c.c. E. Feigenbaum/
To: Computer Science Faculty

From: Robert W. Floyd, Chairman

Subject: Agenda for Faculty Meeting, January 6, 1975

1. Announcement. The Department now has official notification from Gerald J. Lieberman, Associate Dean of H & S, to proceed with our search for an assistant professor and has stated that in the event more than one outstanding candidate is found, serious consideration of an additional appointment will be given, providing funds can be made available. The Dean's Office will also be receptive to a senior appointment should an outstanding candidate become available.

2. Recommendation of degree candidates.

3. Procedures and policies concerning the assignment of TA's to courses. See memorandum of November 19, 1975, to all CSD faculty from Vasek Chvátal, Chairman of the TA/RA Committee.

4. Recommendation to extend Comprehensive Exam deadline for Richard Carr. This recommendation should have been brought up at the June 12, 1975, faculty meeting but for some reason it was not included in the agenda. Mr. Carr wishes to take the Comprehensive Exam this January.
