

Image Manipulation Tools

Use the 'Expand tools' button on the right hand side of your page image to access a range of image manipulation tools for your chosen image.

- You can rotate right and rotate left.
- You can flip the image
- You can change the level of brightness
- You can change the contrast level
- You can alter the colour saturation of the image
- You can move between greyscale and colour on the image
- And you can invert the colours on the image

Finally you can revert to the original image.
