Senior Lecturer: Geoffrey Rothwell
The department’s purposes are to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them the ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in public service, private enterprise, teaching, or research.

The undergraduate program provides an excellent background for those going on to graduate work in the professional schools (for example, business and law) and may also be structured to prepare students for a Ph.D. program in economics. The department’s curriculum is an integral part of Stanford’s programs in International Relations, Public Policy, and Urban Studies.

The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 25 to 30 students are admitted each year.

The faculty represent a wide spectrum of interests and conduct research on a broad range of topics. Most fields of economics are covered, including comparative institutional analysis, econometrics, economic development, economic history, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, and public finance.

UNDERGRADUATE PROGRAMS
BACHELOR OF ARTS

The department established a new curriculum for the undergraduate program, on September 1, 1998, to strengthen students’ quantitative skills and their knowledge of the analytical core of economics.

The total number of units required for the major has increased from 60 to 75. Economics 102 is now required for all majors. The required number of field courses has increased from two to four. There is now greater flexibility in the choice of electives, including upper-division math and statistics.

Of the 75 units required for the major, at least 50 of which must be taken at Stanford, California. Students cannot declare Economics as their major until they have completed Economics 1 with a grade of ‘C+’ or better.

Students who declared Economics as their major prior to September 1, 1998 may opt to complete their Economics major under the old requirements (see the 1997-98 Stanford Bulletin) or under the new requirements listed below.

REQUIREMENTS FOR THE MAJOR (75 units)

Basic Economics Courses (30-32 units)

1. Economics 1 (5 units).
2. Economics 50 (5 units). It is recommended that students satisfy this requirement before proceeding with the rest of the program. Prerequisite: Mathematics 41 or equivalent.
3. Economics 50 (5 units). Prerequisite: 1, Mathematics 41, or equivalent.
4. Economics 51 and 52 (10 units). Requirement ‘3’ must be completed before taking 51 or 52.
5. Economics 102 (5 units). Prerequisites: Economics 50, 51, 80.

Field Courses (must be taken at Stanford, CA) (20 units)—Four courses must be chosen from among Economics 111, 118, 140, 141, 145, 149, 150, 154, 155, 156, 157, 160, 165 (5 units each).

Policy Writing Course (5 units)—Economics 101 (5 units). This course may be taken only after completing Economics 51, 52, 102 and at least two field courses.

Electives (20 units)—Choose from Economics courses numbered up to 189, excluding 90 (190) and 91 (191). Up to 10 units of this requirement may be fulfilled by additional math and statistics beyond that required in the basic economics courses. For example, the Mathematics 50 series; Mathematics 103, 104, 113, 114, 115; or Statistics 116, 200 are eligible.

OTHER REQUIREMENTS

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit.

A grade point average (GPA) of ‘C’ or better must be received for all units applied toward the preceding requirements.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department’s Associate Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements (see the Information Book for Economics Majors). The time limit for satisfactory completion of a course is one year from the date an “incomplete” is given. Students are responsible for seeing that all grades of incomplete are cleared within the time limit.

SAMPLE PROGRAMS

Sample listings of upper-division economics electives may be examined in the department’s Information Book for Economics Majors, available in the Economics Building, room 136. Sample programs are provided for the following areas of emphasis: (1) liberal arts, (2) pre-business, (3) quantitative, (4) international, (5) political economy and regulation, and (6) preparation for graduate school in economics.

MINORS

Note—The curriculum for the minor in Economics was revised effective September 1, 1998 and the total number of units has increased from 30 to 35.

The minor in Economics has two main goals. The first is to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors. The second is to allow students to build basic competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

COURSE WORK

1. Economics 1 (5 units).
2. Economics 50 (5 units). Prerequisites: Economics 1, Mathematics 41 or equivalent (Mathematics 51 may be substituted).
3. Economics 51 (5 units). Prerequisite: Economics 50 or Mathematics 51.
4. Economics 52 (5 units). Prerequisite: Economics 51.
5. Two field courses may be chosen from the following list: Economics 102, 111, 118, 140, 141, 145, 149, 150, 154, 155, 156, 157, 160, 165.
6. One elective from Economics courses numbered up to 198, excluding 90 (190) and 91 (191).

OTHER REQUIREMENTS

If the candidate’s major requires basic Economics courses (1-4 above), then half the units that count toward this minor must be made up by taking additional Economics courses towards the minor under items 5 and 6 above.

At least 20 out of the 35 units for the minor must be taken at Stanford in California.

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit. A grade point average (GPA) of ‘C’ or better must be received for all units applied toward the minor.

Two quarters before degree conferral, students must complete their declaration of the minor no later than the last day of the preceding quarter.
HONORS PROGRAM

The honors program offers an outstanding opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with coursework and the introduction of exceptional quality. Honors students are eligible to participate in an Honors Research Symposium during Spring Quarter, with those nominated for prizes making oral presentations. The honors program requires:

1. Completing all requirements for the major, including Economics 103 or 104 as electives.
2. Achieving a grade point average (GPA) of at least 3.5 for the 75 units required of the Economics major. See details in the Information Book for Economics Majors.
3. Demonstrating completion of those lecture courses (at least two beyond Economics 102, 103, or 104) most relevant for the proposed topic of the honors thesis. (These can be included in the basic 75 units.)
4. Candidates must write an honors thesis in their senior year for up to 10 units of credit (199D). The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of 199D do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors. However, the requirement for Economics 101 may be replaced or substituted as early as possible during the second year.

Juniors interested in the honors program are urged to attend an informal presentation by the honors program director each Winter Quarter. At this meeting, students receive information on organizing an honors project and are given details on the Honor’s College. Prospective candidates for the honors program must submit an application to the department no later than the end of the second full week of the third quarter before graduation (typically Autumn Quarter of the senior year). Also required, later in the same quarter, is a three-page prospectus that must be approved by the thesis adviser.

GRADUATE PROGRAMS

Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate calculus, a course in linear algebra, and a rigorous course in probability and statistics.

MASTER OF ARTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The department does not admit students who plan to terminate their study with the A.M. degree. Students may (but need not) elect this degree in preparation for the Ph.D. degree. A master’s option is also available to Ph.D. candidates from other departments.

Admission—Prospective students must have completed the Stanford requirements for an A.B. in Economics or an equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected. Prospective applicants should submit their credentials together with a plan of study to the Director of Graduate Study for approval.

Requirements—A master’s program must satisfy the following criteria:

1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor’s degree, of which at least 40 units must be in the Department of Economics. Economics courses must include 202, 210, and at least two other 200-level courses. Undergraduate courses must be numbered 105 or higher. No seminar courses numbered 300 or above can be counted.

2. Demonstrating competence in empirical methodology at the level of Economics 270. Normally, this is done by including that course in the program of study.

3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 10 units of credit can be earned for a thesis toward the 45-unit degree requirement.

4. A grade point average (GPA) of ‘B’ must be maintained for all master’s level work. In addition, a grade of ‘B-’ or better must be earned in each of the two graduate theory courses. All courses must be taken for a letter grade.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

Admission to Candidacy for Ph.D.—A student may apply for admission to candidacy when the following minimal requirements are met:

1. Successful results on comprehensive examinations in “core economics” (the examinations based on material from Economics 202, 203, 204, and Economics 210, 211, 212), and “Econometrics,” (the examination based on material from Economics 270, 271, 272).

2. Completing the requirements in two additional fields from the list below or one such field together with a substantial amount of work toward a minor in a related department approved by the Director of Graduate Study. Advanced fields include comparative institutional analysis, econometrics, economic development, economic history, industrial organization, international economics, labor economics, mathematical economics, monetary theory and advanced macroeconomics, and public finance.

Each field listed above can be satisfied by completing two courses, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. All courses (or comprehensive exams, when offered) must be passed with a grade of ‘B’ or better.

3. Completing a “candidacy paper,” normally written in conjunction with one of the special fields selected above.

It is expected that the student will meet, and indeed exceed, the above standard by the beginning of the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the second year. Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After approval, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances.
Further Requirements for the Ph.D. Degree—

1. Additional Course Work: four other graduate-level courses must be completed. One of these must be from the area of economic history unless that field has already been selected above and, in any event, these courses must be “distributed” in such a way that at least two fields not selected above are represented. In addition, if the special fields consist of econometrics together with mathematical economics, the distribution courses must include at least two from outside these areas. With the approval of the Director of Graduate Study, some of the distribution courses may be drawn from a minor subject, for those choosing that option.

2. Teaching Experience: each student must serve as a teaching assistant for at least one quarter. It is strongly recommended that this requirement be satisfied before the final year of residence.

3. Seminar Participation: each student is expected to participate in at least two all-year research seminars by the end of the fourth year of residence. Normally, participation in a seminar requires one or more oral presentations and the submission of a research paper (which, however, need not be completely separate from dissertation research).

4. Ph.D. Dissertation: the process involves selecting a topic, choosing an appropriate adviser, submitting a prospectus (signed by the adviser) outlining proposed research, selecting a three-member reading committee (usually all from the Department of Economics, although exceptions can be made under certain circumstances), passing the University oral examination at which these three faculty (and two other members of the Academic Council) ask questions about the completed research, and submitting a final draft of the work signed by all members of the reading committee. The student is advised to initiate this process as early as possible.

Ph.D. Minor

To be recommended for the Ph.D. degree with Economics as a minor subject, a student must qualify in three fields of economics, at least one of which must be in the "core economics" sequence. Qualification in these fields is tested in the department’s comprehensive written examinations given annually. The standard of achievement in these examinations is the same for minor as for major candidates.

Joint Degree Programs

The Department of Economics and the School of Law offer a joint program leading to the Ph.D. in Economics and the J.D. in Law. See the Stanford University bulletin Law School for descriptions of its participation in the joint program.

To qualify, the student’s program objectives must clearly justify such a joint program. Decisions are made by the Director of Graduate Study. A student’s program in economics must satisfy the same standards as the Ph.D. degree in Economics taken with a minor in Law. It is expected that dissertation research will cross department lines and that members of the dissertation committee will be drawn from both faculties.

Students normally spend the first year full time in economics or in law and the second year full time in the other department. After the second year, courses in economics and law may be pursued simultaneously.

Other joint programs may be arranged; for example, the Ph.D. in Economics combined with one or two years of study in the School of Law, leading either to the nonprofessional Master of Legal Studies (M.L.S.) degree or the nonprofessional Master of Jurisprudence (J.M.). See the bulletin Law School for the requirements. Conversely, a student taking the J.D. in the School of Law may apply for an A.M. in Economics.

Fellowships and Assistantships

The department awards a number of fellowships for graduate study. Some first-year students are awarded full fellowships, including a stipend and tuition. All students whose record justifies continuation in the program may be assured support for the second through fourth years in the form of employment as a teaching or research assistant. These half-time appointments provide a stipend and tuition allowance. Entering students are not normally eligible for research or teaching assistantships.

Applications should be submitted before January 1 to the department admissions committee.

Courses

(WIM) indicates that the course meets the Writing in the Major requirements.

5 units, Aut (Clerici-Arias)
Win (Bernheim)
Spr (Wright)

50. Economic Analysis I—(Graduate students register for 151.) The neoclassical theory of consumer and firm behavior under perfect competition, partial equilibrium analysis, and the role of markets and prices in a decentralized system. Economic tools are developed concurrently with mathematical techniques from multivariable calculus, including partial differentiation and constrained and unconstrained optimization. Students who have not taken and passed Mathematics 51 take a diagnostic math test covering Mathematics 41 (or equivalent) during the first week of class; the results may preclude some students and require others to register concurrently for 50M. Prerequisite: 1; Mathematics 41 (or equivalent). Recommended: Mathematics 51. GER:2c (DR:4)

5 units, Aut (Bajari)
Win (Hammond)
Spr (Rosston)

50M. Economic Analysis IA—(Graduate students register for 150M.) Only for students registered in 50. Math tutorial complements 50 during the first weeks of the quarter. Students may be required to take this tutorial concurrently with 50 as a result of the diagnostic test. Optional for students who have successfully completed Mathematics 51. Prerequisite: Mathematics 41. Corequisite: 50.

2 units, Win (Russell)
Spr (Willman)

51. Economic Analysis II—(Graduate students register for Welfare Economics 151.) Introduction to neoclassical analysis of general equilibrium, welfare economics, imperfect competition, externalities and public goods, intertemporal choice and asset markets, risk and uncertainty, game theory, adverse selection and moral hazard. Multivariable calculus is used. In Autumn and Winter Quarters, all students must have successfully completed either Economics 180 or Mathematics 51. Prerequisite: 50.

5 units, Aut, Win (Frankel)
Spr (Schmidt)

52. Economic Analysis III—(Graduate students register for 152) Growth and fluctuations in the economic system as a whole. National income accounts and aggregate relationships among stocks and flows in markets for goods, labor, and financial assets. Inflation and unemployment. The role of macroeconomic policies in the short and long run. Prerequisite: 50.

5 units, Aut (D. Krueger)
Win (Jones)
Spr (Horvath)

80. Introduction to Statistical Methods (Postcalculus) for Social Scientists—Introduction to statistical methods relevant to the social sciences. Emphasis is on description and examples of the use of statistical techniques. Probability: basic rules of probability, conditional probability, Bayes’ rule, discrete and continuous probability distributions.)
Statistical inference: point estimation, tests of hypotheses, confidence intervals, large-sample methods. Data analysis: linear regression techniques and diagnostics. Statistical computer packages (e.g., Minitab) are used for inference and data analysis. Autumn, section 2, (Switzer) uses Web based tools; limited enrollment. See www.stat/teaching/statl90.

Prerequisites: Mathematics 41 or equivalent, consent of instructor. GER:2c (DR:4)
3-5 units, Aut, Spr (Staff)
Win (Amemiya)

90. Introduction to Financial Accounting—(Graduate students register for 190.) Develops the students' ability to read, understand, and use corporate financial statements. Oriented towards the use of financial accounting information (rather than the preparer), and emphasizes the reconstruction of economic events from published accounting reports. 5 units, Aut, Spr (Staff)

91. Introduction to Cost Accounting—(Graduate students register for 191.) The use of internal financial data for managerial decision making. 5 units, Win (Staff)

99Q. Stanford Introductory Seminar: State, Market, and Development—Preference to sophomores. Development problems in Asia, Latin America, and Africa; development thinking by economists; and the policy relationships between the public and private sector. Focus is on the analytical techniques used by development economists. 5 units, Aut (Meier)

5 units, not given 1999-2000

101. Economic Policy Analysis—Develops skills in economic policy analysis, writing, and oral presentation. Topics vary with instructor. Limited enrollment. Prerequisites: requirements 4 and 5 above. (WIM) 5 units, Aut (Rosston, Topper, Haak)
Win (Pauly, Haak, Gould)
Spr (Uhlig, Aturupane, Perry, Van Biesebroeck)

102. Introduction to Econometrics—Descriptive statistics. Regression analysis. Hypothesis testing. Analysis of variance. Heteroscedasticity, serial correlation, errors in variables, simultaneous equations. Prerequisites: 51, 80 or Statistics 60 (or equivalent). Recommended: computer experience. 5 units, Aut (Wolak)
Win (Rothwell)
Spr (Goldberger)

103. Applied Macroeconomic Analysis—The construction and use of econometric models for analyzing macroeconomic phenomena. Students complete individual projects and core material. Topics vary with the instructor. Limited enrollment. Prerequisites: 52, 102. 5 units, Aut (Uhlig)

104. Applied Microeconomic Analysis—Develops skills in interpreting and conducting econometric analysis of microeconomic data. Topics vary with instructor. Students complete projects and core material. Limited enrollment. Prerequisites: 51, 102. 5 units, Win (Pistaferti)
Spr (Hall)

106. The World Food Economy—(Same as Food Research 103/203.) The interrelationships among food, population, resources, and economic development. The role of agricultural and rural development in achieving economic and social progress in low-income nations. Emphasis is on the public sector decision making as it relates to food policy. 5 units, Win (Falcon, Naylor)

111. Money and Banking—The structure of financial markets. The monetary system in the U.S. and other countries. The microeconomics of banking, and the macroeconomic role of banks. Theories of money demand, monetary policy, and monetary models of the macro-economy. Prerequisites: 51, 52. 5 units, Aut (Chan)
Win (Kumhof)

113. Technology and Economic Change—The economic causes and consequences of technological change. The historical experience of advanced industrial countries and the more recent experience of less developed economies. Topics: the origins of modern industry in the U.S. and Europe, technology and the growth of large-scale organizations, late-comers to industrialization (Japan and newly industrializing countries), economic growth and slowdown in mature industrial countries, and present concerns and future prospects (the influence of technology on employment, civilian "spillover" from military R&D, and coping with rapid technological change). GER:3b (DR:9)
5 units, Win (Rosenberg)

115. European Economic History—Economic changes and growth in Western Europe from the medieval period to the present. The transformation of Europe from an economically and culturally backward part of the world to the center of the world economy pre-WW I. Topics: attitudes toward technology and science, demography, institutional changes, politics and military technology, and production technology. GER:3b (DR:9)
5 units, Win (Greif)

116. American Economic History—The history of the U.S. economy from colonial times to the present. The application of economic analysis to historical issues, and the role of historical context in economics. Topics: American economic growth in comparative and international perspective, the economics of slavery and regional divergence; the social and cultural aspects of economic growth; recent U.S. economic performance in historical perspective. Prerequisite: 1. GER:3b,4b (DR:3 or 9)
5 units, Aut (Wright)

118. The Economics of Development—The economic problems and policy concerns of developing economies. Theories of economic growth and development, inequality and poverty, agriculture and rural development, fertility, education, the economic role of family. Focus is on economic models rather than case studies. Prerequisite: 51. GER:4a (DR:2)
5 units, Spr (Chan)

120. Socialist Economies in Transition—Privatization, restructuring, and institutional change in Eastern Europe and the former Soviet Union. Analysis of property rights, corporate governance, incentives, and resource allocation in socialist and transitional economies. Emphasis is on liberalization and privatization policies (including mass and voucher programs) as the primary instruments to induce changes in behavior. 5 units, Spr (Earle)

121. The Economics of Greater China and the World—The structure and development of the economy of the People's Republic of China, Taiwan, and Hong Kong. Topics: interregional and international trade;
124. The Economy of Japan—Analysis of the economic institutions of the Japanese economy in comparative and historical perspective. Firms, the employment system, corporate governance and financial institutions, the political economy. Elementary applications of game theory and other analytical tools. Prerequisite: 51. GER:4a (DR:2)
5 units, Spr (Aoki)

125. Introduction to Finance—(Same as Business F221, Industrial Engineering 236.) The foundations of finance, with applications in corporate finance and investment management. The process of valuation, which is central to many of the major financial decisions made by corporate managers and investors. Topics: criteria for making investment decisions, relationships between risk and return, market efficiency, and the valuation of derivative securities (e.g., options). The major financial instruments issued by corporations including short and long term debt, equity, and convertible securities. Conceptually rigorous; cases illustrate applications of the main concepts. Prerequisites: 1 or Engineering 60, and strong analytical background, or consent of instructor; familiar with basic probability and statistics concepts, including random variables, expected returns, variance, and covariance.
5 units, Win (Admati)

126. Comparative Economic Institutions: The Economics of Transition—The problems in building new economic institutions in countries during the transition from plan to market resource allocation. Topics: economic history and theory, law and economics, and comparative economic systems. The creation, evolution, and consequences of alternative economic institutions. Recent experiences in Eastern Europe, Russia, and China are analyzed and compared. Prerequisite: 51.
5 units, not given 1999-2000

127. Information and Incentives—Focus is on the provision of incentives in situations where one part has more information than another. A part may have better information about things that it controls (moral hazard), or about things that are outside of its control (adverse selection). In the former, well-structured contracts give the party incentives to exercise its control in a mutually beneficial way. In the latter, contracts should give the party incentives to reveal its private information truthfully. The general structure of incentive problems and the design of contracts and institutions to deal with such problems. Applications (time permitting): executive and employee compensation in firms, sharecropping, financial contracts and credit rationing, insurance, markets with unobservable quality, monopolistic price discrimination, regulation of natural monopolies, income taxation and redistribution, the provision of public goods, and auctions. Prerequisite: 51.
5 units, Spr (Segal)

128. Risk and Insurance—Insurance affects a large part of the American economy: life insurance and pension funds provide financial capital for the private sector; health insurance funds the 14 percent of GNP spent on medical services. Economic analysis, theoretical and empirical, provides an understanding of how the insurance markets function, how and why they are regulated, and how they might be improved. The organization of the various parts of the insurance industry and the public policy issues concerning earthquake, health, auto, and environmental risk insurance. Insurance-like devices consumers use to affect risk, such as product guarantees, or preventive and precautionary activities.
5 units, Spr (Pauly)

139D. Directed Reading and Research
1-10 units (Staff)
151. Economic Analysis II—See 151.

152. Economic Analysis III—See 152.

154. Economics of Legal Rules and Institutions—Description and analysis of the existence, design, and consequences of legal rules. Topics: common ideas that run through diverse areas of law, including individual rationality, economic efficiency, conventional and Caisson analysis of the existence, design, and consequences of legal rules. Prerequisite: 51.

5 units, Aut (Polinsky)

155. Environmental Economics and Policy—(Same as Earth Systems 112.) The economic sources of environmental problems and the alternative policies for dealing with them (technology standards, emissions taxes, and marketable pollution permits). An evaluation of the policies addressing regional air pollution, global climate change, water allocation in the Western U.S., and the use of renewable resources. The connections between population growth, economic output, environmental quality, and human welfare. Prerequisite: 50.

5 units, Spr (Staff)

156. Economics of Health and Medical Care—(Graduate students register for 256; same as Health Research and Policy 256, Medical Information Sciences 256.) Graduate students with research interests should take 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: 51 or consent of instructor. Recommended: some background in statistics or mathematics.

5 units, Win (McClellan)

157. Imperfect Competition—Extends and develops the basic tools of price theory in the context of U.S. industrial market structure. The application of theoretical models and concepts to the behavior of firms and markets when the conditions of perfect competition are not satisfied. Topics: monopoly, oligopoly, monopolistic competition, concentration measures, international competition, advertising, innovation, externalities, economies of scale, and the role of information in markets. Prerequisite: 51.

5 units, Win (Bajari)

158. Antitrust and Regulation—The history, economics, and legal background of the institutions under which U.S. industry is subject to government control. Topics: antitrust law and economics; the economics and practice of public utility regulation in the communications, transportation, and energy sectors; and the effects of licensing. Emphasizes application of economic concepts in evaluating the performance and policies of government agencies.

5 units, Aut (Noll, Wolak)

160. Game Theory and Economic Applications—Mathematically rigorous introduction to game theory and its applications to economics. Topics: strategic and extensive form games, Nash equilibrium, subgame-perfect equilibrium, Bayesian equilibrium, and Perfect Bayesian Equilibrium. The theory is applied to repeated games, auctions, and bargaining. Examples from economics and political science. Prerequisites: 51 and one rigorous course in calculus, or consent of instructor.

5 units, Aut (Carter)

162. Introduction to Dynamic Economics—The dynamics of the allocation process. Calculus required; develops the mathematical tools needed for dynamic analysis. Topics: intertemporal consumer choice and theory of savings, theory of dynamic efficiency, models of aggregate economic growth and capital accumulation, theories of interest and pricing of capital assets, productivity and growth, intergenerational allocation. Prerequisites: 51 or equivalent, 180.

5 units, Win (Razin)

Spr (Kunhof)

165. International Economics—Comparative advantage in production and trade among nations; trade policy; increasing returns, imperfect competition and trade; the international monetary mechanism; domestic monetary, fiscal, and exchange rate policies and their relationship to foreign trade; global financial crises and trade. Prerequisites: 1, 51, 52.

5 units, Win (Razin)

Spr (Kunhof)

167. Economics of European Integration and Monetary Union—The economics of the European Community and the internal market. Analysis of current competition, transportation, and factor market policies, including the problems of agriculture and unemployment. Fiscal harmonization and mercantilist rivalry. European Monetary Union (EMU): genesis, implementation, and consequences of a common currency and central bank. Foreign exchange and foreign trade. Prerequisites: 51, 52, or equivalents.

5 units, not given 1999-2000

170. Intermediate Econometrics I—(Same as 270.)

5 units, Aut (Amemiya)

171. Intermediate Econometrics II—(Same as 271.)

5 units, Win (Goldberger)

172. Intermediate Econometrics III—(Same as 272.)

5 units, Spr (MacCurdy)

181. Optimization and Economic Analysis—The development of optimization techniques, including calculus, linear and nonlinear programming, the calculus of variations, and control theory. Emphasis is on concepts and results rather than techniques and proofs. Examples: static and dynamic theories of the household and the firm, and problems in aggregative planning and control. Prerequisites: 51 and 180, or Mathematics 43 or equivalent.

5 units, Spr (Gonzalez de Lara)

190. Introduction to Financial Accounting—See 90.

191. Introduction to Cost Accounting—See 91.

198. Junior Honors Seminar

5 units, Spr (Rothwell)

199D. Directed Reading and Research—Honors. In-depth study of an appropriate question and completion of a thesis of very high quality. Normally written under the direction of a member of the Department of Economics (or a member of some closely related department). See description of honors program. Register for at least 1 unit for at least one quarter. Meets first week of Autumn Quarter (see Stanford Daily for details).

1-10 units, Aut, Win, Spr (Rothwell)

PRIMARILY FOR GRADUATE STUDENTS

350. A.M. Thesis

by arrangement

400. Ph.D. Dissertation

by arrangement

A. CORE ECONOMICS

202. Core Economics I—Theory of the consumer and the implications of constrained maximization; uses of indirect utility and expenditure functions; theory of the producer, profit maximization, and cost minimi-
203. Core Economics III—Noncooperative game theory including normative and extensive forms, solution concepts, games with incomplete information, and repeated games. Externalities and public goods: an introduction to mechanism design. The theory of imperfect competition: static Bertrand and Cournot competition, dynamic oligopoly, entry decisions, entry deterrence, strategic behavior to alter market conditions.
5 units, Aut (Rangell)

204. Core Economics V—The theory of resource allocation over time, competitive equilibrium and intertemporal efficiency, capital asset pricing models, equilibrium with securities, pricing of securities and arbitrage. Overlapping generations models with incomplete market structure and applications. Prerequisite: 203.
5 units, Spr (Kurz)

5 units, Aut (Sargent)

211. Core Economics IV—Monetary theory: evidence on the nature of economic fluctuations, the role of money (overlapping generations, cash in advance, money in the utility function), the dynamic impact of changes in money on the economy, the natural rate of unemployment and job creation/destruction, exchange rate determination, international transmission of money, dynamic stochastic general equilibrium models. Macroeconomic policy: theoretical rationale or central bank independence, time inconsistency, the impact of public debt, rules vs. discretion, interest rate vs. money rules, international monetary policy coordination, rational expectations econometric policy evaluation.
5 units, Win (D. Krueger)

212. Core Economics VI—The theory of contracts, emphasizing contractual incompleteness and the problem of moral hazard. Incentive regulation. Competition with imperfect information, including signaling and adverse selection. Investment theory and empirics, including adjustment costs and the q theory; consumption theory and empirics, focusing on the life-cycle model; and the labor market.
5 units, Spr (Tadelis, Hall)

301A, B, C. Workshop in Microeconomics
10 units (Staff)

310A, B, C. Workshop in Macroeconomics
10 units (Staff)

B. ECONOMIC DEVELOPMENT

To receive comprehensive credit in the field, students must complete any two from 214, 215, or 216 and submit an additional paper. Students wishing to do research in the field are strongly advised to take 267, as well as supporting work in international economics and comparative institutional analysis.

214. Microeconomic Issues in Economic Development—Microeconomic problems of developing economies, emphasizing the rural agrarian. Topics: determination of income, models of savings, role of the household, and issues relating to health, nutrition, and education. Emphasis is on empirical tests of theoretical models and empirical evidence on these issues.
5 units, Spr (A. Krueger, Rosenzweig)
the growth and distribution of output, demographic trends, technological
and organizational changes in trade and industry, and the changing
formal and informal institutions governing political and economic activ-
y.
5 units, Win (Greif)

228. Institutions in Economic History: Form, Function, and Evolu-
tion—See 294.
5 units, not given 1999-2000

325A,B,C. Workshop in Economic History
10 units (Staff)

D. MONETARY THEORY AND ADVANCED
MACROECONOMICS

Requirements for the field are successful completion of 233 and 234.

233. Advanced Macroeconomics I—Topics in the theory of fluctua-
tions and growth.
5 units, Win (Paal)

234. Advanced Macroeconomics II—Topics in the theory of fluctua-
tions and growth.
5 units, Spr (Sargent)

E. PUBLIC FINANCE

To receive credit for the field, students must complete 241 and 242
by passing the final examinations, and submit an acceptable research
paper on a topic approved by the instructor for either course.

241,242. Public Finance and Taxation I and II—Normative and
positive tax policy. Tax incidence and efficiency, corporation financial
policy, expenditure evaluation, social insurance, and public goods.

241. 5 units, Win (Bernheim, Rangel)
242. 5 units, Spr (McClellan, Shoven)

243. Economics of the Environment—Upper-division undergraduates
may attend with consent of instructor. Analysis of the sources of
environmental problems in market economies and of policy options for
addressing these problems. Topics: choice of policy instruments (taxes,
standards, tradeable permits), environmental risk assessment, valuation
of non-marketed commodities (environmental amenities, biodiversity),
environmental policy making under uncertainty, the optimal mix of
corrective and distortionary tax instruments, and the dynamics of eco-
omic growth in the presence of non-reproducible natural resources.

5 units, not given 1999-2000

341A,B,C. Workshop on the Economics of the Public Sector—Issues
in measuring and evaluating the economic performance of government
tax, expenditure, debt, and other policies; their effects on private eco-
nomic activity, saving, investment, labor supply, etc.; alternative poli-
cies and methods of evaluation. Workshop format combines student
research, faculty presentations, and guest speakers. Prerequisite: 241 or
consent of instructor.
10 units (Staff)

354A,B,C. Workshop on Economics of Factor Markets
6 units, Win, Spr

F. ECONOMICS OF LABOR

To receive credit for the field, students must successfully complete
two from 246, 247, and 248.

246. Labor Economics I—The demand for workers and hours of work,
isubstitution among different types of labor in production, technologi-
change, adjustment costs, restrictions on layoffs. The supply of labor,
hours of work, participation, life-cycle models of behavior, welfare
programs. Wage differentials by schooling, age, cohort, gender, and race.

5 units, Win (Greif)

247. Labor Economics II—Econometric modeling of economic behav-
ior, including discrete choice and labor supply. Life cycle decision-
making. Applications of empirical duration analysis. Human capital and
wage determination.
5 units, Spr (Pistaferri)

248. Health, Medical Care, and Aging—Introduction to current re-
search and policy issues in the economics of health, medical care, and
aging. Topics: technological change; demand for medical care; behav-
ior of physicians, hospitals, and health plans; analysis of insurance markets;
effects of health and health insurance on labor supply; health risks and
individual behavior; economic demography; political economy of the
health care sector. Emphasis is on the development and estimation of
microeconomic models.
5 units, Win (McClellan)

345A,B,C. Workshop on Economics of Factor Markets
10 units (Staff)

G. ECONOMICS OF INDUSTRY

To receive credit for the field, students must successfully complete
257 and 258 and submit one research paper, the subject of which has been
approved in advance by one of the faculty teaching 257, 258, or 260.

256. Economics of Health and Medical Care—See 156.

257,258. The Economics of Industry, Regulation, and Firm Organi-
zations I and II—Theoretical and empirical analyses of the determi-
nants of market structure; firm behavior and market efficiency in oligop-
olies; theory and practice of pro-competitive government policies; the
relationship of product quality and technological innovation to market
structure; government regulation of business; public utilities, regulated
competition, licensing, product and worker safety, environmental pro-
tection; the political economy of business policies.

257. 5 units, Aut (Bajari)
258. 5 units, Win (Noll, Wolak)

260. Special Topics in Industrial Organization and Regulation—
Focused, in-depth study of issues of current research and policy interest:
empirical tests of oligopoly theories; dynamics of change in regulatory
policy; theory of economic institutions; antitrust status of joint ventures;
and use of capacity, innovation, and product variety as a barrier to entry.
Significant research issues that remain unresolved and promising ways
to attack them.
5 units, Spr (Bernheim, Noll, Wolak)

262. Experimental Methods of Institutional Analysis—Use and de-
dsign of laboratory methods to test theories of individual behavior in
various institutional settings, including markets, small groups, and
political processes. Reading/lectures on methods of experimental re-
search and the current state of research findings, and individual research
projects in which students design and run an experiment.
3 units, not given 1999-2000

303A,B,C. Workshop in the Economics of Science and Technology—
Sponsored by the department and the Center for Economic Policy
Research. Focus is on applied studies and policy issues relating to the
resource allocation and organization of basic science and engineering
research, commercialization of scientific knowledge, diffusion of tech-
nological and organizational innovations, and impacts on productivity
and economic welfare in the U.S. and other industrially advanced
economies.
10 units, Aut, Win, Spr (Staff)
355A,B,C. Workshop in Industrial Organization, Regulation, and Applied Microeconomics—Working seminar on current research in the field by visitors, presentations by students, and structured discussion of recent papers. Students are required to write an original research paper, make a formal seminar presentation, and lead a structured discussion.

10 units, Aut, Win, Spr (Staff)

358A,B,C. Workshop in Political Economics and Collective Choice—Offered in collaboration with the Graduate School of Business and the Department of Political Science. Multidisciplinary working seminar on current topics in the mechanisms of social choice, political processes, and the politics of economic policy. Participants are required to undertake an original research project, approved by the instructors, and to make an oral presentation.

10 units, Aut, Win, Spr (Staff)

H. INTERNATIONAL ECONOMICS

To receive comprehensive credit in this field, students must complete 265 and 266 and one additional paper. (Special topics course 267 is strongly recommended.) For students doing research in the field, further supporting courses are found in the fields of economic development, industrial organization, and public finance.

5 units, Aut (Kunihof)

5 units, Win (A. Krueger, Razin)

5 units, Spr (A. Krueger, Razin)

365A,B,C. Workshop in International Economics 10 units (Staff)

I. ECONOMETRICS

All Ph.D. students are required to take 270, 271, and 272. To receive credit in the econometrics field, students must complete 273, and either 274 or 275.

270. Intermediate Econometrics I—Probability, random variables, and distributions; large sample theory; theory of estimation and hypothesis testing. Prerequisites: Math and knowledge of probability at the level of Chapter 2, Paul G. Hoel, Introduction to Mathematical Statistics, 5th ed.

5 units, Aut (Amemiya)

271. Intermediate Econometrics II—Linear regression model, relaxation of classical-regression assumptions, simultaneous equation models, linear time series analysis. Prerequisite: 270.

5 units, Win (Goldberger)

5 units, Spr (MacCurdy)

5 units, Aut (Wolak)

274. Limited Dependent Variables—Discrete choice models; Tolls models; Markov chain and duration models. Prerequisite: 273 or consent of instructor.

5 units, Win (Amemiya)

5 units, Spr (Horvath)

276. Special Topics in Econometrics—Possible subjects: robust estimation, stochastic control, prediction theory, Bayesian analysis, face analysis, pooling of sample series and cross-section data. Prerequisite: 271.

5 units, not given 1999-2000

370A,B,C. Workshop in Econometrics 10 units (Staff)

J. MATHEMATICAL ECONOMICS

To receive credit in the mathematical economics field, students must complete two courses from 280, 281, 282, 284, 286, or 287.

280. Welfare Economics—Social choice theory with and without interpersonal comparisons, Pareto efficiency with public goods, externalities, and non-convexities, potential Pareto improvements. private information, incentive constraints, and mechanism design. Welfare measurement, cost benefit analysis, and analysis of economic policy reform.

5 units, not given 1999-2000

5 units, not given 1999-2000

5 units, Spr (Hammond)

5 units, Win (Kurz)

286. Game Theory and Economic Applications—Non-cooperative games, games in extensive and normal forms, games with incomplete information, Nash equilibrium and refinements, repeated games, signaling games, non-Nash solution concepts. Cooperative games, the characteristic function and core. Applications and current selected research.

5 units, Win (Hammond)

with infinitely-lived agents. Prerequisites: 202, 203, 204, or consent of instructor.
5 units, Aut (Kubler)

288. Computational Economics—Computational approaches to solving economic problems. Overview of numerical analysis. Economic problems in computationally tractable forms, and the use of numerical analysis techniques to solve them. Examples of problems solved numerically (general equilibrium models, optimal taxation, dynamic programming, economic growth, life-cycle models, intervention in commodity markets, Bayesian econometrics, equilibria of dynamic and repeated games, and nonlinear rational expectations equilibria with asymmetric information). Prerequisite: equivalent of first-year graduate core economics sequence.
5 units, not given 1999-2000

290. Multiperson Decision Theory—Review of working papers, emphasizing methods of game theory and topics in mathematical economics that use game-theoretic models. The effects of differences in information, limitations on observability and contracts, etc., on strategic behavior. Prerequisites: two courses from the Choice Theory/ Mathematics Economics sequences, or consent of instructor.
5 units, Spr (Milgrom)

385A, B, C. Workshop in Mathematical Economics
10 units (Staff)

386. Interdisciplinary Seminar on Conflict Resolution—(Same as Law 611, Engineering-Economic Systems and Operations Research 489, Psychology 283.) Addresses problems of conflict resolution and negotiation from an interdisciplinary perspective. Presentations by faculty and by scholars from other universities.
1-2 units, Win (Arrow, Ross, Wilson, Alexander)

K. COMPARATIVE INSTITUTIONAL ANALYSIS

To receive credit for this field, students are required to take 291 and then select at least one of: 292, 293, or 294. Students expecting to make Comparative Institutional Analysis their primary field are also required to take the workshop (391).

291. Contracts and Organizations—General issues and recent developments in the theory of contracts. Topics: mechanism design, hidden information and hidden action models; contracting with many agents; problems with dynamic agency, renegotiation and commitment; incomplete contracts, and applications of contract theory to theories of the firm and organizational design. Prerequisites: 202 and 203, or consent of instructor.
5 units, Win (Segal)

292. Comparative Analysis of Institutions and Organizations—Game theoretic (classic and evolutionary analysis of institutions as multiple equilibria. Norms, social embeddedness, organizations as conventions, contract enforcement and corporate governance mechanisms, and states. Institutional complementarities and diachronic institutional linkage.
5 units, Spr (Aoki)

293. Reform and Transition in Socialist Economies—Applications of organization theory to problems in reforming socialist economies. Emphasis is on understanding problems in the creation of market institutions in China, Eastern Europe, and the territory of the former U.S.S.R. Theoretical topics: coordination, incentives, commitment problems, and contract enforcement are related to issues in privatization, the building of fiscal and financial institutions, international trade, and foreign investments.
5 units, not given 1999-2000

294. Institutions and Organizations in Historical Perspective—(Same as 228.) Description and analysis of institutions and organizations in the Western historical experience, emphasizing the formative period from the 11th to the 18th centuries. Discussion of the formation, function, and evolution of institutions highlights alternative conceptual frameworks—neoclassical, transaction cost economics, institutionalism, and Marxism and neo-Marxism, while utilizing game theory, mechanism design, contract theory, etc. Topics: institutions related to trade organization, the organization of production, feudalism, mercantilism, and the state.
5 units, not given 1999-2000

391A, B, C. Seminar in Comparative Institutional Analysis
10 units (Staff)

OVERSEAS STUDIES

The following courses are approved for the Economics major and taught overseas at the campus indicated. Students are encouraged to discuss with their major advisers on campus which courses would best meet individual educational needs. Descriptions can be found in the “Overseas Studies” section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

BERLIN
129X. One Market, One Money, One Europe?
4-5 units, Win (Brückner)

FLORENCE
167X. The Integration of Europe—(Same as Overseas Studies 178F.)
4-5 units, Aut (Spini)

MOSCOW
120X. Economic Reform and Economic Policy in Modern Russia
5 units, Aut (Mau)

OXFORD
168X. Path Dependence of Science and Technology since the Industrial Revolution
5 units, Spr (David)

PUEBLA
112X. Economies of Emerging Financial Markets
5 units, Win (Castañeda)

114X. Developmental Macroeconomics: The Mexican Case—(Same as Economics 118X.)
5 units, Win (Cárdenas)

SANTIAGO
129X. Latin America in the International System—(Same as Economics 163X.)
4-5 units, Win (Rojas)

130X. Latin American Economies in Transition—(Same as Economics 165X.)
5 units, Aut (Muñoz)

ENGLISH

Emeriti: (Professors) W. B. Carnochan, Charles N. Fifer, Albert J. Gel-
Chair: Terry Castle
Vice Chair: Robert M. Polhemus
Director of Creative Writing Program: Eavan Boland
Director of Program in Writing and Critical Thinking: Andrea A. Lunsford (Spring), Ronald Rebholz (Autumn, Winter)
The Department of English offers work in English and American literature, other literature written in English, English philology, creative writing, and expository writing. In connection with these programs, it maintains the William Dinsmore Briggs Memorial Library for the use of graduate students and the Jones Room as a center for its work in Creative Writing.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The English major is designed to provide students with both an understanding of the historical development of English literature and an appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

PREPARATION FOR THE MAJOR

Before declaring an English major, students should have satisfied the University writing requirement.

The following departmental requirements are in addition to the University’s basic requirements for the bachelor’s degree. Any two of the requisite courses may be taken on a satisfactory/no credit basis at the discretion of the instructor, but students intending to go on to graduate school should weigh the fact that a grade of satisfactory provides little evidence of their abilities.

MAJOR PROGRAMS OF STUDY

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several major programs of study in English. Each of these has different objectives and requirements; students should consider carefully which major corresponds most closely to their personal and professional objectives.

MAJOR IN ENGLISH

This program provides for the interests of students who wish to understand the full variety and historical development of English and American literature over the centuries. It is recommended to prospective candidates for admission to graduate schools of English. Of particular value to students selecting this major are courses with broad historical perspectives on literature and language and courses which concentrate on major writers. Students who declared an English major prior to Autumn Quarter, 1999 must choose one 5-unit course from each of the nine areas B-H and P. Students declaring an English major during Autumn Quarter, 1999, or thereafter must choose one 5-unit course from each of the nine areas A-H and P. A student who took a 3-unit sub-100 English course while still a non-major may count it retroactively towards the elective requirement for the major. Only one such course may be applied to the major. If possible, students should take courses in chronological sequence.

At least one of the courses satisfying the major must be English 181-183 (Seminars for English Majors) or 196 (Honors Seminar) or an English seminar offered in the Stanford in Oxford program at St. Catherine’s College. Other English courses which are taught in a seminar format require a substantial amount of critical writing may be approved by the Director of Undergraduate Studies on a case by case basis. Students urged not to postpone satisfying this requirement until late in their major career. Undue tardiness may result in a delay of degree conferral.

In addition, students who declared an English major prior to Autumn Quarter, 1999 must elect three additional courses from among those offered by the Department of English (excluding only English 1-2-3, 74-9, and advanced composition courses). Students declaring an English major during Autumn Quarter, 1999, or thereafter must elect two such courses. In place of one of these elective courses, students may choose one upper-division course in a foreign literature read in the original language.

Students may apply as many as four English courses taken at other approved universities towards their major.

Foreign Language Requirement—Students declaring an English major during Autumn Quarter, 1996, or thereafter are not required to demonstrate proficiency in a foreign language at a higher level than that mandated by the University. However, students who plan to study English literature at the graduate level should be aware that advanced reading skills in one or more foreign languages enhance their chances of admission to and success in most Ph.D. programs.

Students who declared English prior to Autumn Quarter, 1996 must pass a fourth quarter language other than a “conversation” course (for example, French 22) or demonstrate equivalent knowledge (that is, a placement exam). For information about placement exams, contact individual language departments. Students who take a placement exam should ask the coordinator in the department administering the exam to send official verification of exam results to the undergraduate English coordinator.

EMPHASES IN THE ENGLISH MAJOR

English with a Creative Writing Emphasis—This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or fiction. Students must take a total of twelve (those declaring an English major prior to Autumn Quarter, 1999) or thirteen (those declaring an English major during Autumn Quarter, 1999, or thereafter) courses offered through the Department of English and the Program in Creative Writing. Students declaring an English major prior to Autumn Quarter, 1999 must choose one course from each of the eight areas B-H and P (those declaring an English major prior to Autumn Quarter, 1999) or the nine areas A-H and P (those declaring an English major during Autumn Quarter, 1999, or thereafter) and fulfill the seminar requirement.

In addition, they must take four courses specifically designed for either the fiction or the poetry concentration. Fiction writers must first take English 90 (Fiction Writing), then two quarters of 190 (Intermediate Fiction Writing) or 290A (Advanced Fiction Writing), and 137 (Development of the Short Story). Poets must first take English 92, then two quarters of 192 (Intermediate Poetry Writing) or 292 (Advanced Poetry Writing), and one course in poetry in addition to the course that fulfills area requirement P (for students declaring an English major during Autumn Quarter, 1999, or thereafter, English 150 is the only course which...
satisfies Area P), to be approved by a poetry instructor in the Creative Writing program. Courses taken to satisfy an area requirement cannot also satisfy a Creative Writing requirement. English 198 or tutorials taken elsewhere (such as tutorials in the Overseas Studies Program) may not be substituted for required courses. Students should note that they cannot anticipate completing the Creative Writing emphasis until they have been accepted in either 190 or 192.

Admission to English 190, 192, 290, 290A, and 292 is by consent of the instructor and is based on the quality of the student's work. Admission to a single quarter of 190 or 192 does not guarantee admission to a second quarter of 190 or 192. Students should submit a manuscript to the Creative Writing office by the last day of the preceding quarter, and in the case of Autumn Quarter, no later than one week before the beginning of the quarter. Students not admitted to the intermediate courses may take the introductory course a second time.

English with Interdisciplinary Emphasis—This major is intended for students who wish to combine the study of literature of one broadly defined historical period with an interdisciplinary program of courses relevant to that literature. Students are required to fulfill the language and seminar requirements listed under the major in English and to take a total of fifteen (students who declared an English major prior to Autumn Quarter, 1999) or sixteen (those declaring an English major during Autumn Quarter, 1999, or thereafter) courses distributed as follows:

1. One course in area P, Poetry and Poetics.
2. Five courses in one of the two areas of emphasis:
   a) Medieval and Renaissance Literature: students who declared an English major prior to Autumn Quarter, 1999 must take one course in each of the areas A, B, C and D and both English 111 and 112*. Students declaring an English major during Autumn Quarter, 1999, or thereafter must take one course in three of the areas A, B, C, and D and both English 111 and 112*.
   b) English and American Literature from the Enlightenment to the Present: students must take one course in each of the areas E, F, G, and H and English 110*.
3. Three elective English courses in the area of emphasis.
4. Six courses related to the literature of the chosen period from such disciplines as anthropology, the arts (including the practice of one of the arts), classics, comparative literature, European or other literature, feminist studies, history, modern thought and literature, political science, and African-American studies. These courses should form a coherent program and they must be relevant to the historical focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by the interdisciplinary program director.
5. In addition, students in the interdisciplinary program must write at least one interdisciplinary paper. This may be a senior honors essay (197), a senior independent essay (199), an individual research paper (194 or 198), or a paper integrating the material in two courses the student is taking in two different disciplines.

*Two more focused courses may be substituted for each of the courses 110, 111, and 112, by consent of the student's advisor in the interdisciplinary major.

MINORS

The minor in English offers some flexibility for those students who want to pursue specific interests within English and American literature, while still requiring certain courses that ensure coverage of a variety of periods, genres, and methods of studying literature.

1. Either English 150, Poetry and Poetics, or a course in literary theory (the 166 series).
2. One course in American literature written before 1900.
3. Three courses in either of the following configurations:
   a) English 110, Chaucer, Shakespeare, Milton, and their Contemporaries
   A course in English literature written between 1700 and 1900*
   A course in English literature written after 1900*
   b) English 111, From the Enlightenment to the Modern Period
   A course in English literature written before 1500*

A course in English literature written between 1500 and 1700*
4. Two elective courses in English literature originally written in English. One of these may be a course in Creative Writing.

* "English Literature" here means literature of the British Isles.

INTERDEPARTMENTAL MAJORS

English and French Literatures—This major provides a focus in English literature with additional work in French literature. Candidates for the A.B. in English and French Literatures who declared an English major prior to Autumn Quarter, 1999 complete eight courses in English, one from each of the areas B-H and P listed under the major in English, and fulfill the seminar requirement. Those declaring an English major during Autumn Quarter, 1999, or thereafter complete nine courses in English, one from each of the areas A-H and P listed under the major in English, and fulfill the seminar requirement. In addition, they must complete a coherent program of four courses in French literature, read in the original. The program of each student must be approved by the Director of Undergraduate Studies in English and by the Department of French and Italian.

English and German Literatures—Candidates for the A.B. in this major who declared an English major prior to Autumn Quarter, 1999 must complete a program exactly analogous to the preceding major, with eight courses in English, and a coherent program of four courses in German literature, read in the original, with approval by the departments involved as specified above. Those declaring an English major in Autumn Quarter, 1999, or thereafter, take nine courses in English.

English and Italian Literatures—Candidates for the A.B. in this major who declared an English major prior to Autumn Quarter, 1999 must complete eight courses in English and a coherent program of four courses in Italian literature, read in the original, with approval by the departments involved as specified above. Those declaring an English major in Autumn Quarter, 1999, or thereafter, take nine courses in English.

English and Spanish or Spanish-American Literatures—Candidates for the A.B. in this major who declared an English major prior to Autumn Quarter, 1999 must complete eight courses in English, and a coherent program of four courses in Spanish or Spanish-American literatures, read in the original, with approval by the departments involved as specified above. Those declaring an English major in Autumn Quarter, 1999, or thereafter, take nine courses in English.

ADVANCED WORK

INDIVIDUAL RESEARCH

Students taking 100- or 200-level courses may, with the consent of the instructor, write a follow-up 5-unit paper based on the course material and due no later than the end of the succeeding quarter (register for 194). The research paper is written under the direct supervision of the professor; it must be submitted first in a preliminary draft and subsequently in a final version.

INTEGRATED WORK

Students taking (either simultaneously or consecutively) two or three courses which have a clear thematic or historical relationship to each other may, with the consent of the relevant instructors, write one large-scale paper of 7,000-10,000 words integrating the material in the courses in question.

SENIOR INDEPENDENT STUDY

Independent study is open, on approval by the department, to seniors majoring in English who wish to work throughout the year on a critical or scholarly essay of about 10,000 words. In rare circumstances, advisors may nominate exceptional students for honors if the student's thesis is outstanding and the program of study has been approximately equivalent to that required of regular honors students.

HONORS PROGRAM

Students who wish to undertake a more extensive program in English literature, including a tutorial, a seminar, and independent research, are
invited to apply for the honors program as soon as possible after declaring an English major and no later than Autumn Quarter of the junior year. Application consists of completing a form and submitting a sample of critical writing. Admission is selective. Provisional admission is announced in December. Permission to continue in the program is contingent upon successful completion of a tutorial and submission, by May 15 of the junior year, of a Senior Honors Essay proposal with a bibliography.

In the junior year, students may choose between the following two options: (1) at Oxford, take two quarters of the seminar sequence offered by St. Catherine's College, or at least 5 units of tutorial work arranged by the director of the Oxford program; (2) at Stanford, take 5 units of tutorial work in the Department of English. Students who elect the latter option select a regular English lecture course, registering for 3 rather than 5 units. With that course, they also take a 5-unit tutorial (196T) on the same or related material with an advanced graduate student. The courses taken at Oxford or at Stanford to satisfy this requirement for the honors program can also be used where appropriate to satisfy the area requirements for the English major.

In the Spring Quarter of the junior year, students take a 5-unit honors seminar on critical approaches to literature. (Students who have previously taken an upper-division course in literary theory and criticism may be exempted from this seminar on request and with the approval of the director of the honors program.) In the senior year, honors students complete the senior honors essay for 10 units under supervision of a faculty adviser. In Winter Quarter, all honors students take a 3-unit essay workshop focused on the process of researching and writing the essay. The deadline for submitting the honors essay is May 15.

Students in the honors program complete the following:

Area Requirements (A–H, P), nine courses
One tutorial, 5 units
Junior seminar and workshop, 8 units total
Senior Honors Essay, 10 units
Three electives

Note—For other opportunities for extended essay projects, see Senior Independent Essay and English 194 and 199.

HONORS PROGRAM IN HUMANITIES

An honors program in Humanities is available for English majors who wish to supplement the major with a related and carefully guided program of studies. See the “Interdisciplinary Studies in Humanities” section of this bulletin for a description of the program. Students wishing to take the Comparative Literature option within the honors program in Humanities should see the “Comparative Literature” section of this bulletin.

VISITING STUDENTS

Students who do not wish to become candidates for a graduate degree, but who are qualified to meet the standards of admission to a master’s or Ph.D. program, may apply to Graduate Admissions, Registrar’s Office, Stanford University, for admission as nonmatriculated students for a period of not more than three consecutive quarters. Each quarter they may take up to three English courses numbered 101 to 299, or two such courses and (with the consent of the instructor) one English course numbered above 300.

GRADUATE PROGRAMS

For University regulations governing advanced degrees, see the “Graduate Degrees” section of this bulletin.

Eligibility—Students with a bachelor’s degree of acceptable quality may apply to pursue graduate work toward an advanced degree in English at Stanford. (Formal application for candidacy is a separate step taken somewhat later.) Students whose previous preparation is in a field other than English are expected to make up deficiencies. Credits for previous graduate work at Stanford or elsewhere more than five years old may be reevaluated or rejected.

Graduate students are admitted as candidates for only the Ph.D. or the A.M. in English and American Literature. The A.M. is a one-year program without financial aid. A.M. students may apply to the Ph.D. program.

MASTER OF ARTS IN TEACHING

Candidates for a coterminal master’s degree must fulfill all requirements for the A.M. in English (including the language requirement), as well as general and major requirements for the A.B. in English. A minimum GPA of 3.5 in the major is required of those applying for the coterminal master’s degree. No courses used to satisfy the A.B. requirements (either as General Education Requirements or department requirements) may be applied toward the A.M. However, additional graduate units not applied to any previous degree may be applied toward the A.M. See the description of programs under the "Undergraduate Degrees" section of this bulletin.

Masters of Arts in Teaching

The A.M. in Teaching is offered jointly by this department and the School of Education. The degree is intended for candidates who have teaching credential or relevant teaching experience and wish to further strengthen their academic preparation. The program consists of a minimum of 25 units in the teaching field and 12 units in the School of Education. Detailed requirements for the course are outlined in the "School of Education" section of this bulletin.

Candidates for the A.M. in Teaching may also qualify for the State of California Community College Instructor Credential by completing additional units of academic work at the graduate level. For further information, consult the Credentials Administrator, room 110, School of Education, early in the Autumn Quarter.
DOCTOR OF PHILOSOPHY

University regulations regarding the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin. The following department requirements, dealing with such matters as residence, dissertation, and examinations, are in addition to the University’s basic requirements for the doctorate. (Students should consult the most recent edition of “Informal Notes: Procedures for the Ph.D.” Copies are available in the English Graduate Studies office.)

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor’s degree. Candidates are expected to offer at least 97 units of graduate work in addition to the doctoral dissertation. At least three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.

A student may count no more than 20 units of English 398 toward the 97 course units currently required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded units (normally fourteen courses) of the 97 normally required total units (397, 398, and 399 do not count toward the 70 graded units). No more than 15 units (normally three courses) may come from 100-level courses. When graduate students are teaching 50-percent time, one course may be taken for 4 units.

This program is designed to be completed in five years. Six sections of supervised teaching (four as a teaching assistant in a literature course and two as the instructor of a Writing and Critical Thinking course) are a requirement of the Ph.D. program.

Students take a Teachers’ Workshop and an Apprentice Teaching Program in the first quarter of their second year. The workshop and apprentice teaching constitute a 50-percent quarter of work as a Teaching Assistant. Apprentice teachers attend the classes, conferences, and tutorials of the master teachers, then take responsibility for conducting a class, holding conferences, and grading papers. All these teaching activities are done under the supervision of the master teachers, who insure the quality of instruction.

ENGLISH LITERATURE

Requirements are as follows:

1. A course in either Old English or Middle English literature read in the original vernacular.

2. A course that focusses on language, linguistics, history of the language, or rhetoric. English courses that satisfy this requirement include: 101, Language of Poetry; 102, History of the English Language; 102A, The Development of Englishes Around the World; 102B, The Structure of English Words; 105, Language of the Short Story; 119, British Modernism and the Problem of Meaning: 1860-1939; 211, Readings in Middle English; 212, History of Rhetoric; 260A, American Literature and the Politics of Language; 293, Seminar in Literary Translation; 295, Interactivity, Narrative, and Artificial Intelligence; 300E, Linguistics and Literary Theory.

3. A minimum of six courses for a letter grade from the graduate colloquia and graduate seminars, of which at least three must be graduate seminars. The colloquia and seminars are given according to the adviser’s judgment and the candidate’s needs. A student may receive graduate credit for three 100-level courses in the Department of English.

4. Consent of the adviser if courses taken outside the Department of English are to count toward the 97-unit requirement.

5. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the Graduate Studies Committee in consideration of the student’s course record in conjunction with performance in the examination.

A student coming to the doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The Director of Graduate Studies considers the petition in conjunction with the student’s grades.

A student who has isolated a topic or area which seems promising for a doctoral thesis subject and who wants to explore it right away, and to incur additional specific course requirements insuring coverage and balance in program, may petition on entrance to qualify on the recommendation of a committee of advisers who would oversee and evaluate a full year’s course of study. Such petitions are rigorously scrutinized by the Graduate Studies Committee and granted only in exceptional cases.

6. A University oral examination to be taken no later than the Spring Quarter of the student’s third year of graduate work. This examination covers the field of concentration as defined by the student and the student’s adviser.

ENGLISH AND AMERICAN LITERATURE

Requirements are as follows:

1. A course in either Old English or Middle English literature read in the original vernacular.

2. A course that focusses on language, linguistics, history of the language, or rhetoric. English courses that satisfy this requirement include: 101, Language of Poetry; 102, History of the English Language; 102A, The Development of Englishes Around the World; 102B, The Structure of English Words; 105, Language of the Short Story; 119, British Modernism and the Problem of Meaning: 1860-1939; 211, Readings in Middle English; 212, History of Rhetoric; 260A, American Literature and the Politics of Language; 293, Seminar in Literary Translation; 295, Interactivity, Narrative, and Artificial Intelligence; 300E, Linguistics and Literary Theory.

3. A minimum of 35 units of graduate courses in American literature and 35 units in English. Among these, a minimum of six courses for a letter grade from the graduate colloquia and graduate seminars, of which three must be in American literature, and of which at least three must be graduate seminars. The colloquia and seminars should be in different genres and periods as approved by the adviser. A 5-unit course, Introduction to Graduate Study, and a 2-unit laboratory in pedagogy.

5. Completion, in Autumn Quarter of the second year, of a Teachers’ Workshop, which includes the Apprentice Teaching Program described above, and a Teachers’ Workshop in Winter Quarter. There are no units associated with this work.

6. Students are encouraged to take an advanced course in literary theory or criticism.

7. Consent of the adviser if courses taken outside the Department of English are to count toward the requirement of 97 units.

8. Qualification: see item 9 under requirements of the Ph.D. program in English literature.

9. A University oral examination to be taken no later than the Spring Quarter of the student’s third year of graduate work. This examination covers the field of concentration as defined by the student and the student’s adviser.

ENGLISH AND COMPARATIVE LITERATURE

The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of England and of at least one foreign country, for one period. Approximately half of the student’s course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.
This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should consult a Department of English adviser, but faculty from Comparative Literature may also provide useful supplementary information.

The requirements are as follows:
1. Qualifications: see item 9 under requirements of the Ph.D. program in English literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350.
2. A knowledge of the basic structure of the English language and of Chaucer. This requirement may be met by examination, or by taking 10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature including Chaucer. No particular courses are required of all students.
3. A 5-unit course, Introduction to Graduate Study, and a 2-unit laboratory in pedagogy.
4. Completion, in Autumn Quarter of the second year, of a Teachers' Workshop, which includes the Apprentice Teaching Program described above, and a Teachers' Workshop in Winter Quarter. There are no units associated with this work.
5. A knowledge of one foreign language comparable to that demanded under the basic program and an advanced reading knowledge of a second language.
6. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign language read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this requirement may be satisfied through courses in reading and research. A student may receive graduate credit for three 100-level courses in the Department of English.
7. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism. These colloquia and seminars should be in different genres and periods as approved by the adviser.
8. A University oral examination covering the field of concentration (as defined by the student and the student's adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study. However, those who spend the third year studying abroad may take this examination after their return early in the fourth year.

LANGUAGE REQUIREMENTS

All candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages. Candidates in the earlier periods must offer Latin and one of the following languages: Greek, French, German, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must offer either Latin, French, or German as one language and may choose the second language from the following: Greek, Latin, French, German, Italian, Spanish, Russian, or another language relevant to the student's field of study. In all cases, the choice of languages offered must have the approval of the candidate's adviser. Any substitution of another language must be approved by the Director of Graduate Studies.

The Graduate Studies Committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before registration in the following year), and the other by the end of the third year.

Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:
1. A reading examination given each quarter by the various language departments, except for Latin and Greek.
2. For Latin and Greek, an examination by the Department of English. The Latin examination is given before registration in the Autumn Quarter in order to permit those who need the course to register for Latin 3. It is also given in the eighth week of the Winter and Spring Quarters, along with other department examinations for languages tested by the Educational Testing Service.
3. Passage with a grade of 'B' or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford, or an alternative for Latin, French, and Spanish, passage of Latin 51 and 52, French 50, Italian 50, and Spanish 50, respectively, with a grade of 'B' or higher.

CANDIDACY

Students are expected to file for candidacy after successful completion of qualifying procedures and, in any event, by the end of the second year of doctoral study. Candidacy is valid for five years, and may be extended, subject to satisfactory progress.

DISSERTATION

As early as possible during their graduate study, Ph.D. candidates are expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work.

Immediately after the dissertation topic has been approved by the adviser, the candidate should file a formal reading committee form prescribed by the University.

The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree. Dissertations may not be submitted during the Summer Quarter.

JOINT PH.D. IN ENGLISH AND HUMANITIES

The Department of English participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in English and Humanities. For a description of that program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

PH.D. IN MODERN THOUGHT AND LITERATURE

Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half in interdisciplinary studies. Interested students should see the "Modern Thought and Literature" section of this bulletin and consult the chair of the program.

CREATIVE WRITING FELLOWSHIPS

The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are degree-granting fellowships. Information is available in the Creative Writing office (650) 723-2637.

COURSES

(WIM) indicates that the course meets the Writing in the Major requirements.

NUMBERING SYSTEM

Writing and Critical Thinking Courses: 1-3
Introduction to Literature: 5

352
Introduction to the Humanities: 7, 8, 9
English Language Courses: 101-109, 200-209
English Period Courses: 10-19, 110-119, 210-219, 310-319
American Period Courses: 20-29, 120-129, 220-229, 320-329
Genre Courses:
  Drama: 40-45, 140-145, 240-249, 340-349
  Poetry: 50-59, 150-159, 250-259, 350-359
Topic Courses: 60-69, 160-169, 260-269, 360-369
Author Courses: 70-79, 170-179, 270-289, 370-389
Seminars for English Majors: 180-189
Graduate Colloquia: 300-309
Writing Courses, Workshops, Individual Study, etc.: 90-99, 190-199, 290-299, 390-399

INTRODUCTORY (FOR NON-MAJORS)

Classes for students whose major is undeclared, or who are not majoring in English.

1. Writing and Critical Thinking—The successful completion in proper sequence of 1 and 2 satisfies the first-year writing requirement (W). Classes meet twice a week for 50 minutes along with individual conferences with instructors. Both involve reading texts and improving writing techniques. First quarter: students concentrate on finding an appropriate thesis and developing and organizing ideas. Second quarter: students concentrate on style and diction and on preparing and writing researched essays. Students choose from one of three general categories (A, B, or C). Readings vary in each, but the primary concern is student writing and its improvement. All are expository and argumentative writing courses, not conventional courses in cultural studies, literature, film, etc. (W)

1A. Writing and the Arts of Persuasion—Writing generally based on readings of effective arguments.
  3 units, Aut-Win, Win-Spr (Staff)

1B. Writing about Social and Political Issues—Writing generally based on readings drawn from social science disciplines.
  3 units, Aut-Win, Win-Spr (Staff)

1C. Writing about Literature—Writing generally based on literature and other creative forms.
  3 units, Aut-Win, Win-Spr (Staff)

2. Writing and Critical Thinking—Fulfills the first-year writing requirement (W) in one quarter; offered only to students scoring 4 or 5 on the English AP exams or 6 or 7 on the International Baccalaureate at the higher level. Classes meet twice a week for 75 minutes along with individual conferences with the instructor. Students concentrate on the same writing techniques as those presented in the 1 and 2 sequence, choosing from one of three general thematic categories (A, B, or C). Readings vary in each, but the primary concern is student writing and its improvement. All are expository and argumentative writing courses, not conventional courses in cultural studies, literature, film, etc. (W)

2A. Writing and the Arts of Persuasion—Writing generally based on readings of effective arguments.
  4 units, Aut, Win, Spr (Staff)

2B. Writing about Social and Political Issues—Writing generally based on readings drawn from social science disciplines.
  4 units, Aut, Win, Spr (Staff)

2C. Writing about Literature—Writing generally based on literature and other creative forms.
  4 units, Aut, Win, Spr (Staff)

4. Directed Writing—For students, especially freshmen and sophomores, who have completed the Writing Requirement and wish further work in writing. Workshops and individual tutorials are tailored to each student’s needs. Graduate credit available.
  3 units (Brawn)

5. Introduction to Literature—Enriches the understanding and appreciation of literature by introducing the essential tools and concepts used in textual analysis. Readings include masterpieces from a wide variety of literary genres, historical periods, and national literatures.
  3 units (not given 1999-2000)

8.9. The Literature of Transformation—(Enroll in Introduction to the Humanities 21A, B.)
  8. 5 units, Win (Evans, Middlebrook)
  9. 5 units, Spr (Evans, Middlebrook)

10. Masterpieces of English Literature I: Chaucer, Shakespeare, Milton, and their Contemporaries—(English majors and others taking 5 units, register for 110.) Introduces medieval and Renaissance literature through the works of Chaucer, Shakespeare, Milton, and selected contemporaries.
  3 units, Aut (Steidle)

11. Masterpieces of English Literature II: From the Enlightenment to the Modern Period—(English majors and others taking 5 units, register for 111.) Introduction to literary masterpieces written in English between 1700 and 1950. Treats fiction and poetry, with some drama. GER:3a (DR:7)
  3 units, Win (B. Gelpi)

12. Masterpieces of American Literature—(English majors and others taking 5 units, register for 112.) Survey of some major works of American literature, 1840-1940. Authors: Hawthorne, Melville, Whitman, Dickinson, James, Fitzgerald, Wright, Faulkner. GER:3a (DR:7)
  3 units, Aut (Jones)

30. The Novel—(English majors and others taking 5 units, register for 130.) Introduction to the novel through a close, sympathetic reading of a variety of major novels, focusing on their construction, narrative technique, and expression of human values. GER:3a (DR:7)
  3 units, Aut (Woloch)
  Win (Drake)

40. Drama—(English majors and others taking 5 units, register for 140.) Principal dramatic forms, development of dramaturgy, and modern masterpieces of the theater from Ibsen to the present.
  3 units, Win (Bartholomew)

60. The English Bible—(English majors and others taking 5 units, register for 160.) Selected readings in important versions of the English Bible as the source, inspiration, and reference for English and American literary works.
  3 units, Spr (Evans, Middlebrook)

65A. Introduction to Medieval Culture—(English majors and others taking 5 units, register for 165A.) Introduction to the development of medieval culture through the study of religious, philosophical, literary, artistic, social, and political sources, emphasizing the interrelationships among them. GER:3a (DR:7 or 8)
  3 units, Win (Brown, Miller)

65B. Arthurian Literature—(English majors and others taking 5 units, register for 165B.) Survey of medieval classics (in translation) that recount the legends of Arthur and his companions. Focus is on the relation between history and fiction, the social uses of literature, and on the construction of gender roles.
  3 units, Spr (Evans, Middlebrook)

65A. Introduction to Native American Studies—(English majors and others taking 5 units, register for 168A.) For students with no background in the area. Introduction to the multidisciplinary field of Native American
Studies as it has emerged in American universities over the past 30 years. Focus is on the study of literary texts by Native American writers, federal policy, western education, and contemporary efforts to bolster tribal traditions in marking out the future for Native American people and communities. GER:4b (DR:5)

not given 1999-2000

68B. Introduction to Afro-American Literature—(English majors and others taking 5 units, register for 168B.) The slave narrative and other representative genres (poetry, short stories, essays, novels): works by Douglass, Jacobs, Chesnutt, Du Bois, Dunbar, Toomer, Hurston, Wright, Ellison, Baldwin, and Morrison. GER:3a (DR:7)

3 units, Win (Boland)

68C. Introduction to Chicana/o Literature—(English majors and others taking 5 units, register for 168C.) Introduction to the literature of the nation’s second largest ethnic minority. Works by Paredes, Gonzales, Alurista, Cervantes, Rivera, Cisneros, Viramontes, Moraga, Anzaldua, Burciaga, Acosta, and Rodriguez are examined to see how these uncertain Americans negotiate their struggles with U.S. immigration policies, racial discrimination, economic exploitation, and cultural transformation through literature.

not given 1999-2000

68E. Introduction to 20th-Century Irish Literature—(English majors and others taking 5 units, register for 168E.) GER:3a (DR:7)

3 units, Win (Boland)

79E. Hemingway and Fitzgerald—(English majors and others taking 5 units, register for 179E.)

3 units, Win (Bacon)

INTRODUCTORY SEMINARS

61N. Stanford Introductory Seminar: The Films of Woody Allen—Preference to freshmen. GER:3a (DR:7)

3 units, Win (Polhemus)

62N. Stanford Introductory Seminar: Eros and Other Problems in Modern American Poetry—Preference to freshmen. GER:3a (DR:7)

3 units, Win (Fields)

63N. Stanford Introductory Seminar: Literature of California—Preference to freshmen. GER:3a (DR:7)

3 units, Win (Jenkins)

64N. Stanford Introductory Seminar: Growing Up in America—Preference to freshmen. GER:3a (DR:7)

3 units, Win (Moya)

65N. Stanford Introductory Seminar: Contemporary Short Story—Preference to freshmen. GER:3a (DR:7)

3 units, Aut (Tallent)

66N. Stanford Introductory Seminar: Landscape and Modern Literature—Preference to freshmen. GER:3a (DR:7)

3 units, Spr (Harkin)

67N. Stanford Introductory Seminar: The Reciprocal Vision—Our Europe, their America—Preference to freshmen. GER:3a (DR:7)

3 units, Win (Evans)

80Q. Stanford Introductory Seminar: Gothic Terror—Preference to sophomores. GER:3a (DR:7)

3 units, Aut (Bender)

81Q. Stanford Introductory Seminar: Authority and Women in the Early Middle Ages—Preference to sophomores. GER:3a,4c (DR:7)

3 units, Aut (Brown)

82Q. Stanford Introductory Seminar: Shakespeare's Plays—Preference to sophomores. GER:3a (DR:7)

5 units, Win (Rehbolz)

FOR MAJORS

BASIC UNDERGRADUATE SURVEYS

Note—Graduate students may receive graduate credit for three 100-level courses.

5 units, Aut (Steidle)

111. Masterpieces of English Literature II: From the Enlightenment to the Modern Period—See 11.

5 units, Win (B. Gelpi)

5 units, Aut (Jones)

130. The Novel—See 30.

3 units, Aut (Woloch)

Win (Drake)

140. Drama—See 40.

5 units, Win (Bartholomew)

160. The English Bible—See 60.

not given 1999-2000

AREA A: LANGUAGE AND RHETORIC

Note—During the academic year 1999-2000, students may satisfy area A by taking Linguistics courses for 3 units.

101. The Language of Poetry—(Enroll in Linguistics 71.)

3-5 units, Win (Kiparsky)

102. History of the English Language—Same as Linguistics 62.

not given 1999-2000

102A. The Development of Englishes around the World—(Same as Linguistics 64.) The emergence of standard English in Britain in connection with the establishment of Caxton’s printing press in the late 15th century. The transformation of English in the context of colonialism and postcolonialism, focusing on the U.S., the Caribbean, S. Asia, and Africa. The characteristics of these languages, and their literary/expres- sive, social, and political uses. The nature of language mixture, and of the simplification and complication processes which resulted in new “pid- gins” and “creoles.” The future of international English. GER:3a (DR:7)

5 units, Spr (Tragossi)

102B. The Structure of English Words—(Enroll in Linguistics 70/270.)

4-5 units, Spr (Leben)

102C. Language and Gender—(Enroll in Linguistics 146.)

4 units, Aut (Eckert)

103A. African-American Vernacular English—(Enroll in Linguistics 73.)

4-5 units, Win (Rickford)

103B. The Literary History of American English—(Same as Linguistics 77.) The development of American English and ideas around “standard” and “literary” with emphasis on the 19th- and early 20th-century writings. Possible topics: American periodicals, dialect literature, folktales, regional literary standards, children’s literature, and women’s ways of conversing in print. GER:3a (DR:7)

5 units, Win (Heath)
104. Language and Literary Theory—(Same as Linguistics 78.) Examination of the central role linguists’ understanding of language structures, uses, and grammatical processes have played in the development of literary criticism and theory. The ways literary language layers affect meaning through genre, imagery, voice, narration, and incorporation of more than one language or dialect. GER:3a (DR:7)
5 units, Spr (Heath)

105. The Language of Short Stories—(Same as Linguistics 72.) Close reading of 20th-century British and American short stories, emphasizing perspective. Introduction to recent works in discourse analysis and conversational structure, as they inform the reading of fiction. (Areas:A,H)

212. The History of Rhetoric—(Same as Comparative Literature 212.) The history of the discipline of rhetoric from Classical Greek and Latin traditions, through medieval, Renaissance, modern, and contemporary treatments. Schemes and tropes (Cicero and Quintilian); grammatical education and the schools (Geoffrey Vinaul, John of Garland); Renaissance handbooks (Wilson, Puttenham); 18th- and 19th-century oratory; current appropriations (e.g., Paul de Man, deconstruction). Texts are read for their deployments of rhetorical devices and their thematic attentions to verbal organization (e.g., selections from the Aeneid, medieval lyrics, Chaucer’s Canterbury Tales, Shakespeare’s Hamlet. Augustan and Romantic Poetry, 19th-century prose fiction). Modern English translations; some emphasis to original-language texts of earlier periods.
4-5 units, Win (Lerer)

206A. American Literature and the Politics of Language—(Areas:A,G)

AREA B: MEDIEVAL

165A. Introduction to Medieval Culture—(Same as History 105A, Medieval Studies 165.) See 65A. GER:3a (DR:7 or 8)
5 units, Win (Brown, Miller)

165B. Arthurian Literature—See 65B.
not given 1999-2000

165E. The Invention of Middle English Literature, 1330-1400—Key texts from a great period of English writing, focusing on the invention of writers, readers, and of literary history itself.
5 units, Aut (Simpson)

165F. From Epic to Romance: Courtly Love and the Heroic Ideal
5 units, Spr (Steidle)

171. Chaucer—His major poetry, concentrating on the Canterbury Tales, with reference to the historical, social, and aesthetic backgrounds of medieval literature. GER:3a (DR:7)
5 units, Win (Summit)

211. Readings in Middle English—The language and dialects of Middle English and readings in the various genres of prose and poetry.
4-5 units, Win (Brown)

AREA C: RENAISSANCE

113. The Renaissance—A basic survey of English literature. GER:3a (DR:7)
5 units, Win (Orgel)

182. Seminar: Renaissance Poetry
5 units, Win (Rehholz)

182A. Seminar: Milton
5 units, Spr (Evans)

AREA D: SHAKESPEARE

173A. Shakespeare—GER:3a (DR:7)
5 units, Aut (Orgel)

173B. Shakespeare—GER:3a,4c (DR:71)
5 units, Win (Parker)

173C. Shakespeare—GER:3a (DR:7)
5 units, Spr (Rehholz)

273. Shakespeare: “The Voice of a Whole Epoch”—Focus is on a number of plays (The Taming of the Shrew, Richard III, Henry V, As You Like It, Hamlet, and Macbeth), written at the height of the Renaissance and on the threshold of the modern era. The plays are studied within their dramatic historical milieu. Early modern art, films, and collateral readings on related issues and theoretical approaches to the plays.
4-5 units, Aut (Brooks)

AREA E: RESTORATION AND 18TH CENTURY

131. The 18th-Century British Novel—GER:3a (DR:7)
5 units, Spr (Harkin)

174B. Gender and Politics in English Literature, 1668-1725—After the 1688 “Glorious Revolution,” the struggle between traditional patriarchalism and modern patriarchy marked various texts. Representations of male and female identities in transition, in novels by Behn and Defoe, plays by Southerne, Pix, and Congreve, poems by Finch, Pope, and Swift.
5 units, Spr (Gabbard)

184. Seminar: The Gothic Novel—(Areas:E,F)
5 units, Aut (Bender)

184A. Seminar: 18th-Century English Poetry
5 units, Spr (Groom)

AREA F: ROMANTIC AND VICTORIAN

132G. The 19th-Century English Novel—GER:3a (DR:7)
5 units, Aut (Alfano)

154. Major Romantic Poets—GER:3a (DR:7)
5 units, Aut (Dekker)

184. Seminar: The Gothic Novel—(Areas:E,F)
5 units, Aut (Bender)

185A. Seminar: The Brontes and Elizabeth Gaskell
5 units, Spr (B. Gelpi)

185G. Seminar: Jane Austen
5 units, Win (Polhemus)

185H. Seminar: Dickens
5 units, Aut (Woloch)

219. Representation and Repression in Fiction
4-5 units, Spr (Woloch)

AREA G: AMERICA BEFORE 1900

121. American Literature and Culture to 1855—(Same as American Studies 150.) Reading texts from Cotton Mather to Melville, examines the major issues in early American cultural and literary history. Developments in the fine and domestic arts; methodological issues associated with the enterprise called “American Studies.” GER:3a (DR:7)
5 units, Win (Fliegelman)

123D. The Multicultural Moment: American Literature from the Civil War to World War I—GER:3a (DR:7)
5 units, Spr (Jones)

175. Henry James—GER:3a (DR:7)
   5 units, Aut (Dekker)

179. Mark Twain and the Gilded Age—The Gilded Age, the satirical novel Mark Twain co-wrote, gave historians the name for the post-Civil War period of rampant corruption, political uncertainty, and flamboyant humbuggery. Mark Twain’s major fictions are read along with related texts of this period of expansion and social conflict, e.g., Twain’s novel of racist delusion, Pudd’nhead Wilson, is read alongside African-American novelist Charles Chesnutt’s fiction of white supremacist terror, The Marrow of Tradition. Other works by Twain: The Innocents Abroad, Roughing It, Adventures of Tom Sawyer, The Adventures of Huckleberry Finn, and A Connecticut Yankee in King Arthur’s Court.
   5 units, Win (Obenzinger)

164G. California Literary Imagination: The 19th Century
   5 units, Spr (J. Moser)

186B. Seminar: Melville
   5 units, Aut (Fliegelman)

186P. Seminar: Representing Poverty in America, 1840-1940
   5 units, Aut (Jones)

186S. Seminar: Poe
   5 units, Win (Merish)

260A. American Literature and the Politics of Language—(Areas:A,G)
   4-5 units, Spr (Jones)

105. The Language of Short Stories—(Same as Linguistics 72.) See Area A. (Areas:A,H) not given 1999-2000

119G. Literature of World War I—GER:3a (DR:7)
   5 units, Win (Bourbon)

126A. 20th-Century American Literature—GER:3a (DR:7)
   5 units, Spr (Rampersad)

133A. Contemporary British Fiction: From Beckett to the Present
   not given 1999-2000

   GER:3a,4c (DR:71)
   5 units, Aut (Tallent)

155A. Modern British Poetry—Survey of several British poets from the 1890s to the present, including Thomas Hardy, G. M. Hopkins, D. H. Lawrence, Philip Larkin, Thom Gunn, and others.
   not given 1999-2000

157A. Modernist Poetry—GER:3a (DR:7)
   5 units, Win (Jenkins)

160I. American Film: The Western
   not given 1999-2000

161E. Modern African Writing in English—Introduces modern writing in English, primarily from E. and W. Africa, in a historical context. Emphasis is on colonial and the immediately postcolonial period, and in the novel, with work in other genres and from other periods.
   not given 1999-2000

162G. Writing by 20th-Century Women of Color—GER:3a (DR:7)
   5 units, Aut (Moya)

162L. Caribbean Literatures in English—Examines various aspects of (post)modern literature written in English and French from within Caribbean cultural sensibility, seeing how authors of Anglophone and Francophone “Third World” novels represent, question, and re/deconstruct the experience of diaspora, hybridity, and ethnicity and their effect on the formation of the subject. Students read a variety of novels that explore the subject’s experience of subalternity socially, politically, and sexually, considering how the different generic, rhetorical, and stylistic representational modes reflect the process of the formation of hybrid identities.
   5 units, Spr (Aldama)

164B. Imagining the Holocaust—How has the literary imagination envisioned the destruction of European Jewry? The Holocaust and European, Israeli, and American responses through documentation; diaries; fiction; poetry by Appelfeld, Borowski, Wiesel, Celan, Levi, Roth, Malamud, Schindler’s List (Keneally); and through visual art. Survivor addresses the class.
   not given 1999-2000

168. American Indian Mythology, Legend, and Lore
   not given 1999-2000

168B. Introduction to Afro-American Literature—See 68B.
   5 units, Spr (Rampersad)

168C. Introduction to Chicana/o Literature—See 68C.
   not given 1999-2000

168D. Introduction to Asian-American Culture—(Enroll in Comparative Literature 168.)
   5 units, Win (Palumbo-Liu)

168E. Introduction to 20th-Century Irish Literature—See 68E.
   GER:3a (DR:7)
   5 units, Win (Boland)

179E. Hemingway and Fitzgerald—See 79E.
   5 units, Win (Bacon)

187. Seminar: Sylvia Plath and Ted Hughes
   5 units, Spr (Middlebrook)

187E. Seminar: British Novels of the Thirties
   5 units, Spr (Jenkins)

187P. Seminar: Short Story Collections
   5 units, Win (Tallent)

187R. Seminar: Literature of Colonialism and Postcolonialism
   5 units, Aut (Drake)

   5 units, Win (Rampersad)

238. The Third World Novel in English
   4-5 units, Aut (Drake)

256F. Black Mountain Poets
   4-5 units, Spr (A. Gelpi)
277B, Virginia Woolf and Bloomsbury
4-5 units, Aut (Halliburton)

279D. Joyce
4.5 units, Spr (Bourbon)

287S. Hardy, Eliot, Auden
4.5 units, Spr (Jenkins)

AREA P: POETRY AND POETICS

92. Reading and Writing Poetry—Introduction to the understanding and writing of poetry. Prerequisite: completion of the writing requirement.

5 units, Aut, Win, Spr (Cohen, Richter)

150. Poetry and Poetics—Introduction to the reading of poetry through a variety of poems, emphasizing the ways the meanings of poems are shaped through diction, imagery, figurative language, and technical elements of verse. GER:3a (DR:7) (WIM)

5 units, Aut (Fields)
Win (Felstiner)
Spr (Boland)

192. Intermediate Poetry Writing—See “Creative Writing.”

5 units, Aut, Spr (Cohen)

THEMES AND TOPICS

100D. Core Seminar: The Protagonist in Literature—(Enroll in Interdisciplinary Studies in Humanities 194W.)

5 units, Win (Woloch)

166D. Introduction to Critical Theory: Literary Theory since Plato—(Same as 266D.) Introduction to the history of literary theory in the Western tradition. Emphasis is on the history of attempts to define, locate, or engage “the literary,” and of attempts to understand it in relation to philosophy, history, politics, sexuality, gender, race, psychology, language, etc.

not given 1999-2000

189D. Seminar: Literature and Technology
5 units, Win (Halliburton)

263. Undergraduate Colloquium: Body Works—Medicine, Technology, and the Body in 20th-Century America—(Enroll in History 274A/374A.)

4-5 units, Win (Lenoir)

UNDERGRADUATE WORKSHOPS AND DIRECTED READING

191. Expository Writing—Advanced composition open to undergraduates and graduates. Taught through tutorials, short lectures, and general discussion. General instruction in writing.

3 units, Spr (Watters)

194. Individual Research—See section above on “Undergraduate Program, Opportunities for Advanced Work, Individual Research.”

5 units, any quarter

195. Ad Hoc Undergraduate Seminars—Undergraduates (at least three) who wish in the following quarter to study a subject or an area not covered by regular courses, may plan an informal seminar and approach a member of the department to supervise it. A syllabus should be submitted to the director of undergraduate advising at least two weeks before the end of the quarter. No more than 5 units of credit are given for 195 and/or 198 in one quarter. 195 may not be used to fulfill departmental area or elective requirements without permission.

any quarter

196A. Honors Seminar: Critical Approaches to Literature—Required of all seniors in the English honors program.

5 units, Aut (Dunn)
Spr (Bourbon)

196B. Honors Essay Workshop—Required of all English honors students.

3 units, Win (T. Moser)

196T. Honors Tutorial
5 units, Aut, Win, Spr (Staff)

197. Senior Honors Essay
10 units in two quarters, Aut, Win, Spr (Staff)

198. Individual Work—Undergraduates who wish to study a subject or an area not covered by regular courses may, with permission, enroll for individual work under the supervision of a member of the department. No more than 5 units of credit are given for 198 and/or 195 in any one quarter. 198 may not be used to fulfill departmental area or elective requirements without permission. Group seminars are not considered appropriate to 198.

any quarter

199. Senior Independent Study—Open, with department approval, to seniors majoring in English who wish to work throughout the year on a 10,000 word critical or scholarly essay (see “Note” under honors program in English). Applicants should submit a sample of their expository prose and a proposed topic for independent study with a bibliography to the Director of Undergraduate Studies, before preregistration in May of the junior year. Each student accepted is responsible for finding a department faculty director.

10-15 units in three quarters, Aut, Win, Spr (Staff)

CREATIVE WRITING

90. Fiction Writing—Basic problems of narrative and imaginative writing. Prerequisite: completion of the writing requirement.

5 units, Aut, Win, Spr (Brown, Harty, MacDonald, Orozco, Scribner)

190. Intermediate Fiction Writing—May be taken twice. Manuscript must be submitted to Creative Writing Office by last day of preceding quarter. Prerequisite: 90.

5 units, Aut, Win, Spr (Brown, Harty, Scribner, Wolff)

192. Intermediate Poetry Writing—May be taken twice. For admission, manuscript must be submitted to the Creative Writing Office by the last day of preceding quarter. Prerequisite: 92.

5 units, Aut, Spr (Cohen)

290A. Advanced Fiction Writing—Students are selected by the instructor. Promising fiction writers who have completed the 90 and 190 workshops critique their stories with a view toward bringing them to publishable quality. Manuscripts must be submitted to the Creative Writing Office by the last day of the preceding quarter.

4-5 units, Spr (MacDonald)

292. Advanced Poetry Writing—Students are selected by the instructor. Promising student poets write poetry in an atmosphere of mutual aid. Manuscripts must be submitted to the Creative Writing Office by December 15.

4-5 units, Win (Fields)
293. Seminar in Literary Translation—After examining versions of Baudelaire, Rilke, Neruda, Celan, Pagg, Shakespeare, Keats, Dickinson, Whitman, Yeats, Eliot, Frost, and Duncan, students pursue and present their own work in progress, discussing practical and theoretical questions.

3-run, Win (Felstiner)

390. Graduate Fiction Workshop—Primarily for graduate students in the Writing program. May be repeated for credit. Prerequisite: consent of instructor.

3 units, Aut (Wolff)
Win (Tallents)
Spr (L'Heureux)

392. Graduate Poetry Workshop—Primarily for graduate students enrolled in the Writing program. May be repeated for credit. Prerequisite: consent of instructor.

3 units, Aut (Fields)
Win (Boland)
Spr (Kleinzahler)

ADVANCED UNDERGRADUATE/GRADUATE

205. Old English—Introduction to the earliest English literature in its original language, studying the basics of the Old English language and reading select short prose passages of graduated difficulty. After students have some command of the language, class reads choice Anglo-Saxon poems (including portions of Beowulf), not given 1999-2000

209. Introduction to Paleography and Codicology—Introduction to the study of late antique and medieval manuscripts in Latin, of medieval Latin and vernacular scripts, and of the materials and composition of the medieval book.

4-5 units, Aut (Brown)

211. Readings in Middle English—The language and dialects of Middle English and reading in the various genres of prose and poetry. (Area:B)

4-5 units, Win (Brown)

219. Representation and Repression in Fiction

4-5 units, Spr (Woloch)

238. The Third World Novel in English

4-5 units, Aut (Drake)

256F. Black Mountain Poets

4-5 units, Spr (A. Gelpi)

260A. American Literature and the Politics of Language

4-5 units, Spr (Jones)

263. Undergraduate Colloquium: Bodyworks—Medicine, Technology, and the Body in 20th-Century America—(Enroll in History 274A, 374A.)

4-5 units, Win (Lenoir)

266D. Introduction to Critical Theory: Literary Theory since Plato—See 166D.

not given 1999-2000

273. Shakespeare: “The Voice of a Whole Epoch”—See Area D.

4-5 units, Aut (Brooks)

277B. Virginia Woolf and Bloomsbury

4-5 units, Aut (Halliburton)

279D. Joyce

4-5 units, Spr (Bourbon)

284. Concord and Jena: The Coming of Romanticism to America—(Enroll in German Studies 292A.)

3-5 units, Spr (Mueller-Vollmer)

287S. Hardy, Eliot, Auden

4-5 units, Spr (Jenkins)

296. Critical Theory and the Profession: An Introduction to Graduate Study for A.M. Students—Introduces incoming graduate students to literary criticism and theory in the context of the past and presents paradigms, conflicts, and modes of institutionalization. The role of text in relation to social issues, canon formation, and the emergence of “new” approaches (e.g., cultural and ethnic studies) are compared and contrasted with more traditional approaches (e.g., philology, hermeneutics).

5 units, Aut (Haliburton)

GRADUATE

COLLOQUIA

300B. Colloquium: The Bible and Literature—(Same as Comparative Literature 300B.) Combines intensive readings from Genesis to Revelation, with selections from a wide range of literary texts (from Dante to medieval drama, through Shakespeare, Spenser, Renaissance lyrics and Milton to 19th- and 20th-century poetry and novels from British, American, African-American, African, and other writing). Related topics: the relation between biblical eschatology and literary structures, Song of Songs and the history of lyric, the influence on prototypes of race/gender difference, citations in radical and hegemonic political contexts.

4-5 units, Spr (Parker)

300C. Colloquium: Metamorphoses, Myths and Monsters—Metamorphosis was a dynamic principle of classical myths and early modern fairy tales, and returns strongly as a theme in contemporary fascination with beasts and monsters. The changing meanings and functions of shape-changing in writers ranging from Apuleius, Ovid, and Shakespeare to Giambattista Basile, Charles Perrault, Marie-Catherine d'Aulnoy, Leonora Carrington, and Angela Carter.

4-5 units, Spr (Warner)

302H. Colloquium: The Reformation in English Literature

4-5 units, Aut (Summit)

303. Colloquium: 18th-Century Geographies

4-5 units, Win (Harkin)

303A. Colloquium: High and Low Life—Polite and Popular Forms in 18th-Century Literature

4-5 units, Spr (Castle)

4-5 units, Spr (Kaufman)

306. Colloquium: American Enlightenment

4-5 units, Aut (Fliegelman)
314. Seminar: Epic and Empire—(Same as Comparative Literature 314.) Focusing on Virgil's Aeneid and its influence, traces the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period. 5 units, Win (Parker)

356. Seminar: Whitman and Dickinson 4-5 units, Win (A. Gelpl)

366. Seminar: Literary Theory—Structuralism and After—(Same as Comparative Literature 366.) Introduction to the theorists whose ideas shaped the study of literature and culture over the past generation. The entry point is recent works by Butler, Guillery, Spivak, Zizek, and others. Selections from prior theorists focus on issues of present concern: Saussure, Jakobson, Volosinov, Levi-Strauss, Lacan, Althusser, Austin, Foucault, Derrida, Bourdieu, and Kristeva. 5 units, Aut (Simpson)

370. Seminar: Suffering History—Exemplary Lives in Medieval Literature—Considers the representation of a series of lives, of women and men, secular and religious, in which decisive historical transitions are suffered and/or provoked. 4-5 units, Aut (Simpson)

373A-B. Seminar: Shakespeare—Text and Performance 4-5 units, Aut, Win (Orgel)

383B. Seminar: Literary Forgeries—The history and theory of literary plagiarism, authenticity and inspiration, and copying and counterfeiting? Writers such as Chatterton, Gide, Baudrillard. 4-5 units, Spr (Groom)

385H. Seminar: Early 20th-Century Avant-Garde 4-5 units, Aut (Perloff)

389A. Seminar: Realist Theory and the Predicament of Postmodernism 4-5 units, Aut (Moya)

389B. Modern Seminar—(Enroll in Interdisciplinary Studies in Humanities 314.) 3-5 units, Aut (Bourbon)

391. Advanced Work in Writing and Criticism any quarter

394. Independent Study—Preparation for qualifying examination and for the Ph.D. oral examination. any quarter

395. Ad Hoc Graduate Seminars—Three or more graduate students who wish in the following quarter to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a suitable member of the department to supervise it. any quarter

396. Laboratory in Pedagogy—Required for first-year Ph.D. students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students doing their teaching in a foreign language). Preparation for TA in undergraduate literature courses. Focus is on leading discussions and grading papers. 2 units, Aut (Cormack, Rebholz)

397A. Teachers Workshop I—Seminar and apprenticeship required of second-year graduate students in English, Modern Thought and Literature, and Comparative Literature teaching in the Writing and Critical Thinking Program. Each student is assigned as an apprentice to an experienced teacher and sits in on classes, conferences, and tutorials, with eventual responsibility for conducting a class, grading papers, and holding conferences. Meetings discuss rhetoric, theories of composition, and the teaching of writing. Readings in rhetoric and pedagogy. Each student designs a two-quarter syllabus in preparation for teaching English 1 and 2. 1-5 units, Aut (Reichard, Rebholz, Watters)

399. Thesis 3 units, any quarter

399. Thesis 3 units, any quarter

Program in Ethics in Society

Director: Debra Satz (Philosophy)

Steering Committee: Christopher Bobonich (Philosophy), Arnold Eisen (Religious Studies), John Ferejohn (Political Science), Barbara Koenig (Center for Biomedical Ethics), Susan Okin (Political Science), Rob Reich (Political Science), Bill Simon (Law)

Affiliated Faculty: Kenneth Arrow (Economics, emeritus), Donald Barr (Human Biology), Barton Bernstein (History), Michael Bratman (Philosophy), Albert Camarillo (History), Lori Gruen (Philosophy), Elizabeth Hansot (Political Science), Agnieszka Jaworska (Philosophy), David Kennedy (History), David K. Stevenson (Pediatrics), Susan Okin (Political Science), John Ferejohn (Political Science), Rob Reich (Political Science), Bill Simon (Law)

The Program in Ethics in Society is designed to foster scholarship, teaching, and moral reflection on foundational issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as international relations, politics, science, medicine, law, and business.

Current and planned initiatives of the program include:

1. Supporting and fostering ethics research.
2. Supporting innovative teaching which focuses on the ethical dimensions relevant to the different disciplines across the curriculum.

3. Establishing a yearly faculty-graduate seminar focusing on topics in ethics and public life.

The program also sponsors public lecture series, including the Tanner Lectures in Human Values, the Wesson Lectures in Problems of Democracy, and the Ethics in Society lecture series on a current social issue.

Students interested in pursuing studies which bring moral and political theory to bear on issues in public life should consult the director.

UNDERGRADUATE PROGRAM
HONORS

The honors program in Ethics in Society is open to majors in every field and may be taken in addition to a department major. Students should apply for entry at the end of Spring Quarter of the sophomore year or at the beginning of the Autumn Quarter of the junior year. Applicants should have a cumulative grade point average (GPA) of 'B+' or higher. They should also maintain this minimum average in the courses taken to satisfy the requirements.

Requirements*—

1. Required courses:
   a) Philosophy 20, Introduction to Moral Theory, or Philosophy 170. This is normally taken in the sophomore year.
   b) Philosophy 30, Introduction to Political Philosophy (same as Public Policy 103A), or Philosophy 171. This is normally taken in the sophomore year. At least one of (a) and (b) must be taken at the upper level.
   c) Ethics in Society 77, The Ethics of Social Decisions (same as Philosophy 77). Ethics in Society honors students must enroll under Ethics in Society. This course is aimed primarily at the junior year and is taken upon admission to the honors program.

2. One 4- or 5-unit undergraduate course on a subject approved by the honors adviser, designed to encourage students to explore those issues in Ethics in Society that are of particular interest to them. Courses of relevance to the Program in Ethics in Society are offered by members of the program committee and by other departments. Students may also take a course with the honors thesis in mind. To promote a broad interdisciplinary approach, this elective should normally be outside the Department of Philosophy. Students are not restricted to choosing from the sample of such courses included below.

4. Ethics in Society 200A,B, Honors Thesis, on a subject approved by the honors adviser, 8-10 units, with work spread over two quarters.

*Courses credited toward the Ethics in Society honors requirements may not be double counted for the Philosophy major or minor.

A typical student takes Philosophy 20 or 170 and 30 or 171 in the sophomore year. On admission to the honors program as a junior, he or she takes Ethics in Society 77, given Winter Quarter. Requirement 3 is also fulfilled in Winter Quarter, and requirement 2 (the optional subject) at any time during the junior year, or possibly Autumn Quarter of the senior year. The honors thesis is normally written during the Autumn and Winter Quarters of the senior year.

GRADUATE STUDIES

In addition to the Ethics in Society Lecture Series, the program’s main provision for graduate students is a seminar on a topic in applied ethics. Students present talks on normative themes of their own choosing, providing an opportunity for graduate students from different disciplines to interact in the process of deliberating over ethical matters of common interest.

COURSES
UNDERGRADUATE

For course information not listed, refer to the relevant department listings elsewhere in this bulletin. See the Time Schedule each quarter for any changes in listings.

11N. Stanford Introductory Seminar: Autonomy—(Enroll in Philosophy 11N.)
   3 units, Spr (Jaworska)

20. Introduction to Moral Theory—(Enroll in Philosophy 20.) What is the basis of our moral judgments? What makes right actions right, and wrong actions wrong? (Existing social rules? The consequences of human happiness? Conformity to a rule of reason?) What sort of person is it best to be? The answers to these classic questions about ethics are examined in the works of traditional and contemporary authors.
   5 units, Spr (Rosner)

30. Introduction to Political Philosophy Theory—(Enroll in Philosophy 30, Political Science 51D, Public Policy 103A.) Critical introduction to issues of state authority, justice, liberty, and equality. The issues are approached through major works in political philosophy. Topics: human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion and politics. Readings: Aristotle, Locke, Rousseau, Mill, Marx, Rawls, the U.S. Constitution, some Supreme Court cases.
   5 units, Aut (Okin)

53N. Stanford Introductory Seminar: Plato and Aristotle on Justice—(Enroll in Political Science 53N.)
   3 units, Aut (Reich)

76. Justice and Public Service—(Same as Philosophy 176A.) The meaning and justification of public service, and its relationship to political activism and to justice.
   4 units (Satz) not given 1999-2000

77. The Ethics of Social Decisions: Racism, Poverty, and Environmental Justice—(Same as Philosophy 77.) The application of moral reasoning to a particular social or political issue.
   4 units, Spr (Grae

78. Medical Ethics—(Enroll in Philosophy 78.)
   4 units, Aut (Jaworska)

100. Computers, Ethics, and Social Responsibility—(Enroll in Computer Science 201.)
   4 units, Spr (Johnson)

110. Ethics and Public Policy—(Enroll in Science, Technology, and Society 110; Public Policy 103B.)
   5 units, Win (McGinn)

   1-4 units, Aut, Win, Spr (Lasagnan, Gupta)

150. Economics and Public Policy—(Enroll in Economics 150, Public Policy 104.)
   5 units, Win (Noll)

151A,B. Undergraduate Colloquium: Poverty and Homelessness in America—(Enroll in History 251A,B.)
   8 units (Camarillo) not given 1999-2000

156. Economics of Health and Medical Care—(Enroll in Economics...
156. Health Research and Policy 256, Medical Information Sciences 256.)
5 units, Win (McClellan)

157. Seminar: Morality and Law—(Enroll in Political Science 157.)
5 units (Hardin) given 2000-01

158R. Children’s Citizenship: Justice across Generations—(Enroll in Political Science 158R.)
5 units, Aut (O’Reich)

159R. Issues in Public Service—(Enroll in Political Science 159R.)
5 units, Win (Reich)

164. Introduction to Race and Ethnicity in the American Experience—(Enroll in History 64, American Studies 164.)
5 units, Win (Castillo)

167/267. Seminar: Gender, Development, and Women’s Human Rights in International Perspective—(Enroll in Political Science 167/267.)
5 units, Aut (Okin)

170. Kantian Ethical Theory—(Enroll in Philosophy 170.)
4 units, Win (Jaworska)

172/272. Is Morality too Demanding?—(Enroll in Philosophy 172/272.)
4 units (Gruen) not given 1999-2000

176B. Philosophy of Law—(Enroll in Philosophy 176B.)
4 units, Aut (Gruen)

177. Philosophical Issues Concerning Race and Racism—(Enroll in Philosophy 177.)
4 units, Spr (Satz)

190. Ethics in Society Honors Seminar—(Same as Philosophy 178.)
Interdisciplinary. Students present issues of public and personal morality; topics are chosen with the advice of the instructors. Student-prepared reading list is made available a week prior to the presentation. Group discussion follows.
3 units, Win (Reich)

200A/B. Honors Thesis—Limited to Ethics in Society honors students.
8-10 units, any two quarters (Staff)

222D. Human Rights Issues in Sub-Saharan Africa—(Enroll in Political Science 222D.)
3-5 units, Spr (Abernethy, Diamond)

266. Seminar: Gender and Western Political Theory—(Enroll in Political Science 266.)
5 units (Okin) not given 1999-2000

268. Seminar: Contemporary Theories of Justice—(Enroll in Political Science 268.)
5 units (Okin) not given 1999-2000

271. Ethics: Topics in Democratic Theory—(Enroll in Philosophy 271.)
3 or 5 units (Ferejohn, Satz) not given 1999-2000

FEMINIST STUDIES

Chair: Estelle Freedman
Program Committee:
Staff: Cathy Jensen, Ineko Tsuchida

Resource Faculty and Staff:
Anthropological Sciences: Hill Gates
Art and Art History: Wanda Corn, Pamela Lee, Suzanne Lewis, Melinda Takeuchi
Asian Languages: Susan Matsioff, Yoshiko Matsumoto
Business: Joanne Martin, Sonja Grier
Chemistry: Carl Djersassi
Classics: Andrea Nightingale, Susan Treggiari
Comparative Literature: Patricia Parker
Cultural and Social Anthropology: Paulla Ebron, Akhil Gupta, Miyako Inoue, Purnima Mankekar, Sylvia Yanagisako
Drama: William Eddelman, Harry J. Elam, Cherrie Moraga, Anna Deaver Smith
Education: Elizabeth Cohen, Francisco Ramirez, David Tyack
English: Eavan Boland, Terry Castle, Sandra Drake, Barbara Gelpi, Maureen Harkin, Sharon Holland, Diane Middlebrook, Paula Moya, Stephen Orgel, Horace Porter, Ramon Saldivar, Jennifer Summit, Elizabeth Tallent
Feminist Studies: Susan Krieger
French and Italian: Brigitte Cazelles, Carolyn Springer
German Studies: Russell Berman, Kathryn Strachota
History: Phillippe Buc, Paula Findlen, Estelle Freedman, Kennell Jackson, Nancy Kollmann, Carolyn Lougee, Mary L. Roberts, Michael Thompson
Human Biology: Ellen Porzig
Institute for Research on Women and Gender: Ineko Tsuchida
Law: Barbara Babcock, Janet Halley, Margaret Radin, Deborah Rhode
Library: Kathryn Kerns
Linguistics: Penny Eckert, Shirley Heath
Medical School: Anne Arvne, Helen Blau, Roy King, Cheryl Koopman, Herbert Liederman, Iris Litt, Charles Massion
Philosophy: Lorie Gruen, Debra Satz
Political Science: Elisabeth Hansot, Terry Karl, Susan Okin
Psychology: Albert Bandura, Laura Carstensen, Peter Hegarty, Hazel Markus
Religious Studies: Rudy Busto, Hester Gelber
Slavic Languages: Monika Greenleaf
Sociology: Cecilia Ridgeway
Spanish and Portuguese: Claire Fox, Mary L. Pratt, Yvonne Yarbro-Bejarano

Feminist Studies is an interdisciplinary undergraduate program investigating the significance of gender in all areas of human life. Feminist analysis is based on the assumption that gender is a crucial factor in the organization of our personal lives and our social institutions. It focuses on how gender differences and gender inequality are created and perpetuated. The courses offered by the program use feminist perspectives to expand and reevaluate the assumptions at work in traditional disciplines in the study of individuals, cultures, social institutions, policy, and other areas of scholarly inquiry.

The Program in Feminist Studies coordinates the courses offered on women, gender, sexuality, and feminism throughout the University and facilitates the undergraduate major and minor in Feminist Studies. In addition, it seeks to encourage feminist analysis and teaching at Stanford, both in courses instituted within the program and those housed within departments.

The committee awards the annual Michelle Z. Rosaldo and Francisco Lopes prizes for the best undergraduate essays on women, gender, or feminism. The prizes are awarded in two divisions: a thesis division for senior honors theses and masters’ papers written by undergraduates in coterminal degree programs, and an essay division. The Rosaldo prizes are awarded for the best work in the social sciences and the Lopes prizes for the best work in the humanities. Submissions are due in the Feminist Studies office April 20 for essays and May 20 for theses. Essays and theses completed later in Spring Quarter may be submitted for consideration the following year.
UNDERGRADUATE PROGRAMS
BACHELOR OF ARTS

The major in Feminist Studies may be taken as a single major, as one of multiple majors, or as a secondary major. If taken as one of multiple majors, none of the 60 units counted toward the major in Feminist Studies may overlap with units counted toward the major in another department or program. But if taken as a secondary major, then up to 30 of the units counted toward the Feminist Studies major may also be counted toward fulfilling the major requirements in another department or program if that department or program consents. A maximum of 10 of the 60 units for the major may be taken on a satisfactory/no credit basis; a maximum of 10 may be taken as independent study or directed reading.

Students interested in Feminist Studies should consult with the chair or program coordinator during sophomore year. The major should normally be declared by the beginning of a student’s third year, and must be declared by the senior year. Curriculum guidelines are available at the Feminist Studies office in Serra House, telephone (650) 723-2412, or visit the web site at www.stanford.edu/dept/femstudies. Majors should choose two faculty advisers, one of whom is usually the chair of the program, from the list of resource faculty (see above) and may consult with peer advisers. Faculty advisers work closely with the student in helping design an appropriate program of study. A proposal explaining the rationale for the plan of study and signed by both advisers must be submitted to the program office. The program office arranges a meeting between the student, chair, and the other adviser at the student’s request.

CURRICULUM

The following course of study is recommended for a major in Feminist Studies: a minimum of twelve courses (a core of five plus seven others) for a total of at least 60 units. The seven courses not in the core should be chosen in consultation with the student’s advisers. To ensure coverage, intellectual focus and breadth in the program, and practical experience, the twelve courses required for the major should be distributed among the core (five courses), the focus (at least five courses), and electives. A practicum is also required, in addition to the twelve courses above. At least one course must focus on cross- or multicultural feminist studies.

CORE

The core consists of five courses. The first three are required and the remaining two should be chosen from the list of feminist studies courses. One of these courses should be in the social sciences, the other in the humanities.

Courses that fulfill the social science requirement in the Feminist Studies (FS) major can be found among courses listed under Cultural and Social Anthropology, Education, History, Human Biology, Law, Political Science, Psychology, and Sociology. Courses that fulfill the humanities requirement in the Feminist Studies major can be found among courses listed in English, Philosophy, Religious Studies, the arts, and languages.

Required Courses—FS 101 (Introduction to Feminist Studies), 102 (a theory course), and 103 (a methodology course). 101 is a prerequisite for FS 102 and 103.

FOCUS

The seven courses not part of the core, at least five should reflect a particular thematic focus, and all seven should be chosen in consultation with the student’s advisers.

1. At least three of the focus courses should be Feminist Studies courses or be selected from the list of affiliated courses in other departments and programs (see below).
2. At least one should be a major survey, methodology, or theory course, offered by a department or interdepartmental program as an initiation into the practice of study in the field.

The following thematic clusters illustrate foci that individual students can design, in consultation with their advisers:

Cross-Cultural Perspectives on Gender
for honors certification no later than the third quarter of the junior year.
To apply, students must first consult the Chair of the Program in Feminist Studies outlining the plan for course work, the rationale for the program, and an honors project. The chair acts as one of the student’s faculty advisers and helps the student select two other faculty advisers to supervise the student’s progress.

Requirements—
1. Thirty units of course work in addition to the units granted for the honors project.
   a) 15 units of core courses: Feminist Studies 101, 102, and 103.
   b) Select the remaining 15 units, in consultation with advisers, from the list of courses approved by the Feminist Studies program. None of the courses selected may simultaneously count toward the student’s major.
2. Submit in the senior year two preliminary drafts, and then a final draft, of a thesis based on substantial research. The thesis must be of acceptable quality on an aspect of Feminist Studies approved by the student’s faculty advisers. The final draft must be submitted three weeks before the end of exam week during Spring Quarter on May 19. Students enroll in FS 105 for 10-15 units of credit for preparation of the honors thesis, but these units do not count toward requirement ‘1.’

COURSES
(WIM) indicates that the course meets the Writing in the Major requirements.

Courses listed under the Core and Interdepartmental Offerings contain a significant component of attention to gender difference, the situation of women in Western or non-Western cultures, or the role of sexism in social organization. Some courses are planned after this bulletin is printed. Updated listings are available at the Feminist Studies office and on the web site at www.stanford.edu/dept/semstudies.

CORE

101. Introduction to Feminist Studies—(Same as History 173C.) How gender inequality is created and perpetuated, and when feminist theory and movements emerge to respond to gender inequality. Topics: theories of inequality; history of feminism; international and multicultural perspectives on feminism; women’s work, health, and sexuality; creativity; spirituality; and movements for social change. GER:3b,4c (DR:9f)
   5-6 units, Aut (Freedman)

103B/203B. Subjectivity in Feminist Research—Development of each student’s personal voice in feminist research and writing. Emphasis is on the diversity of women’s experiences. Fosters skills in personal essay writing. Prerequisites: 101, consent of instructor.
   5 units, Spr (Krieger)

104. Practicum/Senior Seminar—For Feminist Studies majors only. Two-quarter, biweekly senior seminar. Students present oral reports on the relationship of the practicum to their academic work, submit a written analysis of the practicum, and discuss applications of feminist scholarship. Honors majors also begin thesis work in the seminar. (WIM)
   3-6 units, Aut, Win (Townsend)

105,106. Honors Work

108. Internship in Feminist Studies—For non-majors. Augments relevant course work in Feminist Studies with a supervised field, community, or lab experience, e.g., law offices, medical research and labs, social service agencies, legislative and other public offices, and local and national women’s organizations. Credit represents approximately three hours work per unit each week. Required: a 3-5 page statement on the nature of the internship and its relevance to Feminist Studies. Must be arranged in advance through the program office (see application form on our web page). Prerequisites: at least one course in Feminist Studies, written consent of faculty sponsor.
   1-6 units, any quarter

195. Directed Reading

INTERDEPARTMENTAL OFFERINGS

71N. Stanford Introductory Seminar: Language and Gender in Japan—Myths and Reality—(Enroll in Asian Languages 71N.)
   3 units, Spr (Matsumoto)

119. Critical Perspectives on Popular Culture—(Enroll in Cultural and Social Anthropology 13.)
   5 units, Spr (Mankekar)

130. Gender and Education—(Enroll in Education 170.)
   4 units, Aut (Christopher)

134. Sociology of Gender—(Enroll in Sociology 142.)
   3-5 units, Spr (Ridgeway)

139. Rereading Judaism in Light of Feminism
   4-5 units, Aut (Karlin-Neumann)

139A. Education and the Status of Women: Comparative Perspective—(Enroll in Sociology 134, Education 197.)
   4-5 units, Win (Ramirez)

160A. Dance, Gender, and History—(Enroll in Dance 160.)
   3-4 units, Win (Ross)

160B. Dance and Live Art in the 20th Century—(Enroll in Dance 161.)
   3-4 units, Spr (Ross)

168C. Introduction to Chicana/o Literature—(Enroll in English 168C.)
   not given 1999-2000

169B. Race and Sexuality—(Enroll in Spanish and Portuguese 389E.)
   5 units, Win (Yarbro-Bejarano)

170. The 19th-Century English Novel—(Enroll in English 132G.)
   5 units, Aut (Alfano)

179. Stanford Introductory Seminar: Gender, and Interaction in the U.S.—(Enroll in Sociology 40N.)
   5 units, Win (Ridgeway)

214A. Medieval Women—(Enroll in German Studies 134P.)
   4 units (Poor) not given 1999-2000

240/340. Lesbian Communities and Identities—Scholarship and research on lesbian experiences. Issues of homophobia, lesbian intimacy and sexuality, femme and butch roles, lesbian separatism, and the diversity of lesbian communities and identities. Prerequisite: consent of instructor.
   5 units, Spr (Krieger)

260. Seminar: Gender and Western Political Theory—(Enroll in Political Science 266.)
   5 units (Okin) not given 1999-2000

267. Seminar: Gender, Development, and Women’s Human Rights in International Perspective—(Enroll in Political Science 267.)
   5 units, Aut (Okin)

285B. Chicana Cultural Studies—(Enroll in Spanish and Portuguese 285E.)
   3-5 units, Spr (Yarbro-Bejarano)

301. Graduate Seminar in Interdisciplinary Feminist Scholarship
   3-5 units, Spr (Neyer)
AFFILIATED DEPARTMENTAL LISTINGS

These courses also count toward the Feminist Studies major and minor.

ANTHROPOLOGICAL SCIENCES
102. Women, Fertility, and Work
5 units (Gates) not given 1999-2000

CULTURAL AND SOCIAL ANTHROPOLOGY
77. Japanese Society and Culture
5 units, Win (Inoue)

DRAMA
65. American Musical Theater: Broadway/Hollywood
4 units, Aut (Eddelman)

156. Contemporary Ethnic Drama
4 units (Elam) alternate years, given 2000-01

EDUCATION
201. History of Education in the United States
3 units, Aut (Tyack, Williamson)

FRENCH AND ITALIAN
192E. Images of Women in French Cinema: 1930-1990
3-5 units, Spr (Apostolides)

HUMAN BIOLOGY
128. The Human Gamete and Pre-Embryo
3 units, Aut (Porzig)

LAW
307. Gender, Law, and Public Policy—(For graduate students.)
3 term units (Rhode)

LINGUISTICS
146. Language and Gender
4 units, Aut (Eckert)

MEDICINE
237. Women and Health
1-2 units, Aut (Grudzen, Massion)

MUSIC
14N. Stanford Introductory Seminar: Women Making Music
3 units, Win (Hadlock)

PHILOSOPHY
175. Feminist Practical Ethics
4 units (Gruen) not given 1999-2000

POLITICAL SCIENCE
151A. History of Political Thought I: Ancient, Classical, and Christian Worlds
5 units, Aut (Hansot)

151B. History of Political Thought II: The Origins of Modern Democracy
5 units, Win (Okin)

RELIGIOUS STUDIES
109. God and Gender: Christianity through the Eyes of Women
4 units, Win (Pitkin)

FINANCIAL MATHEMATICS

Director: George Papanicolaou
Core Faculty:
Business: D. Duffie, J. M. Harrison, K. Singleton
Economics: T. Amemiya, M. Kurz, F. Wolak
Electrical Engineering: T. Cover
Mathematics: A. Dembo, P. Diaconis, G. Papanicolaou

Steering Committee:

This is an interdisciplinary program that aims to provide a master's level education in applied and computational mathematics, statistics, and financial applications to individuals with strong mathematical skills. The departments of Mathematics and Statistics, in close cooperation with the departments of Economics, Engineering-Economic Systems and Operations Research, as well as the Graduate School of Business, provide many of the basic courses.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The program requires that the student take 36 units of work, or twelve courses of 3 units each, from the list of offerings provided below. Ordinarily, three or four quarters are needed to complete all requirements.

Admission—To be eligible for admission, students are expected to have taken the following courses or their equivalent:

1. Linear algebra at the level of Mathematics 103.
2. Advanced Calculus (Real Analysis) at the level of Mathematics 115.
5. Computer programming at the level of Computer Science 106A.

Some of these courses, for example, Statistics 217-218, are offered as Summer courses and can be taken by candidates lacking the required background. Additional information about summer courses is posted on the program web site; see http://math.stanford.edu/html/fmmath.html.

Candidates for admission must take the general Graduate Record Examination as well as the subject test in Mathematics. Information about this exam can be found in http://www.gre.org.

Requirements—For the M.S. degree in Financial Mathematics, students must fulfill the following six required courses:

1. In stochastic processes and statistics:
   a) Mathematics 236 (Introduction to Stochastic Differential Equations)
   b) Statistics 240 (Statistical Methods in Finance) or Economics 275 (Time Series).
2. In differential equations, simulation, and computing:
   b) Mathematics 240 (same as Statistics 245) (Computation and Simulation in Finance)
3. In finance and economics:
   b) Mathematics 241 (same as Statistics 250 and Economics 289) (Mathematical Finance)

These courses must be taken for letter grades, and an overall 2.75 letter grade point average (GPA) is required. There is no thesis requirement.
Courses that are equivalent to the above and have been taken previously may be waived by the adviser, in which case they must be replaced by elective courses in the same subject area.

In addition, students must take at least six approved elective courses from a list that can be found on the website; see http://math.stanford.edu/html/fmmath.html.

**COURSES**

The following are required core courses.

**MATHEMATICS**

3 units, Spr (Papanicolaou)

3 units, Win (Liu)

3 units, Aut (Mattingly)

3 units, Spr (Papanicolaou)

**241. Mathematical Finance**—(Enroll in Statistics 250.)
3 units, Spr (Lai)

**STATISTICS**

**240. Statistical Methods in Finance**—Regression analysis and applications to the Capital Asset Pricing Model and multifactor pricing models. Smoothing techniques and estimation of yield curves. Classification and credit risk. Statistical analysis and econometric modeling of financial time series. Problem sets include hands-on experience with real data.
3 units, Win (Owen)

**245. Computation and Simulation in Finance**—(Enroll in Mathematics 240.)
3 units, Spr (Papanicolaou)

3 units, Spr (Lai)

**FILM STUDIES**

Stanford does not offer an undergraduate major in Film Studies, but a number of courses are offered in various departments. A professional A.M. curriculum in Documentary Film and Video Production is offered by the Department of Communication.

**COURSES**

**ART AND ART HISTORY**

**140/240. Introduction to Film Study**
4 units, Aut (Bukatman)

**249. Seminar: French New Wave Film (1958-68)—Theory and Practice**
4 units, Spr (Lewis)

**347. Phenomenology of Film**
4 units, Win (Bukatman)

**COMMUNICATION**

The following courses are open to all students:

**122A/222A. Documentary Film**
5 units, Aut (Breitrose)

**141B/241B. History of Film: The Second 50 Years**
5 units, Win (Breitrose)

**CULTURAL AND SOCIAL ANTHROPOLOGY**

**13. Critical Perspectives on Popular Culture**
5 units, Spr (Mankekar)

**ENGLISH**

**3C. Writing about Literature**
4 units, Aut, Win, Spr (Staff)

**61N. Stanford Introductory Seminar: The Films of Woody Allen**
3 units, Win (Polhemus)

**FRENCH AND ITALIAN**

**20B. French Cinema**
2 units, Win (Staff)

**189Q. Stanford Introductory Seminar: Romance—Texts and Movies**
4 units, Win (Caselles)

**191E. The Cinema as a Space of the Sacred**

### FOOD RESEARCH INSTITUTE

Emeriti: (Professors) Bruce F. Johnston, Dudley Kirk, Clark W. Reynolds
Director: Carl H. Gotsch
Professors: Carl H. Gotsch, Timothy E. Josling, Scott R. Pearson, Anne E. Peck, Pan A. Yotopoulos

The Food Research Institute (FRI), a research and teaching unit in the School of Humanities and Sciences, was founded 75 years ago to study problems of food supply, distribution, and consumption on a world-wide scale. The range of its investigation comprises the world food and agricultural economy, domestic and international trade in primary products, agriculture and economic development, and world population problems.

FRI will be closed in the near future and no new graduate students are being admitted. During 1999-2000, faculty will offer courses to assist continuing FRI doctoral students complete their graduate programs. Some of the courses offered are open to undergraduate and graduate students from other departments, as indicated. Check the Time Schedule each quarter for course offerings.

### FRENCH AND ITALIAN

Emeriti: (Professors) Robert G. Cohn, John Freccero, Raymond D. Giraud, René Girard, Ralph M. Hester, Alphonse Julliard, Pauline Newman-Gordon, Roberto B. Sangiorgi, Leo Weinstein
Chair: Jeffrey T. Schnapp
The French Section provides students with the opportunity to pursue course work at all levels in French language, literature, cultural and intellectual history, theory, film, and francophone studies. It understands the domain of “French Studies” in the broadest possible sense: as encompassing the complex of cultural, political, social, scientific, commercial, and intellectual phenomena associated with French-speaking parts of the world, from France and Belgium to Canada, Africa, and the Caribbean.

Three degree programs are available in French: an A.B. (with two concentrations, one literary, the other interdisciplinary), a terminal A.M., and a Ph.D. (with various possible minors and combined degrees).

A curator for Romance Languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes a wealth of materials on 20th-century France and on French social and political movements.

A distinguished group of visiting faculty and instructors contribute regularly to the life of the French Section. The section maintains frequent contacts with the Ecole Normale Superieure, the Institut d'Etudes Politiques, the Ecole Polytechnique, and other prestigious institutions.

Stanford in Paris — The Stanford Overseas Program in Paris offers undergraduates the opportunity to study in France during the Autumn and Winter Quarters. It provides a wide range of academic options, including course work at the Stanford center and at the University of Paris, independent study projects, and internships. In addition, the program promotes a high degree of interaction with the local community through volunteer employment, homesteads, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Specialized offerings at the Stanford home campus and in Paris encourage engineering students to study abroad and to coordinate internships through the department to work in France. All students are encouraged to consult with the Director of Undergraduate Studies before attending the program, and after returning, in order to ensure that course work and skills acquired abroad can be coordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the Overseas Studies section of this bulletin, the Paris website http://www.osp.stanford.edu/Paris/, or from the Overseas Studies Office in Sweet Hall.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The French Section offers a two-track major in French and a minor. Each of these programs encourages students to pursue a course of study tailored to their individual needs and interests. The purpose of an undergraduate degree in French is necessarily variable. For some students such a degree may serve as a stepping stone to entering the domains of international business or law; for others it may provide training for a career as a translator or teacher; for others still it may serve as preparation for graduate studies in French, History, or Comparative Literature. This variability argues for the sort of flexibility that characterizes the French major. Two principal tracks are available. The first consists of a “French Literature concentration.” It corresponds to a traditional French major, with the bulk of course work done within the French Section and devoted to advanced language training and to the study of French literature, culture, and civilization. The second track consists of a “French Studies concentration” and is intended as a non-traditional, interdisciplinary alternative to the first concentration. It allows students to combine work in French with studies in fields such as African Studies, Art History, Economics, History, International Relations, Music, and Political Science, or in other foreign languages and literatures.

Prerequisites — Before declaring a French major, a student must be proficient in written and spoken French at a second-year college level. Such proficiency must be demonstrated either (1) by having completed the entire language sequence up to and including French 23, (2) by having scored a 5 or better on either the French language or the French literature Advanced Placement (AP) exams, or (3) by having demonstrated equivalent proficiency on the departmental placement exam offered at the beginning of each academic quarter. Students not meeting at least one of these criteria are required to complete such portion of the language sequence as deemed necessary by the department before beginning to take courses toward the major.

Declaring a Major — Before declaring a French major, the prospective major is required to schedule an appointment with the Director of Undergraduate Studies. This informal meeting is designed to introduce the student to the department and to answer any questions that the student may have regarding the various options that are available.

After this meeting, the student is asked to draft a brief statement of purpose (one-to-two pages) describing his or her intellectual goals and interests within the discipline, and his or her intentions as regards the different concentrations. This statement is a nonbinding draft meant to encourage each student to carefully consider his or her course plans, with an eye towards the Senior Project (see below) or honors thesis.

Majors are formally accepted into the department upon review of the statement and of their language competency. Once accepted, a student should declare the French major with the Registrar’s Office and arrange for the academic file to be delivered to the Department of Undergraduate Studies.

REQUIREMENTS

Irrespective of the concentration chosen, the French major requires a minimum of 56 units, to be selected in accordance with the following requirements:

1. Introductory Series on French and Francophone Literature and Culture (12 units): three courses must be taken from the French 130, 131, 132, and 133 sequence.
2. Advanced Language (4 units): French 261 (prerequisite; 123, 124, 125, or consent of instructor) or Overseas Studies 126P must be taken. Either course fulfills the Writing in the Major (WIM) requirement.
3. Research Seminar (3 units): a majors-only seminar, French 289, must be taken in the Autumn Quarter of the senior year. This course prepares and assists students as they undertake either their Senior Project (see below) or honors thesis. It also familiarizes them with research resources in the department and University and helps students think critically about their research topics. By the end of the course, students must have chosen either a project adviser or a thesis adviser, generally a faculty member in the department, who offers support and feedback throughout the development of the Senior Project or honors thesis.

Senior Project — In order to demonstrate the quality of his or her scholarly work and command of written French, each major not writing an honors thesis (see “Honors Program” below) is required to submit a senior project to the project adviser before May 15 of the senior year.

The French Section offers a two-track major in French and a minor. Each of these programs encourages students to pursue a course of study tailored to their individual needs and interests. The purpose of an undergraduate degree in French is necessarily variable. For some students such a degree may serve as a stepping stone to entering the domains of international business or law; for others it may provide training for a career as a translator or teacher; for others still it may serve as preparation for graduate studies in French, History, or Comparative Literature. Students not meeting at least one of these criteria are required to complete such portion of the language sequence as deemed necessary by the department before beginning to take courses toward the major.

Declaring a Major — Before declaring a French major, the prospective major is required to schedule an appointment with the Director of Undergraduate Studies. This informal meeting is designed to introduce the student to the department and to answer any questions that the student may have regarding the various options that are available.

After this meeting, the student is asked to draft a brief statement of purpose (one-to-two pages) describing his or her intellectual goals and interests within the discipline, and his or her intentions as regards the different concentrations. This statement is a nonbinding draft meant to encourage each student to carefully consider his or her course plans, with an eye towards the Senior Project (see below) or honors thesis.

Majors are formally accepted into the department upon review of the statement and of their language competency. Once accepted, a student should declare the French major with the Registrar’s Office and arrange for the academic file to be delivered to the Department of Undergraduate Studies.

REQUIREMENTS

Irrespective of the concentration chosen, the French major requires a minimum of 56 units, to be selected in accordance with the following requirements:

1. Introductory Series on French and Francophone Literature and Culture (12 units): three courses must be taken from the French 130, 131, 132, and 133 sequence.
2. Advanced Language (4 units): French 261 (prerequisite; 123, 124, 125, or consent of instructor) or Overseas Studies 126P must be taken. Either course fulfills the Writing in the Major (WIM) requirement.
3. Research Seminar (3 units): a majors-only seminar, French 289, must be taken in the Autumn Quarter of the senior year. This course prepares and assists students as they undertake either their Senior Project (see below) or honors thesis. It also familiarizes them with research resources in the department and University and helps students think critically about their research topics. By the end of the course, students must have chosen either a project adviser or a thesis adviser, generally a faculty member in the department, who offers support and feedback throughout the development of the Senior Project or honors thesis.

Senior Project — In order to demonstrate the quality of his or her scholarly work and command of written French, each major not writing an honors thesis (see “Honors Program” below) is required to submit a senior project to the project adviser before May 15 of the senior year. The
project consists of a research paper with a target length of 20 pages and must be written in French.

The senior project is not graded and no credit is offered for it. However, acceptance of the senior project by the project adviser is a condition for graduation from the department. A paper deemed unsatisfactory by the project adviser is returned to the student for reworking and resubmission by an agreed-upon date.

Students are advised to begin thinking about their senior projects as early as their junior year, even if they are in Paris. While in Paris, students should avail themselves of the unique resources the city has to offer for research on their chosen topic.

THE TWO CONCENTRATIONS (36 units minimum each)

All majors, whether or not they are applying for honors, must choose one of the following two concentrations in structuring their course of study.

FRENCH LITERATURE

This concentration is appropriate for students whose interests are such that most of their course work towards the major is done within the French Division. In addition to the required courses listed above, they must enroll in at least nine additional courses. Of these nine, four must fulfill the Ancien Régime requirement detailed below.

1. Ancien Régime Courses (approx. 16 units): at least four courses must concern the period before July 1789. Courses fulfilling this requirement within the department must be drawn from above the 190 level. Courses chosen from outside the department must be preapproved by the Director of Undergraduate Studies.

2. Remaining Courses (approx. 20 units): the student is encouraged to use the remaining five or more courses to develop a specialized knowledge of a specific domain related to either the Senior Project or the honors thesis.

FRENCH STUDIES

The department also accommodates students who would like to combine their interest in French with the study of other disciplines or literatures. In the past, students have completed majors in French and African Studies, French and Economics, French and English, French and European Studies, French and German, French and Italian, and French and Linguistics. Students who wish to elect the French Studies Concentration are required to draw up a proposal for a rigorous and coherent course of study (consisting of a paragraph-long description of the field of concentration and a course plan) and present it to the Director of Undergraduate Studies for approval no later than May 15 of the junior year. Proposals must include no more than 24 units of study pursued outside the department, all of which must be at the upper-division level and must be drawn from above the 190 level. Courses chosen from outside the department must be preapproved by the Director of Undergraduate Studies.

CROSS-DISCIPLINARY STUDIES

FRENCH AND ENGINEERING

Engineering majors may elect to include in their program from four to six specially designed courses in French. The actual number of courses is dependent on competency in French and is determined in consultation with an adviser. Courses in engineering taken at French institutions during a student’s attendance at the Stanford Paris Program, as well as internships in French firms may count as part of this extended major. Admission to engineering courses in Paris requires an advanced proficiency level, to be determined with a department adviser. Engineering majors successfully completing a major in French are also eligible for a Certificate of Advanced Proficiency in French upon their passing an official proficiency test for technological and scientific French sanctioned by the French government. This certificate, which is noted on the official transcript, is widely accepted by French-speaking countries of the European Union and in most Francophone countries throughout the world, as guaranteeing the certificate holder’s high-level competency in French. Engineering students wishing to extend their major to include French and to include Paris Program courses and internships in France must consult closely with advisers in Engineering, French, and Overseas Studies.

The program includes the following courses given in French specially designed for students in technology and science:

- Course No. and Subject
- Unit

126. Technological and Scientific French 3-5
127. French Media and Communications 3-4
128. Technocritique 3-5
129. Advances of Technology in Europe 3-5

Two courses in Engineering have discussion sections in French (see below under content-based discussion sections):

50. Introductory Science of Materials 1-3
60. Engineering Economy 1-3

The School of Engineering, the Department of French and Italian, and the Stanford Overseas Studies Office have information on engineering courses offered through the Stanford Center in Paris by affiliated French institutions (Ecole Polytechnique, Ecole des Mines, Conservatoire National des Arts et Metiers).

FRENCH AND LINGUISTICS

Linguistics majors may elect to specialize in the French language. In addition to 50 units in Linguistics, of which two courses (110 and 160) may be replaced by comparable courses in French, students opting for French Language Specialization must take three courses in the introductory series devoted to French and Francophone literature and culture (130-133). For full details, please contact the Department of Linguistics.

HONORS PROGRAM

Majors are eligible to apply to the honors program if they have maintained an average grade point average (GPA) of 3.5 in five upper-division French courses. The honors program candidate must fulfill all reg-
ular requirements for the major, save the Senior Project, from which he or she is exempt. Instead, the student undertakes the writing of a research paper no shorter than fifty pages in length, written in French, on a specialized topic. No later than the end of the Spring Quarter of the junior year, preferably after completion of the research seminar, the student must submit to the Director of Undergraduate Studies an Application for Honors in French, the central portion of which must contain an outline of the proposed honors essay. If it is in need of revisions, the Director of Undergraduate Studies helps the student through the revision process until the proposal is granted his or her approval. (The Director of Undergraduate Studies also helps the student identify an appropriate adviser for the essay.) Once the application is approved, the student may receive 9 to 12 units of credit for independent work on the honors essay by enrolling in French 198. All honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of grade of ‘A-’ or ‘A’ by the thesis adviser, honors are granted at the time of graduation.

Honors College—The Department of French and Italian encourages all honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages. The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by the Spring Quarter of the same calendar year. For more information, contact the department administrator.

LA MAISON FRANÇAISE

La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings and lectures by distinguished representatives of French and francophone intellectual, artistic, and political life.

GRADUATE PROGRAMS

Admission to the A.M. and Ph.D. Programs—Applications and admission information may be obtained from Graduate Admissions, in the Registrar’s Office. Applicants should read carefully the general regulations governing degrees in the “Graduate Degrees” section of this bulletin. They should have preparation equivalent to an undergraduate major in French and should also have reached a high level of speaking and writing proficiency in French. Previous study of a language other than French is also highly desirable. Recent Graduate Record Examination (GRE) results are required, as is a writing sample representative of the applicant’s best undergraduate work.

MASTER OF ARTS

[Terminal Program]

The terminal A.M. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 36 units of graduate work, with a grade point average (GPA) of ‘B+’ as well as pass the master’s examination at the end of their training. To fulfill the requirements in a single year, enrollment must be for an average of 12 units per quarter.

Applications for admission to the Masters of Arts program must be received by May 31 of the prior year. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

Requirements

The basic program of 36 units requires the following course work:

1. One teaching methodology course, ordinarily “The Learning and Teaching of Second Languages,” the second-language-pedagogy course offered by the Stanford Language Center.
2. A cultural history course (to be taken either inside or outside the Department of French and Italian).
3. A course in stylistics and textual analysis (261 or equivalent).
4. All remaining units are to be taken in advanced literature courses (200 level or above), three of which must be concerned with the prerevolutionary period of French cultural history.

The Stylistics and Textual Analysis (261) requirement is designed to insure that A.M. students have achieved a high level of proficiency in written and oral expository French and a familiarity with various modes of literary-critical writing. Master’s students who have already achieved a high degree of competence in writing in French (either at Stanford or elsewhere) may, with the approval of the Director of Graduate Studies, be exempted from this requirement upon presentation of a sample seminar paper in the quarter prior to that during which 261 would otherwise be taken.

EXAMINATION

The terminal A.M. examination is normally administered two weeks before the end of the Spring Quarter by the three members of the examination committee, selected each year by the Director of Graduate Studies. It consists of two parts:

1. The written exam (two hours) tests the candidate’s general knowledge of French literature and is based on the same reading list as that for the Ph.D. qualifying exam (see below).

   The exam requires that the candidate answer four questions (out of six) in a manner that demonstrates his/her ability to synthesize and draw parallels between periods, genres, and systems of representation on the basis of the standard reading list. At least one question must be answered in French and two in English. Use of a dictionary is allowed.

   If the student’s performance on the exam is deemed a “pass” by two out of three of the members of the examining committee, the student is then permitted to go on to the oral examination (which is ordinarily taken later the same week).

   Should the candidate fail the A.M. written exam, he/she is given a second chance at the end of the Spring Quarter.

2. The oral exam (one-hour) assumes as its point of departure the student’s answers on the written exam. It examines the candidate’s knowledge and understanding of French literary history on the basis of the standard reading list.

   At the conclusion of the oral exam, the examination committee meets in closed session and discusses the student’s performance on the written and oral portions of the examination. If it is judged adequate, the A.M. degree is granted. In no event may the master’s written and oral exams be taken more than twice.

DOCTOR OF PHILOSOPHY

The Department of French and Italian provides students with the opportunity to pursue advanced work in French language, literature, cultural history, theory, and francophone studies within a uniquely flexible interdisciplinary framework. Unlike conventional Ph.D. programs, it encourages students to construct a highly individualized course of study, integrating specialization in a particular literary period or area with work in such fields as art history, classics, film studies, the history of science and technology, linguistics, literary theory, music, and philosophy. The program is founded on the belief that such a balance between period/area specialization and interdisciplinary breadth is not only desirable but essential in a field such as French Studies. Students in the Ph.D. program are normally admitted as French Fellows on a four to five year fellowship plan that integrates their financial support with rigorous training as scholars and as prospective university faculty.

Students admitted to the program work closely with the Director of Graduate Studies in structuring a plan consistent with their needs and interests. Aside from the benefits of the program’s flexible structure, a number of unique resources are available to students. The French Section’s exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris.
ADVISORY

Given the interdisciplinary nature of the Ph.D. program in French and the opportunity it affords each student to create an individualized program of study, regular consultation with an advisor is of the utmost importance. The advisor for all entering graduate students is the Director of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the first year of study, each student must choose a faculty advisor whose expertise is appropriate to his or her own area of research and interests.

Entering graduate students are also paired with a faculty mentor as a function of their stated research interests at the time of admission. The role of the mentor is to advise the student on an informal basis regarding the student’s academic program and plans.

REQUIREMENTS

A candidate for the Ph.D. degree in French must complete at least 72 units of graduate-level study beyond the bachelor’s degree and teach five language courses in the section.

Students entering with a master’s degree or previous graduate work may receive credit as determined on a case-by-case basis, up to a maximum of 36 units. Fellowship funding and teaching requirements are adjusted according to University regulations.

REQUIRED/RECOMMENDED COURSES

Three courses are required:

1. **The Disciplines of Literature (French and Italian 369E),** a 5-unit seminar offered in the Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.

2. **Definition and Inquiry: Colloquium on Research Methods in French and Italian (French and Italian 201E),** a 3-unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.

3. **The Learning and Teaching of Second Languages, the second-language-pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.**

In addition to the above-required courses, native English speaking students are encouraged to enroll in Stylistics and Textual Analysis (French 261).

**Distribution of Elective Courses—**Apart from these requirements, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. Of the 72 minimum units of graduate course work required for the Ph.D., at least 52 units must be taken within the Department of French and Italian.

**Language Requirements—**Attaining a native or near-native fluency in French is the individual responsibility of all candidates in the Ph.D. program and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree. In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and his or her advisor as a function of the student’s area of specialization. Such proficiency may be demonstrated either by successfully completing a third-year level or above undergraduate course or, better, a graduate seminar in the language in question; or by passing an exam that establishes a high level of proficiency, which is judged sufficient for admission to candidacy for the Ph.D. If the overall exam is judged insufficient for admission to candidacy for the Ph.D., students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis.

The examining committee consists of two faculty members selected by the student, as well as the Director of Graduate Studies.

Two weeks before the exam, the student must submit a graduate seminar paper which he or she considers representative of the quality of his or her graduate work at Stanford. Students may receive up to 3 units of credit for the reworking, in close cooperation with a faculty member of this paper prior to its submission. The goal of this reworking is to produce a text of publishable quality.

On the basis of this paper, the results of the qualifying examination, and an evaluation of the student’s overall progress, the members of the student’s examining committee will vote for or against admission to candidacy for the Ph.D. The terminal master’s degree may be awarded to students who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall exam is judged insufficient for admission to candidacy for the Ph.D., students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis. Subject to approval by the Director of Graduate Studies and department Chair, students already holding an advanced degree in French Studies, when admitted to the French Ph.D. program, may be excused from the qualifying exam. However, they must present a formal request for waiver to the Director of Graduate Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

**Special Topic Examination—**The second oral examination, which normally takes place at the end of Spring Quarter of the second year of study, concerns a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her advisor and the Director of Graduate Studies. Students should design this research project so that it has the breadth and focus of a book they might write or a seminar they might teach. The proposed topic should be discussed with the Director of Graduate Studies before the end of the quarter preceding the quarter in which they plan to take the exam. The student and the Director of Graduate Studies choose a committee of two faculty members
with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) In addition to these two members, the examination committee includes the Director of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee.

At the beginning of the quarter in which he or she takes this examination, the student discusses plans for the section with committee members, who offer suggestions on the project and on the reading list. In general, the reading list should be between one and two single-spaced pages in length. In the course of the quarter, the student should regularly consult with committee members to discuss his or her progress. The actual examination lasts one hour. The candidate must present a tentative reading list to the members of the committee about twelve weeks before the examination and a final reading list at least one week before the examination. This list, to be headed by a title describing the topic of the examination, may be divided into two parts: "core" works that the student has found to be central to his or her topic, and works that fill out the "periphery" of the topic. Two copies of the final reading list must be given to the Student Services Officer for the Division of Languages, Cultures, and Literatures: one for the student's file and one for a special file which subsequent students can consult. The examination assumes the form of an oral colloquium between the student and the examining committee. It concentrates on the conclusions to which the student's research has led him or her, and aims to determine the student's overall mastery of the research topic in question. At the beginning of the examination, the student presents a talk of no longer than 20 minutes (not to be written out, but to be presented from notes) reviewing the results of his or her reading and outlining the major features and implications of the chosen topic. The remainder of the hour is devoted to a discussion between the student and the committee regarding the problems the student raised in the talk and the reading list itself.

The following procedures are applicable to both the qualifying and special topic exams:

1. The committee meets briefly at the end of the hour and immediately informs the student as to whether he or she has passed the examination.
2. In the week after the examination, the student is expected to meet individually with members of the committee to discuss strengths and weaknesses revealed during the qualifying exam or colloquium.
3. The Director of Graduate Studies places a brief letter describing each one-hour oral exam in the student's file, a copy of which is also be furnished to the student.

THE UNIVERSITY ORALS

The University Ph.D. examination follows most of the same procedures outlined above. Normally students put one, and at most two, full-time quarters of study into preparation for the exam. The University oral exam should virtually always be taken at the end of Spring Quarter of the third year of study. Students must complete minimum course requirements (as listed in the Stanford Bulletin) and all language and course requirements before the quarter in which they take the University oral examination.

Early in the quarter before they intend to take the University Ph.D. examination, students must discuss the scope and nature of the period to be covered, as well as the dissertation proposal, with the Director of Graduate Studies. The reading list should include works in all genres relevant to the period covered. The amount of "non-literary" or cross-disciplinary material on the reading list varies according to the period and the research interests of the student. Students ordinarily cover about a century of writing in great depth. As with the preceding examinations, the Director of Graduate Studies and the student determine the committee's makeup.

The governing principle is that the University oral examination in French must be a period examination rather than one on the specific concerns of the dissertation proposal, which is dealt with separately in a later colloquium. It follows from this basic principle that the examination will cover the major authors and genres in the student's period of choice. The lists may well include critical and scholarly works or texts from outside the traditional domain of French literary studies (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's "field."

The aim of the University oral is to establish the student's credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that constitute the cultural baggage essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and major genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work will prove relevant, but they should also remember that the examination is the central means of certifying their expertise in a literary period.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee and the Student Services Officer for the Division of Literatures, Cultures, and Languages no later than two weeks preceding the examination. Students must submit the Request for University Oral Exam form to the Student Services Officer for the Division of Literatures, Cultures, and Languages at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. Dissertation Reading Committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the two foreign languages the student presents to meet the language requirements. The two-hour examination consists of the following two parts:

1. Forty minutes: a 20-minute talk by the candidate followed by a 20-minute question and answer period concerning the talk. Working with the committee members, the candidate's adviser will prepare three or more questions to be presented to the candidate at 8:00 a.m. on the day of the examination. These questions concern broad topics pertinent to the candidate's reading list and period of specialization, including concerns relevant (but by no means limited to) the student's projected dissertation. The candidate chooses one of the questions and develops a 20-minute talk in response. Students must not read from a prepared text, but rather must speak from notes. They are free to consult any necessary materials while preparing the talk. The candidate is questioned for 20 minutes on the talk, with the dissertation adviser starting the questioning.
2. One hour, 20 minutes: questions on the area of concentration. Each member of the committee, except for the chair, is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications.

The University oral examination is a formal University event with a chair appointed from an outside department. It represents the last occasion for the faculty to evaluate a student's overall preparation as a candidate for the Ph.D. After the University orals, only the colloquium on the dissertation prospectus and certification of the final dissertation by the student's reading committee stand in the way of conferral of the Ph.D. The examination, therefore, is a unique significant event and is designed to evaluate the student's preparation as a specialist in a given sector of French studies, but within a broader context than that provided by a single course, hour examination, or even the dissertation itself.

DISsertATION

The doctoral dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope
of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

Colloquium on the Dissertation Proposal — The colloquium normally takes place in the quarter following the University oral examination; in most cases this means early in Autumn Quarter of the student’s fourth year of study. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student (lasting no more than ten minutes), and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double-spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project’s relation to prior scholarship on the topic, and lay out a complete chapter-by-chapter plan.

It is the student’s responsibility to schedule the colloquium no later than the first half of the quarter subsequent to the quarter in which the student passed the University oral examination. The student should arrange the date and time in consultation with the Student Services Officer and with the three examiners. The Student Services Officer schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

JOINT DEGREES AND MINORS

A candidate may also take a joint degree in French and Humanities, as described in the “Interdisciplinary Studies in Humanities” section of this bulletin. Minors are possible in Comparative Literature, Italian, Linguistics, Modern Thought and Literature, and other departments offering related courses such as Art and Art History, History, Music, Philosophy, Spanish, and so on.

Students interested in a joint degree or a minor should design their course of study with their adviser(s). Joint degrees and minors usually require 24 additional units. With careful planning, students may complete course work for the Ph.D. and the minor in a total of nine quarters.

Ph.D. Minor in French Literature — The department offers a minor in French Literature. The requirement for a minor in French is successful completion of 24 units of graduate course work in the French Section with a grade point average (GPA) of ‘B’ or above. Interested students should consult the graduate adviser.

ITALIAN SECTION

The Italian Section offers a variety of graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small and highly specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

On the undergraduate level, a number of options are available. In addition to the Italian major, students may choose from a minor in Italian, an honors program in the Humanities (see the Interdisciplinary Studies in Humanities section of this bulletin), an honors program in Italian, and a fourth major — one in Italian and French literature and one in Italian and English literature.

On the graduate level, programs of study leading to the A.M. degree and the Ph.D. degree are offered in Italian literature. Joint programs for the Ph.D. degree with the graduate programs in Comparative Literature, Humanities, and Modern Thought and Literature are also available.

Special collections and facilities at Stanford offer the possibility for extensive research in Italian studies and related fields. These include the undergraduate and graduate libraries and the Hoover Institution for the Study of War, Revolution, and Peace. Collections in Green Research Library are especially strong in the Medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the Western European collection at the Hoover Library; and the Music Library has excellent holdings in Italian opera.

Stanford in Italy — Stanford in Florence affords undergraduates with at least three quarters of Italian the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on areas: Renaissance History and Art, and Contemporary Italian and European Studies. The program is structured to help integrate students fully as possible into Italian culture through homestays, Florence University courses, the Language Partners Program, research, internship, and public service opportunities, and by conducting some of the program's classes completely in Italian. Many of the courses offered in Florence count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian Section requirements. Information on the Florence program is available in the “Overseas Studies” section of this bulletin, the Florence website http://www-opf.stanford.edu/Florence/, or at the Overseas Studies Office, Sweet Hall.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Italian major offers students the opportunity to develop an in-depth knowledge of Italian literature, language, and civilization through a highly flexible program combining core work in Italian with work in such fields as art history, classics, comparative literature, economics, English, French, history, international relations, music, philosophy, and political science. All Italian majors are required to have completed two second-year language courses: Italian 21, 22, and/or 23 (or the equivalent taken at the Florence campus). Students considering an Italian major should consult with the Italian undergraduate adviser as early as possible (even before completing the language requirement) in order to ensure a maximum of flexibility in designing a course of study suited to individual needs and cultural interests.

Italian majors must complete 60 units of course work above the 10 level.

The remaining requirements for the major are the following:
1. A minimum of 32 units of Italian courses (selected from courses numbered 100 and above).
2. Of these courses, at least one on Dante is required, as well as at least one in each of the following areas: (a) the Middle Ages, (b) the early modern period, and (c) the modern period. A Dante course may fulfill the Middle Ages requirement.
3. The intermediate-level survey sequence (Italian 127, 128, 129).
4. One advanced language course beyond the level of Italian 114.

Of the 60 units required for the major, up to 28 units of course work in related fields may be taken outside the department.

EXTENDED MAJORS

Requirements for both extended majors are essentially identical to those of the Italian major with a concentration in Italian literature.

Italian and English Literatures — In addition to the 32 units required for the A.B. in Italian, candidates must complete four English literature courses numbered 100 and above related to the field of concentration in Italian Studies.

Italian and French Literatures — In addition to the 32 units required for the A.B. in Italian, candidates must complete four French literature courses numbered 100 and above related to the field of concentration in Italian Studies.

MINORS

Students considering a minor in Italian are encouraged to design a course of studies that fosters their understanding of the interaction be-
tween Italian and their second area of expertise. A minimum of 24 units of graduate work beyond the Italian 3 level must be completed.

Requirements for the minor include two intermediate language courses (chosen from 21, 22, and 23); all three of the introductory series on Italian literature and culture (127, 128, 129); and a minimum of one advanced course in language or literature numbered 114 and above. All courses must be chosen in consultation with the Director of Undergraduate Studies, who is responsible for evaluating all requests and individual study plans for the minor.

HONORS PROGRAMS

ITALIAN

Italian majors with a grade point average (GPA) of 'B+' or better in all Italian courses are eligible for department honors. In addition to the requirements listed above, honors candidates must complete an honors essay representing 6 to 9 units of academic work through enrollment in Italian 198. Proposals for essays must be submitted to the Italian faculty by the end of the candidate’s junior year. If the proposal is accepted, a member of the Italian faculty is assigned to serve as the student’s advisor for the essay. Students interested in the honors program should consult the Italian undergraduate advisor early in their junior year.

HUMANITIES

An honors program in the Humanities is available for Italian majors who wish to supplement their studies with a carefully structured program of humanistic studies. See the "Interdisciplinary Studies in Humanities" section of this bulletin for further information.

LA CASA ITALIANA

La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works closely with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It often hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are regularly taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

GRADUATE PROGRAMS

Admission to the Program—Although they need not have been undergraduate Italian majors, candidates are expected to be proficient in the Italian language and to have done significant course work in Italian literature and/or Italian studies on the undergraduate level. Candidates with a broad humanistic and linguistic background are especially encouraged to apply. Contact Graduate Admissions, the Registrar's Office for application information. Recent Graduate Record Examination (GRE) results are required.

MASTER OF ARTS

(TERMINAL PROGRAM)

The A.M. in Italian provides a combination of language, literature, civilization, and general courses designed to prepare secondary school, junior college, or college teachers. Applicants should be undergraduate and/or Italian studies on the undergraduate level. The basic course program (36 units) is nine graduate courses in Italian literature and/or Italian studies within an unusually flexible interdisciplinary framework. It is fully independent of the Ph.D. program in Italian and aims to encourage students to bring broader methodological and interdisciplinary concerns to bear on the study of Italian literature. Like conventional Italian Ph.D. programs, it places primary emphasis on developing a command of Italian literature as a whole. Unlike conventional Italian Ph.D. programs, it allows students to construct a highly individualized course of study, integrating specialization in a particular literary period with work in such fields as art history, classics, comparative literature, feminist studies, film, French, history, history of science, linguistics, literary theory, Medieval or Renaissance studies, philosophy, and religion. The program is founded on the belief that this sort of balance between period specialization and interdisciplinary breadth is not only desirable but also essential in a small field such as Italian studies, particularly given the diversity of the Italian literary canon, which extends over a wide variety of disciplines.

Students admitted into the Ph.D. program in Italian work closely with the adviser in structuring a plan of study appropriate to needs and interests. Such a plan usually involves a mix of teaching and courses within the Italian program, courses taken in other departments, and independent work under supervision of a member of the Italian faculty, thus integrating financial support with training as scholars and prospective university teachers. Assuming satisfactory academic progress, fellowships are offered for one or two years. Graduate-level work completed elsewhere may be counted as fulfilling part of the requirements for the degree. Students in the fifth year normally apply for outside fellowships or part-time teaching positions in the department.

Aside from the benefits of the program's structure and fellowship plan, a number of unique resources are available to Ph.D. students in Italian at Stanford. During their years of study, students may be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty. The Florence center, located in a palazzo along the Arno, is near important Florentine libraries and archives and the University of Florence. An additional resource is the graduate student publication, Constructions, a scholarly journal published twice annually by the Department of French and Italian. Graduate students also have at their disposal the resources of La Casa Italiana, a residential theme house which serves as an Italian cultural center and hosts such events as colloquia, lectures, and film series.

REQUIREMENTS

Residency and Course Work—In accordance with University regulations, candidates for the Ph.D. must complete at least nine quarters (three years) of full-time work, or the equivalent, in graduate study beyond the bachelor’s degree. For a graduate student entering with an A.B., the Ph.D. program should normally be completed in four years. The first year is devoted to full-time study; the second and third years to teaching and the completion of course requirements (for a total of no fewer than 72 units of graduate work), and the fourth to dissertation work. Students entering with a master's degree receive credit for previous graduate work as determined on a case-by-case basis, up to a maximum of 36 units. Fellowship funding and teaching requirements are adjusted according to University regulations.

Students should read carefully the general regulations governing degrees in the "Graduate Degrees" section of this bulletin.
Teaching—In addition to training capable and creative scholars, one of the program’s primary objectives is to promote the effective teaching of Italian at all levels. To this end, students teach three or five Italian language courses (normally during the second and third year). During the first term of teaching, students must enroll in Italian 301, Graduate Workshop on Pedagogy, a seminar which permits working closely with a master-teacher and involves a regular schedule of class visitsations.

Language—As soon as possible, but not later than the end of the third year, the candidate must have passed reading examinations in two additional foreign languages. If the candidate’s period of concentration is earlier than the Romantic period, one of these must be Latin, if Romantic or later, French. Completion of the language requirement is a prerequisite for taking the University oral examination.

Course Requirements—Three courses are required:
1. Introduction to Graduate Study (French and Italian 369), a 5-unit seminar, offered in Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.
2. Definition and Inquiry: Colloquium on Research Methods in French and Italian (French and Italian 201E), a 3-unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.
3. The Learning and Teaching of Second Languages, the second language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.

Apart from the above requirements, students are granted considerable freedom in structuring a course of study appropriate to individual needs. During the first year, most course work is usually done within the Italian Section in order to ensure an adequate preparation for the qualifying examination. In the second and third years, the students’ programs normally consist of a combination of course work done inside and outside the Italian Section, supplemented by tutorials and independent work pursued under supervision of the Italian faculty.

Qualifying Procedures—Students are admitted on a probationary basis. The probationary period ends once a student is officially admitted to “candidacy” for the Ph.D. as a result of successful completion of the qualifying procedure. The qualifying procedure takes place at the end of the third or during the fourth quarter of graduate study, at which time the student: (1) takes the oral qualifying exam (equivalent to the master’s exam), and (2) submits to the Italian faculty a sample graduate seminar paper which the student considers representative of the quality of his or her graduate work at Stanford. On the basis of this paper, the results of the qualifying examination, and the student’s overall progress, the faculty members of the department vote for or against admission to candidacy.

The terminal A.M. degree is awarded to students who have successfully completed the oral qualifying exam but who are not admitted to candidacy for the Ph.D.

Examinations—Two oral examinations are required of candidates for the Ph.D.: the qualifying examination (mentioned above), and the University oral examination.

1. The qualifying examination tests the student’s general knowledge of Italian language and literature and is taken at the end of the third or during the fourth quarter of graduate study. It is composed of two sections, the first consisting of a 20-minute presentation by the candidate, the second of a 70-minute question and answer period on the candidate’s talk and on his or her reading list. The examination committee for the qualifying examination is made up of the members of the Italian faculty, including the student’s faculty adviser who chairs the examination. While the reading list for the qualifying examination must be based on the department’s standard list, it should be amplified in consultation with the student’s adviser so as to reflect each student’s particular areas of interest.
2. The University oral examination is normally taken at the end of the third year of graduate study or at the beginning of the fourth year. The reading list for the oral examination must be established in consulta-

tion with the student’s dissertation director, who chairs a committee of readers (usually three) selected jointly by the dissertation director and the student according to the list’s emphasis. The University oral examining committee is ordinarily drawn from the committee of readers for the dissertation. Reading lists for the University oral examination must cover all periods of Italian literature, with the student’s area of specialization the primary focus, covered in depth. Aside from this general guideline, students are given considerable latitude in establishing a list which reflects their individual scholarly concerns.

The examination is divided into four sections. The first, 30 minutes, consists of a formal presentation addressing one of the questions that the student received the morning of the examination. The second, also 30 minutes, is a question and answer period concerning the student’s presentation. The third, one hour, takes the form of an oral colloquy on the student’s reading list as a whole. The fourth, lasting 30 minutes, is allocated to a defense of the student’s dissertation proposal (a copy of which is submitted to the examiners one week in advance of the examination). Successful completion of the examination constitutes approval of the proposal.

Dissertation—The fourth and (if necessary) fifth years of graduate study are devoted to writing and researching the doctoral dissertation.

JOINT DEGREES AND MINORS

A joint degree program in Humanities and Italian Literature is described in the “Interdisciplinary Studies in Humanities” section of this bulletin. Minors are possible in a wide variety of related fields. Joint degree programs and minors frequently require 24 additional units of work, making completion of all course requirements in nine quarters difficult if careful advance planning is not done.

Ph.D. Minor in Italian Literature—The section offers a minor in Italian Literature. The requirement for a Ph.D. minor is a minimum of 24 units of graduate course work in Italian literature. Students interested in a minor in Italian should consult the graduate adviser.

COURSES

(FWM) indicates that the course meets the Writing in the Major requirement.

FRENCH SECTION

Note—Changes in course offerings after this bulletin has gone to press are sometimes necessary. Students are advised to consult the department bulletin board regularly. Courses are taught in French unless noted.

Introductory and Intermediate Language Courses (1-99)
Advanced Language Courses (100-125)
Courses in French, Technology, and Science (126-129)
Undergraduate courses in Literature and Culture (130-199)
Courses for Advanced Undergraduates and Graduates (200-299)
Graduate Seminars (300-399)

GENERAL

These courses are open to all undergraduate and graduate students, are taught in English, and do not require a knowledge of French.

2E,3E. Great Works—(Enroll in Introduction to the Humanities 2, 3)
2E. The Afterlife—(two-quarter sequence)
5 units, Win (Harrison, Schnapp)
3E. The Here and Now—(two-quarter sequence)
5 units, Spr (Harrison, Schnapp)

108N. Stanford Introductory Seminar: Female Saints—The Rhetoric of Religious Perfection—Preference to freshmen. The medievals lives of saintly women. Traditional motifs in the portrayal of perfection (the saint as founding hero); perfection in the literary context of 12th- and 13th-century France (the Lady as Saint); and the rhetorics of female perfection (the body sacrificed). Readings from medieval poems in English translation. Limited enrollment. GER:3a,4c (DR:8†)
4 units, Aut (Cazelles)
the feminine idol in French films is understood by placing it in its
ticism to the Impressionist and Surrealism, the high moments and context—Preference to sophomores. From Roman-
temporary movie makers. Focusing on salient components of the
ies
debates on ethnosciences. The problems involving intellectual histories,
come.
theoretical essays, students assess Sartre's importance for the century to
French philosopher, used literature to make philosophical ideas available
Preference to sophomores. Sartre, the most important 20th-century
Lectures in English. Films in French, with English subtitles. GER:3a,4c
modern nation after 1945. Analysis of films from Renoir to Truffaut and
vehicle that helped France to change from a traditional society into a
the love story motif and the reason for its attraction.
the various responses provided by texts and movies. The significance of
myth (the quest for love, its obstacles, and its tragic resolution), examines
of frustrated passion whose fatalistic overtone exerts
Tristan and Isolde,
(Enroll in Comparative Literature 171.)
171E. Comparative Narrations of Race, Ethnicity, and Nation—
(Earll in Comparative Literature 171.)
5 units, Spr (Palumbo-Liù)
189Q. Stanford Introductory Seminar: Romance—Texts and Mov-
ies—Preference to sophomores. The concept of romance through an
analysis of the “love story” motif in literature and cinema. The myth of
Tristan and Isolde, of frustrated passion whose fatalistic overtone exerts
a wide influence on Western imagination from medieval romance to
contemporary movie makers. Focusing on salient components of the
myth (the quest for love, its obstacles, and its tragic resolution), examines
the various responses provided by texts and movies. The significance of
the love story motif and the reason for its attraction.
4 units, Win (Cazelles)
190Q. Stanford Introductory Seminar: Parisian Cultures of the 19th
and Early 20th Centuries—Preference to sophomores. From Romantic-
ticism to the Impressionist and Surrealism, the high moments and context
of the cultural history of 19th- and 20th-century France. Illustrated with
slides.
4 units, Win (Bertrand)
192E. Images of Women in French Cinema: 1930-1990—The myth of
the feminine idol in French films is understood by placing it in its
historical and cultural context. The mythology of stars was the
imaginative vehicle that helped France to change from a traditional society into a
modern nation after 1945. Analysis of films from Renoir to Truffaut and
Nelly Kaplan, the evolution of the role of women in France over 60 years.
Lectures in English. Films in French, with English subtitles. GER:3a,4c
(DR:7+)
3-5 units, Spr (Apostolidès)
201E. New Methods and Sources in French and Italian Studies—
(Same as Italian 201E.) Based on students' individual interests, surveys
changes in research methods: the use of digitized texts, Web resources,
and the expanding databases available through Stanford Library's vari-
ous gateways. Emphasis is on the strategy for the most effective explo-
ration of broad and specialized topics through a mix of new and
traditional methods. Using a flexible schedule based on enrollment and
the level of students' prior knowledge, may be offered in various forms,
including a shortened version on the basics, independent study, or a
syllabus split over two quarters. Unit levels are adjusted accordingly.
1-4 units, Aut (Parrisse)
220A. Verse Translation: From Intuition to Artistry—(Enroll in
Slavic Languages 220A.)
4 units, Spr (Hofstadter)
254E. Introduction to French Philosophy: From 1943 to the Present—
From the florification of subjectivity (existentialism) to the funerals of
the subject (structuralism, post-structuralism, deconstruction) to a mod-
est theory of agency in the contemporary revivial of social, moral, and
political philosophy. Readings: Sartre, Camus, Lévi-Strauss, Lacan,
Foucault, Bourdieu, Derrida, Dumont, Lefort, Castoriadis, Ricoeur,
Manant, Dupuy, Ferry, Renault, Gauchet. GER:3a (DR:8)
3-5 units, Spr (Dupuy)
259E. Michel Foucault and the Archaeology of Knowledge—(Same as
Comparative Literature 259E.) Introduction to, and explanation of, the
basic tenets and methods of Michel Foucault's theses and methods, and
their significance for the individualization and specification of each
culture and individual. Close reading of Foucault's major works.
3-5 units, Aut (Mudimbe)
271E. On Honor—(Enroll in Comparative Literature 271.)
5 units, Spr (Mudimbe)
287E. Myth and the Bible—Seminar on the separation of the Bible and
mythology, and about religious inspiration in these texts and how it
relates to mythology without being mythology. Readings: Oedipus the
King, Sophocles; The Bacchae, Euripides; The New Oxford Bible (Re-
vised Standard Version).
3-4 units, Win (Girard)
331E. What Intellectually Mattered between 1958 and 1968: In Paris
and in the Rest of Europe—(Same as Comparative Literature 331E.) In
relation to the present-day agenda in the Humanities (if there is a “shared
agenda”), the years 1958-68 are both extremely remote and close.
Remote because the “quietism” of the post-WW II period and the
“student revolution” of 1968, as a reaction to it, appear as episodes long
left behind. Those years seem close because some of those intellectual
protagonists (mostly “French theorists”), who are still agenda-setting for
us, published their first (or most important) books between 1958 and
1968: Roland Barthes, Jacques Derrida, Michel Foucault, Jacques Lacan,
Jürgen Habermas, Carlo Ginzburg, Raymond Williams, etc. Seminar
analyzes the texts that have become foundational of our own present-day
intellectual situation in their specific historical contexts (and their often-
complicated interrelations).
3-5 units, Win (Gumbrecht)
358E. The Practice of Sociology and the Humanities: An Analysis of
Pierre Bourdieu’s Work—Specialized study of the work of Pierre
Bourdieu, focusing on themes such as the function of the school, the
practice of social sciences, and the politics of knowledge. Emphasis is on
the philosophical presuppositions of Bourdieu’s work and the logic of his
investigation.
4 units, Aut (Mudimbe)
369E. The Disciplines of Literature—(Same as Comparative Litera-
ture 369E, Italian 369E)
5 units, Aut (Lerer, Schnapp)
FIRST- AND SECOND-YEAR LANGUAGE
Note—Students registering for the first time in a first- or second-year
course must take a placement test if they had any training in French be-
fore entering Stanford. All entering students must take Part I (written)
of the placement test on-line during the summer, followed by Part II (oral),
to be administered on campus 9/1999. Consult the Stanford Language
Center for further information or http://language.stanford.edu/.
Basic French grammar and vocabulary are covered in French 1.1, 2.1, and
3. At the completion of 3, students will have acquired beginning level
functional proficiency in listening comprehension, speaking, reading, and
writing in satisfaction of the University Foreign Language Requirement.
Students may continue with second-year French courses (22 or 23) or at a
higher level upon recommendation of the Language Program Coordina-
tor.
Auditing is not permitted in lower division language courses.
1,2,3, First-Year French—Introduction to basic communication skills
using an all-in-French, student-centered approach. By the end of the
three-quarter sequence, students are able to engage in interactions with
speakers of French for a variety of purposes and contexts using appropri-
5A, B. Accelerated First-Year French—Completes the first-year language sequence in two rather than three quarters. Recommended only for students who have previous knowledge of French and who place into 5A on the placement test. Prerequisite: consult Language Program coordinator prior to enrollment.

5 units, Aut, Win, Spr (Langmuir)

10. First-Year Conversation—Introduction to French conversation for students who have completed French 2 or equivalent. Emphasis is on the development of authentic discourse at the first-year level. May be repeated for credit.

2 units, Aut, Win, Spr (Staff)

15. Conversation in Everyday Life—Second-year French conversation for students who have completed French 3 or equivalent. Topics: the family, student life, films, theater, fashion, food, politics, etc. Useful information for students planning to travel/study abroad. May be repeated for credit. Prerequisite: 3 or equivalent.

2 units, Aut, Win, Spr (Staff)

15S. Intermediate Conversation—Second-year French conversation designed to improve communication in everyday situations. Topics: student life, films, theater, fashion, food, politics, etc. No auditors. Prerequisite: one year of college French or equivalent.

3 units, Sum (Staff)

20A. French Survival Skills—Second-year French conversation for students who have completed French 3 or equivalent. Learn to use Paris subway system, make hotel reservations, use the Minitel, travel by TGV, etc. Prerequisite: 3 or equivalent.

2 units, Aut (Staff)

20B. French Cinema—Second-year French conversation for students who have completed French 3 or equivalent. Introduction to major French film-makers, stars, and trends. Discussion in French of selected films. Prerequisite: 3 or equivalent.

2 units, Win (Staff)

20C. France and Francophone—Second-year French conversation for students who have completed French 3 or equivalent. Exposure to regions of France and the Francophone world. Topics: travel, food, cross-cultural comparisons, etc. Useful information for students planning travel/study abroad. Returning students are encouraged to enroll. Prerequisite: 3 or equivalent.

2 units, Spr (Dozer)

22. Second-Year French (Part A)—Content-based, intermediate-level, and designed to integrate culture and language in the development of authentic discourse. Review of present and past narrative, pronominal verbs, etc. Combines the study of grammar with discussion of French and Francophone texts. Utilization of language lab, multimedia, and computer facilities in the language learning process. Extra unit for individual or group projects. Satisfies the foreign language requirement for students majoring in International Relations. Prerequisite: 22 or equivalent or consent of coordinator.

4-5 units, Aut, Win, Spr (Staff)

Note—Special sections of second-year French (22, 23) with emphasis on certain topics (communications, Francophone or women writers, law, politics, trade, etc.) can be arranged through the coordinator and are indicated in the Time Schedule by a suffix (e.g., 22F, 22W).

23. Second-Year French (Part B)—Content-based, intermediate-level, and designed to integrate culture and language in the development of authentic discourse. Review of future, conditional, and subjunctive. Combines the study of grammar with discussion of French and Francophone texts. Utilization of language lab, multimedia, and computer facilities in the language learning process. Extra unit for individual or group projects. Prepares students for advanced courses and for study abroad. Satisfies the foreign language requirement for students majoring in International Relations. Prerequisite: 22 or equivalent or consent of coordinator.

4-5 units, Aut, Win, Spr (Staff)

24. Intensive Review of French Grammar—(Same as 124.) Intensive review of French grammar for highly motivated students who plan to enroll in advanced courses on campus and/or abroad. Emphasis is on individual work in the language lab with class time spent on contextualized activities and textual analysis. Prerequisite: 23 or equivalent, or consent of coordinator.

3-4 units, Aut, Spr (Staff)

40. Intensive French Specials—By petition only and with consent of instructor. Students with special programmatic needs for an alternate curriculum may complete 3-7 units through a combination of coursework and tutorials. No auditors.

3-7 units, Sum (Staff)

41A, B. Intensive French for Beginners—Accelerated first-year course covering all essential grammar. An all-in-French method is used for developing competence in listening, speaking, writing, and reading. Written exercises, compositions, conversational drills, and daily work in the language lab. No auditors.

9-12 units, Sum (Staff)

50. Reading French—For graduate students or seniors seeking to meet the University reading requirement for advanced degrees. Accelerated, designed specifically for the acquisition of reading ability. No auditors.

4 units, Aut (Staff)

ADVANCED LANGUAGE

99. Language Specials—With consent of department only. See instructor for section number.

1-5 units (Staff)

120. Advanced Conversation: France Today—Third-year conversation. Discussion of contemporary issues and topics of general interest. May be repeated for credit after two quarters. Prerequisite: 23 or equivalent.

3 units, Aut, Win, Spr (Staff)

121A, B. Business French—For students who wish to function and communicate in the French-speaking business community. 121A emphasizes résumé-writing and the job application process for on-site employment. 121B emphasizes acquisition of specialized vocabulary, discussions, and written work, including translations and business letters. Prerequisite: 23 or equivalent.

121A. 1-3 units, Aut (Servant)
121B. 1-3 units, Win (Staff)

121C. Advanced Topics in Business French—Advanced language course for students interested in practicing professional business French. Discussion of selected topics pertaining to international economics, management, and marketing. Based on materials presented in, e.g., international financial markets, global management, etc. Prerequisite: 23 or equivalent.

1-3 units, Spr (Marchand)

122. Introduction to French Civilization—Content-based language course introducing French civilization and culture through the reading of selected texts. Stresses the development of language skills through the...
study of art, geography, history, political and social institutions, etc. Prerequisite: 23 or equivalent.

123. Creative Writing—Writing as practical communication and as literature. The cultural and social determinants in shifting from spoken to written French, formal and informal. Textual analysis and creative writing is centered on various genres and styles (e.g., letters, essays, short stories, poems; description vs. narration). Grammar and vocabulary review. Class discussion in French focuses on model texts and original writing done by students. Prerequisite: 23 or equivalent. (WIM)

4 units, Win (Staff)

124. Intensive Review of French Grammar—(Same as 24.)

3-4 units, Aut, Spr (Staff)

125. Contemporary French Usage: Spoken and Written—Can serve as adjunct to Paris program. Grammar, syntax, and stylistics, emphasizing the similarity and divergence of oral and written French, including written French slang. Prerequisite: 23 or equivalent.

4 units, Spr (Staff)

127. French Media and Communications—For students interested in acquiring knowledge and developing practice in technical, legal, and business French. The technological policy of contemporary France in a historical perspective, and in reference to contemporary issues in the French computing, broadcasting, telecommunications, and multimedia industries. Readings from current journals are a basis for acquisition of specialized vocabulary. For extra unit, research paper or a multimedia presentation on a topic of choice. Prerequisite: 126 or equivalent or consent of instructor.

3-4 units, Win (A. Giraud)

128. Technocritique—The French tradition of social and philosophical criticism of technology. The apparent contradiction between being at the forefront of technological and scientific development and the demand for prudence, because technological development is not always perceived as a synonym of social and moral progress.

3-5 units (Dupuy) not given 1999-2000

LITERATURE AND CULTURE

UNDERGRADUATE

130. Middle Ages and Renaissance France—Introduction to the literature and culture of France, 11th-16th century. Readings from the epics (The Song of Roland), medieval romances (Yain, Chretien de Troyes), post-Petrarchan poetry (Du Bellay, Ronsard), and prose humanists (Rabelais, Montaigne). GER:3a (DR:7)

4 units, Aut (Cazelles)

131. 17th- and 18th-Century France—Introduction to the literature and culture of France from the Baroque to the Enlightenment. Readings: Corneille, Diderot, Moliere, Montesquieu, Rousseau, and Voltaire. Criticism of excerpts from contemporary filmed versions of French "classical" literature. GER:3a (DR:7)

3-5 units, Win (Russo)

132. 19th- and 20th-Century France—An approach to the intellectual history of modern France, viewed as a recognition of and response to the "absurd." A specifically modern crisis of subjectivity and of belief, accompanied by a broad range of responses: from art for art's sake to existentialist revolt and the bitter laughter of the theater of the absurd. Readings are from poetry and drama, but provide an overview of movements and styles from the period. GER:3a (DR:7)

4 units, Spr (Schilling)

133. Literature and Society: Introduction to Francophone Literature from Africa and the Caribbean—Focus is on major African and Caribbean writers, and the major issues raised in literary works which reflect changing aspects of the societies and cultures of Francophone Africa and the French Caribbean: meeting the challenge of acculturation and the search for identity; of tradition competing with modernity; the use of oral tradition and writing: women's role and status; writers' social responsibility. Visual material: readings from fiction, poetry, plays, and criticism. GER:3a,4a (DR:2 or 7)

4 units, Win (Apostolides)

142. From Romanticism to Symbolism: Transformations of French Poetry in the 19th Century—The evolution of poetry between creative revolutions and classical forms; the tension between prose and poetry; and the invention of modern consciousness for the poet, between the lyric voice and the analytic spirit, through the works of French poets Alphonse de Lamartine, Victor Hugo, Alfred de Musset, Charles Baudelaire, Paul Verlaine, Arthur Rimbaud, Jules Laforgue, Gerard de Nerval, Stephane Mallarme, Paul Claudel, Paul Valery, and Guillaume Apollinaire.

4 units, Aut (Pompidou)

198. Honors—Open to juniors and seniors with consent of adviser; 9-12 units total credit for completion of honors essay.

3-12 units (Staff)

199. Individual Work—Open only to majors in French with consent of department. Normally limited to 4-unit credit toward the major.

1-12 units (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

Note—The prerequisite for the following courses taught in French is one course from the 130 series or equivalent.

221. 17th-Century French Theater—Analysis, through contemporary literary theories, of the works of Corneille, Rotrou, Moliere and Racine. Modern stagings of classical French theater. GER:3a (DR:7)

3-5 units, Win (Apostolides)

229. Baroque, Classicism, and the Enlightenment: The Emotion of the Rational—The cultural history of France during the period from the cessation of the religious wars to the Revolution of 1789. The culture of the elite (Baroque, Préciosité, Classicism, Cartésianism, and themes of the Enlightenment), and the content, forms, and diffusion of the popular culture (written and iconic graphic elements; Almanacs). The approach is that of French contemporary historiography: from study of the levels of cultural productions, to ways of life (material civilization), to collective sensibilities. Slides illustrate iconic graphic elements. GER:3a (DR:7)

3-5 units, Aut (Bertrand)

237. Gallants and Libertines in 17th- and 18th-Century Fiction—The representation of love, eroticism, and gender in the novel and theater. From neo-platonist ideas to the cruelties of libertinage, love was seen as an instrument of social initiation, a civilizing force, a source of dissolution, a social game, a heroic ideal, or a bitter failure. Focus is on the relationship between love and the novel as a genre: strategies of disguise and deceit, euphemistic veiling of the body, eroticism and reading, shifting boundaries between feminine and masculine identities. Works by d'Urfe, Marivaux, Crebillon, Laclos, Denon, Choisy.

3-5 units, Spr (Russo)

3-5 units, Spr (Dupuy)

261. Stylistics and Textual Analysis—Designed to assure a high-level proficiency in written French. In-depth textual analysis and commentary of excerpts from various genres. Different styles of criticism. The exposé, written and spoken. Prerequisite for undergraduates: 123. (WIM)

3-5 units, Win (Hester)

262. Pronunciation and Phonetics—Theory study and corrective work: articulation, intonation, rhythm, phonetic alphabet, etc.

3-5 units, Aut (Hester)
264. Contemporary French Women Novelists—What does it mean to write as a woman? If, for Simone de Beauvoir, it meant simply to write like a man, fiction written by women in France since 1960 has suggested other interpretations, from feminist essentialism and working-class realism to post-modern Ludism. The role of class and family in identity formation, linguistic experiment as a challenge to patriarchy, and the reuse of minor genres such as the fairy tale in subverting the gendered literary imaginary. Readings from Cixous, Duras, Etcherelli, Wittig, Emaux, Redonnet, and Ndiaye. GER:3a (DR:7)
3-5 units, Aut (Schilling)

271. Collective Memory and Occupation France—The most divisive event in 20th-century French collective memory, the German Occupation (1940-44) split France, according to national myth, into two camps: collaborators and resisters. Through a selection of literary and filmic texts, from Vercors’s early Resistance writings to explorations of Judauty in the 1990s, addresses the ways artists have interpreted a conflicted national past in terms of amnesia, collective responsibility, victimhood, and memorialization. Authors: Calaferte, Delbo, Duras, Hitchcock, Kofman, Lanzmann, Malle, Modiano, Resnais, and Wiesel.
3-5 units, Aut (Schilling)

294A. Buffon, Diderot, and Rousseau—Five-week course.
2 units, Aut (Serres)

294B. Topics in French Literature and Philosophy—Five-week course.
2 units, Spr (Serres)

299. Individual Work—For students engaged in special work.
1-12 units, any quarter (Staff)

GRADUATE

312. Hagiography—Exploration of Saints’ Lives, composed in verse from the 9th to the 13th century. Topics: hagiography as a literary genre the theater of sanctity; sanctity in the wilderness; holy androgyyn, the saint’s exemplarity. Prerequisite: 204.
4 units, Win (Cazelles)

350. Contemporary French Fiction—Contemporary fiction and autobiography in France today, from Nouveau Roman formalism to today’s life stories of societal integration by young Beur writers and other minority voices. Readings: Modiano, Daniel Pennac, Eric Holder, Chimo, Claire Fredrie, Malika Mokkedem, Michel Houellebecq.
3-5 units, Spr (Bertrand)

374. Perec/Leiris: lectures croisees—Michel Leiris (1901-91) and Georges Perec (1936-1982) are recognized as key figures in the 20th-century literary imaginary. Readings: Modiano, Daniel Pennac, Eric Holder, Chimo, Claire Fredrie, Malika Mokkedem, Michel Houellebecq.
3-5 units, Spr (Bertrand)

399. Individual Work—For students in French working on special projects or engaged in predissertation research.
1-12 units, any quarter (Staff)

AFFILIATED DEPARTMENT OFFERINGS

ART AND ART HISTORY

1. Introduction to the Visual Arts
5 units, Aut (Marrinan)

120A/220A. 18th-Century Art in Europe, ca. 1660-1780
4 units (Marrinan)

ITALIAN SECTION

Note—Changes in course offerings are sometimes necessary after this bulletin has gone to print. Students are advised to consult the department bulletin board on a regular basis. Courses are taught in Italian unless noted.

Introductory Language Courses (1-99)

Advanced Language Courses (100-129)

Undergraduate courses in Literature and Culture (130-199)

Courses for Advanced Undergraduates and Graduates (200-299)

Graduate Seminars (300-399)

GENERAL

These courses are open to all undergraduate and graduate students; they are taught in English, and do not require a knowledge of Italian.

2E, 3E. Great Works—Enroll in Introduction to the Humanities 2, 3.
2E. The Afterlife—(two-quarter sequence)
5 units, Win (Harrison, Schnapp)
3E. The Here and Now—(two-quarter sequence)
5 units, Spr (Harrison, Schnapp)

166E. Women’s Voices in Contemporary Italian Literature—Introduction to 20th-century women’s writing in Italy, from Sibilla Aleramo’s A Woman to the narrative experiments of the last decade. Readings: Grazia Deledda, Anna Banti, Dacia Maraini, Fabrizia Ramondino, Francesca Duranti. GER:4c (DR:†)
4 units, Spr (Springer)

190E. The Decameron and the 1001 Nights—(Same as Comparative Literature 190E.) Boccaccio’s Decameron and the 1001 Nights begin with a “frame-story” describing a catastrophe that threatens a city, then present a series of scintillating tales to distract the audience from looming disaster. Beginning from these structural echoes, the two works are compared and contrasted, considering the role of women in the frame story and in the tales; difference and exoticism; the salvific narrative, science, knowledge, and moral education in Christianity and Islam; and modern retellings of the two works in film and fiction. GER:3a (DR:7)
4-5 units, Aut (Mallette)

191E. The Cinema as a Space of the Sacred—Is the film-text a map of sacred allegories? How does the cinema screen the Sacred? Are there any religious dimensions in secular texts like films? The phenomenology of the Sacred, its reinvention, and symbolism are probed through an analysis of a number of films. Readings: Mircea Eliade, René Girard, film theory and criticism. GER:3a (DR:7)
3-5 units, Spr (Campani)

201E. New Methods and Sources in French and Italian Studies—(Same as French 201E.) See French 201E.
1-4 units, Aut (Parrine)

225E. Pirandello, Sartre, and Beckett: Self and World in Modern Literature—Problems of identity, self-alienation, and human relationships as portrayed in novels and plays of Luigi Pirandello, Jean-Paul Sartre, and Samuel Beckett. Comparison of styles and ideas demonstrates the common vision of “abandonment” underlying their work. Readings: Pirandello’s Fu Mattia Pascal, Cost e (se vi pare), and S6 Personaggi; Sartre’s La Nausée and Huis Clos; Beckett’s Molloy. Readings available in translation.
3-5 units, Win (Harrison)

233E. Dante’s Divine Comedy—(Same as Comparative Literature 233E.) A reading of Dante’s poem, with reference to his other works (especially Vita Nuova) and the European literary traditions of his age. Topics: Dante’s afterworld in relation to Christian and Islamic visionary writings; his response to the Provencial and Sicilian poetry of courtly love; the idea of history, both personal and political, in
25E. F. T. Marinetti and Futurism—Inquiries into the history and influence of the Futurist movement. The links between avant-garde cultural experimentation and themes of speed, acceleration, intensification, and novelty that have shaped modern/postmodern ideas concerning experience, subjectivity, rhythm, power, and production.
3-5 units, Win (Schnapp)

36E. Italo Calvino in Translation—Calvino’s development as a writer. The increasing degree of his experimentation with structure and literary language, and the enduring component of fantasy. The Path to the Nest of Spiders, Marcovaldo, The Baron in the Trees, Cosmicomics, Invisible Cities, Mr. Palomar, and Six Memos for the Next Millennium.
3-5 units, Win (Schnapp)

31E. Seminar: Epic and Empire—(Enroll in Comparative Literature 314.)
5 units, Win (Parker)

320E. The Avant-Gardes of the Middle Ages—(Same as Comparative Literature 320E.) The medieval courtly love movements parallel many of the social and aesthetic tensions of the modernist avant-gardes. Readings of Provencal, Arabic, and Italian poetry highlight similarities to the avant-garde and issues peculiar to the Middle Ages: the revolution in poetic language and form; the relational argument with literary tradition; the role of the court in the evolution of new literatures; orality and the lyric text; gender and courtly love; vernacular literatures and the construction of cultural identity. Readings available in translation.
4-5 units, Win (Malleite)

369E. The Disciplines of Literature—(Same as Comparative Literature 369E.) Open to all entering graduate students in the Division of Languages, Cultures, and Literatures. Introduction to the history, structure, and intellectual debates of the disciplines of literary study. The origins of comparative and national literatures in the study of philology and the institutions of the European university. Key theoretical moves that shaped literary theory, criticism, and history in America: semiotics and structuralism, deconstruction, and post-structuralist critiques; the renewed interest in the rhetoric and rhetorical reading, identity politics, and ethnic studies; views of the literary canon and the impact of cultural studies.
5 units, Aut (Lerer, Schnapp)

389E. Common Roots: A Perspective on the History of Linguistics and Linguistic Ideas—A relevant feature of European cultural history is the diversity, the competition, and the changing predominance of languages, from Greek and Latin to Spanish, Italian, French, German, and English. The notion of “linguistic root” in the labyrinth of grammatical and philosophical reflections on language in Europe. Topics: the Classical tradition (where the notion of “root” is well established), the philosophy of language of the 17th-18th century (searching for the “roots” of language), the discovery of Sanskrit grammar and the beginning of the comparative linguistics, the changing concept of “root.” Encounters, detours, and unity in the history of European linguistic ideas.
3-5 units, Aut (Gambarrara)

FIRST- AND SECOND-YEAR LANGUAGE

Note—Because the Italian Language Program does not have a formal placement test, students registering for the first time in a first- or second-year course must see the instructor for proper placement if they have had any prior training in Italian.

1. First-Year Italian (First Quarter)—Intensive introduction to the Italian language, with emphasis on speaking and oral comprehension. Language lab.
5 units, Aut, Win, Spr (Staff)

2. First-Year Italian (Second Quarter)—Continuation of 1 with emphasis on the development of reading and writing skills, and on Italian culture. Language lab. Prerequisite: 1 or equivalent.
5 units, Aut, Win, Spr (Staff)

3. First-Year Italian (Third Quarter)—Continuation of 1 and 2 with additional cultural and literary readings. Language lab. Prerequisite: 2 or equivalent.
5 units, Aut, Win, Spr (Staff)

21. Second-Year Italian (First Quarter)—Comprehensive review of Italian grammar combined with further study of advanced grammar and Italian culture through literary texts. Prerequisite: 3 or equivalent.
3-4 units, Aut, Win (Devine)

22. Second-Year Italian (Second Quarter)—Continuation of 21 with emphasis on translation, stylistics, and composition. Prerequisite: 21 or equivalent.
3-4 units, Win, Spr (Devine, Napolitano)

23. Second-Year Italian (Third Quarter)—Continuation of 22. Prerequisite: 22 or equivalent.
3-4 units, Aut, Spr (Napolitano)

30. Conversation: Conoscere l’Italia—Conversation for students planning to go to Florence. Films, slide shows, and lectures on Italian culture, including opera, modern music, wine, and food. A preview of the Florentine experience. Prerequisite: consent of instructor. Recommended: two to three quarters of Italian.
3 units, Win, Spr (Tempesta)

31. Parlare dell’Italia—Open only to students who have studied at the Florence program. Have you got a favorite Italian wine or city, a favorite author, or movie director that you have studied in depth? Students share their experiences with their comrades from Florence and those preparing to go to Italy. Brief presentation to students in the beginning first-year Italian sequence. Prerequisite: studio abroad in Florence or equivalent.
3 units, Win (Napolitano)

41A, B, C. Accelerated First-Year Italian—Covers one, two or three quarters of Italian. Conversational drills and daily work in the language lab. All-in-Italian method is used, developing the four basic skills: listening, speaking, writing, and reading. No auditors.
9-12 units, Sum (Staff)

50. Reading Italian—Open to advanced undergraduates with consent of instructor; primarily for graduate students seeking to fulfill University foreign language requirements for advanced degrees. Accelerated, designed for the acquisition of reading skills in Italian. No auditors.
3 units, Win (Devine)

60. Italian Opera from the Early 19th Century (Rossini) to the Early 20th Century—Italian history through the operatic melodramas from the heroic epic of the Risorgimento to the social anguish of Venismo, which brings Italian opera to California as in the Girl of the Golden West by Puccini. Students attend at least two opera performances.
3-4 units, Aut (Napolitano)

99. Language Specials—With consent of department only. See instructor for section number.
1-5 units (Staff)

114. Advanced Styh’stics and Composition—Designed to achieve a high level of proficiency in written and spoken Italian. Readings of literary and non-literary texts with in-depth textual and grammatical analysis in class, oral reports, translations, and weekly writing assignments. Prerequisite: 22 or consent of instructor. (WIM)
3-4 units, Win (Napolitano)
115. Translation and Composition—Continuation of 114. Emphasis is on composition, writing of short essays, and short stories. Prerequisite: 114 or consent of instructor. 
3-4 units, Spr (Napolitano)

INTERMEDIATE-LEVEL LITERATURE

120. Stile Italiano—Tailored to the needs of advanced second-year students returning from the Florence campus, develops written and verbal skills within the framework of a reflection on the contradictions that define 20th-century Italy. Through readings, discussion, and slide presentations, it emphasizes the conflict between two Italics: the traditional Italy of art, culture, gastronomy, and the Mafia; and the new Italy that emerged in the postwar era as a world leader in contemporary design, art, architecture, and graphics.
3 units, Spr (Poli)

127. Framing Italian History—Overview of Italian history: medieval, Renaissance, baroque, Enlightenment, Risorgimento, Fascist, postwar, contemporary. Films, slides, videos, readings. (In Italian) Prerequisite: 3 or equivalent. GER:3a (DR:7)
4 units, Aut (Springer)

128. Inventing Italian Literature: Dante/Petrarca/Boccaccio—The origins of Italian literature in poetry (the love lyrics of Dante and Petrarch) and prose (stories from Boccaccio’s Decameron). Prerequisite: 3 or equivalent. GER:3a (DR:7)
4 units, Win (Springer)

129. The Path to Modernity: Renaissance to Pirandello—Analysis of a series of influential Italian texts from the 16th to the 20th century. Readings: Ariosto, Tasso, Goldoni, Leopardi, Verga, Pirandello. Prerequisite: 3 or equivalent. GER:3a (DR:7)
4 units, Spr (Springer)

198. Honors—Open to juniors and seniors with consent of adviser; 9-12 units total credit for completion of honors essay.
3-12 units (Staff)

199. Individual Work—For students engaged in special work. See instructor for section number.
1-12 units (Staff)

290. Pier Paolo Pasolini: From Poetry and Novels to Cinema and Film Theory—The life and work of the Italian poet, novelist, critic and film-maker. Pasolini as a political poet; poetry, novels, and film caught between the theory and the practice of Pasolini’s own notion of realism; the “myth” and the “sacred” in a consumption-orchestrated society; death, reality and myth as narrative strategies; semiotics, psychoanalysis and the cinema. Pasolini’s work in the light of his own theoretical writings and contemporary film theory.
3-5 units, Spr (Campani)

ADVANCED LITERATURE

299. Individual Work—For students engaged in special work. See instructor for section number.
1-12 units, any quarter (Staff)

GRADUATE

301. Graduate Workshop on Pedagogy—Introduction to the theory and practice of teaching Italian. Observations of demonstration classes taught by the master teacher and regular class visitsations.
2 units, Spr (Napolitano)

379. Italian Linguistic Theories and Practices, from Dante to Croce—Until 1950, what we now know as “standard Italian” was used mainly in literature. For centuries, writers debated which dialect or combination of dialects would become the official language of Italy. This debate was just one side of wider reflections on language, and grammatical and philosophical theories. Their European context, and the actual practice of the authors: Dante, Machiavelli, Vico, Leopardi, Manzoni, Croce, and others.
3-5 units, Aut (Gambarara)

399. Individual Work—For graduate students engaged in work on a special project in the field of Italian studies or predissertation research. May be repeated for credit. See instructor for section number.
1-12 units, Aut, Win, Spr, Sum (Staff)

AFFILIATED DEPARTMENT OFFERINGS

ART AND ART HISTORY

110D/210D. The Venetian Renaissance
4 units, Win (Berdini)

181/281. Theories of Architecture
4 units, Spr (Berdini, Turner)

214B. Seminar: Humanistic Discourse on Art
4 units, Spr (Berdini)

The following courses are accepted for credit in the major. See respective department listing for course descriptions and General Education Requirements (GER) information.

CLASSICS

205A,B. The Semantics of Grammar
2 units, Aut (Devine)
1 unit, Win (Devine)

HISTORY

12Q. Stanford Introductory Seminar: “The Mind Has No Sex”? 3 units, Win (Findlen)

13. The Emergence of Modern Medicine
5 units, Win (Findlen)

206P/306P. Many Histories of Science: The Scientific Revolution
4-5 units, Aut (Findlen)

213/313A. Graduate Colloquium: New Worlds, Imaginary Worlds
4-5 units, Spr (Findlen)

213C/313C. Undergraduate Colloquium: Power, Art, and Knowledge in Renaissance Italy
5 units, Win (Findlen)

413. Graduate Seminar: Early Modern Europe
8-10 units, Spr (Findlen)

LINGUISTICS

1. Introduction to Linguistics
4 units, Win (Leben)

GERMAN STUDIES

Emeriti: (Professors) Theodore M. Andersson, Gerald Gillespie, Walter F. W. Lohnes, Katharina Mommsen, Kurt Mueller-Vollmer; (Adjunct Professor) Gertrude Mahrholz

Chair: Russell A. Berman

Professors: Russell A. Berman, Elizabeth Bernhardt, Orrin W. Robinson III (Berlin, Autumn)

Assistant Professors: Karen J. Kenkel (on leave), Sara S. Poor (on leave), Arthur C. Strum

Senior Lecturers: William E. Petig, Kathryn Strachota, Brigitte Turza

Lecturer: Harriet Jernigan

Assistant Professor: Amir Eshel
The department offers a variety of programs in German language and linguistics, literature, culture, and thought. Courses are open to majors and all interested students. Candidates are accepted for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy.

By carefully planning their programs, students may fulfill the A.B. requirements for a double major in German Studies and another subject. An extended undergraduate major in English and German literature is available as a certiﬁmal program for the A.B. and A.M. degrees in German Studies, and joint programs for the Ph.D. degree with Comparative Literature, Interdisciplinary Studies in Humanities, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German studies and related ﬁelds pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrandt Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material of the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), and the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The department also has its own reference library. Extensive use is made of the language lab in the Undergraduate Library as well as the department’s own audio-visual equipment, films, tapes, and slides.

The Republic of Austria has endowed the Distinguished Visiting Professorship in Austrian Studies. The professorship rotates on a yearly basis through several departments.

Haus Mitteleuropa, the German theme house at 620 Mayﬁeld, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

**UNDERGRADUATE PROGRAMS**

**BACHELOR OF ARTS**

The major in German Studies provides students with the linguistic and analytic facility to explore the signiﬁcance of the rich cultural traditions and political histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, history, literature, media theory, philosophy, political science, and other areas, also encourages students to evaluate broader and contradictory legacies of modernity. For example, the literary, artistic, and cultural responses to the belated and rapid modernization of Germany allow for reﬂection on the modern condition in general.

Similarly, the German experience of national identity and political unification sheds light on wider issues of cultural cohesion and diﬀerence, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies integrates work done abroad into their degree program. Returning interns who wish to develop a paper based on their experience should enroll in 298. All undergraduates interested in Germany are urged to enroll in the Berlin program, which is open for academic study Autumn, Winter, and Spring Quarters. The program also offers internships in German industry, government, and cultural organizations year round. Through the center, students with at least two years of college-level German can also take courses at Freie Universität, Technische Universität, or Humboldt Universität. Most students live in homes with German hosts. Multiple majors are especially recommended for students spending one or more quarters at the Stanford Center in Berlin.

**MINORS**

There are two minor options.

**German Language and Culture**—Students may choose to minor in German Language and Culture if they are particularly interested in developing a strong ability in the German language, or in pursuing linguistic issues pertinent to German. Students satisfy the requirements for the minor in German Language and Culture by completing 35 units of coursework, including at least three courses at the 100-129 level, taught in German. Study at the Stanford Center in Berlin for at least one quarter is highly recommended.

**German Cultural Studies**—Students who wish to study German literature, culture, or thought, without necessarily acquiring facility in the German language, may pursue a minor in German Cultural Studies. Students meet the requirements for the minor in German Cultural Studies by completing 35 units of coursework in German literature, culture, and thought in translation, including at least three courses at the 130 or 140 level. (Five units of the CTX sequence Myth and Modernity may be counted towards the completion of requirements for the minor in German Cultural Studies).

**HONORS**

Majors with a minimum grade point average (GPA) of 'B+' in German courses are eligible for departmental honors. In addition to the requirements listed above, each honors candidate submits an essay representing 6 to 9 units of academic work. The essay topic is chosen in consultation with a faculty member of the department. Opportunities to commence research projects are offered at the Berlin Center.

**STANFORD IN BERLIN**

All undergraduates interested in Germany are urged to enroll in the Berlin program, which is open for academic study Autumn, Winter, and Spring Quarters. The program also offers internships in German industry, government, and cultural organizations year round. Through the center, students with at least two years of college-level German can also take courses at Freie Universität, Technische Universität, or Humboldt Universität. Most students live in homes with German hosts.

Most credits earned in Berlin can be applied to the undergraduate major in German Studies. All students who are planning to study at the Stanford Center in Berlin or engage in an internship are encouraged to consult with their major advisers and the Overseas Studies oﬃce about integrating work done abroad into their degree program. Returning interns who wish to develop a paper based on their experience should enroll in 298. More detailed information is available at the Overseas Studies Oﬃce in Sweet Hall or with the faculty adviser in the department.

**COTERMINAL PROGRAMS**

Students may elect to combine programs for the A.B. and A.M. degrees in German Studies. For details, see the "Undergraduate Degrees" section of this bulletin.
GRADUATE PROGRAMS

The University requirements for the A.M. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS

This program is designed for those who do not intend to continue studies through the Ph.D. degree. Students desiring the A.M. degree must complete a minimum of 36 units of graduate work. If students enroll for three quarters for a minimum of 12 units per quarter, they can fulfill the A.M. requirements in one year. The program normally includes at least one course in each of the three areas of concentration: language and linguistics, literature, and thought.

In addition, students must take graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

A.M. candidates must take an oral examination toward the end of their last quarter.

DOCTOR OF PHILOSOPHY

The requirements for the Ph.D. include: (1) a minimum of 36 graduate units during the first year of graduate study and a minimum of 9 units per quarter during the six quarters following the first year; (2) a reading knowledge of one language other than English and German, normally French; (3) a master’s oral examination, unless the student already has an A.M. upon entering the program; (4) a qualifying paper; (5) a qualifying examination; (6) the University oral examination; and (7) a dissertation. Students in Medieval Studies must also have a reading knowledge of Latin.

The first year of work, which leads to the A.M. degree, is designed to introduce each student to the three major areas of study. During Spring Quarter of the first year, all students, except those admitted with a master’s degree, must take an oral A.M. examination. During the one-hour examination, the student is questioned by three examiners, chosen by the student, on work undertaken in specific graduate courses.

By July 1 of the summer following the first year of graduate study, students should present as a qualifying paper an example of their course work. Although ordinarily not meant to represent an original contribution to scholarship, it should demonstrate the candidate’s ability to grasp complex subject matter with sufficient competence to organize materials and to present arguments in a clear and concise manner commensurate with scholarly standards. The paper is submitted to the department chair, who passes it on for approval by the student’s faculty adviser and a second reader appointed by the chair in consultation with the adviser.

Students who enter the program with a master’s degree from another institution must submit, in lieu of a qualifying paper, a master’s thesis or a major research paper as evidence of ability to pursue advanced scholarly work.

At the end of the sixth quarter of study (and only if the qualifying paper has been accepted), the student takes a one-hour oral qualifying exam with two examiners, the student’s chosen adviser, and another faculty member appointed by the chair. The purpose of this examination is to demonstrate a broad familiarity with the literature of the major periods, movements, and some major figures. Only after successful completion of the qualifying procedure will the department approve the student’s admission to candidacy. A student who fails the qualifying examination may retake it once at the beginning of the seventh quarter.

The University oral examination in the Department of German Studies consists of an area examination; on consultation with the four prospective examiners, the student prepares a specialized list of relevant literature from an area of concentration, as well as appropriate secondary literature. The area of concentration is considerably broader than a dissertation topic but nevertheless allows for intensive work. Examples of areas of acceptable scope are: a 100-year period with some thematic emphasis, problems emerging from a particular genre in various contexts, a major literary movement, institutional setting, or discursive structure.

At least two weeks before the examination date, the student distributes the definitive version of the bibliography as well as a position paper, approximately 25 pages in length, addressing a major issue in the area of study. The examination consists of questions regarding this paper and the area of bibliography. The examination lasts at least two hours, permitting each of the four examiners a 30-minute question period and reserving an optional 10 minutes for questions from the chair of the examination.

Within three months of successful completion of the University oral, the student must submit a dissertation proposal to the department, approved by all members of the reading committee. The topic of the dissertation normally is directly related to the area of concentration in the University oral.

Students, regardless of their future fields of concentration, are expected to acquire excellence in German and thorough knowledge of the grammatical structure of German. The department expects Ph.D. candidates to demonstrate teaching proficiency in German; 200, Learning of German, is required. The teaching requirement is six quarters during the second and third years of study.

The department expects candidates to demonstrate research skills appropriate to their special areas of study. The requirement can be fulfilled in the capacity of either a University Fellow or a Research Assistant.

Graduate students are also advised to start developing skills in teaching literature by participating in the teaching of undergraduate literature courses. Students can earn up to 3 units of graduate credit for practice teaching in literature.

INTERDISCIPLINARY PROGRAMS

The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in German Studies and Humanities. For description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

Students may work toward a Ph.D. in German Studies with minor in such areas as comparative literature, modern thought and literature, linguistics, or history. Students obtaining a Ph.D. in such combinations may require additional training.

STANFORD TÜBINGEN GRADUATE EXCHANGE

One or two Stanford graduate students in German Studies may be accepted as exchange students by the University of Tübingen, and the counterparts from Tübingen participate in academic programs at Stanford.

COURSES

(WIM) indicates that the course meets the Writing in the Major requirements.

(AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

GENERAL

(IN ENGLISH)

These courses do not require a knowledge of German and are open to all students.

8A, 9A. Myth and Modernity: Culture in Germany—(Enroll in Introduction to the Humanities 8A, 9A.)

8A. Reason and Revolution—GER:1 (DR:1) (two-quarter sequence) 5 units, Win (Strum)

9A. Rationalization and the Return of Myth—GER:1 (DR:1) (two-quarter sequence) 5 units, Spr (Eshel)

38A. Introduction to the Germanic Languages—(Same as 138) Survey of the oldest attested stages of the Germanic language family, including Gothic, Old Norse, Old Saxon, Old English, Old Frisian, Old Low Franconian (Old Dutch), and Old High German. The linguistic interrelationships, prehistory, Germanic tribal groupings, and written literature (if any). GER:3a (DR:7) 3 units, Win (Robinson)
120N. Stanford Introductory Seminar: Virtue and Terror—Kant, Rousseau, and the French Revolution—Preference to freshmen. As a culmination of the European Enlightenment, the French Revolution can be understood as an effort to construct state and society in the image of reason. A philosophical interpretation of the central features of revolutionary culture and politics (festivals, paintings, the Terror, etc.), and of their importance to modern conceptions of revolution and social change is made through "Kantian" and "Rousseauian" perspectives, and Enlightenment philosophical ideas, which are themselves at play in the Revolution. Works by Rousseau, Kant, Robespierre, others; paintings by David, others; music by Mozart. GER:3a (DR:7)

4 units, Spr (Lowood)

126A. Literary Institutions: A Comparative Approach—(Same as Comparative Literature 91.) Taught simultaneously at different overseas campus sites and at Stanford. The institutional structures and contexts for literature in different cultures, i.e., how literature is presented to the public at various levels. What sorts of literature are discussed in the press, and what issues are raised by such literary criticism? What is literature presented in schools? (Is it primarily the "local" national literature or is "world literature" read?) Do students read "minority authors"? What texts are taught at universities, what plays performed, and what films are screened in theaters? Students work as project groups in local sections, communicating with the instructor at Stanford and with students at distant sites through the Web. Group projects involve students at several locations and include comparisons of local literary institutions (e.g., the range of theater performance or the character of literacy criticism in the different sites). GER:3a (DR:7)

4 units, Win (Berman)

145A. Holocaust and Literature—(Same as 293A.) Questions of remembrance, representation, and cultural politics surrounding the Holocaust. The possibility of "poetry after Auschwitz;" relations between aesthetic form and historical experience; changing generational perspectives; the Holocaust in mass culture, especially film. Readings by: Paul Celan, Nelly Sachs, Dan Pagis, Tuvia Riebue, Imre Kertesz, Aharon Appelfeld, Primo Levi, Eli Wiesel, Günter Grass, and others. (In English)

3-5 units, Win (Eshel)

161A. The Arthurian Legend in Literature and Film—The "origins" of legend in the 6th century (Gildas, Bede, Geoffrey of Monmouth), through medieval ( Chrétien, Wolfram von Eschenbach, Malory), and to modern interpretations (Twain, Malamud). Focus is on variations in social meaning of different heroes in different contexts. Films from cult favorites (Excalibur, Monty Python and the Holy Grail) to the more obscure (Lancelot du Lac, Feuer und Schwer). Readings and discussion in English.

3-5 units (Poor) not given 1999-2000

162A. Weimar Cinema—Introduction to Weimar cinema and the cultural and political environment of the Weimar Republic (1919-33), focusing on film's formal aspects and consideration of film as entertainment and cultural expression in Germany. How to "read" and discuss film. Selections from Weimar and contemporary film theorists. Films, readings, discussion in English; some texts in German for German majors.

3-5 units, Aut (Lee)

175A. Modernization, Technology, and Culture in Germany, 1900 to 1945—(Same as 175/275.) Open to advanced undergraduates and graduate students. Interactions of material life, technology, and culture in Germany 1900-45. Lectures, readings, films, and reports are organized around the identification and sorting out of modernist and anti-modernist, rational and anti-rational, technocratic and anti-technocratic strands. Technology as a source and artifact of social, political, and cultural movements. Topics: industrialization, urban development, new means of transportation and communication, literature and technology, film and technology, "Amerikanismus," military technology, and the engineering culture of National Socialism. GER:3a (DR:7)

4 units, Spr (Lowood)

221A. Modernism and the Jewish Voice in Europe—(Same as Slavic Languages and Literatures 221.) Some of the most haunting literary voices of the 20th century emerged from the Jewish communities of Eastern and Central Europe. The Jewishness of the modernists is thematized, asking whether it contributed to shared attitudes toward text, history, or identity. Their works are situated in specific linguistic traditions: Yiddish, Hebrew, Russian, Polish, or German. Primary readings from Ansky, Bialik, Mandelstam, Babel, Schulz, Kafka, Celan, and others; secondary readings in history, Eastern European literature, and theory, including Marx, Freud, Benjamin, and Arendt.

3-4 units, Aut (Safra, Eshel)

241A,242A,243A.—Open to graduate students, advanced undergraduates, and sophomores with consent of instructor. The history of German thought from 1700 to the present and its significance for understanding modern culture and society. Authors such as: Leibniz, Mendelssohn, Kant, Schiller, Hegel, Marx, Kierkegaard, Nietzsche, Lukács, Husserl, Heidegger, Adorno, Arendt, Habermas, Kluge.

241A. Deutsche Geistesgeschichte I: 18th-Century German Thought—(Same as 241.) Introduction to 18th-century German thought, and to some distinctive problems of modern philosophy and cultural theory, through an analysis of Leibniz, Mendelssohn, Lessing, Kant, Schiller, and others. Discussions of the concept of modernity and its critics, of the politics of theory, and of the political and epistemological functions of art. (In English)

3-5 units, Aut (Strum)

242A. Deutsche Geistesgeschichte II: 19th-Century German Thought—(Same as 242.) Preludes to the 20th century: from the philosophy of culture and of history to utopian constructionism, and its disillusionments. Reading and discussion of relevant texts by representative thinkers: Hegel, Humboldt, Feuerbach, Marx, Stirner, Mainländer, Schopenhauer, and Nietzsche.

3-5 units, Win (Mueller-Vollmer)

243A. Deutsche Geistesgeschichte III: 20th-Century German Thought—(Same as 243.) German thought in the 20th century, especially critical theory, hermeneutics, and psychoanalysis. Readings of representative texts by Weber, Freud, Lukács, Benjamin, Schmitt, Heidegger, Adorno, Habermas. (In English)

3-5 units, Spr (Safra, Eshel)

292A. Concord and Jena: The Coming of Romanticism to America—American transcendentalism and the encounter of its major figures (Emerson, Fuller, Thoreau, and Parker) with Classical and Romantic German writers, e.g., Goethe, Schiller, Novalis, Jean Paul, Fichte, the Schlegels and Schieremacher. Focus is on the integration of specific Germanic traditions into the transcendentalists' conceptions of literature, poetic discourse, criticism, aesthetics, and new style of writing.

3-5 units, Spr (Mueller-Vollmer)

293A. Holocaust and Literature—(Same as 145A.)

3-5 units, Win (Eshel)

INTRODUCTORY

Note—Students registering for the first time in a first- or second-year course must take a placement test if they have studied German before entering Stanford.

FIRST-YEAR

1N. Stanford Introductory Seminar: German Studies—Preference to freshmen. Introduction to the language and culture of the German-speaking peoples for students who have had little or no prior exposure to German, but have a substantial interest in learning the language and understanding the complexities of German-speaking culture. Emphasis is on analyzing modern life against a socio-historical backdrop. German
language learning provides the basic tools to comprehend issues in German culture and history. GER:3a (DR:7)
5 units, Aut (Bernhardt)

20N. Stanford Introductory Seminar: German Studies—Preference to freshmen. Emphasis is on building language skills and expanding the understanding of German cultural history for students with some prior exposure to German (equivalent to one quarter of college-level study). The acquisition of basic competence in the language is coupled with explorations of history, literature, and the arts to achieve a basic cultural literacy in German Studies.
5 units, not given 1999-2000

1,2,3. German Language and Culture—Comprehensive, balanced introduction to listening and speaking, and reading and writing.
5 units, Aut, Win, Spr (Staff)

IX. Accelerated German—Equivalent to German 1 and 2 combined. For students who want an accelerated start in German language and culture with practice in all four skills. Appropriate for, but not limited to, students intending to study at Stanford in Berlin in Winter Quarter.
8 units, Aut (Strachota)

5. Intensive First-Year German—Equivalent of 1, 2, and 3 combined.
12 units, Sum (Staff)

10. Elementary German for Seniors and Graduate Students—Intensive, designed for students who need to acquire reading ability in German for the Ph.D. and/or for advanced research in their own field. No auditors.
4 units, Win, Sum (Petig)

11P. Individually Programmed Beginning German—For those who wish to complete more or less than 5 units a quarter, have scheduling conflicts, or prefer to work independently. Students proceed at their own pace, working on their own with the text and tapes. The instructor is available for consultation on a regular basis. Conversation classes may be attended for listening and speaking practice.
3-12 units, Aut, Win (Strachota)
Spr (Petig)

HAUS MITTELEUROPA

20A. Beginning Conversation—(AU)
1 unit, Aut, Win, Spr (Staff)

20B. Intermediate Conversation—(AU)
1 unit, Aut, Win, Spr (Staff)

20C. Advanced Conversation—(AU)
1 unit, Aut, Win, Spr (Staff)

20F. Everyday Life during WW II—(AU)
1 unit, Spr (Staff)

20K. Küche Mitt (German Cooking Class)—(AU)
1 unit, Aut (Staff)

20M. “Mitt” Movie Series—(AU)
1 unit, Aut, Win, Spr (Staff)

20N. German Music—(AU)
1 unit, Spr (Staff)

20P. Germany Today—(AU)
1 unit, Aut (Staff)

20Q. German Drama—(AU)
1 unit, Win (Staff)

20S. Speaking German “Mitt”—(AU)
1 unit, Win (Staff)

20T. Teaching German Conversation—(AU)
1 unit, Aut, Win, Spr (Staff)

INTERMEDIATE

At this level, students have several options depending on their interests. After completing German 3 or the equivalent, students may enroll directly in courses on the 120-level, which consider special topics in German culture while encouraging additional language learning. Alternatively, 21 and 22 emphasize a systematic review of the language, with 21W and 22W study the language of business and economics.

3-4 units, Aut, Win (Turneaure)

21W. Intermediate German I: Business German—Equivalent to 21, but readings, discussion, and exercises focus on the business world. Recommended for students planning to do a business internship in Germany. Prerequisite: 3.
3 units (Petig) not given 1999-2000

22. Intermediate German II—Continuation of 21, with greater emphasis on reading and writing skills. Literary texts of major 20th-century writers in their historical context.
4 units, Win (Turneaure)

22W. Intermediate German II: Business German—Equivalent to 22, but continues the business focus of 21W. Recommended for students going to Germany to do an internship. Prerequisite: 21 or 21W.
4 units (Petig) not given 1999-2000

100. 100 German Years—Hones German language skills while introducing the history and culture of Germany as experienced by ordinary people over the 20th-century; based on the Deutsche Welle video series. Themes: Germans and war, democracy, work, family, religion, sex, humor, crime, etc. Complementary readings. Presentations using related internet links, short written commentaries.
3-4 units, Win (Strachota)

101. Advanced Language Study I—Short fictional and expository readings, discussions, essays. Review of grammatical structures. Vocabulary building with emphasis on phrases and idiomatic expressions used in common communicative situations and lexical distinctions between various German equivalents of high-frequency English words. Practice conversations using the structures and expressions studied. Prerequisite: 22 or equivalent.
3-4 units, Aut (Turneaure)

102. Advanced Language Study II—Continuation of 101.
3-4 units, Win (Turneaure)

105. Advanced Business German—Case studies of typical business situations in German with accompanying videos, listening comprehension exercises, and computer drills. Business correspondence and reports in German. Prepares students for the International Business German exam.
3-4 units, Spr (Petig)

110. German Newspapers—Articles from the weekly Die Zeit and line dailies and news magazines are read and discussed. Short written commentaries. Systematic vocabulary building.
3-4 units, Aut (Turneaure)

111. Television News from Germany—For intermediate and advanced students. Viewing of current news reports and features. Emphasis is on the acquisition of basic competence in the language is coupled with explorations of history, literature, and the arts to achieve a basic cultural literacy in German Studies.
5 units, not given 1999-2000
121. Pop Culture in Contemporary Germany—Current trends in German popular culture. Reading materials from newspapers, magazines, comics, web, plus one contemporary novel. Weekly video and film viewings include TV talk shows, soaps, detective shows, and new German comedy films. Web-research, newsgroup, oral presentations, and 4-5 short papers.  
4 units (Poor) not given 1999-2000

122N. Stanford Introductory Seminar: The Brothers Grimm and their Fairy Tales—Preference to freshmen. A historical, biographical, linguistic, and literary look at the famous Kinder- und Hausmärchen of Jacob and Wilhelm Grimm. Readings from the fairy tales, plus materials in other media (film and the visual arts). Small-group performances of dramatized fairy tales. Prerequisite: 3 or equivalent. (In German) GER:3a (DR:7) (WIM)  
4 units, Spr (Jermigan)

126Q. Stanford Introductory Seminar: Reading German Literature—An Introduction—Preference to sophomores. The fundamental skills and concepts needed to read literature in German, strengthening language skills with an introduction to the central questions of literary study: how to interpret a text, the relationship between an author’s intention and a reader’s interest. Why does the literature of another age and another country continue to interest us and how does this distance influence our judgments? Authors: Luther, Goethe, Heine, Rilke, Kafka, and Brecht. Conducted primarily in German with short writing assignments. Prerequisite: 3 or equivalent. GER:3a (DR:7) (WIM)  
4 units, Aut (Berman)

127. The Culture of Seduction in German Plays—Introduction to some major German-language plays, including Goethe’s Faust; Schnitzler’s Hands Around; Wedekind’s Spring Awakening; and Brecht’s Threepenny Opera. The plays are approached by asking “how do the methods of seduction and the subsequent results in the plays reflect the cultural and social values of their times?” Dramatic interpretation.  
4 units, Win (Jermigan)

131-133. German literature and culture from the 18th century to present. Topics vary each year and courses may be repeated with consent of the instructor. Readings in German.

132. 19th-Century Literature and Culture: Romanticism—Responses to the Enlightenment and the French Revolution; the aesthetic discourse of the “sublime;” women and romanticism. Redefinitions of identity and emancipation, Romantic philosophy and evaluations of art and music. Authors such as Goethe, Holderlin, Novalis, Hoffmann, Schlegel, Heine, and others. GER:3a (DR:7)  
4 units, Aut (Eshel)

133. 20th-Century Literature and Culture: German Modernism—Introduces the major movements and authors of German Modernism in literary and visual culture. Authors: Hauptmann, Nietzsche, Wedekind, Mann, Kafka, Brecht, Lasker-Schüler. Readings and discussion in German.  
4 units, not given 1999-2000

133C. Minority Literature from Germany—Literary texts by writers of various cultural backgrounds (Jewish, Turkish, Russian, E. German, etc.) who live in Germany and who thematize difference. Emphasis is on a critical understanding of the concept of minority discourse in the German context. The nature of minority discourse and its relation to literature in various categories: e.g., mainstream, outsider, minority, and difference. Taught in German, building the appropriate vocabulary for literary and linguistic analysis of literary texts in spoken and written German.  
4 units, Spr (Kührch)

134P. Medieval Women—The place, participation, and images of women in medieval culture, emphasizing German-speaking contexts. Prominent historical women (e.g., Queen Matilda), images of women in medieval poetry (Minnesang), romance (Hartmann von Aue’s Erec, Gottfried’s Tristan), and texts authored by women (autobiographical writings of women mystics). Modern conceptions of medieval women in film. Primary texts in German, some secondary material in English. Discussion in German and English. GER:4c (DR:1)  
4 units (Poor) not given 1999-2000

138. Introduction to the Germanic Languages—(Same as 38A.)  
GER:3a (DR:7)  
3 units, Win (Robinson)

145A. Holocaust and Literature  
3-5 units, Win (Eshel)

175. Modernization, Technology, and Culture in Germany, 1900 to 1945—(Same as 175A/275.) GER:3a (DR:7)  
4 units, Spr (Lowood)

191. Mentoring Comparative Institutions—Introduction to mentoring and teaching on a web-based learning environment for students at dispersed sites and in diverse cultures. Weekly sessions and extensive on-line interaction. Prequisite: 126A or Comparative Literature 91.  
2 units, Win (Berman)

194. German Studies Colloquia—Stanford faculty, students, and visiting scholars present and discuss their works in German Studies and related fields.  
1 unit, Aut, Win, Spr (Staff)

195. Colloquium on the Contemporary Novel—(Same as 295.) Hans-Ulrich Treichel’s acclaimed novel Der Verlorene. A “close and slow reading” open to German majors and graduates dedicated to contemporary German novels. Focus is on developing analytical skills, presenting and reflecting on different, contradictory possible readings of the same text. (In German)  
1-3 units, Win (Eshel)

199. Individual Reading—36 hours of reading per unit, weekly conference with instructor. May be repeated for credit. Prerequisite: consent of instructor.  
1-2 units, Aut, Win, Spr (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

231-239. German Literature and Culture—The major periods of German literature from the early Middle Ages to the present. Undergraduate prerequisite: consent of instructor.

234B. Literary and Philosophical Revolutions around 1800—The critical commonplace suggests the Germans had their revolution only in spirit or in thought, a sign of German political backwardness, of the Deutsche misère. It may be that German literary and philosophical “revolutions” just preceding and directly following 1789 were not so much expressions of, or even simple reactions to, the political backwardness of the Germans, but instead enacted a distinctive literary-philosophical politics, sometimes explicit, sometimes coded. Readings: Heine, Goethe, Schiller, Wieland, Friedrich Schlegel, Novalis. Prequisite: consent of instructor. (In German)  
3-4 units, Spr (Strum)

236J. Weimar Republic—(Same as Comparative Literature 236J.) The relationship between literature and democracy during the 1920s. The impact of military defeat and revolution on the restructuring of the institutions on cultural life. Problems of nationhood and popularity; the tensions between engagement and tradition; literature and film; representations of war.  
3-5 units, Aut (Berman)
241-243. The history of German thought from 1750 to the present and its significance for an understanding of modern culture. Authors: Lessing, Herder, Kant, Schiller, Hegel, Marx, Nietzsche, Lukács, Husserl, Heidegger, Adorno, Habermas. (In English)

241. Deutsche Geistesgeschichte I: 18th-Century German Thought—(Same as 241A.)
3-5 units, Aut (Strum)

242. Deutsche Geistesgeschichte II: 19th-Century German Thought—(Same as 242A.)
3-5 units, Win (Mueller-Vollmer)

243. Deutsche Geistesgeschichte III: 20th-Century German Thought—(Same as 243A.)
3-5 units, Spr (Staff)

255. Middle High German—Introduction to medieval German language and culture. Selections from various authors (e.g., Hartmann von Aue, Gottfried von Strassburg) and genres (e.g., Minnesang, epic, romance). Grammar is reviewed and elucidated; emphasis is on rapid and accurate reading.
3-5 units, Win (Robinson)

275. Modernization, Technology, and Culture in Germany, 1900 to 1945—(Same as 175A/175.)
4 units, Spr (Lowood)

295. Colloquium on the Contemporary Novel—(Same as 195.)
1-3 units, Win (Eshel)

298. Individual Work—Open only to German majors and to students working on special projects, including written reports for internships. Honors students use this number for the honors essay. May be repeated for credit.
1-15 units each quarter (Staff)

300. Methods and Materials for German Studies—Techniques and library resources for investigating German literature and culture, particularly in its historical dimensions. Readings/assignments on the multiple aspects of the production of texts in historical context, emphasizing the location and interpretation of relevant cultural, economic, social, and literary sources. Bibliography; non-canonical and extra-literary sources; film and other non-print media; archives and special collections.
3-5 units (Lowood) not given 1999-2000

ADVANCED GRADUATE

400. Dissertation Research—Exclusively for graduate students in German working on dissertations.
1-12 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

These courses are approved for the German major and taught at the campus indicated. Students should discuss with their major advisers which courses would best meet educational needs. Course descriptions can be found in the “Overseas Studies” section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

BERLIN

3B. German Language and Culture
4 units, Aut, Win, Spr (Staff)

22B. Berliner Geschichte(n): Second-Year German
4 units, Aut, Win, Spr (Staff)

100B. Aktives Deutsch
2 units, Aut, Win, Spr (Staff)

123. The Brothers Grimm and their Fairy Tales
4 units, Aut (Robinson)

126A. Literary Institutions: A Comparative Approach—(Same as Overseas Studies 91.)
4 units, Win (Berman)

177A. Culture and Politics in Modern Germany
4-5 units, Win (Kramer)

179B. German Film and its European Context
4 units, Aut (Kramer)

195. Contemporary Theater—(Same as Overseas Studies 101A.)
4-5 units, Spr (Kramer)

AFFILIATED DEPARTMENT OFFERINGS

COMPARATIVE LITERATURE

30N. Stanford Introductory Seminar: Opera and Literature
3-5 units, Aut (Lindenberger)

115Q. Stanford Introductory Dialogue: Thinking in the Present—20th Century European Philosophy
2 units, Win (Gumbrecht)

311A. Visions of History
5 units, Win (White)

HISTORY

22N. Stanford Introductory Seminar: Ethnic Cleansing in the 20th-Century Europe
4 units, Aut (Naimark)

136A. European Thought and Culture in the 19th Century
5 units, Win (Robinson)

224. Undergraduate Colloquium: Stalinism in Eastern Europe
5 units, Spr (Naimark)

MUSIC

4G. The Operas of Richard Wagner
3 units, not given 1999-2000

15Q. Stanford Introductory Seminar: The Music of J. S. Bach and his Time
3 units, Win (Cohen)

17N. Stanford Introductory Seminar: The Operas of Mozart
3 units, Win (K. Berger)

143. Studies in Classical Music
4 units, Aut (K. Berger)

310. Research Seminar in Musicology
3-5 units, Win (K. Berger) Spr (Mahrt)

PHILOSOPHY

125/225. Kant’s Critique of Pure Reason
4-5 units, Win (Anderson)

170. Kantian Ethical Theory
4 units, Win (Jaworszka)

RELIGIOUS STUDIES

7N. Stanford Introductory Seminar: Religion in the Age of Enlightenment
3 units, Spr (Sockness)

274. From Kant to Kierkegaard
5 units, Spr (Sockness)

386
338. Mystics and Mysticism
4 units, Win (Gelber)

HISTORY

Chair: Carolyn Lougee Chappell
Associate Professors: Philippe Buc, Gordon H. Chang (on leave), Ahmad Dalal, Paulina Findlen, Kennell A. Jackson Jr., Mary L. Roberts (on leave)
Assistant Professors: Brad S. Gregory (on leave), Kathryn Miller, Ellen G. Neskar, Michael Thompson, Amir Weiner (on leave)
Visiting Professors: Paul David, Avner Greif, Susan M. Treggiari, Gavin Wright
Senior Lecturer: Joseph J. Corn
Lecturers: Margo Horn, Bertrand Patenaude, Richard Street
Consulting Professor: Thomas W. Simons, Jr.
Visiting Professors: Thomas Hughes, Colin Jones, Herbert Klein, Arnold Suppan, Katherine Tachau
Visiting Associate Professors: Pedro Castillo, Glenna Matthews, Julie Saville
Visiting Assistant Professors: Madeline Hsu, Roger Thompson
Acting Instructors: Timothy Lane, Angus Lockyer

History courses teach the foundational knowledge and skills (analytical, interpretive, writing) necessary for understanding the deep connections between past and present. History is a pragmatic discipline in which the synthesis of change over time involves sifting the multiple influences and perspectives that affect the course of events, as well as evaluating critically the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into a persuasive analysis lies at the heart of the department's undertaking. History majors with interdisciplinary emphasis (HMIE)

In pursuing the above requirements for all History majors, the student in the General History major is required to satisfy breadth and concentration requirements.

1. Breadth: to ensure chronological and geographical breadth, at least two courses must be completed in a "premodern" chronological period and in each of three geographical fields: Field I (Africa, Asia, and Middle East); Field II (the Americas); and Field III (Europe, including Western Europe, Eastern Europe, and Russia). Courses fulfilling the "premodern" chronological period may also count for Fields I-III.

2. Concentration: to develop some measure of expertise, students must complete four courses in one of the following fields of concentration: Africa, Asia, Eastern Europe and Russia, Europe before 1700, Europe since 1700, Jewish history, Latin America, science and technology, the United States, the Middle East, Comparative Empires and Cultures; or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture, high culture, and so on. The proposed concentration must be approved by the major adviser; a proposal for a thematic concentration must have the approval of both the adviser and the department's Undergraduate Studies Committee. At least one and preferably two of these four courses should be an undergraduate colloquium or seminar.

Certain Introduction to the Humanities courses taught by History faculty in a Winter-Spring sequence count toward the General History major.

HISTORY MAJORS WITH INTERDISCIPLINARY EMPHASIS (HMIE)

These majors are designed for several types of students: students interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline; students in History who want to understand how interdisciplinary approaches can deepen their understanding of history; and students primarily interested in developing interdisciplinary approaches to historical scholarship by combining the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science, humanities, and social science. In pursuing the above requirements for all His-
History majors, students in HMIE are required to complete their twelve courses for the major as follows:

Gateway Course (one course)—Students are required to take the appropriate gateway course for their interdisciplinary major. This introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major.

Methodological Cluster (three courses)—This cluster is designed to acquaint students with the ways in which interdisciplinary methods are employed in historical scholarship, both by practicing historians and by scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for the appropriate Historical Methods courses.

Geographic Cluster (four courses)—History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

Interdisciplinary Cluster (four courses)—These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must provide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for appropriate interdisciplinary courses.

HMIE majors do not mandate the breadth or concentration requirements of the General History major. Introduction to the Humanities courses taught by History faculty may apply to HMIES only insofar as their content is specifically appropriate to the particular methodological or geographic cluster. Courses pre-approved for the clusters in Interdisciplinary tracks are listed on the History advising website.

HISTORY, LITERATURE, AND THE ARTS

The History, Literature, and the Arts major is designed for the student who wishes to complement his or her work in history with study in literature, particularly in a foreign language. For the purposes of this major, literature is defined broadly, including art, drama, films and poetry, memoirs and autobiography, novels, as well as canonical works of philosophy and political science. It appeals to students who are interested in studying literature primarily in its historical context, or who want to focus on both the literature and history of a specific geographical area while also learning the language of that area.

Gateway Course—History 206A, History, Literature, and Arts, gives students a broad introduction to the study of literary texts in history.

Methodological Cluster—This cluster teaches students how historians, in particular, analyze literary texts as documentary sources. Students choose three courses from among the pre-approved HLA Methodology curriculum; other courses must be approved by the HLA coordinator. These courses need not be in the student’s geographic concentration.

Geographic Cluster—Students select four History courses in one of the following geographic areas: Continental Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, or Africa. These four courses must be taken in addition to the three methodological courses required above.

Interdisciplinary Cluster—Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student’s adviser must pre-approve all courses in this cluster; these courses may not be double-counted towards a minor or major other than History.

HISTORY AND SOCIAL SCIENCE

History and Social Science HMIE is a collaborative program of the Department of History and the Social Science History Institute. The curriculum is designed to acquaint students with the application of the analytic and quantitative tools of the social sciences to issues in historical causality and explanation.

Gateway Course—History 206, The Logic of History, focuses on the way that historians sustain arguments on the basis of logical models and documentary evidence. It is divided into two modules: the first focuses on readings in the philosophy of history and causal model building, the second focuses on the reading of a wide variety of historical scholarship in order to allow students to identify particular kinds of confirmatory logics in a practical sense.

Methodological Cluster—Three History courses employ social scientific methods to address historical questions. The choice of courses depends on the student’s particular methodological and substantive interests, and must be selected from courses preapproved for this cluster, or approved in advance by the faculty adviser.

Geographic Cluster—See above.

Interdisciplinary Cluster—Students must define an interdisciplinary methodological cluster with the approval of their adviser. This cluster must constitute a coherent curriculum of tools oriented courses in the departments of Classics, Economics, Political Science, or Sociology. The cluster requirement may be fulfilled in either of two ways: by taking four courses in a single department; or by taking four courses that are built around a particular set of approaches in multiple departments. An example of the former might be a curriculum that allows a student to become acquainted with the methods and approaches of political science to the study of political history (what is often called “new political history”). Such a curriculum would include courses in the Department of Political Science on quantitative methods (Political Science 100A and 100B) along with courses in the historical analysis of American Politics (courses taught, for example, by professors Brady and Weingast). An example of the latter might be a focus on economic history, in which a student took American economic history, European economic history, and history of technological change in the Department of Economics, along with the ancient economy in the Department of Classics. In either case, the program of study must be approved in advance by the student’s adviser. Courses in this cluster may not be double-counted towards a minor or major other than History.

HISTORY AND SCIENCE

History and Science is a collaborative program of the Department of History and the Program in the History and Philosophy of Science. The major is designed for the science student who wishes to complement his or her work in science with a History major that focuses explicitly on science; students in the humanities and social sciences whose interests science is primarily historical and contextual; and students contemplating medical school who are interested in a History major that allows them to study the history of medicine, biology, and allied sciences in conjunction with fulfilling the premed science requirements that give them a general grounding in science.

Gateway Course—206P, Many Histories of Science, is designed to introduce students to approaches and methods in the history of science, technology, and medicine. It is primarily concerned with definitions of scientific methodology, practice, and institutions, and exposes students to some of the fundamental debates in the history of science. Case studies vary depending upon the particular instructor.

Methodological Cluster—Three History courses focusing on the history of science, technology, and medicine. Courses must be approved by the student’s adviser. The choice of courses depends on the student’s particular interests (for example, premodern science, history of medicine and biology, history of technology, contemporary science).

Geographic Cluster—Students select a geographic area (for example, America, Europe, Asia, or Africa) and complete four history courses in that area. Courses in history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted for the methodological cluster.

Interdisciplinary Cluster—This four-course cluster can be defined in any of three ways: (1) a disciplinary concentration that entails taking four courses in a single scientific discipline; (2) an interdisciplinary concentration that entails taking two anthropology of science, philosophy of science, or sociology of science courses, and two complementary Sc.
CREDENTIAL

SECONDARY (HISTORY) TEACHER’S CREDENTIAL

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding the requirements by applying to the Credential Administrator, School of Education.
Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A final decision as to whether she or he will be allowed to continue to work towards the Ph.D. is normally made by the middle of the student’s third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.

REQUIREMENTS

1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:
   - Europe, 300-1400
   - Europe, 1400-1789
   - Europe since 1700
   - Jewish History
   - Russia
   - Eastern Europe
   - Middle East
   - East Asia before 1600
   - East Asia since 1600
   - Africa
   - Britain and the British Empire since 1460
   - Latin America
   - The United States (including Colonial America)
   - The United States (including Colonial America) to 1865
   - The United States since 1865
   - The History of Science and Technology

2. The department seeks to provide a core colloquium in every major concentration in which students normally enroll during the first year of graduate study.

3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.

4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
   a) One of the concentrations listed above (other than the student’s major concentration).
   b) One of the concentrations listed below, which falls largely outside the student’s major concentration:
      - The Ancient Greek World
      - The Roman World
      - Europe, 500-1000
      - Europe, 1000-1400
      - Europe, 1400-1600
      - Europe, 1600-1789
      - Europe, 1700-1871
      - Europe since 1848
      - England, 450-1460
      - Britain and the British Empire, 1460-1714
      - Britain and the British Empire since 1714
      - Russia to 1800
      - Russia since 1800
      - Eastern Europe to 1800
      - Eastern Europe since 1800
      - Jewish History
      - Middle East to 1800
      - Middle East since 1800
      - Africa
      - China before 1600
      - China since 1600
      - Japan before 1600
      - Japan since 1600
      - Latin America to 1825
      - Latin America since 1810
      - The United States (including Colonial America) to 1865
      - The United States since 1865
      - The History of Science and Technology

5. Each student, before conferral of the Ph.D., is required to satisfy the department’s teaching requirement.

6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. A student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Latin, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of language competence must be accomplished before a student takes the University oral examination.

7. The student is expected to take the University oral examination in the major concentration early in the third graduate year.

8. The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

JOINT PH.D. IN HISTORY AND HUMANITIES

The Department of History participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in History and Humanities. See the “Interdisciplinary Studies in Humanities” section of this bulletin.

RESOURCES

The above section relates to formal requirements, but the success of a student’s graduate program depends in large part on the quality of the guidance which he or she receives from the faculty and on the library resources available. Prospective graduate applicants are advised to study closely the list of History faculty and the course work which this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described below.

The rich, and in some respects unique, collection of the Hoover Institution on the causes, conduct, and results of WWI and WW II are being augmented for the post-1945 period. The materials include government documents, newspaper and serial files, and organization and party publications (especially the British and German Socialist parties). There are also important manuscript collections, including unpublished records of the Paris Peace Conference of 1919 and the Herbert Hoover archives which contain the records of the Commission for Relief in Belgium, the American Relief Administration; the various technical commissions established at the close of WW I for reconstruction in Central and East-
FINANCIAL SUPPORT

 Students who are admitted with financial support are provided four more years of support through fellowship, teaching and research assistantships, and tuition grants. Applicants who have completed the A.M. degree from another institution may be eligible for three or four years of support. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent residents who are interested in area language studies in East Asia, Latin America, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from:

FLAS Coordinator
(650) 723-0564
FLAS application deadline: mid-January

COURSES

See the Time Schedule for changes in course offerings each quarter, and check the web at http://www-portfolio.stanford.edu:6380/430 for updated information.

INTRODUCTORY UNDERGRADUATE

STANFORD INTRODUCTORY SEMINARS

Refer to the Time Schedule or contact the Stanford Introductory Studies office (123 Sweet Hall, telephone 650-723-4504) for applications and information.

12Q. Stanford Introductory Seminar: "The Mind Has No Sex"?—Preference to sophomores. In 1673, the French educator Pollain de la Barre declared, "The mind has no sex." The relations between male and female intellectuals from the Renaissance to the Enlightenment, the age of Galileo, Descartes, and Newton. The place of gender in the formation of modern science and philosophy. How, historically, have men and women participated in making knowledge? What does it mean to be a knowing individual?

3 units, Win (Findlen)

3 units (Findlen) not given 1999-2000

16N. Stanford Introductory Seminar: Science on Trial—The Crimes of Galileo—Preference to freshmen. In different periods, scientific knowledge has been contested by competing authorities with a claim to possess another truth. How do scientists respond to such assaults? How do we view these debates over time? The 1633 trial of the Italian mathematician Galileo is a point of departure to explore the relations between science, politics, faith, and reason. Students compare this episode with other scientific controversies in the past and the present.

3-4 units (Findlen) not given 1999-2000

19N. Stanford Introductory Seminar: Peter the Great—The Individual Shaping History, History Shaping the Individual—Preference to freshmen. Praised by his subjects for rescuing Russia from the alleged backwardness of the medieval past, Peter the Great became the subject of a powerful, yet contested, myth. Focusing on primary sources from the 17th to the 19th century (speeches, laws, travelers' accounts, literature, and art), emphasis is on the myth of the "Great Reformer," its makers and detractors, and its many variations. GER:3a (DR:7)

4 units, Win (Kollmann)

20Q. Stanford Introductory Seminar: Cultural Revolution in 18th-Century Russia—Preference to sophomores. The legacy of Peter the Great (1682-1725). Did he really transform Russia, as he is said to have done? If so, in what ways? The social and cultural changes in the wake of Peter's dynamic rule; and whether the Europeanization in 18th-century culture was more than skin-deep. Continuity and change in the rhetoric of power, mores and manners, aristocratic life, printing and literacy, opportunities for women, and social mobility.

3-5 units (Kollmann) not given 1999-2000

22N. Stanford Introductory Seminar: Ethnic Cleansing in 20th-Century Europe—Preference to freshmen. The major episodes of "ethnic cleansing" in 20th-century Europe: the Greek expulsion from the Ottoman Empire/Turkey and the Armenian genocide, Nazi genocidal policies, the expulsion of Germans from Poland and Bohemia, the deportation of the Crimean Tatars, and the case of Bosnia. GER:3a (DR:7)

4 units, Aut (Naimark)

27N. Stanford Introductory Seminar: The First World War as Experience and Memory—Preference to freshmen. What the war meant to European and American soldiers and civilians as they lived through it and remembered it. The experience of war in a variety of documents, films, novels, memoirs, and secondary sources.

3 units (Sheehan) not given 1999-2000

33Q. Stanford Introductory Seminar: Philosophical Machines—The History of Thinking Technology—Preference to sophomores. Technology and technologies, i.e., human-built devices that extend the powers of the human body in its interactions with nature and with other bodies, have been a provocation and a fascination for Western thought since its incipient moves in classical antiquity. The intensity with which philosophers have reacted to the technological innovations of their times suggest that, within Western culture, philosophy and technology seem to have shaped each other. The parallel analysis of historically specific technical devices and chronologically corresponding philosophical texts.

3-5 units (Gumbrecht, Lenoir) not given 1999-2000

34Q. Stanford Introductory Seminar: Virtuality—Preference to sophomores. New media technology from the printing press and photography to computer-mediated communication has transformed our experience of the "real": our conceptions of objectivity, agency, the self, the body. Using authors from Hobbes to Freud (17th-20th centuries), the focus is on the material media's role in changing epistemological formations. Visualizations in biomedicine, including new developments in "virtual surgery." Hands-on construction of virtual worlds. Readings on the new
hypermedia guide study of emerging practices of reading and rhetoric.

3SQ. Stanford Introductory Dialogue: 20th-Century History as Lived Experience—Preference to sophomores. Intersections between individual lives and the cataclysmic events of the 20th century, e.g., WW I and WW II, the Spanish Civil War, the Holocaust, and the Soviet takeover of Eastern Europe. Critical examination of memoirs, autobiographies, and fiction of 20th-century writers and politicians (Koestler, Brittain, Orwell, Remarque, Churchill, and Kundera) evaluates the uses of personal memory for the historian. What can individual accounts tell us about 20th-century history which a general narrative cannot? How are these accounts limited as historical sources? What are the politics of memory and how have they shaped the history of the 20th century?

2 units (M. L. Roberts) not given 1999-2000

36N. Stanford Introductory Seminar: Gay Autobiography—Preference to freshmen. The issues of gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Lounigas, Barbín, Cammermeyer, Gingrich, and Lorde. To what degree do these writers come to view their sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view the issue of identity? What kind of politics follow from these writers' experiences? GER:3a,4c (DR:7)

4 units, Spr (Robinson)

41N. Stanford Introductory Seminar: Fictions of Empire—Preference to freshmen. Readings of works of fiction; what the British Empire meant for the British themselves and for those who were within the Empire. Conrad's Heart of Darkness, Kipling's Kim, Forster's A Passage to India, Orwell's Burmese Days, and Porter's The Lion's Share, and works by Indian authors as they react to the experience of being part of the Empire. GER:3a (DR:7)

5 units, Win (Stansky)

42N. Stanford Introductory Seminar: The Invention of Liberty and the English Revolution—Preference to freshmen. Between 1640 and 1660, England experienced a civil war and an 11-year period in which it became a republic, ruled not by a hereditary king but by a lord protector. During this revolutionary period, English men and women talked and wrote about freedom and liberty, in terms of the individual and the state and in terms of religion and society. What these writings on what freedom might and should mean, writings which sketched for the first time in premodern Europe what democracy and a democratic republic might entail. GER:3a (DR:7)

4 units, Spr (Seaver)

5 units, Spr (Jackson)

48Q. Stanford Introductory Seminar: South Africa—Contested Transitions—Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet. GER:3b (DR:9)

3 units, Win (Samoff)

50N. Stanford Introductory Seminar: The Black Atlantic—Preference to freshmen. The spread of African peoples and cultures since the beginning of the modern slave trade. This forced migration began a process in which millions of Africans traversed the Atlantic Ocean. Such journeys were marked by the fashioning and refashioning of diverse identities, rooted in Africa, and a shared experience of slavery and its legacy, which shaped the political, cultural, and social development of nations and peoples in the Americas, the Caribbean, and Europe. Focus is on issues of cultural exchange, cultural negotiation, and resistance. GER:4b (DR:3)

4 units (M. Thompson) not given 1999-2000

51N. Stanford Introductory Seminar: Abraham Lincoln—Myth and Reality—Preference to freshmen. What we know about Lincoln from documentary sources is compared with his image in American memory and mythology. Students read/discuss Lincoln's speeches and letters, a standard biography, essays on controversial aspects of his career, a study of how Lincoln has been remembered, and a recent novel based on his life. How history is made and remade by historians, artists, and interest groups within American society.

3 units (Fredrickson) not given 1999-2000

52N. Stanford Introductory Seminar: The Atomic Bomb in Policy and History—Preference to freshmen. Emphasizing declassified files from WW II and later interpretations, addresses the questions: Why did the U.S. drop A-bombs on Japanese cities in August 1945? Were there viable alternatives, and, if so, why were they not pursued? What did the use of the A-bombs mean then, and later? How have postwar interpreters explained and justified, or criticized, the A-bombings, and why? Various approaches from history, international relations, American studies, political science, and ethics address the underlying conceptions, the role of evidence, logic, models of explanation, ethical values, and cultural social influences in the continuing dialogue on the atomic bomb.

4 units (Bernstein) not given 1999-2000

53N. Stanford Introductory Seminar: Reflections on the American Condition—American History through Literature—Preference to freshmen. Classics of American literature, viewed as cultural and historical documents, cultivate critical skills in reading texts from various perspectives: aesthetic, biographical, social, and historical. Readings: Harriet Beecher Stowe, Uncle Tom's Cabin; short stories by Henry James and Edith Wharton; Richard Wright, Native Son; and David Guterson, Snow Falling on Cedars. GER:3a (DR:7)

5 units, Aut (Kennedy)

57Q. Stanford Introductory Seminar: Martin Luther King, Jr.—Interactive—Preference to sophomores. The MLK Papers Project website attracts users from all over the world to the project's unique documentary collections. Students adapt these materials to the needs of people from various educational backgrounds.

5 units (Carson) not given 1999-2000

85Q. Stanford Introductory Seminar: Jews and Muslims—Preference to sophomores. The history of Jewish communities in the lands of Islam and their relations with the surrounding Muslim populations from the time of Muhammad to the 20th century. Topics: the place of Jews in Muslim societies, Jewish communal life, variation in the experience of communities in different Muslim lands, the impact of the West in the Modern period, the rise of nationalisms, and the end of Jewish life in Muslim countries. GER:3b,4a (DR:9 or 2)

5 units, Win (Rodrigue)

90Q. Stanford Introductory Seminar: Buddhist Political and Social Theory—Preference to sophomores. Contemporary Buddhist political theory and its historical and textual roots, emphasizing Tibetan, Thai, and Sri Lankan Buddhism. Topics: society and polity in Buddhist thought, Buddhist spiritual practice as social and political practice, sovereignty, the individual and society, Buddhist economic theory and practice, Buddhism and the state, Buddhist political and social theory in practice.
differences between Vajrayana (Tibetan) and Theravada (S.E. Asian) Buddhist social theory. GER:3b,4a (DR:9 or 2)

5 units (Mancall) not given 1999-2000

92N. Stanford Introductory Seminar: Killing Fields—Atrocity and Memory—Preference to freshmen. How do historians trace the act of memory? Two atrocities, Pol Pot's assault on his own people in Cambodia and the My Lai massacre of civilians in Vietnam, are explored as to how events are reported, assimilated, reproduced, and altered through the articifaces of memory and the narratives of history. Research is based on a wide variety of primary sources and on critical readings of invented and recollected events.

4 units (Kahn) not given 1999-2000

99Q. Stanford Introductory Seminar: Buddhist Biography and Autobiography—Preference to sophomores. Biography and autobiography reveal the “Buddhist world view;” explore the progress of the subject on the path to “enlightenment,” describe the methods used to achieve enlightenment, and provide evidence concerning the ways in which the Buddhist “self” relates to other “selves” and to society at large. Materials are primarily from Tibetan and Thai Buddhism.

5 units, Spr (Mancall)

INTRODUCTORY LECTURES

For students with little or no previous experience in college-level history, these courses survey a specific topic and introduce the methods of the discipline. All are meant to serve as foundations for more advanced course work within the department.

13. The Emergence of Modern Medicine—How did medicine emerge as a distinctive body of knowledge and as a profession in the age of Vesalius and Harvey? Why did physicians, rather than other medical practitioners, come to dominate medicine? The history of medicine from approximately 1000 to 1700. Topics: the history of the body, the religious and cultural significance of disease, development of hospitals, the rise of public health system. Compares medical knowledge and institutions in western Europe and Islam. GER:3a (DR:7)

5 units, Win (Findlen)

24A.B. Ten Days that Shook the World—(Enroll in Introduction to the Humanities 24A,B.)

24A. 5 units, Win (Buc)
24B. 5 units, Spr (Rodrigue)

26A.B. Democratic Society in Europe and America: Origins, Crises, Dilemmas—(Enroll in Introduction to the Humanities 26A,B.)

26A. 5 units, Win (Kennedy, Sheehan)
26B. 5 units, Spr (Kennedy, Sheehan)

28. The Second World War—(Formerly 128.) The diplomatic, military, and political history of the war in Europe and America. Themes: the crisis in the international state system following WW I, the origins of WW II, the nature of wartime leadership, the relationship between strategy and politics, the mobilization of societies for war, the character of combat, war and race, and the afterlife of the war in public and private memory.

5 units (Kennedy, Sheehan) not given 1999-2000

33A. The Rise of Scientific Medicine—The intellectual, social, and institutional dimensions of the rise of scientific medicine in the 19th and 20th centuries. How did medicine become “scientific?” What differences did science make to the practicing physician? Why did it displace other approaches to medicine? Focus is on medicine in Europe and the U.S., 1800 to the present. Topics: the development of experimental physiology, bacteriology, pharmacology, biomedical technology, nuclear medicine, biomedical imaging, computers in medicine, and prospects for bedside gene therapies; the effects of scientific developments in biomedical science and of technology on medical practice and therapy; the professionalization of medicine in comparative European and American contexts. GER:3b (DR:9)

5 units, Spr (Lenoir)

61. The Constitution and Race—The relation between the development of American constitutionalism and the politics and jurisprudence of slavery and race during the creation of the federal republic, the crisis of Civil War and Reconstruction, and the civil rights revolution of the mid-20th century. GER:4b (DR:3)

5 units (Rakove) not given 1999-2000

64. Introduction to Race and Ethnicity in the American Experience—(Formerly 164; same as American Studies 164.) How ethnicity influenced the American experience and how prevailing attitudes about racial and ethnic groups over time have affected the historical and contemporary reality of the nation’s major minority populations. Focuses on the past two centuries. GER:3b,4b (DR:3 or 9)

5 units, Win (Castillo)

65. Introduction to Comparative Studies in Race and Ethnicity—Introduces how various disciplines approach the study of race and ethnicity; identifying important topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere, and exposing students to several History and other senior faculty affiliated with the Program in Comparative Studies in Race and Ethnicity. Key faculty provide weekly lectures augmented by discussion sections taught by CSRE Teaching Fellows. GER:3b (DR:9)

5 units, Spr (Camarillo, Fredrickson)

75. The United States and East Asia—Introduction to the history of political, social, military, and cultural interactions between the U.S. and the societies of E. Asia (China, Japan, Korea, Vietnam, and the Philippines) from the mid-19th century to the present. Major wars and diplomatic events, mutual perceptions, reciprocal consequences, and long-term trends generated by these events and the circumstances that brought them about. Structured as an American narrative with full voice to E. Asian perspectives.

5 units (Chang, Duus) not given 1999-2000

80. Culture, Politics, and Society in Latin America—Introduction to the political and social history of Latin America. Emphasis is on the interaction between institutional change, social structure, and political movements, emphasizing the environment and cultural values. GER:3b,4a (DR:2 or 9)

5 units, Win (Wirth)

87. Empires and Cultures in the Modern World—The formation of modern European empires and their expansion into Asia, Africa, and the Middle East. Topics: cultural encounters, military conquest, economic integration, the new imperialism, colonialism, nationalism, the mutual constitution of colonial power and forms of knowledge, and the culture and politics of the post-colonial world. Readings: historical texts, films, and novels. GER:4a (DR:2)

5 units, Spr (Lockyer)

88. Imagining Jewish Civilization—(Same as Religious Studies 29.) Interdisciplinary introduction to the various forms of Jewish self-expression, literature, religion, and history from the Biblical period to the present. Topics: power and powerlessness, conflicting notions of the divine, evil, beauty, community, gender, and learning through the ages. Guest lectures, films, readings of primary and secondary texts.

5 units (Eisen, Zipperstein) not given 1999-2000

92A. The Roots of Modern East Asia—China, Korea, and Japan in Early Modern Times—From the late Yuan to the Taiping Rebellion. Emphasis is on socio-economic, rather than political history, to expose students to a sophisticated society very different from their own. GER:3a,4a (DR:2 or 7)

5 units, Aut (Kahn)
58S. Sources and Methods Seminar: Americans All—The Cultural Politics of Gender and Race in Wartime America—WW II mobilization efforts presented women and some racial minorities with attractive social and economic opportunities, but what were the costs? What did it mean to unite anti-democratic forces abroad even as democracy’s promise remained unfulfilled at home? The effects of the war upon individuals and the role war played in facilitating or hindering incipient civil rights movements and oppositional subcultures.

5 units, Win (Mozes)

61S. Sources and Methods Seminar: America 1968—Race, Riots, and Rock n’ Roll—In 1968 the U.S. was in a state of turmoil as Vietnam, the murders of MLK and RFK, riots, and student and ethnic protests paralyzed the nation. America’s diverse body politic struggled to make sense of its own unraveling, with race, class, and culture shaping every action, reaction, and response. The politics, culture, and society through official reports, media, music, and movies.

5 units, Aut (Peralas)

65S. Sources and Methods Seminar: Hyphenated Americans? The Formation of Identity in 20th-Century California—What does it mean to be an American? How have African Americans, Japanese Americans, American Jews, and other “outsiders” in California framed their conception of American identity and belonging in the face of mainstream society’s resistance, even refusal, to embrace them? Primary sources (e.g., speeches, Hollywood films, novels, autobiographies, personal correspondence, and plays) show how people on the margins redefined the mainstream in their own terms.

5 units, Aut (S. Bernstein)

68S. Sources and Methods Seminar: Virgins, Fairies, and Nymphomaniacs—The Making of Sexual Identities in the United States—Were the Puritans sexually repressed? Was Walt Whitman really “gay?” What did it mean to be “queer” in the 1930s? The social construction of sexual categories and sexual identities in American history, with a focus on the 20th century. Primary sources include personal correspondence, court transcripts, Hollywood films, pulp fiction, Kinsey reports, medical journals, and original documents in the Stanford Archives.

5 units, Spr (Chavez)

72S. Sources and Methods Seminar: Flappers, Housewives, and Bra Burners—Images and Representations of Womanhood in 20th-Century America—How have images and representations of women changed over the 20th century in America? Prescriptions of womanhood and woman’s own representations of themselves through advertising, film literature, autobiography, and oral history. The differences in racial, ethnic, and class representations within each decade of the 20th century and the method by which prescription and lived experience converge and diverge.

5 units, Spr (Chavez)

74S. Sources and Methods Seminar: Filipina/o American Communities in California, 1900-1965—Filipina/o efforts to build ethnic rural and urban communities in Stockton, San Francisco, and Los Angeles amidst labor exploitation and anti-Filipina/o sentiment, and how the colonial relationship (1899-1946) between the U.S. and the Philippines shaped the lives of these immigrants. Topics: racialization, segregation, immigration, ethnicity, political activism, nationalist responses to U.S. rule, labor, the family, gender and the impact of war, depression in the global context of U.S.-Philippine relations.

5 units, Spr (Mabalon)

88S. Sources and Methods Seminar: Transformation of Jewish Identity in Eastern Europe, 1881-1939—The Jews of modern Eastern Europe offer a case for the study of questions raised by our contemporary preoccupation with ethnicity and multiculturalism: How do politics, culture, and language intersect? What are ethnicity, nationality, and national culture? Reset by massive social, political, and cultural changes, these men and women created a new Jewish politics, new varieties of Jewish culture, and competing visions of Jewish identity. Primary sources (political writings, literature, memoir, census data, art, film) focus on questions of historical method.

5 units, Win (Mozes)

99S. Sources and Methods Seminar: Re-Imagining Palestine—Although Palestine as a formal geopolitical entity ceased to exist after the 1948 war and the establishment of the State of Israel, the Palestinian Arabs did not. The diverse experiences and struggles of Palestinians who became stateless refugees throughout the world, and the small minority who remained in Israel. Which aspects of pre-1948 Palestinian social and cultural life continued at home and in the diaspora, and which were newly invented? How has Palestinian identity been shaped by exile, sweeping changes in the Arab world, and the movement for self-determination?

5 units, Spr (S. Robinson)

91S. Sources and Methods Seminar: Human Rights in China—U.S.-China relations in the post-Cold War era have largely been framed within narratives of human rights. An international human rights regime has come into being since WW II, but debates concerning cultural relativism vs. universalism are not settled. Is there a specifically Chinese approach to human rights? When have human rights been discussed in Chinese history? When and where have human rights been discussed with reference to Western concepts? Is there a difference between Western and Chinese views of human rights and, if so, what are the implications of this? Examples from the student democracy movement, Chinese prison system, political dissidents, and policies toward Tibet.

5 units, Win (Plum)

UNDERGRADUATE LECTURES

100 through 199 are lecture courses.

GENERAL

102A. The International System—The history and analysis of world politics and international relations from the dominance of empires and nation-states at the turn of the century until the present. The influence of communism, fascism, and anti-imperialism on the system, and the emergence of “society” as a factor in international relations. Questions of sovereignty vs. the “new world order.” GER:3a,4a (DR:2 or 7)

5 units, Win (Naimark, Simons)

EASTERN EUROPE AND RUSSIA

119. Aristocracies and Absolutism: Early Modern Eastern Europe, 1400-1800—The societies and culture of E. Europe (Belorussia, Bohe mia, Hungary, Poland, Ukraine) in the late medieval and early modern periods. The conflict of aristocratic parliamentary governments with absolutist states (Austria, Hungary, Prussia, Russia). E. Europe’s development is contrasted to the Russian historical experience.

5 units (Kollmann) not given 1999-2000

120A. Early Modern Russia, 1400-1762—Chronicles in the context of international trade and geopolitics. The expansion of Russia from its 14th-century origins to its achievement of a multiethnic empire stretching from Poland to Siberia, the Far East, and the Black Sea by the 18th century. Governance and society in conditions of autocracy: institutions of rule, social hierarchy, interethnic relations in empire, tension between the center and periphery, serfdom and agrarian economy, social values and gender roles, popular religiosity, Russian Orthodox as institution and as arbiter of high culture, 18th-century immersion in European culture and attendant social tensions. Interdisciplinary: guest lectures on art and literature. Eras of rapid change and social mobilization (Ivan IV,
Peter I, Catherine II) are placed in the long-term context. GER:3b (DR:9)
5 units, Spr (Kollmann)

120B. Imperial Russia, 1762-1917—State, society, empire, and the international relations of Imperial Russia (18th-19th centuries to 1917)
Alternate years with 120D. GER:3a (DR:7)
5 units, Win (Emmons)

120C. 20th-Century Russian and Soviet History—Survey and analysis of Russia in the 20th century, focusing on Soviet policy from its revolutionary advent in 1917 to its dramatic collapse in 1991. GER:3a (DR:7)
5 units, Aut (Patenaude)

120D. Intellectual and Cultural History of Imperial Russia—Companion to 120B. The development of Russian intellectual and cultural life under the impact of Western influences, from the reign of Peter the Great to the end of the Empire. Focus is on primary texts and cultural products. Recommended: 120B.
5 units (Emmons) not given 1999-2000

121. Russian Jewish History, 1772-1917—The social, economic, cultural, and political trends in Russian Jewish life from the Polish partitions until the 1917 Revolution: popular and elite cultures, changing family and social patterns, government attitudes toward Jews, perceptions of Jews in Russian culture, Jewish political cultures, and political radicalism. Emphasis is on regional differences and their impact on the character of Jewish life in the areas of Belorussia, Lithuania, Ukraine, etc.
5 units (Zipperstein) not given 1999-2000

125. 20th-Century Eastern Europe—Major historical trends in 20th-century E. European history. Empires and national movements. The creation of independent Eastern Europe after WW I; social movements and the emergence of dictatorships and fascism in the inter-war period. WW II, Stalinism, and destalinization in contemporary E. Europe.
5 units (Naimark) not given 1999-2000

MEDIEVAL AND EARLY MODERN EUROPE

100A. Europe: Late Antiquity to 1500—Themes of group identity, power, and religion, surveying the transformations of European society and power-structures from Augustus to Machiavelli. How did groups fashion and refashion themselves through contact with other groups, the pressures of politics, and the utilization of sacred norms? How did religious influences societies and how were religions transformed by societies? GER:3a (DR:7)
5 units (Buic) not given 1999-2000

100B. Machiavellian Moments: Europe's History, 1492-1793—Survey of the intellectual and social currents from the voyages of Columbus to the American Revolution. Readings: Shakespeare, Locke, Wollstonecraft, Rousseau, and Jefferson. GER:3a (DR:7)
5 units, Win (Lougee Chappell)

105A. Introduction to Medieval Culture—(Same as English 165A. Medieval Studies 165.) Introduction to the development of medieval culture through religious, philosophical, literary, artistic, social, and political sources, with emphasis on the interrelationships among them. GER:3a (DR:7 or 8)
5 units, Win (Brown, K. Miller)

110. Storming Heaven: Christianity in Conflict in Early Modern Europe—What happens when a culture holds that right religion is absolutely necessary for salvation, yet disagrees about its content? A multi-perspectival view of divergent Christian traditions from the early 16th to the mid-17th centuries, with parallels to religious "hot spots" in our own world. Topics: the character of the late medieval Church, humanism and Catholic reform, Luther and the early evangelical movement, the rise and spread of Anabaptism, Calvin and the exportation of Calvinism, the Council of Trent and Counter-Reformation, the Wars of Religion in France and the Netherlands, and the process of confessionization.
5 units (Gregory) not given 1999-2000

MODERN EUROPE

100C. Introduction to Modern Europe—European history since the French Revolution has been a persistent attempt to come to terms with the promise and perils of the great revolutions of the 18th century. Readings: von Gentz, Adams, Marx, Fanon, Freud, de Beauvoir. GER:3a (DR:7)
5 units, Spr (Sheehan)

130. From Enlightenment to Revolution: France in the 17th and 18th Centuries
5 units (Baker) not given 1999-2000

130B. France from 1750 to the Present—France has long been viewed as the epitone of civilized values and cultural distinction; but it has also been associated with chronic political instability, violent revolution, and anarchistic artistic rebellion. The diverse and contradictory features of one of world’s great powers, starting in the 18th century in which France produced Voltaire, Rousseau, and the Enlightenment, and Robespierre, and to the present. Use of literature, art, and film.
5 units, Spr (Jones)

136A. European Thought and Culture in the 19th Century—Major European thinkers and intellectual movements from the Enlightenment to Modernism. Readings: Matthew Arnold, Jane Austen, Karl Marx, John Stuart Mill, Friedrich Nietzsche, Emile Zola, etc. GER:3a (DR:7 or 8)
5 units, Win (Robinson)

136B. European Thought and Culture in the 20th Century—Important European thinkers and intellectual movements of the 20th century, from Freud to Foucault.
5 units (Robinson) not given 1999-2000

137. The Holocaust—The emergence of modern racism and radical antisemitism. The Nazi rise to power and the Jews. Anti-semitic legislation in the 1930s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry.
5 units (Rodrique) not given 1999-2000

HISTORY OF SCIENCE AND TECHNOLOGY

133. The Darwinian Revolution—(Same as 333.) The conceptual developments leading to establishment of the major unifying paradigm of biological science, the theory of evolution by natural selection. Biological thought before Darwin (1800 to 1836). The voyage of the Beagle and the formation of Darwin’s thought in terms of its broader intellectual and social context. The Origin of Species. Descent of Man. The difficulties the theory had to overcome and their resolution in the union of evolutionary biology and population genetics in the 1930s and ‘40s.
4 units (Lenoir) not given 1999-2000

133B. The Sociology of Scientific Knowledge—Classical problems in the sociology of knowledge in the writings of Marx, Durkheim, and Mannheim. Recent works in the social construction of scientific knowledge, emphasizing the historical sociology of experimental science and lab practice. Case studies and the anthropological approaches in the works of Mary Douglas, Pierre Bourdieu, and others are used to explore a theory of practice and a critique of historically situated practical reason as the foundation of the sociology of scientific knowledge.
4 units (Lenoir) not given 1999-2000

139. The Scientific Revolution—Recent studies and related primary materials (in translation) reassess the claims made for the "scientific revolution." Studies of early modern science have broadened our unde-
standing of the period, from work on museums and gentlemanly trust to the sciences of non-European cultures.

5 units (Seaver) not given 1999-2000

BRITAIN

141. Yorkist and Tudor England—The Making of a Modern State—The transition from the late medieval realm to the Renaissance monarchy, Henry VIII, the English Reformation, and the new conservatism of the Elizabethan regime.

5 units (Seaver) not given 1999-2000

142. Revolutionary England, 1603-1689—Analysis of the conditions that led to the first of the modern revolutions, the collapse of the Stuart monarchy, the beheading of the king, the first and only English experiment with a republic, the attempt of the Restoration to recreate a stable royal absolutism, and its final defeat in the “Glorious Revolution” of 1688-89. Radical ideas emerging in the heat of revolution.

5 units (Seaver) not given 1999-2000

143. Shakespeare’s England, 1558-1640—Introduction to a period of early modern English history when England was still a minor power and when Elizabeth Tudor and then her Stuart cousins tried to exploit the new powers acquired by the monarchy under Henry VIII, before the society was torn apart by civil war. This society produced three of its greatest dramatists, perhaps its greatest philosopher of science, and an unrivaled outpouring of poetry. It would be reductionist to argue that social, political, and economic developments “explain” this period of literary outpouring. It would be reductionist to argue that social, political, and economic developments “explain” this period of literary production, but the social, political, and religious world in which it took place is sketched.

5 units (Seaver) not given 1999-2000

144. Britain, 1688-1832—(Same as 244.) Survey/colloquium. Alternate meetings provide a broad knowledge of British society in its political, social, intellectual, and cultural aspects, and considers one text in depth (a historical study, novel, etc.) for what it may say about Britain from the Glorious Revolution of 1688 to the Great Reform Act of 1832.

5 units (Stansky) not given 1999-2000

145C. Modern Britain—(Same as 245C.) Survey/colloquium. Alternate meetings provide a sense of British history in the 19th and 20th centuries in its political, social, intellectual, and cultural aspects and considers one text in depth (a historical study, novel, etc.) for what it may tell us, in the broadest and most particular senses, about the recent history of Britain. GER:3a (DR:7)

5 units, Spr (Stansky)

AFRICA

147A. African History in Novels and Film—The principal episodes in African history have been captured in novels and, to a lesser extent, in film. What happens to history and historical understanding as they undergo transformation in imaginative literature and film. Does the African novel fairly represent history? Is film only an imperfect vision of African past events? GER:3a,4a (DR:2 or 7)

5 units, Aut (Jackson)

147B. The Idea of Africa among African Americans—No group within the Black diaspora has developed more notions, sometimes competing, of Africa than African Americans since the late 18th century. The crucial moments in that envisioning of Africa, from the free Black identifications of the 1770s-1840s to Marcus Garvey’s 1920s homeland ideologies and the 1990s Mandela fever. GER:4b (DR:3)

5 units (Jackson) not given 1999-2000

148. Introduction to African History—African history from the discovery of early humans in E. Africa to the 1990s. Geared to students who want to master the basics of Africa’s past while engaging more advanced analysis. Films, novels, autobiographies, slides, readings. GER:4a (DR:2)

5 units (Jackson) not given 1999-2000

148C. Africa in the 20th Century—The challenges facing Africans from when the continent fell under colonial rule until independence. Lectures are organized around case studies of colonialization and its impact on African men and women drawn from West, Central, and Southern Africa. Discussions on novels, plays, polemics, and autobiographies written by Africans. GER:4b (DR:2)

5 units, Spr (Lane)

THE UNITED STATES

115. Technology and Culture in 19th-Century America—The social and cultural aspects of technological change from the American Revolution through WW I. Emphasis is on technologies of production and consumption (armory practice, department stores); of temporal and spatial transformation (telegraphic time signals, railroads), simulation and reproduction (photography, phonograph), and communication and control (telephone, scientific management). GER:3b (DR:9)

4-5 units, Win (Corn)

150A. African-American History to the 20th Century—Surveys African-American history through the Civil War. Slavery in Africa, the development of slavery in the Western Hemisphere, and the Atlantic slave trade. The evolution of slavery as an institution in America and the development of slave culture. The free black population and the emergence of abolitionism, growing regional tensions and war, and emancipation and its immediate effects. GER:3a,4b (DR:3 or 7)

5 units, Aut (M. Thompson)

150B. Introduction to African-American History: The Modern Black Freedom Struggle—(Formerly 157.) The 20th-century civil rights movements and political/racial thought. Using recent historical scholarship and audio-visual materials, lectures examine the racial advancement strategies of such leaders as Booker T. Washington, W. E. B. DuBois, Mary M. Bethune, Ella Baker, Martin Luther King, Jr., Malcolm X, and Jesse Jackson. GER:3b,4b (DR:3 or 9)

5 units, Spr (Carson)

152. American Spaces: An Introduction to Material Culture and the Built Environment—(Same as American Studies 152.) American history through the evidence of things, e.g., spaces, buildings, and landscapes of the “built environment.” How to “read” such artifacts using methods and theories from anthropology, cultural geography, history, and other disciplines. GER:3b (DR:9)

5 units, Spr (Corn)

158. History of Education in the United States—(Same as Education 201.) Analysis of selected turning points in education in relation to religion, political socialization, race relations, gender, immigration, and urbanization. Limited enrollment.

3 units, Aut (Tyack, Williamson)

158B. American Education and Public Policy—(Same as Education 105.) Treats policy issues in education, drawing on history and political science. Who influences schooling and how? How have American schools responded to human diversity? What consequences does schooling have? What are the prospects for reform in public education? Lectures and small group discussions.

4 units (Kirst, Tyack) not given 1999-2000

159. Introduction to Asian American History—The historical experience of people of Asian ancestry in the U.S. Immigration, labor, community formation, family, culture and identity, and contemporary social and political controversies. Readings: interpretative texts, primary material, and historical fiction. Lectures/discussion. GER:4b (DR:3)

4-5 units (Chang) not given 1999-2000

161. Phorographers and Photography in the American West—Photographic representations of the West (its people, problems, and landscape environment) from 1850 to the present and from E. Muybridge to A. Adams. The interaction between the larger history of the American
West and the history of western photography, including the rise of socially-conscious photography in the 1930s up to the present works of documentary photographers.

5 units, Spr (Street)

165A, B, C. United States History from the Revolution to the Present—
General sequence emphasizing political, social, and institutional history. Provides a broad foundation in U.S. history on which to base further work in history, literature, economics, political science, religious studies, art history, etc. Three parts form an integrated whole; any portion may be taken independently. Recommended as a prerequisite for advanced work in American history.

165A. Colonial and Revolutionary America—Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution. GER:3b (DR:9)

5 units, Aut (Rakove)

165B. 19th-Century America—The history of the U.S. in the 19th century, emphasizing the causes and consequences of the Civil War. Topics: Jacksonianism and the market revolution, slavery and the old south, sectional conflict, the rise and fall of Reconstruction, late 19th-century society and politics, and the crisis of the 1890s. GER:3b,4b (DR:3 or 9)

5 units, Win (Matthews)

165C. The United States in the 20th Century—Major political, economic, social, and diplomatic developments in the U.S. since the end of the 19th century. Themes: debates over the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 1950s and ‘60s); the changing status of women (since WWII); shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy (in WW I, WW II, and the Cold War).

GER:3b,4b (DR:3 or 9)

5 units, Spr (Kennedy)

172A. The United States since 1945—Analyzes foreign policy and politics, dealing with social themes and intellectual history. GER:3b (DR:9)

4-5 units, Win (Bernstein)

173B. U.S. Women's History, 1820-1980—The transformation of Victorian womanhood in the late 19th century, including the workforce participation of immigrant and black women and the educational and professional opportunities for middle-class white women, the impact of wars and depression on 20th-century women's lives, and the rebirth of feminism.

5 units (Freedman) not given 1999-2000

173C. Introduction to Feminist Studies—(Same as Feminist Studies 101.) How gender inequality is created and perpetuated, and when feminist theory and movements emerge to respond to gender inequality. Topics: theories of inequality; history of feminism; international and multi-cultural perspectives on feminism; women's work, health, and sexuality; creativity, spirituality, and movements for social change.

GER:3b,4c (DR:9)

5-6 units, Aut (Freedman)

LATIN AMERICA

176. Colonial Latin America—Introduction to the indigenous societies which evolved in America until 1492. Detailed survey of the Spanish and Portuguese colonial empires established in America to 1825. The social and economic evolution of the various regions of America; the nature of the multi-ethnic and multi-racial societies which were created by the Iberians from the 16th to the 18th centuries. The French and British Caribbean colonies.

5 units (Klein) not given 1999-2000

177. Modern Latin America—Latin America since the early 19th century, concentrating primarily on Mexico, Brazil, Argentina, and Cuba. Emphasis is on Latin America’s role in the world economy and the effect that this has had on economic growth, social structure, and politics.

GER:3b,4a (DR:2 or 9)

5 units, Spr (Haber)

180. 20th-Century Brazil—Brazil, a continent-sized nation and multi-ethnic society, is at a crossroad: how to achieve economic growth with social and regional equity in an era of trading blocs. Brazilian efforts to come to terms with its long colonial history based on export agriculture, slavery, and extractive industries, while developing an urban-based, industrial society. Brazil’s rise as a middle range economic power and the development of a dynamic national culture.

GER:3b,4a (DR:2 or 9)

5 units, Win (Matthes)

188B,C. Jewish History from the Medieval Period to the Present—

GER:3b,4b (DR:3 or 9)

5 units, Win (Matthes)

188C. Jews in the Modern World—Jewish history in the modern period. Possible themes: the fundamental restructuring of all aspects of Jewish existence under the impact of the Enlightenment and legal emancipation at the end of the 18th century in Western Europe, the transformation of Jewish life in Eastern Europe under the authoritarian Russian regime, the experience of colonialism in the Sephardi world, and the range of new ideologies (Reform Judaism and various Jewish nationalisms), the persistence and renewal of anti-semitism, the destruction of European Jewry under the Nazis, the rise of new Jewish centers in the U.S., and the emergence of the State of Israel.

GER:3a (DR:7)

5 units, Aut (Zipperstein)

MIDDLE EAST

185. Introduction to Islamic Civilization—Introduction to the societies and cultures in which Islam has been the dominant religious tradition, focusing on the Middle East. Topics: the faith of Islam; the career of the prophet Muhammad; Islamic political theory; Islamic law, philosophy, and science; relations among Islam, Christianity, and Judaism; modern currents in Islam.

GER:4a (DR:2)

5 units (Beinin) not given 1999-2000

187. Palestine, Zionism, and the Arab-Israeli Conflict—The Arab-Israeli conflict from the beginnings of Zionist settlement in Palestine in 1882 to the present. Topics: the emergence of modern political Zionism, Arab nationalism and Palestinian nationalism, the Palestinian Mandate establishment of the state of Israel, the Arab-Israeli wars, the Palestine Liberation Organization, U.S. policy toward the territories, the Palestinian Intifada, and the Oslo accords. Readings from a range of viewpoints, vigorous discussion is encouraged.

5 units (Beinin) not given 1999-2000
187B. The Middle East in the 20th Century—The history of the Middle East since WW I, focusing on the eastern Arab world, Egypt, the Fertile Crescent, and the Arabian Peninsula (The Mashrigh) with some attention to Turkey, Iran, and Israel. GER:4a (DR:2)
5 units (Beinin) not given 1999-2000

187C. Women in the Modern Middle East—Women’s role in the modern Middle East. Topics: work, religious expression, politics, and family life. Format: one film showing per week with associated lecture and discussion. GER:4c (DR:1)
5 units (Beinin) not given 1999-2000

188C. Jews in the Modern World—GER:3a (DR:7)
5 units, Aut (Zipperstein)

189A. Israel: 1880 to the Present—The beginnings of the Zionist Movement, the establishment of the State of Israel, and the development of Israeli society, culture, and politics. Analysis of the ideologies and institutionalization of the Zionist movement and Jewish nationalism in its various forms; Ottoman and Mandate Palestine and the growth of the Jewish settlement there, including social experimentation, relationships with the Palestinians and their responses to Zionism; the revolt against the British. Israel since independence; its institutions, international relations, and relations with Jewish communities outside of Israel. GER:4a (DR:2)
5 units (Mancall) not given 1999-2000

189B. Ottoman Empire—From the 14th through the 19th century. The Balkans and the Middle East under Ottoman rule. Systems of governance and economy of the Ottoman Levant. The onset of weakness and decline in the 17th century; European Imperialism in the Middle East; westernizing reforms in the 19th century; the Balkan Wars, WW I, and the collapse of the Ottoman Empire. GER:3b,4a (DR:2 or 9)
5 units, Aut (Rodrique)

SOUTH ASIA

5 units, Aut (Mancall, Gupta)

190A. Introduction to the History of Buddhism—Survey of the history of Buddhism, focusing primarily on Central, South, and S.E. Asia. The historical Buddha. The development, evolution and spread of Buddhist institutions and Buddhist practices. Political, social, and economic aspects. Buddhism and the state. Buddhist law and social thought. Modern and contemporary Buddhist social movements. The spread of Buddhism in the West.
5 units (Mancall) not given 1999-2000

EAST ASIA

192A. Chinese History to the 14th Century—From Peking Man to Kublai Khan. Emphasis is on social, religious, and intellectual developments from the Earliest Times through the Mongol dynasty. GER:3a,4a (DR:2 or 7)
5 units, Win (Neskar)

192B. Chinese History from the Mongols to Early Modern Times—From the late Yuan to the Taiping Rebellion. Emphasis is on socio-economic rather than the political history to expose students to a sophisticated society very different than their own. Recommended: 192A. GER:4a (DR:2)
5 units (Kahn) not given 1999-2000

192C. Modern and Contemporary Chinese History—China’s development from the peace and prosperity of the late 18th century, the wars and imperialist incursions of the 19th century, and the struggle in the 20th century to create a modern nation-state and regain a position of wealth and power in an often-hostile world. The crushing of the pro-democracy movement at Tiananmen in 1989 and its consequences. Chinese materials in translation (novels, autobiographies, newspaper accounts, reports, and films) explore how individuals experienced the major political, cultural, social, and economic transformations of the past two centuries. Recommended: 92A,B, 192A,B, or Political Science 115. GER:4a (DR:2)
5 units, Spr (R. Thompson)

194A. Japan from Earliest Times to 1560—The prehistoric origins of the people and culture, and emergence of the first polity, Chinese influences, the flowering of the native culture, samurai and feudal government.
5 units (Mass) not given 1999-2000

194B. Late Medieval and Early Modern Japan—From the Warring States Period to the establishment and rise of the last Shogunal house, the Tokugawa. The social, religious, and political contours of the age.
5 units (Staff) not given 1999-2000

194C. 19th-Century Japan
5 units (Staff) not given 1999-2000

194D. The Rise of Modern Japan—Japanese history from 1840 to the present. Topics: the Meiji Restoration and its background, building a modern state, industrialization of the economy, the emergence of an imperialist power, the reorientation of postwar Japan, and the “economic miracle.” Socio-economic change and political developments. GER:3b,4a (DR:2 or 9)
5 units, Spr (Duus)

UNDERGRADUATE COLLOQUIA AND RESEARCH SEMINARS

Colloquia consist of reading and discussion on specific historical themes. Short papers, reports, historiographical essays, and a final exam may be required. In all cases, colloquia are designed to examine issues of historical interpretation. Oral presentations are encouraged.

Undergraduate research seminars provide students with opportunities to conduct research using primary documents, engage in historiographical debate, or to interpret major historical events. Seminars may be offered for one or two quarters and they may be combined with a colloquium. In all cases, students write preliminary drafts of their research findings, present oral reports, and revise their papers.

Courses 200 through 299 are primarily for juniors and seniors majoring in history. Admission is by consent of the instructor.

200A,B,C. Senior Research I, II, and III
1-5 units (Staff)

200H. Junior Honors Colloquium
3 units, Spr (Gregory)

200M. Undergraduate Directed Research: Martin Luther King, Jr. Papers Project
units by arrangement (Carson)

200W. Undergraduate Directed Reading
units by arrangement (Staff)

200X. Undergraduate Directed Research and Writing
units by arrangement (Staff)

GENERAL

201B. Undergraduate Colloquium: Great Ideological Movements of the 20th Century—Socialism and the Islamic Revival—(Same as
testing of historical hypotheses and the use of quantitative proof in this historical research: preparation of data and its processing to the statistical techniques used in this field and as applied to specific research issues as quantitative methods in historical research, providing students with the latest Analysis for Historians—(Same as 305B.) Introduces the use of quantifies and other sources. The changing contexts of women's lives and the (Same as 305A.) Autobiography—(Same as 305A.) Autobiography in Women's History—(Same as 305A.) Autobiographies and other sources. The changing contexts of women's lives and the way women's actions have shaped and responded to those contexts. GER:4c: (DR:1) (WIM)

205A. Undergraduate Colloquium: Private Lives, Public Stories—Autobiography in Women's History—(Same as 305A.) Autobiographies and other sources. The changing contexts of women's lives and the way women's actions have shaped and responded to those contexts. GER:4c: (DR:1) (WIM)

5 units (Simons)

202. Undergraduate Colloquium: Introduction to Problems of Historical Interpretation and Explanation—(Same as 302A.) Focus is on problems of historical narrativity: the relationship between the past and stories about the past, history and the novel; other epistemological issues. 5 units, Spr (Simons)

205B. Undergraduate Colloquium: Introduction to Quantitative Analysis for Historians—(Same as 305B.) Introduces the use of quantitative methods in historical research, providing students with the latest techniques used in this field and as applied to specific research issues as seen in current historical debates about mobility, discrimination, participation, and stratification. Surveys all the major aspects of quantitative historical research: preparation of data and its processing to the statistical procedures needed to examine theoretical issues. The formation and testing of historical hypotheses and the use of quantitative proof in this validation procedure.

5 units, Win (Klein)

INTERDISCIPLINARY GATEWAY COLLOQUIA

206. Undergraduate Colloquium: The Logic of History—(Same as 306.) Introduction to the literature for students in history and the social sciences. How do historians advance and sustain arguments? What is evidence and how is it treated? What are the rules of argumentation that underlie different types of history, and how do these differ from those found in the social sciences? In the writing of history, what constitutes a truth claim? Readings/discussion of the literatures on case study methods, the philosophy of history and social science, and actual historical case studies. (WIM)

5 units, Aut (Haber)

206A. Undergraduate Colloquium: History, Literature, and Arts in the French Revolution—A "gateway" to the History (Literature and the Arts) major, but not restricted to students in that option. The relationship among politics, language, art, music, and literature, using the French Revolution as a laboratory. Aim is to open up humanistic approaches to history, looking at ways in which historical events are culturally constituted, cultural forms interpreted historically, and historical writing shaped by literary tropes.

5 units, Aut (Baker)

206P. Undergraduate Colloquium: Many Histories of Science—The Scientific Revolution—(Same as 306P, History and Philosophy of Science 171.) A "gateway" to the History (and Science) major, but not restricted to students in that option. What sort of tools do historians use to understand and interpret science? How did science emerge as a distinctive kind of knowledge? Introduction to the history of science as a field of study, using the Scientific Revolution of the 16th and 17th centuries, the age of Copernicus, Galileo, Kepler, and Newton, as a case study in the historical interpretation of science.

5 units, Aut (Findlen)

EASTERN EUROPE AND RUSSIA

217. Undergraduate Colloquium: Men, Women, and Power in Early Modern Russia, 1500-1800—(Same as 317.) Social values, gender relations, and social change in an era of rapid change; challenges to established norms by new constructions of deviance (witchcraft; religious reform, and revolt) and by new standards of civility; encounters with non-Russians and the construction of national consciousness. Social values as political ethos: patrimonial autocracy and the reality of female rulers in the late 17th and 18th century.

5 units (Kollmann) not given 1999-2000

219S. Undergraduate Research Seminar: The Soviet Civilization—(Same as 419.) Socialist visions and practices of the organization of society and messianic politics; the Soviet understanding of mass violence, political and ethnic; and living space. Readings of secondary and primary sources and writing of a research paper or a historiographical essay.

5 units (Weiner) not given 1999-2000

220. Soviet Historiography—(Same as 330.)

5 units (Weiner) not given 1999-2000

221C. Undergraduate Colloquium: Historiography of the Soviet Union—(Same as 321C.) Introduces the major schools of interpretation of the Soviet phenomenon through works representative of a specific school, in chronological order, from the first major interpretation of the Soviet polity by Trotsky to the current postmodernist theories.

5 units (Weiner) not given 1999-2000

221S. Undergraduate Research Seminar: Wartime and Postwar Poland—(Same as 421.) The problems of German and Soviet occupation, Polish resistance during the war, dilemmas of Polish politics, the end of the war and beginning of peace. The relationship between social changes and political movements. The complex nationality issues involving Germans, Jews, Poles, Russians, and Ukrainians.

5 units (Naimark) not given 1999-2000

222A. Undergraduate Colloquium: Myths and Identities in Modern Ukraine—(Same as 322A.) The evolution and interaction between various national identities of stateless Ukrainian populations throughout the century until Ukrainian statehood in 1991. Focus is on the core of the Ukrainian population; the Soviet Union; and Ukrainian populations in Poland, Czechoslovakia, Romania, and Hungary. Ethnic, regional, and political visions of national identities, the emergence of mass political movements, the rise of radical ideologies and regimes, the experience of II WW II and the unification of Ukrainian land and people, and the struggle for definitive national myths to the present.

5 units (Weiner) not given 1999-2000

222C. Undergraduate Colloquium: Nationbuilding in Eastern Europe—(Same as 322C.)

5 units, Win (Suppan)

222D. Undergraduate Colloquium: National Conflict in Eastern Europe—(Same as 322D.)

5 units, Spr (Suppan)

223. Undergraduate Colloquium: Honor, the Law, and Modernity in Early Modern Europe—(Same as 323.) How individuals constructed their sense of honor in Europe (including Russia) from medieval timesw
the 18th century, and how they defended honor through law and litigation, extra-legal sanctions (feuds, duels), and ritual (charivari). The rise of the duel as a turning point in Europe towards modern concepts of honor and civility, social hierarchy, and legal practice.

5 units, Aut (Kollmann)

224. Undergraduate Colloquium: Stalinism in Eastern Europe—
(Same as 324.) The origins and history of Stalinism in Eastern Europe. The ways European countries confronted the Stalinist past. Readings on historical and literary representations of Stalinist theory and practice. (WIM)
5 units, Spr (Naimark)

225. Undergraduate Colloquium: The Russian Revolutionary Tradition—
(Same as 325.) The history and myths behind the Russian Revolution.
5 units (Emmons) not given 1999-2000

226. Undergraduate Colloquium: Modernity, Revolution, and Totalitarianism—
(Same as 326.) Analysis of modern revolutionary and totalitarian politics based on readings of monographs on the medieval, Reformation, French Revolutionary, and the Great War eras which deal with relevant themes. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities.
5 units (Weiner) not given 1999-2000

207. Undergraduate Colloquium: Jews, Christians, and Muslims—
Medieval Spain—From the Islamic conquest of 711 A.D. to the Christian expulsion of the Jews in 1492. Forms of confrontation (theological debate to systemic violence) and forms of confluence (conversion to cultural overlap), and hostile indifference between Jews, Christians, and Muslims. What were the undercurrents of aggression that gave rise to persecution of the “other” in medieval Spain? What were the elements of commonality between groups that gave rise to great intellectual advancements? The dynamics of the three religions elsewhere in the medieval Mediterranean.
5 units (K. Miller) not given 1999-2000

208. Undergraduate Colloquium: The Conversion of Europe—
The formation of Christian Europe is examined through the conversion experiences (actual and remembered) of a number of historical figures and communities. The riddle of the first Christian emperor, Constantine; the Christianization of Germanic society, Scandinavia; and the issue of conversions to more spiritual ways of life within the Christian faith.
5 units (Buc) not given 1999-2000

209A. Undergraduate Colloquium: Law, Society, and Identity in Christianity and Islam, 500-1500—
(Same as 309A.) Introduction to Mediterranean society and the interplay of law, morality, and social customs in the Middle Ages. Sources of law, forms of legal reasoning and procedure (courts to informal dispute settlements), coercive mechanisms for enforcing rules, and religious obligations in Christian and Islamic communities. Spain and Egypt are used as case studies. How do groups use law to build communities? When does law create order and when does it reproduce exploitative relations? What is the relation between law and gender?
5 units, Win (K. Miller)

209B. Undergraduate Colloquium: Crusaders, Pilgrims, and Merchants—
The Mediterranean World, 700-1600—
(Same as 309B.) Medieval Mediterranean travelers, their motivations (religious, military, economic, scholarly) and how they perceived the cultures they encountered. Readings: a Muslim scholar’s travels, letters of Jewish merchants to their families, the report of a 10th-century Christian ambassador to Constantinople, and a 20th-century novel that reconstructs the peregrinations of a 12th-century Indian slave based on medieval Jewish sources from Egypt.
5 units, Spr (K. Miller)

210A. Undergraduate Colloquium: The Language of Politics in the Middle Ages—
(Same as 310A.) The different methods through which political theory was articulated and communicated and a culture of politics created: language proper and its grammar (as in biblical exegesis and other mediums), gestures (and the theory of gestuality), royal proclamations, rituals (peace-making and conflict-resolution, royal funerals, advents, and coronations), and iconography. (WIM)
5 units, Spr (Buc)

211. Undergraduate Colloquium: Body, Gender, and Society in Medieval Europe—
(Same as 311.) Secondary sources (historical, literary, theological, and anthropological studies). Issues: transformations in representations of the body, gender, sexuality, and in women’s place in society (or social representation) in Western Europe between the 3rd and 14th century. Were these processes related with one another and with social changes? Analytically straddles the realm between codification of spiritual powers and control (or manipulation) of the body in society, from the cult of relics to asceticism. GER:4c (DR:1)
5 units (Buc) not given 1999-2000

213A. Undergraduate Colloquium: New Worlds, Imaginary Worlds—
(Same as 313A.) Why does the idea of “utopia” first emerge in the Renaissance and Reformation? What does it mean to imagine a society? During the 16th and 17th centuries, Europeans developed greater knowledge of other parts of the globe (the Americas, Asia) and began to explore questions of nature and society in new ways, looking more critically at their own society and others. Topics: travel, knowledge, and experience; changing definitions of humanity; reason and imagination; order and deviance in the age of Columbus, More, Galileo, and Kepler.
5 units, Spr (Findlen)

213B. Undergraduate Colloquium: Heretics, Prostitutes, and Merchants—
Venice and its Empire—
(Same as 313B.) What was life like on the edge of the Mediterranean in a city with contacts that stretched from the Ottoman Empire to the Americas? During the Renaissance, Venice was one of the most ethnically and culturally diverse regions of Europe, with a history of religious and political dissent and a flourishing artistic tradition. Topics: commerce, politics, and society; gender, sexuality, and family; religious minorities (Jews, moriscos, heretics); knowledge and culture.
5 units (Findlen) not given 1999-2000

213C. Undergraduate Colloquium: Power, Art, and Knowledge in Renaissance Italy—
(Same as 313C.) What were the defining features of the society that gave us the idea and art of the Renaissance? The world of Leonardo, Machiavelli, and Michelangelo. The interdisciplinarity of history, politics, art, and literature in the 15th and 16th centuries. The relationship between the Renaissance and the Reformation. (WIM)
5 units, Win (Findlen)

214A. Undergraduate Colloquium: Universities in Medieval Europe—
(Same as 314A.)
5 units, Spr (Tackau)

215. Undergraduate Colloquium: Religion and Society in Early Modern Europe—
Introduction to recent research on Christianity in early modern Europe, supplemented with primary sources. The dialectical relationship by which religion influenced other domains of human life, and was in turn influenced by them. Possible topics: religion in relationship to gender and family life, the Reformation in urban context, printing and literacy, oral and visual communication, individual and collective devotion, confession, and refugees and religious
minorities. Readings are multinational and multiconfessional to acquaint students with the range and diversity of the phenomenon.

5 units (Gregory) not given 1999-2000

216. Undergraduate Colloquium: When Worlds Collide—The Trial of Galileo—In 1633, the Italian mathematician Galileo was tried and condemned for his advocacy of a sun-centered cosmology. The Catholic Church did not publicly admit that Galileo was right until 1989. What does this tell us about the relationship between science and religion? Why has the “Galileo affair” continued to be a discussed episode in Italian history and the history of science? Examines documents from Galileo’s trial and related literature on Renaissance Italy. Students critique historians’ interpretations of this event.

5 units (Findlen) not given 1999-2000

MODERN EUROPE

227. Undergraduate Colloquium: War and Peace in the 20th Century—(Same as 327.) The diplomatic and military crises from the origins of WWI to the collapse of Yugoslavia. Readings include historical analyses and original documents.

5 units (Sheehan) not given 1999-2000

5 units (Kennedy, Sheehan) not given 1999-2000

232A. Undergraduate Colloquium: Shopping—A History—European consumer culture from its inception in the 18th century to its increasing dominance of all aspects of life in the 20th century. Why have commodities come to play such an important part in our culture? How was the creation of the department store a watershed event in modern history? What are the politics of consumerism, from the bread riots of the French Revolution to the fashions of the 1920s? Emphasis is on the relation between gender and commodity culture, particularly the image of woman as family consumer and “kleptomaniac.”

5 units (M. L. Roberts) not given 1999-2000

232B. Undergraduate Colloquium: Attention Shoppers—A History of Consumerism in Modern Europe—Consumerism, its institutions, politics, and critics in Europe from the 18th to the early 20th centuries. How commodities have become central to Western culture and individual identity and why a consumer economy has distressed generations of social critics. Emphasis is on the role of commodities in the imagined differentiation of social classes, genders, and political actors.

5 units, Aut (Brown)

5 units (Robinson) not given 1999-2000

238B. Undergraduate Colloquium: Marx, Darwin, and Freud—Read and discuss the seminal works of the three most influential European thinkers of the modern era. Marx, Darwin, and Freud are the creators of powerful and distinctive intellectual systems (theories of society, nature, and the self) that invite comparison in terms of their structure and of their broad impact on life and thought.

5 units (Robinson) not given 1999-2000

238S. Undergraduate Research Seminar: Europe 1880-1918—The Fin de Siècle and the Great War—The period from 1880-1914 represents a transition from an optimistic, naive age to one that knew moral relativism, total war, and material comfort and great genius. Through art, fiction, autobiography, psychology, and cultural history, how the “age of innocence” ended and the 20th century began.

5 units (M. L. Roberts) not given 1999-2000

HISTORY OF SCIENCE AND TECHNOLOGY

206P. Undergraduate Colloquium: Many Histories of Science—The Scientific Revolution—(Same as 306P.)

5 units, Aut (Findlen)

262S. Undergraduate Research Seminar: Science and High Technology in the Silicon Valley, 1930-1980—(Same as 462.) The technological, political, economic, and spatial dimensions of the rise of Silicon Valley from the 1930s to the early 1980s. How did Silicon Valley arise? What sustained its growth? How did it function? How did it evolve? Archival research and oral history. Focus is on radionuclides, microwave devices, semiconductors, and computers; economies of skills; university-industry relations; political dissent and the counterculture; and technology policies of the Cold War era. Comparison with Roux 128. (WIM)

5 units, Spr (Lenoir)

274A. Undergraduate Colloquium: Body Works—Medicine, Technology, and the Body in Late 20th-Century America—(Same as 374A.) The influence of new medical technologies (organ transplantation, endoscopic surgery, genetic engineering, computer-aided tomography, medical imaging) on the American imagination from WW II to the 1990s.

5 units, Win (Lenoir)

274B. Undergraduate Colloquium: Managing Technological Change—A History—(Same as 374B.) In modern times, engineers, scientists, and managers have become increasingly at ease in coping with the design, development, and deployment of messy, complex technical systems and have developed a variety of managerial techniques and organizational forms. Participants consider case studies and interview persons who have managed projects and created systems.

4-5 units, Win (Hughes)

BRITAIN

240. Undergraduate Colloquium: Shakespeare’s London—The Social and Cultural Consequences of Growth—Between 1500 and 1700 London grew from a late medieval town of 50-60,000 to a metropolis of more than 500,000, the largest city in Western Europe. The problems such unprecedented growth generated, ranging from Crown attempts to limit and control growth to the city magistrates’ measures to meet the needs of the growing number of the poor and sick. The official image the city presented in its Lord Mayor’s shows and the image of urban life presented in the new popular theater.

5 units, Aut (Seaver)

241S. Undergraduate Research Seminar: From Reformation to Revolution in Early Modern England—Sources for England from 16th-century Protestant Reformation to the civil wars and revolution in the mid-17th century are unusually rich. The types of records (private diaries and letters to the official proclamations, and state papers) deline the question that shapes the investigation. Critiques of a draft of the research paper.

5 units (Seaver) not given 1999-2000

242S. Undergraduate Research Seminar: Exploring Modern Britain through Documents and Images Held at Stanford—Students choose a British text, artifact, or picture from the Stanford collections for a preselected list and discover British society by writing about it.

5 units (Stansky) not given 1999-2000

244. Undergraduate Colloquium: Britain, 1688-1832—(Same as 144.)

5 units (Stansky) not given 1999-2000

245C. Undergraduate Colloquium: Modern Britain—(Same as 145C)

5 units, Spr (Stansky)
AFRICA

246D. Undergraduate Colloquium: The Social History of Southern Africa—The political transformation of Southern Africa in the last ten years has redefined the terrain of historical writing and opened new spaces for historical inquiry within Southern African trade studies. The works of a new generation of social historians in such areas as the history of the household, environmental history, urban history, identity and ethnicity, disease and medicine, and witchcraft. Emphasis is on the postcolonial context of Southern Africa in which this research and writing takes place.
5 units, Aut (Lane)

246S. Undergraduate Research Seminar: Popular Culture in Africa—(Same as 446.) African culture rarely appears in historical research. The classics in this field; case-studies such as the role of the griot, women as diviners and seers, Euro-African dress and fashion, the image of Europeans in Africa, highlife music in Ghana, emblems in the Mau Mau rebellion, etc.
5 units (Jackson) not given 1999-2000

247. Undergraduate Colloquium: Greater East Africa and its Historical Writing—(Same as 347.) Greater E. Africa contains Kenya, Tanzania, Uganda, Ethiopia, parts of Zaire, and Mozambique. From this area has come a dynamic historical literature (especially about women, the colonial period, and the purpose of history).
5 units, Spr (Jackson)

5 units (R. Roberts) not given 1999-2000

247B. Undergraduate Colloquium: Health and Society in Africa—The history of disease, therapeutic and diagnostic systems, and the definition of health in precolonial, colonial, and postcolonial Africa. The social and political histories of specific epidemics, including sleeping sickness, influenza, TB, mental illness, and AIDS. The colonial contexts of epidemics and the social consequences of disease.
5 units (R. Roberts) not given 1999-2000

247C. Undergraduate Colloquium: Africa and African Americans since World War II—(Same as 347C.) The most intense, profound, and contradictory dialogue by African Americans on Africa has occurred since WW II, an event that unleashed new political forces in Black communities worldwide. The dialogue and the impact events in Africa (e.g., the 1950s-'60s surge of African nationalism, and the ascendancy of Nelson Mandela) on Black American consciousness.
5 units, Win (Jackson)

247S. Undergraduate Research Seminar: The Great Mau Mau Rebellion in 1950s Kenya—(Same as 447.) The Mau Mau rebellion in 1950s Kenya was significant and controversial. Within the last decade, literature has emerged to sort out the rebellion: the novels, film, autobiographies, historical writing, and popular culture artifacts. (WIM)
5 units, Win (Jackson)

248A. Undergraduate Colloquium: The End of Slavery in Africa and the Americas—(Same as 348A.) Comparative social history of the end of slavery in the Caribbean, the American South, and Africa. Interpretations of the social transformations. Topics: motivations for abolition of slavery, meanings of freedom in different societies, and processes of adaptation to new political economies of work.
5 units (R. Roberts) not given 1999-2000

248D. Undergraduate Colloquium: Law and Colonialism in Africa—(Same as 348D.) Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases are a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority.
5 units (R. Roberts) not given 1999-2000

248S. Undergraduate Research Seminar: Colonial States and Societies in Africa—(Same as 448A.) Students examine the encounter between African societies and European colonialism in the colony or region of their choice. Approaches to the colonial state; tours of primary source collections in the Hoover Institution and Green Libraries. Students present their original research findings and may continue research for a second quarter.
5 units (R. Roberts) not given 1999-2000

249A. Undergraduate Colloquium: The Issue of Greatness in Black History—(Same as 349A.) A major tension in the writing of Black history is between the public demand for greatness, achievements, monuments, and firsts, and the academic historian's skepticism about this approach. Why greatness is thought essential in Black mass history and how academic historians have reacted to this pressure.
5 units (Jackson) not given 1999-2000

249B. Undergraduate Colloquium: Black Visual Arts and Black History—(Same as 349B.) The subject matter of the Black past has been used repeatedly in the Black visual arts in this century. From the 1920s-'30s works of Aaron Douglass, Jacob Lawrence, and Lois Mailou Jones to the 1990s works represented in the avant-garde Paris-based Revue Noire, Black visual artists have wrestled with the problem of how to show the Black past. Case studies of artists from African-America, Africa, and the Caribbean. Original research by students is encouraged in this unexamined field.
5 units (Jackson) not given 1999-2000

THE UNITED STATES

250. Undergraduate Colloquium: American Popular Culture—The development and evolution of popular culture in the U.S. The 19th-century emergence of blackface minstrelsy and popular entertainments such as domestic fiction (authored primarily by women), vaudeville and musical theater, dime novels, early film, and jazz. Emphasis is on race, class, and gender analyses.
5 units (M. Thompson) not given 1999-2000

250B. Undergraduate Colloquium: Constitutional Interpretation in History and Theory—Disputes about how to interpret the Constitution have figured prominently in American politics since 1787. The key episodes in the history, politics, and theory of constitutional interpretation from the founding debates of the 1780s to the ongoing controversy over "originalism" and other contemporary theories.
5 units (Rakove) not given 1999-2000

250C. Undergraduate Colloquium: Thomas Jefferson and his World—The multiple facts of Jefferson's life; his views of politics and society, constitutions and revolutions, nation and state, Old World and New, slavery and race; his place in the national memory; and the problem of passing moral judgments on historical actors. Extensive readings in primary and secondary sources.
5 units, Spr (Rakove)

251A.B. Undergraduate Colloquium: Poverty and Homelessness in America—Students participate in an internship with the Emergency Housing Consortium, the primary agency providing shelter for homeless people in Santa Clara and San Mateo counties, while learning about homelessness and poverty through required readings/discussions. Pre-requisite: interview with the instructor.
8 units (Camarillo) not given 1999-2000

252. Undergraduate Colloquium: Decision-Making in International Crises—The A-bomb, the Korean War, and the Cuban Missile Crisis—(Same as 352.) For advanced undergraduates and graduate
students. Integrates primary documents and secondary literature to understand the three sets of events.

5 units, Aut (Bernstein)

252S. Undergraduate Research Seminar: Museums and History—How museums and historic sites have interpreted the past. The history of museums, the relationship of academic scholarship to popular exhibition, the politics of public memory, and the effect of museum display on the meaning of objects. Required field trips.

5 units (Corn) not given 1999-2000

253. Undergraduate Colloquium: Topics in African American History—The Great Migration—Focus is on the massive movement of African Americans from the rural south to the urban north from Reconstruction through WW I. The motivations for and consequences of this migration. Topics: urbanization, immigration, class dynamics within the African American community, gender roles, race progress and leadership, color consciousness, and the emergence of African American urban culture.

5 units (M. Thompson) not given 1999-2000

254. Undergraduate Colloquium: Nature—The natural and the social are very hard to disentangle. When Americans have written about nature, they have revealed much about what they think about society. Considers the shifting ways in which Americans have constructed nature and "nature's nation" by examining some classic American texts from Thomas Jefferson’s Notes on the State of Virginia through Rachel Carson’s Silent Spring. How ideas about the social order, the economy, racial relations, etc., are often embedded in discussions of the natural world.

5 units (White) not given 1999-2000

254S. Undergraduate Research Seminar: U.S. Women’s History—For History or Feminist Studies majors only. Students learn bibliographic, research, and writing skills through the study of 20th-century women’s reform efforts, utilizing primary sources available in Green Library and culminating in a substantial research paper. Prerequisite: at least one U.S. history course, consent of instructor. Recommended: 173B.

5 units (Freedman) not given 1999-2000

255A. Undergraduate Colloquium: Culture and Ideologies of Race—(Same as 355A.) How culture is used to create, reify, and subvert categories of race in the U.S. The processes of cultural exchange and contestation which forge and dismantle racialized identities. Topics: the uses of memory and nostalgia, the introduction of new cultural technologies, and gender and class as categories which define and are defined by race.

5 units, Win (M. Thompson)

256. Undergraduate Colloquium: Topics in Mexican American History—(Same as 356.) Topics from the 19th and 20th-century immigration from Mexico, the Americanization of Mexican society in the Southwest, the Mexican working class, intraethnic conflict, the Chicano movement of the 1960s, the making of barrios, the role of Mexican American women, etc. Focus is on the 20th century. GER:4b (DR:3)

5 units, Win (Camarillo)

257. Undergraduate Colloquium: Immigrants and Racial Minorities in American Cities—Comparative Perspectives—(Same as 357.) The urbanization of major ethnic immigrant and racial minority groups in American cities during the 20th century. Historical case studies of different groups, and social science theories and historical interpretations. The urban histories of Euro-Americans, African Americans, Mexican Americans, Asian Americans, and Native Americans in comparative perspective.

5 units (Castillo) not given 1999-2000

258. Undergraduate Colloquium: Modern America in Historical Perspective—The historical roots of several issues in contemporary American society: changing patterns of income distribution, the legacy of the "Great Society" and Reagan-era policies, the evolution of political parties, the changing situation of women, race relations, and immigration. Recommended: background in 20th-century American history.

5 units (Kennedy) not given 1999-2000

259. Undergraduate Colloquium: Race and Ethnicity in the United States and South Africa—(Same as 359.) The comparative history of black-white relations in the U.S. and S. Africa. Topics: white race ideologic patterns of segregation, Pan-Africanism and the Garvey Movement, nonviolent protest, and Black Power/Black consciousness. Prerequisite: 157 or 164, or equivalent.

5 units (Fredrickson) not given 1999-2000

259S. Undergraduate Research Seminar: The United States and the Vietnam War

5 units (Chang) not given 1999-2000

260A. Undergraduate Colloquium: Perspectives on American Identity—(Same as American Studies 200.) Analysis of the changing interpretations of American identity and "Americanness."

5 units, Aut (J. Corn)

261. Undergraduate Colloquium: Nuclear Weapons and International Relations—Theories and History—(Same as 361.) Case studies involving nuclear weapons and related international relations theory.

5 units (Bernstein, Holloway) not given 1999-2000

262S. Undergraduate Research Seminar: Science and Technology in Silicon Valley, 1930-1980—(Same as 462.) See “History of Science and Technology” above.

5 units, Spr (Lenoir)

263A. Undergraduate Colloquium: The Automobile Industry in 20th-Century America—One of the nation’s major industries is examined from the perspective of its products, workers, and wide-ranging influences. Topics: origins and consequences of the industry’s geographical concentration in Michigan; evolution of assembly line work and other forms of automotive labor; influence of automobiles on the built and natural environments; cars and government regulation; and recent challenges to the industry stemming from technological change, foreign competition, and environmentalism.

5 units (Corn) not given 1999-2000

263B. Undergraduate Colloquium: The Making of the Atlantic World, 1600-1960—(Same as 363B.) The political, economic, and cultural linkages among Europe, Africa, and the Americas as they were fashioned and reconstructed through slavery and the slave trade, slave emancipations and post-emancipation labor regimes, colonial and anti-colonial social struggles, and 20th-century liberation movements. The assumption that large issues of political ideology or domination and social subordination or mobilization are linked to matters of daily life and lived experience; it is only with attention to the local and the particular that these concepts are understood.

5 units, Win (Saville)

264S. Undergraduate Research Seminar: Martin Luther King, Jr. and the Modern Civil Rights Movement—Supervised research projects use the resources of the King Papers Project at Stanford.

5 units (Carson) not given 1999-2000

265. Undergraduate Colloquium: New Research in Asian American History—(Same as 365.) Asian American studies is a rapidly developing field, with new narrative material and methodologies. Newly published studies in history and related disciplines. Discussion of texts and exploration of possible research work. Recommended: previous exposure to Asian American studies.

5 units (Chang) not given 1999-2000
265A. Undergraduate Colloquium: The History of Sexuality in the United States—(Same as 365A.) For graduate students and senior History or Feminist Studies majors. Readings on the social construction of sexuality, primarily U.S., in the 19th and 20th centuries. Topics: the histories of contraception and abortion, prostitution, homosexuality, race and sexuality, and the social and political movements shaping sexual values and practices.
5 units (Freedman) not given 1999-2000

267. Undergraduate Colloquium: Yesterday's Tomorrows—Technology and the "Future" in History—The changing American expectations regarding the development and consequences of science and technology in the future. Topics: the emergence of a culture of prognostication in the late 19th century (Edward Bellamy, H. G. Wells); the turn-of-the-century reception of new communications technologies; 1930s world's fairs and Depression "futures;" the 1960s, "technology assessment," and anti-technology ("the future isn't what it used to be").
5 units (Corn) not given 1999-2000

269. Undergraduate Colloquium: The African-American Community Organizing Tradition—(Same as 369.) Because the political rights of African-Americans have often been restricted, black people have developed innovative ways of mobilizing their collective power to achieve group advancement. The history of modern African-American grassroots movements and the organizing techniques that have enabled people without many resources to liberate themselves. Focus is on the Student Nonviolent Coordinating Committee (SNCC), the Southern Christian Leadership Conference (SCLC), the Black Panther Party (BPP), etc.
5 units (Carson) not given 1999-2000

270. Undergraduate Colloquium: North American Wests—The modern American West is a recent historical creation dependent on the emergence of the nation states of Canada, the U.S., and Mexico. It is the product of processes of migration, state formation, new technologies, capital flows, and environmental changes still at work in N. America. The emergence of the American West in regional terms vis a vis the East, and in relation to Mexico, Canada, Indian nations, and the larger world of the Pacific Rim.
5 units (White) not given 1999-2000

272A. Undergraduate Colloquium: War and Society, 1941-68—Briefly considers WW II. The focus is on the early Cold War and the Vietnam War: dissent and the impact of the "national-defense system" on major domestic institutions, and their relationships to American culture. Readings: John Dower, Paul Fussell, George Kennan, Dwight Macdonald, Robert McNamara, bringing together different approaches from International Relations and American Studies.
5 units, Spr (Bernstein)

273A. Undergraduate Colloquium: Childhood in Modern American History—The experience of children, ideas about childhood, and policy toward children from the early 19th to the late 20th century. Variations in childhood experience based on differences of race, class, ethnicity, gender, and geographic region. How has American society defined its responsibility toward children? How has it treated children defined as social problems or those who are dependent on public care?
5 units, Win (Horn)

274A. Undergraduate Colloquium: Body Works—Medicine, Technology, and the Body in Late 20th-Century America—(Same as 374A.) See "History of Science and Technology" above.
4-5 units, Win (Lenoir)

LATIN AMERICA

276. Undergraduate Colloquium: The Creation of North America—(Same as 376.) Responding to rapid changes in the world economy, Canada, the U.S., and Mexico are developing common interests in a shared regional space. This convergence is transforming relations between three sovereign states, each with its distinct political system, national history, cultures, and identities. The historical origins of the convergence, from the clash of European empires and native societies, to the development of viable nation states in Canada and Mexico as influenced by the American Civil War and the intersecting of frontiers and railroads, and the effects of WWII through the movement of peoples and development of complex identities today.
5 units (Wirth) not given 1999-2000

277. Undergraduate Colloquium: History and Public Policy—The Political Economy of Economic Growth—(Same as 377.) How have different countries in the Americas created different systems to regulate economic development? What effects have these regulatory systems had on the course of growth? What are the political reasons that explain why different countries have regulated economic activity in different ways? These interrelated questions are addressed through the study of regulation and its impact in three countries in the Western Hemisphere: Brazil, Mexico, and the U.S., drawing on the literatures of law and economics, development economics, positive political economy, and economic history.
5 units (Haber) not given 1999-2000

278. Undergraduate Colloquium: Historical Aspects of Underdevelopment in Latin America—The methods and approaches of economic history. Emphasis is on the critical analysis of scholarly studies of issues in Latin American economic growth addressed by economic historians, including the creation of national transport systems, the growth of industry, the economics of slavery, and the long-term effects of export oriented growth.
5 units, Win (Haber)

5 units (Staff) not given 1999-2000

281A. Undergraduate Colloquium: Environmental History of the Americas—(Same as 381A.) Environmental history is approached topically, using examples from N. and S. America to survey and evaluate the current state of research.
5 units, Spr (Wirth)

282. Undergraduate Colloquium: The Agrarian Origins of Underdevelopment in Latin America—(Same as 382.) Introduction to the study of Latin American agrarian economic history. The relationship between the productive organization of agriculture and long run economic growth, focusing on Mexico during the 18th, 19th, and 20th centuries. Works by development economists, social historians, and economic historians.
5 units (Haber) not given 1999-2000

283. Undergraduate Colloquium: The Process of Industrialization—Europe, the United States, and Latin America—(Same as 383.) Introduction to comparative economic history for graduate students. The literature on the transition to industrial societies during the 19th and 20th centuries in a variety of national contexts. Readings from the institutionalist, cliometric, and Marxist schools of economic history.
5 units (Haber) not given 1999-2000

283A. Undergraduate Colloquium: Slavery and Race Relations in the Americas—(Same as 383A.) The comparative economic and social history of Latin American and N. American slavery, 16th-19th centuries.
5 units (Klein) not given 1999-2000

JEWISH HISTORY

285B. Undergraduate Colloquium: The Bible ("Old Testament")—Focus is on the Hebrew Bible, in English translation, from the perspec-
utive of the social sciences, as a document of social, political, institution-
al, economic, and cultural history. The society and mentality of the peo-
ple of the Bible is discussed through the examination of selected books
and passages.

5 units, Win (Mancall)

287A. Undergraduate Colloquium: Modern Jewish Identity—(Same
as 387A.)
5 units (Rodrique) not given 1999-2000

289B. Undergraduate Colloquium: Zionism and its Critics—(Same
as 389B.) The major texts produced by the Zionist movement, emphasizing
its early years between the 1880s and the 1917 Balfour Declaration.
One of a range of forces in Jewish politics, Zionism was subjected to
sustained scrutiny by orthodox Jews, liberals, socialists, etc. The move-
ment and the criticisms engendered by it, within and beyond the Jewish
world, especially in prestate Palestine.

5 units (Zipperstein) not given 1999-2000

MIDDLE EAST

285A. Undergraduate Colloquium: Problems in Israeli History—
The National Identity and Political Culture of the Israeli State—
Focus is on ideology, institutions, and politics. Themes: Zionism, non-
Zionism, and anti-Zionism; religion and secularism; multi-ethnicism;
socialism; symbols; law.
5 units (Mancall) not given 1999-2000

286. Undergraduate Colloquium: Economic and Social History of
the Modern Middle East—(Same as 386.) The integration of the
Middle East into the world capitalist market on a subordinate basis and
the impact on economic development, class formation, and politics.
Alternative theoretical perspectives on the rise and expansion of the
international capitalist market are combined with possible case studies of
Egypt, Iraq, and Palestine.

5 units (Beinin) not given 1999-2000

287S. Undergraduate Research Seminar: Topics in the Modern
History of Egypt, Palestine, and Israel—(Same as 487.) Student-
selected research topics with guided historiographical reading and dis-
cussions as an introduction.

5 units (Beinin) not given 1999-2000

288. Undergraduate Colloquium: Palestine and the Arab-Israeli
Conflict—(Same as 388.) The Palestine-Zionist conflict 1882 to the
present through reading and comparing representative expressions of
competing historical interpretations. U.S. policy towards the conflict
since 1948.

5 units (Beinin) not given 1999-2000

289A. Undergraduate Colloquium: The Ottoman Empire—(Same
as 389A.) The rise of the Ottoman Empire from the 14th to 16th centuries.
The Balkans and the Middle East under Ottoman rule. Systems of
governance and the economy of the Ottoman Levant. The onset of
weakness and decline after the 17th century. European imperialism in the
Middle East. Ottoman westernizing reforms in the 19th century. Rise of
nationalism. The Balkan Wars, WW I, and the collapse of the Ottoman
Empire.

5 units (Rodrique) not given 1999-2000

EAST ASIA

290A. Undergraduate Colloquium: History of Chinese Overseas—
Readings on the comparative experiences of ethnic Chinese in S.E. Asia,
Oceania, and the Americas; migration as a means of understanding world
history in the past two centuries. Topics: nationalism and the rise of na-
tion-states, diaspora and transnationalism as theoretical tools, variations
in ethnic identity formation, and patterns of community evolution.

5 units, Win (Hsu)

291A. Undergraduate Colloquium: The Chinese Revolution—Key
passages in China's revolutionary struggle, beginning with Sun Yat-sen
and the 1911 Revolution and ending with the pro-democracy movement
and events at Tiananmen in 1989. The May 4th Movement, Chiang Ka-
shek's National Revolution of 1925-27, Mao Zedong's peasant-based
Communist revolution, and the Cultural Revolution are explored from
social, cultural, and political perspectives. First-person accounts, e.g.,
Edgar Snow's Red Star Over China, primary documents, classic and
revisionist scholarly works, Chinese literature in translation, and films,
e.g., Yellow Earth and Farewell, My Concubine.

5 units, Aut (R. Thompson)

292. Undergraduate Colloquium: Postwar Japan—(Same as 392)
Discussion of various aspects of Japanese social history since 1945: the
postwar emperor system, economic growth and urbanization, middle-
class culture, new religions, citizens' movements, the transformation of
village life, the search for national identity, and popular media.

5 units (Duus) not given 1999-2000

292A. Undergraduate Colloquium: Japanese Lives—Autobiogra-
phy and History—(Same as 392A.) The consciousness of self and
history in modern Japan as reflected in autobiographical and semi-
autobiographical literature. Works by Kurosawa Akira, Kaneko Fumiko,
Arai Hakuseki, Fukuzawa Yukichi, Mishima Yukio, etc.

5 units (Duus) not given 1999-2000

292B. Undergraduate Colloquium: Aspects of Chinese Economic
History from the High Middle Ages to Modern Times—Premise:
Economic information changes in meaning as history moves into differ-
ent social formations. Where the ancient imperial state left its agrarian
imprint on land formations and ownership patterns, a thousand years of
growth and the development of commerce, the emergence of complex
systems of land ownership and tenancy, the appearance in late imperial
and early modern times of demographic problems, questions of agrarian
stagnation, rural commercialization, and the beginnings of an industrial
economy.

5 units (Kahn) not given 1999-2000

292S. Undergraduate Research Seminar: China in the Western
Imagination, 16th-20th Century—500 years of the reinvention of
China in the Western mind. Through the use of Jesuit correspondence,
diplomatic reminiscence, missionary memoirs, modern journalism, trav-
ellers' accounts, and military logs, students construct a research project
which explores subject (the viewer) and object (the viewed) in the early
modern history of China.

5 units (Kahn) not given 1999-2000

294B. Undergraduate Colloquium: Chinese Medicine—Interdisci-
plinary Studies—(Same as 394B.) Interdisciplinary approach (drawing
on cultural history, anthropology, gender studies, and philosophy) to the
study of Chinese medicine in its intellectual, social, and cultural context.
Readings: primary sources in Chinese medicine, current research, criti-
cal theory, and studies of Western medicine. Emerging trends in the field.

5 units (Harris) not given 1999-2000

295S. Undergraduate Research Seminar: Creating Modern Chi-
na—From Empire to Nation in the Age of Imperialism—Sixty years
of transformation. A voluminous documentary record in Western lan-
guages is part of the legacy of the "opening" of the countryside in 1860
to missionaries and "treaty ports" inhabited by diplomats and business-
men. Students use diplomatic records, missionary correspondence and
reports, travel accounts, newspapers, memoirs, Chinese material in
translation, and private collections of papers to write research papers on,
e.g., the Taiping Rebellion; the cultural, social, economic, and political
impact of the West; the Boxer Uprising, various reform movements; the
1911 Revolution; and China's descent into warlordism and the simulta-
neous beginning of a cultural revolution in the years leading up to 1919.
Prerequisite: consent of instructor.

5 units, Win (R. Thompson)
296. Undergraduate Colloquium: Ordinary Lives—The Social History of Early Modern China—Explores ways of studying people who were not prominent in the conventional spheres of authority or high culture. Topics: migrations, disease, production and consumption, gender and family, popular culture and entertainments, the politics of banditry, etc., during Ming-Qing (16th-19th centuries). Prerequisite: consent of instructor. GER:4a (DR:2)

5 units (Kahn) not given 1999-2000

298. Undergraduate Colloquium: Imperialism, Colonialism, and National Identity in Modern Japan—(Same as 398.) The linkages between state building, economic change, territorial expansion, and national consciousness in late 19th- and early 20th-century Japan. Topics: the construction of race, the alien and the barbarian; the nature of the modern Japanese state; the economic roots of territorial expansion; styles and schemes of colonial domination and management; debates on Japan's relationships with Asia, the West, and its colonial subjects.

5 units (Duas) not given 1999-2000

299. Undergraduate Colloquium: Japan in the Age of Courtiers and Warriors, 1180-1333—(Same as 399.) Government and society during the period of Japan’s transition from its classical to its medieval phase. Topics: law, justice, family, inheritance, war, religion, and the economy through the analysis of primary documents, chronicles, and sources in translation.

5 units, Spr (Mass)

300. History Wired—Overview, theoretical and applied, of electronic media as they relate to the various disciplines of historical research and teaching.

3 units (Lougee Chappell, Lenoir) not given 1999-2000

300A. Undergraduate Colloquium: Vision of Utopia—Travelers to China, 9th-20th Century

5 units (Kahn) not given 1999-2000

300B. Undergraduate Colloquium: Japan in the Age of Courtiers and Warriors, 1180-1333—(Same as 399.) Government and society during the period of Japan’s transition from its classical to its medieval phase. Topics: law, justice, family, inheritance, war, religion, and the economy through the analysis of primary documents, chronicles, and sources in translation.

5 units, Spr (Mass)

301. Graduate Colloquium: Historiography of American Education—(Same as Education 301.) Analysis of the literature of American education history for students who wish to do further work in the field. Weekly discussions, plus an opportunity to pursue specialized topics in small group tutorial sessions. Limited enrollment. Prerequisite: consent of instructor.

3-4 units, Aut (Tyack)

301A. Graduate Colloquium: Early Greece

4-5 units (Morris) not given 1999-2000

301B. Graduate Colloquium: 20th-Century Turkey, Iran, and Pakistan—(Same as 201B.)

5 units, Spr (Simons)

302A. Graduate Colloquium: Introduction to Problems of Historical Interpretation and Explanation—(Same as 202.)

4-5 units, Spr (Emmons)

304. Approaches to History—Required of all first-year History Ph.D. students.

1-3 units, Aut (Duas)

4-5 units, Aut (Lenoir)

305. Graduate Workshop in Teaching—Introduction to teaching, lecturing, and curriculum development.

1 unit, Spr (R. Roberts)

305A. Graduate Colloquium: Private Lives, Public Stories—Autobiography in Women's History—(Same as 205A.)

4-5 units, Aut (Lougee Chappell)

305B. Graduate Colloquium: Introduction to Quantitative Analysis for Historians—(Same as 205B.)

4-5 units, Win (Klein)

306. Graduate Colloquium: The Logic of History—(Same as 206.)

4-5 units, Aut (Haber)

306A. Graduate Colloquium: The Modern Tradition—Capitalism, Imperialism, and their Critics—The tradition of social theory beginning with Marx’s concept of capitalism and Lenin’s theory of imperialism is elaborated by examining works arguing that gender and racial hierarchies are constitutive of capitalism. The dimensions of ideological and cultural domination, using the writings of Marx, Gramsci, and representatives of the cultural studies and subaltern studies schools including Start Hall, Gyan Prakash, Edward Said, and Paul Gilroy. The debate over postmodernism/late capitalism, and theory and strategy after the Gulf War.

4-5 units (Reinin) not given 1999-2000

306B. Design and Methodology for International Field Research

1 unit, Win (Kollmann)

306C. History Wired—Overview, theoretical and applied, of electronic media as they relate to the various disciplines of historical research and teaching.

3 units (Lougee Chappell, Lenoir) not given 1999-2000

306P. Many Histories of Science: The Scientific Revolution—(Same as 206P.)

4-5 units, Aut (Findlen)

307. Graduate Colloquium: Men, Women, and Power in Early Modern Russia, 1500-1800—(Same as 217.)

4-5 units (Kollmann) not given 1999-2000

308. Graduate Colloquium: The Modern Tradition—Capitalism, Imperialism, and their Critics—The tradition of social theory beginning with Marx’s concept of capitalism and Lenin’s theory of imperialism is elaborated by examining works arguing that gender and racial hierarchies are constitutive of capitalism. The dimensions of ideological and cultural domination, using the writings of Marx, Gramsci, and representatives of the cultural studies and subaltern studies schools including Start Hall, Gyan Prakash, Edward Said, and Paul Gilroy. The debate over postmodernism/late capitalism, and theory and strategy after the Gulf War.

4-5 units (Reinin) not given 1999-2000

317. Graduate Colloquium: Men, Women, and Power in Early Modern Russia, 1500-1800—(Same as 217.)

4-5 units (Kollmann) not given 1999-2000

320. Graduate Colloquium: Topics in Early Modern Russian History

4-5 units (Kollmann) not given 1999-2000

320A. Graduate Colloquium: Topics in Early Modern Russian History

4-5 units (Kollmann) not given 1999-2000

320B. Graduate Colloquium: Topics in Imperial Russian History

4-5 units (Emmons) not given 1999-2000

320C. Graduate Colloquium: Topics in 20th-Century Russian and Soviet History

4-5 units (Weiner) not given 1999-2000

321A. Graduate Colloquium: Topics in Early Modern Russian Historiography

4-5 units, Spr (Kollmann)

321B. Graduate Colloquium: Topics in Modern Russian Historiography

4-5 units (Emmons) not given 1999-2000

321C. Graduate Colloquium: Historiography of the Soviet Union—(Same as 221C.)

4-5 units (Weiner) not given 1999-2000

322. Historical Research in Russia, 17th-20th Centuries: Sources, Archives, Paleography

5 units, Spr (Kamenskii)
322A. Graduate Colloquium: Myths and Identities in Modern Ukraine—(Same as 222A.)
4-5 units (Weiner) not given 1999-2000

322C. Graduate Colloquium: Nationbuilding in Eastern Europe—(Same as 222C.)
5 units, Win (Suppan)

322D. Graduate Colloquium: National Conflict in Eastern Europe—(Same as 222D.)
5 units, Spr (Suppan)

323. Graduate Colloquium: Honor, the Law, and Modernity in Early Modern Europe—(Same as 223.)
4-5 units, Aut (Kollmann)

324. Graduate Colloquium: Stalinism in Eastern Europe—(Same as 224.)
4-5 units, Spr (Naimark)

325. Graduate Colloquium: The Russian Revolutionary Tradition—(Same as 225.)
4-5 units (Emmons) not given 1999-2000

325B. Graduate Core Colloquium: 20th-century Russia
4-5 units, Aut (Patenaude)

326. Graduate Colloquium: Modernity, Revolution, and Totalitarianism—(Same as 226.)
4-5 units (Weiner) not given 1999-2000

MEDIEVAL AND EARLY MODERN EUROPE

307B. Graduate Core Colloquium in Medieval European History
4-5 units, Aut (K. Miller)

309A. Graduate Colloquium: Law, Society, and Identity in Christianity and Islam, 500-1500—(Same as 209A.)
4-5 units, Win (K. Miller)

309B. Graduate Colloquium: Crusaders, Pilgrims, and Merchants—The Mediterranean World, 700-1600—(Same as 209B.)
4-5 units, Spr (K. Miller)

310A. Graduate Colloquium: The Language of Politics in the Middle Ages—(Same as 210A.)
4-5 units, Spr (Buc)

311. Graduate Colloquium: Body, Gender, and Society in Medieval Europe—(Same as 211.)
4-5 units (Buc) not given 1999-2000

313A. Graduate Colloquium: New Worlds, Imaginary Worlds—(Same as 213A.)
4-5 units, Spr (Findlen)

313B. Graduate Colloquium: Heretics, Prostitutes, and Merchants—Venice and its Empire—(Same as 213B.)
4-5 units (Findlen) not given 1999-2000

313C. Graduate Colloquium: Power, Art, and Knowledge in Renaissance Italy—(Same as 213C.)
4-5 units, Win (Findlen)

314A. Graduate Colloquium: Universities in Medieval Europe—(Same as 214A.)
5 units, Spr (Tachau)

315A. Graduate Colloquium: Topics in Reformation History
4-5 units (Gregory) not given 1999-2000

316A. Graduate Core Colloquium: Europe in the 15th and 16th Centuries
4-5 units (Gregory) not given 1999-2000

316B. Graduate Core Colloquium: Europe in the 17th and 18th Centuries
4-5 units, Aut (Baker)

HISTORY OF SCIENCE AND TECHNOLOGY

306P. Many Histories of Science: The Scientific Revolution—(Same as 206P.)
4-5 units, Aut (Findlen)

313F. Graduate Core Colloquium on Modern Europe: Women and Gender
4-5 units (M. L. Roberts) not given 1999-2000

313G. Graduate Core Colloquium on Modern Europe
4-5 units, Win (Naimark)

322. Graduate Colloquium: Culture and Politics in Modern France—(Same as 222.)
4-5 units (M. L. Roberts) not given 1999-2000

AFRICA

347. Graduate Colloquium: Greater East Africa and its Historical Writing—(Same as 247.)
4-5 units, Spr (Jackson)
347B. Graduate Core Colloquium in African History: The Colonial Period  
4-5 units (R. Roberts) not given 1999-2000

347C. Graduate Colloquium: Africa and African Americans since World War II—(Same as 247C.)  
4-5 units, Aut (Jackson)

348A. Graduate Colloquium: The End of Slavery in Africa and the Americas—(Same as 248A.)  
4-5 units (R. Roberts) not given 1999-2000

348B. Graduate Colloquium: Law and Colonialism in Africa—(Same as 248B.)  
4-5 units (R. Roberts) not given 1999-2000

349. Graduate Core Colloquium: Precolonial Africa  
4-5 units, Spr (R. Roberts)

349A. Graduate Colloquium: The Issue of Greatness in Black History—(Same as 249A.)  
4-5 units (Jackson) not given 1999-2000

349B. Graduate Colloquium: Black Visual Arts and Black History—(Same as 249B.)  
4-5 units (Jackson) not given 1999-2000

THE UNITED STATES

351A,B,C,D,E,F. Graduate Core Colloquium in American History 24-30 units

351A. Graduate Core Colloquium in American History—Part I  
4-5 units, Aut (Rakove)

351B. Graduate Core Colloquium in American History—Part II  
4-5 units, Aut (M. Thompson)

351C. Graduate Core Colloquium in American History—Part III  
4-5 units, Win (Staff)

351D. Graduate Core Colloquium in American History—Part IV  
4-5 units, Win (Freedman)

351E. Graduate Core Colloquium in American History—Part V  
4-5 units, Spr (Carson)

351F. Graduate Core Colloquium in American History—Part VI  
4-5 units, Spr (Bernstein)

352. Graduate Colloquium: Decision-Making in International Crises—The A-Bomb, the Korean War, and the Cuban Missile Crisis—(Same as 252.)  
4-5 units, Aut (Bernstein)

355A. Graduate Colloquium: Culture and Ideologies of Race—(Same as 255A.)  
4-5 units, Win (M. Thompson)

356. Graduate Colloquium: Topics in Mexican American History—(Same as 256.)  
4-5 units, Win (Camarillo)

357. Graduate Colloquium: Immigrants and Racial Minorities in American Cities—Comparative Perspectives—(Same as 257.)  
4-5 units (Castillo) not given 1999-2000

359. Graduate Colloquium: Race and Ethnicity in the United States and South Africa—(Same as 259.)  
4-5 units (Fredrickson) not given 1999-2000

361. Graduate Colloquium: Nuclear Weapons and International Relations—Theories and History—(Same as 261.)  
4-5 units (Bernstein, Holloway) not given 1999-2000

363B. Graduate Colloquium: The Making of the Atlantic World, 1600-1960—(Same as 263B.)  
5 units, Win (Saville)

365. Graduate Colloquium: New Research in Asian American History—(Same as 265.)  
4-5 units (Chang) not given 1999-2000

365A. Graduate Colloquium: The History of Sexuality in the United States—(Same as 265A.)  
4-5 units (Freedman) not given 1999-2000

369. Graduate Colloquium: The African-American Community Organizing Tradition—(Same as 269.)  
4-5 units (Carson) not given 1999-2000

372. Graduate Colloquium: Creating the American Republic  
4-5 units, Win (Rakove)

LATIN AMERICA

376. Graduate Colloquium: The Creation of North America—(Same as 276.)  
4-5 units (Wirth) not given 1999-2000

377. Graduate Colloquium: History and Public Policy—The Political Economy of Economic Growth—(Same as 277.)  
4-5 units (Haber) not given 1999-2000

381A. Graduate Colloquium: Environmental History of the Americas—(Same as 281A.)  
4-5 units, Spr (Wirth)

382. Graduate Colloquium: The Agrarian Origins of Underdevelopment in Latin America—(Same as 282.)  
4-5 units (Haber) not given 1999-2000

383. Graduate Colloquium: The Process of Industrialization—Europe, the United States, and Latin America—(Same as 283.)  
4-5 units (Haber) not given 1999-2000

383A. Graduate Colloquium: Slavery and Race Relations in the Americas—(Same as 283A.)  
4-5 units (Klein) not given 1999-2000

JEWISH HISTORY

384A. Graduate Core Colloquium in Jewish History, 17th-19th Centuries  
4-5 units, Aut (Rodrigue)

384B. Graduate Core Colloquium in Jewish History, 20th Century  
4-5 units, Win (Zipperstein)

387A. Graduate Colloquium: Modern Jewish Identity—(Same as 287A.)  
4-5 units (Rodrigue) not given 1999-2000

MIDDLE EAST

386. Graduate Colloquium: Economic and Social History of the Modern Middle East—(Same as 286.)  
4-5 units (Beinin) not given 1999-2000

388. Graduate Colloquium: Palestine and the Arab-Israeli Conflict—(Same as 288.)  
4-5 units (Beinin) not given 1999-2000

389A. Graduate Colloquium: The Ottoman Empire—(Same as 289A.)  
4-5 units (Rodrigue) not given 1999-2000
389B. Graduate Colloquium: Zionism and its Critics—(Same as 289B.)
4-5 units (Zipperstein) not given 1999-2000

EAST ASIA
390A. Graduate Colloquium: Topics in Middle-Period Chinese History
4-5 units (Neskar) not given 1999-2000

390B. Graduate Colloquium: Topics in Late Traditional Chinese History
4-5 units, Win (Kahn)

390C. Graduate Colloquium: Topics in Modern Chinese History
4-5 units, Spr (R. Thompson)

392. Graduate Colloquium: Postwar Japan—(Same as 292.)
4-5 units (Duus) not given 1999-2000

392A. Graduate Colloquium: Japanese Lives—Autobiography and History—(Same as 292A.)
4-5 units (Duus) not given 1999-2000

395A. Graduate Colloquium: Early and Medieval Japan
4-5 units, Win (Mass)

395B. Graduate Colloquium: Late Medieval and Early Modern Japan, 1560-1800
4-5 units (Staff) not given 1999-2000

395C. Graduate Colloquium: Modern Japan
4-5 units, Aut (Duus)

398. Graduate Colloquium: Imperialism, Colonialism, and National Identity in Modern Japan—(Same as 298.)
4-5 units (Duus) not given 1999-2000

399. Graduate Colloquium: Japan in the Age of Courtiers and Warriors, 1180-1333—(Same as 299.)
4-5 units, Spr (Mass)

ADVANCED GRADUATE
- Courses numbered 400 to 499 are intended primarily for second- and third-year graduate students, but other qualified students may be admitted by consent of instructor.

400X. Graduate Research
units by arrangement (Staff)

CLASSICS
401C. Graduate Seminar: Early Greece—Prerequisite: 301C.
4-5 units (Morris) not given 1999-2000

EASTERN EUROPE AND RUSSIA
419. Graduate Research Seminar: The Soviet Civilization—(Same as 219S.)
4-5 units (Weiner) not given 1999-2000

420B. Graduate Seminar: Modern Russia
8-10 units (Emmons) not given 1999-2000

433. Graduate Seminar: Modern Eastern Europe
4-5 units (Naimark) not given 1999-2000

MEDIEVAL AND EARLY MODERN EUROPE
411A. Graduate Seminar: Medieval History, Part 1
4-5 units, Win (Buc)

411B. Graduate Seminar: Medieval History, Part 2
4-5 units, Spr (Buc)

413. Graduate Seminar: Early Modern Europe
8-10 units, Spr (Findlen)

MODERN EUROPE
430. Graduate Seminar: The French Revolution
4-5 units (Baker) not given 1999-2000

433A,B. Graduate Seminar: European History
8-10 units, Aut, Win (Sheehan)

437. Graduate Seminar: Modern European Cultural and Intellectual History
4-5 units (Robinson) not given 1999-2000

437A. Graduate Seminar: Modern European History
8-10 units (Robinson) not given 1999-2000

438. Graduate Seminar: The European Enlightenment—(Same as 338)
8-10 units (Staff) not given 1999-2000

HISTORY OF SCIENCE AND TECHNOLOGY
462. Graduate Seminar: Science and High Technology in the Silicon Valley, 1930-1980—(Same as 262S.)
4-5 units, Spr (Lenoir)

BRITAIN
442A,B. Graduate Seminar: Research, Paleography and Archives of Early Modern England
8-10 units, Aut, Win (Seaver)

445. Graduate Seminar: Modern Britain
4-5 units, Win (Stansky)

AFRICA
446. Graduate Seminar: Popular Culture in Africa—(Same as 246S.)
4-5 units (Jackson) not given 1999-2000

4-5 units, Win (Jackson)

448A. Graduate Seminar: Colonial States and Societies in Africa—(Same as 248S.)
8-10 units (Roberts) not given 1999-2000

THE UNITED STATES
451. Graduate Seminar: 20th-Century America
8-10 units (Bernstein) not given 1999-2000

454. Graduate Seminar: Culture and Ideology in American History
4-5 units (Fredrickson) not given 1999-2000

456A,B. Graduate Seminar: United States in the 20th Century
8-10 units (Kennedy) not given 1999-2000

457. Graduate Seminar: The United States
4-5 units, Spr (Thompson)

473A,B. Graduate Seminar: U.S. Women's Family and Sexual History
8-10 units, Win, Spr (Freedman)

474. Graduate Seminar: Race, Ethnicity, and Class in 20th-Century America
8-10 units (Camarillo) not given 1999-2000
476. Graduate Seminar on Brazil
4-5 units (Wirth) not given 1999-2000

477. Graduate Seminar: Economic and Social History of Colonial Latin America—Open to non-Latin Americanists working on research projects that utilize quantitative data. Acquaints students with social science approaches to Latin American history.
4-5 units (Haber) not given 1999-2000

478. Graduate Seminar: Economic and Social History of Latin America—Open to non-Latin Americanists working on research projects that utilize quantitative data. Acquaints students with social science approaches to Latin American history.
4-5 units (Haber) not given 1999-2000

482. Graduate Seminar: Historical Approaches to Social Science
4-5 units, Spr (Haber)

JEWISH HISTORY

485A. Graduate Research Seminar in Modern Jewish History
4-5 units, Spr (Zipperstein)

MIDDLE EAST

487. Graduate Seminar: Topics in the Modern History of Egypt, Palestine, and Israel—(Same as 287S.)
4-5 units (Beinin) not given 1999-2000

EAST ASIA

493. Graduate Seminar: Late Imperial China
4-5 units, Spr (Neskar)

498. Graduate Seminar: Japanese Historical Texts
4-5 units, Win (Mass)

AFFILIATED DEPARTMENT OFFERINGS

AMERICAN STUDIES

151. The Transformation of American Thought and Culture, 1865 to the Present
5 units, Win (Gillam)

214. The American 1960s: Thought, Protest, and Culture
5 units, Aut (Gillam)

CLASSICS

10N. Stanford Introductory Seminar: Bimillennium, High and Low Life in Rome 2000 Years Ago
3-4 units, Aut (Treggiari)

101. History of Greece
4-5 units, Aut (Scheidel)

102. Roman History I: The Republic
4-5 units, Win (Scheidel)

103. Roman History II: The Empire
4-5 units, Spr (Treggiari)

105. History and Culture of Egypt
4-5 units, Spr (Manning)

ECONOMICS

115. European Economic History
5 units, Win (Greif)

116. American Economic History
5 units, Aut (Wright)

226. Problems in American Economic History
5 units, Aut (Wright)

227. European Economic History
5 units, Win (Greif)

OVERSEAS STUDIES

These courses are approved for the History major and taught overseas at the campus indicated. Students should discuss with their major advisors which courses would best meet individual needs. Descriptions are in the “Overseas Studies” section of this bulletin or at the Overseas Studies office, 126 Sweet Hall.

BERLIN

117V. The Industrial Revolution and its Impact on Art, Architecture, and Theory
5 units, Aut (Neckenig)

120V. Industry, Technology and Culture, 1780-1945
4 units, Win (Neckenig)

229V. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity—(Same as Overseas Studies 143U.)
4 units, Spr (Neckenig)

FLORENCE

106V. Italy: From an Agrarian to a Post-Industrial Society
4 units, Aut (Mammarella)

215V. The Scientific Revolution: From the Renaissance to the 18th Century
4-5 units, Win (La Vergata)

MOSCOW

225V. Aspects of Soviet Political History
4 units, Aut (Emmons)

226V. History of Moscow through its Architecture
4 units, Aut (Emmons)

OXFORD

102V. Ancient Roman Society—(Same as Overseas Studies 185.)
5 units, Win (Treggiari)

139V. The European City: 1860-2000
4-5 units, Spr (Tyack)

141V. European Imperialism and the Third World, 1870-1970
5 units, Spr (Darwin)

143V. Horace, Kipling, and Imperialism: Songs and Law—(Same as Overseas Studies 186.)
5 units, Win (Treggiari)

224V. Art and Society in Britain—(Same as Overseas Studies 221Y.)
5 units, Win (Tyack)

PARIS

130V. Paris: 1200-2000
4 units, Win (Bender)

131V. The Holocaust in France and Beyond
5 units, Aut (A. Felstiner, M. Felstiner)

132V. The Memory of a Nation: The Birth of Museums in France
4 units, Aut (Georgel)
PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE

Chair: Timothy Lenoir
Committee-in-Charge: Barton Bernstein (History), Joe Corn (History), Paul David (Economics), Paula Findlen (History), Peter Godfrey-Smith (Philosophy), Yair Guttmann (Philosophy), Timothy Lenoir (History)

Professors: Barton Bernstein, David Holloway, Timothy Lenoir
Associate Professors: Paula Findlen, Peter Godfrey-Smith
Assistant Professors: Yair Guttmann, Reviel Netz
Senior Lecturer: Joseph Corn
Visiting Professors: Thomas Hughes, Norbert Paul-Humbolt Fellow
Affiliated Faculty: Hans Ulrich Gumbrecht (Comparative Literature), C. Francis Everitt (Hansen Lab), Alex Pang (Science, Technology, and Society), Michael Rior (SLAC), Charles A. Taylor (Mechanical Engineering, Surgery)

Fellow: Laura Bruno
Other Affiliation: Henry Lowood (Stanford University Libraries), Michael Rior (SLAC)

The Program in History and Philosophy of Science is an interdisciplinary, non-degree program focusing on the historical and contemporary aspects of science. At its regular monthly colloquium, invited speakers from anthropology, history, medicine, philosophy, sociology, the economics of science and technology, and the sciences address topics of broad concern to science and technology studies. The program works closely with the University Libraries' Special Collections in the History of Science and cooperates with other departments and programs in the administration of undergraduate and graduate majors. Its undergraduate and graduate courses span the period from antiquity to the late 20th century. These courses can accommodate students with varying backgrounds in the natural sciences, humanities, and social sciences.

At the undergraduate level, students who wish to pursue studies in the history and philosophy of science and technology should major in the departments of History or Human Biology, with a concentration in history of science, or in the Department of Philosophy which offers a specific degree in History and Philosophy of Science. A concentration in the anthropology of science can be arranged through the Department of Anthropological Sciences. Alternatively, students may consult with a member of the Committee-in-Charge to construct an individually designed major. This major must conform to the requirements for Individually Designed Majors (see the "Individually Designed Majors" section of this bulletin). Graduate students who wish to combine studies in the history and philosophy of science and technology with majors in anthropology, history, or philosophy should consult those departments.

COURSES

60. Introduction to the History and Philosophy of Science—(Same as Philosophy 60.) Survey of 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions; case study in the history of biology. GER:3a (DR:8)

5 units, Aut (Godfrey-Smith)

113. Undergraduate Colloquium: New Worlds, Imaginary Worlds—(Enroll in History 213A/313A.)

5 units, Spr (Findlen)

115. The Emergence of Modern Medicine—(Enroll in History 13.)

5 units, Win (Findlen)

3-4 units (Findlen) not given 1999-2000

121. Technology and Culture in 19th-Century America—(Enroll in History 115.)

4-5 units, Win (Corn)

137. The Greek Invention of Harmony and Proportion—(Enroll in Classics 137.)

4 units, not given 1999-2000

138A. Ancient Period

4 units, not given 1999-2000

138B. Cosmology: Middle Ages and the Renaissance

4 units, not given 1999-2000

138C. Modern Period: Newton to Einstein

4 units, not given 1999-2000

139. Medicine in Ancient Greece and Rome—(Enroll in Classics 139)

4 units, Aut (Netz)

140. Topics in the History of Mathematics: From Antiquity to the 17th Century—The origins and development of concepts and techniques in their social and philosophical context. Emphasis is on ancient Greek geometry, its adoption of the idea of proof and interaction with early philosophy, its application in optics and mechanics, its significance and limitations.

4 units, not given 1999-2000

142. Information Revolutions: Technology and Forms of Knowledge—(Enroll in Science, Technology, and Society 140.)

3 units, Aut (Pang)

145/245. The Scientific Revolution—(Enroll in History 139/339; graduate students register for 339.)

5 units, Staff not given 1999-2000

147/247. Undergraduate Research Seminar: Science and High-Technology in Silicon Valley, 1930-1980—(Enroll in History 262S.) The technological, political, economic, and spatial dimensions of the rise of Silicon Valley, 1930s-80s. How did Silicon Valley arise? What sustained its growth? How did it function? How did it evolve? Archival research and oral history. Focus is on radiotubes, microwave devices, semiconductors, and computers; economies of skills; university-industry relations; political dissent and the counter-culture; and the technoscientific policies of the Cold War state. Comparison with Route 128.

5 units, Spr (Lenoir)

152. The Darwinian Revolution—(Enroll in History 133.) The conceptual developments leading to establishment of the major unifying paradigm of biological science, the theory of evolution by natural selection. Biological thought before Darwin (1800-1836). The voyage of the Beagle and the formation of Darwin's thought in its broader intellectual and social context. The Origin of Species: Descent of Man. The difficulties the theory had to overcome and their resolution in the union of evolutionary biology and population genetics in the 1930s and 40s.

4 units (Lenoir) not given 1999-2000

4-5 units, Win (Lenoir)
154. The Rise of Scientific Medicine—(Enroll in History 33A.) The intellectual, social, and institutional dimensions of the rise of scientific medicine in the 19th and 20th centuries. How did medicine become "scientific"? What differences did science make to the practicing physician? Why did it displace other approaches to medicine? Focus is on medicine in Europe and the U.S., 1800-present. Topics: the development of experimental physiology, bacteriology, pharmacology, biomedical technology, nuclear medicine, biomedical imaging, computers in medicine, and prospects for bedside gene therapies; the effects of scientific developments in biomedical science and technology on medical practice and therapy; the professionalization of medicine in comparative European and American contexts.

5 units, Spr (Lenoir)

158Q. Stanford Introductory Seminar: Virtuality—(Enroll in History 34Q.) Preference to sophomores. New media technology from the printing press and photography to computer-mediated communication have transformed our experience of the "real": our conceptions of objectivity, agency, the self, and the body. Using authors from Hobbes to Freud, 17th to the 20th centuries, the focus is on the material media's role in changing epistemological formations. Visualizations in biomedicine, including new developments in "virtual surgery." Hands-on construction of virtual worlds. Readings on the new hypermedia guide study of emerging practices of reading and rhetoric.

5 units (Lenoir) not given 1999-2000

168. History of 20th-Century Physics—Describes, analyzes, and interprets the major scientific changes characteristic of the 20th century. Introduction to the ideas of relativity, the influence of quantum theory, and alternating scientific fashions from atomic, nuclear, and particle physics, including the impact on cosmology, semiconductors, and superconductivity. Emphasis is on corresponding cultural changes in areas such as sociology and philosophy, and on the changing role of physics in the 20th century.

3-5 units (Riordan) not given 1999-2000

171/271. Undergraduate/Graduate Colloquium: Many Histories of Science—The Scientific Revolution—(Enroll in History 206B/306B.)

5 units, Aut (Findlen)

199. Directed Reading

1-5 units (Staff)

204A/304A. Undergraduate Colloquium: Critical Studies—Science, Language, and Culture—(Enroll in History 204A/304A.)

4-5 units, Aut (Lenoir)

206. History Wired—(Enroll in History 306C.) Overview, theoretical and applied, of electronic media as they relate to the various disciplines of historical research and teaching.

3 units (Chappell, Lenoir, Lougee) not given 1999-2000

233. Feminist Theories of Science and Technology—Feminist theories and studies of science, technology, and medicine, especially as they intersect with cultural studies of science and technology. Focus is on feminist epistemologies, and questions whether, and how, they challenge and shift the lens of current practices in science and technology. How gender is constructed by and constructs the technosciences.

5 units, Spr (Staff)

274B/374B. Undergraduate/Graduate Colloquium: Managing Technological Change—A History—(Enroll in History 274B/374B.)

4-5 units, Win (Hughes)

294B. Undergraduate/Graduate Colloquium: Chinese Medicine—Interdisciplinary Studies—(Enroll in History 294B.)

5 units (Hart) not given 1999-2000

299. Graduate Individual Work

1-5 units (Staff)

AFFILIATED DEPARTMENT OFFERINGS

CLASSICS

18N. Stanford Introductory Seminar: All is a Number

3-4 units, Win (Netz)

GERMAN STUDIES

175/175A. Modernization, Technology, and Culture in Germany, 1900 to 1945

4 units, Spr (Lowood)

HISTORY

152. American Spaces: An Introduction to Material Culture and the Built Environment

5 units, Spr (Corn)

451. Graduate Seminar: 20th-Century America

8-10 units (Berstein) not given 1999-2000

PHILOSOPHY

164/264. Central Topics in the Philosophy of Science: Scientific Explanation

4 units, Win (Strevens)

165/265. Philosophy of Physics

4 units, Spr (Gutman)

167A/267A. Philosophy of Biology

4 units, Win (Godfrey-Smith)

167B/267B. Philosophy, Biology, and Behavior

4 units, Spr (Godfrey-Smith)

242A. Philosophy of Science Seminar

3 units, Win (Gutman, Suppes)

242B. Philosophy of Science Seminar: The Evolution of Complex Systems

3 units, Win (Strevens)

200. Senior Colloquium

2-4 units, Win (Pang)

PROGRAM IN HUMAN BIOLOGY

Emeriti: (Professors) Paul Bascom (Education), Sanford Dornbusch (Sociology), Albert H. Hastorf (Psychology), Luigi Cavalli-Sforza (Genetics)

Director: Russell D. Fernald

Assistant Director: Shirley Feldman

Professors: J. Myron Atkin (Education), Clifford Barnett (Anthropoligical Sciences), William Dement (Psychiatry), Carl Djerassi (Chemistry), William H. Durham (Anthropological Sciences, Human Biology), Marcus Feldman (Biological Sciences), Russell D. Fernald (Psychology, Human Biology), H. Craig Heller (Biological Sciences), Herant Katchadourian (Biological Science), Donald Kennedy (Biological Sciences), Richard Klein (Anthropological Sciences), Timothy Lenoir (History), Iris Litt (Pediatrics), Michael Marmor (Ophthalmology), Robert Sapolsky (Biological Sciences), Arthur B. Wolf (Anthropological Sciences)

Associate Professors: John E. Atwood (Medicine), Christos Constantiou (Urology), Anne Fernald (Psychology), James Fox (Anthropological Sciences), Peter Godfrey-Smith (Philosophy), Ramachandra Guha (Anthropological Sciences), Margo Horn (History), Gordon
Matheson (Medicine), Daria Mochly-Rosen (Molecular Pharmacology, Human Biology), Ellen Porzig (Developmental Biology, Human Biology, Molecular Pharmacology), Robert Reich (Political Science), John Rick (Anthropological Sciences), Robert Siegel (Microbiology and Immunology)

Assistant Professors: Amato J. Giaccia (Radiation Oncology), Abby King (Medicine, Health Research Policy), Joanna Mountain (Anthropological Sciences)

Associate Professor (Teaching): Carol Boggs

Other Teaching Faculty: William Abrams, Donald Barr, Baruch Blumberg, Barry Braun, Gail Butterfield, Malcolm Cohen, Anne Ehrlich, S. Shirley Feldman, Anne Friedlander, Laura Garden, Hill Gates, Michael Green, William B. Hurlbut, Alan Launer, Philip Lee, Anne Maggioncalda, Armin Rosencranz, Merritt Ruhlen, Marjorie Shuer, Tomoko Wakabayashi, Chris Wilson

Student Advisers: Nina Chinosornvatana, Brook Fries, Nkem Ogbechie, Kameelah Phillips, Ramin Shadman, Apa Sohoni

The Program in Human Biology is an interdepartmental, undergraduate major. It provides an interdisciplinary perspective on the relationship between the biological and social aspects of humanity's origin, development, and prospects.

The program has three goals:

1. To provide a broad and rigorous introduction to the biological and behavioral sciences and their interrelationships.
2. To relate these sciences to the problems raised by the relationships of human beings to one another and to their environment.
3. To help each student achieve a high level of understanding by focusing on one aspect of the biological and behavioral sciences, and its application.

The Human Biology curriculum draws on faculty from diverse University departments and schools. To complete the requirements for the major, students must take courses from the offerings of the program and from the listings of other University departments. The program culminates in an A.B. in Human Biology.

Human Biology majors are well prepared for advanced training in professional schools (for example, education, law, medicine, public policy) and graduate programs in the behavioral, natural, and social sciences, depending on their choice of upper-division courses. Undergraduates in Human Biology often enter coterminous master's degree programs in a number of other University departments.

Additional information about the major may be obtained from the program's offices or the web site at www.stanford.edu/dept/humbio.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The A.B. in Human Biology (HB) requires a minimum of 87 units in the major divided between four levels of courses:

1. Fundamental Program: at least 38 units, to include
   - Human Biology Core 30 units
   - Statistics 4-5 units
   - Internship (HB 197) 4 units
   The Human Biology Core refers to HB 2A and 2B, 3A and 3B, and 4A and 4B. See "Required Courses" below for more information.
   - Human Biology 4B fulfills the policy requirement of the major.
   Other courses which satisfy the policy requirement may be obtained from the program office. A course used to fulfill the program's policy requirement may not be used in the student's foundation or area of concentration or as one of the three required upper-division courses.
   - Statistics may be selected from: Statistics 60 or 190, Psychology 10, Economics 80, or Biological Sciences 141.
   - The core and a statistics course must be taken for a grade by majors.
   - The internship requirement, an independent field experience project, is graded satisfactory/no credit only.

2. Foundation Courses: 20-unit minimum. Total units vary, depending on the focus of study selected by the student for the area of concentration. They may include practicums, labs, and introductory-level courses from across the University. A maximum of 10 pre-medium (from the chemistry, physics, and calculus series, and biology in courses) and 4 research units are allowed.

3. Area of Concentration: a minimum of five courses totaling at least 20 units. This in-depth area of study enables the student to focus on a educational and post-baccalaureate goals. Courses must be numbered 100 or above. Three or more departments must be represented in the concentration. Each course must be taken for a minimum of 3 units. Final approval of the concentration rests with the student advisers as faculty adviser. All area of concentration courses must be taken for grade. Examples of possible areas of concentration are available in the Human Biology Student Handbook.

4. Upper-Division Courses: students must take three Human Biology upper-division courses numbered 100 to 189. Students are expected to enroll in courses outside of the area of concentration for breadth. Lab courses cannot be used to fulfill the upper-division requirements.
   - One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. All non-laboratory advanced courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement, including those that say "enroll in" another department.

A prospective major must consult with the student advisers to obtain detailed information about the program and guidance in the development of an individual course of study. At the time the major is declared, the student must submit a brief written statement of academic and long-term goals and a proposed roster of courses satisfying the requirements for the major. The proposal is reviewed by the student advisers who then identify an appropriate faculty adviser. Final approval of the proposed course of study rests with the faculty adviser. There are three upper-division tracks offered within the program: Health Policy (coordinated by Donald Barr), Human Health and Performance (coordinated by Gal Butterfield and Gordon Matheson), and Environmental Policy (coordinated by Armin Rosencranz). Students with interests in these programs should contact the appropriate coordinator.

Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

MINORS

A minor in Human Biology is intended to provide an introductory background to the relationship between the biological and social aspects of humanity's origin, development, and prospects. Many of the major problems facing human civilization today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived, integrating what we know of the biological with an understanding of the social and cultural setting in which they exist. Students with a minor in Human Biology will have a strong background in the integration between the biological and social aspects of humans.

To minor in Human Biology, students must take the core curriculum (Human Biology 2A, 2B, 3A, 3B, 4A, and 4B) and one additional upper-division course (for example, any course offering by Human Biology with a number over 100, including courses cross-listed with other departments or programs). These must be taken for a letter grade of "C-" or better. Courses that count towards the fulfillment of major requirements may not be counted towards the minor. The area of study enables students to work closely with faculty on an individual research project culminating in an honors thesis. Students may begin honors research after a number of starting points including: topics introduced in the core...
upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences. Students may apply to the honors program once they have completed the Human Biology core, have an overall Stanford grade point average (GPA) of 3.0, and meet other requirements detailed in the honors handbook. Interested students should consult resources in the Human Biology office including the Human Biology Honors Handbook, the honors program application available from the student services office, and appointments during office hours with the Human Biology honors chair.

Specific courses of interest to honors students include: 190 (Honors Seminar for Sophomores), 191 (Honors Seminar for Juniors), 192 (Honors Seminar for Seniors), 193 (Research in Human Biology), and 194 (Honors). Most honors projects involve a total of 10 to 15 units of course work in HB 193 and 194.

Admission to the honors program is by application, normally in the junior year (and no later than November 1 of the senior year). Students planning to conduct honors research are encouraged to attend the Honors Seminar for Juniors (191) and to begin research or preparation during their junior year. An Honors College is held for a select number of senior honor students just prior to Autumn Quarter each year. For applications, contact the program office. The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Each honors student then presents a brief summary of honors research at the Human Biology Honors Symposium in May.

**COURSES**

(WIM) indicates that the course meets the Writing in the Major requirements.

(AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

The faculty and staff of Human Biology prepare a student handbook, available in the Student Adviser’s office in Building 80, which provides a detailed description of the Human Biology major and outlines possible areas of concentration. Because the handbook is published over the summer, it reflects the most up-to-date information for the academic year, and is the definitive guide for all Human Biology majors.

**REQUIRED CORE**

Required Core sequences (2A and 2B, 3A and 3B, and 4A and 4B) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series and take the core in sequence. Students should initiate the core in Autumn Quarter of the sophomore year. Any deviation from the core sequence must first be approved by the program chair through a petition process. Freshmen are not permitted to enroll. Majors must take core courses for a letter grade.

2A.B. Genetics, Evolution, and Ecology: Culture, Evolution, and Society

2A. Genetics, Evolution, and Ecology—Introduction to the basic principles of classical and modern genetics, evolutionary theory, and population biology. Topics: micro- and macro-evolution, population and molecular genetics, population dynamics, and community ecology, emphasizing the genetics of the evolutionary process and applications to human populations. GER:2a (DR:5)

5 units, Aut (Boggs, Durham)

2B. Culture, Evolution, and Society—Introduction to the evolutionary study of human diversity. Hominid evolution, the origins of social complexity, social theory, and the emergence of the modern world system, emphasizing the concept of culture and its influence on human differences. GER:3b (DR:9)

5 units, Aut (Klein, Wolf)

3A.B. Cell Biology and Developmental Biology: Biology and Culture in Human Development

3A. Cell and Developmental Biology—The basic principles of the biology of cells: principles of human developmental biology, bio-

3 units, Win (Dement)

chemistry of energetics and metabolism, nature of membranes and organelles, hormone action and signal transduction in normal and disease states (diabetes, cancer, autoimmune diseases), drug discovery, immunology, and drug addiction. GER:2a (DR:5)

5 units, Win (Mochly-Rosen, Porzig)

3B. Biology and Culture in Human Development—Introduction to research and theory on early human development. How psychobiological factors shape the developing child, and how cultural practices shape the environments of childhood and influence human cognitions, emotions, moral judgments, relationships, and social behavior from birth through adolescence. GER:3b (DR:9)

5 units, Win (A. Fernald)

4A.B. The Human Organism: The Human Predicament

4A. The Human Organism—Organ system physiology, beginning with the basic principles of neurobiology and endocrinology, and the functions of body organs. The mechanisms of control, regulation, and integration of organ systems function. GER:2a (DR:5)

5 units, Spr (R. Fernald, Heller)

4B. The Human Predicament—The relation of the biological sciences to public policy in resource management and conservation practices, the regulation of environmental and health risks, agricultural production, the delivery of health services, the protection of biodiversity, and global climate change. Assigned policy challenges in lectures and section meetings. Reading on actual cases. GER:3b (DR:9) (WIM)

5 units, Spr (Kennedy)

**ADDITIONAL INTRODUCTORY OFFERINGS**

25.35.4S. Bioethical Issues in Human Biology—Perspectives on moral, ethical, and religious issues associated with advances in the biological sciences and their impact on human life. Guest speakers with discussion format.

1-2 units, Aut, Win, Spr (Hurlbut)

3X. Practicum in Young Child and Family Development—Practicum experience at Children’s Health Council for 3.5 hours/week. Must be taken concurrently or subsequent to 3B. Enrollment limited to 35. (AU)

1 unit (Staff)

3Y. Practicum in Young Child and Family Development—Practicum experience at Bing Nursery School for 3.5 hours/week. Must be taken concurrently or subsequent to 3B. (AU)

1 unit, Spr (A. Fernald, Hartiman)

5 units, Win (Klein)

4 units, Spr (Katchadourian)

11. Sleep and Dreams—Multimedia lecture/survey format provides a background of current information and research on how sleep affects our daily life. Topics: physiology of non-REM and REM sleep, daytime sleepiness and performance, circadian rhythms, dreaming (i.e., content, psychophysiological correlates, lucidity, etc.), sleep disorders (insomnia, narcolepsy, sleep apnea, sleepwalking), jet lag, sleeping pills, sleep and mental illness, sleep deprivation, developmental and phylogenetic aspects, sleep and memory, etc.

3 units, Win (Dement)

12. The Nature of Health—The concept of health from a sociologic perspective. Ways to define and measure health, and how social factors
13. The Emergence of Modern Medicine—(Enroll in History 13.)
5 units, Win (Findlen)

16. Introduction to Anthropological Genetics—(Enroll in Anthropological Sciences 8.)
5 units, Win (Mountain)

60. Colloquium on Population Studies—(Enroll in Biological Sciences 146.)
1 unit, Win (M. Feldman)

61. Introduction to the History and Philosophy of Science—(Enroll in Philosophy 60.)
5 units, Aut (Godfrey-Smith)

SCHOOL OF HUMANITIES AND SCIENCES

STANFORD INTRODUCTORY SEMINARS

90Q. Stanford Introductory Seminar: Contemporary Issues in Human Experimentation—Preference to sophomores. Issues in using humans for experimentation in medical research. The principles of protection of subjects, process of obtaining informed consent, organization of protocols, evaluation of experimental design, and scientific merit. Ethical/legal issues involving human subjects in terms of confidentiality, recruitment, and conflict of interest. Legislation addressing inadequate numbers of women and minorities in research projects. Focus is on research with the cognitively impaired, prisoners, and barriers to obtaining informed consent in issues of age, language, and factors that may affect the ability to give truly informed consent.
3 units, Aut (Constantinou)

91Q. Stanford Introductory Seminar: Studies of Animal Behavior—Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat.
3 units, Win (R. Fernald)

100Q. Stanford Introductory Seminar: Critical Insights in Sports Medicine—Preference to sophomores. Issues within sports medicine. Topics are decided at the beginning of the quarter, based on consensus: sports injuries, treatment, and return to play guidelines; exercise testing of aerobic capacity (conducted in the laboratory); ethical considerations in sports (the interface between winning, pressure to return, and health); the body image, media and societal pressures; career opportunities; observation of orthopedic surgery; ergogenic aids and sports supplements; exercise and its relationship to health and wellness at all ages. Guests speakers include physicians, sports scientists, athletes, and coaches. Physiology lab assignment.
3 units, Win (Matheson)

ADVANCED

Open to non-majors with the proper prerequisites. Human Biology majors have preference when enrollment is restricted. All classes listed here fulfill the Human Biology upper-division requirement, including those that say "enroll in" another department.

102B. Children, Youth, and the Law—Analysis of the legal "rights" of children and adolescents in America and how those rights are defined, protected, and enforced through the legal process within the context of the developmental needs of children and youth and competing societal interests. Topics: the origins and definitions of children's rights; adoption; custody; the juvenile justice system (abused, neglected, and dependent children, status offenders such as runaways and truants and minors accused of crimes); education; health care; protection from harm and child welfare; due process; and privacy, freedom of expression, and exercise of First Amendment rights. Interactive, using hypotheticals for discussion and analysis. Companion to 102A, and alternates every other year; students may take one, or both.
4 units, Win (Abrams)

103. Women, Fertility, and Work: The Biology/Culture Debate about Gender—Seminar on women's efforts to bear and rear young children while contributing to familial and community production. How women and men share and balance these aspects of social reproduction in diverse societies. Theoretical and practical approaches to the connection between biology and culture are tested, emphasizing interactional effects. The limits of theories of the cultural construction of femaleness, connection between gender and political economy, and how these culture's differently envision individual and collective responsibilities in women's work and childcare.
5 units (Gates) not given 1999-2000

104. Aging: From Biology to Social Policy—(Enroll in Anthropological Sciences 171.)
5 units, Spr (Barnett)

107. Astrobiology and Space Exploration—Evolution is cast against space and time, focusing on the emergence of life, intelligence, and civilization on Earth and, possibly, elsewhere. The phenomenon of human space exploration and the biological, psychological, sociological, and ultimately, philosophical issues that emerge. Integrates information from astrophysics, biochemistry, chemistry, evolutionary biology, geology, paleontology, psychology, sociology, and philosophy. Taught by scientists from NASA Ames Research Center. Enrollment limited to 30. Prerequisites: one year college-level mathematics, physics, chemistry, biology, or psychology.
3 units, Spr (Cohen)

108. Advanced Seminar on Bilingualism and Second Language Acquisition—Theoretical issues and research pertaining to bilingual acquisition of the two languages and second-language acquisition in children and adults. Urgent practical issues relating to the growing number of children in the U.S. educated in their second language. Emphasis is on childhood bilingualism and on socio-cultural factors relating to language acquisition. The controversies surrounding bilingualism and second language acquisition. Informed opinions concerning the current debate on bilingual education in the U.S.
3 units, Spr (Wakabayashi)

109. Human Behavioral Biology—(Enroll in Biological Sciences 151, 250.)
6 units, Spr (Sapolsky)

110. Vertebrate Biology—The evolution, form, function, and behavior of the vertebrates, from primitive fishes to birds and mammals, including humans. Prerequisite: Biological Sciences or Human Biology core.
3-4 units (Porzig) not given 1999-2000

110L. Vertebrate Biology Lab—Comparative anatomy structure of vertebrates, with emphasis on osteology. Representatives of each of seven vertebrate classes are available in lab. Review labs and field trip Prerequisites: current or previous enrollment in 110.
3 units (Porzig) not given 1999-2000

111. Human Physiology—(Enroll in Biological Sciences 112/212.)
4 units, Win (Heller, Harris) alternate years, not given 2000-01

112. Hormones and Behavior—(Enroll in Anthropological Science 132.)
5 units, Aut (Maggiozcalda)
113. The Biology and Evolution of Language—(Enroll in Anthropological Sciences 5.)
4-5 units, Aut (Fox)

115A. Humans and Viruses—(Same as Microbiology and Immunology 115A.) Overview of human virology. Topics illustrate how viruses interact with the human body, and the social sciences, focusing on emerging infections, viral classification, transmission and prevention, vaccination and treatment, eradication of disease, viral pathogenesis, mechanisms of virally-induced cancer, and viral evolution. Topics: molecular biology of genetic shift and drift in influenza virus, cellular tropism of HIV, developmental biology of virally-induced birth defects, clinical aspects of infantile diarrhea, social aspects of the common cold, policy issues of blood antibody tests, factors in pathogenesis and transmission of prions. Prerequisites: Human Biology core or consent of instructor. 4 or 6 units, Win (Siegel)

115B. Seminar: The Vaccine Revolution—(Same as Microbiology and Immunology 115B.) Advanced seminar. The human aspects of viral disease, focusing on recent discoveries, especially in the area of vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize it into a literature review on a specific topic. Emphasis is on the development of critical reading, analysis, experimental design, and interpretation of data. Students give four oral presentations and lead discussions based on their scientific journal reading. Enrollment limited to 10. Prerequisite: 115A. 5 units, Spr (Siegel)

116. Eye and Implications of Vision—The basic physiology of vision and how visual capabilities influence human endeavors. Topics: mechanisms of vision, vision in animals, illusions, visual physiology of art, the eye in history and literature, vision in sports. Lectures/seminar format with student participation, oral presentations, and a written thesis. Prerequisites: interest in mechanisms of vision and the humanities. 3 units (Marmor) not given 1999-2000

117. Policy and Research in Science Education—Controversial topics in science education (e.g., teaching of evolution, national standards and tests), gender bias, text selection, recruiting and retaining qualified teachers, goals of science teaching for different populations). The substance and style of formulating policy for science education in the U.S., now and in the recent past. Issues for local, state, and federal authorities; appropriate government roles in the selection of content, improvement of teaching, and research. Primary, secondary, and undergraduate programs; and the use of museums and media in programs to improve science education. International comparisons where appropriate. Enrollment limited to 20. 4 units, Spr (Atkin)

118. Human Diversity: A Linguistic Perspective—The diversity and distribution of human language and its implications for the origin and evolution of the human species. The origin of existing languages and the people who speak them. Where did the languages that we currently see in the world come from and how can this diversity be used to study human history? Evidence from related fields (archaeology and human genet-ics). Topics: the origin of the Indo-European languages, the peopling of the Americas, and the evidence that all human languages share a common origin. GER:4s (DR:2)
3 units, Spr (Ruhlen)

119. Conservation Biology—Introduction to the science of preserving biological diversity, its principles, policy, and application. Topics: the biology of small populations, extinction, minimum viable population analysis, habitat fragmentation, reserve design and management, the Endangered Species Act, and conflict mediation. Case studies and local field trips illustrate topics. Prerequisite: 2A, Biological Sciences 33 or 51, or consent of instructor. 3-4 units, Win (Boggs, Launer)

120. Human Nutrition—Nutrient flow and interactions within the human body. Emphasis is on the pathways by which nutrients are processed, stored, remodeled, and oxidized to provide energy and functional components. How diet and physical activity affect human health and disease at the physiological/biochemical levels. Do athletes have greater nutritional needs? Is fat a toxic substance or an essential nutrient? Do high insulin levels cause obesity? What happens if you don’t meet the recommended dietary allowances? Is leptin the anti-obesity “drug”? What are humans designed to eat? Prerequisite: Human Biology core or consent of instructor. GER:2a (DR:5)
4 units, Aut (Braun)

121. Ethical Issues in the Neurosciences—Multidisciplinary approach to the ethical questions raised by recent advances in the neurosciences. How these advances relate to medical therapy, social policy, and broader considerations of human nature (consciousness, free will, personal identity, and moral responsibility). Discussion format with leading research scientists, legal experts, philosophers, and theologians. Topics: neurogenetics, fetal brain tissue therapy, medicalization of criminal behavior, cosmetic psychopharmacology, and the neurobiological basis of love, sexuality, and gender. Enrollment limited to 15. Prerequisites: Human Biology core, Biological Sciences core, or consent of the instructor. 4-5 units, Spr (Hurlbut)

122. International Health Policy: Comparative National Health Care Systems—(Enroll in International Relations 129.)
3 units, Win (Lee)

124. Neural Basis of Sleep and Circadian Rhythms—(Enroll in Biological Sciences 249.)
4 units (Heller, Edgar) alternate years, given 2000-01

125. Environmental Policy and Law—The role of government and citizens in formulating, implementing, and enforcing environmental policy. Using case studies, background readings, law cases, and statutes, seminar investigates the formal and informal political mechanisms involved in controlling pollution and protecting the environment. Topics: the respective roles of courts, legislatures, executive agencies, and nongovernmental organizations in shaping U.S. environmental policy. The pros and cons of regulatory and economic approaches to pollution control; environmental politics and ethics; air and water pollution; environmental justice; toxic substances and risk assessment; economics and trade; hazardous wastes. 5 units, Spr (Rosencranz)

126. Adolescent Development—Adolescence from sociological, psychological, and psychiatric perspectives. Topics: physical, physiological, and cognitive development; identity; peer group; parent/child relations; impact of school; vocational development; and problem outcomes (eating disorders, violence, and teen pregnancy). Prerequisite: 3B or Psychology 1. or consent of instructor. 4 units, Win (S. Feldman)

127. Research Seminar on Adolescence—For juniors preparing to undertake Honors research in their senior year. Small groups jointly design, conduct, analyze, and write up a piece of original research. Teaches research-related skills including how to design a survey, enter data on a computer, and data analysis. Enrollment limited to 12. Pre- or corequisite: 126, Psychology 10 or equivalent, or consent of instructor. 4 units, Win (S. Feldman)

128. The Human Gamete and Pre-Embryo—Writing based seminar. The cultural, biological, medical, and social aspects of human gameto-genesis and the earliest stages of human development. Topics: assisted reproductive technologies (including in vitro fertilization), historical and cultural perspectives on male and female gametes, pre-implantation genetic testing and the critical analysis of current biological and medical
research on gametogenesis. Enrollment limited to 12. Prerequisites: Human Biology core or consent of instructor.

3 units, Aut (Porzig)

129A. Controversies in Nutrition—Seminar on human nutrition. Exposure to statistics and experimental design. Oral presentations on subjects of students’ choice, emphasizing critical reading of original scientific research. Summary paper. Prerequisites: 120, consent of instructor.

3 units, Win (Butterfield)

129B. Controversies in Sports Nutrition—In-depth investigation of controversial issues in sports nutrition. Lectures, student presentations on controversial issues. Students evaluate original scientific literature and read material pertinent to each controversy to participate knowledgeably in the discussion. Prerequisites: 120 and 159, or consent of instructor.

3 units (Butterfield) not given 1999-2000

130. Adam 2000: Images of Human Life in the Age of Biomedical Technology—Interdisciplinary approach to the social, moral, and aesthetic values which guide the use of biomedical technology. How advances in biology are reshaping our relationship with nature, attitudes toward the body, and ideas about the meaning and purpose of human life. Topics: the use of medical technology to alter appearance and enhance performance, fetal tissue transplantation, biotherapy for criminal behavior, treatment of aging as a disease, and alteration of the body for space travel. Lecture/discussion format with guests from the scientific and religious communities. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.

4 units, Win (Hurlbut)

131. Natural Resources Policy—Focus is on federal public land and natural resources policy; mining, timber, and grazing law and policy; the legal aspects of forest, range, park, wilderness, wetlands, and wildlife management; recreation and preservation; and related issues. The role of the courts, administrative discretion, the Endangered Species Act, and the tension between protecting resources and respecting property rights. Students research one aspect of law and policy governing the management of natural resources.

5 units, Win (Rosencrantz)

132. Seminar on Problem Behavior in Adolescence—Lecture/seminar. Aspects of adolescent problem behavior, including risk, and protective factors, treatments, and intervention programs designed to ameliorate or prevent these problems. Externalizing behaviors (violence, delinquency, drug abuse, risk taking), internalizing problems (depression, eating disorders, suicide), and sexuality-related problems (teen pregnancy, date violence, STDs/HIV). Enrollment limited to 20. Prerequisite: 126 or consent of instructor.

3 units, Spr (S. Feldman)

133. Nutrition through the Lifespan—Changes in physiology throughout the lifespan and their influence on the nutritional needs of the individual. Topics: pregnancy, lactation, infancy, childhood, adolescence, young and mature adulthood, and old age. The importance of nutrition and exercise in maintenance of good health. Nutrition-related areas of concern, such as high risk pregnancy, disordered eating, and nutritional aspects of heart disease, diabetes, hypertension, and cancer. Case studies illustrate the major points.

4 units (Butterfield) not given 1999-2000

133A. Sports Nutrition—The nutrient needs of physically active individuals for optimum performance and maintenance of health. Energy needs and the consequences of not meeting them; specific carbohydrate, protein, and fat needs; key vitamin and mineral requirements for optimal performance and health maintenance; possible sex differences in nutrient handling and needs; ergogenic aids and fad diets for athletes. Focus is on optimizing performance and long-term health through wise food choices.

4 units, Spr (Butterfield)

134. Ecological Anthropology—(Same as Anthropological Sciences 164.) The relationships between human social systems and their environments. How do environments influence the nature and form of human social systems found within them? How do human social systems influence the properties and dynamics of their environments? How can we best conceptualize and understand human social systems, environments, and the links between them? Case studies of human societies in the Arctic, Amazon, E. Africa, the Alps, and Papua New Guinea.

5 units, Spr (Durham, Chernley)

135. Global Environmental Policy and Law—(Enroll in International Relations 135.)

5 units (Rosencranz)

4 units, Win (Wilson)

138. Theories in Demography—(Enroll in Anthropological Sciences 158.)

4 units, Win (Wilson)

139. Primate Societies—(Enroll in Anthropological Sciences 131B; GER.2A)

5 units, Spr (Maggioncalda)

140. Biopsychosocial Aspects of Sports—Seminar on the world of sport and athletic competition; multi-disciplinary approach. Topics: athletic injury, retirement, competitive and performance stress, coach-athlete dynamics, life as an elite athlete, child development and sport drug abuse, doping control, eating disorders, post-traumatic stress disorder, and boundary violation, and the cognitive-behavioral aspects of performance enhancement and peak experience. Writing and research intensive. Understanding the elements of original design is expected as a paper/project, with elements of original field research. Limited enrollment. Prerequisite: Psychology 10 or equivalent.

4 units (Shuer) not given 1999-2000

141. Race, Poverty, and the Environment—Seminar on environmental conditions and disproportionate environmental impacts in poor and minority communities in the U.S., correlating race, ethnicity, and income to exposure to environmental and public health hazards. Case studies of migrant workers and Native American subsistence fishers.

5 units, Spr (Rosencranz)

142A. The Impact of AIDS—Focuses on HIV, particularly disease pathology and the spread of the virus, providing a solid foundation for understanding the impact of HIV on biology, medicine, and society. Biology, clinical features, cultural aspects, and intervention/prevention. Provides tools for thinking of ways to stop the transmission of HIV emphasizing education and health policy. The cultural aspects of HIV
142. Alternative Spring Break: AIDS and HIV in San Francisco
1 unit, Win (Siegel)

144. Guilt: Multidisciplinary Perspectives—The experience of guilt and shame from the perspective of the individual. The development of the sense of guilt in childhood; behaviors commonly associated with guilt; its role in interpersonal relationships; communal interactions; its psychopathology, and cross-cultural and gender differences. Conceptions of guilt and shame from the perspectives of major religious and philosophical traditions, and recent interpretations from evolutionary psychology. Prerequisite: majors in Human Biology, Religious Studies; joint majors in Religious Studies and Philosophy; or consent of instructor.
4 units, Win (Katchadourian)

5 units, Aut (Reich)

146. Perspectives on Sustainable Development in Latin America—(Enroll in Latin American Studies 195.)
5 units, Win (Rosset)

147. The Road to Buenos Aires: Controlling Climate Change in the 21st Century—The science, economics, and environmental diplomacy of global climate change. Topics: the science of climate change, climate change and global environmental law; global economic approaches to carbon abatement, taxes and tradable permits; joint implementation, consensus and division in the European Union; gaining the support of China, other developing countries, and U.S. corporations; alternative energy and energy efficiencies for less carbon-intensive electric power and transport. Enrollment limited to 12 seniors.
3 units (Schneider, Rosencranz) given 2000-01

148. Environmental Policy—Important environmental issues of today and the future, how to deal with them politically, and how to resolve conflicts between environmental concerns and other social needs. Focuses on the U.S.; international perspective when appropriate. Definition and description of the environment and environmental impact, the history of human impact on the environment, causes of increased human impact, the history of environmental protection, decision making and resolution of issues, future environmental issues. Enrollment limited to 15 Human Biology seniors. Prerequisites: Human Biology core, or consent of instructor.
3 units (A. Ehrlich) not given 1999-2000

150. Gender-Specific Perspectives on Birth Control—In most societies, human fertility control responsibility rests predominantly with women. Is this desirable and realistic, or should changes be instituted? Groups of four to five students of diverse backgrounds and different professional interests (medicine, law, economics, religion, sociology, political science) develop a series of position papers dealing with new birth control procedures suitable for populations of different cultural and socioeconomic backgrounds with gender-specific considerations. Part I: lectures, selecting population groups and multi-disciplinary task forces, and individual discussions with each task force. Part II: library and field work, writing task force reports, and oral presentations. Limited to 20 seniors; juniors considered in exceptional circumstances. GER:4c (DR:†)
6 units (Djerassi) not given 1999-2000

151. The Rise of Scientific Medicine—(Enroll in History 33A.)
5 units, Spr (Lenoir)

152. Environmental Policies and Institutions in Developing Countries—Examines the tension between environmental protection and economic growth in eight developing countries: Egypt, Russia (Siberia), China, India, Indonesia, Nigeria, Mexico, and Ecuador. Each student is responsible for an environmental profile of a chosen developing country. Prerequisite: 135 or consent of instructor.
5 units (Rosencranz) given 2000-01

154. Biosocial Aspects of Cancer—Recent advances in the biology, diagnosis, and treatment of cancer. The social and economic ramifications of being diagnosed and treated for cancer. What are the present options for cancer treatment and what new technologies may change these options in the future? New diagnostic techniques for the early detection of cancer. The use of predictive assays to determine the most effective treatment modality—chemotherapy, radiotherapy, surgery, hyperthermia, immunotherapy, etc.
4 units, Spr (Giacca)

155. Exercise Physiology—Overview of human exercise physiology, with an emphasis on metabolism and cardiopulmonary function during exercise. Topics: energetics; calorimetry; carbohydrate, lipid, and protein metabolism; the endocrine system; determinants of fuel utilization, metabolic training adaptations; ventilatory and cardiac response to exercise; skeletal muscle structure and the integration of movement; training principles; the impact of the environment, gender, and aging on performance; measurement of exercise capacity; and enhancement of human performance. Prerequisite: Human Biology core or consent of instructor.
4 units, Aut (Friedlander)

156. Human Development—The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene activity in early development; cell recognition at fertilization; swimming and grand multiple pregnancies; prematurity, in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.
3-4 units, Spr (Porszig)

159. Sports Medicine—(Same as Medicine 260.) For medical students and upper-division Human Biology undergraduates. Overview of sports medicine and sports science topics. The themes of sports, exercise, health, and medicine are integrated throughout the entire human performance continuum, from the use of exercise as a form of therapy to the injuries and illnesses that result from sports and exercise. Content in the basic and applied sciences is from physiology, nutrition, psychology, and biomechanics. Medical topics in the problems exacerbated or caused by exercise and sport; maximizing performance in elite athletes; and population-based issues such as exercise and its relationship to health, women’s issues, drugs in sport, and exercise and aging. Prerequisite: medical school enrollment or upper-division Human Biology standing or consent of instructor.
4 units (Matheson) not given 1999-2000

160. Health Care in America—Overview of the health care system in the U.S., examining several key organizations and institutions that shape health policy and health care delivery. By understanding the forces that affect health and health care, students assess more critically options for health care reform.
3 units, Aut (Barr)

160A. Seminar in American Health Policy—Key issues surrounding health care reform, and the policy-making process as it pertains to health care. Student presentations of assigned readings are followed by discussion. Prerequisites: 160 and consent of instructor.
3 units, Spr (Barr, Lee)
160B. Senior Honors Colloquium in Health Policy—Open to seniors admitted to the honors program, by consent of instructor. Assists students doing honors research pertaining to health policy. Weekly discussion centers around students' presentations of honors projects, the policy issues involved, and the structure of the proposed research. Prerequisite: consent of instructor.
1 unit, Aut, Win, Spr (Barr, Lee)

160W. Seminar in Federal Health and Environment Programs/Agencies—Priority enrollment for students going to Stanford in Washington, Winter Quarter. Introduces health policy making in Washington, D.C., with an emphasis on understanding the agencies within the federal government responsible for developing and carrying out health policy. Weekly lectures/discussions. Enrollment limited to 25.
3 units, Aut (Lee)

161. Darwin, Evolution, and Galapagos—(Same as Anthropological Sciences 137.) Seminar on Darwinian theory as applied to the evolution of flora and fauna on the Galapagos Islands. Darwin's observations in Galapagos, and their role in the formulation of his theory of evolution; recent research in Galapagos and its implications for our understanding of evolution today. The impact of human activity in Galapagos and emerging conservation issues. Lectures, discussions, and optional field trip to Galapagos (at extra expense, limited capacity). Enrollment limited to 40.
5 units, Win (Durham)

162. Primate Evolution—(Enroll in Anthropological Sciences 131A.)
5 units, Win (Maggioncalda)

163. South Asia: Environment, Development, and Security—(Enroll in International Relations 137.)
5 units, Aut (Rosenzweig)

164. Ecology and Equity—(Enroll in Anthropological Sciences 168.)
5 units, Win (Guha)

165. Human Ecology of the Amazon—(Enroll in Anthropological Sciences 165.)
5 units, Win (Lu)

166. Methods in Primatology—(Enroll in Anthropological Sciences 131C.)
3-5 units (Maggioncalda) not given 1999-2000

167. International Health—Introduction to concepts of health and wellness and the major descriptors and determinants of health status, international organizations and control programs, specific disease-related problems within particular population groups from an epidemiologic viewpoint, examples of health care delivery methods, analysis of efforts to improve health through examination of specific programs and projects currently underway and previously implemented. Emphasis is on the cultural, economic, and political context in which all questions/issues in international health exist. Prerequisites: Human Biology core or consent of instructor.
3 units (Staff)

168. Medical Anthropology—(Enroll in Anthropological Sciences 170.)
5 units, Aut (Barnett)

170. Social Policy for Sustainable Resource Use—(Enroll in Anthropological Sciences 167.)
5 units, Win (Irvine)

171. Undergraduate Colloquium: Childhood in Modern American History—(Enroll in History 273A.)
5 units, Win (Horn)

172. Indigenous Forest Management
5 units (Irvine) not given 1999-2000

173. Medical Ethics—(Enroll in Philosophy 78.)
4 units, Aut (Jaworska)

175. Virtual Vertebrae—Computer simulations of the biomechanics of aquatic locomotion in vertebrates such as fishes and cetaceans. Development and testing of educational software on the anatomy, physiology, and biomechanics of swimming vertebrates. Possible organisms: lungfish, eels, lamprey, tuna, sharks, rays, turtles, penguins, dolphins. Estimation and resolution of the biomechanical forces affecting lift, thrust, and drag. Computer lab-based weekly meetings. Enrollment limited to 10. Prerequisites: 110, consent of instructor.
3 units (Porzig)

179. Advanced Neurosciences Laboratory—(Enroll in Biological Sciences 209.)
4 units, Win (Heller, Grahn)

180. Beginning Osteology—(Enroll in Anthropological Sciences 133A.)
Introduction to the study of the human skeletal system. Biology of bone growth and development, structure and function. Identification of the different bones in the human skeletal system. Methods for assessing age, sex, and the biological affinity of bones from archaeological and palaeontological contexts. GER:2a (DR:5)
5 units, Aut (Maggioncalda)

181. Evolutionary Anthropology—Upper-division/graduate seminar focused on the concept of evolution as used in anthropology. Evolutionary theory in biological anthropology, as applied to hominid evolution and human population genetics. Evolutionary approaches to culture and social organization, including social evolution, sociobiology, and evolutionary culture theory. Enrollment limited to 20.
5 units (Durham) not given 1999-2000

182. Urban Environmental Policy—(Enroll in Urban Studies 182.)
4 units, Win (Hall, Kibel)

183. Hunter-Gatherers in Archaeological Perspective—(Enroll in Anthropological Sciences 141.)
5 units (Rick) not given 1999-2000

184. The Darwinian Revolution—(Enroll in History 133.)
4 units (Lenoir) not given 1999-2000

186. Evolutionary Medicine—(Enroll in Anthropological Sciences 172.)
5 units, Spr (Cronin)

189. Philosophy of Biology—(Enroll in Philosophy 167A.)
4 units, Win (Godfrey-Smith)

HONORS, INTERNSHIP, AND SPECIAL PROJECTS

190. Honors Seminar for Sophomores—Introduction to the process of doing honors research and writing the final thesis. Guest speakers discuss various aspects of honors research. Students attend at least one of the Honors Symposium presentations in May. Prerequisite: consent of instructor. (AU)
1 unit, Spr (R. Fernald)

191. Honors Seminar for Juniors—Open to juniors considering honors work in Human Biology. Weekly survey of faculty research areas. Writing honors proposals, research grant applications, and Human Subjects Committee approval. Speakers include honors students, faculty, and statistical and writing consultants. (AU)
1 unit, Win (Staff)
192. Honors Seminar for Seniors—Modifying honors proposals and honors theses. Speakers include honors students, faculty, and statistical and writing consultants. Prerequisite: admission to the honors program; may be taken by juniors or seniors advanced in their honors work. (AU) 1 unit, Aut (Porzig, Feldman)

193. Research in Human Biology—Independent research conducted under faculty supervision, taken junior or senior year, normally (but not necessarily) in pursuit of an honors project. May be taken more than once quarter for credit.
1-5 units

194. Honors—Completion of the honors project. First component: the honors thesis, a final paper providing evidence of rigorous research, fully referenced, and written in an accepted scientific style. Second component: participation in the honors symposium, including a 10-minute oral presentation followed by a brief question and answer session. Prerequisites: 193, a draft of the honors thesis, and acceptance into the honors program.
1-10 units (Staff)

197. Internship in Human Biology—Limited to and required of Human Biology majors. Combines course work with a supervised field, community, or lab experience of student’s own choosing. Must be arranged in advance and initiated at least three quarters prior to graduation.
4 units (Staff)

197S. Service-Learning Internship in Community Health—(Fulfills the Human Biology internship requirement.) Provides 100 hours of work in service capacity with a non-profit, community health agency. Students are required to go through an orientation to their community and participate in organized reflection activities throughout their experience. Prerequisite: consent of instructor and admittance into the Human Biology Service-Learning Program.
4 units (Barr)

199. Directed Reading/Special Projects—Independent study open to Human Biology majors and non-majors. Human Biology majors must obtain a sponsor from the Human Biology associated faculty or the academic council. Non-majors and/or students who have not declared must obtain a sponsor only from the Human Biology associated faculty. Students must complete application in student services office.
1-4 units (Staff)

200. Teaching of Human Biology—For upper-division undergraduate and graduate students. Practical experience in teaching Human Biology or serving as an assistant in a lecture course.
1-5 units (Staff)

OVERSEAS STUDIES

Descriptions of these courses are in the “Overseas Studies” section of this bulletin or at the Overseas Studies office, 126 Sweet Hall. Students overseas are encouraged to participate in a wide range of internships and independent research as well.

166H. Man-Environment Interactions: Case Studies from Central Chile—Santiago.
5 units, Aut (Hajek)

125X. Environmental Policy in Europe—(Same as Overseas Studies 122P.) Berlin.
4-5 units, Spr (Jakobeit)

4 units, Win (Giraud)

4 units, Win (Mille)

INTERDISCIPLINARY STUDIES IN HUMANITIES

Emeritus: (Professors) Kurt Mueller-Vollmer, Lawrence V. Ryan
Acting Chair: Paul Robinson
Teaching and Program Coordinator: Helen Brooks

Steering Committee: (Chair) Paul Robinson (History); Helen Brooks (English, Interdisciplinary Studies in Humanities), Gregory Freidin (Slavic Languages and Literatures), Rusch Rehm (Drama), Arthur Strum (German Studies), Zack (Graduate Program in Humanities Student Representative)

Interdisciplinary Studies in Humanities includes:
1. Honors Program in Humanities
2. Interdisciplinary Major in Humanities
a) Option I: Interdisciplinary Major
b) Option II: Interdisciplinary Major for students preparing for careers in the health sciences (premedical, predental, etc.)
3. Graduate Program in Humanities
a) Master of Arts
b) Joint Ph.D.
4. American Studies (see the “American Studies” section of this bulletin.)
5. Medieval Studies (see the “Medieval Studies” section of this bulletin.)

UNDERGRADUATE PROGRAMS

See also the “Honors Program” below.

BACHELOR OF ARTS

THE MAJOR IN INTERDISCIPLINARY STUDIES IN THE HUMANITIES

This undergraduate major is designed for students with a strong commitment to interdisciplinary study in the various humanities. A student may choose to pursue the A.B. degree in Humanities through one of two concentration options: (I) the standard student designed thematic concentration, or (II) the concentration designed for students who also plan to complete the established “premedical” curriculum for careers in the health sciences.

Unlike the empirical disciplines in natural and social sciences, the humanities focus on the formation of ideas through language. The goal of the program is to acquaint students with the differences of disciplinary methods as well as their intersections, where meaning, history and communication are produced. Students interested in Interdisciplinary Studies in Humanities have the opportunity to arrange their courses by thematic subject matter, by genre, or by nationality. At the same time, advanced interdisciplinary seminars provide a rigorous context in which to develop the skills for in-depth study about how culture, history, art, and philosophy intersect.

All majors submit a study plan, accompanied by a “statement of purpose” which outlines the rationale for a concentration. Students who wish major in Humanities should receive approval of their concentrations before the end of the junior year.

OPTION I

Students may devise concentrations in modern thought and literature that incorporate modern literature, cultural history, and critical theory, or in other period specific areas such as early modern studies or medieval studies. Students may also devise concentrations such as cultural, film or performance studies; politics and literature; or popular culture.

Generally the program must include at least twelve courses over and above the requirements of the honors program for a minimum of 60 units. Each of the twelve courses is designated to fall within one of the following three categories: literary/cultural study, historical study, or philosophical study.
1. Six courses in one of the three areas above (30 units)
2. Three courses in each of the other two areas above (30 units)
3. The core colloquium (2 units)
4. Three Humanities Core Seminars (15 units)
5. An essay proposal (2 units)
6. A senior honors essay (10 units)
7. Proficiency in a foreign language

If additional courses are needed to make up the 60 unit minimum, the student may take those courses in any of the three categories. Each program of study must be signed by a Stanford faculty member who has agreed to act as the student’s academic advisor; the proposed program must then be approved by the chair. Changes in the study plan must be approved by the student’s advisor and must be kept on file in the program office.

Competence in reading a foreign language is required of all Humanities majors who choose to design a thematic concentration, and must be certified by appropriate course work or equivalent. Competence is generally considered to be acquired after the completion of five quarters of college-level study, but may also be certified by other means. Consult the student handbook for such recommendations.

The A.B. degree conferred in Humanities. Students choose a concentration title that reflects the focus of their study and this is noted on the transcript after degree conferred.

OPTION II

The Interdisciplinary Major in Humanities offers an option for students who are preparing to attend medical school, but who wish to focus their studies in the humanities. This concentration gives students a coherent way to organize interdisciplinary interests by theme, nationality, or period. In addition, students choosing this option take all the courses usually required by medical schools (two years organic and inorganic chemistry with labs, one year physics, one year biology with labs, one or two courses to provide proficiency in quantitative skills as determined by a premed adviser), as well as course work in various humanities disciplines along with the Humanities Honors Program (69 units) distributed as follows:

1. Four courses in the student’s chosen area of concentration (national culture, philosophy, historical period, film, gender, genre, theme). Generally these four courses address different aspects of literature, history, and philosophy (20 units)
2. Three courses in medical ethics, history or philosophy of science, ethics, science and literature or science and the arts (15 units)
3. One course in the arts (5 units)
4. The Core Colloquium (2 units)
5. Three Humanities Core Seminars (15 units)
6. An essay proposal (2 units)
7. A senior honors essay (10 units)

When selecting courses, a student choosing this option is expected to define the focus in a brief "statement of purpose" approved by the chair.

For either option, the A.B. degree conferred in Humanities. Students choose a concentration title that reflects the focus of their study and this is noted on the transcript after degree conferred.

HONORS PROGRAM

The Honors Program in Humanities aims to heighten a sense of the relations among various humanistic disciplines, and to study issues in intellectual and cultural history through aesthetic, literary, historical, social, and ethical values.

ADMISSION

As an extradepartmental honors program, the Humanities Honors Program is open to any qualified undergraduate at Stanford, regardless of major. Interested freshmen and sophomores may obtain information from the program office. Students should register for the program at the earliest opportunity, preferably Spring Quarter of the freshman year.

Students must meet the following entrance requirements before being admitted to the program:

1. Completion of all at least two quarters of the Area One requirement, except in the case of transfer students, who will be granted exception.
2. A grade point average (GPA) of at least 3.3 (B+) in all course work in the humanities. Such course work includes any Area One sequence, and all Writing and Critical Thinking sections; all courses in the departments of Art and Art History, Drama, and Music (except studio or performance courses); all courses in the departments of Asian, Slavic, French and Italian, German Studies, Comparative Literature, Philosophy, and Religious Studies; and all courses in the programs in Feminist Studies and Modern Thought and Literature.

REQUIREMENTS

1. Completion of 100, Core Colloquium: Humanities, 2 units, preferably in the sophomore year.
2. Two different seminars in the series 190-198: 10 units, sophomore or junior year. Both seminars must be completed by the end of the tenth quarter of undergraduate study in order for students to remain members in good standing.
3. A third seminar, either chosen from the 190-198 series, or from the list of affiliated seminars available from the program office.
4. Unless students have strong intellectual reasons for doing otherwise, they must fulfill their World Cultures (GER Area 4a) and American Cultures (GER Area 4b) requirements from courses offered in humanities disciplines.
5. In order to develop the requisite knowledge and methodological background to write a Humanities honors essay, students must take, during their sophomore and junior years, the required Humanities honors courses and additional humanities courses in disciplines of their interest.
6. Enrollment in 200A, one unit each, Autumn and Winter Quarters of the junior year.
7. An honors essay on a topic approved by the Steering Committee (usually 5 units Autumn Quarter and 5 units Winter Quarter, senior year).
8. A minimum GPA of 3.3 (B+) in all courses taken for the Honors Program, as well as an overall minimum GPA of 3.0 (B) in all coursework in order to remain in the program.

GRADUATE PROGRAMS

University requirements for the A.M. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

MASTER OF ARTS

Application is made through the Interdisciplinary Studies in Humanities office. (Application forms are available from Graduate Admission Registrar's Office, Old Union, Stanford University, Stanford CA 94305-3005, or on the web.) The A.M. program in Humanities is ideally completed as a half-time, two-year program, but under some circumstances it may be completed in one year as a full-time program. The department does not offer financial aid for the master's program. Qualified undergraduates at Stanford may petition to complete the A.M. program coterminally with their bachelor's degrees. The deadline for applying to the A.M. program is March 1 for both outside and coterminal applications.

REQUIREMENTS

1. Reading knowledge of at least one foreign language, to be completed prior to admission to the A.M. program.
2. Complete the five Interdisciplinary Studies in Humanities seminars (311-315).
3. Complete four graduate-level courses in an approved "established discipline," to be determined in consultation with the chair. One of these must be a graduate-level research seminar for which a research paper is required (this paper must be filed in the department). Under "Statement of Purpose" on the application form, the candidate must...
The Graduate Program in Humanities (GPH) provides graduate students in different disciplines an opportunity to broaden their knowledge of intellectual and cultural history by focusing on texts and ideas which have been central to all humanistic disciplines from classical Greece to the present. The program’s seminars usually focus on specific topics or issues in the context of historical, literary, philosophical, and other disciplinary and theoretical orientations. The program provides a unique opportunity to study highly influential texts with a view to their relevance to the student’s own disciplinary field.

Because the GPH supplements, and does not substitute for, departmental specializations, its members must be students earning the Ph.D. in an academic department at Stanford. Students may register for the program at any time, usually during the first quarter of graduate study. Members of the program are given first preference in registration for all of its offerings. Normally, the program involves taking 311-314, followed by 315, the core seminar on interdisciplinary study in the humanities. The course of study culminates in the nature of disciplinary and interdisciplinary studies.

Although students in the GPH generally complete the program course work in their first two years of graduate study, requirements of some participating departments may necessitate completion of the GPH over three years. In some instances, one or more of the GPH seminars may fit within the requirements of the student’s home department.

The departments of Art and Art History, Classics, Drama, English, French and Italian, German Studies, History, Modern Thought and Literature, Music, Philosophy, Religious Studies, Slavic Languages and Literatures, and Spanish and Portuguese all participate in the GPH. Doctoral students from other departments may participate with permission of their home departments and approval of the Chair of Interdisciplinary Studies in Humanities.

REQUIREMENTS

1. Continue satisfactory work in the student’s major field, in accordance with department requirements.
2. Complete the four chronologically ordered seminars (311-314) followed by the core seminar on interdisciplinary study in the humanities (315). To qualify for candidacy, students should complete at least three seminars in the first two years of graduate residence. Exemption from, or permission to audit, a seminar may be secured by petition if the student can show coverage of the material at an advanced level.
3. Participate in the GPH student symposium at the end of the second year of GPH course work (298; registration for units is optional).
4. At least one quarter of teaching for Interdisciplinary Studies in Humanities, normally a teaching internship in the third or fourth year; other interdisciplinary teaching may be substituted for this requirement by petition to the chair (299; registration for units is optional).
5. Reading knowledge of at least one foreign language, ancient or modern, to be certified in the first two years of graduate work.
6. Passing the University oral examination according to the schedule prescribed by the major department with one GPH representative, designated by the chair, as a member of the examining committee.
7. Submission of a Ph.D. dissertation acceptable to a committee which includes one representative of the GPH, designated by the chair.

COURSES

See quarterly Time Schedule for changes in listings.

20A.B. The Humanities: Breaking Boundaries—(Enroll in Introduction to the Humanities 20A.B.)
20A. 5 units, Win (Brooks)
20B. 5 units, Spr (Rayner)

100. Core Colloquium: Humanities—Required of all students in the Humanities Honors Program, to be taken in the sophomore year. Inquiry into the nature of disciplinary and interdisciplinary studies. 2 units, Spr (Brooks, Robinson)

130. Latin American Philosophy—(Enroll in Philosophy 194V.)
4 units, Spr (Vargas)

191-198. Interdisciplinary Core Seminars in Humanities—Students in the Humanities Honors Program must complete two different seminars from different areas before the end of the tenth quarter of undergraduate study. Other students may enroll if space allows and with the instructor’s consent.

192G. Core Seminar: Philosophical Art—(Same as Philosophy 298.) Surveys some of the important ideas and practices of avant garde artists in the 20th century. Emphasis is on the various interpretations of the work of Duchamp. 5 units, Aut (Guttmann)

193N. Core Seminar: Ecology in Philosophy and Literature—The basic principles of ecological thinking, and different ways of conceptualizing the “natural” world. Discussion of western literary and philosophical texts, looking at the rhetorical, narrative, and/or analytic strategies that articulate the continuities and discontinuities between human and non-human beings. What is nature, and where do humans fit in the natural world? How do humans differ from other animals? Do these differences make us superior beings? Are there moral reasons for granting other living beings the right to live and flourish? What is "ecological wisdom," and how does it situate us in relation to "nature?" Focus is "ecological hermeneutics" ("green theory"). Critical approach with feminist criticism and colonial literary studies; the ways these and other poststructural theoretical models lend themselves to ecological readings of literature and culture. Readings: recent work on eco-feminism and deep ecology, Descartes, Thoreau, Darwin, Conrad, Heidegger, Tournier, and Edward Abbey. 5 units, Spr (Nightingale)

194B. Core Seminar: Text and Context—Focus is on the contextual conditions that bring texts into their social, religious, historical, artistic and political spheres and that impact on conceptions of “meaning.” Changing views of the relationships between texts and audiences/readers, and the nature of humanistic discourse (and representation). Some film versions of the texts read: Shakespeare, Joyce, Woolf, Stein, Beckett, Picasso, selected poetry. 5 units, Aut (Brooks)

194W. Core Seminar: The Protagonist—The function and significance of a central individual within a literary work. How does the protagonist help shape the formal, thematic, and ideological aspects of a text? Does a story need to revolve around a single individual? What happens when more than one character vies for the central role? Three genres and their various constructions of heroism and character: Greek tragedy, the 19th-century European novel, and American war films. 5 units, Win (Woloch)
1968. Core Seminar: From Kant to Kierkegaard—The main currents of religious thought in Germany from Kant's critical philosophy to Kierkegaard's revolt against Hegelianism. Emphasis is on theories of religion, the epistemological status of discourse about God; the role of history, especially, the figure of Jesus; and the problem of alienation/reconciliation in four seminal modern philosophers (Kant, Schleiermacher, Hegel, and Kierkegaard). Theories of religion and Christology, the knowledge of God, the significance of history, and the problem of alienation.

5 units, Spr (Sockness)

197F. Core Seminar: Tolstoy's Anna Karenina and the Social Thought of Its Time—(Same as Slavic Languages and Literatures 190.) Reading of Tolstoy's novel in historical context. Comparative discussion of Marx and Engels, John Stuart Mill, Nietzsche, Freud, Emile Durkheim, and Max Weber. Confrontation of modernity and tradition, rational thought and religious sentiment, crisis of authority and legitimacy; charisma and routinization; changes in the institution of family, the question of gender and sex equality, the rise of individualism, estate society vs. class, capital and the modern city; autonomy of art and ideological engagement. GER:3a (DR:7)

5 units, Win (Freidin)

200A,B,C. Senior Research—Limited to Humanities honors students. A critical essay of about 15,000 words. Students develop a proposal beginning in Winter Quarter of the junior year, and research a topic and write the essay during senior year, taking a total of 5 units each of 200B and 200C, spread out during senior year as best suits their schedules. Deadline for submitting essays is the first working day on or after May 15.

200A. Research Proposal—Preliminary planning and study. Student drafts a proposal in Winter Quarter of the junior year to submit to the Committee in Charge for suggestions regarding focus and bibliography. After revisions, the student resubmits fully developed proposal to the committee for additional comment and/or final approval. 60 hours over two quarters are expected of students developing their essay proposals for 2 units, usually 1 unit each in winter and spring of the junior year. Students usually make revisions of some kind in either scope or formulation of the topic. Students overseas submit proposals and receive feedback by fax or e-mail.

1-2 units (Robinson)

200B. Senior Research—Regular meetings with tutor (thesis advisor). Prerequisite: 200A.

1-5 units (Robinson)

200C. Senior Research—Regular meetings with tutor; submission of complete first draft at least two weeks before final deadline. Final grade is assigned by chair of program based on evaluations received from the student's tutor and a second reader appointed by the committee. Prerequisite: 200B.

1-5 units (Robinson)

GRADUATE PROGRAM

275. Directed Reading

1-5 units (Staff)

298. GPH Symposium—Required of doctoral and master's students in the GPH. Participation in the student-organized symposium; presentation of a paper informed by texts addressed in GPH seminars.

1-3 units, Spr (Robinson)

299. Teaching Internship—Required of doctoral students in the GPH. Preparation for teaching in interdisciplinary programs. Closely supervised teaching responsibilities in the Humanities program courses.

1-3 units (Brooks)

311,312,313,314,315. Graduate Program in Humanities Seminars—Required of students in the GPH. Open to other graduate students by consent of the instructor.

311. Classical Seminar—Performing the Ancient City—Concentrates on the cultural and political formation of ancient Athens at Rome. Homer, Aeschylus, Sophocles, Euripides, Aristophanes, Thucydides, Plato, Virgil, Petronius, Seneca, St. Augustine.

3-5 units, Aut (Rehn)

312. Medieval Seminar—Mystics and Mysticism—(Same as Religious Studies 338.) The western middle ages are a laboratory for exploring accounts of mystical experience. Medieval mysticism was diverse: a neo-Platonic strand wound from Augustine and Pseudo-Dionysius to Meister Eckhart, Nicholas of Cusa and John of the Cross. An emotive, passion-filled version found voice among the Cistercians, Franciscans and the women mystics of the period, culminating in the Carmelites Teresa of Avila, and again, John of the Cross. Initial focus is on Christian tradition; participants are invited to explore the mystical literature of other traditions (Islam, Judaism, Buddhism) in cross comparison with medieval Christian accounts.

4 units, Win (Gelber)

313. Renaissance/Early Modern Seminar—Focus is on this period as it records the impact of major historical forces: the advent of printing; the reappropriation of classical thought; the expansion of trade; revolutions in religion; the exploration of uncharted realms of the self, the world, and the heavens; and the rise of historiography. Texts: De Pizan, Columbus, De Las Casas, More, Luther, Montaigne, Marlowe, Shakespeare, Donne, Wroth, and Descartes.

3-5 units, Spr (Brooks)

314. Modern Seminar—Focus is on the various ways in which meaning and "meaning" became a problem in what we call the modern period. Study of philosophical and literary texts, including Wittgenstein, Heidegger, Carroll, Conrad, Woolf, Joyce.

3-5 units, Aut (Bourbon)

315. Graduate Core Colloquium: The Interdisciplinary Study of the Humanities

3-5 units, Win (Mease)

INTERNATIONAL POLICY STUDIES

Director: Judith L. Goldstein (Political Science)
Deputy Directors: Coit D. Blacker (Institute for International Studies), David W. Brady (Business, and Political Science)
Faculty Committee: David B. Abernethy (Political Science), Jonathan Bendor (Business), Coit D. Blacker (Institute for International Studies), John Cogan (Hoover Institute), David L. Freyberg (Civil and Environmental Engineering), Avner Greif (Economics), Stephen Haber (History), Thomas C. Heller (Law), Timothy E. Josling (Institute for International Studies), Stephen D. Krasner (Political Science), Anne O. Krueger (Economics), Michael McFaul (Political Science), Ronald I. McKinnon (Economics), James D. Morrow (Hoover Institution), Norman M. Naimark (History), Roger G. Noll (Economics), Michel C. Okesenberg (Institute for International Studies), Robert A. Packenham (Political Science), Scott D. Sagan (Political Science)
Lecturers: Alison Alter (Political Science), Nigel Key (International Policy Studies), Ronald Mitchell (International Policy Studies), David Epstein (Political Science)
Affiliated Faculty: Walter P. Falcon (Institute for International Studies), Simon Jackman (Political Science), Douglas Rivers (Political Science), Pan Yotopoulos (Food Research Institute)
Other Affiliation: Walter J. Stone (Political Science), Barry O'Neill (Political Science)

GRADUATE PROGRAM

MASTER OF ARTS

University requirements for the A.M. degree are described in the "Graduate Degrees" section of this bulletin.

424
International Policy Studies (IPS) is a highly analytical interdisciplinary program focusing on international policy analysis. Its goal is to provide students with in-depth exposure to a range of issues that they will face in the 21st century in international business and public policy, and to develop a foundation of skills and knowledge to address those issues. The program allows students to focus on the international economic system, developing and transition societies, security issues, or the world environment.

IPS requires the completion of the requirements as listed in items 1 through 5 below, which normally amounts to 48 units of credit. Additional units are required for students who have not fulfilled the prerequisites for these requirements.

ADMISSION

IPS is designed for students who have a strong undergraduate background in economics and political science. To enroll in the program, students must have taken at least one undergraduate course in international relations, and calculus-based undergraduate courses in statistics, microeconomics, and macroeconomics. Stanford courses satisfying these requirements are Political Science 55, Statistics 190, and Economics 51 and 52. In addition, to fulfill the program requirements in one year, students must have completed one advanced undergraduate course in international economics, and in either security studies or international political economy. Stanford courses that meet these requirements are Political Science 134A and 134B, and Economics 165.

Applicants from schools other than Stanford or applicants from Stanford who did not apply in their senior year should submit the Graduate Admission Application form and provide a statement setting forth relevant personal, academic, and career plans and goals; transcripts; three letters of recommendation; Graduate Record Examination (GRE) scores; relevant personal, academic, and career plans and goals; transcripts; three letters of recommendation; Graduate Record Examination (GRE) scores; and a writing sample of at least ten pages. Applications can also be filed by accessing the World Wide Web through the University Registrar’s web page at http://www.stanford.edu/dept/Registrar/. Applicants are expected to have an A.B. or B.S. degree from an accredited school. Applications for admission beginning Autumn Quarter must be filed together with supporting credentials by the preceding January 15.

Undergraduates at Stanford may apply for admission between their ninth and eleventh quarters. The application requires an official, current transcript, two letters of recommendation from University faculty, a course paper of at least ten pages, and a statement of relevant personal, academic, and career plans and goals. Students enroll in the program in the Autumn Quarter following completion of all of their undergraduate requirements including at least 180 units and, if graduating with honors, a senior thesis. Application is made through the International Policy Studies office. The closing date for filing applications and supporting credentials is January 15 of the senior year.

DEGREE REQUIREMENTS

To receive the A.M. degree in International Policy Studies, the student must complete items 1 through 5 below. Normally, these requirements entail 48 units of course work; exceptions are made with the written approval of the director of the program. These courses have the following prerequisites, which can not be counted toward any of the IPS degree requirements or for an area specialization. Economics 51, 52, and 165; Political Science 35 or IPS 204, 134A or 134B; Statistics 190 or Economics 80.

1. Core Requirement: IPS 200A, B, C (Seminar: Current Issues in International Policies, 3 units)
2. Skills Requirement (complete three of the following courses, 15 units):
   a) Introductory Econometrics (IPS 201)
   b) Advanced Econometrics (up to two of Economics 103, 104, Public Policy 105)
   c) Methods of Policy Analysis (up to two of IPS 201C, 201D, 201E, 209)
4. Foreign Policy Requirement: IPS 208 (Decision Making in U.S. Foreign Policy, 5 units)
5. Electives: students must take 20 units of other IPS approved courses, at least 10 units of which must be in one of the following areas of specialization. (A complete list of the courses available in these areas is available in the IPS Program Office, Building 60.)
   a) International Political Economy
   b) Conflict/Security Studies
   c) World Environmental Problems
   d) Political and Economic Development
   e) Public Organizations and Policy Implementation
6. a) Area Specialization: students may earn an area specialization certificate by completing 15 additional units focusing on one region. Options include Asia, Eastern Europe/Russia, Latin America, and Western Europe.
   b) Master’s Thesis: students are not required to write a master’s thesis; however, students may take up to 10 units of thesis research under the guidance of a faculty member as part of their electives.

In addition, students must meet the following deadlines:
1. Complete and file the IPS Program Proposal, available in the IPS office, no later than the second week of Autumn Quarter. All students should list all courses that will be used to fulfill the IPS requirements (including the required IPS 200 course). Coterminal students must list unduplicated courses, that is courses not counted toward an undergraduate degree.
2. Use Axess to file an Application to Graduate by the appropriate deadline, and complete and file the IPS Program Requirement Completion Worksheet with the IPS office.

Grade Requirements—All courses to be counted toward the 45 units must be taken for a grade of a ‘B-’ or higher.

Financial Aid—Undergraduates may petition for a fifth year of financial aid as coterminal students. Note that these petitions can only be made if the undergraduate degree has not been conferred. University-based financial aid is not normally available for graduate students entering the IPS program.

COURSES

Please refer to the IPS Degree Requirements sheet (available in the IPS Program Office) for information on additional core courses and electives.

103. Applied Macroeconomic Analysis—(Enroll in Economics 103.)
   5 units, Aut (Uhlig)

104. Applied Microeconomic Analysis—(Enroll in Economics 104.)
   5 units, Aut (Pistaferri)
   Spr (Hall)

105. Quantitative Methods and their Application to Public Policy—
   (Enroll in Public Policy 105.)
   5 units, Spr (Rothwell)

138B. International Negotiation—(Enroll in Political Science 138B.)
   5 units, Spr (O’Neill)

139B. Seminar: Foreign Policy Decision-Making—(Enroll in Political Science 139B.)
   5 units, Aut (O’Neill)

143S. Major Issues in International Conflict Management—(Enroll in Political Science 143S.)
   5 units, Spr (Stedman)
Scholars present their analysis of major international public policy issues.

201. Intermediate Statistics—Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: calculus.

202. Issues in International Economics—Topics in international trade and international macroeconomics: "new" trade theory, tariff and non-tariff trade barriers, international factor mobility, regional trading arrangements, trade and the environment, trade and development, exchange rate determination, international financial policy, and the international monetary system. Prerequisite: Economics 165 or equivalent.

204. Theoretical Issues in International Policy Studies—War and violent conflict are clearly common in international relations. In realms outside of national security such as economic affairs, human rights, and environmental protection, states often miss obvious and important opportunities to solve problems through cooperation. The factors that make international cooperation possible, examining themes of continuity and change. How the increasing economic, informational, and ecological interdependence of recent years is likely to change and reshape international relations in the future. Understanding these related questions; using causal analysis to understand other social problems.

206. European Integration—The political and economic factors shaping European integration from its inception to the present day. The evolution of the European Union and its governing institutions through the lens of several policy areas: agricultural, regional, monetary, regulatory, and foreign. Debates about democratic accountability, the future of the European Union, and the interplay between EU institutions and the domestic political arenas of member states.

207. Methods of International Policy Analysis—An economic approach to policy analysis and project evaluation, covering the tools of benefit-cost analysis, cost-effectiveness assessment, welfare measurement, and economic valuation. Students apply the tools to international policy problems. Prerequisite: Economics 51, a course in statistics.

208. Seminar: Decision Making in U.S. Foreign Policy—(Same as Political Science 241B.) Priority given to students in International Policy Studies. The formal and informal processes involved in U.S. foreign policy decision-making. The formation, conduct, and implementation of policy, emphasizing the role of the president and executive branch agencies. Theoretical and analytical perspectives are supplemented by case studies. Preparation of policy memorandum and substantial research paper or take-home final.

209. International Economic Development—Current development policies and programs in the areas of poverty, technological change, land reform, micro-finance, product markets, and the environment. Theoretical arguments for policy involvement and how efficiency and equity considerations impact the design, implementation, and success of programs by developing countries, the World Bank, NGOs, and other development agencies. Case studies and assignments emphasize applied quantitative methods: measures of poverty and inequality, sustainable development, productivity measurement; impact analysis, etc.

210. International Regimes: How States Govern in an Anarchic World—When and why do states turn to international regimes in their efforts to overcome the problems that arise in an anarchic world of self-interested states? Do the international regimes that states succeed at creating actually produce outcomes any different than those which occurred otherwise? Why states use international regimes to solve some types of problems but not others. How states and non-state actors create institutions that help them surmount the obstacles that anarchy poses to achieving their goals and why they often fail. Cases involve national security, trade, human rights, and environment protection. Theories regarding how the kinds of problems states face influence the kinds of cooperative institutions they develop. The major tenets of various theories of international organization and which of two or more competing theories better explains the actual experience of a variety of different international organizations.

214. Dispute Settlement in the World Trade Order—How the WTO dispute settlement system operates. Introduction to the basic principles and obligations of the GATT/WTO Agreement and how the rules and procedures governing the WTO dispute settlement apply in practice. Representative cases under the WTO dispute settlement system such as Japan-Alcoholic Beverages, EC-Bananas, Japan-Films, U.S.-Shrimp, and U.S.-Foreign Sales Corporations. Students participate as complainants or defendants in moot panel proceedings, or upon instructor's approval, write a paper on the WTO dispute settlement system.

215A. International Environmental Politics—How do nations address international environmental problems that they cannot adequately manage through domestic unilateral action alone? Some have negotiated effective international treaties; others seem to have had few positive effects. Students identify and skeptically evaluate all causal claims regarding environmental problems and develop skills using causal analysis, counterfactuals, and rigorous empirical evaluation.

215B. International Environmental and Resource Economics—The impact of economic development and population growth on the environment, especially in developing countries. The environmental impact of agricultural intensification; and the causes of tropical deforestation, desertification, and biodiversity loss. The role of local incentives in achieving global objectives, and how international organizations and institutions can help mitigate the market and policy failures that lead to environmental degradation.

217. The World Food Economy—(Enroll in Food Research Institute 219.)

219. Development and Population Interactions in the Third World—(Enroll in Food Research Institute 219.)

220. The Economics of Regional Agreements—(Enroll in Food Research Institute 246.)

230. Game Theory Application in Political Science—(Enroll in Political Science 239.)

240. Strategy in Politics—(Enroll in Political Science 200.)

241. Seminar: Issues in International Political Economy—(Enroll in Political Science 241.) Critical examination of the major theories whi
shod light on contemporary issues of global economic relations.  
5 units, Win (Goldstein)

250. Economics and Public Policy—(Enroll in Public Policy 104.)  
5 units, Win (Noll)

260. Comparative Western European Institutions—(Same as Public Policy 160.) How institutions shape politics and policies in Western Europe. Electoral laws, parliamentary systems, and government institutions at the national level influence the quality and nature of representation, political competition, and policy outcomes. Institutional developments at the subnational level and within the European Union challenge the domestic politics and policies of the European nation states.  
5 units, Win (Alter)

261. Comparative Political Economy of Post-Socialist Transitions—  
The post-Socialist economic and political transitions ongoing in Eastern Europe and the former Soviet Union, investigating attempts to build market economies and democratic governments. The politics of constitutional choice and variation in reform strategies and outcomes across the cases.  
5 units, Spr (Alter)

INTERNATIONAL RELATIONS

Director: Judith L. Goldstein (Political Science)  
Faculty Committee: David B. Abernethy (Political Science), Jonathan Bendor (Business), Barton J. Bernstein (History), Coit D. Blacker (Institute for International Studies), John Cogan (Hoover Institute), David L. Freyberg (Civil and Environmental Engineering), Ayner Greif (Economics), Stephen H. Haber (History), Thomas C. Heller (Law), Timothy E. Josling (Institute for International Studies), Stephen D. Krasner (Political Science), Anne O. Krueger (Economics), Michael McPaul (Political Science), Ronald I. McKinnon (Economics), James D. Morrow (Hoover Institution), Norman M. Naimark (History), Roger G. Noll (Economics), Michel C. Oksenberg (Institute for International Studies), Robert A. Packenham (Political Science), Scott D. Sagan (Political Science)

Affiliated Faculty: Masahiko Aoki (Economics), Larry J. Diamond (Political Science), Peter Duus (History), Walter P. Falcon (Institute for International Studies), Hester G. Gelber (Religious Studies), Lawrence H. Goulder (Economics), David J. Holloway (History), Simon Jackman (Political Science), Kennell Jackson, Jr. (History), Terry L. Karl (Political Science), David M. Kennedy (History), Anjini Kochar (Economics), Michael Kumhof (Economics), Gail Lapidus (Institute for International Studies), Mark I. Mancall (History), Noah M. Mark (Sociology), Isabella Mares (Political Science), Michael M. May (Engineering-Economic Systems and Operations Research), Robert E. McGinn (Industrial Engineering), Jean C. Oi (Political Science), Daniel I. Okimoto (Political Science), Susan M. Okin (Political Science), William J. Perry (Institute for International Studies), Richard Roberts (History), Paul A. Robinson (History), Aron Rodrigue (History), Nathan Rosenberg (Economics), Debra M. Satz (Philosophy), James J. Sheehan (History), John B. Shoven (Economics), Thomas W. Simons (History), Peter D. L. Stansky (History), Andrew Walder (Sociology), Amir Weiner (History), John D. Wirth (History), Pan Yotopoulos (Food Research Institute)

Other Affiliation: Alison Alter (Political Science), Byron Bland (Education), Gerald A. Dornan (Hoover Institute), John Earle (Economics), David Epstein (International Policy Studies), Naushad Forbes (Science, Technology, and Society), David Holloway (Institute for International Studies), Nigel Key (International Policy Studies), Timothy Lane (History), Ronald Mitchell (International Policy Studies), Barry O'Neill (Political Science), Walter J. Stone (Political Science), Arnold Suppan (History), Mikl Titma (Sociology)

International Relations (IR) is an interdisciplinary undergraduate major focusing on the study of the changing relations among nation-states (political, economic, and cultural). Students pursue a course of study in world politics that includes classes in political science, economics, history, and languages, focusing on a range of issues including international security, international political economy, political and economic development, and the politics of the transition to democracy. All International Relations majors must spend at least one quarter abroad and show two-year proficiency in a foreign language.

The International Relations program provides students with both the foundational skills and specific knowledge necessary to analyze the contemporary behavior of countries. The major prepares students for a variety of careers in government, non-governmental organizations, and business, both domestic and international. In addition, many IR students go on to graduate school either in law, business, economics, or political science.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Requirements for the major (65 units) are:

1. Political Science 35.
2. Either Political Science 134A or 134B or History 172A.
3. Economics 1, 50, or 51, plus two additional upper-division Economics courses from the IR course offerings lists.
4. At least one of the following skills classes:
   Economics 80 (Statistics 190)
   History 206
   Political Science 100A
   Sociology 180
   Statistics 60 (Psychology 10)
5. Specialization in one of three tracks by completing at least four additional courses from a specific list of classes. The three tracks are: Comparative Political and Historical Analysis (CPHA); Comparative Culture and Society (CCAS); Comparative and International Political Economy (CIPE). Specific classes may change. Consult the updated Course Offering lists available in the International Relations office.
6. Completion of at least three additional courses in the two remaining tracks. At least one course must be from a third track.
7. At least one seminar or colloquium.
8. At least one course designated as writing intensive (WIM) for International Relations.
9. No more than 20 units can be lower-division courses.
10. A minimum grade of 'C' is required for courses to count towards your major requirements.
11. Completion of study overseas either through the Stanford Overseas Studies Program or an approved non-Stanford program.
12. Under some circumstances, up to 10 units of Honors Thesis work may be used towards Track requirements.

Please refer to the Information Book for International Relations Majors for specific information and policies about major requirements.

The International Relations major must be declared before the end of the second quarter of the junior year. Students must submit an acceptable proposal to the director of the program and declare themselves as an IR major using the student AXESS system. Students completing a double major, or fulfilling International Relations as a secondary major, or declaring a minor are also required to file a proposal by the end of the second quarter of the junior year.

Students who have already been accepted as majors in the program may petition for credit for courses not listed in this section of the bulletin or in the updated course lists. Petitions should contain as much information as possible about the course in question (syllabi, reading lists, examinations, and papers). Courses should be clearly international in nature. Petitions are available in the International Relations Program office.
A minor in International Relations is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. Students complete the minor by taking seven unduplicated courses from the IR curriculum, including the following:

1. Political Science 35
2. Political Science 134A and 134B
3. Four courses from one of the three tracks, or four courses relating to the same geographic region. Specific courses may change. Consult the updated Course Offering lists available in the International Relations office.

Declaration of the minor must take place no later than the end of the second quarter of the junior year. To declare, first pick up the updated Course Offering lists from the International Relations office and then access the Registrar’s Web page and select “Minor Declaration.” Send questions by email to kp.ask@forsythe.stanford.edu.

HONORS PROGRAM

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students should submit their honors thesis proposal during Spring Quarter of their junior year.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students admitted to the honors program spend three quarters in the Honors Colloquium and present a formal defense of their thesis, in addition to enrolling each quarter with their faculty adviser. Under some circumstances, up to 10 units of honors thesis work may be used towards Track requirements. Students must receive at least a grade of 'B+' in order to graduate with honors in International Relations or receive honors credit towards their degree requirements.

Further details of the International Relations honors program are available from the program office.

GRANTS

The International Relations Program offers funds to students writing senior honors theses in international relations to finance travel to places where field work or library research is to be conducted, or to support intensive work at Stanford. The grants are intended for use by IR majors during the summer between their junior and senior years. The creativity and intellectual promise of the project and the preparation of the student are major considerations in awarding these funds. Applications are made during the Spring Quarter through the office of Undergraduate Research Opportunities at Stanford.

GRADUATE PROGRAM

MASTER OF ARTS

It is possible for students majoring in International Relations to work simultaneously for a coterminal master’s degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to make sure they fulfill the degree requirements in both fields. For information on the A.M. program in International Policy Studies, see the “International Policy Studies” section in this bulletin.

COURSES

(WIM) indicates that the course meets the Writing in the Major requirements.

For information on Track designations, consult the updated Course Offering Lists available in the International Relations Program office, and the quarterly University Time Schedule.

5 units, Aut (Clerici-Arias)
Win (Bernheim)
Spr (Wright)

50. Economic Analysis I—(Graduate students register for 151.) The neoclassical theory of consumer and firm behavior under perfect competition, partial equilibrium analysis, and the role of markets and prices in a decentralized system. Economic tools are developed concurrently with mathematical techniques from multivariable calculus, including partial differentiation and constrained and unconstrained optimization. Students who have not taken and passed Mathematics 51 take a diagnostic math test covering Mathematics 41 (or equivalent) during the first week of class; the results may preclude some students and require others to register concurrently for 50M. Prerequisite: Economics 1; Mathematics 41 (or equivalent). Recommended: Mathematics 51. GER:2c (DR:4)

5 units, Aut (Bajari)
Win (Hammond)
Spr (Rosston)

51. Economic Analysis II—(Graduate students register for 151.) Introduction to neoclassical analysis of general equilibrium, welfare economics, imperfect competition, externalities and public goods, intertemporal choice and asset markets, risk and uncertainty, game theory, adverse selection and moral hazard. Multivariable calculus is used. In Autumn and Winter Quarters, all students must have successfully completed either Economics 180 or Mathematics 51. Prerequisite: 50.

3-5 units, Aut, Win (Frankel)
Spr (Schmidt)

80. Introduction to Statistical Methods (Postcalculus) for Social Scientists—(Same as Statistics 190.) Introduction to statistical methodology relevant to the social sciences. Emphasis is on the description and examples of the use of statistical techniques. Probability: basic rules of probability, conditional probability, Bayes’ rule, discrete and continuous probability distributions. Statistical inference: point estimation, tests of hypotheses, confidence intervals, large-sample methods. Data analysis: linear regression techniques and diagnostics. Computer software (e.g., Excel) is used for inference and data analysis. Prerequisites: Mathematics 41 or equivalent, consent of instructor. GER:2c (DR:4)

3-5 units, Aut, Spr (Staff)
Win (Amemiya)

172A. The United States since 1945—Analyzes foreign policy and politics, and deals with social themes and intellectual history. GER:3b (DR:9)

4-5 units, Win (Bernstein)

206. Undergraduate Colloquium: The Logic of History—(Same as 306.) Introduction to the literature for students in history and the social sciences. How do historians advance and sustain arguments? What is evidence and how is it treated? What are the rules of argumentation that underlie different types of history, and how do these differ from those found in the social sciences? In the writing of history, what constitutes a truth claim? Readings/discussion of the literatures on case study methods, the philosophy of history and social science, and actual historical case studies.

3 units, Aut (Haber)
POLITICAL SCIENCE

35. International Politics—(Same as 135.) Approaches to the study of world politics including realism, liberalism, and decision-making theories. WW I, the nuclear weapons debate, and contemporary and economic problems. The normative and policy implications of different theories. GER: 3b (DR: 9)
5 units, Aut (Krasner)

100A. Statistical Methods I—(Same as 200A.) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus.
5 units, Aut (Stone)

133A. Strategy, War, and Politics—Traditional and modern theories on the causes of war and sources of peace. Contrasting explanations for the origins of WW I and II; alternative theories of deterrence in the nuclear age; the causes of war in the Persian Gulf, and ethnic conflicts and terrorism in the post-Cold War era. GER: 3b (DR: 9)
5 units, Spr (Sagan)

134A. America and the World Economy—Developmental approach analyzes American foreign economic policy, centering on a historical analysis of the basic issues involved in the formation of American foreign policy. Issues: evolution of American tariff and trade policy, development of mechanisms for international monetary management, and American foreign investment policy reflected in changing political goals pursued by American central decision-makers. Prerequisite: 35 or equivalent. (WIM)
5 units, Win (Goldstein)

134B. America and the World Economy—(Graduate students register for 404.) Introduces the methods used in contemporary sociological research, focusing on strategies for designing research and analyzing data.
5 units, Aut (Mark)

STATISTICS

60. Introduction to Statistical Methods: Precalculus—(Graduate students register for 160; same as Psychology 10.) Emphasis on techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER: 2c (DR: 4)
5 units, Aut (Griffin)
Win (Walther)
Spr (Thomson)

OFFERING LISTS
For information on Track designations, consult the updated Course Offering Lists available in the International Relations Program Office.

129. International Health Policy: Comparative National Health Care Systems—The structure and underlying policies of national health care systems in Europe, N. America, and Japan. How other countries have addressed issues of health care organization and finance and the issue of allocating scarce health care resources. Limited enrollment. Prerequisite: consent of instructor.
3 units, Win (Lee)

135. Global Environmental Policy and Law—Advanced seminar on the international management of regional and global environmental issues, focusing on the issues themselves, and on the international institutions and agreements created to manage them. The need for international environmental law, its sources, and the participants in its creation and implementation. What works in international environmental management and what does not. Topics: ozone depletion, global warming, forests, transboundary and marine waters, Antarctica, endangered species, biodiversity, plant genetic resources, trade and the environment, and the rights of indigenous people. The future of global environmental policy and law.
5 units, Aut (Rosencranz)

137. South Asia: Environment, Development, and Security—Parallel movements and activities in these three areas in India and Pakistan since independence in 1947, with emphasis on developments since 1991. The environment: air, water, and agrochemical pollution, and population growth and attempts to limit them. Development: new programs for economic and energy growth and their environmental consequences. The nuclear arms competition between the two countries and its potential to destabilize the region.
5 units, Aut (Rosencranz)

160. Comparative West European Institutions—(Same as Political Science 120A, Public Policy 160.) How institutions shape politics and policies in Western Europe. Electoral laws, parliamentary systems, and government institutions at the national level influence the quality and nature of representation, political competition, and policy outcomes. Institutional developments at the subnational level and within the European Union challenge the domestic politics and policies of the European nation states.
5 units, Win (Alter)

161. Comparative Political Economy of Post-Socialist Transitions—The post-Socialist economic and political transitions ongoing in Eastern Europe and the former Soviet Union, investigating attempts to build market economies and democratic governments. The politics of constitutional choice and variation in reform strategies and outcomes across the cases.
5 units, Spr (Alter)

191. International Relations Journal
1 unit, Aut, Win, Spr (Goldstein)

192. Global Hot Spots: Understanding Current World Conflicts and International Political Issues—Weekly lecture series surveying the historical background and current context of major issues in international politics today. (AU)
1 unit, Spr (Goldstein)

199T. Seminar: Transatlantic Economic and Security Relations in the Post-War Period—For International Relations students. The changing nature of the transatlantic relationship over the past 50 years, including economic, political and security dimensions. Emphasis is on the interplay of economic and trade issues, which have often led to conflicts between the U.S. and the EU, the predominant political motives which have been behind U.S. support for European integration, and the strengthening of Europe as a global actor. Lecture material, class presentation. Enrollment limited to 20. (WIM)
5 units, Spr (Josting)

201. Intermediate Statistics—Introduction to probability and statistical interference, with applications to political science and public policy. Prerequisite: calculus, Statistics 60.
5 units, Aut (Epstein)

202. International Trade Policy
5 units, Spr (Key)

204. Theoretical Issues in International Policy Studies—War and violent conflict are clearly common in international relations. In realms outside of national security such as economic affairs, human rights, and environmental protection, states often miss obvious and important opportunities to solve problems through cooperation. The factors that make international cooperation possible, examining themes of dependency and change. How the increasing economic, informational, and ecological interdependence of recent years is likely to change and reshape interna-
tional relations in the future. Understanding these related questions; using causal analysis to understand other social problems.

5 units, Aut (Mitchell)

205. European Integration—Seminar on the political and economic factors shaping European integration from its conception to the present day. The evolution of the European Union and its governing institutions through the lens of several policy areas. Agricultural, regional, monetary, regulatory, and foreign policy. The debates about democratic accountability, the future of the European Union, and the interplay between EU institutions and the domestic political arenas of the member states.

5 units, Aut (Alter)

207. Methods of International Policy Analysis

5 units, Win (Key)

209. International Economic Development—Current development policies and programs in the areas of poverty, technological change, land reform, micro-finance, product markets, and the environment. Theoretical arguments for policy involvement and how efficiency and equity considerations impact the design, implementation, and success of programs by developing country governments, the World Bank, NGOs, and other development agencies. Case studies emphasize applied quantitative methods: measures of poverty, inequality, and sustainable development, productivity measurement; impact analysis, etc.

5 units, Spr (Key)

210. International Regimes: How States Govern in an Anarchic World—When and why do states turn to international regimes in their efforts to overcome the problems that arise in an anarchic world of self-interested states? Do the international regimes that states succeed at creating actually produce outcomes any different than would have occurred otherwise? Why do states use international regimes to solve some types of problems but not others. How states and non-state actors create institutions that help them surmount the obstacles that anarchy poses to achieving their goals and why they often fail. Cases involve national security, trade, human rights, and environment protection. Theories regarding how the kinds of problems states face influence the kinds of cooperative institutions they develop. The major tenets of various theories of international organization and which of two or more contending theories better explains the actual experience of a variety of different international organizations. (WIM)

5 units, Spr (Mitchell)

215. International Environmental Politics—How do nations address international environmental problems that they cannot adequately manage through domestic unilateral action alone? Some negotiated effective international treaties; others have had few positive effects. Students identify and skeptically evaluate all causal claims regarding environmental problems and develop skills using analysis, counterfactuals, and rigorous empirical evaluation. (WIM)

5 units, Win (Mitchell)

220. The Economics of Regional Agreements—(Enroll in Food Research Institute 146.)

INTRODUCTION TO THE HUMANITIES PROGRAM

Program Director: Harry Elam (Drama)

Introduction to the Humanities offers courses which satisfy a three-quarter General Education Requirement (GER) for first-year students. The purpose of the Area 1 requirement is to build an intellectual foundation in the study of human thought, values, beliefs, creativity, and culture. Introduction to the Humanities courses enhance skills in analysis, reasoning, argumentation, and oral and written expression, thus helping to prepare students for more advanced work in the humanities, and for work in other areas such as the sciences, social sciences, and engineering.

The Area 1 requirement may be satisfied in two different ways:

Introduction to the Humanities courses (one-quarter introductory courses followed by two-quarter thematic sequences), or with The Program in Structured Liberal Education (an intensive, three-quarter, residence-based program satisfying the Area 1 requirement, the University writing requirement, and one additional General Education Requirement)

COURSES INTRODUCTION TO THE HUMANITIES

Students enrolled in Introduction to the Humanities courses satisfy, in two parts, the Area 1 requirement by pairing a one-quarter introductory course in Autumn Quarter with a two-quarter thematic sequence in Winter and Spring Quarters. The Autumn Quarter introductory courses hone skills in humanistic disciplines through close reading and critical investigation of a limited number of works as preparation for further work in the humanities and, specifically, for any one of the Winter-Spring sequences.

AUTUMN

1. Great Works I—Small discussion sections explore some of the ideas, beliefs, values, and conflicts in the cultural heritage of contemporary America. By performing analysis and considering different approaches or “reading strategies” in the humanities, students develop critical styles relevant to current scholarship and tailored to their own specific interests. Concentrating on classic works of Western literature, religion, and philosophy, participants discover the ways that these works contribute to and critique their own immediate contexts and cultures. Works from outside the traditional Western canon are included, giving voice to the pluralistic strands in contemporary society and allowing students to consider the nature and source of many of the assumptions on which common beliefs are grounded. Students learn to question the very designation “great work” as they investigate the different historical, political, and cultural processes that contribute to and flow from such value judgments.

Track Coordinator: Renee Courey (Introduction to the Humanities)

5 units, Aut (Staff)

12. Word and the World: Conversations across Time and Space—The texts read are foundational, producing social, political, religious, and imaginative worlds. They constitute identities; imply selves; and define relationships between parents and children, women and men, subjects and objects, slaves and masters. These texts are webs, presenting tangled histories of editing, commentary, use, and appropriation, and entangling readers in their power. Students read and re-read them on their own terms, and in juxtaposition with each other. The goal is to develop a rich sense of the texts themselves, as well as the critical and interpretive approaches used to explore them. Partially web-based. Students should be prepared to use a computer to complete course work.

5 units, Aut (Friedlander, Lenoir, Saussy)

14. The Good Life—What does it mean to live the “good life”? What must people do in order to fulfill their potential as human beings and assert their difference from other species? What is the highest value, against which are rated all other human values and activities? Reason? Love? Freedom? Originality? Explicitly and implicitly, written texts (be they philosophical or literary in form) reveal prime values and comment on the nature of the good life. The texts read stage a conflict between competing values, values which although equally desirable turn out to be fundamentally incompatible. Through an analysis and discussion of these works, contrasting visions of the good life put forward by each text are explored.

5 units, Aut (Elam, Landy, Nightingale)

16. Freedom and Eros in Philosophy and Art—Plato and Nietzsche had fundamentally opposed philosophical visions. Plato proposes an elaborate metaphysical system that orders reality around the Good, and that subordinates the importance of freedom and of the arts as human values. By contrast, Nietzsche rejects Plato’s project of metaphysics, and claims that freedom and artistry are fundamental values for human life.
The place of freedom and of the arts within these two philosophies via traditional philosophical techniques. The experience of art, asking how philosophers view art, and how the viewer can experience freedom by engaging works of art, and thereby contributing to the completion of artistic expression.

5 units, Aut (Anderson, Berdini, Bobonich)

17. Themes and Variations—Three themes or narratives are presented that, in various incarnations and in different media, function as mythologies of Western culture. Each centers on a figure (Oedipus, Othello, Don Juan), who by his existence or behavior challenges or subverts perceived social norms and calls into question cultural boundaries. Students consider these figures as characters in written texts and as they are transformed in a variety of different media: film, opera, gospel. Emphasis is on viewing, hearing, and reading, and on how the medium itself affects experience and poses interpretative challenges.

5 units, Aut (Greenleaf, Hinton, Stephens)

18. Narrative: Telling It the Way It Is?—Humans narrate stories in order to recount events and make sense of them. There are ways of understanding different forms of narratives. Some forms of narrative studied are familiar: ancient epics, classic novels, short stories, and films. Other forms are more informal: gossip and rumor. There is narrative in unexpected locations, e.g., scientific laboratories, and stories from different times and cultures, enabling comparisons across time and space.

5 units, Aut (Ebron, Shanks)

19. The Self, the Sacred, and the Human Good—The works examined were written across a span of 2,300 years, from very different cultural and historical situations, and in very different forms and genres. Taken together, they create an urgent conversation about the ways in which human beings define their place in this world, and how they attempt to give meaning and dignity to lives subject to every kind of social and personal evil, bodily affliction, and spiritual doubt. In the face of such difficulties, and mortality, how do humans build systems of value, whether based on personal, sacred, or social authority? What is the relationship between these ways of making meaning and establishing standards of virtue and vice? Are they compatible or antithetical? The works studied give various answers, or refuse to answer at all. Their differences give creative tension to an examination of these issues, as they offer unique aesthetic and persuasive achievements.

5 units, Aut (Wolff, Yearley)

WINTER-SPRING SEQUENCES

2.3. Great Works: The Hereafter, the Here-and-Now—The sequence explores great texts (religious, philosophical, and literary) that have addressed the hereafter and the here-and-now, comparing different conceptions of the afterlife and the ways that traditions about the afterlife are created and appropriated. How the imagined involvement of the underworld in everyday life is modified, tracing the ways that the presence (or absence) of spirits takes on different meanings and makes different claims on the behavior of the living.

2A. 5 units, Win (Harrison, Schnapp)
2B. 5 units, Spr (Harrison, Schnapp)

8A, 9A. Myth and Modernity: Culture in Germany—The contrasts and interplays between traditional and modern cultures are explored, raising questions about history, progress, and change. What defines a cultural tradition? How do values change? When does a national past sustain or impinge on the present? These questions are posed with reference to German literary and philosophical writings, visual arts, films, and music. Within this cultural field, the focus is on the impact of modernization on values, expressivity, and community. Students are encouraged to assume a critical perspective on their own cultures, via close examination of the constellation of ideas and values that contributed to the German legacy, with its proximity of intellectual achievement and political disaster. How did an obsession with "race" overtake Germany? Do all cultures require such myths, or can mythic thinking be overcome?

8A. 5 units, Win (Strum)
9A. 5 units, Spr (Eshel)

20A, B. The Humanities: Breaking Boundaries—This sequence examines the persistent reappearance of "interdisciplinarity" in eras from the Middle Ages to the present. Students study key works that cross disciplinary boundaries in order to examine how texts themselves provide terms for interdisciplinary methods of reading. Reading, encompassing intellectual, social, literary, ethical, and artistic concerns, is explored to see how ideas become established, what their intellectual and social boundaries are, and what historical pressures break boundaries down.

20A. 5 units, Win (Brooks)
20B. 5 units, Spr (Rayner)

21A, B. The Literature of Transformation—This sequence explores the ways in which writers from Ovid to Maxine Hong Kingston have dealt with and described the phenomenon of change in their own lives and in the world around them. The foundational text is Ovid's Metamorphoses, which surfaces throughout the course in the original version (read in translation) and in various transformations from the medieval through the modern periods.

21A. 5 units, Win (Evans, Middlebrook)
21B. 5 units, Spr (Evans, Middlebrook)

23A, B. Reason, Passion, and Reality—What roles should passion and reason play in human life? Answers to this question cross various boundaries of human difference: gender, race, age, culture, and epochs. Contrasting roles for passion and reason are traced in the context of three traditional philosophical concerns: value and obligation; knowledge, emotion, and understanding; God and reality. These problems are explored through classics of philosophy and drama, poetry, novels, and wisdom literature.

23A. 5 units, Win (Moravcsik)
23B. 5 units, Spr (Anderson, Taylor)

24A, B. Ten Days that Shook the World—Focus is on ten events that "shook the world" in their own times, or owing to their medium-range and long-range effects (and usually both), or in terms of their emblematic nature for historical processes at work: the destruction of the Second Temple of Jerusalem (70 B.C.); the arrival of Islam in India; the Grott Plague in Europe, Asia, and N. Africa (1347-50); the battle of Kosovo (1389); the French Revolution; and the "opening" of Japan by Commodore Perry (1853). The leading theme is ideologies of imperialism, universalism, and globalism (religious, political, and economic) and the processes of empire-building and globalization (and resistance to them). The material begins and ends with "the West," because for better or worse, "the West" created successful world-unifying imperialism in ideology and fact. The Roman imperial, other formations such as the Muslim commonwealth and the Turkish empire, and through contact India, Japan, and Africa.

24A. 5 units, Win (Buc)
24B. 5 units, Spr (Rodrique)

26A, B. Democratic Society in Europe and America: Origins, Crises, Dilemmas—The development of the theory and practice of democracy is analyzed in Europe and the U.S. from the 18th century to the present. The technique is comparative: by studying European and American materials in parallel, perspectives are developed on both the universal and the particular elements that have shaped the histories of Europe and N. America in the last two centuries. Where appropriate, comparisons are drawn with developments in Asia, Africa, and Latin America.

26A. 5 units, Win (Kennedy, Sheehan)
26B. 5 units, Spr (Kennedy, Sheehan)

27A. B. Encounters and Identities—The formation of ideas about individual and collective identities is investigated in S. Asia, Western
Europe, and the U.S. Some contemporary ideas about identity, including nationalism and national identity, and historical encounters and social transformations linking these areas of the globe. In emphasizing the similarities and differences among ideas of individual and collective identity found in different regions of the world, challenges are presented to assumptions about the origins of human identity.

27A. 5 units, Win (Gupta)
27B. 5 units, Spr (Yanagisako)

28A, B. Poetic Justice: Order and Imagination in Russia—This sequence examines the difference between justice and law in the view of 19th- and 20th-century Russian writers, focusing on the notion of “poetic justice”: the artistic representation of order, whether divine, natural, or human. The aim is to heighten awareness of familiar narratives, mythologies, ideas, and images, and at the same time convey a sense of a long-established national culture with its own dynamic and vision.

28A. 5 units, Win (Safran)
28B. 5 units, Spr (Bulgakowa, Freidin)

30A, B. Transculturations—Literary and other works testify to the intermingling of flows of population, resources, stories, and social institutions across the world, and with analytic discussion and historical contextualization, demonstrate that the modern concept of globalization is new mainly in degree, questioning the tacit implication that the earlier history of cultures is one of mutual isolation. Through reading texts familiar and unfamiliar, from Homer to Soyinka, connections are fashioned among the arts and their near neighbors (history, anthropology, economics).

30A. 5 units, Win (Batchelor, Saussy)
30B. 5 units, Spr (Batchelor, Saussy)

PROGRAM IN STRUCTURED LIBERAL EDUCATION

Track Chair: Mark Mancall (History)

Structured Liberal Education (SLE) offers students an intensive, three-quarter, residence-based learning experience, which simultaneously satisfies the Area 1 requirement, the University writing requirement, and one General Education requirement in the humanities. SLE encourages students to live a life of ideas in an atmosphere that stresses critical thinking and a tolerance for ambiguity. The residence hall is the informal setting for lectures and small-group discussions. SLE instructors work closely with students and participate in dorm life. SLE enhances the classroom experience with other residence-based educational activities: a weekly film series throughout the year and a student-produced play each quarter.

SLE students receive intensive and individualized writing instruction from a team of instructors and peer writing tutors. See the “Structured Liberal Education” section of this bulletin.

9 units, Aut, Win, Spr (Mancall, Staff)

PROGRAM IN JEWISH STUDIES

Program Director: Steven Zipperstein
Faculty Advisory Committee: Joel Beinin (History), Arnold Eisen (Religious Studies), Amir Eshel (German Studies), John Felstiner (English), Mark Mancall (History), Norman Naimark (History), Jack Rakove (History), Aron Rodrigue (History), David Rosenhan (Law, Psychology), Gabriella Safran (Slavic Languages and Literatures), Peter Stansky (History), Amir Weiner (History), Steven Zipperstein (History)

The interdisciplinary Program in Jewish Studies investigates all aspects of Jewish life in history, literature, language, and culture from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The program annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish studies, and it coordinates the annual Dorot Travel Grants for summer study in Israel.

Graduate students enroll in the program through the departments of English, History, or Religious Studies and must meet the requirements of those departments.

UNDERGRADUATE PROGRAMS

INDIVIDUALLY DESIGNED MAJOR

The Individually Designed Major in Jewish Studies permits interested students to focus their attention on the broad field of Jewish Studies and, at the same time, to expand their knowledge of one or another related fields.

Each major should complete at least 60 units, all in courses at or above the 100 level (or their equivalent). A maximum of 15 of these 60 units may be taken on a credit/no credit basis. A maximum of 5 of these 60 units may be taken in individual study or directed reading. Students must present evidence that demonstrates their ability to do independent work and have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee. Each major must obtain sponsorship from three faculty members, one of whom is the student’s primary adviser, and from the Director of the Program in Jewish Studies. Details about the written procedures and documents necessary for application for an Individually Designed Major can be obtained at the Undergraduate Advising Center, Sweet Hall, first floor (650) 723-2426.

REQUIREMENTS

The faculty members in Jewish Studies have designed the following structure for the major:

<table>
<thead>
<tr>
<th>Category</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>History and Society: students must take one course in each of the three periods—biblical and ancient, medieval and modern, and contemporary</td>
<td>15</td>
</tr>
<tr>
<td>Religion: biblical, rabbinic, medieval, modern</td>
<td>15</td>
</tr>
<tr>
<td>Literature: Hebrew, Yiddish, Holocaust, American Jewish</td>
<td>10</td>
</tr>
<tr>
<td>Hebrew Language (second year or beyond): Students who demonstrate by examination that they have completed the equivalent of at least two years of university-level Modern Hebrew may apply the 12 units required in this category to more work in one of the other categories required by the major, with the approval of their primary adviser.</td>
<td>12</td>
</tr>
<tr>
<td>Ancillary Courses: ancient history, Medieval history, modern European history, history of philosophy, Islam, Christianity</td>
<td>8-10</td>
</tr>
<tr>
<td>Total number of units required</td>
<td>60-62</td>
</tr>
</tbody>
</table>

Students planning an Individually Designed Major in Jewish Studies are also strongly urged to write an honors thesis. Students interested in majoring in Jewish Studies should discuss this with their adviser(s) when discussing the major itself. Up to 10 honors thesis units may be included in the major.

No course proposed for the major may be counted as fulfilling more than one required category in the proposed major. Transfer credits from other universities must be approved by the appropriate Stanford authorities.

MINORS

The Jewish Studies minor is open to students in any department who wish to enrich their studies through an acquisition of knowledge in Jewish history, thought, religion, literature, and society. Students must complete their declaration of the minor no later than the last day of the quarter four quarters before degree conferral. For example, a student graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of the junior year.

Students must complete six courses for a maximum of 36 units toward the minor. All courses of study should be discussed and approved by a Jewish Studies faculty member in the departments of English, History, or Religious Studies, and by the program director. In addition to suggested introductory courses, students are also encouraged to take courses in Hebrew language as part of their Jewish studies minor, and are granted
credit toward the minor for up to 5 units of language study. Any variations on the minor requirements must be approved in advance by the Director of the Program in Jewish Studies.

Courses credited toward the minor must be distributed in the following ways: (1) three introductory courses at the 100 level or below in the fields of history, religious studies, literature, or Hebrew language (for a maximum of 5 units) or one of the designated introductory-level courses offered through the Program in Comparative Studies in Race and Ethnicity; (2) two courses at the 100 level or above from two of three areas of concentration (history, religious studies, or literature); and (3) one seminar or undergraduate colloquium at the 200 level or above in one area of concentration (history, religious studies, or literature). No course credited toward the Jewish Studies minor may be double counted toward major requirements.

HONORS PROGRAM
The Jewish Studies honors program fosters a sustained examination of the field of Jewish studies for students majoring in any discipline, and it extends its concerns across broad interdisciplinary terrain, with implications beyond the humanities in areas such as psychology, law, business, international relations, medicine, etc. Students may apply for entry, at the latest, by the Autumn Quarter of their junior year, and must have a cumulative grade point average (GPA) of 'B' or higher.

Each student is required to take a lower-division 5-unit "Jewish Civilization" survey (History 88/Religious Studies 29) co-taught by a cross-section of the faculty in Jewish Studies from the departments of English, History, and Religious Studies, with the cooperation of faculty in American Studies, Feminist Studies, and Slavic Languages and Literatures. This course is designed to provide honors students and others with a broad grasp of the variety and conflicting approaches to Jewish studies. In addition, students are required to take two 5-unit courses chosen from offerings in English, History, or Religious Studies. Students are urged to take at least one course in Jewish history from the course offered in the Department of History (188A,B,C). Jewish studies honors students are required to write an honors thesis during Autumn and Winter Quarters of the senior year. An honors seminar (202A,B) is offered for students to share their work-in-progress. Thesis proposals are submitted to the Faculty Advisory Committee at least one year prior to the intended date of graduation.

COURSES

CULTURAL AND SOCIAL ANTHROPOLOGY
79. Anthropological Perspectives on the Middle East
5 units, Win (Razielli)

HISTORY
22N. Stanford Introductory Seminar: Ethnic Cleansing in 20th-Century Europe
4 units, Aut (Naimark)

85Q. Stanford Introductory Seminar: Jews and Muslims
5 units, Win (Rodrigue)

88S. Sources and Methods Seminar: Transformation of Jewish Identity in Eastern Europe, 1881-1939
5 units, Win (Moss)

89S. Sources and Methods Seminar: Re-Imagining Palestine
5 units, Spr (S. Robinson)

188C. Jews in the Modern World
5 units, Aut (Zipperstein)

209B/309B. Undergraduate/Graduate Colloquium: Crusaders, Pilgrims, and Merchants—The Mediterranean World, 700-1600
4-5 units, Spr (Miller)

285B. Undergraduate Colloquium: The Bible ("Old Testament")
5 units, Win (Mancall)

384A. Graduate Core Colloquium in Jewish History, 17th-19th Centuries
4-5 units, Aut (Rodrigue)

384B. Graduate Core Colloquium in Jewish History, 20th Century
4-5 units, Win (Zipperstein)

485A. Graduate Research Seminar in Modern Jewish History
4-5 units, Spr (Zipperstein)

LANGUAGE CENTER

Director: Elizabeth Bernhardt
Assistant Director: Patricia de Castries
Senior Lecturer, and Coordinator African and Middle Eastern Languages: Khalil Barhoum (Arabic)
Lecturer, and Coordinator Special Language Program: Eva Priou (Modern Greek)
The Stanford Language Center was created to oversee all language instruction at Stanford and is principally responsible for all first- and second-year foreign language courses taught at Stanford. The center’s charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford’s language instruction; and to take leadership in research and development efforts in language learning.

UNDERGRADUATE PROGRAM
MINOR IN MIDDLE EASTERN LANGUAGES, LITERATURES, AND CULTURES

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to the Arabic and Hebrew languages, as well as an introduction to the cultures and civilizations of the Middle East.

Students declaring a minor must do so no later than the last day of the quarter four quarters before degree conferral. For example, students graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of their junior year. If a student is not able to meet this deadline, he or she may petition the Language Center director and request a revised declaration date, which may be granted at the director’s discretion.

The requirements for a minor in Middle Eastern Languages, Literatures, and Cultures are:

1. Completion of six courses in either Track A: Cultural Studies, or Track B: Language Studies.
2. Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/credit.
3. All courses must be completed with a letter grade of ‘C’ or better.
4. Courses may not overlap with those taken for a major course of study.
5. Courses taken which also fulfill a GER count toward fulfilling both minor and GER requirements.
6. Students pursuing Track B: Language Studies, must complete the prerequisite of Beginning Arabic or Hebrew, or demonstrate equivalent competence.

CULTURAL STUDIES TRACK

Requirements are:

1. Successful completion of the prerequisite, Beginning Arabic (or Hebrew), or a demonstrated equivalent competence.
2. Completion of three courses from Appendix A.
3. Completion of three courses from Appendix B.

Course No. and Subject:

Appendix A:
SLP125A. The Contemporary Arab World through Literature and Culture 4
SLP125B. Readings in Contemporary Arab Writers 3
SLP125C. Influences and Issues in Contemporary Arab Women Writers* 4
SLP125D. The Arab World through Travel Literature* 4

Appendix B:
Comp. Lit. 10N. Stanford Introductory Seminar: Egyptian East/Egyptian West 3
History 85Q. Stanford Introductory Seminar: Jews and Muslims 5
History 87. Empires and Cultures in the Modern World 5
History 185. Introduction to Islamic Civilization 5
History 187B. The Middle East in the 20th Century* 5
History 187T. Palestine, Zionism, and the Arab-Israeli Conflict 5
History 187C. Women in the Modern Middle East 5
History 189A. Israel: 1800 to the Present 5
History 207. Jews, Christians, and Muslims: Medieval Spain 5
History 209A. Law, Society, and Identity in Christianity and Islam, 500-1900 5
History 285A. Problems in Israeli History: The National Identity and Political Culture of the Israeli State 5
History 285B. Zionist Theory and Practice 5

History 286. Undergraduate Colloquium: Economic and Social History of the Modern Middle East 5
History 287S. Topics in the Modern History of Egypt, Palestine, and Israel 5
History 288. Palestine and the Arab-Israeli Conflict 5
Relig. Studies 121. People of the Book: Abraham and Joseph 4-5

* Units of course work earned from GER courses listed in the Language track and Cultural Studies tracks may be used to fulfill the unit requirements for the minor.

LANGUAGE TRACK

Requirements are:

1. Successful completion of the prerequisite, Beginning Arabic (or Hebrew), or a demonstrated equivalent competence.
2. Completion of one year of language study at the intermediate level (Special Language Program 121A,B,C for Arabic, or 129A,B,C for Hebrew).
3. Completion of three courses from Appendix B.

GRADUATE PROGRAM

Ph.D. MINOR IN APPLIED LINGUISTICS

The Ph.D. minor in Applied Linguistics has been designed to give students the opportunity to examine and explore language as it pertains to teaching, learning, translation, education, and language policies.

The Ph.D. minor requires the completion of less than 30 units of unduplicated course work. Course work must include Linguistics 201 (Foundations of Linguistic Analysis, 4 units). At least one additional Linguistics course must also be taken. Courses taken for the minor must be incremental units beyond those used to satisfy the major (with the exception of Linguistics 201 for Linguistics students). At least 20 of the 30 units must be at the 200 level or above. Students may also supplement their Applied Linguistics training with an array of courses from the departments of Cultural and Social Anthropology, Linguistics, and Spanish and Portuguese.

Overlapping applied linguistics concentrations are available in the Learning, Teaching, and Translation of Second Languages; and in Educational and Policy Applications of Linguistics.

Some suggested courses relevant to each track are listed below the track description; a fuller listing of courses which are appropriate for the minor can be found on the Language Center’s web site (http://language.stanford.edu/).

Students in either track should develop a program of study in consultation with an academic adviser and submit the proposed program of study for approval by the Applied Linguistics Steering Committee.

THE LEARNING, TEACHING, AND TRANSLATION OF SECOND LANGUAGES TRACK

This overall program concentration requires general reading in second language acquisition (SLA) and/or translation while offering students course work in the following areas:

1. Second language acquisition in instructed contexts
2. Elements of curricular design for university and college settings
3. The acquisition of second language literacy
4. The use of technology to enhance student performance
5. Linguistics and the teaching of foreign languages
6. Theoretical foundations in the translation of various languages

Course No. and Subject:

Ed. 248. Theory and Issues in Literacy 4
Ed. 390. Advanced Seminar in Bilingual Education 1-3
Lang. Ctr. 201. The Learning and Teaching of Second Languages 3
Lang. Ctr. 203. Second Language/Second Dialect Acquisition (Same as Span. 204) 3-5
Lang. Ctr. 204. Issues and Methods in the Teaching of Heritage Languages (Same as Span. 300) 3-5
Lang. Ctr. 205. Educational Applications of Sociolinguistics (Same as Edu. 341) 3-4
Ling. 189/289. Linguistics and the Teaching of English as a Foreign Language (Same as Ed. 282) 4-5
Ling. 140/240. Language Acquisition I 4

437
EDUCATIONAL AND POLICY APPLICATIONS OF LINGUISTICS TRACK

This concentration is oriented toward a combination of conceptual and research foci regarding language minority populations and their educational welfare. The education of women, low-income, and language minority populations receive primary attention within this concentration.

Course No. and Subject Units
Ed. 248. Theory and Issues in Literacy 4
Ed. 249. Theory and Issues in the Study of Bilingualism 3-4
Ed. 270. African-American English in Educational Context 3-4
Ed. 277X. Education of Immigrants in Cities 4
Ed. 289X. Introduction to Linguistics for Educational Research (Same as Ling. 290) 4
Ed. 297X. Research in Second Language Classrooms 3
Ed. 335X. Language Policy and Planning: National and International (Perspectives) 3
Ed. 390. Advanced Seminar in Bilingual Education 1-3
Ed. 435X. Research Seminar in Applied Linguistics 2-4
Ling. 75/273. African American Vernacular English 4
Ling. 150. Introduction to Language in Society 6
Ling. 250. Sociolinguistic Theory and Analysis 4-6
Ling. 252. Language and Ethnicity 4

COURSES

201. The Learning and Teaching of Second Languages—The teaching of second languages from a learning perspective, eschewing the traditional sense of "teaching methods." Focus is on instructional decision-making within the context of the students’ intellectual and linguistic development. Language instructors are prepared to teach languages in a variety of university settings to an array of populations. Some general reading in second language acquisition (SLA) and language-specific reading within the database in SLA.

3-5 units, Spr (Bernhardt)

2-4 units, Spr (Staff)

204. Issues and Methods in the Teaching of Heritage Languages—(Same as Spanish 300.) Focus is on the teaching of Spanish as a heritage language to students raised in Spanish-speaking homes. The fundamental issues relating to the language abilities of heritage students, including aspects of language variation in the Spanish-speaking world, characteristics of English/Spanish bilingualism in the U.S., and the process of second dialect acquisition. Emphasis is on the methods and techniques for developing the academic Spanish language skills of heritage-background students in a classroom setting.

3-5 units, Aut (Valdés)

AFRICAN AND MIDDLE EASTERN LANGUAGES

AFRICAN LANGUAGES

100A,B,C. Beginning Amharic
100A. 3 units, Aut (Staff)
100B. 3 units, Win (Staff)
100C. 3 units, Spr (Staff)

102A,B,C. Beginning Hausa
102A. 3 units, Aut (Staff)
102B. 3 units, Win (Staff)
102C. 3 units, Spr (Staff)

106A,B,C. Beginning Swahili—Successful completion of 106C may fulfill the foreign language requirement.
106A. 4 units, Aut (Staff)
106B. 4 units, Win (Staff)
106C. 4 units, Spr (Staff)

107A,B,C. Intermediate Swahili
107A. 4 units, Aut (Staff)
107B. 4 units, Win (Staff)
107C. 4 units, Spr (Staff)

108A,B,C. Advanced Swahili
108A. 4 units, Aut (Staff)
108B. 4 units, Win (Staff)
108C. 4 units, Spr (Staff)

111A,B,C. Beginning Chichewa
111A. 3 units, Aut (Staff)
111B. 3 units, Win (Staff)
111C. 3 units, Spr (Staff)

133A,B,C. The African Evening Forum
133A. 1-4 units, Aut (Staff)
133B. 1-4 units, Win (Staff)
133C. 1-4 units, Spr (Staff)

MIDDLE EASTERN LANGUAGES

120A,B,C. Beginning Arabic—Successful completion of 120C may fulfill the foreign language requirement.
120A. 4 units, Aut (Barhoum)
120B. 4 units, Win (Barhoum)
120C. 4 units, Spr (Barhoum)

121A,B,C. Intermediate Arabic
121A. 4 units, Aut (Salti)
121B. 4 units, Win (Salti)
121C. 4 units, Spr (Salti)

122A,B,C. Advanced Arabic
122A. 4 units, Aut (Salti)
122B. 4 units, Win (Salti)
122C. 4 units, Spr (Salti)

125A,C,D. Topics in Arabic Literature and Culture—Examines several literary and cultural facets of the Arab world not usually dealt with in other courses at Stanford. May be taken independently. Readings in discussion in English.

125A. The Contemporary Arab World and Culture through Literature—Introduces the Arab world through a survey of different literary genres (i.e., poetry, novels, short stories), providing a glimpse of contemporary Arab society and culture. Readings are from prominent male and female authors, dealing with dominant cultural topics (nationalism, religion, gender and women issues, kinship and social concepts, etc.). Texts delineate the cultural uniqueness of the Arab world, including major works by Neguib Mahfouz, Nawal El-Saadawi, Ghassan Kanafani, Tanyaeb Salih, Etef Aladn and representative samples of poetry and short stories spanning the Arab world. GER: 3a,4 (DR: 2 or 7)

4 units, Aut (Barhoum)

125C. Contemporary Arab Women Writers and Issues—Selections of fiction and non-fiction works by prominent Arab women writers, with discussion and analysis of the main cultural factors contributing to the shaping of their dominant feminist conceptions and attitudes. Readings: Fatima Mernissi’s Dreams of Trespass; Nawal Saadawi’s God Dies by the Nile; Etef Adan’s Sit Marie Rose; Hanan Al-Shaykh’s The Story of Zara, Alifa Rifaat’s Distant View of Minaret. Alternates with 625B. GER: 3a,4c (DR: 7f)

4 units, Win (Barhoum)

125D. The Arab World through Travel Literature—Early colonialist and postcolonialist portrayals of Arab culture in the West and recent critical examinations of such stereotypical depictions of Arab and Islam. Readings: Gustave Flaubert’s Flaubert in Egypt; Jonathan...
Raban’s Arabia through the Looking Glass; Elizabeth Fernea’s Guests of the Sheik; Lady Mary Wortley Montagu’s Letters; Lawrence Durrell’s The Alexandria Quartet; Edward Said’s Covering Islam and the Introduction to Orientalism; Jack Shaheen’s The T.V. Arab; Maxime Rodinson’s Europe and the Mystique of Islam; Geraldine Brooks’ Nine Parts of Desire; Eric Hansen’s Motoring with Mohammed.

128 A, 4 units, Spr (Barhoum)

128 A. 4 units, Aut (Berman)
128 B. 4 units, Win (Berman)
128 C. 4 units, Spr (Berman)

129 A, 4 units, Aut (Berman)
129 B. 4 units, Win (Berman)
129 C. 4 units, Spr (Berman)

130 A, B, C. Advanced/Conversational Hebrew
130 A. 4 units, Aut (Berman)
130 B. 4 units, Win (Berman)
130 C. 4 units, Spr (Berman)

141 A, B, C. Beginning Yiddish
141 A. 4 units, Aut (Staff)
141 B. 4 units, Win (Staff)
141 C. 4 units, Spr (Staff)

142 A, B, C. Intermediate Yiddish
142 A. 4 units, Aut (Staff)
142 B. 4 units, Win (Staff)
142 C. 4 units, Spr (Staff)

SPECIAL LANGUAGE PROGRAM

The Special Language Program (SLP) offers a number of foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for 1999-00 are listed below; however, not every course listed will be taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2000-2001 academic year should be made by Spring Quarter of this year at the Special Language Program office.

All beginning-level 3-unit courses are offered on a satisfactory/no credit basis only. Intermediate-level and 4-unit courses are offered with a grading option. No auditors. “Beginning” and “Intermediate” each refer to an academic year’s sequence of language study; the suffixes A, B, and C refer to first-, second-, and third-quarter of language instruction that year. Most 3-unit language courses are offered for a two-year, three-quarter sequence; however, a beginning or intermediate level might be offered on alternate years.

For further information consult the Special Language Program, Building 40, room 41B.

To request a language, apply via the web at http://www.stanford.edu/dept/SLP.

126 A, B, C. Beginning Turkish
126 A. 3 units, Aut (Ayanoglu)
126 B. 3 units, Win (Ayanoglu)
126 C. 3 units, Spr (Ayanoglu)

132 A, B, C. Beginning Tibetan
132 A. 3 units, Aut (Staff)
132 B. 3 units, Win (Staff)
132 C. 3 units, Spr (Staff)

140. Beginning Haitian/Creole
3 units, Spr (Staff)

144 A, B, C. Beginning Tagalog
144 A. 3 units, Aut (Gonzalez)
144 B. 3 units, Win (Gonzalez)
144 C. 3 units, Spr (Gonzalez)

146 A, B, C. Beginning Persian
146 A. 3 units, Aut (Fahimi)
146 B. 3 units, Win (Fahimi)
146 C. 3 units, Spr (Fahimi)

150 A, B, C. Beginning Vietnamese
150 A. 3 units, Aut (Ha)
150 B. 3 units, Win (Ha)
150 C. 3 units, Spr (Ha)

152 A, B, C. Beginning Hindi
152 A. 3 units, Aut (Singh)
152 B. 3 units, Win (Singh)
152 C. 3 units, Spr (Singh)

154 A, B, C. Beginning Gujarati
154 A. 3 units, Aut (Ranchod)
154 B. 3 units, Win (Ranchod)
154 C. 3 units, Spr (Ranchod)

156 A, B, C. Beginning Indonesian
156 A. 3 units, Aut (Burke)
156 B. 3 units, Win (Burke)
156 C. 3 units, Spr (Burke)

159 A, B, C. Beginning Punjabi
159 A. 3 units, Aut (Dhillon)
159 B. 3 units, Win (Dhillon)
159 C. 3 units, Spr (Dhillon)

162 A, B, C. Beginning Tamil
162 A. 3 units, Aut (Rangaraju)
162 B. 3 units, Win (Rangaraju)
162 C. 3 units, Spr (Rangaraju)

164 A, B, C. Beginning Czech
164 A. 3 units, Aut (Staff)
164 B. 3 units, Win (Staff)
164 C. 3 units, Spr (Staff)

167 A, B, C. Beginning Polish
167 A. 3 units, Aut (Staff)
167 B. 3 units, Win (Staff)
167 C. 3 units, Spr (Staff)

170 A, B, C. Beginning Modern Greek
170 A. 4 units, Aut (Prionas)
170 B. 4 units, Win (Prionas)
170 C. 4 units, Spr (Prionas)

171 A, B, C. Intermediate Modern Greek
171 A. 4 units, Aut (Prionas)
171 B. 4 units, Win (Prionas)
171 C. 4 units, Spr (Prionas)
173A,B,C. Beginning Hungarian
   173A. 3 units, Aut (Szabo)
   173B. 3 units, Win (Szabo)
   173C. 3 units, Spr (Szabo)

174A,B,C. Beginning Quechua
   174A. 3 units (Fajardo)
   174B. 3 units (Fajardo)
   174C. 3 units (Fajardo)

176A,B,C. Beginning Thai
   176A. 3 units, Aut (Staff)
   176B. 3 units, Win (Staff)
   176C. 3 units, Spr (Staff)

178A,B,C. Beginning Sign (ASL)
   178A. 4 units, Aut (Haas)
   178B. 4 units, Win (Haas)
   178C. 4 units, Spr (Haas)

179A,B,C. Intermediate Sign (ASL)
   179A. 3 units, Aut (Haas)
   179B. 3 units, Win (Haas)
   179C. 3 units, Spr (Haas)

199Q. Stanford Introductory Seminar: Literature and Culture of
   Modern Greece—Preference to sophomores. The focus is on modern
   Greece since its establishment as a nation. Discussion and analysis of
   literary works of prominent authors, films, and documents highlight
   issues related to Greek institutions, social structures, traditions, and
   culture. Emphasis is on topics of ethnicity, Greek heritage and national
   identity, kinship and gender issues, and migration patterns. GER:3a
   3-5 units, Aut (Pronas)

CENTER FOR LATIN AMERICAN STUDIES

Chair of the Committee and Director of the Center: Terry Karl
Associate Director: Kathleen B. Morrison
Visiting Professor: Torcuato Di Tella
Anthropological Sciences: Clifford Barnett, William Durham, James
Fox, John W. Rick
Biological Sciences: David Ackerly, Paul Ehrlich, Harold Mooney
Cultural and Social Anthropology: Akhil Gupta, Renato Rosaldo
Dance: Susan Cashion
Economics: Donald Harris, Anne Krueger
Education: Martin Carnoy, Kathleen Morrison, Amado Padilla
History: Stephen Haber, Herbert Klein, John D. Wirth
Law: School of: John Barton, Thomas Heller
Linguistics: Shirley B. Heath, John Rickford
Medicine, School of: Yvonne Maldonado, Julie Parsonnet, Gary
Schoolnik, Peter M. Small
Political Science: Terry Karl, Beatriz Magaloni, Robert Packenham
Spanish and Portuguese: Claire Fox, Mary Pratt, Richard Rosa, Jorge
Ruffinelli, Lucia De Sá, Guadalupe Valdés, Lyris Wiedemann

The Center for Latin American Studies coordinates the University’s
   teaching, research, and extracurricular activities related to Latin America.
   Field research, language training, and interdisciplinary approaches are
   stressed in the Latin American Studies program, which draws on the
   strength and diversity of its nationally recognized faculty affiliates and
   substantial library holdings on Latin America. These resources are enhanced
   by the Tinker Visiting Professorship in Latin American Studies

and the Nabuco Visiting Chair in Brazilian Studies, which bring distinguished Latin American academics to teach at Stanford each year. The center is a U.S. Department of Education Title VI National Resource Center for Latin American Studies.

The principal programs administered by the center (the bachelor’s degree, the honors certificate program, summer field research grants, master’s degree, and concurrent degrees with the schools of Business, Education, Law, and Medicine) are described below. For further information, contact the Center for Latin American Studies, Bolivar House, 582 Alvarado Row, Stanford University, Stanford, California 94305; 8545; phone (650) 723-4444. Consult the center’s Web site for updates on information including course offerings and public programs: www.leland.stanford.edu/group/las.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The A.B. in Latin American Studies (LAS) offers qualified undergraduates the opportunity to pursue an individualized, interdisciplinary study of Latin America, culminating in the preparation of a senior honors thesis written under the guidance of a faculty sponsor, or the completion of an approved service internship and the submission of a satisfactory report that meets program guidelines.

To declare a major in Latin American Studies, a student must apply to the center’s Subcommittee on Undergraduate Programs no later than the beginning of the second quarter of the junior year; exceptions are made only in unusual circumstances.

Requirements for the major include the following:

1. Sixty (60) units: no more than 5 units may be taken pass/no credit; at least 40 units must be taken at the 100-level or higher; no more than 20 units completed in overseas study may be applied to the 60-unit requirement. The 60 units must include:
   a) 10 units that provide a broad survey of Latin America, for example, LAS 80, 87; History 278; Economics 118; Political Science 113A, 114K, 117K; Spanish 160, 161; Overseas Studies (Santiago) 112X, 117X.
   b) 30 units devoted to one of the three core concentrations:
      1) Culture and Identity of Latin America
      2) Political Economy of Latin America
      3) Ecology, Environment, and Health in Latin America

The core concentration must include one course in theory and methods (see below), and at least one seminar or colloquium. Twenty units must be taken at the 100-level or higher. For example, students selecting the concentration on Culture and Identity might take Spanish 160; students selecting Political Economy might select Political Science 117K; students selecting Ecology, Environment, and Health might take LAS 195 or Anthropological Sciences 164. A complete list of courses and the core concentrations to which they may be applied is available at the LAS program office.
   c) 15 units at the 100-level or higher drawn from the two other core concentrations, with at least 5 units in each.
   d) 5 units in the interdisciplinary senior seminar (LAS 199).

2. Fulfillment of the foreign language requirement (see below). First-or second-year language courses may not be counted toward the 60-unit requirement.

3. Field experience (study abroad, internship, field research) in Latin America.

4. An honors thesis or service internship. Students may enroll in up to 15 units of credit work for the thesis or internship, of which no more than 5 units may be applied to the core concentration or breadth requirement. Prior to the end of the Spring Quarter of the junior year, students who wish to write an honors thesis must present a written proposal with faculty sponsorship to be approved by the Subcommittee on Undergraduate Programs. Only the completion of an honors thesis of substantial quality earns the degree designation of Honors in Latin American Studies. Service internships may be completed any time prior to the final quarter before graduation and require a substantial report written according to program guidelines and endorsed by the Subcommittee on Undergraduate Programs. Students
are strongly advised to seek prior approval for the internship from the LAS program office.

THEORY AND METHODS COURSES

The following courses may be used to satisfy the theory and methods requirement: (recommended for Culture and Identity) Art and Art History 1, Comparative Literature 101, Cultural and Social Anthropology 90, History 80, Spanish 140; (recommended for Political Economy; or Ecology, Environment, and Health) Economics 80, Political Science 35, Psychology 10, Sociology 180A, B; Statistics 60 or 190; (recommended for Ecology, Environment, and Health) Biological Sciences 141.

FOREIGN LANGUAGE REQUIREMENT

Acquisition of a language of Latin America is critical to an in-depth understanding of the region, both for advanced study and fieldwork and for future professional endeavors. The minimum requirement for completion of the degree or honors certification (see below) is three years of university-level language study, equivalent to advanced proficiency by ACTFL standards.

The foreign language requirement can be satisfied by any of the following: (1) completion of a foreign language class at the third-year level of university training; (2) completion of an upper division (100-level or higher) course taught in the foreign language; or (3) achievement of the Advanced Proficiency level on the ACTFL scale in a test administered by the Department of Spanish and Portuguese. Students entering with advanced proficiency in Spanish are encouraged to enroll in Portuguese for Spanish Speakers; alternatively, students may arrange to study an Amerindian language such as Quechua or Quiche Maya, or Haitian Creole. All students are expected to enhance their language proficiency as part of their program of study.

MINORS

The minor in Latin American Studies is offered for students in other majors who wish to develop a complementary concentration on the region. To pursue the minor, students must declare their intention no later than the second quarter of their junior year. Requirements for the minor include:

1. Completion of 25 units as follows: a 5-unit course surveying Latin America, for example, LAS 80 or an approved substitute; 20 additional units at the 100-level or higher which together comprise a coherent focus on a theoretical problem or issue of the region; for example, culture and identity, political economy, sustainable development. At least 10 of the total 25 units must be completed at Stanford.
2. Demonstration of proficiency in either Spanish or Portuguese, equivalent to the requirement for the major and honors certificate.
3. Field experience in Latin America (study abroad, summer research, internship, and so on) is recommended.

Upon satisfactory completion of all requirements, the center’s Subcommittee on Undergraduate Programs authorizes the designation of the Minor in Latin American Studies on the student’s transcript.

HONORS CERTIFICATION FOR MAJORS IN OTHER DEPARTMENTS OR PROGRAMS

As distinguished from the major in Latin American Studies, Honors Certification in Latin American Studies is intended to complement study in any conventional major. The aim of certification is to enable the student to pursue a foreign area focus through interdisciplinary coursework and individualized research on Latin America, culminating in the preparation of a senior honors thesis written under the guidance of a faculty sponsor.

The Honors Certification program is of particular interest to students who plan further disciplinary study or a career with an international or foreign-area focus. Students in the humanities, social sciences, or natural sciences may wish to enrich their studies by acquiring a first-hand understanding of a related aspect of Latin American life.

To pursue the Honors Certification program, students must apply to the Subcommittee on Undergraduate Programs no later than the Spring Quarter of the junior year with a written proposal with faculty sponsorship.

REQUIREMENTS

1. Completion of a coherent interdisciplinary program of at least 30 units, based on an individualized plan of study achieved in consultation with the student's adviser and approved by the center's Subcommittee on Undergraduate Programs. The curriculum ordinarily includes:
   a) At least one course (5 units) surveying Latin America comprehensively, whether historically from the perspective of a discipline, or in an explicitly interdisciplinary framework. Appropriate courses include, but are not limited to: LAS 80, 87; Economics 118; History 278; Political Science 113A, 117K; 160, 161; Overseas Studies (Santiago) 112X, 117X.
   b) At least four additional courses (20 units) in 100-level courses or higher, focusing directly on Latin America. First- or second-year language courses may not be counted toward the 25 units. Only 5 units of satisfactory/no-credit work may be counted toward the program.
   c) Five units in the interdisciplinary senior seminar.
2. Fulfillment of the Foreign Language Requirement (see above).
3. Field experience in Latin America (study abroad, summer research, internship, and so on).
4. Submission in the senior year of a research paper of acceptable quality on a topic pre-approved by the Subcommittee on Undergraduate Programs and written under the guidance of a faculty adviser. Up to 15 units may be given for preparation of the senior paper, but no more than 5 of these units may be counted toward the 20 units in "b." Prior to the end of the Spring Quarter of the junior year, students who wish to write an honors thesis must present for approval a written proposal with faculty sponsorship. Only the completion of an honors thesis of substantial quality earns the degree designation of Honors in Latin American Studies.

SUMMER FIELD RESEARCH

Each summer, the center awards research grants to a small number of undergraduates to conduct individual research projects in Latin America. Students must have demonstrated the ability to work independently and must possess the necessary language competence. Applications must include a research proposal that has been reviewed and endorsed by a faculty member who agrees to serve as sponsor. A pre-fieldwork course, Latin American Studies (LAS) 165, is required the Spring Quarter before departure. Students from all departments are eligible to apply.

GRADUATE PROGRAMS

MASTER OF ARTS

The M.A. in Latin American Studies is designed for students who wish to develop an advanced interdisciplinary area focus prior to the pursuit of: (1) a Ph.D. in one of the disciplines; (2) a professional degree, for example, J.D., M.B.A., M.D.; or (3) a career in business, government, international development, journalism, teaching, or another field in which advanced knowledge of the region is desirable.

Entering M.A. students are expected to possess language proficiency at the minimum of the university-intermediate level in either Spanish or Portuguese, to have completed a course surveying the history of the region as well as training in at least one of the social sciences, and to have field experience (study abroad, extended residence, internship) in Latin America. Applicants must also take the General Test of the Graduate Record Examination (GRE) and have the results sent to Graduate Admissions, Office of the Registrar. Candidates whose native language is not English and who have not studied in an English-speaking institution for at least one and one-half years must take the Test of English as a Foreign Language (TOEFL). The deadline for submission of applications for admission and financial aid is January 1. Admission is normally granted only beginning in Autumn Quarter.

The M.A. is normally completed in one academic year. A total of 45 units is required, distributed as follows:
1. Ten units offered in the Autumn and Winter Quarters as the A.M. core seminar (LAS 250 and 251).

2. Twenty units in one of the three core concentrations: Culture and Identity; Political Economy, or Ecology, Environment, and Health. All of the units must be at the 100-level or higher, with no fewer than 10 units at the 200-level or higher.

3. Fifteen units at the 100-level or higher, drawn from an approved list of courses outside the core concentration. No more than 5 of these 15 units may be devoted to individual directed research (LAS 269).

A minimum of 5 units of course work must be devoted to language study. These units must be taken for a letter grade. Students who already possess proficiency in Spanish are encouraged to pursue the study of Portuguese or a language indigenous to the region (for example, Quechua, Quiche Maya, Haitian Creole).

All A.M. students are expected to complete a non-credit workshop on bibliographic resources given early in the Autumn Quarter.

In addition, at the end of the Spring Quarter students must either: (1) pass a comprehensive written exam, or (2) submit an extended research paper of satisfactory quality. The research option requires approval early in the Winter Quarter, based on the submission of an advanced proposal with faculty sponsorship. No more than 10 of the 45 required units may be devoted to individual directed research (LAS 269), and no more than 5 units of LAS 269 may be applied to the 15-unit breadth requirement of item ‘3’ above.

Concurrent Degree Programs—The Center for Latin American Studies collaborates with the schools of Business (M.B.A.), Education (M.A.T.), Law (J.D.), and Medicine (M.D.) to allow students to simultaneously pursue concurrent degrees in LAS (A.M.) and the respective professional field. Students must apply to and be independently admitted to both degree programs. For additional information about specific plans of study and degree requirements, contact the Center for Latin American Studies.

Summer Field Research—The center awards summer research grants for continuing graduate students to conduct individual research projects in Latin America. A competition is held each Spring Quarter, and continuing graduate and professional school students in any field and at any level are eligible to apply. Applicants must provide evidence of appropriate language competence and have the sponsorship of a faculty member. For additional information, contact the Center for Latin American Studies.

DOCTOR OF PHILOSOPHY

Since the University does not offer a Ph.D. in Latin American Studies, students who wish to remain in an academic program at Stanford after completing their A.M. must be accepted by one of the departments offering a Ph.D. with an emphasis on Latin America.

COURSES

(WIM) indicates that the course meets the Writing in the Major requirements.

See the respective department section of this bulletin for cross-listed course descriptions.

80/170. Culture, Politics, and Society in Latin America—(Same as History 80.) Introduction to the political and social history of Latin America. Emphasis is on the interaction between institutional change, social structure, and political movements, emphasizing the environment and cultural values. GER:3b,4a (DR:2 or 9) (WIM)

5 units, Win (Wirth)

87Q. Stanford Introductory Seminar: Urbanization, Poverty, and Children in Latin America—Preference to sophomores. Regional issues through the study of street children in Latin America: rural-urban migration patterns, the informal economy and labor sector, human rights, ethnicity and identity, the costs of structural adjustment policies, environmental and other health hazards, the role of public and private institutions, and grassroots mobilization. Disciplinary perspectives on

the plight of street children include sociological and demographic profiles; psychological studies; depictions in literature, film, and popular culture; ethnographies; and economic analyses. Case studies of institutional responses. Enrollment limited to 10.

5 units, Win (Morrison)

117K. Global Politics of Human Rights—(Enroll in Political Science 117K.)

5 units, Win (Karl)

120. Chilean Studies: Modern Chilean Culture through Music, Film, and Literature 1945-1997—(Same as Spanish 168E.) Recommended for students planning to attend the Santiago program and open to all students. Introduction to the history, culture, politics, and literature of Chile, mainly in the 20th century.

3-5 units, Spr (Missana)

122A. The Maya—(Enroll in Anthropological Sciences 122.)

5 units, Win (Fox)

137A. Darwin, Evolution, and Galapagos—(Enroll in Anthropological Sciences 137.)

5 units, Win (Durham)

142. Incas and their Ancestors: Peruvian Archaeology—(Enroll in Anthropological Sciences 142.)

5 units, Spr (Rick)

161. Conservation and Community Development Issues in the Amazon—(Enroll in Anthropological Sciences 161.)

5 units (Durham) not given 1999-2000

165A. Human Ecology of the Amazon—(Enroll in Anthropological Sciences 165.)

5 units, Win (Lu)

165. Introduction to the Design and Methodology of Interdisciplinary Field Research—Preparation for summer fieldwork in Latin America or other regions. Issues of interdisciplinary research design and methodology; the relationship between evidence and argument; practicalities of field research in developing countries; ethical and political considerations.

5 units, Spr (Staff)

169/269. Directed Individual Study—(Graduate students register for 269.) For students engaged in special interdisciplinary work that cannot be arranged by department.

1-5 units, Aut, Win, Spr (Staff)

181. Undergraduate Colloquium: Slavery and Race Relations in the Americas—(Enroll in History 283A.)

5 units (Klein) not given 1999-2000

181/281. Political Systems of Argentina, Brazil, and Chile—Similarities and contrasts between the class structures, populist experiences, dictatorial periods, and emerging party systems. Recommended: some previous knowledge of these countries.

5 units, Spr (Di Tella)

192. The Information Revolution in Latin America—Obstacles and Opportunities through the Internet—Multiple disciplines are used to analyze the opportunities and obstacles that the Information Revolution presents for newly developing countries in Latin America. Students develop the framework and tool set for formulating, evaluating, and recommending possible policy changes and courses of action through country case studies. Topics: internet infrastructure issues; technology transfer, human capital formation, and capacity-building; challenges of access and opportunity; government policy and the role of the private sector.
sector; strategies for enterprise development. Mandatory weekly section. 
Limited enrollment.
5 units, Aut (Staff)

194. Latin American Philosophy—(Enroll in Philosophy 194V.)
4 units, Spr (Vargas)

195. Perspectives on Sustainable Development in Latin America—
Cross-disciplinary examination of perspectives for “sustainable develop-
ment” in rural areas of Latin America. Interactions between poverty,
development, environmental degradation, and approaches to growth and
sustainability in agroecology, agroforestry, small farm development,
and conservation biology. Limited enrollment.
5 units, Win (Rosset)

198. Senior Thesis—Restricted to undergraduate majors and those
writing the honors thesis in Latin American Studies.
1-10 units, Aut, Win, Spr (Staff)

199. Senior Seminar in Latin American Studies—Required for senior
majors in LAS and open to seniors writing honors theses related to Latin
America.
5 units, Win (Morrison)

221K. Seminar: Comparative Democratization—Latin American and
other Regions—(Enroll in Political Science 221K.)
5 units, Aut (Karl)

250. Graduate Core Seminar in Latin American Studies: Discourses
of Race and Identity in Latin America—Restricted to A.M. degree
students, or consent of instructor. A historical approach to the debate on
race and identity in Latin America. Analysis of the works of Sarmiento,
DaCunha, Marti, Rodo, Vasconcelos, Mariategui, Freyre, Paz, Menchu,
and Ferre.
5 units, Aut (Sid)

251. Graduate Core Seminar in Latin American Studies: Society and
Politics in Latin America—Restricted to A.M. degree students, or
consent of instructor. Analysis of social structures and political systems
in the main Latin American countries. Review and interpretation of
events since the 1920s provides the basis for comparative conclusions.
5 units, Win (Di Tella)

306B. Design and Methodology for International Field Research—
(Enroll in History 306B.) Preparation for area studies field research.
Collaborative project of centers for African, East Asian, Latin American,
and Russian and East European Studies.
1 unit, Win (Kollman)

AFFILIATED DEPARTMENT OFFERINGS

The courses listed below by department deal primarily with Latin
America. See the respective department listings for course descriptions
and General Education Requirement (GER) information. Additional
relevant courses by resident or visiting faculty may be offered; for up-
dated information, consult the quarterly Time Schedule or contact the
Center for Latin American Studies for a list of approved courses and their
respective core concentration areas.

ANTHROPOLOGICAL SCIENCES

3. Introduction to Prehistoric Archaeology
3-5 units, Aut (Rick)

23N. Stanford Introductory Seminar: Maya Mythology Multimedia
Project
3 units (Fox) not given 1999-2000

111. Language and Prehistory
5 units, Spr (Fox)

123. Environmental Issues in the Americas
5 units (Staff) not given 1999-2000

141. Hunter-Gatherers in Archeological Perspective
5 units (Rick) not given 1999-2000

158. Theories in Demography
4 units, Win (Wilson)

162. Indigenous Peoples and Environmental Problems
3-5 units (Durham, Charnley) not given 1999-2000

163. Community-Based Conservation
5 units (Charnley) not given 1999-2000

164. Ecological Anthropology
5 units, Spr (Durham, Charnley)

167. Social Policy for Sustainable Resource Use
5 units, Win (Irvine)

168. Ecology and Equity
5 units, Win (Guha)

170. Medical Anthropology
5 units, Aut (Barnett)

203. Theory and Method in Cultural Evolution
5 units (Durham) not given 1999-2000

208. Models and Imaging in Anthropological Computing
3 units, any quarter (Rick)

250. Advanced Ecological Anthropology
5 units (Staff) not given 1999-2000

251. Anthropological Solutions to Environmental Problems
5 units (Staff) not given 1999-2000

252. Political Ecology
5 units (Durham) not given 1999-2000

266. Human Evolutionary Ecology
5 units, Spr (La)

267. Social Policy for Sustainable Resource Use
5 units, Win (Irvine)

269. Research Methods in Ecological Anthropology
5 units (Staff) not given 1999-2000

270. Advanced Medical Anthropology
5 units, Win (Barnett)

COMMUNICATION

133/233. Communication and Culture
4 units, Win (Bar)

155/255. Interethnic Communication
4 units (Leets) not given 1999-2000

166/266. Communication Policy in Comparative Perspectives
4 units, Win (Bar)

176. International Communication
4 units (Staff) not given 1999-2000

Latin American Cultural Theory: A Historical Perspective  
3-5 units (Sd)

Gabriel García Márquez and Magical Realism  
3-5 units, Win (Ruffinelli)

Latin American Fiction of the 1990s  
5 units, Aut (Pratt)

Latin American Short Story: Theory and Practice  
3-5 units (Ruffinelli)

Third Cinema and After  
3-5 units (Fox)

A Latin American Woman Voice: Clarice Lispector  
3-5 units, Win (Sd)

OVERSEAS STUDIES  
These courses are approved for the Latin American Studies major as taught at the campus indicated. Students should discuss with their major advisers which courses would best meet their educational needs. Course descriptions can be found in the "Overseas Studies" section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

PUEBLA  
104X. Cholula: The Working of a Sacred City  
5 units, Win (Knab)

105X. Mexico: Explaining Change in an Era of Globalization  
5 units, Win (Morales)

113X. Economics of Emerging Financial Markets—(Same as Overseas Studies 112X.)  
5 units, Win (Castañeda)

114X. Development Macroeconomics: The Mexican Case  
5 units, Win (Cárdenas)

SANTIAGO  
118X. Cultural Modernization: The Case of Chile  
5 units, Win (Fuenzalida)

120X. Modernization and Culture in Latin America  
5 units, Aut, Spr (Subercaseaux)

121X. Social Heterogeneity in Latin America—(Same as Overseas Studies 111.)  
5 units, Aut (Valdés)

122X. Man-Environment Interactions: Case Studies from Central Chile—(Same as Overseas Studies 106H.)  
5 units, Aut (Hajek)

129X. Latin America in the International System  
4-5 units, Win (Rojas)

130X. Latin American Economies in Transition  
5 units, Aut (Muñoz)

162X. Core Seminar: Ecology-Policy Studies  
5 units, Win (Ffrench-Davis)

163X. Latin America in the International Economy  
5 units, Win (Ffrench-Davis)

LINGUISTICS  
Emeriti: (Professors) Clara N. Bush, Joseph H. Greenberg  
Chair: Stanley Peters  
Professors: Joan Bresnan, Eve V. Clark, Penelope Eckert, Shirley Bit-Heath, Martin Kay, Paul Kiparsky, William R. Leben, Beth Levin(leave), Stanley Peters, John R. Rickford, Ivan A. Sag, Elizabeth Traugott, Thomas A. Wasow  
Associate Professor: Peter Sells  
Assistant Professors: David Beaver, Edward Flemming, Christoph Manning  
Consulting Professor: John Baugh  
Senior Lecturers: Philip L. Hubbard, Beverley J. McChesney  
Acting Assistant Professor: Michael Dukes  
Consulting Professors: Jerry Hobbs, Charlotte Linde, Geoffrey Nunberg  
Consulting Associate Professor: Jared Bernstein
Linguistics concerns itself with the fundamental questions of what language is and how it is related to the other human faculties. In answering these questions, linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is unique in languages, what is universal, how language is acquired, and how it changes. Linguistics is, therefore, one of the cognitive sciences; it provides a link between the humanities and the social sciences, as well as education and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels in the areas central to linguistic theory and analysis. Many of them deal with the analysis of structural patterns in the different components that make up language, including sounds (phonetics and phonology), meanings (semantics), words (morphology), sentences (syntax), and the way they change. Other courses integrate the analysis of linguistic structure with phenomena that directly concern other disciplines. These include courses in computational linguistics, language acquisition, the philosophy of language, and sociolinguistics.

A variety of open forums provide for the discussion of linguistic issues, including colloquia and regularly scheduled workshops in child language, phonology, semantics, sociolinguistics, and syntax. Faculty and visiting scholars in the Cognitive Science Group and the Center for the Study of Language and Information, whose members are linguists, philosophers, psychologists, and computer scientists, participate extensively in the activities of the department.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; in addition, the major draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities, social, and physical sciences, and provides a solid general education as a background for advanced studies in such disciplines as anthropology, communication, computer science, education (language, literacy, and culture), hearing and speech sciences, languages, law, linguistics, philosophy, and psychology.

REQUIREMENTS

Requirements for the A.B. include at least 50 units of course work in linguistics and related fields (typically twelve courses plus Linguistics 197, Linguistics Seminar), and a short research paper. No more than twelve of the 50 units may be below 100-level. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis.

Core Courses—The core courses are:

110. Introduction to Phonetics and Phonology
120. Introduction to Syntax
130. Introduction to Linguistic Meaning
150. Language in Society, which fulfills the writing requirement (WIM)
160. Introduction to Language Change, or, in consultation with their adviser, a course in historical linguistics or the history of a language

All majors must complete at least four core courses, including 150, Language and Society, which fulfills the writing requirement (WIM).

Other Courses—Other courses counting toward the unit requirement should form a coherent program and be approved by an adviser. Students select emphases from among the areas of concentration listed below (or design one in consultation with their adviser). Students should consult with an adviser when declaring the major, and maintain regular contact during the remainder of their Stanford career.

Of the 50 units for the major, at least 16 come from the core courses. If only four core courses are taken, Linguistics 1, Introduction to Linguistics, is required for breadth. Students must also take:

1. At least two 200-level Linguistics courses.
2. Linguistics 197, preferably in the junior year. This course is offered each year for 2 units and may be repeated. The goal is to provide a forum for students to work on a small project that helps define a focus for their linguistic studies at Stanford.

Language Requirement—Majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This is usually demonstrated by the completion of six quarters of language study at Stanford or equivalent (level of proficiency is determined by the Language Center or the relevant language department).

Research Paper—Students complete a short (10-15 page) primary research paper with a grade of 'B' or better by the end of their junior year (special arrangements can be made for transfer students and others who start the major late). The research paper requirement may be fulfilled in one of the following three ways:

1. Completion of a research paper project in a Linguistics course (for example, 110, Phonetics and Phonology; 124, Introduction to Formal Universal Grammar; 137, Symbolic Systems Seminar; 150, Language in Society; 182, Introduction to Typology) subject to approval of the instructor.
2. Expansion of the pilot research project in a Linguistics course (for example, 140, Language Acquisition; or 197, Linguistics Seminar) into a research paper. Typically, students sign up for 1 additional unit of 199, Independent Study, with a faculty adviser.
3. Writing a paper in the context of a 2-unit independent research course (199, Independent Study).

AREAS OF CONCENTRATION

Students select one of the following areas of concentration or develop one themselves. All areas of concentration should be designed in advance in consultation with an undergraduate adviser in Linguistics. See the department’s web pages for details.

General Linguistics (all five core courses required)
Language and Society
Language Specialization
Language Structures

MINORS

Requirements for the minor include at least 28 units of course work (typically seven courses) in linguistics and related fields. The minor consists of:

1. Linguistics 1, Introduction to Linguistics
2. Two out of the following five Linguistics core courses:
   110. Introduction to Phonetics and Phonology
   120. Introduction to Syntax
   130. Introduction to Linguistic Meaning
   150. Language in Society
   160. Introduction to Language Change (or, in consultation with their adviser, a course in historical linguistics or the history of a language)
3. At least four other courses. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.

Students should work out a coherent program in advance in consultation with a Linguistics undergraduate adviser who should ascertain that the courses chosen are offered during the time of anticipated enrollment. The courses counting toward the minor must be incremental units beyond
those needed to satisfy the major. They should form a coherent program, and are subject to approval by the Linguistics Undergraduate Studies Committee.

HONORS PROGRAM

Students who wish to undertake a more intensive program of study, including independent research, should seek departmental honors. An application to pursue honors work should be presented to a Linguistics undergraduate adviser before the end of the junior year. Approval is given only to students who have maintained a grade point average (GPA) of 'B+' or better in the courses required for the major.

Honors students take a total of 60 units. These must include the 50 units for the major, 10 additional units, and an honors thesis based on research conducted with a principal adviser who must be a member of the Linguistics faculty, and a secondary faculty adviser, who may, with the approval of the Undergraduate Studies Committee, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in Linguistics 199, Independent Study, to work closely with one of the advisers on the research project. In Winter and Spring Quarters, honors students register in 198, Honors Research, with the principal adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

COTERMINAL A.M.

The Department of Linguistics admits a very limited number of undergraduates to work for their coterminal degree in Linguistics. Students are required to submit to the department a complete application, which includes a statement of purpose, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree rest with the Graduate Admissions Committee of the Department of Linguistics. For further application information and criteria, see the department’s web pages.

GRADUATE PROGRAMS

MASTER OF ARTS

The University’s basic requirements for the master’s degree are discussed in the “Graduate Degrees” section of this bulletin. The following are additional departmental requirements. Candidates should review the department’s “Guidelines for the A.M. and Ph.D. Degrees” for further particulars concerning these requirements.

1. Courses: candidates must complete a minimum of 40 units of graduate work in linguistics, including at least four courses in the student’s area of specialization. No more than two courses should be at the 100 level.

Individual programs should be worked out in advance with an adviser who should ascertain that the necessary courses in the area of specialization are offered over the course of the year of anticipated enrollment. The overall grade point average (GPA) must be at least ‘B’ for all degree program course work.

2. Language: reading knowledge of a non-native language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language or in-depth research on the structure of a non-native language.

3. Thesis or Thesis Project: a research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of Linguistics 398, Directed Research).

DOCTOR OF PHILOSOPHY

The following requirements are in addition to the basic University requirements for the degree sought; see the “Graduate Degrees” section of this bulletin. Candidates should review the department’s “Guidelines for the A.M. and Ph.D. Degrees” for further particulars concerning these requirements.

1. Language: candidates must demonstrate the ability to read at least one foreign language in which a substantial linguistic literature is written, with sufficient facility to understand and to interpret linguistic research published in that language. (Particular areas of specialization may require additional research languages.)

In addition, each candidate must demonstrate an explicit in-depth knowledge of the structure of at least one language (normally neither the candidate’s native language nor the language used for the required exam). This requirement is fulfilled by writing an original research paper on a language.

2. Courses: a minimum of 80 units of graduate work beyond the A.M. or B.S. exclusive of dissertation units or, beyond the A.M., 40 units exclusive of dissertation units. A basic course requirement details in the Ph.D. guidelines guarantees that each student covers a sufficient set of subareas within the field.

Candidates must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 'B,' and all of the "basic" courses should be completed with at least a 'B.'

3. Research: the prospective Ph.D. candidate is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of the Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end of Spring Quarter of the second year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by 395A, Research Workshop (2 units each), and oral discussion with a committee of at least three faculty members selected by the student at the faculty.

4. Candidacy: students must complete the basic course requirement (see item 2 above), one foreign language requirement (see item 1 above), and one qualifying paper (see item 3 above) by the end of their second year.

5. Teaching: at least three quarters serving as teaching assistant in linguistics course; students on University fellowships teach four quarters.

6. Colloquia: two oral presentations exclusive of the oral presentation of the dissertation proposal (see item 7 below). This requirement is satisfied by class presentations, conference papers, or colloquium talks. Normally, both should be given during the first three years of study.

b) Oral presentation of the dissertation proposal, preferably at colloquium.

c) Approval of the dissertation topic and appointment of dissertation committee.

d) Successful passing of a University oral examination on the dissertation and related areas.

e) Dissertation (up to 15 units of 399).

Ph.D. MINOR

1. Courses: the candidate must complete 30 units of course work in linguistics at the 100 level or above, including 110, 120, and 130 (10 level courses are waived if 200-level courses in the same area are taken), and at least three courses related to the area of specialization.

Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student’s Ph.D. minor adviser in Linguistics.

2. Research Project (optional): the candidate may elect to present a paper, which integrates the subject matter of linguistics into the field of specialization of the candidate.

3. The linguistics adviser or designee serves on the candidate’s University oral examination committee and may request that up to one-third of the examination be devoted to the minor subject.
Linguistics involves the study of language, the processes of language acquisition and change, and the structure and meaning of language. Courses in this field are designed to provide students with a deep understanding of language as a cognitive and social instrument. Topics include the sound patterns of a language, the structure of words and sentences, and the analysis of meaning. The course offerings are divided into various categories, including General Linguistics, Phonetics, Phonology, and Morphology, and Syntax, Semantics, and Pragmatics; Mathematical and Computational Linguistics.

1. Introduction to Linguistics

At all levels, the course numbering indicates a special area, as follows:
- 00-04 General
- 05-19 Phonetics, Phonology, and Morphology
- 20-39 Syntax, Semantics, and Pragmatics; Mathematical and Computational Linguistics
- 40-49 Language Acquisition and Psycholinguistics
- 50-59 Sociolinguistics
- 60-69 Language Change, Language, and Culture
- 70-84 Linguistic Analysis of a Language
- 85-94 Methods
- 95-99 Directed Work, Theses, Dissertations

1N. Stanford Introductory Seminar: Accents of English

Preferences to freshmen. The accents of English, focusing on the U.S. and other parts of the world. GER:3b (DR:9) 4 units, Win (Leben)

1Q. Stanford Introductory Seminar: Slips of the Tongue

Preferences to sophomores. Slips of the tongue and other types of linguistic mistakes, using collections of real-life errors as windows on how languages are structured and used. 3 units, Win (Zwicky)

30Q. Stanford Introductory Dialogue: Legal Language

Preference to sophomores. Why is legal language so different from ordinary English? Can it be simplified? How legal language became crystallized in the quest for precision, definition, and the goals of the profession. The various purposes and audiences of legal language in the courtroom and in documentation. The history of legal language in English. 2 units, Aut (Traugott)

35Q. Stanford Introductory Seminar: Computers and Human Language

Preferences to sophomores. Will computers use natural language to understand, communicate, or translate? Why is language processing difficult? How like a human must one be to understand human language? GER:2b (DR:6) 3 units, Win (Hubbard, Kay)

44N. Stanford Introductory Seminar: Living with Two Languages

Preferences to freshmen. The nature of bi- and multilingualism, with emphasis on the social and educational effects in the U.S. and worldwide, in individual vs. society, and in the child and the adult. The social, cognitive, psycholinguistic, and neurological consequences of bilingualism. Participation in planning and carrying out a survey of language use on campus to establish the language background, range of languages spoken, contexts of use, and general attitudes towards each language used. GER:3b (DR:9) 3 units, Spr (E. Clark)

62. History of English Language

(As English 102.) not given 1999-2000

64. Development of Englishes Around the World

The emergence of standard English in Britain in connection with the establishment of Caxton's printing press in the late 15th century. The transformation of English in the context of colonialism and postcolonialism, focusing on the United States, the Caribbean, South Asia, and Africa. The characteristics of these languages, their literary/expressive, social, and political uses. The nature of language mixture, and of the simplification and complication processes which resulted in new "pidgins" and "creoles." The future of international English. GER:3a (DR:7) 3-5 units, Spr (Traugott)

70. Structure of English Words

(Graduate students register for 270.) Analysis of vocabulary to determine word meanings. Goals: to increase vocabulary, and by discovering the principles behind changes in pronunciation and meaning, to take the mystery out of the processes that have made our vocabulary what it is today. (Optional practicum for 5 units.) GER:3a (DR:7) 4-5 units, Spr (Leben)

71. Language of Poetry

Introduction to the analysis of verbal art through English poetry. The poetic function of language. Versification: theories of rhythm and meter, normative prosody and its ideology. The grammar of parallelism. The semantics and pragmatics of figurative language. Tradition, innovation, and individual style. (Register for 5 units for additional research.) GER:3a (DR:7) 3-5 units, Win (Kiparsky)

72. The Language of Short Stories

(As English 105.) not given 1999-2000

73. African American Vernacular English

Survey of the English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands ("Gullah"), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin' and rappin'), and its educational implications. GER:3b,4b (DR:3 or 9) 3-5 units, Win (Rickford)

77. The Literary History of American English

(As English 103B.) The development of American English and ideas around "standard" and "literary," with emphasis on 19th- and early 20th-century writings. Various topics: American periodicals, dialect literature, folk-
85. Introduction to Teaching English as a Second Language—
Practical approach to teaching English to non-native speakers, focusing on a survey of the features of English which present particular difficulties. Preparation of lessons, practice answering questions, and tutoring of an individual learning to speak English.
3-4 units, Spr (McChesney)

86. Practicum in Teaching English as a Second Language—
Observation and participation in an English as a second language class on a regular basis. Weekly workshop in course planning. Prerequisite: 189, or concurrent enrollment in 85.
1-2 units, Spr (McChesney)

105. Phonetics—See 205. GER:2a (DR:5)
4 units, Aut (Flemming)

110. Introduction to Phonetics and Phonology—
Introduction to the study of sounds as part of language. Survey of sounds of the world’s languages; practice in producing and perceiving them. The theory of the sound patterns of languages, analysis of phonological data. GER:2a (DR:5)
4 units, Spr (Flemming)

120. Introduction to Syntax—
Analyses of various grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules. GER:3b (DR:9)
4 units, Aut (Sag, Wasow)

121. Intermediate Syntax—
Builds on the techniques for linguistic analysis and expression developed in 120. How different languages convey meaning through their syntactic structures and morphology, and the search for commonalities across different languages. Case studies focus on structures which are counterintuitive to speakers of English but, on closer examination, have parallels to structures in English. 4 units (Staff) not given 1999-2000

124. Lexical Functional Grammar—See 224.
4-6 units, Aut (Bresnan)

130. Introduction to Linguistic Meaning—
Linguistic meaning and its role in communication. Students learn how diagnostic tests can be used to categorize and separate various semantic phenomena (e.g., ambiguity and vagueness, entailment, and presupposition). How basic set theory and logic can be used to specify meanings and explain semantic phenomena. Pragmatic complications involving the assumptions and intentions of language users. For those who have not taken logic (e.g., Philosophy 159), an associated pass/fail 1-unit self-study lab is offered using Tarski’s World. Prerequisite: 120 or consent of instructor. GER:3b (DR:9)
4 units, Win (Beaver)

137. Symbolic Systems Seminar: Problems in Intelligence, Information, and Learning—
(Same as Education 120, Philosophy 200, Symbolic Systems 200.) Interdisciplinary topics in cognitive science (e.g., modularity, representation, reasoning, situated action, or creativity.)

Prerequisites: 120 or 130, Computer Science 109, Philosophy 80, Psychology 40, or consent of instructors.
3-4 units, Win (Greeen, Wasow)

138. Introduction to Computational Linguistics—See 238. GER:3. (DR:6)
4 units, Aut (Kay)

140. Language Acquisition I—See 240. GER:3b (DR:9)
4 units, Aut (E. Clark)

145. Language and Thought—(Enroll in Psychology 131.)
4 units, Aut (H. Clark)

146. Language and Gender—
Survey of the literature on how gender influences language use. Topics: differences in men’s and women’s speech styles, how these are acquired, how gender influences spoken and written language; the interaction of class and gender in language.
GER:3b,4c (DR:9)
4 units, Aut (Eckert)

150. Language in Society—
The ways in which language and society affect each other. Social dialects, class, ethnic, and gender differences in speech. Prestige and stigma associated with different ways of speaking the official English movement. Stylistic variation; how speakers adapt their language to different audiences and different social contexts. In addition, additional units, optional public service internship in an organization dealing with linguistic minorities or language-related issues (bilingual education or language rights), focusing on the field experience.
GER:3 (DR:9) (WIM)
4-5 units, Spr (Richford)

152. Introduction to Bilingualism—
Overview of empirical findings on the study of bilingualism, primarily from a sociolinguistic perspective. Survey of bilingual communities and issues surrounding societal bilingualism. Student project using primary data.
4 units, Aut (Morimoto)

160. Introduction to Language Change
not given 1999-2000

3 units, Win (Baugh)

182. Introduction to Linguistic Typology—
Introduction to universal and linguistic typology, with emphasis on classification based on semantic, syntactic, and morphological factors. Cross-linguistic analysis of grammatical systems, and general considerations in the typological descriptions of languages.
4 units, Spr (Sells)

187. Field Methods—See 287.
4 units, Win (Dukes)

189. Linguistics and the Teaching of English as a Second/Foreign Language—See 289. GER:3b (DR:9)
4-5 units, Win (Hubbard)

197. Linguistics Seminar—
Introduction to research goals and methods in linguistics and related disciplines. Provides a forum for student work on a small project that helps define a focus for their linguistic studies. Presentations, discussion, and final paper.
2 units, Win (Traugott)

198. Honors Research
I or more units, Win, Spr (Staff)

199. Independent Study
I or more units, any quarter (Staff)
200. Foundations of Linguistic Theory—Theories that have shaped 20th-century linguistics.
4 units (Staff) not given 1999-2000

201. Foundations of Linguistic Analysis—Primarily for graduate students. Introduction to the leading ideas of linguistic description and linguistic argumentation. The fundamental representational notions in phonology, syntax, and semantics, and the place of these notions in wider linguistic analysis.
4 units, Win (Flemming)

205. Phonetics—(Same as 105.) The study of speech sounds. How we produce them, how we perceive them, their acoustic properties. The influence of the production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or consent of instructor.
4 units, Aut (Flemming)

4 units, Win (Leben)

4 units (Staff) not given 1999-2000

207B. Morphosyntax—The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Universal properties and typology of morphological categories; proposals towards their principled explanation in a restrictive theory of language.
1-4 units, Win (Kiparsky)

207C. Morphology Seminar: Alternations in Stems, Affixes, and Shapes—Exploration of aspects of morphophonology that are "purely morphological." Unlike the phonology associated with inflection and derivation, these variants do not directly signal meaning, but serve as alternative versions of stems, affixes, or entire word-forms, suitable for different phonological, morphological, or syntactic contexts.
1-4 units, Aut (Zwicky)

208A. Phonology Seminar: Tone and Pitch Accent Systems—Study of the behavior of tone in the different types of tone language and of the question of where languages traditionally referred to as pitch accent belong in the typology of tonal systems. Prerequisite: 206.
1-4 units, Aut (Leben)

208B. Phonology Seminar—Selected topics in phonological theory.
1-4 units, Win (Flemming)

208C. Phonology Seminar—Selected topics in phonological theory.
1-4 units, Spr (Kiparsky)

220A. Cross-Linguistic Syntax I—The types of critical phenomena found in diverse syntactic systems and their implications for syntactic theory. Emphasis is on cross-linguistic diversity, typological variation, and their relation to general theoretical issues.
4 units, Aut (Sells)

220B. Cross-Linguistic Syntax II—The types of critical phenomena found in diverse syntactic systems and their implications for syntactic theory. Emphasis is on cross-linguistic diversity, typological variation, and their relation to general theoretical issues.
4 units, Win (Sells)

209C. Themes in Generative Syntax—Examination of a theme relevant to current issues in syntax, e.g., mathematical foundations, historical antecedents, or methodologies of data collection.
1-4 units (Staff) not given 1999-2000

221A. Introduction to Head-Driven Phrase Structure Grammar—Systematic introduction to Head-Driven Phrase Structure Grammar (HPSG), a constraint-based and lexicalist approach to grammatical theory. Topics: lexical and phrasal organization in terms of type hierarchies and constraint inheritance, the analysis of complementation, the English auxiliary system, extraction dependencies, cross-dialect and cross-linguistic variation, and the syntax-semantics interface. Problems are selected from a variety of languages.
4 units, Win (Sag)

221B. Advanced Topics in Head-Driven Phrase Structure Grammar—Current research on grammatical theory within HPSG and closely related frameworks.
4 units, Spr (Sag)

222A. Austronesian Syntax—Examination of empirical and theoretical issues in Polynesian syntax from a broadly lexicalist perspective. Focus is on the grammar of Tongan; the treatment of grammatical relations, ergativity, null pronouns and complex clauses in the language; comparative and typological issues arising from the analysis.
1-4 units, Spr (Dukes)

222B. Advanced Topics in Austronesian Syntax—Selected topics in Polynesian syntax from a broadly lexicalist perspective. Focus is on the grammar of Tongan; the treatment of grammatical relations, ergativity, null pronouns and complex clauses in the language; comparative and typological issues arising from the analysis.
1-4 units, Win (Dukes)

222C. Introduction to Optimality Theory Syntax—Optimality Theory (OT) as an appropriate framework for expressing universal principles and language-particular effects of prominence hierarchies in (morpho)syntax. Topics: universal and language-particular effects of prominence, generative and typological accounts of prominence-driven phenomena, further development of an OT-based account. Possible empirical domains: voice, case marking, word and morpheme ordering, freezing effects, and the expression and neutralization of morphosyntactic contrast. Goal: provide a context for the assessment of existing approaches to prominence-related phenomena, and for further progress in the development of an OT approach. Lectures/discussion of reading, and participant research. Offered jointly with Judith Aissen of UCSC.
1-4 units, Win (Bresnan)

222A. Optimality Theory Syntax—Optimality Theory (OT) as an appropriate framework for expressing universal principles and language-particular effects of prominence hierarchies in (morpho)syntax. Topics: universal and language-particular effects of prominence, generative and typological accounts of prominence-driven phenomena, further development of an OT-based account. Possible empirical domains: voice, case marking, word and morpheme ordering, freezing effects, and the expression and neutralization of morphosyntactic contrast. Goal: provide a context for the assessment of existing approaches to prominence-related phenomena, and for further progress in the development of an OT approach. Lectures/discussion of reading, and participant research. Offered jointly with Judith Aissen of UCSC.
1-4 units, Win (Bresnan)

2 units, Spr (Sells)

223B. Introduction to the Minimalist Program—The development of the Minimalist Program from Government-Binding Theory, and recent innovations in the approach. Prerequisite: knowledge of Government-Binding Theory.
2 units, Spr (Sells)

224. Lexical Functional Grammar—(Same as 124). Open to students with and without background in LFG. A formal model of universal grammar explaining radical crosslinguistic variation in syntactic structure. General issues: universal grammar design, lexical integrity, and modeling variation and analytic problems from a variety of natural languages. Advanced topics: lexical mapping theory, X' theory and nonconfigurationality, lexical integrity, and complex predicatives. Prerequisites: 120 and some familiarity with logic or other symbolic systems, or consent of instructor.
4-6 units, Aut (Bresnan)

225A. Austronesian Syntax—Examination of empirical and theoretical issues in Polynesian syntax from a broadly lexicalist perspective. Focus is on the grammar of Tongan; the treatment of grammatical relations, ergativity, null pronouns and complex clauses in the language; comparative and typological issues arising from the analysis.
1-4 units, Spr (Dukes)

225B. Austronesian Syntax II—Selected topics in Polynesian syntax from a broadly lexicalist perspective. Focus is on the grammar of Tongan; the treatment of grammatical relations, ergativity, null pronouns and complex clauses in the language; comparative and typological issues arising from the analysis.
1-4 units, Win (Dukes)

225A. Optimality Theory Syntax—Optimality Theory (OT) as an appropriate framework for expressing universal principles and language-particular effects of prominence hierarchies in (morpho)syntax. Topics: universal and language-particular effects of prominence, generative and typological accounts of prominence-driven phenomena, further development of an OT-based account. Possible empirical domains: voice, case marking, word and morpheme ordering, freezing effects, and the expression and neutralization of morphosyntactic contrast. Goal: provide a context for the assessment of existing approaches to prominence-related phenomena, and for further progress in the development of an OT approach. Lectures/discussion of reading, and participant research. Offered jointly with Judith Aissen of UCSC.
1-4 units, Win (Bresnan)
230A. Introduction to Semantics and Pragmatics—Introduction to meaning in natural language. Topics: elementary set theory; propositional logic, predicate logic, and lambda calculus together with their relation to semantic analysis; model theoretic characterizations of meaning and semantic properties of English conjunctions and determiners. Grice's theory of implicature, speech acts, Davidson's theories of "logical form," and Montague Grammar. Recommended: familiarity with elementary logic and set theory.
4 units, Win (Peters)

230B. Semantics and Pragmatics—Expands on 230A. Standard approaches to formal semantics (Montague Grammar, DRT, and basic dynamic semantics). Analyses of selected semantic phenomena in these frameworks. Prerequisites: 230A, or combination of 130, and Philosophy 159 and 160.
1-4 units, Spr (Beaver)

230C. Topics in Semantics and Pragmatics—More advanced work on the semantic and pragmatic analysis of central phenomena of language: plurals, quantification, type shifting, tense and aspect, questions.
1-4 units, Aut (Peters)

233A. Presupposition—Introduces and compares all the major contemporary linguistic theories of presupposition, considering decisive linguistic examples. The wider ramifications for the semantics/pragmatics interface. Beaver's "Presupposition" in the Handbook of Logic and Language (1998) and his forthcoming publications are supplemented by original source readings. Prerequisite: 230B or consent of instructor.
1-4 units, Win (Beaver)

233B. Dynamic Semantics—Covers a variety of approaches to meaning, inspired by the fact that natural language statements change the hearer's state of knowledge. Discourse representation theory, file change semantics, dynamic predicate logic, and situation semantics. Singular anaphora in dynamic frameworks, generalized anaphora, E-type anaphora, reference quantification, contextually restricted quantification, presupposition and epistemic modality.
1-4 units, Win (Peters)

233C. Semantics Research Seminar—Advanced topics of current interest to students and instructor.
1-4 units, Spr (Beaver)

234. Introduction to Discourse Analysis—Discussion of the methods and models of varying approaches to language beyond the sentence. Topics: information packaging, topic, and focus; discourse markers; tense and aspect; their different uses in conversation and narrative; spoken and written discourse.
4 units, Win (Traugott)

235. Mathematical Linguistics—Introduction to structures and methods from mathematical logic which are useful in linguistic theories of the structure and meaning of natural languages. Prerequisite: Computer Science 154 or consent of instructor.
1-4 units, Aut (Peters)

237. Natural Language Processing—Develops an in-depth understanding of the algorithms available for the processing of linguistic information and the underlying computational properties of natural languages. Morphological, syntactic, and semantic processing from a linguistic and an algorithmic perspective. Focus is on modern quantitative techniques in NLP: using large corpora, statistical models in acquisition, representative systems. Prerequisites: 138/238 or Computer Science 121/221, and programming experience. Recommended: background in logic and probability.
4 units, Spr (Manning)

238. Introduction to Computational Linguistics—(Same as 138.) Introduction to the computational aspects of basic linguistic processes: morphology, syntax, and semantics. Grades are based on computer programs implementing key algorithms for parsing, generation, etc. Recommended: Prolog programming.
4 units, Aut (Kay)

239A. Topics in Computational Linguistics
1-4 units, Win (Kay)

240. Language Acquisition I—(Same as 140.) Survey of the present knowledge of processes of language acquisition from a linguistic point of view. Recent and past literature.
4 units, Aut (E. Clark)

241. Language Acquisition II: Lexicon and Syntax in Acquisition—Advanced topics in language acquisition.
1-4 units, Win (E. Clark)

246. Psycholinguistics—(Enroll in Psychology 214.)
1-3 units, Spr (H. Clark)

247. Ethnography of Communication—(Enroll in Cultural and Social Anthropology 167.)
4-5 units, Spr (Heath)

250. Sociolinguistic Theory and Analysis—The kinds of problems which sociolinguists deal with, including language acquisition, language contact, language contact, and language change. Emphasis is on what general linguistics might gain from the socio-linguistics approach to problems of linguistic theory and description, and linguistic change. Prerequisite: graduate standing in Linguistics or consent of instructor.
4-6 units (Staff) not given 1999-2000

251. Pidgin and Creole Sociolinguistics—Key issues in sociolinguistics and pidgin-creole studies, especially issues whose understanding is one field has been assisted by methods or advances in the other, including diglossia, the acts of identity model, the notion of speech community, variable rules, implicational scaling, and the scope of sociolinguistic competence.
4 units (Staff) not given 1999-2000

254. Style, Language, Ideology, and Culture—Interdisciplinary seminar addressing the intersection between linguistic and social theory. Grounded in emerging research on personal and group linguistic styles, explores the relation between these styles and linguistic, political, and social ideologies. Students have research interests grounded in linguistic, anthropological, or other social science perspectives. Ongoing discussions of major student research projects.
1-4 units, Aut (Rickford)
Win, Spr (Eckert)

258. Sociolinguistic Variation—Advanced introduction to the study of linguistic variation in time, space, and society. Theoretical issues related to social and linguistic constraints in variation, and issues and methods in the quantitative analysis of variation.
1-4 units, Spr (Eckert)

260A. Historical Phonology and Morphology—Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction.
4 units, Aut (Kiparsky)
266. Topics in Historical Linguistics: Grammaticalization—The kinds of issues that historical linguists address when studying grammaticalization, focusing on the theories and models currently being debated. The hypothesis of unidirectionality, the role of reanalysis in grammaticalization, differences between grammaticalization and lexicalization. 4 units, Spr (Traugott)

270. Structure of English Words—(Same as 70.) Analysis of vocabulary to determine word meanings. Goals: to increase vocabulary, and by discovering the principles behind changes in pronunciation and meaning, to take the mystery out of the processes that have made our vocabulary what it is today. Practicum required. 4-5 units, Spr (Leben)

273. African-American English in Educational Context—(Enroll in Education 275.) 3 units, Win (Baugh)

280. Structure of English Words—(Same as 70.) Analysis of vocabulary to determine word meanings. Goals: to increase vocabulary, and by discovering the principles behind changes in pronunciation and meaning, to take the mystery out of the processes that have made our vocabulary what it is today. Practicum required. 4-5 units, Spr (Leben)

281. Japanese Pragmatics—(Enroll in Asian Languages 281.) 4 units, Win (Matsumoto)

286. Sociolinguistic Field Methods—Overview of and practice in the principal methods of data collection in sociolinguistics, along with an assessment of their strengths and weaknesses. 4 units, Aut (Rickford)

287. Field Methods—(Same as 187.) Hands-on overview of methods by which linguists gather raw linguistic data about a language and begin the task of analyzing its structure. Working with a speaker of a language not previously studied by class participants, students attempt to develop a description of key aspects of the grammar of the language and examine methodologies for obtaining, storing, and manipulating data. 4 units, Win (Dukes)

289. Linguistics and the Teaching of English as a Second/Foreign Language—(Same as 189.) Methods and techniques for teaching languages, using ideas from modern linguistics and language acquisition theory. Focus is on teaching English, but the principles underlying methods and techniques discussed are applicable to teaching any language. 4.5 units, Win (Hubbard)

290. Introduction to Linguistics for Educational Researchers—(Enroll in Education 289.) 4 units, Aut (Baugh, Hakuta)

292. The History of Chinese—(Enroll in Asian Languages/Chinese 192/292.) 4 units (Sun) not given 1999-2000

395A, B. Research Workshop—Restricted to students in the doctoral program. Student presentations of research toward qualifying papers.

395A. 1-2 units, Spr (E. Clark)

395B. 1-2 units, Spr (Wasow)

397. Directed Reading 1-5 units, any quarter (Staff)

398. Directed Research—Research at predissertation level. 1-6 units, any quarter (Staff)

399. Dissertation Research 1-15 units, any quarter (Staff)

435A. Research Seminar in Applied Linguistics—(Enroll in Education 435X.) 1-4 units, Spr (Baugh)

ENGLISH AS A SECOND LANGUAGE (683-699)

These courses represent offerings for non-native speakers in Autumn, Winter, and Spring Quarters. Enrollment in one or more courses may be required of, or recommended to, current graduate students from other countries after they have taken the English screening examination. To enroll, students must come to the English for Foreign Students office the first day of each quarter.

During the Summer Session, courses in spoken and written English are offered. Two six-week intensive courses are also offered during the summer. Summer visitors must apply directly to the EFS program.

690A. Interacting in English—Strategies for effective interaction in academic settings. Emphasis is on functional language used in typical university settings, including active listening, asking questions, and contributing ideas and opinions. Activities include simulation and discussion, with feedback on pronunciation, grammar, and usage. 3 units, Au (Rylance, Staff)

690B. Academic Discussion—The refinement and practice of discussion skills, with attention to pronunciation, grammar, and appropriateness for specific tasks. Preparation for effective participation in the classroom and research group communication. Detailed feedback on pronunciation, grammar, and usage. Prerequisite: 690A or consent of instructor. 3 units, Au, Win, Spr (Rylance, Staff)

691. Oral Presentation—For advanced graduate students. Practice in academic presentation skills; strategy, design, organization, and use of visual aids. Focus is on improving fluency and delivery style, with videotaping for extensive feedback on language accuracy and usage. Prerequisite: 695 or consent of instructor. 3 units, Win, Spr (Rylance, Mawson, Staff)

692. Speaking and Teaching in English—For non-native speakers who must teach in English. Focus is on developing clarity, intelligibility, and effectiveness through weekly presentations simulating actual teaching assistant responsibilities. 1-3 units, Au, Spr (McChesney, Rylance, Staff)

693A. Listening Comprehension—Strategies for effective listening in an academic setting, focusing on identifying key ideas in lectures. Practice in understanding words and phrases commonly encountered in classroom settings. Work with computer-based exercises promotes comprehension of rapid, natural speech. 3 units, Au (Rylance, Staff)

693B. Listening and Communication—The development of listening strategies and vocabulary for understanding English in a variety of academic and non-academic contexts. Discussion and interpretation improve comprehension of communicative intent. Computer-based and video exercises plus an individual project. Prerequisite: 693A or consent of instructor. 3 units, Au, Win (Hubbard, Rylance)

694A. The Language of Interpersonal and Professional Relationships—For advanced graduate students. Analysis and practice of communicative intent in interpersonal relationships and in the mass media. Use of indirectness, assertiveness, humor. Prerequisite: 693A,B or consent of instructor. 3 units, Win (McChesney, Staff)
694B. Communication Strategies in Professional Life—For advanced graduate students. Task-based practice of language appropriate for professional settings such as consulting, startups, and related teamwork. Simulate the roles of manager, applicant, subordinate, and co-worker. Prerequisite: 693A, B or consent of instructor
3 units, Spr (McChesney)

695A. Pronunciation and Intonation—Recognition and practice of American English sounds, stress, and intonation patterns for greater comprehension and intelligibility. Analysis of problem areas. Assignments include audiotaping exercises for instructor’s feedback in conferences.
3 units, Aut, Win, Spr (Mawson, Staff)

695B. Advanced Pronunciation and Intonation—Continuation of 695A, focusing on American English sounds, stress, rhythm, and intonation patterns. Emphasis is on self-monitoring, integrated with short videotaped presentations. Biweekly tape assignments and tutorials. Prerequisite: 695A.
2 units, Win, Spr (Mawson)

698A. Writing Academic English—Prepares graduate students to write academic papers; emphasis is on fluency, organization, documentation, and appropriateness for specific writing tasks.
3 units, Aut, Win, Spr (McChesney, Rylander)

698B. Advanced Graduate Writing—For graduate students experienced in English writing and currently required to write for courses and research. Class meetings and frequent individual conferences. Prerequisite: 698A.
3 units, Aut, Win, Spr (Hubbard, Staff)

DIVISION OF LITERATURES, CULTURES, AND LANGUAGES

Chair of the Executive Committee: Seth Lerer
Executive Committee: Russell Berman (German Studies), Elizabeth Bernhardt (Language Center), Gregory Freidin (Slavic Languages and Literatures), Seth Lerer (Comparative Literature), Haun Saussy (Asian Languages), Jeffrey Schnapp (French and Italian), Yvonne Yarbo-Bejarano (Spanish and Portuguese).
Members at Large: Brigitte Cazelles (French and Italian), Lazar Fleishman (Slavic Languages and Literatures)

The Division of Literatures, Cultures, and Languages embraces six academic departments: Asian Languages and Literatures, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, Spanish and Portuguese, and the Language Center, which is charged with facilitating and overseeing all language instruction at Stanford. All the member departments of the division offer full-fledged academic programs leading to bachelor’s, master’s, and doctoral degrees. The division brings together scholars and instructors dedicated to the study of foreign literatures, cultures, and languages from humanistic and interdisciplinary perspectives. The departments in the division are distinguished by the quality, size, and diversity of their faculty, a wide variety of approaches to cultural tradition and expression, and the intense focus on the mastery of foreign languages. This wealth of academic resources, together with small classes and the emphasis on individual advising, creates a superior opportunity for students who wish to be introduced to or develop a deeper understanding of non-English speaking cultures.

The division’s member departments and the Language Center offer instruction at all levels, including introductory and general courses that do not require knowledge of a foreign language. The more advanced and specialized courses requiring skills in a foreign language are listed under the specific departments and programs. These introductory and general courses, among them many Stanford Introductory Seminars with preferences for freshmen and sophomores, are listed below. As indicated, they satisfy a variety of the undergraduate requirements and can serve as a basis for developing a minor or a major program in the member departments. For descriptions of the minor and major programs, see the sections under the individual departments.

COURSES

See the respective department listings for course descriptions and General Education Requirements (GER) information.

STANFORD INTRODUCTORY SEMINARS

PREFERENCE TO FRESHMEN

ASIAN LANGUAGES

71N. Stanford Introductory Seminar: Language and Gender in Japan—Myths and Reality
3 units, Spr (Matsumoto)

81N. Stanford Introductory Seminar: Writing and Writing System
3 units, Spr (Hare)

COMPARATIVE LITERATURE

25N. Stanford Introductory Seminar: Latin American Nobel Prize Winners
5 units, Spr (Pratt)

30N. Stanford Introductory Seminar: Opera and Literature
3-5 units, Aut (Lindbergh)

70N. Stanford Introductory Seminar: The Bible and World Culture
3 units, Spr (Parker)

80N. Stanford Introductory Seminar: The Science of Wars—Does Physics Get Closer to Reality than Poetry?
5 units, Aut (Rorty)

FRENCH AND ITALIAN

108N. Stanford Introductory Seminar: Female Saints—The Rhetoric of Religious Perfection
4 units, Aut (Cazelles)

GERMAN STUDIES

1N. Stanford Introductory Seminar: German Studies
5 units, Aut (Bernhardt)

120N. Stanford Introductory Seminar: Virtue and Terror—Kant, Rousseau, and the French Revolution
4 units, Spr (Strum)

123N. Stanford Introductory Seminar: The Brothers Grimm and their Fairy Tales
4 units, Spr (Robinson)

SLAVIC LANGUAGES AND LITERATURES

13N. Stanford Introductory Seminar: Russia, Russian, Russians
3-4 units, Spr (Schapbach)

SPANISH AND PORTUGUESE

111N. Stanford Introductory Seminar: Contemporary Spain—The Challenge of Change, from Fascism to Democracy (1939 to Present)
3 units, Aut (Haro)

113N. Stanford Introductory Seminar: Latin American Culture in the ’60s
3-5 units, Win (Ruffinelli)

115N. Stanford Introductory Seminar: Growing Up Bilingual—Introduction to the Study of Bilingualism in the U.S.
3-5 units, Spr (Valdés)
3-5 units, Win (Gómez)

130N. Stanford Introductory Seminar: Reading the Rain Forest Visions of the Amazon
3-5 units, Aut (Sá)

PREFERENCE TO SOPHOMORES

COMPARATIVE LITERATURE

3-5 units, Aut (Palumbo-Liu)

84Q. Stanford Introductory Dialogue: Shakespeare, Haying, Gender
3 units, Win (Parker)

115Q. Stanford Introductory Dialogue: Thinking in the Present—20th-Century European Philosophy
2 units, Win (Gumbrecht)

FRENCH AND ITALIAN

189Q. Stanford Introductory Seminar: Romance—Texts and Movies
4 units, Win (Gazelles)

190Q. Stanford Introductory Seminar: Parisian Cultures of the 19th and Early 20th Century
4 units, Win (Bertrand)

GERMAN STUDIES

126Q. Stanford Introductory Seminar: Reading German Literature—An Introduction
4 units, Aut (Herman)

SPECIAL LANGUAGE PROGRAM

199Q. Stanford Introductory Seminar: Literature and Culture of Modern Greece
3-5 units, Aut (Prionas)

TAUGHT IN ENGLISH

ASIAN LANGUAGES

92. Traditional East Asian Civilization: Japan
5 units, Win (Hare)

131/231. Chinese Poetry in Translation
4 units, Win (Egan)

132. Chinese Fiction and Drama in Translation
4 units, Win (J. Wang)

133A/233A. Introduction to Modern Chinese Literature
4 units, Spr (Sang)

137/237. Classical Japanese Fiction in Translation
4 units, Aut (Wallace)

138. Modern Japanese Literature in Translation
4 units, Win (A. Ueda)

FRENCH AND ITALIAN

166E. Women's Voices in Contemporary Italian Literature
4 units, Spr (Springer)

170E. Introduction to African Systems of Thought
3-5 units, Win (Mudimbe)

190E. The Decameron and the 1001 Nights
4-5 units, Aut (Mallette)
292A. Concord and Jena: The Coming of Romanticism to America
3-5 units, Spr (Mueller-Vollmer)

SLAVIC LANGUAGES AND LITERATURES

110. Russian “Crash” Course for Departing Students
1 unit, Spr (Schupbach)

142/242. Literature and Formation of State Mythology in Russia from Catherine II to Nicholas I
4 units, Win (Zorin)

145/245. The Age of Experiment (1820-1864)
3-4 units, Aut (Fleishman)

146/246. The Age of Transgression: Russian Literature from Turgeniev through Tolstoy
3-4 units, Win (Safran)

147/247. The Age of Revolution: Russian Literature and Culture since 1917
3-4 units, Spr (Fleishman)

151. Dostoievsky
4 units, Win (Frank)

155/255. Anton Chekhov and the Turn of the Century
3 units, Spr (Safran)

166/266. Russia on the Silver Screen: U.S., Western European and Emigre Cinema
4 units, Spr (Bulgakowa)

168/268. Documentary Film and Fiction in Russian and Western Cinema, 1920 to the Present
4 units, Aut (Bugalkowa)

170B/270B. Pushkin in the Romantic Context
4 units, Aut (Greenleaf)

221. Modernism and the Jewish Voices in Europe
4 units, Aut (Safran, Eshel)

SPANISH AND PORTUGUESE

130. Spanish and Cultural Perspectives
4 units, Spr (Haro)

131. Spanish American Cultural Perspectives
4 units, Aut (Schroeder)

132. Mexican and Chicano Cultural Perspectives
4 units, Aut (Pietro)

135. Caribbean Cultural Perspectives
4 units, Spr (Negrón, Johnson)

168E. Chilean Studies: Modern Chilean Culture through Music, Film, and Literature 1945-1997
3-5 units, Spr (Missana)

285E. Chicana Cultural Studies
3-5 units, Spr (Yarbrough-Bejarano)

308E. Scholarly Research and Writing: Workshop and Tutorial
3-5 units, Win (Pratt)

372E. A Latin American Woman Voice: Clarice Lispector
3-5 units, Win (Safran)

389E. Race and Sexuality
5 units, Win (Yarbrough-Bejarano)

SPECIAL LANGUAGE PROGRAM

125A. The Contemporary Arab World and Culture through Literature
4 units, Aut (Barhoum)

125C. Contemporary Arab Women Writers and Issues
4 units, Win (Barhoum)

125D. The Arab World through Travel Literature
4 units, Spr (Barhoum)

MATHEMATICAL AND COMPUTATIONAL SCIENCE

Chair: Bradley Efron
Committee in Charge: Takeshi Amemiya (Economics), Gunnar Carlson (Mathematics), Richard Cottle (Engineering-Economic System and Operations Research), Bradley Efron (Statistics), Gene Golub (Computer Science), George Papanicolaou (Mathematics), David Rogosa (Education), David Siegmund (Statistics), Leon Smith (Mathematics), Arthur F. Veinott Jr. (Engineering-Economic Systems and Operations Research)

Program Administrator: Helen Tombokopoulos

This interdepartmental, interschool undergraduate program is designed as a major for students interested in the mathematical and computational sciences, or in the use of mathematical ideas and analysis problems in the social or management sciences. It provides a core of mathematics basic to all of the mathematical sciences and an introduction to the concepts and techniques of automatic computation, optimization, decision-making, probabilistic modeling, and statistical inference. It also provides an opportunity for elective work in any of the mathematical science disciplines at Stanford.

The program utilizes the faculty and courses of the departments of Computer Science, Engineering-Economic Systems and Operations Research, Mathematics, and Statistics. It prepares students for graduate study or employment in the mathematical and computational sciences in those areas of applied mathematics which center around the use of high-speed computers and are concerned with the problems of the social and management sciences.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

The requirement for the bachelor's degree, beyond the University's basic requirements, is an approved course program of 76 to 80 units, distributed as follows:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Qtr. and Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics: 33-34 units</td>
<td></td>
</tr>
<tr>
<td>Math. 41, 42. Single Variable Calculus</td>
<td></td>
</tr>
<tr>
<td>or Math. 19</td>
<td></td>
</tr>
<tr>
<td>and Math. 20</td>
<td>A,W</td>
</tr>
<tr>
<td>and Math. 21</td>
<td>S</td>
</tr>
<tr>
<td>Math. 51. Linear Equations and Differential Calculus</td>
<td></td>
</tr>
<tr>
<td>Math. 52. Integral Calculus of Several Variables</td>
<td>W,S</td>
</tr>
<tr>
<td>or Math. 110. Applied Number Theory and Field Theory (WIM)</td>
<td>S</td>
</tr>
<tr>
<td>or Math. 120. Modern Algebra (WIM)</td>
<td>S</td>
</tr>
<tr>
<td>Math. 113. Linear Algebra and Matrix Theory</td>
<td>A,W</td>
</tr>
<tr>
<td>and Math. 104. Matrix Theory and Its Applications</td>
<td>W,S</td>
</tr>
<tr>
<td>Math. 130. Ordinary Differential Equations</td>
<td>A,W,S</td>
</tr>
<tr>
<td>or Math. 53. Ordinary Differential Equations with Linear Algebra</td>
<td>A,W,S</td>
</tr>
</tbody>
</table>

One of the following:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Qtr. and Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Comp. Sci. 137. Introduction to Scientific Computing</td>
<td>A,S</td>

</tr>
<tr>
<td>EES&amp;OR 251. Stochastic Decision Models</td>
<td>W 3</td>
</tr>
<tr>
<td>EES&amp;OR 273. Stochastic Models in Operations Research</td>
<td>S 3</td>
</tr>
</tbody>
</table>

## Statistics (11 units)

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stat. 200. Introduction to Statistical Inference</td>
<td>W 3</td>
</tr>
<tr>
<td>Stat. 201. Statistical Methods</td>
<td>A 3</td>
</tr>
<tr>
<td>or Stat. 203. Analysis of Variance</td>
<td>S 3</td>
</tr>
</tbody>
</table>

## Electives (9 units)

Three courses in mathematical and computational science, 100-level or above, and at least 3 units each. At least one must be chosen from the following:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Math. 106. Introduction to Theory of Functions of a Complex Variable</td>
<td>S 5</td>
</tr>
<tr>
<td>Math. 131. Partial Differential Equations I</td>
<td>W 5</td>
</tr>
<tr>
<td>Math. 132. Partial Differential Equations II</td>
<td>W 3</td>
</tr>
<tr>
<td>Stat. 217. Introduction to Stochastic Processes</td>
<td>W 3</td>
</tr>
</tbody>
</table>

For Computer Science (CS), suggested electives include those courses not taken under item 3 of the above Computer Science list and the following:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 108. Object Oriented Systems Design</td>
<td>A,W 4</td>
</tr>
<tr>
<td>CS 110. Introduction to Computer Systems and Assembly</td>
<td>A,W 4</td>
</tr>
<tr>
<td>Language Programming</td>
<td>S 4</td>
</tr>
<tr>
<td>CS 112. Computer Organization and Design</td>
<td>A,S 3</td>
</tr>
<tr>
<td>CS 140. Operating Systems</td>
<td>A,W 4</td>
</tr>
<tr>

With the adviser's approval, courses other than those offered by the sponsoring departments may be used to fulfill part of the elective requirement. These may be in economics, biology, electrical engineering, industrial engineering, medicine, and so on, that might be relevant to a mathematical sciences major, depending on the particular interest of the student.

1. At least three quarters before graduation, majors must file with their advisers a plan for completing degree requirements.
2. All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfactory/no credit only.
3. A course used to fulfill the requirements of one section of the program may not be applied toward the fulfillment of the requirements of another section.
4. The student must have a grade point average (GPA) of 'C' or better in all course work used to fulfill the major requirement.

## MINORS

The minor in Mathematical and Computational Science is intended to provide an experience of the four constituent areas: computer science (CS), mathematics, engineering-economic systems and operations research (EES&OR), and statistics. Four basic courses are required:

1. CS 106X. Programming Methodology and Abstractions
   or CS 106A.B. Programming Methodology
2. Math. 51. Linear Equations and Differential Calculus
   or Math. 103. Matrix Theory and its Applications
3. EES&OR 111. Introduction to Optimization
   or EES&OR 121. Introduction to Stochastic Modeling
   or Stat. 190. Statistics for Social Scientists

In addition to the above, the minor requires three courses (total) from the following, two of which must be in different departments:

- CS 106X. Programming Paradigms
- CS 137. Introduction to Scientific Computing
- CS 138. MATLAB and MAPLE for Science and Engineering Applications
- CS 154. Introduction to Automata and Complex Theory
- CS 260. Concrete Mathematics
- Elect. Engr. 261. The Fourier Transform and its Applications
- Econ. 160. Game Theory and Economic Applications (prereq. Econ 51)
- Econ. 171-172. Intermediate Econometrics II-III
- Econ. 181. Optimization and Economic Analysis
- EES&OR 211. Linear and Nonlinear Optimization/Programming
- EES&OR 212. Network and Integer Programming
- EES&OR 251. Stochastic Models
- EES&OR 273. Stochastic Models in Operations Research
- Math. 104. Matrix Theory and its Applications
- Math. 106. Introduction to Theory of Functions of a Complex Variable
- Math. 110. Applied Number Theory and Field Theory
- Math. 115. Fundamental Concepts of Analysis or Math. 171
- Math. 131. Partial Differential Equations I
- Math. 132. Partial Differential Equations II
- Math. 160A. First Order Logic
- Stat. 200. Introduction to Statistical Inference
- Stat. 201. Statistical Methods
- Stat. 203. Analysis of Variance
- Stat. 217. Introduction to Stochastic Processes

Other upper-division courses appropriate to the program major may be substituted with the permission of the program director. Undergraduate majors in the constituent programs cannot count courses in their own departments.

## HONORS PROGRAM

The honors program is designed to encourage a more intensive study of mathematical sciences than the Bachelor of Science program. In addition to meeting all requirements for the B.S. in Mathematical and Computational Science, the student must:

1. Maintain an average letter grade equivalent in mathematical sciences courses of at least a 3.4.
2. Complete at least 15 units in mathematical sciences in addition to the requirements for the major listed above. These courses should form a sustained effort in one area and constitute a program approved by the committee in charge of the Mathematical and Computational Science Program.
3. Include in the above 15 units at least one of the following:
   a) an approved higher-level graduate course
   b) participation in a small group seminar
   c) at least three units of directed reading

Students interested in doing honors work should consult with their advisers by the last quarter of the junior year to prepare a program of study for submission to the committee in charge for their approval. Honors work...
may be concentrated in a wide variety of fields outside of the Mathematical and Computational Science programs, for example, physics, biological sciences, medicine.

**COURSES**

**100. Mathematics of Sports**—(Spring Quarter 1999-2000, enroll in Statistics 50.) For freshmen only. The use of mathematics, statistics, and probability in the analysis of athletic performance, sports records, strategy, etc. Topics: mathematical analysis of the physical and biological aspects of human performance, the effects of variations in technique and equipment, the determination of optimal strategies, traditional sports statistics and the development of new statistics, calculation of probabilities of various outcomes, etc. Different sports are considered. Prerequisites: Mathematics 51. Corequisite: Statistics 116.

3 units (Cover) alternate years, not given 2000-01

**MATHEMATICS**

Emeriti: (Professors) Kai Lai Chung, Robert Finn, David Gilbarg, Samuel Karlin, Joseph Keller, Georg Kreisel, Harold Levine, Robert Osserman, Hans Samelson, Mary Sunseri

Chair: Leon Simon

Associate Professor: Amir Dembo

Assistant Professors: Julie Benson, Jeffrey Brock, David Carlton, Kai Cieliebak, Michael Hutchings, Kefeng Liu, Jonathan Mattingly, Gigliola Staffilani, Mu-Tao Wang

Courtesy Professor: Renata Kallosh

Lecturer: Helen Moore

The Department of Mathematics offers programs leading to the degree of Bachelor of Science, Master of Science, and Doctor of Philosophy in Mathematics and participates in the program leading to the B.S. in Mathematical and Computational Science. The department also participates in the M.S. and Ph.D. degree programs in Scientific Computing and Computational Mathematics.

**ADVANCED PLACEMENT FOR FRESHMEN**

Students of unusual ability in mathematics often take one or more semesters of college-equivalent courses in mathematics while they are still in high school. Under certain circumstances, it is possible for such students to secure both advanced placement and credit toward the bachelor's degree. A decision as to placement and credit is made by the department after consideration of the student’s performance on the Advanced Placement Examination in Mathematics (forms AB or BC) of the College Entrance Examination Board. This examination is only the one used for granting credit.

The department does not give its own advanced placement examination. Students may receive either 5 or 10 units of advanced placement credit, depending on their scores on the Advanced Placement Examination. Entering students who have credit for two quarters of single variable calculus (10 units) are encouraged to enroll in Mathematics 51-53 in multivariable mathematics, or the honors version 51H-53H. These three-course sequences, which can be completed during the freshman year, supply the necessary mathematics background for most majors in science and engineering. They also serve as excellent background for major or minor degrees in Mathematics, or in Mathematical and Computational Science. Students who have credit for one quarter of single variable calculus should take Mathematics 42 in the Autumn Quarter and 51 in Winter Quarter. Options available in the Spring Quarter include Mathematics 52, 53, 103, or 130. For proper placement, contact the Department of Mathematics.

**UNDERGRADUATE PROGRAMS**

**BACHELOR OF SCIENCE**

The following department requirements are in addition to the University’s basic requirements for the bachelor’s degree:

**MAJORS**

Students wishing to major in Mathematics must satisfy the following requirements

1. Department of Mathematics courses totaling at least 49 units credit, and such courses must be taken for a letter grade. For the purposes of this requirement, Statistics 116 counts as a Department of Mathematics course.

2. Additional courses taken from Department of Mathematics course numbers 100 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units credit.

3. A Department of Mathematics adviser must be selected, and the courses selected under items ‘1’ and ‘2’ above must be approved by the adviser, acting under guidelines laid down by the department’s Committee for Undergraduate Affairs. The Department of Mathematics adviser can be any member of the department’s faculty.

4. To receive the department’s recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation. In any case students are strongly encouraged to declare as early as possible, preferably by the end of the sophomore year.

Students are normally expected to complete either the sequence 19, 20, 21 or the sequence 41, 42 (but not both). Students with an Advanced Placement score of at least 3 in BC math or 5 in AB math may, if they so choose, take 10 units credit and fulfill requirement ‘1’ by taking at least 39 units of Department of Mathematics courses numbered 51 and above. Students with an Advanced Placement score of at least 3 in BC math or 5 in AB math may, if they so choose, take 5 units credit and fulfill requirement ‘1’ by taking at least 44 units of Department of Mathematics courses numbered 42 and above.

It is recommended that the choice of courses under requirement ‘1’ above should include at least the following: the sequences 51H, 52H, 53H (but not both); 104 or 114; 106; 115 or 171; 120 or both 109 and 110. In addition, it is recommended that students make a reasonably broad selection of courses from the department’s algebra and analysis courses 121, 131, 132, 134A-B, 152, 153, 155, 156, 173, 175, 176, the geometry/topology courses 141, 143, 145, 147, 149 and foundation courses 160A, 160B, 161. The probability course Statistics 116 is also recommended.

Some of the additional courses mentioned under (2) above could, for example, be taken from the physics series 41, 43, 45, 47, or the physics series 61, 63, 65. A variety of other courses would be allowed under (2) including some courses taken from the departments of Engineering Computer Science, Statistics, and Economics.

Subject to approval of the department’s Committee for Undergraduate Affairs, it may, in some cases, be permitted to count freshmen and sophomore seminar courses as part of a choice of courses under item ‘1’. Other variations of the course requirements laid down above (under item ‘1’ and ‘2’) may, in some circumstances, be allowed (for example, students transferring from other universities may be allowed credit for some courses completed before their arrival in Stanford). In all cases, approval must be obtained from the department’s Committee for Undergraduate Affairs. Application for such approval should be made through the student’s Department of Mathematics adviser.

It is to be emphasized that the above regulations are minimum requirements for the major—students contemplating graduate work in mathematics are strongly encouraged to include the courses 14, 120, and 114 in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items ‘1’ and ‘2’ above, including at least one 200-level course. Such students are also encouraged to consider the possibility of taking the honors program, discussed below.
To help develop a sense of the type of course selection (under items '1' and '2' above) which would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a few of a very large number of possible combinations of courses which could be taken in fulfillment of the Mathematics major requirements:

Example 1—A "General" program (a balanced program of both pure and applied components, without any particular emphasis on any one field of mathematics or applications) as follows:

Either 19, 20 and 21, or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 104; 106; 110; 115
Plus any selection of at least eight of the following courses, including three math department courses (or two Department of Mathematics courses and Statistics 116): Mathematics 131, 132, 143, 147, 152, 153, 161, 173; Statistics 116; Physics 41, 43, 45; Computer Science 137; Economics 50

It would be common in this sequence to also include Mathematics 103 or 113 in the selection of Department of Mathematics courses here, especially for students wishing to supplement their knowledge of linear algebra, gained in Mathematics 51 and 53, before attempting some of the other courses listed. However, Mathematics 51 and 53 would generally be deemed sufficient introduction to linear algebra for these other courses. Students could take 103 (or 113) and 130 in lieu of 53.

Example 2—A "Theoretical" program (recommended for those contemplating possible later graduate work (see, also, the discussion of the honors program below), providing an introduction to the main areas of mathematics both broader and deeper than the general program outlined above).

Either 19, 20, and 21, or 41 and 42 (or satisfactory Advanced Placement credit)

Either the sequence 51, 52, 53, or the sequence 51H, 52H, 53H; 106; 114; 120; 171
Plus at least nine of the following courses: 121, 131, 132, 134A, 141, 143, 145, 147, 148, 152, 153, 155, 156, 160A, 161, 173, 175, 176; Statistics 116

In addition, those contemplating eventual graduate work in mathematics should seriously consider including at least one graduate-level math course such as Mathematics 205A or 206A. Such students should also consider the possibility of entering the honors program.

(Students taking 51, 52, 53 rather than 51H, 52H, 53H should consider taking 113 before attempting 114.)

Example 3: An "Applied Mathematics" program:

Either 19, 20 and 21; or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 104; 106; 110; 115; 131; 132; Statistics 116

Plus at least 15 units of courses in Applied Mathematics, including, for example, suitable courses from the departments of Computer Science, Economics, Engineering, and Statistics

Students with interests in applied mathematics, but desiring a broader-based program than the type of program suggested in Example 3, including significant computational and/or financial and/or statistical components, are encouraged to also consider the Mathematics and Computational Sciences program.

MINORS

To qualify for the minor in mathematics, a student should successfully complete, for a letter grade, at least six Department of Mathematics courses numbered 51 or higher, totaling a minimum of 24 units. It is recommended that these courses include either the sequence 51, 52, 53 or the sequence 51H, 52H, 53H.

HONORS PROGRAM

The honors program is intended for students who have strong theoretical interests and abilities in mathematics. The goal of the program is to give students a thorough introduction to the main branches of mathematics, especially analysis, algebra, and geometry. Through the honors thesis, students may be introduced to a current or recent research topic, although occasionally more classical projects are encouraged. The program provides an excellent background with which to enter a masters or Ph.D. program in mathematics. Students successfully completing the program are awarded a B.S. in Mathematics with Honors.

It is recommended that the sequence 51H, 52H, 53H be taken in the freshman year. Students who have instead taken the sequence 51, 52, 53 in their freshman year may be permitted to enter the honors program, but such entry must be approved by the Department of Mathematics Committee for Undergraduate Affairs.

To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

1. The selection of courses under items '1' and '2' above must include all the math courses 106, 114, 120, 171 and also must include at least two courses from the analysis sequence 131, 132, 134A, 134B, 173, 175, 176; at least two courses from the algebra sequence 121, 152, 153, 155, 156; at least one course in the geometry/topology sequence 141, 143, 145, 147, 148; and at least one course in logic or set theory (from 160A, 160B, 161). The probability course Statistics 116 is also strongly recommended.

2. Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics faculty, and map out a concentrated reading program under the direction and guidance of the adviser. During the senior year, the student must enroll in Mathematics 197 for a total of 6 units (typically spread over two quarters), and work toward completion of the thesis under the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for Mathematics 197 are required in addition to the course requirements laid out under items '1' and '2' above of the usual requirements for math majors.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range). Mathematics 205A, 206A are especially recommended in this context.

Students with questions about the honors program should see the Director of Undergraduate Advising.

BACHELOR OF SCIENCE IN MATHEMATICAL AND COMPUTATIONAL SCIENCE

The Department of Mathematics participates with the departments of Computer Science, Engineering-Economic Systems and Operations Research, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the "Department of Mathematical and Computational Science" section of this bulletin.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The University’s basic requirements for the master’s degree are discussed in the "Graduate Degrees" section of this bulletin. The following are additional department requirements:

Candidates must complete an approved course program of 36 units beyond the department requirements for the B.S. degree. It must include 18 units in courses numbered 200 or above. The candidate must have a grade point average (GPA) of 'B' over all course work taken in mathematics, and a GPA of 'B' in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department’s Director of Graduate Studies.

For the degree of M.S. in Computer Science, see the "Computer Science" section of this bulletin.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the "School of Education" section of this bulletin or address inquiries to Credential Secretary, School of Education.
MASTER OF ARTS IN TEACHING (MATHEMATICS)

In cooperation with the School of Education, the department offers a program leading to a Master of Arts in Teaching (Mathematics). It is intended for candidates who have a teaching credential or relevant teaching experience and wish to strengthen their academic preparation. Detailed requirements are outlined under the “School of Education, Master of Arts in Teaching” section of this bulletin.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the doctorate (residence, dissertation, examination, and so on) are discussed in the “Graduate Degrees” section of this bulletin. The following are additional department requirements.

To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

Beyond the requirements for candidacy, the student must complete a course of study of at least 48 units approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. The course program should display substantial breadth in mathematics outside the student’s field of application. The student must receive a grade point average (GPA) of ‘B’ or better in courses used to satisfy the Ph.D. requirement. In addition, the student must pass the University oral examination and pass a reading examination in two foreign languages, chosen from French, German, or Russian.

Experience in teaching is emphasized in the Ph.D. program. Each student is required to complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student. Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

For the Ph.D. degree in Computer Science, see the “Computer Science” section of this bulletin.

For further information concerning degree programs, fellowships, and assistantships, inquire of the academic associate of the department.

APPLIED MATHEMATICS OPTION

This option differs from the standard Ph.D. program in that qualifying examinations in more applied areas are substituted for the regular qualifying examinations. Also, the courses Mathematics 220 (basic methods in partial differential equations) and Computer Science 237 (numerical methods) are a required part of the curriculum in the first year. Students are required to take 18 units of graduate-level courses in computer science and applied areas such as fluid mechanics, operations research, financial mathematics, or statistics.

Ph.D. MINOR

The student should complete both of the following:*  
1. Mathematics 106, 131, 132
2. Mathematics 113, 114, 120 or 152

These courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable.

In addition, the student should complete 21 units of 200-level courses in mathematics. These must be taken at Stanford and approved by the Department of Mathematics’ Ph.D. minor adviser.

*C A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for items 1 or 2.

COURSES

(WIM) indicates that the course meets the Writing in the Major requirements.

INTRODUCTORY AND UNDERGRADUATE

The department offers two sequences of introductory courses in single variable calculus.

1. Mathematics 41, 42 present single variable calculus. Differential calculus is covered in the first quarter, integral calculus in the second.
2. Mathematics 19, 20, 21 cover the material in 41, 42 in three quarters instead of two.

There are options for studying multivariable mathematics:

1. Mathematics 51, 52, 53 cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize applications. Mathematics 51 covers differential calculus in several variables and introduces matrix theory and linear algebra, 52 covers integral calculus in several variables and vector analysis, 53 studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is strongly recommended for incoming freshmen with 10 units of Advanced Placement credit.
2. Mathematics 51H, 52H, 53H cover the same material as 51, 52, 53, but with more emphasis on theory and rigor.

The introductory course in modern algebra is Linear Algebra (103 or 113). There are no formal prerequisites for these courses, but appropriate mathematical maturity is expected. The material in 103 is covered in the sequence 51, 52, 53.

19, 20, 21. Calculus—The content is the same as the sequence 41 and 42 described below, over three quarters rather than two.

19. Calculus—GER:2c (DR:4)
   3 units, Aut (Moore)
   Win (Staff)

20. Calculus—Continuation of 19. Prerequisite: 19. GER:2c (DR:4)
   3 units, Win (Moore)
   Spr (Staff)

21. Calculus—Continuation of 20. Prerequisite: 20. GER:2c (DR:4)
   4 units, Spr (Moore)

41, 42—Three large lecture classes per week plus two classes in small sections.

41. Single Variable Calculus—Introduction to differential and integral calculus of functions of one variable. Topics: review of elementary functions including exponentials and logarithms, rates of change, and the derivative. Prerequisites: algebra, trigonometry. GER:2c (DR:4)
   5 units, Aut (Rumelhart)

42. Single Variable Calculus—Continuation of 41. Methods of symbolic and numerical integration, applications of the definite integral, introduction to differential equations. Infinite series. Prerequisite: 41 or equivalent. GER:2c (DR:4)
   5 units, Aut (Elezi)
   Win (Rumelhart)

51, 52, 53. Multivariable Mathematics—Recommended for incoming freshmen with 10 units of Advanced Placement credit, and for those interested in science, engineering, or economics. Provides an integrated treatment of multivariable calculus, linear algebra, and ordinary differential equations involving numerical algorithms and computer experiments. Applications are stressed.

51. Linear Algebra and Differential Calculus of Several Variables—Geometry and algebra of vectors, systems of linear equations, matrices, vector valued functions and functions of several variables, partial derivatives, gradients, chain rule in several variables, vector fields, optimization. Prerequisite: completion of 21, 42, or a score of at least 4 on the BC Advanced Placement Examination or on the A8 Advanced Placement Examination, or consent of the instructor. GER:2c (DR:4)
   5 units, Aut (Carlsson, R. Cohen, Benson, Brock, Etnyre)
   Win (deSilva, Levandosky)
   Spr (Rumelhart)
   Sum (Staff)

52. Integral Calculus of Several Variables—Iterated integrals, line and surface integrals, vector analysis with applications to vector p-
tentials and conservative vector fields, physical interpretations, numerical methods. Similar to 44; makes use of techniques from matrix theory. Prerequisite: 51.

3 units, Aut (Cieliebak)  
Win (Bruunfjel, Kerckhoff)  
Spr (Wang)

53. Ordinary Differential Equations with Linear Algebra—Linear ordinary differential equations, applications to oscillations, matrix methods including determinants, eigenvalues and eigenvectors, matrix exponentials, and solving of systems of linear differential equations with constant coefficients, numerical methods, and Laplace transforms. Similar to 130, integrated with topics from linear algebra (103, 104). Prerequisite: 51.

3 units, Aut (Levandosky)  
Win (Carlton)  
Spr (Einyre, Hutchings)

51H,52H,53H. Honors Calculus—(Formerly 43H, 44H, 45H.) For prospective math majors in the honors program or other areas of science or engineering who have a strong mathematics background. Three-quarter sequence, beginning in Autumn, covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Provides a unified treatment of multi-variable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement Exam or consent of the instructor. Recommended: complete at least the first two quarters. 51H satisfies GER:2c (DR:4)  
3 units, Aut, Win, Spr (Staffilani)

80Q. Stanford Introductory Seminar: Capillary Surface Interfaces—Preference to sophomores.  
3 units, Win (Finn)

3 units, Spr (Mazzeo)

82Q. Stanford Introductory Seminar: Surfing Wavelets at Stanford—Preference to sophomores.  
3 units, Aut (Staffilani)

83N. Stanford Introductory Seminar: Paradoxes—Preference to freshmen.  
3 units, Win (Feferman)

3 units, Win (Carlsson)

3 units, Spr (Katznelson)

3 units, Spr (R. Cohen)

UNDERGRADUATE AND GRADUATE

Unless explicitly stated, there are no prerequisites for the courses listed below. Where a prerequisite is stated, it may be waived by the instructor.

103. Matrix Theory and its Applications—Linear algebra and matrices, emphasizing the computational and algorithmic aspects and the scientific problems in which matrix theory is applied. Solution of linear equations. Linear spaces and matrices. Orthogonal projection and least squares. Introduction to eigenvalues and eigenvectors. GER:2c (DR:4)  
3 units, Aut (Elezi, Levandosky, Schlichtkrull)  
Win (Dembo, Benson)  
Spr (Benson, Carlton)  
Sum (Staff)

3 units, Win (Wang)  
Spr (Bump)

106. Introduction to Theory of Functions of a Complex Variable—Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy formula; elementary conformal mappings. Prerequisite: 52 or S2H.  
3 units, Win (Li)  
Spr (Katznelson)

109. Applied Modern Algebra—Applications of the theory of groups. Topics: elements of groups theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. (WIM)  
3 units, Win (Li)

110. Applied Number Theory and Field Theory—Applications of number theory and finite fields in computing and coding. Topics: divisibility and congruences, costs and operations, finite Fourier transforms, finite fields and applications to error correcting codes and cryptography. (WIM)  
3 units, Spr (K. Liu)

113. Linear Algebra and Matrix Theory—Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization.  
3 units, Aut (Katznelson)  
Win (Hutchings)

114. Linear Algebra and Matrix Theory—Continuation of 113. Deeper study of 113 topics plus additional topics from invariant subspaces, canonical forms of matrices; minimal polynomials and elementary divisors; vector spaces over arbitrary fields; inner products; Jordan normal forms; Hermitian and unitary matrices; multilinear algebra.  
3 units, Win (Milgram)

3 units, Aut (Katznelson)  
Win (Ornstein)  
Sum (Staff)

120. Modern Algebra I—Basic structures in algebra: groups, rings, and fields. Elements of Group Theory: permutation groups, finite Abelian groups, p-groups, Sylow theorems. Polynomial rings, principal ideal domains, unique factorization domains. (WIM)  
3 units, Aut (J. Li)
121. Modern Algebra II—Continuation of 120. Fields of fractions. Solvable and simple groups. Elements of field theory and Galois theory. Prerequisite: 120.

3 units, Win (Bump)

130. Ordinary Differential Equations—Special, exact, and linear equations; series solutions, numerical solution; Laplace transform; systems of equations. Students with some background in matrix theory should take 53, which integrates linear algebra with differential equations. Pre-or co-requisite: 44 or 52, or consent of instructor.

3 units, Aut (Chou)
Win (Mazzeo)
Spr (Schlichtkrull)

131. Partial Differential Equations I—First order equations, classification of second order equations. Initial-boundary value problems for heat, wave, and related equations. Separation of variables, eigenvalue problems, Fourier series, existence and uniqueness questions. Prerequisite: 53 or 130 or equivalent.

3 units, Aut (T. P. Liu)
Win (Cieliebak)

3 units, Win (T. P. Liu)

134A,B. Honors Analysis—Primarily for students planning graduate work in mathematics of physics who would normally enroll in an honors sequence. Required of honors math majors, but of use and interest to other majors at ease with rigorous proofs and qualitative discussion. Coherent, mathematically sophisticated presentation of the basic areas in classical real analysis. Emphasis is on ordinary and partial differential equations. Prerequisite: 53H or 171, or consent of instructor.

3 units, Win, Spr (Mazzeo)

3 units, Aut (P. Cohen)
Win (Mazzeo)

145. Algebraic Geometry—Affine and projective spaces, plane curves, Bezout’s theorem, singularities and genus of a plane curve, applications of commutative algebra to geometry. Prerequisites: 106 and either 120 or 110.

not given 1999-2000

147. Differential Topology—Smooth manifolds, transversality, Sard’s theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan Curve Theorem. Prerequisite: 115 or 171.

3 units, Spr (Hutchings)

148. Algebraic Topology—Fundamental group, covering spaces, Euler characteristic, classification of surfaces, knots. Prerequisites: 109 or 120.

not given 1999-2000

3 units, Win (Dembo)

152. Elementary Theory of Numbers—Euclid’s algorithm, fundamental theorems on divisibility; prime numbers, congruence of numbers, theorems of Fermat, Euler, Wilson; congruence of first and higher degrees; Lagrange’s theorem, its applications; residues of power, quadratic residues; introduction to the theory of binary quadratic forms.

3 units, Spr (Carlton)

153. Combinatorics—Topics in Ramsey’s theorem, generating functions, partition functions, and in number theory (sums of integers and van der Waerden’s theorem). Recommended: general background in algebra, analysis, and some number theory.

not given 1999-2000

156. Group Representations—Designed for undergraduates. Expositions, primarily examining symmetries on objects such as vector spaces (“group representations”), geometric objects (“geometric group actions”), and discrete sets (combinatorics). Topics: group representations and their characters, classification of permutation representation using partitions and Young tableaus, group actions on sets and the Burnside ring, and spherical space forms. Prerequisites: basic knowledge of linear algebra (51-53, 103 or 113) and Group Theory (109, 110 or 120).

3 units, Aut (Milgram)

160A. First-Order Logic—(Enroll in Philosophy 160A.)

160B. Computability and Logic—(Enroll in Philosophy 160B.)

161. Set Theory—Informal and axiomatic set theory: sets, relations, functions and set-theoretical operations. The Zermelo-Fraenkel axioms and the special role of the axiom of choice and its various equivalents. Well-ordering and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor’s Alephs and cardinal arithmetic. Open problems in set theory.

not given 1999-2000

162. Philosophy of Mathematics—(Enroll in Philosophy 162.)

171. Fundamental Concepts of Analysis—Recommended for math majors and required of honors math majors. Similar to 115 but altered contents and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisites: either 51, 52, 53, or 51H, 52H, 53H (WIM)

3 units, Aut (Kerckhoff)

173. Analysis on Manifolds—Differentiable manifolds, tangent space, submanifolds, implicit function theorem, differential forms, vector and tensor fields. Frobenius’ theorem, DeRham theory. Prerequisites: 52 and 52H.

3 units, Win (Schlichtkrull)

175. Elementary Functional Analysis—Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171.

3 units, Spr (Cieliebak)

3 units, Spr (Papanicolaou)

181. Topics in the History of Mathematics: From Antiquity to the 17th Century—(Enroll in History and Philosophy of Science 140.)

195. Teaching Practicum—Students assist in an undergraduate course, lead problems sessions, and tutor. Some reading in topics in mathematics education is required.

1 unit, Aut, Win, Spr
197. Senior Honors Thesis
1-6 units, Aut, Win, Spr (Staff)

199. Independent Work—Undergraduates pursue a reading program; topics limited to those not in regular department course offerings. Credit can fulfill the elective requirement for math majors. Approval of Undergraduate Affairs Committee is required to use credit for department’s area requirement. Consult the academic associate for help in finding an adviser.
(Staff)

PRIMARILY FOR GRADUATE STUDENTS

200. Graduate Problem Seminar
not given 1999-2000

205A. Theory of Functions of a Real Variable—Lebesgue measure and integration, LP spaces, and convergence theorems. Prerequisite: 171 or equivalent.
3 units, Aut (Simon)

3 units, Win, Spr (Katznelson)

3 units, Aut (J. Li)

206B. Theory of Functions of a Complex Variable—Riemann mapping theorem, product developments, entire functions, elliptic functions, Dirichlet problem, Picard’s theorem. Prerequisites: 171, 206A.
3 units, Win (Wang)

210A. Modern Algebra—Groups, rings and fields, Galois theory, ideal theory. Prerequisite: 120 or equivalent.
3 units, Win (P. Cohen)

210B, C. Modern Algebra—Introduction to algebraic geometry representation of groups and rings, multilinear algebra. Prerequisites: 210A or equivalent.
3 units, Win, Spr (Bump, Brumfiel)

216A. Introduction to Algebraic Geometry—Algebraic varieties, sheaves, cohomology, and Riemann-Roch theorem. Hodge theory, Lefschetz decompositions, and hyperplane theorem. Curves and surfaces classification theorem. Prerequisite: 120 or equivalent.
not given 1999-2000

3 units, Win, Spr (K. Liu)

220A. 3 units, Aut (T. P. Liu)
220B. 3 units, Win (T. P. Liu)
220C. 3 units, Spr (Chou)

227. Mathematical and Computational Molecular Biology—Emphasis is on concepts and principles, combined with hands-on applications. Topics: probability models for letter sequences, score-based sequence analysis. Amino acid substitution scoring matrices, dynamic programming and other methods for sequence alignment, phylogenetic trees from sequence data, signal search methods, codon usage, exon-intron prediction.
not given 1999-2000

3 units, Aut, Win (Ornstein)

3 units, Aut (Siegmund)

3 units, Win (Dembo)

3 units, Spr (Siegmund)

235A. Selected Topics in Ergodic Theory—Topics from the Kolmogorov-Sinai theory of entropy; the isomorphism theorem for Bernoulli shifts and Bernoulli flows; K-automorphisms applications to mechanical systems, and automorphisms of compact groups.
3 units, Aut, Win, Spr (Ornstein)

3 units, Aut (Mattingly)

3 units, Win (Mattingly)

3 units, Spr (Papanicolaou)

241. Mathematical Finance—(Enroll in Statistics 250.)
3 units, Spr (T. Lai)

244. Riemann Surfaces—Compact Riemann surfaces: topological classifications, Hurwitz’ formula. Riemann-Roch formula, uniformization theorem. Abel’s theorem, Jacobian varieties. Some elements of harmonic analysis are developed with applications. Methods are generally applicable to the algebraic curves highlighted.
3 units, Aut (K. Liu)

246. Asymptotics of Multivariable Generating Functions—Formal power series and generating functions. Asymptotics of one variable generating functions. The theory of oscillating integrals in one and many variables. Asymptotics of multivariable generating functions and complete classification of two-variable, meromorphic non-entire functions. Topological and algebraic-geometric issues in extending this. Derivation of generating functions via symmetric function theory, elliptic functions, and Riemann-Hilbert problems. Applications in combinato-
L-functions, groups and elliptic curves. Connections with Iwasawa theory and p-adic 249. Topics in Representation Theory and Number Theory—Euler forms, including Hecke operators, L-series, twisting, Rankin-Selberg undergraduates. Differential equations and vector fields. Exam-
tors on singular and noncompact spaces, the microlocal theory of elliptic theorem for Dirad operators). Possible topics: pseudodifferential opera-
259. Microlocal Analysis—The basic calculus of pseudodifferential and mechanics. Contact geometry and contact manifolds. Relations be-
3 units, Spr (Bump)
254A,B. Ordinary Differential Equations—Qualitative theory of ordi-
nary differential equations, analytic and geometric methods. Topics from the stability and perturbation theory of dynamical systems; Hamilton-
yon systems; applications to the theory of oscillations and celestial me-
not given 1999-2000
256A,B,C. Partial Differential Equations—Introduction to the theory of linear and non-linear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and L2 estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; non-linear equations, e.g., the minimal surface equation, geometric flow problems, and non-
3 units Aut, Win, Spr (Simon, Mazzeo)
258. Topics in Geometric Analysis not given 1999-2000
259. Microlocal Analysis—The basic calculus of pseudodifferential operators, focusing on the parametrix construction for elliptic operators, and leading to various applications in geometry (Hodge theorem, index theorem for Dirad operators). Possible topics: pseudodifferential opera-
tors on singular and noncompact spaces, the microlocal theory of elliptic boundary value problems, Atiyah-Patodi-Singer index theorem. not given 1999-2000
260A,B. Mathematical Methods of Classical Mechanics—Open to undergraduate students. Differential equations and vector fields. Exa-
264A. Number Theory—Introduction to algebraic number theory: the arithmetic of local and number fields, and a brief introduction to class field theory. Prerequisite: 210A or equivalent. not given 1999-2000
264B. Number Theory—Modular forms. The basic theory of modular forms, including Hecke operators, L-series, twisting, Rankin-Selberg method, and the Eichler-Shimura theory relating modular forms of weight two to elliptic curves. 3 units, Spr (Bump)
253. Regularity of Sets and Mappings—For students interested in any area of analysis. Topics: Lipschitz functions; $C^r$ functions; Sobolev functions; various regularity and extension theorems including Radamacher, Kirzbraun, Whitney, Sard, $C^r$-Sard. Critical sets of real-analytic, complex analytic functions. Affine approximation properties of subsets of $R^n$, including a discussion of rectifiability and non-rectifiability, structure theorem, and Reifenberg's topological disc theorem. 3 units, Spr (Simon)
270. Geometry and Topology of Affine Complex Manifolds—Geometric introduction to the theory of plurisubharmonic functions and pseudoconvex hypersurfaces. Affine (Stein) manifolds and their character-
ization in terms of plurisubharmonic functions (Grauert's theorem). Topology of Stein manifolds. Lefschetz's theorem and its converse a complex dimensions greater than two. Rigidity properties of two-dimen-
stein manifolds. Symplectic geometry of Stein manifolds. Morse-Smale type theory for plurisubharmonic functions. not given 1999-2000
272A,B. Topics in Partial Differential Equations—Introduction to PDE methods in an intrinsic geometric setting. Topics: Schauder and DeGiorgi-Nash theory in a geometric setting, Sobolev, Poincare, and isoperimetric inequalities. Discussion of nonlinear methods: Leray-
Schauder fixed point, and degree and variational methods. Geometric examples introduce basic nonlinear PDEs of geometry (the harmonic map, Yang-Mills, and mean curvature equations) and equations arising from scalar and Ricci curvature. Prerequisite: knowledge of the elements of Fourier analysis. not given 1999-2000
277. Mathematical Theory of Relativity—Ricci calculus; variational principles and covariance properties; differential geometry of spacetime; Cauchy's problem for the differential equations of gravitation and electromagnetism; relativistic hydrodynamics; unified field theories. not given 1999-2000
281A,B. Introduction to Algebraic and Differential Topology—Fundamental group, covering spaces, embeddings and immersions of manifolds, transversality, homotopy theory, homology and cohomolog
of complexes, differential forms, fiber and vector bundles, and their
characteristic classes.

3 units, Aut (Kerckhoff)
Win (R. Cohen)

283. Topics in Topology
3 units, Spr (R. Cohen)

284. Topics in Geometric Topology
3 units, Aut (Milgram)

285A. Geometric Measure Theory—Hausdorff measures and dimen-
sions, area and co-area formulas for Lipschitz maps, integral currents and
flat chains, minimal surfaces and their singular sets.
not given 1999-2000

286. Topics in Differential Geometry
3 units, Spr (Schoen)

290A. Model Theory—(Enroll in Philosophy 290A.)
3 units, Aut (Mints)

290B. Model Theory—Kripke (possible world) semantics of intuition-
istic and modal logics. Completeness results and strategies in automated
deduction. Algebraic models. Second order systems. May be taken
independently of 290A. Prerequisites: 160A,B or equivalent.
3 units, Win (Mints)

291A,B- Recursion Theory—Theory of recursive functions and recur-
sively enumerable sets. Turing machines and alternative approaches.
Diophantine definability. Definability in formal systems. Gödel’s in-
completeness theorems. Recursively unsolvable problems in mathemat-
is and logic. Introduction to recursive ordinals and hierarchies. Prereq-
isites: 160A,B and 162, or equivalents.
not given 1999-2000

292A,B- Set Theory—The basics of axiomatic set theory; the systems of
Zermelo-Fraenkel and Bernays–Gödel. Topics: cardinal and ordinal
numbers, the cumulative hierarchy and the role of the axiom of choice.
Models of set theory, including the constructible sets and models
constructed by the method of forcing. Consistency and independence
results for the axiom of choice, the continuum hypothesis and other
unsettled mathematical and set-theoretical problems. Prerequisites:
160A,B and 161, or equivalents.
3 units, Win, Spr (Feferman)

293A,B- Proof Theory—Gentzen’s natural deduction and/or sequential
calculi for first-order predicate logic. Normalization respectively cut-
elimination procedures. Extensions to infinitary calculi; ordinal com-
plexity of proof trees. Subsystems of analysis and their reduction to
constructive theories. Prerequisites: 160A,B and 162, or equivalents.
not given 1999-2000

294. Topics in Logic—Hilbert’s program and its modern modifications.
Brouwer-Heyting-Kolmogorov interpretation, realizability, extraction
of programs from proofs. Normalization of proofs as computation of
programs. Stability of program extraction. Intensional and extensional
identity of programs. Continuous cut-elimination and its use for the study
of finite proofs and programs. Prerequisites: 160A,B or equivalent.
3 units, Spr (Mints)

297. Algebraic Logic—(Enroll in Computer Science 353.)

350. Directed Reading
any quarter (Staff)

351. Seminar Participation—Participation in a student-organized gradu-
te seminar under the general supervision of a faculty member.
any quarter (Staff)

360. Advanced Reading and Research
any quarter (Staff)

361. Seminar Participation—Participation in a faculty-led seminar
which has no specific course number.
any quarter (Staff)

380. Seminar in Applied Mathematics
by arrangement

381. Seminar in Analysis
by arrangement

383. Seminar in Function Theory
by arrangement

385. Seminar in Abstract Analysis
by arrangement

386. Seminar in Geometry and Topology
by arrangement

387. Seminar in Algebra and Number Theory
by arrangement

388. Seminar in Probability and Stochastic Processes
by arrangement

389. Seminar in Mathematical Biology
by arrangement

391. Seminar in Logic and the Foundations of Mathematics
by arrangement

MEDIEVAL STUDIES

Chair: Philippe Buc

Committee in Charge: George Brown, Philippe Buc, Hester Gelber,
William Mahrt, Jennifer Summit

Affiliated Faculty: George H. Brown (English), Philippe Buc (History),
Brigitte Gazelles (French and Italian, Comparative Literature),
Sara S. Poor (German Studies), Orrin W. Robinson (German Studies),
Jeffrey Schnapp (French and Italian, Comparative Literature),
Jennifer Summit (English)

The Medieval Studies Program is administered through Interdiscipli-
ary Studies in Humanities, but the degree is conferred by the Dean of
Undergraduate Studies’ Advisory Committee on Individually Designed
Majors. The committee has approved the program as listed below. Stu-
dents interested in pursuing the Medieval Studies major or minor should
consult the Chair of Medieval Studies. Students who are members of the
Humanities Honors Program may petition to major in Medieval Studies.
See the “Interdisciplinary Studies in Humanities” section of this bulle-
tin. The major is normally declared by the beginning of the student’s third
year.

The major combines interdisciplinary breadth with a disciplinary
focus. The interdisciplinary emphasis is provided by 165, Introduction
to Medieval Culture, by upper-level interdisciplinary colloquia, and by
the requirement that students take courses in three different areas. Depth
is ensured by the requirement that students take at least four courses in
one area. A faculty adviser helps each student choose courses that integ-

Affiliated Faculty:
George H. Brown (English), Philippe Buc (History),
Hester Gelber (Religious Studies), William Mahrt (Music), Jeffrey P. Mass (History),
Kathryn Miller (History), Sara S. Poor (German Studies), Orrin W. Robinson (German Studies),
Jeffrey Schnapp (French and Italian, Comparative Literature)

Chair: Philippe Buc

Committee in Charge: George Brown, Philippe Buc, Hester Gelber,
William Mahrt, Jennifer Summit

Affiliated Faculty: George H. Brown (English), Philippe Buc (History),
Brigitte Gazelles (French and Italian, Comparative Literature),
Sara S. Poor (German Studies), Orrin W. Robinson (German Studies),
Jeffrey Schnapp (French and Italian, Comparative Literature),
Jennifer Summit (English)
The requirements of breadth and depth. To that end, the following

guidelines are provided.

The student should take a minimum of ten courses dealing directly
with the Middle Ages and distributed as follows:

1. The introductory course, Medieval Studies 165, Introduction to
   Medieval Culture.

2. Two upper-division courses, ideally with an interdisciplinary com-
   ponent, in any field.

3. Four courses in one of the following categories:
   a. Literature: English, French, German and Scandinavian, Italian,
      Latin, Slavic, Spanish
   b. History
   c. Art history, drama, music
   d. Humanities, philosophy, religious studies (certain Humanities
      courses may fulfill requirements within other categories)

4. Two courses in a second category from the above list.

5. One course in a third category from the above list.

In addition to the ten courses, a language proficiency equal to two
years of college-level study is suggested in Latin or one of the follow-
ing: French, German, Italian, or Spanish.

MINORS

An undergraduate minor in Medieval Studies is available through the
program. Students interested in completing the minor should inquire
about enrollment procedures at the office of Interdisciplinary Studies in
Humanities.

Requirements:

1. Language: in addition to the University foreign language requirement,
at least a one-quarter course in a classical and/or medieval vernacular
language is recommended, which may count as one of the five
required courses for the minor listed under item 2a.

2. The minor consists of six courses, which include:
   a) Medieval Studies 165, Introduction to Medieval Culture (core
course, given annually)
   b) An additional five courses dealing directly with the Middle
   Ages. If the student’s major department or program offers
   medieval courses, he/she should take two of them for the
   Medieval Studies minor, but those courses may not also count
   for the major. At least three courses must be taken outside the
   student’s major, selected from two or more of the following
categories:
      1) Language and literature
      2) History
      3) Art history, drama, music
      4) Humanities, philosophy, religious studies
      5) From among the Medieval Studies faculty listed above, the stu-
         dent chooses an adviser, who assists in the selection of courses and
         the design of the program.

All courses counted toward the minor in Medieval Studies must be
taken for a letter grade. No course counted toward the minor can also count
 toward a student’s major or another minor.

COURSES

165. Introduction to Medieval Culture—(Same as English 165A, His-
tory 105A.) Introduction to the development of medieval culture through
religious, philosophical, literary, artistic, social, and political sources,
with emphasis on the interrelationships among them. Lectures by facul-
ty from various departments. GER:3a (DR:7 or 8)
5 units, Win (Brown, Miller)

RELATED AREAS

Courses suitable for self-designed majors in Medieval Studies are
listed below. More detailed course descriptions are found under the vari-
ous department headings. See quarterly Time Schedule for changes in
listings.

ART AND ART HISTORY
105/205. Sites and Images of Power in 12th-Century Europe
206D. Colloquium: Multiculturalism and Image Appropriation—Early Medieval Art and Architecture

COMPARATIVE LITERATURE
218. Latinity and Vernacularity

ENGLISH
81Q. Authority and Women in the Early Middle Ages
10/110. Masterpieces of English Literature I: Chaucer, Shakes-
peare, Milton, and their Contemporaries
165E. The Invention of Middle English Literature, 1330-1400
171. Chaucer

209. Introduction to Paleography and Codicology

211. Readings in Middle English

370. Seminar: Suffering History—Exemplary Lives in Medieval

FRENCH AND ITALIAN

FRENCH
108N. Stanford Introductory Seminar: Female Saints
130. Middle Ages and Renaissance France

ITALIAN
127. Framing Italian History
190E. The Decameron and the 1001 Nights
233E. Dante’s Divine Comedy
320E. The Avant-Gardes of the Middle Ages

GERMAN STUDIES
255. Middle High German

HISTORY
13. The Emergence of Modern Medicine
185. Introduction to Islamic Civilization
189B. The Ottoman Empire

208. Undergraduate Colloquium: The Conversion of Europe
209A/309A. Undergraduate/Graduate Colloquium: Law, Society, and Identity in Christianity and Islam, 500-1500
209B/309B. Undergraduate/Graduate Colloquium: Crusaders, Pilgrims, and Merchants—The Mediterranean World, 700-1600
210A/310A. Undergraduate/Graduate Colloquium: The Language of Politics in the Middle Ages
214A/314A. Undergraduate/Graduate Colloquium: Universities in Medieval Europe
299/399. Undergraduate/Graduate Colloquium: Japan in the Age of Courtiers and Warriors, 1180-1333
MODERN THOUGHT AND LITERATURE

Chair: David Palumbo-Liú
Affiliated Faculty: Lanier Anderson (Philosophy), Anthony Antonio (Education), Joel Beinin (History), Russell Berman (German Studies, Comparative Literature), Brett Bourbon (English), Scott Bukatman (Art and Art History, Comparative Literature), Rudy Busio (Religious Studies), Albert Camarillo (History), Terry Castle (English), George Dekker (English), Paulla Ebron (Cultural and Social Anthropology), Harry Elam (Drama), Jay Fliegelman (English), Claire Fox (Spanish and Portuguese), George Fredrickson (History), Theodore Glasser (Communication), Hans U. Gumbrecht (French and Italian, Spanish and Portuguese, Comparative Literature), Akhil Gupta (Cultural and Social Anthropology), Janet Halley (Law), David Halliburton (English), Elisabeth Hansot (Political Science), Shirley Heath (English, Linguistics), Miyako Inoue (Cultural and Social Anthropology), Pamela Lee (Art and Art History), Timothy Lenoir (History), Herbert Lindenberger (English, Comparative Literature), Purnima Mankekar (Cultural and Social Anthropology), Diane Middlebrook (English), Paula Moya (English), Valentin Mudimbe (French and Italian, Comparative Literature), David Palumbo-Liú (Comparative Literature), Robert Polhemus (English), Mary Pratt (Spanish and Portuguese, Comparative Literature), Arnold Rampersad (English), Renato Rosaldo (Cultural and Social Anthropology), Ramón Saldívar (English, Comparative Literature), Debra Satz (Philosophy), Jeffrey Schnapp (French and Italian, Comparative Literature), Peter Stansky (History), Michael Thompson (History), Elizabeth Traugott (Linguistics, English), Robert Weisberg (Law), Sylvia Yanagisako (Cultural and Social Anthropology), Yvonne Yarbro-Bejarano (Spanish and Portuguese), Richard White (History)

The Program in Modern Thought and Literature is administered through the office of Interdisciplinary Studies in Humanities. The program admits students for the Ph.D. and a very limited number for a coterminal A.M. Program.

UNDERGRADUATE PROGRAMS

Although Modern Thought and Literature has no formal undergraduate degree-granting program, undergraduate students who are interested in completing a major in this field may do so through the undergraduate major in Interdisciplinary Studies in Humanities (see that section of this bulletin). This undergraduate program is designed for students with a strong commitment to interdisciplinary study in the various humanities. Students may devise majors that incorporate modern literature (since the 18th century), cultural history, and critical theory. Students may also create majors in cultural studies, film studies, performance studies, popular culture, history of representation, politics and literature, etc. For specific course guidelines, see the undergraduate Handbook for the Major in Interdisciplinary Studies in Humanities. Students wishing to declare the major in Interdisciplinary Studies in Humanities must apply for admission to the Humanities honors program and for graduation with honors in Humanities.

COTERMINAL PROGRAM

Each year, one or two undergraduate students, who are exceptionally well-prepared in literature and at least one foreign language and whose undergraduate course work includes a strong interdisciplinary component, may petition to be admitted to the program for the purpose of completing a coterminal A.M. degree. Admission to this program is granted only on condition that in the course of working on their master's degree they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is March 1.

To apply, applicants submit:
1. An unofficial grade transcript from AXESS.
2. A "Petition for Admission to the Coterminal Program" from Degree Progress, in the Registrar's Office.
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. A plan of study listing, quarter by quarter, each course by name, units, and instructor to be taken in order to fulfill the requirements for the degree, including 361, at least 20 units of advanced work in one liter-}

REQUIREMENTS

The candidate for the A.M. must complete at least 45 units of graduate work, to be divided in the following manner:
1. The introductory seminar, 361, The Modern Tradition (5 units).
2. Twenty units of advanced course work in literature, to be approved by the chair.
3. Twenty units of course work in a coherent and individually arranged interdisciplinary program, to be approved by the chair.

By the end of the course of study, each candidate must also demonstrate a reading knowledge of at least one foreign language.

GRADUATE PROGRAMS

The Ph.D. in Modern Thought and Literature is an interdisciplinary program combining work in modern literary/cultural studies with work in one or more other modern disciplines.
The Ph.D. program is designed specifically for students who have a strong interest in literature or culture, but whose approach or focus requires an interdisciplinary program—for example, students interested in anthropological or philosophical approaches to literature and culture, gender studies; ethnic studies; or in topics such as legal humanities, popular culture, and social or cultural theory.

Modern Thought and Literature is intended for students who plan to teach and write in literature departments or in interdisciplinary programs in the humanities, cultural studies, or humanistic social sciences, or for students intending to formulate cultural policy.

Course work in the program is divided about evenly between advanced courses in literature departments and advanced courses in non-literary departments.

MASTER OF ARTS
The Master of Arts is available to students who are admitted to the doctoral program. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D., who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an A.M. in Modern Thought and Literature.

DOCTOR OF PHILOSOPHY
University requirements for the Ph.D. are discussed in the "Graduate Degrees" section of this bulletin.

A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the A.B. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. At least three consecutive quarters of graduate work must be taken at Stanford. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

2. Nine courses of advanced work in literary studies in one language. Of the nine courses, at least six must be regularly scheduled courses in literary studies focused on the period from 1750 to the present, of which at least two must be regularly scheduled seminars. Courses in the teaching of composition (English 396, 397), ad hoc graduate seminars (395), research courses (398), and thesis registration (802) may not be counted among these six courses; 396, 397, 399, 802 may not be counted toward these requirements under any circumstances.
3. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdepartmental concentration, typically consisting of six courses. Department minors are available from the departments of Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, and Sociology (see information in those sections of this bulletin). Approved interdepartmental concentrations have been established in popular culture, ethnic studies, feminist and gender studies, and science and technology studies (specific course requirements are available from the program office). Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with each student's academic adviser. Course restrictions noted above in item 2 also apply.
4. Qualifying Paper: this certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. Qualifying papers should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge. Qualifying papers must be submitted to the program office no later than the end of the third week of the fifth quarter of enrollment, normally, winter of the second year.
5. Teaching, an essential part of the program, is normally undertaken in conjunction with the Department of English. Candidates are required to demonstrate competence in teaching.
6. Students must demonstrate, by the end of the third quarter of the first year, a reading knowledge of one foreign language and, by the beginning of the first quarter of the third year, a reading knowledge of one other foreign language. Reading knowledge means the ability to make a genuine scholarly use of the language: that is, to read prose of ordinary difficulty.

Students may not take the University oral examination before completion of the foreign language requirement.

7. Candidacy: at the end of the second year, students apply for candidacy. The following qualifications are required before candidacy can be certified: the earlier submission of a satisfactory qualifying paper, demonstration of a reading knowledge of one foreign language; satisfactory progress in course work; a list of courses applicable to the degree, distinguishing between courses appropriate to the literary component and courses appropriate to the interdisciplinary component; and the submission of a statement outlining the scope and coherence of the interdisciplinary component of the program in relation to the literary component and noting the relevance of the course work to that program.
8. Annual Review: the program and progress of each student must be approved by the Committee-in-Charge at the end of each academic year.
9. University Oral Examination: this examination, covering the student's areas of concentration, normally is taken in the third year of graduate study. It is a two-hour oral examination administered by four faculty members specializing in the student's areas of concentration, and a chair from another department. The exam is based on a substantial reading list prepared by the student in conjunction with the faculty committee and designed to cover the areas of expertise pertinent to the student's dissertation project.
10. Colloquium on the Dissertation Proposal: several weeks after the University oral examination, or in conjunction with that examination, the dissertation committee assembles for up to one hour to discuss the dissertation proposal with the student. Prior to this meeting, the student should have consulted each member of the committee to discuss the proposal and compile a bibliography.
11. Dissertation: the fourth year is devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee on Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies.

HUMANITIES
The program participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Modern Thought and Literature, and Humanities. For a description of the Humanities program, see "Interdisciplinary Studies in Humanities" section of this bulletin.

COURSES
The courses listed below are specifically sponsored by the Program in Modern Thought and Literature or are required for the doctoral program. For literature courses, students should consult the listings of the various literature departments at Stanford. For other offerings, students should consult listings in the individual departments of interest. Consent of instructor is often required.

Students in the doctoral program in Modern Thought and Literature are advised to read through the offerings in the Department of English (or in their foreign literature of choice) as well as offerings of the non-literature departments in which they wish to concentrate: for example, courses dealing with culture listed under Cultural and Social Anthropology, courses dealing with film under Communication or Art and Art History, courses in intellectual and cultural history under History. If the area of nonliterary interest is thematic rather than disciplinary, doctoral students should look under various program listings, such as Feminist
175. Individual Work—Directed reading or research for undergraduates. Individual work does not count towards unit requirements for the undergraduate major in Interdisciplinary Studies in Humanities.

2-5 units, any quarter (Staff)

193S. Space, Place, and Culture—(Same as Cultural and Social Anthropology 170S.) The ways cultures are embedded in spaces and places, how geography effects identity, how communities make and negotiate places, and the connections between space, power, and knowledge. The ways "space" has been theorized by cultural geographers and used as a trope in cultural theory. Interdisciplinary readings in cultural geography, political economy, critical theory, and literature. Feminist geography, cartography and imperialism, race and space, and the politics of landscape.

5 units, Spr (Stein)

361. Graduate Colloquium: The Modern Tradition—Globalization and Modernity—(Same as Cultural and Social Anthropology 261.) Rather than assume one modern tradition, the colloquium encourages the analysis of the (uneven) appearance of a number of possible "modernities" in various geopolitical spaces, their cultural and historical formations, and their inter-relations. Can modernity be seen as a uniquely "western" achievement? By examining such diverse topics as trade and finance, colonialism, ecological transformations, immigration and forced migration, nationalism and postcolonialism, the complicated history of modernity is understood as a global phenomenon. Prerequisite: consent of instructor.

5 units, Aut (Gupta, Palumbo-Liu)

361B. Modern Thought and Literature Colloquium—(Undergraduates register for 261B.) Required of first-year graduate students in the program; others by consent of instructor. Weekly meeting of students in the program discusses current scholarship and issues. Presentations by affiliated faculty and by student panels.

1 unit, Win (Gupta, Palumbo-Liu)

395. Ad Hoc Graduate Seminars—Graduate students (three or more) who wish to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a suitable member of the faculty to supervise it.

Any quarter

396L. Laboratory in Pedagogy—(Enroll in English 396L.) Required for first-year Ph.D. students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students doing their teaching in a foreign language). Preparation for TA in undergraduate literature courses. Focus is on leading discussions and grading papers.

2 units, Aut (Cormack, Rebholz)

398. Research Courses—Students pursue a special subject of investigation under supervision of a member of the committee or another faculty member. Thesis work is not to be registered under this number.

Any quarter

AFFILIATED DEPARTMENT OFFERINGS

The following courses, offered in 1999-2000 by faculty on the Committee in Charge of Modern Thought and Literature, may be of interest to students in the program. Course descriptions can be found in the sponsoring department’s section of the Stanford Bulletin. This is not by any means an inclusive list of courses that can be applied to Modern Thought and Literature. The list is merely intended to provide information about the breadth of interest of faculty who are on the Committee in Charge, thereby showing the interdisciplinary nature of the program.
EDUCATION

346. Research Seminar in Higher Education
   (Antonio)

381. Multicultural Issues in Higher Education
   (Antonio)

HISTORY

33A. The Rise of Scientific Medicine
   (Lenoir)

150A. African-American History to the 20th Century
   (Thompson)

255A/355A. Undergraduate/Graduate Colloquium: Culture and Ideologies of Race
   (Thompson)

262S/462. Undergraduate/Graduate Research Seminar: Science and High Technology in Silicon Valley, 1930-1980—(Same as History and Philosophy of Science 147.)

274A/374A. Undergraduate/Graduate Colloquium: Body Works—Medicine, Technology, and the Body in Late 20th-Century America
   (Lenoir)

304A. Graduate Colloquium: Critical Studies—Science, Language, and Culture
   (Lenoir)

LAW

293. Family Law
   (Halley)

PHILOSOPHY

5B. Reason, Passion, and Reality
   (Anderson, Taylor)

125/255. Kant’s Critique of Pure Reason
   (Anderson)

132/232. Existentialism
   (Anderson)

SPANISH AND PORTUGUESE

190. Fiction and Political Imagination
   (Prafft)

357. Latin American Fiction of the 1990s
   (Prafft)

MUSIC

Chair: Stephen Hinton
Professors: Karol Berger, Albert Cohen (Autumn), Jonathan Harvey (Winter)
Assistant Professors: Heather Hadlock, Melissa Hui, Tobias Plebich, Stephen Sano
Professor (Research): Max V. Mathews (on leave 1999-2000)
Associate Professor (Performance): Karla Lemon (Director of Orchestras)
Associate Professor (Teaching): George Barth (Piano; on leave Winter, Spring)
Senior Lecturers: Judith Bettina, Stephen Harrison (Violoncello), Gennady Kleyman (Violin, Viola), Jennifer Lane (Voice), Gregory A. Wait (Voice), Frederick R. Weldy (Piano)
Lecturers: Giancarlo Aquilanti (Theory, Symphonic Band), Talyn Berge (Theory), Fredrick Berry (Jazz Ensemble), Frances Blaisdell (Flute), Mark Brandenburg (Clarinet), Marjorie Chauvel (Harp), Robe Claire (Baroque Flute), Floyd O. Cooley (Tuba), Laura Dahl (Resident Accompanist), John Dornenburg (Viola da Gamba), Charles A. Ferguson (Guitar), Susan Freier, Claire Giovannetti (Voice), Dawn Harms (Violin), Elizabeth Harrison (Organ), Alexandra Hawley (Flute), Robert Hubbard (Oboe), Joyce Johnson-Hamilton (Trumpet), Jay Kadiis (Audio Recording), McDowell Kenley (Trombone), Fernando Lopez-Lezcano (Computer Research in Music and Acoustics), Janet Maestre (Flute), Anthony Martin (Baroque Violin), Jaime Matheson (Oboe), John McGinn (Theory, Piano), Herbert Myen (Early Winds), James O. Nadel (Jazz), Karen Nagy (Bibliography), Rufus Olivier (Bassoon), Larry S. Ragent (French Horn), Gary Scavone (Computer Research in Music and Acoustics), Malcolm Slane (Computer Research in Music and Acoustics), Ronald Bruce Smith, Harold Stein (Saxophone), Frank Sumares (Jazz Piano), Elaine Thornburgh (Harpsichord), Linda Uyechi (Taiko), Mark Veregg (Percussion), Timothy Zerlang (Piano)
Artists in Residence (St. Lawrence String Quartet): Geoff Nuttall (Violin 1), Barry Shifman (Violin 2), Lesley Robertson (Viola), Maria Hoovr (Cello)
Consulting Professors: Marina Busi (Computer Research in Music and Acoustics), Walter Hewlett (Computer Assisted Research in the Humanities), Eleanor Selfridge-Field (Computer Assisted Research in the Humanities)
Visiting Professor: John R. Pierce (emeritus)
Mellon Fellow: David Code

The Department of Music’s aims are to provide specialized training for those who plan careers in music as composers, performers, teachers, and research scholars; and to promote the understanding and enjoyment of music in the University at large.

Varied opportunities for instrumental and vocal study, and performance, are available to majors and nonmajors alike. Students wishing to obtain individual instruction, to participate in chamber music, or to perform in department ensembles should note that auditions are held during registration week in Autumn Quarter; while there may be openings in some private studios for qualified students during other quarters, it is to the student’s advantage to audition in autumn.

The department is housed in Braun Music Center, Dinkelspiel Auditorium, and The Knoll, including two theaters for concert and recital productions, two rehearsal halls, and a small chamber hall. Pianos, organs, harpsichords, and a variety of early stringed and wind instruments are available for student use. In addition, advanced students may use first old stringed instruments and bows from the Harry R. Lange Historical Collection.

The Music Library contains a comprehensive collection of complete editions, scores, books, and recordings. Supplementing this is the Stanford Memorial Library of Music, an invaluable collection of musical manuscripts and first editions, and the Archive of Recorded Sound.

For more information on the Department of Music, see the Music homepage (http://www.stanford.edu/group/Music).

The Doreen B. Townsend Center for Computer Research in Music and Acoustics (CCRMA) provides one of the top-rated facilities for digital sound research in the world. It includes a large distributed computing facility, recording, and editing studio; MIDI-based small systems studios and work areas with audio-related peripherals. CCRMA software consists of a vast set of programs and system tools for editing, viewing, synthesizing, and analyzing sound. For a detailed and up-to-date description of the hardware and software available, contact the CCRMA office, or see their homepage (http://ccrma-www.stanford.edu).
UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major in Music is built around a series of foundation courses in theory, musicianship, and music history, in addition to performance and proficiency requirements outlined below. Because of the sequence of courses, it takes more than two years to complete the requirements for the major. Prospective majors are urged to consult one of the major advisers in the department as early as possible in order to plan a program which allows sufficient time for major course work, practice, and University requirements outside the major. Early planning is especially important for students wishing to double-major, for those planning an overseas study during their undergraduate years, for those wishing to do an in-depth concentration in the music major, and for those with particular musical talents and interests. All required courses for the A.B. in Music and in the Music, Science, and Technology specialization must be taken for a letter grade. Electives may be taken credit/no credit, but any courses taken towards concentration requirements must also carry a letter grade.

1. Students are required to include the following foundation courses in their programs:
   a) Theory: Music 21, 22, 23
   b) History: Music 40, 41, and three from the series 140-145
   c) Analysis: Music 121 and two from 122A,B,C

2. Additionally, music majors must fulfill the following two performance requirements:
   a) Individual studies in performance: five quarters.
   b) Ensemble: five quarters of work in one or more of the department's organizations or chamber groups. Music 157 (Mariachi Band) does not satisfy this requirement.

3. Majors are required to pass a Piano Proficiency examination as a prerequisite for all higher-level theory and analysis courses (Music 121, 122A,B,C) and the 140 series. Offered at the end of the Autumn and Spring Quarters or at other times by arrangement, it consists of scales and arpeggios, performance of a simple tune (to be set by the examiner), sight reading, and the performance of prepared pieces (consult the Music office for details). Remedial skills are taught in Music 12A,B,C.

4. Majors must also pass an Ear Training Proficiency examination, which is part of the requirements to complete Music 23 or can be taken by arrangement, demonstrating a student's ability to hear music accurately and to perform it at sight. The successful completion of the examination is a prerequisite for all higher-level theory and analysis courses (Music 121, 122A,B,C).

RECOMMENDED SCHEDULE FOR THE MUSIC MAJOR

The following sample schedule shows how a student may include substantial work on a major in music while also fulfilling the University General Education Requirements during the freshman and sophomore years. The schedule also includes foreign language study, which is strongly recommended for all music majors and especially for those expecting to continue into graduate work in any area of music.

FIRST YEAR

MUSIC, SCIENCE, AND TECHNOLOGY

The specialization in Music, Science, and Technology is designed for those students with a strong interest in the musical ramifications of rapidly evolving computer technology and digital audio, and in the acoustic and psychoacoustic foundations of music. The program entails a research project under faculty guidance and makes use of the highly multidisciplinary environment at CCRMA. This program can serve as a complementary major to students in the sciences and engineering.

1. Students in the program are required to include the following foundation courses in their studies:
   a) Theory: Music 21, 22, 23, 121, 151 (4 units), 220A,B,C,D (4 units each); one-quarter course in Physics (14, 150, or equivalent)
   b) History: Music 40, 41, 154
   c) Applied: individual studies in performance (two quarters) or Music 192A,B; and Ensemble or 192C (five quarters)

2. Students in Music, Science, and Technology must also pass the Piano and Ear-training Proficiency examinations required of all Music majors.

MINORS

Minors in Music and in the Music, Science, and Technology specialization provide the student with a core of essential music courses in the disciplines which establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it.

CONCENTRATIONS

Concentrations are offered in performance, conducting, composition, or history and theory. In each concentration, 6 additional course units in the area of concentration beyond the basic requirements for the major are required. In addition, each concentrator registers for an independent project (4 units) in the senior year under faculty supervision, leading to a senior recital, a composition, a conducting project, or a senior research paper. Specific guidelines and information on the concentration tracks are available from the Department of Music office.
HONORS PROGRAM

Honors in music is awarded by the faculty to concentrators who have produced an independent project of exceptional quality and meet certain department standards in musicianship, scholarship, and academic standing. The conferral of honors is done solely through faculty consultation. Students do not petition for honors.

OVERSEAS STUDIES

Courses in music are often available at overseas Stanford programs, especially in Berlin and Moscow. See the Overseas Studies Program section of this bulletin immediately following this section for this year's listings. Music majors and minors should talk to the Department of Music undergraduate administrator prior to going overseas.

GRADUATE PROGRAMS

University requirements for the A.M., D.M.A., and the Ph.D. are described in the "Graduate Degrees" section of this bulletin. The following statements apply to all the graduate degrees described below, unless otherwise indicated.

Admission—Applicants are required to submit evidence of accomplishment (scores, tapes, and/or research papers, according to the proposed field of concentration) when they return the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 31 application deadline. All applicants, except those applying for the A.M. in Music, Science, and Technology (A.M./MST), are also required to submit a departmental entrance test in theory and musicianship, which is sent along with the application. All components of the application are due by December 31.

Department Examinations—All entering graduate students except those in the A.M./MST program are required to take: (1) a diagnostic examination testing the student in theory (counterpoint, harmony, and analysis) and the history of Western music, and (2) a proficiency examination in sight-singing and piano sight-reading given at the beginning of study in the department (usually the week before school begins). None of Stanford's required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of 'A,' 'B,' or 'Satisfactory' (a passing grade in an instructor-mandated pass/no credit course) in music courses taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

MUSIC

MUSIC

Foreign-Language Requirement—Reading knowledge of a language other than English, and the ability to translate into idiomatic English, must be demonstrated at the beginning of graduate study.

Study Program—Students may concentrate in composition, history, or performance practice. To be recommended for the A.M. degree, a candidate must complete a program of 36 units of graduate course work. Depending on the concentration, the A.M. project will be an investigatory essay, a composition, or a demonstration of performance supported by a written commentary on the performance practice involved.

Required are:

Course No. and Subject Units
Music 320. Introduction to Digital Audio Signal Processing and MIDI-Based Systems 4
Music 322. Compositional Algorithms, Psychoacoustics, and Spatial Processing 4
Music 323. Computer-Music Research 4
Music 324. Seminar in Computer-Music Research 4
Total 36

DOCTORAL PROGRAMS

Residence—The candidate must complete a minimum of three years of full-time (12 units or more per quarter) work. Generally, it takes more than three years due to part-time study during the second, third, and fourth years, when the student also acts as a Teaching Assistant or Predoctoral Research Affiliate for each concentration (see Residency under the "Graduate Degrees" section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate Registration (TGR), after they have reached the required residency units for that category.

Foreign Language Requirement—At the time of advancement to candidacy, all D.M.A. and Ph.D. students in the Computer-Based Theory and Acoustics program are required to have demonstrated a reading knowledge of a language other than English and the ability to translate into idiomatic English. Ph.D. candidates in Musicology are required to demonstrate proficiency in German and a similar competence in a second language, chosen from French, Italian, or Latin (or, on a case-by-case basis, another language, if it has significant bearing on the candidate's field of study).

Qualifying Examination—A written and oral examination for admission to candidacy is given just prior to the fourth quarter of full-time residence for D.M.A. and Ph.D. students in the Computer-Based Music Theory and Acoustics programs; for Ph.D. students in Musicology, the exams are given just prior to the seventh quarter of full-time residence. This exam tests knowledge of history, theory, repertory, and analysis.

Teaching—All students in the Ph.D. or D.M.A. degree programs, regardless of sources of financial support, are required to complete six quarters of their supervised teaching at half time. Music 280 is a required course for Teaching Assistants.

Basic Requirements—Doctoral programs in the Department of Music do not require the A.M. degree as a prerequisite. All students entering with only a bachelor's degree are required to take the following course (which is, however, required of all students in musicology, regardless of entering degree level):

Course No. and Subject Units
Music 321. Signal Processing Methods in Musical Acoustics 4
Total 4

All doctoral candidates must take:

301 A,B,C Music Analysis: Modal, Tonal, and Post-Tonal 12

DOCTOR OF MUSICAL ARTS IN COMPOSITION

The Doctor of Musical Arts (D.M.A.) degree in Composition is given breadth through collateral studies in other branches of music and a
relevant studies outside music as seems desirable. A minimum of 72 units of credit is required for the degree.

Examinations—A written examination in the candidate’s special area of concentration is given no later than the seventh quarter after passing the qualifying examination. A public lecture-demonstration is given during the last quarter of residence. It should be one hour in length, treating aspects of the final project.

Requirements—Besides those requirements listed above, candidates are expected to produce a number of works demonstrating their ability to compose in a variety of forms and for the common media: vocal, instrumental, and electronic music. If possible, the works submitted are presented in public performance prepared by the composer. Annual progress is reviewed by the composition faculty. The final project in composition is an extended work for instruments, voices, electronic media, or a combination of these. Music 323, Doctoral Seminar in Composition (16 units) is a required course.

DOCTOR OF PHILOSOPHY
The Ph.D. in Music can be pursued in two concentrations: Musicology or Computer-Based Music Theory and Acoustics.

Examinations—
1. Special Areas: a written and oral examination testing the student’s knowledge of music and research in the area of special concentration is given no later than the seventh quarter after passing the qualifying examination. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.

2. Ph.D. Orals: the University oral examination, taken once the dissertation is substantially underway, is an oral presentation and defense of dissertation research methods and results.

Requirements—Besides those requirements listed above, Music 221A and B, History of Music Theory (8 units), is a required course for both concentrations. Other requirements by concentration are:

MUSICOLOGY
Course No. and Subject  Units
269A. Seminar in Performance Practices  4
300A,B. History of Notation  8
310. Research Seminars in Musicology  24-40
312A,B. Aesthetics and Criticism of Music  8

* The requirement is for eight seminars of 3-5 units each. Students may petition to take up to two graduate seminars in other departments, in consultation with their adviser.

COMPUTER-BASED MUSIC THEORY AND ACOUSTICS
220A,B,C. Computer-Generated Music Seminars  12
220D. Research in Computer Music  12
320. The Discrete Fourier Transform  4

JOURNAL PH.D. IN MUSIC AND HUMANITIES
The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Music and Humanities. For a description of the program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES
(WIM) indicates that the course meets the Writing in the Major requirements.
(AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).
Many Department of Music courses have pages on the World Wide Web, which are linked to the Music home page (see above). Courses with Web pages at press time are noted in their entries below.

GENERAL
1. Introduction to Music—Techniques of active listening for an enhanced understanding of various musical styles. A awareness of the basic elements of music is applied to the appreciation of Western art music from the Middle Ages to the present, and to traditions of popular and non-Western music. Questions of musical form, style, expression, and meaning in different historical and cultural contexts. GER:3a (DR:7) 3 units, Spr (Hadlock)

2A. The Symphony  3 units, not given 1999-2000
2B. The Concerto  3 units, not given 1999-2000
2C. Opera—See web site.  3 units, not given 1999-2000
3C. Medieval Music  3 units, not given 1999-2000
3E. Franz Liszt and the Music of the Romantic Era  3 units, not given 1999-2000
4A. The Music of J. S. Bach  3 units, not given 1999-2000
4B. The Music of Mozart  3 units, not given 1999-2000
4C. The Music of Beethoven  3 units, not given 1999-2000
4E. Fantasies and Nightmares: Turn-of-the-Century Music and Culture in Paris and Vienna—Fin de siècle decadence and anarchy in Europe’s most vibrant capital cities. The era of Freud, WW I. Musicians, writers, and artists reflect the breakdown of earlier values. From the dreamworld of Debussy’s Pelléas et Mélisande (1902) to the alienation of Alban Berg’s Wozzeck (1923), via Ravel’s exotic fantasies, Schoenberg’s psychosexual nightmares, Stravinsky’s primitive violence, Satie’s irony. The context: expressionist, fauvist, and cubist painting; symbolist poetry and drama; the manic dancing of the Ballets Russes. An exploration of the birth pangs of the century that has just ended. 3 units, Spr (Code)

4F. The Music of Stravinsky  3 units, not given 1999-2000
4G. The Operas of Richard Wagner  3 units, not given 1999-2000
5A. Music in America  3 units, not given 1999-2000
7B. Explorations in World Music  3 units, not given 1999-2000
performers, and patrons. Women’s music in traditional cultures, such as Finnish and Greek lamenters; composers of Western art music from Hildegard von Bingen in the Middle Ages to Libby Larsen in the present; the “mystique” of performers from cloistered nuns to operatic divas like Maria Callas; self-made women in pop music from Bessie Smith to Madonna. GER:3a,4c (DR:7f)

3 units, Win (Hadlock)

14Q. Stanford Introductory Dialogue: Singing Gregorian Chant—Preference to sophomores. Singing a wide range of Gregorian chants from memory and notation is the basis for experimentation and reflection on the nature of music, singing, memory, pure melody, and the relation between music and words. The beginnings of music writing are experienced by testing historical notations and correlating them with the history of writing in general. Readings from medieval writers on music and from modern scholars who address the oral transmission of music, poetry, and musical cognition.

2 units, Win (Mahr)

15N. Stanford Introductory Seminar: Richard Wagner and The Ring of the Nibelung—Preference to freshmen. Introduction to the four “music dramas” that make up Wagner’s Ring cycle. Their mythological and literary sources, the role of music (and “leitmotif”) in projecting the structure and meaning of the drama, and their influence on musicians and other artists. Interpretations of the Ring from psychoanalytic, religious, and other perspectives. Selected critical readings, recordings, and videotapes of recent productions are a basis for discussion of musical, historical, and interpretive issues. Recommended: some ability to read music. GER:3a (DR:7)

3 units, Spr (Grey)

15Q. Stanford Introductory Seminar: The Music of J. S. Bach and his Time—Preference to sophomores. Study of the music of J. S. Bach, whose crowning achievements cap a revolutionary period of discovery, self-expression, and diversity in Western art of the early modern age (now called the Baroque era). The nature of the artistic revolution of the time; influences on the nature of Bach’s works. The quality and breadth of expression in his musical style. Careful listening to representative works, seminar discussions, class projects. Prerequisites: some acquaintance with Bach’s music, a willingness to develop listening skills. Recommended: musical training or knowledge. GER:3a (DR:7)

3 units, Win (Cohen)

16N. Stanford Introductory Seminar: Contemporary Music—Preference to freshmen. Critical listening of new music, focusing on varying conceptions of time and cross-cultural influences. Emphasis is on understanding composers’ intents and developing new listening strategies for the diverse musical languages of today. GER:3a (DR:7)

3 units, Spr (Hui)

16Q. Stanford Introductory Seminar: Ki ho’alu—The New Renaissance of Hawaiian Musical Tradition—Preference to sophomores. The Hawaiian tradition of Slack-Key Guitar, Hawaiian history and the culture surrounding its development, and subsequent evolution. Hands-on experience, reading, discussion, and workshops. Recommended: guitar-playing abilities. GER:3a,4b (DR:3 or 7)

3 units, Aut (Sano)

17N. Stanford Introductory Seminar: The Operas of Mozart—Preference to freshmen. Four of Mozart’s mature operas have held the stage uninterrupted since their premieres, the earliest works in the operatic repertoire never to go out of fashion. What accounts for this extraordinary staying power? Close reading of selected operas, with attention to the history of their composition, performance, and reception, and to their changing significance from Mozart’s time to ours. GER:3a (DR:7)

3 units, Win (K. Berger)

18. Jazz History

18A. Ragtime to Bebop (1900-1940)—From the beginning of jazz to the war years.

3 units, Win (Staff)
by harmonic and melodic dictation, sight singing, and other practical skills. See web site. Prerequisite: 21 or consent of instructor. GER:3a (DR:7)

4 units, Win (Grey)
Spr (Aquilanti)

23. Elements of Music III—Chromatic harmony, complex forms. Satisfactory passage of ear-training proficiency exam is a requirement for course completion. Passage of piano proficiency exam is strongly recommended at this time to continue in the theory sequence. See web site. Prerequisite: 22 or consent of instructor. GER:3a (DR:7)

4 units, Aut (Aquilanti)
Spr (McGinn)

40, 41. Music History—The history of Western art music from Gregorian chant to the present, stressing major styles and genres in their intellectual and institutional settings.

40. Music History to 1750—Prerequisite: 23. GER:3a (DR:7)

4 units, Win (Hadlock)

41. Music History since 1750—Prerequisite: 40. GER:3a (DR:7)

4 units, Spr (Grey)

121. Analysis of Tonal Music—Complete movements, or entire shorter works of the 18th and 19th centuries, are analyzed in a variety of theoretical approaches. Prerequisites: 23, successful completion of the ear-training and piano-proficiency examinations. GER:3a (DR:7)

4 units, Win (Hui)

122A. 18th-Century Counterpoint—Analysis and composition of two- and three-part inventions and three- and four-voice fugues. Use of keyboard, ear training, and sight singing underlies all written work. Prerequisites: 23, successful completion of the ear-training and piano-proficiency examinations.

4 units, Win (Hui)

122B. Harmonic Materials of the 19th Century—Analysis of 19th-century music, with compositional exercises based on 19th-century models. Prerequisites: 121 or consent of instructor, successful completion of the ear-training and piano-proficiency examinations.

4 units, Spr (Hui)

122C. Introduction to 20th-Century Composition—Projects in free composition based, at first, on 20th-century models analyzed in class. Final projects are performed in an informal setting. Prerequisites: 121 or consent of instructor, successful completion of the ear-training and piano-proficiency examinations.

4 units, Aut (Hui)

120. Introduction to Music Composition and Programming using MIDI Based Systems—Composition projects demonstrate participant’s own software for voicing and controlling MIDI synthesis. Extensive individual lab time required during week days. See web site. Prerequisite: consent of instructor. GER:3a (DR:7)

4 units, Spr (J. Berger)

123. Undergraduate Seminar in Composition—Weekly discussion on current trends in composition. May be repeated for credit. Prerequisite: 23 or consent of instructor.

3 units, Aut, Win, Spr (Aquilanti)

125. Individual Undergraduate Projects in Composition—Individual projects in creative work. May be repeated for credit. Prerequisites: music major, and at least one quarter of 123.

1-3 units, Aut, Win, Spr (Staff)

127. Instrumentation and Orchestration—Prerequisite: 23.

3 units, alternate years, given 2000-01

128. Advanced Musicianship—Prerequisite: 23, 127.

2 units, alternate years, given 2000-01

220. Computer-Generated Music

220A. Fundamentals of Computer-Generated Sound—Techniques for digital sound synthesis, effects, and reverberation. Topics: summary of digital synthesis techniques (additive, subtractive, non-linear, waveable, spectral-modeling, and physical-modeling); digital effects algorithms (phasing, flanging, chorus, pitch-shifting, and vocoding); and techniques for digital reverberation. Prerequisite: 22 or equivalent, or consent of instructor. Majors (undergraduate or graduate) must take for 4 units.

2-4 units, Aut (Chafe)

220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing—The use of high-level programming language as a compositional aid in creating musical structures. Studies in the physical correlates to auditory perception and a review of psychoacoustic literature. Simulation of a reverberant space and control of the position of sound within the space. Prerequisite: 220A.

4 units, Win (Lopez-Lecanzo)

220C. Seminar in Computer-Music Research—Individual projects in composition, psychoacoustics, or signal processing. See web site. Prerequisite: 220B.

4 units, Spr (Chafe)

220D. Research—Independent research projects in composition, psychoacoustics, or signal processing. May be repeated for credit. Prerequisite: 220C.

1-4 units, any quarter (Staff)

228. Advanced Musicianship—For graduate students. See 128.

2 units, alternate years, given 2000-01

HISTORY AND LITERATURE

140, 141, 142, 143, 144, 145. Seminars in Music History—Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year. May be repeated for credit.

140. Studies in Medieval Music—Prerequisite: 40.

4 units, given 2000-01

141. Studies in Renaissance Music—Prerequisite: 40.

4 units, given 2000-01

142. Studies in Baroque Music—Prerequisite: 40.

4 units, given 2000-01

143. Studies in Classic Music—Prerequisite: 41. (WIM)

4 units, Aut (K. Berger)

144. Studies in Romantic Music—Prerequisite: 41. (WIM)

4 units, Win (Code)

145. Studies in Modern Music—Prerequisite: 41. (WIM)

4 units, Spr (Hui)

146. Keyboard Fantasias of the 17th and 18th Centuries—See web site.

3 units, not given 1999-2000

147. Hindemith

3 units, not given 1999-2000

148. Shakespeare in 19th-Century Music

3 units, not given 1999-2000

149. Instrumental Music with Electronics

3 units, not given 1999-2000

based lab. Prerequisites: music performance/composition experience, basic algebra, and physics. GER:3a (DR:7)
3 units, Aut (Scavone)

151. Psychophysics and Cognitive Psychology for Musicians—Basic concepts and experiments relevant to the use of sound, especially synthesized, in music. Introduction to elementary concepts. Listening to sound examples. Emphasis is on salience and the importance of various auditory phenomena in music. Prerequisite: some basic knowledge of music. GER:3a (DR:7)
4 units, Win (J. Berger)

154. History of Electroacoustic Music—Survey of recent works and computer-based techniques. See web site. (WIM)
4 units, Spr (J. Berger)

240,241,242,243,244,245. Seminars in Music History—For graduate students. Topics as in 140-145. Participation in upper-class seminars, with additional in-depth research. Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year.

243. Studies in Classic Music
4 units, Aut (K. Berger)

244. Studies in Romantic Music
4 units, Win (Code)

245. Studies in Romantic Music
4 units, Spr (Hadlock)

PERFORMANCE

GROUP INSTRUCTION

Note—Special fee of $85 per quarter (subject to revision) for 12A,B,C (non-majors); 65A,B,D; 72, 73, 74, 75, 76, 77.

12A,B,C. Piano Class (Beginning)—(A=level 1; B=level 2; C=level 3)
Preference given to music majors.
1 unit, Aut, Win, Spr (Zerlang)

65A,B. Voice Class I, II—Group (7 students to a section) beginning voice for the non-major (A = level 1; B = level 2).
1 unit, Aut, Win, Spr (Giovannetti)

65C. Voice Class—For music majors and non-majors who are members of departmental choral ensembles.
1 unit, Aut, Win, Spr (Wait)

72,73,74,75,76,77. Small-Group Intermediate-Level Instruction—Minimum enrollment required. May be repeated for credit.
1 unit, Aut, Win, Spr

72A. Piano Class—For intermediate students. Prerequisites: 12C or equivalent, audition.
1 unit, Win, Spr (Zerlang)

72B. Organ Class—For beginning organ students who have keyboard skills.
1 unit, Win, Spr (E. Harrison)

72C. Harpsichord Class—For beginning harpsichord students who have keyboard skills.
1 unit, Win, Spr (Thornburgh)

72D. Jazz Piano Class—By invitation only; priority to majors and jazz-ensemble participants.
1 unit, Win, Spr (Sumares)

73. Voice Class—For intermediate students. Admission by audition.
1 unit, Win, Spr (Giovannetti)

74A. Flute Class
1 unit, Win, Spr (Ferguson)

74B. Renaissance Wind Instruments Class
1 unit, Win, Spr (Sumares)

76. Brass Instruments Classes
1 unit, Win, Spr (Code)

77. Percussion Class
1 unit, Win, Spr (Veregge)

INDIVIDUAL INSTRUCTION

172/272, 173/273, 174/274, 175/275, 176/276, 177/277. Individual Vocal and Instrumental Instruction—Special fee of $165 per quarter for majors and $330 for non-majors (subject to revision). Prospective students must demonstrate, by audition with the appropriate teacher, a minimum proficiency on instrument. Minimum proficiency requirements for each instrument are available at department office. 270-level courses are for advanced students. May be repeated for credit.
3 units, Aut, Win, Spr

172/272. Keyboard Instruments
172A/272A. Piano
172B/272B. Organ
172C/272C. Harpsichord
172D/272D. Jazz Piano
172E/272E. Early Piano

173/273. Voice
174/274. Stringed Instruments
174A/274A. Violin
174B/274B. Viola
174C/274C. Violoncello
174D/274D. Contrabass
174E/274E. Guitar
174F/274F. Harp
174G/274G. Baroque Violin
174H/274H. Baroque Violin

175/275. Woodwind Instruments
175A/275A. Flute
175B/275B. Oboe
175C/275C. Clarinet
175D/275D. Bassoon

175E/275E. Renaissance Wind Instruments
ENFORCE

An audition is required for admission to any University musical ensemble; auditions are announced during the registration period in Autumn Quarter. Audition is by appointment in Winter and Spring Quarters: contact the ensemble director. Membership is open to all students including those who do not register for credit, although these courses may be repeated for credit.

157. Introduction to Mariachi Ensemble—Introduction to the practice of mariachi music, tradition, and history. Focus is on learning traditional sones, rancheras, huapangos, and boleros. Requirements: ability to play, and access to instruments—violin, trumpet, guitar, vihuela, and guitarron. (AU)

1 unit, Aut, Win, Spr (Rodriguez)

158. Contemporary Performance Ensemble—Alea II. A workshop for performance of works by Stanford and contemporary composers. Rehearsals arranged according to performance requirements. One concert per quarter.

1 unit, Aut, Win, Spr (Lemon)

159. Early Music Singers—Small choir specializing in medieval, Renaissance, and early Baroque vocal music. One major concert per quarter.

1 unit, Aut, Win, Spr (Mahrt)

160. University Orchestra—70- to 100-member ensemble performing major orchestral works; minimum one concert per quarter.

1 unit, Aut, Win, Spr (Lemon)

161. University Bands

161A. Symphonic Band—40- to 50-member ensemble performing transcriptions of symphonic, brass band music, and repertoire composed specifically for symphonic band. One concert per quarter.

1 unit, Aut, Win, Spr (Aquilanti)

161B. Jazz Orchestra—Big-band format. Repertoire drawn primarily from the contemporary jazz-ensemble literature. One formal concert per quarter.

1 unit, Aut, Win, Spr (Berry)

Note—The Leland Stanford Junior University Marching Band is now under the aegis of the Department of Athletics. See the “Athletics, Physical Education, and Recreation” section in this bulletin.

162. Symphonic Chorus—100- to 150-voice ensemble, performing major choral masterworks with orchestra. One concert per quarter.

1 unit, Aut, Win, Spr (Sano)

163. University Choir—Official choir of Memorial Church, furnishing music for Sunday services and special occasions in the church calendar.

2 units, Aut, Win, Spr (Wait)

165. Stanford Chamber Chorale—Select 24-voice chamber ensemble, specializing in virtuoso choral repertoire from all periods of Western classical music.

1 unit, Aut, Win, Spr (Sano)

167. University Singers—Mixed-repertoire chorus, performing a variety of choral repertoire from all periods of Western classical music and from other world cultures.

1 unit, Aut, Win, Spr (Sano)

169. Stanford Taiko—Select North-American taiko ensemble, performing traditional and contemporary repertoire for Japanese drums. Multiple performances in Winter and Spring Quarters, also touring; instrument construction and maintenance.

1 unit, Aut, Win, Spr (Sano)
170. Collaborative Piano—Performance class in a workshop setting. Techniques of collaboration with vocalists and instrumentalists in repertoire ranging from songs and arias to sonatas and concertos. Prerequisite: private-lesson proficiency level in piano, or consent of instructor.
   1 unit, Aut (Dahl)

171. Chamber Music—Open to students at the private-lesson-proficiency level to hone ensemble skills, preferably while also taking private lessons. Small combinations for strings, winds, and keyboard instruments. Admission by audition.
   1 unit, Aut, Win, Spr (Staff)

RECORDING

192. Theory and Practice of Audio Recording
192A. Foundations of Sound Recording Technology—Preference given to music majors with MST specialization. Topics: elementary electronics, physics of sound transduction and microphone operation, selection and placement; mixing consoles; connectors and device interconnection; grounding and shielding; principles of analog magnetic recording; operation maintenance of recording equipment; basic principles of recording engineering. Enrollment limited. Prerequisites: 151; algebra, physics basics.
   3 units, Aut (Kadis)

192B. Advanced Sound Recording Technology—Topics: noise reduction techniques; dynamics and time-delay audio effects; principles of digital audio; disk- and tape-based digital recorders; digital audio workstations and editing; advanced multitrack techniques; SMPTE and MIDI time code and device synchronization; MIDI sequencing and synchronization. Prerequisite: 192A.
   3 units, Win (Kadis)

192C. Session Recording—Independent engineering of recording sessions. May be repeated for credit. Prerequisites: 192A,B.
   1-2 units, Aut, Win, Spr (Kadis)

DIRECTED READING AND RESEARCH

198. Concentrations Project—For concentration-program participants only. Must be taken in senior year.
   4 units, Aut, Win, Spr (Staff)

199. Independent Study—For advanced undergraduates and graduate students who wish to do work outside the regular curriculum. Before registering, student must present specific project and enlist a faculty sponsor.
   1-4 units, Aut, Win, Spr (Staff)

GRADUATE RESEARCH AND SPECIAL STUDIES

200. Graduate Proseminar—Required of first-year graduate students in music. Introduction to research in music, bibliographical materials, major issues in the field, philosophy, and methods in music history. Guest lecturers and individual research topics.
   4 units, Aut (K. Berger, Nagy)

   221A. 4 units, Win (Hinton, Plebuch)
   221B. 4 units, Spr (Hinton, Plebuch)

252. Seminar: Topics in Computer Music—See web site.
   3 units, Aut (C. Chafe) (enroll in Comp. Sci. 377A)
   1-3 units, Win (J. Berger)

253. Musical Information: An Introduction—The kinds of musical information used in sound, graphical, and analytical applications. Emphasis is on independent concepts and principles in music representation and research objectives (repertory analysis, performance analysis, theoretical models, similarity, and stylistic simulation). Examples from Western art music. Prerequisites: one year of music theory or equivalent; "methods" courses in such fields as musical analysis, symbolic systems, information processing, sound engineering, or intellectual property issues.
   1-4 units, Win (Selfridge-Field)

254. Seminar: Musical Representation and Computer Analysis—Participants explore the issues introduced in 253 in greater depth and take initiative for research projects related to a theoretical or methodological issue, a software project, or a significant analytical result. Prerequisite: 253 or consent of instructor.
   1-4 units, Spr (Selfridge-Field)

269A. Seminar in Performance Practices—Performance techniques, theoretical principles, aesthetics, and musical resources of various historical periods.
   4 units, Spr (Plebuch)

269B. Research in Performance Practices—Directed reading and research.
   1-5 units, Aut, Win, Spr (Staff)

280. TA Training Course—Required for doctoral students serving as Teaching Assistants. Orientation to resources at Stanford, guest presentations on the principles of common teaching activities, supervised teaching experience. Students should take this course in the second year, as they begin teaching. See web site.
   1 unit, Aut (Falk)

299. Master of Arts Project
   4 units, Aut, Win, Spr (Staff)

300A, B. Seminar in Notation—Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.
   300A. Medieval Notation
   4 units, not given 1999-2000
   300B. Renaissance Notation
   4 units, Aut (Mahrt)

   301A. Modal Analysis
   4 units, Spr (Mahrt)
   301B. Tonal Analysis
   4 units, Aut (Barth)
   301C. Post-Tonal Analysis
   4 units, Win (Staff)

302. Research in Musicology—Directed reading and research.
   1-5 units, Aut, Win, Spr (Staff)

310. Research Seminar in Musicology—Specialized topics vary each quarter.
   3-5 units, Aut (Plebuch)
   Win (Berger)
   Spr (Mahrt)

312A, B. Aesthetics and Criticism of Music—Selected primary text focusing on the nature, purposes, and uses of music and other arts.
   312A. Ancients and Moderns: Plato to Nietzsche
   4 units, not given 1999-2000
   312B. Contemporaries: Heidegger to Today
   4 units, not given 1999-2000

319. Research Seminar on Computational Models of Sound Perception
   1-3 units, Aut, Win, Spr (Slaney)

478
320. Introduction to Digital Audio Signal Processing and the Discrete Fourier Transform (DFT)—Introduction to the mathematics of digital signal processing and spectrum analysis for music and audio research. Topics: complex numbers, sinusoids, spectra, aspects of audio perception, the DFT, and basic Fourier time-frequency relationships in the discrete-time case. See web site.

2-4 units, Aut (Scavone)

321. Readings in Music Theory
1-5 units, Aut, Win, Spr (Staff)

323. Doctoral Seminar in Composition—Illustrated discussions of compositional issues and techniques. Students present their own work to the class, and individually to the instructor.
4 units, Aut, Spr (Staff)

Win (Harvey)

325. Individual Graduate Projects in Composition
1-5 units, Aut, Win, Spr (Staff)

341. Ph.D. Dissertation
1-9 units, Aut, Win, Spr (Staff)

399. D.M.A. Final Project
1-9 units, Aut, Win, Spr (Staff)

420. Applications of the Fast Fourier Transform (FFT) in Digital Audio Signal Processing—Spectrum analysis and signal processing using the FFT, with emphasis on audio applications. Topics: FFT windows; cyclic and acyclic convolution; zero padding and other spectrum analysis parameters; FIR filter design; phase and channel vocoders; the overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and synthesis; tracking sinusoidal peaks across FFT frames; modeling time-varying spectra as sinusoids plus filtered noise; FFT-based sound synthesis, brief overviews of and introductions to transform coders (as used in MPEG audio compression), perfect-reconstruction filter banks, and wavelet transforms. See web site. Prerequisite: 320 or Electrical Engineering 261, or equivalent. Recommended: Electrical Engineering 264.
2-4 units, Win (Boix)

421. Signal Processing Methods in Musical Acoustics—Computational models of musical instruments, primarily in the wind and string families, based on physical models implemented using signal processing methods. The models are designed to capture only the “audible physics” of musical instruments using computationally efficient algorithms. Topics: mass-spring systems and their discrete-time simulation, sampled traveling waves, lumping of losses and dispersion, delay-line interpolation methods, applications of allpass filters and lattice/ladder digital filters in acoustic models, models of winds and strings using delay lines, scattering junctions, digital filters, and nonlinear junctions implementing oscillation sources such as bow-string and reed-bore couplings. See web site. Prerequisites: 150 or equivalent; Electrical Engineering 264.
2-4 units, Spr (Smith)

422. Perceptual Audio Coding
1-3 units, not given 1999-2000

423. Graduate Seminar in Signal Processing Research—See web site.
1-4 units, not given 1999-2000

OVERSEAS STUDIES

The following courses are taught overseas at the campus indicated. Students are encouraged to discuss with their major advisers on campus which courses would best meet individual educational needs. Descriptions can be found in the “Overseas Studies Program” section of the bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

BERLIN

3M. Musik, Kultur, Gesellschaft
4 units, Win (Lucchesi)

MOSCOW

178/278. Individual Vocal and Instrumental Instruction
3 units, Aut (Orbelian)

OVERSEAS STUDIES PROGRAM

Director of the Program: Russell A. Berman

Stanford Program in Berlin
Director: Karen Kramer
Associate Director: Maria Biege
Faculty: David Beach, Hildegard Bedarff, Ulrich Brückner, Jane Daf-fy, Dubravka Friezel-Kopecki, Therese Hörmiger, Cord Jakobeit, Wolf-D. Junghans, Ingo Klein, Joachim Lucchesi, Franz Necken-ig, Orrin Robinson, Andreas Ryll, Sylke Tempel, Jochen Wohlfel

Stanford Program in Buenos Aires
Faculty: Sergio Berenzstein, Alfredo Canavesi, Ezequiel Gallo, Jorge Liernur, Diego Petrecolla, Roberto Russell

Stanford Program in Florence
Director: Ermelinda Campani
Faculty: Riccardo Bruscagli, Antonello La Vergata, Giuseppe Mammarella, Leonardo Morino, Roy King, Valdo Spini, Timothy Ver-don

Stanford Center for Technology and Innovation (SCTI)—Kyoto

Kyoto Center for Japanese Studies (KCJS)
Director: Terry MacDougall
Faculty: Monica Bethe, Patricia Fister, Charles Fox, Koichiro Fujikura, Toshiko Fujiwara, Johannes Gumbrecht, Fujiko Hotta, Takemori Inoki, Ikuo Kume, Larry Leifer, Takayuki Marakami-Yokota, Shuji Matsumo, Junko Minamoto, William Rapp, Henry D. Smith II, Haru-ka Ueda, Mariko Uemiya, Chihhiro Yamaoka

Stanford Program in Moscow
Director: Maxim Bratersky
Associate Director: Alexander Abashkin
Faculty: Tatiana Boldyrev, Terence Emmons, Zinaida Kuznetsova, Vladimir Mau, Constantine Orbelian, Kirill Rogov, Inn Shiman-skaya

Stanford Program in Oxford
Director: Geoffrey Tyack
Faculty: George Brown, John Darwin, Paul David, Philip Davies, Michael Gearin-Tosh, Theodore L. Glasser, Ruth Mateer, Tina Miller, Susan Treggiari, Stewart Wood, Jonathan Wordsworth

Stanford Program in Paris
Director: Estelle Halevi
Faculty: Corinne Balleix, John Bender, Frédéric Charrillon, John Felstiner, Mary Felstiner, Chantal Georgel, Isaac Getz, Alexandra Giraud, Marie Grèé, Marc Lazar, Todd Lubart, Nonna Mayer, Florence Mercier, Isabelle Tarde

Stanford Program in Puebla
Dean of International Affairs: Ofelia Cervantes
Faculty: Enrique Cárdenas, Gonzalo Castañeda, Timothy Knab, Isidro Morales,

Stanford Program in Santiago
Director: Edmundo Fuenzalida
Faculty: Ricardo F'erench-Davis, Ernesto Hajek, Jorge Heine, Gilbert Masters, Michael McWilliams, Oscar Muñoz, Francisco Rojas, Bernardo Subercaseaux, Teresa Valdés

Stanford University encourages students to explore the opportunities of study abroad and to achieve cultural literacy through living, learning, and working in another country. Overseas Studies maintains centers in Berlin, Buenos Aires, Florence, Kyoto, Moscow, Oxford, Paris, Pueb-
la, and Santiago. Students may enroll for one or two quarters at most centers and for three quarters in Berlin, Kyoto–KCJS, Oxford, and Santiago. Course offerings from engineering, humanities, sciences, and social sciences provide full Stanford credit. Most courses are also reviewed by specific departments and count toward major requirements. Courses that fulfill General Education Requirements in Area 3 or Distribution Requirements in Areas 7 and 9 are usually offered at every center. Academic or paid internships are available at the Berlin, Florence, Kyoto–SCTI, Moscow, and Paris centers. Research opportunities are available in various formats at different centers. Minimum required language preparation varies among centers: Moscow offers a first-year intensive language course for those without prior Russian study; Berlin requires two quarters; Kyoto–SCTI requires two quarters for students in technical majors and five quarters for those in non-technical majors; Florence, Paris, and Santiago require three quarters for Autumn Quarter entry and four quarters for Winter Quarter entry; Buenos Aires, Kyoto–KCJS, Puebla, and Santiago (Spring Quarter) require more advanced language preparations. Depending on language proficiency, students may attend local universities in Berlin, Florence, and Paris.

Students remain registered at Stanford and pay regular tuition, along with the Overseas Studies fee which is based on Stanford room and board rates. Regular financial aid applies, and may be increased to cover additional costs. At most centers, students live in a homestay in the host culture, or with local students. Overseas Studies, located on the first floor of Sweet Hall, has a full-time staff and peer advisers to assist students in planning their programs abroad. The information following, while accurate at the time of printing, is subject to change. Consult the Overseas Studies Program web site at http://www-osp.stanford.edu for updated information.

**COURSES**

(AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

International Relations has approved a number of Overseas Studies courses for major credit; these are listed in the "International Relations" section of this bulletin.

**BERLIN**

3M. Musik, Kultur, Gesellschaft—(Same as Music 3M.) The musical legacies of the last 200 years in Berlin in its changing cultural and political contexts. The appropriation of music for ideological purposes in the Nazi period, lost traces of performance spaces, music cultures of Real Socialism. Berlin provides unparalleled opportunities to begin or deepen an appreciation of performance music. Language credit for advanced German students. GER:3a (DR:7)
4 units, Win (Lucchesi)

30. Berlin vor Ort: A Field Trip Module—The cultures of Berlin as preserved in museums, monuments, and architecture. Berlin's cityscape as a narrative of its history from baroque palaces to vestiges of E. German communism, from 19th-century industrialism to grim edifices of the Sachsenhausen concentration camp. Competing political agendas and the criteria of historical selection in monument-alteration and removal, renaming streets, and structuring the capital city. Focus is on the interface between sociopolitical life and artistic expression. (In German) (AU) 1 unit, Aut, Win, Spr (Neckenig)

37. Web Projects—Plan and develop a multimedia web project based on academic work associated with a concurrent course. Prerequisite: knowledge of web design or preparation on home campus.
1 unit, Aut, Win, Spr (Kramer)

38. Research Module—Continuation of 177A, below. Research is under the guidance of a local specialist and may be in libraries, archives, research institutes and/or in the field. Prerequisite: German Studies 177A.
3-4 units, Spr (Kramer)

46. The German Economy: Past and Present—The history of the German economy in the five different states systems: the Wilhelmian Empire, the Weimar Republic, the Third Reich, the post-war "empire" of the GDR, and the free market economy of the FRG. The processes of economic transition since unification and the current challenges faced by united Germany as Europe's first economic power and the world's second largest export nation. GER:3b (DR:9)
4.5 units, Aut (Klein)

47. Individualized Readings in German—Directed reading in the fields of students' choice. Potential disciplines include economic, political science, international relations, and business, especially as it is reflected in German newspapers, magazines, and television. 1-3 units, Aut (Robinson)

53. Seminar in Manufacturing Processes: Technology, History, Commerce
Spr (Beach)

57. Gender and Cultural Discourses in Modern German Literature—Analysis of literary texts based on the hypothesis that gender identity is a culturally shaped category, susceptible to historical development and subject to change. How gender identity varies as a cultural and social role, and how it is discussed and/or undermined in German literature of the past 30 years. GER:4c (DR:7)
4 units, Spr (Hörnigk)

58. Contemporary German Political Economy—Recent reform trends and debates in Germany and Continental Europe: the welfare state, private vs. public management, mandatory vs. voluntary membership EU, insurance vs. redistribution. Health care policy, social security, welfare, labor market flexibility. GER:3b (DR:9)
4-5 units, Spr (Ryll)

101A. Contemporary Theater—(Same as Drama 101A, German Studies 195.) Texts of plays are supplemented by theoretical writings of respective playwrights and background reading in theater history and theory. Weekly theater trips, a tour of backstage facilities, attendance at a rehearsal, and discussions with actors, directors, or other theater professionals. (In German) GER:3a (DR:7)
5 units, Spr (Kramer)

103. Manufacturing and Design—(Same as Mechanical Engineering 103.)
4 units, Spr (Beach)

117V. The Industrial Revolution and its Impact on Art, Architecture, and Theory—(Same as Science, Technology, and Society 117V. Art and Art History 173Y.) The interlinking of architecture and painting with technological and scientific development. In a period of industrial revolution, the dominance of positivist thinking and empirical method promotes in the cultural and artistic realm a response of euphoric acceptance or emphatic rejection. Artwork as a social, cultural, spiritual "symbol" is a response to scientific and technological development, yet claims timeless validity. Topics: relationships between Idealism and Realism, photography and painting, Historicism and Functionalist Expression and Dadaism, Futurism and New Sobriety, Functionalism and Nazi Classicism. GER:3a (DR:7)
5 units, Aut (Neckenig)

120V. Industry, Technology and Culture, 1780-1945—(Same as History 105V; Science, Technology, and Society 120V.) Technological innovations of the past 200 years have defined the modern world; human inventions have left indelible marks on culture and civilization. The dialectical relationship between material, intellectual, and social cultures on, e.g., modern materials, transport and communications systems, micro- and macrocosms discovered in physics, chemistry, and astrophys.
my, and the revolutionizing influence of photography, film, and television. GER:3a (DR:7)

4 units, Win (Neckenig)

12P. Environmental Policy in Europe—(Same as Public Policy 122P, Human Biology 125X.) Introduction to the actors, ongoing negotiations, and institutions created in Europe after the beginning of the 1970s to stem the tide of environmental degradation. Environmental problems and politics in: Germany, the nation states of the EU, and between East and West in Europe. The central aspects of international environmental affairs in a regional setting. GER:3b (DR:9)

4-5 units, Spr (Iakobiet)

123. The Brothers Grimm and their Fairy Tales—(Same as German Studies 123.) Readings of 15-20 fairy tales and theoretical treatments of the Grimms’ fairy tales. Sources for and authenticity of the tales, their reception at different times and in different cultures, the values represented in the tales, portrayals of gender roles, family values, etc. Material in other media (film and visual arts). (In German) GER:3a (DR:7)

4 units, Aut (Robinson)

129X. One Market, One Money, One Europe?—(Same as Economics 129X.) Insight into the European Monetary Union (EMU), started in the late 90s. The theoretical background and historical path from a single market to a common currency. The impact of the EMU on the financial, social, and political aspects at the European and the member states level. Empirical data is analyzed. The role of new institutions and frameworks for decision making in the European Union (EU). GER:3b (DR:9)

4-5 units, Win (Brückner)

143U. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity—(Same as Science, Technology, and Society 119V; Urban Studies 143U; Art and Art History 174; History 229V.) Urban Berlin since the Gründerzeit. Architectural “corrections” attempted in post-Communist E. Berlin and on the drawing boards. The dual perspective of the major architectural movements of the century and the shifting roles of Berlin during the unifications of 1871 and 1990. GER:3a (DR:7)

4 units, Spr (Neckenig)

145. Multiculturalism in Comparative Perspective: Germany and Israel—(Same as Sociology 145.) Despite the reality of multicultural Germany, the adjective “German” continues to refer not to formal citizenship, but to “Kulturation,” expressing the common culture, language, and history of the nation. In contrast, Israel explicitly defines itself as an immigration land. Since its founding, hundreds of thousands of immigrants have become Israelis under the “Re-immigration Law,” which grants automatic citizenship to Jews. The history of the two countries, comparing their self-definitions and the challenges posed by modern migration. New conceptions of multi-culturalism emerging in these contexts.

4 units, Win (Tempe)

174. Sport-Frei! Sports and Modernity in Comparative Perspective—(Same as German Studies 174.) Introduction to the theory and history of mass spectator sports and their role in modern societies, especially in Germany. Comparisons with U.S. and Britain highlight the peculiarities of sports in German culture and create a vantage point to understand German culture, past and present. Concepts of competing and fighting, rule observance, and the role of sports in W. and E. Germany before and after unification. The relationship between sports and politics, including analysis of 1936 Berlin Olympic Games.

4-5 units, Aut (Junghanns)

177A. Culture and Politics in Modern Germany—(Same as German Studies 177A.) Key paradigms of modern Germany: German romanticism, the belated state and national identity, National Socialism and the Holocaust, Germany divided and unified. Literary, analytical, and theoretical texts; newspaper articles; film/TV, oral history. GER:3b (DR:9)

4-5 units, Win (Kramer)

179B. German Film and its European Context—(Same as German Studies 179B.) Cinema, as a mass-reception form of art, emerged in a Europe torn by “the Great War” and the revolutions of 1917-1918. The representations of the salient socio-political conflicts and discourses of the century in German and European film of the period. GER:3a (DR:7)

4 units, Aut (Kramer)

MULTISITE COURSES

91. Literary Institutions: A Comparative Approach—(Same as Comparative Literature 91, German Studies 126A.) Experimental course taught simultaneously at several different sites with instructor based at Stanford. Institutional structures and contexts for literature in different cultures. How literature is presented to its public at various levels; literary criticism, presentation, and choice of texts in schools and universities; national literature. Students work in project groups in local sections while communicating with the instructor and students at distant sites through electronic discussion groups. Group projects include comparison of literary institutions in different cultures.

4 units, Win (Berman)

108R. Religion in Culture: A Comparative Approach—(Same as Religious Studies 108R.) Experimental course taught simultaneously at several different sites with instructor based in Florence. The different ways religion forms culture and is formed by it. Theoretical approaches to the subject are followed by projects in the context of different cultures. Possible topics: the relation of religion to the state or depictions of sacred themes in art and architecture. Students work individually or in groups at local sites while communicating with instructor and other students at distant sites via the electronic discussion groups.

4 units, Aut (Reichard)

GERMAN LANGUAGE PROGRAM

3B. German Language and Culture—(Same as German Studies 3B.) Grammar, composition, and conversation. Increases students’ fluency in German as rapidly as possible to help students take advantage of the many opportunities in Berlin. Corequisite: German Studies 100B.

4 units, Aut, Win, Spr (Staff)

22B. Berliner Geschichte(n), Second Year German—(Same as German Studies 22B.) Knowledge of German is improved by reading texts in history, literature, politics, and economics.

4 units, Aut, Win, Spr (Staff)

100B. Aktives Deutsch—(Same as German Studies 100B.) Required for students enrolled in German Studies 3B; open to students in other German language classes. Active usage of German, including vocabulary from a variety of fields and disciplines, and discussion on current issues.

2 units, Aut, Win, Spr (Staff)

ON VIDEO_TAPE

See the “School of Engineering” section of this bulletin for course descriptions.

40B. Introductory Electronics—(Same as Engineering 40B.) GER:2b (DR:6)

5 units, Aut, Win, Spr (Masters)

50B. Introductory Science of Materials—(Same as Engineering 50B.) GER:2b (DR:6)

4 units, Aut, Win, Spr (Brandt)

BUENOS AIRES

1. Contemporary Political History of Argentina—The themes and problems of the contemporary political history of Argentina. Students select topics to investigate throughout the term.

units to be announced, Spr (Bersenbein)
2. Argentina's Foreign Policy—Interdisciplinary analysis of Argentina's foreign policy from historic perspective: continuities and ruptures. Structural ties between Argentina and its principle international partners throughout the 20th century. The connection between foreign policy and the type of government and/or political regime. The relation between foreign policy and the dominant political culture and belief systems of decision-makers. Analysis of present-day foreign policy in Argentina and its political and economic agreements. Institutional plans for constitutional control of foreign policy. Bilateral and multilateral relations and alignments in historical perspective.

units to be announced, Spr (Russell)

3. Themes in the Political Economy of Argentina—The problems of the contemporary political economy in Argentina. Students select topics to investigate throughout the term.

units to be announced, Spr (Petrecolla, Canavese)

4. Politics and Society in Argentina in the 19th and 20th Centuries—The conservative republic. Economic growth and rebellion and the question of universal suffrage. The Catholic Church and politics in Argentina. The formation of contemporary political parties and the crisis of the conservative order. Politics between 1930-43 and the military coup of 1943. The rise of Peronism, his government (1946-55), and political difficulties in the post-Peronist period. The experience of development. The government of the UCRP. The Argentine Revolution and its original origins of the politically key mental health de-institutionalization move—Important psychosocial differences in psychiatric treatment between the American and Italian mental health delivery systems. The psychoanalytic and the U.S. to understand the resulting Italian system within a more realistic understanding. Major and new rules chosen. Comparisons with other European democracies and the U.S. to understand the resulting Italian system within a more consensual or majoritarian direction. The main features of the crisis are analyzed and the changes and choices assessed. (In Italian) GER:3a (DR:7)

5 units, Win (Campagnoli)

5. Art and Architecture of Argentina—Theories in urban development in the 20th century, heritage preservation, public and commercial architecture.

units to be announced, Spr (Gallo)

FLORENCE

11. Italy: Crisis, Change, and Choice—Recent changes in the traditional parties, the breakdown and disappearance of the Christian Democratic and the Socialist parties, establishment of new actors, and the stronger role of unions have been complemented by a new electoral system and a leftist cabinet. Important changes to the constitution have been decided and new rules chosen. Comparisons with other European democracies and the U.S. to understand the resulting Italian system within a more consensual or majoritarian direction. The main features of the crisis are analyzed and the changes and choices assessed. (In Italian) GER:3b (DR:9)

5 units, Win (Molino)

34. Italian Psychiatry: Contrasts with the U.S. Mental Health System—Important psychosocial differences in psychiatric treatment between the American and Italian mental health delivery systems. The origins of the politically key mental health de-institutionalization movement in Italy. Main issues: the existential-phenomenological school of psychiatry. Works: Jaspers, Laing, Ruesch. Visit local psychiatric clinics in Florence and Pisa. GER:3b (DR:9)

4 units, Aut (King)

35. Aesthetics, Style, and Psychopathology—Theories of Benedetto Croce and their application in understanding the relationship between the process of artistic creation and affective expression in visual artists. Psychobiological material of Italian Renaissance artists such as Fra Angelico, Botticelli, Michelangelo illustrate how personality and affect can be reflected in visual style. Croce's theories of art expression are contrasted to neoclassical and romantic models of art production. GER:3a (DR:7)

4 units, Aut (King)

36. Modernist Italian Cinema—Cinema is the embodiment of modernity. It develops in the wake of modernism proper, but can be understood as one of its technological and aesthetic expressions. Topics: cinema's archeology in Futurist texts and theories with their nationalistic politics, and their iconoclastic, radical, and interdisciplinary re-thinking of the language and form of all the arts (Marinetti, Pisanelli, D'Annunzio).

GER:3a (DR:7)

4 units, Aut (Campagnoli)

52. Realism, Utopia, Myth, and Society in Italian Cinema: Bernardo Bertolucci, Pier Paolo Pasolini, and Federico Fellini—(Same as Communication 52, Italian 190F.) Major films in the careers of Bertolucci, Pasolini, and Fellini are used to assess the ways in which realism, myth, utopia, and society are theorized and problematized. Topics: ideology and representation, class and specificity of intellectual labor, canonicity, the creation of a personal mythology of imagination, memory, and reality. (In Italian) GER:3a (DR:7)

5 units, Win (Campagnoli)

106V. Italy: From an Agrarian to a Post-Industrial Society—(Same as History 106V, Political Science 158X.) Italian history from the Risorgimento to the present. Italian society, crises, evolution, values, and the relation to the political institutions existing in different periods. Ideologies and political doctrines, and historical events which contributed to the formation of modern Italy's predominant subcultures: Catholic and Socialist. (In Italian) GER:3b (DR:9)

4 units, Aut (Mammarella)

111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence—(Same as Art and Art History 111Y.) Lectures, site visits, and readings reconstruct the circumstances that favored the flowering of architecture, sculpture, and painting in Florence and Italy, late 13th to early 16th century. Emphasis is on the classical roots; the particular relationship with nature; the commitment to human expressiveness; and the rootedness in real-world experience, translated in sculpture and painting as powerful plasticity, perspective space, an interest in movement and emotion. GER:3a (DR:7)

4 units, Win (Verdon)

112Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization—(Same as Art and Art History 112Y.) The history, history of art and symbolism of the two principal monuments of Florence: the cathedral and the town hall. Lectures, site visits, and readings grasp the point of common meaning and ideological difference between the religious and civic symbols of Florence's history from the time of Giotto and its first Guelph republic to Bronzino and Giovanni da Bologna and the Grand Duchy. GER:3a (DR:7)

4 units, Win (Verdon)

160F. The Making of Literary Identity: From Dante to Machiavelli—(Same as Italian 160F.) Italian Renaissance literature is placed in the context of the Renaissance culture by relating texts and authors to their historical and ideological issues: Petrarch, Boccaccio, Machiavelli, Guicciardini, Castiglione, Ariosto, and Tasso. Main issues: the peculiar relation in Italy between geography, language, and literary genre; the foundation of fundamental modes of writing such as lyric poetry, political-historiographic discourse, chivalric romance; the polycentric nature of Italian Renaissance literature; and the status of the writers with regard to questions of gender. (In Italian) GER:3a (DR:7)

4-5 units, Win (Bruscagli)

178F. The Integration of Europe—(Same as Italian 178F.) The historical, political, economic, and cultural aspects of the process of European integration from a general perspective and from the specific point of view of Euro-U.S. relations. The euro, the EMU, and what it means for the nations which have accepted it. Questions of the future enlargement of the EU to E.-Central European countries. The role of NATO, WEU, and the construction of a common European foreign and security policy in the wake of the Amsterdam Treaty. A forecast for the election of the next
European Parliament and appointment of the European Commission. GER:3b (DR:9) 4-5 units, Aut (Spinelli)

215V. The Scientific Revolution: From the Renaissance to the 18th Century—(Same as Science, Technology, and Society 125V; Philosophy 145P; History 215V.) Focus is on crucial changes in man’s view of nature and himself, ca. 1400 to 1750. The interplay between ideas and the ways of thinking across disciplinary boundaries. Scientific developments as major intellectual changes. Topics: Renaissance man, the new attitude toward machines and technology, the birth of a new physics, medicine and natural history, the artist and the scientist. GER:3a (DR:8) 4-5 units, Win (La Vergata)

MULTISITE COURSES

See the “Berlin” section of Overseas Studies Program for course descriptions.

91. Literary Institutions: A Comparative Approach—(Same as Comparative Literature 91, German Studies 126A.) 4 units, Win (Berman)

108R. Religion in Culture: A Comparative Approach—(Same as Religious Studies 108R.) 4 units, Aut (Reichard)

ITALIAN LANGUAGE PROGRAM

The Italian language program has the goal of engaging all students in scholarly work in Italian. Students choose from the following alternatives:

1. Enroll in one of the courses conducted primarily in Italian.
2. Enroll in directed reading conducted primarily in Italian.
3. Enroll in a course at the University of Florence. (These courses typically run from October to mid-March, so this option is available only to two-quarter students.)
4. Complete a term paper (for any course) that is written in Italian and draws extensively on Italian-language sources. Students writing papers in Italian for English-language courses must discuss their decision with the director and the professor teaching the course by the end of the fourth week of the quarter.

All students are encouraged to work with the language resource person offering group and individualized support for language issues.

ON VIDEOTAPE

50F. Introductory Science of Materials—(Same as Engineering 50F.) GER:2b (DR:6) 4 units, Aut, Win (Bravman)

KYOTO

The Stanford Japan Center in Kyoto houses two separate academic programs: the Kyoto Center for Japanese Studies (KCJS) and the Stanford Center for Technology and Innovation (SCTI). KCJS is administered by Stanford for a consortium of American universities. For current information on KCJS, consult the web site at http://www-osf.stanford.edu/KCJS or contact Overseas Studies for a brochure. The courses listed below are offered by the SCTI program.

17R. Religion and Japanese Culture—(Same as Religious Studies 17R.) Introduction to the importance of religion in Japanese culture, covering the major traditions of the country. Visits to relevant religious centers for observation of current religious practices and participation where appropriate (e.g., meditation session). Topics: the relation between religion and culture; ancient Japanese religion and Shinto; Buddhist schools of Heian Japan; Zen Buddhism as it flourished in the Kamakura period; Confucianism, as originally conceived in ancient China, and as transmitted to Japan in the Edo period in its Neo-Confucian form; some characteristic modern practices. GER:3a,4a (DR:2 or 8) 4-5 units, Spr (Staff)

21. Research Project—Independent research projects on significant aspects of Japanese culture, society, or public policy. Students interested in developing the project as a web page should take a home campus class on creating web pages or have equivalent experience.

2-3 units, Spr (MacDougall)

110K. Introduction to Team-Based Product Design-Development in Japan—(Same as Mechanical Engineering 110K.) Multidisciplinary experience with three product design challenges of deepening complexity, stressing cross-cultural issues and undertaken within the surrounding community. Interaction with “coaches” support Japanese technology access, language, and culture.
4 units, Spr (Leifer)

121K. The Asian Others of Western Culture—(Same as Comparative Literature 121K.) Since the appearance of Edward Said’s book on “Orientalism,” it has become an obligation for Western intellectuals to acknowledge the problematic and often scandalous projections of their own culture onto Far Eastern (and Japanese) culture. Goals: to reconstruct the history of problematic “othering,” based on original texts (in English translation) from Classical Antiquity to the first half of the 20th century; and to discover that these “well-intentioned otherings” are less aggressive, yet no more problematic than their long Western prehistory.

GER:3a (DR:7) 3-5 units, Spr (Gumbrecht)

122K. Western Permutations in Thinking Technology—(Same as Comparative Literature 122K.) The denaturalization of some recurrent premises and conditions under which western culture has thought and indeed created our concept of “technology.” If “technology” has been understood as a human addition to the cosmos, it becomes important to think of the non-intentional impact of these practices on nature and human life.

3-5 units, Spr (Gumbrecht)

215X. The Political Economy of Japan—(Same as Political Science 215X) Institutions and processes in the political organization of economic activity in modern Japan. The interaction of public and private sector institutions in the growth of Japan’s postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, government interaction, and public policy making. The transformation of Japanese industrial policy from the rapid growth of heavy and chemical industries to the promotion of high technology and communications industries. The international, political, and economic ramifications of the structure and importance of Japanese capitalism. GER:3b (DR:9) 4-5 units, Spr (Kume)

JAPANESE LANGUAGE PROGRAM

3K. First-Year Modern Japanese—(Same as Asian Languages/Japanese 3K.) 5 units, Spr (Fujiwara, Ueda)

21K. Second-Year Modern Japanese, First Quarter—(Same as Asian Languages/Japanese 21K.) 5 units, Spr (Uemiya)

23K. Second-Year Modern Japanese, Third Quarter—(Same as Asian Languages/Japanese 23K.) 5 units, Spr (Yamaoka)

100K. Advanced Japanese—(Same as Asian Languages/Japanese 100K.) 5 units, Spr (Hotta)
SCHOOL OF HUMANITIES AND SCIENCES

103K. Upper Advanced Japanese—(Same as Asian Languages/Japanese 103K.)
   5 units, Spr (Yamaoka)

ON VIDEOTAPE
   See the “School of Engineering” section of this bulletin for course descriptions.

40K. Introductory Electronics—(Same as Engineering 40K.) GER:2b (DR:6)
   5 units, Spr (Masters)

50K. Introductory Science of Materials—(Same as Engineering 50K.)
   GER:2b (DR:6)
   4 units, Spr (Braivan)

113. Electronic Circuits—(Same as Electrical Engineering 113.)
   3 units, Spr (Flynn)

182. Computer Organization—(Same as Electrical Engineering 182, Computer Science 112.)
   4 units, Spr (Flynn)

15. Academic Internship—Placements in areas such as journalism, health care, education, international ventures, and technology are an introduction to Russian society and work experience. Regular meetings with a mentor develop an in-depth evaluation of observations. Findings and analysis are summarized in an academic paper.
   4-5 units, Aut, Win (Bratersky)

16. Tutorial—Meet with tutors individually or in very small groups on a chosen topic.
   3-5 units, Aut, Win (Bratersky)

21. Ethnic Moscow—Readings on ethnicity in Russia are synthesized in the context of visits to Armenian, Jewish, Georgian, Tatar (Muslim), and Russian communities, places of worship, and cultural events.
   3 units, Aut (Abashkin)

27. Modernist Composers in Russian Music—Indepth study of the most important composers of the early 20th century, focusing on the changing trends and harmonic evolution that came with the dramatic changes and upheavals at the start of the century. Works: Prokofiev, Shostakovitch, Stravinsky, Bartok, Hindemith, Berg, Scriabijn, Debussy, Ravel. GER:3a (DR:7)
   3-4 units, Aut (Orbelian)

28. Music Internship with the Moscow Chamber Orchestra—Advanced student musicians (strings and woodwinds only) may play with one of the world’s great orchestras. Rehearse with the Moscow Chamber Orchestra with private lessons and coaching. Depending on individual ability and scheduling limitations, students perform with the orchestra. Prerequisite: selection by audition.
   5 units, Aut (Orbelian)

119X. Russian Politics—(Same as Political Science 119X.) Introduction to the political, cultural, social, and historical background of Russian domestic life and foreign politics; the major issues in Russian political life; and the political forces currently playing a role in the Russian arena. Emphasis is on an understanding of major interest groups and the political concepts affecting the struggle in Russia; the inter-relationship among politics, economic issues, ethnic-territorial problems; and security matters in Russia itself, in the countries of the former Soviet Union, and on an international level. GER:3b (DR:9)
   5 units, Aut (Bratersky)

120X. Economic Reform and Economic Policy in Modern Russia—(Same as Economics 120X.) Problems in economic policy in modern Russia. Topics: Russian economic history; the reasons and logic of economic transformation; and the major components of post-communist economic transformation doctrine. The mechanism of economic policy decision making in modern Russia, realistic patterns and alternatives of economic development, and the logic and direction of the transformation of the elements in the Russian economic system. Discussions with politicians involved in economic decision making. GER:3b (DR:9)
   5 units, Aut (Mau)

121V. Russia in the Age of Nobility 1700-1840: State, Society, and Culture—(Same as History 121V.) Insight into a period of Russian history and culture where Russians produced achievements in literature and the arts, but failed to resolve the social and institutional problem created by rapid transformation. The reforms of Peter the Great through the Slavophile-Westernizers controversy established the paradigms of Russia’s historic development and raised issues still determining the intellectual agenda today. GER:3a (DR:7)
   5 units, Aut (Rogov)

146X. Contemporary Issues of Russian Society—(Same as Political Science 146X.) Forum addresses the major issues of Russian society today. The problems facing an individual in Russia, issues confronting Russia, issues confronting Russian society, and the main aspects of multiple crises evolving after the collapse of the Soviet Union. Prerequisite: some background in Russian studies.
   4 units, Win (Bratersky)

178/278. Individual Vocal and Instrumental Instruction—(Same as Music 178/278.) Private lessons with outstanding music teachers in Moscow for voice and most instruments. Prerequisite: minimum proficiency on instrument demonstrated by audition.
   3 units, Aut (Orbelian)

225V. Aspects of Soviet Political History—(Same as History 225V.)
   GER:3b (DR:9)
   4 units. Aut (Emmons)

226V. History of Moscow through its Architecture—(Same as History 226V.) Weekly field trips examine monuments of Moscow architecture in historical sequence, beginning with medieval church and fortification architecture and ending with Stalinist baroque. GER:3a (DR:7)
   4 units, Aut (Emmons)

MULTISITE COURSES
   See the “Berlin” section of Overseas Studies Program for course descriptions.

91. Literary Institutions: A Comparative Approach—(Same as Comparative Literature 91, German Studies 126A.)
   4 units, Win (Berman)

   4 units, Aut (Reichard)

RUSSIAN LANGUAGE PROGRAM

10M. Intensive First-Year Russian—(Same as Slavic Languages 10M.)
   10 units, Aut (Staff)

51M. Second-Year Russian I—(Same as Slavic Languages 51M.)
   6 units, Aut (Kuznetsova)

52M. Second-Year Russian II—(Same as Slavic Languages 52M.)
   6 units, Win (Kuznetsova)

111M. Third-Year Russian I—(Same as Slavic Languages 111M.)
   6 units, Aut (Boldyreva)

484
The poetry, prose, and drama of the period is placed in its literary, cultural, and historical contexts, and key texts are read closely.

112M. Third-Year Russian II—(Same as Slavic Languages 112M.) 6 units, Win (Boldyrev)

117M. Fourth-Year Russian I—(Same as Slavic Languages 177M.) 6 units, Aut (Shimanskaya)

118M. Fourth-Year Russian II—(Same as Slavic Languages 178M.) 6 units, Win (Shimanskaya)

OXFORD

31. Media Accountability in Britain and the U.S.—(Same as Communication 31.) The principles and practice of media accountability in the U.S. and Britain during the second half of 20th century. The balance between press freedom and accountability, comparing the role of British Press Council, now defunct, and its legacy, the Press Complaints Commission, with the National News Council (1974-1984) and various local news organizations in the U.S. Why and how Western democracies try mechanisms for press accountability without implicating the state (government), and why the efforts seldom achieve their stated goal. GER:3b (DR:9)

4 units, Aut (Glasser)

33. Mass Media in the Tradition of British Cultural Studies—(Same as Communication 33.) The contributions of “British Cultural Studies,” emphasizing its analysis and critique of mass media and popular culture. The origins and development of the tradition of British Cultural Studies at the Centre of Contemporary Cultural Studies at University of Birmingham in early 1970s. Works: Raymond Williams and Stuart Hall. GER:3b (DR:9)

4 units, Aut (Glasser)

64. Modern British Politics and Government—The 1980s marked the beginning of a period of transformation in British politics. Two decades of constitutional and political evolution under Margaret Thatcher have followed by the election of Tony Blair and his program of constitutional reforms. The status quo during the post-war period, specific themes and institutions, and agendas of constitutional reform of the present government. The prospects for success and likely consequences. GER:3b (DR:9)

4-5 units, Win (Wood)

114Z. English Literature 1509-1642—(Same as English 114Z.) Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine’s undergraduates. English literature from the beginning of Henry VIII’s reign to the onset of the Civil War, excluding Shakespeare. The poetry, prose, and drama of the period is placed in its literary, cultural, and historical contexts, and key texts are read closely.

5 units, Aut (Gearin-Tosh)

116Z. English Literature 1642-1740—(Same as English 116Z.) Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine’s undergraduates. English literature from the middle of the 18th century. The poetry, prose, and drama of the period is placed in its literary, cultural, and historical contexts, and key texts are read closely.

5 units, Win (Gearin-Tosh)

117W. Social Change in Modern Britain—(Same as Sociology 117W.) Changes in the social institutions, attitudes, and values in Britain over the past 20 years. Social changes occurring as a consequence of the Thatcher years of government. Changes to the British economy, the Welfare State, National Health Service, the education system, the criminal justice system, gender relations, marriage, divorce, reproduction, and the family. The consequences in terms of British competitiveness, income distribution, wealth and poverty, social class, health and illness, educational attainment and skills development, crime, and family life. GER:3b (DR:9)

4.5 units, Aut (Davies)

127X. A New Europe: Conflict and Integration since 1980—(Same as Political Science 127X.) The acceleration of European integration in the West, and the collapse of the state-socialism and Russian hegemony in the East have fundamentally altered relations between the states of Europe. The nature and implications of these changes for transnational relations between European nations, and for their domestic politics. Issues: European Union before and after Maastricht, the new Germany in the new Europe, political union and sovereignty, migration and the return of extremist politics, European security after the Cold War, the return to war in late 1990s in Eastern Europe. GER:3b (DR:9)

4-5 units, Win (Wood)

139V. The European City: 1600-2000—(Same as History 139V.) Over the past 400 years, cities in Europe have been transformed under impact of population growth, technological change, and revolutionary social and architectural ideologies. How and why transformation occurred through key texts and the physical fabric of the cities themselves. Topics: the effects of Baroque patronage in 17th and 18th centuries, rebuilding the city centers in 19th century, the growth of suburbs; the impact of mass transportation; the influence of modernist doctrines in the 20th century; and ongoing attempts by governments to tackle endemic problems of slums, poverty, etc. Comparisons with U.S. cities where relevant. GER:3b (DR:9)

4-5 units, Spr (Tyack)

141V. European Imperialism and the Third World, 1870-1970—(Same as History 141V. Political Science 148X.) European imperialism from its zenith in the late 19th century to the era of decolonization after WW II. The effects of western imperialism in different parts of the Third World. The legacy of imperialism and decolonization to the modern world. GER:3b (DR:9)

5 units, Spr (Darwin)

154Z. English Literature 1540-1832—(Same as English 154Z.) Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine’s undergraduates. Survey of English romantic literature. The poetry, prose, and drama of the period is placed in its literary, cultural, and historical contexts, and key texts are read closely.

5 units, Spr (Wordsworth)

160. Changing Health Care Delivery in Britain—(Same as Human Biology 160.) The delivery of health care in Britain is explored through three related areas: health and illness behavior, contemporary health issues, and health policy. During the last 15 years, health care delivery in Britain has been the focus of reviews and legislative changes, challenging one of the founding principles of the National Health Service (NHS): free health care for all at the point of delivery, irrespective of pay. How far this principle can be upheld in the face of increasing financial restraint and technological advancements. GER:3b (DR:9)

4 units, Win (Miller)

165B. Arthurian Literature—(Same as English 165B.) Arthurian legend in literature, as it appears in British historical chronicle, in narrative romance, and in erotic and religious texts and illustrations. The moral ambiguities of chivalry and courtly love. Focus is on medieval versions of the Arthurian tales, tracing its development in our century in literature, art, film, and popular culture. Visits to Oxford’s collections of Arthurian pre-Raphaelite art in the Ashmolean Museum and possibly other collections. (English major Area:B) GER:3a (DR:7)

5 units, Spr (Brown)

168X. Path Dependence of Science and Technology since the Industrial Revolution—(Same as Economics 168X.) The methods and concepts for studying the historical development of scientific and technological knowledge and practice in the West since the Industrial Revolution. Applied analysis of path dependent dynamical systems; uses and limitations of "counterfactual history," perspectives of "evolutionary economics," "evolutionary epistemology," and models of technological and
173X, Y, Z. Shakespeare—(Same as English 173X, Y, Z.) Open only to students majoring in Drama, English, and related subjects. Taught jointly for Stanford students and second-year St. Catherine’s undergraduates. A study of the complete dramatic oeuvre of Shakespeare. Focus is on the sources of the plays, historical and dramatic content, and use of language.

173X. The Comedies  
5 units, Aut (Gearin-Tosh)

173Y. The Tragedies  
5 units, Win (Gearin-Tosh)

173Z. The Late and Problem Plays  
5 units, Spr (Gearin-Tosh)

176Y. Architecture in Britain and Europe 1800 to the 1900s—(Same as Art and Art History 176Y.) European architecture in the last 200 years in the context of social, cultural, and technological changes. Topics: neoclassical and Gothic Revival movements of 19th century; Beaux Arts, Arts and Crafts and “free-style” derivatives; the origins and subsequent development of architectural modernism; post-modernism and neomodernism of present day. GER:3a (DR:7)  
5 units, Aut (Tyack)

185. Ancient Roman Society—(Same as Classics 185, History 102V.) Social life in the Roman world 100 B.C. to 200 A.D. Demographic patterns and the interaction of cultures in areas controlled by Roman Empire. Topics: citizenship; Roman private law; freedom and slavery; manumission and position of freed slaves; the family, marriage, concubinage, and slave quasi-marriage; work; houses and living conditions. Visits to sites and museums. GER:3b (DR:9)  
5 units, Win (Treggiari)

186. Horace, Kipling, and Imperialism: Songs and Law—(Same as Classics 186, History 143V.) British thinking about empire in the 19th century, when admission to the army and the Indian Civil Service depended heavily on success in examination in Latin, was naturally influenced by ideas in prescribed school texts. Horace’s Odes (in translation) and a selection of Kipling’s writings in prose and verse, and their views of defeat, victory, and right conduct. GER:3a (DR:7)  
5 units, Win (Treggiari)

209. Medieval Books—(Same as English 209.) Examination of the manuscripts, facsimiles, and incunabula in Oxford libraries. Topics: survey of scripts, layouts, illustrations and illuminations, bindings, and types of medieval books; developments of medieval book production to literacy, education, culture, ideology, and social class. Works: earliest manuscripts surviving in the British Isles up to the Renaissance. GER:3a (DR:7)  
5 units, Spr (Brown)

221Y. Art and Society in Britain—(Same as Art and Art History 221Y, History 244V.) Themes in 18th-, 19th-, and 20th-century British art. Painting, sculpture, and design and a comparison of the British experience and that of Europe and the U.S. Readings: problems relating to the role of art, and the artist in modern society. Visits to relevant collections. GER:3a (DR:7)  
5 units, Win (Tyack)

254Z. Drama in Britain Today—(Same as English 254Z, Drama 158D.) The classics of world drama and some contemporary plays. The meanings of the works and theatrical techniques used to complete them on stage. Weekly visits to the theater. GER:3a (DR:7)  
4 units, Spr (Mateer)

MULTISITE COURSES

See the “Berlin” section of Overseas Studies Program for course descriptions

91. Literary Institutions: A Comparative Approach—(Same as Comparative Literature 91, German Studies 126A.)  
4 units, Win (Berman)

4 units, Aut (Reichard)

PARIS

35. Building the European Economy: Economic Policies and the Challenges Ahead—The main issues and challenges of European Economic construction. The European Economic Union at the end of 1950s; various European economic policies (industrial, agricultural, social, and monetary). Topics: wider definitions of Europe, Europe’s relations with industrial and developing countries, Europe’s challenge in confronting global economic crises. GER:3b (DR:9)  
5 units, Aut (Balletx)

40. Europe: Integration and Disintegration of States, Politics, and Civil Societies—European integration is now an economic, social, and political reality. This integration has a history of mutation and a transformation of its very foundation. Topics: evolution of welfare state, elites, political parties; and systems in Europe; lobbies, trade unions, voluntary associations, social movements, popular protest, citizenship, democracy. GER:3a (DR:9)  
4 units, Win (Lazar)

111. Health Systems and Health Insurance: France and the U.S.—A Comparison—(Same as Public Policy 111, Human Biology 152X.) The role of the state in the delivery of health care. The evolution of the health profession in France and the U.S.; developments in health policy and reform; Clinton health reform, the Oregon plan; measures restraining professional autonomy and their implications for the medical profession. (In French and English) GER:3b (DR:9)  
4 units, Win (Giraud)

120X. French Painting from 1780-1900—(Same as Art and Art History 120X.) Changes in artistic aims and the interaction between artist and society throughout the period. Weekly field trips to Paris museums holding paintings of David, Ingres, Delacroix, Courbet, Daumier, Manet, Renoir, Monet, Degas, and others. (In French and English) GER:3a (DR:7)  
4 units, Win (Halevi)

130P. Paris: 1200-2000—(Same as Comparative Literature 130P, History 130V.) The history of Paris through an analysis of art, architecture, city planning, and literature. Paris of the high middle ages; absolutism in Paris from Louise XIV’s Invalides and its quarter to the city planning, private house development, and court projects that took place under Louis XV and XVI; Haussmann’s total remaking of Paris in the later 19th century; state monuments of past 30 years. GER:3a (DR:7)  
4 units, Win (Bender)

131I. The Holocaust in France and Beyond—(Same as History 131I, English 164Z.) Topics: what definitions of “holocaust” and “genocide” have emerged in recent years? What precedents for modern genocide can be traced from the past? What attitudes towards race, gender, and class contributed to persecution? What systems of terror, co-optation, and deception turned persecution into mass murder? What forms of resistance and rescue developed? What political, moral, and psychological effects of the Holocaust persist today? GER:3a (DR:7)  
5 units, Aut (J. Felstiner, M. Felstiner)

131X. France, Africa, and Global Politics—(Same as Political Science 131X.) Global interdependence and military, diplomatic, economic...
humanitarian, religious, and cultural issues are linked, as are the domestic and external fields. The postcolonial link between France and Africa. The role of French firms in Africa, Islam in France, migrations, NGOs, smuggling, etc. in the French-African relationship. This test case illuminates one of the theoretical stalemates of today’s world politics. (In French and English) GER:3b (DR:9)

4-5 units, Win (Charillon)

132V. The Memory of a Nation: The Birth of Museums in France—
(Same as History 132V, Art and Art History 121 Y.) The role of museums as institutions which preserve and communicate national memory and identity. In addition to collecting objects for exhibit, museums tell stories that can raise questions and structure experience. Major museums in Paris and their relationship to France’s self-perception. (In French and English) GER:3a (DR:7)

4 units, Aut (Georgel)

158F. Theater in France—(Same as Drama 158F.) The myth of Don Juan, and its representation in literature. Analysis of French authors and comparative literature. Comparison with other French theatrical presentations. Frequent visits to the theater. GER:3a (DR:7)

4 units, Aut (Mercier)

184B. Art and Science of Creativity—(Same as Psychology 184B.) Theories of creativity, case studies of eminent creators, laboratory studies, and introduction to techniques to foster creative thinking. Is talent innate or developed? What are the personal traits for a person to be creative? Which processes lead to a creative product? (In French and English) GER:3b (DR:9)

4 units, Aut (Getz, Lubart)

5 units, Aut (Felstiner)

211X. Political Attitudes and Behavior in Contemporary France—
(Same as Political Science 211X.) The institutions of the Fifth Republic, the main political forces and their evolution. Electoral behavior, taking into account other forms of political action such as the demonstrations for the defense of schools (1984) and the “lycee” students (1990), or the protest that followed the desecration of the Jewish cemetery in Carpentras. Attitudes and values are linked to voting choice. (In French and English) GER:3b (DR:9)

4-5 units, Aut (Mayer)

274A. Bodyworks—(Same as Comparative Literature 274A, History 274, History and Philosophy of Science 153.) Thesis: that dramatic new ways of imaging, controlling, intervening, remaking, and possibly even choosing bodies have participated in a complete reshaping of the notion of the body in the cultural imaginary and a transformation of our experience of actual human bodies. Works: Judith Butler, Elaine Scarry, Donna Haraway. Films: Blade Runner, Paris is Burning.

5 units, Win (Bender)

MULTISITE COURSES

ON VIDEOTAPE

50P. Introductory Science of Materials—(Same as Engineering 50P.)

GER:2b (DR:6)

4 units, Aut, Win (Bravman)

PUEBLA

The Puebla program has distinct academic focal points: development economics, cultural studies, and studio art. Students are expected to have completed significant prerequisite course work.

15. Research Project—Students may enroll in an individual research project and work one-on-one with an UDLA faculty member.

2-3 units, Win (Staff)

16. Writing Workshop—Preparation for writing academic papers in Spanish.

2 units, Win (Staff)

20. Art History and Studio Art—By arrangement with the Department of Art and Art History at Stanford. Select from specified Art History and Studio Art courses offered through the Universidad de las Americas. (In Spanish)

Win (Staff)

104X. Cholula: The Workings of a Sacred City—(Same as Latin American Studies 104X.) Cholula is perhaps the oldest living city in the Americas. The social, ethnic, religious, historic, economic, and political factors that give it its identity as a part of the Mexican nation. Practical hands-on program requires student participation in social welfare programs, planning and development, town festivals, and ongoing research. Goal is to explore Cholula’s role in rural and urban Mexico, the agricultural and industrial economies, the social and religious systems, and its cultural and historical heritage in relation to the regional, national, and global systems of which Cholula is a part. (In Spanish) GER:3b (DR:9)

5 units, Win (Knab)

105X. Mexico: Explaining Change in an Era of Globalization—
(Same as Latin American Studies 105X.) Political, social, and cultural changes in Mexico in the 1990s. The roots of these changes, focusing on the external force of globalization. Globalization and internal change. The relationship between government and political figures. (In Spanish) GER:3b (DR:9)

5 units, Win (Morales)

112X. Economics of Emerging Financial Markets—(Same as Economics 112X, Latin American Studies 113X.) Issues related to emerging financial markets: institutions, behavior of economic agents, and evolution. Analytical overview with regard to the relationship of financial development and growth. Firms typical of developing countries; their financial and control structure. The nature of emerging stock markets, causes and consequences of financial crises, and links between monetary policy and economic activity. (In Spanish) GER:3b (DR:9)

5 units, Win (Castañeda)
114X. Development Macroeconomics: The Mexican Case—(Same as Latin American Studies 114X, Economics 118X.) Issues relevant in developing economies and the structures which make them different to the industrialized world. A thorough analysis in relation to the Mexican economy. Recent stabilization programs are analyzed by means of traditional tools and adjusted to the institutional framework of Mexico. Literature on growth, political economy, and structural reforms is applied to the Mexican case. (In Spanish) GER:3b (DR:9) 5 units, Win (Cárdenas)

SANTIAGO

5. Director's Seminar—Weekly seminar with presentations on current issues and events in Chilean political and cultural life.
   2 units, Aut, Spr (Fuenzalida)

11W. Research Methods—Open only to students enrolled in the Research Module. Preparatory seminar on research methods is offered by the person who is the primary research supervisor for the students. Students develop project topics and research designs. Corequisite: 12W.
   2 units, Win (Staff)

12W. Research Tutorial—Open only to students enrolled in the Research Module. Independent research with a research supervisor in Chile develops an extended paper associated with the central topic of the research module. Corequisite: 11W.
   5 units, Win (Staff)

37. Geology of the Andes—The Andes are used as the principal example of plate tectonics and other basic concepts of geology: the subduction of Nazca Plate, active volcanism along the Andean chain, the occurrence of some of largest earthquakes, and the development of some of richest copper deposits in the world. GER:2a (DR:5)
   5 units, Win (McWilliams)

38. Geology and Environment Seminar—Mining/environment seminar focusing on Chile's copper industry. Why is copper in Chile, what it takes to mine it, the market forces driving copper prices, and the ultimate environmental price.
   Win (McWilliams)

106H. Man-Environment Interactions: Case Studies from Central Chile—(Same as Human Biology 106H, Biological Sciences 106Z, Latin American Studies 122X.) Problems in rural and urban areas (pollution, over-exploitation of resources, and deterioration of the landscape) are all closely linked to social problems. The consequences of human action on the environment and possible actions to reverse the situation. GER:2b (DR:6)
   5 units, Aut (Hajek)

111. Social Heterogeneity in Latin America—(Same as Sociology 111, Latin American Studies 121X.) Latin America is characterized by social heterogeneity and inequality. An interpretation of these phenomena, focusing on the social, ethnic, gender, political, and economic dimensions. Their historical roots and unfolding during the periods of industrialization, the '60s, '70s, and '80s, and the contemporary situation. GER:3b (DR:9)
   5 units, Aut (Valdés)

118X. Cultural Modernization: The Case of Chile—(Same as Latin American Studies 118X.) The cultural changes that have taken place in Chile under conditions of economic liberalization and political democratization at all three levels of culture: elite, mass-media, and popular or folk. The reception of cultural meanings from the world social system (the U.S., EU, and Japan), its reformulation to respond to local conditions, and its export under the shape of cultural artifacts that can be understood by the non-Latin American members. Innovative elements rooted in the regional-local culture. GER:3b (DR:9)
   5 units, Win (Fuenzalida)

120X. Modernization and Culture in Latin America—(Same as Latin American Studies 120X, Spanish 290Z.) The intellectual and cultural expressions of Latin America against the background of modernization. Latin American modernization as a constant tension between: rationalization and subjectification, change and identity preservation, and the logic of economic development and the logic of the culture. GER:3a (DR:7)
   5 units, Aut, Spr (Subercaseaux)

129X. Latin America in the International System—(Same as Latin American Studies 129X, Political Science 137X.) Analysis of Latin America's role in world politics, with emphasis on U.S.-Latin America relations: the history of U.S.-Latin American interactions, national interest in the definition, and models for explaining U.S.-Latin America relations. Important themes in Latin America's evolving relationship with the international system. GER:3b (DR:9)
   4-5 units, Win (Rojas)

130X. Latin American Economies in Transition—(Same as Latin American Studies 130X, Economics 165X.) Introduction to the major debates and approaches developed to understand and analyze the economies of Latin America. Recent processes of transition to market economies. Common characteristics among countries of the region; the differences and special traits of individual countries. Historical, analytical, and empirical perspectives on topics at the center of controversy and specific policy problems over several decades. Recommended: Economics 1, 51, and 52. GER:3b (DR:9)
   5 units, Aut (Muñoz)

162X. Core Seminar: Ecology-Policy Studies—(Same as Latin American Studies 162X.) Students are provided the intellectual depth and background to carry on research in the field, exposing them to the environment of functioning research groups.
   5 units, Win (Hajek)

163X. Latin America in the International Economy—(Same as Economics 163X, Latin American Studies 119X.) The external economic relations of Latin American countries. Similarities and differences among countries, focusing on the last 15 years. Analytical and empirical elements for interpretation of policies and the outcome. Trade, external debt, capital flows, and the inter-relationships between domestic economy and overall growth. Recommended: Economics 1, 51, and 52. GER:3b (DR:9)
   5 units, Win (Ffrench-Davis)

176S. Energy for Development—(Same as Civil and Environmental Engineering 176S.) Introduction to the technologies and issues associated with rapid energy growth in developing countries, with emphasis on Chile. Topics: energy and environment, demand and supply sides, electric power development and regulation in Chile, Chile as case study for Latin America. Parallels between restructuring of Chile's electricity industry and the restructuring of utilities in California.
   Aut (Masters)

179S. Workshop on Solar Cooking—(Same as Civil and Environmental Engineering 179S.) The environmental and economic impact of the current means of cooking in developing nations. A variety of solar cookers are built, tested, and evaluated as to their usefulness in Latin America for traditional diets, availability of local materials and expertise, and potential impacts on the social fabric of rural villages.
   Aut (Masters)

221X. Political Transition and Democratic Consolidation: Chile's Comparative Perspective—(Same as Political Science 221X.) The dynamics of the Chilean transition, considered by many observers among the most analytically interesting. Topics: the challenges faced by democratic governments in 1990s, framed by the legacy of military rule (1973-1990); the country's political culture; institutional traditions of...
democracy in Chile; and Chilean process within broader context of Latin American political development. GER:3b (DR:9)
5 units, Spr (Heine)

MULTISITE COURSES
See the “Berlin” section of Overseas Studies Program for course descriptions

9R. Literary Institutions: A Comparative Approach—(Same as Comparative Literature 9R, German Studies 126A.)

4 units, Aut (Reichard)

PHILOSOPHY
Emeriti: (Professors): Fred Dretske, Stuart Hampshire, Georg Kreisel, David S. Nivison, Patrick Suppes, James O. Urmson
Chair: John Etchemendy
Director of Graduate Study: Michael Bratman
Director of Undergraduate Study: Kenneth Taylor
Professors: Michael Bratman, John Etchemendy, Solomon Feferman, Dagfinn Fjeldstad (Autumn), Grigori Mints, Julius Moravcsik, John Perry, Johan van Benthem (Spring), Thomas Wasow
Associate Professors: Mark Crimmins, Peter Godfrey-Smith, Debra Satz, Kenneth Taylor
Assistant Professors: Lanier Anderson, Chris Bobonich, Yair Guttmann, Agnieszka Jaworska, Krista Lawlor, Michael Stevens, David S. Nivison, Patrick Suppes, James O. Urmson
Courtesey Assistant Professor: Reviel Netz
Lecturers: David Barker-Plummer, Roger Florka, Lori Gruen
Acting Assistant Professor: Jennifer Rosner
Visiting Professor: Keith Stenning

Philosophy concerns itself with fundamental problems. Some are abstract and deal with the nature of truth, justice, value, and knowledge; others are more concrete and their study may help guide our conduct or enhance our understanding of other subjects. In addition, philosophy examines the efforts of past thinkers to understand the world and our experience of it.

Although it may appear to be an assortment of different disciplines, there are features common to all philosophical enquiry. These include an emphasis on methods of reasoning and the way in which our judgments are formed, on criticizing and organizing our beliefs, and on the nature and role of fundamental concepts.

Students of almost any discipline can find something in philosophy which is relevant to their own specialties. In the sciences, it provides a framework within which the foundations and scope of a scientific theory can be studied, and it may even suggest directions for future development. Since philosophical ideas have had an important influence on human endeavors of all kinds (artistic, political, even economic), students of the humanities will find their understanding deepened by some acquaintance with philosophy.

Philosophy is an excellent major for those planning a career in law, medicine, or business. It provides analytical skills and a breadth of perspective helpful to those called upon to make decisions about their own conduct and the welfare of others. Philosophy majors who have carefully planned their undergraduate program have an excellent record of admission to professional and graduate schools.

The Special Program in the History and Philosophy of Science enables students to combine interests in science, history, and philosophy. Students interested in this program should see the special adviser.

The joint major in Philosophy and Religious Studies combines courses from both departments into a coherent theoretical pattern.

The Tanner Memorial Library of Philosophy contains an excellent working library and ideal conditions for study.

Graduate students and undergraduate majors in philosophy have formed associations for discussion of philosophical issues and the reading of papers by students, faculty, and visitors. These associations elect student representatives to department meetings.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

There are two ways of majoring in philosophy: the “General Program” and the “Special Program in the History and Philosophy of Science.” A student completing either of these receives an A.B. degree in Philosophy. There is also a major program offered jointly with the Department of Religious Studies. To declare a major, a student must consult with the Director of Undergraduate Study. The student is assigned an adviser to work out a coherent plan. The department strongly urges proficiency in at least one foreign language.

GENERAL PROGRAM

1. Course requirements, minimum 55 units:
a) Preparation for the major: an introductory course (under 100) and 80.
b) The core: 24 additional philosophy units as follows.
1) Logic: one from 57, 159, 160A, 169
2) Philosophy of Science: any course from 60, 61, 156, 163-168
3) Moral and Political Philosophy: one from 170-173
4) Metaphysics and Epistemology: one from 180-188
5) History of Philosophy: two history of philosophy courses numbered 100 or above
c) One undergraduate philosophy seminar from the 194 series.
d) Electives: courses numbered 10 or above, at least 15 units of which must be in courses numbered above 99.
2. Units for Tutorial, Directed Reading, or The Dualist (Philosophy 196, 197, 198) may not be counted in the 55-unit requirement. No more than 10 units completed with grades of “Satisfactory” may be counted in the 55-unit requirement.
3. Transfer units must be approved by the Director of Undergraduate Studies, in writing, at the time of declaring a major. In general, transfer courses cannot be used to satisfy the five area requirements or the undergraduate seminar requirement.

SPECIAL PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE

Undergraduates may major in Philosophy with a degree field in History and Philosophy of Science under the Department of Philosophy. Each participating student is assigned an adviser who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

1. Three science courses (for example, biology, chemistry, physics) for 12 units.
2. The following Philosophy core courses must be completed with a letter grade by the end of the junior year:
a) one from 57, 159, 160A, 169
b) 60
c) 80
3. Three history of science courses.
4. Three philosophy of science courses, of which one must be Philosophy 164.
5. Three additional courses related to the major, in philosophy or history, to be agreed on by the adviser.
6. At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or The Dualist (196, 197, 198) may not be counted in the requirement. No more than 10 units completed with grades of "Satisfactory" may be counted in the requirement.

7. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring a major. Transfer courses are strictly limited when used to satisfy major requirements.

MINORS

A minor in Philosophy consists of at least 30 units of philosophy courses satisfying the following conditions:

1. Introduction to the Humanities Program 23A and 23B (Reason, Passion and Reality) may be counted for a maximum of 5 units.
2. At least 10 units must be from courses numbered 100 or above.
3. The 30 units must include one of:
   a) A history of philosophy course numbered 100 or above
   b) Two quarters of Area 1 (only 5 of the 10 units can count towards 30-unit requirement)
4. One course from any two of the following three areas:
   a) Philosophy of science and logic: 60, 61, 156, 163-168; 57, 59, 160A, 169
   b) Moral and political philosophy: 20, 30, 170-172
   c) Metaphysics and epistemology: 10, 80, 180-188
5. Units for tutorials and directed reading may not be counted.
6. Transfer units must be approved in writing by the Director of Undergraduate Studies at the time of declaring. The number of transfer units is generally limited to a maximum of 10.
7. No more than 6 units completed with grades of "Satisfactory" count towards the 30-unit requirement.

As with the Philosophy major, these courses need not be taken in any particular order.

Students must declare their intention to minor in Philosophy in a meeting with the Director of Undergraduate Studies. This formal declaration must be made no later than the last day of the quarter two quarters before degree conferral. The Permission to Declare a Philosophy Minor (signed by the Director of Undergraduate Studies) lists courses taken and to be taken to fulfill minor requirements. This permission is on file in the department office. Before graduation, a student's record is checked to see that requirements have been fulfilled, and the results are reported to the University Registrar.

HONORS PROGRAM

Students who wish to undertake a more intensive and extensive program of study, including seminars and independent work, are invited to apply for the honors program during Winter Quarter of the junior year. Admission is selective on the basis of grade point average (GPA), demonstrated ability in philosophy, and progress towards satisfying the requirements of the major.

With their application, candidates should submit an intended plan of study for the remainder of the junior and the senior years. It should include at least 5 units of Senior Tutorial (196) during Autumn and/or Winter Quarter(s) of the senior year. In the quarter preceding the tutorial, students should submit an essay proposal to the Philosophy undergraduate director and determine an adviser.

In the senior tutorial, students write an essay on some philosophical problem. This essay is usually about 7,500 words for those taking one quarter of the tutorial, and about 12,500 for those taking two quarters of the tutorial. Length may vary considerably depending on the problem and the approach. The tutorial essay may use work in previous seminars and courses as a starting point.

A completed draft of the essay is submitted to the adviser at the end of the Winter Quarter. If rewriting is necessary, the student may enroll in 2 units of the Spring Quarter senior tutorial. Three copies of the essay must be given to the department by the end of the fifth full week of the Spring Quarter.

The honors tutorial represents units in addition to the 55-unit requirement.

The Department of Philosophy cooperates with the honors component of the "Interdisciplinary Studies in Humanities" as described in the section of this bulletin.

JOINT MAJOR IN PHILOSOPHY AND RELIGIOUS STUDIES

The joint major in Philosophy and Religious Studies consists of 6 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major or the special concentration.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

CORE REQUIREMENTS

1. Philosophy courses:
   a) 80
   b) 16 units, including at least one Philosophy course from each of the following areas:
      1) Logic and philosophy of science: 57, 60, 61, 156, 159, 160A, 162-169
      2) Ethics and value theory: 170-173
      3) Epistemology, metaphysics, and philosophy of language: 180-188
      4) History of philosophy: 100-103

2. Religious Studies courses: 20 units, including at least two courses in diverse religious traditions (for example, an Eastern and a Western or a literate and a preliterate tradition) and including at least one seminar.

   General Major Requirements—Five additional courses (approximately 20 units) divided between the two departments. No more than 10 units of these may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

   Special Concentration—With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the adviser.

   Directed Reading and Satisfactory/No Credit Units—Units of directed reading for fulfilling requirements of the joint major are allowed only with special permission. No more than 10 units of work with a grade of "Satisfactory" count toward the joint major.

HONORS PROGRAM

Students pursuing a joint major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

COTERMINAL DEGREE

It is possible to earn an A.M. in Philosophy while earning an A.B. or B.S. This can usually be done by the end of the fifth undergraduate year, although students whose degree is not in philosophy may require an additional year. Standards for admission to, and completion of, this program are the same as for A.M. applicants who already have the bachelor's degree when matriculating. Applicants for the coterminal program are not, however, required to take the Graduate Record Exam. Information about application is available from Degree Progress in the Registrar's Office.

GRADUATE PROGRAMS

The department is prepared to direct and supervise individual study and research to supplement instruction offered in the courses listed below. In addition, advanced seminars not listed in the catalog are frequently
organized in response to student interest. Candidates for advanced degrees are urged to discuss their entire program of study with their department advisers as early as possible.

Applications to graduate programs in the Department of Philosophy can be obtained from Graduate Admissions, the Registrar’s Office. Applicants must take the Graduate Record Examination by October of the year the application is submitted.

**MASTER OF ARTS**

University requirements for the A.M. are discussed in the “Graduate Degrees” section of this bulletin.

Four programs lead to the A.M. in Philosophy. One is a general program providing a grounding in all branches of the subject. The others provide special training in one branch.

**Admissions**—All prospective master’s students, including those currently enrolled in other Stanford programs, must apply for admission to the program. The application deadline is April 1 of the academic year preceding entry into the program. In exceptional circumstances, consideration may be given to applications received after the April 1 deadline but before April 30. No fellowships are available. Entering students must meet with the director of the master’s program and have their advisers’ approval, in writing, of program proposals. The master’s program should not be considered a stepping-stone to the doctoral program; these two programs are separate and distinct.

**Unit Requirements**—Each program requires a minimum of 36 units in philosophy. Students in a special program may be allowed or required to replace up to 9 units of philosophy by 9 units in the field of specialization. Although the requirements for the A.M. are designed so that a student with the equivalent of a strong undergraduate philosophy major at Stanford might complete them in one year, most students need longer. Students should also keep in mind that although 36 units is the minimum required by the University, quite often more units are necessary to complete department requirements. Up to 6 units of directed reading in philosophy may be allowed. There is no thesis requirement, but an optional master’s thesis or project, upon faculty approval, may be countable as equivalent of up to 8 units. A special program may require knowledge of a foreign language. At least 36 units in courses numbered 100 or above must be completed with a grade of ‘B-’ or better at Stanford. Students are reminded of the University requirements for advanced degrees, and particularly of the fact that for the A.M., students must complete three full quarters as measured by tuition payment.

**GENERAL PROGRAM**

The General Program requires a minimum of 36 units in Philosophy courses numbered above 99. These courses must be taken for a letter grade and the student must receive at least a ‘B-’ in the course. Courses taken to satisfy the “undergraduate core” may not be counted in the 36 units. The requirement has three parts:

1. **Undergraduate Core:** students must have when they enter, or complete early in their program, the following undergraduate courses (students entering from other institutions should establish equivalent requirements with a master’s adviser upon arrival or earlier):
   a) Logic 57, 159, or 160A
   b) Philosophy of science: any course from 60, 61, 163-167
   c) Moral and political philosophy: one from 170-173
   d) Metaphysics and epistemology: one from 80, 180-188
   e) History of philosophy: two history of philosophy courses numbered 100 or above

2. **Graduate Core:** students must take at least one course numbered over 105 from three of the following five areas (courses used to satisfy the undergraduate core cannot also be counted toward satisfaction of the graduate core). Crosslisted and other courses taught outside the Department of Philosophy do not count towards satisfaction of the core.
   a) Logic and semantics
   b) Philosophy of science and history of science
   c) Ethics, value theory, and moral and political philosophy
   d) Metaphysics, epistemology, and philosophy of language
   e) History of philosophy

Each master’s candidate must take at least two courses numbered above 200 (these cannot be graduate sections of undergraduate courses). One may be a graduate core seminar (260, 270, 280, 281), but no student is admitted to a core seminar before completing undergraduate requirements in the area of the seminar and securing the approval of the instructor.

3. **Specialization:** students must take at least three courses numbered over 105 in one of the five areas.

**SPECIAL PROGRAM IN THE HISTORY AND PHILOSOPHY OF SCIENCE**

Only students with substantial preparation in philosophy or in the history of science in one of the natural or social sciences are admitted. Entering students whose primary preparation has been in science may be required to satisfy all or part of the undergraduate core requirement as described in the General Program. Students whose preparation has not been in science may be required to take additional science courses.

**Course Requirements**

1. At least four courses in the Department of Philosophy in the history or philosophy of science. At least one of these must be graduate-level courses, or graduate sections of undergraduate courses, and at least one of the four must be in the philosophy of science and one in the history of science.

2. In most cases, one upper division or graduate course outside the Department of Philosophy in the natural or social sciences or in history.

3. Remaining courses are to be chosen in consultation with and approved by an adviser.

**SPECIAL PROGRAM IN SYMBOLIC SYSTEMS**

Students should have the equivalent of the Stanford undergraduate major in Symbolic Systems. Students who have a strong major in one of the basic SSP disciplines (philosophy, psychology, linguistics, computer science) may be admitted, but are required to do a substantial part of the undergraduate SSP core in each of the other basic SSP fields. This must include the following three philosophy courses or their equivalents: 80; 160A; and one from 181, 183, 184, 186. This work does not count towards the 36-unit requirement.

**Course Requirements**

1. Four courses in philosophy at the graduate level (numbered 200 or above), including courses from three of the following five areas:
   a) Philosophy of language
   b) Logic
   c) Philosophy of mind
   d) Metaphysics and epistemology
   e) Philosophy of science

At most two of the four courses may be graduate sections of undergraduate courses numbered 100 or higher.

2. Three courses numbered 100 or higher from outside Philosophy, chosen in consultation with an adviser. These courses should be from two of the following four areas:
   a) Psychology
   b) Linguistics
   c) Computer Science
   d) Education

Remaining courses are to be chosen in consultation with and approved by an adviser.

**SPECIAL PROGRAM IN THE PHILOSOPHY OF LANGUAGE**

Admission is limited to students with substantial preparation in philosophy or linguistics. Those whose primary preparation has been in linguistics may be required to satisfy all or part of the undergraduate core requirements as described in the General Program. Those whose preparation is primarily in philosophy may be required to take additional courses in linguistics.
DOCTOR OF PHILOSOPHY

The University's basic requirements for the Ph.D. degree (residence, dissertation, examination, and so on) are discussed in the "Graduate Degrees" section of this bulletin. The requirements detailed here are department requirements.

There are six basic areas (philosophy of science, ethics, metaphysics and epistemology, philosophy of language, logic, and history) in which students should have proficiency in order to obtain a Ph.D. Demonstrating proficiency takes the form of course work, intensive seminars, and papers, as detailed below.

All courses used to satisfy proficiency requirements must be passed with a grade point average (GPA) of 'B-' or better (no satisfactory/no credit).

At the end of the first year, the department reviews the progress of each first-year student to determine whether the student may continue in the program.

Any student in one of the Ph.D. programs may apply for the A.M. when all University and department requirements have been met.

PROFICIENCY REQUIREMENTS

1. Course requirements, to be completed during the first two years:
   a) Seven of the eight items listed below:
      1) Four "core" graduate courses and seminars in philosophy of language (281); philosophy of mind, metaphysics, and epistemology (280); value theory (270); and philosophy of science (260). To enroll, the student must be a Ph.D. student in Philosophy or have special permission of the instructor.
      2) Three history courses, each consisting of an approved graduate-level course in the history of philosophy. Courses satisfying this seven-out-of-eight requirement must include at least one history course in ancient philosophy, one in modern.
      3) Philosophy 160A
      b) Philosophy 159 or the equivalent.
      c) Breadth requirement: a course in Eastern or Continental philosophy, or some other course establishing breadth.
   d) A total of at least 39 units of course work in the Department of Philosophy, numbered above 110, but not including Teaching Methods (Philosophy 239). Units of Individual Directed Reading (Philosophy 240) may be included only with the explicit approval of the Director of Graduate Studies.

2. Teaching assistance: a minimum of four quarters of teaching assistance at 25 percent time, usually during the second and third years.

3. Candidacy: to continue in the Ph.D. program, each student must be approved for candidacy during the sixth academic quarter (normally the Spring Quarter of the student's second year). Students may be approved for candidacy on a conditional basis if they have only one or two outstanding deficiencies, but are not officially advanced to candidacy until these deficiencies have been removed. Approval for candidacy indicates that, in the department's judgment, the student can successfully complete the Ph.D. In reaching this judgment, the department considers both the student's work and the overall quality of the student's work during the first six years of the program.

4. During the third year of graduate study, and after advancement to candidacy, a Ph.D. student should successfully complete at least three graduate-level courses/seminars, at least two of which must be in philosophy. Courses required for candidacy are not counted toward satisfaction of this requirement. Choice of courses/seminars outside philosophy is determined in consultation with a student's adviser.

5. During the summer of their second year, students are eligible to attend a Dissertation Development seminar given by the department.

6. Dissertation work and defense: the third and fourth (and sometimes fifth) years are devoted to dissertation work.
   a) Dissertation Proposal: by Spring Quarter of the third year, students select a dissertation topic, a reading committee, and some possible thesis relative to that topic. The topic and thesis should be sketched in a proposal of three to five pages, plus an annotated bibliography indicating familiarity with the relevant literature. The proposal should be approved by the reading committee before the meeting on graduate student progress in Spring Quarter.
   b) Departmental Oral: during Autumn Quarter of the fourth year, students take an oral examination, called the "Departmental Oral," based on at least 30 pages of written work, in addition to the proposal. The aim of the exam is to help the student arrive at an acceptable plan for the dissertation and to make sure that the student, thesis, topic, and advisor make a reasonably fit. In cases where such an exam is deemed inappropriate by the reading committee, the student may be exempted by filing a petition with the Director of Graduate Studies, signed by the student and the members of the reading committee.
   c) Fourth-Year Colloquium: no later than the Spring Quarter of the fourth year, students present a research paper in a seminar open to the entire department. This paper should be on an aspect of the student's dissertation research.
   d) University Oral Exam: Ph.D. students must submit a complete draft of the dissertation to the three-person reading committee at least one month before the student expects to defend the thesis in the University oral exam. If the student is given permission to go forward, the University orals take place approximately two weeks later. A portion of the exam consists of a student presentation based on the dissertation and is open to the public. A closed question period follows. If the draft is ready by Autumn Quarter of the fourth year, the student can request that the University oral count as the department oral.

SPECIAL GRADUATE PROGRAMS

The department recognizes that some students may need to spend a large amount of time preparing themselves in some other discipline related to their philosophical goals, or in advanced preparation in some area within philosophy. In such circumstances, the department is willing to waive some of the Ph.D. requirements. Such an exemption is not automatic; a program must be worked out with an adviser and submitted to the department some time in the student's first year. This proposal must be in writing and must include:

1. The areas to be exempted (see below).
2. A program of additional courses and seminars in the special area (usually at least 12 units).
3. A justification of the program that considers both intellectual coherence and the student's goals.

The department believes there is plenty of room for normal specialization within the program as it stands, and that all students will specialize to some extent. Thus, the intent is not to exempt courses on a one-to-one basis, but only to grant exemptions when a student plans an extensive and intensive study of some relevant area.

Special-program students may be exempted from two of the following:
1. One additional item from the items listed above in requirement 1(b)
2. Philosophy 159 (but then they must take Philosophy 57)
3. The breadth requirement

If a student's special program involves substantial course work outside of philosophy then, with the approval of the adviser, the student may petition the department to reduce requirement 1(d) (the Philosophy unit requirement for the first two years). Normally this requirement is not reduced below 32 units.
PH.D. MINOR

To obtain a Ph.D. minor in Philosophy, students must follow these procedures:
1. Consult with the Director of Graduate Studies to establish eligibility, and select a suitable adviser.
2. Give to the department academic assistant a signed copy of the program of study (designated with the adviser) which offers:
   a) 30 units of courses in the Department of Philosophy with a letter grade of 'B-' or better in each course. No more than 3 units of directed reading may be counted in the 30-unit requirement.
   b) At least one course or seminar numbered over 99 to be taken in each of these five areas:
      1) Logic
      2) Philosophy of science
      3) Ethics, value, theory, and moral and political philosophy
      4) Metaphysics, epistemology, and philosophy of language
      5) History of philosophy
   c) Two additional courses numbered over 199 to be taken in one of these five areas.
3. A faculty member from the Department of Philosophy (usually the student's adviser) serves on the student's doctoral oral examination committee and may request that up to one third of this examination be devoted to the minor subject.
4. Paperwork for the minor must be submitted to the department office before beginning the program.

INTERDEPARTMENTAL PROGRAMS

GRADUATE PROGRAM IN HUMANITIES

The Department of Philosophy also participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Philosophy and Humanities. It is described in the "Interdisciplinary Studies in Humanities" section of this bulletin.

GRADUATE PROGRAM IN COGNITIVE SCIENCE

Philosophy participates with the departments of Computer Science, Linguistics, and Psychology in an interdisciplinary program in Cognitive Science. It is intended to provide an interdisciplinary education, as well as a deeper concentration in philosophy, and is open to doctoral students. Students who complete the requirements within Philosophy and the Cognitive Science requirements must receive a special designation in Cognitive Science along with the Ph.D. in Philosophy. To receive this designation, students must complete 30 units of approved courses, 18 of which must be in two disciplines outside of philosophy. The list of approved courses can be obtained from the Cognitive Science program located in the Department of Psychology.

SPECIAL TRACK IN PHILOSOPHY AND SYMBOLIC SYSTEMS

Students interested in interdisciplinary work relating philosophy to artificial intelligence, computer science, linguistics, or logic may pursue a Ph.D. degree in the major.

PREREQUISITES—Ideally, admitted students have covered the equivalent of the core of the undergraduate Symbolic Systems Program requirements as described in this bulletin, including courses in philosophy, logic, artificial intelligence (AI), computer science, and linguistics. The graduate program is designed with this background in mind. Students missing part of this background may need additional course work. Aside from the required course work below, the Ph.D. requirements are the same as for the regular program.

COURSES

See the quarterly Time Schedule for revised listings.

INTRODUCTORY

These acquaint the student with some of the most important problems, positions, and methods in philosophy. Some are designed to give general preparation for further work in philosophy. Some apply the philosopher's approach to particular problems and subjects encountered in other areas of study. In conjunction with the Introduction to Humanities Autumn Quarter course, courses 5A and B form an Area 1 sequence, sponsored by the Department of Philosophy as part of the Introduction to the Humanities Program. Either 5A or B may count as the introductory philosophy course requirement for the major.

5A. Reason, Passion, and Reality—(Enroll in Introduction to the Humanities 23A,B.)
5A.—GER:1 (DR:1)
5 units, Win (Moravcsik)
5B.—GER:1 (DR:1)
5 units, Spr (Anderson, Taylor)

10. God, Self, and World: An Introduction to Philosophy—Basic philosophical problems are introduced through the writings of classical and contemporary authors. Problems considered are: our knowledge of the external world; induction and causation; minds, machines, brains, and bodies, freedom and determinism, the meaning of life. Authors: Descartes, Hume, Russell, Nagel, Turing, Searle, etc. GER:3a (DR:8)
5 units, Aut (Perry)

12N. Stanford Introductory Seminar: Identity and the Self—Preference to freshmen. In what does the identity of a thing over time consist? The question is especially pressing when the thing in question is oneself. ("I worry more about my own dentist appointment tomorrow than I worry about yours. Why?") Physical, psychological, and mixed criteria of identity produce distinct answers to the question. Is it rational to care as much as we do about personal identity? GER:3a (DR:8)

3 units, Win (Lalor)

13N. Stanford Introductory Seminar: Free Will and Moral Responsibility—Preference to freshmen. What is it to be a free agent? What is it to be a morally responsible agent? What is it to act of one's own free will? Can there be free, morally responsible agents in a world of physical causes? What happens, or should happen, to our understanding of people as morally culpable and/or morally praiseworthy when we see their actions as embedded in a causal process that began before their birth? The efforts by a number of philosophers, historical and contemporary, to respond to these questions about our agency and how it fits, or fails to fit, into a world of physical causes. GER:3a (DR:8)

3 units, Win (Braman)

14N. Stanford Introductory Seminar: Consciousness—Preference to freshmen. The nature of consciousness from several different perspectives. The main philosophical question that arises within the Western philosophical tradition: whether consciousness can be understood as a physical process, or requires postulation of a non-physical aspect of mind. What philosophers such as Descartes, Dennett, Searle have said about this issue. The works of neuroscientists and issues such as split brain patients and blindsight keep the philosophizing grounded in contemporary knowledge about the structure and function of the brain. GER:3a (DR:8)

3 units, Aut (Perry)

15N. Stanford Introductory Seminar: Mind and World—Preference to freshmen. Does the mind apprehend reality as it really is? Does the mind apprehend reality at all? Does the mind "create" reality? Readings from classic philosophical texts and recent cognitive science, leading to the question: Which of the many venerable philosophical views of the relationship between mind and world fits best with our modern understanding of the mind? GER:3a (DR:8)

3 units, Spr (Strevens)

20. Introduction to Moral Theory—What is the basis of our moral judgments? What makes right actions right, and wrong actions wrong? (Existing social rules? The consequences of human happiness? Conformity to a rule of reason?) What sort of person is it best to be? The answers to these classic questions about ethics are examined in the works of traditional and contemporary authors. GER:3a (DR:8)

5 units, Spr (Rosner)

30. Introduction to Political Philosophy/Theory—(Same as Political Science 51D, Public Policy 103A.) Critical introduction to issues of state authority, justice, liberty, and equality. The issues are approached through major works in political philosophy. Topics: human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion and politics. Readings: Aristotle, Locke, Rousseau, Mill, Marx, Rawls, the U.S. Constitution, some Supreme Court cases. GER:3a (DR:8)

5 units, Aut (Okin)

57. Logic, Reasoning, and Argumentation—Study of propositional and predicate logic, emphasizing translating English sentences into logical symbols and constructing derivations of valid arguments. GER:2c (DR:4)

5 units, Spr (Staak)

60. Introduction to the History and Philosophy of Science—(Same as History and Philosophy of Science 60.) Survey of 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricism and realism positions; a case study in the history of biology. GER:3a (DR:8)

5 units, Aut (Godfrey-Smith)

74Q. Stanford Introductory Seminar: Ethical Aspects of Risk—Preference to sophomores. GER:3a (DR:8)

3-5 units, Aut (Fellesdal)

77. The Ethics of Social Decisions: Racism, Poverty, and Environmental Justice—(Same as Ethics in Society 77.) The application of moral reasoning to a particular social or political issue.

4 units, Spr (Graum)

78. Medical Ethics—Introduction to moral reasoning and its application to problems in medicine: informed consent, confidentiality in the physician-patient relationship, reproductive technology and abortion, euthanasia and physician-assisted suicide, and the distribution of medical resources.

4 units, Aut (Jaworska)

80. Mind, Matter, and Meaning—Intensive survey of some central and perennial topics in philosophy: free will and determinism, the mind-body problem, and personal identity. Prerequisite: one course in philosophy other than logic. GER:3a (DR:8) (WIM)

5 units, Aut (Braman)

Spr (Taylor)

HISTORY OF PHILOSOPHY

100-103 are surveys of important figures and movements in Western philosophy. Other courses cover particular periods, movements, and figures in the history of Eastern and Western philosophy. Prospective philosophy majors should take as many as possible during the sophomore year.

100. Greek Philosophy—Greek philosophical thought, covering Socrates, Plato, Aristotle, and the Hellenistic schools (the Epicureans, the Stoics, and the Skeptics). Topics: the nature of the soul, virtue and happiness, knowledge, and reality. GER:3a (DR:8)

4 units, Win (Sedlucz)

4 units, Aut (Gellner)

102. Modern Philosophy, Descartes to Kant—Issues in the theoretical philosophies of Descartes, Locke, Leibniz, Hume, and Kant. Topics: questions of realism and idealism, the scope and limits of the human intellect, the idea of a "science of the mind," the status of metaphysical concepts like substance and cause, and the relation of philosophy to the "new science" that emerged in the 17th century. GER:3a (DR:8)

4 units, Win (Florka)

103. 19th-Century Philosophy—Introduction to the major thinkers and problems of European philosophy in the 19th century. Interpretation of works by Kant, Hegel, Marx, and Nietzsche, focusing on the philosophy of history, responses to Kantianism, the prospects for a scientific philosophy, the possibilities for and character of a philosophical system, and the value of particular historical and cultural formations (e.g., capitalism, economy, Christianity).

4 units (Anderson) not given 1999-2000

112/212. Socrates' Philosophy—(Graduate students register for 212) Socrates' main philosophical theses and his method of argument.

4 units, Win (Sedlucz)
115/215. Pre-Socratic Philosophy—(Graduate students register for 215.) The philosophies of Heraclitus and Democritus on the nature of rationality and rational explanation. Prerequisite: 100 or classics equivalent.
4 units (Moravcsik) not given 1999-2000

116/216. Plato's Philosophy—(Graduate students register for 216.) Plato's moral psychology.
4 units (Moravcsik) not given 1999-2000

117/217. Aristotle's Philosophy—(Graduate students register for 217.) Central doctrines in Aristotle's metaphysics.
4 units, Spr (Moravcsik)

118. Hellenistic Philosophy—The epistemology, metaphysics, and ethics of the main Hellenistic schools: the Epicureans, the Skeptics, and the Stoics.
4 units (Babonich) not given 1999-2000

121/221. Descartes—(Graduate students register for 221.) Descartes's philosophy is fundamental to modern Western thought. His views, focusing on mind-body dualism. Descartes's novel way of distinguishing between the corporeal and the incorporeal. Why he adopted his form of dualism and various problems for this view. Related questions about science, religion, and knowledge.
4 units, not given 1999-2000

122/222. Locke—(Graduate students register for 222.)
4 units, Spr (Florka)

125/225. Kant's Critique of Pure Reason—(Graduate students register for 225.) In-depth study of Kant's greatest work. Selections also from Kant's Prolegomena to Any Future Metaphysics that May be Able to Come Forwards as a Science, and secondary literature.
4-5 units, Win (Anderson)

128. Hobbes—Written during the English Civil War, Hobbes' Leviathan (1651) attempts to ground obligations of obedience to an absolute state by synthesizing views of science, morality, and religion. Focus is on interpreting and analyzing this work; close reading of Leviathan and present-day commentary.
4 units, not given 1999-2000

129/229. Pragmatism—(Graduate students register for 229.) Introduction to Pierce, James, Dewey, and some recent writers such as Rorty. Focus is on questions of truth, belief, knowledge, and the nature of philosophical inquiry.
4 units, Aut (Guttmann)

131/231. The Structure of Cognition: Introduction to Husserl's Phenomenology—(Graduate students register for 231.) Its background and basic concepts. Emphasis is on the concept of intentionality, and its role in Husserl's theory and in contemporary philosophical debates.
4 units, not given 1999-2000

132/232. Existentialism—(Graduate students register for 232.) Exploration of central existentialist questions (e.g., what constitutes authentic individuality? what is our relation to the divine? how can one live a meaningful life? what is the significance of death?) through the existentialist preoccupation with human freedom. A rethinking of the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including their social and political consequences in light of 20th-century fascism and feminism.
4 units, Aut (Anderson)

133/233. Hermeneutics and Critical Theory—(Graduate students register for 233.) Introduction to two of the most important and influential schools in 20th-century German philosophy through the leading representatives of these schools: Heidegger, Gadamer, Horkheimer, and Habermas.
4 units, not given 1999-2000

134/234. Phenomenology and the Background of Contemporary Continental Philosophy—(Graduate students register for 234.) Presentation and critical discussion of Husserl's phenomenology as a key to understanding contemporary continental philosophy, notably Heidegger's and Sartre's existentialisms, Gadamer's hermeneutics, and recent trends in contemporary German and French philosophy. The role of intentionality in contemporary debates in cognitive science.
4 units (Follesdal) not given 1999-2000

LOGIC AND PHILOSOPHY OF SCIENCE

155. Concepts of Freedom—Historical and current concepts of freedom. The views of Hume, Kant, Mill, A. V. Dicey, and Hayek; recent works, including economic concepts of freedom.
4 units (Follesdal, Suppes) not given 1999-2000

157/257. Seeing Reason: An Interdisciplinary Approach—(Graduate students register for 257.) How can we combine diagrams and language in reasoning, and what are their internal mental forms? A satisfactory answer requires at least: a semantic analysis of diagrams and languages; an experimental analysis of student learning, based on the semantic theory; and an account of the different learning styles that lead to contrasting effects of presentations on different students. These ingredients yield a new theory of human reasoning focused on the creation and selection of representations.
3 units, Aut (Stenning)

156. Popper, Kuhn, and Lakatos—(Same as Education 214.) Popper, Kuhn, and Lakatos are 20th-century philosophers of science who have raised fundamental issues with the nature of scientific progress: the rationality of change of scientific belief: science vs. non-science, the role of induction in science, truth or verisimilitude as regulative ideals. Their impact in the social sciences and applied areas such as educational research.
3 units, Spr (Phillips)

159. Basic Concepts in Mathematical Logic—The concepts and techniques used in mathematical logic, primarily through the study of the language of first-order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability.
GER.2c (DR.4)
4 units, Aut (Barker-Plummer)

160. First-Order Logic—The syntax and semantics of sentential and first-order logic. Introduction to the basic concepts of model theory. Gödel's Completeness Theorem and its consequences: the Löwenheim-Skolem Theorem and the Compactness Theorem. Prerequisite: 159 or consent of instructor.
4 units, Win (Mints)

160B. Computability and Logic—Different approaches to effective computation: recursive functions, register machines, and various programming styles. Proof of their equivalence, discussion of Church's Thesis. Development of some elementary recursion theory. These techniques are used to prove Gödel's Incompleteness Theorem for arithmetic, whose technical and philosophic repercussions are surveyed. Prerequisite: 160A.
4 units, Spr (Mints)

162/262. Philosophy of Mathematics—(Graduate students register for 262.) Introduction to 20th-century approaches to the foundations and philosophy of mathematics. Background in mathematics, set theory, and logic. The schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisites: 160A or consent of the instructor.
4 units (Feferman) not given 1999-2000
163. Philosophy of Statistics—Introduction to and definition of the concept of probability in a philosophically motivated fashion. Emphasis is on the use of probabilities for decision-making under uncertainty.

4 units (Guttmann) not given 1999-2000

164/264. Central Topics in the Philosophy of Science: Scientific Explanation—(Graduate students register for 264.) Empiricist, realist, and pragmatic accounts of scientific explanation, with emphasis on the connection between explanation and metaphysical questions about laws, causation, and chance. Topics: probabilistic explanation, functional explanation, explanation of one theory by another. Recommended: 60 or 80.

4 units, Win (Strevens)

165/265. Philosophy of Physics—(Graduate students register for 265.) The philosophy of quantum mechanics. What is a superposition? The measurement problem (Schrödinger’s cat, etc.). Modern approaches to the problem: the many worlds and many minds theories, the GRW theory, Bohm’s theory.

4 units, Spr (Guttmann)

167A/267A. Philosophy of Biology—(Graduate students register for 267A.) Questions about explanation and theory construction in evolutionary biology. Analysis of key concepts: adaptation, function, units of selection, species.

4 units, Win (Godfrey-Smith)

167B/267B. Philosophy, Biology and Behavior—(Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of some key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: altruism, group selection, genetic determinism. Prerequisite: 167A (students with some philosophy background and Biology or Human Biology core, or equivalent, admitted with consent of instructor).

4 units, Spr (Godfrey-Smith)

168/268. Theories of Truth—(Graduate students register for 268.) The correspondence, coherence, pragmatist, and deflationary theories of truth. Tarski’s semantic conception of truth. The problems posed by the Liar Paradox. Introduction to formal theories of truth proposed by philosophical logicians (e.g., Kripke, Gupta and Belnap, McGee, and Barwise and Etchemendy) in the last few decades. Prerequisite: 160A or equivalent.

4 units, Spr (Feferman)

169. Intensional Logic—Logical analysis of intensional notions like modality, time, conditionals, knowledge, action, starting from their philosophical background. Introduction to the modern notions and methods of modal logic, including a choice of recent applications to computer science, AI, linguistics, and mathematics.

4 units, Spr (van Benthem)

ETHICS, AESTHETICS, AND SOCIAL AND POLITICAL PHILOSOPHY

170. Kantian Ethical Theory—Detailed study of Kantian moral philosophy, based largely on readings from Grounding for the Metaphysics of Morals and from contemporary articles exploring various issues raised in the Grounding. Emphasis is on Kant’s various formulations of the moral law, Kantian theory of value, and the Kantian answer to the question “why should I be moral?”

4 units, Win (Jaworszka)

171. Political Philosophy—Liberalism and its critics. Individual and group rights. The ability of liberal political theory to respond to critics’ attacks on its methodological and psychological foundations and on its core values.

4 units, Spr (Satz)

172/272. Is Morality too Demanding—(Graduate students register for 272.) Exploration of one of the most damning criticisms of moral theories, that they demand too much. Critics have argued that prominent moral theories require moral agents to act in ways that are either impossible or, if possible, undesirable. Can these theories capture the value of acting with integrity? Do they require agents to act as saints? Do they alienate agents from their personal projects and relationships? Do they contain an overly strenuous commitment to impartiality?

4 units (Gruen) not given 1999-2000

173. Philosophy of Literature—The themes of friendship, loyalty, and overcoming resentment in four dramas spanning 2,400 years.

4 units (Moravcsik) not given 1999-2000

175. Feminist Practical Ethics—Over the last two decades, feminist philosophers and political theorists have been developing and refining a variety of feminist approaches to public policy issues. The controversies that have emerged between feminists over affirmative action, reproductive technologies, pornography and sex work, militarism, the environment, and other issues of contemporary social concern.

4 units (Guttmann) not given 1999-2000

176A. Justice and Public Service—(Same as Ethics in Society 76.) The meaning and justification of public service, and its relationship to political activism and to justice.

4 units (Satz) not given 1999-2000

4 units, Aut (Gruen)

177. Philosophical Issues Concerning Race and Racism—Concepts of race, race consciousness, and racism, and their connections. What is “race” and what is its role in racism? How should we view ethnic and racial identities if we wish to secure the conditions in which humanity can be viewed as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance between the competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion and various explanations.

4 units, Spr (Satz)

178. Ethics in Society Honors Seminar—(Same as Ethics in Society 190.) Interdisciplinary. Students present issues of public and personal morality; topics are chosen with the advice of the instructor. Student-prepared reading list is made available a week prior to the presentation.

3 units, Win (Reich)

179. Philosophy of Friendship—Examination of different conceptions of friendship in philosophy, literature, and across cultures.

4 units, Aut (Moravcsik)

EPistemology, Metaphysics, Philosophy of Mind, and Philosophy of Language

181. Philosophy of Language—Notions of meaning, reference, and language use; with relations to psycholinguistics and formal semantics. Prerequisites: 80 and some background in logic.

4 units, Win (Taylor)

183/283. Meaning and Experience—(Graduate students register for 283.) Interrelationships between meaning and experience, emphasizing how our judgments concerning meaning may be based on empirical
184. Theory of Knowledge—The major competing theories of epistemic justification (foundationalism, coherentism, and externalism) are evaluated against the background of two central problems in the theory of knowledge: radical skepticism and the infinite regress argument. Readings: Descartes, Alston, Chisholm, Bonjour, Goldman, Pollock, Plantinga. Prerequisite: 80 or consent of instructor.
4 units, Win (Lawlor)

183-285. Contextualism/Skepticism—Standard arguments for skepticism have proved compelling and hard to combat. Why do these arguments prove compelling while we consider them, but also prove to have no effect on our practice of attributing knowledge to ourselves and others? Contextualism seeks to exploit this curious fact in response to skepticism by claiming that how good a position one must be in to count as knowing varies with the context one is in. The skeptic changes the context, thereby briefly depriving one of one’s claim to know. Readings: Austin, Clarke, Cohen, DeRose, Dretske, Lewis, Unger.
4 units, Spr (Lawlor)

186. Philosophy of Mind—The mind-body problem, including behaviorism, functionalism, and other forms of materialism; intentionality and the nature of mental representation; the explanation of action in terms of the agent’s reasons. Prerequisite: 80 or consent of instructor.
4 units, Win (Crimmins)

157/287. Philosophy of Action—What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is it to act intentionally? What is it to act for a reason? What is it to act autonomously? Readings: Davidson, Frankfurt, Korsgaard, Chisholm, Velleman, and others.
4 units, Win (Braman)

188. Personal Identity—People seem to remain the same despite the various changes they undergo during their lives. Why? The answer can profoundly influence one’s beliefs about whether people are essentially bodies or minds, and whether one’s own survival matters. Readings: John Locke, Thomas Reid, David Hume, Terence Penelhum, Bernard Williams, and Derek Parfit.
4 units, not given 1999-2000

189. Philosophical Applications of Cognitive Science—The relevance of recent discoveries about the mind to philosophical questions in metaphysics, epistemology and philosophy of science, and the rules. Is there a right way to “carve up” the world into kinds of things? Are the rules of logic objective or just a description of the way we happen to think? Is there such a thing as objective right and wrong? Prerequisite: one course in philosophy other than logic.
4 units, Aut (Strevens)

192G. Philosophical Art—(Same as Interdisciplinary Studies in Humanities 192G.)
5 units, Aut (Gutmann)

194. Undergraduate Seminars in Philosophy—Preference given to undergraduate majors. A series for advanced undergraduates. Enrollment limited to 14. For those in the Philosophy honors program, seminars serve as preparation for writing an honors thesis.

194C. Consciousness—Philosophical questions about the nature of consciousness, including how the conscious realm hooks up to the world of quarks and neurons. Some experimental; but mainly getting philosophically clear about conceptually difficult terrain.
4 units, Aut (Crimmins)

194E. Emotions and the Arts—The relationship between art and emotion, particularly the place of emotion in aesthetic experience. How is it possible to respond to artwork emotionally? What is the role of emotion in aesthetic response (is aesthetic response essentially emotional or is emotional response improper)? How do different art-forms (literature, dance, music, the visual arts) differ in their impact upon the emotions? What, if any, is the nature of our emotional response to fictional characters and to abstract and anti-subjective art?
4 units, Spr (Everett, Friend)

194M. Goodman and Wittgenstein: Rule-Following, Practices, and Community—What distinguishes lawlike statements from non-lawlike statements? How does our use of language in the past determine how we ought to use language in the future? Or does it? What is it to follow a rule? How does the community and its practices determine facts about what we mean by our language?
4 units, Win (Maguire)

194P. The Genetics of Human Identity—Stephen Anthony Mobley tried to convince the Supreme Court of Georgia that his disposition to violence was genetic in origin. The extent to which genes influence, and might be manipulated to control, aspects of human behavior and personality. The implications for notions of responsibility and the determination of individual identity.
4 units, Aut (Philpot)

194R. Topics in Moral Psychology—The sources of moral obligations, autonomy, practical identity, weakness of will. Historical readings by Plato, Aristotle, Kant, Hume; contemporary readings by Frankfurt, Watson, Korsgaard, Williams.
4 units, Win (Rosner)

194V. Latin American Philosophy—Some of the major thinkers and philosophical movements in Latin American thought, highlighting the role that specific intellectual programs have played in the history of Latin America. Topics: philosophical approaches to cultural identity and racial theory; the “culturalist” movement and the status of Latin American philosophy as a distinct intellectual project; liberation philosophy; recent Latin American analytic philosophy of culture and multiculturalism.
4 units, Spr (Vargas)

196. Tutorial: Senior Year
5 units, any quarter (Staff)

197. Individual Work for Undergraduates
any quarter (Staff)

198. The Dualist—Dedicated to the publication and promotion of The Dualist, a national journal of undergraduate work in philosophy. Requires neither papers nor presentations; students take the initiative in an informal atmosphere. May be taken one to three quarters. (AU)
1 unit, any quarter (Staff)

PRIMARILY FOR GRADUATE STUDENTS

Graduate students should also consult previous entries in the catalog for courses with graduate student numbers.

200. Symbolic Systems Seminar: Problems in Intelligence, Information, and Learning—(Same as Symbolic Systems 200.)
3 units, Win (Greeno, Wasow)

222. Genealogical Method and the Genetic Fallacy—Philosophers make appeals to the history of philosophy in support of philosophical arguments. Such appeals may be problematic, especially when they purport to address distinctively normative philosophical problems about knowledge, morality, etc. That a certain idea or practice has a particular historical origin seems irrelevant to the question of its justification. Do all “genealogical” claims in philosophy commit this genetic fallacy, and do historical claims have a standing within philosophy? Readings from continental and analytic philosophy.
3 units (Anderson) not given 1999-2000
226. Kant's System of Reason—The role of the faculty of reason in Kant’s theoretical philosophy. The limits Kant places on the use of this faculty, and the positive “regulative” use of the Ideas of Reason in philosophy and other sciences. Emphasis is on the ideal of systematicity in Kant’s thought. Readings from the Critique of Pure Reason, the Critique of Judgment, other works of Kant, and secondary literature.
3 units (Anderson) not given 1999-2000

235. James and Husserl—William James’s Principles of Psychology and Husserl’s main phenomenological works. Their bearing on recent psychological and philosophical studies of the mental.
3 units (Follesdal, Suppes) not given 1999-2000

237. Nietzsche—Nietzsche’s later works, questions of the structure of these books, and what that structure can teach us about what kind of philosopher Nietzsche was. Interpretation of the core doctrines of Nietzsche’s thought (perspectivism, the will to power, eternal recurrence) and Nietzsche’s vision of the good life for human beings. Some secondary literature.
3 units (Anderson) not given 1999-2000

239. Teaching Methods in Philosophy—For Ph.D. students in their second or third year who are teaching assistants for the department. Discussion of issues about the teaching of philosophy.
1-4 units, any quarter (Staff)

240. Individual Work for Graduates
any quarter (Staff)

242A. Philosophy of Science Seminar
3 units, Win (Guttmann, Suppes)

242B. Philosophy of Science Seminar: The Evolution of Complex Systems—A small change in one part of a complex system can have a big effect on the behavior of the system as a whole. If evolution works by “tinkering,” how can complex systems evolve, or at least, evolve in the time that they did? Recent attempts to understand the stability of complex systems under change. Emphasis is on understanding complex systems than on understanding evolution.
3 units, Win (Stevens)

250. Advanced Seminar in Philosophy of Education—(Same as Education 420B.)
1-3 units, Win (Phillips)

260. Core Seminar in Philosophy of Science—for first- and second-year students in the Philosophy Ph.D. program.
4 units (Godfrey-Smith, Strevens) not given 1999-2000

270. Core Seminar in Moral Philosophy—for first- and second-year students in the Philosophy Ph.D. program.
4 units, Win (Jaworska, Satz)

271. Graduate Seminar: Topics in Democratic Theory—Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Petit, Iris Marion Young, Ian Shapiro, and Amy Gutman.
3-5 units (Ferejohn, Satz) not given 1999-2000

275. Marx and Weber—Marx and Weber aspired to grasp the fundamental political problems of the human predicament (unfreedom, inequality, oppression, and bureaucratization). Both developed theories to account for these problems and investigated the extent that such problems could be mitigated or resolved, and believed that social science could contribute to our understanding of the modern world, and to our efforts to change it. Their works are evaluated with regard to our own convictions about politics, human agency, social change, and the role of knowledge.
3 units (Satz) not given 1999-2000

279. Moral Psychology—Recent philosophical works on desire, intention, the motivation of action, valuing, and reasons for action. Readings: Williams, Korsgaard, Smith, Blackburn, Velleman, Stampe, Frankfurt, and others.
3 units, Spr (Bratman)

280. Core Seminar in Metaphysics and Epistemology—for first- and second-year students in the Philosophy Ph.D. program.
4 units, Aut (Godfrey-Smith, Lawlor)

281. Core Seminar in Philosophy of Language—for first- and second-year students in the Philosophy Ph.D. program.
4 units (Perry) not given 1999-2000

282. Mental Causation
3 units (Taylor) not given 1999-2000

284. Graduate Seminar in the Philosophy of Action—the central features of human agency, including our capacities for purposive agency, for reflective endorsement of our motivation, and for planning. Reading from Davidson, Frankfurt, Korsgaard, Velleman, etc.
3 units (Bratman) not given 1999-2000

286B. Graduate Seminar in Metaphysics—Examination of views on negation and predication (authors include Russell and Ramsey).
3 units, Spr (Moravcsik)

288. Graduate Seminar on Vagueness—theories about the nature and extent of vagueness in language and in the world, plus an attempt to push the boundaries. Recommended: some background in logic, philosophy of language, and metaphysics.
3 units, Aut (Crimmins)

289. Brain and Mind—Detailed comparison of current concepts in the philosophy of mind and in neuroscience, with emphasis on theories of brain computations and processing of language. Readings from current literature.
3 units, Aut (Follesdal, Suppes)

297. Phenomenology and Logic—Phenomenological views on logic, mathematics, and computation. Emphasis is on the contemporary relevance of these views. Selections from Husserl’s work on logic and mathematics and from the recent literature.
3 units, not given 1999-2000

298. Logical Dynamics—Logical analysis of information flow and cognitive action, using recent techniques from dynamic logic and other process theories, update semantics for natural language, and (powerful new development) interfaces with game theory.
3 units, Spr (van Benthem)

299. Topics in Philosophy of Logic—Foundational issues in logic; the question of what the subject matter and boundaries of logic are. The claim that second-order logic is not logic. What has led philosophers to such peculiar-sounding claims? Is the claim based, as the instructor has argued, on a faulty definition of logical consequence? Prerequisite: 160A, concurrent registration in 160A, or consent of the instructor.
3 units (Etchemendy) not given 1999-2000

322. Leibniz—Analysis of Leibniz’ philosophical system with an emphasis on his metaphysics.
3 units, not given 1999-2000

373. Mind, Action, and Rationality—Topic: the intersection of research in philosophy and the social sciences on basic issues about agency
and practical reason. Prerequisite: graduate standing or consent of instructors.

380. Graduate Seminar on Mind and Action: Animal Awareness—Recent psychological and philosophical literature on the question of animal thought, awareness, and intentionality.

3 units, not given 1999-2000

382. Concepts—Metaphysical questions about the nature of concepts and epistemological psychological questions about the acquisition of concepts. What in natural concepts are such that a mind may deploy them in thought. What makes a particular concept the concept that it is. The extent to which theories of concept acquisition must be informed by a correct account of the metaphysical nature of concepts. Readings from philosophy and some psychological literature.

3 units, not given 1999-2000

383. Epistemology—Examination and comparison of Hume and Goodman on induction, and Wittgenstein on following a rule.

3 units, not given 1999-2000

450. Thesis

any quarter (Staff)

AFFILIATED DEPARTMENT OFFERINGS

COMPARATIVE LITERATURE

80N. Stanford Introductory Seminar: The Science Wars—Does Physics get Closer to Reality than Poetry?

5 units, Win (Rorty)

172. From Religion through Philosophy to Literature

5 units, Win (Rorty)

240. Introduction to Philosophy of Education

4 units, Aut (Callan)

FRENCH AND ITALIAN

254E. Introduction to French Philosophy: From 1943 to the Present

3-5 units, Spr (Dupuy)

MATHEMATICS

161. Set Theory

not given 1999-2000

290A,B. Model Theory

3 units, Aut, Win (Mints)

291A,B. Recursion Theory

not given 1999-2000

292A,B. Set Theory

3 units, Win, Spr (Feferman)

293A,B. Proof Theory

not given 1999-2000

294. Topics in Logic

3 units, Spr (Mints)

POLITICAL SCIENCE

155S/255S. Seminar: Rousseau and his Times

5 units, Win (Okin)

157. Seminar: Morality and Law

5 units (Hardin) given 2000-01

251B. History of Political Thought II: The Origins of Modern Democracy

5 units, Win (Okin)

254H. Seminar: Hume and Montesquieu

5 units (Hardin) not given 1999-2000

267. Seminar: Gender, Development, and Women's Human Rights in International Perspective

5 units, Aut (Okin)

268. Seminar: Contemporary Theories of Justice

5 units (Okin) not given 1999-2000

RELIGIOUS STUDIES

42. Philosophy of Religion

4 units, Aut (Gelber)

55. Introduction to Chinese Religions

4 units, Win (Cedzich)

PHYSICS

Emeriti: (Professors) Stanley S. Hanna, William A. Little, Walter E. Meyerhof, David M. Ritson, J. Dirk Walecka, Mason R. Yeeian

Chair: Steve Chu

Associate Chair: Douglas D. Osheroff

Director of Graduate Study: Roger W. Romani

Director of Undergraduate Study: Charles M. Marcus

Associate Professors: Patricia Burchat, John Doyle, Giorgio Gratta, Shamit Kachni, Charles M. Marcus, Roger W. Romani, Zhi-Xun Shen

Assistant Professors: Sarah Church, Scott Thomas, Jeffrey Willick

Professors (Research): John A. Lipa, Phillip H. Scherrer, Todd I. Smith, John P. Turneaure

Courtesy Professors: Richard Taylor, Richard N. Zare

Lecturer: Richard L. Pam

Consulting Professor: Theodor Hansenh

Consulting Associate Professor: Peter Rowson

Consulting Assistant Professor: Hal Edwards

Visiting Professor: Matthias Neubert

The Russell H. Varian Laboratory of Physics, the nearby W. W. Han sen Experimental Physics Laboratory (HEPL) and the E. L. Ginzton Labor atory form a closely related complex which houses a range of physics activities from general courses through advanced research. At the Stanford Free Electron Laser Center, located in HEPL, tunable picosecond optical beams are available for materials and biomedical research at wavelengths that extend from the visible to the far infrared. Separate from this group is the Stanford Linear Accelerator Center (SLAC), a high energy physics lab which has as its principal tools a two-mile-long 50- GeV electron accelerator and a 6-GeV electron-positron storage ring. Also at SLAC are a 30 GeV electron-positron storage ring (PEP) and the Stanford Synchrotron Radiation Laboratory (SS-RL). A high-energy facility, the Stanford Linear Collider (SLC), provides electron-positron collisions at about 100 GeV in the center of mass.
Professor Byer is director of HEPL, and Professors Cabrera, Lipa, Michelson, Scherrer, Schwettman, Smith, and Tousey are members of the staff. The Gordon Laboratory, HEPL, SLAC, and SSRL are listed in the "Independent Research Laboratories, Centers, and Institutes" section of this bulletin.

Stanford is a member of the Hobby-Eberly Telescope Consortium. This 10.4 meter telescope has begun operation at McDonald Observatory in Texas. There are opportunities for graduate and undergraduate students doing research projects to use this telescope.

Stanford has also built (with CalTech) an underground laboratory for the study of neutrino oscillations near the Palo Verde Nuclear Generating Station, 50 miles west of Phoenix, Arizona. It is in operation and students are engaged in the construction and operation of the experiment.

The Physics Library, a center for the reading and study of physics and astronomy at all levels, includes current subscriptions and back sets of important journals together with textbooks, scholarly treatises in English, French, German, and Russian, and the collected works of the most eminent physicists.

Course work is designed to provide students with a sound foundation in both classical and modern physics. Students who wish to specialize in astronomy, astrophysics, or space science should consult the "Astronomy Course Program" section of this bulletin.

Three introductory series of courses include labs in which undergraduates carry out individual experiments. The Intermediate and Advanced Physics Laboratories offer facilities for increasingly complex individual work. Undergraduates are also encouraged to participate in research; most can do this through the honors program.

Graduate students find opportunities for research in the fields of astrophysics, atomic physics/laser science, coherent optical radiation, condensed matter physics, high energy physics, intermediate energy physics, low temperature physics, and theoretical physics. Opportunities for research are also available with the faculty at SLAC in the areas of theoretical and experimental particle physics and accelerator design, and with the faculty in Physics and Applied Physics in the areas of astrophysics, materials research, novel imaging technology, photon science, quantum electronics, and theoretical and experimental condensed matter physics.

The number of graduate students admitted to the Department of Physics is strictly limited. Students should complete application by January 1 for the following Autumn Quarter. Graduate students may normally enter the department only at the beginning of Autumn Quarter.

### UNDERGRADUATE PROGRAMS

The study of physics is undertaken by three principal classes of undergraduates: those including physics as part of a general education; those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering; and those preparing for teaching or research careers in physics or related fields. Physics courses numbered below 200 are planned to serve all three of these groups. The courses numbered above 200 meet the needs mainly of the third group, but also of some students majoring in other branches of science and in engineering.

### BACHELOR OF SCIENCE

Requirements for the degree of Bachelor of Science in Physics are:

- Physics 61, 63, 64, 65, 66, 70, 105, 106, 107, 110, 111, 120, 121, 122, 130, 131, 132, 170, 171, 201; Mathematics 51, 52, 53, 131; any one additional mathematics course numbered 100 or higher; and one of the following advanced physics courses: 135, 160, 161, 172, 181, 203, 204 or 262. (The Physics 40 series can replace the 60 series requirements, and Mathematics 51H, 52H, and 53H may substitute for Mathematics 51, 52, and 53.)
- The department advises the study of some chemistry, for example, Chemistry 31 or 32, 33, and 35 and some computer science, for example, CS 106. Mathematics and physics courses taken to satisfy the department's major requirements cannot be taken on a credit/no credit basis. Prospective physics majors are also recommended to take Physics 59, Current Research Topics.

In an effort to increase the flexibility of the Physics major for students with strong interests in allied disciplines such as biology, chemistry, computer science, electrical engineering, or mathematics, selected courses from the Physics major (indicated by an * below) may be replaced with a concentration of correspondingly advanced courses in one of these other fields. In all cases, these modifications to the Physics major toward an interdisciplinary course of study should be worked out beforehand with the student's adviser and must be documented with the undergraduate program coordinator.

To decide which introductory sequence is appropriate, students contemplating majoring in physics are urged to consult with the instructor of Physics 61 or the undergraduate program coordinator at the earliest possible date to see which sequence is the most suitable. Students who begin taking an entry level physics course after their freshman year and wish to major in physics are generally advised to take the Physics 61, 63, 65 sequence, provided they have previously taken Mathematics 41.

Undergraduates are offered help with physics problems in the department tutoring center, the Reference Frame, which is staffed Monday through Thursday.

### REQUIRED COURSES FOR MAJORS

* These courses may be replaced with a concentration of correspondingly advanced courses in another field as part of an interdisciplinary program. This must be discussed with the student's adviser and documented with the undergraduate program coordinator.

### CONCENTRATION IN ASTROPHYSICS

This area encompasses the study of the universe and its constituent planets, stars, and galaxies. The courses recommended for a concentration in astrophysics are four undergraduate courses; one laboratory course, 100; and three lecture courses: Electrical Engineering 106 (or also the Astronomy Program) on planetary exploration; Physics 160 on stars and galactic structure; and Physics 161 on galaxies and cosmology. More advanced students, and in particular, those undergraduates whose honors thesis topic is in this concentration area, are strongly urged...
MINOR IN ASTRONOMY

Modern astronomy deals with the origin and evolution of the dramatic range of objects observed in our Universe. The language of this study is physics. Those wishing to pursue advanced work in astronomy or related fields should major in physics with an astrophysics concentration. The minor programs below are designed primarily for those from other disciplines with a general interest in astronomy. In particular, the non-technical minor treats the subject in a more descriptive manner.

An undergraduate minor in Astronomy requires the following course work:

NON-TECHNICAL

For students whose majors do not require the Physics 40 or 60 series:

HONORS PROGRAM

The department offers a program leading to the degree of Bachelor of Science in Physics with Honors as follows:

1. Students must submit an Honors Program Proposal to the Undergraduate Program Coordinator once they find a physics project, either theoretical or experimental, in consultation with individual faculty members. Proposal forms are available from the Physics Undergraduate Center and must be submitted by November 1 of the year in which the students' degree will be conferred.

2. Credit for the project is assigned by the adviser within the framework of Physics 205 or Astronomy 169. The work done in the honors programs may not be used as a substitute for regularly required courses.

3. Both a written report and a presentation of the work at its completion is required for honors. By mid-May, each honors candidate is required to present his or her project at the department's Honors Presentations. (This event is publicized and is open to the general public. The expectation is that the student's adviser and second reader, along with all other honors candidates, will attend.)

4. The decision as to whether a given independent study project does or does not merit award of honors is made jointly by the student's honors adviser and the second reader for the written thesis. This decision is based on the quality of both the honors work and the other work in physics.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The department does not offer a coterminal degree program, nor a separate program for the M.S. degree, but this degree may be awarded for a portion of the Ph.D. degree work.

University requirements for the master's degree, discussed in the “Graduate Degrees” section of this bulletin, include registration for at least three quarters at full tuition as a graduate student and completion of 36 units of course work after the bachelor's degree. Among the department requirements are a grade point average (GPA) of at least 'B' in courses 201, 203, 210, 211, 212, 220, 221, 230, 231, 232, or their equivalents. Up to 6 of these required units may be waived on petition if the equivalent is submitted.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin. The minimum department requirements for the Ph.D. degree in Physics consist of completing all courses listed below, and at least one quarter from each of two subject areas (among condensed matter, quantum optics and atomic physics, astrophysics and gravitation, and nuclear and particle physics) chosen from courses with numbers above 232, except 290 and 294. The requirements in this list may be fulfilled by passing the course at Stanford or passing an equivalent course elsewhere: 201, 203, 210, 211, 212, 220, 221, 230, 231, 232, 290, 294. A GPA of at least 'B' is required in all the courses taken toward the degree.

All Ph.D. candidates must have math proficiency equivalent to the following courses: 106, 113, 114, 130, 131, 132.

Prior to making an application for candidacy, each student is required to pass a comprehensive qualifying examination on undergraduate physics. This exam is given annually at the beginning of Winter Quarter. Graduate physics is tested by the exams in the first-year courses (210-232). A thesis proposal must be submitted during the third year. In order to assess the direction and progress toward a thesis, an oral report and evaluation is required during the fourth year. After completion of the dissertation, each student must take the University oral examination (defense of dissertation). The Physics faculty also believes that a scientist should have facility with a foreign language for cultural reasons as well as to establish better contact at meetings in foreign countries.

Three quarters of teaching (including a demonstrated ability to teach) are a requirement for obtaining the Ph.D. in Physics.

Students interested in applied physics and biophysics research should also take note of the Ph.D. grant independently by the Department of Physics.
Applied Physics and by the Biophysics Program administered through the Department of Chemistry. Students interested in astronomy, astrophysics, or space science should also consult the "Astronomy Course Program" section of this bulletin.

Ph.D. MINOR

Minors in Physics must take at least six courses numbered 210 to 232 among the 20 required units. All prospective minors must obtain approval of their physics course program from the Physics Graduate Study Committee at least one year before award of the Ph.D.

FELLOWSHIPS AND ASSISTANTSHIPS

The Department of Physics makes an effort to support all its graduate students through fellowships, teaching assistantships, research assistantships, or a combination of sources. Information on application procedures is mailed with the admission information.

TEACHING CREDENTIALS

For information on teaching credentials, consult the "School of Education" section of this bulletin or address an inquiry to the Credential Administrator, School of Education.

The degree of Master of Arts in Teaching is offered jointly by this department and the School of Education. The degree is intended for those who have a teaching credential and wish to strengthen their academic background. Both the Twenty and Forty Series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments closely correlated with the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the two series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the Forty Series.

Both the Twenty and Forty Series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments closely correlated with the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the two series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the Forty Series.

There are four series of beginning courses. The Ten Series (11, 15, 16, 19, 27) is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics. The Twenty Series (21, 22, 23, 24, 25, 26) is recommended for general students and for students preparing for medicine or biology. The Forty Series (41, 43, 45, 46, 47, 48) is for students of engineering, chemistry, geology, mathematics, and some physics majors. The Advanced Freshman Series (61, 63, 64, 65, 66) is for the well-prepared student and is the preferred introductory series for those physics majors who have the appropriate background.

COURSES

There are four series of beginning courses. The Ten Series (11, 15, 16, 19, 27) is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics. The Twenty Series (21, 22, 23, 24, 25, 26) is recommended for general students and for students preparing for medicine or biology. The Forty Series (41, 43, 45, 46, 47, 48) is for students of engineering, chemistry, geology, mathematics, and some physics majors. The Advanced Freshman Series (61, 63, 64, 65, 66) is for the well-prepared student and is the preferred introductory series for those physics majors who have the appropriate background.

Both the Twenty and Forty Series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments closely correlated with the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the two series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the Forty Series.

Courses beyond 99 are numbered in accordance with a three-digit code. The first digit indicates the approximate level of the course: undergraduate courses (1); first-year graduate courses (2); more advanced courses (3); research, special, or current topics (4). The second digit indicates the general subject matter: laboratory (0); general courses (1), (2), (3); nuclear physics (4); elementary particle physics (5); astrophysics, cosmology, gravitation (6); condensed matter physics (7); optics and atomic physics (8); miscellaneous courses (9).

UNDERGRADUATE

(WIM) indicates that the course meets the Writing in the Major requirements.

ASTRONOMY

For further information on astronomy and astrophysics courses, consult the Astronomy Course Program.

15, 16. Topics in Modern Astronomy—15 and 16 are for students not majoring in the physical sciences and are taught in different quarters by different instructors. They are related in topic but emphasize different aspects of modern astronomy and cosmology. Students may take 15, 16 individually or in sequence.

15. The Nature of the Universe—Introduction to the structure, origin, and evolution of the major components of the Universe: planets, stars, and galaxies. Emphasis is on the formation of the Sun and planets, the evolution of stars, and the structure and content of our galaxy. Topics: cosmic enigmas (dark matter, black holes, pulsars, X-ray sources). Star birth and star death. The origins of and search for life in our solar system and beyond. GER:2a (DR:5)

3 units. Aut (Wagoner)

16. Cosmic Horizons—Introduction to the origin and evolution of our universe and its contents: stars, galaxies, quasars, etc. The overall structure of the cosmos and the physical laws that govern matter, space, and time. Topics: the evolution of the cosmos from its primeval fireball, the origin of the elements and the formation of stars and galaxies, exotic astronomical objects (black holes, quasars, supernovae, and gamma ray bursts), dark matter, and the fate of the cosmos. GER:2a (DR:5)

3 units. Spr (Romani)

18N. Stanford Introductory Seminar: Revolutions in Concepts of the Cosmos—Preference to freshmen. Faculty led dialogue. Introduction to four revolutionary changes in humanity's concept of the cosmos (explored at the Stanford Observatory): Copernicus' heliocentric model of the solar system, Herschel's concept of the galaxy as a collection of stars, Shapley's model of the Milky Way galaxy, and Hubble's discovery that the universe is expanding. Enrollment limited to 20 in one section. GER:2a (DR:5)

3 units. Win (Wagoner)

27. Evolution of the Cosmos—Similar to 15 or 16 but at a somewhat more quantitative level. The origin and evolution of astronomical objects: planets, stars, black holes, galaxies, and the universe at large, emphasizing modern developments in astronomy and physics relevant to the subject matter. The development of life in the universe. (Algebra is used.) Offered occasionally. Recommended: high school physics and calculus. GER:2a (DR:5)

3 units. Win (Wagoner)

50. Astronomy Laboratory and Observational Astronomy—The theory and use of the optical telescope and the interpretation of basic observational data of planets, stars, and galactic systems. Individual observations with a 24-inch Cassegrain telescope are supplemented by lectures/discussion of basic observational techniques, astronomical catalogs and coordinate systems, and the relation of observations to astrophysical models. Limited enrollment. Lab. GER:2a (DR:5)

3-4 units. Aut, Sum (Walker)

59N. Stanford Introductory Seminar: 21st-Century Physics—Current Topics of Research—Preference to freshmen. Supplements 59 Discussion, reading, and writing on areas of physics research currently active: neutrinos, Bose-Einstein condensates, high temperature superconductors, the fate of the universe.

1 unit. Win (Marcus)

81Q. Stanford Introductory Dialogue: Lookback Time in Cosmology—Preference to sophomores. The use of telescopes as "time machines" to see the history of the universe. Summary of the big bang, galaxies and quasars at high redshift. How old is the universe? When did the first objects form? When were the elements created? What is the cosmic dark matter? Can we predict the future evolution of the cosmos? Discussion is at a semi-quantitative level: basic physics concepts used without calculus. Directed reading, sample exercises, and (weather permitting) a term project observing distant galaxies and quasars at the Stanford teaching observatory. Prerequisites: elementary physics (21-22 or equivalent).

1 unit. Win (Romani)

3 units, Aut (Petrosian)

162. Planetary Exploration—(Enroll in Electrical Engineering 106.)

3 units, Spr (Fraser-Smith)

169A,B,C. Independent Study in Astrophysics and Honors Thesis—Detailed study of a selected problem in astrophysics with one or more faculty members. While not all projects require three quarters, the sequence below suggests the format most projects are expected to follow. Projects may commerce in any quarter.

169A. Selection of the Problem—Selection of the problem to be studied and development of the theoretical apparatus or initial interpretation of the selected problem. Preparation of a detailed description of the problem and its background and a comprehensive discussion of the work planned in the subsequent two quarters.

1-9 units, Aut (Staff)

169B. Continuation of Project—Substantial completion of the required computations or data analysis for the research project selected.

1-9 units, Win (Staff)

169C. Completion of Project—Completion of research and writing of a detailed paper presenting methods used and results.

1-9 units, Spr (Staff)

PHYSICS

11N. Stanford Introductory Seminar: Symmetries of Nature—From Inner Space to Outer Space—Preference to freshmen. Physicists use symmetry principles to discover the laws of nature on a subatomic scale and how these symmetries determine the behavior of matter on microscopic scales of atoms, nuclei, and elementary particles. In parallel with our understanding of Nature on subatomic scales (Inner Space), our understanding of the structure and development of the universe (Outer Space) has undergone radical revisions. Observations of the motions of galaxies, plus the assumption that we have a typical view of the universe, have led to the conclusion that the universe began with an instantaneous, enormous explosion, about 12 billion years ago. The status of the quest to unify the fundamental interactions (electromagnetic, weak, strong, and gravitational interactions) observed in Nature into a unified Theory of Everything. The impact of this quest to understand Inner Space on understanding the origin and evolution of the universe. Discussions semi-quantitative. Term project paper. Prerequisite: high school physics or equivalent.

1 unit, Aut (Michelson)

120Q. Stanford Introductory Dialogue: Expanding Cosmic Horizons—Preference to sophomores. The history and structure of our cosmic environment. How recent advances in observations at various wavelengths are expanding the horizons of our knowledge. Possible topics: What are the properties of black holes? What is the nature, amount, and distribution of the "dark matter" which appears to dominate the universe? What is the geometry and fate of the universe? Prerequisite: freshman physics or equivalent. 1 unit, Aut (Wagoner)
29. Electricity and Magnetism II, Optics, Modern Physics—Magnetism, induced currents; wave motion, optics; relativity, quantum mechanics, atomic theory, radioactivity, nuclear structure and reactions, elementary particles, astrophysics, and cosmology. Prerequisite: 28. GER:2a (DR:5)
6 units, Sum (Staff)

41. Mechanics—Vectors, particle kinematics and dynamics, work, energy, momentum, angular momentum; conservation laws; rigid bodies. Discussions based on use of calculus. Corequisite: Mathematics 19 or 41, or consent of instructor. GER:2a (DR:5)
3 units, Aut (Cabrera)

41N. Stanford Introductory Seminar: Mechanics—Insights, Applications, and Advances—Preference to freshmen. Faculty led and associated with 41, with student participation. Possible topics: tidal forces, gyroscopic effects, fractional dimensions, and introduction to chaos. Enrollment limited to 20 in one section. Corequisite: 41 or advanced placement.
1 unit, Aut (Romani)

43. Electricity—Mechanical waves. Electrostatics including fields, potentials, capacitors, and dielectrics. Steady state currents, and circuits with batteries and resistors. RC circuits. Prerequisites: 41, and Mathematics 19 or 41. Corequisite: Mathematics 20 or 42, or consent of instructor. GER:2a (DR:5)
3 units, Win (Schwettman)

43N. Stanford Introductory Seminar: Electricity—Understanding Electrical Phenomena—Preference to freshmen. Expands on the material presented in 43, discussing a variety of phenomena associated with electricity and magnetism, and allowing students to connect the material in 43 with the world in which they live. Corequisite: 43 or advanced placement.
1 unit

45. Magnetism—Time varying currents and fields, inductance, Maxwell's equations, electromagnetic oscillations and waves. Special relativity. Prerequisite: 43. GER:2a (DR:5)
3 units, Spr (Michelson)

45N. Stanford Introductory Seminar: Special Topics in Electromagnetism—Preference to freshmen. Expands on the material presented in 45, discussing a variety of phenomena associated with electricity and magnetism, and allowing students to connect the material in 45 with the world in which they live. Special topics related to recent developments in experimental and theoretical physics. Corequisite: 45 or advanced placement.
1 unit, Spr (Thomas)

46. Electricity and Magnetism Laboratory—Pre- or corequisite: 45. 1 unit, Spr (Michelson)

47. Light and Heat—Reflection and refraction of light, lens systems; light and electromagnetic waves; temperature, properties of matter, introduction to kinetic theory of matter. Prerequisites: 45 and Mathematics 51, or consent of instructor. GER:2a (DR:5)
4 units, Aut (Osheroff)
Sum (Staff)

48. Light and Heat Laboratory—Pre- or corequisite: 47. 1 unit, Aut (Osheroff)
Sum (Staff)

50. Advanced Physics—Recommended for all prospective physics majors. Major areas of current research. Topics: fundamental particles, solid state physics, low temperature physics, biophysics, and astrophysics. Lectures by faculty and physicists with research interests in these fields.
1 unit, Win (Marcus)

61, 63, 65. Advanced Freshman Physics—Recommended for students contemplating a major in Physics and other students interested in a more rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, special relativity, and electricity and magnetism; selected topics in heat and light in Spring Quarter. Lectures and small discussion sections. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable); prior or concurrent registration in Mathematics 42. Physics 61, 63, and 65 are all GER:2a (DR:5)
61. 4 units, Aut (Moler)
63. 4 units, Win (Dimopoulos)
65. 4 units, Spr (Dimopoulos)

1 unit, Aut (Romani)

63N. Stanford Introductory Seminar: Applications of Electromagnetism—Preference to freshmen. Faculty led and associated with 63, including material related to the 63, but at a slightly more advanced level. Student participation is encouraged in the selection of topics. Enrollment limited to 20 in one section. Corequisite: 63.
1 unit, Win (Fetter)

64, 66. Advanced Freshman Physics Laboratories—Experimental work in mechanics, electricity and magnetism, and optics. Prerequisite: 61.
64. 1 unit, Win (Dimopoulos)
66. 1 unit, Spr (Dimopoulos)

65N. Stanford Introductory Seminar: Statistical Mechanics—Principles and Applications—Preference to freshmen. Faculty led and associated with 65, including material related to 65, but at a slightly more advanced level. Concepts about thermal and statistical physics are discussed with examples and applications. Enrollment limited to 20 in one section. Corequisite: 65.
1 unit, Spr (Zhang)

70. Modern Physics—Relativity, the experimental basis of quantum theory, Schrödinger equation, atomic structure, nuclear structure, high energy physics, elementary particles. Prerequisite: 45. Recommended: prior or concurrent registration in Mathematics 53 or 130. GER:2a (DR:5)
3 units, Aut (Marcus)

72. Modern Physics Laboratory—Preference or corequisite: 25 or 70. 1 unit, Aut (Marcus)

80N. Stanford Introductory Seminar: The Technical Aspects of Photography—Preference to freshmen. For those with some background in photography. How cameras record photographic images of film and electronically. The technical photographic processes which the photographer must understand in order to use cameras effectively. Camera types and their advantages, how lenses work and their limitations, camera shutters, light meters and the proper exposure of film, file types, depth of focus, control of the focal plane, and special strategies for macro and night photography. View cameras and range finders. Basic exposure calculations. Students exploit the flexibility of these formats to take photographs around campus. Prerequisite: knowledge of elementary physics.
3 units, Spr (Osheroff)
30. **Stanford Introductory Seminar: The Physics of Terrorist Bomb Detection**—Preference to sophomores. The bombing of Pan Am 103 over Lockerbie, Scotland in December 1988 has pushed efforts to develop a suitable bomb detector to protect airplanes, buildings, tunnels, and other terrorist targets. The limitations imposed on a successful detection system, and the physics principles already tried or under development. Site visits are made to industrial laboratories engaged in making bomb detectors. Prerequisite: high school background in physics. 3 units

34. **Stanford Introductory Dialogue: On Growth and Form**—Preference to sophomores. Introduces important concepts in physics by analyzing the shapes of objects and growth mechanisms from a statistical mechanics point of view. Concepts such as self-similarity, fractals, and random processes describe the objects. Simple computer simulations study and visualize objects. Demonstrations by instructor and the students. 1 unit

105, 106, 107. **Intermediate Physics Laboratory Seminars**—Sequence in experimental techniques required of all Physics majors. Topics: electronics, detectors and radioactive sources, optics and lasers, statistics and data handling. Lectures/labs. 106 consists of independent experiments. Prerequisites: 46 or 64 and 66; prior or concurrent registration in 48 and the 120 series.

105. **Laboratory Seminar I: Electronics** 3 units, Aut (Pam)

106. **Laboratory Seminar II: Particle Physics Experimental Techniques** 3 units, Win (Grazia)

107. **Laboratory Seminar III: Optics**—(WIM) 3 units, Spr (Chu)

110, 111. **Intermediate Mechanics**—The mechanics of systems of particles and rigid bodies. Coordinate transformation and vectors; Newtonian mechanics; linear and nonlinear oscillations; Hamilton’s principle, Lagrangian and Hamiltonian dynamics; central forces, planetary motion; collisions; non-inertial reference systems; rigid body dynamics; coupled oscillations; and introductory fluid mechanics. Prerequisites: 41 or 61, and Mathematics 53 or 130.

110. 4 units, Win (Shen)

111. 4 units, Spr (Kono)

120, 121, 122. **Intermediate Electricity and Magnetism**—Vector analysis, electrostatic fields, including multipole expansion; dielectrics. Special relativity and transformation between electric and magnetic fields. Maxwell’s equations. Static magnetic fields, magnetic materials. Electromagnetic radiation, plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation. Wave guides and cavities. Prerequisites: 45 or 63; concurrent or prior registration in Mathematics 53, 130 or 131; with Physics 120 and 121, respectively. Recommended: concurrent or prior registration in Mathematics 103.

120. 4 units, Aut (Thomas, Dimopoulos)

121. 4 units, Win (Thomas)

122. 4 units, Spr (Thomas)

130, 131, 132. **Quantum Mechanics**—The origins of quantum mechanics, wave mechanics, and the Schrödinger equation. Heisenberg’s matrix formulation of quantum mechanics, solutions to one-dimensional systems, separation of variables and the solution to three-dimensional systems, the central field problem and angular momentum eigen-states, spin and the coupling of angular momentum, Fermi and Bose statistics, perturbation theory and other approximation techniques. Scattering theory: partial wave expansion, Born approximation, Green’s functions. Reference to problems in atomic and nuclear physics explaining the basic phenomenology of these disciplines. Invariance principles and conservation laws in the context of quantum theory. Prerequisites: 70 or equivalent and 110, 111; concurrent or prior registration in 120, 121, 122, and Mathematics 53 or 130, 131.

130. 4 units, Aut (Laughlin)

131. 4 units, Win (Laughlin)

132. 4 units, Spr (Laughlin)

135. **Computational Physics**—Development of computational methods with application to problems in classical, electro-, quantum, and statistical mechanics. Numerical integration; solution of ordinary differential equations including the Runge-Kutta method; solutions of the heat equation and Poisson’s equation with relaxation methods, etc.; Monte Carlo methods; matrix methods and eigenvalue problems. Short introduction to Basic programming; class projects may be programmed in Basic, Fortran Pascal, or C. Offered occasionally. Prerequisites: 110, 111, 121; Mathematics 53 or 130.

3 units
201, 203. Advanced Physics Laboratory—Experiments in atomic, nuclear, solid state, and low-temperature physics; optics; and particle physics. 201 has individually prepared lab experiments. 203 consists of continued experiments at the advanced physics lab level or preparation of a new experiment. Prerequisites: 105, 107. Recommended: prior or concurrent registration in 171.

201. 3 units, Spr (Marcus)
203. 3 units, Spr (Marcus)

204. Senior Seminar in Theoretical Physics—Topics of recent interest in theoretical physics: Bose-Einstein condensation of atoms, high Tc superconductivity of cuprates, quantized Hall effect, quantum chaos, superfluidity of H_2. Work in the seminar may provide a basis for an honors project in theoretical physics. Prerequisite: 132 or consent of instructor.

3 units, Aut (Doniach)

205. Honors Undergraduate Research—Experimental or theoretical project and thesis in physics under supervision of a faculty member. Planning of the thesis project should begin no later than middle of the junior year. Successful completion of an honors thesis leads to graduation "with departmental honors." Prerequisites: superior work in physics as an undergraduate major and approval of the honors committee.

1-8 units, any quarter (Staff)

GRADUATE

207, 208. Laboratory Electronics—(Enroll in Applied Physics 207, 208.)

207. 3 units, Win (Fox)
208. 3 units, alternate years, given 2000-2001

210. Advanced Particle Mechanics—The Lagrangian and Hamiltonian dynamics of particles (a review), small oscillations, and rigid body motion. Transition to continuum mechanics. Prerequisites: 111, 122.

3 units, Aut (Fetter)

211. Continuum Mechanics—Elasticity, fluids, turbulence, waves, gas dynamics, shocks, and MHD plasmas. Examples from everyday phenomena, geophysics, and astrophysics. Prerequisite: 111.

3 units, Win (Romani)

3 units, Spr (Willick)

3 units, Win (Doniach) alternate years, not given 2000-01

216. Back of the Envelope Physics—Survey of topics intended to develop the ability to do simple, physically based calculations with undergraduate physics. Goal: sharpen ones physical intuition and promote a synthesis of physics at the undergraduate level through the examination of problems normally not usually included in undergraduate physics. Topics: practice in making order of magnitude estimates, applications of statistical mechanics, astrophysics and cosmology, biological physics, scaling concepts in physics, quantum interference and quantum measurement, geophysics, etc. Prerequisites: mechanics, statistical mechanics, electricity and magnetism, and quantum mechanics at the undergraduate level.

3 units, Aut (Chu)

220, 221. Classical Electrodynamics—Electrostatics and magnetostatics: conductors and dielectrics, magnetic media, electric and magnetic forces and energy. Maxwell's equations; electromagnetic waves, Poising's theorem, electromagnetic properties of matter, dispersion relations, wave guides and cavities, magnetohydrodynamics. Special relativity: Lorentz transformations, covariant, equations of electrodynamics and mechanics, Lagrangian formulation, Noether's theorem and conservation laws. Radiation: dipole and quadrupole radiation, electromagnetic scattering and diffraction, the optical theorem, Liénard-Wiechert potentials, relativistic Larmor's formula, frequency and angular distribution of radiation, synchrotron radiation. Energy losses in matter; Bohr's formula, Cherenkov radiation, bremsstrahlung and screening effects, transition radiation. Prerequisites: 122 or equivalent; Mathematics 106 and 132, or concurrent registration in Physics 210 and 211.

220. 3 units, Win (Whittum)
221. 3 units, Spr (Whittum)

230, 231, 232. Quantum Mechanics—Prerequisites: 132 and a strong course on differential equations.

3 units, Aut (Shenker)

3 units, Win (Shenker)

3 units, Spr (Shenker)

240. Asymptotics Methods in Physics Problems—Use of the notion of asymptotics in physics. Algebraic equations, branching (eigenfrequencies of small oscillations). Asymptotic estimates of integrals (short and long time behavior, near and far field, group velocity and energy transport by waves); uniform asymptotics. Asymptotic methods for ODEs: coordinate and parameter asymptotics, regular and singular perturbations; WKB method (quasiclassic approximation, one-dimensional wave propagation); Poincare method, "fast" and "slow" variables (perturbation of periodic orbits, weak dissipation, adiabatic invariants); matched asymptotic expansions—boundary layers (problems of electrodynamics, heat conductivity, elasticity, etc.). Asymptotic methods for PDEs: ray method for multi-dimensional linear wave propagation (rays, wavefronts, least-time path principle, caustics for waves of different physical origin); matched asymptotic expansions—boundary layers and "thin" bodies (applications to electrostatics, hydrodynamics and MHD, linear elasticity, etc.); multi-scale expansions: homogenization, effective parameters for composite bodies. Examples from various branches of physics (astrophysics and general relativity).

3 units

252. Introduction to High Energy Physics—Graduate section; see 152
3 units, alternate years, given 2000-01

3 units
262. Introduction to Gravitation—Tensor analysis: special relativity, energy-momentum tensor, and curvature. Einstein’s equations: weak fields, tests, spherically-symmetric solutions, gravitational waves. Cosmology, black holes, stellar structure, and other topics in astrophysics, as time permits. Prerequisites: 111, 122.

3 units, Spr (Wagoner)

271. Introduction to Solid State Physics—Reviews key discoveries in condensed matter physics in the past 15 years, with emphasis on experiment. Topics: sliding charge density waves in layered compounds, the first pressure-induced Mott transition, the first organic superconductor, the discovery of superfluid 3He, quasicrystals, the Sharvin effect, the quantum hall effect, and re-entrant superconductivity. Journal club format, with presentations by students on assigned topics. Offered occasionally.

3 units

3 units (Staff) alternate years, given 2000-01

290. Research Activities at Stanford—Required of all first-year physics graduate students and strongly suggested for junior physics majors for 1 unit; no registration needed for graduate students. Review of research activities in the department and elsewhere at Stanford at a level suitable for entering graduate students.

1-3 units, Aut (Chu)

291. Practical Training—Opportunity for practical training in industrial labs. Arranged by student with the research adviser’s approval. A brief summary of activities is required, approved by the research adviser.

3 units, Sum (Staff)

293. Literature of Physics—Intensive study of literature of any special topic. Preparation, presentation of reports. If taken under the supervision of a faculty member outside the department, approval of the Physics chair required. Prerequisites: 25 units of college physics, consent of instructor.

1-15 units, any quarter (Staff)

294. Teaching of Physics Seminar—Required of all teaching assistants in Physics prior to or concurrent with the first quarter of a teaching appointment; registration not required. Techniques of teaching physics by means of weekly seminars/discussions, simulated teaching situations, and evaluation of in-class teaching performance.

1 unit, Aut (Pam)

301. Astrophysics Laboratory—Combined seminar/lab investigating the fundamental observational basis of physical models of astronomical objects. Observational component uses the 24-inch telescope at the Stanford Observatory and ancillary photometric and spectroscopic instrumentation. Emphasis is on spectroscopic and photometric observation of main sequence, post-main sequence, and variable stars. Limited enrollment. Offered occasionally. Prerequisite: consent of instructor.

3 units, Sum (Walker)

320. Quantum Optics and Selected Topics in Atomic Physics—Quantization of the electromagnetic field, photon states, and vacuum fluctuations and atomic transitions of real atoms. Two-level atoms, the Optical Bloch Equations, dressed states, coherent transients, resonance fluorescence, laser cooling and trapping of atoms and ions, tests of quantum mechanics and Bell’s Theorem, photon statistics, coherence, antibunching, squeezed states, and parity non-conservation and time-reversal invariance tests in atomic physics. Offered occasionally.

3 units

3 units

323. Laser Cooling and Trapping—The fundamental principles of laser cooling and atom trapping. The general treatment of optical forces on atoms, the various forms of laser cooling, atom optics and atom interferometry, ultra-cold collisions, and Bose condensation of dilute gases. Emphasis is on the development of the general formalisms currently used to treat these topics. Applications of the cooling and trapping techniques: atomic clocks, internal sensors, measurements that address high-energy physics questions, studies of many-body effects, polymer science, and biology. Prerequisite: 231 or equivalent.

3 units

324. Introduction to Accelerator Physics—(Enroll in Applied Physics 324.)

3 units, Aut (Siemann) alternate years, not given 2000-01

330,331,332. Quantum Field Theory—Introduction to the concepts and methods of quantum field theory. Prerequisites: 210, 221, 232.

3 units, Aut (Susskind)

331.—Loop diagrams, electron (g-2), renormalization, Ward Identities, the renormalization group, perturbation theory anomalies.

3 units, Win (Brodsky)

3 units

3 units

351.—Introduction to the Standard Model—Features of high-energy interactions of hadrons; deeply inelastic lepton-hadron scattering; structure functions; the parton model; QCD, gluons, and scaling violations; jets and quark fragmentation in rr(LC) and e+e- annihilation to hadrons; radiative corrections in QED and QCD; running coupling constants; experimental measurements of the strong coupling; Monte Carlo techniques.

3 units

352.—Hadron spectroscopy in the static quark model; properties of heavy quarks and quarkonium systems. Weak interactions: muon, pion, and beta decay; weak mixing angles; the K-L system on CP violation; charged and neutral current neutrino scattering; the standard model of electroweak interactions; determinations of sin^2(θ_W); properties of W and Z bosons; gauge symmetries and the Higgs mechanism; properties of Higgs particles. Introduction to topics beyond the standard model: grand unification, proton decay, super-symmetry.

3 units

360. Physics of Astrophysics—Theoretical concepts and tools for modern astrophysics. Radiation transfer equations, and scattering and absorption processes: Compton, synchrotron photoionization, lines, and Bremsstrahlung. Equations of state of ideal, interacting, and degenerate gasses. Particle kinetic equations (Boltzmann, Fokker-Planck) and mechanisms for particle acceleration and transport. Application to ionization and dust scattering in HII regions and high-energy astrophysics.
sources such as accretion disks, x-ray and radio sources. Prerequisites: 122, 171.

3 units

361. Stellar and Galactic Astrophysics—Basic astronomical data on stars, star clusters, interstellar medium, and the Milky Way galaxy. Basic theory of stellar structure; hydrostatic equilibrium, radiation balance, and energy production. Stellar formation, Jean’s mass and protostars. Evolution of stars to the main sequence and beyond to red giants, white dwarfs, neutron stars, and black holes. Structure of the Milky Way; the disk and spiral arms, central bulge or bar, black hole, the halo and mass of the galaxy. Prerequisites: 221, and 260 or 360.

3 units

362. Extragalactic Astrophysics and Cosmology—Basic observational data on galaxies and their activities, cosmic microwave background radiation, gravitational lensing and dark matter in the universe. Models of the origin, structure, and evolution of the universe based on the theory of general relativity. Test of the models. Physics of the early universe, inflation, Baryosynthesis, nucleosynthesis, and galaxy formation. Prerequisites: 210, 211, 260 or 360, 262.

3 units, Spr (Petrosian)

363. Solar and Solar-Terrestrial Physics—Structure, mechanisms, and properties of the sun’s interior and atmosphere; solar wind and its variability; solar activity; coronal mass ejections; UV, x-ray, and high-energy particle emission. Earth’s magnetosphere. Interaction of the solar wind with the earth’s magnetosphere and its terrestrial effects. Sun’s electromagnetic radiation effect on the terrestrial environment. Prerequisite: Physics 221 or equivalent.

3 units, Win (Kosovichev) alternate years, not given 2000-01

3 units

3 units

372. Condensed Matter Theory I—(Enroll in Applied Physics 372.)

3 units, Aut (Harris) alternate years, not given 2000-01

373. Condensed Matter Theory II—(Enroll in Applied Physics 373.)

3 units, Win (Zhang) alternate years, not given 2000-01

3 units (Staff) alternate years, given 2000-01

3 units

377. Literature of Condensed Matter Physics—Review of key discoveries in condensed matter physics in the past 15 years, with emphasis on experiment. Topics: sliding charge density waves in layer compounds, the first pressure-induced Mott transition and organic superconductor, the discovery of superfluid 3He, quasicrystals, the Sharvin effect, the Quantum Hall effect, and reentrant superconductivity. Journal club format with presentations by students on assigned topics. Offered occasionally.

3 units

383. Introduction to Atomic Processes—(Enroll in Applied Physics 383.)

3 units, Aut (Harris) alternate years, not given 2000-01

387. Quantum Optics and Measurements—(Enroll in Applied Physics 387.)

3 units, Win (Yamamoto) alternate years, not given 2000-01

388. Mesoscopic Physics and Nanostructures—(Enroll in Applied Physics 388.)

3 units (Yamamoto) given 2000-01

392. Topics in Molecular Biophysics—(Enroll in Applied Physics 392.)

3 units (Doniach) alternate years, given 2000-01

450,451,452. Theoretical Physics of Particles and Fields—Advanced topics in theoretical high-energy physics. Topics change by quarter and year to provide a background in all areas of current theoretical research. Prerequisite: 332.

450. M-theory Compactifications and Duality

3 units, Aut

451. Elements of String Theory

3 units, Win

452. Strings, Branes, and Duality

3 units, Spr

459. Frontiers in Interdisciplinary Biosciences—Literature/discussion on how to critically evaluate the cutting edge of current research, held in conjunction with a seminar series, occurring once per month for 1999-2000, and more frequently thereafter. Leading investigators in interdisciplinary research from Stanford and from throughout the world present their work in a particular area. Before the seminar, students and faculty read and critically discuss one or more papers from the primary research literature on a related topic. After the seminar, students meet informally with the speakers to discuss the research and future direction. Emphasis is on how to read papers in the primary research literature, and familiarization with the broad set of techniques and approaches used to study problems in the biosciences. This interdisciplinary course is listed in many departments in the schools of Engineering, Medicine, and Humanities and Sciences. Students should enroll in their affiliated department, if it is offered. If not, students may enroll in any department within their school where the course is listed.

1 unit, Aut, Win, Spr (Spudich, Robertson, Chu, Mobley)

463. Special Topics in Astrophysics—Research-level discussions of current topics in astrophysics. Content varies each quarter and year, depending on the interests of staff and students. Topics to be announced. Offered occasionally.

3 units

473A. Condensed Matter Physics—(Enroll in Applied Physics 473A)

2 units, Aut (Kapitulnik)

473C. Electronic Structure—(Enroll in Applied Physics 473C)

3 units, Spr (Harrison)

490. Research Orientation—Familiarizes students with the activities of one or more research groups, within the department or outside. Registration limited to one quarter per research group with overall limitation of two quarters. Prerequisite: consent of student’s adviser.

1-15 units, any quarter (Staff)
491. Research—Open only to graduate physics major students, with consent of instructor. Work is in experimental or theoretical problems in research, as distinguished from independent study of a non-research character in 190 and 293. If taken under the supervision of a faculty member outside the department, Physics Graduate Study Committee approval required.
1-15 units, any quarter (Staff)

**POLITICAL SCIENCE**

Chair: Barry R. Weingast

Associate Professors: James D. Fearon, Luis R. Fraga, Jane C. Oi, Scott D. Sagan

Assistant Professors: Claudine Gay (on leave 1999-2000), Simon Jackman, Beatriz Magaloni, Isabela Mares, Michael A. McFaul (on leave Winter, Spring), Rob Reich, Carolyn Wong

Professor (Research): Norman Nie

Courteous Professors: David P. Baron, Jonathan B. Bendor, Bruce Bueno de Mesquita, Gerhard Casper, Steven H. Chafee, Larry Diamond, Gerald Dorfman, Jean-Pierre Dupuy, Lawrence Friedman, Keith Krehbiel, Gail Lapidus, James Morrow, Roger Noll, Michael Okzen

Courteous Associate Professors: Coit Blacker, Timothy J. Groseclose, Debra M. Satz

Senior Lecturer: Elisabeth Hansot

Lecturers: Alison Alter, Jeremy Buchman, Adrienne Jamieson

Visiting Associate Professors: David Epstein, Stephen Stedman

Visiting Assistant Professor: Alberto Diaz-Cayeros

Affiliated Professors: Michael W. Kirs, Michael M. May

**UNDERGRADUATE PROGRAMS**

**BACHELOR OF ARTS**

To receive an A.B. in Political Science, a student must:

1. Begin by submitting an application for the Political Science major to the undergraduate administrator. Forms are available in Building 160, room 161H. For additional information, drop by or phone (650) 723-1608.

2. Complete 60 units, at least 50 of them in Political Science courses. Up to 10 units may be from courses outside the department that are related to the student’s interests in Political Science and are not entry-level courses in other disciplines (such as Economics 1 or Psychology 1). All courses counted for the degree must be taken for a letter grade.

3. Satisfy a depth requirement. Each major should declare a primary concentration in one subfield and take at least 20 units in this concentration, including the introductory course for that subfield. Subfields include:

   - Public Administration and Public Policy (100-109, 206-209)
   - Comparative Politics (110-129, 210-229)
   - International Relations (130-149, 230-249)
   - Political Theory (150-169, 250-269)

American Politics (170-198, 270-298)

A student may propose an individual primary concentration in a special subfield, for example, politics in advanced industrial democracies, political organizations, public policy, the politics of development, or formal models in political science. This concentration proposal is subject to the approval of the Director of Undergraduate Studies.

4. Satisfy a breadth requirement. Each major should declare a secondary concentration in another subfield, with at least 10 units in that concentration.

Each major should take at least 5 units in a third subfield.

A secondary concentration may be designed by the student and is subject to the approval of the Director of Undergraduate Studies.

5. Demonstrate the capacity for sustained research and writing in the discipline. This requirement is satisfied by taking a Political Science course which has been designated a Writing in the Major (WIM) course.

6. Take at least one 5-unit seminar in Political Science.

7. A maximum of 20 units of transfer work may be given Political Science credit toward the major.

8. Directed reading units may not be used to fulfill a distribution requirement, and no more than 10 units of directed reading may be Counted toward the 50 Political Science units.

9. All courses counting toward the 60-unit requirement must be taken for a letter grade, although units in excess of the required 60 may be taken on a credit/no credit basis.

**MINORS**

Students must complete their declaration of the minor no later than the last day of the quarter two quarters before degree conferment. For example, a student graduating in June (Spring Quarter) must declare the minor no later than the last day of Autumn Quarter of the senior year.

To receive a minor in Political Science, a student must complete a minimum of 30 units in two subfields. All units must be in courses listed or cross-listed in the Department of Political Science. A maximum of 5 units of Directed Reading may count if supervised by a member of the department.

All units are for a letter grade.

**Concentration**—The student selects a subfield in which three courses are taken. Ordinarily one of these courses is at the introductory level (numbered under 100), the other two at the advanced level (numbered above 100). Where a linked set of advanced courses is offered (as with the Political Theory 151A,B,C series), an introductory course need not be taken.

Ordinarily the concentration corresponds to one of the subfields the department already has in place, namely, American politics, comparative politics, international relations, political organizations, and political theory. An alternative way of defining a subfield is acceptable, however, if a sufficient number of courses is offered and if the student’s proposal is accepted by the department.

**Distribution**—Three courses must be in the area of concentration, as specified above, for 15 units. An additional 10 units of advanced courses (100 level or above) must be in two additional subfields.

**Transfer Work**—A maximum of 10 units of transfer work may be given Political Science credit toward the major, upon approval.

**PRIZES**

There are four annual prizes for undergraduate students: the Edwin A. Cottrell Memorial Prize for the best student in Political Science 1, the Arnaud B. Leavelle Memorial Prize for the best paper in the History of Political Thought sequence (Political Science 151A,B,C), a cash prize for the best thesis written in political theory, and the Lindsay Peters, Jr., Memorial Prize for the outstanding student each year in Political Science 10.

**HONORS PROGRAM**

This program offers qualified students an opportunity to conduct independent research and to write a thesis of superior quality summariz-
ing the results of their research. It provides for close contact between students and their advisers, so that students can receive intensive guidance and assistance throughout their research and writing. The aim is to help students through the process of research, analysis, drafting, rethinking, and redrafting essential to excellence in writing.

The basic requirement for admission to the program is that students secure the agreement of a regular faculty member to be their thesis adviser. No faculty member can effectively supervise more than a few honors theses each year. Application to the program should therefore be made as early as possible, preferably by Spring Quarter of the junior year. Application forms can be obtained from the department office, should be countersigned by both the student and his or her thesis adviser, and then approved by the Director of the Honors Program. Normally, the thesis adviser is a faculty member with whom the student has already worked. To be eligible for the program, students must have at least a 3.5 grade point average (GPA) in Political Science courses when they apply. They should enroll in the program at the start of the Autumn Quarter of the senior year and take Political Science 199R, a 2-unit Autumn Quarter seminar focusing on research and writing skills. If a student is not on campus during that quarter, an equivalent to 199R should be taken.

The program is based on the assumption that good writing takes time. Students are, therefore, strongly discouraged from attempting to complete an honors thesis in less than three quarters. While details are worked out on an individual basis between students and thesis advisers, the following patterns are typical: (1) If a student already has substantial background on the thesis topic, the honors thesis program can be completed in two or three quarters (for a total of 10-15 units); (2) if a student has done little or no previous work on the topic, then the program should be spread over three quarters (for a maximum of 15 units).

Successful completion of honors in Political Science requires (1) completion of all requirements for the major, (2) enrollment in Political Science 199R, and (3) successful completion of a thesis of honors quality ("B+" or better). Honors work done for credit (Political Science 199) may not be counted toward the required 50 units in Political Science but may be counted as all or part of the additional 10 units which relate to the student's interest in political science.

**GRADUATE PROGRAMS**

**Admission**—Prospective graduate students should write to Graduate Admissions, the Registrar's Office for application materials. All applicants are required to submit a sample of their writing and to take the General Test of the Graduate Record Examination. Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL) and the Test of Spoken English (TSE). The TOEFL and TSE requirements are waived for applicants who have recently completed two or more years of study in an English-speaking country. For details concerning these tests, see the Guide to Graduate Admission. The application deadline is January 1. Admission is offered for the Autumn Quarter only. The department expects all students to pursue a full-time program except for time devoted to teaching or research assistantships.

**MASTER OF ARTS IN TEACHING**

The University's basic requirements for admission to the Ph.D. program are discussed in the "Graduate Degrees" section of this bulletin. The degree is intended for candidates who have a teaching credential or relevant teaching experience and wish to further strengthen their academic preparation. The program consists of a minimum of 25 units in Political Science courses and 12 units in the School of Education. A student's plan must be approved by the Director of Graduate Studies before the courses are taken. Detailed program requirements are outlined in the "School of Education" section of this bulletin.

**DOCTOR OF PHILOSOPHY**

The University's basic requirements for the Ph.D. degree are discussed in the "Graduate Degrees" section of this bulletin. Programs of study leading to the Ph.D. degree are designed by the student, in consultation with advisers and the Director of Graduate Studies, to serve his or her particular interests as well as to achieve the general department requirements. A student is recommended to the University Committee on Graduate Studies to receive the Ph.D. degree in Political Science when the following program of study has been completed:

1. The candidate for the Ph.D. degree must offer three of the following concentrations in political science: American politics, comparative politics, international relations, political theory, and public organizations. Upon petition, a special field (for example, methodology, public law, or urban politics) may be offered as a third concentration. Students concentrate on two of these areas by fulfilling, depending on the concentration, combinations of the following: written qualifying examinations, research papers, research design, or course work. The requirement for the third concentration may be satisfied by taking either a written examination in that area or by offering a minimum of 10 units with a grade point average (GPA) of 'B' or better in the third concentration from among the formal graduate-level courses in the Ph.D. degree program. The third concentration cannot be satisfied by courses taken as a requirement for a first or second concentration. A third concentration in theory requires two courses in addition to the 5 units necessary to fulfill the program requirement. Completion of special concentrations may require more than 10 units of course work.

2. The Ph.D. candidate is required to demonstrate competence in a language and/or skill that is likely to be relevant to the dissertation research. The level of competence needed for successful completion of the research is determined by the student's adviser. All candidates must complete 5 units of statistical methods or its equivalent. Students who are in the concentration of international relations, American politics, or public organizations are required to take an additional 5 units of methods. Previous instruction can be counted towards this requirement only if approved by the Director of Graduate Studies.

3. If the candidate has not completed at least one year of previous undergraduate instruction in political science, or at least 5 quarter units of graduate political theory, he or she must take 5 quarter units of graduate instruction in political theory.
4. By the start of the fourth quarter in residence, each first-year graduate student submits to the student's adviser a statement of purpose. This statement indicates the student's proposed major concentrations of study, the courses taken and those planned to be taken to cover those fields, the student's plan for meeting language and/or skill requirements, plans for scheduling of comprehensive examinations and/or research papers, and, where possible, dissertation ideas or plans. This statement is reviewed with, and must be approved by, the student's adviser. In the Autumn Quarter following completion of their first year, students are reviewed at a regular meeting of the department faculty. The main purposes of this procedure are, in order of importance: to advise and assist the student to realize his or her educational goals; to provide an incentive for clarifying goals and for identifying ways to achieve them; and to facilitate assessment of progress toward the degree.

5. When both the student and adviser feel that the student is ready, he or she takes comprehensive examinations in two concentrations and completes one research paper. Comprehensive examinations are offered at the discretion of the faculty. If scheduled, they are given in the third week of Autumn and Winter Quarters, and in the seventh week of Spring Quarter. Students should normally expect to complete these examinations and the research paper by the end of their second year.

6. Upon completion of one research paper and two comprehensive exams in his or her two major concentrations, the student files an Application for Admission to Candidacy for the Ph.D. which details program plans and records. This document, along with a student's examination performance, is reviewed by the faculty at a regular meeting. If it is approved, the student is advanced to candidacy. Students must be approved to candidacy by the completion of their sixth quarter as a full-time student.

7. During the third year, a formal dissertation proposal is submitted by the student to a thesis committee of three faculty members, including the principal adviser.

8. A candidate for the Ph.D. in Political Science is required to serve as a teaching assistant (TA) in the department for a minimum of two quarters.

9. Doctoral candidates who apply for the A.M. degree are awarded that degree on completion of the requirements outlined in the description of the A.M. program.

10. The candidate must pass the University oral examination on the area of the dissertation, at a time, after the passing of the written comprehensive examinations, suggested by the candidate's dissertation committee.

11. The candidate must complete a dissertation satisfactory to the Dissertation Reading Committee and the University Committee on Graduate Studies.

**Ph.D. MINOR**

Candidates in other departments offering a minor in Political Science select two concentrations in political science in consultation with the Director of Graduate Studies and submit to her or him a program of study for approval. Written approval for the program must be obtained from the Director of Graduate Studies before application for doctoral candidacy. Students are required to complete at least 20 units in Political Science courses. Two of these courses, in separate concentrations of political science, must be 200 level and above. All grades must be a GPA of 'B' or better. Candidates may be examined in their concentrations in the general oral examination by a member of the Department of Political Science, chosen in consultation with the Director of Graduate Studies.

**WEST REFERENCE ROOM**

The department maintains, for its faculty, guests, graduate students, and advanced undergraduates, a small reference room that holds political science journals, handbooks, books useful in preparing for Ph.D. examinations, and other materials. Access to West Reference Room is restricted to eligible key holders.

**COURSES**

(WM) indicates that the course meets the Writing in the Major requirement.

**Summer Quarter**—During Summer Quarter, the Department of Political Science offers a variety of courses and seminars. The specific offerings depend on the faculty available during the Summer Quarter.

The department uses the following course numbering system:

1-99 Introductory Courses
100-199 Advanced Courses and Undergraduate Seminars (at the instructor's discretion, graduate students may enroll and be given graduate credit when additional work is assigned and the appropriate department Graduate Credit Authorization form is completed)
200-299 Graduate-Undergraduate Seminars (principally for graduate students; at the instructor's discretion, undergraduates may be admitted)
300-400 Graduate Seminars

Course information is accurate when the Stanford Bulletin goes to press; however, students should be aware that there may be changes and should check the quarterly Time Schedule for up-to-date information.

**INTRODUCTORY**

1. **Introduction to Political Science**—Alternative public policies in selected areas, including control of monopoly, poverty, and foreign policy. The political process: the influence of cultural, economic, and political factors and the location of political power in determination of public policy. GER:3b (DR:9)
   5 units, Win (Perejohn, Fiorina)

10. **American National Government and Politics**—The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy. GER:3b (DR:9)
    5 units, Win (Perejohn, Fiorina)

20. **Comparing Political Systems: Power, Policy, and Industrial Development**—How is industrialization affected by a country's political life and by policies of its central government? How in turn does industrialization affect a country's politics and governmental policies? The answers are found by comparing countries that differ in the timing, extent, and character of industrial development. Cases include Britain, Germany, Japan, the Soviet Union, Korea, and India.). GER:3b (DR:9)
    5 units, Aut (Abernethy)

21N. **Stanford Introductory Seminar: The Politics of Labor in Advanced Industrial Democracies**—Preference to freshmen. The emergence of compromise between labor and capital in post-war Europe and its impact on economic performance. What political factors contributed to the successful institutionalization of a cross-class compromise in post-war Western Europe? What was the role of labor in the development of solidaristic wage policies and the expansion of a redistributive welfare state? What are the obstacles faced by social-democratic governments in their pursuit of full-employment policies during the last two decades? How do the new constraints posed by increased economic globalization and the creation of a common market affect the political sustainability of this cross-class compromise? GER:3b (DR:9)
    3 units, Aut (Mares)

25. **Colonialism and Nationalism in the Third World**—Comparative historical analysis of European exploration, conquest, and colonial rule in Latin America, the Caribbean, Africa, and Asia. Factors affecting the timing, character, and effectiveness of nationalist movements in the Third World. The impact of colonialism on postcolonial political and economic systems. GER:3b (DR:9)
    5 units (Abernethy) given 2000-01
28. East Asia in the Age of Imperialism—Designed for freshman and sophomores. Interdisciplinary introduction to E. Asian political, social, cultural, and economic evolution 1840 to 1945. The various responses in China, Japan, and Korea to Western penetration of the region. GER:3b (DR:9)
   5 units, Win (Oksenberg, Duus)

29. Contemporary East Asia—Designed for freshmen and sophomores, introducing E. Asian history and cultures from the end of WW II to the present. Focus is on long-standing interactions among Japan, Korea, China, and the peripheries of Central, S.E., and S. Asia. Issues: politics, economic development, and common challenges for the region as whole. GER:3b (DR:9) (WIM)
   5 units, Spr (Oksenberg)

35. International Politics—(Same as 135.) Approaches to the study of world politics including realism, liberalism, and decision-making theories. WW I, the nuclear weapons debate, and contemporary and economic problems. The normative and policy implications of different theories. GER:3b (DR:9)
   5 units, Aut (Okin)

51D. Introduction to Political Philosophy/Theory—(Same as Philosophy 30, Public Policy 103A.) Critical introduction to issues of state authority, justice, liberty, and equality. The issues are approached through major works in political philosophy. Topics: human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion and politics. Readings: Aristotle, Locke, Rousseau, Mill, Marx, Rawls, the U.S. Constitution, some Supreme Court cases. GER:3a (DR:8)
   5 units, Aut (Okin)

53N. Stanford Introductory Seminar: Plato and Aristotle on Justice—Preference to freshmen. What does it mean for humans to be just? What constitutes a just society? What is the relationship between just political arrangements and just human behavior? Focus is on Plato’s Republic and Aristotle's Politics, two texts in political philosophy that continue to provide insight into these questions. Discussion-based and requires close reading of the primary texts. GER:3a (DR:8)
   3 units, Aut (Reich)

60. The American Dream—Critical analysis of America's dominant ideology, the American Dream, as experienced by women, minorities, labor, Indians, and immigrants. GER:3b,4b (DR:3 or 9)
   5 units, Win (Manley)

90N. Stanford Introductory Seminar: The Evolution of Voting Rights in the U.S.—Preference to freshmen. The evolution of voting rights in the U.S. from the enactment of the Constitution of 1787 to the present. Emphasis is on identifying conditions under which expansion was possible as a result of the removal of barriers (property ownership, racial and ethnic discrimination, gender bias, and language facility). Current issues in the interpretation and implementation of the provisions of the Voting Rights Act. Implications of the evolution of voting rights in the U.S. for understanding democratic theory and American political development. GER:3b (DR:9)
   3 units, Spr (Fraga)

   5 units, Win, Spr (Moe)

95A. Introduction to Political Data Analysis I—Introduction to applied data analysis techniques commonly employed by political scientists and policy analysts. Emphasis is on application and hands-on experience with political data, rather than mathematical derivations and statistical theory. Computer applications that support data analysis in the social sciences. The basic elements of research design and causal analysis using survey data on the American electorate and data on other substantive problems. GER:2c (DR:4)
   3 units, Aut (Stone)

95B. Introduction to Political Data Analysis II—Introduction to applied regression analysis using a variety of substantive examples and data from political science and policy analysis. The logic of hypothesis testing and control in post-hoc designs commonly used by political scientists and policy analysts. Topics: the graphical presentation of data, bivariate and multivariate regression analysis, inference, and assumptions. Emphasis is on the application of the techniques to data analysis and research problems. Prerequisite: 195A or consent of instructor. GER:2c (DR:4)
   5 units, Win (Stone)

95C. Introduction to Political Data Analysis III—Review of data sources in political science and related fields, including archived data, data sources on the Web, and documentary sources. Emphasis is on developing each student's independent experience with research, applying appropriate principles of research design, data management, data analysis, and on the presentation and evaluation of results. Prerequisite: 195B or consent of instructor. GER:2c (DR:4)
   5 units, Spr (Stone)

ADVANCED UNDERGRADUATE

Advanced undergraduate courses are open to undergraduates who have the necessary prerequisites, and to graduates where advisable. Undergraduate seminars have limited enrollments and admission generally requires consent of instructor. They are intended for juniors and seniors, but may admit graduate students. Sign-up sheets for undergraduate seminars are posted in the department office at class list sign-up time. Undergraduates should also consider the graduate-undergraduate seminars, numbered 200-299, in the next general section.

GENERAL

100A. Statistical Methods I—(Same as 200A.) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus.
   5 units, Aut (Stone)

100B. Statistical Methods II—(Same as 200B.) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations; graphical techniques for model fitting and model checking; interactions among explanatory variables; pooling data; extensions for binary responses.
   5 units, Win (Jackman)

100C. Statistical Methods III—(Same as 200C.) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory.
   5 units, Spr (Jackman)

POLITICAL ORGANIZATIONS

The courses and seminars listed below are open to all undergraduates in the University regardless of major. There are no prerequisites. There are no formal course sequences in public administration.

101P. Politics and Public Policy—(Same as Public Policy 101.) The domestic policy-making process, emphasizing how elected officials, bureaucrats, and interest groups shape government policies in various areas including tax, environmental, and social-welfare policy, give their goals and available tactics. How public policies are formulated as
109. Directed Reading/Research in Political Organizations—Advanced individual study in public administration.

any quarter (Staff)

COMPARATIVE POLITICS

Undergraduate courses and seminars in comparative politics generally fall into two groups: those dealing with a particular country or region, and those dealing with major political problems or processes. Students concentrating in comparative politics are encouraged to take courses from both groups, and are also urged to do course work in more than one country or region.

110D. British Politics—Britain has experienced a remarkable change in its politics the last two decades. After a prolonged period of political and economic instability, Prime Minister Thatcher and her Conservative Party established in 1979 a one-party dominance that persisted until 1997. Changes in British policy, and the revival of political competition in the years ahead. GER:3b (DR:9)

5 units, Win (Dorfman)

112M. Parties and Elections in Latin America—The last two decades have witnessed a wave of democratization and a fundamental shift in economic policy in virtually all Latin American countries. Competitive elections established themselves as a means to elect governments precisely at a time when runaway inflation, balance-of-payment crises, and other symptoms of macroeconomic instability led governments to embrace so-called "neoliberal" economic policies and market reforms. The determinants of individual voting behavior in such "transitional" contexts, how institutions and electoral rules shape emerging party systems, the dynamics of electoral competition, and the effects of partisan governments and regular elections on public policies and political-economic outcomes.

5 units, Win (Magaloni)

113A. Politics and Development in Latin America—Survey of political, economic, and social development in selected Latin American countries (normally Brazil, Mexico, Argentina, and Cuba) and analysis of policy and theoretical issues such as ideologies of development, democracy and its alternatives, constraints on national autonomy, and civil-military, state-society, and state-market relations. Student papers on any country in the region.

5 units (Packenham) not given 1999-2000

114K. Political Economy of Development—Introduction to the major theories of political development, emphasizing the interplay between political economic processes, and national and international factors from Latin America, Africa, and Asia. Cases: S. Africa, Chile, Brazil, Mexico, Taiwan, China, India, and the oil-exporting countries.

5 units (Karl) not given 1999-2000

115. Chinese Politics—(Same as 215.) The politics of the People's Republic of China. The origins of the Communist Revolution, the institutionalization and consequences of communist rule and attempts to reform the system since 1978.

5 units (Oi) not given 1999-2000

115A. Chinese Politics: The Revolution and the Mao Years—(Same as 215A.) The rise of the Chinese Communist Party (1921-49) and the era of Mao Zedong's rule (1949-76). The political institutions, policy process, and major domestic policies of the Mao years and their consequences. GER:4a (DR:2)

5 units (Oi) not given 1999-2000

115B. Chinese Politics: The Transformation and the Era of Reform—(Same as 215B.) The content, process, and consequences of reform in China from 1976 to the present. Changes in property rights, markets, credit, and the role of the state in economic development.

GER:3b,4a (DR:2 or 9) (WIM)

5 units, Spr (Oi)

115C. Seminar: Topics in Chinese Politics—Political Change in China—Content varies each year. The forms of political participation and transitional communist systems, with a focus on China. Why and when certain forms are used and why new forms emerge. Topics: covert pursuit of interests, overt protests, and competitive elections.

5 units (Oi) not given 1999-2000

116L. Comparative Democratic Development—(Same as 216L) The social, cultural, political, economic, and international factors favorable to the development and consolidation of democracy, in historical and comparative perspective. Worldwide development and the reemergence of democracy in the past decade. Case studies of individual country experiences with democracy.

5 units, Spr (Diamond)

117K. The Global Politics of Human Rights—The global development of human rights and the rise of an international human rights movement. The changing nature of rights and various dilemmas, e.g., conflicts between national sovereignty and rights, conflicts between various types of rights, etc., through specific case studies, including genocide in Rwanda, holding torturers accountable in Chile and El Salvador, factory workers vs. Nike, and the rights of women in South Africa.

GER:3b (DR:9) (WIM)

5 units, Win (Karl)

118A. Political Change in Tropical Africa—The colonial situation, growth of nationalism, achievement of political independence, ethnic patterns in new states, civilian and military leadership, role of party and bureaucracy, movements for electoral democracy, succession struggles and civil war, problems in stimulating economic development, and efforts at regional integration.

GER:3b,4a (DR:2 or 9)

5 units, Win (Abermethy)

118B. The Politics of Race and Class in Southern Africa—The political history of the region's 10 countries, emphasizing relations among racial and ethnic groups. Diplomatic, economic, and military interactions among these states. The impact of movements, corporations, and international organizations based outside the region. Domestic politics in South Africa, emphasizing struggles over the character of post-apartheid society.

GER:3b (DR:9)

5 units (Abermethy) given 2000-01

119M. Seminar: Revolutions—While "revolutions" mark important turning points in the modern world, the causes and consequences of revolutions are poorly understood. Given the limited number of cases, theorizing about revolutions is underdeveloped, underspecified, and outdated. Seeks a study of revolutions as a legitimate focus for theoretical inquiry by reviewing structural, institutional, cultural, and rational choice approaches. Case studies focus on testing and applying recent theories of political change to classic revolutionary cases.

5 units (McFaul) not given 1999-2000

120A. Comparative West European Institutions—(Same as Public Policy 160, International Relations 160.) How institutions shape politics and policies in Western Europe. Electoral laws, parliamentary systems, and government institutions at the national level influence the quality and nature of representation, political competition, and policy outcomes. Institutional developments at the subnational level and within the Euro-
pean Union challenge the domestic politics and policies of the European nation states.

5 units, Win (Alter)

121A. Comparative Political Economy of Post-Socialist Transitions—(Same as Public Policy 161, International Relations 161.) The post-Socialist economic and political transitions ongoing in Eastern Europe and the former Soviet Union, investigating attempts to build market economies and democratic governments. The politics of constitutional choice and variation in reform strategies and outcomes across the cases. Prerequisites: Economics 1, Political Science 1 or 10.

5 units (Abernethy) given 2000-01

122. Seminar: Decolonization in Asia and Africa, 1940-80—Comparison of the dynamics of decolonization and “new state” formation. Factors affecting the timing, speed, nature, and extent of violence in the decolonization process, and the character of the regime ruling the new state. Case studies: India/Pakistan, Indonesia, Indochina, Ghana, Ivory Coast, Algeria, and Zimbabwe.

5 units (Abernethy) given 2000-01

125. The Rise of Industrial Asia—(Same as 225.) The political, economic, social, and cultural aspects of industrial development and change in Asia as a region. Prerequisite: consent of instructors. GER.3b (DR:9)

5 units, Win (Oi, Oksenberg, Rohlen, Rowen, Staff)

127. Political Economy of Western Europe—Analytical and historical introduction to the political economy of Western Europe. Fundamental differences in economic performance are explained by examining the relative importance of structural institutional variables and of the strategic choices of key political actors. Topics: macroeconomic policy, wage determination and income inequality, welfare state expansion and reorientation, European integration. Readings focus on Britain, France, Germany, and Sweden.

5 units, Win (Mares)

128. Seminar Fiscal Politics—The causes and consequences of taxation, expenditure, and fiscal structures in the political system. Starting from the framework provided by the “new institutionalism” and the contributions to economic history by Douglass North and others, the recent political economy literature on economic growth, distribution, taxation, and expenditure. The historical conformation of tax authority and a comparative assessment of fiscal structures around the world. The geographic distribution of public expenditure (pork barrel politics and federalism).

5 units, Spr (Diaz-Cayeros)

129. Directed Reading/Research in Comparative Politics—Advanced individual study in comparative politics.

any quarter (Staff)

INTERNATIONAL RELATIONS

Students interested in international relations are encouraged to take Political Science 35, International Politics. While not a formal prerequisite for many of the courses listed below, 35 provides a desirable background for more advanced work.

The courses in international relations offered by the Department of Political Science can be divided into two groups: those dealing with global political, military, and economic problems; and those dealing with the foreign relations of specific nations or geographic regions. Students concentrating in international relations are encouraged to select their courses from both groups.

Students interested in a major in international relations are encouraged to refer to the “International Relations” section of this bulletin, which lists international relations courses in other departments.

132D. Seminar: Controversies over Foreign Aid—Debates over official development assistance: the ethical basis for aid; the effectiveness, efficiency, and distributional impact of aid, trade, and private investment: economic conditions attached to structural adjustment loans; human rights and democratization conditions attached to aid programs; humanitarian relief efforts in times of natural disaster, civil war, and anarchy.

5 units (Abernethy) given 2000-01

133. Peace Studies—(Same as Psychology 165.) Interdisciplinary, dealing with the challenges of pursuing peace in a world where the sources of conflict are many, and regional, ethnic, and religious antagonisms are rising. The art of creating and maintaining peace is analyzed from historical, social, psychological, and moral perspectives. Goals: to illustrate the current and potential contributions of various academic disciplines and critical analyses to the study of peace; and to prepare students to think critically and to act responsibly and effectively on behalf of peace. Eight sections: challenges, enemies, theoretical understandings, justice, security, non-violence, public peace processes, and peace and you. Seminar format once a week. Limited enrollment. GER.3b (DR:9)

5 units, Spr (Bland, Holloway, Ross)

134A. Strategy, War, and Politics—Traditional and modern theories on the causes of war and sources of peace. Contrasting explanations for the origins of WW I and II; alternative theories of deterrence in the nuclear age; the causes of war in the Persian Gulf, ethnic conflicts and terrorism in the post-Cold War era. GER.3b (DR:9)

5 units, Spr (Sagan)

134B. America and the World Economy—Developmental approach analyzes American foreign economic policy, centering on a historical analysis of the basic issues involved in the formation of American foreign policy. Issues: the evolution of American tariff and trade policy, the development of mechanisms for international monetary management, and American foreign investment policy reflected in the changing political goals pursued by American central decision-makers. Prerequisite: 35 or equivalent. GER.3b (DR:9) (WIM)

5 units, Win (Goldstein)

134P. The Role of Technology in National Security—(Enroll in Engineering Economic Systems and Operations Research 193; same as 234P.)

3 units, Aut (Perry)

135. International Politics—See 35. Limited to students with graduate standing.

5 units, Aut (Krasner)

137F. Nationalism and International Conflict—Nationalism is a leading candidate as the most important source of conflict between and within states after the Cold War. How the scholarly literatures of nationalism and war might be integrated and used to shed light on post-Cold War international politics. Theories and evidence on war and the international system, largely from Europe since 1648. Theories and evidence on the nature and origins of nationalism. Arguments about how nationalism causes (and is caused by) international conflict. The application of these ideas in several regions.

5 units (Fearon) not given 1999-2000

138. International Security in a Changing World—(Same as Engineering-Economic Systems and Operations Research 195.) Surveys the major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in arms control, the military legacy of the Cold War, regional security conflicts, proliferation of advanced weapons capabilities, ethnic conflicts, and peacekeeping efforts. GER.3b (DR:9)

5 units, Win (Blacker, Perry, May, Sagan)

138A. Seminar: Advanced Study in International Security—Provides undergraduates an opportunity to conduct advanced research
international security. Themes: whether prominent theories in security studies that were developed during the Cold War are appropriate today; whether metaphors and models from other disciplinary traditions (psychology, sociology, and organization theory) might be useful for the explanation of international political outcomes. Contemporary security issues (Democracies do not fight each other. Is that claim accurate? Did deterrence theory in the developing world “work” during the Cold War and are smaller powers (Iraq and N. Korea) deterrable?). The international relations theory failed to account for the possibility of the end of the Cold War. (How can we explain and address this?) Great power responses to the spread of nuclear weapons (Is nuclear proliferation dangerous, and if so, what should be done?).

5 units (Staff) not given 1999-2000

138B. International Negotiation—Almost every major international event or continuing institution has been shaped by a negotiation. A negotiator can balance the push for a favorable outcome against the risk of a disagreement. Topics: agency in negotiation, coalitions, threats and promises, the agenda, symbolic moves, single- vs. multi-issue negotiations, the relevance of information about the other party, bargaining chips, mediation, bargaining in good faith, and honesty. Experiential learning, where students take on assigned roles in negotiation, then analyze and discuss their strategies and experiences. (WIM)

5 units, Spr (O’Neill)

139B. Seminar: Foreign Policy Decision-Making—Foreign policy events are unusually well documented: sometimes transcripts of leaders’ deliberations are available, making these cases uniquely valuable ways to explore theories of real decision-making. Cognitive psychology, organizational behavior, and decision analysis are joined with history and international relations. Topics: belief systems and operational codes; symbolic, analogical, and metaphorical thinking; counterfactual reasoning; motivated misperception, hindsight, probability biases and other heuristics; utility theory, and its alternatives, including prospect theory and other approaches; decision making under the pressure of a crisis; and organizational influences on decisions.

5 units, Aut (O’Neill)

140B. Chinese Foreign Policy—(Same as 240M.) Introductory. The origins of Chinese foreign policy. China’s intentions, capabilities, and strategies in world affairs since 1949, Chinese crisis behavior, and national security institutions and processes.

5 units (Oksenberg) not given 1999-2000

142S. Seminar: Advanced Study in the United Nations and the Wars of the 1990s—The UN has in recent years played a lead role in conflict management. Topics: peacekeeping, the implementation of peace agreements in civil wars, humanitarian intervention, mediation, preventative diplomacy, UN reform, and relations between the U.S. and the UN. Case studies evaluate the UN’s performance in preventing, managing, and resolving various wars in the 1990s including Cambodia, El Salvador, Mozambique, Rwanda, and the former Yugoslavia.

5 units (Stedman) not given 1999-2000

143S. Major Issues in International Conflict Management—Surveys contemporary issues of international conflict management: conflict prevention, mediation and implementation of peace agreements, peacekeeping, peacebuilding, and humanitarian intervention. Topics: ethical dilemmas of conflict management, evaluation of international, regional, and non-governmental organizations in conflict management, the future of the UN, and the use of economic sanctions.

5 units, Spr (Stedman)

149. Directed Reading/Research in International Relations—Advanced individual study in international relations.

any quarter (Staff)
159R. Issues in Public Service—Preference to freshmen and sophomores who will/are participating in service activities through the Haas Center or enrolling in courses with service learning components. What does it mean to “do” public service? Why should or should not citizens do volunteer work? Is public service by definition a good thing? The historical context of public service work in the U.S., introducing the range of ethical concerns involved with service. Provides the basis for a more intimate connection between the undergraduates’ service activities and his or her academic experiences at Stanford.

5 units, Win (Reich)

161S. Seminar: Democratic Theory—The major questions in modern democratic theory, including obedience to authority, alienation, participatory democracy, and political tolerance.

5 units, Aut (Sniderman)

162. Seminar: Capitalism and Democracy—Attacks on and defense of the workings of the American political economy, emphasizing competing theories of democracy.

5 units, Win (Manley)

165S. Graduate Seminar: Topics in Democratic Theory—(Same as Philosophy 271.)

3-5 units (Ferejohn, Satz) not given 1999-2000

167. Seminar: Gender, Development, and Women’s Human Rights in International Perspective—(Same as 267.) The intersections of gender and development theory and practice. The evolution of development theory from modernization to neoliberal, and the parallel growth of feminist critiques. The effects of specific economic, social, educational, and environmental development policies on women, and women’s activism around these policies at the national and international levels. Examples from the developing regions: Asia, Africa, Latin America, and the Middle East. GER:4c (DR:t)

5 units, Aut (Okin)

169. Directed Reading/Research in Political Theory—Advanced individual study in political theory.

any quarter (Staff)

AMERICAN POLITICS

170. Judicial Politics and Constitutional Law: The Federal System—The interaction of law and politics, and the role of the U.S. Supreme Court in constitutional interpretation and the political system generally. Focus is on major court cases dealing with separation of powers and federalism. Prerequisites: 10 or equivalent, and sophomore standing.

5 units, Win (Barker)

171. Judicial Politics and Constitutional Law: Civil Liberties—The role and participation of courts, primarily the U.S. Supreme Court, in public policy making and the political system. Judicial activity in civil liberty areas (religious liberty, free expression, race and sex discrimination, political participation, and rights of persons accused of crime). Prerequisites: 10 or equivalent, and sophomore standing.

5 units, Spr (Buchman)

172R. Undergraduate Colloquium: Constitutional Interpretation in History and Theory—(Enroll in History 250B.)

5 units (Rakove) not given 1999-2000

172J. Undergraduate Colloquium: Thomas Jefferson and his World—(Enroll in History 250C.)

5 units, Spr (Rakove)

173M. Critical Overview of American Political History—Critics and defenders of American “democratic capitalism,” from colonial times to present. Prerequisite: 10 or consent of instructor.

5 units, Spr (Manley)

174M. Seminar: The American Dream—Open to juniors and seniors. The American dream in American history. Weekly meetings discuss readings and individual research projects. Prerequisite: 60, or consent of instructor.

5 units, Spr (Manley)

175R. Seminar: Judicial Biography in the Study of Law and Courts—The Life and Times of Justice Thurgood Marshall—Overview of the use of judicial biography in understanding the nature and functions of courts and law in American politics and society, with an intensive study of the life and times of Justice Thurgood Marshall. Prerequisite: advanced undergraduate or graduate standing with two or three courses in law, or law related courses, and/or consent of instructor.

5 units, Win (Barker)

176. Seminar: The Supreme Court—Intensive study of the U.S. Supreme Court and its role in the governing system. Topics: the court as a political-legal institution, judicial recruitment and selection, the nature and dynamics of judicial decision-making in individual and collegial contexts, and the differential role and responsiveness of the court as compared to other governing institutions. Prerequisites: 170 or 171 and junior standing, or consent of instructor.

5 units, Win (Barker)

177. Seminar: Courts, Politics, and Public Policy—The role and interaction of courts with other political institutions and interests in the formulation and implementation of public policy. Prerequisites: 170 or 171 and junior standing, or consent of instructor.

5 units, Spr (Buchman)

178. Environmental Policy and Law—(Enroll in Human Biology 125)

5 units, Spr (Rosencranz)

178R. Natural Resources Policy—(Enroll in Human Biology 131)

5 units, Win (Rosencranz)

180. Courts, Color, and the Constitution—A political-legal analysis of the role of the judiciary, especially the U.S. Supreme Court, in dealing with matters relating to race. Focus is on the development and application of jurisprudential doctrines in historical and contemporary perspective; and how legal concepts have influenced public policy and public discourse on race. Prerequisites: 10 or consent of instructor, sophomore standing and some relevant background social science course.

5 units (Barker) not given 1999-2000

180R. Global Environment Policy and Law—(Enroll in International Relations 135)

5 units, Aut (Rosencranz)

181. African Americans and the Political System—African Americans as political actors and the development and use of political resources as the means to achieve policy objectives. Emphasis is on the role and differential responsiveness of governing institutions to the concerns of African Americans. Prerequisite: 10 or consent of instructor.

5 units (Staff) not given 1999-2000

182F. Introduction to American Law—(Same as American Studies 179, Law 106.) American law for undergraduates. The structure of the American legal system, including the courts; American legal culture; the legal profession and its social role, the scope and reach of the legal system, the background and impact of legal regulation, the relationship between the American legal system and American society in general. Prerequisite: 10 or consent of instructor. GER:3b (DR:9)

5 units, Aut (Friedman)

184W. Issues of Representation in American Politics—How the mass citizenry and organized interests are represented in American politics and the policy making process. Focus is on problems of representation in controversies over social and economic policies that evolve economic
and ethnic cleavages in society. Problems of minority representation, including a comparison of the issues confronting Asian American, Chicano/a, Native American, and African American groups. Prerequisite: 10 or consent of instructor. GER:3b (DR:9)
5 units, Win (Wong)

5 units, Spr (Wong)

186. Urban Politics—Introduces the major actors, institutions, processes, and policies of sub-state government in the U.S., focusing primarily on city general-purpose governments through a comparative examination of historical and contemporary politics. Issues are related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: 10 or consent of instructor. GER:3b (DR:9)
5 units, Win (Fraga)

187. Introduction to the Politics of Educational Analysis—(Enroll in Education 220B.)
4 units, Spr (Kirst)

191J. Seminar: The Politics of the American Macro-Economy—(Same as 291J.) Survey of the relationship between the American macro-economy, public opinion, elections, and policy outcomes. Examples include the links between the state of the American macro-economy and election outcomes, the existence of a political business cycle, and the origins and consequences of public opinion on economic matters. How people learn about the macro-economy, the role of the media in shaping public opinion about the economy, and the implications for representation and policy-making. 5 units (Jackman) not given 1999-2000

192F. Seminar: Politics of Race and Ethnicity in the United States—Examines the historical and contemporary politics of selected communities of color to comprehensively understand American political development and the important issues in current American politics. The issues common to communities of color (educational opportunity, vote dilution, and immigration). Participation in a class debate on affirmative action. 5 units (Fraga) given 2000-01

193. Politics by the Numbers—Analysis of the uses of statistics in political argument and in political science. Elementary statistical concepts (e.g., research design, sampling, correlation, inference, and threats to validity). The "political" uses of statistics in settings such as polling data in political campaigns, and in evaluating public policy (e.g., education, welfare, the environment). Research and analysis paper. Prerequisite: 10 or consent of instructor. 5 units, Spr (Jackman)

194C. The Press and the Political Process—(Enroll in Communication 260.)
5 units, Spr (Iyengar)

196. Issues of Race in American Politics—Surveys the forms that racism takes in contemporary American political thinking, emphasizing the connections, if any, between central values in the American political tradition, e.g., self-reliance and individualism, attitudes toward Blacks, and ideas about racial policies. Recent, large-scale surveys of the opinions and attitudes of Americans. Prerequisite: 10 or consent of instructor. GER:3b (DR:9)
5 units, Aut (Sniderman)

197P. Seminar: Political Beliefs and Values of Black Americans—An examination, based on original analysis and research, of the view of African Americans on current issues and controversies.
5 units, Win (Sniderman)

197S. Seminar: Prejudice and Group Conflict—An opportunity to engage in original data analysis on problems of significant social and political interest. Focus is on the analysis of prejudice, e.g., the views of white Americans toward Black Americans and Black toward white Americans.
5 units (Sniderman) not given 1999-2000

198. Directed Reading/Research in American Politics—Advanced individual study in politics. Prerequisite: 10 or equivalent. any quarter (Staff)

199A,B,C. Senior Project—Students conduct independent research work towards a senior honors thesis. See "Honors Program" above. any quarter (Staff)

199R. Seminar: Senior Research Project—Required for students writing honors theses. Focuses on acquisition of research skills and development of an appropriate research design. (WIM)
3 units, Aut (Abernethy)

GRADUATE-UNDERGRADUATE SEMINARS
Conducted as seminars or colloquia, and open to advanced undergraduates and graduates. Non-majors and majors are usually welcome, but enrollments are limited. Sign-up sheets for these courses are posted in the department office on class list sign-up days. Sheets should be checked for specific enrollment information.

GENERAL

200. Strategy in Politics—Introduction to formal theories of rational choice in political science. Basic utility, game, and social choice theory is explained and applied to topics in American, comparative, and international politics. Objectives: lay out the logical basis of rational choice methods at an accessible level, and demonstrate the application of these methods.
5 units, Aut (Morrow)

200A. Statistical Methods I—For graduate students; see 100A.
5 units, Aut (Stone)

200B. Statistical Methods II—For graduate students; see 100B.
5 units, Win (Jackman)

200C. Statistical Methods III—For graduate students; see 100C.
5 units, Spr (Jackman)

201A. Seminar: Foundations of Political Economy—(Same as Business 680.) First in a three-part sequence and a prerequisite for the remaining courses. Political economy is the study of collective decision-making and the institutions used to make and implement those decisions. The central issues and techniques in the political economy, laying a foundation for original research using methods of positive political science. Topics: social choice, majority rule, strategic behavior, agendas, norms, institutions, interest groups, and lobbying. Material is somewhat technical but accessible to most graduate students in political science, economics, and business.
5 units, Aut (Groseclose)

201B. Seminar: Economic Analysis of Political Institutions—(Same as Business P681.) Continuation of 201A, applying the techniques of microeconomic analysis and game theory to the study of political behavior and institutions, including information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations. Applications include agenda formation in legislatures, the implications of legislative structure, government form-
The institutional constraints in which parties operate and how electoral behavior of parties, and the way they shape the operation of government in different national and subnational settings, e.g., parliamentary and presidential systems. The institutional constraints in which parties operate and how electoral rules and social cleavages shape party systems. Why people vote, whether voters choose parties rationally to reflect their points of views, and in which way government performance shapes voting choices. Why politicians seek to further their goals and ambitions through the party, the strategies they follow to mobilize electoral support, and in what way partisan government shapes economic performance and peoples' welfare. Research and models are developed from advanced industrial democracies to understand party politics in new democracies.

212M. Seminar: Comparative Political Institutions—Overview of the range of existing political institutions and their impact on political economies. The roles of political institutions and what determines their stability, how they are chosen, and which processes enable their transformation over time. The main variances in institutional settings, emphasizing the menu of democratic institutions, e.g., parliamentary, semi-presidential and presidential systems; electoral rules; bicameralism; federalism; and legislative-executive relations. The effects of political institutions on economic growth and political stability.

213P. Seminar: Economic Reform and Development in Latin America—For graduate students and advanced undergraduates. Theoretical and policy approaches to Latin American development in recent decades, with an emphasis on issues raised, and positive and normative theories in use since the economic crises of the 1980s. Prerequisite: consent of instructor.

214M. Seminar: Chinese Communist Revolution—(Enroll in Sociology 217B.)

215. Chinese Politics—(Same as 115.)

215A. Chinese Politics: The Revolution and the Mao Years—(Same as 115A.)

215B. Chinese Politics: The Transformation and the Era of Reform—(Same as 115B.)

215D. Graduate Seminar: Approaches to Chinese Politics—Provide bibliographic control of the major secondary literature on Chinese politics, organized around theoretical concepts and issues found in studies of the Chinese political system. Prerequisite: basic knowledge of the government and politics of post-1949 China.

215E. Graduate Seminar: Political Economy of Reform in China—The content, process, and problems of China's post-Mao reform. Changes in property rights, markets, credit, and the role of the state in economic development. Comparative insights about reform in the Chinese communist system that distinguishes it from the experience of democracies to understand party politics in new democracies.

216L. Comparative Democratic Development—For graduate students; see 116L.

216M. Seminar: Environmental Politics in the Asia/Pacific Region—Focus is on the evolving ecology of Asia/Pacific from 1400 to the present (topography, climate, flora and fauna, and human populations); traditional patterns of managing and perceiving environmental issues; recent environmental consequences of industrialization and modern agriculture (trends in water, air, and soil quality; land use; and coastal
water quality); contemporary policies of Asian countries concerning their environmental problems (improved water management and effluent discharge standards, soil conservation, auto emission controls, national energy policies, transportation policies, and policies on population growth and migration); and bureaucracies, interest groups, transitional actors, and the environmental politics of Asian/Pacific countries. Emphasis is on Japan, China, Indonesia, Thailand, India, and the small Pacific island nations. Policy making and implementation processes in the environmental area: the structures and institutions established in recent years; their efficacy; and the political, economic, and cultural obstacles and inducements to implementing environmental policies. Prerequisite: consent of instructor.  
5 units (Okansen) not given 1999-2000

217M. Seminar: Evolution of the Chinese State  
5 units Win (Okansen, Miller)

218L. Seminar: Ethnicity and Nationalism in Soviet and Post-Soviet Politics—The major theoretical approaches to the study of ethnicity and nationalism in the Soviet system and how they attempt to explain the strategies and institutions utilized by the Soviet state to manage its "nationality problem;" the impact of Gorbachev's reforms in precipitating national movements which contributed to the dissolution of the Soviet system; and the role of ethnicity and nationalism in the new states of the region.  
5 units, Win (Lapidus)

219A. European Integration—(Same as Public Policy 205, International Policy Studies 205.) Seminar on the political and economic factors shaping European integration from its conception to the present day. The evolution of the European Union and its governing institutions through the lens of several policy areas. Agricultural, regional, monetary, regulatory, and foreign policy. The debates about democratic accountability, the future of the European Union, and the interplay between EU institutions and the domestic political arenas of member states. Prerequisites: Economics 1, Political Science 1 or 10.  
5 units, Aut (Aller)

220C. Seminar: The Political Economy of Development—Latin America and other Regions—The process of economic development from a political perspective, focusing on Latin American development, with implications of the theoretical material to other regions in the developing world. Overview of theoretical classics (e.g., modernization and dependency theory); current theories of development (e.g., endogenous growth theory and the effects of inequality on growth). Recent academic contributions to questions of structural adjustment, the size of government, fiscal deficits, poverty alleviation, and budgetary politics.  
5 units, Win (Diaz-Cayeros)

221K. Seminar: Comparative Democratization—Latin America and other Regions—Critical issues of democracy, its definition, problems of transition and consolidation, and comparison. The relationship between democracy and the military, the economy, and the interstate system.  
5 units, Aut (Karl)

222D. Seminar: Non-Governmental Organizations and Development in Poor Countries—How might non-governmental organizations affect economic growth, equity, political stability, and prospects for democracy in poor countries? Do NGOs actually contribute to these goals? What is reasonable and appropriate to expect from the NGO sector? Interactions among NGOs with wealthy countries; NGOs based in poor countries, governments, international financial institutions, and multi-national corporations.  
5 units (Abernethy) given 2000-01

223. Seminar: Japanese Politics—The primary institutions in Japanese politics (the bureaucracy, legislature, political parties, and interest groups) through the lens of the major theories that have been used to explain their structure and behavior (statism, pluralism, elitism, and network theory).  
5 units, Win (Staff)

223M. Seminar: Political Economy of Post-Communism—The sources of the collapse of the communist states in Eastern Europe and the former Soviet Union. Issues facing the formation and consolidation of post-communist states and societies, including democratization, privatization, nationalism, and foreign relations between newly independent states. Models and historical analogues for analyzing the emergence of post-communist polities. Prerequisite: 121M.  
5 units (McFaul) not given 1999-2000

224. Seminar: States and Markets in Development—For graduate students and advanced undergraduates. Research-oriented; focus is recent trends in most of the world toward market-oriented policies and models of national development: what has happened, why, what it means and how to evaluate it. Prerequisite: consent of the instructor.  
5 units (Packenham) not given 1999-2000

225. The Rise of Industrial Asia—See 125. Limited to graduate students.  
5 units, Win (Oi, Okansen, Rohlen, Rowen, Staff)

5 units, Aut (Mares)

227D. Seminar: Consolidating Democracy—Problems and processes in consolidating new or recently restored democracies. Examples and illustrations from Europe, Asia, Africa, and Latin America, with emphasis on the new democracies of the post-1974 "third wave" period. The nature of consolidation and its relationship to legitimation; legacies of authoritarian rule and the transition; design of political institutions; (re)building political parties; crafting agendas and constructing coalitions; problems of democratic governance (delivering accountability, a rule of law, electoral integrity); the relationship between consolidation and structural economic reform, managing ethnic and regional conflict; establishing civilian control over the military; developing a democratic civil society and political culture; and the role of international actors. Students write a major research paper on an individual country.  
5 unit (Diamond) given 2000-01

228D. Seminar: Non-Governmental Organizations and Development in Poor Countries—How might non-governmental organizations affect economic growth, equity, political stability, and prospects for democracy in poor countries? Do NGOs actually contribute to these goals? What is reasonable and appropriate to expect from the NGO sector? Interactions among NGOs with wealthy countries; NGOs based in poor countries, governments, international financial institutions, and multi-national corporations.  
5 units (Abernethy) given 2000-01

229. Directed Reading in Comparative Politics  
any quarter (Staff)

INTERNATIONAL RELATIONS

234P. The Role of Technology in National Security—(Enroll in Engineering-Economic Systems and Operations Research 193; same as 134P.)  
3 units, Aut (Perry)

237S. Seminar: War in the 20th Century—The causes, character, and consequences of war in the 20th century provides a survey of trends in warfare. The processes of the totalization of war: interstate and civil
239. Game Theory Applications in Political Science—Game theory applications in international relations, legislative decision-making, the development of institutions and other areas. The philosophy and the mechanics of game models. Goal: the ability to read critically articles using the approach, and to promote student skill in formulating such models themselves. Recommended: prior course in game theory.
   5 units, Win (O’Neill)

240M. Chinese Foreign Policy—For graduate students only; see 140M.
   5 units (Oksenberg) not given 1999-2000

241. Seminar: Issues in International Political Economy—Open to master’s students and to advanced undergraduates. Critical examination of the major theories which shed light on contemporary issues of global economic relations.
   5 units, Win (Goldstein)

241B. Seminar: Decision Making in U.S. Foreign Policy—(Same as International Policy Studies 208.) Priority given to students in International Policy Studies. The formal and informal processes involved in U.S. foreign policy decision-making. The formation, conduct, and implementation of policy, emphasizing the role of the President and Executive Branch agencies. Theoretical and analytical perspectives are supplemented by case studies. Preparation of policy memorandum and substantial research paper or take-home final.
   5 units, Spr (Blacker)

242F. Graduate Seminar: The Politics of Ethnicity—Why do political coalitions form along ethnic lines in some places and at some times but not others? Why do conflictual but peaceful interethnic relations become violent at some times and in some places but not others?
   5 units (Fearon) not given 1999-2000

243A. Graduate Seminar: International Relations Theory—Introduction to contemporary theories of international politics. Micro and macro approaches to the study of conflict and cooperation in world politics, including the work of Carr, Waltz, Gilpin, Keohane, and Bueno de Mesquita. Format emphasizes student oral and written presentations of assigned readings.
   5 units, Spring (Hansot)

243B. Seminar: Theoretical Issues in International Security—Critical examination of the major theories concerned with international security. The theories are reviewed at a variety of levels of analysis (systemic, domestic politics, organizational, and psychological). Short research design papers and a longer literature review essay.
   5 units, Spr (Krasner)

243C. Seminar: Theoretical Issues in International Political Economy—For Ph.D. students only. Major contemporary theories affecting global economic relations and related national policies.
   5 units, Spr (Goldstein)

   5 units (Rice) not given 1999-2000

249. Directed Reading in International Relations
   any quarter (Staff)

POLITICAL THEORY

Graduate students in Political Theory should also see courses numbered 150-169.
course in political theory. GER:4c (DR:†)
5 units (Okin) not given 1999-2000

267. Seminar: Gender, Development, and Women's Human Rights in International Perspective—(Same as 167.)
5 units, Aut (Okin)

268. Seminar: Contemporary Theories of Justice—Social and political justice. Facilitates understanding of the major contemporary debates in political theory. The major recent works that develop the principles of justice, and the political arrangements that best satisfy their requirements.
5 units (Okin) not given 1999-2000

269. Directed Reading in Political Theory
any quarter (Staff)

AMERICAN POLITICS

272R. Graduate Colloquium: Creating the American Republic—
(Enroll in History 372.)
4-5 units, Win (Rakove)

291F. Seminar: Urban Politics and Policy—Graduate and undergraduate. The major theoretical approaches used in the analysis of urban politics and policy. Assesses the fundamental conclusions about American politics reached by urban scholars as to how subsequent interpretations continue to set the context for scholarly debate and an understanding about American political development generally.
5 units, Spr (Fraga)

291J. Seminar: The Politics of the American Macro-Economy—
(Same as 191J.)
5 units (Jackman) not given 1999-2000

292A. Graduate Seminar: Approaches to the Study of American Politics—Theories of American politics, focusing on Congress, the presidency, the bureaucracy, and the courts.
5 units, Aut (Fiorina)

292B. Graduate Seminar: Topics in American Political Behavior—
For graduate students with some background in American politics embarking on their own research. Current research in American politics, emphasizing political behavior and public opinion. Possible topics: uncertainty and ambivalence in political attitudes, heterogeneity in public opinion, the structure of American political ideology, political leaning, the media as a determinant of public opinion, and links between public opinion and public policy.
5 units, Win (Jackman, Snideman)

292C. Graduate Seminar: American Political Institutions—Students undertake supervised research in American politics and political behavior, producing a research proposal, and conducting research leading to the completion of a significant scholarly paper. Corequisites: 292A,B.
5 units, Spr (Ferejohn, Moe)

292D. Research and Writing—Students undertake supervised research in American politics and behavior, leading to the completion of a significant scholarly paper. Prerequisites: 292A,B,C.
5 units, Aut (Iyengar, Wong)

293. Graduate Seminar: Models of Political Choice—Recent research on political reasoning in mass publics. The nature of ideology, the role of political values, the framing of political issues, informational constraints, and alternative conceptions of the process of political choice.
5 units (Snideman) not given 1999-2000

294. The Press and the Political Process—(Enroll in Communication 260.)
4 units, Win (Iyengar)

294C. Graduate Seminar: Politics of Social Policy and Race—The politics of social policy-making in the U.S. Topics: partisan conflict over social policy; the role of budgeting in the making of welfare policy, interest group influence and the nature of public opinion. Focus is on the relationship between the politics of race and welfare policy. Social policy issues include welfare policy, health care, affirmative action, and language policy.
5 units, Spr (Wong)

296. Seminar: Racial and Ethnic Politics in the U.S.—Focus is on the evolution of racial and ethnic politics in the U.S., examining the political development of the American polity generally. Goal: the construction of a comprehensive theory of American political development which can incorporate race and ethnicity.
5 units (Wong) given 2000-01

297. Graduate Seminar: The Political Economy of Immigration—
The theoretical and empirical literature on migration politics and the economic causes and effects of migration. The political economy of American immigration in comparative perspective. The immigration dilemmas of governments in Western Europe, Asia, and Australia.
5 units (Wong) given 2000-01

298. Directed Reading in American Politics
any quarter (Staff)

GRADUATE SEMINARS

Seminars numbered 300 and above are limited to graduate students. Instructors should be consulted before enrolling.

300. Thesis
any quarter (Staff)

311. Graduate Seminar: Major Theories in Comparative Politics—
Required for all Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of instructor. Major theoretical approaches in comparative politics including modernization, institutionalist, Marxist, rational choice, cultural, and new institutionalist theories; also theories about major regime types (democracy, authoritarianism, totalitarianism) and transitions between them. Enrollment limited to 14.
5 units, Aut (Packenham)

312. Seminar: Comparative Political Analysis—For Political Science Ph.D. candidates. Required of all students with comparative politics as a first or second concentration. Qualified Ph.D. candidates in other departments and A.M. candidates in Political Science may be admitted with consent of the instructors. Enrollment limited.
5 units, Win (Abernethy)

313H. Graduate Seminar: Historical Approaches to Social Science—(Enroll in History 482.)
4-5 units, Spr (Haber)

314K. Seminar: Political Economy of Development—The major development theories in the area of comparative politics, emphasizing the interplay between global and domestic factors, and economics and politics in the developing world.
5 units (Karl) not given 1999-2000

315F. Graduate Seminar: Topics in Chinese Politics—In depth examination of selected topics in Chinese politics. Content varies each year.
5 units, Spr (Oi)

340. Seminar: New Approaches to International Security—Live televised seminar between Stanford and the universities of Minnesota and Wisconsin. Innovative interdisciplinary approaches to security from the political science, sociology, anthropology, history, and engineering perspectives. Issues relating to war, nationalism, ethnic conflict, conflict
resolution, democratization, and sustainable development. Approaches and issues are related to changing understandings of international security and conflicting disciplinary assumptions and methodologies.

5 units, Aut (Eden)

343A, B, C. Research Seminar: International Security and Social Science—Advanced graduate students, faculty, and visitors present current research on contemporary problems in international security.

1 unit, Aut, Win, Spr (Eden, Sagan)

380A, B, C. Workshop on Political Economy

5 units, Aut, Win, Spr (Ferejohn, Weingast)

401. Seminar: Graduate Orientation—Open to first-year graduate students in Political Science.

1 unit, Aut (Staff)

402A, B, C. Seminar: Graduate Speaker Series—Open to graduate students in Political Science.

1 unit, Aut, Win, Spr (Goldstein)

OVERSEAS STUDIES

Courses approved for the Political Science major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

MORRISON INSTITUTE FOR POPULATION AND RESOURCE STUDIES

Faculty: (Director) Marcus W. Feldman (Biological Sciences); Carl Djerassi (Chemistry), William Durham (Anthropological Sciences), Paul R. Ehrlich (Biological Sciences), Lawrence H. Goulder (Economics, Institute for International Studies), Mary Lake Polan (Gynecology and Obstetrics), Shripad Tuljapurkar (Consulting Professor)

Although Stanford University does not have a formal degree program in population studies, it does have scholars of international reputation in such specialties as demographic history, demographic methods, economic demography, epidemiology, population biology, population genetics, and the sociology and anthropology of populations.

The Morrison Institute for Population and Resource Studies is an interdisciplinary group serving three major functions: (1) encouraging graduate work in population studies through fellowship grants and supervision, (2) instituting courses and seminars in population studies, and (3) bringing visiting faculty to Stanford to strengthen existing course offerings. The institute also organizes an interdisciplinary Colloquium on Population Studies to introduce upper-division undergraduates and graduate students to a variety of issues in population-related specialties.

For the convenience of interested students, offerings of population and resource studies at Stanford are listed below.

COURSES

ANTHROPOLOGICAL SCIENCES

22N. Stanford Introductory Seminar: Genes, Peoples, and Diversity

3 units (Mountain) not given 1999-2000

105. Race, Gender, and Biology

5 units (Durham) not given 1999-2000

123. Environmental Issues in the Americas

5 units (Staff) not given 1999-2000

150. Population and Society

5 units (Wolf) not given 1999-2000

151. Demography in Anthropology

5 units (Staff) not given 1999-2000

153. The Population Question: From Malthus to Rio

3-5 units (Durham) not given 1999-2000

154. The Limits to Growth

3-5 units (Staff) not given 1999-2000

160. Development and Environment

5 units (Staff) not given 1999-2000

161. Conservation and Development Issues in the Amazon

5 units (Durham) not given 1999-2000

162. Indigenous Peoples and Environmental Problems

3-5 units (Durham, Charnley) not given 1999-2000

163. Community-Based Conservation

5 units (Charnley) not given 1999-2000

164. Ecological Anthropology—(Same as Human Biology 134.)

5 units, Spr (Durham, Charnley)

165. Human Ecology of the Amazon

5 units, Win (Lu)

166. Indigenous Forest Management

5 units (Irvine) not given 1999-2000

167/267. Social Policy for Sustainable Resource Use

5 units, Win (Irvine)

168. Ecology and Equity

5 units, Win (Guha)

170/270. Medical Anthropology

5 units, Aut (Barnett)

181. Genes and Culture through Time and Space

5 units (Mountain) not given 1999-2000

204. Culture and Politics in South Asia

5 units, Win (Guha)

251. Anthropological Solutions to Environmental Problems

5 units (Staff) not given 1999-2000

252. Political Ecology

5 units (Durham) not given 1999-2000

266. Human Evolutionary Ecology

5 units, Spr (Lu)

BIOLOGICAL SCIENCES

13N. Stanford Introductory Seminar: Environmental Problems and Solutions

3 units, Spr (Ehrlich)

15N. Stanford Introductory Seminar: Environmental Literacy

3 units, Win (Schneider) alternate years, not given 2000-01

16N. Stanford Introductory Seminar: Island Ecology

3 units, Win (Vitousek)

The courses and research opportunities in the Department of Psychology introduce students to the vast corpus of data on, and explanations of, human nature and human behavior. Through the study of, for example, abnormal behavior, aging, decision-making, emotion, group behavior, infancy, language, learning and memory, personality, social perception, and visual perception, students are introduced to the properties of sensory, cognitive, and affective systems, and of their interrelationships; to the reciprocal effects of one person on another; and to the effects on behavior of the physical, social, and cultural environment. The research programs of the faculty and students focus on the study of basic psychological mechanisms and, where appropriate, on relating basic research to the analyses and solutions of important societal problems.

The department, housed in Jordan Hall, maintains shop facilities and many computer-equipped laboratories. Bing Nursery School, located on campus at 850 Escondido Road, provides a laboratory for child observation, training in nursery school teaching, and research. It was constructed with funding from the National Science Foundation and a special grant from Mrs. Anna Bing Arnold and Dr. Peter Bing.

The department provides (1) courses designed for the general student, (2) a major program leading to the degree of Bachelor of Arts, including options for honors and a specialization in one of four content area tracks, (3) a minor program, (4) a coterminal master’s degree program leading to the degree of Master of Arts, and (5) programs of graduate study and research leading to the degree of Doctor of Philosophy. Applications are not accepted for the master’s degree except as noted below.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Major Requirements—As of Autumn Quarter 1996-97, all students declaring in Psychology must complete a minimum of 55 units of course work in psychology. All courses taken to satisfy the 55-unit requirement must be taken for a grade of ‘C’ or better (including the grades of S and CR). All majors complete Psychology 1, Introduction to Psychology, and one course in statistics, which may be selected from Psychology 10 or 101. Beyond these two required courses, students must complete at least five of the following nine core courses:

- 20. Introduction to Brain and Behavior
- 30. Introduction to Perception
- 40. Introduction to Cognitive Psychology
- 50. Introduction to Human Neuropsychology
- 60. Introduction to Developmental Psychology
- 70. Introduction to Social Psychology
- 80. Introduction to Personality Psychology
- 90. Introduction to Abnormal Psychology
- 153. Introduction to Clinical Psychology

Students must take one writing intensive course (designated WIM) in psychology, and should check the Stanford Bulletin yearly as these courses may change.

Students enrolled in the senior Honors program may take up to 15 units in independent study and practica, including Psychology 197 and 198. Other students may count up to 10 units of independent study and practica through Psychology 194 and 195, which are graded on a mandatory satisfactory/no credit basis. The department strongly recommends that all majors take at least one seminar.

Lifestyle courses (formerly Psychology 190, 193, and 196), and Psychology 199 do not count toward the Psychology major.

Transfer students must take at least 28 units of course work in the department in order to receive the department’s recommendation for graduation. Such students may receive transfer units for courses completed in psychology at any accredited university or college provided that the courses were taught by a regular faculty member and were approved by the Transfer Credit Office. All students must satisfy the five-core course requirement through courses completed at Stanford.

Beyond the Minimal Requirement—Many students want a “stronger” program than the minimal requirements listed above. This may be achieved in any or all of these ways:

1. Within the general major, the student may take advanced undergraduate or graduate courses. The student may also take advantage of widespread opportunities for directed research, working closely with individual faculty and graduate students.
2. The student may apply to the senior honors program, described below.
3. The student may elect to pursue one of four specialization tracks:
   - Health and Development
   - Neurosciences
   - Mind, Culture, and Society
   - Cognitive Sciences

The training obtained from the pursuit of any of these options is valuable not only for students considering graduate work in psychology, but also for those thinking of professional careers outside of psychology.

Note—Students who declared the psychology major before Autumn Quarter 1996-97 have the option of completing their major requirements as described in the Stanford Bulletin 1995-96.

MINORS

Declarations—Students who wish to declare a minor field of concentration in Psychology must do so no later than the deadline for their applications to graduate.

Requirements—Completion of a minimum of seven courses in psychology is required for the minor. Beyond Psychology 1 and 10, the minor must include three of nine core courses (20, 30, 40, 50, 60, 70, 80, 90, and 153) and at least two other courses within the department. All courses to be counted toward the minor must be passed with a grade of ‘C’ or better. Lifestyle courses (formerly Psychology 190, 193, and 196) and Psychology 199 do not count toward the Psychology minor.

SPECIALIZATION TRACKS

Students in the major program, including those in the honors program, may elect to specialize in one of four tracks, namely, Health and Development; Neurosciences; Mind, Culture and Society; and Cognitive Sciences. Students must meet the general requirements for the major (Psychology 1, 10 or 101, and the five core courses) plus the requirements designated for the specialization track. Typically the courses required for the track include one or two required courses and four to six recommended courses in psychology, along with three to four courses in related disciplines. (Psychology courses completed for the track would count toward satisfying the major requirements stated above.) In the ideal case, the student who specializes would acquire an understanding of a range of

525
psychological processes, as well as an appreciation of the significance of these processes in the chosen area of application. In this way, specialization could facilitate the student’s preparation for a professional career in, for example, medicine, business, or counseling, or for graduate work in psychology and a more academic career. Information about the required and recommended courses for each track is available from the Undergraduate Coordinator in Building 420, room 214. After declaring a major, a student who wants to specialize should discuss the chosen track with the Undergraduate Coordinator or his/her assigned adviser.

For information concerning the coterminal bachelor’s and master’s degree program, see below.

HONORS PROGRAM

The senior honors program is designed for exceptionally able students who wish to pursue a year of intensive supervised independent research. Admission to the program is made at the end of the student’s junior year on the basis of (1) excellent academic performance, (2) previous research experience, and (3) recommendations by faculty and/or graduate students. An information meeting about the program is held in Winter Quarter.

Students interested in the program should involve themselves in research as early as possible and acquire a broad general background in a chosen area. The program is particularly appropriate for students planning to go to graduate school in psychology and in other social sciences, as well as computer science, business, law, and medicine.

Funds for research are available in the form of Firestone Grants (applied for early in Spring Quarter of the junior year) and Small Grants (applied for early in Autumn Quarter of the senior year). Information is available at the Undergraduate Research Opportunities office in Sweet Hall.

During Autumn Quarter of the senior year, students participate in a weekly seminar concerned with general methods and issues in psychological research. At the same time, they plan for research under the supervision of an appropriate faculty member, and proposals are presented orally at the seminar for discussion. A written copy of the proposal is turned in at the end of Autumn Quarter. During Winter and Spring Quarters, students are primarily involved in completing research and writing the honors thesis. Students present completed projects at a convention at the end of Spring Quarter, attended by other students, faculty, and graduate students.

GRADUATE PROGRAMS

There are no specific course requirements for admission to the doctoral program. However, an applicant should have research experience as an undergraduate, as well as the equivalent of an undergraduate major in psychology. The major focus of the doctoral program is on research training, and admission is highly selective.

Applicants for admission must submit their scores on the Graduate Record Examination (both general and psychology subject tests) as part of the application. This examination may be taken at most universities and colleges.

MASTER OF ARTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The Department of Psychology normally offers an A.M. degree only to students concurrently enrolled in its Ph.D. program or students concurrently pursuing coterminal A.B. and A.M. degrees. All applicants must satisfy University residency requirements for the degree and are responsible for consulting with their primary departments or the Financial Aid Office about the effects of the proposed program on their current funding.

Stanford undergraduate students who would like advanced training in psychology may apply for a coterminal A.M. degree in psychology. To do so, students should consult with the student services officer in the department. Along with a coterminal program application, applicants must submit (1) a statement of purpose, (2) a program plan specifying the courses in which they intend to enroll to fulfill degree requirements, (3) at least two letters of recommendation from Stanford faculty members familiar with their academic work, (4) a current Stanford undergraduate transcript, and (5) a written agreement by a member of the psychology faculty to serve as the student’s adviser. This program is limited in size and admissions are selective. Students should apply to this program between their eighth and eleventh quarters of undergraduate study. The department’s deadline for the submission of an application to the coterminal program is March 20.

In exceptional cases, students concurrently enrolled in another doctoral or professional program at Stanford may also apply for the A.M. degree. Such applicants should also consult with the department’s student services officer, and need to submit (1) a written agreement by a member of the Psychology faculty to serve as the student’s adviser, (2) a statement of purpose, (3) a program plan specifying the courses in which they intend to enroll to fulfill degree requirements, (4) at least two letters of recommendation from Stanford faculty members familiar with their academic work, (5) complete undergraduate transcript(s), (6) a current Stanford transcript, and (7) GRE (or professional school test) scores.

Students must complete at least 36 units of psychology courses for the degree. (For coterminal degree students, course work for the master’s degree may not duplicate courses taken for the undergraduate degree.) Of these 36 units, at least 18 must be in psychology courses numbered 200 or above. Units from Psychology 275 (Graduate Research) may be counted toward these 18 units; service as a teaching assistant for Psychology 1 or 60, through registration in 257 or 281 (Practicum in Teaching), may be counted for up to 3 of these 18 units. Two of the graduate courses must be selected from the courses listed as “core course” requirements for the Ph.D. in psychology. In addition, at least one statistics course beyond the introductory level is required. The course must be approved by the student’s adviser. All courses to be counted toward the master’s degree must be passed with a grade of “B” or better (unless the course is offered only on a satisfactory/no credit basis). Demonstration of competence in the design and execution of psychological research is also required for receipt of the master’s degree. Normally, this demonstration entails completion of a master’s thesis. However, evidence of other research experience, notably the completion of a senior honors thesis, may be substituted for a formal master’s thesis upon approval of the department’s Committee on Graduate Studies. Students enrolled in the coterminal program must meet the University’s residency requirement of 15 full tuition quarters or three tuition quarters beyond the quarter in which 180 units were completed.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

In addition to fulfilling the residence requirement for the degree, the following requirements are stipulated.

First-Year Course Requirements—During the first year of graduate study, the student must take 207 (Proseminar for First-Year Graduate Students), at least one approved graduate statistics course, and at least two core courses from the list below.

201. Personality
202. Neuroscience
205. Foundations of Cognition
211. Developmental Psychology
212. Social Psychology or 215. Mind, Culture, and Society
213. Personality

The student is expected to spend at least half of the time in research from the beginning of the first year of graduate study to the completion of the Ph.D., normally taking no more than 9 units of course work each quarter. At the end of the first year of graduate study, the student must file with the department a written report of the first-year research activities.

Second-Year Course Requirements—During the second year of graduate study (or as additional courses during the first year), the student must complete the core courses listed above and take a second approved graduate course in statistics.
Third-Year Major Area Paper—During the first week of Autumn Quarter of the fourth year, the student turns in a Conceptual Analysis of the Dissertation Area (CADA). This paper provides a general framework for the research topic of the dissertation, addresses the central issues within the specialty area, and reviews the pertinent literature. Typically, the analysis has the kind of scope found in the opening chapters of the more traditional dissertations, but the exact format and scope of the paper is a joint decision made by student and adviser.

At the same time, the student selects two faculty members to read the paper and give feedback and commentary on it. These should be two faculty members most likely to serve on the later oral committee of the dissertation. A portion of the paper, revised as appropriate, can then become the first section of the actual dissertation proposal.

If the student should radically change the area of the dissertation research after CADA has been written, the formal CADA procedure does not need to be repeated for the second dissertation topic. The student is still expected to be knowledgeable about the literature and problems of any research topics being pursued for the dissertation.

Minor Requirements—The candidate must complete either a University minor satisfactory to the minor department, or elect to have the minor waived by selecting 12 approved units outside the department. A student designing a program of 12 units outside the Department of Psychology is expected to do so in consultation with the adviser.

Dissertation Reading Committee—The candidate must select a dissertation reading committee satisfactory to the department. The minimum membership of this committee must be (1) the principal dissertation adviser, (2) a second member from within the department, and (3) a third member chosen from Psychology or another department.

Orals—The candidate must pass the University oral examination, which is based on the dissertation proposal, not on the defense of the dissertation itself. The reason for this policy is to permit the oral to serve the function of guiding and improving the proposed research. This function can best be served if the oral is scheduled early in the year in which the dissertation research is conducted. It is therefore expected that the oral will be taken by the end of the Autumn Quarter of the fourth year.

Dissertation Requirements—The candidate must complete a dissertation satisfactory to the dissertation reading committee.

Ph.D. candidacy expires five years after admission to candidacy by the University Committee on Graduate Studies. Reapplication requires department reexamination.

STUDENT EVALUATIONS

First-Year Evaluation—It is the department’s policy to evaluate the progress of each graduate student at the end of the first year of graduate study. As part of the procedure, each student is required to file with the department a report of the first-year research activities.

Students should discuss this report and the evaluation procedures with their adviser as early as possible in their first year. The report is due on June 1. If the student fulfills the academic promise displayed upon entrance, he or she is invited to continue to the doctorate.

The first-year evaluation is primarily based on three factors:
1. Quality of research carried out in the first year
2. Performance in courses (especially required courses)
3. Recommendations of the adviser (including a commitment on the part of that adviser to continue in that role)

Second-Year Evaluation—A similar evaluation is conducted at the end of the second year of graduate training involving the same criteria as the first year; however, the student is not required to submit a paper. Students who do not make satisfactory progress during the second year may be dropped from the program.

THE DOCTORAL TRAINING PROGRAM

As indicated by the requirements described above, a student may concentrate in any one of several areas within psychology. Regardless of area, however, the training program places emphasis on the development of research competence, and students are encouraged to develop those skills and attitudes that are appropriate to a career of continuing research productivity.

Two kinds of experience are necessary for this purpose. One is the learning of substantial amounts of technical information. A number of courses and seminars are provided to assist in this learning, and a student is expected to work out a program, with his or her adviser, that attains such knowledge in the most stimulating and economical fashion.

A second aspect of training is one that cannot be gained from the courses or seminars. This is firsthand knowledge of, and practical experience with, the methods of psychological investigation and study. These methods do not exist in the abstract; they are ways of behaving with the people or animals who are being studied. They are skills and require guided practice for their perfection. Students are provided with whatever opportunities they need to reach those levels of competence representative of doctoral standing. Continuing research programs, sponsored by members of the faculty, offer direct opportunities for experience in fields represented by the faculty’s many research interests.

Each student achieves competence in unique ways and at different rates. Each student and adviser share in planning a program leading to the objectives discussed. The student is expected to spend half of his or her time on research and normally takes no more than 9 units of course work per quarter.

FELLOWSHIPS, SCHOLARSHIPS, AND ASSISTANTSHIPS

Research and teaching assistantships, United States Public Health Service traineeships, and some University fellowships are available. The type of support offered may vary from year to year. The department depends on the fact that a number of its students receive outside awards. Qualified applicants are asked to take initiative in applying for predoc toral fellowships from the National Science Foundation, the Danforth Foundation, Ford Foundation, and the United States Public Health Service, among others. Applications may be made by college seniors planning to work for a higher degree. Students should apply early in Autumn Quarter of the senior year. For information concerning application forms and procedures, consult representatives from the financial awards office of your home institution.

TEACHING REQUIREMENT

The department views experience in supervised teaching as an integral part of its graduate program. Regardless of the source of financial support, all students serve as teaching assistants for four Psychology courses during their graduate study. Of the four courses, one of them should be Psychology 1, General Psychology, and another be Psychology 10, Statistical Methods. Students are discouraged from participating in teaching the first year of graduate study. Students typically progress from closely supervised teaching to more independent work. They usually begin by teaching sections of General Psychology and Statistics and then progress to more advanced courses in their area of specialization. They may offer a supervised, but essentially independent, seminar during their final year of graduate study.

Ph.D. MINOR

Candidates for the Ph.D. degree in other departments may elect a minor in psychology. To obtain a minor, the student must complete 20 units of course work at the graduate level in the Department of Psychology, excluding Psychology 275 (graduate-level research). Cross-listed graduate courses can be used to satisfy this requirement. All courses counted toward the Ph.D. minor must be passed with a grade of 'B-' or better (unless the course is offered only on a satisfactory/no credit basis).

COGNITIVE SCIENCE PROGRAM

Psychology is participating, along with the departments of Computer Science, Linguistics, Philosophy, and the School of Education, in an interdisciplinary program of cognitive science. The program is intended to provide students with an interdisciplinary education as well as a deeper concentration in psychology. Doctoral students in psychology are eligible to participate in the Cognitive Science program. Students who complete the requirements receive a special designation in cognitive
science along with the Ph.D. in Psychology. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of psychology.

**PSYCHOLOGY COLLOQUIUM**

The Psychology Colloquium meets on most Wednesday afternoons at 3:45. Speakers from Stanford and other institutions present topics of current interest. Graduate students are expected to attend.

**COURSES**

(WIM) indicates that the course meets the Writing in the Major requirements.

**SUMMER SESSION**

The courses announced for the Summer Session are those regularly scheduled in the department curriculum. Additional courses may be announced in the Stanford University bulletin *Summer Session 2000*, issued annually in January.

**STANFORD INTRODUCTORY SEMINARS**

3N. Stanford Introductory Seminar: Culture and Mind—Preference to freshmen. Explore the ideas that cultures and mind make each other up, including the role of culture in cognition, emotion, and motivation.

4N. Stanford Introductory Seminar: Affect and Cognition—Preference to freshmen. The psychological processes of emotions as they influence behavior, emphasizing the relation of emotions to other psychological concepts, such as cognition and motivation. Conscious and nonconscious emotional influences. Three units for paper and final exam; two units for final exam only.

6N. Stanford Introductory Seminar: Remembering and Misremembering—Preference to freshmen. Discussion of experiments and cases of errors, biases, distortions, and omissions in memory, and understanding them in light of a theory of memory.

8N. Stanford Introductory Seminar: Evaluating Popular Media Accounts of Social Science Findings—Preference to freshmen. Introduction to the concepts and concerns of social psychology through pop media and user-friendly “trade books,” e.g., Frank Sulloway’s *Born to Rebel*, which deals with the impact of birth order and Dick Nisbett’s *Culture of Honor*, which deals with the reasons for high homicide rates in the American south. Critical considerations of articles, books, and documentary film are intended for lay people that deal with findings relevant to social psychology and related fields. Documentary films and magazine articles deal with the impact of parents on delinquency and achievement, and with various social problems and policy issues, e.g., affirmative action and crime. Limited enrollment.

9N. Stanford Introductory Seminar: The Social Psychology of Race, Gender, and Culture—Preference to freshmen. Focus is on the role that one’s social context (one’s position in society and social identity) plays in shaping the psychology of the individual and the collective psychology of society more generally.

10N. Stanford Introductory Seminar: Collective Violence—Preference to freshmen. By some estimates, 100 million civilians were victims of organized violence during this century alone. The significant psychological factors underlying massacres and other forms of collective violence, focusing on the perpetrators and on the victims. The literature authored by psychologists, historians, journalists, sociologists, political scientists. Limited enrollment.

12Q. Stanford Introductory Dialogue: Emotion—Preference to sophomores. The fundamental questions about emotions: What is emotion? Why do we have emotions? Can we change our emotions? How do different people’s emotions differ? Can emotions make us sick? Focus is on experimentally tractable questions, and empirical research findings relevant to these questions, emphasizing critical thinking and writing skills. Limited enrollment.

14Q. Stanford Introductory Dialogue: Psychological Studies of the Life Course—Preference to sophomores. How psychologists have conceived of the life course of an individual from birth to death, exploring two or three classical life course studies, including Lewis Terman’s study of the gifted.

20Q. Stanford Introductory Seminar: Oldies but Goodies in Pop Self-Help Psychology—Preference to sophomores. Review of popular self-help books, e.g., *You Just Don’t Understand* and *Emotional Intelligence*; their claims, and how to relate the themes to those in contemporary psychological research.

**OPEN TO ALL STUDENTS**

Additional courses not listed here are frequently offered by selected postdoctoral or terminal Ph.D. personnel in the areas of their special research. These are listed in the quarterly *Time Schedule*; the course descriptions are circulated in advance.

1. Introduction to Psychology—The scientific study of behavior, focusing on psychological research and theory. Topics: the biological bases of behavior, sensation and perception, emotion, learning, memory, cognition, child development, psychopathology, and social psychology. (Sections optional) GER:3b (DR:9)

3 units, Win (Gabrieli)

Win (Zimbardo)
Spr (Gross)

3. Practicum in Effective Teaching Methods and Style—Enrollment limited to advanced undergraduates serving as teaching assistants in Psychology 1. Discussions on teaching methods and style, selected readings on teaching effectiveness, student presentations to class sections, preparation of exams, and grading essays and term papers.

2 units. Win (Zimbardo)

10. Introduction to Statistical Methods—(Same as Statistics 60.) Emphasis is on techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:2c (DR:4)

5 units, Win (Walther)
Spr (Thomas)

20. Introduction to Brain and Behavior—How the brain regulates behavior and in turn is influenced by behavioral interactions. Behavior is described in physiological terms, organized with respect to evolution-
ary principles. Topics: neurons, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states and the biology of learning, memory, and psychopathology. Recommended: 1. GER:2a (DR:5)
3 units, Aut (R. Fernald)

30. Introduction to Perception—Perceptual psychology and sensory neuroscience, emphasizing vision and hearing. Topics: anatomy and physiology of the eye and ear, anatomy and physiology of the visual and auditory areas of the brain, pitch and loudness perception, speech perception, color vision, depth perception, visual motion perception, etc. Recommended: 1. GER:3b (DR:9)
3 units, Spr (Heeger)

40. Introduction to Cognitive Psychology—Survey and analysis of major topics in cognitive psychology, including perception, memory, problem solving, and reasoning. Emphasis is on contemporary research and theory. Recommended: 1 and 10. GER:3b (DR:9)
4 units, Win (Spier)

4 units, Win (Gabrieli)

60. Introduction to Developmental Psychology—Psychological development from birth to adulthood, emphasizing infancy and the early and middle childhood years. The nature of change during childhood and theories of development. Recommended: 1. GER:3b (DR:9) (WIM)
3 units, Aut (Flavell)

60A. Introduction to Developmental Psychology Section—Guided observation of children age 2-6 at Bing Nursery School. Corequisite: 60.
2 units, Aut (Hartman)

70. Introduction to Social Psychology—Surveys, theory, and empirical research on social psychological topics: attitudes and persuasion, identity, person perception, compliance, obedience, aggression, altruism, group dynamics, interpersonal relationships, prejudice, stereotyping, roles, norms, attribution, and social judgment. Two lectures plus section each week. Original research proposal. Recommended: 1. (WIM)
4 units, Spr (Eberhardt)

80. Introduction to Personality Psychology—Provides a broad, balanced introduction to the study of personality. Key concepts and research methods, major theoretical approaches, and related empirical findings including psychodynamic, trait, biological, humanistic, behavioral, social-learning, and cognitive perspectives. Recommended: 1.
3 units, Spr (Gollub)

90. Introduction to Abnormal Psychology—The nature, origin, and treatment of a variety of psychological disturbances, examined from psychodynamic, behavioral, cognitive, and biomedical perspectives. Historical and current controversies in the field. Recommended: 1. GER:3b (DR:9)
3 units, Spr (Butler)

101. Introduction to Statistical Methods (Postcalculus) for Social Scientists—(Enroll in Economics 80, Statistics 190.)
3-5 units, Aut (Johnstone)
Win (Amemiya)
Spr (Liu)
Sum (Staff)

102. Statistical Methods for Behavioral and Social Sciences—See 252.

103. Statistical Theory, Models, and Methodology—See 253.

110. Research Methods and Experimental Design—Experimental research methods and principles in psychology. Structured research exercises and the design of an individual research project. Prerequisite: consent of instructor.
5 units (M. Lepper) not given 1999-2000

112. Research Methods in Cognitive Psychology—Focus is on conceptual and methodological issues that arise in research in the areas of cognitive science and cognitive neuroscience. Training in the logic and techniques of research provides students with the skills necessary for research in cognitive science. Students conduct several experiments, analyze their data, and interpret the results.
5 units, Aut (Spier)

120. Cellular Neuroscience: Cell Signaling and Behavior—Survey of neural interactions underlying behavior. Prerequisites: 1 or equivalent, and elementary biology.
4 units, Aut (Wine)

121. Ion Transport and Intracellular Messengers—(Graduate students register for 228.) Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Lab demonstrations and brief hands-on introduction to some techniques (e.g., patch clamping). Recommended: 120 or introductory course in biology or human biology.
3 units, Spr (Wine)

122. Human Behavioral Biology—(Enroll in Biological Sciences 150.)
6 units, Spr (Sapolsky) alternate years, not given 2000-01

123. Graduate Seminar in Cognitive Neuroscience—See 222. Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Gabrieli)

124. Seminar on Psychophysiology—See 236. Prerequisite: consent of instructor.
4 units (Gross) not given 1999-2000

126. Sleep and Dreams—(Enroll in Human Biology 11.)
3 units, Win (Dement)

131. Language and Thought—The psychology of language, including production and understanding in utterances; from speech sounds to speaker's meaning; children's acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or Linguistics 1. (WIM) GER:3b (DR:9)
4 units, Aut (Clark)

132. Language Processing—Influential theories, computational models, major issues, and research in psycholinguistics. Emphasis is on sentence- and word-level processes in human language comprehension and production. Prerequisite: 40.
4 units, Spr (Griffin)

133. The Psychology of Trauma—Seminar analyzes the impact of emotional trauma on cognitive, emotional, and social functioning throughout life. Cross-disciplinary, including literatures from social, clinical, cognitive, and developmental psychology; and neuroscience and psychiatry. Students lead and participate in weekly discussions. Paper.
3 units, Win (Bower, Sivers)

529
134. Seminar on Language and Deception—Deceptive, exploitative, and other noncooperative uses of language. How is language used to deceive or exploit? Where are these techniques practiced and why? What are the personal, ethical, and social consequences of these practices? Prerequisite: 131, Linguistics 1, or Philosophy 181.
3 units, Win (H. Clark)

3 units, Win (Greeno, Wasow)

136. Cognition and Aging—(Graduate students register for 225.) Survey of research examining the influence of aging on cognition. Topics: influence of aging on attention, language, memory, and the cognitive effects of age-related neurological disorders such as Alzheimer’s and Parkinson’s disease. Prerequisite: 40.
3 units, Spr (Spierer)

141. Cognitive Development—Topics and issues on cognitive development, developmental changes in memory, conceptual organization, logical reasoning, and communication skills. Prerequisite: 1. GER:3b (DR:9)
3 units, Aut (O’Donnell, Henderlong)

142. Social Development—Socialization and the development of social behaviors. Review of research concerning conscience and conduct, altruism and aggression, cooperation and competition, achievement motivation, and self-control.
3 units (M. Lepper) not given 1999-2000

144. Conceptual Organization and Development—See 242. Prerequisite: 141 or consent of instructor.
1-3 units (Markman) not given 1999-2000

145. Seminar on Infant Development—For students interested in research skills. Focus is on conceptual and methodological issues related to research on early development; training in experimental design, lab, and observational procedures; and the collection, analysis, and interpretation of data. Limited enrollment.
1-3 units, Aut, Win, Spr (A. Fernald)

146. Observation of Children—Seminar on learning about children through guided observations at Bing Nursery School, Psychology’s lab for research and training in child development. Physical, emotional, social, cognitive, and language development. Recommended: 60.
3-5 units, Win, Spr (Hartman)

147. Development in Early Childhood—Supervised experience with young children at Bing Nursery School. Three units require four hours per week in Bing classrooms throughout the quarter; 4 units require seven hours per week; 5 units require 10.5 hours per week. Weekly seminar on developmental issues in the teaching-learning environment at Bing School. Prerequisite: 60 or 146, or consent of instructor.
3-5 units, Aut, Win, Spr (J. Lepper)

152. Social Conflict: Models and Methods of Mediation—Conceptual models of social conflict and approaches to resolving them through mediation. Examples from a spectrum of conflict settings ranging from minor disputes between individuals to intragroup and intergroup tensions. Existing theories and empirical research. Students generate examples from the Stanford community, and role play methods of mediation in resolving social conflict.
3 units, Spr (Daheer, Martinez)

153. Introduction to Clinical Psychology—Survey and analysis of topics in clinical psychology: the history of clinical psychology, models and assessment of personality, behavior, cognition, psychopathology, and approaches to the treatment of abnormal behavior. Emphasis is on current theory, research, and issues in clinical psychology and on the role of clinical psychology in contemporary society. Recommended: 1.
3 units, Win (Gottlieb)

154. Selected Topics in Affective Disorders—See 234. 3 units, Spr (Gottlieb)

155. Research Seminar on Stereotyping and Prejudice—Students participate in on-going laboratory research on stereotyping and prejudice. Emphasis is on theoretical and methodological issues; research design; data collection and analysis. Two-quarter practicum. Prerequisites: 1, 70, research experience, and consent of instructor.
3-4 units, Aut, Win, Spr (Eberhardt)

156. Applications of Social Psychology—(Graduate students register for 271.) The application of social psychological theory and research to a variety of issues and problems: evaluating the impact of social interventions, strategies, and shortcomings in personal and social decision making; the effects of mass media and other sources of social persuasion; problems of conflict resolution and negotiation; applications of social psychology in legal, medical, educational, and business settings. Prerequisites: 1 and 10, or consent of instructor.
4 units, Aut (Ross)

157. Theoretical Approaches in Social Psychology—(Graduate students register for 279.) The field of social psychology, organized by the theories and systems that tie together wide-ranging findings and phenomena. Possible topics: how attitudes, beliefs, and self-concepts originate in our actions; the importance of construal and cognition in social-psychological phenomena; and the relationships between thought and emotion, and health. Emphasis is on developing a systematic understanding of the field of social psychology.
3 units (Stein) not given 1999-2000

158. Emotions: History, Theories, and Research—See 259. Prerequisite: consent of instructor.
3 units, Aut (Zajonc) alternate years, not given 2000-01

159. Psychological Perspectives on the Self—(Graduate students register for 223.) The evolution of scientific conceptions of the self, developmental approaches; motivational and cognitive self processes; applications of self and self-regulation theory to depression, gender roles, and achievement outcomes. Modernist and postmodernist conceptions of the self, and the importance of cultural influence. Changes in the nature and phenomenological experience of the self as a function of historical periods. Prerequisites: 1, 10, 70.
3 units (Stein) not given 1999-2000

160. Culture and Self—See 226. Prerequisites: 1, 10, 70.
3 units, Win (Markus) alternate years, not given 2000-01

161. Cultural Psychology—The cultural sources of diversity in thinking, emotion, motivation, self, personality, morality, development, and psychopathology. Prerequisite: 1 or equivalent. GER:4a (DR:2)
5 units (Markus) not given 1999-2000

162. Psychology of Gender—Research and theory on the socialization and psychological development of women and men. The biological, cultural, and social factors that influence gendered behavior. GER:4e (DR:4)
4 units (Carstensen) not given 1999-2000

163. The Interpersonal Basis of Abnormal Behavior—The role of interpersonal problems and processes in producing different forms of psychopathology, from neurotic reactions to schizophrenia. Combine clinical (case study) approach with conventional empirical approaches to clarify the origin, nature, and treatment of emotional disorders. Prerequisite: 90.
3 units (Horowitz) not given 1999-2000
1-3 units (Eberhard) alternate years, given 2000-01

165. Peace Studies—(Same as Political Science 133.) Interdisciplinary, dealing with the challenges of pursuing peace in a world where the sources of conflict are many, and regional, ethnic, and religious antagonisms are rising. The art of creating and maintaining peace is analyzed from historical, social, psychological, and moral perspectives. Goals: illustrate the current and potential contributions of various academic disciplines and critical analyses to the study of peace; and to prepare students to think critically and to act responsibly and effectively on behalf of peace. Eight sections: challenges, enemies, theoretical understandings, justice, security, non-violence, public peace processes, peace and you. Seminar format once a week. Limited enrollment. GER:3b (DR:9)
3 units, Spr (Bland, Ross, Holloway)

166. Seminar on Personal and Social Change—Analysis of the social cognitive approaches to personal and social change. Applications of sociocognitive theory to the modification of psychological dysfunctions in familial, educational, medical, and organizational settings. Ethical and value issues in behavior change.
3 units (Baudena) not given 1999-2000

167. Seminar on Aggression—Analysis of the causes and modification of individual and collective aggression. Major issues in aggression: social labeling of injurious conduct, social determinants of aggression, effects of the mass media, institutionally sanctioned violence, terrorism, psychological mechanisms of moral disengagement, modification of aggressive styles of behavior, and legal sanctions and deterrence doctrines.
3 units, Win (Bandura)

3 units, Aut (Gross)

170. Seminar on the Psychology of Gender—(Graduate students register for 238.) In-depth coverage of a specified topic related to the psychology of gender. Prerequisite: 162.
3 units (Carstensen) not given 1999-2000

171. Research Seminar on Aging—Two-quarter practicum exposes students to multiple phases of research by participating in a laboratory focusing on social behavior in adulthood and old age. Review of current research and participation in ongoing data collection, analysis, and interpretation. Prerequisites: 1, research experience, and consent of instructor.
4 units, Aut, Win, Spr (Carstensen)

174. African American Psychology—Introduction to ethnic psychology, specifically, the psychological dimensions of the Black experience in America. Lectures and readings. Black psychology from its evolution as a concentration area in the social sciences to present concerns that impact Black Americans' mental health. Students are encouraged to expand on the methodological constructs employed in the study of Black Americans.
3 units, Aut (McCants)

175. Seminar on Topics in Identity Development—Issues affecting identity development from adolescence through adulthood. Lectures/discussion. Topics: the effect of group dynamics on identity; the impact of social factors such as racism, stereotypes, and culture; how a person's identity affects education and self-esteem.
3 units (McCants) not given 1999-2000

176. Carl Jung and Analytical Psychology—Introduction to the person of Jung, his seminal philosophical perspectives, and their impact on modern thought and life. The formation of analytical psychology with regards to Jung's past relationship with Freud and later emergence as a prominent 20th-century thinker. Emphasis is on the archetypal themes of the shadow, animas/animus (feminine/masculine) and puer/senex (youth/elder). The function of dreams and the interplay between the Jungian paradigm and spirituality.
4 units, Aut (Daher)

178. Stigma and Marginality—See 263.
3 units, Win (Eberhard) alternate years, not given 2000-01

180. Social Psychological Perspectives on Stereotyping and Prejudice—Classic and contemporary social psychological approaches to prejudice and stereotyping. Emphasis is on how stereotypes are employed and maintained; and the influence of stereotyping and prejudice on behavior in a variety of domains including education, employment, politics, and law. Limited enrollment. Prerequisites: 1, 10, and 70.
4 units (Eberhard) alternate years, given 2000-01

182. Misunderstanding, Conflict, and Dispute Resolution—See 256.
3 units, Win (Ross, Curhan)

2 units, Spr (Markus, Ross)

194. Reading and Special Work—Independent study. Can be repeated for credit. Prerequisite: consent of instructor.
1-3 units, any quarter (Staff)

195. Special Laboratory Projects—Independent study. Can be repeated for credit. Prerequisites: 1, 101, and consent of instructor.
1-6 units, any quarter (Staff)

196. Contemporary Psychology: Overview of Theory, Research, Applications—For junior and senior psychology majors. The state of the field of psychology in each of the primary areas represented by the department; psychobiology, cognitive neuroscience, cognitive science, developmental psychology, personality and abnormal psychology, and social psychology. Faculty in each area present an overview of current theory, research, and applications in their domain of expertise during weekly lectures, integrating the wide range of knowledge majors have gathered from their more specialized course work. Discussion sections.
3 units, Aut (Zimbardo)

197. Advanced Research—Limited to students in senior honors program. Weekly research seminar, independent research project under the supervision of an appropriate faculty member. A detailed proposal is submitted at the end of Autumn Quarter. Research continues during Winter and Spring Quarters as Senior Honors Research. A report demonstrating sufficient progress is required at the end of Winter Quarter.
1-4 units, Aut (Thomas)

198. Senior Honors Research—Limited to students in the senior honors program. Work includes finishing the research and data analysis, written dissertation, and presentation at the Senior Honors Convention.
1-4 units, Win, Spr (Thomas)

199. Psychological Aspects of Addiction—The medical, psychological, and social issues involved with alcohol and drug abuse and dependence. Students are presented with the etiological theories and psychological perspectives on addiction. Limited enrollment.
3 units, Aut (Matano)

PRIMARILY FOR GRADUATE STUDENTS
Undergraduate students admitted only by consent of instructor.

mechanisms of: vision, attention, memory, language, motor control, emotion, and consciousness. Prerequisite: 207 or consent of instructor. 3 units, Spr (Heeger, Wandell, Gabrieli)

203. Foundations of Vision—The quantitative behavioral and neural aspects of human vision. Image formation by the eye, retinal sampling and wavelength encoding, neural encoding within the retina and cortex; performance measures including spatial contrast sensitivity, localization, color sensitivity, multiresolution representations of image data; color, motion, and depth perception. 1-3 units, Wandell alternate years, given 2000-01

205. Foundations of Cognition—Advanced survey of cognitive psychology and cognitive science. Major topics: perception, imagery, attention, memory, similarity, categories and concepts, learning, reasoning, judgment, planning, problem solving, language, morality. Central themes: computation, representation, the mind and the brain, modularity, evolution and adaptation, uncertainty. Is the core of cognition learned or innate? Conscious or unconscious? Symbolic or subsymbolic? Rational or irrational? Prerequisite: 207 or consent of instructor. 1-3 units, Aut (Tenenbaum)

206. Behavioral Neuroscience—The biological substrates of behavior, emphasizing topics currently being investigated by resident and visiting neuroscientists at Stanford. Possible topics: neuroanatomical and neurophysiological aspects of vision; audition; motor control, learning, and memory; and hormonal and neurochemical aspects of stress and motivation. 1-3 units, Wandell, Wine alternate years, given 2000-01

207. Proseminar for First-Year Graduate Students—Required of and limited to first-year graduate students in psychology. Survey of major issues in contemporary psychology with their historical backgrounds. 2-3 units, Aut (Steele)

210. Memory and Learning—Major topics in human memory, emphasizing information-processing approaches to short-term memory, organization and long-term memory, forgetting, retrieval processes, prose memory, imagery, emotional memory, autobiographical memory, and memory and hormonal neurochemical aspects of stress and motivation. Prerequisite: graduate standing in psychology or consent of instructor. 4 units, Aut (Bower)

211. Developmental Psychology—Prerequisite: 207 or consent of instructor. 1-3 units, Win (A. Fernald, Flavell)

212. Social Psychology—Prerequisite: 207 or consent of instructor. 1-3 units, M. Lepper, Ross not given 1999-2000

213. Personality—Survey of theory and research in personality. Prerequisite: 207 or consent of instructor. 3 units, Spr (Carstensen)

214. Psycholinguistics—Prerequisite: graduate standing in Psychology or consent of instructor. 1-3 units, Spr (H. Clark)

215. Mind, Culture, and Society—Social psychology from the context of society and culture. Focus: interdependence of psychological and sociocultural processes; how sociocultural factors shape psychological processes; how psychological systems shape sociocultural systems. Conceptualizations of the interdependence of psychological processes and sociocultural context. Use of theoretical developments to understand social issues, problems, and policy. Works of Baldwin, Mead, Asch, Lewin, Burner, and contemporary theory and empirical work on the interdependence of psychology and social context as constituted by gender, ethnicity, race, religion, region of the country, and part of the world. Prerequisite: 207 or consent of instructor. 3 units, Win (Markus, Steele)

217. Graduate Seminar: Special Topics in Early Social Development—Considers long-standing and newer issues in the study of socioemotional development from infancy through middle childhood. Topics: relationships as contexts for social development, universal vs. culturally specific socialization practices, secular influences and changing cultural norms, biological underpinnings of social relationships, social development as the product of gene-environment processes, origins of social knowledge as the basis for emotion regulation, best methods for the study of social development. During each weekly meeting, participants discuss assigned readings and meet with a guest scientist to learn about their current programs of research in social development. Prerequisites: 211 or 212, consent of instructor. 1-3 units, Aut (Lepper)

218. Graduate Seminar in Social Cognition—(Undergraduates register for 164.) Critical overview of social cognition research and theory. Topics: attribution theory, social categories and schemas, social encoding, person memory, affect, attitudes and behavior. Prerequisite: graduate standing in psychology or consent of instructor. 1-3 units, Eberhardt alternate years, given 2000-01

219. Graduate Seminar on Selected Topics in Cognition—Prerequisite: consent of instructor. 1-3 units, Tversky not given 1999-2000

220. Graduate Seminar: Special Topics in Cognitive Development—Prerequisite: graduate standing in psychology or consent of instructor. 1-3 units, Markman not given 1999-2000

221. Applied Vision and Image Systems—Lectures/demonstrations illustrate the design and control of color imaging devices (display, printers, cameras, and scanners). Aspects of human vision relevant to software and hardware design. Topics: digital halftoning, color calibration, color metrics, flicker sensitivity, motion compensation, human spatial resolution, visual masking, JPEG principles, printer design, scanner design, color software architecture. 1-3 units, Win (Wandell)

222. Graduate Seminar in Cognitive Neuroscience—(Undergraduates register for 123.) For students who are already or planning to become involved in research. Critical reviews of theory and ongoing research in human cognitive neuroscience. Prerequisite: consent of instructor. 1-3 units, Aut, Win, Spr (Gabrieli)

223. Psychological Perspectives on the Self—See 159. 1-3 units, Spr (Steele) not given 1999-2000

224. Learning and Inference in Humans and Machines—The connections between computational modeling and experimental studies of learning and inference in several cognitive domains: perception, concepts and categorization, inductive reasoning, causal reasoning. Probabilistic models and statistical inference are unifying themes. Goals: reach a better understanding of human learning in computational terms and bring computational systems closer to the capacities of human learners. Lectures/discussion, with supplementary computer assignments. Final modeling project or paper. Prerequisite: consent of instructor. 1-3 units, Spr (Tenenbaum)

225. Cognition and Aging—See 136. 1-3 units, Spr (Steele)

226. Culture and Self—(Undergraduates register for 160.) Recent perspectives on the nature and functioning of self; anthropological and psychological literature on the self in various cultural contexts; and the
consequences of variation in selfhood for cognition, learning, emotion, motivation, and psychopathology.

1-3 units, Win (Markus) alternate years, not given 2000-01

238. Ion Transport and Intracellular Messengers—See 121.
1-3 units, Spr (Wine)

231. Graduate Seminar: Self-Efficacy—The origins, mediating mechanisms, and diverse effects of people's beliefs in their efficacy to exercise control over events in their lives. Alternative theories of perceived control; the nature and structure of self-efficacy belief systems; major sources of efficacy beliefs; the processes through which they affect human functioning; developmental analysis of efficacy beliefs over life course; the application of self-efficacy theory to cognitive development, health functioning, clinical dysfunctions, organizational functioning, and athletic performance; the exercise of collective efficacy to accomplish social change.
1-3 units, Spr (Bandura)

233. Counseling Theories and Interventions from a Multicultural Perspective—(Enroll in Education 233A.)
3 units (LaFromboise) not given 1999-2000

234. Selected Topics in Affective Disorders—(Undergraduates register for 154.) Current research topics in the study of affective disorders. Topics: epidemiology and phenomenology of affective disorders, psychological theories of depression, gender differences in affective disorders, cognitive and social functioning of depressed persons, psychobiology of affective disorders, depression in children, postpartum depression, suicide issues in the treatment of depression, and cultural aspects of affective disorders. Prerequisite: graduate standing in psychology or consent of instructor.
1-3 units, Spr (Gotlib)

235. Psychology and American Indian Health—(Enroll in Education 340X.)
3 units (LaFromboise) not given 1999-2000

236. Seminar on Psychophysiology—(Undergraduates register for 124.) Overview of psychophysiology, the empirical study of mind-body relations. Focus is on two response systems (electrodermal and cardiovascular) and applications to lie detection, emotions, and health. Critical thinking skills are emphasized; hands-on lab.
4 units (Gross) not given 1999-2000

237. Career and Personal Counseling in Culturally Diverse Settings—(Same as Education 234.) Methods of integrating career and personal counseling with clients and counselors from differing backgrounds. Practice with selected assessment instruments. Cases studies of bicultural role conflict. Informal supervised experience.
3 units, Aut (Krumboltz)

238. Seminar on the Psychology of Gender—See 170. Prerequisite: graduate standing in psychology.
1-3 units (Carstensen) not given 1999-2000

240. Language Acquisition I—(Enroll in Linguistics 240.)
4 units, Aut (E. Clark)

241. Language Acquisition II: Lexicon and Syntax in Acquisition—(Enroll in Linguistics 241.)
1-4 units, Win (E. Clark)

242. Conceptual Organization and Development—(Undergraduates register for 144.) Theories and research in conceptual organization and development, critically evaluated. Topics: the acquisition of categories and category terms informed by the general problem of induction, by philosophical and psychological analyses of the nature of human categories (natural kind terms, family resemblances), by recent arguments how the acquisition of category terms is guided by constraints children place on possible word meanings, and by more traditional theories of cognitive development. Prerequisite: graduate standing in psychology or consent of instructor.
1-3 units (Markman) not given 1999-2000

243. General Development Seminar—Prerequisite: consent of instructors.
1-2 units, Aut (A. Fernald, Flavell)

244. The Psychology of Aging—Critical examination of theory and research in gerontology. Normal and abnormal changes that occur in biological, cognitive, and psychological aging. Emphasis is on the environmental factors that influence the aging process. Prerequisite: graduate standing in psychology or consent of instructor.
1-3 units (Carstensen) not given 1999-2000

245. Social Psychological Perspectives on Stereotyping and Prejudice—Classic and contemporary social psychological approaches to prejudice and stereotyping. Emphasis is on how stereotypes are employed and maintained; and the influence of stereotyping and prejudice on behavior in a variety of domains including education, employment, politics, and law.
3 units, Aut (Eberhardt) alternate years, not given 2000-01

246. Perception Lecture Series—Current research topics in perceptual psychology, visual neuroscience, machine vision, and image processing. Speakers from research institutions in the Bay Area and around the world. Prerequisite: 203.
1 unit, Win, Spr (Heeger)

248. Introduction to Test Theory—(Enroll in Education 252.)
3-4 units, Spr (Haertel)

249A. Problems in Measurement: Item Response Theory—(Enroll in Education 353A.)
3 units (Haertel) not given 1999-2000

252. Statistical Methods for Behavioral and Social Sciences—(Undergraduates register for 103.) For students who seek experience and advanced training in empirical research. Analysis of data from experimental through factorial designs, randomized blocks, repeated measures; regression methods through multiple regression, model building, analysis of covariance; categorical data analysis through two-way tables. Integrated with the use of statistical computing packages. Prerequisite: 10 or equivalent. (PSE)
1-6 units, Aut (Thomas)

253. Statistical Theory, Models, and Methodology—(Undergraduates register for 103.) Practical and theoretical study of advanced data analytic techniques such as loglinear models, signal detection, meta-analysis, logistic regression, reliability theory, and factor analysis. Prerequisite: 252 or Education 257.
1-3 units, Win (Thomas)

255. Graduate Seminar: Selected Topics in Personality and Abnormal Psychology—Prerequisite: consent of instructor.
1-3 units, Aut, Win, (Horowitz)

256. Misunderstanding, Conflict, and Dispute Resolution—(Undergraduates register for 182.) Discussion of contemporary theory and research on interpersonal and intergroup conflict and misunderstanding, emphasizing barriers to dispute resolution and methods for overcoming them. Additional topics: game theory, bargaining and negotiation, and second-track diplomacy.
3 units, Win (Ross, Curhan)

257. Individually Supervised Practicum—Relevant teaching experience for graduate students as part of their program of study. Can be
258. Graduate Seminar in Social Psychology Research — For students who are already or are planning to become involved in research on social construal and the role that it plays in a variety of phenomena, notably the origin and escalation of conflict.
1-3 units, Aut, Win, Spr (Zajonc)

1-3 units, Aut (Zajonc) alternate years, not given 2000-01

260. Memory Systems — Recent findings indicate different kinds of memory are mediated by separable neural networks. Different patterns of memory failures are seen in a variety of neurological disorders and in terms of functional consequences for normal memory, such as unconscious learning. Prerequisites: 50, 201, or consent of instructor.
1-3 units (Gabrieli) not given 1999-2000

261. Psychology of Problem Solving and Reasoning — (Same as Education 295.) Introduction to the results and methods of research on the cognitive processes of solving problems and reasoning. Focus is on the accomplishments and limitations of research conducted since 1970, including views of cognition as situated activity.
3 units (Greeno) not given 1999-2000

262. Stigma and Marginality — (Undergraduates register for 178.) The perceptions and strategies of the targets of prejudice and discrimination, with emphasis on race and ethnicity. Topics: social perceptions and the judgments of targets, racial identity, behavioral consequences of prejudice and discrimination, and legal/policy implications. Readings from social psychology, African-American studies, sociology, and law. Limited enrollment.
3 units, Win (Eberhardt) alternate years, not given 2000-01

263. Selected Topics in Human Learning — Recent empirical and theoretical analyses of verbal learning, learning from text, learning of concepts, and intellectual skills. Emphasis is on information processing theories of memory and retrieval. Readings from recent research journals with topics determined partly by students' interests. Discussion format. Prerequisite: 210 or consent of instructor.
1-3 units, Win (Bower)

264. Vision and Image Processing — Introduction to image processing through a combination of lectures and hands-on experience in a computer lab. Topics: image representation, sampling and filtering, image segmentation and mosaicing, image warping and morphing, motion analysis, image statistics, restoration, synthesis, and compression.
1-3 units (Heeger) alternate years, given 2000-01

265. Graduate Seminar in Personality Research — Can be repeated for credit. Prerequisite: graduate standing in psychology.
1-2 units, Aut, Win (Horowitz)

266. Applications of Social Psychology — See 156.

267. Special Topics in Psycholinguistics — May be repeated for credit. Prerequisite: consent of instructor.
1-3 units, Win (H. Clark)

268. Graduate Research — Intermediate-level research undertaken with members of departmental faculty. Prerequisite: consent of instructor.
1-15 units (Staff)

269. Computational Neuroscience — Introduction to computational neuroscience: the biophysics of computation; models of vision, audition, learning, and development; self-organizing networks. Emphasis is on theoretical and computational models and how to construct models of neurons and neural systems.
1-3 units (Heeger) alternate years, given 2000-01

270. Seminar on Emotion — (Undergraduates register for 169.) Overview of the scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas.
1-3 units, Aut (Gross)

1-3 units (Steele) not given 1999-2000

272. Doctoral Research — For dissertation. Prerequisite: consent of instructor.
1-15 units (Staff)

273. Practicum in Teaching — Enrollment limited to students serving as teaching assistants in selected psychology courses. Can be repeated for credit.
3-5 units, Aut, Win, Spr (Staff)

274. Interdisciplinary Seminar on Conflict Resolution — (Same as Economics 386, Engineering-Economic Systems and Operations Research 489, Law 611.) Addresses problems of conflict resolution and negotiation from an interdisciplinary perspective. Presentations by faculty and by scholars from other universities.
1-2 units, Win (Alexander, Arrow, Ross, Wilson)

275. Careers in Psychology: Academic and Applied — (Undergraduate students register for 193.) Intended for graduate students and advanced undergraduates who want an opportunity to meet with people who have undertaken academic and nonacademic careers. Speakers discuss their experiences and reflect on their careers and ways in which their graduate and undergraduate education prepared or failed to prepare them for their careers. (AU)
2 units, Spr (Markus, Ross)

276. Methods in Personality and Social Psychology — Focus is on developing and consolidating a set of methodological skills in personality and social psychology and in allied disciplines (sociology, education, and communication). Experimental survey and multivariate methods. Topics: formulating the research problem, experimental and quasi-experimental design, going from abstract ideas to concrete instances, measuring and analyzing change data, observational techniques, handling research artifacts, professional and ethical issues, triangulation, archival and co-relational studies, validity and reliability of measurement, organizing data. Practicum format; students develop a real research proposal.
1-3 units (Staff) not given 1999-2000

277. Seminar for Coterminal Masters' Students — Discussion of contemporary issues and student research. Student and faculty presentations.
1 unit, Aut, Win, Spr (Ross)

278. Contemporary Topics in Social Psychology — Limited to graduate students in social psychology. In-depth analysis of selected issues in contemporary life understood from various social psychological theories and perspectives. Prerequisites: 207, 212.
2-4 units (Zajonc, Zimbardo) alternate years, given 2000-01
Director: Roger Noll  
Associate Director: David Brady (Political Science, Business)  
Affiliated Faculty: Lucius Barker (Political Science), Donald Barr (Human Biology, Jonathan Bendor (Business), Coit Blacker (Institute for International Studies), Timothy Bresnahan (Economics), John Cogan (Hoover Institution), Andrew Creighton (Sociology), Morris Fiorina (Political Science, Hoover), Lawrence Gould (Economics), Mark Hlatky (Health Research and Policy), Daniel Kessler (Business), Michael Kirst (Education), Anne Krueger (Economics), Thomas Macurdy (Economics), Mark McClellan (Economics), Robert McGinn (Science, Technology, and Society), Milbrey McLaughlin (Education), Terry Moe (Political Science), Susan Okin (Political Science, Susan Olizak (Sociology), Leonard Ortolano (Civil and Environmental Engineering), A. Mitchell Polinsky (Law), Nathan Rosenberg (Economics), Geoffrey Rothwell (Economics), Debra Satz (Philosophy), W. Richard Scott (Sociology), Myra Streber (Education), James Sweeney (Engineering-Economic Systems and Operations Research), Barton Thompson (Law), Nancy Tuma (Sociology), Barry Weingast (Political Science), Frank Wolak (Economics), Carolyn Wong (Political Science)  
Lecturers: Roger Printup, Timothy Stanton, Patrick Windham  
Acting Assistant Professor: Scott Wallsten

Government plays an important, ubiquitous role in contemporary society. Moreover, the growing complexity of public policies, the political processes that give rise to them, and the organizations that implement them have created a need in government, business, and the nonprofit sector for people who understand how government operates. The Public Policy Program provides students the foundational skills and institutional knowledge necessary for understanding the policy process, and provides an interdisciplinary course of study in the design, management, and evaluation of public sector programs and institutions. The major in Public Policy is useful as preparation for employment as an analyst in government agencies or business, as a foundation for postgraduate professional schools in business, education, law, and public policy, and as preparation for graduate study in the social sciences, especially economics, political science, and sociology.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The core courses in the Public Policy Program develop the skills that are necessary for understanding the political constraints faced by policy makers, assessing the performance of alternative approaches to policy implementation, evaluating the effectiveness of policies, and appreciating the sharp conflicts in fundamental human values that often animate the policy debate. After completing the core, students apply these skills by focusing their studies in one of several areas of concentration. The areas of concentration may deal with a specific field of public policy, with types of institutions, or with deeper development of the tools of policy analysis. A list of recommended courses for each concentration is available in the Public Policy Program office. Areas of concentration are:

- Advanced Methods of Policy Analysis
- Business Policies
- Design of Public Institutions
- Development and Growth Policies
- Education
- Environment, Resources, and Population
- Health Care
- International Policies
- Law and the Legal System
- Science and Technology Policy
- Social Policy: Discrimination, Crime, Poverty
- Urban and Regional Policy

Completion of the program in Public Policy requires 88 units of course work:

1. Forty-five units of prerequisite courses: For students who declared the major by the Autumn Quarter, 1998, these courses are: Political Science 1 or 10; Economics 1, 51, 52, 80, 102; Sociology 160 or Industrial Engineering 100; and sufficient calculus to satisfy the prerequisites of Economics 51 (that is, Mathematics 51, Economics 50, or Economics 180). For students who declared after Autumn Quarter, 1998, or who wish to satisfy the new prerequisites, these courses are: Political Science 1 or 10; Economics 1, 50, 51, 52, 80, and 102; Sociology 160 or Industrial Engineering 100; and either Mathematics 19 or 20, or 41. In addition, students are encouraged to take at least one course in linear algebra.

2. The 25-unit sequence of 5-unit core courses, which students should plan to complete by the end of their junior year (see below for descriptions 101-105). To satisfy the core requirement in Organizations, students may take Public Policy 102A or 102B, and to satisfy the core requirement in Philosophy students may take Public Policy 103A or 103B.

3. During the senior year, majors must complete 15 units of course work in a problem-focused area. The 15 units of post-core course work must be approved by an adviser, who is appointed when the student selects an area of concentration. This usually is done midway through the junior year, and must be done no later than the end of the second week of Autumn Quarter in the senior year.

4. Seniors are required to participate in one quarter of the Senior Seminar (Public Policy 200). Majors also must submit at least one research paper during the senior year and present it before the Senior Seminar. The senior paper may be a term paper for either the senior seminar or another course, or an honors thesis.

5. A maximum of 10 units may be taken on a satisfactory/no credit basis in the prerequisite courses for the Public Policy core. All courses required for Public Policy majors must be taken for a letter grade.

6. Students must complete the Public Policy core and their concentration area courses with a grade point average (GPA) of 2.0 or higher.

7. To become a major in Public Policy and to be nominated for the A.B. degree, students must complete an application, available in Building 60, room 61B. For additional information, drop by or phone (650) 723-3452.

The Public Policy Program offers a two-quarter course sequence to prepare students for making effective academic use of an internship (Public Policy 182A and B). Students may also participate in the Integrated Scholar Intern Program, combining directed reading and research with an internship.

MINORS

The Public Policy Program offers a minor that is intended to provide students with interdisciplinary training in applied social sciences. Students who pursue the minor are required to take at least three of the five core courses, and a total of 35 units in Public Policy and its supporting disciplinary departments. Because University rules prohibit double-counting of courses, the requirements for a minor differ according to the student’s major requirements.

For students whose major department or program requires no courses in economics, political science, or sociology, the requirements for a Public Policy minor are:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics 1, 50, 51; Public Policy 104</td>
<td>20</td>
</tr>
<tr>
<td>Public Policy 101 or 102</td>
<td>5</td>
</tr>
<tr>
<td>Sociology 160 or Industrial Engineering 100; Public Policy 102</td>
<td>10</td>
</tr>
</tbody>
</table>

For students who are Economics majors or who satisfy a major requirement by taking Economics 51, but no courses in political science, the requirements for a Public Policy minor are:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Political Science 1 or 10; Public Policy 101</td>
<td>10</td>
</tr>
<tr>
<td>Public Policy 103</td>
<td>5</td>
</tr>
<tr>
<td>Public Policy 104</td>
<td>5</td>
</tr>
<tr>
<td>Public Policy 105</td>
<td>5</td>
</tr>
<tr>
<td>Sociology 160 or Industrial Engineering 100; Public Policy 102</td>
<td>10</td>
</tr>
</tbody>
</table>

For students who are Political Science majors or who satisfy a major requirement by taking either Political Science 1 or 10, but no courses in Economics, the requirements for a Public Policy minor are:
Economics 1, 50, 51; Public Policy 104 20
Public Policy 103 5
Sociology 160 or Industrial Engineering 100; Public Policy 102 10
Public Policy 104 5

For Sociology majors, the requirements for a Public Policy minor are:
Economics 1, 50, 51; Public Policy 104 20
Political Science 1 or 10; Public Policy 101 10
Public Policy 103 5

For students who major in another interdepartmental program (such as International Relations) and who satisfy major requirements by taking both Economics 51 and Political Science 1 or 10, the requirements for a Public Policy minor are:
Economics 102; Public Policy 105 10
Public Policy 101 5
Public Policy 103 5
Public Policy 104 5
Sociology 160 or Industrial Engineering 100; Public Policy 102 10

HONORS PROGRAM

The Public Policy Program offers students the opportunity to pursue honors work during the senior year. In order to graduate with honors in Public Policy, a student must:

1. Apply for admission to the honors program no later than the end of the second week of Autumn Quarter of the senior year.
2. Complete the requirements for the A.B. in Public Policy and achieve a grade point average (GPA) of 3.3 in the following courses: the Public Policy core, the student’s concentration area courses, the Senior Seminar, and Public Policy 199 (senior research). Courses not taken at Stanford are not included in calculating the GPA.
3. Enroll in at least 8 but no more than 15 units of Public Policy 199 during the senior year and receive a final grade on the senior thesis of at least a ‘B+.’

Students who intend to pursue honors work should plan their academic schedules so that most of the core courses are completed before the beginning of the senior year, and all of the core and concentration courses are completed by the end of Winter Quarter of senior year. This scheduling gives students both the time and the necessary course background to complete a senior research project in Spring Quarter. In addition, juniors who may wish to pursue a senior thesis are encouraged to enroll in Public Policy 197 (Junior Honors Seminar) during Winter Quarter. This course focuses on developing a research plan and the research skills necessary to complete a thesis.

To apply, a student must submit a completed application to the Public Policy Program office with a brief description of the thesis. The student must obtain the sponsorship of a faculty member who approves of the thesis description and who agrees to serve as a thesis adviser. Students intending to write a thesis involving more than one discipline may wish to have two advisers. To be admitted to the honors program, students must:

1. Submit a completed application for honors work to the Public Policy Program office by the end of the second week of Autumn Quarter of the senior year.
2. Achieve a GPA of at least 3.3 in Public Policy courses by the end of the junior year.

The honors thesis must be submitted to both the thesis adviser and the Public Policy Program office. Graduation with honors requires that the thesis be approved by both the adviser and the Director of the Public Policy Program. The role of the director is to assure that the thesis deals with an issue of public policy and satisfies the standards of excellence of the program. However, the grade for the honors thesis is determined solely by the adviser. The thesis adviser sets the deadlines for receiving the final draft of the thesis; the director sets the deadline for theses to be considered for University and department awards. In order to graduate with honors at the Spring commencement, a student must submit a final bound copy of the thesis to the Public Policy Program office no later than Friday, June 2. In order to be considered for awards given to outstanding senior theses, a student must submit a copy of the thesis to the Public Policy Program office no later than Wednesday, May 17.

Members of the core faculty in Public Policy are listed above and are available to provide assistance in selecting a senior thesis topic. For additional information, contact the Public Policy Program office.

COURSES

(WIM) indicates that the course meets the Writing in the Major requirements.

3 units, Spr (Noll)

101. Politics and Public Policy—(Same as Political Science 101P.) The domestic policy-making process, emphasizing how elected officials, bureaucrats, and interest groups shape government policies in various areas including tax, environmental, and social-welfare policy, given their goals and available tactics. How public policies are formulated and implemented. The results of this process using equity and efficiency criteria. Prerequisite: Political Science 1 or 10.
5 units, Spr (Staff)

102A. Organizations and Public Policy—(Same as Sociology 166/266.) Concepts and methods for analyzing the influence of organizations on the setting and implementation of public policy. Varying conceptions of organizations as corporate actors and as social contexts. The roles of organizations in relation to public policy; organizations as decision makers and problems solvers, as change agents, and as clients. Prerequisite: Sociology 160 or Industrial Engineering 100. GER:3b (DR:9)
5 units, Win (Creighton)

102B. Organizations and Public Policy—Analysis of public organizations, stressing problems of effective management and incentives in a non-market environment. Prerequisite: Sociology 160, or Industrial Engineering 100.
5 units, not given 1999-2000

103A. Introduction to Political Philosophy/Theory—(Same as Philosophy 30.) Critical introduction to issues of state authority, justice, liberty, and equality. The issues are approached through major works in political philosophy. Topics: human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion and politics. Readings: Aristotle, Locke, Rousseau, Mill, Marx, Rawls, the U.S. Constitution, some Supreme Court cases. GER:3a (DR:8)
5 units, Aut (Okin)

103B. Ethics and Public Policy—(Same as Science, Technology, and Society 110.) Ethical issues in science- and technology-related public policy conflicts. Develops the capacity for rigorous critical analysis of complex, value-laden policy disputes. Topics: the nature of ethics and morality; the natures of and rationales for liberty, justice, and human rights; and the use and abuse of these concepts in recent and current policy disputes. Cases from: biomedicine, environmental affairs, the technical professions, communications, and international relations. GER:3a (DR:8)
5 units, Win (McGinn)

104. Economics and Public Policy—(Same as Economics 150.) The relationship between macroeconomics and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Readings: theoretical foundations of policy making and analysis, and applications to the adoption and implementation of
105. Quantitative Methods and their Application to Public Policy—
Applications of statistical methods, rather than methodology per se. Risk
assessment in the evaluation of biohazards and medical technologies and
technologies; comparisons of such information-gathering techniques as
surveys, experiments, or simulation studies; methods of expressing and
evaluating uncertainty; and the interpretation of such quantitative tech-
niques of data analysis as regression. Prerequisites: Economics 80 and
102.  
5 units, Spr (Rothwell)

160. Comparative West European Institutions—(Same as Interna-
tional Relations 160, Political Science 120A.) How institutions shape
politics and policies in Western Europe. Electoral laws, parliamentary
systems, and government institutions at the national level influence the
quality and nature of representation, political competition, and policy
outcomes. Institutional developments at the subnational level and within
the European Union challenge the domestic politics and policies of the
European nation states.  
5 units, Win (Alter)

161. Comparative Political Economy of Post-Socialist Transitions—
(Same as International Relations 161, Political Science 121A.) The post-
Socialist economic and political transitions ongoing in Eastern Europe
and the former Soviet Union, investigating attempts to build market
economies and democratic governments. The politics of constitutional
choice and variation in reform strategies and outcomes across the cases.
5 units, Spr (Alter)

182A,B. Policy Making and Problem-Solving at the Local and
Regional Level—In an era of devolution and calls for "integrated
service-provision," much innovative policy formulation and implement-
tion takes place at the local and regional level. The theory and practice
of these processes, focusing on Silicon Valley as a case study. The social,
institutional, and organizational landscape within metropolitan regions,
and theories of metropolitan politics; alternative theories of community
and economic development; collaboration as an approach to policy-
making and problem-solving. Weekly seminars; a speaker series; and
internships with collaborative community and economic development
efforts in Silicon Valley. Enroll both quarters. Prerequisite: consent of
instructor after formal application.  
5 units, Win, Spr (Stanton)

185. Managing Public Policy—The role of public administration in
contemporary government. Major issues: administrative structure, con-
trol, relations with other branches of government, the problems of
internal organization and management, methods of innovation and
change, budgeting, and personnel. Prerequisite: course in American
politics.  
5 units, Spr (Printup)

191. Business Skills for the Social Sector—Recommended for students
taking 192. Introduces core concepts in marketing, financial decision
making, organizational effectiveness, operations management, and strat-
yey. Focus is on the adaptation of these concepts for use in the social
sector, exploring the limits of using business-based methods to serve
social objectives. Conceptual articles and some case studies. Prerequi-
tites: Economics 1, junior or senior standing.  
4 units, Win (Dees)

192. Social Entrepreneurship—The search for innovative responses to
social needs, the role of private initiatives, for-profit and not-for-profit,
and the challenges associated with these initiatives. Theoretical issues:
defining the social good and assessing the role of market forces, philan-
thropy, and government. Practical issues: recognizing specific opportu-
nities for social improvement, forming an enterprise that responds to
these opportunities, developing organizational and funding strategies,
evaluating performance, managing the enterprise, and creating sustained
positive impact. Readings: business school cases and a range of theoretical
and practical articles. Prerequisites: Economics 1, junior or senior
standing.  
5 units, Spr (Oll)

194. Technological Policy—The evolution of U.S. technology policy
and the way in which policy is made. Students rigorously analyze
technology policy issues. Topics: federal technology policy before and
after WW II, the debate over using R&D programs and other measures
to promote economic growth and competitiveness, the impact of federal
policy on the development of the Internet and biotechnology, and nuclear
waste disposal and genetic privacy as examples of controversies over the
environmental and social impact of technological activities. Prerequi-
ties: Economics 1 and Political Science 1 or 10.  
5 units, Win (Windham)

195. Business and Public Policy—The multi-faceted relationships
between business, government, and interest groups, with emphasis on
companies and interest groups as strategic actors in the "nonmarket
environment." Companies attempt to shape public policy through gov-
ernment processes and international politics; interest groups attempt to
shape public policy through government processes and by exerting direct
influence on businesses; politicians attempt to mediate conflicts of
interest between and among businesses and interest groups. Each rela-
tionship transcends the conventional view of a business as an exclusively
or predominantly market focused entity that takes as given government
actions and ignores interest groups and their collective actions. Modules:
media and private collective action, business strategies in government
arenas, international business and the nonmarket environment, and
corporate responsibility and ethics.  
5 units, Spr (Wiseman)

196. The Political Economy of the Federal Budget—Applies the tools
of economic analysis to study how the federal government makes its
budgetary decisions. The factors that have contributed to the growth in
federal spending, taxation, and the national debt; congressional and
executive branch budget processes and their effects on government
policymaking; spending programs (Social Security, Medicare, welfare,
and infrastructure programs), Prerequisites: Economics 51,52 (Econom-
ics 52 may be taken concurrently).  
5 units, Win (Cogan)

197. Junior Honors Seminar—Primarily for students who expect to
write an honors thesis. Weekly sessions discuss writing an honors thesis
proposal (prospectus), submitting grant applications, and completing the
honors thesis. Readings focus on writing skills and research design.
Students select an adviser, outline a program of study for their senior
year, and complete a prospectus by the end of the quarter. Seniors
working on their theses also may enroll and present their research to
the seminar participants. Seniors are required to make substantial progress
on their thesis by the end of the quarter.  
3 units, Win (Rothwell)

198. Directed Readings in Public Policy
1-5 units (Staff)

199. Senior Research
1-15 units (Staff)

200A,B,C. Senior Seminar—Designed to give Public Policy students
the opportunity to make oral presentations and to write a seminar-length
paper on a topic in public policy. Topic and methods of analysis used are
determined by student in consultation with instructor. A limited number
of lectures and seminars deal with the question of how to conduct "good"
research in public policy. Prerequisites: completion of core courses in
Public Policy or consent of the instructor.  
200A. 3 units, Aut (Wallsten)
Acting Instructor: David Stewart
Associate Professor: Linda Hess

upper-division course in either international economics or the politics of concentration. Relevant courses listed in one area may, with the written concentration across these (or other) areas, again in consultation with the religion; or religion, culture, and comparative studies. Religious tradi-
tion in one of three areas: religious traditions; ethics and philosophy of

Professors: Carl W. Bielefeldt, Arnold M. Eisen, Bernard R. Faure,

Chair: Arnold M. Eisen
Professors: Carl W. Bielefeldt, Arnold M. Eisen, Bernard R. Faure, Robert C. Gregg, Thomas Sheehan, Lee Yearley
Associate Professor: Hester G. Gelber
Assistant Professors: Rudy V. Busto, Eric Lawee, Brent Sockness
Lecturer: Linda Hess
Visiting Associate Professor: Ebrahim Moosa
Visiting Assistant Professors: Angelika Cedzich, Barbara Pitkin
Acting Instructor: David Stewart

The purpose of Religious Studies is to understand and interpret the history, literature, thought, and social structures of various religious traditions and cultures. The department offers courses at several levels, described below.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The general requirements for an A.B. in Religious Studies are 60 units of course work in the department (no more than 10 units of which can be taken satisfactory/no credit), including 9 to 15 units in introductory courses (numbered 1-89). At least two introductory courses must be in diverse religious traditions (see below). At least 40 units are to be taken in courses numbered above 100, including no fewer than three seminars numbered above 200. All majors are required to take 290, Majors Seminar. Up to 10 units of directed reading may count towards the major.

In meeting these requirements, a student is expected to structure a coherent program of study in consultation with his or her adviser. This may be done in a number of ways. The student may choose to concentrate in one of three areas: religious traditions; ethics and philosophy of religion; or religion, culture, and comparative studies. Religious traditions consists of three sub-fields: East Asian religions, Judaism, and Christianity. Alternatively, the student may construct a self-designed concentration across these (or other) areas, again in consultation with the adviser.

The student is expected to take a minimum of 25 units in the area of concentration. Relevant courses listed in one area may, with the written consent of the undergraduate director, be counted in another. Approved courses offered by other departments may also be counted.

MINORS

The minor requires at minimum seven courses of 3 or more units for a minimum of 30/maximum of 36 units of graded work. Students must complete two introductory courses (numbered 1-89), at least two topics in religion courses (numbered 101-189) and at least one seminar (numbered 201-289). Remaining units must be taken in courses numbered 101 and above. One course in directed reading (199) may count towards the minor, and students may petition for other Stanford courses to fulfill minor requirements. Students are strongly encouraged to focus their program of study in one of the established department areas of concentra-
tion, but may also design the minor to supplement their major. Exam-

Examples of minor concentrations are available from the department admin-
istrator. Minors must take courses from at least two Religious Studies faculty members. Students must declare the minor no later than the last day of the quarter two quarters before degree conferral.

It is possible for minors to write a senior essay in Religious Studies, but only with the consent of the undergraduate director and the student's major adviser. Students writing the senior essay are required to complete 197 (Senior Essay) in addition to the minor course requirements, and should plan on one directed reading course as part of their program requirements (199).

SENIOR ESSAY/HONORS

Majors in Religious Studies (RS) are encouraged to write a senior essay in Religious Studies. The essay allows students to apply knowledge and skills learned in the classroom to a topic of personal interest. It also provides a focused research experience under the tutelage of a Religious Studies faculty member, thereby offering students a chance to improve research and writing skills indispensable to graduate work in the humanities and useful in a wide variety of professions.

The essay may be on any approved topic in Religious Studies. Stu-
dents should begin conversations about the senior essay with Religious Studies faculty and the undergraduate director soon after declaring the Religious Studies major. While the bulk of the essay is generally written during the senior year, students are advised to begin conceptualizing a project at the end of the junior year in order to take advantage of summer research opportunities. Students unsure about which faculty member would be most knowledgeable in the area of interest should ask the under-
graduated assistant in the department for a copy of the leaflet, Religious Studies at Stanford. A proposal for the senior essay, consisting of a completed application form, a copy of the transcript, and a one-to-two page description of the topic signed by the prospective essay adviser, should be submitted by the end of Spring Quarter of the junior year, and in no case later than the end of third quarter prior to graduation. The applica-
tion is then reviewed by the undergraduate director who either approves the project or requests resubmission with revisions.

Students must take RS 197 (Senior Essay) for a letter grade and 3 to 5 units in the senior year while writing the thesis. These units are in addi-
tion to the total number of units (60) required for successful comple-
tion of the major. Students are allowed up to 10 letter grade units in se-

Senior essays of exceptional merit are submitted to the Religious Studies faculty for honors consideration. There is no honors essay in Religious Studies; rather, all senior essays are eligible for receiving the honors distinction if the essay receives a grade of 'A' or 'A-.' Those who successfully earn honors are acknowledged publicly during the depart-
ment's commencement exercise, and the honors distinction is also record-
ed on the final University transcript.

Further details and guidelines for the senior essay are available from the department undergraduate assistant.

MAJOR IN RELIGIOUS STUDIES AND PHILOSOPHY

The departments of Religious Studies and Philosophy jointly nomi-

nate for the A.B. students who have completed a major in the two disci-

plines. See a description of this joint major under the "Philosophy" sec-
tion of this bulletin, or in the guidelines available from the undergraduate
director of either department.

**GRADUATE PROGRAMS**

**MASTER OF ARTS**

University regulations pertaining to the A.M. are listed in the “Gradu-
ate Degrees” section of this bulletin. The following requirements are
in addition to the University’s basic requirements.

The student completes at least 36 units of graduate work at Stanford
beyond the A.B. degree, including a required graduate seminar (304A
or B). Residence may be completed by three quarters of full-time work
of the equivalent.

The student’s plan of courses is subject to approval by the graduate
director. No field of specialization is expected, but students may focus
work in particular areas. Advanced and graduate courses in other depart-
ments may be taken. No thesis is required; a thesis, if elected, may count
for as many as 9 units.

Each student demonstrates reading knowledge of at least one foreign
language.

**DOCTOR OF PHILOSOPHY**

University regulations regarding the Ph.D. are found in the “Gradu-
ate Degrees” section of this bulletin. The following requirements are
in addition to the University’s basic requirements.

Residence—Each student completes three years (nine quarters) of full-
time study, or the equivalent, in graduate work beyond the A.B. degree,
and a minimum of 72 units of graduate course work (excluding the dis-
sertation).

Field of Study—The Ph.D. signifies special knowledge of a field of
study and potential mastery of an area of specialization within it. The
faculty of the department has established certain fields of study in which
its strengths and those of other Stanford departments cohere. They are:

- East Asian religions: Buddhist, Confucian, Taoist, Hindu, and modern
- Western religious thought: Christianity, Judaism, Islam, Eastern religions

Stages of Advancement—The three stages through which the student
advances to the degree are: (1) in the first two years, the student refines
an area of specialization within the chosen field of study in preparation
for candidacy; (2) after attaining candidacy, the student concentrates on
the area of specialization in preparation for the qualifying examination;
(3) the student writes a dissertation and defends it in the University oral
examination.

Languages—Each student demonstrates a reading knowledge of two
foreign languages, including French or German. Each student also dem-
strates reading knowledge of other ancient or modern languages neces-
sary for the field of study, area of specialization, and dissertation topic.

Courses—Each student satisfactorily completes the two graduate
seminars (304A and B) before the candidacy decision. Other courses are
taken with the approval of a faculty adviser in consideration of the stu-
dent’s field of study.

Candidacy—At the end of each academic year, the department’s fac-
ulty recommend second-year students for candidacy on the basis of all
relevant information, and especially on the student’s candidacy dossier
which includes the approved declaration of an area of specialization,
certification for one foreign language, and two substantial papers writ-
ten for courses during the previous two years.

Teaching Internship—At least one teaching internship under the
supervision of faculty members is undertaken at a time negotiated with
the graduate director. Students receive academic credit for the required
internship, which is a project of academic training and not of employment.

Qualifying Examination—To qualify for writing a dissertation, the
student must successfully pass a comprehensive examination in the cho-

Dissertation—The dissertation contributes to the humanistic study of
religion and is written under the direction of the candidate’s dissertation
adviser and at least two other members of the Academic Council. The
University oral examination is a defense of the completed dissertation.

**PH.D. MINOR IN RELIGIOUS STUDIES**

Candidates for the Ph.D. in other departments may select a Ph.D.
minor in Religious Studies. The minor requires at least 24 units in Reli-
gious Studies at the 200 level or above. Four of the 24 units should be in
“Theories and Methods.”

**JOINT PH.D. IN RELIGIOUS STUDIES AND HUMANITIES**

Religious Studies participates in the Graduate Program in Humanities
leading to the joint Ph.D. in Religious Studies and Humanities, de-
scribed in the “Interdisciplinary Studies in Humanities” section of this
bulletin.

**COURSES**

Course levels:

1-89 Introductory (4 units)
101-189 Undergraduate Lecture Courses (4 or 5 units)
197-199 Undergraduate Directed Reading (variable units)
201-290 Undergraduate Seminars (4 or 5 units)
299 Graduate Directed Reading (variable units)
301-399 Graduate Seminars, Research, and Teaching (variable units)

**INTRODUCTORY**

1. Introduction to Religion—Cross-disciplinary approach to the beliefs,
practices, experiences, and institutions that, to individuals of diverse
epochs and cultures, have comprised the phenomenon called religion.
Issues: prophets and founders; God and the gods; scriptures and their
interpretation; annual and life-cycle rituals; faith, reason, and mysticism;
the impact(s) of modernity. GER: 3a (DR: 8)
4 units, Aut (Gregg)

2N. Stanford Introductory Seminar: Prophecy and Politics in America—
The Religious Thought of Abraham Joshua Heschel and Martin Luther King, Jr.—Preference to freshmen. Examination of the
religious beliefs and political activities of two pre-eminent religious
figures in 20th-century America, each now considered a hero in his own
religious community and beyond. Both brought together disparate source-
s in their personal theologies: King synthesizing Baptist roots with a
diverse body of thought studied during his dissertation years in Boston;
Heschel synthesizing Hasidic roots with a diverse body of thought studied
during his dissertation years in Berlin. Each took the mandate of the
Hebrew Bible prophets with utmost seriousness, convinced that God
demanded action to transform the social order. GER: 3a (DR: 8)
3 units, Aut (Eisen)

5N. Stanford Introductory Seminar: The Trickster in East Asia—
Preference to freshmen. The trickster, a subversive, mischievous, and
boundary-crossing figure, is a well-known motif in N. American myth
and folklore. Trickster-like figures are also found in mythologies and
religions throughout the world. After examining a few famous tricksters
in American and European cultures (from Coyote to Hermes and Fal-
staff), the focus is on the nature and function of tricksters and other holy
fools in Asian cultures, emphasizing how some Asian cultures have put
transgression and folly at the center of religious life. GER: 3a (DR: 8)
3 units, Aut (Faure)

6N. Stanford Introductory Seminar: Readings in Asian Religions—
Preference to freshmen. Classic texts from diverse cultural settings and
religious traditions: Bhagavadgita, a formative treatise of early Hindu-
ism; the Chuang Tzu, a classic statement of philosophical Taoism; and
the Shobho genzo, a collection of essays on Zen Buddhism. The texts are
placed in historical and intellectual context, exploring the philosophical
and religious teachings as responses to issues posed by earlier tradition.
Notions of self and self-cultivation, and the relationships between
personal and social ethics, follow from these notions. GER: 3a, 4a (DR: 2
or 7 or 8)
3 units, Win (Bielefeldt)
11. Religious Classics of Asia—Important texts from S. Asia, including discussion of the idea of text; culture-specific ways of receiving and interpreting texts; interactions of such categories as oral and written, classical and folk, elite and popular in Indian traditions. Texts: Upanisads, Sattipathana Sutta, Bhaqavad Gita, Ramayana, Devi Mahatmya, devotional poetry, and drama. Emphasis is on Hinduism, with materials from S. Asian Buddhism, Jainism, and Islam.

4 units, Win (1999-2000)

12. Religions of India—The history of religious traditions in the Indian subcontinent (including indigenous or "tribal" religions, Hinduism, Buddhism, Jainism, Islam, Sikhism, and Christianity), representative texts and practices, and some issues of religious identity and conflict in modern India. GER:3a (DR:8)

4 units, Win (1999-2000)

14. Introduction to Buddhism—Introduction to the life and teachings of the canonical Buddha, and to the various Buddhist cultures that have drawn inspiration from the movement he created. Materials from India, China, Japan, and Tibet are examined in terms of their doctrinal content, institutional basis, ritual context, and implications for the changing Buddhist understandings of the path to liberation. GER:3a (DR:8)

4 units, Win (1999-2000)

15. The Hebrew Bible—GER:3a (DR:8)

4 units, Spr (1999-2000)

18. Zen Buddhism—Introduction to classical Zen thought in China, its background, origins, and development. GER:3a,4a (DR:2 or 8)

4 units, Spr (1999-2000)

4 units (1999-2000)

23. Introduction to Judaism—The historical development of Jewish religious thought and practice, from the biblical period to the present. Various kinds of texts reflecting that development: scriptural, liturgical, midrashic, legal, historical, and philosophical. The Sabbath, and yearly festivals and sacred days. GER:3a (DR:8)

4 units, Win (1999-2000)

24. Introduction to Christianity—The historical development of Christian religious thought and practice from Jesus to the present. Emphasis is on the formation of Christianity's major teachings and their transformation and diverse expressions in the medieval, reformation, and modern periods. Readings focus on primary texts. GER:3a (DR:8)

4 units, Spr (1999-2000)

25. Introduction to New Testament Literature—The more important writings in the New Testament (and several non-canonical early Christian works) and recent scholarly treatment of this literature. Emphasis is on the historical and social dynamics which influenced the New Testament's leading ideas, including its differing portraits of Jesus and its several understandings of divine action.

4 units (Gregg) not given 1999-2000

26. Early Christianity—The Christian movement to 600 A.D., emphasizing its distinctive beliefs and practices, the importance of Christianity to changes within the late-Roman world, and emergent beliefs and practices that distinguished Christians from other groups and among themselves. Primary documents (ancient texts in translation) and surviving art and architecture show early Christianity's modes of community organization, debates about orthodoxy and heretical teaching, and interaction with other religions. Thematic interest concerns deployment of "holy power" in people, places, rituals, objects.

5 units (Gregg) not given 1999-2000

27. Introduction to Islam—The beginning of Islam as a religious tradition and its unfolding into a world religion. Focus is on the history of the founder and the elements that constitute a Muslim world view: beliefs, rituals, scripture, and prophecy. Some tools and insights to understand contemporary Islam.

GER:3a (DR:8)

4 units, Aut (1999-2000)

29. Imagining Jewish Civilization—(Same as History 88.) Interdisciplinary introduction to the various forms of Jewish self-expression, literature, religion, and history from the Biblical period to the present. Topics: power and powerlessness, conflicting notions of the divine, evil, beauty, community, gender, and learning through the ages. Guest lectures, films, reading of primary and secondary texts.

5 units (1999-2000)

30. Modern Christian Theology: Issues and Problems—Challenges to Christian belief posed by modernity (e.g., the historical reliability of Christian scriptures, the rise of secularism as a world view, the historicization of human thought and culture, the quest for political justice and liberation, the rise of protest atheism, the presence of "other" religions, the meaning of religious discourse in a scientific age) and responses to these challenges by classic and contemporary Christian thinkers since the Enlightenment. Specific issues and figures rotate.

GER:3a (DR:8)

4 units, Win (1999-2000)

42. Philosophy of Religion—Classic and modern questions in the philosophy of religion are traced through Western and Eastern traditions: the coherence of theism, relativism, verification and ethics of belief, and implications of science. Readings from traditional and modern texts.

GER:3a (DR:8)

4 units, Win (1999-2000)

53. Jews and Judaism in America—The interaction between the character of the American Jewish community and the forms of Judaism developed in this country is examined against the background of American ethnicity, historical, literary, sociological, and theological materials are used.

GER:4b (DR:3)

4 units (1999-2000)

55. Introduction to Chinese Religions—Confucianism, Daoism, Buddhism, and the interchange among these belief systems and institutions. Set against the background of Chinese history, society, and culture, with attention to elite and popular religious forms.

GER:3a (DR:8)

4 units, Win (1999-2000)

65. Introduction to Christian Ethics—The concepts, sources, and methods employed in the ethical reflections of major Christian thinkers from traditional to contemporary (e.g., Augustine, Aquinas, and Stanley Hauerwas). Their understandings of society, the meaning of our lives, the
kind of people we ought to be, and how we make practical moral judgments.

4 units, not given 1999-2000

**77. God in the Modern and Postmodern World**—The dialogue of philosophy and religion from Kierkegaard’s leap of faith to Heidegger’s pious agnosticism, and beyond.

4 units, Win (Sheehan)

**80. Introduction to Rabbinic Culture**—The genres of rabbinic culture and the issues which have shaped its worldview in different times and places. Selections (in English translation) from midrash, Mishna, Talmud, codes, and responses. The legitimacy of rabbinic authority, the value of oral Torah, discipleship, the lure of the hyposthetica, the relationship between custom and law, the nature and place of dissent, the creeping expansion of the realm of norms, the challenge of modernity.

4 units, not given 1999-2000

**UNDERGRADUATE LECTURES**

**ASIAN RELIGIONS**

**113. Introduction to the Daoist Religion**—The major schools and practices of Daoism, China’s indigenous higher religion. The historical framework, with the texts of Laozi and Ao Wuangzi, cosmology, and a variety of beliefs and practices of various periods. Modern Daoist liturgy and its relationship with popular religion.

4 units, Aut (Cedzich)

**116. Japanese Buddhism**—The history and teachings of Buddhism in Japan, emphasizing the early and medieval periods.

5 units, not given 1999-2000

**117. Syncretism and Sectarianism in Chinese Buddhism**—Dialectical relationships between sectarian and syncretic tendencies, conservative and subversive elements, and orthodoxy and heterodoxy in the development of Chinese Buddhism. Prerequisite: consent of instructor.

5 units (Faure) not given 1999-2000

**118. Ritual in East Asian Buddhism**—Rituals and symbolic representations of the relationship between the sacred and profane in E. Asian religious traditions.

4 units (Faure) not given 1999-2000

**119. Gandhi and Non-Violence**—M. K. Gandhi, widely known as “Mahatma” (saint or holy man), is one of the most influential figures of the 20th century and is especially associated with the development of ahimsa (nonviolence) as a political force and social ideal. Violence/nonviolence in Hinduism, Buddhism, and Jainism. Gandhi, his life, ideas, and influence, through his own autobiography and writings, and through writings by others. GER:3a,4c (DR:8t)

4 units, Aut (Hess)

**124. Religion in Japan**—The history and characteristics of Japanese religious tradition. Limited enrollment.

5 units, not given 1999-2000

**136. Buddhist Yoga**—Introduction to Buddhist models of spiritual practice, with emphasis on issues in the interpretation of the contemplative path. Limited enrollment.

4 units (Biehfeldt) not given 1999-2000

**150. Mahayana Buddhism**—Introduction to the Lotus school of Mahayana; its Indian sources, Chinese formulation, and Japanese developments. GER:3a (DR:8)

3 units, Aut (Biehfeldt)

**156. Religious Lives of South Asian Women**—Emphasis is on religious texts and practices in which women are the main actors and the principal or only participants. The process of making “women’s spaces” and the circumstances in which women experience and exercise their own agency. The boundaries of these spaces, the implied contrasts with mainstream traditions, and constructions of gender from various perspectives. Hindu, Muslim, Sikh, and Jain communities. Student research projects on any religious tradition in any S. Asian country.

4 units, not given 1999-2000

**CHRISTIANITY**

**109. God and Gender: Christianity through the Eyes of Women**—Introduction survey of contemporary feminist critiques and revisions of traditional Christian beliefs and practices. Recent contributions by womanist, Mujerista, and Asian feminists. GER:3a,4c (DR:8t)

4 units, Win (Pitkin)

**126. Protestant Reformation**—16th-century evangelical reformers (Luther, Calvin) and reform movements (Lutheran, Reformed, Anabaptist) in their medieval context.

4 units, not given 1999-2000

**145. Protestantism: Ethics and Community**—The structure and development of ethical thought in the Protestant theological tradition(s), from the Reformation to the 20th century. Readings in primary texts of representative authors: e.g., Luther, the Anabaptists, Spener, Edwards, Schleiermacher, Trelitz, Barth, R. Niebuhr, Gustafson.

4 units (Sockness) not given 1999-2000

**146. Power in the Blood: Evangelical Christianity in the United States**—The history, theology, and subculture of Protestant Evangelicalism. Topics: the rise of fundamentalism, biblical interpretation, missions, politics, the Second Coming, Christian music, parachurch organizations, charismatic movements, televangelism, biblical feminism.

4 units (Busto) not given 1999-2000

**167. Medieval and Renaissance Religious Philosophy**—Survey of medieval and Renaissance philosophy, focusing on God, world, and human freedom. How do divine will and foreknowledge determine the events of this world? Do events at any level remain contingent and free from divine determinism? What is the nature of the human will that it might remain free? How much freedom might God have in creating the world that exists? Is it eternal or does it have a beginning? Could God create more than one? Are there other worlds? Questions like these engaged a number of medieval thinkers. Readings from Augustine, Anselm, Aquinas, Scotus, and Ockham, etc. GER:3a (DR:8)

4 units, Aut (Gelber)

**168. Divine Justice in Medieval Thought and Literature**—Medieval ethical beliefs through legends, myths, saints’ lives, literature, and the ethical theories of medieval scholars.

4 units (Gelber) not given 1999-2000

**172. Sex, Body, and Gender in Medieval Religion**—Anxiety about sex and the body increased markedly during the early years of Christianity, while the doctrine of the Incarnation put the human body at the center of religious concern. Ideals of virginity, chastity, aesthetic self-denial of necessities like food, sleep, and freedom from pain were central to lay and clerical piety. The religious theory and practice associated with questions about sex, body, and gender in the Middle Ages as constructed in
JUDAISM

173A. Religion in the Age of Reason—Western religious thought during the European Enlightenment (1650-1800). Figures and movements: the Deists, Locke, and Hume in England; the philosophers, Voltaire, and Rousseau in France; Pietism, Protestant Orthodoxy, Leibniz and Kant in Germany.
4 units (Sockness) not given 1999-2000

177. Religious Existentialism—Introduction to the influence of existentialism on religious thought since Kierkegaard. GER:3a (DR:8)
5 units, not given 1999-2000

186. 20th-Century Christian Thought—Introduction to systematic theology in the 20th century through the study of the main proponents of “dialectical” or “Neo-Orthodox” theology: Karl Barth, Rudolf Bultmann, Reinhold Niebuhr, and Paul Tillich.
4 units (Sockness) not given 1999-2000

189. Vatican II and Beyond: Continuity and Change in the Catholic Church—The debates, decisions, and documents of the Second Vatican Council (1962-65), in light of theological ferment that preceded it, cultural changes that prompted Pope John XXIII to convene it, and the subsequent impact on Church doctrine, discipline, polity and popular practice through the pontificates of Paul VI and John Paul II. Core texts are Council documents, supplemented by implementing decrees, theological/cultural assessments, and historical primary sources.
4 units, Spr (DuMaine)

JUDAISM

112. Sexual Politics in the Ancient World—Study of biblical and classical texts that indicate sources of gender bias. Topics: construction of gender and social reality in ancient texts; the female divine in biblical religion; ways in which changing social attitudes, especially issues of gender and sexuality, challenge the traditional values expressed in the Bible. Biblical stories of Sarah and Hagar, Ruth, Esther, Deborah, Judith; classical texts include Homer, Hesiod, Euripides' The Bacchae, Aristotle.
5 units, not given 1999-2000

5 units (Staff) not given 1999-2000

128. Women and Judaism—The role and image of women in classical Judaism; responses of modern Jewish women to traditional conceptions of women and femininity. Recent attempts to create a feminist Judaism.
5 units, not given 1999-2000

161. Modern Jewish Thought—Key texts and thinkers in 20th-century Jewish thought that focus on God, the self, love, death, the quest for goodness and the meaning of Jewish existence. Thinkers include Buber, Heschel, Kook, Levinas, and Savelitchik.
5 units (Eisen) not given 1999-2000

166. Myth and Ritual in Judaism—Festivals in the Jewish tradition.
5 units, not given 1999-2000

5 units, not given 1999-2000

184. Spirit and the Law—Throughout much of post-biblical history, Torah and the commandments have been dismissed as devoid of spirit. Critiques of the Law as formulated by Paul, Aquinas, Spinoza, and Kant. Jewish perspectives on the spirituality of the commandments through readings from talmudic, philosophical, kabbalistic, Hasidic, and contemporary sources. GER:3a (DR:8)
4 units, Win (Fishman)

ISLAM

110. Islam in the Modern World—Critical and controversial issues in modern Islam. The beginnings of Islamic reforms in the 19th-century Middle East and the ideas of key modern thinkers. Some thematic issues, such as the notion of an Islamic state, women's liberation, and the move towards the Islamization of education.
4 units, not given 1999-2000

110A. Updating Tradition: Law and Gender in Modern Islam—Women, gender, and tradition in Islam. Theory and case studies from different Muslim communities inside the traditional Islamic world and outside it. Experiences in N. America, the Middle East, Africa and S. Asia. Gender theory is combined with case studies and critical applications, explored through the prism of law and religion; how it impacts on the lives of women, family, and community in the contemporary world. GER:3a (DR:8)
4 units, Spr (Moosa)

THEORETICAL AND COMPARATIVE STUDIES

121. Peoples of the Book: Mates, Mothers, and Daughters—Significant women in the traditions of Judaism, Christianity, and Islam, with attention to Eve, Sarah and Hagar, the Queen of Sheba, "the women of" Noah and Lot, and Mary (mother of Jesus) in the Bible; Qur'an and early rabbinic, patristic, and Muslim commentaries. GER:3a, 4c (DR:8f)
3-4 units, Aut (Gregg)

122. Wealth and Poverty in the Biblical Tradition
4 units, Spr (Stewart)

143. Chicano/a Religious Traditions—The religious traditions that created and continue to influence the history, politics, and formation of Mexican American communities. Topics: ancient Mesoamerica, Mexican Catholicism, Movimiento indigenismo, Evangelicos, Latino theology, Chicana innovations.
4 units (Busto) not given 1999-2000

148. Social Theory and Religion
5 units (Eisen) not given 1999-2000

149. Theories of Religion—The origin and persistence of religious behavior and belief in the modern period. Philosophical, sociological, historical, and psychological theories, “classic” and contemporary. 5 units, not given 1999-2000

155. Asian/Pacific American Religious Traditions—The role of religion in Asian American and Pacific Islander communities since the 19th century. Topics: the impact of immigration laws on religious life, WWII internment, the transformation of Asian traditions, Christian evangelicalism, Asian American theology, the controversy over “American Buddhism.” Prerequisite: consent of instructor.
4 units (Busto) not given 1999-2000

157. Readings in Greco-Roman Religion—Texts present philosophical and religious thought and point towards activities of discrete groups.
5 units (Gregg) not given 1999-2000

163. Religion and Ethnicity—Religion and issues of race, class, and gender in the history and development of racially ethnic communities. Religion as promoting or resisting assimilation. Issues: revitalization, theologies of liberation, dissent, and transformation within traditions.
5 units (Busto) not given 1999-2000
165. Religious Ritual—Classical and contemporary theories of religious ritual with case studies from a variety of traditions.
   5 units (Faure) not given 1999-2000

171. Faith and Politics in the Middle Ages—Does God have politics? Are politics a human evil or divine good? These questions and their cognates are explored from the perspective of medieval Christian, Muslim, and Jewish thought on the relation between spiritual and temporal powers, and between reason and revelation as it pertains to the political order.
   4 units (Lawee) not given 1999-2000

179. Religion in Science Fiction and Fantasy—What religion is to us can be discerned in the ways we imagine it to be. The place of religion in the modern literary imagination through science fiction texts and films, assessed in conjunction with theoretical texts that define religion in the academic imagination. Students construct a fictional religion or religious situation.
   5 units (Gelber) not given 1999-2000

183. The Death of God: Between Hegel and Marx—The radical transformations in Western notions of God between the death of Hegel and the birth of historical materialism, arguing that questions about theism and atheism, humanism, and history formulated in the period 1831-1846 are still pertinent today. Texts from Hegel, the Young Hegelians, Feuerbach, and Marx on issues of God, history, and the social dimensions of human nature. GER: 3a (DR: 8)
   4 units, Aut (Sheehan)

   4 units, Busto (Sheehan)

UNDERGRADUATE DIRECTED READING

197. Senior Essay—Prerequisite: consent of instructor and of the department.
   Aut, Win, Spr (Staff)

199. Individual Work—Prerequisite: consent of instructor and of the department.
   Aut, Win, Spr (Staff)

UNDERGRADUATE SEMINARS

ASIAN RELIGIONS

206. Popular Chinese Religion—Beliefs and practices centered around life, death, and the afterlife; concepts of divinity and the structure of the popular pantheon; communication with the divine; ritual celebrations and specialists; messianic movements; popular religious arts: performative, literary, and visual.
   4 units, Aut (Cedzich)

210. Speech and Writing in the Buddhist Traditions—Using Western “literature” on writing and morality (Derrida, Ong, Goody), examines various conceptions of speech and writing found in E. Asian religions, specifically the way writing has transformed the Chan/Zen tradition, and our interpretation of it.
   4 units (Faure) not given 1999-2000

212. Interpreting Confucian Texts—Illustrates the critical importance of historical and philosophical issues to the task of interpretation. Introduction to Chinese commentarial tradition. Seminar; pace and range determined by constituents. Prerequisite: consent of instructor.
   5 units, not given 1999-2000

221. Ch’uan/Zen and Local Religion—The relationships between the Ch’uan/Zen tradition and Chinese or Japanese local religion, focusing on forms of symbolic mediation (ritual, meditative techniques, etc.) in both religious traditions. Prerequisite: consent of instructor.
   5 units (Faure) not given 1999-2000

230A. Zen Buddhism Seminar—Selected topics in Ch’uan and Zen; may be repeated for credit.
   5 units (Bielefeldt) not given 1999-2000

256. Japanese Buddhism Seminar—Selected topics. May be repeated for credit.
   4 units (Bielefeldt) not given 1999-2000

257. East Asian Buddhist Texts
   4 units, Win (Faure)

   5 units, Spr (Bielefeldt)

CHRISTIANITY

203. The End of the World: Apocalypse Then, Now, and to Come—Close reading of the classical Jewish and Christian texts on eschatology, and an analysis of their relevance at the turn of the new millennium.
   4 units, Win (Sheehan)

234. The Virgin Mary and Images of Power—Through art and literature, the emergence of the Virgin Mary as a symbol of religious and cultural values from earliest legends to the modern era. Emphasis is on the Middle Ages.
   5 units (Gelber) not given 1999-2000

240. Jews, Pagans, and Christians in Late Antiquity—Investigation of the distinctive expressions of Judaism, Roman polytheism, and Christianity from 100-450 A.D., emphasizing interactions between the groups. Primary documents and new studies of late Roman religious-political competition and conflict.
   4 units (Gregg) not given 1999-2000

241. Asceticism in Pagan and Christian Antiquity
   4 units (Gregg) not given 1999-2000

242. Wrestling with the Text: Perspectives on the Bible in the Age of Reform, 1400-1600—Significant and often conflicting developments in the interpretation and use of the Bible by Renaissance humanists, Roman Catholics, and Protestants from the late medieval period through 1570. Issues of translation, the canon, and the authority of sacred texts.
   4 units, not given 1999-2000

244. Religious Studies and the Humanities: Reconstructing Religion—Friedrich Schleiermacher—Idealist philosopher, Moravian pietist, religious skeptic, hospital chaplain, charter member of the Romantic movement, head preacher at Trinity Church, co-founder of the University of Berlin, translator of Plato’s works, opponent of Hegel, pioneer in hermeneutical theory, “father of modern theology.” Examination of this multifaceted 19th-century German thinker, who reconceived the meaning of religion in the West and pioneered an approach to theology attuned to the sensibilities of modern science and history.
   5 units (Sockness) not given 1999-2000

268. Model Selves: Francis of Assisi—The formation of the model self in myth and history in the Western tradition, emphasizing Francis of Assisi, with reference to other model selves, masculine and feminine in Eastern and Western traditions.
   5 units (Gelber) not given 1999-2000

271A.B. Dante and Aquinas—Focus is on the different ways Dante and Aquinas both treat human excellencies, such as love and courage, and
human deformations, such as pride and anger. Students may take the 271A without B.

271A. 4 units, Win (Yearley)
271B. 4 units, Spr (Yearley)

273. Aquinas’ Ethics—Thomas Aquinas’ general theory of human flourishing and his analysis of specific human excellences (e.g., love, courage, and magnanimity) and human deformations (e.g., vanity, pride, and envy). Limited enrollment.

5 units (Yearley) not given 1999-2000

274. From Kant to Kierkegaard—The main currents of religious thought in Germany from Kant’s critical philosophy to Kierkegaard’s revolt against Hegelianism. Emphasis is on the theories of religion; the epistemological status of discourse about God; the role of history, especially, the figure of Jesus; and the problem of alienation/reconciliation in four seminal modern philosophers: Kant, Schleiermacher, Hegel, and Kierkegaard.

5 units, Spr (Sockness)

5 units, not given 1999-2000

5 units (Harvey) not given 1999-2000

280. Schleiermacher—The “father of modern theology.” Friedrich Schleiermacher (1768-1834) holds a monumental place in the history of Western religious thought since the Enlightenment. Exploration of his controversial conception of the theological enterprise through a study of his most significant religious writings.

4 units (Sockness) not given 1999-2000

THEORETICAL AND COMPARATIVE STUDIES

208. Feminist Theology—Seminar examining contemporary feminist critiques, rejections, and revisions of traditional Western, principally Christian, beliefs and practices.

4 units, not given 1999-2000

211. Science and Religion—From Galileo and Newton to Einstein, religion and science have been deeply intertwined, yet science now challenges traditional religious belief. The questions science raises justifies of moral truth claims?

5 units (Busto) not given 1999-2000

260. Contemporary Jewish Thought: Jewish Feminism and Jewish Tradition—Jewish women’s relationship to Jewish tradition, and the theology and religious practices of contemporary Jewish feminism. Topics: gender in traditional Jewish society; traditional women’s spirituality, rituals, and liturgy; gender and Jewish modernity; the feminist critique of Jewish tradition and the creation of alternative traditions; the “feminization of Judaism.”

5 units, not given 1999-2000

261. Modernization/Secularization—Reexamination of these two fundamental concepts in light of recent historical, sociological, anthropological, and philosophical developments.

5 units (Eisen) not given 1999-2000

262. Back to the Sources: Close Readings of Classical Jewish Texts—Examination of selected rabbinic, mystical, philosophical, and exegetical texts. Sources are read in translation and in Hebrew.

4 units, not given 1999-2000

264. Hasidism and Modernity—Hasidism, a Jewish pietist movement in late 18th-century Eastern Europe, can be viewed as a blend of the traditional and the modern. Primary sources and secondary literature show this polarity in historiographies and representations of Hasidism, the zaddic as an alternative type of Jewish leader, the roles of textual and non-textual authority in Hasidic culture, Hasidism’s relationship to kabbalah and Sabbateanism.

4 units, not given 1999-2000

282. Classics of Medieval Jewish Thought—Close study of medieval Hebrew theological writings in translation (with an optional Hebrew component), focusing on issues such as reason and revelation, prophecy, the final human end, scriptural interpretation and rabbinic exegesis, and messianism. Topic: Moses Maimonides’ Guide of the Perplexed and its medieval and modern interlocutors.

5 units, not given 1999-2000

283. Jerusalem Holy Places—Religious Studies majors register for 290. Studies of four “monuments” in the old city: the Temple (the history of the 1st and 2nd western wall, with surrounding excavations today), the Church of the Holy Sepulchre (in Byzantine and Crusader periods, and in the present), and (on the temple mount/Haram) the Dome of the Rock and al-Aqsa Mosque. Literature, art, and archaeology concerning these buildings, sacred to Judaism, Christianity, and Islam, with attention to their uses as religious centers, and their importance and development as places of worship and pilgrimage. Opportunity for travel-study to Jerusalem at Spring Break.

4 units, Win (Gregg)

545
1. Two core courses: one on Russia/Soviet Union, one on Eastern Europe, to be selected by the student from an annual list of qualifying courses issued by CREES.

2. At least four additional REES courses, totaling at least 20 units.

3. The student’s courses, core and additional, must be distributed among at least three departments; that is, the student takes at least one course in each of three departments. In addition to REES courses in the departments of History, Political Science, and Slavic Languages and Literatures, REES courses in Cultural and Social Anthropology, Economics, Sociology, and so on, when offered, may qualify. The CREES academic coordinator determines which courses qualify for the minor.

4. A “capstone” experience in REES, including, but not limited to, one of the following:
   a) A departmental seminar course for advanced undergraduates
   b) Directed reading and research with a Stanford faculty member or a CREES-approved resident or visiting scholar
   c) Participation in the Stanford Moscow Overseas Studies campus

Foreign Language—The REES minor has no language requirement, but the participating student is strongly encouraged to attain working competence in Russian or another relevant language. Courses at the third-year level or above in Russian or another language of the former Soviet Union or Eastern Europe (excluding German) count towards the REES minor, up to a maximum of 3 units per academic quarter, 9 units total.

Additional Information—The total number of courses applied to the REES minor must be at least six, but the minor should total no more than 36 units. Courses counting towards the REES minor may not be counted towards the student’s major. Courses taken at Stanford overseas campuses (particularly the Moscow campus) may count towards the REES minor, with prior approval; at least three courses for the minor must be taken in residence at Stanford.

Approval of CREES Academic Coordinator—Students interested in pursuing the REES minor should consult the CREES academic coordinator, and then complete the Minor Declaration Form. Students declaring the REES minor must do so no later than five quarters prior to their intended quarter of degree conferral. Approval of minor declarations and certification of requirements are made by the CREES academic coordinator.

Students pursuing the REES minor work with the CREES academic coordinator, who is responsible for determining that requirements for the minor are satisfied. Questions about which courses count towards the minor, which courses taken overseas count towards the minor, what project counts as a “capstone” experience, and so on, are also handled by the academic coordinator.

To qualify for a coterminal A.M. degree in Russian and East European Studies, a student must, besides completing University requirements for the A.B. degree:

1. Submit a coterminal application for admission to the program no earlier than the beginning of the eighth quarter, and no later than the end of the 11th quarter of undergraduate study. Students with advanced placement and transfer credit must apply at least four quarters before the expected master’s degree conferral date. Applications may be obtained from Degree Progress, the Registrar’s Office. The deadline for all applications to the A.M. program in Russian and East European Studies is January 4, 2000. The Admissions Committee considers coterminal applications at the same time that it reviews applications from outside Stanford and from other graduate degree programs within the University.

2. Include in the application a program which outlines, by quarter, the schedule of courses the student plans to complete toward the A.M. degree. The student should seek the advice of the CREES academic coordinator in drafting this schedule. The application also should include: (a) a current Stanford transcript, (b) a one-page statement of purpose, and (c) two letters of recommendation from Stanford professors. Applicants must have a grade point average (GPA) of at least ’B’ (3.0). Coterminal applications must take the General Test of the Graduate Record Examination and have the results sent to Graduate Admissions, the Registrar’s Office.

3. Complete 15 full-time quarters or the equivalent, or three quarters in full-time residence after completing 180 units; and complete, in addition to the 180 units required for the bachelor’s degree, a minimum of 40 units for the master’s degree.

The same courses may not be counted to meet both undergraduate and graduate requirements, and no courses taken before the junior year may be used to meet the course requirements for the master’s degree. Requirements for completion of the A.M. degree are summarized below; a more detailed description of the program and requirements is available from the center.

**SLAVIC THEME HOUSE**

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence which houses 50 students and offers them a wide variety of opportunities to expand their knowledge, understanding, and appreciation of Russia and Eastern Europe.

**OVERSEAS STUDIES PROGRAMS**

Undergraduate students interested in the study of the languages, history, culture, and social organization of Russia and Eastern Europe can apply to study at Stanford centers in Berlin and Moscow. For information about these programs, contact the Overseas Studies Office in Sweet Hall.

**GRADUATE PROGRAMS**

**MASTER OF ARTS**

CREES offers a one-year intensive interdisciplinary master’s degree program in Russian and East European Studies for students with a strong prior language and area studies background. Students have flexibility to pursue their particular interests, while also taking a required core curriculum that addresses 20th-century and contemporary processes of change in the former Soviet Union and Eastern Europe.

**ADMISSION**

Applications may apply electronically or request an application from the Registrar’s homepage, http://www.stanford.edu/dept/registrar/admissions/. An application may also be obtained by writing to: Graduate Admissions, Registrar’s Office, Stanford University, Stanford, CA 94305-3005. In addition, prospective applicants are strongly encouraged to consult with the academic coordinator at CREES regarding the application process.

The materials in the application packet provide detailed instructions for applying. To qualify for admission to the program, the following apply:

1. Applicants must have earned an A.B. or B.S. degree, or the equivalent.
2. Applicants must have completed at least three years of college-level Russian language study or the equivalent prior to beginning the program. Other languages of Eastern Europe or the former Soviet Union may be accepted on a case-by-case basis.
3. Applicants whose native language is not English are ordinarily expected to take the Test of English as a Foreign Language (TOEFL) and have the results sent to Graduate Admissions, the Registrar’s Office.
4. All applicants must take the general test of the Graduate Record Examination and have the results sent to Graduate Admissions, the Registrar’s Office.

The deadline for submission of applications for admission and for financial aid is January 4, 2000. Admission is normally granted for Autumn Quarter, but requests for exceptions are considered.

The successful applicant generally demonstrates the following strengths: adequate foreign language study, course work in Russian and East European studies in various disciplines, outstanding grades in previous academic work, high GRE scores (particularly verbal and analytical), strong letters of recommendation, and a persuasive statement of purpose explaining why and how the program fits the applicant’s academic and career goals.

**DEGREE REQUIREMENTS**

Candidates for the A.M. degree must meet University requirements for an A.M. degree as described in the “Graduate Degrees” section of this bulletin.

The A.M. program in REES can ordinarily be completed in one academic year by a well-prepared student; longer periods of study are permitted.

Requirements to complete the interdisciplinary A.M. degree are principally ones of distribution, with the exception of three required core courses, as described below. Each student, with the advice of the CREES academic coordinator, selects courses according to the student’s interests, needs, and goals.

All students in the A.M. REES program must complete a minimum of 40 academic credit units within the following guidelines.

1. Language Study: students in the program must study Russian or another language of the former Soviet Union or Eastern Europe. Credit towards the 40-unit minimum (maximum 3 units per quarter, 9 units total) is allowed for advanced language work; in the case of Russian, “advanced” is defined as third-year Russian language instruction and above. Similar standards apply for other languages.

2. **Interdisciplinary Course Work:** a minimum of five graduate courses in Russian and East European studies must be completed and distributed among at least three departments. All course work applied to the 40-unit minimum must deal primarily with Russian/Soviet/post-Soviet or East European studies.

3. **Core Courses:** a required core course is designated each academic quarter; students must complete three quarters of core courses.

4. **Training workshop:** CREES organizes a regular, usually twice-a-month, workshop for students in the A.M. program. Its goals are to acquaint students with Stanford’s resources and faculty, to survey current issues in Russian and East European Studies, and to introduce students to the methodologies, challenges, and opportunities of studying the 20th-century former Soviet Union and Eastern Europe.

5. All course work qualifying for the 40-unit minimum must have a grade of ‘B’ or higher. (‘B-’ does not count for degree credit.)

6. Students are expected to complete introductory course work in Russian and East European studies in the disciplines of history, literature, and politics. Courses taken prior to graduate work at Stanford are
considered on a case-by-case basis towards satisfying this requirement.

7. Students are expected to do course work in both Russian/Soviet/post-Soviet studies and in East European studies. Course work completed prior to graduate work at Stanford is considered in determining whether this requirement has been satisfied.

8. All courses counting towards the 40-unit minimum must be approved by the CREES academic coordinator, who ensures that planned course work satisfies requirements towards the degree. The CREES faculty director and steering committee determine the specific requirements.

A description of the A.M. program is also available on the Web at http://www.stanford.edu/dept/CREES/ and by request from the Center for Russian and East European Studies.

CORE COURSES

CREES designates one core course each academic quarter as required of all A.M. students from among departmental offerings, typically in History, Political Science, or Slavic Languages and Literatures. Courses so designated as core courses examine subject areas of fundamental importance within modern Russian, Soviet, post-Soviet, and East European studies, and address questions of research, methodology, and current scholarship. Courses so designated for 1999-2000 are:

FINANCIAL AID

Subject to funding, CREES may have a limited amount of financial aid to offer in the form of Foreign Language and Area Studies (FLAS) fellowships. Recipients of FLAS fellowships must be American citizens or permanent residents and must enroll in Russian language courses at Stanford at the appropriate level. Applicants in the A.M. program have priority in the annual FLAS competition; in recent years CREES has also awarded FLAS fellowships in the Graduate School of Business and the School of Law. Consult the CREES academic coordinator for further information about the application and award process. Applications for FLAS fellowships are available from the Center for Russian and East European Studies.

CONCURRENT DEGREE PROGRAMS

The Center for Russian and East European Studies collaborates with the schools of Business and Law to allow students simultaneously to pursue concurrent degrees in Russian and East European Studies (A.M.) and the respective professional field (J.D., M.B.A.). Students must apply to and be independently admitted to each degree program. For additional information about specific plans of study and degree requirements, contact the Center for Russian and East European Studies.

DOCTORAL PROGRAMS

Since the University does not offer a Ph.D. in Russian and East European Studies, students wishing to pursue a REES-related doctoral program must apply to one of the departments offering a Ph.D. with an emphasis on Russia, the former Soviet Union, or Eastern Europe, such as the departments of History, Political Science, or Slavic Languages and Literatures.

COURSES

200. Directed Individual Study—For students engaged in special interdisciplinary work that cannot be arranged by a department.

1-5 units, Aut, Win, Spr (Staff)

AFFILIATED DEPARTMENT OFFERINGS

The courses listed below by department deal at least in part with Russia, the Soviet Union, or Eastern Europe. See the respective department listings for course descriptions. Additional relevant courses by resident or visiting faculty may be offered; for updated information, consult the quarterly Time Schedule or contact the Center for Russian and East European Studies. Students in the area studies A.M. program must have their course list approved by the department prior to enrollment.

SCIENCE, MATHEMATICS, ENGINEERING CORE

Program Director: Brad Osgood
Track Chairs: Brad Osgood, Robert Simoni, Mark Zoback
Core Faculty: David Botstein (Genetics), Patricia Burchat (Physics), Paul Ehrlich (Biological Sciences), Martin Fejer (Applied Physics), Russell Fernald (Psychology, Human Biology), James Ferrell (Molecular Pharmacology), Anthony Kovescek (Petroleum Engineering), Sharon Long (Biological Sciences), Michael McWilliams (Geological and Environmental Sciences), Richard Myers (Genetics), Brad Osgood (Electrical Engineering), David Siegmund (Statistics), Robert Simoni (Biological Sciences), Virginia Walbot (Biological Sciences), Mark Zoback (Geophysics)

Research Scientist Assistant: Gretchen Daily (Biological Sciences)

The courses in the Science, Mathematics, Engineering (SME) Core provide the opportunity for students to have a serious encounter with the essential ideas of science, mathematics, and engineering, emphasizing the active process of doing science through the exploration of the natural and human-made world. This program is especially designed for students whose primary interests are in the humanities and social sciences.

Each track in the program is taught by faculty teams from departments across the University. All of the tracks address common concepts, but from different points of view. Principles addressed in the Core include: science as a structure of testable hypotheses; the nature of energy in the physical world; the character of physical law based on quantitative, reproducible evidence; the molecular basis for living and non-living things; the interplay between the physical world and biological systems; scaling, emergence, and the idea of going from elementary to complex; the statistical description of populations and complex systems; the design process; pulling together multiple considerations to achieve a practical, manufacturable, durable design of products and systems. Mathematics is woven into the courses in support of solving scientific and technological problems.

The courses include laboratory sections in which students do experiments and projects that develop and explore the concepts discussed in the lectures. The lab sections are small and provide students the opportunity to work in teams.

All of the tracks are three quarters long. Because of the interdisciplinary nature of the courses, students must start Autumn Quarter. All courses are 4 units each quarter. The General Education Requirements (GER) for the areas of science, mathematics, and engineering (Area 2) were designed to encourage enrollment in the SME Core. The University requires a total of three courses in the three scientific and technical areas, with no more than two in any particular area. Taking a year of SME fulfills the requirement completely.

For students thinking of majoring in the humanities or social sciences, this program is an excellent way not only to fulfill these requirements, but also to provide an active understanding of ideas and applications of science, mathematics, and engineering.
**SCIENCE, TECHNOLOGY, AND SOCIETY**

**Emiriti:** James Adams (Industrial Engineering and Engineering Management), Alex Inkeles (Sociology), Walter Vincenti (Aeronautics and Astronautics)

**Co-Directors:** Paula Findlen (History), Robert McGinn (Industrial Engineering and Engineering Management; Science, Technology, and Society; and, by courtesy, Civil and Environmental Engineering)

**Program Committee**

**Faculty:** Francois Bar (Communication), Stephen Barley (Industrial Engineering and Engineering Management), Joseph Corn (History), Sarah Jain (Cultural and Social Anthropology; Science, Technology, and Society), James Jucker (Industrial Engineering and Engineering Management), Timothy Lenoir (History), Eric Roberts (Computer Science), Scott Sagan (Political Science), Sheri Sheppard (Mechanical Engineering), Gavin Wright (Economics)

**Students:** Marita Zirk-Blumberg, Gregory Leung

**Faculty:**

**Affiliated Faculty:** Francois Bar (Communication), Stephen Barley (Industrial Engineering and Engineering Management), Joseph Corn (History), David Freyberg (Civil and Environmental Engineering), Sarah Jain (Cultural and Social Anthropology; Science, Technology, and Society), Pamela Lee (Art and Art History), Timothy Lenoir (History), Gilbert Masters (Civil and Environmental Engineering), Eric Roberts (Computer Science), Nathan Rosenberg (Economics), Scott Sagan (Political Science), Sheri Sheppard (Mechanical Engineering), Paul Turner (Art and Art History), Gavin Wright (Economics)

**Consulting Faculty:** Naushad Forbes (Science, Technology, and Society), Richard Meehan (Civil and Environmental Engineering)

Technology and science are activities of central importance in modern life, intimately bound up with industrial society's evolving character, problems, and potentials. If scientific and technological pursuits are to further enhance human well-being, they and their effects on society and the individual must be better understood by nontechnical professionals and ordinary citizens as well as by engineers and scientists. Issues of professional ethics and social responsibility confront technical practitioners. At the same time, lawyers, public officials, civil servants, and business people are increasingly called upon to make decisions requiring a basic understanding of science and technology and the environmental consequences. Ordinary citizens, moreover, are being asked with increasing frequency to pass judgment on controversial matters of public policy related to science and technology. These circumstances require education befitting the complex sociotechnical character of the contemporary era.

Science, Technology, and Society (STS) is an interdisciplinary program devoted to understanding the nature, consequences, and shaping of technological and scientific activities in modern industrial society. Achieving this understanding requires critical analysis of the interplay of science and technology with human values and world views, political and economic forces, and cultural and environmental factors. Hence, students in STS courses study science and technology in society from a variety of perspectives in the humanities and social sciences. To provide a basic understanding of technology and science, STS majors are also required to achieve either literacy (A.B.) or a solid grasp of fundamentals (B.S.) in some area of engineering or science.

**GENERAL INFORMATION**

Selected STS courses may be used, individually or in groups, for various purposes:

1. To satisfy University General Education Requirements
2. To satisfy the Technology in Society Requirement of the School of Engineering
3. To comprise parts of student-designed concentrations required for majors in fields such as Human Biology and Public Policy
4. To satisfy the requirements of the STS Honors Program complementing any major (see below)
5. To satisfy requirements for majors in STS (see below)
6. To satisfy requirements for a minor in STS (see below)

STS courses are particularly valuable for undergraduates planning further study in graduate professional schools (for example, in business, education, engineering, law, journalism, or medicine) and for students wishing to relate the specialized knowledge of their major fields to broad technology- and science-related aspects of modern society and culture.

**UNDERGRADUATE PROGRAMS**

Degree programs in STS are interdisciplinary curricula devoted to understanding the nature and significance of technology and science in modern society. Majors analyze phenomena of science and technology, in society from ethical, aesthetic, historical, economic, and sociological perspectives. In addition, students pursuing the A.B. degree study a technical field in sufficient depth to obtain a grasp of basic concepts and methods, and complete a structured concentration on a theme, subarea, or problem related to science and technology in society. Those seeking
the B.S. degree complete at least 50 units in technology, science, and mathematics. The particular technical courses chosen reflect the student's special interest in science and technology in society. Specific requirements for the bachelor's degree in STS are as follows:

**BACHELOR OF ARTS**

1. STS Core (eight courses):
   a) Interdisciplinary Foundational course (STS 101)
   b) Disciplinary Analyses (five courses with no more than two courses in each category):
      1) Philosophical perspectives (STS 110, 117, 118)
      2) Historical perspectives (STS 107, 121, 124, 130)
      3) Social Science perspectives (STS 107, 137, 138, 162)
   c) Advanced courses (one course in each category):
      1) Disciplinary analysis (STS 207, 215, 219, 222, 231, 253, 266)
      2) Senior Colloquium (STS 200)

2. Technical Literacy (five courses):
   a) Computer literacy, normally demonstrated by successfully completing Computer Science 105 or its equivalent.
   b) Science or engineering literacy demonstrated by one of the following:
      1) Completing a four-course sequence (minimum of 12 units) in one field of engineering or science (sample sequences available in the STS office).
      2) Completing four of the following "Engineering Fundamentals" courses: Engineering 14, 15, 20, 30, 40, 50, 60, 70 (see the descriptions in the "School of Engineering" section of this bulletin).

3. Thematic Concentration (minimum of 20 units, at least five courses, one from each of those designated on the appropriate concentration course list as "foundational" and "advanced"). Thematic Concentrations are organized around an STS-related problem or area. The following Thematic Concentration topics have been preapproved: the intersections of technology and science with aesthetics, development, history and philosophy, information and society, public policy, social change, and work and organizations.

   Course lists for these concentration topics are available in the STS office. A student selecting one of the certified topics may include one or more courses not on the corresponding course list if they are germane to the concentration and meet the student's special interests. Alternatively, the student may choose to design a Thematic Concentration topic and course package subject to program approval. Each Thematic Concentration, certified or self-designed, requires the signature of an appropriate faculty adviser. See the program chair for details.

**BACHELOR OF SCIENCE**

The student pursuing the B.S. degree shall complete the STS Core and a structured package of at least 50 units of technical courses intended to enable students to understand socially significant technical phenomena in some field of engineering or science. Introductory courses in mathematics or physics (for example, Mathematics 19 or Physics 19) are normally not counted as parts of this technical depth component.

The B.S. candidate follows one of two models in fulfilling the minimum 50-unit requirement:

1. "Focused Depth": at least 24 units and seven courses in a single field of science or engineering, with the remaining units (except for at most two stand-alone courses) grouped in clusters of at least three courses each in other fields of science or engineering. For example, a Focused Depth package might contain eight industrial engineering, three physics, three mathematics, and three computer science courses, and one course each in electrical engineering and chemistry.

2. "Clustered Depth": two or more clusters of at least five courses and 15 units each in different fields of science or engineering, with at most two stand-alone courses, and remaining courses, if any, in sequences of three or more courses. For example, a Clustered Depth package might contain five courses each in computer science, electrical engineering, physics, and one course each in industrial engineering and earth sciences, and three courses in civil engineering.

It is strongly recommended that B.S. majors complete Computer Science 106A or its equivalent.

**MINORS**

Students planning careers in many technical and non-technical fields, including business, education, engineering, science, law, medicine, and public affairs, are faced with important STS issues in their professional practice. Therefore, a minor in STS is likely to prove practically valuable as well as intellectually stimulating.

**Requirements**—The STS minor requires successful completion of six courses satisfying the following four requirements:

1. Foundational Course: STS 101
2. One disciplinary analysis course from each of the following three categories:
   a) Philosophical/Ethical Perspectives (STS 110, 115, 117, 174)
   b) Historical Perspectives (STS 121, 124, 130, 132)
   c) Social Scientific/Policy Perspectives (STS 107, 137, 138, 162, 170, 171, 183)
3. Two advanced courses, from one or two of the following categories, building on courses taken under requirements 1 and 2:
   a) Philosophical/Ethical Perspectives (STS 215)
   b) Historical Perspectives (STS 222, 223)
   c) Social Scientific/Policy Perspectives (STS 207, 219, 231, 266, 279)
4. At least one of the courses taken under requirements 1 to 3 must incorporate a weekly small group discussion.

**Note**—Students wishing to use a course not listed above to satisfy one of the requirements for a minor in STS may petition to do so. For details, inquire at the STS office (Bldg. 370, room 109).

**HONORS PROGRAM**

STS offers a limited number of students an opportunity to achieve honors through in-depth study of the interaction of science and technology with society. The honors program is open to students majoring in any field (including STS). Students accepted for this program carry out an honors project, the work for which normally begins in Spring Quarter of the junior year and is completed by mid-May of the senior year. Usually, this project entails writing an honors essay, although occasionally students have been allowed to produce a technical artifact or carry out some other work that itself represents original thinking. When a project results in a work other than an essay, students must also submit an accompanying scholarly exegesis of the work.

**ADMISSION**

Application for admission to the STS honors program is typically made during the student's junior year. By May 15 of that year, interested students must have completed at least two of the four core course requirements listed below for honors and have submitted a detailed formal proposal for their project to the STS Honors Committee (for details on submitting a proposal, see the brochure, Honors Program Requirements, available in the STS office). Students whose proposals are approved may then take from 12 to 15 units of credit for work on the honors project, distributed so as to best support the student's academic progress. Under exceptional circumstances, students may be admitted to the honors program early in Autumn Quarter of the senior year. STS majors pursuing honors in STS or another honors program take STS 200 for 2 units instead of 4 and do not write a research paper for this course. However, failure to complete the thesis will require additional research work in STS 200.

**REQUIREMENTS**

1. Foundational Course: STS 101.
2. Philosophical and Ethical Perspectives: STS 110, or 117.
3. Historical Perspective: STS 107, 121, 124, or 130.
5. Honors Project: an original critical essay (or investigative project with accompanying explanatory essay) on an STS topic of general impor-
COURSES

101. Science, Technology, and Contemporary Society—(Graduate

students register for 201; same as Engineering 130.) Analysis of the

interplay of science, technology, and society in the contemporary U.S.

Topics: the key social, cultural, and values issues raised by contemporary

scientific and technological developments; distinctive features of science

and engineering as socio-technical activities; major influences of

scientific and technological developments on 20th-century society,

including transformations and problems of work, leisure, human values,

the fine arts, and international relations; ethical conflicts in scientific

and engineering practice; and the social shaping and management of con-

temporary science and technology. GER:3b (DR:9)

4-5 units, Aut (McGinn)

107. Technology and Economic Change—(Enroll in Economics 113.)

5 units, Win (Rosenberg)

110. Ethics and Public Policy—(Same as Public Policy 103B.) Ethical

issues in science- and technology-related public policy conflicts. Devel-

ops the capacity for rigorous critical analysis of complex, value-laden

policy disputes. Topics: the natures of ethics and morality; the natures of

and rationales for liberty, justice, and human rights; and the use and abuse

of these concepts in recent and current policy disputes. Cases from:

biomedicine, environmental affairs, the technical professions, communi-

cations, and international relations. GER:3a (DR:8) (WIM)

5 units, Win (McGinn)

114Q. Stanford Introductory Seminar: Environmental Ethics—

Preference to sophomores. Analysis of ethical issues raised by the ways

humans have altered natural and human-made environments in contem-

orary Western societies. Topics: endangered species, wilderness pres-

ervation, climate change, cross-border pollution, toxic waste disposal,

population growth, genetically engineered animals, traffic congestion,

the proliferation of tall buildings, the technological “soundscape,” and

urban public space. Enrollment limited to 12.

3-4 units (McGinn) not given 1999-2000

115. Ethical Issues in Engineering—(Same as Engineering 131.)

Ethical issues in contemporary engineering practice. Topics: the moral

rights and responsibilities of engineers in relation to society, employers,

colleagues, and clients; cost-benefit-risk analysis, safety, and informed

consent; the ethics of whistleblowing; ethical conflicts of engineers as

expert witnesses, consultants, and managers; ethical issues in engineer-

ning design, manufacturing, and operations; ethical issues arising from

engineering work in foreign countries; and ethical implications of the

social and environmental contexts of contemporary engineering. Use of

real-life case studies, guest practitioners, and field research. Limited

enrollment.

4 units (McGinn) not given 1999-2000

117. Art and Technology—(Enroll in Art and Art History 123.)

4 units (Lee) not given 1999-2000

118. Modern Architecture I—(Enroll in Art and Art History 175A.)

4 units (Turner) not given 1999-2000

121. Technology and Culture in 19th-Century America—(Enroll in

History 115.)

4-5 units, Win (Corn)

123. Undergraduate Colloquium: Many Histories of Science—The

Scientific Revolution—(Enroll in History 206P.)

5 units, Aut (Findlen)

124. American Economic History—(Enroll in Economics 116.)

5 units, Aut (Wright)

125. The Emergence of Modern Medicine—(Enroll in History 13.)

5 units, Win (Findlen)

128. The Rise of Scientific Medicine—(Enroll in History 33A.)

5 units, Spr (Lenoir)

130. The Darwinian Revolution—(Enroll in History 133.)

4 units (Lenoir) not given 1999-2000

132. Undergraduate Colloquium: Yesterday’s Tomorrows—Tech-

nology and the “Future” in History—(Enroll in History 267.)

5 units (Corn) not given 1999-2000

137. U.S. Communication Policy—(Enroll in Communication 137.)

5 units (Bar) not given 1999-2000

Science 138.)

5 units, Win (Blacker, Perry, May, Sagan)

140. Information Revolutions: Technology and Forms of Knowl-

edge—The relationship between the development of information tech-

nologies and intellectual/cultural history from antiquity to the present.

Topics: the shift from orality to literacy (and the invention of early

alphabets and writing) in early civilization; the influence of printing

technologies in the Renaissance, Reformation, and Scientific Revolu-

tion; the culture of print in the modern world; technologies of information

management and control; computers, the Internet, and the contemporary

“age of information.”

3 units, Aut (Pang)

150. Sociology of System Disasters—Seminar on the analysis of actual

and projected breakdowns of socio-technical systems. Topics: high

reliability theory; NIMBY and public risk aversion; accidents as normal

phenomena; the need for engineering, sociological, economic, and

political scientific perspectives. Examples: nuclear power, Y2K, interna-
tional monetary flows, etc. Limited enrollment.

4 units, Win (Perrow)

162. Computers and Interfaces: Psychological and Social Issues—

(Enroll in Communication 169.)

5 units, Spr (Nass)

170. Work, Technology, and Society—(Enroll in Industrial Engineer-

ing and Engineering Management 170.) GER:3b (DR:9)

4 units, Spr (McGinn)

171. The Role of Technology in National Security—(Enroll in Engi-

neering-Economic Systems and Operations Research 193/293.)

3 units, Aut (Perry)
183. Media Economics—(Enroll in Communication 183.)
5 units (Bar) not given 1999-2000

190A. B.C. Honors Project—Project for students in STS honors program.
190A. Submission of Proposal
2-5 units, Aut, Win, Spr (Staff)
190B. Continued Study and Writing
2-5 units, Aut, Win, Spr (Staff)
190C. Final Work on Project
2-5 units, Aut, Win, Spr (Staff)

195. Honors Tutorial
7 units, Aut, Win (Staff)

199. Individual Work
7-5 units, Aut, Win, Spr (Staff)

200. Senior Colloquium—Reading/discussion of key analytical and theoretical texts treating the natures and interplay of science, technology, and society. Prerequisites: STS major with senior standing and four STS core courses, or consent of the instructor.
2-4 units, Win (Pang)

ADVANCED UNDERGRADUATE AND GRADUATE

4-5 units, Aut (McGinn)

207. Science and Technology in Economic Growth—(Enroll in Economics 224.)
5 units, not given 1999-2000

215. Computers, Ethics, and Social Responsibility—(Enroll in Computer Science 201.)
4 units, Spr (Johnson)

219. Management and Organization of Research and Development—(Enroll in Industrial Engineering 220.)
4 units, Aut (Barley)

5 units, Spr (Lenoir)

231. Technology and Work—(Enroll in Industrial Engineering 223.)
4 units (Barley) given 2000-01

253. Undergraduate Colloquium: Body Works—Medicine, Technology, and the Body in Late 20th-Century America—(Enroll in History 274A/374A.)
5 units, Win (Lenoir)

266. Communication Policy in Comparative Perspectives—(Enroll in Communication 166/266.)
5 units (Bar) not given 1999-2000

279. Technology, Policy, and Management in Newly-Industrializing Countries—(Same as Industrial Engineering and Engineering Management 279.) Technology is seen as the key to development and prosperity in most parts of the world. Building technological capability in newly-industrializing countries at the national and firm level. What makes technology special, government intervention that affects technology, the concept of technology leader and technology follower environments, the transfer of technology from "leader" countries, indigenous technological capability, human capital, culture and innovation, the role of small firms and new enterprises in technological capability. Managing innovation in firms: how innovation is different in technology-followers, organizing for shop-floor innovation, building an innovation culture, the special role of R&D in followers, the role of design, technology strategy for followers. Cases from Korea, India, Brazil, Singapore, and other NICs.
2-4 units, Aut (Forbes)

299. Individual Graduate Work
1-5 units, Aut, Win, Spr (Staff)

RELATED DEPARTMENT OFFERINGS
ENGINEERING

1. The Nature of Engineering
3 units, Aut (Freyberg)

HISTORY

152. American Spaces: An Introduction to Material Culture and the Built Environment—(Same as American Studies 152.)
5 units, Spr (Corn)

MATERIALS SCIENCE AND ENGINEERING

159Q. Stanford Introductory Seminar: Research in Japanese Companies
3 units, Spr (Sinclair)

POLITICAL SCIENCE

125. The Rise of Industrial Asia
5 units, Win (Oi, Oksenberg, Rohlen, Rowen, Staff)

OVERSEAS STUDIES

Descriptions of these courses are in the "Overseas Studies" section of this bulletin or at the Overseas Studies office, 126 Sweet Hall.

BERLIN

117V. The Industrial Revolution and its Impact on Art, Architecture, and Theory
5 units, Aut (Neckenig)

119V. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity—(Same as Overseas Studies 143U.)
4 units, Spr (Neckenig)

120V. Industry, Technology, and Culture, 1780-1945
4 units, Win (Neckenig)

FLORENCE

125V. The Scientific Revolution: From the Renaissance to the 18th Century—(Same as Overseas Studies 215V.)
4-5 units, Win (La Vergata)

SLAVIC LANGUAGES AND LITERATURES

Emeriti: (Professors) Joseph Frank*, Joseph A. Van Campen; (Assistant Professor) Elisabeth Stenbock-Fermor
Chair: Gregory Freidin
Professors: Lazar Fleishman, Gregory Freidin, Richard D. Schupbach
Associate Professor: Monika Greenleaf (on leave Winter, Spring)
Assistant Professor: Gabriella Safran
Senior Lecturer: Rima Greenhill
Lecturers: Marina Brodskaya, Serafima Getty
Visiting Professors: Oksana Bulgakowa, David Frick, Douglas Hofs-tadter, Andrei Zorin

* Recalled to active duty.

The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy. Particular requirements for each degree are described below.
**UNDERGRADUATE PROGRAMS**

**BACHELOR OF ARTS**

The Department of Slavic Languages and Literatures (Slavic) offers two concentrations for undergraduate majors: Russian Language and Literature, and Russian Language, Culture, and History.

**Writing in the Major**—All Stanford undergraduates who entered in 1996-97 or thereafter are required by the University to pass at least one writing-intensive course in their field of concentration in order to graduate. Majors in Russian Language and Literature or Russian Language, Culture, and History may satisfy the writing requirement by enrolling in and receiving a passing grade in Slavic 146.

**Overseas Studies**—The department encourages students to enhance their education with a term abroad. For information about the Stanford-in-Moscow program, see the “Overseas Studies” section of this bulletin or the Overseas Studies office. Most credits earned in Moscow can be applied to both undergraduate concentrations. Cultural awareness and language ability are enhanced by living with a Russian family in Moscow.

**RUSSIAN LANGUAGE AND LITERATURE**

The concentration in Russian Language and Literature is designed for those students who desire to gain a firm command of the Russian language and to study the nation’s literary tradition. Emphasis is placed on the linguistic and philological study of literature, as well as the history of Russian literature and related media in the broader context of Russian culture. Students may explore historically related literary traditions (for example, French, German, English), as well as other related fields. The Russian Language and Literature concentration also welcomes students with an interest in Russian and Slavic linguistics.

**Prerequisites**—Successful completion of Slavic 51, 52, 53, or the equivalent, as determined by the results of the department placement examination, is a prerequisite for a concentration in Russian Language and Literature.

**Requirements**

Candidates for the A.B. degree with a concentration in Russian Language and Literature must complete an additional 55 units according to the following distribution.

**Russian Language**—A minimum of 15 units selected from the following Slavic Languages and Literatures courses: 111, 112, 113, 177, 178, 179, 181, 182, 183.

**Russian Literature**—The 20-unit core literature sequence consisting of the following Slavic Languages and Literatures courses: 145, 146, 147, 187, 188.

**Electives**—Students must take 20 units of electives embracing at least two of the following categories: (1) Russian language or linguistics, (2) Russian literature, (3) historically related literatures. These courses are selected in consultation with the undergraduate director. With department permission, work in related academic fields (for example, anthropology, communications, political science, religion, sociology) may apply toward the degree requirements.

Majors who concentrate in Russian Language and Literature must earn a grade point average (GPA) of ‘C’ or better in order to receive credit toward the major.

**RUSSIAN LANGUAGE, CULTURE, AND HISTORY**

The concentration in Russian Language, Culture, and History is for students who would like to obtain a firm command of the Russian language and to pursue a broad, interdisciplinary study of Russian literature, other expressive media (including film), as well as cultural traditions and institutions. Emphasis is placed on the relation of the Russian literary tradition to disciplines that have enriched the historical understanding of Russian literature: primarily history, but also anthropology, communications, political science, and sociology.

**Prerequisites**—Successful completion of Slavic 51, 52, 53, or the equivalent as determined by the results of the department placement examination, is a prerequisite for a concentration in Russian Language, Culture, and History.

**Requirements**

Candidates for the A.B. degree with a concentration in Russian Language, Culture, and History must complete an additional 55 units according to the following distribution.

**Russian Language**—A minimum of 15 units selected from the following Slavic Languages and Literatures courses: 111, 112, 113, 177, 178, 179, 181, 182, 183.

**19th-Century Russian Literature and History**—A minimum of 8 units chosen from the following courses or the equivalent: Slavic 145, 146; History 120B and 121. Students must choose one course from Slavic and one course from History.

**20th-Century Russian Literature and History**—A minimum of 8 units chosen from the following or the equivalent: Slavic 147; History 120C. Students must choose one course from Slavic and one course from History.

**Electives**—In order to complete the basic degree requirements, students must take 24 additional units of course work embracing at least two of the following categories: (1) Russian language, (2) Russian literature, (3) Russian history. These courses are selected in consultation with the undergraduate director. With department permission, work in related academic fields (for example, anthropology, communications, political science, religion, sociology) may apply toward the degree requirements.

Majors with a concentration in Russian Language, Culture, and History must earn a GPA of ‘C’ or better in order to receive credit toward the major.

**MINORS**

The Department of Slavic Languages and Literatures offers three undergraduate minor programs in Russian Language, Literature, and Culture.

The minor program is designed for students who, while pursuing a major in another program, seek a comprehensive introduction to Russian culture, whether primarily through (1) Russian language courses; or (2) a combination of minimal proficiency in Russian and courses in the history of Russian culture; or, (3) courses on Russian literature in translation and, depending on the student’s interest, other forms of the country’s cultural expression as well as its social institutions. Students seeking a Slavic minor are particularly encouraged to take advantage of Stanford’s Overseas Studies Program in Moscow.

**RUSSIAN LANGUAGE**

**Prerequisites**—The minor concentration in Russian Language requires the successful completion of Slavic 1A, 2B, 3C (First-Year Russian) and Slavic 51, 52, 53 (Second-Year Russian), or a demonstrated equivalent competence as determined by the departmental Russian language placement examination.

**Requirements**—Candidates for the A.B. degree with a minor concentration in Russian Language must complete 24 units of Russian language and literature courses according to the following distribution: 12 to 15 units selected from Slavic 111, 112, 113, 177, 178, 179, 181, 182, 183. The remaining 9 to 12 units should be selected from Slavic 145, 146, 147, 187, 188, other monograph courses offered by the Department of Slavic Languages and Literatures or, with the approval of the Slavic department’s undergraduate adviser, in history, politics, linguistics, or other relevant programs.

**RUSSIAN LANGUAGE, LITERATURE, AND CULTURE**

**Prerequisites**—The minor concentration in Russian Language, Literature, and Culture requires the successful completion of Slavic 1A, 2B, 3C (First-Year Russian) or the equivalent as determined by the departmental Russian language placement examination.

**Requirements**—Candidates for the A.B. degree with the minor concentration in Russian Language, Literature, and Culture must complete 28 units according to the following distribution:...
1. A minimum of 16 units of courses on literature and culture selected from the following Slavic Languages and Literatures courses: two quarters in the 145, 146, 147 sequence (Russian Literature in English Translation); or one quarter in the 145, 146, 147 sequence and one quarter in the 187, 188 sequence (Russian Poetry; prerequisite: Second-Year Russian); and, at least one monograph course focusing on a single writer.

2. 12 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the Slavic department's undergraduate adviser, in history, linguistics, politics, or other relevant programs.

RUSSIAN CULTURE

Candidates for the A.B. degree with the minor concentration in Russian Culture must complete 36 units according to the following distribution: a minimum of 20 units of courses on literature and culture selected from the following Slavic Languages and Literatures courses—three quarters in the 145, 146, 147 sequence (Russian Literature in English Translation) and two monograph courses focusing on a single writer. In addition, one course in Russian history is selected from History 120B or 120C. No knowledge of Russian is required.

Electives—11 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the Slavic department’s undergraduate adviser, in art, history, linguistics, political science, or other relevant programs.

The deadline for minor declarations in all concentrations is no later than the last day of the third quarter before degree conferral.

HONORS PROGRAM

Students in either concentration with a grade point average (GPA) of ‘B+’ or better in their major courses are eligible to participate in the department’s honors program. In addition to the basic program requirements above, honors students must also complete the following:

1. One advanced course, usually taken during the Spring Quarter of the junior year and related to the area of the student’s expected research. Majors in either concentration who propose a senior project in literature must take a course in literary or cultural theory. Students concentrating in Russian Language, Culture, and History and pursuing a project in cultural history are required to take a course in literary or cultural theory, or a graduate seminar in the area of their topic. Students concentrating in Russian Language and Literature who propose a senior project in Russian language select their course in consultation with the undergraduate director.

2. Slavic 199, Individual Work: a minimum of 8 units during the senior year. To qualify for honors, the candidate must receive a grade of 'B' or better on the thesis or project completed during this period.

COTERMINAL PROGRAM

The department allows a limited number of undergraduates to work for coterminal A.B. and A.M. degrees in Slavic Languages and Literatures with a concentration on Russian. In addition to University requirements for the A.B. degree, the student must:

1. Submit an application for admission by January 31 of the senior year. Applicants must meet the same general standards as those seeking admission to the A.M. program. Applicants must submit: an application for admission; a written statement of purpose; a transcript; and three letters of recommendation, at least two of which should be from members of the Department of Slavic Languages and Literatures faculty.

2. Meet all requirements for both the A.B. and A.M. degrees. They must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 216 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three graduate-level courses.

GRADUATE PROGRAMS

MASTERT OF ARTS

University requirement for the A.M. degree are discussed in the "Graduate Degrees" section of this bulletin.

Admission—The requirements for admission to the master's degree program in Russian are:

1. A Bachelor of Arts degree (or its equivalent) from an accredited college or university.

2. A command of the Russian language sufficient to permit the student to do satisfactory graduate work in an area of specialization.

3. A familiarity with Russian literature sufficient to permit the student to perform adequately in courses at the graduate level.

The applicant’s previous academic training in Russian language and literature must normally serve as a tentative indication of competence. Accordingly, the department does not ordinarily consider applications from students who have not had at least three years of college Russian and some undergraduate training in Russian literature of the 19th and 20th centuries.

Before registering for the first quarter’s work in the department, cataloging graduate students are required to take placement examinations in language and literature. Students who fail to perform satisfactorily on such examinations must register for remedial courses in the areas in which they are deficient. Such remedial courses, normally completed within the first three quarters of residence, carry no credit toward either the A.M. or the Ph.D. degree.

Course Requirements—Candidates for the A.M. who are not also candidates for the Ph.D. should plan course work that ensures adequate preparation for the A.M. final examination at the end of the third quarter of work. Ph.D. candidates with a concentration in language and linguistics should include in the first year’s work any courses needed for the A.M. examination in that area. Ph.D. candidates with a concentration in literature should attempt to include as many of the department’s basic course offerings as possible in the first-year program to ensure sufficient time to complete the A.M. thesis during the fifth quarter of registration. In any case, course work should be planned in consultation with the graduate adviser, whose written approval of the overall course load is required.

Candidates for the A.M. must complete a program of 36 units, of which 27 units must be selected from courses given by the department. The other 9 units may, with approval of the candidate's adviser, be selected from courses in related fields. Of the 27 units in the department, a minimum of 9 must be in language and a minimum of 9 in literature. The remaining 9 may be distributed in accordance with the needs and interests of the student, and with the advice and approval of the department adviser.

No credit toward the A.M. degree is allowed for first- or second-year courses in non-Slavic languages required for the Ph.D. degree.

The A.M. Thesis—A requirement for candidates for a Ph.D., the A.M. thesis represents a complete article-length research paper (6,000-9,000 words) that, in both form and substance, qualifies for submission to English language professional publications in the Slavic field. The A.M. thesis must be submitted to the adviser no later than the fifth quarter and approved no later than the sixth quarter of registration.

Final Examination—Students not enrolled in the Ph.D. program may either submit an A.M. thesis or take a final examination. In the latter case, regardless of the area of specialization, the student must demonstrate in a written examination: (1) command of the phonology, morphology, syntax, and lexicology of contemporary Standard Russian sufficient to teach beginning and intermediate courses at the college level; (2) ability to read contemporary Standard Russian sufficient to assist students studying contemporary Russian poetry or literary prose; and (3) sufficient familiarity with Russian literature of either the 19th or 20th century to handle successfully survey courses dealing with a chosen period of specialization.

The examination should be passed at the end of the final quarter of required course work.
MASTER OF ARTS IN TEACHING

The degree of Master of Arts in Teaching is offered jointly by the department and the School of Education. It is intended for candidates with teaching credentials or relevant teaching experience who wish to further strengthen their academic preparation. Requirements for the degree are outlined in the "School of Education" section of this bulletin. The program includes 45 units, of which 25 must be in the teaching field and 12 in education. Specific language requirements are established in consultation with the department.

DOCTOR OF PHILOSOPHY

University requirement for the Ph.D. are discussed in the "Graduate Degrees" section of this bulletin.

Students enrolled in the Ph.D. program in Slavic Languages and Literatures are expected to fulfill the following requirements:

1. Minor or Related Fields: during the course of study, students must develop substantial expertise in a field contiguous to the area of specialization. A candidate may elect to present a full minor or, in consultation with the graduate adviser, develop a special program in a related field.

   a) Related Field: a student is required to complete a sequence of basic courses (12 units) in a chosen discipline outside the Department of Slavic Languages and Literatures. The choice of patterns is one of the following:
      1) A sequence of three courses in one West European literature, selected in consultation with the adviser, or
      2) three basic courses in comparative literature to be selected in consultation with the graduate adviser and the Department of Comparative Literature.

   b) Minor: if the student elects a minor (for example, French, German, Spanish, or Russian history), he or she should take six graduate courses in that department with a minimum of 20 units at the graduate level, according to the minor requirements established by that department. Students considering minors in other areas, such as Asian languages, English, or comparative literature, should consult with the adviser, the Chair of the Department of Slavic Languages and Literatures, and the chair of the minor department. Students who wish to enroll in the Graduate Program in the Humanities should apply there.

2. Admission to Candidacy: candidates should read carefully the general regulations governing the degree, as described in the "Graduate Degrees" section of this bulletin. No student is accepted as a candidate until the equivalent of the A.M. degree requirements, including the A.M. thesis described above, are completed. (Ph.D. students in literature who may not opt for a written examination.) Admission to candidacy is determined by the end of the fifth quarter of graduate studies. The candidate by that time must have demonstrated commitment to graduate studies by completion of a minimum of 60 quarter units of credit and with a grade point average (GPA) of 'B+' or better. Students specializing in literature, or to Russian intellectual history. (Students specializing in Slavic linguistics are excused from this portion of the examination if they have completed Slavic 211, 212, and 213 with a GPA of 'B-' or better.)

3. Proficiency Test: administered for all entering graduate students, this test determines whether the student's knowledge of Russian language and literature falls below the department's standard. Students who fail to excel in this test are asked to complete appropriate courses in the first year of graduate study.

4. Course Requirements: before qualifying for the department oral and written examinations, a Ph.D. candidate is expected to accumulate at least 72 quarter units of credit for courses taken while in graduate school. No less than half of this course work (36 units) must be done in the Department of Slavic Languages and Literatures, including at least 12 units of credit for seminar-level courses. (All entering graduate students are expected to enroll in Slavic 200.) The candidate must submit to the department's Academic Progress Committee three seminar-level papers completed at the Department of Slavic Languages and Literatures, as well as the A.M. thesis.

5. Foreign Languages: a candidate must demonstrate reading knowledge of French and German by passing written examinations.

6. Examinations: a candidate must pass the departmental general qualifying examinations. The written part covers:
   a) The history and structure of the Russian language and its relationship to the other Slavic languages. (Students specializing in literature are excused from this portion of the examination if they have completed Slavic 211, 212, and 213 with a GPA of 'B-' or better.)
   b) The history of Russian literature, including its relationship to the development of other Slavic literatures, or West European literature, or to Russian intellectual history. (Students specializing in Slavic linguistics are excused from this portion of the examination if they have completed, with a GPA of 'B-' or better, Slavic 221, 222, and either 187 or 188. They should also have taken Slavic 245, 246, and 247, or show equivalent training.)

   The oral portion follows shortly after the successful completion of the written portion. The department oral examination is designed to test the students' knowledge of the major cultural and literary trends in a period of their choice. It can be used most profitably as an opportunity to do intensive reading in the period of a candidate's projected dissertation work. Preparation for the oral should begin immediately following the successful completion of the department's written examination. After consulting with members of the faculty, the student proposes a reading list, which, once approved, serves as the basis for the examination. The exam structure requires that the student make an opening presentation on a topic or set of topics of particular interest or relevance to the period in question. After an open discussion of the presentation, each examiner is given the chance to question the student on other topics related to the reading list.

   Following the department examinations, a candidate must pass a University oral examination which is a defense of a dissertation proposal covering content relevant to the area of study, rationale for the proposed investigation, and strategy to be employed in the research.

   Specialization—Candidates in Slavic Languages and Literatures specialize in literature and related media. Candidates may draw up individual programs of study and research in consultation with the graduate adviser. Requirements vary according to the nature of the specialized program requested.

   Continuation—Continuation in the Ph.D. program is contingent on: for first-year students, a high quality of performance in course work (decided by department evaluation); for second-year students in literature, an A.M. thesis; and, for linguistics students, a written examination based on course materials and a reading list. Both thesis and written examination should be completed no later than the end of the second quarter of the second year.

Course Work, Breadth Requirements, and Overall Scheduling—

1. Candidates for the Ph.D. degree are allowed as much freedom as possible in the selection of course work to suit their individual program of study. However, candidates are held responsible for all of the areas covered by the general examinations, regardless of whether they have registered for the department's offerings in a given field. For this reason, it is strongly recommended that before taking Ph.D. examinations, students specializing in literature complete seminar-level work directly related to the following broad areas:
   a) Russian poetry
   b) the Russian novel
   c) 20th-century Russian literature
   d) 19th-century Russian literature (the Age of Pushkin and after)
   e) 18th-century Russian literature (from the early 1700s to the Age of Pushkin)
   f) medieval Russian literature
g) a monograph course on a major Russian author
h) theory of literature

Students may not normally register for individual work in a given area until they have covered the basic course offerings in that area. First-year students may register for individual work only under special circumstances and must obtain the written approval of the graduate adviser. Those candidates who are also candidates for the A.M. degree should consult the course requirements for that degree in planning their first-year's work. The A.M. thesis or written examination should be completed by the end of the fifth quarter of graduate study at the latest. The remainder of the second year should be devoted to course work preparing the student for the general qualifying examination and to fulfill the requirements of the minor, if any. The department's general qualifying examinations must be taken by the end of the first quarter of the third year of study; they may be taken during the second year if the student and the adviser feel this is appropriate. During the two quarters following the general qualifying examinations, the student should be concerned primarily with preparation for the University oral examination, which should take place no later than the end of the third quarter of the third year. However, students may, if necessary, do limited amounts of course work not directly related to the dissertation proposal. The fourth year should be devoted to completion of the dissertation.

2. Students possessing the equivalent of the Stanford A.M. are normally expected to adhere to the schedule for the second, third, and fourth years of work outlined under item 1 above.

3. Students in the Ph.D. program are required to do four quarters of teaching in partial fulfillment of the requirements of the Ph.D. degree: three quarters of first-year Russian, and one quarter of literature as a teaching assistant to a faculty member (usually for one of the survey courses in translation: 145, 146, 147). While teaching a section of first-year Russian supervised by a faculty member, students are required to enroll in the department's teaching colloquium (Slavic 206A,B,C). In addition, students must enroll in Slavic 207D, the department's TA preparatory course, which is offered to all graduate students in the Spring Quarter preceding their first quarter of language teaching. While enrolled in Slavic 207D, students participate in actual language teaching sections.

Non-Slavic Language Requirements—Credit toward either the A.M. or the Ph.D. degrees is not given for first- or second-year courses in non-Slavic languages. It is assumed that, on entering the program, the student has a reading knowledge of both German and French or, at the very least, one of these languages. The reading examination in one of these languages must be passed by the end of the first year of study. The reading examination in the second language must be passed by the end of the second year of study. Both language examinations must be passed before the candidate takes the University oral examination, that is, before the end of the third year.

JOINT Ph.D. IN SLAVIC LANGUAGES AND LITERATURES AND HUMANITIES

The Department of Slavic Languages and Literatures participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Slavic Languages and Literatures and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

(WIM) indicates that the course meets the Writing in the Major requirements.

(AU) indicates that the course is subject to the University activity unit limitation (8 unit maximum).

For additional offerings in literature, see the “Comparative Literature” section of this bulletin.

Students interested in languages not listed should contact the Special Language Program in the Division of Languages, Cultures, and Literatures.

GENERAL

This curriculum covers topics of general interest. Courses are open to all students and have no prerequisites. Some courses may be taken for graduate credit. Additional work in the original language may be arranged with individual instructors.

The courses:
1. Introduce students to the major authors and texts in the Russian literary and cultural tradition.
2. Offer broad conceptual frameworks for the understanding of the material covered.
3. Demonstrate the dynamic interaction between cultural texts and a variety of contexts (literary, intellectual, and socio-political).

While these goals are pursued to some extent in all of the courses, the general curriculum may be roughly classified according to contextual emphasis to assist students in choosing courses according to their interests.

Literary Movements and Genres: Slavic 133, 145, 146, 147, 155, 156
Literature and Intellectual History: Slavic 151, 190
Literature and Social History: Slavic 141, 142
Media, Gender, Ethnicity: Slavic 148, 158, 161, 162, 163, 166, 167, 168

13N. Stanford Introductory Seminar: Russia, Russian, Russians—Preference to freshmen. The political and cultural history of Russia and the Russians: prominent persons, prominent events, and how these shape current attitudes and society. Five or six short works by famous Russian authors are analyzed/discussed. GER:3a (DR:7) 3-4 units, Spr (Schupbach)

14N. Stanford Introductory Seminar: Oedipus in Russia—Identity Narratives and Generational Conflict in Modern Russian Fiction and Film—Preference to freshmen. Discuss/analyze Freud’s rendering of the Oedipus story by confronting it with the treatment of identity confusion and generational rivalry in modern Russian fiction and film, against the background different from both Freud’s Vienna and Sophocles’ Athens. Can literature and art be seen as an elaboration of the Oedipus Complex with the social displacing the psychological; can Freud’s Oedipus be seen as a displaced elaboration of a modern social drama of dislocation and multiple identity? Works: Freud’s The Origin of Psychoanalysis, Totem and Taboo, Moses and Monotheism; Turgenev’s Fathers and Sons; Chekhov’s Seagull; Babel’s Red Cavalry and “Sunset;”; S. Eisenstein’s Alexander Nevsky (1938) and Ivan the Terrible (1946); Mikhail Bulgakov’s The Master and Margarita (1940). Enrollment limited to 12. not given 1999-2000

65Q. Stanford Introductory Seminar: Art, Music, and Poetry of the Russian Avant-Garde—Preference to sophomores. Interrelations of poetry and other arts during the Avant-Garde era. The impact of the new technological civilization on the character of artistic experiments. Readings of the main works of Russian avant-garde poetry in the context of changes in the language of visual arts (Futurism, Cubism) and music (Scriabin, Prokofiev, Stravinsky). not given 1999-2000

77Q. Stanford Introductory Seminar: Russia’s Weird Classic—Nikolai Gogol—Preference to sophomores. The work and life of Nikolai Gogol, the eccentric founder of “Fantastic Realism,” based on the work written in various genres and created in various stages of his literary career. The relationship between Romanticism and Realism in Russian literature (the so-called “Natural School” of the 1830-40s), and between the popular Ukrainian culture and the “high” Russian and W. European traditions in Gogol’s oeuvre. Gogol’s influence on subsequent Russian literature (Dostoevsky) and the impact of his work on 20th-century modernist literature, painting, theater, music, and art (Vladimir Nabokov’s literature of the absurd, Dmitry Shostakovich, Vsevolod Meyerhold, Marc Chagall). Critical interpretations of Gogol (Freudian, Marxist, formalist, post-modern). Readings: The Bewitched Place, The Portrait...
The Diary of a Madam, The Nose, The Overcoat, the novel Dead Souls, and the comedies The Government Inspector, and Marriage.

100. History of Russian Music—Introduction to Russian culture through the medium of Russian music, and discussed in the context of Russian literature, painting, and societal life. The main periods, styles, and major figures in the history of the Russian musical culture of the 19th (Glinka, Tchaikovsky, Borodin, Mussorgsky) and 20th century (Rachmaninov, Scriabin, Stravinsky, Prokofiev, Shostakovich, and contemporary composers); various genres of orchestral, instrumental and vocal music, opera, and ballet. The relationship of Russian musical culture and European musical schools. The role of oriental traditions, themes, and elements (Jewish, Georgian, Persian, etc.) in Russian classical music. Distinct features of Russian performers (Chaliapin, Rachmaninov, Hefetz, Horowitz, et al.).

110. Russian “Crash” Course for Departing Students—For students taking the Intensive Language Course in Moscow. Overview of the Cyrillic alphabet and grammar and an introduction to Russian life and manners: How does one get from Point A to Point B on the subway? What is the polite way to refuse yet another portion, etc. (AU)

1 unit, Spr (Schupbach)

133/233. Literature and Culture in East-Central Europe, 1945-2000—Focus is on Poland, and the former Yugoslavia and Czechoslovakia. Literature and film through, and in relation to: multi-ethnic states and multi-ethnic cleansing; coming to terms with historiographies of national honor and shame; censorship, “gray zones,” and emigration; the Czech Spring and the Polish August; what to do once “They” have gone. Novels and poems by: Andric, Gombrowicz, Vaculik, Konwicky, Huelle, Miledinovic. Films by Wajda and Forman. (In English)

3-4 units, Spr (Frick)

141/241. Revolution in Russian Theater 1898-1930—Russian dramatic art 1898-1930, exploring the interaction of the aesthetic revolution in theater and the political revolutions of 1905, 1917 and the 1930s (the Stalin Revolution). The new concepts of drama and its mise-en-scene (the director-theater, new forms of theatrical space, “intervention” of the spectators, the interrelationship between sound and image, new concepts acting). Plays by Chekhov, Blok, Khlebnikov, Mayakovsky, Babel, Tretiakov, Erdman, Bulgakov; and the theater-concepts of Stanislavsky and Meyerhold between 1898 and 1930.

not given 1999-2000

142/242. Literature and Formation of State Mythology in Russia from Catherine II to Nicholas I—Dramatic political, cultural, and ideological changes in the 18th century contributed to the deep crisis of traditional religious interpretations of the state and its functions. Russia had to create a new mythology which would legitimize its imperial expansion and new cultural orientation. Literature served rulers and state ideologues as a reservoir of metaphors to formulate their values and projects. The four major attempts at creating a new national ideology starting with the reign of Catherine II. Readings in literary texts, historical documents, and political pamphlets. Recommended: reading knowledge of Russian and French. (In English)

4 units, Win (Zorin)

145/245. The Age of Experiment (1820-1850)—The formative period of Russian literature. Recognized "classics" (“Pushkin’s Eugene Onegin, The Belkin Tales, The Captain’s Daughter; Lermontov’s Hero of Our Time; Gogol’s Petersburg Tales and Dead Souls) are considered in the context of “local” literary and stylistic developments and of contemporary European trends. GER:3a (DR:7)

3-4 units, Aut (Fleishman)

146/246. The Age of Transgression: Russian Literature from Turgenev through Tolstoy—In the half-century before the Russian Revolution, educated people began to debate the reform of human behavior. Censorship inspired some to conceal political messages in fiction. They wrote about murderers, adulterers, and terrorists, whose transgressions challenged social, ethical, and aesthetic boundaries. Dostoevsky’s Crime and Punishment, Tolstoy’s Anna Karenina, and Bely’s Petersburg, are read focusing on their common techniques and themes, especially the idea of the modern city as the locus of crime and self-invention. These novels are contrasted to more provincial texts by masters of short forms (Turgenev, Leskov, and Chekhov). GER:3a (DR:7) (WIM)

3-4 units, Win (Safran)

147/247. The Age of Revolution: Russian Literature and Culture since 1917—Open to all undergraduates. Introduction to modern Russian culture, focusing on literature and other arts in the context of Russia’s Soviet and post-Soviet history. The role of literature and the arts in the creation of Soviet civilization. Post-Soviet Russian culture. Texts in English translation. GER:3a (DR:7)

3-4 units, Spr (Fleishman)

148/248. The Factory of the Eccentric Actor (1921-1929): Between Theater and Film, Avant-Garde and Trivial Genres, East and West—Open to advanced undergraduates and graduate students. The experimental group FEKS (Factory of the Eccentric Actor) was founded in 1921 in Petrograd and worked in theater and film until 1929. They developed a specific system of actor training, near to Meyerhold’s biomechanics, and collaborated with Russian Formalists (Yuri Tynianov, Boris Eikhenbaum, Viktor Shklovsky). Revolution was conceived by the FEKS as a carnival, and the avant-garde had to assimilate, according to their program, trivial genres. FEKS practiced in their films “defamiliarization” of the Russian classics by using the stereotypes of German and American cinema. Gogol’s Overcoat was staged as a German expressionist film, the uprising of Russian aristocrats against the monarchy in 1825 as a melodrama with the elements of the American Western and the Gothic novel. The problem of intertextuality in film. Recommended: knowledge of Russian.

4 units, Aut (Bulgakowa)

151. Dostoevsky—Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture and intellectual history. Lectures and discussion section. GER:3a (DR:7)

4 units, Win (Frank)

155/255. Anton Chekhov and the Turn of the Century—Chekhov’s art in its Russian literary, historical, philosophical, and political contexts. Primary readings from Chekhov’s short stories and major plays; supplemental readings for graduate students from Chekhov’s letters and works by his friends and contemporaries, such as Leskov, Tolstoy, Korolenko, and Gorky. GER:3a (DR:7)

3 units, Spr (Zorin)

156. Nabokov and Modernism—Stories, novels, and film scripts in the context of other modernist writers (Bergson, Proust, Joyce), media (photography and film), and 20th-century events and intellectual discourses (Marxism-Stalinism, avant-garde, Freudianism, American post-war cultural ideology), whose influences Nabokov belittled or ignored. Critical approaches that elude the author’s control. Readings: Despair, Camera Obscura, The Gift, Bend Sinister, Lolita, Pale Fire, excerpts of Eugene Onegin’s Commentary and Speak Memory.

not given 1999-2000

158/258. Sergei Eisenstein—Open to undergraduate and graduate students. His vision of film theory, and its main theoretical models. Through an analysis of his major films (Strike, Battleship Potemkin, October, The General Line, Que viva Mexico!, Alexander Nevsky, and Ivan the Terrible), radical innovations of the medium are explored: new modes of narration, editing, and acting; audiovisual synchronization; and deep-focus composition and an unfolding foreground of the film image. This film-poetics interrelates with other arts of the Avant-Garde era (Futurism
and Cubism in painting, Constructivism in architecture and theater, new schools of expressive movement in ballet, the modernist literary experiments of Joyce). The film theoretician Eisenstein creates for these films a rich systematic context that includes new theories in psychology and psychoanalysis, linguistics, and anthropology.

not given 1999-2000

161/261. Poetess: The Grammar of the Self when the Poet is a Woman—Seminar. Readings of lyrical works by women poets from the U.S., Russia, Eastern Europe, and Germany (Dickinson, Moore, Brooks and the Harlem Renaissance, Bishop, Akhmatova, Tsvetaeva, Sachs, Plath, Cisneros, Angelou, Graham, Howe, and Szymborska). The historical and cultural context enriches our understanding of such theoretical and practical issues as “breaking and entering” the male preserve of “high poetry” in different eras; the interaction of written and oral, political and performative modes of expression; new representations of the feminine body and experience in the visual arts; and the development of a female lineage and modes of poetic legitimation, association, and inspiration.

not given 1999-2000

162/262. Gender Images in Film—Seminar, open to undergraduate and graduate students. Film creates permanent new images of femininity. One of its conscious prerequisites is the notion of social stereotypes, whose alternation is caused by the arrival of a new historical epoch. The development of enduring images of the film heroine between 1914 and 1990, through comparison of the Russian, American, and W. European cinema, and analytical approaches to them from feminist film theory.

not given 1999-2000

163. Beyond Fiddler on the Roof: The Jewish Experience in Eastern Europe through Literature and Film—Examines stereotypes about Jewish life in Eastern Europe in the last two centuries. Rather than looking at Eastern European Jews as living in a pattern that changed only when interrupted by revolution, emigration, or Holocaust, there was a constant play of forces of rebellion and reaction; rather than imagining Jewish communities as isolated, there were interactions among Jews and non-Jews. Readings: Yiddish classics by Sholem Aleikhem, L. Peretz, B. Singer, and recently rediscovered women writers; Russian and Polish texts by Jewish writers (Osip Mandelstam, Isaac Babel, Felix Roziner, Bruno Schulz, and Hanna Krall); stories by non-Jews, (Eliza Orzeszkowa and Anton Chekhov); and four films in Russian, Polish, Yiddish, and English.

not given 1999-2000

not given 1999-2000

166/266. Russia on the Silver Screen: U.S., Western European, and Emigre Cinema—The fantasy of “Russia” in German, French, and American cinema, 1920-90. Films created by Russian emigrés in Berlin, Paris, and Hollywood as odd models, constructing the imaginative national identity according to different cultural stereotypes of “Russia.”

4 units, Spr (Bulgakowa)

167/267. Models of Film Analysis—Open to undergraduates and graduate students. Introduction to the aesthetics of film, its topics, basic principles of film form, and different approaches to them. The objects of study are fictional and non-fictional (American, East and West European) films, the genre-system narrative and non-narrative films; the artistic possibilities of primary film technique (mise-en-scene, image, editing, and sound); and different models of analysis (structuralism, psychoanalysis, feminism).

not given 1999-2000

168/268. Documentary Film and Fiction in Russian and Western Cinema, 1920 to the Present—Documentary films from Dziga Vertov and Robert Flaherty to the present. The marks and conventions of “documentary” and “fiction” in different periods, the “impression of reality,” the technique of its representations, and “boundary works” between genres.

4 units, Aut (Bulgakova)

169. Seminar: Voice and Literature in Russia and America—Introduction to the comparative study of literature through voice and text. In the modern era, prose and poetry have drawn from the productive tension between the spoken words and the objectification of language in writing. The shifting relationships between these modes of expression and the changing representation of voice in text have defined forms of social and cultural identity (gender, race, class, nation) and the notion of literature itself. Concepts from theoretical readings are explored in active dialogue with literary texts from several national traditions and genres.

not given 1999-2000

190. Modernism and the Humanities: Tolstoy’s Anna Karenina and the Social Thought of its Time—A “close reading” of Tolstoy’s novel in historical context, followed by a discussion of the novel as a polemic with contemporary social thought: Marx and Engels, John Stuart Mill, Nietzsche, Freud, Emile Durkheim, and Max Weber. Confrontation of modernity and tradition, changes in the institution of family, the question of gender and sex equality; rational thought and religious sentiment, crisis of authority and legitimacy; charisma and routinization; the rise of individualism, estate society vs. class; capital and the modern city; autonomy of art and ideological engagement. GER:3a (DR:7 or 8)

5 units, Win (Freidin)

220A. Verse Translation: From Intuition to Artistry—Seminar focusing on the challenge of translating into modern English from poems in various languages, selected by the student from: Francois Villon, Victor Hugo, Paul Verlaine, Armand Silvestre, Edmond Rostand, Clement Marot, and other French poets; poems by Alexander Pushkin, especially stanzas from his novel in verse Eugenii Onegin, works by Goethe, Rilke, Schiller, Christian Morgenstern, and other German poets; excerpts from Dante’s Inferno, Horace’s Ode to Pyrrha, Wang Wei’s La zhai, a haiku by Basho; etc. Works in English: Shakespeare’s sonnets, poems by Dylan Thomas, and e.e. cummings, which could be translated either into verse in contemporary English or into verse obeying a different set of constraints.

4 units, Spr (Holfstuder)

221. Modernism and the Jewish Voice in Europe—(Same as German Studies 221A.) Open to advanced undergraduate and graduate students. Some of the most haunting literary voices of the 20th century emerged from the Jewish communities of Eastern and Central Europe. The Jewishness of the modernists is thematized, asking whether it contributed to shared attitudes toward text, history, or identity. Their works are situated in specific linguistic traditions, Yiddish, Hebrew, Russian, Polish, or German. Primary readings from Ansky, Bialik, Mandelstam, Babel, Schultz, Kafka, Celan, and others; secondary readings in history, Eastern European literature, and theory, including Marx, Freid, Benjamin, and Arendt.

3-4 units, Aut (Safran, Eshel)

UNDERGRADUATE AND GRADUATE LANGUAGE

By special arrangement with the department, courses numbered 100-159 can be taken for graduate credit. Students are urged to take all three quarters of first-, second-, and third-year language series consecutively in the same academic year.

FIRST- AND SECOND-YEAR LANGUAGE

Note—Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Russian before entering Stanford. All entering students must take Part I (written) of the placement test on-line during the summer, followed by Part II (oral).
to be administered on campus 9/19/99. Consult the Stanford Language Center for further information or see http://language.stanford.edu.

3-5 units, Aut, Win, Spr (Gettys, Staff)

**2D. Accelerated Beginning Russian**
5-8 units, Win (Staff)

**50. Review of Russian Grammar: Repair Russian**—"Mainstreams" the skills of students who do not fit easily into the basic language program, e.g., those whose performance on the Placement Exam is not sufficient to justify placement in 51, or native speakers of the language whose reading and writing skills are impaired, etc. Students successfully completing 50 normally proceed directly into 52; others, particularly "heritage" speakers may enter 112 or 178.
3 units, Aut (Schupbach)

**51,52,53. Second-Year Russian**—Reviews the more difficult areas of the grammar, e.g., numbers, verb conjugation, and aspect, etc., enriches the students’ vocabulary and understanding of the language, and improves their speaking skills.
51.—Grammar is presented through well-known short stories by the leading 19th- and 20th-century Russian writers.
5 units, Aut (Gettys, Staff)
52.—Continuation of 51.
5 units, Win (Greenhill, Staff)
53.—Continuation of 52 with an emphasis on Russian history.
5 units, Spr (Greenhill, Staff)

**52B. Second-Year Russian**—For students returning from the Overseas Studies Program in Moscow.
5 units, Win (Schupbach)

**99. Language Specials**—With consent of department only. See instructor for section number.
1-5 units, Aut, Win, Spr (Staff)

**111,112,113. Third-Year Russian**
111.—Emphasis is on grammar, writing, and conversation. Grammar is presented through readings from an edited version of the *The Golden Calf* (L’ija ì’àì’èêàì’ë ìêàì’ì’àêèì’) Petrov’s humorous and "right-on" view of the Russians at their best and worst. Conversation emphasizes material from contemporary Russian periodicals, films, music, radio, and TV programs.
4 units, Aut (Schupbach, Staff)
112.—See 111.
4 units, Win (Schupbach, Greenhill)
113.—See 111.
4 units, Spr (Schupbach, Greenhill)

**178. Second-Year Russian**—For students returning from the Overseas Program in Moscow.
5-8 units, Win (Staff)

**179. Fourth-Year Russian**—Interactive mini-course in culture, history, and current events. Films, readings from classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Discussions, role-playing, and creative assignments improve oral and written skills. Review and “fine-tuning” of grammar and idiomatic usage. Prerequisites: 111-113, or equivalents.
3 units, Win (Greenhill)

**181,182,183. Fifth-Year Russian**
181,183. The Russians: What Makes Them Different?—Language proficiency maintenance for undergraduates and graduates with four years of Russian or equivalent; appropriate for majors and non-majors with language experience overseas. Content-based advanced language skills are expected for conducting discussions, oral presentations, and writing essays on important issues on contemporary Russia. The Russians’ world: outlook; “folk” psychology; the way Russians see themselves and the rest of the world in ways, habits, and traditions through contemporary prose, newspaper articles, films.
3 units, Aut (Staff)
3 units, Spr (Gettys)
182. See 188.
3 units, Win (Freedlin)

not given 1999-2000

**196. Advanced Topics in Russian Grammar II: Morphology and Syntax**—Problems in government and agreement: verbs, prepositions, quantifiers, and adjectives. Lectures with coordinated exercises. Students not possessing a solid control of Russian morphology must take remedial work. Recommended: at least two years of college Russian or the equivalent.
not given 1999-2000

**198. Comparison of Russian and English**—The ways in which these two languages are similar and different. Starting from Old English and Old Russian, what events have led to their present structures and interaction.
not given 1999-2000

**199. Individual Work**—Open to Russian majors or students working on special projects. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, any quarter (Staff)

**206A,B,C, Practicum in Teaching Russian as a Foreign Language**—Curriculum and lesson planning. Observation and discussion of class-
room techniques in conjunction with teaching beginning Russian. (AU)
1-2 units, Aut (Gettys, Schupbach)
Win, Spr (Gettys)

207D. Introduction to Teaching Russian as a Foreign Language—
Practical approach to teaching Russian to non-native speakers, focusing
on a survey of the features of Russian which present particular difficulties
for students. A survey of the Slavic Languages from the standpoint of
Russian. Preparation of lessons for classes and tutoring of an individual
learning to speak Russian.
3 units, Spr (Gettys, Schupbach)

211. Introduction to Old Church Slavic
not given 1999-2000

212. Old Russian and Old Church Slavic
not given 1999-2000

213. History of the Russian Literary Language—Major structural and
semantic changes from the 10th to the 19th centuries. Prerequisites: 211,
212.
not given 1999-2000

299. Individual Work—For graduate students in Slavic working on
theses or engaged in special work. Prerequisite: written consent of
instructor.
1-12 units, any quarter (Staff)

UNDERGRADUATE AND GRADUATE LITERATURE

115. Humor and Russian Literature—The history of Russian literature
from the standpoint of the humor that it contains, from Old Russian
times to the present. Lectures are in English and may be taken separately
from the discussion sections. (In Russian)
not given 1999-2000

127/227. Boris Pasternak and the Poetry of the Russian Avant
Garde—Pasternak’s work is examined within a broad cultural context to
identify and analyze characteristic features of the Russian avant garde
poetics. Readings in Russian.
4 units, Spr (Fleishman)

129/229. Poetry as System: Introduction to Theory and Practice of
Russian Verse—The history and theory of Russian versification from
the 17th to the 20th century. GER:3a (DR:7)
4 units, Win (Fleishman)

170B/270B. Pushkin in the Romantic Context—(Same as Compara-
tive Literature 170B/270B.) Open to students from comparative and
other literatures, including advanced undergraduates. The ways Pushkin
used current European aesthetic and literary discourses to fashion and
refashion autoportraits in ironic and dynamic interaction. A theoretical
and comparative textual framework is derived from comparative litera-
ture’s study of Romanticism, integrating a variety of perspectives.
Topics: the “fragment” as the quintessentially modern poetic genre; the
morbid elegy as the “genre of entry” for young poets; the real narrative
innovations of Byronism; Russian male “identity” and disempowerment
through the oriental erotic tale; Pushkin’s use of Shakespeare’s chronicle
plays to rewrite Karamzin’s history of Boris Godunov, and his renova-
tion of Gothic conventions for Russian uses; the ability of the concept
“Romantic irony” to shed new light on Eugene Onegin, “Egyptian
Nights,” and Pushkin’s relation to Romanticism.
4 units, Aut (Greenleaf)

185/285. Writing Russia in the Age of Catherine the Great—The
Enlightenment’s boldest experiment: Catherine the Great’s use of west-
ern “regimes of description” (textual and visual) to imagine a legal
Russian state, interactive public spheres and literary culture, and the
parameters of the Russian subject’s interior domain. Catherine’s own
writings, from Shakespearean comedies at the heart of her conception of
a national theater, to her fantasy-impersonations of Europe’s ideal
monarch and her boundary-crossing Autobiography read in the context
of late 18th-century Russian writers’ efforts to produce Golden Age
Culture.
not given 1999-2000

186/286. 18th-Century Russian Literature—Lecture/seminar exam-
ining period literature (poetry, prose, and drama) in its specific cultural
and historical context, with an emphasis on the creation of “modern
Russian literature” as a social institution. The generic diversity of
Russian literature and its relation to Western European models. Close
reading of selected works by major authors, including Lomonosov,
Prerequisite: good reading knowledge of Russian.
4 units, Win (Zorin)

187. Russian Poetry of the 18th and 19th Centuries—Required of all
majors in Russian language and literature; open to undergraduates who
have completed three years of Russian, and to graduate students. The
major poetic styles of the 19th century as they intersected with late
classicism, the romantic movement, and the realist and post-realist
traditions. Representative poems by Lomonosov, Derzhavin, Zhuk-
ovskii, Pushkin, Baratynskii, Lermontov, Tютчев, Некрасов, Пес, So-
loviev. Lectures/discussions in Russian.
not given 1999-2000

188. From Alexander Blok to Joseph Brodsky: Russian Poetry of the
20th Century—(Same as 182.) Required of all majors in Russian
literature. Developments in Russian poetry of the 20th century including
Symbolism, Acmeism, Futurism, and literature of the absurd from
Zinaida Hippius and Andrey Bely to Marina Tsvetaeva and Joseph
Brodsky. Emphasis is on close readings of individual poems. Discuss-
sions in Russian. GER:3a (DR:7)
4 units, Win (Freidin)

189/289. Literature of Old Rus’ and Medieval Russia—From the
earliest times through the 17th century. Lectures on the development of
literary and historical genres and on links between literature and art,
architecture, and religious culture. Readings in English; graduate stu-
dents read in the original.
not given 1999-2000

199. Individual Work—Open to Russian majors or students working on
special projects. May be repeated for credit. Prerequisite: consent of
instructor.
1-5 units, any quarter (Staff)

200. Proseminar in Literary Theory and Study of Russian Litera-
ture—Required of first-year graduate students in Slavic. Introduction to
graduate study in Slavic languages and literatures. Discussion of the
profession, discipline, and literary theory complement theoretical read-
ings and practical exercises in versification and narrative analysis.
4 units, Aut (Freidin)

200A. Introduction to Library and Archival Research in Slavic
Studies—Familiarizes students with major Western language sources
and search methodologies pertaining to the Russian and E. European
are studies. Recommended: knowledge of Slavic languages.
1-3 units, Aut (Freidin)

223A,B. Graduate Seminar: Russian Literature and the Literary
Milieu of the NEP Period—The Problem of Authorship (1921-
1928)—Texts (primarily journal fiction and criticism) deal with the
problem of authorship and are examined in the contemporary literary and
socio-historical context. Emphasis is on non-Party authors (Babel, Eikhe-
baum, Mandelstam, Olesha, Tynianov, Zamiatin, and Zoshchenko).
not given 1999-2000

not given 1999-2000

230C. 20th-Century Russian Literary Theory from Symbolism and Formalism to Semiotics—Survey of Russian theoretical works on literature. The scholarship of Alexander Vesebovsky, Potsevny; theories of Symbolism and Formalism. Symbolist authors (Bely, Blok, Bryusov, Vyacheslav I. Ivanov) are seen in the fusion of their theoretical and poetical work, as the Formalists' school is understood in its correlation to post-Symbolist (Futurists and Acmeist) poetical movements. Postformalist studies of the '30s and '40s (Bakhtin, Florensky, Freydenberg, Polivanov, Propp, etc.) in their relation to contemporary studies of the Prague Circle and the later Moscow-Tartu semiotics school.

not given 1999-2000

240A. Topics in Soviet Civilization: Stalinist Culture in Soviet Russia, 1928-1990—Open to advanced undergraduates and graduates. Seminar on the Stalin era: the First Five-Year Plan in 1928, the Great Retreat and the Great Terror of the second half of the 1930s, the cataclysm of WW II, and the culture of High Stalinism in the postwar period. Focusing on the entire quarter century of Stalinist rule, provides the vicissitudes of an aesthetic and ideological system that was characterized by certain fixed elements and that witnessed significant variations over time. Analysis of the artifacts of Stalinist culture (primarily works of literature, visual arts, and film) in relation to the institutions and elites that produced them and the audiences for which they were intended. The interplay of "texts" (written, visual, and otherwise) and contexts (historical, social, political) is informed by an eclectic set of theoretical perspectives, drawn from the humanities and social sciences. Recommended: knowledge of Russian.

not given 1999-2000

240B. Topics in Soviet Civilization: Stalinist Culture in Soviet Russia, 1928-1953—Open to students who took 240A or equivalent. Guided research and bi-weekly meetings are devoted to the discussion of students' and individual research projects.

not given 1999-2000

270. Pushkin—Pushkin's major poems and prose are accompanied by detailed examination of his cultural milieu. Emphasis is on essential changes in the understanding of literary concepts relevant to this period of Russian literature (poetic genres, the opposition between poetry and prose, Romanticism, etc.).

not given 1999-2000

270C. Pushkin and the Moderns—Graduate seminar pairs a close analysis of Pushkin's major poetic texts with a study of "the Pushkin function" in specific works of 20th-century Russian literature. Prerequisite: knowledge of Russian.

not given 1999-2000

272. Mandelstam and the Modernist Paradigm—His poetry, prose, critical writings, and reception in the context of contemporary letters, scholarship, and politics. The function of poetry in Modern Russian culture. Mandelstam's Acmeist paradigm in Soviet civilization.

not given 1999-2000

278. Tolstoy—Open to exempt undergraduates. Tolstoy's creative evolution from his early and late short fiction (Childhood, The Sevastopol Tales, The Kreutzer Sonata, etc.) and notification (Confession and Anna Karenina), together with the appropriate critical texts. Readings in Russian.

not given 1999-2000

292. Graduate Workshop in Design and Method of Research Projects in Literary and Cultural Studies—Weekly meeting with graduate students working in the area of Russian literature and culture to discuss their nascent and ongoing dissertation projects (A.M. and Ph.D.).

not given 1999-2000

299. Individual Work—For graduate students in Slavic working on theses or engaged in special work. Prerequisite: written consent of instructor.

1-12 units, any quarter (Staff)

305. Russian Critical Traditions—The Russian intelligentsia invested its literature with the highest esthetic and ethical value, then developed a set of critical apparatuses that have inspired Western approaches to text. Readings in theorists from the early 19th to the late 20th century and from the most positivist to the entirely formalist. Possible topics: 19th-century radicals (Belinsky and Dobrolyubov) Future manifestos, the Formalists, Freudian and Marxist models, Bakhtin, and the Tartu semioticians. Readings in English; some familiarity with the Russian canon is presumed.

not given 1999-2000

399A,B,C. Advanced Research Seminar in Russian Literature—Offered as follow-up to 200- or 300-series seminars, as needed. 2-4 units, Aut, Win, Spr (Staff)

AFFILIATED OFFERINGS

HISTORY

322. Graduate Colloquium: Historical Research in Russia, 17th-20th Centuries—Sources, Archives, Paleography 5 units, Spr (Kamenskii)

SOCIOLOGY

Chair: Andrew Walder

Professors: Karen Cook, Mark Granovetter, Michael T. Hannan, Douglas McAdam, John W. Meyer, Susan Olzak, Cecilia Ridgeway, C. Matthew Snipp, Nancy B. Tuma, Andrew Walder

Assistant Professors: Elisa Bienenstock, Robert Freeland, Noah Mark

Lecturers: Andrew Creighton, Ann Hironaka, Kathy Kuipers, Mikl Titma

Courtesy Professors: Larry Diamond, Roberto Fernandez, Joanne Martin, Joel Podolny, Francisco Ramirez, Neil Smelser, Walter Powell

Courtesy Associate Professor: Clifford J. Nass

Consulting Professor: George Bohrastedt

Consulting Associate Professor: Ruth Crompton

Acting Instructor: Evan Schofer

Sociology is concerned with the full spectrum of social behavior (of individuals, small groups, large organizations, communities, institutions, and societies) and provides a strong intellectual background for students considering careers in the professions or business. Students may pursue degrees in sociology at the bachelor's, master's (coterminate), or doctoral levels.

UNDERGRADUATE PROGRAMS

Sociology offers two programs leading to the A.B. degree: the general sociology major and the specialized major. Both are designed around a core curriculum, the intent of which is to ensure adequate coverage of basic sociological knowledge and to provide enough flexibility for tailoring the degree program to fit individual needs and interests. The general major consists of the core curriculum plus a selection of additional
courts intended to provide breadth of exposure to the variety of areas encompassed by sociology. The specialized major consists of the core curriculum plus a concentrated set of courses in one area of sociology. Areas of concentration include Social Psychology and Interpersonal Processes, Organizational Studies, Social Stratification and Inequality, and Political, Economic and Comparative-Historical Sociology. If a specialized major is completed, the student’s transcript will reflect his or her specialized field of study. These programs and the requirements for each are described below.

CORE CURRICULUM AND GENERAL SOCIOLOGY MAJOR

All recipients of the A.B. degree in Sociology must complete a minimum of 60 units of course work in the major. All courses taken to satisfy this 60-unit requirement must be taken for a grade of ‘C-’ or better (except for Sociology 190-193). Related course work from other departments may fulfill part of this requirement, but such work must be approved in advance by a department adviser and must not exceed 15 units. All degree candidates must fulfill the following core requirements:

1. Introduction to Sociology (5). It is recommended that students take it early in their program. It is also suggested for students who are considering a major in Sociology.
2. Methods for Sociological Research (180), or its equivalent.
3. An introductory course in statistics, such as Sociology 181B, Statistics 60, Psychology 60, or equivalent.
4. Classics of Modern Social Theory (170), or an equivalent course in social theory.
5. At least three foundation courses, each from a different area of concentration.
6. Senior Seminar: Honors (200) or Senior Seminar for Majors (201), to be taken by majors during their senior year.

To complete the general Sociology major, the student must complete 20 additional units of work.

SPECIALIZED SOCIOLOGY MAJOR

The department recognizes that some students may wish to engage in more in-depth study than that provided by the major in general Sociology. The specialized Sociology major permits students to pursue a more focused program in one of the four areas of concentration described below. To complete the requirements for the A.B. degree in Sociology with a field designation in Social Psychology and Interpersonal Processes, Organization Studies, Political and Comparative-Historical Sociology, or Stratification and Inequality, the student must (1) complete all the core and foundation curriculum, and (2) complete 20 units of course work in the selected area of concentration.

CONCENTRATION AREAS

Each area identifies a specialized area of inquiry, a set of skills within sociology, and basic preparation for a variety of careers. A brief description of each area follows.

Social Psychology and Interpersonal Processes—This area of inquiry focuses on the social organization of individual identity, beliefs, and behavior; upon social structures and processes which emerge in and define interpersonal interactions. Processes studied include social acceptance and competition for prestige and status, the generation of power differences, the development of intimacy bonds, the formation of expectations which govern performance in task oriented groups, and social pressures to constrain deviance. Foundation courses emphasize the effect of social processes on individual behavior and the analysis of group processes. This area provides excellent training for careers having a significant interpersonal component, including law, management, business, advertising and marketing, medicine and health, education, or social work.

Organizational Studies—This area studies individual behavior within organizations and the behavior of organizations as collective actors, and the factors that affect them. Organizations are the primary tool by which specialized goals are pursued in modern societies; they are found in every sector of modern life. Organizations studied include private profit-making firms and public organizations; voluntary associations and total institutions such as prisons; and small, single purpose companies as well as giant diversified corporations. Foundation courses stress the environmental and technological factors that shape the structure of organizations and the social psychological and interpersonal processes that shape the behavior of individuals within organizations. Careers related to this study include all areas of management and administration: public, business, education; management consulting and analysis; and organizational development.

Social Stratification and Inequality—This area offers a comprehensive overview of various forms of social inequality. It examines the shape and nature of social inequalities; the competition for power; the allocation of privilege; the production and reproduction of social cleavages; and the consequences of class, race, and gender for such outcomes as attitudes, political behavior, and lifestyles. Many courses emphasize changes in the structure of social inequalities over time, and the processes which produce similarities or differences in stratification across nations. Topics include educational inequality, employment history, gender differences, income distributions, poverty, race and ethnic relations, social mobility, and status attainment. Careers related to this field include administration, advertising, education, foreign service, journalism, industrial relations, law, management consulting, market research, public policy, and social service.

Political, Economic, and Comparative-Historical Sociology—This area concerns the emergence, reproduction, and change of political and economic institutions, especially focusing on why and how different political and economic systems appear in different times and places, and how varied are the systems referred to with simple descriptions such as “democracy” or “capitalism.” Transitions among democracy and dictatorship or socialism and capitalism are related to historical patterns and to social structure and organization. The origins and significance for change of social movements, including nationalism and revolutions, are studied in comparative and historical perspective. Careers related to this area include law, government service, and national and international business applications.

CONCENTRATION AREA COURSES

Many of the department courses can be categorized as primarily oriented to one of the four areas of concentration; a few courses are relevant to more than one area. Within each area of concentration, one or more undergraduate foundation courses are identified which provide a general introduction to the area or some portion of it. Courses, classified by area, are as follows:

1. Social Psychology and Interpersonal Processes
   Foundation Courses: 120, 121
   Other Courses: 132, 142, 150, 155, 220-229
2. Organization Studies
   Foundation Course: 160
   Other Courses: 110, 130, 161-169, 260-268
3. Social Stratification and Inequality
   Foundation Course: 140
   Other Courses: 132, 134, 139, 141-149, 150, 240-249
4. Political and Comparative-Historical Sociology
   Foundation Courses: 110, 114, 130
   Other Courses: 111-119, 133, 138, 210-219, 230

MINORS

The minor in Sociology is intended to familiarize students with the basic concepts and methods of the discipline. In addition to ensuring considerable breadth of exposure to the fundamental issues and approaches of the field of sociology, students are encouraged to obtain some depth of exposure to one of the specialized areas of study. The requirements for a minor in sociology are as follows:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sociology 1: Introduction to Sociology</td>
<td>5</td>
</tr>
<tr>
<td>Sociology 180: Methods for Sociological Research</td>
<td>5</td>
</tr>
<tr>
<td>Two Foundation Courses, one each from two of the four concentration areas (e.g., Social Psychology; Organizations; Stratification; Comparative-Historical Sociology)</td>
<td>10</td>
</tr>
</tbody>
</table>
All courses qualifying for the minor must be taken for a letter grade and receive a grade point average (GPA) of 'C-' or higher.

HONORS PROGRAM

Students desiring to undertake an independent scholarly project under the direction of a faculty member are encouraged to apply for admission to the department's honors program. To enter the program, the student must be accepted by a faculty member of the department who agrees to advise on the research and writing of the essay. It is possible in some cases for students to work with faculty advisers in other departments, but such arrangements must be approved by the chair of the Undergraduate Studies Committee. Admission to the program requires a grade point average (GPA) of 'B+' or higher in courses taken within the major, and an overall GPA of 'B' or higher in all undergraduate course work.

Work on the project can begin earlier, but ordinarily is initiated in connection with meeting the course requirements of Sociology 200, Honors Senior Seminar. Students are encouraged to begin designing their honors project in connection with this seminar, in consultation with the seminar leader and a faculty member who is willing to serve as sponsor for the honor's project. If admitted to the program, the work can then be completed during Winter and Spring Quarters.

To formally enter the program, a student must complete an application form from the department office. The form requires the endorsement of the faculty sponsor and is to be accompanied by a brief description of the project to be undertaken and a copy of the student's undergraduate transcript. Prospective candidates must submit the copy of the completed application to the chair of the Undergraduate Studies Committee no later than the end of the third quarter before graduation (typically Autumn Quarter of the senior year).

Honors students may earn up to 12 units credit for work leading to completion of the required honors thesis (excluding units associated with the Senior Seminar). To be eligible for an honors degree, a grade of 'A-' or better must be earned on the honors thesis. If an 'A-' is not earned, the thesis credit counts toward meeting the standard major requirements.

Successful completion of honors in Sociology requires (1) completion of all requirements for the major; and (2) completion of a thesis of honor's quality (a grade of 'A-' or higher). The thesis is due on or before the beginning of the End-Quarter period in the student's final quarter before graduating. If the thesis has been sponsored by a faculty member outside the department, it must be submitted to both that sponsor and to the chair of the Undergraduate Studies Committee, who appoints a departmental reader to evaluate the paper. Both the sponsor and the reader must agree that the paper merits honors. In every case, two copies of the final paper must be submitted. One is retained by the department and becomes a part of the department's permanent collection.

COTERMINAL MASTER'S PROGRAM

Stanford undergraduate students who wish additional training in sociology (whatever their undergraduate major), and who have a good academic record (ordinarily a GPA of at least 'B+' in their previous undergraduate work), may apply to the coterminal master's program as described in the "Undergraduate Degrees" section of this bulletin.

To apply for admission to the coterminal program, students should submit with the coterminal application the following: (1) a statement of purpose providing the rationale for the proposed program of study, (2) a proposed program that specifies at least 45 units of course work relevant to the degree program and at least 36 units in Sociology, (3) a current undergraduate transcript, and (4) two letters of recommendation from Stanford faculty familiar with the student's academic work.

All 45 course units to be counted toward the graduate degree must be at or above the 100 level; at least 18 course units must be above the 200 level. Because the acquisition of research skills is an important component of graduate training in the social sciences, it is recommended that coterminal students take one or more research methodology courses, for example, Sociology 281A and 281B. A grade of 'B-' or better must be secured in each course satisfying the 45-unit requirement. Most coterminal students propose programs that concentrate on one of the four areas of concentration offered by the department: Social Psychology and Interpersonal Relations; Organization Studies; Political, Economic, and Comparative-Historical Sociology; or Stratification and Inequality. This approach helps to ensure program coherence.

GRADUATE PROGRAMS

University requirements for the A.M. and Ph.D. degree are described in the "Graduate Degrees" section of the bulletin.

Admission—Applicants to the graduate program should have some undergraduate preparation in sociology; however, the department does consider for admission those without such preparation. Each applicant must submit results from the general Graduate Record Examination. The GRE Advanced Tests in Sociology is not required. In addition, foreign students must take the TOEFL exam (a minimum score of 600 is required by the University to be considered for admission). Submission of a writing sample (social sciences paper is preferred) and three letters of recommendation are also required. Admission forms can be obtained from Graduate Admissions, Registrar's Office, Old Union, Stanford University, Stanford, CA 94305-3005. Completed forms should be returned to the Department of Sociology. Students are admitted once each year for graduate study beginning in the Autumn Quarter. The University deadline for receiving applications for admission is January 5, 2000.

MASTER OF ARTS

The department does not admit students who are candidates solely for the A.M. in Sociology. This degree is, however, granted as a step toward the fulfillment of Ph.D. requirements. To receive the A.M., 45 units of approved work must be completed with a grade point average (GPA) of 'B-' or better. All course work must be at 100 level or above; 18 units must be above the 200 level.

Students enrolled in business, education, law, medicine or any other advanced degree program at Stanford may wish to obtain a master's degree in Sociology. In this instance, the usual admission requirements are waived, but course requirements are determined in consultation with the Sociology adviser for doctoral candidates from other departments and schools. All 45 units must be taken in Sociology courses at Stanford. Interested students should contact the department for advance approval of their programs.

DOCTOR OF PHILOSOPHY

The department admits only those students who appear to have the aptitude and qualities to complete the Ph.D. program in the Department of Sociology successfully. The curriculum and degree requirements are designed to provide students with the necessary knowledge and skills to become proficient as both scholars and teachers. The courses and requirements also provide faculty with essential information on the progress of each student and on areas of difficulty or deficiency requiring attention and improvement.

Students must complete the following department requirements for the Ph.D. degree in Sociology:

1. In order to receive a thorough introduction and orientation to the field of sociology, the department, and the faculty, each student must enroll in the Graduate Proseminar. The proseminar is a one-quarter course given during the Autumn Quarter of the first year of residence. One unit of credit is given for this course; grading is on a satisfactory/unsatisfactory basis. The proseminar leader also serves as the academic adviser for all first-year students. After the first year, students are allowed to select their academic adviser from among members of the department's faculty.

2. As partial preparation for becoming an accomplished researcher, each student must complete three quarters of research experience, working under the supervision of faculty members. The experience may involve paid work as a Research Assistant (RA), or unpaid work as a research apprentice, carried out to obtain research experience. Stu-
Students may work with only one, or more than one, faculty member to satisfy the requirement. With the approval of the chair of Graduate Studies, research experience may be acquired by involvement in research projects outside the department, e.g., the American Institute for Research or the Veteran’s Administration Hospital. It is recommended that students complete their research requirements early in their graduate program; the requirement must be completed by the end of the fourth year of residency.

3. As partial preparation for becoming an accomplished teacher, each student must complete three quarters of teaching apprenticeship in departmental courses, serving as a Teaching Assistant (TA) working under the supervision of a faculty member, or as a Teaching Fellow (TF). All students are required to take one–quarter TA training course offered by the department during their first year. In addition, students are expected to take advantage of the department’s and University’s teacher training programs during their first few years of residence. Students for whom English is a second language are expected to acquire sufficient facility in English to be an effective teacher.

4. In order to demonstrate command of a range of sociological literatures, students must take four broad survey courses offered by department faculty. Each year the department specifies which courses meet this requirement, and will undertake to ensure that an adequate selection of such courses is offered. Students should consult with their advisor to ensure that the combination of courses selected to meet this requirement exhibits sufficient breadth. This requirement must be met by the end of the third year of residency.

5. In order to obtain a thorough grounding in sociological theory, each student must take two courses in theory, one in classical sociological theory (Sociology 370 or equivalent), and a course on the development of theory and research design (Sociology 372 or equivalent).

6. In order to obtain a thorough grounding in research methods, each student must complete four courses in methodology (281A, 382, 383, and 384). Students with little background in statistics are encouraged to take Sociology 281B or equivalent.

7. In partial preparation for a career of writing scholarly papers, each student must complete a paper by May 15 of the second year of residency. This second-year paper may be on any sociological topic, and may address theoretical, empirical, or methodological issues. The paper is expected to reflect original work and is considered an important piece of evidence in the decision to advance to candidacy. A two-person committee that includes the primary adviser evaluates the paper. Other faculty outside the department may serve as secondary advisers, but the reading committee must consist of two regular faculty members of the department.

8. In order to demonstrate the ability to conduct independent scholarly work, each student must prepare a dissertation prospectus and pass the University oral examination. The oral exam is intended to evaluate the dissertation prospectus or a partial draft of the dissertation and to assess the student’s knowledge of the relevant theory and research in the area in which the project intends to contribute.

9. Each student must complete a doctoral dissertation. Assessment of satisfactory completion is determined by the student’s doctoral committee members. All students are invited to present their dissertation findings at an informal department colloquium.

The faculty assumes the responsibility to provide students with timely and constructive feedback on their progress toward a degree. In order to evaluate student progress and to identify potential problem areas, the department’s faculty reviews the academic progress of each first-year student at the beginning of Winter and Spring Quarters and again at the end of Spring Quarter. These reviews at the beginning of Winter and Spring Quarters are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. The review at the end of Spring Quarter is more thorough: Each student’s performance during the first year is reviewed and discussed. Possible outcomes of the spring review include: (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first year are usually allowed to complete the requirements to receive an A.M. degree, if this does not involve additional residence or financial support. All students are given feedback from their advisers at the end of their first year of graduate work, helping them to identify areas of strengths and potential weakness.

At the end of the sixth quarter of residency, the faculty again reviews the progress of all doctoral students in the program. Students who are performing well, as indicated by their course work, teaching and research apprenticeship performance, and second-year paper, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are still on probation at this stage may be (1) advanced to candidacy; (2) retained on probation with specification of the steps still required to be removed from this status; or (3) terminated from the program.

Ph.D. MINOR

Sociology offers a minor for School of Education doctoral students. Students must complete a minimum of 30 graduate-level units with a grade point average (GPA) of ‘B’ or better. All 30 units for the minor are to be taken in Sociology courses or in courses taught by Sociology faculty, the exception being statistics or methods courses. Research and directed reading courses are acceptable, but must be approved in advance by the chair of the Graduate Studies Committee. The specific program must be approved by a Sociology adviser and filed with the Department of Sociology.

JOINT PROGRAM WITH THE SCHOOL OF LAW

The faculties of the School of Law and the Department of Sociology conduct joint programs leading to either a combined J.D. or J.M. degree with an A.M. degree in Sociology or to a combined J.D. or J.M. degree with a Ph.D. in Sociology.

Normally, the student interested in pursuing an A.M. degree in Sociology completes one full year of the law program, applying for admission to the Department of Sociology during the first year of law school. If admitted, the student must complete regular Department of Sociology master’s degree requirements. Applications for a joint program must be approved by the Research and Interdisciplinary Studies Committee of the School of Law and by the Department of Sociology. Faculty advisers from both the department and the school participate in the planning and supervise the study program of students admitted to joint degree status.

The joint J.D.-Ph.D. degree program is designed for students who wish to prepare themselves for research or teaching careers in areas relating to legal and sociological concerns. Participation requires application to both the School of Law and the Department of Sociology and acceptance by each. Upon admission, students may elect to begin their study program in either the School of Law or the Department of Sociology. Normally, the student spends the first full year in one program and the second full year in the other. Thereafter, the student may take courses concurrently until requirements for both degree programs have been met.

COURSES

Courses are open to all students without prerequisites, unless specifically indicated. Courses numbered 200-299 are open to advanced undergraduate and graduate students. Courses numbered 300 and above are normally offered to graduate students only. Courses with an ‘X’ suffix are taught at an overseas campus only.
OPEN TO ALL STUDENTS

INTRODUCTORY

1. Introduction to Sociology—Introduces the central concepts, methods, and theoretical orientations of the discipline. Sociological imagination is illustrated by recent theory and research. Possible topics: the persistence of class cleavages; ethnic, racial, and gender inequalities; religious beliefs and the process of secularization; functions and dysfunctions of educational institutions; criminology and social deviance; social movements and social protest; production and reproduction of culture in a changing world. Enrollment limited to 16.

6D. Stanford Introductory Seminar: Transformation of Health Care Systems—Preference to sophomores. Recent changes in the ways health care systems are organized. Readings/discussions of what changes are underway. Each student examines empirically a specific topic or problem by, e.g., tracing the development of one medical care organization as it has attempted to adapt to the new conditions in this sector. Enrollment limited to 12.

5 units, Spr (Scott)

POLITICAL AND COMPARATOR HISTORICAL SOCIOLOGY

110. Politics and Society—(Graduate students register for 210.) Themes of political sociology, the origins and expansion of the modern state, linkages between state and society, the impact of the modern world system on national policies, internal distribution of power and authority, and the structure of political group formation and individual participation in modern states. Emphasizes modern empirical literature. GER:3b (DR:9)

5 units, Spr (McAdam)

112. Comparative Democratic Development—(Enroll in Political Science 116L.)

5 units, Spr (Diamond)

13. Institutional Theories of Nation-States and other Organizations—(Graduate students register for 213.) Reviews the institutional theories and research on the impact of wider environments (including world society as a whole) on nation-state structures, and on organizational forms arising within national societies. Prerequisite: previous work in comparative or political sociology.

5 units (Meyer) given 2000-01

10. The Nature of Health—(Enroll in Human Biology 12.)

3 units, Spr (Barr)

12A. Transitions in World Society: Towards the Global Citizenship—Introduction to the sociological understanding of a changing world environment. The political, economic, and cultural domain issues of the global society and their implications on everyday life.

5 units, Win (Staff)

12B. Transitions in World Society: Immigration and its Urban Context—Builds on 12A, examining immigration as an urban phenomenon in different U.S. cities; immigrants' disproportionate concentration in the central cities and their contribution to the changing economic and ecological characteristics of cities; and interactions between new immigrants and existing racial and ethnic groups in a shared urban space.

5 units, Spr (Staff)

22N. Stanford Introductory Seminar: The Roots of Protest—Preference to freshmen. Comparison of the women's, environmental, peace, and civil rights movements, and race/ethnic conflict in the U.S., Western Europe, South Africa, and other settings. Enrollment limited to 16.

5 units, Spr (Olzak)

25N. Stanford Introductory Seminar: Understanding the Sixties—Preference to freshmen. A grounded sociological explanation for the political and cultural turbulence that marked the 1960s and its ambiguous contemporary legacy. Enrollment limited to 16.

5 units, Win (McAdam)

40N. Stanford Introductory Seminar: Gender and Interaction in the U.S.—Preference to freshmen. The diverse effects of gender on patterns of interaction, and the role of these interactional patterns in the maintenance of gender inequality in U.S. society. Enrollment limited to 16.

5 units, Win (Ridgeway)
socialist economy; the reorganization of rural society and urban work-places; the emergence of new inequalities of power and opportunity; and
the new forms of social conflict during Mao’s Cultural Revolution of
1966-69 and its aftermath. GER:4a (DR:2)
5 units, Win (Walder)

118. Social Movements and Collective Action—(Graduate students
register for 218.) Contemporary research on social movements and
collective action. The strategies used by researchers for collecting and
analyzing information on collective events, protests, conflicts, and social
movements organizations. Analysis of different theories and methods
that try to account for the rise and fall of social movement activity over
time. GER:3b (DR:9)
5 units, Spr (Olszak)

119. Political, Social, and Economic Structures of Modern States—
(Graduate students register for 219.) The basic features of the political,
social, and economic structures of modern states and alternative theories
of how these structures evolve and are related to one another. Case
studies of major states elucidate various theories and arguments. Empha-
sis is on the former socialist states and their attempts to forge new
political and economic structures. Comparisons of these transformations
to one another and to the structures in democratic states with established
markets, and the issues concerning the interdependencies of societal
structures.
5 units, given 2000-01

130. Education and Society—(Graduate students register for 230; same
as Education 220C.) The effects of schools and schooling on individuals,
the stratification system, and society. Education as socializing individu-
als and as legitimizing social institutions. The social and individual
factors affecting the expansion of schooling, individual educational
attainment, and the organizational structure of schooling. GER:3b (DR:9)
4-5 units, Aut (Staff)

131. World, Societal, and Educational Change: Comparative Perspec-
tives—(Graduate students register for 231; same as Education 136.)
Analysis of the relations between educational and societal developments
from a comparative perspective. Readings on various theoretical perspec-
tives and empirical studies on the structural and cultural sources of
educational expansion and differentiation, and on the cultural and
structural consequences of educational institutionalization. Research
topics: education and nation-building; education, mobility, and equality;
education, international organizations, and world culture.
3-5 units, Aut (Ramirez)

133. Computers and Interfaces: Psychological and Social Issues—
(Graduate students register for 233; enroll in Communication 169.)
5 units, Spr (Nass)

136. Law and Society—(Graduate students register for 236.) Sociologi-
cal approaches to the study of law and the legal system; lectures on
theoretical perspectives with examples from legal settings. Topics:
central philosophical debates in the sociology of law; the social-psycho-
lological foundations of legal behavior; relations between law and the
economy, stratification, culture, ideology, and social change. Contem-
porary legal issues (crime, litigiousness, civil rights, etc.) provide oppor-
tunities to link sociological theories with current events. Prerequisite: 1.
5 units, Spr (Creighton)

138. American Indians in Comparative-Historical Perspective—
(Graduate students register for 238.) Comparative historical framework
surveys the demographic, political, and economic processes and events
that shaped relations between Euro-Americans and American Indians
from 1600 to 1890. How the intersection of these processes affected the
outcome of conflicts between these two groups, and how this conflict was
decisive in determining the social position of American Indians in the late
19th century and the evolution of the doctrine of tribal sovereignty.
GER:4c (DR:1)
4-5 units, Win (Ramirez)
139. American Indians in Contemporary Society—(Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions, e.g., tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history. GER:4b (DR:3)
5 units, Spr (Snipp)

140. Introduction to Social Stratification—(Graduate students register for 240.) Introduction to social stratification theory and research. The shape and nature of social inequalities; competition for power; allocation of privilege; production and reproduction of social cleavages; and the consequences of class, race, and gender for such outcomes as attitudes, political behavior, and lifestyles. Topics: distribution of educational opportunities and cultural capital; labor market segmentation by race, ethnicity, and gender; status attainment and occupational mobility; income inequalities and urban poverty; class differences in consciousness, values, and lifestyles. GER:3b (DR:9)
5 units, Aut (Tatoma)

141. Introduction to Social Networks—(Graduate students register for 241.) Introduction to social network theory, methods, and research. Basic network concepts (e.g., density, homogeneity, and centrality) are defined and applied to a variety of substantive areas. The impact of social network structure on individuals and groups in such areas as communities and neighborhoods, families, work life, and innovations.
5 units, given 2000-01

142. Sociology of Gender—(Graduate students register for 242C.) Gender inequality in contemporary American society with different explanations for how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Three analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes. Arguments and evidence for each approach. The social consequences of gender inequality, e.g., the feminization of poverty and problems of interpersonal relations. GER:4c (DR:+)
3-5 units, Spr (Ridgeway)

144. Inequality: Theoretical and Comparative Perspectives—(Graduate students register for 244.) Surveys the main classical and modern explanations of political, social, and economic inequality, investigating how well these explanations fit a wide range of societies. Cases: technologically simple African tribes, the Indian caste system, social class, poverty and the "underclass" in the U.S., and changing systems of inequality in the former socialist societies as they undergo transition to more market-like economies. Issues: the relative importance of economic vs. political forces creating and sustaining inequality, the significance of ethnicity and gender, and the possible role of social policy in reducing inequality.
5 units, Win (Granovetter)

145. Race and Ethnic Relations—(Graduate students register for 245.) Race and ethnic relations in the U.S. and elsewhere. Analysis of the processes that render ethnic and racial boundary markers (e.g., skin color, language, culture) salient in interaction situations. Explanations of why only some groups become targets of ethnic attacks. Analysis of the social dynamics of ethnic hostility and ethnic/racial protest movements. GER:3b (DR:9)
5 units, Win (Olzak)

149. The Urban Underclass—(Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Analysis of ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:3b (DR:9)
5 units, given 2000-01

151A. Asians in America: Trends and Issues—Introduction to selected topics and issues facing contemporary Asian American communities, including debunking the model minority stereotype, economic sociology of Asian Americans, and panethnic identity and political empowerment.
5 units, Spr (Staff)

ORGANIZATIONAL STUDIES

5 units, Aut (Freelander)

161. Organizational Ecology—(Graduate students register for 261.) Recent research on populations of market and non-market organizations. The processes determining when new organizations emerge, what forms they assume, and how long they last. Relations between organizations and the environment, and the competitive, commensal, and symbiotic relations that tie organizations together.
5 units (Hannan) given 2000-01

161A. Theory and Practice of Formal Organizations—(Graduate students register for 261A.) Within the framework of organizational theories, how organizations seek to adapt to their environments in consideration of the following issues: What are the mechanisms used by organizations to find out the demands of society? How do organizations determine their goals? What are the mechanisms of organizational learning and change?
5 units, Win (Staff)

162. Organizations: Then, Now, Next—(Graduate students register for 262A.) The sociology of organizations, emphasizing historical changes in social structures. Organizations have become important collective social actors during the last 150 years, and have undergone important changes. The development and spread of organizations, changes in them over time, and their causes.
5 units, given 2000-01

163. Work, Organization and Society—(Graduate students register for 263A.) Introduction to the sociological study of work—its personal, economic, and cultural significance. The types and qualities of work; work’s social and technical organization into projects, firms, unions, and professions; its regulation by the state, and its systemic role in segmenting and stratifying society.
5 units, Win (Staff)

164. Firms, Markets and States—(Graduate students register for 264.) The relationship between business organizations, state economic policies, and market competition. The ways in which state intervention and broad institutional factors influence and delimit the organization of firms. The ways in which such factors create different forms of market competition.
5 units, Win (Freeland)

165. Identity and Organizational Culture—(Graduate students register for 265.) Introduction to the study of organizational culture and identity. What are organizational cultures? What are their functions and characteristics? Can organizational cultures be managed? How do organizational cultures shape their members’ identities and sense of self? How do members cope with the demands of their organizational identities? Guided by theories of culture and identity, the answers are explored in four case studies.
5 units, given 2000-01

166. Organizations and Public Policy—(Graduate students register for 266; same as Public Policy 102A.) Concepts and methods for analyzing the influence of organizations on the setting and implementation of public policy. Varying conceptions of organizations as corporate actors
and as social contexts. The roles of organizations in relation to public policy; organizations as decision makers and problems solvers, as change agents, and as clients. Prerequisite: 160 or Industrial Engineering 100. GER:3b (DR:9)

3 units, Win (Creighton)

169. Health Care in America—(Enroll in Human Biology 160.)
3 units, Aut (Barr)

SOCIOLOGICAL THEORY

170. Classics of Modern Social Theory—The enduring contributions of Karl Marx, Max Weber, and Emile Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the enduring impact of these traditions.

5 units, Win (Freeland)

RESEARCH METHODS

180. Methods for Sociological Research—(Graduate students register for 380.) Introduces the methods used in contemporary sociological research, focusing on strategies for designing research and analyzing data.

5 units, Aut (Mark)

181A. Sociological Methods IA: Computer Assisted Data Analysis—(Graduate students register for 281A.) For Sociology majors only. Introduction to the computer as a research tool and to common data sets in the social sciences. Emphasis is on development of the necessary skills for other courses in sociology methodology. Enrollment limited to 15.

2 units, Aut (Hironaka)

181B. Sociological Methods IB: Statistics—(Graduate students register for 281B.) Emphasizes the statistical methods of principal relevance to sociology: contingency tables, correlation, and regression. Recommended: 181A/281A. GER:2c (DR:4)

5 units, Spr (Staff)

INDIVIDUALIZED LEARNING EXPERIENCES, PRIMARILY FOR UNDERGRADUATE MAJORS

190. Undergraduate Individual Study
1-5 units (Staff)

191. Undergraduate Directed Research—Work on a project of one's own choice under the close supervision of a faculty member. Prior arrangement required.
1-5 units (Staff)

192. Undergraduate Research Apprenticeship—Work in an apprentice-like relationship with specific faculty member(s) on an on-going research project. Prior arrangement required.
1-5 units (Staff)

193. Undergraduate Teaching Apprenticeship
1-5 units (Staff)

196A,B,C. Honors Thesis—Work intensively on an honors thesis project under faculty supervision (see description of honors program). Must be arranged early in the year of graduation, or before.
1-15 units (Staff)

200. Senior Seminar: Honors—For majors accepted in the honors program. The student brings together theory, methods, and substantive courses by illustrating the ways in which sociological problems are framed, linked to theories, and answers pursued through appropriate research designs. (WIM)

5 units, Aut (Bienenstock)

201. Senior Seminar for Majors—Capstone course in which sociological problems are framed, linked to theories, and answers pursued through appropriate research designs.

5 units, Spr (Cook)

FOR ADVANCED/COTERMIMAL UNDERGRADUATES AND GRADUATE STUDENTS

INTRODUCTORY

205. Status, Friendship, and Social Pressure: An Experiential Approach—For graduate students; see 5.

5 units, given 2000-01

POLITICAL AND COMPARATIVE-HISTORICAL

210. Politics and Society—For graduate students; see 110.

5 units, Spr (McAdam)

213. Institutional Theories of Nation-States and other Organizations—For graduate students; see 113.

5 units (Meyer) given 2000-01

214. Economic Sociology—For graduate students; see 114.

5 units, Aut (Granovetter)

215. Topics in Economic Sociology—For graduate students; see 115.

5 units, Win (Granovetter)

216. Comparative Sociology: Successor States of Soviet Union—For graduate students; see 116.

5 units, Aut (Tuma)

217. China's Social Transformation—The implications of China's transition to a market economy for social stratification and mobility, property rights and economic organization, and political organization and authority. Critical overview of recent scholarship, identifying promising questions for further research.

5 units (Walder) given 2000-01

217A. Social Impact of the Chinese Revolution—For graduate students; see 117A.

5 units, Win (Walder)

217B. Seminar: Chinese Communist Revolution—Examines the evolving interpretations of the Chinese Communist Revolution of 1921-1955 against the background of the theoretical literature on the revolutionary process. How have the interpretations of the communist revolution changed over time? Why? What contributions to the theoretical literature on revolution can the Chinese case make, now that such an extensive empirical literature exists?

5 units (Walder) given 2000-01

218. Social Movements and Collective Action—For graduate students; see 118.

5 units, Spr (O EZak)

219. Political, Social, and Economic Structures of Modern States—For graduate students; see 119.

5 units, given 2000-01

230. Education and Society—For graduate students; see 130.

5 units, Aut (Schofer)

231. World, Societal, and Educational Change: Comparative Perspectives—(Same as Education 306D.) For graduate students; see 131.

5 units, Aut (Ramirez)

233. Computers and Interfaces: Psychological and Social Issues—(Enroll in Communication 269.) For graduate students; see 133.

4 units, Spr (Nass)
236. Law and Society—For graduate students; see 136.
5 units, Spr (Creighton)

238. American Indians in Comparative-Historical Perspective—For
graduate students; see 138.
5 units, Win (Snipp)

SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES
220. Interpersonal Relations—For graduate students; see 120.
3-5 units, Aut (Ridgeway)

221. Social Psychology and Social Structure—For graduate students;
see 121.
5 units, Win (Bienenstock)

222. Sociology of Culture—The major theoretical approaches to cul-
ture, including cultural capital theory, rational choice, symbolic inter-
actionism, and structuralism. The adequacy of explanations offered by
different theories for major empirical findings in the sociology of culture.
Emphasis is on the relationship between culture and social structure.
5 units, given 2000-01

223. Gender, Interaction, and Inequality—Seminar on the diverse
effects of gender on patterns of interaction and the role of these interac-
tional patterns in the maintenance of gender inequality in U.S. society.
The empirical evidence for gender effects in interaction, major theore-
tical perspectives for explaining them, and the implications of these
perspectives for analyzing gender inequality. Emphasis is on the critical
evaluation of the theories in light of the evidence. Topics: power and
power use, influence, social emotional behavior, nonverbal behavior,
and language in interaction.
5 units (Ridgeway) given 2000-01

224. Interaction Processes in Education: Design and Evaluation—
(Same as Education 312.) The educational applications of sociological/
social psychological theory and research to classroom processes, staff
relations, teams, and task forces. The principles for the design and
evaluations of group-work for students and teamwork for teaching staff.
Topics: the social process of influence, role differentiation, and evalua-
tion. Methods for systematic evaluation and observation. Students re-
ceive practical experience in using these methods.
4 units (Staff) not given 1999-2000

225. Sociology of Religion—For graduate students; see 125.
5 units, Spr (Mark)

227. Bargaining, Power and Influence in Social Interaction—For
graduate students; see 127.
5 units, Win (Cook)

SOCIAL STRATIFICATION AND INEQUALITY
232. Problems in Sociology of Education—(Graduate students regis-
ter for 330; same as Education 210.) Introduction to sociological ap-
proaches to the educational phenomena. Topics: school organization and
environment, the relationship of education to adult roles, the impact of
social class and ethnicity on classroom learning, and the social structure
of the classroom. Read/evaluate social sciences research. Short written
assignments and individual feedback.
4 units, Spr (Ramirez)

239. American Indians in Contemporary Society—For graduate
students; see 139.
5 units, Spr (Snipp)

240. Introduction to Social Stratification—For graduate students; see
140.
5 units, Aut (Titma)

241. Introduction to Social Networks—For graduate students; see 141.
5 units, given 2000-01

242. Sociology of Gender—For graduate students; see 142.
3-5 units, Spr (Ridgeway)

244. Inequality: Theoretical and Comparative Perspectives—For
graduate students; see 144.
5 units, Win (Granovetter)

245. Race and Ethnic Relations—For graduate students; see 145.
5 units, Win (Olzak)

249. The Urban Underclass—For graduate students; see 149.
5 units, given 2000-01

ORGANIZATIONAL STUDIES
260. Formal Organizations—For graduate students; see 160.
5 units, Aut (Freeland)

261. Organizational Ecology—For graduate students; see 161.
5 units (Hannan) given 2000-01

261A. Theory and Practice of Formal Organizations—For graduate
students; see 161 A.
5 units, Win (Staff)

261B. Women in Organizations—(Same as Business 387R.) Business
cases, exercises, videos, class discussions, and guest speakers are used to
explore issues relevant to women's working experiences in managerial
and professional positions. Topics: cross cultural differences in women's
experiences, women's networking patterns, fair pay and promotion
issues, management styles, and strategies of women entrepreneurs.
4 units, Spr (Martin)

262. Organization and Environment—(Same as Business 672R.) Seminar considers alternative theoretical approaches useful for analyz-
ing organization-environment and inter-organizational relations.
Approaches: resource dependence, population ecology of organizations,
and Williamson's markets and hierarchies. Perspectives analyze merg-
ers and vertical integration, joint ventures, interlocking directorates, and
organizational forms and structures. Prerequisite: consent of instructor.
5 units (Haunschild)

262A. Organizations: Then, Now, Next—For graduate students; see 162.
5 units, given 2000-01

263. Cultures in Organizations—(Same as Business 386R.) Use of
case studies, individual and group papers, exercises, videos, guest
speakers and a field project to decipher the meanings of various cultural
manifestations, including stories, rituals, informal norms, and formal
policies and practices. Cultures in organizations are viewed as sources of
conflict, power, ambiguity, and value consensus.
4 units, Win (Martin)

263A. Work Organization and Society—For graduate students; see 163.
5 units, Win (Staff)

264. Firms, Markets, and States—For graduate students; see 164.
5 units, Win (Freeland)

265. Identity and Organizational Culture—For graduate students; see
165.
5 units, given 2000-01

266. Organization and Public Policy—For graduate students; see 166.
5 units, Win (Creighton)
267. Institutional Analysis of Organizations—Reading and research on the nature, origins, and effects of the modern institutional system. Emphasis is on the effects of institutional systems on organizational structure.
3-5 units, Spr (Scott)

RESEARCH METHODS

281A. Sociological Methods IA: Computer Assisted Data Analysis—For graduate students; see 181A.
2 units, Aut (Hironaka)

281B. Sociological Methods IB: Statistics—For graduate students; see 181B.
5 units, Spr (Staff)

PRIMARILY FOR GRADUATE STUDENTS

GENERAL

300. Workshop: Teaching Development—For graduate students in sociology with little or no teaching experience. Students learn the fundamental principles essential for becoming an effective instructor, advisor, and mentor to undergraduates. Topics: ethics, course organization and syllabus development, issues related to test construction and grading, conflict resolution, common classroom problems, and university policies related to matters such as sexual harassment. Technologies and other topics related to making effective presentations, and campus resources that may be used to improve classroom performance. Roundtable discussions with faculty and advanced graduate students known for teaching excellence. Students may be asked to give a demonstration lecture subject to critique and discussion.
2 units, Spr (Staff)

305. Graduate Proseminar—For first-year Sociology doctoral students only. Introduction and orientation to the field of Sociology.
1 unit, Aut (Staff)

308. Social Demography: Theories, Methods, and Data—For graduate students and advanced undergraduates interested in the study of demography. Topics: models of fertility behavior, migration models, stable population theory, life table analysis, data sources, and measurement problems. How population behavior affects social processes, and how social processes influence population dynamics. Recommended: knowledgeable about sociological research methods, and have a basic understanding of regression analysis and log linear models.
5 units, Spr (Snipp)

POLITICAL AND COMPARATIVE-HISTORICAL

310. Issues in Political and Comparative/Historical Sociology—For Sociology doctoral students only. Major theoretical and empirical issues in macrosociology.
2 units, given 2000-01

311A,B,C. Workshop: Comparative Studies of Educational and Political Systems—(Same as Education 387 A,B,C.) Analysis of quantitative and longitudinal data on national educational systems and political structures. Prerequisite: consent of instructor.
2-3 units, Aut, Win, Spr (Ramirez, Meyer)

312A,B,C. Workshop: Collective Action and Social Movements—Issues of research design, data gathering, measurement, and analysis of evidence on the occurrence of race and ethnic collective action. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Olzak)

313A,B,C. Workshop: Political Sociology in Comparative and Domestic Perspective—Focus is on presentations by workshop participants and guest speakers on their work in the field of political sociology; general discussions of contemporary issues. Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (McAdam)

315A,B,C. Workshop: Economic Sociology—Theory, methods, and research in the sociology of the economy. Possible activities: participation in ongoing research projects; instruction in new methods; and presentation of ongoing research by students, faculty, or visiting speakers. Prerequisite: registration in a graduate program or consent of the instructor.
2-5 units, Aut, Win, Spr (Granovetter)

318. Sociological Perspectives on Transitional Societies—Critical examination of the emerging research literature on social change in Eastern Europe, the former Soviet Union, and China, providing a critical understanding of the state of the field, and of the emerging models and new data sources employed in current research.
5 units, Aut (Tuma, Walder)

SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES

320. Foundations of Social Psychology—Major theoretical perspectives in interpersonal processes and social psychology. The basic principles, assumptions, and substantive problems associated with each perspective; techniques of investigation and methodological issues. Perspectives: symbolic interaction, social structure and personality, cognitive, and group processes.
5 units (Ridgeway) given 2000-01

321A,B. Workshop: Social Psychology—Current theories and research agendas, critical reviews of recent publications, presentations of ongoing research by faculty and students. Prerequisite: consent of instructor.
2-5 units, Aut, Win (Ridgeway)

322. Social Interaction, Social Structure, and Social Exchange—Current theoretical perspectives and research on such topics as social cognition and social identity, group processes, bargaining and negotiation, social justice, social dilemmas, and social exchange, and networks and collective action. Students gain a broad knowledge of the sociological perspective on social psychology and a deeper knowledge of the social exchange approach.
5 units, Win (Cook)

324. Social Exchange Theory—A review of the classic exchange theory literature: Homans, Blue, Emerson and Thibaut, Kelley, Malinowski, Mauss, and Levi-Strauss; empirical and contemporary work on exchange illustrates which ideas of the classical theories have survived and how they have evolved.
5 units, Win (Bienenstock)

326A,B. Workshop: Sociology of Culture—Current theories and research agendas, critical reviews of recent publications, presentations of ongoing research by faculty and students. Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Mark)

342. Seminar in Social Networks—Advanced concepts and techniques (e.g., semigroups, block-modeling, duality, structural equivalence) in the analysis of social networks. Examples show their applicability to such topics as success in the art world, the formation and operation of interlocking directorates, the behavior of children in impoverished role structures, and the world system. How to use network concepts and methods to analyze empirical data. Prerequisite: 141 or 241, or consent of the instructor.
5 units (Bienenstock) given 2000-01

SOCIAL STRATIFICATION AND INEQUALITY

330. Problems in Sociology of Education—(Same as Education 310.) For graduate students; see 232.
4 units, Spr (Ramirez)

340. Social Stratification—Classical and contemporary approaches to understanding the differential distribution of valued goods and the social
processes by which such inequality comes to be seen as legitimate, natural, or desirable. Introduction to modern analytic models of the effects of social contacts, cultural capital, and "luck" in generating inequality; the role of educational institutions in perpetuating and undermining modern forms of stratification; the causes and consequences of stratification by race and gender; the structure of social classes, status groupings, and prestige hierarchies in past and present societies; the sources of "labor markets" and their functions in early and advanced industrialism; the implications of social stratification for individual lifestyles, consumption patterns, and personality traits; and the rise of the "new class," the "underclass," and other emerging forms of stratification under post-industrialism.

5 units, given 2000-01

34A, B, C. Workshop: Social Stratification—Stratification theory and research for advanced students. Current theories and research agendas, critical reviews of recent publications, presentations of ongoing research by faculty and students. Prerequisite: registration in a Ph.D. program or consent of instructor.

1-5 units, given 2000-01

343. Workshop on Sociology of Gender—Workshop on current theories and research agendas, critical reviews of recent publications, and presentations of ongoing research by faculty and students. Prerequisite: consent of instructor.

2-5 units, Spr (Ridgeway)

ORGANIZATIONAL STUDIES

361. Seminar: Social Psychology of Organizations—(Same as Business 671R.) Selected curriculum issues in social psychology relevant to behavior in organizations. Prerequisite: consent of instructor.

4 units (Morris)

363. Social and Political Processes in Organizations—(Same as Business 676R.) Focus is on cognition, attitudes, and behavior in organization, drawing on psychological and sociological research at the "meso" level of analysis. Topics vary each year, including organizational learning and decision making; power and conflict; emotions in organizations; mobility and stratification; gender inequality and discrimination; networks; organizational justice and legitimacy; cultural perspectives on organizations, etc. No auditors. Prerequisite: enrollment in a Ph.D. program.

4 units, Win (Martin)

363A. Seminar on Organization Theory—(Same as Education 375A.) For doctoral-level students or equivalents. Provides a thorough grounding in the social science literature on organizations. Readings are organized historically, and introduce the major theoretical perspectives and debates.

5 units, Win (Powell, Scott)

363B. Seminar on Organizations: Theory and Application—(Same as Education 375B.) Continuation of 363A. Focus is on contemporary applications of organization theory in the examination of political, educational, and business organizations.

5 units, Spr (Powell, Scott)

364. Organizations as Governance Structures—Introduction to a body of work that treats organizations as governance structures that coordinate transactions between firms while creating and maintaining cooperation within firms. In-depth reading of economic accounts of the firm (transaction cost economics, agency theory, and related approaches) and of competing explanations of governance that have emerged in the recent sociological literature.

5 units, Aut (Freeland)

366. Workshop on Organizational Ecology—Workshop for designing, collection, and analysis of data on long term change in populations and communities of organizations. Prerequisite: 360, consent of the instructor.

5 units (Hannan)

369. Macro-Sociological Perspectives of Organizations—Core problems in the sociology of organizations, main theoretical perspectives, and research programs directed at evaluating these perspectives. Prerequisite: registration in a Ph.D. program.

5 units (Hannan)

SOCIOLOGICAL THEORY

370. Sociological Theory—Introduces theoretical strategies in sociological analysis selected from among functionalism, historical materialism, human ecology, the theory of action, symbolic interactionism, social phenomenology, decision theory, and behaviorism, illustrated by one or more programs of theoretical research originating in the classical literature (e.g., Durkheim, Marx, Weber, et al) still active in the contemporary literature. Some elementary methods are required to intelligently read and analyze theory.

5 units, Win (Walder)

372. Theoretical Analysis and Design—Teaches skills in theoretical analysis and the logical elements of design, including the systematic analysis of the logical structure of arguments, the relationship of arguments to more encompassing theoretical or meta-theoretical assumptions, the derivation of logical implications from arguments, assessments of theoretically significant problems or gaps in knowledge, etc.

5 units, Spr (Zelditch)

RESEARCH METHODS

380. Introduction to Sociological Research—Same as 180 but restricted to Ph.D. candidates in Sociology or Sociology of Education.

5 units, Aut (Mark)

382. Sociological Methodology II: The General Linear Model—The general linear model for discrete and continuous variables. Introduction to the principles of estimation, model selection, specification error, and assessment of fit. Prerequisites: 281A,B, or equivalents.

4-6 units, Win (Tuma)

3-6 units, given 2000-01

384. Sociological Methodology IV: Advanced Models for Continuous Outcomes—The rationale for and interpretation of static and dynamic models for the analysis of continuous variables. Topics: structural-equation models, latent-variable models, times-series models, and pooled cross-section and time-series models. Evaluation at first class meeting determines whether students have the appropriate background.

4-6 units, Aut (Bienenstock)

385. Seminar: Measurement in the Social Sciences—The principles and problems of measurement in the social sciences within the context of causal modeling. Methodological approaches, from traditional factor analysis methods to recent developments in the causal modeling of error structures. Emphasis is on the utility of multiple indicator approaches to social measurement.

5 units, given 2000-01

5 units (Tuma) given 2000-01
387. Seminar: Frontiers of Quantitative Sociological Research—Advanced topics in quantitative sociological research, especially recently-developed models and methods. Possible topics: robust regression methods, boot-strapping, local likelihood estimation, quantile regression, two-sided logit models, event count models, event sequence models, heterogeneous diffusion models, and models for change in social networks.
3-5 units (Tuma) given 2000-01

388. Advanced Models for Analysis of Tabular Arrays—Analysis of categorical data with log-linear, log-multiplicative, latent class, latent trait, Markov, Rasch, and related models.
5 units, given 2000-01

389. Topics in Mathematical Sociology
5 units (Bienvenido) given 2000-01

GRADUATE INDIVIDUAL STUDY

390. Graduate Individual Study
(Staff)

391. Graduate Directed Reading
(Staff)

392. Research Apprenticeship
(Staff)

393. Teaching Apprenticeship
(Staff)

394. Thesis
(Staff)

395A, B, C. Research Internship—Graduate students engage in internship work and integrate that work into their academic program. Students register in the quarter following internship work and complete a research report outlining their work activity, problems investigated, key results, and any follow-up projects they expect to perform. Meets requirements for Curricular Practical Training for students on F-1 visas. Work completed cannot be counted toward the departmental research assistantship requirement.
(Staff)

OVERSEAS STUDIES

These courses are approved for the Sociology major and taught at the campus indicated. Students should discuss with their major advisers which courses would best meet educational needs. Course descriptions can be found in the "Overseas Studies" section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

OXFORD

117W. Social Change in Modern Britain
4-5 units, Au (Davies)

SANTIAGO

111. Social Heterogeneity in Latin America
5 units, Au (Valdes)

CENTER FOR SPACE SCIENCE AND ASTROPHYSICS

Director: Robert V. Wagener
Associate Directors: Umran S. Inan, Roger W. Romani, Philip H. Scherrer

Associate Professors: Bruce B. Lusignan, Roger W. Romani

Assistant Professors: Sarah Church, Guenther Walther, Jeffrey Willick

Professors (Research): C-W. Francis Evrict, Antony Fraser-Smith, Philip H. Scherrer

Consulting Professors: Alan M. Title, Martin Walt

The center is an interdepartmental organization coordinating teaching and research in space science and astrophysics. Its members are drawn from the Department of Geological and Environmental Sciences in the School of Earth Sciences; the departments of Aeronautics and Astronautics, Electrical Engineering, and Mechanical Engineering in the School of Engineering; the departments of Applied Physics, Physics, and Statistics in the School of Humanities and Sciences; the W. W. Hansen Experimental Physics Laboratory, and the Stanford Linear Accelerator Center.

Research now in progress covers a wide array of investigations and is approached in a variety of ways, including experiments flown on rockets, satellites, and space probes; ground-based observations made from the Hobby-Eberly Telescope, the Wilcox Solar Observatory, and from national observatories; and theoretical research including computer modeling. Topics currently being studied include cosmology, gamma-ray astronomy, gravitation theory and experiments, guidance and control, high-energy astrophysics, ionospheric and magnetospheric physics, microwave and infrared astronomy, planetary sciences, solar physics, solar-terrestrial phenomena, stellar structure, theoretical astrophysics, x-ray and extreme ultraviolet astronomy, and the study of life in the universe. Some of these projects involve opportunities for collaboration with scientists at the Lockheed-Martin Research Laboratory through the Stanford-Lockheed Institute for Space Research, the NASA-Ames Research Center, and the SETI Institute.

Stanford is a member of the Universities Space Research Association, a consortium of universities which operates the Lunar Science Institute in Houston, Texas; the University Corporation for Atmospheric Research in Boulder, Colorado; and the San Diego Supercomputing Consortium.

Stanford is the lead institution for the EGRET experiment at the Compton Gamma Ray Observatory and the Solar Oscillations Investigation on the Solar and Heliospheric Observatory spacecraft (SOHO), and participates in the Soft X-Ray Telescope program on the Japanese Yohkoh spacecraft.

Stanford is also a member of the Hobby-Eberly Telescope Consortium which has constructed a 10-meter telescope at the McDonald Observatory of the University of Texas. Full science operations are scheduled to start in Autumn 1999.

The facilities of the center are available to any interested and qualified student, who must be admitted by and registered in a department. The departments of Aeronautics and Astronautics, Applied Physics, Electrical Engineering, Mechanical Engineering, and Physics offer opportunities leading to an M.S. or Ph.D. degree for work in space science or astrophysics. The center also offers opportunities to undergraduates who may, for instance, participate in research projects in their junior or senior years, on a part-time basis during the school year or on a full-time basis during the summer. The Astronomy Course Program operates a small student observatory where students may gain practical experience in astronomical observing. The course list at the end of this entry includes courses of interest to undergraduates as well as courses primarily of interest to graduate students.

Further information is available from the director.

COURSES

For descriptions, see the listings under the department's section of this bulletin.
AERONAUTICS AND ASTRONAUTICS
213. Atmospheric Entry
236A,B,C,D. Spacecraft Design
279. Space Mechanics
283. Aircraft and Rocket Propulsion
290. Problems in Aeronautics and Astronautics

ELECTRICAL ENGINEERING
106. Planetary Exploration
249. Introduction to the Space Environment
350. Radioscience Seminar
352. Electromagnetic Waves in the Ionosphere and Magnetosphere
354. Introduction to Radio Wave Scattering
356. Elementary Plasma Physics: Principles and Applications
358. Geomagnetically Trapped Radiation

ENGINEERING
235A,B. Space Systems Engineering

PHYSICS
15. The Nature of the Universe
16. Cosmic Horizons
18N. Stanford Introductory Seminar: Revolutions in Concepts of the Cosmos
27. Evolution of the Cosmos
50. Astronomy Laboratory and Observational Astronomy
81Q. Stanford Introductory Seminar: Lookback Time in Cosmology
82Q. Stanford Introductory Dialogue: Expanding Cosmic Horizons
100. Introduction to Observational and Laboratory Astronomy
160. Introduction to Stellar and Galactic Astrophysics
161. Introduction to Extragalactic Astrophysics and Cosmology
260. Introduction to Astrophysics
262. Introduction to Gravitation
301. Astrophysics Laboratory
304. Physics of Astrophysics
361. Stellar and Galactic Astrophysics
362. Extragalactic Astrophysics and Cosmology
363. Solar and Solar-Terrestrial Physics
364. Advanced Gravitation
463. Special Topics in Astrophysics

SPANISH AND PORTUGUESE

Emeriti: (Professors) Fernando Alegria, Aurelio M. Espinosa, Jr., Bernard Gicovate, Isabel Magana Schevill, Sylvia Wynter
Chair: Yvonne Yarbro-Bejarano
Professors: Mary L. Pratt, Michael P. Predmore, Jorge Ruffinelli, Guadalupe Valdes, Yvonne Yarbro-Bejarano, Edwin Williamson (on leave Autumn, Winter)
Assistant Professors: Claire Fox (on leave 1999-2000), Fernando Gomez, Richard Rosa, Lucia de Sa
Professor (Teaching): Maria-Paz Haro
Courtesy Professors: John Felstiner, Hans U. Gumbrecht, Ramon Saldivar
Courtesy Assistant Professor: Paula Moya
Senior Lecturers: Lyris Wiedemann (Portuguese Language Director);
Susan Cashon (by courtesy), Irene Corso
Lecturers: Juana Alicia, Claudia Angelelli, Jeffrey Berset, Jose Cartagena-Calderon, Sara Cooper, Clémence Jouët-Paré, Caridad Kennedy, Monica Malamud-Makowski, Patrice Marks, Alice Miano, Joan Molitoris, Consuelo Perales, Anthony Prieto, Ana M. Sierra, Maria-Cristina Urruela, Douglas Young
Affiliated Faculty: James Fox (Cultural and Social Anthropology)
Writer-Artist-in-Residence: Cherrie Moraga (Drama)
Spanish Language Coordinator: Alice Miano
Majors and Minors Coordinator: Jose Cartagena-Calderon
Undergraduate Advisers: Michael Predmore, Lucia de Sa
Graduate Adviser: Mary Pratt

The department is committed to four main educational purposes: (1) to provide students with expert training in the Spanish and Portuguese languages at all levels and to enable them to develop their skills in these languages according to their goals and interests; (2) to acquaint students with the literatures and cultures of the Spanish and Portuguese speaking world (Iberia, Latin America, the United States), in terms of both contemporary realities and 1,000 years of written and oral tradition; (3) to prepare undergraduates for advanced study in Iberian, Latin American, and Luso-Brazilian languages, literatures, and cultures and/or in language education, and (4) to provide doctoral students with advanced training as research scholars and teachers, in preparation for careers as university teachers or related roles.

The faculty represent a broad range of interests and approaches. In general, the department’s programs are characterized by: (1) a commitment to undergraduate and graduate teaching at the highest intellectual level, (2) a strong interdisciplinary focus that combines the study of literature with that of other forms of cultural expression, (3) a sociohistorical perspective on language, literature, and culture, (4) an effort to maintain a balance among Latin American, Iberian, and U.S. Latino fields, and (5) language study tailored to a range of educational intellectual goals and native and non-native experience with the Spanish and Portuguese languages.

The department works closely with the Center for Latin American Studies, El Centro Chico, the Overseas Studies programs in Santiago, Chile, and Puebla, Mexico, and selected overseas programs in Spain. It makes extensive use of the resources of the language laboratory and the Language Center. The University library maintains world class collections in Latin American and Iberian Studies and one of the largest research archives in the country in Chicanist history and literature. The Hoover Library is a valuable resource for particular research topics on Spanish and Latin American intellectual history. Department faculty teach in the School of Education. Comparative Literature, Comparative Studies in Race and Ethnicity Drama, Feminist Studies, Film Studies, Introduction to the Humanities Program, and Modern Thought and Literature. The department houses a Brazilian Writer-in-Residence program developed in cooperation with the Brazilian Ministry of Culture, and hosts visiting faculty from Spain and Latin America on a regular basis.

575
UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Note—The department redesigned its undergraduate major in Autumn Quarter 1996-97. Students who declared a Spanish major prior to June 1, 1996 may remain under the former requirements or may elect to fulfill the new requirements. The former requirements are found in previous versions of the Stanford Bulletin or in the department’s Undergraduate Handbook. For transition arrangements, see the department’s academic affairs administrator or undergraduate adviser.

The major in Spanish is designed to enable students to develop a concentration in a particular area of interest, accompanied by basic work in two secondary areas. Students are normally expected to declare the major during the sophomore year, but it is possible to declare during the junior year as well, particularly after overseas study at Santiago or Puebla.

The major in Spanish requires 50 units in addition to completion of second-year Spanish (13, 13B or equivalent). Course work for the major is grouped under the following subject areas:

1. Latin American/Caribbean Studies (including Brazil)
2. Iberian Studies (including Portugal)
3. U.S. Latino studies
4. Language in the Spanish-speaking world
5. Luso-Brazilian language and culture

Students are required to take four courses in one of these areas, two courses in a second and one in a third. Course work for the major must include:

One quarter of Portuguese language (counts for area 5 above)

Spanish 101, Structure of Spanish (counts for area 4 above)

Spanish 140, Methods of Literary and Cultural Analysis (counts for area 1, 2, or 3 above)

One writing intensive course

Spanish 278, Senior Seminar (writing intensive optional)

All courses in the department numbered 100 or above count toward the major. With the consent of the student’s adviser, up to 10 units of relevant course work outside the department and up to 10 units of course work done in English may be counted toward the major. With the consent of the adviser, up to 25 units of relevant course work taken abroad may be counted toward the major. Courses taken credit/no credit cannot be counted toward the major.

How to Declare a Major—Students interested in declaring a Spanish major should see the Majors and Minors Coordinator, José Cartagena-Calderón, or one of the undergraduate advisers, Professors Fox and Rosa. General information on the major is available in the department reception area, Building 260, room 214.

Double Majors—The major in Spanish and Portuguese is designed to combine readily with a second major in another field and with study abroad. Students may not count the same course to fulfill requirements in both majors.

Intensive Summer Program—Stanford University offers first-year intensive language and conversation courses in Spanish during the summer. For further information, contact the department or the Summer Session office.

Courses for Heritage Language Speakers—The department offers a series of second- and third-year courses especially designed for students who grew up in homes where Spanish is spoken and who wish to develop their existing linguistic strengths. The suffix B in course numbers below indicates these courses.

Proficiency Notation—Seniors are encouraged to qualify by examination (given every Spring Quarter) for the departmental Language Proficiency Notation on their transcript, which certifies foreign language competence. For further information, contact Alice Miano, Spanish Language Coordinator, or Lyris Wiedemann, Portuguese Language Director.

MINORS

The department offers two minor concentrations. With the consent of the student’s adviser, up to 10 units of relevant course work outside the department, and up to 15 units of relevant course work taken abroad, may be counted toward the following minors:

LANGUAGE AND CULTURE STUDIES

This minor is intended for students who wish to focus on developing advanced linguistic competence in Spanish and/or Portuguese, or who wish to combine acquisition of linguistic competence with the study of the literature, thought, culture, or language systems of the Spanish- or Portuguese-speaking world.

Requirements—Thirty units of course work at the level of Spanish 11 or above, and/or in Portuguese at any level. Students must take at least three courses in one of the following subject areas:

1. Latin American and Iberian Studies: recommended are Spanish 130, 131, 132, 133 and 134; and 150, 151, 160, 161.
3. Advanced Language: any combination of second-year Spanish and/or first- and second-year Portuguese, plus a selection of 100 and 200-level language courses. Recommended: Spanish 203, 204, 205, 206, 207.
4. Luso-Brazilian Language and Culture: recommended are Portuguese 11A, 12A, 133, 134, 170, and 171.

CULTURE AND AREA STUDIES

This minor is intended for students who wish to study the literature, culture, or thought of the Spanish- and Portuguese-speaking world without necessarily acquiring proficiency in Spanish or Portuguese language. Students choosing this minor are strongly encouraged to take courses in Spanish or Portuguese language, including reading courses (such as Spanish 50 or Portuguese 50). Such courses count, but are not required, for this minor.

Requirements—Thirty units of course work in Latin American, Iberian, U.S. Latino, or Luso-Brazilian literature, culture, language, and thought studied in the original or in translation at the level of Spanish 11 or above.

HOW TO DECLARE A MINOR

For minors in the School of Humanities and Sciences, students must complete their declaration of the minor no later than the last day of the quarter two quarters before degree conferment. For example, a student graduating in June (Spring Quarter) must declare the minor no later than the last day of Autumn Quarter of senior year. Students declaring a minor should meet with the majors and minors coordinator. General information about the minor is available in the reception area of the department, Building 260, room 214.

HONORS PROGRAM

Spanish and Portuguese majors in the junior year, with a grade point average (GPA) of 'B+' or better in all major courses, may apply to the honors program. Honors students are eligible to participate in the honors college at the beginning of their senior year. Students should submit an application for the honors program and a proposal outline by the end of Winter Quarter of the junior year. Each honors student must write an honors essay of 20 to 25 pages under the direction of a faculty member who serves as adviser. Work on the essay normally begins in the Spring Quarter of the junior year and must be completed by the end of the third week of March of the senior year. Consult an undergraduate adviser (Professors Fox or Rosa) for additional information on the honors program.

OVERSEAS STUDIES

All majors are strongly encouraged to study abroad. To transfer credit from programs abroad, consult the Office of the Registrar. Depending on course selections, up to 25 units of course work taken abroad may be applied toward the major and 15 units toward the minor in Spanish. Students planning study abroad, or returning from study programs, are encouraged to consult with the majors and minors coordinator or an undergraduate adviser to coordinate the course work from abroad with their degree program.
Both the department and Becktel International Center maintain information banks on study abroad programs. Stanford sponsors the following options:

STANFORD IN SANTIAGO, CHILE

The Stanford Program in Santiago, Chile requires one year of college Spanish, with preference given to students with more advanced language preparation. Course work there is done entirely in Spanish. Detailed information, including curricular offerings, is listed in the “Overseas Studies” section of this bulletin, or at the Overseas Studies Program (OSP) office in Sweet Hall. Internships and research opportunities may be arranged for two-quarter students.

STANFORD IN PUÉBLA, MEXICO

The Stanford Program in Puebla, Mexico requires preparation through the level of Spanish 13 (second year third-quarter Spanish) or the equivalent. The minimum required preparation is completion of Spanish 11 (second year first-quarter Spanish) or its equivalent by the time of enrollment in the Puebla program. Students who have completed Spanish 11 prior to Autumn Quarter but have not yet completed Spanish 13 are required to enroll in Spanish 12 or a higher course at Stanford during the Autumn Quarter prior to participation in the Puebla program. Course work at Puebla is done entirely in Spanish in regular courses at the Universidad de las Americas. Detailed information, including curricular offerings, is found in the “Overseas Studies” section of this bulletin, or at the Overseas Studies Program (OSP) office in Sweet Hall. Research opportunities may be arranged.

BRAZIL AND PORTUGAL

The University maintains a relationship with the Universidade Estatal do Rio de Janeiro in Brazil. Students interested in study in Brazil or Portugal, should contact Professor de Sa or Lyris Wiedemann.

SPAIN

The Department of Spanish and Portuguese recommends study in Spain with the Hamilton College Academic Year in Spain program, administered by the Department of Romance Languages of Hamilton College in cooperation with faculty members of Williams and Swarthmore colleges. Two distinguishing features of this program are: (1) Spanish must be spoken at all times, both in and outside of class; all students are required to sign a pledge to this effect before their arrival in Madrid; (2) the arrangement of independent study projects in lieu of regular courses. The program is based in Madrid, where the cultural, educational, social, and geographical benefits are optimal.

An additional excellent program recommended by the department is the Madrid Campus of St. Louis University. This program has many of the features of the Hamilton College Program. In addition, it has its own buildings and facilities located on the outskirts of the University of Madrid campus. This is the only U.S. overseas study program in Spain which has received full accreditation by the Spanish authorities.

Students interested in study in Spain should consult Professors Haro or Predmore for information.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the “School of Education” section of this bulletin and the credentials administrator, School of Education.

COTERMINAL A.B. AND A.M.

The requirements for the coterminal A.B. are the same as those outlined below for the A.M. No course can count for both the A.B. and A.M. degrees. Contact Graduate Admissions at the Registrar’s Office for information.

GRADUATE PROGRAMS

University requirements for the A.M. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS IN SPANISH

This terminal A.M. degree program is for students who do not intend to continue their studies through the Ph.D. degree. Students in this program may not apply concurrently for entrance to the Ph.D. program. Students must complete a minimum of 45 graduate-level units, 36 of which must have a grade point average (GPA) of ‘B’ or above.

Requirements—One linguistics course (203, 204, 205, 206, 207); one course in language pedagogy; one course in literary or cultural theory; two 200- or above courses in Latin American literature and two 200-or above courses in Peninsular literature; and reading knowledge of one foreign language other than Spanish (preferably Portuguese). Independent study courses (299, 399), and cross-listed courses originating outside the department may not be used to fulfill requirements except by permission of the graduate adviser.

In addition, students may take approved courses in related fields such as classics, comparative literature, education, history of art, linguistics, modern thought, and philosophy.

DOCTOR OF PHILOSOPHY

The requirements of the Ph.D. are: (1) 90 units of graduate-level course work with a grade point average (GPA) of ‘B’ or above. Units completed toward the A.M. degree can be counted for the Ph.D.; (2) one course in Spanish linguistics, one course on methods of teaching Spanish, and one course on introduction to literary theory; (3) a reading knowledge of Portuguese and one other foreign language; (4) the qualifying paper, the comprehensive, and the University oral examinations, as described below; (5) teaching of three to five courses in the department; (6) completion of a dissertation. Independent study courses (299, 399) and cross-listed courses originating outside the department may not be used to fulfill requirements except by permission of the graduate adviser. For basic residency and candidacy requirements, see the “Graduate Degrees” section of this bulletin. For further information, consult the department’s Graduate Student Handbook.

Newly admitted students are required to take an oral proficiency examination in Spanish by the third week of Autumn Quarter to determine the level of previous preparation. The student is required to remedy deficiencies indicated by this examination before a teaching assignment is awarded. In preparation for teaching, Ph.D. candidates must take Spanish 301, and/or Spanish 300 in the first year.

In consultation with the adviser, students select one major field of study from the following: (1) Spanish Literature of the Golden Age, (2) Modern Spanish Literature, (3) Spanish-American Literature to Independence, (4) Spanish-American Literature of the 19th and 20th Centuries, (5) Chicano Literature. In addition, candidates select two secondary areas of study outside the major field from the following: (1) Spanish Medieval Literature, (2) Spanish Literature of the Golden Age, (3) Modern Spanish Literature, (4) Spanish-American Literature of the Colonial Period, (5) Spanish-American Literature from Independence, (6) Chicano Literature, (7) Literary Theory, (8) Linguistics, (9) Spanish-American Film, (10) Brazilian Literature.

At least four courses must be taken in the major field of study. At least two courses must be taken in each secondary area. Students whose major field is in Spanish-American or Chicano Literature must choose one secondary area in Peninsular literature and vice versa. One secondary area of concentration may be taken outside the department in consultation with the adviser.

In addition to the department’s course offerings, students may take relevant courses with the approval of their adviser in other departments and programs, such as the graduate programs in Comparative Literature, Feminist Studies, History, Humanities, or Modern Thought and Literature. It is also possible to complete a minor in another department with approval of the adviser. Normally, not more than 25 units are taken outside the department.

After the first year of study, the student’s progress is evaluated by the faculty to determine whether continuation to the Ph.D. is recommended and whether there are particular areas where improvement is needed. For this evaluation, students submit a research paper of approximately 20
STANFORD INTRODUCTORY SEMINARS

110N. Stanford Introductory Seminar: Arts and Archives—Introduction to Research in Chicana/o Cultural Studies—Preference to freshmen. Hands-on introduction to the methods and topics of archival research on the visual and verbal arts and their socio-historical context. Student develop original research projects using the digital archive "Chicana Art," and the Special Collections in Green Library, which house the papers of major Chicana/o artists, writers, activists, and intellectuals. Slide/presentations by invited artists and presentations by students on their research. GER:4b (DR:3)
3 units (Yarbro-Bejarano)

112N. Stanford Introductory Seminar: The U.S.-Mexico Border Region in Film and Literature—Preference to freshmen. Targeted at students who are heritage speakers of Spanish, or who have scored a 4 or 5 on the AP exam in Spanish. Introduces the wide range of cultural production about the border region, highlighting the U.S. and Mexican viewpoints. Topics: free trade, the maquila system, interethnic relations, women's issues, and migration. Readings from novels and essays by Chicana/o, Mexican, and Anglo authors. Weekly screenings of movies and videos, ranging from classic Hollywood and Mexican study productions to independent features produced in the border region. Assignments stress the development of basic skills in literary and visual analysis, and oral production. (In Spanish and English) GER:4b (DR:3)
3-5 units (Fox)

113N. Stanford Introductory Seminar: Latin American Culture is the '60s—Preference to freshmen. Focus is on the Latin American culture of the 1960s (through literature, film, music, politics, fashion, etc.) as a means of understanding Latin America as a whole. Latin America underwent a drastic renovation during this decade: the emergence of the Cuban revolution and the figure of Ernesto Che Guevara as a continental symbol; the boom of the Latin American novel (Novel Prize winner Gabriel García Márquez, Mario Vargas Llosa, and Julio Cortázar); the student revolt; the creation of testimony as a genre; and the emergence of popular music. These and other cultural themes are examined with emphasis on the representation of youth ("la cultura de los jóvenes") through literature and film. GER:3a (DR:7)
3-5 units, Win (Ruffinelli)

114N. Stanford Introductory Seminar: Lyric Poetry—Preference to freshmen. Aimed at students with considerable competence who may be interested in increasing their language skills. Introduction to the basic elements and expressive devices of lyric poetry: multidimensional language, denotation, connotation, image, metaphor, symbol, allegory, paradox, irony, meaning, idea, rhythm, and meter. These primary elements of poetry are studied through representative poems of outstanding poets of Spain and Latin America of the late 19th and early 20th century. G. A. Bécquer, Rosalía de Castro, Rubén Darío, Miguel de Unamuno, Antonio Machado, García Lorca, Pablo Neruda, and Gabriela Mistral. (In English and Spanish) 3-5 units (Fredmore)
115N. Stanford Introductory Seminar: Growing up Bilingual—Introduction to the Study of Bilingualism in the U.S.—Preference to freshmen. For students who have grown up in bilingual communities or bilingual households or who have studied Spanish formally for three or more years at the secondary level. How do people become bilingual? When and how do people use two languages in their everyday lives? What kinds of different bilinguals are there? Field project in a nearby Latin community. GER:3a (DR:7) 3-5 units, Spr (Valdés)

116N. Stanford Introductory Seminar: Letters and Colors of Imperial Spain—Preference to freshmen. The rich and challenging literature and images of Imperial Spain (mostly 16th and 17th centuries). Golden Age letters and paintings are combined to see how citizens of the past arranged their experiences for a better life, and how this relates to the future. Historicity and heterogeneity are examined in relation to authors, e.g., Calderón de la Barca, Saavedra y Pajardo, Gracián and Estebanillo González. Students use cd-rom material on Golden Age paintings and become acquainted with a panorama of Golden Age collections in the Prado Museum (Velázquez, Greco, Zurbarán, etc.). (In English, but some readings in Spanish.) GER:3a (DR:7) 3-5 units, Win (Gómez)

125N. Stanford Introductory Seminar: Latin American Nobel Prize Winners—(Same as Comparative Literature 25N.) Preference to freshmen. An inquiry simultaneously into the powers of the artistic imagination and the dynamics of modern Latin American society and culture. The works of six Nobel Prize writers and intellectuals: Pablo Neruda, Gabriela Mistral, Octavio Paz, Gabriel García Marquez, Miguel Ángel Asturias, and Rigoberta Menchú. All write from deep connections to the tumultuous history of Latin America in this century. GER:3a (DR:7) 5 units, Spr (Pratt)

130N. Stanford Introductory Seminar: Reading the Rain Forest—Visions of the Amazon—Preference to freshmen. Different views of the Amazon, considering travel literature, Brazilian and Spanish-American novels, indigenous narratives, socio-environmentalist texts, and film. Texts: Susanna Hecht’s The Fate of the Forest; passages from travel diaries by fray Gaspar de Carvajal, Richard Schomburgk, Walter Bates, and Lévi-Strauss; Alejo Carpentier’s Los pasos perdidos, José Eustasio Rivera’s La vorágine, Márcio Souza’s Galvez, o Imperador do Acre, Mário de Andrade’s Macunaima, Mario Vargas Llosa’s El habitador, and Betty Mindlin’s Vozes da Origem. Texts in original language or in English translation. (In English, unless all participants agree to have it in Portuguese or Spanish.) GER:3a (DR:7) 3-5 units, Aut (Sd)

142Q. Stanford Introductory Seminar: Space and Representation in Latin-America—Preference to sophomores. How have representations of urban spaces developed in Latin America? How different spaces and places are engineered and transformed in a process of cultural negotiation and the dynamics of modern Latin American society and culture. Students will understand and interpret the written and spoken language on a variety of topics; manifest an awareness of the social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world; and present information, concepts, and ideas to an audience of listeners or readers on a variety of academic topics. Completion of 3 fulfills the University’s language requirement. 5 units, Aut, Win, Spr (Staff)

1A,2A. Accelerated First-Year Spanish—Completes the first-year language sequence in two rather than three quarters. Recommended only for students who have previous knowledge of Spanish or a strong interest in it who wish to dedicate more time to the development of their language proficiency. A full mastery of the language is impossible in one course. Students will understand and interpret written and spoken texts in the Spanish- and English-speaking world; and present information, concepts, and ideas to an audience of listeners or readers on a variety of academic topics. Completion of 9 fulfills the University’s language requirement. 10 units, Sum (Staff)

9A,9B,9C. Intensive First-Year Spanish—Stanford graduate students restricted to 9 units may take two or three courses in the series for a total of 9 units, or one course for 5 units. Upon completion, students are able to engage in interaction with speakers of Spanish for a variety of purposes and in a variety of contexts, using socially and culturally appropriate forms for participating in conversations; establish relationships with others; provide and obtain information; express feelings and emotions, and expressing opinions. Students will understand and interpret written and spoken language on a variety of topics; manifest growing awareness of the social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking worlds; and present information, concepts, and ideas to an audience of listeners on a variety of academic topics. Completion of 9 fulfills the University’s language requirement. See the Summer Session Catalogue, 2000. Enrollment limited to 15. No auditors. 15 units, Sum (Staff)

10. Beginning Oral Communication—For students who have completed or are currently taking Spanish 2 and who wish to devote additional
class time to developing pronunciation, usable vocabulary, and speaking skills. May be repeated once for credit.

2 units, Aut, Win, Spr (Staff)

SECOND YEAR

11C, 12C, 13C. Second-Year Spanish, Cultural Emphasis—Students become aware of and able to use socioculturally appropriate language in a variety of situations, formal and informal, academic and professional. Greater emphasis is placed on the presentational language, giving academic presentations and writing reports on topics of interest to students who develop the ability to comprehend and interpret oral and written language. Can be taken in any quarter.

4 units, Aut, Win, Spr (Staff)

11R, 12R, 13R. Second-Year Spanish, Emphasis on International Relations—Content-based approach, focusing on politics in the Spanish-speaking world and international relations; and the Hispanic world today, geographically, socially, and economically. Develops correct usage in contemporary Spanish through the reinforcement of reading, writing, listening, and speaking abilities. Primary texts from Latin America and Spain. Activity-based methodology. Fieldwork projects for an optional unit.

4-5 units, Aut, Win, Spr (Angelelli, Urreuela)

FOR HERITAGE LANGUAGE STUDENTS

11B, 12B, 13B. A special series designed for students who grew up in homes where Spanish is spoken, and who wish to develop their existing linguistic strengths.

11B. Second-Year Spanish for Heritage Language Students—Emphasis is on developing the ability to successfully communicate orally or in writing with persons with whom students come into personal contact. Intensive and extensive reading of selected texts.

4-5 units, Aut (Staff)

12B. Written and Spoken Language for Heritage Language Students—Emphasis is on developing the ability to understand, interpret, and critically analyze a variety of print and non-print materials such as movies, radio and television broadcasts, short novels, short stories, and newspaper editorials. Extensive reading of texts from a number of fields and disciplines. Writing of summaries and reviews. Prerequisite: 11B or consent of instructor.

3-5 units, Win (Staff)

13B. Multipurpose Communication for Heritage Language Students—Emphasis is on developing the bilingual student's abilities to use the oral and written language appropriately for a variety of purposes, focusing on the development of styles and registers used in more formal settings. Prerequisite: 12B or consent of instructor.

3-5 units, Spr (Staff)

15. Intermediate Oral Communication—For students who have completed or are enrolled in any second-year Spanish course, and for students trained in grammar-oriented courses who wish to improve oral skills. Develops appropriate speech strategies and communicative proficiency in Spanish, creating opportunities to act out everyday life situations encountered in a Spanish-speaking environment. Listening and reading materials are used to develop interpretive abilities and knowledge of cultural context. May be repeated once for credit.

3 units, Aut, Win, Spr (Staff)

18M. Spanish for Heritage Language Pre-Med Students—For premed students who grew up in homes where Spanish is spoken or for premed students who have learned Spanish as a foreign language and possess a considerable command of this language. Emphasis is on oral communication with Spanish-speaking patients on topics related to their health. Students participate in the organization and participation of a workshop on health-related topics prepared for a Spanish-speaking community outside campus.

3-4 units, Win (Sierra)

50. Reading Spanish—For students who have already taken Spanish for at least one full year or have superior reading proficiency in another Romance language. Emphasis is on comprehension of academic texts. Fulfills University reading requirements for advanced degrees if students earn at least a grade of 'B.'

3 units, Spr (Sierra)

99. Language Specials—With consent of department only. See instructor for section number.

1-5 units (Staff)

100. Advanced Oral Communication—For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others' points of view. Focus is on vocabulary enrichment with emphasis on idiomatic expressions. Cultural, literary, political, and journalistic readings stimulate discussion about issues related to the Spanish-speaking world. May be repeated once for credit. Prerequisite: 13 or equivalent.

3 units, Aut, Win, Spr (Staff)

103B. Advanced Spanish for Heritage Language Students—Enrollment limited to students who grew up in homes where Spanish is spoken or who have had extensive experience (e.g., 3-5 years residence) in Spanish-speaking countries. Develops competence in Spanish for academic and professional purposes, including giving presentations, writing essays, and discussing academic subjects.

4 units, Aut (Cartagena-Calderón)

104B. Special Topics in Advanced Grammar and Composition for Heritage Language Students—A grammar and composition workshop intended for heritage language speakers with advanced oral and written language skills who wish to improve their ability to communicate in Spanish through writing. The mechanics of writing (written accents, spelling, syntax, etc.) and the art of writing itself (from brainstorming, planning, and outlining to drafting, editing, and rewriting), introducing the more complex aspects of Spanish grammar. Provides students with the necessary skills to successfully undertake courses that require strong competence in academic Spanish. Students are encouraged to take such a course during the quarter of instruction.

3-4 units, Win (Cartagena-Calderón)

PORTUGUESE

FIRST YEAR

1, 2, 3. First-Year Portuguese—For students with no prior study of Portuguese or Spanish. By the end of the first-year sequence of the Portuguese language program, students are able to engage in interactions with speakers of Portuguese for a variety of purposes and in a variety of contexts using socially and culturally appropriate forms for participating in conversations, establishing relationships with others, providing and obtaining information, expressing feelings, emotions, and opinions. Students will understand and interpret written and spoken languages in a variety of contexts; manifest growing awareness of the social and cultural influences shaping the production of oral and written texts in the Portuguese-speaking world; and present information, concepts, and ideas to an audience of listeners or readers on a variety of academic topics. Completion of 3 fulfills the University's language requirement.

1. First-Year Portuguese (Part 1)—Normal paced. Follows a proficiency-oriented approach, emphasizing speaking and oral comprehension. Students learn the language as they contrast Brazilian culture with their own. Lab.

5 units, Aut (Staff)

2. First-Year Portuguese (Part 2)—Continuation of 1. Normal-paced. Emphasizes speaking and oral comprehension proficiency and promotes the beginning of development of reading and writing skills. Lab. Prerequisite: 1.

5 units, Win (Staff)
3. Second-Year Portuguese (Part 3)—Continues emphasizing speaking and oral comprehension proficiency and the development of reading and writing skills. Literary and journalistic readings, studying of Brazilian popular music, and viewing short documentaries are the basis for discussions on Brazilian culture and current events. Lab. Prerequisite: 2 or equivalent.

5 units, Spr (Staff)

1A, 2A. Accelerated First-Year Portuguese—Recommended for students with at least two years of formal study of a Romance language. By the end of the first-year sequence of the Portuguese language program, students are able to engage in interactions with speakers of Portuguese for a variety of purposes and in a variety of contexts using socially and culturally appropriate forms for participating in conversations, establishing relationships with others, providing and obtaining information, expressing feelings and emotions, and expressing opinions. Students will understand and interpret written and spoken language on a variety of topics; manifest a growing awareness of the social and cultural influences shaping the production of oral and written texts in the Portuguese-speaking world; and present information, concepts, and ideas to an audience of listeners or readers on a variety of academic topics. Completion of 2A fulfills the University’s language requirement.

1A. Accelerated First-Year Portuguese (Part 1)—Fast-paced. Follows a proficiency-oriented approach, emphasizing speaking and oral comprehension. Students learn the language as they contrast Brazilian culture with their own. Lab.

3-5 units, Aut, Win, Spr (Wiedemann)

2A. Accelerated First-Year Portuguese (Part 2)—Continuation of 1A. Fast-paced. Recommended for students with a background in a Romance language. Emphasizes speaking and oral comprehension proficiency and promotes the beginning of reading and writing skills development. Literary and journalistic readings, Brazilian popular music, and short documentaries are the basis for discussions on Brazilian cultural aspects and current events. Prerequisite: 1A or equivalent.

3-5 units, Aut, Win, Spr (Wiedemann)

SECOND YEAR

11A, 12A. Accelerated Second-Year Portuguese—By the end of the second-year sequence of the Portuguese language program, students are able to engage in interactions with speakers of Portuguese belonging to different sociolinguistic groups, using socially and culturally appropriate forms. Students will understand and interpret written and spoken language on a variety of topics; judge, discuss, and defend points of view; work in increasing depth on academic topics of their own interest in the target language; and present original information, concepts, and ideas to an audience of listeners or readers on a variety of genres and with an array of different purposes.

11A. Accelerated Second-Year Portuguese (Part 1)—Fast-paced. Three of the five cultural-geographical regions of Brazil are studied as a means of developing listening, speaking, reading, and writing proficiency. The regions are contrasted through discussions fostered by viewing movies, plays, short stories, journalistic materials, Brazilian popular music, and by listening to speakers from each region. Prerequisite: first-year sequence, equivalent, or consent of instructor.

3-5 units, Aut, Win, Spr (Wiedemann)

12A. Accelerated Second-Year Portuguese (Part 2)—Continuation of 11A. Fast-paced. Provides further development of listening, speaking, reading, and writing proficiency. Two of the five cultural-geographical regions of Brazil and other Portuguese-speaking areas are studied and contrasted through discussions fostered by viewing movies, reading longer texts of different genres, Brazilian popular music, and listening to speakers from each region. Prerequisite: 11A, or consent of instructor.

3-5 units, Aut, Win, Spr (Wiedemann)

50. Reading Portuguese—For students with superior reading proficiency in Spanish. Reading competence for research and courses in Luso-Brazilian studies. Overview of grammar. Literary, journalistic, and academic readings. Fulfills University reading requirement for advanced degrees.

3 units, Spr (Staff)

100. Advanced Portuguese Conversation—Conversation practice recommended as a supplement to the second-year sequence. Prerequisite: 12A, equivalent, or consent of instructor.

2-3 units, Spr (Staff)

109A. Practicum—Portuguese for Speakers of Spanish (Part 1)—Recommended for graduate students of literature. Accelerated introduction to Portuguese for speakers of Spanish. Follows a proficiency-oriented approach, emphasizing speaking and oral comprehension. Students learn the language as they contrast Brazilian culture with their own. Lab. Prerequisite: advanced reading competence in Spanish.

3-4 units, Aut (Wiedemann)

109B. Practicum—Portuguese for Speakers of Spanish (Part 2)—Continuation of 109A. Emphasizes speaking, oral comprehension, and reading proficiency, and promotes the beginning of the development of writing skills.

2-3 units, Win (Wiedemann)

ADVANCED AND SPECIALIZED LANGUAGE

101. Structure of Spanish—Advanced study, designed to help students understand the grammatical system of Spanish language and how it functions. It offers a description and analysis of the main topics of Spanish grammar: types of clauses, relative pronouns, verb aspect and tenses, review of prepositions, ser and estar, etc. Exercises (prepared in advance) inform class discussion.

3-5 units, Aut (Angelelli)

102. Composition and Writing Workshop—Focuses on individual development of the ability to write in Spanish. Emphasis is on style and diction, and on preparing and writing essays on literary topics. Non-Spanish majors or minors may choose topics more closely related to their studies for their projects. Prerequisite: two years of college Spanish, bilingual Spanish series at Stanford, or equivalent. GER:3a (DR:7) (WIM)

4 units, Spr (Cartagena-Calderón)

110. Introduction to Translation—Designed to familiarize students with basic translation skills and strategies. A variety of text types illustrate different types of translation (general, technical, medical, legal). Service learning component provides an opportunity to put into practice the translation principles discussed. Prerequisites: 101 and 102B; advanced command of Spanish and English.

4 units, Win (Angelelli)

121L, 122L. Spanish for Legal Professions—Open only to law students and designed for lawyers who need to work with Spanish-speaking clients. Legal terminology is combined with a review and practice of grammar for adequate oral and written expression in legal situations. Comparison of the Common Law and Roman Law systems, and some issues where the two legal systems might not correspond. Uses legal documents and materials. Law semester calendar.

3-5 units (Angelelli)

121M, 122M, 123M. Spanish for Medical Students—(Same as Health Research and Policy 280, 281, 282.) Geared to achieve a practical and rapid command of spoken Spanish. Topics: the human body, hospital
procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, Aut, Win, Spr (Corso)

125. Spanish for the Professions—Third-year level, aimed at students who wish to continue developing their Spanish language skills in relation to their particular discipline of study. Written and oral presentations required. Prerequisite: 13, 13B, or equivalent.

4-5 units (Staff)

LITERATURE, CULTURE, LINGUISTICS, AND THEORY
UNDERGRADUATE

130, 131, 132, 133, 134, 135. Cultural Perspectives—For students interested in the culture of Spanish and Portuguese speakers. Readings and topics for discussion and composition include socio-cultural and historical material from Spain, Portugal, Brazil, Spanish America, and the Mexican-Chicano, Portoriqueño, and Cuban heritage. Art, current events, folklore, history, language, and literature topics are supplemented by slides, movies, tapes, and occasional field trips.

130. Spanish Cultural Perspectives—GER:3a (DR:7)
4 units, Spr (Haro)

131. Spanish American Cultural Perspectives
4 units, Aut (Sroedler)

132. Mexican and Chicano Cultural Perspectives
4 units, Aut (Prieto)

133E. Portuguese Cultural Perspectives
4 units (Staff)

134. Brazilian Cultural Perspectives
4 units (Sá)

135. Caribbean Cultural Perspectives
4 units, Win, Spr (Negron, Johanson)

140. Introduction to Methods of Literary and Cultural Analysis—For students with little or no background in literary analysis. The basic terminology of literary theory and critical approaches to literature through textual analysis. Emphasis varies with instructor. Prerequisite: 13, 13B, or equivalent. GER:3a (DR:7)
3-5 units, Aut (Rosa)

141. Contemporary Spanish Women Writers—The speed of change and unique vitality of contemporary Spain is illustrated by studying women, particularly in the literary arena. Works by prominent women narrators of Franco's era (Matute, Martín Gaite). Novels by the new narrators of Franco's era (Matute, Martín Gaite). Novels by the new generations of women writers (Tusquets, Montero, Mayoral, Ortiz, Etxebarria) who are transforming their experiences, values, and ideologies into a new literature about the complex relationships among gender, creativity, and social mores. The feminist consciousness, how it has developed to this day, and how it is changing to face the challenges of our world. GER:3a, 4c (DR:7)
3-5 units, Win (Haro)

142E. Latino Self-Representation in the Arts: 1980s-1990s—The ways in which configurations of Latino identity are constructed and represented in the arts; how artists choose to participate in the public cultural process of self-representation; and how they have staged a trajectory in the U.S. Latino artistry in which the simplistic “ethnic” tag is transformed. The 1980s renaissance of a politicized arts “movement” inspired by the NEA controversy, censorship, and an increasing awareness of the stereotypical media image” projected of Latinas/os. The 90s as a postmodern culture, and the process of self-definition. Issues of racial and sexual differences, and how a subject is constituted through language and cultural representations.
3-5 units (Staff)

150, 151. Spanish Literature—Basic introduction to Spanish Peninsular literature. Sequence deals with major works from several periods and genres preparing for more specialized 200-level courses. Prerequisite: 13, 13B, or equivalent.

150. Spanish Literature I—The spirit of Spain in its early literature. Medieval and Golden Age masterpieces that establish and reflect Spain’s unique identity (Christians, Jews, Moors) and create its traditions. Close reading of El libro de buen amor, Poema del Cid, La Celestina, Lazarillo de Tormes, El Burlador de Sevilla, Gacilaso, Covantes, Góngora, Lope de Vega, Calderón. GER:3a (DR:7)
3-5 units, Spr (Williamson)

151. Spanish Literature II—Representative works of Spanish literature from the 1830s to the 1930s: Larra, Esproncede, Bécquer, Rosalía de Castro, Galdós, Unamuno, Valle-Inclán, Machado, and Loca. Emphasis is on a close reading of the texts in relation to the “problem of Spain” within the democratic tradition of Spanish liberalism. GER:3a (DR:7)
3-5 units, Win (Pledmore)

160, 161. Spanish American Literature—Introductory survey of major works from several periods and genres. Prerequisite: 13, 13B, or equivalent.

160. Spanish American Literature I—Major themes, writers, and cultural debates from the Colonial Period to independence. Novels, poems, essays, and periodicals from Latin America. GER:3a (DR:7)
3-5 units, Win (Rosa)

161. Spanish American Literature II—Continuation of 160, from independence to the present. Readings from a range of genres including essay, poetry, short story, and the novel. GER:4a (DR:2)
3-5 units, Spr (Staff)

168E. Chilean Studies: Modern Chilean Culture through Music, Film, and Literature 1945-1997—(Same as Latin American Studies 120.) Recommended for students planning to attend the Santiago program and open to all students. Introduction to the history, culture, politics, and literature of Chile, mainly in the 20th century.
3-5 units, Spr (Missana)

169E. Cultural Dimensions of Globalization—Recommended for students working up an honor’s thesis or a research grant proposal. The relationship between national identity and culture. How do different disciplines define “culture” and the “nation?” How do phenomena such as international trade in consumer goods, transitional migration, and global mass media affect the way in which peoples identify themselves? Readings from “case histories” in the humanities and social sciences.
3-5 units (Fox)

170, 171. Brazilian Literature—Introductory survey of major works from several periods and genres.

170. Brazilian Literature I—Survey of Brazilian literature, from the Colonial Period through the 19th century. Authors: Gregório de Matos, Tomás Antonio Gonzaga, Antonio Gonçalves Dias, José de Alencar, Nísia Floresta, Bernardo Guimarães, and Machado de Assis.
3-5 units (Staff) given 2000-01

171. Brazilian Literature II—Survey of 20th-century Brazilian literature, fiction, poetry, and essays. Themes: “the urban gaze” (Mario de Andrade, Oswald de Andrade, Patricia Galvão, Manuel Bandeira, Clarice Lispector, Dalton Trevisan, and Ledusha) and “regional” (Eduídes da Cunha, Gilberto Freyre, Raquel de Queirós, Graciliano Ramos, João Cabral de Melo Neto, João Guimarães Rosa, and Márcio Sousa). (In Portuguese or English, depending on the students’ fluency.) GER:3a (DR:7)
3-5 units, Win (Sá)
190. Fiction and Political Imagination—The ways contemporary Latin American writers explore and debate the realities of their societies and visions for the future. How literary forms and symbolic structures create socio-historical understanding, and how literature itself interacts with social and institutional structures and historical circumstances. Focus is on contemporary literary texts from regions undergoing social, cultural, and political transformations: Mexico, the Andean region, and the Southern Cone (Argentina/Chile). Authors: Carlos Fuentes, Alicia Partnoy, Juan Rulfo, José María Arguedas, Pía Barros, Manuel Puig, Domitila Barrios de Chungara, etc. Audiovisual materials contextualize written texts. GER:3a (DR:7)

3-5 units, Spr (Pratt)

191. Contemporary Spanish Cinema I: From Surrealism to Almodóvar—Spanish cinema from the Franco dictatorship through the transition to democratic Spain. The works of internationally-known directors (Buñuel, Bardem, Ercíce, Saura, Trueba, and Almodóvar), and the new Basque and Catalan filmmakers. The relationship of film to literature and the sociopolitical realities of Spain. GER:3a (DR:7)

3-5 units, Aut (Haro)

3-5 units (Haro)

199. Individual Work—Open only to students in the department, or by consent of professor. (Spanish and Portuguese)

1-12 units (Staff)

ADVANCED UNDERGRADUATES AND GRADUATES

LANGUAGE, LINGUISTICS, AND THEORY

202. Academic Writing Workshop—For entering graduate students who need to improve their academic writing skills in Spanish, and for seniors working on honors theses in Spanish or fulfilling the writing intensive requirement for the major.

5 units (Ruffinelli)

203. History of the Spanish Language—The development of the Spanish language from its earliest days to the present. Focus is on the historical circumstances in which the growth of the Spanish language took place, and on the phonological, morphological, and syntactic changes that took place during of this development.

3-5 units (Valdés)

204. Second Language/Second Dialect Acquisition—Introduction to adult second language/second dialect acquisition in tutored environments. Focus is on questions posed by the nature of Spanish-language teaching and learning. Prerequisite: 101 or equivalent.

3-5 units (Valdés)

205. Dialectology of the Spanish Language—Focuses on the major varieties of Spanish as they are spoken in Spain and in the Americas. Introduction to dialect geography and to the study of social and regional variation from a sociolinguistic perspective.

3-5 units (Valdés)

206. Spanish Use in Chicano Communities—The significance and consequences of language diversity in the culture and society of the U.S. Using Spanish-English Chicano bilingual communities, focuses on the experiences of non-English background individuals in this country. GER:4b (DR:3)

3-5 units (Valdés)

207. Theory and Issues in the Study of Bilingualism—(Same as Education 149/249.) Fulfills linguistics requirement. Key issues in the study of bilingualism from a sociolinguistic perspective. Emphasis is on typologies of bilingualism, the acquisition of bilingual ability, the description and measurement of bilingualism, and the nature of societal bilingualism. Prepares students to work with bilingual students and their families and to carry out research in bilingual settings.

3-4 units (Valdés) not given 1999-2000

PENINSULAR LITERATURE

222. The Problem of Two Spains: Literature and Society in 19th-Century Spain—Representative literary figures of 19th-century Spain: Larra, Espronceda, Zorrilla, Rosalía de Castro, Bécquer, and Galdós. Major directions in modern lyric poetry and in the modern realist novel are studied against the background of Napoleonic invasions, the loss of overseas colonies, two Carlist civil wars, and frustrated attempts to establish the First Spanish Republic. Emphasis is on close textual analysis.

3-5 units, Aut (Predmore)

3-5 units, Win (Predmore)

224. The Literature of the Spanish Republic: Civil War and Aftermath—The significance of the Civil War for Spanish, European, and world history; the International Brigades. The effect of war on the literary and cultural life of the country and the response of writers from Spain (Alberti, Lorca, Machado) and Latin America (Guillén, Neruda, Vallejo). Literary protest during the Franco regime by Aleixandre, Alonso, Cela, and Sender.

3-5 units, Spr (Predmore)

225E. Theater, Society, and Politics in 20th-Century Spain—The two major 20th-century Spanish dramatists: Ramon del Valle-Inclán and Federico García Lorca. The innovative, avant-garde nature of their major plays (symbolism, expressionism, realism) and the dramatists’ engagement with fundamental social and political issues of the times (feudalism, the newly emerging liberal state, women’s protest, class struggle, civil war).

3-5 units (Predmore)

231. Early Modern Subjectivities—Is human nature one or is it (or are we) constantly changing? Inquiries into the notion of subjectivity of subjecthood, reading classic authors of the Golden Age of Spanish Literature (16th and 17th centuries), e.g., Francisco de Vitoria, Fray Luis de León, Calderón de la Barca, Juan de la Cruz, and Teresa de Avila. Changing, historical notions such as literature and textuality, modernity and progress, individuality and authorship, emblems, Jesuit pedagogy and allegorical modes of signification in visual and non-visual formats. (In Spanish)

3-5 units, Spr (Gómez)

233. Modern Hispanic Poetry—Representative poems from 19th- and 20th-century Hispanic poets (Rosalía de Castro, Bécquer, Darío, Unamuno, Machado, Lorca, Neruda, etc.). Introduction to the elements and devices of lyric poetry: figurative language, image, symbol, metaphor, irony, meter, meaning, idea.

3-5 units (Predmore)

LATIN AMERICAN LITERATURE

210E. Anglophone Caribbean Literature—Surveys the major Anglophone Caribbean writers, with emphasis on narrative fiction and literary
241. The Colonization of the Americas—Interdisciplinary. The Early Modern "colonization" of the Americas, examining notions such as colonization or domination in relation to Early Modern American populations. What is the object of domination and in relation to what? Languages, bodies, bodies of knowledge, physical territories, territories of the imagination and the future? What are the historical options and possibilities (if any) to colonization? What would the “negative” notion of decolonization mean for us today? Historical narratives and chronicles, legal texts and repressive performances, ephemeral architectures, glyphs and images from and about the Early Modern Americas are analyzed critically. (In Spanish) 3-5 units (Gómez)

244. Women Writers of the Spanish Speaking World—Social and textual analysis of selected narratives by U.S. Latina, Spanish/Catalan, and Latin-American women writers, focusing on the representation of race, gender, and sexuality. The works are examined in their specific socio-historical context. Theoretical questions of narrativity and the role of memory. 3-5 units (Yarbro-Bejarano)

252. Contemporary Mexican Thought—Writings of theorists of mexicanidad from the post-Revolutionary era to the 1960s (Vasconcelos, Ramos, Zea, Paz). The work of these pensadores in light of recent critiques and refashionings of the concept of national identity, including cultural theory, performance art, plastic arts, popular fiction, and activist movements. 3-5 units (Fox)

254. Latin American Cinema: The Short Story in Film—Focus is on the genre of Latin American short story and those developments by major writers (Borges, García Márquez, Vargas Llosa, Onetti) which encouraged adaptations into film. Short story literary techniques are compared to cinematic techniques. 3-5 units (Ruffinelli)

255. Magical Realism: Gabriel García Márquez—Focus is on one of the most complex and confusing terms in criticism and literature history: Magical Realism. The novels and short stories of Colombian Gabriel García Márquez, and film adaptations of his literature, portray Magical Realism and other familiar concepts: Fantastic, “Real Maravilloso,” “fiction” vs. reality and documentary, etc. 3-5 units (Ruffinelli)

256. Mexico through the Eyes of Buñuel and Ripstein—Focus is on the two masters of film representation, Buñuel and Ripstein offered disturbing and polemic images of Mexico, which constitute the "real" Mexico for many viewers. The representation of family, gender, religion, race, and sex in films such as Los Olvidados, Nazarin, El Santo Oficio, and El Castillo de la Pureza. 3-5 units (Ruffinelli)

258. Dictatorships Aftermath: New Literature/New Cinema—The sociological, political, psychological, and existential scars left by South Cone military dictatorships in the '70s. Testimonial texts, short stories, and films as new expressions of literature and film on the eve of the new millennium. 3-5 units, Spr (Ruffinelli)

261. The Avant Garde in Latin America—Surveys the neglected but increasingly important Avant Garde period of the 1920s and '30s. Readings include novels, short stories, manifestos, and poetry from Mexico, Argentina, Uruguay, Peru, etc. 3-5 units (Ruffinelli)

262. The Origins of the New Latin American Novel—Several works of the 1920s form the foundation of the contemporary novel and provide a powerful image of Latin America: the "novel of the Land" (Don Segundo Sombra, Doña Barbara, La Vidascape), and the "novel of the City" (Los siete locos, Ifigenia). Close readings survey the 20th century. 3-5 units (Ruffinelli)

263. The Latin American Novel of the '60s: Cortázar, Vargas Llosa, García Márquez—Novels of the "Boom" era by this "generation" of internationally-known writers. Focus is on the construction of the modern canon of the Latin American novel. 3-5 units (Ruffinelli)

264. The Latin American Novel of the '70s: Bryce, P. Rossi, Soriano—Focuses on the post-Boom novel and the struggle for identity by a new generation of writers. The continuation/disruption of the aesthetics of the '60s. Readings: Peri Rossi, Skármeta, Soriano, etc. 3-5 units (Ruffinelli)

265. The Latin American Novel of the '80s 3-5 units (Ruffinelli)

266. Power, Resistance and Culture—The ways in which literary texts and cultural performances are related to power. Readings from various moments of Latin America and U.S. Latino history. The extent to which a project of resistance can be articulated through cultural production. Different strategies and the extent to which it can be an effective tool for transforming the ways in which modernity impacted the different time-space of the communities of their authors. Readings by Guzmán Poma, Carpenter, Piri Thomas, Miguel Barnet, etc. 3-5 units (Rosa)

268. A New Literary Genre: Testimony—Latin American literature and politics in light of a new narrative genre in the works of Cabezas, Poniatowska, Walsh, etc. 3-5 units (Ruffinelli)

269. Borges—Short stories, poetry, and essays by the Argentinean Borges. His works as literature and as a paradigm for the subsequent generation. Utilizes film adaptations of the short stories to make comparisons between two different aesthetic expressions. 3-5 units (Ruffinelli)

271. Reading the Rain Forest: Visions of the Amazon—For decades, the Amazon has been one of the most debated regions of the world. Home of a millennial cultural tradition that is expressed in and through various languages and social practices, it has had a decisive impact on the writers, artists, and scholars of Brazil and Spanish America. Views of the Amazon, considering indigenous texts: Umsusin Panlon Kumu’s AnteMundo nao Exista. Brazilian and Spanish American novels: Alejo Carpentier’s Los Pasos Perdidos, Darcy Ribeiro’s Maira, Marcio Souza’s O Boto do Tucuxi, and Mario Vargas Llosa’s El Hablador; plays, films, photography, and sociological essays. 3-5 units (Sá)

272. The Southern Cone Dictatorships—Works from Brazil, Argenti- na, Uruguay, Paraguay, and Chile focusing on the '60s-Southern Cone dictatorships. Writers: Nélida Piñón, Antonio Callado, Márcio Souza, Renato Tapajós, Diamela Eltit, David Viñas, Ricardo Piglia, Manuel Puig, Luisa Valenzuela, Cristina Perri-Rossi, Marta Traba, and Rubén Barioglo Aguiar. (In English, Spanish, or Portuguese, depending on students’ fluency.) 3-5 units (Sá)

275. Market and Culture in the Caribbean—The ways the Caribbean has been imagined and lived through different textual and cultural strategies, reacting and influencing different political and economic scenarios. How the image of the Caribbean is constructed from different spatial and social locations and how the cultural landscape has been
transformed in the last years. Issues: cultural geography; migration; urban problems; and popular cultures, race, and feminism.

3-5 units, Aut (Rosa)

276E. “Race,” Discourse, and the Origin of the Americas: The History that Literature Makes—The major literary and other texts related to the arrival of Columbus and the Spaniards in the Caribbean; the prelude voyage of the Portuguese around Cape Bojador, their landing on the shores of W. Africa; and the subsequent yoking of three separate worlds. The central role played by the literary and correlated juridico-theological texts of the time in the structuring of the post-1492 societies of the New World. Race as a basis of a status-organizing principle replacing the feudal principle of caste, a code that would be inseparable from the Renaissance’s “Invention of Man,” the rise of the modern state, and the global expansion of the West.

3-5 units (Wynter)

278. Senior Seminar: Pan-American Movements—Recommended for students working on honors theses. At various moments in the history of Latin America, intellectuals have proposed the goal of continental unity. How does the Pan-American ideal relate to the project of nation-building? Survey of Pan-American visions ranging from 19th- and early 20th-century leaders and intellectuals (Bolívar, Bello, Martí, and Vasconcelos) to contemporary figures (García Márquez, Galeano, Castillo, Saldívar). GER:4a (DR:2) (WIM)

3-5 units (Fox)

279. Senior Seminar: Heroes or Villains? Transgression in Spanish Art, Film, and Literature—Recommended for students working on honors theses. Transgression has been an element in Spanish Literature since the Middle Ages. In Western culture, transgressive fictional characters such as Celestina, Lazarillo and Don Juan have become the prototypes of the go-between, rogue, and womanizer. In art, Picasso and Miro shattered the aesthetic cannon of painting forever; and Bunuel and Almodóvar brought about surrealism and postmodernism in film. Contemporary fiction and film actively continue this tradition by depicting recurrent types of transgressors of both genders. Artistic and literary works and film represent aesthetic, ideological, criminal, sexual, and other behaviors that sabotage accepted rules and mores, yet exert tremendous magnetism on readers and viewers. (WIM)

3 units, Win (Haro)

CHICANO STUDIES

281. “Flor y Canto” A Poetry Workshop—Intensive poetry reading and writing workshop explores the poet as philosopher and the poet as revolutionary. Texts: the philosophical meditations of pre-columbian Aztec poetry known as “flor y canto,” and reflections on the poetry of resistance born out of the nationalist and feminist struggles of Latin America and Aztlan. Required 20-page poetry manuscript.

3-5 units (Moraga)

282. Sour Grapes: Writing in Resistance

4-5 units, Spr (Moraga)

285E. Chicana Cultural Studies—Analysis of the expressive culture (visual art, film/video, writings, and everyday cultural practice) of Mexican women in the U.S., grounded in an understanding of the culture as fluid and dynamic, not static or unchangeable, and shaped by the historical experience of its practitioners rather than existing beyond and above the people. Historical survey of culture as a site of conflict, contradiction, domination/resistance, and protest. Internship required. (In English) GER:4e (DR:1)

3-5 units, Spr (Yarbo-Bejarano)

286. Chicana/o Muralism—The artistic, political, and social movements that formed the modern tradition of chicana/o mural making in the U.S. and internationally. The social and political movements and their relationships to muralists: the WWII Zoot Suit era, McCarthyism, the bracero era, the birth of the UFW and the chicano student movement/MECHA, the Chicano Moratorium, chicana feminism, and international solidarity movements. Collaborative, hands-on design project.

5 units, Win (Alicia)

299. Individual Work—Open to department undergraduates or graduates by consent of professor. May be repeated for credit. (Spanish and Portuguese)

1-12 units, any quarter (Staff)

GRADUATE SEMINARS

Open to undergraduates with consent of instructor.

300. Issues and Methods in the Teaching of Heritage Languages—Focus is on the teaching of Spanish as a heritage language to students raised in Spanish-speaking homes. The fundamental issues relating to the language abilities of heritage students, including aspects of language variation in the Spanish-speaking world, characteristics of English/Spanish bilingualism in the U.S., and the process of second dialect acquisition. Emphasis is on the methods and techniques for developing the academic Spanish language skills of heritage-background students in a classroom setting.

3-5 units, Aut (Valdés)

302. Historicity and Legality in Colonial Latin America—Examination of tensions between the changing continuum of human life and the formalized rigors of the repressive culture (or law). A possible definition of law: the historical formalization of inclusions and exclusions of social agents from social goods. A critical look at the historical configuration or content of the repressive reality in relation to the Early Modern Americas (16th and 17th centuries). What does it mean to “regulate life” in Colonial Latin America or to “repress” collectivities and how is it done? Who determines the law? The role of the “letrado” culture in collective repression. Texts by Solorzano y Pereira, Ginés de Sepúlveda, Francisco de Vitoria, Bartolomé de las Casas, and Vasco de Quiroga. (In Spanish)

3-5 units, Spr (Gómez)

303. Concepts of Literacy and Cultural Theory—Topics of recent literary and cultural theory. Issues of meaning, agency, gender, and race. Reconceptualizations of the relationship between culture and material practices, and the implications for the study of the literary production of technological changes, the crisis of geographical and spatial distributions, and the emergence of social identities and informationalism. The relationship between literary and critical texts, social theory, economy, and anthropology. Texts by Rama, Castells, Bourdieu, Seyla Benhabib, Fernando Calderon, etc.

3-5 units (Rosa)

306E. Introduction to Literary Criticism and Theory: Sociocriticism—Literary theorists have proposed systematic approaches to literature in relation to the structures of society and of consciousness. “Classic” figures are combined with recent critics theorizing from non-European contexts. Readings: Northrop Frye, Raymond Williams, Jean Franco, Terry Eagleton, Angel Rama, Patricia Hill Collins, Gayatri Spivak, Edward Glaissant, Jean Bernabe, Nestor García Canclini, Pierre Bourdieu, Henry Louis Gates, etc.

3-5 units (Pratt)

307. Latin American Cultural Theory: A Historical Perspective—How has Latin America defined itself over time? How have its intellectuals dealt with questions related to race, class, and culture? Examples from different regions and moments of the Latin American experience offer some answers using concepts developed in the field of “Cultural Studies,” with a more diachronic approach. Readings: the foundational statements by Andres Bello, Jose de Alencar, and Jose Marti; the racial theories of Gilberto Freyre; Oswald de Andrade’s “Manifesto Antropofago”; Carpentier’s definition of “lo real maravilloso;” texts by Ernesto Che Guevara; Augusto Boal’s Teatro do Oprimido; Roberto Fernandez Retamar’s Caliban; Angel Rama’s Transculturation narrativa en Amer-
Trends and developments in 20th-century poetry in the context of Cervantes.

315. Cervantes
3-5 units (Sd)

308E. Scholarly Research and Writing: Workshop and Tutorial—Doctoral students produce a scholarly research: argumentation, questions of audience and expression, use of secondary sources, and other topics. Collaborative projects welcome. Group meetings and individual tutorials. Enrollment limit to 10.
3-5 units, Win (Pratt)

309E. Criticism and Colonialism—Critical approaches to literature and the study of literature and culture in relation to colonialism, neocolonialism, and the postcolonial world. Topics: representations and hegemony, transculturation, cultural dimensions of decolonization and resistance, psychoanalysis and colonial subjects, ideologies of masculinity and the feminine, colonial discourse, nationalism and the first world/third world distinction, popular culture, and syncretism. Readings from Europe, N. America, Latin America, Africa, and the Caribbean.
3-5 units (Pratt)

315. Cervantes
3-5 units, Spr (Williamson)

336. Major Trends in Spanish Poetry: Machado, Jiménez, Lorca—Trends and developments in 20th-century poetry in the context of Restoration Spain (1871-1930) and against the background of the democratic tradition of Spanish liberalism. Emphasis is on close stylistic analysis and such concepts as the Generation of 1898, Modernism, Krausism, pure poetry, and symbolic systems.
3-5 units (Predmore)

337. Ramón del Valle-Inclán—The evolution of the major works of Valle-Inclán from the Sonatas to Tirano Banderas, including the Comedias bárbaras and three of the “esperpentos,” against the background of Restoration Spain. Emphasis is on Valle as a major force in aesthetic innovation and social criticism.
3-5 units (Predmore)

341. Gabriel García Márquez and Magical Realism—Overview/discussion on “Magical Realism” as developed in the literary works of Colombian writer García Márquez and in films based on his short stories and scriptwriting. Magical Realism as the expression of myth, exoticism, and political discourse.
3-5 units, Win (Ruffinelli)

342. Liberalism: Politics and Literature in 19th-Century Latin America—The relationships between poetic works and the creation of the new states in Latin America are formulated by focusing on the connections between the appropriation of the liberal tradition and its transformations by the elite and subaltern intellectuals, and the parallel process of imitating and transforming European literary models. Theoretical readings from recent debates on liberalism and studies on literary romanticism are combined with discussion of the works of Latin American writers.
3-5 units, Win (Rosa)

348E. Contemporary Cuban Narrative and Marxist Aesthetics—Cuban novels since the '60s are a way to question and reflect on Marxist theories of literature. How Cuban writers appropriate and nationalize Marxist theories of representation to reconcile them with a construction of a "Cuban" or "Caribbean" self within the frame of the revolutionary state. Recent cultural debates through the readings of fiction and theory, e.g., the relationship between self and community, organic intellectuals, ideology and the state, popular culture, etc. Readings: Lezama Lima, Carpenter, Reinaldo Arenas, Lisandro Otero, Daena Chaviano, etc.
3-5 units (Rosa)

357. Latin American Fiction of the 1990s—The works of a range of contemporary prose fiction writers: Margo Glantz (Mexico), Sergio Ramírez (Nicaragua), Diamela Eltit (Chile), Mario Bellatin (Peru/Mexico), Silviano Santiago (Brazil), and Carmen Boullosa (Mexico). Intensive reading.
5 units, Aut (Pratt)

358. Latin American Short Story: Theory and Practice—Since Modernismo, the short story has been considered one of the most important "genres" in Latin American literature. Focus is on short story-telling writers such as Darío, Quiroga, Borges, Cortázar, Garro, Arreola, Monterroso. Latin American theories on the short story are compared with other (European, American) theoretical and critical thinking.
3-5 units (Ruffinelli)

359. 19th-Century Latin America: Currents and Cross-Currents—Intensive three weeks of concentrated seminar sessions, followed optionally by preparation of individual research projects.
3-5 units (Pratt)

360. Gender, Race, and Nation in 19th-Century Latin America—Readings of major writers of the 19th century, emphasizing their relation to projects of nation-building and decolonization.
5 units (Pratt)

361. Latin American Writing, 1900-1945: Dialectics of Cosmopolitanism/Localism—Major women poets, novelists, and essayists in dialogue with the major male writers of the same period. Issues of gender and gender symbolism in relation to regionalist, vanguardists, and the feminist movements.
5 units (Pratt)

363. Third Cinema and After—The New Latin American Cinema and Cine Novo movements. The role of the filmmaker as social theorist, the filmmakers' relation to cosmopolitan and other third world intellectuals, and the role of cinema in national liberation struggles. The legacy of these movements in Latin America and elsewhere. Current trends in Latin American cinema, and the revival of the term "Third Cinema" to describe a variety of oppositional film practices worldwide.
3-5 units (Fox)

369. The U.S.-Mexico Border Region—Interdisciplinary seminar, emphasizing recent scholarship in the field of border studies. Topics: the maquiladora industry, cross-border organizing, mass media in the border region, free trade, immigration; and critical theory, arts, and literature about border identities. (Readings in Spanish and English)
3-5 units (Fox)

372E. A Latin American Woman Voice: Clarice Lispector—The major works of Clarice Lispector in the context of Brazilian, Anglo-American, and French feminist and non-feminist criticism. (In English)
3-5 units, Win (Sá)

380. Critical Concepts in Chicana/o Literature—Metacritical interrogation of received notions about Chicana/o creativity, and how its canon and genealogies have been constructed and re-constructed over time. "Foundational" texts (With a Pistol in His Hand, Y No se lo Trago la Tierra), and cultural nationalist/neoinmigrant manifestos. Poetry and theater have been formulated as configuring genealogies that were later disrupted by Chicana feminist/lesbian critiques and writings. This literary history is questioned by highlighting women's essential participation from the beginning in theorizing and writing (which co-existed with sexism), by examining alternative subjects and genealogies, and by studying recently published early women-authored novels.
3-5 units (Yarbro-Bejarano)

389E. Race and Sexuality—Analysis of representations by Latinas and Latinos of race, ethnicity, sexuality, and identity in a variety of media: writing, visual art, performance, film/video, and music. How are the
intersections between race and sexuality represented? How is desire racialized in these representations? How do these representations contest the "ideal body" of American and/or Latina/o national identity? (In English)

5 units, Win (Yarbro-Bejarano)

399. Individual Work—Exclusively for Spanish and Portuguese departmental graduate students engaged in special work, by consent of professor.
1-12 units, any quarter (Staff)

AFFILIATED DEPARTMENT OFFERINGS
See the respective department listings for course descriptions.

COMPARATIVE LITERATURE

271. On Honor
3 units, Spr (Middlebrook)

CULTURAL AND SOCIAL ANTHROPOLOGY

72. Dance and Culture in Latin America
3-4 units, Spr (Cashion)

104. Race and Language in the U.S.
5 units, Spr (Roth, Gordon)

DRAMA

17N. Stanford Introductory Seminar: (Re)Viewing Valdez in the Year 2000
3 units, Win (Moraga)

177. Playwriting: Writing for Performance—The Fundamentals
5 units, Win (Moraga)

179B. Teatro America Workshop: The Theater of Native/Chicano America
5 units, Spr (Moraga)

DANCE

42. Dances of Latin America

174A, B, C. Beginning Quechua
3 units, Aut, Win, Spr (Fajardo)

OVERSEAS STUDIES

These courses are approved for the Spanish major and taught at the campus indicated. Students should discuss with their major advisers which courses would best meet educational needs. Course descriptions can be found in the "Overseas Studies" section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

SANTIAGO

290Z. Modernization and Culture in Latin America—(Same as Overseas Studies 120X.)
5 units, Aut, Spr (Subercaseaux)

STATISTICS

Chair: David O. Siegmund
Associate Professors: Amir Dembo, Joseph P. Romano
Assistant Professors: Emmanuel Candès, Jun Liu, Guenther Walther
Courtesy Professors: Richard A. Olshen, Neil Risch
Courtesy Associate Professor: David Rogosa
Senior Lecturer: Susan Holmes

The department’s goals are to acquaint students with the role played in science and technology by probabilistic and statistical ideas and methods, to provide instruction in the theory and application of techniques that have been found to be commonly useful, and to train research workers in probability and statistics. There are courses for general students as well as those who plan careers in statistics in government, business, industry, and teaching.

The requirements for a degree in statistics are flexible, depending on the needs and interests of the students. Some students may be interested in the theory of statistics and/or probability, whereas other students may wish to apply statistical and probabilistic methods to a substantive area. The department has long recognized the relation of statistical theory to applications. It has fostered this by encouraging a liaison with other departments in the form of joint and courtesy faculty appointments: Economics (Anderson), Education (Olkin, Rogosa, Suppes), Electrical Engineering (Cover), Geological and Environmental Sciences (Switzer), Genetics (Risch), Health Research and Policy (Brown, Efron, Hastie, Johnstone, Moses, Olshen), Mathematics (Dembo, Diaconis), Stanford Linear Accelerator (Friedman). The research activities of the department reflect an interest in both applied and theoretical statistics, and probability. There are workshops in biology-medicine and in environmental factors in health.

In addition to courses for statistics majors, the department offers a number of service courses designed for students in other departments. These tend to emphasize the application of statistical techniques rather than their theoretical development.

The Department of Statistics is well equipped for statistical applications and research in computational statistics. Computer facilities include SGI Challenge networked to approximately 25 X-terminals and a PC lab for general research and teaching use. The Mathematical Sciences Library serves the department jointly with the departments of Mathematics and Computer Science.

The department has always drawn visitors from other countries and universities. As a consequence, there is usually a wide range of seminars offered by both the visitors and our own faculty.

UNDERGRADUATE PROGRAMS

MAJOR

Students wishing to build a concentration in probability and statistics are encouraged to consider declaring a major in Mathematical and Computational Sciences. This interdepartmental program is administered in the Department of Statistics (Bradley Efron, chair) and provides a core training in mathematics, statistics, computing, and operations research, with opportunities for further elective work and specialization. See the "Mathematical and Computational Science" section of this bulletin.

MINORS

The undergraduate minor in Statistics is designed to complement major degree programs primarily in the social and natural sciences. Students with an undergraduate Statistics minor should find broadened possibilities for employment. Furthermore, the Statistics minor provides
Examples of elective course sequences are:

- Statistics 217, 218 (251), emphasizing probability and its applications
- Statistics 207; Electrical Engineering 264 (279), emphasizing signal processing
- Statistics 206; Psychology 156 (160), emphasizing psychology models and experiments
- Statistics 205; Economics 160 (181), emphasizing economic optimization
- Statistics 202; Mathematics 110, 190.

**GRADUATE PROGRAMS**

**MASTER OF SCIENCE**

The department requires that the student take 40 units of work from offerings in the Department of Statistics or from authorized courses in other departments. If Ph.D. level statistics courses are included in the program, the total number of units may be reduced. Ordinarily, four or five quarters are needed to complete all requirements.

Each student should fulfill the following requirements for the M.S. degree:

1. Statistics 116, 200, 201, and 217. Courses previously taken may be waived by the adviser, in which case they must be replaced by other graduate courses offered by the department.

2. One of Mathematics 103, 113, and 115/117; and one of Computer Science 106X (3 units), 137 (3 units), and 138A. Substitution of other courses in mathematics and computer science may be made with consent of the adviser.

3. At least three additional courses from graduate offerings in the department (202-399). Consent of the adviser is required in order to take more than 6 units of Statistics 260, 390, or 399.

4. Additional units to complete the requirements may be chosen from the list available from the department. Other graduate courses (200 or above) may be authorized by the adviser if they provide skills relevant to statistics or deal primarily with an application of statistics or probability and do not overlap courses in the student’s program. There is sufficient flexibility to accommodate students with interests in applications to business, computing, economics, engineering, health, operations research, and social sciences.

Students with a strong mathematical background who may wish to go on to a Ph.D. in Statistics should consider applying directly to the Ph.D. program.

All statistics courses required for the M.S. degree (116, 200, 201, 217, and three additional statistics graduate courses) must be taken for letter grades, and an overall 2.75 grade point average (GPA) is required.

**DOCTOR OF PHILOSOPHY**

The department looks for motivated students who want to prepare for research careers in statistics or probability, either applied or theoretical. Advanced undergraduate or master’s level work in mathematics and statistics provides a good background for the doctoral program. Quantitatively oriented students with degrees in other scientific fields are also considered for admission. The program normally takes four years.

**Program Summary**—Statistics 300A, B, C, 305, 306A, B, and 310A, B, C (first-year core program); pass two of three parts of the qualifying examination (beginning of second year); breadth requirement (second or third year); University oral examination (end of third year or beginning of fourth year); dissertation (fourth year).

In addition, students are required to take 9 units of advanced topics courses offered by the department (courses numbered above 310, not including literature, research, or consulting), and 3 units of statistical consulting.

**First-Year Core Courses**—Statistics 300 systematically surveys the ideas of estimation and of hypothesis testing for parametric and nonparametric models involving small and large samples. 305 is concerned with linear regression and the analysis of variance. 306 surveys a large number of modeling techniques, related to but going beyond the linear models of 305. 310 is a measure-theoretic probability theory, beginning with the basic concepts of analysis.

**Qualifying Examinations**—These are intended to test the student’s level of knowledge when the first-year program, common to all students, has been completed. There are separate examinations in the three core subjects of statistical methods, mathematical statistics, and probability theory, and all are given at the beginning of the Autumn Quarter of the student’s second year. Students may take two or three of these examinations and are expected to show acceptable performance in two examinations.

**Breadth Requirement**—In order to appreciate scientific problems, students are required to take 9 units of course work at a graduate or advanced undergraduate level in some other department. These units must be in courses higher than 200. Students with a graduate degree in a scientific area that is not essentially mathematics or statistics are exempted from this requirement.

**University Oral Examination**—The University oral examination is taken on the recommendation of the student’s research adviser after the thesis problem has been well defined and some research progress has been made. Usually, this happens early in the student’s fourth year. The oral examination consists of a 40-minute presentation on the thesis topic, followed by two question periods. The first relates directly to the student’s presentation and the second is intended to explore the student’s familiarity with broader statistical topics related to the thesis research.

**Financial Support**—Students accepted to the Ph.D. program are offered financial support. All tuition expenses are paid and there is a fixed monthly stipend determined to be sufficient to pay living expenses. Financial support is continued for four years, department resources permitting, for students in good standing. The resources for student financial support derive from funds made available for student teaching and research assistantships. Students receive both a teaching and research assignment each quarter which, together, do not exceed 20 hours. Students are strongly encouraged to apply for outside scholarships, fellowships, and other forms of financial support.

**Ph.D. MINOR**

The Department of Statistics will devise individual Ph.D. minor programs, but the department urges all graduate students in other fields who wish to have a subspeciality in statistics to study for an M.S. degree instead. The unit requirement for an M.S. degree is 40 units, whereas the number of units required for a minor averages around 30. This difference of 10-12 units can be made up by the student by including in the M.S. program courses from his or her own field which are related to statistics or applications of statistics.
COURSES

INTRODUCTORY

Introductory courses for general students with an interest in the problems of descriptive statistics and statistical inferences are Statistics 40, 50, 60, 61. These courses have no mathematical prerequisites. Statistics 40, 50, and 60 are certified to meet the General Education Requirement in mathematics for undergraduates. Statistics 40 and 50 are Stanford Introductory Seminars offering introductions to particular topics in a small group format with a preference to freshmen. The sequence 60, 61 emphasizes mainly the techniques and methods of statistical inference. Statistics 110, 116, 190, 200, 217-218 are introductory but have a calculus prerequisite. Statistics 110 (which builds on 116) covers the most important techniques used in the analysis of experimental data in engineering and science. Statistics 190 is a post-calculus course in statistics specifically designed for economists, psychologists, sociologists, and other social science majors. Statistics 116 provides a general introduction to the theory of probability. It may be followed by 200, which deals with statistical theory, or by 217 and 218, which deal with stochastic processes. The sequence 116, 200 is a basic two-quarter sequence in mathematical statistics; the sequence 116, 217, 218 is a basic one-year course in probability theory.

40N. Stanford Introductory Seminar: Chance, Experiments, and Interface—Preference to freshmen. The role of probability and statistics in understanding chance phenomena in an uncertain and unpredictable world. Goal: expose students to the range of real-world applications of probability and statistics, to read newspaper and journal articles with critical thinking, and to learn some simple "back of the envelope" calculations to interpret data. Applications: statistics in court cases, randomized clinical trials and assessing the efficacy of new drugs; chance and strategy in sports; paradoxes in probability and statistics; predicting the stock market and the random walk hypothesis; analysis of ESP experiments. GER:2c (DR:4) 3 units, Win (Romano)

41N. Stanford Introductory Seminar: News and Numbers—Interpreting Information—Preference to freshmen. Data reporting in newspaper and magazine accounts often leads to misinterpretations and erroneous conclusions. Goal: introduce the basic statistical tools needed to critically interpret reported data. Applications from medicine, law, sports, parapsychology, business, etc. GER:2c (DR:4) 3 units, not given 1999-2000

42N. Stanford Introductory Seminar: Monte Carlo Methods—From Molecular Structure to Dynamic Systems—Preference to freshmen. Computer simulation techniques, particularly Monte Carlo methods, first appeared in the early days (1945-55) of electronic computing. The technique was named after the gambling resort because its procedures incorporate the element of chance. Statistical physicists introduced the Markov Chain-based, dynamic Monte Carlo method for the simulation of simple fluids and, later, more complex physical systems. 1980s statisticians and computer scientists developed the method for varieties of Bayesian computation tasks (e.g., hierarchical modeling, forecasting, and belief network computation). In the 90s, the method played a role in computational biology and was used to solve problems in sequence motif identification and the analysis of complex pedigrees. Application areas of Monte Carlo methods include biology, chemistry, computer science, economics and finance, engineering, material science, physics, and statistics. The basic principle of the Monte Carlo simulation method and the power of the method: applications from polymer simulations to target tracking. GER:2c (DR:4) 3 units, not given 1999-2000

43N. Stanford Introductory Seminar: Data Analysis and Flow Cytometry—Preference to freshmen. Hands-on research at a flow cytometer in the Medical School. Flow cytometry is a technology for analyzing and sorting cells that is based on laser-induced fluorescence. The technique has become prevalent in the clinical setting and for research, and is an excellent medium to explore important statistical tools used in data analysis. GER:2c (DR:4) 3 units, not given 1999-2000

50N. Stanford Introductory Seminar: Mathematics in Sports—Preference to freshmen. The mathematical and physical foundations of various sports are developed to provide new statistics, interpret old statistics, and suggest new physical and strategic approaches. Extremes are examined to find the optimum. Some game theory and assessment of odds. The extent to which all sports are equally exciting. Skill vs. luck. The mathematics are followed as necessary to reach the desired conclusions. Recommended: mathematical aptitude. GER:2c (DR:4) 3 units, Spr (Cover)

60. Introduction to Statistical Methods: Precalculus—(Graduate students register for 160; same as Psychology 10.) Emphasis is on techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:2c (DR:4) 3 units, Win (Griffin) 5 units, Spr (Thomas)

61. Introduction to Statistical Methods II—(Graduate students register for 161.) Chi-square tests, analysis of variance, regression, correlation, nonparametrics, sample surveys, elementary design of experiments. Prerequisite: 60 or consent of instructor. 3 units, Win (Candes)

105Q. Stanford Introductory Seminar: Statistical Design of Experiments in Extrasensory Perception—Preference to sophomores. The principle of good and bad experimental designs and how experimental data is used to reach conclusions. Randomization, experimental control, efficient design, elementary probability, statistical inference, quantification of uncertainty. 3 units, not given 1999-2000

110. Statistical Methods in Engineering and the Physical Sciences—Introduction to applied statistics for engineers and physical scientists. Topics: descriptive statistics, interval estimation, tests of hypotheses, nonparametric methods, linear regression, analysis of variance, elementary experimental design. Prerequisites: 116 or equivalent, and one year of calculus. GER:2c (DR:4) 4 units, Aut (Switzer) 3-5 units, Aut (Walther) Sum (Staff)

116. Theory of Probability—Probability spaces as models for phenomena with statistical regularity. Discrete spaces (binomial, hypergeometric, Poisson). Continuous spaces (normal, exponential) and densities. Random variables, expectation, independence, conditional probability. Introduction to the Laws of Large Numbers and Central Limit Theorem. Prerequisite: Mathematics 52 and some familiarity with infinite series, or equivalent. GER:2c (DR:4) 3-5 units, Aut (Walther) Sum (Candes) Sum (Staff)

160. Introduction to Statistical Methods: Precalculus—See 60. For graduate students. 5 units, Aut (Griffin) Win (Walther) Spr (Thomas) Sum (Staff)

161. Introduction to Statistical Methods II—See 61. For graduate students. 3 units, Win (Candes)
190. Introduction to Statistical Methods (Postcalculus) for Social Scientists—(Same as Economics 80.) Introduction to statistical methods relevant to the social sciences. Emphasis is on the description and examples of the use of statistical techniques. Probability: basic rules of probability, conditional probability, Bayes' rule, discrete and continuous probability distributions. Statistical inference: point estimation, tests of hypotheses, confidence intervals, large-sample methods. Data analysis: linear regression techniques and diagnostics. Statistical computer packages (e.g., Mintab) are used for inference and data analysis. Autumn, section 2, (Switzer) uses Web based tools; limited enrollment. See www.stat/teaching/Stat190. Prerequisites: Mathematics 41 or equivalent, consent of instructor. GER:2c (DR:4)

3-5 units, Aut (Johnstone)
Win (Amemiya)
Spr (Liu)
Sum (Staff)

199. Independent Study—For undergraduates.
(Staff)

200. Introduction to Statistical Inference—Modern statistical concepts and procedures derived from a mathematical framework. Statistical inference, decision theory; point and interval estimation, tests of hypotheses; Neyman-Pearson theory. Bayesian analysis; maximum likelihood, large-sample theory. Prerequisite: 116. 3 units, Win (Staff)

CONTINUATION

Courses in this category have been designed for particular use in applications. Generally, they have introductory statistics or probability as prerequisites.

201. Statistical Methods—Descriptive statistics, tests of hypotheses, comparison of two samples, the binomial distribution, nonparametric methods, regression correlation, and elements of the analysis of variance. Can be followed by 202 or 203 (or both, in any order). Prerequisite: 116 or equivalent.

3 units, Aut (Walther)

202. Data Analysis—Elements of modern data analysis. Possible topics: bootstrap and jackknife methods for assessing variability, cross-validation, smoothing procedures and density estimation, multiple linear regression and variable selection, data transformation, nonlinear regression. Emphasis is on conceptual rather than theoretical understanding. Prerequisite: 201 or equivalent.

3 units, Spr (Candes)

203. Introduction to Regression Models and the Analysis of Variance—The most widely used statistical techniques; interpretation of observational data and empirical model building. Topics: simple and multiple linear regression, nonlinear regression, analysis of residuals and model selection, design of one-way and two-way factorial experiments, fixed effects and random effects models. Prerequisite: 200 or 201.

3 units, Spr (Owen)

204. Sampling from Finite Populations—The theory of sampling from finite populations. Simple random sampling, stratified sampling, cluster sampling, efficiency of various designs, nonresponse models; emphasis on applications. Prerequisite: a basic course in statistics (61, 110, or 200).

3 units, not given 1999-2000

205. Introduction to Nonparametric Statistics—Nonparametric analogs of the one- and two-sample t tests and analysis of variance; the sign test, median test, Wilcoxon's tests, and the Kruskal-Wallis and Friedman tests, tests of independence. Nonparametric regression and nonparametric density estimation, modern nonparametric techniques, nonparametric confidence interval estimates.

3 units, Win (Candes)

206. Applied Multivariate Analysis—Introduction to the statistical analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Prerequisite: 200 or 201; concurrent registration in 200 is permitted.

3 units, not given 1999-2000

207. Introduction to Time Series Analysis—Time series models used in economics, engineering, physics, geology, etc. Trend fitting, autoregressive schemes, moving average models, periodograms, second order stationary processes, spectral analysis. Prerequisites: 116 and a basic course in statistics (200 or 201A).

3 units, not given 1999-2000

208. Introduction to the Bootstrap—The bootstrap is a computer-based method for assigning measures of accuracy to statistical estimates. By substituting computation in place of mathematical formulas, it permits the statistical analysis of complicated estimators. Topics: nonparametric assessment of standard errors, biases, and confidence intervals; related resampling methods including the jackknife, cross-validation, and permutation tests. Theory and applications. Prerequisite: at least one course in statistics or probability.

3 units, not given 1999-2000

211. Statistical Methods for Meta-Analysis—(Same as Education 493B, Health Research and Policy 206.) Meta-analysis is a quantitative method for combining results of independent studies, and enables researchers to synthesize the results of related studies so that the combined weight of evidence can be considered and applied. Examples from the medical, behavioral, and social sciences. Topics: literature search, publication and selection bias, statistical methods (contingency tables, cumulative methods, sensitivity analyses, non-parametric methods). Project. Prerequisites: basic sequence in statistics.

3 units, Win (Olkin)

3 units, Aut (Romano)

3 units, Aut (Staff)
Win (Liu)

3 units, Spr (Cover)

3 units, not given 1999-2000
3 units, Win (Owen)

245. Computation and Simulation in Finance—(Enroll in Mathematics 240.)
3 units, Spr (Papanicolaou)

3 units, Win (Owen)

3 units, Win (Tibshirani, Betts)

3 units, Spr (Olshen)

289. Industrial Research for Statisticians—Masters-level research as in 299, but must be conducted for an off-campus employer. Final report required. Prerequisite: enrollment in M.S. or Ph.D. program (prior to candidacy).
3 units, Aut, Win, Spr (Staff)

PRIMARILY FOR DOCTORAL STUDENTS

Sequences 300A, B, C, 305, 306A, B, and 310A, B, C comprise the fundamental sequence which serves as a general introduction to and prerequisite for further work. Subsequent courses delve more deeply into special topics.

300A, B, C. Workshop in Biostatistics—(Same as Health Research and Policy 260A, B, C.) Primarily for doctoral students in statistics. Applications of statistical techniques to current problems in medical science. Enrollment for more than 2 units of credit involves extra reading or consulting and requires consent of the instructor.

300A. 1-5 units, Aut (Bloch, Brown, Efron, Hastie, Johnstone, Lavori, Olshen, Tibshirani)

300B. 1-5 units, Win (Bloch, Brown, Efron, Hastie, Johnstone, Lavori, Olshen, Tibshirani)

300C. 1-5 units, Spr (Bloch, Brown, Efron, Hastie, Johnstone, Lavori, Olshen, Tibshirani)

300A, B, C. Theory of Statistics—Elementary finite sample theory of point estimation: statistical models; sufficiency; applications to exponential families, group families, and nonparametric families; minimum risk unbiased estimation; minimum risk equivariant estimation; Cramér-Rao inequality. Elementary decision theory: loss and risk functions, Bayes estimation; minimax estimation; shrinkage estimators. Large sample estimation theory: asymptotic efficiency, maximum likelihood estimation, delta method, asymptotic distribution of quantiles and trimmed means, differentiability of statistical functionals robustness and influence. Hypothesis testing and confidence intervals: Neyman-Pearson theory; uniformly most powerful tests and uniformly most accurate confidence intervals for distributions with monotone likelihood ratio; systematic use of sufficient and conditioning to eliminate nuisance parameters in exponential families; use of invariance to eliminate nuisance parameters in group families; asymptotic theory of likelihood ratio test; Pitman asymptotic efficiency; rank, permutation and randomization tests; jackknife, bootstrap, and sample reuse methods. Density estimation: kernel density estimation; bias vs. variance tradeoff; choice of bandwidth and kernel. Time series: first- and second-order autoregressive processes; conditions for stationarity; use of maximum likelihood in time series with asymptotic theory. Possible topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions with applications to statistics.

300A. 3 units, Aut (Romano)
300B. 3 units, Win (Romano)
300C. 3 units, Spr (Donoho)

3 units, Aut (Hastie)

306A, B. Methods for Applied Statistics—Survey of applied statistical methods, including computational methods. Topics: nonlinear least squares (including robust regression), generalized linear models, time series (autocorrelation, autoregression, periodogram, spectrum), survey sampling (finite populations, stratification, clustering, ratio estimation), nonparametric regression (kernels, splines, projection pursuit, CART, MARS), survival analysis (Kaplan-Meier, Mantel-Haenszel, Cox model), design (factorial experiments, response surfaces), random number generation, numerical linear algebra, numerical optimization, sample reuse (bootstrap, jackknife, cross-validation, other Monte Carlo), matrix based multivariate statistics (canonical correlation, T-squared, factor analysis, principal components), and other topics briefly. Prerequisite: 305 or equivalent.

306A. 3 units, Win (Donoho)
306B. 3 units, Spr (Friedman)

310A. Theory of Probability—Mathematical tools: asymptotics, metric spaces; measure and integration; Lp spaces; some Hilbert spaces theory. Probability: independence, Borel-Cantelli lemmas, almost sure and Lp convergence, weak and strong laws of large numbers. Weak convergence and characteristic functions; central limit theorems; local limit theorems; Poisson convergence. Prerequisites: 116, Mathematics 171.
3 units, Aut (Siegmund)
3 units, Win (Dembo)

3 units, Spr (Siegmund)

314. Matrix Theory and Inequalities
3 units, not given 1999-2000

315A,B,C. Modern Applied Statistics: Learning and Data Mining—
The meteoric rise in computing power has been accompanied by a rapid growth in the areas of statistical modeling and data analysis. New techniques have emerged that were not possible ten years ago, using ideas that bridge the gap between statistics, computer science, and artificial intelligence. The new methods, emphasizing the statistical methodology.
3 units, Aug (Tibshirani)

315B. Data Mining—Data mining is used to discover patterns and relationships in data, with an emphasis on large observational data bases. It sits at the common frontiers of statistics, data base management, machine learning, and data visualization. From a statistical perspective, it is viewed as computer automated exploratory analysis of (usually) large complex data sets. Topics: classification, association rules, decision trees, covering algorithms, example based methods, clustering, and visualization.
3 units, Win (Friedman)

3 units, Spr (Hastie)

3 units, Spr (Dembo)

318. Modern Markov Chains—Examples: the Gibbs sampler, metropolis algorithm and hybrid Monte Carlo. Irreducibility, recurrence periodicity, Doeblins techniques, C-sets, Harris recurrence. Coupling, spectral techniques, bounds on convergence from bounds on the spectrum. Iterated function systems with application to image compression recurrence; Foster’s criteria and applications to statistical decision theory. Introduction to control theory and nonlinear time series analysis. Pre-requisite: graduate probability course.
3 units, not given 1999-2000)

319. Literature of Statistics—Literature study of topics in statistics and probability culminating in oral and written reports.
3 units, Aut (Staff)
Win (Donoho)
Spr (Johnstone)

3 units, not given 1999-2000

323. Wavelets and Beyond, with Applications—New representations have been proposed for signals and images, e.g., wavelets, wavelet packets, and cosine packets. How these representations are constructed, comparing their special features. The range of potential applications (data compression, feature extraction, pattern classification), and newer representation tools, e.g., noiselets, brushlets, ridgelets, etc.
3 units, not given 1999-2000

3 units, not given 1999-2000

326. Sequential Experimentation—Sequential statistical decision problems, dynamic programming and optimal stopping, quality control and changepoint detection, dynamic allocation and bandit problems, repeated significance tests, and boundary crossing probabilities.
3 units, not given 1999-2000

332. Asymptotic Methods in Statistics—Concepts of efficiency, the asymptotic efficiency of maximum likelihood estimators, best asymptotically normal (BAN) estimators, asymptotic behavior of likelihood ratio tests, optimal designs, empirical Bayes methods.
3 units, not given 1999-2000

3 units, not given 1999-2000

340. Experimental Design—For graduate students in science, engineering, and statistics. Emphasis is on how and why do experiments, and analyzing and presenting the results. Topics: control groups, anova, blocking and balance, factorial experiments, fractional factorials, screening designs, response surfaces, binary outcomes, Taguchi methods, computer experiments. Pre-requisite: 116. Recommended: experience with experimentation or data analysis.
3 units, not given 1999-2000

3 units, not given 1999-2000
344A. Genetic Epidemiology—(Same as Genetics 344A.) Methods for the design and analysis of studies in human genetics, focusing on the epidemiology of Mendelian disorders and the genetic and environmental contributions to common, complex familial traits. Topics: study designs for assessing the importance of genetic factors (family, twin, and adoption studies); methods for determining modes of inheritance (segregation analysis); identification and mapping of major genes through linkage analysis and disease-marker associations. Applications to birth defects, coronary heart disease, psychiatry, neurology, cancer, and immunology. 3 units (Risch) alternate years, not given 2000-01

344B. Topics in Statistical Genetics—(Same as Genetics 344B.) In-depth discussion of statistical methods currently used in human genetic analysis. Topics depend on interests of the students and instructors: concepts of likelihood as used in the genetic context; measures of familial aggregation, including issues of censoring and age-dependent data; genetic modeling of quantitative traits; mode of inheritance analysis, including segregation analysis; analysis of extended pedigrees; parametric and nonparametric approaches to linkage analysis and gene mapping, including family studies, radiation hybrid data, sperm typing, and DNA contig mapping; linkage disequilibrium; analysis of DNA profiles for individual identification; DNA sequence analysis. 3 units (Risch)

350. Advanced Topics in Probability Theory—Each year concentrates on a different topic(s) of current research in probability theory, chosen to reflect the interests of the students and instructor. Possible topics: Brownian motion, course graining, concentration inequalities, discrete probability, Gibbs measures, interacting particle systems, large deviations, percolation, random matrices, Stein’s method. 3 units, not given 1999-2000

352. Spatial Statistics—Summary statistics, probability models, smoothing and interpolation, classification, sampling design, applications to remote sensing, and environmental monitoring. 3 units, Spr (Switzer)

353. Monte Carlo Methods—Recent advances in iterative and noniterative Monte Carlo sampling methods involved in scientific and statistical computations. Basic iterative methods: the Metropolis-Hastings algorithm and the Gibbs sampler; noniterative methods mainly cover variations of importance and sampling. Topics: molecular dynamics, hybrid Monte Carlo (and other Hamiltonian-based methods), Langevin diffusion, simulated and parallel tempering, adaptive directional sampling, multigrid Monte Carlo and generalized Gibbs sampling, multiple-try Metropolis, conjugate-gradient MC, growth Monte Carlo, and Monte Carlo filtering methods. Applications to Bayesian computations, computational biology, computer chip design, digital signal processing, polymer simulation, statistical physics, and target tracking. 3 units, Win (Liu)

371. Bayesian Modeling and Computations—Bayesian methods treat unknowns as random variables and are coherent and flexible. Basic Bayesian models, whose answers often appear similar to classical answers. Complicated hierarchical and mixture models with nonstandard solutions. Methods for model checking, sensitivity analysis, and predictions. Emphasis is on drawing inferences via computer simulation. Mathematical analysis discussion. 3 units, not given 1999-2000

372. Graphical Models and Bayesian Network—Using graphs to represent statistical models (the associational and casual relations between random variables under study) enables concise representations, easy interpretation, and computationally feasible incorporation of new information. Emphasis is on Bayesian inference using these graphical models, e.g., Bayesian networks. Topics: basic graph theory, graphical Gaussian models, log linear models, expert systems, missing data problems, and genetic modeling. Computational issues and their applications to artificial intelligence. 3 units, not given 1999-2000

376A. Information Theory—(Same as Electrical Engineering 376A.) Information theory and statistics. The extreme points of communication theory: data compression to the entropy limit, and communication at the channel capacity limit, Kolmogorov complexity, Shannon entropy. Rate distortion theory. Huffman coding and random coding. Unified treatment based on the asymptotic equipartition theorem. Prerequisite: 116 or Electrical Engineering 278, or equivalent. 3 units, Win (Cover, Gill)

376B. Information Theory—(Enroll in Electrical Engineering 376B.) 3 units, alternate years, given 2000-01

390. Consulting Workshop—Provides skills required of practicing statistical consultants and exposure to wide range of statistical applications. Students participate as consultants in the department’s drop-in consulting service, analyze client’s data, and prepare formal written reports. Seminar provides supervised experience in short term consulting. Prerequisites: coursework in applied statistics or data analysis, and consent of the instructor. 3 units, Aut, Win (Owen) Spr (Donoho)

398. Industrial Research for Statisticians—Doctoral research as in 199, but must be conducted for an off-campus employer. Final report required. Prerequisite: Statistics Ph.D. candidate. 1-9 units, Aut, Win, Spr, Sum (Staff)

399. Research—Research work as distinguished from independent study of nonresearch character listed in 199. (Staff)

PROGRAM IN STRUCTURED LIBERAL EDUCATION

Director and Professor: Mark Mancall (History)
Lecturer and Coordinator: Suzanne Greenberg

The Program in Structured Liberal Education (SLE) is designed specifically for freshmen interested in an interdisciplinary approach to the liberal arts and sciences. The program emphasizes intellectual rigor and individualized contact between faculty and students. SLE has three basic purposes: to present a coherent program of instruction; to develop the student’s ability to ask effective questions of texts, teachers, the culture, and themselves; and to develop intellectual skills in logical reasoning, critical reading, expository writing, and group discussions.

SLE stresses inquiry, criticism, and a tolerance for ambiguity. Neither the faculty nor the curriculum provides “ready-to-serve” answers to the questions being dealt with; rather, SLE encourages a sense of intellectual challenge, student initiative, and originality.

APPLICATION

Freshmen should apply during the summer preceding the academic year in which they will enroll.

SLE is designed as a three-quarter sequence and students applying should be willing to make a commitment for the entire year.
Correspondence regarding the program should be addressed to Program in Structured Liberal Education, Florence Moore Hall, Stanford University, Stanford, California 94305.

COURSES
91, 92, 93. SLE is a demanding program which consumes approximately 60 percent of the average academic workload first-year students usually carry. Autumn Quarter concentrates on ancient Greece, Israel, and India. Winter Quarter examines the religious, ideological, and aesthetic transformations that occurred in Europe, Asia, and the New World as a result of the Middle Ages, Renaissance, Scientific Revolution, and Enlightenment. Spring Quarter focuses on the social, political, and artistic forces that shape the modern world. Completion of the SLE program satisfies the Area One Requirement, the University Writing Requirement, and one General Education Requirement in the humanities.

91. 9 units, Aut (Staff)
92. 9 units, Win (Staff)
93. 9 units, Spr (Staff)

PROGRAM IN SYMBOLIC SYSTEMS

Director: Thomas Wasow (Linguistics, Philosophy)
Program Coordinator: Lera Boroditsky
Program Committee: James Greeno (Education), Daphne Koller (Computer Science), Paul Skokowski, Kenneth Taylor (Philosophy)
Program Faculty: David Beaver (Linguistics), Michael Bratman (Philosophy), Joan Bresnan (Linguistics), Christopher Chafe (Music), Eve Clark (Linguistics), Herbert H. Clark (Psychology), John Etchemendy (Philosophy), Solomon Feferman (Mathematics, Philosophy), Anne Fernald (Psychology), John Gabrieli (Psychology), Peter Godfrey-Smith (Philosophy), Zenzir Griffin (Psychology), David Heeger (Psychology), Martin Kay (Linguistics), Christopher Manning (Computer Science, Linguistics), Ellen Markman (Psychology), John McCarthy (Computer Science), Raymond McDermott (Education), Grigorii Mints (Philosophy), Clifford Nass (Communication), Nils Nilsson (Computer Science), John Perry (Philosophy), Stanley Peters (Linguistics), Vaughn Pratt (Computer Science), Byron Reeves (Communication), Eric Roberts (Computer Science), Ivan Sag (Linguistics), Peter Sells (Linguistics), Michael Strevens (Philosophy), Joshua Tenenbaum (Psychology), Johan van Benthem (Philosophy), Decker Walker (Education), Brian Wandell (Psychology), Terry Winograd (Computer Science)
Lecturer: Todd Davies
Consulting Faculty: Bernardo Huberman (Applied Physics), John R. Koza (Medicine, Electrical Engineering)
Other Faculty: Margaret Johnson (Computer Science), Keith Stenning (Philosophy)

Computer systems, robots, and people are all examples of symbolic systems, agents that use language to represent the world around them so as to communicate and generally act intelligently. The notions of symbol, representation, information, and action are at the heart of the study of symbolic systems. This common core of notions arises in a variety of fields including artificial intelligence, computer science, cognitive psychology, linguistics, philosophy, and symbolic logic. In recent years, though, a new discipline has begun to emerge from research collaborations across these traditional disciplines, addressing questions such as:

In what ways are computers and computer languages like humans and their languages? How can the interaction between humans and computers be made easier and more productive? What would it take to build a computer that thinks?

The Symbolic Systems Program (SSP) offers an opportunity to focus on these issues. Majors take courses in the departments of Computer Science, Linguistics, Philosophy, and Psychology, as well as courses designed specifically for the program. The goal is to prepare students with the vocabulary, theoretical background, and technical skills to understand and participate in contemporary interdisciplinary research into questions about language, information, and intelligence, both human and machine. The curriculum offers traditional humanistic approaches to these questions as well as a training in, and familiarity with, contemporary developments in the science and technology of computation.

A degree in Symbolic Systems prepares students for advanced training in the interdisciplinary study of language and information, or for postgraduate study in any of the contributing disciplines. It is also excellent preparation for employment immediately after graduation.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

The program leads to a B.S. in Symbolic Systems. The curriculum provides students with a core of concepts and techniques from computer science, linguistics, logic, philosophy, and cognitive psychology, drawing on faculty and courses from various departments.

Symbolic Systems majors must complete a core of required courses plus a concentration consisting of five additional courses. All major courses are to be taken for letter grades unless an approved course is offered satisfactory/no credit only. The core requirements are:

1. Cognition:
   a) Psychology 40, Introduction to Cognitive Psychology
   b) One Psychology course from: 30, Introduction to Perception; 50, Introduction to Human Neuropsychology; 131, Language and Thought; 152, Language Processing; 141, Cognitive Development

2. Computation and Artificial Intelligence:
   a) Computer Science 106B, Programming Abstractions, or 106X, Programming Methodology and Abstractions
   b) Computer Science 103X, Discrete Structures, or 109, Introduction to Computer Science
   c) Computer Science 121, Introduction to Artificial Intelligence, or 221 Artificial Intelligence: Principles and Techniques

3. Philosophical Foundations:
   a) Philosophy 80, Mind, Matter, and Meaning
   b) One Philosophy course from: 181, Philosophy of Language; 184, Theory of Knowledge; 186, Philosophy of Mind; 189 Philosophical Applications of Cognitive Science

4. Language:
   a) Linguistics 120, Introduction to Syntax
   b) Linguistics 130, Introduction to Semantics and Pragmatics, or 230A, Semantics and Pragmatics

5. Logic:
   a) Philosophy 160A, First Order Logic
   b) Philosophy 160B, Computability and Logic; or Computer Science 154, Introduction to Automata and Complexity Theory

6. Mathematics: one approved course on a mathematical topic other than calculus.

7. Senior Seminar: Symbolic Systems 201 or an approved interdisciplinary seminar.

Students select concentrations from the list below or design others in consultation with their advisers.

Applied Logic
Artificial Intelligence
Cognition
Computation
Computer Music
Education and Learning
Human-Computer Interaction
Natural Language
Neural Systems
Philosophical Foundations
Rationality
MINORS

Students may minor in Symbolic Systems by completing either item '1' or '2' below.

1. One course in each of the specified core areas:
   a) Artificial Intelligence: Computer Science 121 or 221
   b) Computer Science: Comp. Sci. 103X or 109
   c) Linguistics: Ling. 120 or 130
   d) Logic: Philosophy 159 or 160A, or Computer Science 154
   e) Philosophy: Phil. 80, 181, 184, 186, or 189
   f) Psychology: Psych. 30, 40, 50, 131, 132, or 141

2. Psychology 200, plus an interdisciplinary SSP concentration listed in the program booklet (available from the program office, or on the SSP Web page, http://www-leland.stanford.edu/dept/symbol/). To qualify, the selection of courses used for the minor must be interdisciplinary, that is, it must either include courses from at least three departments, or include more than one course from each of two departments.

DIRECTED RESEARCH AND SENIOR HONORS

The program strongly encourages all SSP majors to gain experience in directed research by participating in faculty research or by pursuing independent study. Several avenues are offered.

1. Summer Internships: students work on SSP-related faculty research projects.
2. Independent Study: under faculty supervision, students work on independent projects. For course credit they may enroll in Symbolic Systems 196.
3. Senior Honors: under faculty supervision, students pursue extended research projects and complete a senior honors dissertation.

Contact SSP for more information on any of these options. In addition, the Undergraduate Research Opportunities office at campus offers numerous grants and scholarships supporting student research projects at all levels.

COURSES

CORE

30. Introduction to Perception—(Enroll in Psychology 30.)
   3 units, Spr (Heeger)

40. Introduction to Cognitive Psychology—(Enroll in Psychology 40.)
   4 units, Win (Spieler)

50. Introduction to Human Neuropsychology—(Enroll in Psychology 50.)
   4 units, Win (Gabrieli)

80. Mind, Matter, and Meaning—(Enroll in Philosophy 80.) (WIM)
   5 units, Aut (Braitman)
   Spr (Taylor)

103X. Discrete Structures (Accelerated)—(Enroll in Computer Science 103X.)
   4 units, Spr (Mitchell, Dill, Staff)

106B. Programming Abstractions—(Enroll in Computer Science 106B.)
   5 units, Aut (Staff)
   Win (Plummer)
   Spr (Zelenski)

106X. Programming Methodology and Abstractions (Accelerated)—(Enroll in Computer Science 106X.)
   5 units, Aut (Plummer)
   Win (Young)
   Spr (Zelenski)

109. Introduction to Computer Science—(Enroll in Computer Science 109.)
   4 units, Aut (Staff)
   Win (Johnson)

120. Introduction to Syntax—(Enroll in Linguistics 120.)
   4 units, Aut (Sag, Wasow)

121. Introduction to Artificial Intelligence—(Enroll in Computer Science 121.)
   3 units, Aut (Nilsson)

130. Introduction to Linguistic Meaning—(Enroll in Linguistics 130.)
   4 units, Win (Beaver)

131. Language and Thought—(Enroll in Psychology 131.)
   4 units, Aut (H. Clark)

132. Language Processing—(Enroll in Psychology 132.)
   4 units, Spr (Griffin)

141. Cognitive Development—(Enroll in Psychology 141.)
   3 units, Aut (O"Donnell, Henderlong)

150. Computers and Democracy—The existence of computer networks creates new options for participative decision making in societies, communities, and organizations. The issues involved in the design of systems for democratic decision making from several perspectives: formal theories of social choice and voting; psychological evidence concerning group decision making, persuasion, and presentation effects; previous uses of computers and the internet as aids to democracy and group involvement; and theories of deliberative discourse. Content flexibility depending on student interests. Student projects on the issues. 3 units, Win (Davies)

154. Introduction to Automata and Complexity Theory—(Enroll in Computer Science 154.)
   4 units, Win (Ullman)
   Spr (Motwani)

157. Seeing Reason: An Interdisciplinary Approach—How can we combine diagrams and language in reasoning, and what are their internal mental forms? A satisfactory answer requires at least: a semantic analysis of diagrams and languages; an experimental analysis of student learning, based on the semantic theory; and an account of the different learning styles that lead to contrasting effects of presentations on different students. These ingredients yield a new theory of human reasoning focused on the creation and selection of representations. 3 units, Spr (Stenning)

160A. First-Order Logic—(Enroll in Philosophy 160A.)
   4 units, Win (Mints)

160B. Computability and Logic—(Enroll in Philosophy 160B.)
   4 units, Spr (Mints)

181. Philosophy of Language—(Enroll in Philosophy 181.)
   4 units, Win (Taylor)

184. Theory of Knowledge—(Enroll in Philosophy 184.)
   4 units, Win (Lawlor)

189. Philosophical Applications of Cognitive Science—(Enroll in Philosophy 189.)
   4 units, Aut (Stevens)

200. Symbolic Systems Seminar: Problems in Intelligence, Information, and Learning—(Same as Education 120, Linguistics 137, Philosophy 200.) Interdisciplinary topics in cognitive science, (e.g., modular-
ity, representation, reasoning, situated action, or creativity). Prerequisites: Computer Science 109, Linguistics 120 or 130, Philosophy 80, Psychology 40, or consent of instructors.

201. Senior Seminar—Core seminar for program majors. Integrates themes from core course work with contemporary cross-disciplinary research in learning, computation, and formal systems.
2 units, Win (Greeno, Wasow)

221. Artificial Intelligence: Principles and Techniques—(Enroll in Computer Science 221.)
4 units, Aut (Koller)

230A. Introduction to Semantics and Pragmatics—(Enroll in Linguistics 230A.)
4 units, Win (Peters)

RESEARCH
190. Senior Honors Tutorial—Under the supervision of the honors faculty adviser, students work on their senior honors project.
1-5 units, any quarter (Staff)

191. Senior Honors Seminar—Under the leadership of the Symbolic Systems program coordinator, students meet, discuss, and present their honors project.
2 units, Win, Spr (Boroditsky)

196. Independent Study—Independent work under the supervision of a faculty member.
1-15 units, any quarter (Staff)

AFFILIATED DEPARTMENT OFFERINGS
Listed below are a sample of other courses, some of which can be used as part of the student’s concentration (see SSP booklet), or may be of special interest to SSP majors. The list is not exhaustive. Students should consult course listings in the related departments for additional courses and information.

COMMUNICATION
169/269. Computers and Interfaces: Psychological and Social Issues
4 units, Spr (Nass)

172/272. Psychological Processing
5 units, Win (Reeves)

COMPUTER SCIENCE
9. Undergraduate Journal Club
1 unit, Aut (Caspi)

99L. Stanford Introductory Seminar: How are We to Know?
3 units, Win (Nilsson)

99P. Stanford Introductory Seminar: Smart Computers and other Technological Opportunities
3 units, Spr (McCarthy)

147. Introduction to Human-Computer Interaction Design
3-4 units, Aut (Winograd)

150. Introduction to Computer Theory for Non-CS Majors
4 units, Spr (Cain)

193D. C++ and Object-Oriented Programming
3 units, Win (Cain)

193I. Internet Technologies
3 units, Spr (Parlante)

193J. Programming in Java
3 units, Aut (Zelenski)

193U. Software Engineering in C
3 units, Win (Staff)

193W. Microsoft Windows Programming
3 units, Spr (Young)

201. Computers, Ethics, and Social Responsibility
4 units, Spr (Johnson)

202. Law for Computer Science Professionals
1 unit, Win (Heckman)

221. Artificial Intelligence: Principles and Techniques
4 units, Aut (Koller)

223A. Introduction to Robotics
3 units, Win (Khatib)

228. Reasoning Under Uncertainty
3 units, Win (Koller)

229. Machine Learning
3 units, Spr (Bregler)

247A. Human-Computer Interaction: Interaction Design Studio
3-4 units, Win (Winograd)

247B. Contextual and Organizational Issues in Human-Computer Interaction
3-4 units, Spr (Hinds)

377. Topics in Human-Computer Interaction
3-4 units

3-4 units, Win (Winograd)

547. Human-Computer Interaction Seminar
1 unit, Aut, Win, Spr (Winograd)

EDUCATION
224. Information Technology in the Classroom
3 units, Win (Walker)

LINGUISTICS
17Q. Stanford Introductory Seminar: Slips of the Tongue
3 units, Win (Zwicky)

35Q. Stanford Introductory Seminar: Computers and Human Language
3 units, Win (Hubbard, Kay)

44N. Stanford Introductory Seminar: Living with Two Languages
3 units, Spr (E. Clark)

105. Phonetics
4 units, Aut (Flemming)

110. Introduction to Phonetics and Phonology
4 units, Spr (Flemming)

120. Introduction to Syntax
4 units, Aut (Sag, Wasow)
124. Lexical Functional Grammar  
   4-6 units, Aut (Bresnan)

138. Introduction to Computational Linguistics  
   4 units, Aut (Kay)

235. Mathematical Linguistics  
   1-4 units, Aut (Peters)

237. Natural Language Processing  
   4 units, Spr (Manning)

240. Language Acquisition I  
   4 units, Aut (E. Clark)

PHILOSOPHY

14N. Stanford Introductory Seminar: Consciousness  
   3 units, Aut (Perry)

15N. Stanford Introductory Seminar: Mind and World  
   3 units, Spr (Strevens)

60. Introduction to the History and Philosophy of Science  
   (Same as History and Philosophy of Science 60.)  
   5 units, Aut (Godfrey-Smith)

159. Basic Concepts in Mathematical Logic  
   4 units, Aut (Baker-Plummer)

164. Central Topics in the Philosophy of Science: Scientific Explanation  
   4 units, Win (Strevens)

167B. Philosophy, Biology, and Behavior  
   4 units, Spr (Godfrey-Smith)

169. Intensional Logic  
   4 units, Spr (van Benthem)

187. Philosophy of Action  
   4 units, Win (Bratman)

298. Logical Dynamics  
   3 units, Spr (van Benthem)

PSYCHOLOGY

20. Introduction to Brain and Behavior  
   3 units, Aut (R. Fernald)

112. Research Methods in Cognitive Psychology  
   5 units, Aut (Spieler)

134. Seminar on Language and Deception  
   3 units, Win (H. Clark)

205. Foundations of Cognition  
   1-3 units, Aut (Tenenbaum)

221. Applied Vision and Image Systems  
   1-3 units, Win (Wandell)

PROGRAM ON URBAN STUDIES

Director: Leonard Ortolano (Professor of Civil and Environmental Engineering)

The Committee on Urban Studies: (Chair) Paul Seaver (Professor, History); Samuel Chiu (Associate Professor, Engineering-Economic Systems and Operations Research), Richard Ford (Professor, Law), Luis Fraga (Associate Professor, Political Science, on leave-Autumn), Steven Gurelick (Professor, Geological and Environmental Sciences), Shirley Heath (Professor, English, Linguistics), Keith Loague (Associate Professor, Geological and Environmental Sciences), Milbrey McLaughlin (Professor, Education), Nancy Tuma (Professor, Sociology), Paul Turner (Professor, Art and Art History)

Visiting Professor: Michael Douglas

Visiting Associate Professor: Gerald Gast

Lecturers: John Barton, Patricia Cross Collins, Nadinne Cruz, Radford Hall, David Neuman, Beverly Purrington, Jackie Schmidt-Posner, Michael Smiley, Frederic Stout, Patti Walters, Douglas Webster

Urban Studies brings together students, faculty, and outside specialists who are concerned with the people and problems of cities. The program stresses two basic themes: developing a critical understanding of how cities evolve and gaining knowledge of the practical and analytical tools which can help improve the quality of urban life. Urban Studies enables undergraduates to examine urban problems through a number of disciplinary lenses and to address these problems in a practical way.

The Urban Studies major examines the city within the broad context of a liberal arts education. It treats urbanism as an interdisciplinary field and encourages students to inquire critically into both the nature of the urban environment and techniques used to modify that environment.

The major prepares students for a variety of careers and advanced academic pursuits. Graduates from the Program on Urban Studies have established careers in architecture, community service, environmental planning, real estate development, urban design, and urban planning. Many have obtained graduate degrees in architecture, urban design, or urban planning from major universities across the country including UC-Berkeley, Harvard, and MIT. A substantial number have opted to take graduate degrees in business, law, and public policy.

Information on graduate programs in urban planning, community organization, and architecture and urban design is available from the program office. This information also details prerequisites for these graduate programs.

UNDERGRADUATE PROGRAMS

All students majoring in Urban Studies must complete the Urban Studies core. Those who specialize in community organization, urban planning, or architecture and urban design must complete their majors by meeting the appropriate Option Requirements. Students who wish to concentrate in a different area (for example, health care) must complete the Urban Studies core and design the remaining units with an academic adviser who is a member of the Academic Council.

In all cases, Urban Studies majors must satisfy requirements for an option, and complete a minimum of 70 units (not counting prerequisites). Courses used to satisfy requirements for the major must be taken for a letter grade.

Students interested in declaring Urban Studies as a major should do so using Axess. However, students are required to meet with the program director before declaring Urban Studies as a major.

URBAN STUDIES CORE

Urban Studies (Urbs) majors should take 110, Introduction to Urban Studies, before the end of the Autumn Quarter of their junior year.

Each of the following is required:

Urbs. 110. Introduction to Urban Studies
Economics 1. Elementary Economics.

Select one of the following*:

Art and Art Hist. 280. Utopia and Reality in Modern Urban Planning

or Urban Studies 120. Building Community

* Students in the Urban Planning Option and the Architecture and Urban Design Option are encouraged to select Art and Art History 280, whereas students in the Community Organization Option are encouraged to select Urban Studies 120.

Select at least one course from each of the following categories:

Social Science Research Methods:
Comm. 106. Communications Research Methods
Cult. & Social Anthro. 93. Prefield Research Seminar
Ed. 179X. Urban Youth and their Institutions: Research and Practice
There are no formal prerequisites. Students who want to pursue a graduate degree in business or city planning are encouraged to take Economics 50, Economic Analysis I. Information on graduate programs suitable for urban studies graduates who wish to pursue advanced studies in community organization is available in the Urban Studies office.

**REQUIRED TO COMPLETE THE MAJOR**

All students complete the Urban Studies Core and Economics 1, which are prerequisites to a required course in this option (Urban Studies 192).

- Comp. Sci. 105, or a more advanced course in computing
- Poli. Sci. 59R, Issues in Public Service*
- Public Policy 191, Business Skills for the Social Sector†
- Urbs 191A, Introduction to Community Service Organizations
- Urbs 191B, Community Organizing
- Urbs 191C, Community Organizing
- Urbs 192, Social Entrepreneurship

Select one of the following courses on organization theory:

- Soc. 160, Formal Organizations
- or Indust. Engr. 100, Organizations: Theory and Management

* Pol. Sci. 159R should be taken before or at the same time as Urban Studies 191C.
† Public Policy 191 must be taken before Urbs. 192.

**RESTRICTED ELECTIVES**

The total number of units taken to satisfy the major add up to at least 70; restricted electives are used for this purpose.

- Ed. 95S, Issues in Leadership
- Ed. 100X, The State of Public Education in Urban Communities
- Ed. 105, American Education and Public Policy
- Ed. 141, Children, Civil Rights, and Public Policy in the U.S.
- Ed. 177X, Education of Immigrants in Cities
- Ed. 193, Peer Counseling
- Geol. & Envir. Sci 196, Introduction to GIS
- Hist. 264S, Undergraduate Research Seminar: The Papers of Martin Luther King, Jr.
- Hist. 269, Undergraduate Colloquium: The African American Community Organizing Tradition
- Law. 564, Housing Law and Policy
- Soc. 118, Collective Action
- Soc. 145, Race and Ethnic Relations
- Soc. 266, Organization and Public Policy

**URBAN PLANNING OPTION**

Courses required for the Urban Planning option introduce the techniques and approaches of city and regional planners. A course applying economics to the solution of urban problems is a key element of this option. Students are also required to study land use planning and the methods used to control the use of land. Because urban planners rely heavily on computers, the major requires an introduction to computer science. The Urban Planning option provides excellent preparation for graduate programs in urban and regional planning and in public policy analysis.

Students interested in these graduate programs are encouraged to consult with the program director and to review information describing graduate programs available in the Urban Studies office.

**PREREQUISITES**

- Math. 41, or 19 and 20, Calculus
- Econ. 50, Economic Analysis I
- Econ. 50M, Economic Analysis IA or pass math placement exam

**REQUIRED TO COMPLETE THE MAJOR**

- Comp. Sci. 105, or a more advanced course in computing
- Geol. and Envir. Sci. 130, Environmental Earth Sciences I
- Geol. and Envir. Sci. 131, Environmental Earth Sciences II
- Geol. and Envir. Sci. 132, Environmental Earth Sciences III
- Geol. and Envir. Sci. 196, Introduction to GIS: ARC/Info and ARC-View

Select one of the following economics courses:

- Econ. 118, Economics of Development
- Econ. 148, Urban Economics
- Econ. 150, Economics and Public Policy
- Econ. 154, Economics of Legal Rules and Institutions
- Econ. 155, Environmental and Natural Resources Economics
RESTRICTED ELECTIVES

These elective courses include any from the Urban Studies core; any 100-level course offered by the Program on Urban Studies; any course listed elsewhere in this section of the Stanford Bulletin under Affiliated Department Offerings, or courses listed below. Restricted electives are used to bring the total number of units to 70 (not including prerequisites).

Civil & Environmental Engr. 171. Air Quality Management
Industrial Engr. 100. Organizations: Theory and Management
Public Pol. 185. American Public Administration
Soc. 160. Formal Organizations

ARCHITECTURE AND URBAN DESIGN OPTION

The Architecture and Urban Design option allows the student to explore the design in the context of architectural and urban history and in response to human needs, social concerns, and cultural values. Required courses focus on drawing and design and on the history of architecture. Two of the design courses are sequenced (Art and Art History 60 and 160). This option provides strong preparation for graduate study in architecture and urban design. Students considering professional study in architecture are strongly advised to take, in addition to the required courses, Mathematics 19, 20, and 21; Physics 21; and an introductory course in computers.

PREREQUISITES
Course No. and Subject
Art & Art Hist. 60. Basic Design

REQUIRED TO COMPLETE THE MAJOR

Art & Art Hist. 140. Drawing I
Art & Art Hist. 160K or 160L. Design I: Intermediate Design

Select one of the following computer courses:
Civil & Environmental Engr. 111. 3D Modeling of Civil Engineering Projects
Computer Sci. 105. Introduction to Computers
Computer Sci. 106A. Programming Methodology

Students who are planning to become architects are strongly encouraged to take Civil and Environmental Engineering 111. It is recommended that Mech. Engr. 101 be taken before Art and Art History 60.

At least two courses on the history of architecture (or architecture and art) offered by the Department of Art and Art History. Urban Studies 175 and Mechanical Engineering 120 may also be used to meet this requirement.

RESTRICTED ELECTIVES

These elective courses include: any from the Urban Studies core; any 100-level course offered by the Program on Urban Studies; any 100-level course offered by the Department of Art and Art History in drawing, painting, sculpture, printmaking or design; or courses listed below. Restricted electives are used to bring the total number of units to 70 (not including prerequisites).

Art & Art Hist. 130B. Transatlantic Modernism: Paris and New York in the Early 20th Century
Art & Art Hist. 174. Digital Art in Public Areas
Civil & Environmental Engr. 100. Managing Civil Engineering Projects
Civil & Environmental Engr. 101A. Structural Systems
Civil & Environmental Engr. 122A/222B. Computer Integrated Architectural/Engineering Construction
Civil & Environmental Engr. 174. Ethical Issues in Civil Engineering
Civil & Environmental Engr. 176A. Energy Efficient Buildings
Mech. Engr. 103. Manufacturing and Design
Mech. Engr. 103D. Engineering Drawing
Mech. Engr. 120. History and Philosophy of Design

RECOMMENDED ADDITIONAL STUDY

Architecture graduate schools typically require applicants to submit a portfolio of work in the visual arts or design as part of the admissions process. The Urban Studies library contains samples of portfolios from alumni who have successfully gained entrance to graduate programs in architecture and urban design. In addition, many graduate schools of architecture require calculus, physics, and basic computer skills as conditions for admission.

Students seeking exposure to orthographic projection, sectioning, and other aspects of technical drawing should take Mechanical Engineering 103D, Engineering Drawing. Students interested in graduate programs in architecture are encouraged to consult with the program director to review information describing graduate programs available in the Urban Studies office. The program office also contains information on portfolio preparation. Courses in drafting are available at local community colleges including West Valley College and Foothill College.

SELF-DESIGNED OPTION

Students who wish to concentrate on an area other than Community Organization, Urban Planning, or Architecture and Urban Design must complete the Urban Studies core and design the remaining units (to bring the total to 70 units) with an academic adviser who is a member of the Academic Council. The self-designed portion of the major should concentrate on a particular area of analysis such as health care, education, or urban policy.

Proposals should include only courses at the 100 level or above and must be approved by a subcommittee of the Committee on Urban Studies. Proposals for the self-designed portion of the major should include a course list and a description of how the courses meet the student's educational objectives. The proposal must be accompanied by a letter from the student's academic adviser indicating that he or she has examined the final version of the proposal and finds it acceptable.

Students pursuing a self-designed option must submit proposals for approval by the Urban Studies Committee by the middle of the second quarter of the student's junior year. Applications received after that deadline are not considered. Students interested in designing their own option are strongly encouraged to meet with the program director before the end of the first quarter of their junior year.

MINORS

The minor in Urban Studies is designed to accomplish two things. First, it introduces students to how specialists from each of several different disciplines approach the study of cities. Second, it provides students with an opportunity to explore their interests in one of three specialized fields: (1) Architecture and Urban Design, (2) Urban Planning, or (3) Community Organization. Students must declare the minor no later than the last day of the quarter four quarters before degree conferral.

Requirements—Students must complete seven courses (for a letter grade) including Urbs 110. Introduction to Urban Studies.

Three courses must be completed from the following categories as listed above in the Urban Studies core: Urban History, and Urban Anthropology and Sociology. At least one course must be from each category.

All three courses in one of the following groups must be completed:

1. Architecture and Urban Design
   b) One course from those included in the Urban Studies Core course listings for Architecture and Urban Design
   c) One (100 level) course on the history of architecture offered by the Department of Art and Art History.

2. Urban Planning
   a) Geol. and Envir. Sci. 130. Environmental Earth Sciences I
   b) Geol. and Envir. Sci. 132. Environmental Earth Sciences II
   c) One course from those included in the Urban Studies Core course listings above for Urban Politics or one of the courses listed as meeting the "economics course" requirement for Urban Studies majors in the Urban Planning Option.

3. Community Organization
   a) Urbs. 191C. Community Organization (requires Urban Studies 191B as prerequisite)
   b) Urbs. 192. Social Entrepreneurship
   c) One of the following courses in Organization Theory:
      1) Soc. 160. Formal Organizations
      2) or Indust. Engr. 100. Organizations Theory and Management
HONORS PROGRAM

The honors program offers qualified students an opportunity to conduct independent research and to write a thesis summarizing the results. The program grants honors at graduation to those students who have successfully completed a thesis of honors quality, attained a 3.5 grade point average (GPA) in their major, and successfully completed all course requirements. Honors students must register for a minimum of 10 units and a maximum of 15 units of Urban Studies 199 spread over their senior year. The program encourages students writing theses linked to community service to apply to the Public Service Scholars Program administered by the Haas Center for Public Service and register in Urban Studies 198 concurrently with 199. Students can obtain details regarding honors procedures from the Urban Studies Program office located in Building 60.

COTERMINAL PROGRAMS

Undergraduates in Urban Studies may enter coterminal master's degree programs in a number of departments in the University. In recent years, Urban Studies majors have developed coterminal programs within the departments of Cultural and Social Anthropology, Sociology, and the School of Education. Information and applications for the coterminal degree programs are available at the Undergraduate Advising office. Students should discuss the coterminal program with the program director during their junior year.

COURSES

Further descriptions and details of current courses offered by lecturers in the Program on Urban Studies are available prior to each quarter from the program office.

110. Introduction to Urban Studies—Interdisciplinary introduction to the study of cities and urban civilization. The history of urbanization through Lewis Mumford's *The City in History* and various disciplinary methodologists comprising the unified field of urban studies (sociology, economics, politics, architecture, urban design, and urban public policy formation).

4 units, Aut (Stout)

120. Building Community—Capstone course for Urban Studies majors in the Community Organization track explores the literature and philosophical underpinnings of community theory developed by urban professionals committed to advocacy, activism, and community service, building on students' previous experience, including fieldwork placements. Close reading of classic texts by Louis Wirth, Clarence Perry, Paul Davidoff, Jane Jacobs, Sherry Arnstein, Saul Alinsky, and others.

4 units, Win (Stout, Staff)

135. Cities and Urban Systems in East Asia—Focus is on the urban transition in East Asia, with emphasis on the rapidly growing megaregional urban systems and emerging world cities. Policy issues: urban social, economic, and environmental conditions; transnational capital and intercity competition for investment; and democratization, the rise of civil society and the new urban politics of governance in a global age. Limited enrollment.

5 units, Spr (Douglas)

170. Introduction to Urban Design—Urban design theory and contemporary practice. Critical issues in urban development and conservation. Neighborhood livability, central city revitalization, historic preservation, and regional growth are examined through comparative case studies from N. America and abroad. Projects focus on neighborhood, downtown, and regional issues in San Francisco and the Bay Area. Two Sat. field workshops in San Francisco.

5 units, Win (Gust)

171. Suburbia: New Downtowns of the 21st Century—The evolution of the American suburb, emphasizing the post-WW II suburban centers that emerged as competitors, in terms of size and economy, with traditional urban centers. Historical development of the suburbs from 1820 to the present. Current problems (if any) and issues of concern. Elements of urban design (circulation, land use, building design, etc.) and their application in the suburban context. Students analyze a case study non-downtown suburban area near the Stanford campus and recommend improvements.

4 units, Aut (Smiley)

174. Architectural Design Process—Lecture/studio. Introduction to the basics of the building design process through case studies, including studio sessions. Visits and discussions with practicing architects/landscape architects. Student work is prepared as an architectural program statement and as a conceptual massing model, along with simplified site and building-related graphics. Result: demystification of the initial phase of the design process and a better understanding of the professional's role within it. Architectural office visit. Enrollment limited to 16.

4 units, Spr (Neuman)

175. Contemporary Architecture: Theory and Design—Brief overview of architecture after modernism, a discussion of themes commonly used in architectural criticism, and a typological analysis of form provide a basis for an examination of architecture. Design exercise allows students to personally experiment with the architectural design process. Examines the work of guest speakers in Stanford's spring lecture series in architecture. Class sessions with each guest architect provide further insights into their work. Attendance required in all sessions of the spring lecture series in architecture. Enrollment is limited to 20.

4 units, Spr (Walters)

176. Architecture, Urban Planning, and the First Amendment—Seminar on the relationship and balance between the right and value of free expression in architecture and the need for communities to guide their development and visual appeal. Themes and topics: how architecture is similar and different from other arts, the underlying philosophical basis of first amendment traditions, the rise of powerful city planning departments, and the politicization of architectural design.

3 units, Win (Baron)

182. Urban Environmental Policy—Overview/analysis of urban environmental issues through the study of current policy, organizations, and case examples, with an emphasis on California and the San Francisco Bay area. Guest lectures from experts working directly on urban environmental issues. Prerequisite: 110, or Human Biology 125, or consent of the instructor.

4 units, Win (Hall, Kibel)

183. Land Use Control—Survey of current and emerging methods of land use control related to the pattern and scale of development and the protection of land and water resources. Emphasis is on the relationship between the geographical landscape, physical externalities, land use law, and desired land use goals. Topics: the historical roots of modern land use controls; urban reforms of the 19th century; private ownership of land zoning; innovations in local, state, and federal land use control; and regulations and management programs. Current issues of growth management, park and recreation services, transportation, urban housing, wetlands, environmental mediation/conflict management, and special purpose agencies.

4 units, Spr (Hall)

184. Managing the Urban Environment in East Asia—Focus is on identification of effective actions to address urban environmental issues in rapidly changing Asian regions. Urban systems are analyzed as human habitat, natural resource consumption systems, polluters, and drivers of development. The role of public and corporate policies in improving urban environments in E. Asia. Selective instruments to improve environmental quality. Innovative options for financing/delivering environmental infrastructure, hardware, and software. Case studies from Bangkok, Shanghai, Seoul, and Jakarta.

4 units, Win (Webster)
185. Environmental Justice: Abandoned Uranium Mines on Navajo Lands—For juniors and seniors and first-year graduate students. Workshop investigating technical and social issues arising from uranium mines on Navajo lands in the Four Corners area. Introduction to mining activities, conducted under the auspices of the Atomic Energy Commission, that have disrupted the way of life of the Navajo. An ongoing project of the U.S. Environmental Protection Agency, the "Navajo Abandoned Uranium Mines Project," is used by students to perform their own assessments of the problems and examine alternative solutions, encompassing land use planning, cultural issues, law, environmental and mining geology, environmental engineering, toxicology, and epidemiology. Limited enrollment.

1 unit, Win (Cruz)

186. High-Tech Industrial Complexes and Urban Form—The forces that shape the design and development of high-tech industrial complexes: analysis of the parameters related to regional policy, strategic planning, urban design, and real-estate economics. Silicon Valley and Pacific Rim case studies provide a basis for analyzing how high-tech complexes are influenced by the spatial, social, political, cultural, and economic contexts in which they are placed. How the convergence of computers, communications, and consumer electronics influence urban form and global competition. Field visits to nearby regional high-tech industrial parks. Enrollment limited to 12.

4 units, Spr (Collins)

187. Business Skills for the Social Sector—(Enroll in Public Policy 191.) Students organize an internship in an office of a government agency, a community organization, or a private firm directly relevant to the major. Minimum total of 40 hours of internship work must be completed. Prerequisite preparatory work for the internship requirement in 191C, including preparation of an internship proposal describing learning goals, individual and group meetings on internship selection and placement, orientation, placement interviews, completion of written learning agreements approved by the internship site, and at least 10 hours of beginning internship work during the quarter. Credit is earned contingent on completion of 191C.

1 unit, Aut (Cruz)

189. Urban Design and Planning Professions Seminar—The contemporary practice of urban design and planning, community development, and related fields. Bay Area professionals lecture and respond to questions concerning the nature of their day-to-day work, impressions of their field in general, and academic background recommended for their line of work. One session on graduate schools and degrees relevant to these fields. 1 unit (Staff) alternate years, given 2000-01

190. Directed Reading—For Urban Studies majors only. Students organize an internship in an office of a government agency, a community organization, or a private firm directly relevant to the major. Reading supplements internship. Paper summarizes internship experience and related readings. Prerequisite: Public Policy 179B.

2-4 units, Ortolano

191. Business Skills for the Social Sector—(Enroll in Public Policy 191.)

4 units, Win (Dees)

191A. Introduction to Community Service Organizations—Project-based, providing an overview and introduction to community service organizations. Focus is on urban-based non-profit groups organized to address: housing and homelessness, youth outreach, families in transition, gang intervention, drug prevention, arts and education, etc. Readings, discussions with leaders and staff of community service organization, and a philanthropic class project, resulting in a class recommendation for a disbursement by a philanthropic public funding agency to community service organization. Small groups select a community service organization for study and recommendation for funding, involving research, site visits, written reports, and a presentation to the class and to guests from community service organizations, who provide feedback on presentations. Promotes familiarity with existing types of urban-based community service organizations and critical awareness of issues in evaluating their quality and effectiveness.

1-3 units, Aut (Cruz)

191B. Community Organizing—Prerequisite preparatory work for the internship requirement in 191C, including preparation of an internship proposal describing learning goals, individual and group meetings on internship selection and placement, orientation, placement interviews, completion of written learning agreements approved by the internship site, and at least 10 hours of beginning internship work during the quarter. Credit is earned contingent on completion of 191C.

1 unit, Aut (Cruz)

191C. Community Organizing—Focus is on community organizing by urban-based groups seeking to improve their neighborhoods or groups through organizing processes. Guest presenters provide varying perspectives on what organizing is, who does it, where, how, and with what results. Readings provide basic information and historical and theoretical background. A required internship provides direct experience with organizing processes. Minimum total of 40 hours of internship work during the combined Autumn (191B) and Winter (191C) Quarters, and to be completed no later than Winter Quarter finals. Corequisite: Political Science 159R.

4 units, Win (Cruz)

191D. Introduction to Community Organizations in Asian Pacific Islander (API) Communities—Introduction to the community organizations developed by and for Asian Pacific Islander (API) communities in the greater Peninsula/Bay Area. Focus is on organizations attempting to improve conditions of life in API communities they work with. Representatives of API community organizations provide perspectives on what they do, who participates in them, where, how, and with what results. Readings provide basic information on the API organizations and the socio-economic and political contexts in which they arise, struggle, and thrive, e.g., the Chinese Progressive Association (Chinatown, SF); Asian American Immigrant Women (AIWA in Oakland and San Jose); and Asian Pacific Islander Outreach Center, Palo Alto.

1 unit, Spr (Cruz)

192. Social Entrepreneurship—(Same as Public Policy 192.) Innovative private initiatives address social needs, including non-profit, for-profit, and hybrid ventures. Emphasizes the challenges facing social entrepreneurs and the practical knowledge needed to do this work effectively. Recent trends in using business-like methods to serve social mission. Readings in business school cases, and theoretical and practical articles. Prerequisites: Economics 1, junior or senior standing. Recommended: Public Policy 191.

5 units, Spr (Dees, Heath)

193. Preparation for Internship Learning

1 unit (Ramirez) not given 1999-2000

194. Internship in Urban Studies—For Urban Studies majors only. Students organize an internship in an office of a government agency, a community organization, or a private firm directly relevant to the major. Reading supplements internship. Paper summarizes internship experience and related readings. Prerequisite: Public Policy 179B.

2-4 units, Ortolano

195. Special Projects

1-5 units (Staff)

197. Directed Reading

1-5 units (Staff)

198. Senior Honors Research in Public Service—Limited to seniors who have registered for and have been approved by their departments for honors thesis, and who have been admitted to the year-round Public Service Scholars Program sponsored by the Haas Center for Public Service. If research is to be conducted as a form of public service, what standards for rigor and excellence would apply in addition to those expected by the academy? How can communities benefit from research? Seminar introduces the theory and practice of research as a form of public service, and provides a forum for discussions and presentations of senior honors theses. Readings in research theory and methods, methods of participatory action research; quarterly presentations on research as service; workshops on each individual participant's thesis-work-in-progress; public presentation on completed research; and evaluation (by a community-based reader) of the thesis as a form of public/community service. Corequisites: 199A, B, C.

3 units, Aut, Win, Spr (Cruz, Schmidt-Posner)

199. Senior Honors Thesis

1-15 units (Staff)
Academic Programs and Centers

CENTER FOR TEACHING AND LEARNING (CTL)

Director: Michele Marincovich

The Center for Teaching and Learning is a University-wide resource on effective teaching and public speaking.

SERVICES TO FACULTY, LECTURERS, AND TEACHING ASSISTANTS

CTL provides the Stanford community with services and resources on effective teaching. Its aims are to: identify and involve successful teachers who are willing to share their talents with others, provide those who are seeking to improve their teaching with the means to do so, acquaint the Stanford community with important innovations and new technologies for teaching, prepare inexperienced teachers for their responsibilities, expand awareness of the role of teaching at research universities, and increase the rewards for superior teaching. CTL also has responsibility for helping teaching assistants (TAs) with their teaching and departments with designing effective TA training programs.

Goals are realized through continuing programs such as: videotaping and consultation; small group evaluation; workshops and lectures; a handbook on teaching and a library of teaching materials; quarterly teaching orientations; and work with individuals, groups, and departments on their specific needs. CTL offices are on the first floor of Sweet Hall. For further details, see CTL’s teaching handbook or the CTL brochure, both available by calling (650) 723-1326. You can also consult the Web page at http://www-ctl.stanford.edu.

ORAL COMMUNICATION PROGRAM

The Oral Communication Program at CTL provides opportunities for undergraduate and graduate students to develop or improve their oral communication skills. Courses and workshops offer a comprehensive approach to speech communication, including training in the fundamental principles of public speaking and the effective delivery of oral presentations. The goal is to enhance the students’ general facility and confidence in oral expression. The program also provides innovative, discipline-based instruction to help students refine their personal speaking styles in small groups and classroom settings.

Those interested in individualized instruction or independent study are invited to visit the program’s Oral Communication Lab on the first floor of Sweet Hall, where trained student consultants, audio/video technology, and a variety of instructional resource materials are available on an ongoing basis. For further details, call (650) 723-4149 or 723-1326, or consult the Web page listed above.

COURSES

Learning skills and tutor training classes formerly taught by CTL are now being offered by the Undergraduate Advising Center through the School of Education. See the “School of Education” section of this bulletin.

117. The Art of Effective Speaking—Introduction to the principles and practice of effective oral communication. Through formal and informal speaking activities, students develop skills at framing and articulating ideas through speech. Strategies are presented for speaking extemporaneously, preparing and delivering presentations, formulating persuasive arguments, refining critical clarity of thought, and enhancing general facility and confidence at oral self-expression.

3 units, Aut, Win (Allen)

118. PublicSpeaking—A practical approach to the art of public speaking. Emphasis is on developing skills in various speech types: exposition, argumentation, and persuasion. Students sharpen their skills with the aid of textbooks, videotapes, texts of famous speeches, and participation in a final program of talks. Students also evaluate presentations by others.

3 units, Spr, Sum (Wagstaffe)

119. Teaching Oral Communication—Seminar for students with a strong background in public speaking who wish to train as public speaking consultants for CTL’s Oral Communication Program. Readings, exercises, and supervised teaching refine the students’ speaking skills and prepare them to serve as a peer consultant in a variety of academic disciplines. Admission by consent of instructor.

3 units, Spr (Allen)

219. Oral Communication Workshop for Graduate Students—Addresses a range of graduate student speaking activities such as teaching (delivering lectures, guiding discussion, and facilitating small groups), giving professional presentations and conference papers, and preparing for orals or theses defenses. In-class projects, discussion, and individual evaluation assist students in developing effective techniques for improving oral communication skills.

2 units, Spr, Sum (Allen)

CHICANO RESEARCH, STANFORD CENTER FOR

Faculty Executive Committee: Al Camarillo (History and CSRE), Kenji Hakuta (Education), Jim Leckie (Engineering), and Yvonne Maldonado (Medicine)

The Stanford Center for Chicano Research (SCCR) is an affiliated research unit of the Center for Comparative Studies in Race and Ethnicity (CSRE) and one of the founding member institutions of the InterUniversity Program for Latino Research (IUPLR). The objective of the SCCR is to facilitate basic and policy-oriented research on the nation’s second largest ethnic minority group, Mexican Americans. As part of the IUPLR consortium, the SCCR also serves as one of the sites to support research projects involving faculty and graduate students and is currently supported through various grants from government agencies.

The participating faculty of SCCR include professors from several departments in the School of Humanities and Sciences, as well as faculty from Business, Education, Engineering, Law, and Medicine. The SCCR was founded in 1980 and remains the only research center of its kind at a major private university.

PROGRAM FOR INDIVIDUALLY DESIGNED MAJORS

Individually Designed Majors (IDM) is coordinated by the Undergraduate Advising Center, located in Sweet Hall, first floor. See also the “School of Earth Sciences” and the “School of Engineering” sections of this bulletin for IDMs in these curriculum areas.

This program is intended for currently registered undergraduates in good academic standing interested in pursuing an area of scholarly inquiry that falls outside the purview of an established academic department or program of the University. Students submit proposals for consideration by the IDM Program Dean’s Advisory Committee. These should be intellectually coherent majors designed by the students themselves, with the assistance of faculty members of their choice. While the Individually Designed Major (IDM) program is not an honors program.
the governing committee encourages each participating student to consider an honors project as a culminating experience of the major. Information about proposal procedures, and the procedure for an honors project, is available at the Undergraduate Advising Center, Sweet Hall, first floor.

In designing a major, the student consults with three faculty members (at least two of whom must be members of the Academic Council) from at least two separate departments or programs of the University; one of the faculty members is selected as the student’s “primary” adviser. In helping the student design the major and in signing the proposal requesting approval from the Dean’s Advisory Committee on Individually Designed Majors, the faculty members are committing themselves to act as a regular academic advisory group for the student until graduation. The committee does not consider proposals without the approval of the faculty advisory group.

DEAN’S ADVISORY COMMITTEE

The program is administered by the Dean’s Advisory Committee on Individually Designed Majors and the Undergraduate Advising Center.

The committee acts in lieu of a regular department of the University. This role involves certifying the scholarly merit of the program and includes the obligation to consider, approve, and recommend changes in each proposed major.

In carrying out its role, the committee reserves the right to reject proposals that in its opinion lack scholarly merit or are not clearly interdisciplinary. Occasionally, the committee must reject a proposal that, though of considerable academic merit, requires resources not available at Stanford. The committee also reserves the right to recommend additions to a student’s faculty advisory group.

THE PROPOSAL

Detailed written procedures and advice about the preparation of the proposal are available from the Undergraduate Advising Center (Sweet Hall, first floor; telephone (650) 723-2426), where an academic adviser is available to discuss your proposal with you.

The proposal should begin with a statement that describes the major, articulates the motivation for and the justification and ultimate goal of the major, and shows how the courses listed relate to and fulfill the major’s goal. This statement should be followed by a list of the proposed core courses to be counted toward the major and, as far as possible, the sequence in which they are to be taken. The proposal must be signed by the selected faculty advisory group; their signatures certify that they endorse the major as described in the proposal and agree to serve as the student’s permanent advisory group. The proposal must be accompanied by a letter of recommendation from each of the three advisers giving separate appraisals of the academic viability of the proposed major. The proposal must also include a current copy of the student’s unofficial transcript.

These specific requirements are in addition to the general guidelines discussed under “The Major” section of this bulletin.

THE GUIDELINES

To establish the IDM program as being fully equivalent to a Stanford A.B. or B.S. degree in an established department or program, the Senate of the Academic Council has approved specific requirements. The criteria for approval of proposals submitted include:

1. Each major shall consist of at least 60 units, all in courses at or above the 100 level (or their equivalent).
2. A maximum of 15 units of these 60 units may be taken on a credit/no credit basis.
3. A maximum of 8 units of these 60 units may be taken in individual study or directed reading.
4. The proposed major must constitute a coherent academic program that fulfills the student’s objectives and achieves a clear academic goal.
5. The proposed major must be comparable in quality and in academic rigor to degrees obtained by students in other degree-granting programs offered at Stanford.
6. The proposed major must achieve both breadth and depth within the academic discipline(s), involve interdisciplinary study, and be compatible with a liberal arts education.
7. The proposed major must not duplicate or be achievable through a major already offered by another degree-granting program or department.
8. Students must present evidence that demonstrates their ability to do independent work.
9. Students proposing individually designed majors must have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee.
10. Two of the three advisers must be on the Academic Council. No more than two advisers may be from the same department.

SOCIAL SCIENCE HISTORY INSTITUTE

The goal of Social Science History Institute is to re-engineer the manner in which students in social science departments learn about historical institutions and data, and the manner in which students in history and related disciplines are trained in social science methods. Historians and social scientists share many of the same substantive interests (the development of economies, political systems, and social structures, for example), but they approach them with different and complimentary methods and bodies of evidence. There is, however, a great deal of potential for historians and social scientists to draw on the strengths of each other’s methods to improve their own work and to foster increased interaction among the various disciplines that employ history as a laboratory to operationalize social science theories. The Social Science History Institute seeks to realized this potential by transplanting state of the art research methods from classics, economics, history, political science, and sociology across the boundaries of each discipline.

An A.B. degree with an emphasis in History and Social Science is offered through the Department of History. The History degree is an HMIE (History Majors with Interdisciplinary Emphasis) program designed to acquaint students with the application of the analytic and quantitative tools of the social sciences to issues in historical causality and explanation. See the “History” section of this bulletin.

Ph.D. MINOR

The first element of the Ph.D. minor in Social Science History is a gateway course, The Logic of History (History 206/306). This course is taught in the Department of History and is designed to introduce students to questions of epistemology and methodology in history and the social sciences. It focuses on standards of evidence and argumentation across the various approaches to history, with a strong emphasis on social science approaches to the discipline.

The second element is a quantitative methods requirement. This requirement may be fulfilled by taking any one of the three two-course sequences:

1. Political Science 200A (Introduction to Political Data Analysis) and Political Science 200B (Statistical Modeling for Political Science).
2. Economics 270 (Intermediate Econometrics I) and Economics 271 (Intermediate Econometrics II).
3. Two of the following three courses in Sociological Methods:
   a) Sociology 382 (Sociological Methodology II: The General Linear Model)
   b) Sociology 383 (Sociological Methodology III: Advanced Models for Discrete Outcomes)
   c) Sociology 384 (Sociological Methodology IV: Advanced Models for Continuous Outcomes)

The third element is a requirement that students focus on a substantive area of social science history. Students must take a group of three courses outside their major department with a strong social science history component. These three courses are selected by students with the
advice and approval of a Ph.D. minor adviser, who also must be from outside the student’s major department. The courses should be chosen with an eye toward providing a coherent curriculum in a substantive issue that is useful in the development of a dissertation topic. For example, a student might focus on economic history by taking Problems in American Economic History (Economics 226), European Economic History (Economics 227), and Institutions in Economic History (Economics 228).

The final requirement is a capstone course, History 482 (Historical Social Science). This is a workshop for students working on or planning dissertations on topics related to social science history. Its purpose is to create a venue for the presentation of dissertation chapters or dissertation prospectuses in a multidisciplinary setting, and it is open to all students and faculty in the institute. Students may take this for 1 unit (and for a satisfactory/no credit grade if they so choose), or for 5 units and a grade.

**STANFORD INTRODUCTORY SEMINARS**

**Participating Faculty:** Over 230 faculty from 63 departments take part in the Introductory Seminars Program. See the faculty listings internal to each department’s listing in this bulletin for pertinent information.

The Stanford Introductory Seminars Program provides opportunities for first- and second-year students to work closely with faculty as they explore a potential major. These courses aim to intensify the intellectual experience of the freshman and sophomore years by allowing students to work with faculty members in a small-group setting; to introduce students to the variety and richness of the academic topics, methods, and issues which lie at the core of particular disciplines; and to foster a spirit of mentorship between faculty and students. The courses are given department credit and most count towards an eventual major in the field.

There are three types of classes offered in the program. Freshmen preference seminars are for 3-5 units to a maximum of 16 students, and generally meet twice weekly. Although preference for enrollment is given to freshmen, sophomores may participate on a space-available basis with the consent of the instructor. Sophomore preference seminars and dialogues, similarly, give preference to sophomores, but freshmen may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars are given for 3-5 units to a maximum of ten to twelve students, while sophomore preference dialogues take the form of a directed reading, and are given for 1-2 units to a maximum of four to five students. In addition, some sophomore preference dialogues and seminars offered during Autumn Quarter have a special advising component. Students who enroll in these classes, which are called advising dialogues and advising seminars, have the option of choosing the instructor as their advisor for the remainder of the academic year.

Because space is limited, students may enroll in only one of these courses each quarter. All Stanford Introductory Seminars require a brief application. Check the Time Schedule or with the Introductory Seminars office, 124 Sweet Hall, phone (650) 723-4388 for more information. Due dates for applications for the 1999-2000 courses are: Autumn Quarter—5 p.m., September 20 for freshmen preference courses, and 5 p.m., September 21 for sophomore preference courses; Winter Quarter—5 p.m., December 3 for freshmen preference courses, and 5 p.m., December 10 for sophomore preference courses; Spring Quarter—5 p.m., March 10 for freshmen preference courses, and 5 p.m., March 17 for sophomore preference courses.

**COURSES**

F=preference to freshmen; S=preference to sophomores; A=advising component; Dial=dialogue; Sem=seminar.

**AMERICAN STUDIES**
114. Visions of the 1960s—(S,Sem) 3 units, Aut (Gillam)

**ANESTHESIA**
75Q. Literature and Medical Interventions—(S,Dial) 1 unit, Spr (Shafer, Barr)

**APPLIED PHYSICS**
79Q. Science-Based Energy Technologies—The Pros and Cons—(S,Dial) 2 units, Aut (Geballe)

**ASIAN LANGUAGES**
71N. Language and Gender in Japan: Myths and Reality—(F,Sem) 3 units, Spr (Matsumoto)

81N. Writing and Writing Systems—(F,Sem) 3 units, Spr (Hare)

**BIOLOGICAL SCIENCES**
11N. Biotechnology in Everyday Life—(F,Sem) 3 units, Aut (Walbot)

12N. The Origin of Species—(F,Sem) 3 units, Spr (Ackerly) alternate years, not given 2000-01

14N. Plants and Civilization—(F,Sem) 3 units, Spr (Mooney)

15N. Environmental Literacy—(F,Sem) 3 units, Win (Schneider) alternate years, not given 2000-01

16N. Island Ecology—(F,Sem) 3 units, Win (Vitousek)

17N. Assessment of Chronic, Low-level Environmental Risks—(F,Sem) 3 units, Aut (Kennedy)

19N. Natural Sex and Gender—An Evolutionary Perspective—(F,Sem) 3 units, Win (Roughgarden)

21N. Readings in Molecular Biology and Genetics—(F,Sem) 3 units, Win (Baker)

22Q. Infection and Immunity—(S,Sem) 3 units, Spr (Jones)

23N. Experimental Strategy in Microbiology—(F,Sem) 3 units (Long)

25Q. Cystic Fibrosis—(S,Sem) 3 units, Spr (Kopito)

26N. Maintenance of the Genome—(F,Sem) 3 units, Spr (Hanawalt)

27N. Nature and Nurture in Brain Development—(F,Sem) 3 units, Spr (McConnell)

28Q. Nobel Prize Winning Research in Cell Biology—(S,Sem) 3 units, Spr (Rexach)

29N. The Outer Limits of Life—(F,Sem) 3 units, Win (Bohannan)
37Q. Evolution in Action—(S,Sem)
3 units, Aut (Gordon)

CHEMICAL ENGINEERING
50Q. Drug Delivery in the 21st Century—(S,Sem)
3 units, Aut (Robertson)

CHEMISTRY
22N. The Frontiers of Science—(F,Sem)

UNDERGRADUATE RESEARCH OPPORTUNITIES (URO)

Director: Laura S. Selznick

The Undergraduate Research Opportunities (URO) program seeks to combine two of Stanford's greatest strengths: the eminence of its research faculty and excellence in undergraduate education. URO encourages students to work independently on projects with faculty and thus to participate directly in Stanford's research community.

The collaboration takes place in two principal formats. Faculty members may list ongoing research projects in which undergraduates can become involved. Or, undergraduates may design their own individual projects and pursue them under the sponsorship of an individual faculty member. The URO staff directs students to departments with established research programs, advertises opportunities submitted by individual faculty, and helps to develop resources.

Faculty who have participated in this program have found enthusiastic and energetic assistants, made better progress in research, and freed up time for more specialized work. Students have appreciated the direct contact with faculty, immersion in a topic of mutual interest, and the unique learning opportunity that research provides.

LISTING RESEARCH

Faculty members with ongoing research programs are encouraged to identify a piece of their project appropriate to undergraduate competencies and to list it through URO. (Purely menial or mechanical projects are not appropriate.) The researcher should clearly state the nature of the position, requisite background and qualifications, and the expected time commitment. Determination of credit appropriate to each project is left to the researcher and the student. The formula generally used is three hours of intellectual work per week per academic unit. (On average, students have received 3 units of credit per quarter in exchange for a commitment of ten hours per week.)

RESEARCH OPPORTUNITIES (URO)

Major grants differ from small grants in the scope of the project proposed rather than the level of reimbursement requested. Small and major grants are restricted to supplies and expenses associated with research. Major grants are awarded once a year, during Spring Quarter, to as many as 150 students whose projects reflect the highest level of creativity and independence and the greatest promise for exciting results. Students on financial aid may sometimes receive funds to replace summer earnings.

RESOURCE FILES

Students can obtain free access to two data bases designed to facilitate undergraduate research projects. The Odyssey and Faculty Interests files are available through Stanford's Portfolio home page on the World Wide Web. Odyssey lists openings for student research assistance on faculty research projects. The Faculty Interests file contains information about the research interests of individual Stanford faculty across the University. Students can use faculty interest information in identifying potential sponsors for projects of their own design or in seeking advice about a particular discipline.

FUNDING AVAILABLE

The Fund for Undergraduate Research is administered by URO and is available exclusively to Stanford undergraduates. All applicants must file a cover sheet on the World Wide Web (http://www.uro.stanford.edu). Faculty recommendation forms and samples of previous successful grant applications are available at 122 Sweet Hall. Grant advice is available both in person and on the home page. The deadlines for major grants (up to $2,500) for 1999-2000 are Friday, March 31 for projects in social sciences, natural sciences, and engineering and Friday, April 14 for projects in humanities and creative arts. Students with interdisciplinary projects are encouraged to apply by the earlier deadline.

Small grants ($500 maximum per project) are awarded each quarter. The deadlines are October 29, February 4, and April 14.

Major grants differ from small grants in the scope of the project proposed rather than the level of reimbursement requested. Small and major grants are restricted to supplies and expenses associated with research. Major grants are awarded once a year, during Spring Quarter, to as many as 150 students whose projects reflect the highest level of creativity and independence and the greatest promise for exciting results. Students on financial aid may sometimes receive funds to replace summer earnings.

The Chappell-Lougee Scholars program is a special opportunity for sophomores in the humanities and social sciences to be involved in research under faculty mentorship. Faculty may nominate students or students may nominate themselves. Financial need is considered, as well as the academic goals of the proposed project. Applications and nominations are due to the URO office by Friday, December 3, 1999. The URO office has information on applications and criteria.

The Future Faculty Incentives Program encourages URO grant recipients from all categories to consider a career in college or university teaching. The award provides undergraduate loan repayment up to $10,000 for graduate work toward a Ph.D. Preference is given to students from disadvantaged backgrounds who would add diversity to the professoriate in their field of study. Financial need and evidence of disadvantaged background are also considered in the selection process. The application deadline is May 15 of the year in which the student plans to matriculate in a graduate program.

Stanford Fund Research Assistantships and Research Awards enable undergraduates in the humanities and social sciences with financial need to gain research experience in lieu of a campus job. Assistantships are for students who have not yet declared a major, but wish to explore a particular field under faculty supervision. Research Awards are for declared students with subject-matter expertise who wish to pursue the interest further. Recipients may have from 10 to 15 weeks of term-time earnings replaced. High financial need is a criterion for acceptance. A maximum of 25 weeks of work in undergraduate employment may be replaced.

Mellon Minority Undergraduate Fellowships promote diversity by encouraging the pursuit of honors at Stanford and enrollment in a Ph.D. program in the humanities after graduation from Stanford. Benefits include earnings replacement, scholarship expenses, and undergraduate loan repayment totaling a maximum of $20,000. The deadline is Friday, June 9, 2000.

STANFORD IN WASHINGTON

Director: Adrienne Jamieson

Stanford in Washington provides highly-qualified undergraduates with an opportunity to work and study in the nation's capital. In addition to providing students with an understanding of public policymaking, the program offers an opportunity to take advantage of the city's unique cultural resources.

Central in the student's educational experience is an internship. Students serve as interns at such institutions and agencies as the Senate, the House of Representatives, the Office of Management and Budget, the Securities and Exchange Commission, the Smithsonian Institution, the National Gallery, and the departments of Commerce, Education, Health and Human Services, Justice, and State.

In addition to the internship, students must also complete an academic course of study consisting of small tutorials taught by policy experts (5 units), and weekly policy seminars taught by Stanford faculty members (5 units). Frequently, speakers from the Washington policy community join students and faculty for discussions. Students usually write a major paper related to their internship for 3-5 units of credit. Course and seminar topics vary according to student and faculty interest.

Stanford in Washington offers "stretch quarters" in the Autumn and Spring (mid-September to mid-December, and late March to the end of June) and a regular quarter in Winter, which focuses on environmental and health policy. The program is designed for students in their junior year or the first quarter of their senior year. Applications must be completed two quarters in advance. For Autumn Quarter, apply early Winter Quarter of the previous year. For Winter Quarter, apply early Spring Quarter of previous year. For Spring Quarter, apply early Autumn Quarter. Students interested in the program may obtain a brochure at the Haas Center for Public Service or call for information, (650) 723-0992.
School of Law

Dean: Kathleen M. Sullivan

Associate Deans: Frank F. Brucato, Richard Craswell, Mitchell W. Davis.

Dean: Kathleen M. Sullivan

Assistant Professors: Janet Cooper Alexander, Barbara Allen Babcock, Joseph Bankman, John H. Barton, Bernard S. Black, Paul Brest (on leave).

Assistant Professors: R. Richard Banks, G. Marcus Cole

Professor (Teaching): William C. Lazier

Consulting Assistant Professors: Lama Abu-Odeh, Michael Stein

Courtesy Professors: Charles McClure Jr., Abraham Sofaer.

Visiting Associate Professor: Amy Chua.

Visiting Assistant Professor: Seung Wha Chang.

The School of Law was established as a department of the University in 1893. Its purpose is to provide a thorough legal education for students who are fitted by their maturity and their previous academic training to pursue professional study under university methods of instruction. The curriculum leading to the first professional degree in law (J.D.) constitutes an adequate preparation for the practice of law in any English-speaking jurisdiction. Graduate work leading to the degrees of Master of the Science of Law and Doctor of the Science of Law are also offered. (For the full curriculum, see the Stanford University bulletin School of Law.) The school is on a two-term academic calendar. Autumn term classes begin on September 9, 1999. Spring term classes begin on January 24, 2000, and the term ends on May 12, 2000.

COURSES

GRADUATE

The following courses are open to qualified graduate students in other departments of the University upon consent of the instructor:

236. Art and the Law—The range of problems that arise at the intersection of law and the visual arts (painting, sculpture, and graphic art): the protection of works of art in time of war, occupation, and civil strife; international traffic in stolen and smuggled cultural treasures; censorship, criticism, selection, and artistic freedom; copyright, moral right, and the proceeds right; art forgery, fakes, and consumer protection in the visual arts; legal relations between artists, dealers, museums, collectors, and auction houses; tax and estate problems of artists and collectors; legal services for artists; artnapping and insurance; legal problems of art museums, etc.

3 term units, Spr semester (Merryman)

287. Urban Policy Design and Implementation—Open to graduate students. Examination of the interaction between urban redevelopment policies and environmental laws as applied to local land use decisions. The opportunities and obstacles to promoting “smart growth” in existing communities and discouraging sprawl in undeveloped areas. Paper. Enrollment limited. Recommended prior course work on environmental law.

2 term units, Aut semester (Hernandez, Hingerty)

307. Gender, Law, and Public Policy—Open to second- and third-year law students and other qualified students with consent of instructor. Topics: equal protection standards, employment, reproductive rights, sexual harassment, rape, domestic violence, pornography, sexual orientation, feminist legal theory, and the family.

3 term units (Rhode)

313. Health Law and Policy—(Same as Health Research and Policy 210.) Open to all law or medical students and, by consent of instructor, to qualified undergraduates. Introductory survey of the American healthcare system and its legal and policy problems. Topics: the special characteristics of medical care as compared with other goods and services, the difficulties of assuring quality care, the complex patchwork of the financing system, and the ethical problems the system raises.

3 term units, Aut semester (Greely)

440. Biotechnology Law and Policy—Open to graduate and professional students and, by consent of the instructors, to qualified undergraduates. Interdisciplinary exploration of the legal and policy issues raised by the biotechnology industry. Patenting, corporate organization and financing, conflicts of interest, regulatory approvals, health care financing issues, and tort liability. The prospects for and implications of the biotechnology revolution. Interdisciplinary student groups present and discuss a solution to a series of hypothetical problems.

2 term units (Barton, Botstein, Greely) not given 1999-2000

611. Interdisciplinary Seminar on Conflict Resolution—(Same as Economics 386, Engineering Economic Systems and Operations Research 489, Psychology 283.) Addresses problems of conflict resolution and negotiation from an interdisciplinary perspective. Presentations by faculty and scholars from other universities.

1 term unit, Win (Alexander, Arrow, Ross, Wilson)

649. Advanced Issues in Health Law and Policy: Genetics and Law—(Same as Health Research and Policy 211.) Open to 20 students from any Stanford graduate or professional program. Writing seminar on the ethical, legal, and social issues raised by the revolution in human genetics. Topics: DNA fingerprinting, genetic privacy, property rights in genes, genetic testing, genetic discrimination, transgenics, and eugenics.

2 term units (Greely, Cox) not given 1999-2000
NONPROFESSIONAL

The following course is open to undergraduates and graduate students in other departments, and may be counted toward the A.B. degree but not toward professional degrees in law.

106. Introduction to American Law—(Same as American Studies 179, Political Science 182F.) American law for undergraduates. The structure of the American legal system, including the courts, American legal culture, the legal profession and its social role, the scope and reach of the legal system, the background and impact of legal regulation, the relationship between the American legal system and American society in general. GER:3b (DR:9)

5 units, Aut (Friedman)
School of Medicine

Dean: Eugene Bauer
Senior Associate Dean for Education and Student Affairs: Charlotte D. Jacobs

The School of Medicine offers courses of study leading to the M.S., Ph.D., and M.D. degrees.

UNDERGRADUATE PROGRAMS

At the undergraduate level, a number of the school’s courses are open to any registered Stanford student who has fulfilled the prerequisites, subject to the usual limits of course enrollment and faculty approval. Details on admission into undergraduate programs are described in the "Undergraduate Degrees" section of this bulletin.

GRADUATE PROGRAMS

M.S. AND Ph.D. PROGRAMS

Departments offer programs leading to the Ph.D. degree. Applications and information for all graduate programs may be obtained from Graduate Admissions, Registrar's Office, Stanford University, Stanford, California 94305-3005.

M.D. PROGRAMS

The School of Medicine provides an educational environment that encourages intellectual diversity and offers stimulation and opportunity for self-motivated students who are interested in developing a scholarly, investigative approach to problems in medicine. Accordingly, Stanford has designed its medical curriculum with a two-fold purpose: to develop in all students the capacity for leadership in the clinical practice of scientific medicine and to provide them opportunities to prepare themselves for careers in research and teaching in the various branches of basic, clinical, and social medicine. The flexible curriculum allows for individual needs in scheduling course work. Students develop study plans that take into consideration their academic background, particular strengths, and career objectives.

All medical students must complete a formal curriculum in the basic medical sciences and have formal clinical experience in medicine, surgery, pediatrics, gynecology-obstetrics, family medicine, and psychiatry. Following completion of 13 quarters of academic work, additional quarters may be taken at a special student rate. Involvement in research and outside course work may extend the time spent in medical school. Completion of the M.D. degree must be achieved within six years, unless a petition is granted to extend this time frame.

There are a variety of opportunities for in-depth study of subject areas in the basic sciences. Students with strong interests in medical research as a career are urged to investigate opportunities available under the auspices of the Medical Scientist Training Program (MSTP). This program provides a limited number of students the opportunity to pursue an individualized program of research and course work leading to both the M.D. and Ph.D. degrees. The estimated time for completion of the program is seven years. Students interested in participating in the MSTP are asked to provide supplemental information relevant to their research background and are considered for entry into the MSTP at the time of their application to the School of Medicine.

The admissions process recognizes that some minorities and women are under-represented in the medical profession, and especially in academic medicine; the school has a strong commitment to identify, recruit, and educate such students.

Provided an applicant to the school has completed the basic courses in physics, chemistry, and biology, the choice of an undergraduate major may reflect other interests, including the arts and humanities. Course work in mathematics and the behavioral sciences is highly recommended because of its importance in understanding medicine. Extracurricular activities and breadth of interests and experiences play an important role in the selection of students from among those applicants having superior records.

Further details on the M.D. degree, including admission requirements, are in the Stanford University School of Medicine Catalog, available on the World Wide Web at http://www-med.stanford.edu/school/catalog. For application materials write: Committee on Admissions, Stanford University, School of Medicine, 851 Welch Road, Room 154, Palo Alto, CA 94304-1677.

BIOCHEMISTRY

Emeriti: (Professors) Robert L. Baldwin, Paul Berg, Arthur Kornberg
Chair: Suzanne R. Pfeffer
Associate Professors: Patrick O. Brown, Gilbert Chu, Daniel Herschlag, Mark A. Krasnow
Assistant Professors: Pehr A. B. Harbury, Julie A. Theriot

Biochemistry is a department within the School of Medicine, with offices and labs located in the Beckman Center for Molecular and Genetic Medicine at the Stanford Medical Center. Courses offered by the department may be taken by undergraduate, graduate, and medical school students. A basic series in biochemistry (200, 203) is taught by the entire staff and requires a good background in organic chemistry and cell biology.

Advanced courses are offered in more specialized areas and they emphasize the most recent developments in biochemistry, cell biology, and molecular biology. These courses include the physical and chemical principles of biochemistry, enzyme reaction mechanisms, membrane trafficking and biochemistry, molecular motors and the cytoskeleton, mechanisms and regulation of nucleic acid replication and recombination, the biochemistry of bacterial and animal viruses, the molecular basis of morphogenesis, the molecular and cell biology of yeasts, and the structure and function of both eukaryotic and prokaryotic chromosomes.

Opportunities exist for directed reading and research in biochemistry and molecular biology, utilizing a small but excellent departmental library as well as the most advanced research facilities, including those for light and electron microscopy, chromatography and electrophoresis, protein and nucleic acid purification, synthesis and analysis, single molecule analyses using laser light traps, and computer graphic workstation facilities for protein and nucleic acid structural analysis. Ongoing research utilizes a variety of organisms, ranging from bacteria to animal cells.

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

Requirements for the M.S. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin. The department does not offer undergraduate degrees.

The Department of Biochemistry offers a Ph.D. program which begins in the Autumn Quarter of each year. The program of study is designed to prepare students for productive careers in biochemistry; its emphasis is training in research, and each student works closely with members of the staff. In addition to the requirement for a Ph.D. dissertation based on original research, students are required to complete six advanced courses in biochemistry and related areas, and at least three of these courses must be taken in the Department of Biochemistry. Selection of these courses is tailored to fit the background and interests of each student. A second requirement involves the submission of three research proposals which are presented by the student to a small advisory committee of departmental faculty members, who are also responsible for monitoring the progress of student curricular and research programs. All Ph.D. students are expected to participate actively in the department's seminar
program and journal club, and students are encouraged to attend and to present papers at regional and national meetings in cellular biochemistry and molecular biology. Teaching experience is an integral part of the Ph.D. curriculum and is required for the degree.

The Department of Biochemistry offers a M.S. degree only to students already enrolled in the Ph.D. program. Students should contact the Graduate Studies adviser for more details.

Those applying for graduate study should have at least a baccalaureate degree and should have completed work in cell and developmental biology, basic biochemistry and molecular biology, and genetics. Also required are: at least one year of university physics; differential and integral calculus; and analytical, organic, inorganic, and physical chemistry. The department is especially interested in those applicants who have research experience in biology or chemistry. Students must submit an application, including transcripts and letters of recommendation, by December 15.

Beginning September 1, applications are available and can be requested by mail from Graduate Admissions, Registrar's Office, Old Union, Stanford University, Stanford CA 94304-3005, by phone (650) 723-4291, or email at ckt.gaa@forysthe.stanford.edu. Applicants are notified by April 1 of decisions on their applications. Stanford University requires scores from the Graduate Record Examination (GRE) (verbal, quantitative, and analytical), and applicants must submit scores from the GRE Subject Test in either biochemistry, biology, or chemistry. Applicants should take the October GRE exam.

All applicants are urged to compete for non-Stanford fellowships or scholarships, and U.S. citizens should complete an application for a National Science Foundation and a Howard Hughes Medical Institute Predoctoral Training. Students are provided with financial support to cover normal living expenses; Stanford tuition costs are paid.

All applicants for admission to the department are considered without regard to race, color, creed, religion, sex, age, national origin, or marital status.

Postdoctoral research training is available to graduates who hold a Ph.D. or an M.D. degree. Qualified individuals may write to individual faculty members for further information.

At present, the primary research interests of the department are the structure and function of proteins and nucleic acids, the biochemistry and control of development processes, molecular motors and the cytoskeleton, the trafficking of proteins between membrane-bound organelles, and the control and regulation of gene expression. COURSES

200. Biochemical Structure, Metabolism, and Energetics—The structure and function of biological molecules, enzyme kinetics and mechanisms, bioenergetics, pathways of intermediary metabolism and their control, and membrane structure and function. Lectures on special topics. Prerequisites: organic chemistry, cell biology.

5 units, Win (Harbury, Pfeffer, Spudich, Theriot)

201. Advanced Molecular Biology—Lectures on rapidly developing frontiers in DNA structure and metabolism, chromosome structure and function, gene expression and its control, regulation of transcription, protein structure and function, RNA processing, and translation. Prerequisites: course in basic molecular biology.

5 units, Aut (Brutlag, Davis)

203. Molecular Biology—Enrollment limited to medical students or by consent of instructors. DNA structure and metabolism, chromosome structure and function, gene expression and its control, regulation of transcription, protein structure and function, RNA processing, and translation. Minicourses provide in-depth treatment of material in the core lectures, topics with medical relevance, and reviews of original literature. Prerequisite: 200 or equivalent.

4 units, Spr (Brown, Chu, Krasnow, Lehman)

210. Advanced Topics in Membrane Biochemistry—The structure, function, and biosynthesis of cellular membranes and organelles. Based on current literature, with extensive student participation. Prerequisite: 200, 203, or equivalents, or consent of instructor.

4 units (Pfeffer)

211. Development in Microorganisms—Cell differentiation and multicellular development in microorganisms. Microbes are attractive subjects for molecular studies of the regulation of development because they can be manipulated easily by genetic and biochemical techniques, handled in large numbers, and because their genomes are relatively small. Topics: temporal and spatial regulation of cell division; sporulation; flagella and pili morphogenesis; positional information; cell-cell communication and multicellular development; signal transduction pathways. Lectures/readings in current literature.

2 units (Kaiser, Shapiro) not given 1999-2000

213. Biological Signaling during Development—The biochemical and genetic analysis of the developmental response of cells, or cell clusters, to specific molecular signals. Signals vary from complex molecules to simple molecules (steroid hormones), and the responding cells vary from those in close proximity to signal-generating cells to all cells in the organism. Focus is on the signaling mechanisms and on the evolutionary conservation of these systems. Prerequisites: knowledge of basic biochemistry and genetics.

3 units (Hogness) not given 1999-2000

214. Physical and Chemical Principles of Biochemistry—The physical chemistry of proteins, nucleic acids and their complexes, and the chemistry underlying biological reactions; principles of enzymatic catalysis. The physical and chemical concepts that are fundamental to biological processes. Appraisal of experimental and conceptual approaches and analysis of classic and current papers in the literature. Areas: interactions involved in protein and nucleic acid structure and folding; energetic, chemical, and structural principles of enzymatic catalysis and control. Prerequisites: 200, 203 or equivalent, a course in physical chemistry, and a course in organic chemistry.

4 units, Spr (Herschlag)

215. Frontiers in Biological Research—(Same as Developmental Biology 215.) Literature/discussion on how to critically evaluate current biological research, held in conjunction with a Wed. seminar series, hosted in alternate weeks by Biochemistry and Developmental Biology. Invited speakers present works in a particular system. Students and faculty read and critically discuss one or more papers from the primary research literature on a related topic before the seminar, and then, meet informally with the speakers to discuss the research and future directions. Emphasis is on how to read papers in the primary research literature, the set of techniques most commonly used to study problems in biology, and a comparison between genetic and biochemical approaches in biological research.

1 unit, Aut, Win (Harbury, Kingsley, Villeneuve)

217. Advanced Tutorial in Special Topics—Readings and tutorial in membrane biochemistry, enzyme mechanisms, chromosome structure, biochemical genetics, bacterial and animal viruses, and nucleic acid enzymology. Conducted under the guidance of advanced graduate students and postdoctoral fellows.

1-3 units, any quarter (Staff)

218. Computational Molecular Biology—(Same as Medical Information Sciences 231.) For molecular biologists and computer scientists desiring a practical, hands-on approach to computational molecular biology; recommended for molecular biologists and computer scientists desiring to understand the major issues concerning representation and analysis of biological sequences and structure. Existing methods critically described with the strengths and limitations of each. Future direction for development of new methods. Practical assignments utilizing the tools described. Topics: accessing molecular databases, pattern search, classification of sequence and structure, alignment of sequences, rapid similarity searching, phylogenies, automated pattern learning, represent-
ing protein structure, modeling protein structure by homology, protein-protein docking and protein-ligand docking. Final project utilizes or analyzes the methods presented. Lecture/lab. Enrollment limited to 40. Prerequisite: introductory molecular biology at the level of Biological Sciences 52 or consent of instructor. Recommended: 210.
3 units, Aut (Brutlag)

221. The Teaching of Biochemistry—To be taken by all teaching assistants in 200, 203, or 217. Emphasizes practical experience in teaching on a one-to-one basis, and problem set design and analysis. Familiarization with current lecture and text materials is expected, along with evaluations of class papers and examinations. Prerequisite: enrollment in the Biochemistry Ph.D. program or consent of instructor. 3 units, any quarter (Staff)

225. Molecular Motor Proteins and the Cytoskeleton—(Same as Developmental Biology 225.) The molecular basis of energy transduction leading to movements generated by microfilament-based and microtubule-based motors. Analysis of forms of myosin, dynein, and kinesin and their roles in the cell, as a model for understanding the structural, biochemical, and functional properties of biological machines in general. Topics: structure of the molecular motors and their accessory proteins; regulation of the function of motile assemblers; functions of molecular motors in cells; spatial and temporal controls on the formation of motile assemblies in cells. Experimental approaches: genetic analysis, DNA cloning and expression, reconstitution of functional assemblies from purified proteins, x-ray diffraction, three-dimensional reconstruction of electron microscope images, spectroscopic methods, and high-resolution light microscopy. Focuses on how a complex cellular process is analyzed at the molecular level by a multifaceted approach using biochemical, biophysical, and genetic techniques. Prerequisites: knowledge of basic biochemistry and cell biology. 3 units (Spudich)

237. Introduction to Biotechnology—(Same as Chemical Engineering 450, Civil and Environmental Engineering 237, Developmental Biology 237, Structural Biology 237.) Faculty from the departments of Biochemistry, Biological Sciences, Chemical Engineering, Civil Engineering, Developmental Biology, Structural Biology, and invited industrial speakers review the interrelated elements of modern biotechnology. Topics: protein structure and dynamics, protein engineering, biocatalysis, gene expression, cellular metabolism and metabolic engineering, fermentation technology, and purification of biomolecules. Prerequisite: graduate student or upper-division undergraduate in the sciences or engineering. 3 units, Spr (Robertson)

294. DNA Repair, Recombination, and Replication—Enzymes and molecular mechanisms and how some physiological aspects of DNA transactions may be explained at the molecular level. Prerequisites: 200, 203.
2 units (Lehman)

299. Directed Reading—Prerequisite: consent of instructor.
1-18 units, any quarter (Staff)

399. Research and Special Advanced Work—Register by section numbers by arrangement with faculty. Prerequisite: consent of instructor.
1-18 units, any quarter

459. Frontiers in Interdisciplinary Biosciences—Literature/discussion on how to critically evaluate the cutting edge of current research, held in conjunction with a seminar series, occurring once per month for 1999-2000, and more frequently thereafter. Leading investigators in interdisciplinary research from Stanford and from throughout the world present their work in a particular area. Before the seminar, students and faculty read and critically discuss one or more papers from the primary research literature on a related topic. After the seminar, students meet informally with the speakers to discuss the research and future directions. Emphasis is on how to read papers in the primary research literature, and familiarization with the broad set of techniques and approaches used to study problems in the biosciences. This interdisciplinary course is listed in many departments in the schools of Engineering, Medicine, and Humanities and Sciences. Students should enroll in their affiliated department, if it is offered. If not, students may enroll in any department within their school where the course is listed.
1 unit, Aut, Win, Spr (Spudich, Robertson, Chu, Mobley)

CENTER FOR BIOMEDICAL ETHICS

Co-Directors: Thomas A. Raffin, Ernè W. D. Young
Executive Director: Barbara A. Koenig
Steering Committee: Kenneth Arrow (Economics, emeritus), Paul Berg (Biochemistry), David Cox (Stanford Human Genome Mapping Center), Ronald Davis (Biochemistry), Victor Fuchs (Economics, Health Research and Policy, emeritus), Linda Giudice (In Vitro Fertilization and Reproductive Endocrinology Laboratories), Mary Goldstein (General Internal Medicine, V. A. Palo Alto Medical Care System), Henry Greely (Law), Peter Gregory (Senior Associate Dean of Clinical Affairs), Susan Okin (Ethics in Society Program, Political Science), Debra Satz (Ethics in Society Program, Philosophy), Lucille Shapiro (Developmental Biology), David Stevenson (Pediatrics)

The Stanford University Center for Biomedical Ethics is an interdisciplinary center devoted to teaching and research in scientific and biomedical ethics. Its mission is to: apply ethical reasoning to actual moral problems in the practice of medicine and science; contribute to the national and international discussion of biomedical and scientific issues through research, public symposia, and published papers and monographs; convene scholars, professionals, and policy-makers to debated and propose policy solutions regarding biomedical and scientific ethical issues; serve as a scholarly resource for the University, the Medical Center, and the community at large on emerging ethical issues in medicine and science; and build a community of individuals dedicated to formulating fresh responses to contemporary ethical issues.

The Program in Genomics, Ethics, and Society is multidisciplinary, and is housed within the Center for Biomedical Ethics. It addresses the compelling social, ethical, legal, and political implications of advances in human genetics.

COURSES

For further information, see the Stanford University School of Medicine Catalog.

CULTURAL AND SOCIAL ANTHROPOLOGY

143. The Anthropology of Death and Dying
5 units, Spr (Koenig)

MASTER OF LIBERAL ARTS PROGRAM

57. Bioethics at the Dawn of the New Millennium—Seminar introduces ethical issues in medicine and the life sciences that are controversial at present and in the future: the genetic revolution, the debate about when human personhood begins and ends (and the implications of this debate for clinical decision-making and public policy), and related ethical issues at the beginning and ending of life. Objectives: encourage students to think through morally problematic topics, in small groups and using case studies, and be prepared to defend one's positions publicly.
3 units, Aut (Young)

MEDICINE

214. Literature and Medicine—Reading/discussion on the uses of literary arts as a companion to medical studies. Essays, stories, and poems
on topics relevant to the basic and clinical sciences such as immunology, cardiology, AIDS, end of life, ethics, etc.
1 unit, Win (Crawley, Shafer, Koenig)

250A. Medical Ethics I—Seminar. The major Western theories of ethical decision-making are applied to moral issues in medicine and the life sciences. Daily quandaries confronting clinicians are discussed as a whole or in small groups. Objectives: develop and apply a methodology for clinical decision-making; delineate core issues in biomedical ethics (the nature of the physician/patient, informed consent, quality of life vs. sanctity of life, and the just distribution of finite medical resources); and to enable students to formulate their own positions with respect to contemporary issues and topics in biomedical ethics.
3 units, Win (Young)

250B. Medical Ethics II—Advanced examination of a narrower range of topics at greater depth. Topics vary each year. Students have an informed discussion with an invited expert on the topic under discussion. Objectives: examine the fundamental ethical principles informing the practice of medicine and the life sciences and the relationships between them; identify "non-rational" factors that enter decisively into ethical decision-making; struggle with emerging ethical issues in medicine and the life sciences; and suggest areas where greater conceptual clarity and methodological fitness is required. Recommended: some acquaintance with the field of biomedical ethics.
3 units, Spr (Young)

89. Stanford Introductory Seminar: Biomedical Ethics—Preference to sophomores. In-depth exposure to ethical theory, moral reasoning, and important texts, dealing with different themes in biomedical ethics that apply to clinical ethical issues. Students assume significant responsibility for leading the sessions, along with the instructor. Objective: help students construct reasoned points of view on a variety of topics that can be defended publicly.
3 units, Aut (Young)

RELATED OFFERINGS

BUSINESS

399. Special Topics in Business Research: Biotechnology Business Ethics Case Development Project
4 units, Aut (Eaton)

HEALTH RESEARCH AND POLICY

209. Medicine and the Law
3 units, Win (Eaton)

210. Health Law and Policy—(Same as Law 313.)
3 units, Aut (Greely)

HUMAN BIOLOGY

2S,3S,4S. Bioethical Issues in Human Biology
1-2 units, Aut, Win, Spr (Hurlbut)

90Q. Contemporary Issues in Human Experimentation
3 units, Aut (Constantinou)

121. Ethical Issues in the Neurosciences
4-5 units, Spr (Hurlbut)

PHILOSOPHY

78. Medical Ethics
4 units, Aut (Jaworska)
research. The examination is preceded by a public seminar in which the research is presented by the candidate. The oral examination is conducted by a dissertation reading committee.

COURSES

Course work and lab instruction in the Cancer Biology Program conform to the Policy on the Use of Vertebrate Animals in Teaching Activities as stated in the back of this catalog.

3 units (Staff) alternate years, not given 2000-01

251,252,253. Special Topics in Cancer Biology—Full-quarter courses or half-quarter minicourses given by different lecturers on topics of major importance in cancer research.

251. 1-3 units, Aut (Staff)
252. 1-3 units, Win (Staff)
253. 1-3 units, Spr (Staff)

263: Apoptosis in Normal Development and Cancer—The importance of apoptosis (programmed cell death) in normal development and in formational progression. Apoptotic paradigms in hemopoetic, neurological, and cardiovascular tissues, contrasted with those in malignant transformation and progression. Organized/coordinate by Assistant Professor Giaccia.

4 units (Staff)

299. Research—Students registered for the Ph.D. must register as soon as they begin dissertation-related research work.

COMPARATIVE MEDICINE

Chair: Linda C. Cork
Professor: Linda C. Cork
Assistant Professors: Donna Bouley, Paul Buckmaster, David Daunt, Sherril Green, Glen Otto, Ravi Tolwani

The Department of Comparative Medicine is a relatively new basic science department and does not offer degrees, but its faculty offers courses and participate in teaching in other departments at the undergraduate and graduate level. Faculty members, most of whom are specialists in some veterinary medical specialty, also accept students to participate in ongoing research projects within the department and assist students with special research projects.

The discipline of Comparative Medicine utilizes the differences and similarities among species to understand basic biologic and disease mechanisms. Comparative Medicine incorporates the use of spontaneous or induced disease models as one of several approaches to research. Faculty members have expertise in anesthesiology, infectious diseases, molecular genetics, neuropathology, neuroscience, rodent biology, and so on.

COURSES

Course work and lab instruction in the Department of Comparative Medicine conform to the Policy on the Use of Vertebrate Animals in Teaching Activities as stated in the back of this catalog.

82Q. Stanford Introductory Seminar: Animal Models in Biomedical Research—Preference to sophomores. Overview of the usefulness of animal models in biomedical research (both naturally occurring animal models that mimic human disease and induced models developed by transgenic techniques) as tools to study mechanisms of disease and develop new therapeutic approaches. Examples of animal models in medical disciplines. The techniques utilized to develop animal models, including transgenic technology.

3 units, Aut (Tolwani)

83Q. Stanford Introductory Seminar: Horse Medicine—Preference to sophomores. Introductory to animals, medicine, and biomedical research. Comparative physiology and disease processes between various mammalian species. Recent technological advances in veterinary medicine of companion animals and livestock. Examples of spontaneous and induced animal models of disease. The ethical considerations of using animals for biomedical research and the future directions of animal use in biomedical research and animal health care.

3 units, Win (Daunt)

105/206. Principles of Animal Research—Graduate students register for 206.) Overview of the methodology and principles of animal models in biomedical research: the comparative biology, anatomy, and physiology of a variety of animal models, and an introduction to animal genetics and the current methodology of producing transgenic animals. Examples of spontaneous and induced animal models of disease. The effects on research of underlying factors, e.g., disease, environment, and genetic background. The principles and methods of animal handling, anesthesia, surgery, analgesia, and necropsy. Wet labs provide a basis for proper animal procedures in biomedical research.

5 units, Win (Cork, Otto, Green, Tolwani, Bouley, Daunt, Buckmaster, Coleman)

UNDERGRADUATE INDIVIDUAL WORK

198. Directed Instruction/Reading—May be taken as a prelude to research and may also involve participation in a lab or research group seminar and/or library research.

1-3 units, any quarter

199. Undergraduate Research—Individual research taken by arrangement with department faculty.

FOR GRADUATE STUDENTS

299. Directed Reading—Prerequisite: consent of instructor.

1-18 units, any quarter

399. Research—Opportunities are available in comparative medicine and pathology, immuno-histochemistry, electron microscopy, molecular genetics, quantitative morphometry, neuroanatomy and neurophysiology of the hippocampus, pathogenesis of intestinal infections, immunopathology, biology of laboratory rodents, anesthesiology of laboratory animals, gene therapy of animal models of neurodegenerative diseases, and development and characterization of transgenic animal models. Enrollment limited to six. Prerequisite: consent of instructor.

1-18 units, any quarter
459. Frontiers in Interdisciplinary Biosciences—Literature/discussion on how to critically evaluate the cutting edge of current research, held in conjunction with a seminar series, occurring once per month for 1999-2000, and more frequently thereafter. Leading investigators in interdisciplinary research from Stanford and from throughout the world present their work in a particular area. Before the seminar, students and faculty read and critically discuss one or more papers from the primary research literature on a related topic. After the seminar, students meet informally with the speakers to discuss the research and future directions. Emphasis is on how to read papers in the primary research literature, and familiarization with the broad set of techniques and approaches used to study problems in the biosciences. This interdisciplinary course is offered in many departments in the schools of Engineering, Medicine, and Humanities and Sciences. Students should enroll in their affiliated department, if it is offered. If not, students may enroll in any department within their school where the course is listed.

I unit, Aut, Win, Spr (Spudich, Robertson, Chu, Mobley)

DEVELOPMENTAL BIOLOGY

Co-Chairs: Roeland Nusse, Matthew Scott
Professors: Gerald Crabtree, David Hogness, A. Dale Kaiser, Roeland Nusse, Matthew Scott, Lucy Shapiro, James Spudich, Irving Weissman
Associate Professors: Ben Barres, Margaret Fuller, Stuart Kim, David Kingsley, Ellen Porzig
Assistant Professors: Seung Kim, William Talbot, Anne Villeneuve

A fundamental problem in biology is how the complex set of multicellular structures that characterize the adult animal is generated from the fertilized egg. Advances at the molecular level, particularly with respect to the genetic control of development, have been explosive. These advances represent the beginning of a major movement in the biological sciences toward the understanding of the molecular mechanisms underlying developmental decisions and the resulting morphogenetic processes. This new thrust in developmental biology derives from the extraordinary methodological advances of the past decade in molecular genetics, immunology, and biochemistry. However, it also derives from groundwork laid by the classical developmental studies, the rapid advances in cell biology and animal virology, and from models borrowed from prokaryotic systems. Increasingly, the work is directly related to human diseases, including oncogene function and inherited genetic disease.

The Department of Developmental Biology includes a critical mass of researchers who are leading the thrust in developmental biology and who can train new leaders in the attack on the fundamental problems of development. Department labs work on a wide variety of organisms from microbes to worms, flies, and mice. The dramatic evolutionary conservation of genes that regulate development makes the comparative approach of the research particularly effective. Scientists in the department labs have a very high level of interaction and collaboration. The discipline of developmental biology draws on biochemistry, cell biology, genetics, and molecular biology.

The department is located in the Beckman Center for Molecular and Genetic Medicine within the Stanford University Medical Center.

GRADUATE PROGRAM

MASTER OF SCIENCE

Students in the Ph.D. program in Developmental Biology may apply for an M.S. degree, assuming completion of their course requirements and preparation of a written proposal. The master's degree awarded by the Department of Developmental Biology does not include the possibility of minors for graduate students enrolled in other departments or programs.

Students are required to take, and satisfactorily complete, at least three lecture courses offered by the department, including 210, Developmental Biology. In addition, students are required to take three courses outside the department. Students are also expected to attend Developmental Biology seminars and journal clubs. In addition, the candidate must complete a research paper proposing a specific experimental approach and background in an area of science relative to developmental biology.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The graduate program in Developmental Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program in which individuals are candidates for both the M.D. and Ph.D. degrees.

Students are required to take, and satisfactorily complete, at least six courses, including Developmental Biology (210); Advanced Genetics (203); Frontiers in Biological Sciences (215); and an advanced molecular biology, biochemistry, or biophysics course. Students are also expected to attend Developmental Biology seminars and journal clubs.

Successful completion of a qualifying examination is required for admission to Ph.D. candidacy. The examination consists of two parts. One proposal is on a subject different from the dissertation research and the other proposal is on the planned subject of the thesis. The final requirements of the program include the presentation of a Ph.D. dissertation as the result of independent investigation and constituting a contribution to knowledge in the area of developmental biology. The thesis must then successfully pass the University oral examination which is taken only after the student has substantially completed his or her research. The examination is preceded by a public seminar in which the research is presented by the candidate. The oral examination is conducted by a dissertation reading committee.

COURSES

Course work and lab instruction in the Department of Developmental Biology conform to the Policy on the Use of Vertebrate Animals in Teaching Activities as stated in the back of this catalog.

203. Advanced Genetics—(Same as Genetics 203, Biological Sciences 203.) The underlying genetic logic used to dissect diverse biological phenomena. The genetic toolbox through studies of analytic methods and modern synthetic genetic manipulation, including original papers. Emphasis is on the use of gene knockout tools to dissect complex biological pathways, developmental processes, and regulatory systems. Classical genetic approaches and newer approaches developed in the post-genome era (in which the entire genomic sequence of an organism is known). Graduates students with minimal experience in genetics should work through problems in Hartl and Jones.

4 units, Aut (Botstein, Kim, Stearns, Villeneuve)

204. More Advanced Genetics—Offered upon request of students. Continuation of 203; basic concepts and experimental design in modern genetics. Emphasis is on studying genetic systems in detail from original papers, and the impact of genomics on experimental design and practice. Prerequisite: 203.

3 units, Win (Botstein, Kim, Stearns, Villeneuve)

210. Developmental Biology—Acquaints graduate students and upper-level undergraduates with advances in current developmental biology. Goal: to discover unifying themes in how organismic complexity is generated during embryonic and post-embryonic development. The roles of genetic hierarchies, induction events, cell lineage, maternal inheritance, cell-cell communication, and hormonal control in developmental processes in well-studied organisms (mammals, insects, and nematodes). Small groups of students and faculty discuss current papers in depth. Team taught by department faculty. Undergraduate prerequisite: consent of instructor. Recommended: familiarity with the basic techniques and experimental rationales of molecular biology, biochemistry, and genetics.

5 units, Spr (Fuller, Crabtree, Stuart Kim, Kingsley Nusse, Scott, Seung Kim, Talbot)
215. Frontiers in Biological Research—(Same as Biochemistry 215.)
Literature/discussion on how to critically evaluate current biological research, held in conjunction with a Wed. seminar series hosted in alternate weeks by Biochemistry and Developmental Biology. Invited speakers present works in a particular system. Students and faculty read and critically discuss one or more papers from the primary research literature on a related topic before the seminar and then meet informally with the speakers to discuss the research and future directions. Emphasis is on how to read papers in the primary research literature, the set of techniques most commonly used to study problems in biology, and a comparison between genetic and biochemical approaches in biological research.

1 unit, Aut, Win (Krasnow, Kingsley)

217. Mammalian Developmental Genetics—(Same as Genetics 217.)
Topics: imprinting; early development and implantation; germ cell allotment; phenotypic consequences of targeted knockouts of developmental, hox, and other developmental genes in mammals; tumorgenesis; coat color mutations; classical mutations and positional cloning; mutation and insertional and gene traps; growth controls and Igs; muscle and limb development; sex determination; classical genetics and gene mapping and inbred strains; segregation and T locus; and germ and embryonic stem cells and teratocarcinomas. Weekly lecture, plus guest lecture or a literature discussion.

2 units (Barsh, Nusse) given 2000-01 and every 3rd year

225. Molecular Motor Proteins and the Cytoskeleton—(Same as Biochemistry 225.)
The molecular basis of energy transduction that leads to movements generated by microfilament-based and microtubule-based motors. In-depth analysis of forms of myosin, dynen, and kinesin and their roles in the cell as a model for understanding the structural, biochemical, and functional properties of biological machines in general. Topics: structure of the molecular motors and their accessory proteins, regulation of the function of motile assemblies in cells; spatial and temporal controls on the formation of motile assemblies in cells. Experimental approaches: genetic analysis, DNA cloning and expression, reconstitution of functional assemblies from purified proteins, x-ray diffraction, three-dimensional reconstruction of electron microscope images, spectroscopic methods, and high-resolution light microscopy. How a complex cellular process is analyzed at the molecular level by a multifaceted approach using biochemical, biological, and genetic techniques. Prerequisites: knowledge of basic biochemistry and cell biology.

3 units (Fuller, Spudich)

237. Introduction to Biotechnology—(Same as Biological Sciences 237, Biochemistry 237, Chemical Engineering 450, Civil Engineering 237, Structural Biology 237.) Faculty from the departments of Biochemistry, Biological Sciences, Chemical Engineering, Civil Engineering, Developmental Biology, Structural Biology, and invited industrial speakers review the interrelated elements of modern biotechnology. Topics: protein structure and dynamics, protein engineering, biocatalysis, gene expression, cellular metabolism and metabolic engineering, fermentation technology, and purification of biomolecules. Prerequisite: graduate student or upper-division undergraduate in the sciences or engineering.

3 units, Spr (Robertson)

399. Research—Must register by section numbers.
1-18 units, any quarter (Staff)

459. Frontiers in Interdisciplinary Biosciences—Literature/discussion on how to critically evaluate the cutting edge of current research, held in conjunction with a seminar series, occurring once per month for 1999-2000, and more frequently thereafter. Leading investigators in interdisciplinary research from Stanford and from throughout the world present their work in a particular area. Before the seminar, students and faculty read and critically discuss one or more papers from the primary research literature on a related topic. After the seminar, students meet informally with the speakers to discuss the research and future directions. Emphasis is on how to read papers in the primary research literature, and familiarization with the broad set of techniques and approaches used to study problems in the biosciences. The interdisciplinary course is listed in many departments in the schools of Engineering, Medicine, and Humanities and Sciences. Students should enroll in their affiliated department, if it is offered. If not, students may enroll in any department within their school where the course is listed.

1 unit, Aut, Win, Spr (Spudich, Robertson, Chu, Mobley)

Epidemiology Program

Director: Jennifer L. Kelsey (Professor of Health Research and Policy)
Steering Committee: (Professors) J. Martin Brown (Radiation Oncology), Byron W. Brown, Jr. (Health Research and Policy, Division of Biostatistics), Jennifer L. Kelsey (Health Research and Policy, Division of Epidemiology), Helena Kraemer (Psychiatry, and Medicine), Robert Marcus (Medicine; Division of Endocrinology, Gerontology, and Metabolism), Alice S. Whittemore (Health Research and Policy, Division of Epidemiology)
Cancer Biology: J. Martin Brown (Professor)
Genetics: Neil Risch (Professor)
Gynecology and Obstetrics: Emmet Lamb (Professor), Mary L. Polan (Professor)
Health Research and Policy: Paul Basch (emeritus), Rodney Beard (emeritus), Byron W. Brown, Jr. (emeritus), John Farquhar (Professor), Jennifer Kelsey (Professor), Abby King (Associate Professor), Lorene Nelson (Assistant Professor), Ralph Paffenbarger, Jr. (emeritus), Julie Parsonnet (Associate Professor), Atsuko Shibata (Assistant Professor), David Thom (Courtesy Assistant Professor), Alice Whittemore (Professor)
Medicine: John Farquhar (Professor), Stephen Fortmann (Associate Professor), James Fries (Professor), William Haskell (Professor, Research), Halstead Holman (Professor), Helen Hubert (Senior Research Scientist), Helena Kraemer (Professor), Robert Marcus (Professor), Gordon Matheson (Associate Professor), Julie Parsonnet (Associate Professor). Charles Prober (Professor), Gary Schoolnik (Professor), Peter Small (Assistant Professor), Marcia Stefanick (Research Associate), David Thom (Assistant Professor), Lucy Tompkins (Professor).
Microbiology and Immunology: Ann Arvin (Professor), Charles Prober (Professor), Gary Schoolnik (Professor), Lucy Tompkins (Professor)
Neurology and Neurological Sciences: Leslie Dorfman (Professor)
Neurobiology: Denis Baylor (Professor)
Pediatrics: Ann Arvin (Professor), Laura Bachrach (Associate Professor), Yvonne Maldonado (Associate Professor), Charles Prober (Professor)
Stanford Center for Research in Disease Prevention: John Farquhar (Professor), Stephen Fortmann (Associate Professor), William Haskell (Professor), Abby King (Associate Professor), Helena Kraemer (Professor), Marcia Stefanick (Research Associate), Marilyn Winkley (Lecturer)

GRADUATE PROGRAMS

The Epidemiology Program offers interdisciplinary instruction and research opportunities leading to the M.S. and Ph.D. degrees in Epidemiology. The program has strengths in the following areas of epidemiology: cancer, cardiovascular, infectious, musculoskeletal and neurological diseases; genetics; some aspects of epidemiologic methods; and reproductive, environmental, and occupational epidemiology.

MASTER OF SCIENCE

The M.S. program is designed to provide training in epidemiologic methods to professionals in a variety of related fields and to serve as an introduction to those with bachelor's degrees who are considering careers in epidemiology. Applicants to the M.S. program should have previous coursework in biology and statistics or mathematics.
To receive the degree, students are expected to obtain a thorough grounding in epidemiologic methods and applied biostatistics and to demonstrate research skills through the completion of a master's thesis. A total of 45 units of course work, including a 12-credit master's thesis, must be successfully completed. Required courses are Health Research Policy 224 (Statistical Issues in Epidemiology), Genetics 344A (Genetic Epidemiology), and an additional course in epidemiology. A student must select a specialty area (for example, cardiovascular diseases, cancer, genetics, infectious diseases, musculoskeletal diseases, neurological diseases, reproductive disorders). Additional courses are required in each specialty area. Requirements for the specific specialty areas may be obtained from the office of the Program Coordinator, and depending on the specialty area, include one or more of the following courses: Pathology 230A (General and Special Pathology), Cancer Biology 241 (Molecular and Cellular Biology of Cancer), Genetics 344A (Genetic Epidemiology), Human Biology 166 (Cardiovascular Disease Prevention and Epidemiology), Health Research Policy 201 (Infectious Basis of Disease), Neuroscience 200 (The Nervous System), and Human Biology 156 (Human Development).

Successful completion of three written qualifying examinations is required for admission to Ph.D. candidacy. The qualifying examinations cover: (1) epidemiologic methods, (2) biostatistics, and (3) a specialty area (for example, epidemiology and pathobiology of cancer, or cardiovascular diseases). Requirements also include the presentation of a Ph.D. dissertation as the result of independent investigation and constituting a contribution to knowledge in epidemiology. The candidate must then successfully pass the University oral examination, which is taken only after the student has substantially completed his or her research. The examination is preceded by a public seminar in which the research is presented by the candidate. The oral examination is conducted by a dissertation reading committee.

**COURSES**

The course listings of individual departments participating in the Program in Epidemiology should be consulted for complete descriptions.

**GENETICS**

**Emeritus:** (Professor) L. L. Cavalli-Sforza

**Chair:** David Botstein

**Professors:** David Botstein, Stanley N. Cohen, David R. Cox, Ronald W. Davis, Uta Francke, Leonard A. Herzenberg, Richard M. Myers, Neil J. Risch, Matthew P. Scott, Lucille Shapiro

**Associate Professors:** Gregory S. Barsh, Michele P. Calos, Margaret T. Fuller, Mark A. Kay, Stuart K. Kim

**Assistant Professors:** James M. Ford, Joanna L. Mountain, Arend Sidow, Tim Stearns, Anne M. Villenuve, Douglas E. Volrath

**Assistant Professors (Research):** Laura Lazzeroni, Zijie Sun

**Researchers:** Leonore A. Herzenberg

**Visiting Professors:** Thomas Breithaupt, Alberto Piazza

**Visiting Associate Professor:** Ian C. Hsu

**GRADUATE PROGRAMS**

University requirements for the Ph.D. degree are described in the "Graduate Degrees" section of this bulletin.

The Ph.D. program in the Department of Genetics offers graduate students the opportunity to study in all the major areas of modern genetics research, including many aspects of human genetics (linkage mapping, physical mapping, cytogenetics, genetic epidemiology and population genetics), bacterial and yeast genetics, Drosophila developmental genetics, mouse genetics, immunogenetics, and mathematical biology. The department also includes two Genome Centers, the Stanford Human Genome Mapping Center, and the Stanford DNA Sequence and Technology Center which are engaged in state-of-the-art mapping and sequencing of human and model organism genomes.

The department believes genetics should be viewed as a discipline that encompasses not just a set of tools but a coherent and fruitful way of thinking about biology and medicine. It emphasizes, in the teaching of doctoral students and physician-scientists, the broad scope of genetic thinking, including not just molecular genetics, but also classical, medical, and population genetics. The department provides training through laboratory rotations, dissertation research, a series of advanced courses in genetics and other areas of biomedical science, several seminar series and colloquia, journal clubs, and an annual three-day retreat that includes faculty, students, postdoctoral fellows, and staff scientists. A strong emphasis is placed on interactions among students, postdoctoral students, and faculty within the department and throughout the campus.

The Department of Genetics is located in the School of Medicine and includes modern, well-equipped laboratories. Extensive computer support and advanced instrumentation are available for research projects. The department has 25 to 30 graduate students and 30 to 35 postdoctoral fellows. In addition to interacting with the faculty and laboratories in the department, students have contacts with a much larger number of students, fellows, and faculty in other biological and biomedical programs throughout the University. During their first year, graduate students in the department take advanced graduate courses and sample several areas of research by doing laboratory rotations in three or four labs in the department. At the end of the first year, students select a lab in which to do their dissertation research. While the dissertation research is generally performed in one lab, collaborative projects with more than one faculty member are encouraged. In addition to interacting with their faculty preceptor, graduate students receive input regularly from other faculty members who serve as advisers on their dissertation committee. Study for the Ph.D. generally requires between four and five years of graduate work, most of which is spent on the dissertation research. Graduate students are generally enrolled in the Ph.D. program, although a limited number of M.D. candidates can combine research training in genetics with their medical studies. Ph.D. candidates who have passed the qualifying exam in the second year can opt to receive the M.S. degree.

There are opportunities for graduate students to teach in graduate level and professional school courses, although there is no formal teaching requirement. In addition, students are encouraged to participate in an education outreach program that is administered through the department and which involves numerous opportunities to interact with secondary school students and teachers, lay groups, and local science museums. Students who have recently received a bachelor's, master's, M.D., or Ph.D. degree in related fields may apply for graduate study in the Department of Genetics. Prospective students must have a background in general biology, mathematics, physics, and chemistry. Decisions for admission are based on a comparison of the relative merits of all the candidates' academic abilities and potential for research. Students who wish to pursue a combined M.D./Ph.D. degree are considered for admission into the graduate program in the Department of Genetics after they have been admitted to the M.D. program in the School of Medicine. All applicants...
are considered equally regardless of race, color, creed, religion, national origin, sexual preference, age, or gender. Students are admitted to the graduate program in the Autumn Quarter. Prospective students are encouraged to begin the application process early enough to ensure that they are able to submit a complete application by the previous December 15, and are able to apply for fellowships by the previous November 15. All students accepted into the Ph.D. program are provided with full tuition and a stipend to cover costs of living. Three training grants from the U.S. National Institutes of Health provide major support for the graduate training program in the department. Other student support is provided by department funds and from the research grants, both federal and private, of the faculty. In addition, a number of graduate students are funded by fellowships from the National Science Foundation or the Howard Hughes Medical Institute. Prospective students are encouraged to apply for fellowships from these institutes by requesting applications from these institutions. Applications are due on November 1 of each year.

Prospective students are encouraged to apply for fellowships from these institutes by requesting applications from the National Science Foundation, Oakridge Associated Universities, P.O. Box 3010, Oak Ridge, TN 37831-3010, telephone (615) 483-3344; Howard Hughes Medical Institute, Fellowship Office, National Research Council, 2101 Constitution Avenue, NW, Washington, D.C. 20418, telephone (202) 334-2872. Applications are due on November 1 of each year.

**COURSES**

For further information on the availability of courses, consult the quarterly Time Schedule, or inquire at the department office. Additional courses in or related to genetics are included in the listings of the departments of Biological Sciences, Biochemistry, Developmental Biology, Microbiology and Immunology, and Structural Biology.

201. Human Genetics—The theoretical and experimental basis for human genetics. Lectures/reading in molecular, chromosomal, cellular, developmental, population, and medical genetics, emphasizing the latter. Prerequisites: knowledge of biochemistry and basic genetics.

*4 units, Spr (Cox, Franke, Barsh)*

203. Advanced Genetics—(Same as Biological Sciences 203, Developmental Biology 203.) The underlying genetic logic used to dissect diverse biological phenomena. The genetic toolbox through studies of analytic methods and modern synthetic genetic manipulation, including original papers. Emphasis is on the use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Classical genetic approaches and newer approaches developed in the post-genome era (in which the entire genomic sequence of an organism is known). Graduate students with minimal experience in genetics should work through problems in Marte and Jones.

*3 units, Aut (Botstein, Stearns, Kim, Villeneuve)*

209. Genetics of Vision and Vision Disorders—Background information about the developmental biology of the eye, the physiology of vision, and the biology of vision disorders that have a genetic basis. Examples of genetically-related research problems involving study of vision and/or vision disorders.

*1 unit (Cohen) alternate years, given 2000-01*

210. Advanced Human Genetics—For students in the Genetics Ph.D. program; other graduate students by arrangement. Companion course for 201. Advanced principles of human and medical genetics. In-depth discussion of human genetics; examples from recent literature. Emphasis is on molecular genetics and on experimental approaches.

*2 units, Spr (Cox, Risch)*

217. Mammalian Developmental Genetics—(Same as Developmental Biology 217.) Topics: imprinting; early development and implantation; germ cell allotment; phenotypic consequences of targeted knockouts of developmental, hox, and other developmental genes in mammals; tumorigenesis; coat color mutations; classical mutations and positional cloning; mutagenesis and insertion and gene traps; growth controls and lgs; muscle and limb development; sex determination; classical genetics and gene mapping and inbred strains; segregation and T locus; and germ and embryonic stem cells and teratocarcinomas. Weekly lecture, plus one guest lecture or a literature discussion.

*2 units (Barsh, Nusse) given in 2000-01 and every 3rd year*

222. Method and Logic in Experimental Genetics—For graduate students only. Experimental design. Weekly topics central to research in genetics, biochemistry, and molecular biology: protein subunit equilibrium, domain structure of proteins, cooperativity, precursor/product relationships, and macromolecular interactions. Emphasis is on student participation and analysis of the logical principles underlying experiments in these areas. Papers, classic and contemporary, from primary literature relevant to the weekly topic.

*3 units, Win (Myers, Vollrath)*

231. Gene Therapy—Gene therapy is developing new vectors and disease applications. Approaches include viral and non-viral vectors, delivery methods, and target cells. History and ethical considerations. Lectures by Stanford faculty, and guest speakers from industry and other institutions. Students participate in question sessions after each lecture.

*3 units, Win (Blau, Calos, Nolan)*

344A. Genetic Epidemiology—(Same as Statistics 344A.) Methods for the design and analysis of studies in human genetics, focusing on the epidemiology of Mendelian disorders and the genetic and environmental contributions to common, complex familial traits. Topics: study designs for assessing the importance of genetic factors (family, twin, and adoption studies); methods for determining modes of inheritance (segregation analysis); identification and mapping of major genes through linkage analysis and disease-marker associations. Applications to birth defects, coronary heart disease, psychiatry, neurology, cancer, and immunology.

*3 units (Risch) alternate years, given 1999-2000*

344B. Topics in Statistical Genetics—(Same as Statistics 344B.) In-depth discussion of statistical methods currently used in human genetic analysis. Topics depend on interests of the students and instructors: concepts of likelihood as used in the genetic context; measures of familial aggregation, including issues of censoring and age-dependent data; genetic modeling of quantitative traits; modes of inheritance analysis, including segregation analysis; analysis of extended pedigrees; parametric and nonparametric approaches to linkage analysis and gene mapping, including family studies, radiation hybrid data, sperm typing, and DNA contig mapping; linkage disequilibrium; analysis of DNA profiles for individual identification; DNA sequence analysis.

*3 units (Risch)*

344C. Genetic Epidemiology: Applications—Sequel to 344A, focusing on application of methods from genetic epidemiology to various diseases: family studies, segregation analysis, linkage analysis, and population association studies. The disease topics are tailored to the interests of the students, from cancer (breast or colon cancer), neurological disorders (multiple sclerosis, epilepsy), birth defects (cleft lip and palate, pyloric stenosis), psychiatry (schizophrenia, manic-depression, Alzheimer’s disease), cardiovascular disease, autoimmune disease (diabetes, coeliac disease), etc.

*2 units, Spr (Risch) alternate years, not given 2000-01*

260. Supervised Study—Prerequisite: consent of instructor.

*any quarter (Staff)*

299. Directed Reading—Prerequisite: consent of instructor.

*any quarter (Staff)*

399. Individual Research—Prerequisite: consent of instructor.

*any quarter (Staff)*
GYNECOLOGY AND OBSTETRICS

Chair: Mary Lake Polan

The Department of Gynecology and Obstetrics does not offer degrees; however, qualified medical, graduate, or undergraduate students with an interest in basic research in reproductive biology may apply to arrange individual projects under the supervision of the faculty. The focus for the Division of Reproductive Biology is the study of molecular and cellular biology of the male and female reproductive organs.

COURSES

99Q. Ovarian Kaleidoscope: A Genomic Approach to Ovarian Physiology—Introduces the basic concept of molecular physiology using the mammalian ovary as a prototypic organ. Emphasis is on the present understanding of ovarian follicle development, development, ovulation, and menopause. The role of reproductive hormones in these processes. Understanding of ovarian physiology provides the basis for developing new contraceptives and the treatment of ovarian pathophysiology. Students participate in a web project, the Ovarian Kaleidoscope Database, a searchable database listing the function and expression pattern of ovarian genes. Prerequisite: general biology background.

3 units, Aut (Hsueh)

HEALTH RESEARCH AND POLICY

Emeriti: (Professors) Paul Basch, Byron Wm. Brown, Jr., Victor R. Fuchs, Count D. Gibson, Jr., Lincoln E. Moses, Ralph S. Paffenbarger, Jr.
Chair: Mark Hlatky
Professors: Bradley Efron, John W. Farquhar, Trevor Hastie, Mark Hlatky, Iain M. Johnstone, Jennifer L. Kelsey, Richard A. Olshen, Robert Tibshirani, Alice S. Whittemore
Associate Professors: Trevor J. Hastie, Abby King, Julie Parsonnet
Assistant Professors: Laurence Baker, Mary Bundorg, Lorene M. Nelson, Atsuko Shibata
Professor (Research): Philip W. Lavori
Associate Professor (Research): Dan Bloch
Assistant Professor (Research): Laura Lazzeroni
Courtesy Professors: Alan M. Garber, Alain Enthoven, Neil Risch
Consulting Associate Professor: Jane E. Pack
Consulting Assistant Professors: Trevor J. Hastie, Abby King, Julie Parsonnet
Consulting Assistant Professor (Research): Gillian Sanders
Senior Lecturer: Irene Corso
Lecturers: Nancy Moss, Angela Prehn
Consulting Professors: David S. P. Hopkins, Gary Friedman, Joseph Selby, Sandra Wilson
Consulting Associate Professor: Eugene Lewit
Consulting Assistant Professors: Paul Barnett, Ciaran Phibbs, John Piette
Visiting Professor: Elizabeth Holly
Visiting Associate Professor: Kathleen Lamborn, Marion Lee

The Department of Health Research and Policy has three divisions:

1. Biostatistics deals with scientific methodology in the medical sciences, emphasizing the use of statistical techniques.
2. Epidemiology provides training and experience in the application of epidemiologic methods to the study of disease etiology and control. It is also concerned with problems of health and disease in human populations in all parts of the world and with efforts toward improving levels of health.
3. Health Services Research is concerned with many aspects of health policy analysis in the public and private sectors.

The department, and each division, offers courses in its areas of specialization. These are described fully in the Stanford University School of Medicine Catalog.

GRADUATE PROGRAMS

The Program in Epidemiology and the Program in Health Services Research are housed in the Department of Health Research and Policy. These programs are described separately within the School of Medicine listings of this bulletin. Students with interest in pursuing advanced degrees with emphasis in biostatistics can do so through programs offered by the Department of Statistics. Division of Biostatistics faculty participate in these programs.

COURSES

Course work and instruction in the Department of Health Research and Policy conform to the Policy on the Use of Vertebrate Animals in Teaching Activities as stated in the back of this bulletin.

85Q. Stanford Introductory Seminar: Current Issues in Women’s Health—Preference to sophomores. Current issues in women’s health from an epidemiologic perspective. Possible topics (as they pertain to women): coronary heart disease, breast cancer (or other cancers), osteoporosis, HIV infection, eating disorders, depression, domestic abuse, benefits and risks of oral contraceptives, benefits and risks of hormone replacement therapy, new replacement therapies (e.g., SERMs), current prevention trials in women (e.g., the Women’s Health Initiative), menopause, menstruation, health issues for athletes, health issues in developing countries, adverse pregnancy outcomes, obesity, cigarette smoking. Prerequisite: knowledge of human biology.

3 units, Win (Kelsey)

98Q. Stanford Introductory Seminar: Cross-Cultural Issues in Medicine—Preference to sophomores. Cross-cultural issues that impact health care delivery, e.g., ethnicity, immigration, language barriers, and service expectations. Fosters an understanding of culturally unique and non-English speaking populations, developing interpersonal and communication skills with diverse ethnic groups.

3 units, Win (I. Corso)

202. Biostatistics and Epidemiology—Required for medical students. Introduces epidemiological concepts, techniques, and studies: statistical reasoning and the application of common statistical procedures used in lab and clinical investigations. Student-designed research project.

4 units, Win (Lavori, Parsonnet)

205. The U.S. Health Care System and Health Policy—Introduces issues in health care systems, organization, and financing including health insurance, managed care, health care costs, the uninsured, and health reform, focusing on the U.S. health care system.

2 units, Win (Baker, Hlatky)

206. Statistical Methods for Meta-Analysis—Same as Education 493B, Statistics 211.) Meta-analysis is a quantitative method for combining results of independent studies, and enables researchers to synthesize the results of related studies so that the combined weight of evidence can be considered and applied. Examples from the medical, behavioral, and social sciences. Topics: literature search, publication and selection bias, statistical methods (contingency tables, cumulative methods, sensitivity analyses, non-parametric methods). Project. Prerequisites: basic sequence in statistics and consent of instructor.

3 units, Win (Olkin)

209. Medicine and the Law—Studies areas of the law that pertain to the practice of medicine. Topics: medical malpractice, patient consent and confidentiality rights, human subject research, withdrawing life support
and physician-assisted suicide, futile medical care, legal requirements in psychiatry, physician discipline, and medical staff law.

3 units, Win (Eaton)

210. Health Law and Policy—(Same as Law 313.) Non-law students admitted with consent of instructor. Open to all law or medical students and to graduate and undergraduate students, by consent of the instructor. Introductory survey of the American health care system and its legal and policy problems. Topics: the special characteristics of medical care compared to other goods and services, the difficulties of assuring quality, the system raises.

3 term units, Aut semester (Greely)

211. Advanced Issues in Health Law and Policy: Genetics and Law—(Same as Law 649.) Open to 20 students from any Stanford graduate or professional program. Writing seminar on ethical, legal, and social issues raised by the revolution in human genetics. Topics: DNA fingerprinting, genetic privacy, property rights in genes, genetic testing, genetic discrimination, transgenics, and eugenics.

2 term units (Greely, Cox) not given 1999-2000

212. Cross-Cultural Medicine—Limited to medical students. Provides interviewing and behavioral skills to facilitate culturally relevant health care across all population groups. The explicit and implicit cultural influences operative in a variety of formal and informal medical contexts.

3 units, Spr (Corso)

213. Statistical Issues in Epidemiology—Selected advanced problems in the design and analysis of epidemiological studies, motivated by published investigations. Possible topics: issues in matching controls to cases in case-control studies, methods for analyzing data from cohort studies, and methods for the design and analysis of family and genetic studies. Prerequisites: 203, 225, 226, or equivalents.

3 units (Whittemore) alternate years, given 2000-01

214. Design and Conduct of Epidemiologic Studies—Intermediate-level. Provides students with the knowledge and skills to design, carry out, and interpret epidemiologic studies, particularity of chronic diseases. Topics: epidemiologic concepts, sources of data, cohort studies, case-control studies, cross-sectional studies, sampling, estimating sample size, questionnaire design, and effects of measurement error. Prerequisite: 202 or equivalent, or consent of instructor.

3-4 units, Aut (Kelsey)

215. Advanced Epidemiologic Methods—The principles of measurement, measures of effect, confounding, effect modification, and strategies for minimizing bias in epidemiologic studies. Prerequisite: 225 or consent of instructor.

3-4 units, Win (Nelson)

216. Molecular Epidemiology—Molecular and biochemical biomarkers for measuring exposure, host susceptibility, and endpoint (disease), as applied to epidemiologic studies of infectious diseases, cancer, and other chronic diseases. Topics: DNA fingerprinting to determine transmission pathways; biochemical markers of environment exposures; study design and methodological consideration; ethical and legal issues.

Prerequisite: 202 or 225, or consent of instructor.

3 units, Spr (Shibata, Parsonnet) alternate years, not given 2000-01

217. Epidemiology of Musculoskeletal and Neurologic Disorders—Epidemiologic contributions to understanding the etiology of conditions such as osteoporosis and fractures, congenital and developmental musculoskeletal disorders, arthritic disorders, disability, Alzheimer's disease and dementia, stroke, epilepsy, headache, chronic neurologic diseases, and head and back injuries. Methodologic issues important to the study of musculoskeletal and neurologic disorders are emphasized. Prerequisite: 225 or consent of instructors.

3 units (Kelsey, Nelson) alternate years, given 2000-01

218. Cancer Epidemiology—Lectures/discussions on key issues in cancer epidemiology. Topics: descriptive epidemiology and sources of incidence/mortality data; biological basis of carcinogenesis and its implications for epidemiologic research; methodological issues relevant to cancer research; causal inference; major environmental risk factors; genetic susceptibility; cancer control; examples of current research; and critique of the literature. Prerequisite: 202 or 225, or consent of instructor.

3 units (Shibata) alternate years, given 2000-01

3 units (Parsonnet) alternate years, given 2000-01

220. Workshop in Biostatistics—On-going research is presented by faculty, staff, students, and guests, and recent journal articles are discussed.

1 unit, Aut, Win, Spr (Staff)

221. Economics of Health and Medical Care—(Same as Medical Information Sciences 256, Economics 156/256; undergraduates register for 156.) Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: Economics 51 or consent of instructor. Recommended: some background in statistics or mathematics.

5 units, Win (McClellan)

222. U.S. Health Policy—Introduction to the institutions and policies that influence health care provision and costs in the U.S. Topics: the organization of the health care delivery system, the structure of hospitals, physician organizations, and the health care networks, and the financing of health care, including health insurance, Medicare, and Medicaid. Current issues in health care policy.

3 units (Baker) not given 1999-2000

223. Workshop in Biostatistics—(Same as Statistics 260A,B,C.) Applications of statistical techniques to current problems in medical science. Enrollment for more than 2 units of credit involves extra reading or consulting and requires consent of the instructor.

260A. 1-5 units, Aut (Olshen, Bloch, Efron, Hastie, Johnstone, Lavori, Tibshirani)

260B. 1-5 units, Win (Olshen, Bloch, Efron, Hastie, Johnstone, Lavori, Tibshirani)

260C. 1-5 units, Spr (Olshen, Bloch, Efron, Hastie, Johnstone, Lavori, Tibshirani)

3 units, Spr (Olshen)

266. Cardiovascular Disease Epidemiology and Prevention—Epidemiological, biological, and behavioral perspectives of cardiovascular disease and assessment and modification of the risk factors relating to it. The potential for disease prevention in the context of major prevention trials. Public policy ramifications. Topics: diet, weight control, smoking, Type-A behavior, and exercise. Prerequisites for undergraduates: Human Biology core and consent of instructor.
2-3 units, Aut (King)

280. Spanish for Medical Students—Teaches students useful medical Spanish. Emphasis is on oral communication skills. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients.
3 units, Win (L. Corso)

281. Spanish II for Medical Students—Can be taken as continuation of 280 or independently as a stand alone course, depending on the student’s ability level.
3 units, Win (L. Corso)

282. Spanish III for Medical Students—Can be taken as continuation of 281 or independently as a stand alone course, depending on the student’s ability level.
3 units, Spr (L. Corso)

283. Core Seminar—Presentation of research in progress and tutorials in the field of health services research.
1 unit, Aut, Win, Spr, Sum (Baker, Garber, Hlatky, Owens)

290. Advanced Spanish Conversation—Intensive practice of oral language skills covering topics such as how to conduct a full pediatric, gynecological, and other specialty exams; patient health education and counseling; and diseases like diabetes, asthma, and TB. Prerequisites: Spanish proficient or consent of instructor.
3 units, Aut, Win, Spr (L. Corso)

291. Intensive Spanish for Medical Students—Covers over two quarters the regular Spanish for Medical Students three-quarter sequence.
6 units, Sum (L. Corso)

299. Directed Reading—Aspects of preventive medicine, public health, social aspects of disease and health, economics of medical care, occupational or environmental medicine, epidemiology, international health, or related fields. Prerequisite: consent of the instructor.
1-18 units, any quarter (Staff)

390. Quality in Health Care—(Same as Business E333.) Topics: What do modern industrial quality theories have to offer health care? How can quality be measured? What are the tools of quality improvement? What are the costs of poor quality in health care? How can high quality lower costs? Students read recent literature and meet with local professionals concerned with health care quality. Prerequisite: consent of the instructor.
4 units, Spr (Enthoven)

391. Political Economy of Health Care in the United States—(Same as Business E331.) The financial and public policy context in which the health care system operates, and the issues in public policy controlling it in the public expenditure. Issues: financing and organization for the delivery of health care in the U.S., how various existing and proposed financing and organizational arrangements affect the allocation of resources, fee-for-service practice and health maintenance organizations, hospital investment decisions and regional planning, health care costs, and national health insurance. Prerequisite: graduate student.
4 units, Spr (Enthoven)

392. Cost-Benefit Analysis in Health Care—(Same as Business E332, Medical Information Sciences 432.) For graduate students. How do you do cost-benefit analysis when the “output” is difficult or impossible to measure? How do MBA analytic tools apply in health services? Study discussion of the main literature on the principles of cost-benefit analysis applied to health care. Critical review of actual studies. Emphasis is on the art of practical application.
4 units, Aut (Garber, Owens, Singer)

399. Research—Qualified students undertake investigations sponsored by individual faculty members. Prerequisite: consent of the instructor.
1-18 units, any quarter (Staff)

HEALTH SERVICES RESEARCH PROGRAM

Director: Mark Hlatky (Professor, Health Research and Policy, and Medicine)

Executive Committee: Laurence Baker (Assistant Professor, Health, Research and Policy), Alan Garber (Professor, Medicine), Mary Goldstein (Assistant Professor, Medicine), Mark Hlatky (Professor, Health Research and Policy, and Medicine), Douglas Owens (Associate Professor, Medicine)

Participating Departments and Faculty:
Economics: Thomas MacCurdy (Professor), Mark McClellan (Assistant Professor), Ann Royalty (Assistant Professor)
Business: Alain Enthoven (Professor), Daniel Kessler (Associate Professor)
Health Research and Policy: Laurence Baker (Assistant Professor), Paul Barnett (Consulting Assistant Professor), Byron W. Brown (Professor, emeritus), Victor Fuchs (Professor, emeritus), Mark Hlatky (Professor), Jennifer Kelsey (Professor), Philip Lavori (Professor, Research), Richard Olshen (Professor), Ciaran Phibbs (Consulting Assistant Professor), John Piette (Consulting Assistant Professor), Anita Stewart (Visiting Scholar), Robert Tibshirani (Professor)

Industrial Engineering and Engineering Management: Margaret Brandeau (Professor)

Law: Henry Greely (Professor)
Medicine: Alan Garber (Professor), Mary Goldstein (Assistant Professor), Douglas Owens (Associate Professor), Gillian Sanders (Assistant Professor, Research)

Graduate Program

MASTER OF SCIENCE

The Master’s Degree Program in Health Services Research seeks to train students in the quantitative analysis of issues in health and medical care. The program emphasizes an individually designed program of coursework and completion of a master’s project under the mentorship of a faculty member. The typical student in the program is either a physician who has completed residency training and is preparing for a research career, or a student with a strong background in policy analysis who wishes to focus on problems in health or medical care. Faculty in-
terests include outcomes research, health economics, health care organization, quality of care, decision analysis, clinical guidelines, and assessment of patient preferences and quality of life.

To receive the degree, students are expected to demonstrate knowledge of issues in health services research and the quantitative skills necessary for research in this area. Students must take at least 45 units of coursework (9 of the units may be double-counted to meet other degree requirements) and write a University thesis. The course work requirements are:

1. At least 8 units from the following group of Health Research and Policy (HRP) core courses: 256, Economics of Health; 391, Political Economy of Health Care; 392, Cost-Benefit Analysis in Health Care.

2. At least 6 units of graduate-level statistics courses. The sequence of Statistics 190, Introduction to Statistical Methods (Post-Calculus) for Social Scientists; and HRP 203, Intermediate Biostatistics, is strongly recommended. (Note: HRP 202 does not count toward the statistics requirement.)

3. At least 3 units of HRP 283, Core Seminar.

4. At least 15 units of HRP research credit from 299, Directed Reading; 399, Research.

5. An additional set of approved elective courses to complete the program total of at least 45 units.

6. A background in health sciences equivalent to Medical Information Sciences 205, Introduction to Clinical Environments.

For additional information, address inquiries to the Program Administrator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T150, Stanford, California 94305-5405.

**IMMUNOLOGY PROGRAM**

**Director:** Mark M. Davis (Professor of Microbiology and Immunology)

**Predoctoral Committee:** Mark M. Davis (Professor of Microbiology and Immunology), David B. Lewis (Associate Professor of Pediatrics), Olivia Martinez (Assistant Professor of Surgery/Transplantation), Irene Ruiz (student representative)

**Participating Departments and Faculty:**

**Biological Sciences:** Patricia J. Jones (Professor)

**Cardiovascular Surgery:** Carol Clayberger (Associate Professor, Research; and Pediatrics)

**Chemistry:** Harden M. McConnell (Professor)

**Genetics:** Leonard A. Herzenberg (Professor), Lenore A. Herzenberg (Professor, Research)

**Medicine/Bone Marrow Transplantation Program:** Robert Negrin (Associate Professor), Judith Shizuru (Assistant Professor)

**Medicine/Immunology and Rheumatology:** C. Garrison Fathman (Professor), Jane R. Parnes (Professor), Samuel Strober (Professor)

**Medicine/Oncology:** Gilbert Chu (Associate Professor, and Biochemistry), Ronald Levy (Professor), Shoshana Levy (Professor, Research)

**Microbiology and Immunology:** Yuch-Hsin Chien (Associate Professor), Mark M. Davis (Professor), Hugh O. McDavitt (Professor)

**Molecular and Cellular Physiology:** Richard S. Lewis (Associate Professor)

**Molecular Pharmacology:** Garry P. Nolan (Assistant Professor, and Microbiology and Immunology), Phyllis Gardner (Associate Professor, and Medical/Clinical Pharmacology, and Cardiovascular Medicine)

**Pathology:** Eugene C. Butcher (Professor), Michael Cleary (Professor), Gerald R. Crabtree (Professor, and Developmental Biology), Edgar G. Engleman (Professor, and Medical/Immunology, and Rheumatology), Joseph S. Lipsick (Professor), Sara Michie (Assistant Professor), Raymond A. Sobel (Associate Professor), Irving L. Weissman (Professor, and Developmental Biology)

**Pediatrics:** Alan M. Kremsky (Professor), David B. Lewis, (Associate Professor), Elizabeth Mellins (Associate Professor), Dale T. Umetu (Professor)

**Structural Biology:** Peter Parham (Professor, and Microbiology and Immunology)

**Surgery:** Sheri Krams (Assistant Professor, Research), Olivia Martinez (Assistant Professor, Research)

**GRADUATE PROGRAMS**

**MASTER OF SCIENCE**

Students in the Ph.D. program in Immunology may apply for an M.S. degree in Immunology, assuming completion of appropriate requirements. Students must complete:

1. Three full-tuition quarters of residency as a graduate student at Stanford.

2. At least 45 units of academic work, all of which must be in courses at or above the 100 level, 36 units of which must be at or above the 200 level.

3. Three quarters of graduate research (Immunology 300), consisting of rotations in the labs of three faculty members.

4. Course work in Immunology as follows: one course in basic immunology (Biology 230, Microbiology/Immunology 200 or equivalent); Advanced Immunology such as Immunology 200 and 201; Principles of Biological Technologies (Microbiology/Immunology 215); Cell Biology of Physiological Processes (Molecular and Cellular Physiology 221).

5. Graduate-level biochemistry and molecular biology (Biochemistry 200, 201, or equivalents).

6. Course work in Immunology 311 (Seminar in Immunology).

7. Participation in journal clubs, and attendance at the weekly Immunology seminar and at the annual Stanford Immunology Scientific Conference.

8. One written proposal and an exam before candidacy.

**DOCTOR OF PHILOSOPHY**

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The interdepartmental Immunology Program offers instruction and research opportunities leading to a Ph.D. in Immunology. The goal of the program is to develop young investigators who have a solid foundation in immunology as well as related sciences and who can carry out innovative research. The program features a flexible selection of courses and seminars to enrich the students' backgrounds, combined with extensive research training in the laboratories of the participating immunology faculty.

Students applying to the program typically have an undergraduate major in biological sciences, but majors in other areas are acceptable if the applicants have had sufficient course work in biology and chemistry. Formal application should be made by December 15. Applications are evaluated by the Immunology Predoctoral Committee based on scores on the GRE exams (including the subject test in either biology, biochemistry, or chemistry), which should be taken by the October test date; grades; evidence of prior research experience; letters of recommendation, including letters from research sponsor(s); and commitment to a career in biomedical research. Interested Stanford medical students are welcome to apply to the program; they should contact the program director.

Students admitted to the program are offered financial support covering tuition, a living stipend, insurance coverage, and an allowance for books/travel. Applicants are urged to apply for independent fellowships such as from the National Science Foundation and the Howard Hughes Medical Institute. Fellowship applications are due in November of the year prior to matriculation in the graduate program. Because of the small number of department-funded slots, students who have been awarded an
outside fellowship will have an improved chance of acceptance into the program.

On matriculation, each student is assisted in selecting courses and lab rotations in the first year and in choosing a lab for the dissertation research. Once a dissertation adviser has been selected, a dissertation committee including at least two Immunology faculty, including the dissertation adviser, is constituted to guide the student during the dissertation research. The student must meet with the dissertation committee at least once a year. Candidates for Ph.D. degrees at Stanford must satisfactorily complete a three-year program of study that includes 72 units of graduate course work and research and nine full-tuition quarters of residency. At least 3 units must be taken with each of four different Stanford faculty members.

The requirements for the Ph.D. degree in Immunology include the following:

1. Training in biology and cognate disciplines equivalent to that provided by the undergraduate Biology major at Stanford.

2. Completion of the following courses (or their equivalents from undergraduate work):
   a) Basic Immunology (Biology 230 or Microbiology and Immunology 200)
   b) Advanced Immunology (Immunology 201, 202)
   c) Biochemistry and molecular biology, graduate level (Biochemistry 200, 201)
   d) Cell Biology of Physiological Processes (Molecular and Cellular Physiology 221)
   e) Statistics (Biology 141 or Health Research and Policy 202)
   f) Principles of Biological Technologies (Microbiology/Immunology 215)

3. Students in their second year and above must participate in the Seminar in Immunology (Immunology 311); students who have not yet achieved TGR status must register for 1 unit. Students attend the weekly Immunology Seminar Series (5-6 p.m. Tuesdays). Students read the papers of and have dinner with visiting seminar speakers two or three times each quarter, and meet with a faculty member to discuss the material.

4. Elective courses as agreed upon by the student, adviser, and advisory committee. Electives may be chosen from graduate courses and seminars in any of the biomedical science departments and programs.

5. Completion in the first year of three one-quarter rotations of research in immunology labs.

6. Teaching assistantship in two immunology courses.

7. For admission to candidacy, completion of two requirements by the end of the second year: a comprehensive written examination in immunology and related biomedical sciences must be completed satisfactorily by the end of Autumn Quarter of the second year. Finally, students must prepare and defend a research proposal on their dissertation research by the end of the second year. Administration and evaluation of these requirements is the responsibility of the student's dissertation committee.

8. Participation (through regular attendance and oral presentation) in one of the faculty-sponsored immunology journal clubs for at least the first two years. Students are also expected to attend the graduate students' journal club, the Tuesday evening immunology seminars, and the annual Stanford Immunology Scientific Conference.

9. Passing of the University oral examination on the dissertation research, which is to be taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the candidate presents his/her research.

10. Completion of a Ph.D. dissertation, resulting from independent investigation and constituting a contribution to knowledge in the area of immunology.

COURSES

Course work and lab instruction in the Immunology Program conform to the Policy on the Use of Vertebrate Animals in Teaching Activities as stated in the back of this catalog.

201. Advanced Immunology—(Same as Microbiology and Immunology 211.) For graduate students and advanced undergraduates. Lecture/discussion featuring current problems in immunology. Topics: genetics and structure/function relationships of antibodies, T-cell receptors, MHC antigens; accessory molecules; lymphocyte differentiation and activation; cellular regulation of immune responses; autoimmunity and other problems in clinical immunology. Prerequisites: biochemistry, basic or introductory immunology course, consent of instructor (for undergraduates).

3 units, Win (Chien, Staff)

202. Advanced Immunology—(Same as Microbiology and Immunology 212.) Critical readings of the immunological literature and specific areas of immunology. Classic problems and emerging areas are covered based on primary literature. Student and faculty presentations. Prerequisite: 201.

3 units, Spr (Davis, Lipstick)

215. Principles of Biological Technologies—(Same as Microbiology and Immunology 215.) The principles underlying commonly utilized technical procedures in biological research. Lectures on gel electrophoresis, nucleic acid hybridization, protein purification and stabilization, light microscopy, and computer search algorithms for protein and nucleic acid databases. Prerequisites: biochemistry, organic chemistry, and physics.

2 units, Aut (Davis)

221. Cell Biology of Physiological Processes—(Same as Biological Sciences 214.) The basic mechanisms of membrane and cellular biogenesis in relation to physiological processes. Emphasis is on the regulatory and signaling mechanisms involved in coordinating complex cellular phenomena such as cellular organization, function, and differentiation. Topics: cellular compartmentalization, transport and trafficking of macromolecules, organelle biogenesis, cell division, motility and adhesion, and multicellularity. Prerequisites: Biology core, Biochemistry 201.

5 units, Win (Kopito, W. Nelson)

290. Teaching of Immunology—Practical experience in teaching by serving as a teaching assistant in an immunology course.

(Staff)

300. Research—Research for graduate students in the Ph.D. program in Immunology.

1-15 units (Staff)

311. Seminar in Immunology—Enrollment limited to graduate students (second-year and above) in the Ph.D. Program in Immunology. Current research topics in immunology. Students read and discuss papers of speakers in the Immunology Seminar Series and meet with the speakers to discuss their research.

1 unit, Aut, Win, Spr (Staff)

Special Topics in Immunology—Graduate student initiated, in journal club style. Previous topics included evolutionary immunology and the principles of vaccine development.

1 unit (Staff)

MEDICAL INFORMATION SCIENCES PROGRAM

Committee: (Chair and Program Director) Edward H. Shortliffe; (Co-Director) Lawrence M. Fagan; Russ B. Altman, Douglas L. Brutlag, Parvati Dev, Alan M. Garber, Mark A. Musen, Yuval Shahar, Gio Wiederhold

Participating Faculty by Department:

Opportunities for research are not limited to the specific faculty and departments listed.
Anesthesia: David M. Gaba (Associate Professor)  
Biochemistry: Douglas L. Brutlag (Professor)  
Biostatistics: Byron W. Brown, Jr. (emeritus Professor), Richard A. Olshen (Professor)  
Business: Alain C. Enthoven (Professor)  
Computer Science: Russ B. Altman (Associate Professor, by courtesy),  
   Thomas O. Binford (Professor, Research), Edward A. Feigenbaum (Professor), Richard E. Fikes (Professor, Research), Michael R. Genesereth (Associate Professor), John Hennessy (Professor), Daphne Koller (Assistant Professor), John Koza (Consulting Professor), Joshua Lederberg (Consulting Professor), Marc Levoy (Associate Professor), Mark A. Musen (Associate Professor, by courtesy), Yuval Shahar (Assistant Professor, Research, by courtesy), Edward H. Shortliffe (Professor, by courtesy), Giao Wiederhold (Professor), Terry Winograd (Professor)  
Economics: Victor R. Fuchs (emeritus Professor), Alan M. Garber (Professor, by courtesy)  
Education: Lee S. Shulman (Professor)  
Electrical Engineering: Marc Levoy (Associate Professor), Albert Mackovski (emeritus Professor), Giao Wiederhold (Professor, Research, by courtesy)  
Engineering-Economic Systems and Operations Research: Samuel Holtzman (Consulting Associate Professor), Ronald A. Howard (Professor), Ross D. Shachter (Associate Professor)  
Genetics: David Botstein (Professor), Stanley N. Cohen (Professor), Richard M. Myers (Professor)  
Health Research and Policy: Byron W. Brown, Jr. (Professor), Alan M. Garber (Professor, by courtesy), Mark A. Hlatky (Professor), Richard A. Olshen (Professor), Douglas K. Owens (Associate Professor)  
Mathematics: Samuel Karlin (emeritus Professor)  
Medicine: Russ B. Altman (Associate Professor), Terrance Blaschke (Professor), Robert W. Carlson (Professor), Parvati Dev (Senior Research Scientist), Lawrence M. Fagan (Senior Research Scientist), James F. Fries (Professor), Alan M. Garber (Professor), Mary Goldstein (Assistant Professor), Peter D. Karp (Consulting Assistant Professor), John Koza (Consulting Professor), Mark A. Musen (Associate Professor), Douglas K. Owens (Associate Professor), Glenn Rennels (Consulting Assistant Professor), Thomas C. Rindfleisch (Senior Research Scientist), Gillian Sanders (Assistant Professor, Research), Yuval Shahar (Assistant Professor, Research), Edward H. Shortliffe (Professor), Michael Walker (Consulting Assistant Professor)  
Neurosurgery: John R. Adler (Professor), Ramin Shahidi (Assistant Professor, Research)  
Obstetrics and Gynecology: Emmet J. Lamb (emeritus Professor)  
Pathology: Howard H. Sussman (Professor)  
Radiation Oncology: Arthur L. Boyer (Professor), Lei Xing (Assistant Professor, Research)  
Radiology: Gary M. Glazer (Professor), Gary H. Glover (Professor), Sandy A. Napel (Associate Professor), Norbert J. Pelc (Professor), Geoffrey Rubin (Assistant Professor)  
Statistics: Trevor J. Hastie (Associate Professor), Jun Liu (Assistant Professor)  
Structural Biology: Michael Levitt (Professor)  
Surgery: Charles Taylor (Assistant Professor, Research)  

This interdisciplinary program was created in response to a recognized need for well-trained researchers and academic leaders in the expanding field of medical information sciences (medical informatics).

Stanford University's extensive computing facilities are described in the "Computer Science" section of this bulletin. In addition, the Medical Information Sciences Program has a network of personal computers, workstations, and servers running the Unix, Windows NT, Windows 95 and Macintosh operating systems. These machines are available for course work and research projects by trainees in the program.

GRADE CURRICULUM

All students are expected to participate regularly in the Medical Informatics Student Seminar (201) and Colloquia (200), regardless of whether they register for credit in those courses. In addition, all students are expected to fulfill requirements in the following five categories:

1. Medical Informatics (15 units): students are expected to understand current applications of computers in medicine and to develop a broad appreciation for research in the management of biomedical information. Required courses are the two-quarter sequence MIS 210A and 210B (Introduction to Medical Informatics), plus 212 (Project Course), all of which should be taken during the first year in the program. First-year students are required to take MIS 302 throughout the year, and second-year students are required to take 303, regardless of whether they choose to register for credit. Students must also take an additional 6 units of MIS course work (which may include cross-listed courses from other departments, but not including MIS 200, 201, 299, 302, or 303), selected in consultation with the academic advisor.

2. Computer Science (9 units): the student is expected to acquire a knowledge of the use of computers, computer organization, programming, and symbolic systems. It is assumed that students have had prior computing experience at least equivalent to Computer Science (CS) 109 and 150. All students are required to take a minimum of 9 units of courses in the Department of Computer Science. If similar courses have not been taken previously, these units must include CS 121, 161, and a course that requires significant programming and knowledge of machine architectures (for example, Electrical Engineering 182, CS 110, or the CS 193 series). For those who have taken such courses previously, replacement units may be taken from any other course in CS selected by the student and approved by the academic advisor. A course in databases is especially recommended. With the exception of CS 110, all other courses applied to the degree requirements must be numbered 137 or higher.

3. Decision Science and Statistics (9 units): students are required to take at least three courses that span the following five topics: basic probability theory, Bayesian statistics, decision analysis, cost-effectiveness analysis, and experimental-design techniques. Prior courses in
biomedical or applied projects in medical informatics.

4. Teaching: all students are expected to act as Teaching Assistants (TAs) for at least one course during their first two years of training. Graduates of this program are prepared to contribute creatively to the biomedical and engineering fields of endeavor. The first year involves acquiring the fundamental topics selected and the previous training of the student. The varying backgrounds of students are well recognized and no one is required to take substitutions, should be chosen in consultation with the student's academic adviser. Also recommended is a course in the psychology of human problem solving (for example, Psychology 256).

4. Biomedical Domain Knowledge (7 units): students are expected to acquire a basic understanding of pertinent life sciences and how to analyze a domain of application interest. Prior courses in biology at least equivalent to Biological Sciences 31 and 32 are prerequisites. Required is MIS 205 and at least one of the following: MIS 204, 6 units of the Clinical Physiology series (Physiology 200-204), Human Biology 112, Biochemistry 200 and 203, or Surgery 101 (Human Structure). At least one additional course in the human domain of the student's application interest is also required.

5. Social and Ethical Issues (6 units): candidates are expected to be familiar with key issues regarding ethics, public policy, financing, organizational behavior, management, and pertinent legal topics. Students may select at least 6 units from suitable courses that include MIS 250, 256, 432 and 250; CS 201; Health Research and Policy 390, 391, and 392, or any other advanced course in policy and social issues proposed by the student and approved by the MIS academic adviser.

The core curriculum generally entails a minimum of 46 units of course work, but can require substantially more or less depending upon the courses selected and the previous training of the student. The varying backgrounds of students are well recognized and no one is required to take courses in an area in which he or she has already been adequately trained; under such circumstances, students are permitted to skip courses or substitute more advanced work. Students design appropriate programs for their interests with the assistance and approval of their MIS academic adviser.

MASTER OF SCIENCE

The University requirements for the M.S. degree are described in the “Graduate Degrees” section of this bulletin.

This degree is designed for individuals who wish to undertake in-depth study of medical informatics. Normally, a student spends two years in the program and will implement and document a substantial project during the second year. The first year involves acquiring the fundamental concepts and tools through course work and research project involvement. Graduates of this program are prepared to contribute creatively to basic or applied projects in medical informatics.

PROGRAM REQUIREMENTS

Programs of at least 54 units that meet the following guidelines are normally approved:

1. Completion of the core curriculum.
2. A minimum of 6 additional units of courses in Computer Science numbered 135 or higher, courses in Engineering-Economic Systems and Operations Research or Statistics numbered 200 or higher, Psychology 256 or 267, or relevant courses in other departments approved by the student’s academic adviser.
3. Electives: additional courses to bring the total to 54 or more units.
4. Teaching: all students are expected to act as Teaching Assistants (TAs) for at least one course during their first two years of training. This will generally be Medicine 292 (the medical informatics short course), although another course approved by the program faculty may occasionally be substituted.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the doctorate (residence, dissertation, examination, and so on) are discussed in the “Graduate Degrees” section of this bulletin.

Individuals wishing to prepare themselves for careers as independent researchers in medical informatics, with applications experience in bioinformatics, clinical informatics, or imaging informatics, should apply for admission to the doctoral program. The following are additional requirements imposed by the MIS Interdisciplinary Committee:

1. A student should plan and successfully complete a coherent program of study including the core curriculum, oral examination, and additional requirements for the master’s program. In addition, doctoral candidates are expected to take MIS 211 and to complete at least one more advanced course (see categories under item 2 of the master’s program requirements). The master’s requirements, including the oral examination, should be completed by the end of the second year in the program (six quarters of study, excluding summers). Doctoral students are generally advanced to Ph.D. candidacy after completing the oral examination. A student’s academic adviser has primary responsibility for the adequacy of the program, which is regularly reviewed by the Graduate Study Committee of the MIS program.

2. To remain in the Ph.D. program, each student must attain a grade point average (GPA) as outlined in the master’s programs above, and must pass a comprehensive exam covering introductory level graduate material in any curriculum category in which he or she fails to attain a GPA of 3.0. The student must fulfill these requirements and apply for admission to candidacy for the Ph.D. by the end of six quarters of study (excluding summers). In addition, reasonable progress in the student’s research activities is expected of all doctoral candidates.

3. During the third year of training, generally in the Winter Quarter, each doctoral student is required to give a preproposal seminar that describes evolving research plans and allows program faculty to assure that the student is making good progress toward the definition of a doctoral dissertation topic. By the end of nine quarters (excluding summers), each student must orally present a thesis proposal to a dissertation committee that generally includes at least one member of the Graduate Study Committee of the MIS program. The committee determines whether the student’s general knowledge of the field, and the details of the planned thesis, are sufficient to justify proceeding with the dissertation.

4. As part of the training for the Ph.D., each student is required to complete 2 units of teaching assistant service in MIS courses, 1 unit (10 hours per week for one quarter) being required during the first two years as evidence of satisfactory progress toward the degree.

5. The most important requirement for the Ph.D. degree is the dissertation. Prior to the oral dissertation proposal and defense, each student must secure the agreement of a member of the program faculty to act as dissertation adviser. The principal adviser need not be an active member of the MIS program faculty, but all committee members should include at least one member of the MIS faculty.

6. No oral examination is required upon completion of the dissertation. The oral defense of the dissertation proposal satisfies the University oral examination requirement.

7. The student is expected to demonstrate an ability to present scholarly material orally and present his or her research in a lecture at a formal seminar.

8. The student is expected to demonstrate an ability to present scholarly material in concise written form. Each student is required to write a paper suitable for publication, usually discussing his or her doctoral research project. Each paper must be approved by the student’s academic adviser as suitable for submission to a refereed journal before the doctoral degree is conferred.

9. The dissertation must be accepted by a reading committee composed of the principal dissertation adviser, a member of the program faculty, and a third member chosen from anywhere within the University. The principal adviser and at least one of the other committee members must be Academic Council members.
VISITING SCHOLAR (SPECIAL PROGRAM)

This one-year program is designed as postdoctorial training for individuals with established research credentials and accomplishments who may wish to acquaint themselves broadly with the field of medical information sciences, emphasizing formal course work and an optional year-long research project. Candidates are permitted to complete the program in no less than four quarters. In general, one position is available in each academic year. Students in this program are drawn from applicants with doctoral degrees in computer science, decision theory, medicine, or related fields; for example, an academic physician on sabbatical might wish to undertake this program of study. Trainees do not undertake research projects. Individuals interested in pursuing this program complement their area of primary academic or research activity by providing them with a heightened ability to work effectively in collaborative research projects. Individuals interested in pursuing this program should contact the program administrator for information regarding the application procedures and schedule.

COURSES

200. Medical Informatics Colloquium—Series of colloquia offered by program faculty, students, and occasional guest lecturers. Credit available only to students in an MIS degree program. (May be taken no more than three times for credit.)
1 unit, Aut, Win, Spr

201. Medical Informatics Student Seminar—For all students and faculty. Participants report on recent relevant articles from the MIS literature or their research projects. The ongoing experience, with feedback from faculty, is intended to teach presentation skills to MIS trainees. Credit available only to students in an MIS degree program. (May be taken no more than three times for credit.)
1 unit, Aut, Win, Spr

202. Clinical Diagnosis—Open only to students in an MIS degree program. Designed for learning the techniques of interviewing and symptom analysis through the study of a variety of common and well-defined clinical entities, and by role-playing in a problem-solving setting. See instructor.
2 units

204. Physiology for Informatics—Seminar. System by system review of physiology, emphasizing important physiological concepts and systems for information technology. Topics: basic molecular biology, cellular physiology, and coverage of basic physiological systems (nervous, cardiovascular, renal, immune, pulmonary, gastrointestinal, and endocrine). Applications of biomedical information technology in each area. Enrollment limited. Prerequisite: consent of instructor.
3-5 units, any quarter (Altman)

205. Introduction to Biomedical Environments—Open only to students in an MIS or Health Services Research degree program who are not enrolled in the M.D. program and do not have an M.D. degree. Background introduction to the sites to be visited; selected faculty introduce a variety of settings at Stanford Medical Center and the Veterans Affairs Medical Center: the medical wards, radiology, molecular biology research laboratories, outpatient clinics, emergency room, operating room, intensive care unit, psychiatry ward, and clinical lab. See instructor.
1 unit, any quarter (Shortliffe)

210A. Introduction to Medical Informatics: Fundamental Methods—(Same Computer Science 270A.) Issues in the modeling, design, and implementation of computational systems for use in biomedicine. Topics: controlled terminologies in medicine and biological science, ontologies, fundamental algorithms, basic knowledge representation, information dissemination and retrieval. Emphasis is on the principles of modeling data and knowledge in biomedicine and on the translation of resulting models into useful automated systems.
3 units, Aut (Musen, Altman)

210B. Introduction to Medical Informatics: Systems and Requirements—(Same as Computer Science 270B.) Continuation of 210A. Survey of the major application areas in medical informatics, including clinical information systems, imaging systems, bioinformatics, public policy, decision support, and signal processing. Emphasis is on the system requirements, relevant data, algorithms, and implementation issues in each area. Prerequisite: 270A.
3 units, Win (Shortliffe, Shahar, Dev)

211. Decision Making Methods for Biomedicine—(Same as Computer Science 271.) For undergraduates or graduate students. Builds on 210B. Intermediate biomedical decision making and survey of the methods for the implementation of such concepts in computer based decision-support tools. Emphasis is on Bayesian statistics, decision analysis, cost-effectiveness analysis, technology assessment, neural networks, artificial intelligence/expert systems, belief networks, influence diagrams, and the synergies among such approaches. Prerequisites: 210B and at least one programming course.
3 units, Win (Higgins, Garber, Owens, Sanders, Shortliffe)

212. Medical Informatics Project Course—(Same as Computer Science 272.) For students who have completed 210, 211, or 214, and who wish to implement those ideas in a computer program. Students may take 214 concurrently and complete a project that is coordinated between the two courses. Prerequisites: programming experience, 210B.
3 units, Spr (Koza, Shahar)

214. Representations and Algorithms for Computational Molecular Biology—(Same as Computer Science 274.) Introduction to the basic computational issues and methods used in the field of bioinformatics, including access and use of biological data sources on the Internet. Topics: basic algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, computing with networks of genes, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of diverse data sources, knowledge representation and controlled terminologies for molecular biology, graphical display of biological data, genetic algorithms and genetic programming applied to biological problems. See instructor for unit options. Prerequisites: programming skills and understanding of matrix algebra.
1-4 units, Spr (Altman, Koza)

1 unit, Spr (Altman, Koza)

226. Genetic Algorithms and Genetic Programming—(Same as Computer Science 426.) The genetic algorithm is a domain-independent algorithm for search, optimization, and machine learning patterned after Darwinian natural selection and naturally occurring genetic operators such as recombination, mutation, gene duplication, gene deletion, gene regulation, and embryonic development. Genetic programming is a domain-independent automatic programming technique that extends the genetic algorithm to the breeding of populations of computer programs. Topics: introduction to genetic algorithms and genetic programming; mathematical basis for genetic algorithms; implementation on parallel computers and field-programmable gate arrays; evolution of machine language programs; applications to problems of system identification, control, classification, analysis of genome and protein sequences, and automatic synthesis of the design of topology, sizing, placement, and routing of analog electrical circuits.
3 units, Win (Shachter)

3 units, Win (Shachter)
230. Seminar on Knowledge Acquisition for Expert Systems—For graduate students. Discussion of experimental approaches to the construction of expert-system knowledge bases. Topics: interviewing techniques, formal and informal approaches to modeling expert knowledge, and automated tools that facilitate knowledge acquisition. Enrollment limited to 20. Prerequisite: one course in artificial intelligence.
2 units (Musen) given 2000-01

231. Computational Molecular Biology—(Same as Biochemistry 231.) For molecular biologists and computer scientists desiring a practical, hands-on approach to computational molecular biology; recommended for molecular biologists and computer scientists desiring to understand the major issues concerning representation and analysis of biological sequences and structure. Existing methods critically described with the strengths and limitations of each. Future directions for development of new methods. Practical assignments utilizing the tools described. Topics: accessing molecular databases, pattern search, classification of sequence and structure, alignment of sequences, rapid similarity searching, phylogenies, automated pattern learning, representing protein structure, modeling protein structure by homology, protein-protein docking and protein-ligand docking. Final project utilizes or analyzes the methods presented. Lecture/lab. Enrollment limited to 40. Prerequisite: introductory molecular biology at the level of Biological Sciences 52 or consent of instructor. Recommended: 210.
3 units, Aut (Bruagl)

232. Seminar on Temporal Reasoning and Planning in Biomedicine—For graduate students. Topics: reasoning about time-oriented biomedical data; abstraction of meaningful concepts from time-stamped data; temporal-pattern matching; temporal databases; representation, execution, and quality assessment of therapy guidelines and other skeletal plans; acquisition of planning and temporal-reasoning knowledge. Enrollment limited to 20. Prerequisite: one course in artificial intelligence.
2 units, Aut (Shahar) alternate years, not given 2000-01

3 units, Spr (Tibshirani)

239. Computer-Based Medical Education—Directed reading and research for graduate-level students in the use of modern hypermedia techniques in education. Possible topics: replacement of a lecture or a lab session, primary learning material (an electronic book), review material (question banks), and clinical cases from simulations to simulations.
1-6 units, any quarter (Dev)

250. The U.S. Health Care System and Health Policy—(Enroll in Health Research and Policy 205.)
2 units, Win (Baker, Hlatky)

256. Economics of Health and Medical Care—(Same as Economics 156/256, Health Research and Policy 256.) Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: Economics 51 or consent of instructor. Recommended: some background in statistics or mathematics.
5 units, Win (McClellan)

278. Reasoning under Uncertainty—(Enroll in Computer Science 228.)
3 units, Win (Koller)

299. Directed Reading and Research—For students wishing to receive credit for directed reading or research time.
any quarter

301. Special Topics in Medical Informatics
1-6 units, any quarter (Staff)

302. Introduction to Current Research—Survey of Stanford-based research in medical informatics, with weekly seminars led by faculty and senior researchers. Prerequisite: MIS degree candidacy or consent of instructor.
1 unit, Aut, Win, Spr (Staff)

303. History of Medical Informatics—Weekly seminar series that surveys key papers and investigators in the field of medical informatics, led by Medical Information Sciences faculty. Prerequisite: MIS degree candidacy or consent of instructor.
1 unit, Aut, Win, Spr (Staff)

315. Topics in Image Informatics—In-depth study of selected active research topics in image informatics, chosen from: scientific and medical visualization, interfaces, virtual environments, relationship to knowledge representations, media databases, data mining in media databases, standards for storage and transmission. Readings from the literature, presentations, and a project. Prerequisites: programming experience in any of C, C++, Java, Matlab, and some prior exposure to graphics or image processing.
3 units, Spr (Dev)

328. Protein and Nucleic Acid Structure, Dynamics, and Engineering—(Enroll in Structural Biology 228.)
3 units, Win (Levitt)

432. Cost-Benefit Analysis in Health Care—(Same as Business E332, Health Research and Policy 392.) How do you do cost-benefit analysis when the “output” is difficult or impossible to measure? How do the MBA analytic tools apply in health services? Study/discussion of the main literature on the principles of cost-benefit analysis as applied to health care. Critical review of actual case studies. Emphasis is on the art of practical application.
4 units, Aut (Garber, Owens, Singer)

MICROBIOLOGY AND IMMUNOLOGY

Emeritus: (Professors) Sidney Raffel, Leon T. Rosenberg, John P. Stew ard, Bruce A. D. Stocker; (Professor (Research) Esther M. Leder ard, Bruce A. D. Stocker*

Professors: (Microbiology and Immunology, Pediatrics), John C. Boothroyd, Mark M. Davis, Stanley Palkow, Stephen J. Gal li, Harry B. Greenberg (Microbiology and Immunology, Medicine), A. C. Matin, Hugh O. McDevitt, Edward S. Mocarski, Peter Parham (Microbiology and Immunology, Structural Biology), Charles Prober (Microbiology and Immunology, Pediatrics), Peter Sarnow, Gary K. Schoolnik (Microbiology and Immunology, Medicine), Lucy S. Tompkins (Microbiology and Immunology, Medicine)

Associate Professors: Yueh-hsiu Chien, Haldar Katsuri, Karla Kirkegaard

Associate Professor (Teaching): Robert D. Siegel
Assistant Professors: Christopher Contag (by courtesy, Pediatrics), Christopher Garcia, Peter Jackson (Microbiology and Immunology,
under special circumstances. Candidates for master's degrees are expected to have completed the preliminary requirements for the B.S. degree, or the equivalent. In addition, the candidate is expected to complete 45 quarter units of work related to microbiology; at least 25 of these units should concern research devoted to a thesis. The thesis must be approved by at least two members of the department faculty.

**GRADUATE PROGRAMS**

**MASTER OF SCIENCE**

A regular M.S. program is not offered, although this degree is awarded under special circumstances. Candidates for master’s degrees are expected to have completed the preliminary requirements for the B.S. degree, or the equivalent. In addition, the candidate is expected to complete 45 quarter units of work related to microbiology; at least 25 of these units should concern research devoted to a thesis. The thesis must be approved by at least two members of the department faculty.

**DOCTOR OF PHILOSOPHY**

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

**Application, Admission, and Financial Aid**—Prospective Ph.D. candidates should have completed a bachelor’s degree in a discipline of biology or chemistry, including course work in biochemistry, chemistry, genetics, immunology, microbiology, and molecular biology. The deadline for receipt of applications with all supporting materials is December 15.

Applicants must file a report of scores on the general subject tests and on an advanced test (normally in cellular and molecular biology, chemistry, or biochemistry) of the Graduate Record Examination (GRE). It is strongly recommended that the GRE be taken before October so that scores are available when applications are evaluated.

In the absence of independent fellowship support, entering predoctoral students are fully supported with a stipend and tuition award. Highly qualified applicants may be honored by a nomination for a Stanford fellowship. Successful applicants have been competitive for predoctoral fellowships such as those from the National Science Foundation and Howard Hughes Medical Institute.

**Program for Graduate Study**—The Ph.D. degree requires course work and independent research demonstrating an individual’s creative, scholarly, and intellectual abilities. On entering the department, students meet an advisory faculty member and together they design a timetable for completion of the degree requirements. Typically, this consists of first identifying gaps in the student’s undergraduate education and determining courses that should be taken. Then, a tentative plan is made for two to four lab rotations (one rotation per quarter). During the first year of graduate study in the department, each student also takes six or seven upper-level (200-series) courses. Three of these courses, Principles of Biotechnologies, Pathogenesis of Bacteria, Viruses and Eukaryotic Parasites, are specific requirements of this department, and one is usually Immunology. Three courses, Advanced Genetics, Biochemistry, and Cell Biology, are part of the "core curriculum" that is required of many graduate students in Stanford Biosciences.

In Winter Quarter of the second year, each student defends orally a formal research proposal on a topic outside the intended thesis project. The outline of this proposal is due to the Graduate Program Steering Committee by January 30th. Based on successful performance on this proposal, the student is admitted to candidacy. In the Autumn Quarter of the third year, a research proposal based on the student’s own thesis topic is defended by his or her thesis committee. Teaching experience and training are also part of the graduate curriculum. All graduate students are required to act as teaching assistants for two quarters. In addition, first- and second-year graduate students are required to participate in a biweekly journal club.

**COURSES**

25N. Stanford Introductory Seminar: Modern Plagues—Preference to freshmen. The molecular and medical aspects of several new and old microorganisms that infect humans. Goal: to place modern human plagues in scientific and historical perspective and to provide an introduction to the fields of molecular biology and microbiology.

2 units, Aut, Win, Spr (Boothroyd, Falkow, Kirkegaard)

26Q. Stanford Introductory Seminar: The Threat of Emerging Antibiotic Resistance and What We can do About It—Preference to sophomores. Resistance of bacteria to antibiotics has reached alarming proportions. From the 1930s to the early '70s, discovery of several classes of highly effective antimicrobial agents enabled us to nearly eliminate the threat of bacterial disease. But this situation is drastically changed as a result of wide-spread antibiotic resistance in bacteria. The seminar deals with causes and potential solutions.

3-5 units, Spr (Matin)

115A. Humans and Viruses—(Same as Human Biology 115A.) Upper division undergraduate, illustrating important concepts in biology and the social sciences, and focusing on emerging infections, viral classification, transmission and prevention, vaccination and treatment, eradication of disease, viral pathogenesis, mechanisms of virally induced cancer, and viral evolution. Sample topics: the molecular biology of genetic shift and drift in influenza virus, cellular tropism of HIV, developmental biology of virally induced birth defects, clinical aspects of infantile diarrhea, social aspects of the common cold, policy issues of blood antibody tests, and factors in pathogenesis and transmission of prions. Prerequisites: Human Biology core, or consent of instructor.

4 or 6 units, Win (Siegel)

115B. Seminar: The Vaccine Revolution—(Same as Human Biology 115B.) Advanced undergraduate. The human aspects of viral disease focusing on recent discoveries, especially in the area of vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize it into a detailed literature review on a specific topic. Emphasis is on the development of critical reading, analysis, experimental design, and interpretation of data. Students give four oral presentations and lead discussions based on their scientific journal reading. Enrollment limited to 10. Prerequisites: 115A, consent of instructor.

5 units, Spr (Siegel)

185. Topics in Microbiology—Introduction to microbiology for undergraduates: diversity, molecular regulation, growth, bioenergetics, and unique metabolic processes. Prerequisites: Chemistry 31, 33, 35. Recommended: Biological Sciences 31.

3 units, Win (Matin, Staff)

198A-F. Undergraduate Directed Reading—Prerequisite: consent of instructor.

15 units maximum, any quarter (Staff)

199. Undergraduate Research—Individual study or research in microbiology or immunology by arrangement with a faculty member. Possible fields: microbial molecular biology and physiology, microbial pathogenicity, immunology, virology, and molecular parasitology. Prerequisites: appropriate backgrounds for various areas, consent of instructors.

1-15 units, any quarter (Staff)

200. Immunology for Medical Students—Introduces the basic concepts of immunology and the role of the immune system in a wide variety of diseases, utilizing case presentations of diseases in which the immune
system plays a major role (autoimmune diseases, infectious disease, transplantation, immunodeficiency diseases, hypersensitivity reactions, and allergic diseases). Basic concepts of the development and function of the immune system are integrated with case material to illustrate how the immune system causes and prevents a variety of endocrine, renal, dermatologic, neurologic, and musculoskeletal diseases, and how organ and tissue transplantation can be used to restore normal function following destruction of particular organs or tissues by immune or other mechanisms.

3 units, Win (McDevitt, Weissman)

200A. Problem Solving in Immunology—Optional, complements 200. Weekly problem sets based, wherever possible, on case reports and publications drawn from the clinical literature concerning the topics covered in lectures and case presentations during the week. Emphasis is on application of the fundamental concepts of immunology to the clinical problems under consideration.

1 unit, Win (McDevitt, Weissman)

201. Infections Basis of Disease—Presentation of the spectrum of human illness induced by viruses, bacteria, fungi, and medical parasitic, including protozoans and helminths. Classification, epidemiology, transmission, pathogenesis, diagnosis, treatment, control, vaccination, and other preventive measures. Emphasis is on the syndromic approach to disease. Lectures, demonstrations, lab sessions, and small group evaluation of clinical correlates. Use of interactive multimedia instructional program, MICROBE, CWP, and labs. Prerequisite: medical student status.

9 units, Aut (Siegel, Staff)

203. Biological Stress Response—In-depth coverage of current literature, with student participation. Possible topics: the nature and molecular regulation of the stress response; biochemistry and structural biology of molecular chaperones; the role of stress proteins in the pathogenic process; psychoneuroendocrinology; multidrug resistance. Enrollment limited. Prerequisites: Biology Core, upper-division course in molecular biology/genetics or biochemistry.

3 units, Spr (Matin, Staff) alternate years, given 1999-2000

3 units, Spr (Mocarski, Kirkegaard, Sarnow)

1 unit, Spr (Staff)

210. Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites—For graduate, medical, and advanced undergraduate students. Required of first-year graduate students in Microbiology and Immunology. Emphasis is on understanding the molecular mechanisms by which microorganisms invade animal and human hosts, express their genomes, interact with macromolecular pathways in the infected host, and induce disease. Problem sets and recent literature pertaining to microbial pathogenesis. Prerequisite: understanding of biochemistry and molecular biology.

4 units, Spr (Sarnow, Boothroyd, Kirkegaard, Mocarski, Relman)

211, 212. Advanced Immunology—(Same as Immunology 201, 202.) For graduate students and advanced undergraduates. Lecture/discussion featuring current problems in immunology. Topics: genetics and the structure/function relationships of antibodies, T-cell receptors, MHC antigens; accessory molecules; lymphocyte differentiation and activation; cellular regulation of immune responses; autoimmunity and other problems in clinical immunology. Prerequisites: biochemistry, basic immunology, consent of instructor (for undergraduates).

211. 3 units, Win (Chien, Staff)

212. Prerequisite: 211.

3 units, Spr (Staff)

215. Principles of Biological Technologies—(Same as Immunology 215.) Required of first-year graduate students in Microbiology and Immunology. The principles underlying commonly utilized technical procedures in biological research. Lectures on gel electrophoresis, nucleic acid hybridization, protein purification and stabilization, light microscopy and computer search algorithms for protein and nucleic acid databases. Prerequisites: biochemistry, organic chemistry, and physics.

2 units, Aut (Davis)

459. Frontiers in Interdisciplinary Biosciences—Literature/discussion on how to critically evaluate the cutting edge of current research. Held in conjunction with a seminar series, occurring once per month for 1999-2000, and more frequently thereafter. Leading investigators in interdisciplinary research from Stanford and from throughout the world will present his or her work in a particular area. Before the seminar, students and faculty read and critically discuss one or more papers from the primary research literature on a related topic. After the seminar, students meet informally with the speakers to discuss the research and future directions. Emphasis is on how to read papers in the primary research literature, and familiarization with the broad set of techniques and approaches used to study problems in the biosciences.

1 unit, Aut, Win, Spr (Spudich, Robertson, Chu, Mobley)

MOLECULAR AND CELLULAR PHYSIOLOGY

Emeriti: (Professor) Julian M. Davidson

Chair: W. James Nelson

Associate Professors: Brian K. Koblika, Richard S. Lewis, V. Daniel Madison, Thomas L. Schwarz

Assistant Professor: Richard S. Lewis

Courtesy Professor: Jeffrey J. Wine

Courtesy Associate Professors: Anson W. Lowe, William Weis

The Department of Molecular and Cellular Physiology is located in the Beckman Center for Molecular and Genetic Medicine.

The creation and growth of the department is a reflection of the rapid development of the field of cellular signaling as it relates to intracellular, and interorgan communication. The faculty have common interests in cellular signaling, with a special focus on molecular mechanisms controlling: synaptic transmission and memory; regulation of vesicle trafficking and targeting in neurons and epithelia; structure/function analysis of G protein coupled receptors, potassium and calcium channels; calcium signaling in activated T lymphocytes; cell-cell interactions in epithelia and neuromuscular junctions; and structural and functional polarity in neurons and epithelia. The research programs draw on a wide range of techniques including biochemistry, cell biology, electrophys-
ology, imaging with light or electron microscopy, and molecular genetics. The department teaches physiology to medical and graduate students.

**GRADUATE PROGRAMS**

The department offers required and elective courses for students in the School of Medicine and is also open to other qualified students with the consent of the instructor. Training of medical, graduate, and postdoctoral students is available. The program offers a course of study leading to the Ph.D. degree. No B.S. is offered, and an M.S. is offered only in unusual circumstances where a student completes the course work, rota- and, the written section of the qualifying exam, but is unable to complete the requirements for the Ph.D.

**DOCTOR OF PHILOSOPHY**

Students with undergraduate or master’s degrees who have completed a year each of college chemistry (including lectures in organic and physical chemistry), physics, calculus, and biology are considered for admission to graduate study. Applicants submit a report of scores from the Graduate Record Examination (verbal, quantitative, analytical, and an advanced subject test in one of the sciences) as part of the application.

Students who do not speak English as their native language must submit scores from TOEFL unless waived by Graduate Admissions, the Registrar’s Office.

Study toward the Ph.D. is expected to occupy five years, including summers. A minimum of seven quarter-long courses are required. Students must take Molecular Cellular Physiology 210, and a choice of two out of these three: Neurobiology 200, Biochemistry 200-201, or Molecular and Cellular Physiology 221. Students are also required to take the Molecular and Cellular Physiology seminar series. At least three of the student’s courses must be more focused, advanced, graduate-level courses in areas such as molecular and cellular physiology, cellular signaling, cell biology, or pharmacology. Each student presents a journal club to the department at least every other year, starting their second year. Acceptable grades for all course work must be a minimum of “B-,” and at least two grades equal to “A-” or above are necessary (but not sufficient) for continuation in the program.

**Qualifying Examination**—At the end of the second year in residence as a graduate student, each Ph.D. candidate presents a written thesis proposal to be defended at an oral comprehensive examination. General knowledge of relevant physiology is also tested orally at a separate examination. The examinations may be taken only after all course work has been completed by the required standard. Students undertake individual research studies as early as possible after consultation with their preceptor. Upon passing this exam, the student is advanced to candidacy for the Ph.D.

**Dissertation and University Oral Examination**—The results of independent, original work by the students are presented in a dissertation. The oral examination is largely a defense of the dissertation.

**Advisers and Advisory Committees**—A graduate advisory committee, currently Professors Madison, Schwarz, and Smith, advises students during the period before the formation of their qualifying committees.

**Financial Aid**—Students may be funded by their adviser’s research grants, faculty research, or by extramural funds. Students are encouraged to obtain funding from outside sources (for example, NIH, NSF, Hughes, and so on).

**COURSES**

Course work and laboratory instruction in the Department of Molecular and Cellular Physiology conform to the Policy on the Use of Vertebrate Animals in Teaching Activities as stated in the back of this catalog.

199. Undergraduate Research—Investigation sponsored by individual faculty members, available to undergraduates, hours and units arranged. Fields of research open to students are decided in consultation with sponsoring faculty member. Any quarter (Staff)

200. Physiology: Cardiovascular—Offered jointly with the Department of Medicine. Lectures, small group instruction, clinical presentations, and lab demonstrations of normal and disordered human cardiovascular physiology. Prerequisite: understanding of general biochemistry.

6 units, Spr (Schwarz)

201. Physiology: Endocrine—Offered jointly with the Department of Medicine. Lectures, clinical presentations, and demonstrations on normal and disordered function in the endocrine system. Prerequisite: understanding of general biochemistry.

4 units, Win (Hoffman, Scheller)

202, 203, 204. Physiology: 202-Gastrointestinal; 203-Renal; 204-Respiratory—Offered jointly with the Department of Medicine. Lectures, clinical presentations, and demonstrations on normal and disordered function in the respiratory, renal, and acid-base systems. Prerequisite: understanding of general biochemistry.

6 units, Aut (202, 1 unit; 203, 3 units; 204, 2 units)

(Gastrointestinal: Lowe; Renal: Meyer; Respiratory: Raffin)

206. Pathophysiology—Offered jointly with the Department of Medicine. The physiology of disease, emphasizing clinical situations where two or more organ systems come together at the molecular, cellular, and organ level. The physiology of individual organ systems and the genetics and physiology of diseases such as cystic fibrosis, muscular dystrophy, and hypertension.

2 units, Win (Tien)

210. Principles of Cell Physiology—Required for all MCP graduate students; open to graduate, medical, and advanced undergraduate students (with consent of instructor). Examines the basic biophysical principles that govern cell physiology and applies these principles to aid in understanding a wide range of physiological processes. Energy transduction, diffusion, membrane properties, and electrical potentials and gradients are discussed and related to current problems in ionic and electrical signaling, solute and solvent transport, and cellular homeostasis. Lecture/discussions introduce basic concepts; students use these principles to solve specific physiological problems.

4 units, Spr (Aldrich, Lewis)

213. Special Topics in Molecular and Cellular Physiology—Seminar of guided reading/discussion in introductory and advanced physiological topics agreed on by an individual instructor and interested students. Prerequisite: consent of instructor.

(Staff)

215. Synaptic Transmission—Primarily for graduate students with an interest in synaptic function; interested medical students and advanced undergraduates may enroll. The anatomical, physiological, and biochemical basis of synaptic function in the peripheral and central nervous system. Lectures and discussions of relevant research papers.

3 units, Aut (Smith, Schwarz, Madison) alternate years, not given 2000-01

216. Ion Channels and Membrane Physiology—(Same as Neurobiology 216.) For students with some background in neurobiology who wish to learn the basic mechanisms of signaling in nerve cells. Reading/discussion of original research papers, emphasizing concepts, quantitative analysis of experimental results, and critical evaluation of evidence. Topics: gating mechanisms in voltage-sensitive and chemo-sensitive ion channels and ionic mechanisms in sensory transduction. Student presentations and small group discussions.

3 units (Aldrich, Baylor) alternate years, given 2000-01

218. Transmembrane Signal Transduction—The molecular mechanisms of signal transduction for a variety of structurally and functionally different plasma membrane receptors. Topics: the structure of receptors and the interaction of the receptor protein with the lipid bilayer, ligand
221. Cell Biology of Physiological Processes—(Same as Biological Sciences 214.) Basic mechanisms of membrane and cellular biogenesis in relation to physiological processes. Emphasis is on the regulatory and signaling mechanisms involved in coordinating complex cellular phenomena such as cellular organization, function, and differentiation. Topics: cellular compartmentalization, transport and trafficking of macromolecules, organelle biogenesis, cell division, motility and adhesion, and multicellularity. Prerequisites: Biology core, Biochemistry 201.
   5 units, Win (Kobilka)

222. Imaging: Biological Light Microscopy—Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biology core.
   3 units, Spr (S. Smith)

299. Directed Reading—Prerequisite: consent of instructor. any quarter (Staff)

399. Advanced Research—Investigation sponsored by individual faculty members undertaken by interested, qualified medical or graduate students. Research fields include endocrinology, neuroendocrinology, and topics in molecular and cellular physiology.
   any quarter (Staff)

MOLECULAR PHARMACOLOGY

Emeriti: (Professors) Robert H. Dreisbach, Avram Goldstein, Dora B. Goldstein, Tag E. Mansour
Chair: Helen M. Blau
Professors: Terrence Blaschke (jointly with Medicine), Helen M. Blau, Oleg Jardetzky, Richard A. Roth, James P. Whitlock, Jr.
Associate Professors: James E. Ferrell, Jr., Phyllis Gardner (jointly with Medicine), Daria Mochly-Rosen
Assistant Professors: Karlene A. Cimprich, Garry P. Nolan
Associate Professor (Teaching): Ellen Porzig
Consulting Professors: Gordon Ringold, Alejandro Zaffaroni

GRADUATE PROGRAMS

MASTER OF SCIENCE

Students in the Ph.D. program may apply for an M.S. degree, after having satisfactorily completed the course and laboratory requirements of the first two years. The degree also requires a written thesis based on literature or laboratory research. Postdoctoral research training is available to graduates having the Ph.D. or M.D. degree.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The Department of Molecular Pharmacology offers interdisciplinary training in biochemistry, genetics, and molecular and cellular biology in preparing students for independent careers in biomedical science. Research and training in the department focuses on the mechanisms by which hormones, drugs, and toxic compounds alter cell function. At the heart of these issues lies the analysis of cell signaling and gene expression. The program leading to the Ph.D. degree includes formal and informal study in biochemistry, computer science, genetics, neuroscience, pharmacology, and physiology. First-year students spend one quarter in each of three different laboratories, working closely with other graduate students, a professor, and postdoctoral fellows on various research projects. During the fourth quarter, the student chooses a faculty mentor with whom to undertake thesis research, based on available positions and the student’s interest. During or before the eighth quarter of study, students must pass a qualifying exam which consists of an oral exam on general knowledge and a defense of a research proposal. Course requirements are fulfilled during the first two years of study; the later years of the four-to-six-year program are devoted to full-time dissertation research. Close tutorial contact between students and faculty is stressed throughout the program.

Research opportunities also exist for medical students and a limited number of undergraduate students. The limited size of the labs in the department allows for close tutorial contact between students, postdoctoral fellows, and faculty.

The department presents two basic courses in medical pharmacology (201 and 202) and advanced courses open to qualified medical and other graduate students. Consult the Time Schedule for additional advanced courses.

COURSES

Course work and lab instruction in the Department of Molecular Pharmacology conform to the Policy on the Use of Vertebrate Animals in Teaching Activities as stated in the back of this catalog.

BASIC

201 and 202 provide a broad exposure to the principles of pharmacology and the properties of the major drug groups.

201. Pharmacology—Topics: receptors; pharmacokinetics; and autonomic, CNS, and cardiovascular pharmacology. Emphasis is on the mechanisms of drug action in humans. Prerequisite: biochemistry.
   5 units, Aut (Staff)

   5 units, Win (Staff)

ADVANCED

Open to all University students; instructor’s consent required prior to registration. These courses require a good knowledge of physiology and biochemistry and sometimes of microbiology or genetics. Students should consult with the instructor about the adequacy of their preparation.

210. Cell Signaling—The molecular mechanisms through which cells receive and respond to external signals, taught out of the primary literature. Topics: biochemical, cell biological, genetic, and pharmacological approaches to specific signaling problems. Complements those areas of cell signaling covered by 221/Biological Sciences 214, and Neurobiology 230, focusing on protein phosphorylation and cell cycle control. Prerequisites: Biochemistry 201 or 202. Recommended: 221/Biological Sciences 214.
   4 units (Ferrell, Staff) alternate years, given 2000-01

231. Molecular Biology of Gene Therapy—Cell mediated gene therapy as a novel form of drug delivery. Vectors, cell types, and relevant genetic and acquired diseases are discussed in a series of lectures, and in student and guest presentations. Prerequisites: biochemistry and molecular biology.
   2-3 units, Spr (Nolan, Blau) alternate years, not given 2000-01

240. Drug Discovery—The scientific principles and technologies involved in making the transition from a basic biological observation to the creation of a new drug, with emphasis on molecular and genetic issues.
   4 units, Aut (Mochly-Rosen, Cimprich)
241. Aging and Gene Therapy—Open to graduate students and medical students. Frontiers in the molecular pharmacology of diseases of aging. Topics: aging as a cellular process, the molecular basis of aging, development of novel gene-therapy based approaches towards the future treatment of syndromes of aging. The molecular neurobiology of aging, cardiovascular diseases, autoimmune diseases, cancer and the consequences of aging on organs, stem cells and reproductive potential. Specialists in the area and invited experts from outside Stanford present cutting-edge work and theories of the basic processes affecting aging. 
3 units, Spr (Blau, Nolan, Porzig)

251. Aging: Health and Disease—Open to graduate students and medical students. Interdisciplinary. The psycho-social aspects of aging: health policy considerations of geriatric medicine, changes in cognition and reproductive potential, effects of exercise and nutrition, cultural perspectives on aging and medical ethical issues including social and family support of aging patients. The cellular and molecular basis of aging: life span and animal models for aging, genetics of aging, aging syndromes, nuclear clocks, senescence and telomers, and non-disjunction in gametogenesis. Future approaches to novel treatments for the diseases of aging: Parkinsons, Alzheimers, cardiovascular illnesses, cancer, arthritis, and osteoporosis. Aging is evaluated as a normal developmental process, focusing on its effects on human reproductive, skeletal, hematopoietic, and nervous systems. 
3 units (Blau, Porzig) given 2001-02

270. Research Seminar—Weekly seminars on current research in pharmacology. Seminars are reviewed and discussed in a separate conference with a member of the faculty.
2 units, Aut, Win, Spr (Staff)

280. Tutorial Program—Primarily for graduate students in pharmacology. Guided readings in the literature of any area of pharmacology. A critical review paper may be required.
any quarter (Staff)

299. Directed Reading
any quarter (Staff)

399. Research
any quarter (Staff)

459. Frontiers in Interdisciplinary Biosciences—Literature/discussion on how to critically evaluate the cutting edge of current research, held in conjunction with a seminar series, occurring once per month for 1999-2000, and more frequently thereafter. Leading investigators in interdisciplinary research from Stanford and from throughout the world present their work in a particular area. Before the seminar, students and faculty read and critically discuss one or more papers from the primary research literature on a related topic. After the seminar, students meet informally with the speakers to discuss the research and future directions. Emphasis is on how to read papers in the primary research literature, and familiarization with the broad set of techniques and approaches used to study problems in the biosciences. This interdisciplinary course is listed in many departments in the schools of Engineering, Medicine, and Humanities and Sciences. Students should enroll in their affiliated department, if it is offered. If not, students may enroll in any department within the school where the course is listed.
1 unit, Aut, Win, Spr (Spudich, Robertson, Chu, Mobley)

GRADUATE PROGRAM

Graduate students in the Department of Neurobiology obtain the Ph.D. degree through the interdepartmental Neurosciences Ph.D. program. Accepted students receive funding for tuition and a living stipend. Applicants should familiarize themselves with the research interests of the faculty and, if possible, indicate their preference on the application form which is submitted directly to the Neurosciences Program.

Medical students also are encouraged to enroll in the Ph.D. program. The requirements of the Ph.D. program are fitted to the individual interests and time schedules of the student. Postdoctoral training is available to graduates holding Ph.D. or M.D. degrees, and further information is obtained directly from the faculty member concerned.

Research interests of the department include: mechanisms of visual transduction and information transmission in vertebrate retina; structure, function, and development of auditory and visual systems; integrative mechanisms and regeneration in the central and peripheral nervous system; mechanisms of ion channel function; and neuronal growth and differentiation.

COURSES

Course work and lab instruction in the Department of Neurobiology conform to the Policy on the Use of Vertebrate Animals in Teaching Activities as stated in the back of this catalog.

The department offers a one-quarter course (Neurobiology 200) on the structure and function of the nervous system, which is open to medical and graduate students, and advanced undergraduates. Advanced courses are open to students who have completed the basic course.

199. Directed Reading (Undergraduate)—Prerequisite: consent of instructor.
1-18 units, any quarter (Staff)

200. The Nervous System—Introduction to the structure and function of the nervous system, including neuroanatomy, neurophysiology, and neurochemistry. Topics range from the properties of neurons to the mechanisms and organization underlying higher functions. Coherent framework prepares for general work in neurology, neuropathology, clinical medicine, and for more advanced work in neurobiology. Lecture and lab components must be taken together.
9 units, Win (Barres, Baylor, Knudsen, McMahan, Newsome, Raymond, Schulman, Shooter, Stryer)

216. Ion Channels and Membrane Physiology—(Same as Molecular and Cellular Physiology 216.) For students with some background in neurobiology who wish to learn the basic mechanisms of signaling in nerve cells. Reading/discussion of original research papers, emphasizing concepts, quantitative analysis of experimental results, and critical evaluation of evidence. Topics: gating mechanisms in voltage sensitive and chemosensitive ion channels and ionic mechanisms in sensory transduction. Student presentations and small group discussions.
3 units, Aut (Aldrich, Baylor) alternate years, given 2000-01

217. Synaptogenesis and Synaptogen—Seminar evaluating current views on the sequence of steps and mechanisms involved in synapse formation. Emphasis is on the neuromuscular synapse; its development in the embryo and its regeneration in the adult. Students read original articles, write summaries, and present them for discussion.
4 units, Aut (McMahan) alternate years, given 2000-01

218. Neural Basis of Behavior—Advanced seminar exploring the principles of information processing by the central nervous system of vertebrates, and the relationship of functional properties of neural systems with perception and behavior. Emphasis is on the visual and auditory systems. Study of original papers, directed group discussions, and student presentations. Prerequisite: Neurobiology 200 or consent of instructor.
4 units, Spr (Knudsen, Newsome) alternate years, not given 2000-01
230. Signal Transduction Mechanisms—Molecular mechanisms of transduction of sensory and hormonal stimuli by prokaryotes and eukaryotes. Topics: bacterial chemotaxis and phototaxis; vision in invertebrates and vertebrates; olfaction; and hormonal actions mediated by G-proteins, e.g., adenylate cyclase cascade and the phosphoinositide cascade; molecular evolution of transducing proteins. The structure and interplay of receptors, enzymes, and ion channels mediating these processes. Experimental approaches include gene cloning and site-specific mutagenesis, isolation and reconstitution of functional transducing assemblies, and patch clamping and other electrophysiological methods. Emphasis is on recurring motifs of excitation and adaptation, and transduction and their evolution.

4 units (Stryer) alternate years, given 2000-01

254. Molecular and Cellular Neurobiology—(Same as Biological Sciences 154/254.) Lecture/seminar for advanced undergraduates and graduate students, focusing on cellular and molecular mechanisms in the organization and function of the nervous system. Topics: cell biology of the neuron, wiring of the neuronal network, synaptic structure and synaptic transmission, signal transduction in the nervous system, the molecular basis of behavior including learning and memory, and the molecular pathogenesis of neurological diseases. Prerequisite for undergraduates: Biological Sciences 31 and 32 or equivalent, plus at least one of 118, 119, 128, 129, or 153, or consent of the instructors.

4 units, Aut (Luo, Schulman)

299. Directed Reading—Prerequisite: consent of instructor.
1-18 units, any quarter (Staff)

300. Professional Development and Integrity in Neuroscience—Required of Neurosciences Ph.D. students every quarter. Develops professional skills in critical assessment and oral presentation of findings from current neuroscience literature in the visual presentation of quantitative data and writing research grants. The role of animals in lab research, fraud in science, the responsibility of authors and reviewers, science in a multicultural environment, and the relationship between student and mentor. Student and faculty presentations and discussions.

2 units, Aut, Win, Spr (Schulman)

399. Individual Research—Prerequisite: consent of instructor.
1-18 units, any quarter (Staff)

NEUROSCIENCES PROGRAM

Director: Eric I. Knudsen (Professor of Neurobiology)

Participating Faculty:
Anesthesia: Rona Giffard (Associate Professor), Joan E. Kendig (Professor), M. Bruce MacIver (Assistant Professor, Research), Mervyn Maze (Professor)

Biological Sciences: Bruce Baker (Professor), William F. Gilly (Professor), H. Craig Heller (Professor), Ron Kopito (Professor), Liqun Luo (Assistant Professor), Susan McConnell (Associate Professor), Robert M. Sapolsky (Professor), Stuart Thompson (Professor)

Developmental Biology: Matthew P. Scott (Professor)

Genetics: David R. Cox (Professor)

Molecular and Cellular Physiology: Richard Aldrich (Professor), Brian Kobilka (Associate Professor), Richard S. Lewis (Associate Professor), V. Daniel Madison (Associate Professor), Richard H. Scheller (Professor), Thomas Schwarz (Associate Professor), Stephen Smith (Professor), Richard Tsien (Professor)

Molecular Pharmacology: Helen Blau (Professor), Daria Mochly-Rosen (Associate Professor)

Neurobiology: Ben Barres (Associate Professor), Denis A. Baylor (Professor), Eric I. Knudsen (Professor), U. J. McMahan (Professor), William T. Newsome (Professor), Jennifer Raymond (Assistant Professor), Howard Schulman (Professor), Eric M. Shooter (Professor), Lubert Stryer (Professor)

Neurology and Neurological Sciences: John A. Huguenard (Associate Professor, Research), William C. Mobjley (Acting Professor), David A. Prince (Professor), Thomas A. Rando (Professor), Lawrence Steinman (Professor)

Neurosurgery: Gary K. Steinberg (Professor)
Pathology: Lawrence F. Eng (Professor, Research)

Psychiatry and Behavioral Sciences: William C. Dement (Professor), Judith Ford (Associate Professor, Research), Terrence A. Ketter (Associate Professor), Edith Sullivan (Associate Professor, Research)

Psychology: Russell D. Fernald (Professor, Teaching), John Gabrieli (Associate Professor), David Heeger (Associate Professor, Teaching), Brian Wandell (Professor), Jeffrey J. Wine (Professor)

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The interdepartmental Neurosciences Program offers instruction and research opportunities leading to a Ph.D. in Neurosciences. The requirements for a Ph.D. degree follow those of the University and in addition are tailored to fit the background and interests of the student. Accepted students receive an award covering tuition, basic health plan, and a living stipend. Qualified applicants should, where possible, apply for the predoctoral fellowships in open competition, especially those from the National Science Foundation and the Howard Hughes Medical Institute. December 15 is the deadline for receipt in the Neurosciences Program office of applications with all supporting material.

Applicants should familiarize themselves with the research interests of the faculty and indicate their preferences clearly on the application form. Since students enter with differing backgrounds and the labs in which they may elect to work cover several different disciplines, the specific program for each student is developed individually with an advisory committee. All students are required to complete the basic courses in neurobiology (Neurobiology 200 or its equivalent). Students are also required to take at least five advanced neuroscience courses. At least one course must be taken from each of the following categories: Clinical Neurosciences, Developmental Neuroscience, Integrative and Behavioral Neurosciences, Membrane Excitability; and one course in either Computational Neuroscience or Neuronal Communication.

Students usually rotate through several labs during their first year, although they may choose to begin thesis research on entry. After the first rotation, students may rotate both within and outside the Neurosciences Program. Required course work should be completed by the end of the second year. Passing of a comprehensive oral preliminary examination given by the student’s advisory committee is required for admission to Ph.D. candidacy. This examination is usually taken by the end of the second year. The student is required to present a Ph.D. dissertation which is the result of independent investigation contributing to knowledge in an area of neuroscience and to defend his or her dissertation in a University oral examination, which includes a public seminar.

Medical students may participate in this program provided they meet the prerequisites and satisfy all the requirements of the graduate program as listed above. The timing of the program may be adjusted to fit their special circumstances.

COURSES

Course work and lab instruction in the Neurosciences Program conform to the Policy on the Use of Vertebrate Animals in Teaching Activities as stated in the back of this catalog.
The following courses fulfill program requirements. Consult the course selections of individual departments for complete descriptions.

**BIOLOGICAL SCIENCES**

**258. Neural Development**
4 units (McConnell) alternate years, given 2000-01

**MOLECULAR AND CELLULAR PHYSIOLOGY**

**215. Synaptic Transmission**
5 units, Aut (Smith, Schwarz, Madison)
alternate years, not given 2000-01

**NEUROBIOLOGY**

**200. The Nervous System**
9 units, Win (Barres, Baylor, Knudsen, McMahan, Newsome, Raymond, Schulman, Shooter, Stryer)

**218. Neural Basis of Behavior**
4 units, Spr (Knudsen, Newsome) alternate years, not given 2000-01

**230. Signal Transduction Mechanisms**
4 units (Stryer) alternate years, given 2000-01

**300. Professional Development and Integrity in Neuroscience**
2 units, Aut, Win, Spr (Schulman)

**NEUROLOGY AND NEUROLOGICAL SCIENCES**

**205. Clinical Neuroscience**
2 units, Win (Huguenard)

**PSYCHOLOGY**

**206. Behavioral Neuroscience**
1-3 units (Wandell, Wine) alternate years, given 2000-01

**276. Computational Neuroscience**
1-3 units (Heeger) alternate years, given 2000-01

**PATHOLOGY**

Emeriti: (Professors) Margaret E. Billingham, Ronald F. Dorfman, Lysia K. Forno, David Glick, David Korn; (Clinical Assistant Professor) Charles T. Uyeda

Chair: Stephen J. Galli

Associate Professors: Gerald J. Berry, P. Joanne Cornbleet, Steven K. H. Foug, Susan A. Galel, Sharon Geaghan, Teri Longacre, Kent W. Nowels, Donald P. Regula, Robert V. Rouse, Raymond A. Sobel, James L. Zehnder

Assistant Professors: Jeffrey Axelrod, Athena M. Cherry, Peter Jackson, Sabine Kohler, Sara A. Michie, Azend Sidow, J. Matthijs van de Rijn

Professor (Research): Lawrence F. Eng

Professors (Clinical): Dickran S. Horoupian, Jon C. Kosek

Acting Assistant Professors: Vivek Bhargava, Keith A. Wharton

Visiting Professor: Samuel D. Parks

Visiting Assistant Professor: Douglas L. Eng

Clinical Professors: James L. Bennington, Jerome S. Burke, Stephen S. Chen, John T. Differding, Seth L. Haber, Maie K. Herrick, Paul L. Herrmann, John E. McNeal, Mahendra Ranchod

Clinical Associate Professors: Robert W. R. Archibald, Barbara M. Egbert, Steven Levine, Charles M. Lombard

Clinical Assistant Professors: Claudia Greco, James E. Meeker, Thomas W. Rogers, Jon C. Ross, William W. Ruehl, Joshua Sickel, Sharon H. Van Meier

Staff Physicians and Clinical Instructors: David B. Bingham, Jeff Harvell, Delia Menozzi, John Higgins, Jim Malone, Erik Ranheim

Clinical Lecturer: Glen B. Haydon

Clinical Instructors: Jorge Rodriguez-Soto, Frank Scappatici

**PROGRAMS OF STUDY**

The Department of Pathology offers a sequence of basic courses in general and special pathology, including neuropathology, which is open to medical students only. Interested and qualified graduate students may petition the course director to audit the lecture portion of these courses. In addition, there are a number of advanced courses in selected aspects of pathology. The department does not offer advanced degrees in pathology, but qualified graduate students who are admitted to the Biophysics Program, the Cancer Biology Program, or other interdepartmental programs may elect to pursue their thesis requirements in the research laboratories of the Department of Pathology. The discipline of pathology has traditionally served as a bridge between the preclinical and clinical sciences and is concerned with the application of advances in the basic biological sciences, both to the diagnosis of disease in man and to the elucidation of the mechanisms of normal molecular, cellular, and organ structure and function that manifest themselves in clinical disease. Accordingly, the department's research interests encompass a broad range that extends from fundamental molecular biology to clinical-pathological correlations, with a primary emphasis on experimental oncology.

At present, investigation in the department includes basic studies in different areas utilizing molecular biological, biochemical, and genetic cell biological techniques: DNA replication in yeast and cultured eukaryotic cells, cell cycle control in animal cells and yeast, identification and pathogenetic role of chromosomal aberrations in human malignancies and mechanisms of activation of oncogenes in human and animal cells, lymphocyte and neutrophil-interactions with endothelial cells, cell type specification and signal transduction pathways leading to specific gene expression or modulation of cytoskeletal behavior; cytoskeletal architecture, cell-matrix interaction, developmental biology of hematopoietic stem cells and thymus, regulation of the immune system, and mechanisms of immune and other responses in the central nervous system. In addition, a variety of studies focus on the development of novel diagnostic and immunotherapeutic treatment modalities and techniques for solid tumors, lymphomas, HIV, and genetic diseases. Research training in all of these areas is available for qualified medical and graduate students by individual arrangement with the appropriate faculty member. A summary of the research interests of the department faculty is available on request.

**COURSES**

Course work and lab instruction in the Department of Pathology conform to the Policy on the Use of Vertebrate Animals in Teaching Activities as stated in the back of this catalog.

**211, 212. Advanced Immunology**—(Enroll in Immunology 201, 202.)

211. 3 units, Win (Chien, Staff)

212. 3 units, Spr (Davis, Lewis, Staff)

**213. Gross Autopsy Pathology Laboratory**—Examine/discuss unfixed dissected organs from current autopsies and correlate morphologic findings with the clinical history. Students view postmortem examinations and may participate (in a small group) in one postmortem examination with the assistance of residents and staff, and present the case to the class. Class scheduling is flexible. Additional unit for participation in a postmortem examination. Pre- or corequisite: 230B or 230C.

2 units, Aut, Win (D. Regula, K. Bensch, Staff)
215. Molecular Mechanisms of Disease—Provides graduate students in the basic sciences with an exposure to current research topics in human disease. Each week, one scientist from academia or industry presents a seminar on the pathogenesis of a particular disease, with an emphasis on molecular approaches, followed by a discussion. A review article and one or two research papers from the current literature are assigned prior to each meeting.

1 unit, Win (Lipsick, Staff)

230A,B,C. General and Special Pathology—Three-quarter introduction to principles in general pathology and a detailed pathology of human disease based on the disordered structure and function of individual organ systems (special pathology). Lecture and lab discussion groups. Course director: Regula.

230A. General and Special Pathology 6 units, Spr (Regula, Lombard, Staff)

230B. Special Pathology 6 units, Aut (Regula, Lombard, Staff)

230C. Special Pathology 6 units, Win (Regula, Hendrickson, Horoupian, Staff)

290. Research in Experimental Neuropathology—Introduction to research methods in experimental neuropathology for students interested in a long-term project in this area. Participation in research is under the close supervision of a staff member in neuropathology. Facilities available include electron microscopy, tissue culture, neurochemistry, and immunocytochemistry with antibody and molecular probes. Prerequisite: consent of instructor.

1-18 units, Spr (Eng, Forno)

292. DNA Repair and Mutagenesis—Enroll in Biological Sciences 205.

3 units, Spr (Hanawalt)

299. Directed Reading—Prerequisite: consent of faculty member.

1-18 units, any quarter (Staff)

399. Research—Department faculty are involved in active research programs at the Stanford Medical Center. Students interested in research at the molecular, cellular, and clinical-pathologic levels are encouraged to seek out faculty advisers. The department is equipped for modern research and maintains an active and vigorous postdoctoral research training program. Prerequisite: consent of the instructor.

1-18 units, any quarter (Staff)

RADIATION ONCOLOGY

Chair: Gary M. Glazer

Associate Professors: A. Gabrielle Bergman, Michael D. Dake, King C. L. Pi, Michael Marks, Robert E. Mindelzun, Michael E. Moseley, Sandy A. Napel, Matilde Nino-Murcia, Eric Olocco, George M. Segall, Charles P. Semba

Assistant Professors: Christopher F. Beaulieu, Robyn L. Birdwell, Francis Blankenberg, R. Kim Butts, Bruce Daniel, Debra M. Ikeda, Philippe Lang, Mahmood Razavi, Geoffrey D. Rubin, Suzanne Slonim, Daniel M. Spielman

Associate Professors (Research): Ann N. C. Leung, Sylvia Plewriis

Acting Assistant Professors: Huy M. Do, Daniel Y. Sze

The Department of Radiation Oncology does not offer degrees; however, its faculty teach a variety of courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Graduate students in the Biophysics Program and in the Cancer Biology Program may perform their thesis research in the department. Undergraduate students may also arrange individual research projects under the supervision of the faculty.
This discipline focuses on the use of radiation, ultrasound, and magnetic resonance as diagnostic, therapeutic, and research tools. The fundamental and applied research within the department reflects this broad spectrum as it relates to anatomy, pathology, physiology, and interventional procedures. Original research and development of new clinical applications in medical imaging is supported within the Radiological Sciences Laboratory.

Courses open to undergraduate and postgraduate students are listed below.

**COURSES**

1. **Selected Readings in Radiology Research**  
   *Aut, Win, Spr (Staff)*

2. **Experimental Nuclear Medicine**—Computer applications in medicine, particularly the use of radioisotopes as tracers. Recommended: some knowledge of physiology and calculus.  
   *Spr (Strauss)*

3. **Research**  
   any quarter (Staff)

**STRUCTURAL BIOLOGY**

**Chair:** Michael Levitt  
**Associate Chair:** Joseph D. Puglisi

**Professors:** Roger D. Kornberg, Michael Levitt, David B. McKay, Peter Parham

**Associate Professors:** Joseph D. Puglisi, William Weis  
**Professor (Teaching):** Patricia Cross  
**Assistant Professor:** Kenan C. Garcia  
**Visiting Associate Professor:** Boaz Shaanan

The department offers opportunities for course work and research in cell biology. Courses fall into two categories: (1) a series of one-quarter courses that treat special topics of current interest in cell biology at an advanced level; and (2) Structure of Cells and Tissues (211), a one-quarter course tailored to the needs of medical students that includes both lectures on structure-function relationships of mammalian cells and tissues and a lab on medical histology.

The emphasis of research in the department is on understanding fundamental cellular processes in terms of the structure and function of organelles and molecular assemblies. Techniques used include standard methods of biochemistry, cell culture, fluorescence microscopy, genetic engineering, and image processing and three-dimensional reconstruction from electron micrographs, microinjection of cells and nuclei, nanosecond fluorescence spectroscopy, and x-ray and electron diffraction. The department owns and operates a computing center equipped with advanced time-sharing and color graphics programs to illustrate problems. Systems include protein-nucleic acid complexes and antibody-antigen interactions. Prerequisites: knowledge of basic biochemistry and cell biology.

3 units, *Win (Levitt)*

**228. Protein and Nucleic Acid Structure, Dynamics, and Engineering**—The availability of three-dimensional atomic structures of proteins and nucleic acids allows interpretation of biological processes based on the physical and chemical properties of these molecules. Crystallographic studies include structural themes exemplified by local chain conformation, secondary structure, domains, families of folds, protein folding, and thermodynamic stability. How these structures move is considered by combining the results of experiments with theoretical molecular dynamics simulations: enzyme catalysis. Novel molecules are engineered from the experimental and predictive aspects, using interactive computer graphics programs to illustrate problems. Systems include protein-nucleic acid complexes and antibody-antigen interactions. Prerequisites: knowledge of basic biochemistry and cell biology.

3 units, *Win (Levitt)*

**229. The Eukaryote Chromosome**—The principles of chromosome structure and function. Topics: structure, dynamics, and topological forms of DNA; units and hierarchies of DNA coiling in chromosomes; centromeres, telomeres, and the basis of chromosome maintenance and sorting in mitosis; the mechanism of gene activation with regard to enhancer, promoter, and terminator sequences; the basis of sequence-specific protein-DNA interaction; organization and assembly of the cell nucleus. Prerequisites: knowledge of basic biochemistry and cell biology.

3 units, *Spr (Kornberg)*

**232. Macromolecular Structure: Diffraction Methods and Diffraction Results**—General methods and notable accomplishments of x-ray crystallography and solution scattering. Methodology topics: small-angle scattering, fiber diffraction, and x-ray crystallography at a level that makes current literature in the field understandable to the non-practitioner. Protein folding patterns, enzymology, receptor-effector systems, proteins of the immune system, and membrane proteins. Prerequisites: knowledge of basic biochemistry.

3 units, *Win (Weis, McKay)*

**450. Introduction to Biotechnology**—(Same as Biochemistry 450, Chemical Engineering 450, Civil and Environmental Engineering 450, Developmental Biology 450.) Faculty from the departments of Biochemistry, Biological Sciences, Chemical Engineering, Civil and Envi-
Environmental Engineering, Developmental Biology, Structural Biology, and invited industrial speakers review the interrelated elements of modern biotechnology. Topics: protein structure and dynamics, protein engineering, biocatalysis, gene expression, cellular metabolism and metabolic engineering, fermentation technology, and purification of biomolecules. Prerequisite: graduate student or upper-division undergraduate in the sciences or engineering.

2 units, Spr (Robertson)

241. Biological Macromolecules—The molecular principles of protein and nucleic acid structures. The forces that stabilize biopolymers is presented with the goal of understanding three-dimensional structures and their functional implications. Topics: protein folding, domain structures, enzyme active sites, DNA and RNA structure, and protein-nucleic acid complexes.

3 units, Aut (Ferrell, Herschlag, Puglisi, Weis)

242. Methods in Molecular Biophysics—Experimental methods in molecular biophysics from a theoretical and practical standpoint. Emphasis is on x-ray diffraction and nuclear magnetic resonance spectroscopy. Fluorescence spectroscopy, circular dichroism, calorimetry, and separation methods. Introduces students from diverse backgrounds to the potential utility of physical approaches in their own research to help them in evaluating literature incorporating these methods.

3 units, Win (McKay, Puglisi, Weis)

260. Supervised Study—Research or advanced tutorial for undergraduates.

1-18 units, any quarter (Staff)

299. Directed Reading

1-18 units, any quarter (Staff)

399. Individual Research

1-18 units, any quarter (Staff)

459. Frontiers in Interdisciplinary Biosciences—Literature/discussion on how to critically evaluate the cutting edge of current research, held in conjunction with a seminar series, occurring once per month for 1999-2000, and more frequently thereafter. Leading investigators in interdisciplinary research from Stanford and from throughout the world present their work in a particular area. Before the seminar, students and faculty read and critically discuss one or more papers from the primary research literature on a related topic. After the seminar, students meet informally with the speakers to discuss the research and future directions. Emphasis is on how to read papers in the primary research literature, and familiarization with the broad set of techniques and approaches used to study problems in the biosciences. This interdisciplinary course is listed in many departments in the schools of Engineering, Medicine, and Humanities and Sciences. Students should enroll in their affiliated department, if it is offered. If not, students may enroll in any department within their school where the course is listed.

1 unit, Aut, Win, Spr (Spudich, Robertson, Chu, Mobley)

SURGERY

The following Anatomy courses are open to undergraduates. For graduate and Medical School course offerings, see the Stanford University bulletin School of Medicine.

COURSES

101. An Undergraduate Course in Anatomy—A regional study of human structure, emphasizing the morphology of the trunk and extremities. Lectures in regional anatomy, dissection of the human body. The anatomy of the area through the dissection process. Enrollment limited to 32.

7 units, Win (Dolph, Glasgow)

101A. An Undergraduate Course in Anatomy—The head and neck portion of the cadaver. Lectures are followed by head and neck dissection. Enrollment limited to 32.

5 units, Spr (Dolph)
Independent Research Laboratories, Centers, and Institutes

Vice Provost and Dean of Research and Graduate Policy and Dean of the Independent Laboratories, Centers, and Institutes: Charles H. Krueger
Associate Dean of Research: Patricia Jones
Associate Dean of Graduate Policy: Thomas Wasow

Independent Research Laboratories, Centers, and Institutes perform multidisciplinary research that extends beyond the scope of any one of the University’s organized schools.

The following laboratories, centers, and institutes report to the Vice Provost and Dean of Research and Graduate Policy:

- Center for the Study of Language and Information
- Edward L. Ginzton Laboratory
- W. W. Hansen Experimental Physics Laboratory
- Institute for International Studies
- Institute for Research on Women and Gender
- Laboratory for Advanced Materials
- Stanford Humanities Center
- Stanford Institute for Economic Policy Research
- The Hoover Institution on War, Revolution and Peace and the Stanford Linear Accelerator Center (SLAC) report to the President and Provost. SLAC is independently operated under a contract with the Department of Energy.

Following is a description of each organization’s activities, including research activities and, where applicable, courses offered.

STANFORD INSTITUTE FOR ECONOMIC POLICY RESEARCH

Director: Lawrence Lau

The primary mission of the Stanford Institute for Economic Policy Research (SIEPR) is to encourage and support research on economic policy issues in areas such as economic growth, technology policies, environmental and telecommunication regulation, tax reform, international trade, and monetary policy. SIEPR pursues four interrelated goals in support of this mission: (1) stimulating graduate student and faculty research on economic policy issues of continuing importance; (2) communicating its findings broadly; (3) building a community of scholars conducting research on policy issues; and (4) linking the policy community at Stanford with decision-makers in business, government, and academia.

SIEPR is a University-wide research center, involving economists from the schools of Business, Engineering, Law, Humanities and Sciences, as well as the Hoover Institution and the Institute for International Studies. Affiliated faculty and students maintain appointments in their home departments while working on SIEPR projects. In addition, scholars visiting from other institutions may apply for affiliation with SIEPR.

Much of the research at SIEPR takes place in research centers or research programs. The Center for Research on Economic Development and Policy Reform (Anne O. Krueger, Director) fosters research on the economic problems of developing economies and economies in transition, as well as analyzing the political aspects of economic policy reform and historical episodes of reform. For more information about this program call (650) 725-8730. The Center for Research on Employment and Economic Growth (Timothy Bresnahan and Paul Romer, co-directors) is focusing on the 21st century, the relationship between long-term economic growth, the economic success of individuals and families in their jobs and careers, and the role played by higher education and how it can supply workers and technology in the work force.

Research programs within SIEPR and their directors are Energy, Natural Resources, and the Environment Program (James L. Sweeney), the Finance Program (John B. Shoven), the High Technology Impact Program (Paul A. David), the International Economy Program (Anne O. Krueger), the Program on the Japanese Economy (Masahiko Aoki), the Macroeconomics and Monetary Policy Program (John B. Taylor), the Program in Regulatory Policy (Roger Noll), the Tax and Budget Policy Program (John B. Shoven), and the Technology and Economic Growth Program (Timothy Bresnahan, Ralph Landau, and Nathan Rosenberg).

SIEPR does not offer courses for academic credit, admit students, or award degrees. SIEPR is located on the first floor of the Landau Economics Building at the corner of Serra and Galvez Streets, telephone (650) 725-1874.

EDWARD L. GINZTON LABORATORY

Director: David A. B. Miller

The Ginzton Laboratory houses the research activities of a number of faculty members from the departments of Applied Physics, Electrical Engineering, Materials Science and Engineering, Mechanical Engineering, and Physics. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for a broad spectrum of scientific research, including acoustic and optical techniques for semiconductor measurements, biophysics, fiber optics, high temperature superconductors, laser physics and applications, mesoscopic devices, microelectromechanical devices and systems, optoelectronic devices and systems, scanning optical microscopy, solid state physics, squeezed light, tunneling and force microscopy, and ultrafast and nonlinear optics.

W. W. HANSEN EXPERIMENTAL PHYSICS LABORATORY (HEPL)

Director: Robert L. Byer

HEPL is an independent laboratory celebrating 50 years of fundamental science and engineering research. HEPL faculty and students are engaged in research in accelerator physics, astrophysics, dark matter in the universe, free electron lasers, fundamental tests of relativity in space, gamma ray observations, gravitational wave detection, quantum condensed matter, and space based solar physics studies. Many of the programs involve satellite-based studies in fundamental physics and engineering.

STANFORD HUMANITIES CENTER

Director: Keith M. Baker
Associate Director: Susan E. Dunn

The Stanford Humanities Center promotes humanistic research and education at Stanford and nationwide. In particular, it stresses work of an interdisciplinary nature, accomplished through the following programs: one-year residential fellowships for advanced research by Stanford faculty, faculty members from other institutions, and Stanford graduate students; public presentations through lectures, colloquia, conferences, and publications of new research, interdisciplinary explorations, and fundamental issues in the humanities; research workshops that
bring faculty and graduate students together regularly to advance ongoing research on topics of interdisciplinary interest.

Fellows are selected on the basis of an open competition. They pursue their own research and participate in a weekly seminar at the center throughout the year. Faculty fellows also contribute to the intellectual life of the Stanford community through activities such as giving departmental courses, participating in ongoing research workshops, or organizing conferences. The courses given by fellows in 1999-2000 are listed below.

**COURSES**

**ART AND ART HISTORY**

   4 units, Aut (Burns)

267. Undergraduate Seminar: Buildings and Society in Europe, 1500-1800
   4 units, Win (Scott)

**ENGLISH**

   4-5 units, Spr (Kaufman)

**HISTORY**

65. Introduction to Comparative Studies in Race and Ethnicity
   5 units, Spr (Camarillo, Fredrickson)

161. Photographers and Photography in the American West
   5 units, Spr (Street)

200H. Junior Honors Colloquium
   3 units, Spr (Gregory)

214A/314A. Undergraduate/Graduate Colloquium: Universities in Medieval Europe
   5 units, Spr (Tachau)

263B/363B. Undergraduate/Graduate Colloquium: The Making of the Atlantic World, 1600-1960
   5 units, Win (Saville)

**INTRODUCTION TO THE HUMANITIES**

14. The Good Life
   5 units, Aut (Elam, Landy, Nightingale)

16. Freedom and Eros in Philosophy and Art
   5 units, Aut (Anderson, Berdini, Bobonich)

23A. Reason, Passion, and Reality
   5 units, Win (Bobonich, Moravcsik)

**MUSIC**

210. Dance and the American Musical Avant-Garde
   4 units, Spr (Levitz)

**UNDERGRADUATE PROGRAM**

**INTERSCHOOL HONORS PROGRAM IN ENVIRONMENTAL SCIENCE, TECHNOLOGY, AND POLICY**

IIS coordinates a University-wide interschool honors program in environmental science, technology, and policy. Undergraduates planning to participate in the honors program are required to pursue studies in environmental sciences, technology, and policy, with a concentration in a single discipline. After completion of the prerequisite units, students join small group honors seminars to work with specific faculty members in the environmental field on an honors thesis that incorporates both scientific principles and the policy aspects of selected environmental issues.

Courses in environmental studies appear under the course listings of the schools of Earth Sciences, Engineering, and Humanities and Sciences. Information about and applications to this program may be obtained from the Center for Environmental Science and Policy, E401 Encina Hall East; telephone (650) 723-5697.

**COURSES**

195. Interschool Honors Program in Science, Technology, and Policy—Students from the schools of Humanities and Sciences, Engineering, and Earth Sciences analyze important problems in a year-long small group seminar. Combines research methods, oral presentations, preparation of an honors thesis by each student, and where relevant, field study.
   9-15 units, Aut, Win, Spr (Naylor, Kennedy, Falcon, Matson)

The Institute for International Studies promotes individual and collaborative research on contemporary, policy-relevant issues that are international and interschool in character. Working in partnership with the seven schools at Stanford (Business, Earth Sciences, Education, Engineering, Humanities and Sciences, Law, and Medicine) and with the Hoover Institution, IIS fosters excellence in research and teaching across disciplinary, school, and national boundaries. The priority areas of research are in the fields of international and regional peace and security; economic development and political change in East and Southeast Asia; the global environment challenge; and the delivery of health care in a comparative perspective.

Opportunities for undergraduate research include the Goldman Interschool Honors Program in Environmental Science, Technology, and Policy. The institute also manages the prestigious Asia/Pacific Scholars Program for graduate level students, in addition to 11 undergraduate and graduate fellowship programs.

The constituent centers and programs within IIS include the Asia/Pacific Research Center, the Bechtel Initiative for Global Growth and Change, the Center for Environmental Science and Policy, the Center for Health Policy, the Center for International Security and Cooperation, the European Forum, the Stanford Computer Industry Project, and the Stanford Japan Center—Research.

In the areas of public service and outreach, IIS administers the Stanford Program on International and Cross-Cultural Education (SPICE), which develops internationally-oriented curricula for use by public school teachers.

The IIS central office is located at 100 Encina Hall, telephone (650) 723-4581. For more information about particular IIS programs, contact the programs directly (area code 650):

Asia/Pacific Research Center, 723-9741
Bechtel Initiative on Global Growth and Change, 723-1737
Center for Environmental Science and Policy, 725-2606
Center for Health Policy, 723-1020
Center for International Security and Cooperation, 723-9625
European Forum, 723-4716
Inter-University Center for Japanese Language Studies, 725-1490
Stanford Program on International and Cross-Cultural Education (SPICE), 723-1116
Stanford Computer Industry Project, 725-7096
Stanford Japan Center—Research, 011 75-752-7073, ext. 40
CENTER FOR THE STUDY OF LANGUAGE AND INFORMATION (CSLI)

Acting Director: David Israel

CSLI is devoted to research in the emerging science of information, computing, and cognition. It is an interdisciplinary endeavor, bringing researchers together from academe and industry in the fields of artificial intelligence, computer science, linguistics, logic, philosophy, and psychology. CSLI’s researchers are united by their common interest in the communication and information processing that ties together people and machines. Their blend of academic disciplines, psychology, communication, linguistics, philosophy, education, along with computer science, gives them a unique perspective on the human side of human interface problems. Like the interface problem, projects at CSLI have both an applied side and a theoretical side. The more applied projects are located in the Interface Lab, and the more theoretical projects are located in the Cognitive Science Center.

On the applied side, researchers are pursuing a wide variety of topics, including machine learning, planning and reasoning, machine-aided translation, language acquisition, text understanding, computer languages, software design strategies, human interface design, access to computers and the internet for people with disabilities, and distance education. On the theoretical side, roughly half the projects deal with languages (natural and computer), and the vehicles by which information is communicated between agents. The others deal with a variety of questions involving the acquisition and manipulation of information: how agents acquire and use information to guide action; what information processing architectures are best suited to various tasks; how representational format affects information processing and human comprehension, and so on.

Course work related to the research at CSLI can be found in the “Program in Symbolic Systems” section of this bulletin.

CSLI is located at the corner of Campus Drive West and Panama Street, in Ventura Hall and Cordura Hall; telephone (650) 723-3084.

LABORATORY FOR ADVANCED MATERIALS

Director: Alexander L. Fetter

The Laboratory for Advanced Materials (LAM) supports the research activities of a number of faculty members from the departments of Applied Physics, Chemical Engineering, Chemistry, Electrical Engineering, Materials Science and Engineering, Mechanical Engineering, and Physics. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for a broad spectrum of scientific research including high temperature superconducting materials and devices, mesoscopic devices, magnetic recording and storage media materials, electronic materials, opto-electronic materials, nanoprobes, materials and devices, highly correlated electronic systems, computational materials science, condensed matter theory and physics, polymeric and biological materials, crystal growth, and thin film synthesis of complex oxides.

The foundation of the research performed at LAM is the Center for Materials Research (CMR). CMR is one of many National Science Foundation Materials Research Science and Engineering Centers (MRSECs) located at various U.S. universities. It provides both analytical and synthesis facilities for the Stanford materials research community and supports multidisciplinary materials research projects involving faculty from many academic departments. It also has programs for undergraduate research, women, and minorities and for outreach to local high schools.

CMR supports a wide range of analytical facilities for advanced materials characterization. This includes electron microprobe analysis (EMPA), micro Raman spectroscopy, Rutherford backscattering (RBS), scanning electron microscopy (SEM), scanning probe microscopy (SPM), transmission electron microscopy (TEM), x-ray diffraction analysis, and x-ray photoelectron spectroscopy (XPS). To serve the synthesis and materials fabrication needs of the community, CMR also supports the vapor phase synthesis facility and bulk crystal growth capabilities. By special arrangement through CMR, high resolution transmission electron microscopy (TEM), nanoindentation, nuclear magnetic resonance spectroscopy (NMR), variable angle spectro-ellipsometry, as well as x-ray absorption spectroscopy techniques (that is, EXAFS, NEXAFS, SEXAFS) and core level photoemission and photoelectron diffraction techniques are available to the materials research community through the Stanford Synchrotron Radiation Laboratory (SSRL).

In addition to the multi-investigator, interdisciplinary research group (IRG) programs, CMR also sponsors seed research projects for new and risky ideas. Its professional staff also conduct research and development of new tools and techniques in areas related to advanced materials synthesis and characterization.

The Laboratory for Advanced Materials is housed in the McCullough Building and the Moore Materials Research Building.

INSTITUTE FOR RESEARCH ON WOMEN AND GENDER

Director: Laura L. Carstensen

During the last decade, research on women and gender has had a profound influence on the social and medical sciences, and the humanities. Since its founding, the Institute for Research on Women and Gender's primary mission is to support scholarship on subjects related to women and gender and to organize educational programs that communicate these findings to a broader public.

Stanford faculty, staff, graduate students, and members of the community work together to stimulate a more informed analysis of issues concerning gender.

Institute projects span a wide range of disciplines but rest on certain shared premises: that gender is a vital category of analysis for contemporary scholarship and policymaking and that the experiences of women as individuals and as a group can best be understood within their historical, social, and cultural contexts. The institute sponsors interdisciplinary research seminars and conferences that examine gender issues in areas such as art, education, employment, family structures, health care, history, law, literature, and psychology. Many scholarly publications have resulted from these activities.

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian

The Hoover Institution, founded in 1919 by Stanford alumnus Herbert Hoover, is a public policy research center where a distinguished group of scholars debate, study, refine and disseminate ideas designed to strengthen society within the context of three core values: individual freedom, private enterprise, and representative government.

Three thematic areas have been established that focus on the interaction of politics and government. Research centers on three broad programs:

American Institutions and Economic Performance, which explores ways to enable the U.S. economy and education, legal, and legislative systems to perform better, thereby providing an ever-higher quality of
life, increased economic opportunity, and greater economic freedom for all citizens.

Democracy and Free Markets, which seeks to understand and foster both the development of democratic processes and institutions and the shift from state control of economies to greater reliance on free markets.

International Rivalries and Global Cooperation, which examines not only questions of war and peace but all types of rivalries and cooperation (economic, political, religious, and cultural) and focuses on interrelationships between countries.

Studies within each of these three areas typically address issues relating to balancing government and private initiatives, promoting individual freedom, and strengthening free-market economies and democratic institutions.

**STANFORD LINEAR ACCELERATOR CENTER (SLAC)**

*Director: Jonathan Dorfan*

The Stanford Linear Accelerator Center is devoted to experimental and theoretical research in elementary particle physics, to the development of theory and new techniques in high energy accelerators, and to research and development in particle detectors. The Stanford Synchrotron Radiation Laboratory (SSRL), a division of SLAC, operates the SPEAR storage ring as a source of intense vacuum ultraviolet and x-ray beams for research in physics, chemistry, biology, and material science. The center is on 425 acres of Stanford property west of the main campus and is operated under a contract with the Department of Energy.

SLAC is operated by Stanford as a national facility so that qualified scientists from universities and research centers throughout the country and world, as well as those at Stanford, may participate in the high energy physics research program of the center. Stanford graduate students may, with the approval of their departments, carry out research for the Ph.D. degree with members of the SLAC faculty. Graduate students from other universities also participate in the research programs of visiting groups.

Research assistantships are available for qualified students by arrangement with individual faculty members. There are also opportunities for summer employment in the research groups at the center. Interested students should contact Professor Schindler, the Graduate Student Adviser.

**STANFORD SYNCHROTRON RADIATION LABORATORY (SSRL)**

*Director: Keith O. Hodgson*

SSRL is a national research facility supported by the Department of Energy for the utilization of synchrotron radiation for research in the natural sciences, medicine, and engineering. SSRL is a division of the Stanford Linear Accelerator Center.

SSRL has research programs in accelerator physics and development of advanced sources of synchrotron radiation, including short-wavelength free electron lasers. The lab is interdisciplinary with students from the following Stanford departments actively pursuing degrees: Applied Physics, Chemical Engineering, Chemistry, Electrical Engineering, Earth Sciences, Materials Science and Engineering, Physics, and Structural Biology.

Students interested in working at the facility should contact a member of the SSRL faculty, one of the Assistant Directors, or other members of the Stanford faculty who use SSRL in their research programs.
Libraries and Computing Resources

STANFORD UNIVERSITY LIBRARIES AND ACADEMIC INFORMATION RESOURCES

University Librarian and Director of Academic Information Resources: Michael A. Keller

Stanford University Libraries and Academic Information Resources develops and implements services within the University libraries that support research and instruction including academic computing functions. These services include acquiring and making available library collections in all formats, establishing policies and standards to guide the use of academic information resources, developing training and support programs for academic uses of computers, and maintaining the on-line library catalog.

In each library unit, reference staff provide general advice on locating and using both print and on-line information sources. Subject specialists and reference librarians offer assistance in specific disciplines either individually or in groups, by lecture to classes on request, tours, demonstrations, or special workshops.

The Academic Computing group supports and enhances instruction and research by providing library and academic computing services and resources. These services include information, advice, and education about academic technology or the use of technology in learning and teaching; operation of the computer clusters and classrooms in Meyer Library; faculty-specific computer resources; and residential computing services.

Information about the scope of collections, physical facilities, and services (such as general borrowing regulations, reserve books, book stack access, interlibrary loans, and photocopies) is available on the World Wide Web (http://www-sul.stanford.edu) and in printed publications and online guides (http://acomp.stanford.edu/acpubs/briefguide/). Anyone wishing further explanation of library services should consult the Privileges Desk or the reference staff in Cecil H. Green Library or academic information staff in the University Libraries branches.

CENTRAL CAMPUS LIBRARIES

The central campus libraries, the Cecil H. Green Library (East and Bing Wings) and the J. Henry Meyer Memorial Library, maintain research collections in the humanities, social sciences, area studies, and interdisciplinary areas. These collections number more than 2,5 million volumes. During regular academic sessions, they are open Monday through Thursday from 8 a.m. to 12 midnight, Friday from 8 a.m. to 6 p.m., Saturday from 9 a.m. to 5 p.m., and Sunday from 1 p.m. to 12 midnight. Library hours information, including hours for holidays, intersessions, and other libraries on campus, is available on the Web at: http://www-sul.stanford.edu/geninfo/libhours.html.

These libraries can seat more than 2,000 readers at one time in a variety of seating arrangements—carrels, lounge areas, tables, computer workstations, individual studies, and group study rooms. Readers will also be able to connect their laptops to the campus network in many library locations beginning in Autumn Quarter 1999.

Major service units housed throughout the Green and Meyer buildings include: the Information Center; the Humanities and Area Studies Reading Room; the Social Science and Government Documents Reading Room; Foreign Language and Area Collections; Access Services; Current Periodicals, Newspapers and Microtexts; and the Interlibrary Services Office. These libraries also house reserves for most graduate and undergraduate courses in the humanities and social sciences.

Green Library also houses the Department of Special Collections and the University Archives. Meyer Library houses the University's Digital Language Lab, computer clusters, technology-enhanced classrooms, and an Academic Technology Lab.

Throughout Green and Meyer, there are computers providing access to the on-line library catalog, photocopy machines, and courtesy and pay telephones.

BRANCH LIBRARIES

Humanities Branch Libraries include the Art and Architecture Library, the Cubberley Education Library, and the Music Library (including the Archive of Recorded Sound).

More information about these libraries is on the Web at: http://www-sul.stanford.edu/geninfo/libraries.html.

COURSES

The following are intended to serve those students for whom a more extended study of bibliographic organization is useful.

ART AND ART HISTORY

236. Art History Bibliography and Library Methods
3 units, Aut (Ross)

FRENCH AND ITALIAN

201E. New Methods and Sources: French and Italian Studies
1-4 units, Aut (Parrine)

GERMAN STUDIES

175A. Modernization, Technology, and Culture in Germany, 1900 to 1945—(Same as 175/275.)
4 units, Spr (Lowood)

MUSIC

200. Graduate Proseminar
4 units, Aut (K. Berger, Nagy)

SLAVIC LANGUAGES AND LITERATURES

200A. Introduction to Library and Archival Research in Slavic Studies
1-3 units, Aut (Fleishman)

LIBRARIES-COORDINATES

J. Hugh Jackson Library, Graduate School of Business
Director: Tim Wei
Lane Medical Library
Director: Peter Stangl
Crown Law Library
Director: Lance E. Dickson
Stanford Linear Accelerator Center Library
Head Librarian: Patricia Kreitz
HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian
Deputy Director: Charles G. Palm

Since its founding by Herbert Hoover in 1919 as a special collection dealing with the causes and consequences of World War I, the Hoover Institution on War, Revolution and Peace has become an international center for documentation, research, and publication on political, economic, social, and educational change in the 20th century.

The library includes one of the largest private archives in the world and has outstanding area collections on Africa, East Asia, Eastern Europe, Russia and the former Soviet Union, Latin America, the Middle East, North America, and Western Europe.

Holdings include government documents, files of newspapers and serials, manuscripts, memoirs, diaries, and personal papers of men and women who have played significant roles in the events of this century, the publications of societies and of resistance and underground movements, and the publications and records of national and international bodies, both official and unofficial, as well as books and pamphlets, many of them rare and irreplaceable. The materials are open to all Stanford students, faculty, and staff, and to scholars from outside the University.

INFORMATION TECHNOLOGY SYSTEMS AND SERVICES (ITSS)

ITSS provides University leadership for the planning, development, acquisition, and operation of University-wide networking and telecommunications services, information systems, data administration, and information technology infrastructure support services for instruction, research, and administrative activities. Core services provided to the Stanford Community include:

Applications support information architecture, planning, and standards
Computer and campus network operations; and assessment and application of new technologies
Data administration, data warehouse services
Data, voice, and video communications
New information systems acquisition, assembly, and integration
Technology training, consulting, and help desks

More information about the complete range of ITSS services, supported systems, and application initiatives can be found on the web at: http://www-leland.stanford.edu/dept/itss.

COMPUTING SERVICES

Production computing services are provided by ITSS from both the Leland and Forsythe Operations Centers. These services include access to distributed software (for example, Netscape and Eudora), public domain software, major programming languages, commercial statistical packages, Stanford developed applications, and the Stanford University Network (SUNet). Stanford faculty, staff, and students who have a valid Stanford ID may apply for a SUNet ID (Stanford University Network Identifier) on the web at: http://www-leland.stanford.edu/group/itss/services/sunetid. SUNet IDs provide access to Stanford’s network and the Internet, an email account, disk space for Web pages and email, and site-licensed software. Additionally, ITSS computer based services include screen-text editing (WYLBUR, emacs, pico), electronic mail (EMS, elm, pine) and formatting (SCRIPT) for preparing reports, data, and theses; SPIRES, the Stanford-developed data-base management system; Oracle and Sybase relational database environments; Prism, the on-line collection of Stanford administrative files and services; and Folio, the on-line collection of Stanford’s academic and institutional data resources, including a large number of index and citation databases (ERIC, GeoREF, Lexis/Nexis, Merck, Federal Register); Socrates, Stanford’s on-line library catalog; Usenet newsgroups, World Wide Web services, and an increasing number of client/server based applications including the Oracle financial applications. Detailed information regarding these services is available on the web at: http://www-leland.stanford.edu/dept/itss/services. Specific questions regarding ITSS computing services can be sent to consultforsythe.stanford.edu, or call (650) 725-8181.

VOICE, VIDEO, DATA, AND NETWORKING

ITSS provides telephone, paging, and video conferencing services for Stanford faculty, staff, and students and also runs the paging service for the hospital. The internal network maintained by ITSS allows for high speed access to Stanford networking services and external networks including the Internet. Dial-in service through the modem pool allows remote access to University host computers. ISDN support has recently been added to the range of ITSS services, and an agreement with Internet Service Provider NetCom allows for discounted subscription rates for high-speed dial-in access for Stanford faculty, staff, and students. Additionally, ITSS manages Stanford’s cable television channel, Channel 51, and the STV cable subscription service for students residing on campus.

COURSES

UNIX, Leland, E-mail—Introductory information about UNIX on the Leland Systems, the EM-ACS text editor, electronic mail, and the Tresidder and Meyer Computer Clusters. Full class descriptions are available on the web at: http://consult.stanford.edu/introclasses.html.

The Stanford Computer Environment, the Internet, Portfolio, Windows, and Macintosh Applications—Word processing and text formatting, database management, statistical and programing applications, desktop publishing, spreadsheets, html, and communications. Class descriptions, schedules, and registration information are available on the web at: http://www-leland.stanford.edu/group/itss-customer/ip/.

646
The Continuing Studies Program

Dean and Associate Provost: Charles Junkerman

The Continuing Studies Program provides adult members of the surrounding communities with the opportunity to take classes on a part-time basis for intellectual enrichment, both personal and professional. Courses are offered in all four academic quarters, with over 275 courses planned for the 1999-2000 academic year.

The faculty are drawn from the ranks of the University’s distinguished professoriate. The program presents a wide variety of courses, with a central concentration in such humanities disciplines as art, literature, history, and music.

Tuition discounts are available to University employees and their spouses/domestic partners, Stanford students and their spouses/domestic partners, Stanford Alumni Association members, teachers (K-12), and those over age 65.

For a course catalogue, contact the: Continuing Studies Program, Building 590, Room 103, Stanford, CA 94305, phone (650) 725-2650, fax (650) 725-4248, email: continuingstudies@stanford.edu, or visit the website at: http://continuingstudies.stanford.edu.

The Continuing Studies Program also administers The Stanford Channel, an educational cable television station; The Master of Liberal Arts Program; Summer Session; and portions of alumni education.

MASTER OF LIBERAL ARTS PROGRAM

Assistant Dean and Lecturer in English: Linda Paulson

Participating Faculty: Marc Bertrand (Professor, French), Eavan Boland (Professor, English), John Bravman (Professor, Material Sciences and Engineering), Wanda Corn (Professor, Art and Art History), Larry Friedlander (Professor, English), Hester Gelber (Professor, Religious Studies), Tom Hare (Professor, Asian Languages), Charles Junkerman (Dean, Continuing Studies Program), Marsh McCall (Professor, Classics), Mark Mancall (Professor, History), David Palumbo-Liu (Professor, Comparative Literature), Linda Paulson (English), Dennis Phillips (Professor, Education, and Philosophy), John Rick (Professor, Anthropological Sciences), Paul Robinson (Professor, History), Steven Zipperstein (Professor, History), Eriné Young (Co-director, Center for Biomedical Ethics)

Program Description—The Master of Liberal Arts (MLA) Program aims to provide a flexible, interdisciplinary program for returning adult students who seek a broad education in the liberal arts. The underlying premise of the MLA program is that knowledge gained through an interdisciplinary course of study leads to intellectual independence and satisfaction not always found in discipline-based programs of study. The goals of the MLA program are to develop advanced critical thinking, to foster intellectual range and flexibility, and to cultivate an individual’s ability to find the connections among different areas of human thought: art, history, literature, music, philosophy, political science, science, and theology.

The program is designed with part-time students in mind: seminars meet in the evening, and students complete the degree in 4-5 years. All master’s seminars are taught by members of the Stanford faculty who are experienced in working with students at the graduate level. Class size is limited to 20 students.

Degree Requirements—Candidates for the MLA degree must complete a minimum of 36 units of course work. These units must include two 3-unit core seminars for entering students, at least seven 3-unit MLA seminars, and a 2-unit master’s thesis. The remainder of the 36-unit requirement may be fulfilled by additional MLA seminars or by relevant Continuing Studies Program course offerings. Students must also fulfill distribution requirements by taking at least 2 units of credit in each of the following areas: humanities; social science or social policy; and science, engineering, or medicine.

MLA Seminars—To maintain minimum progress toward the degree, students should complete at least two of the required seven seminars per year. Each year, at least nine seminars are offered in the MLA program. Each MLA course requires a substantial seminar paper. Students are encouraged to use these papers as a way to investigate new fields of interest, as well as a way to develop different perspectives on issues in which they have an ongoing interest.

Core Seminars—The first core seminar for entering students, whose thematic focus varies from year to year, prepares students to do interdisciplinary graduate work at Stanford. Students concentrate on writing a critical argumentative graduate paper, conducting library research, presenting the results of their research, and productively participating in a collaborative seminar. This course is required of entering students in the Autumn Quarter of their first year; occasionally, it is offered in the Summer Quarter.

The second core seminar explores the history of literary criticism from classical times to the present, while at the same time focusing on such fundamental issues as the nature and formation of the canon, the validity of critical interpretation, and the relationship between literature, philosophy, and history. This course is required of entering students in the Spring Quarter of their first year.

Master’s Thesis—The MLA program culminates in the master’s thesis. Students approaching the end of the program write a thesis, approximately 50-75 pages in length, that evolves out of work they have pursued during their MLA studies. The thesis is undertaken with the prior approval of the MLA program, and under the supervision of a Stanford faculty member. During the process of writing the thesis, students are members of a work-in-progress group, which meets regularly to provide peer critiques, motivation, and advice. Each student presents the penultimate draft of the thesis to a colloquium of MLA faculty and students, in preparation for revising and submitting the final draft to the adviser and to the MLA Program. Additional information can be obtained from the Continuing Studies Program, Building 590, Room 103, Stanford, CA 94305, phone (650) 725-2650, fax (650) 725-4248.

COURSES

102. The Plague: An Introduction to Interdisciplinary Graduate Study—Required course for incoming MLA students.
3 units, Aut (Paulson)

68. Biography and Biographers in Fiction, Memoir, and Elsewhere
3 units, Aut (Zipperstein)

69. Ethical Questions and Controversies in Select Medical Specialties
3 units, Aut (Young)

70. Complex Societies: The Archaeological Origins of Human Inequality
3 units, Win (Rick)

71. Traditional Chinese Poetry and English Romantic Poetry: Reading Landscapes
3 units, Win (Palumbo-Liu)

72. 1855-1857: A Reading of Charles Dickens’ Little Dorrit
3 units, Win (Paulson)

73. Medieval Japan
3 units, Spr (Hare)
74. Evolution and Philosophical thought in the Late 19th and 20th Centuries
3 units, Spr (Phillips)

105. From Plato to Post-Modernism: A History of Literary Criticism—Required course for first-year MLA students.
3 units, Spr (Evans)

75. Chateau Culture of Renaissance France
3 units, Sum (Bertrand)

76. Comparative Political Issues
3 units, Sum (Dorfman)

SUMMER SESSION

Assistant Dean and Director: Roberta Bassett
Program Coordinator: Carolyn Faszholz

Students attending Stanford Summer Session enroll in either the Regular Degree Program or the Summer Visitor Program.

The Regular Degree Program is for students who are candidates for a Stanford degree and who are continuing their academic work in the Summer Quarter. Degree-seeking Stanford students should indicate on Axess (during Summer Quarter) their intention to register for the Summer Quarter. Separate application is not required.

The Summer Visitor Program is for students who are not presently candidates for a Stanford degree. It is open to persons 18 years or older, and high school students who have completed their junior year. High school students may only attend if admitted to Stanford’s Summer Session through the Summer College for High School Students.

Students in the Summer Visitor Program enjoy all the privileges of students in the Regular Degree Program except that work completed cannot apply toward a Stanford degree or credential until the student has been admitted to regular standing. Admission as a summer visitor does not imply later admission to matriculated status. However, should the visitor matriculate at a later date through normal admission procedures, the summer work may, in most cases, be applied toward the requirements for a Stanford degree or credential.

Students who are interested in the Summer Visitor Program may call (650) 723-3109, email: summersession@stanford.edu, or fax their request for a copy of the Stanford University catalogues, Summer Session or Summer College for High School Students, to (650) 725-6080, or write to the Summer Session Office, Building 590, Stanford University, Stanford, CA 94305-3005. These catalogues include all the pertinent information (including fees, housing, activities, course listings) and an application form. All information listed in both catalogues is posted on the World Wide Web and is updated each February. The Summer Session web address is http://summersession.stanford.edu.
Student Services and Programs

STUDENT AFFAIRS

Student Affairs supports the academic mission of the University by providing a climate conducive to living and learning in a diverse community. The organization encompasses a broad range of programs and services for undergraduate and graduate students in the areas of health services, student life, residential education, advising and tutoring, career services, housing and food services, financial services, and registration. It serves the wider community through the Haas Public Service Center and is responsible for the information systems and institutional reporting on students, courses, and classrooms.

The Vice Provost for Student Affairs provides policy direction, administrative support for budget, personnel, facilities, and development, and has oversight of the efficiency and effectiveness of each of the organization's units. The Vice Provost interacts with the President, the Provost, the University Cabinet, schools, department representatives, and students, and is an ex officio member of the Senate of the Academic Council.

DEAN OF STUDENTS

The Office of the Dean of Students seeks to ensure that the University is sensitive and responsive to the needs of students. The office is responsible for several administrative offices and community centers including the Asian American Activities Center; Bechtel International Center; Black Community Services Center; Disability Resource Center; El Centro Chicano; Judicial Affairs; Lesbian, Gay, and Bisexual Community Center; Native American Cultural Center/American Indian Program Office; New Student Orientation; Office of Multicultural Education; Tresidder Memorial Union; the Office of Student Activities, including Greek Affairs; and the Women's Center. The office also provides consultation and coordination with approximately 450 student organizations, student media, activities, publications, and the Associated Students of Stanford University. The office is located in Tresidder Memorial Union, telephone (650) 723-2733. Students are welcome to visit the Dean of Students to discuss ideas, personal issues, or general concerns about student life.

DISABILITY RESOURCE CENTER (DRC)

The Disability Resource Center is the central administrative office that coordinates a variety of services and resources for undergraduate and graduate students with documented disabilities. The students who use the DRC's services have a variety of disabilities, including mobility impairments, learning disabilities, chronic illness, psychological disabilities, and sensory disabilities. The mission of the DRC is to provide disabled students with access to all facets of university life: education, housing, recreation, and extracurricular activities. To initiate services, a student's disability-related needs. Students who are eligible for services are asked to submit professional documentation of their disabilities to the DRC. Services may include, but are not limited to, books on tape, braille, a distraction-free room for taking examinations, extended time on examinations, notetaking, oral or sign language interpretation, and stenocaptioning. The DRC also has available adaptive computer equipment in a work station in Meyer Library. During the academic year, the DRC runs a golf cart service called DisGo Cart for use by students with temporary and permanent mobility impairments. The DRC is located at 123 Meyer Library; office hours are 9 a.m. to 12 noon and 1 to 5 p.m., Monday through Friday. For more information call the DRC at (650) 723-1066 (voice) or 723-1067 (TDD).

INTERNATIONAL CENTER

The Bechtel International Center (I-Center) is a meeting place for students and senior research scholars at Stanford from throughout the world and for internationally oriented U.S. students, faculty, and visitors on the campus. Through a variety of social, cultural, and educational programs, I-Center facilities are utilized to acquaint students and scholars with the life of the University and the community, and to bring them together in activities of mutual interest.

The I-Center emphasizes the international dimensions of the University through its counseling services, through the cultural contributions to campus life by the various nationalities represented, and by bringing to the attention of U.S. students the many opportunities for work, volunteerism, study, and travel abroad.

Responsibilities of the I-Center advisers, working closely with the University's academic departments, include advising foreign students on matters such as immigration, housing, practical training, transactions with foreign governments, study programs, and financial-aid problems; counseling in personal matters relating to academic performance, psychological and cultural adjustment, and proficiency in English; coordinating the international reception and orientation program; encouraging utilization of foreign students as resource people in a variety of academic programs; and evaluating the Stanford experience after the students return home.

TRESIDDER MEMORIAL UNION

Tresidder Memorial Union (TMU) is a center of community activity on the Stanford campus. It houses a variety of food services; meeting rooms for special occasions; a campus information center; branch offices and ATMs for the Stanford Federal Credit Union, and Wells Fargo; ATMs for Bank of America; a fitness center; and a hairstyling shop. Tresidder Express carries groceries, magazines, and sundries. A full range of food services is provided at TMU.

TMU is also the home of the Associated Students of Stanford University (ASSU), and the Office of the Vice-Provost for Student Affairs and the Office of Student Activities/Dean of Students office.

To learn more about activities in Tresidder Union, as well as events on and off campus and employment opportunities, stop by the Information Center on the first floor, or telephone (650) 723-3384.

VOLUNTARY STUDENT ORGANIZATIONS

At its March 1963 meeting, the Board of Trustees adopted the following policy:

"Students are encouraged to study, discuss, debate, and become knowledgeable about contemporary affairs. Expressing opinions or taking positions with respect to these matters is up to the individual students or to volunteer groups of students so constituted that they are authorized to speak for their members. This is not a function of student government at Stanford."

"All students are required to become members of the Associated Students of Stanford University, which represents them with respect to student affairs on the Stanford campus. The student government, under this policy, is not authorized to speak for students on other matters."

"Under such regulations as may be established from time to time by the President of the University, students may form voluntary organizations constituted to speak for their members with respect to matters outside the scope of student government, provided such organizations clearly identify themselves and, in any public statements, make it clear that they do not represent or speak for the University or the Associated Students."

"Any questions concerning the interpretation and application of this policy shall be resolved by the President of the University."

Voluntary student organizations are those organizations: (1) in which membership is not mandatory, (2) in which membership is both open and limited to members of the Stanford community, that is, Stanford students, faculty members, and staff, and their immediate families, and (3) whose purposes and procedures are not inconsistent with the goals and standards
of the University. In order to use University facilities and/or the Stanford name, all voluntary student organizations must register with the University through the Office of Student Activities/Dean of Students Office on the second floor of Tresidder Memorial Union.

As conditions of registration, each voluntary student organization must file the following:

1. A statement of purpose and organizational constitution.
2. A statement about membership eligibility.
3. A statement that, should Stanford facilities be used for the generation or collection of funds, all funds of the organization shall be deposited with the Students’ Organizations Fund (SOF) in the ASSU Office and shall be handled by the Treasurer of the organization in the manner prescribed by the rules and regulations of the fund and of the ASSU. (Sectarian religious organizations in the Stanford enclaves may be exempt from the requirement of membership in the SOF, with the approval of the ASSU Student Financial Manager and Office of Student Activities.)
4. Identification of the authorized representative of the group, who must be a currently registered student, and at least five active members in the organization who are currently registered students.

Each voluntary student organization must renew its registration with the University annually, early in Autumn Quarter, by submitting the name of the new authorized representative or by reconfirming the current representative, and by updating other information.

If a voluntary student organization that is registered with the University seeks to use University facilities for meetings open to more than its own members and to specifically invited guests, such meetings shall be subject to the regulations of the Committee on Public Events. Contact Non-academic Facilities Scheduling, the Registrar’s Office, Old Union, for further information about nonacademic room scheduling.

A voluntary student religious organization may hold open meetings in University facilities only with the approval of the Office of the Dean of the Chapel.

A registered voluntary student organization may advocate publicly a position on a public issue, provided the organization clearly identifies itself, and provided such an organization in any public statement makes clear it does not represent or speak for the University or for the Associated Students.

No student group may use University space or facilities or receive University support for purposes of supporting candidates for public office. In accordance with procedures governing public events, groups supporting candidates may have use of public places such as White Plaza for tables, speeches, and similar activities; may have intermittent use of on-campus meeting rooms; and may request to reserve auditoriums and similar space for public events including speeches by political candidates.

Religious Activities—Religious and ethical concerns are shared by a significant number of Stanford undergraduate and graduate students, many of whom are actively involved in a variety of campus religious organizations.

The University’s commitment to the process by which convictions and values are defined and sharpened is manifest in its chaplaincy staff, and its support of the diverse religious groups on campus. Central in Stanford’s history, from its founding, is multi-faith exploration and dialogue—a vital part of both ethos and education in this institution. For further information about religious life at Stanford, call Memorial Church (650) 723-1762.

JUDICIAL AFFAIRS AND STUDENT CONDUCT

In March 1996, President Gerhard Casper convened the Committee of 15 and requested a review of the student judicial charter. During the following year, the Committee of 15 conducted an extensive review of the existing judicial charter and process and drafted a new charter to take its place. The Student Judicial Charter of 1997 was approved by the Associated Students of Stanford University, the Senate of the Academic Council, and the President of the University during Spring Quarter 1996-97 and Autumn Quarter 1997-98, and became effective in January 1998. Cases of alleged violations of the Honor Code, Fundamental Standard, and other student conduct policies now proceed through an established student judicial process based upon the Student Judicial Charter of 1997.

STUDENT JUDICIAL CHARTER OF 1997

SECTION I: INTRODUCTION

Living and working in a University community dedicated to high standards of academic honesty and personal integrity can be an extraordinary educational experience. At Stanford, students, faculty, and staff have collectively agreed to be committed to the standards set forth in the Fundamental Standard and Honor Code. These eloquent statements have served the University community well since 1896 and 1921, respectively. When it has been alleged that a student has violated the Honor Code or Fundamental Standard, students, faculty, and staff must also share a commitment to the system used to adjudicate the alleged violation. Such allegations are extremely serious matters and must be dealt with in the most fair and even-handed manner possible.

This Charter describes the elements, procedures, and functions of the judicial system that goes into effect when there has been a formal complaint alleging that a Stanford student has violated the Honor Code, Fundamental Standard, or other applicable University student conduct policies. The judicial system described in this Charter is based on three fundamental principles:

To affirm the importance of the Honor Code and Fundamental Standard as critical parts of campus life at Stanford.

To guarantee students a central role in establishing judicial policy and adjudicating cases.

To protect the rights of all individuals involved in judicial affairs, while upholding the highest possible standards of honesty and mutual respect.

The judicial system described here replaces the Legislative and Judicial Charter of 1968 (as amended) and all student judicial procedures described therein. University judicial policy applies to all on-campus activities, even during vacation periods and summer. This University judicial policy does not apply to alleged offenses committed off-campus, except those associated with participation in University activities.

SECTION II: FUNDAMENTAL RIGHTS

This section enumerates the rights guaranteed by the Judicial Charter to all parties.

A. Rights of the Accused—Students accused of misconduct have the following rights:

1. To be considered innocent until found guilty beyond a reasonable doubt.
2. To be informed, in writing, of any formal complaint of alleged misconduct against them.
3. To be informed, in writing, of formal charges filed against them, the evidence upon which the charges are based, the names of the complainants and the names of potential witnesses against them.
4. To be given access to all evidence in the case, both incriminating and exculpatory.
5. To be given the opportunity to choose an open hearing. This choice must be made at least one week before the beginning of the Judicial Panel hearing.
6. To be allowed a reasonable time to prepare a defense prior to Judicial Panel hearings.
7. To be assured that no record of any violation or alleged violation will be placed on their transcript. Where the sanction of an Honor Code violation is modification of a grade, no reference will be made to the cause of the grade change.
8. To be given access to a list of impartial and confidential volunteer Judicial Counselors who may be consulted for advice and guidance during judicial procedures.
9. To appear before the Judicial Panel considering the charges and to respond to the charges in writing. In the event the accused is away from the Stanford campus, the proceedings shall be scheduled in such a way as to allow them a reasonable opportunity to participate.

650
10. To have a person of their choice accompany them throughout the investigative and adjudicative process. This individual may assist the accused student during judicial procedures. The Board on Judicial Affairs shall have the power to enact By-laws establishing policies and guidelines specifying the nature of the adviser’s role.

11. To call witnesses on their behalf at Judicial Panel hearings and to cross-examine witnesses against them. The Board on Judicial Affairs shall have the power to specify in its By-laws limited types of evidence that shall be considered admissible without cross-examination. In all other cases, evidence provided by a witness who is unwilling or unable to be cross-examined will be disregarded.

12. To have a timely determination of the charges.

13. To be sent a written statement of the Judicial Panel’s decision.

14. To have the right to appeal an adverse decision (bases for appeal are defined in Section III.H.1).

15. To be assured that their identity and the circumstances of allegations against them will be kept confidential, except in specific circumstances identified in the By-laws of the Board on Judicial Affairs.

16. To refuse to engage in self-incrimination.

17. To not be charged with both a general violation of the Fundamental Standard and a specific Student Conduct Policy for the same alleged misconduct.

18. To not be charged again, after having found not guilty by a Judicial Panel, for the same alleged misconduct.

19. To be offered reasonable protection from retaliation, intimidation, harassment and/or malicious prosecution.

20. To be given, upon request, a verbatim record of their Judicial Panel hearings, excluding Panel deliberations.

21. To have no charges filed more than six months after the alleged misconduct.

22. To be informed, in writing, of their rights.

B. Rights of the Complainant—The rights of a complainant in any case are:

1. To appear at Judicial Panel hearings.

2. To submit a statement in writing, which does not preempt the right of the accused to cross-examine the complainant during Panel Hearings.

3. To know that all cases in which charges have been filed by the Judicial Officer will be considered by a Judicial Panel.

4. To be given access to a list of impartial and confidential volunteer Judicial Counselors who may be consulted for advice and guidance during judicial procedures.

5. To request a Judicial Panel to hear evidence in cases in which no formal charges are filed by the Judicial Officer.

6. To withdraw the complaint at any time and, if so, to be assured of confidentiality and anonymity.

7. To be offered reasonable protection from retaliation, intimidation, or harassment in response to their complaint.

8. To have a person of their choice accompany them throughout the investigative and adjudicative process. This individual may provide advice and counsel, but may not speak on behalf of, or otherwise represent the complainant during judicial procedures.

9. To be assured of the confidentiality of discussions with Judicial Counselors.

10. To be informed of the progress and outcome of the complaint, with the understanding that this information will be kept confidential.

11. To be informed, in writing, of their rights as defined under this charter.

C. Rights of Witnesses—The rights of a witness in any case are:

1. To refuse to engage in self-incrimination.

2. To be offered reasonable protection from retaliation, intimidation and/or harassment.

3. To be informed, in writing, of these rights.

D. Cooperation of All Parties—Both the complainant and the accused student are expected to cooperate fully with an investigation of the facts of a case and with the adjudicative process. Similarly, in keeping with the principles set forth in the Honor Code and Fundamental Standard, all parties with knowledge of facts pertaining to a case of alleged student misconduct are expected to cooperate fully with the investigation of the facts of the case and must appear, if requested, at Judicial Panel hearings. In addition, all parties are expected to be respectful of the confidential nature of any knowledge or information they may have about a judicial case or the other parties involved. No person shall be required to engage in self-incrimination as part of any judicial proceeding.

SECTION III: JUDICIAL PROCEDURES

This section summarizes the key components of the Judicial System.

A. Board on Judicial Affairs—The Board on Judicial Affairs is a standing committee of students, faculty, and staff that oversees all aspects of judicial affairs.

1. Composition

   a) The Board on Judicial Affairs shall be composed of six student members appointed by the Senate of the Associated Students of Stanford University, six faculty members appointed by the Senate of the Academic Council, and three University administrators appointed by the Provost. The Board shall be drawn from a wide spectrum of the Stanford community and must include both undergraduate and graduate students.

   b) Members of the Board shall be appointed to one- or two-year terms. Members may be appointed to multiple terms.

   c) The Senate of the Associated Students of Stanford University shall determine the date on which the terms of student members of the Board shall begin and end.

2. Powers

   a) The Board shall have the exclusive power to adopt or modify By-laws specifying policies and procedures pertaining to judicial affairs. All such By-laws must be consistent with this Charter.

   b) Whenever the Board adopts or modifies its By-laws, it shall inform the community, and shall forward the text of the changes to the chair of the Senate of the Associated Students of Stanford University, the chair of the Senate of the Academic Council, and the President of the University.

   c) Any By-law adopted or modified by the Board can be overruled by any one of the three following entities: the Senate of the Associated Students of Stanford University, the Senate of the Academic Council, the President of the University.

   d) The Board has the authority to adopt and/or modify the Student Conduct Penalty Code.

   e) Whenever the Board adopts or modifies the Student Conduct Penalty Code, it shall inform the community, and shall forward the text of the changes to the chair of the Senate of the Associated Students of Stanford University, the chair of the Senate of the Academic Council, and the President of the University.

   f) Any adoption or modification of the Student Conduct Penalty Code can be overruled by any one of the three following entities: the Senate of the Associated Students of Stanford University, the Senate of the Academic Council, and the President of the University.

   g) The Board shall have the exclusive power to propose amendments to this Charter, which must be approved as specified in Section IV.

3. Procedures

   a) The Board may conduct official business only in the presence of at least eight members, provided at least two students, two faculty members, and one University administrator are present.

   b) Actions by the Board shall require a majority vote of those present and voting.

   c) The Board shall have the power to adopt rules of procedure to govern its own actions, provided that a two-thirds majority of those present and voting agree.

   d) All members of the Stanford community are invited to propose suggestions about modification of judicial procedures to the Board.

B. Judicial Panel Pool—The Judicial Panel Pool is the body of students, faculty, and staff from which Judicial Panels and Final Appeal
Panels are chosen by the Judicial Adviser. Members of the Judicial Panel Pool are trained each academic year by the Judicial Adviser and can be called upon to serve on either Judicial Panels or Final Appeals Panels, as needed. The Judicial Panel Pool shall consist of both undergraduate and graduate students appointed by the Senate of the Associated Students of Stanford University, faculty appointed by the Senate of the Academic Council, and University staff appointed by the Provost. The Judicial Panel Pool shall consist of at least 30 members.

C. Judicial Panels—Judicial Panels hear all cases when formal charges have been filed by the Judicial Officer.

1. Composition:
   a) A Judicial Panel will be comprised of six members chosen from the Judicial Panel Pool, four of whom will be students and two of whom will be faculty or University administrators.
   b) Judicial Panels will be chaired by a student member.
   c) At least one faculty member must serve on any Judicial Panel considering cases in which a violation of the Honor Code is alleged.
   d) The Judicial Adviser will endeavor to select Panel members who are not acquainted with either the complainant or the accused.
   e) The Judicial Adviser will ensure that no Panel member is biased or has a conflict of interest in a case being considered. Both the complainant and the accused may request the removal of Panel members who they believe are biased or have a conflict of interest.
   f) If a Judicial Panel member discovers that they have a conflict of interest, or a perceived conflict of interest in a case being considered, they may withdraw and be replaced.

2. Powers:
   a) To review all charges of violations of the Fundamental Standard, Honor Code, or other appropriate University policies filed by the Judicial Officer.
   b) To determine whether the alleged violations occurred.
   c) To determine the appropriate sanctions if the Panel finds that the alleged violations did occur.
   d) To hear evidence and argument of the complainant and the accused in cases in which no formal charges have been filed by the Judicial Officer. The Panel has the authority to instruct the Judicial Officer to file appropriate charges in such cases (see sections II-B.5 and III-I.5).

3. Procedures:
   a) A Panel may convene only in the presence of all members.
   b) Determination of guilt requires agreement of five of the six Panel members.

D. Judicial Adviser—The Judicial Adviser is the chief administrator of judicial affairs and is a neutral party in all cases. The primary role of the Judicial Adviser is to advise all parties and to assist with judicial processes.

The specific duties of the Judicial Adviser are to:
1. Serve as a neutral party in all cases.
2. Serve as primary adviser on judicial procedures to all parties.
3. Train the Judicial Panel Pool members.
4. Appoint the members to Judicial Panels from the Panel Pool.
5. Provide general assistance to Judicial Panels upon request.
6. Serve as principal spokesperson for the University on Judicial Affairs.
7. Train the pool of volunteer Judicial Counselors.
8. Provide the accused students and complainants a list of volunteer Judicial Counselors.
9. Provide general oversight of all judicial procedures and act as liaison to the Board on Judicial Affairs.
10. Ensure that all Judicial Panel proceedings are recorded.
11. Inform the accused students of the outcome of Judicial Panel hearings and inform students found guilty of their sanctions and right to appeal.
12. Appoint a Final Appeals Panel and provide general assistance in Final Appeals Panel hearings.

13. Inform the accused students of the outcome of Final Appeals Panel hearings.
14. Inform all parties, in writing, of their rights under this charter.

E. Judicial Officer—The Judicial Officer is the principal investigator in all cases in which a complaint of an alleged violation of the Honor Code, Fundamental Standard, or other University student conduct policy has been filed. The Judicial Officer meets with all knowledgeable parties and gathers incriminating and exculpatory evidence. The Judicial Officer shall decide if there is sufficient evidence to support formal charges against the accused student. If so, the Judicial Officer will present all relevant evidence at the Judicial Panel hearing and, if necessary, at Final Appeals Panel hearings.

The specific duties of the Judicial Officer are to:
1. Receive all reports of alleged student misconduct.
2. Meet with the individual reporting misconduct.
3. Receive the formal complaint.
4. Notify the accused student of complaint and names of complainants.
5. Investigate the complaint and gather incriminating and exculpatory evidence.
6. Determine if there is sufficient evidence of misconduct to file formal charges against a student. The Judicial Officer may refer a case to another office when appropriate.
7. Inform the accused student of charges, the evidence upon which charges are based and the names of potential witnesses at Judicial Panel hearings.
8. Present evidence at Judicial Panel hearings and Final Appeals Panel hearings if necessary.
9. Inform complainants of the outcome of Judicial Panel hearings and, if necessary, Final Appeals Panel hearings.
10. Inform the Board on Judicial Affairs (without divulging the names of the accused) of the essential elements of all cases in which formal complaints did not result in the filing of charges.

F. Judicial Adviser and Judicial Officer—Working jointly, the Judicial Adviser and Judicial Officer will:
1. Meet with, report to, and assist the Board on Judicial Affairs.
2. Be involved with community outreach and education.
3. Summarize and report judicial cases to University community. These summaries shall not reveal the confidential aspects of any case.
4. Preserve all evidence and testimony obtained during investigation of charges for one year following final decision.
5. Ensure enforcement of sanctions in collaboration with the Registrar, the Dean of Students, and other appropriate University personnel.

G. Judicial Counselors—Judicial Counselors are trained, current or former members of a Judicial Panel Pool, or others who agree, on a voluntary basis, to provide confidential assistance to accused students and complainants in cases in which they are not involved as a member of a Judicial Panel.

H. Final Appeals Panel—A Final Appeals Panel is appointed by the Judicial Adviser whenever students found guilty appeal a decision made by a Judicial Panel. They should normally do so within one month of being notified of the outcome of Judicial Panel hearings.

1. The Bases for Appeal are:
   a) Demonstration of a significant procedural error.
   b) The availability of compelling new evidence.
   c) Demonstration of bias on the part of a member of any Judicial Panel involved in the case.
   d) Misconduct on the part of the Judicial Officer or the Judicial Adviser.
   e) Demonstration that any rights of the accused enumerated in this charter have been violated.

2. Composition:
   a) The Final Appeals Panel will be comprised of six members chosen from the Judicial Panel Pool, four of whom will be students and two of whom will be faculty or University administrators.
   b) Final Appeals Panels will be chaired by a student member.
c) At least one faculty member must serve on any Final Appeals Panel, considering cases in which a violation of the Honor Code is alleged.

d) The Judicial Adviser will endeavor to select Panel members who are not acquainted with either the complainant or the accused.

e) The Judicial Adviser will ensure that no Panel member is biased or has a conflict of interest in a case being considered. Both the complainant and the accused may request the removal of Panel members who they believe are biased or have a conflict of interest.

f) If a Judicial Panel member discovers that they have a conflict of interest, or a perceived conflict of interest in a case being considered, they may withdraw and be replaced.

g) No member of the Final Appeals Panel may have served on the Judicial Panel that considered the case being appealed.

3. Powers: The Final Appeals Panel has the following options.

a) To deny the appeal.

b) To return the case to the original Judicial Panel.

c) To convene a new Judicial Panel to rehear the case.

d) To reduce the sanctions.

e) To dismiss the original charges.

4. Procedures:

a) A Final Appeals Panel can convene only in the presence of all members.

b) All decisions of the Panel must be made with the affirmation of four of six members.

1. Procedural Overview—Judicial procedures begin when a Stanford faculty member, student, or staff member files a formal complaint of an alleged violation of the Honor Code, Fundamental Standard, or Student Conduct Policy with the Judicial Officer. The steps outlined below define judicial procedures after a formal complaint has been filed. An available flowchart provides an overview of the sequence of judicial procedures after a complaint has been filed and recommended timelines that should be applicable in a majority of cases.

1. A formal complaint should be made within sixty (60) days of the date of discovery of the evidence upon which it is based.

2. Within one week of receipt of a formal complaint, the Judicial Officer should notify the accused student in writing of the nature of the complaint.

3. As a neutral party, the Judicial Adviser is available to advise both the accused student and the complainant about judicial procedures. The Judicial Adviser will provide a list of impartial and confidential volunteer Judicial Counselors who are available to assist the accused student and the complainant.

4. The Judicial Officer will meet with all knowledgeable parties and gather relevant evidence. After conducting a thorough investigation, the Judicial Officer has three options: (a) to file formal charges against the accused student, (b) to refer the case to another appropriate office, or (c) to refrain from taking any formal action. If charges are filed, the student will be informed of all charges, all incriminating and exculpatory evidence related to the charges, the names of the complainants and the names of potential witnesses against them.

5. In cases in which no charges are filed by the Judicial Officer, the complainant may still request that a Judicial Panel hearing be held in order to hear the evidence against the accused student and exculpatory evidence. The accused will be informed in writing of the hearing and will be allowed to testify and present evidence before the Panel. The Panel can instruct the Judicial Officer to file formal charges. If this occurs, a new Judicial Panel will be convened to hear the case resulting from the charges.

6. All cases in which formal charges have been filed must be heard by a Judicial Panel. The Judicial Adviser shall appoint members of the Judicial Panel from the Judicial Panel Pool within three weeks of charges being filed. At Judicial Panel hearings, the Judicial Officer will present all evidence relevant to the complaint. The Judicial Officer has the responsibility to present evidence which supports the charges as well as any extenuating circumstances or exculpatory evidence uncovered during the investigation. The Judicial Adviser will be present at the hearings to record the proceedings and to answer general questions about judicial procedures.

7. Judicial Panel hearings are usually closed to the public unless the accused student files a request for an open hearing at least one week in advance of the hearing.

8. At Judicial Panel hearings both the accused and the complainant may choose to be accompanied by a friend or adviser. The accused need not appear before the Panel and may choose to respond to the charges in writing. The accused may answer the charges, call witnesses on their behalf, and cross-examine those giving testimony against them.

9. Presentation of evidence and testimony, as well as, questioning of the accused and of witnesses at Judicial Panel hearings shall be conducted in a manner that is courteous to all participants, that is devoid of intimidation and harassment, and that limits discussion to information relevant to the facts and issues of the case.

10. Following the conclusion of the Judicial Panel proceedings, the Panel will meet in a closed session to determine the disposition of the charges. The Panel may request information from the Judicial Adviser regarding rules and procedures. At that time the Panel may (a) dismiss the case for insufficient evidence, (b) find that no violation occurred, or (c) find that a violation did occur. If the Panel finds that a violation did occur, they may also impose appropriate sanctions. Sanctions shall be determined in accordance with precedent and the Student Conduct Penalty Code. Considerations in determining sanctions shall include the nature and seriousness of the offense, extenuating circumstances, and prior violations.

11. The Judicial Adviser will prepare a letter to the accused student which summarizes the findings of the Judicial Panel and, if guilty, the sanctions to be assessed. Letters that include sanctions will be reviewed by the Dean of Students (or a Dean's designee) within one week for general conformance with precedent and the Student Policy Conduct code. If the Dean of Students finds that the sanctions are inappropriate, the Dean may ask the Panel to reconsider the sanctions. If the Panel does reconsider its original sanctions, the reconsidered decision of the Panel is final.

12. If a Judicial Panel recommends expulsion from the University, the case will be automatically reviewed by the Provost. The Provost has the option of supporting the recommendation of expulsion or imposing lesser sanctions.

13. Within one week of the sanctions being affirmed, the student will be informed in writing of the decision of the Judicial Panel. The Judicial Adviser will be available to advise the student about the sanctions.

14. Students found guilty may appeal the decisions of the Judicial Panel. They should normally file an appeal with the Judicial Adviser within one month of receiving the results of the Judicial Panel hearing. The grounds for appeal are cited in Section III-H.1.

15. Final Appeals Panel hearings are usually closed to the public unless the accused student files a request for an open hearing at least one week in advance of that hearing.

SECTION IV AUTHORITY AND AMENDMENT OF THE JUDICIAL CHARTER

A. Authority—Although nothing in this Charter limits or contravenes the authority of the President of Stanford University to promulgate and enforce regulations governing student conduct, the Board on Judicial Affairs, except in extraordinary circumstances, shall have primary responsibility for promulgating judicial policy.

B. Amendment of Charter—The provisions of this Charter are subject to amendment in any and all respects. Amendments shall be enacted by a majority vote of the Board on Judicial Affairs, and shall go into effect immediately upon approval by the Senate of the Associated Students of Stanford University, the Senate of the Academic Council, and the President of the University. No amendment changing the membership of the Board on Judicial Affairs, however, shall go into effect until the time of the next regular selection of members.
When a violation of the Fundamental Standard or the Honor Code is alleged, the University administration pursues the case to completion. Consequently, whenever a member of the University community believes such a violation has occurred, he or she should contact the Judicial Affairs Office, Tresidder Memorial Union, 2nd floor, (650) 725-2485.

THE FUNDAMENTAL STANDARD

Students are expected to observe the Fundamental Standard of student conduct, which was stated by Stanford’s first President, David Starr Jordan, as follows:

“Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University.”

Actions which have been found to be in violation of the Fundamental Standard include:

A. The Honor Code is an undertaking of the students, individually and collectively:

1) that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;
2) that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.

B. The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking unusual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.

C. While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work.

Examples of conduct which have been regarded as being in violation of the Honor Code include:

1) Giving or receiving unpermitted aid
2) Unpermitted collaboration
3) Plagiarism
4) Revising and resubmitting a quiz or exam for regrading without the instructor’s knowledge and consent
5) Giving or receiving unpermitted aid
6) Representing as one’s own work the work of another

In recent years, most student disciplinary cases have involved Honor Code violations; of these, the most frequent arise when a student submits another’s work as his or her own, or gives or receives unpermitted aid. The standard penalty for a first offense is a one-quarter suspension from the University and 40 hours of community service. In addition, many faculty members issue a “No Pass” for the course in which the violation occurred. The standard penalty for a multiple violation (for example, cheating more than once in the same course) is a three-quarter suspension and 60 hours of community service.

INTERPRETATIONS AND APPLICATIONS OF THE HONOR CODE

In the Spring of 1977, the Student Conduct Legislative Council authored and adopted the following guidelines to assist students and faculty in understanding their rights and obligations under the University’s Honor Code. The most recent revisions to the original text were adopted in the Spring of 1999 by the Board on Judicial Affairs.

It must be understood that the individual and collective responsibility of the students for upholding the Honor Code was not imposed upon the students by the administration or the faculty but was assumed by the students at their own request starting in 1921. Without such student responsibility, the Honor Code cannot be effectively maintained.

1. General

a) The Honor Code is agreed to by every student who registers at Stanford University and by every instructor who accepts an appointment.

b) The Honor Code provides a standard of honesty and declares that compliance with that standard is to be expected. It does not contemplate that the standard will be self-enforcing but calls on students, faculty, and administration to encourage compliance and to take reasonable steps to discourage violations. If violations occur, procedures are prescribed by the Student Judicial Charter of 1997. How-ever, the Honor Code depends for its effectiveness primarily on the individual and collective desire of all members of the community to prevent and deter violations rather than on proceedings to impose penalties after violations have occurred.

c) In interpreting and applying the general provisions of the Honor Code, it should be kept in mind that although primary responsibility for making the code effective rests with the students, faculty cooperation is essential since the faculty sets the academic requirements which students are to meet. The faculty should endeavor to avoid academic requirements and procedures which place honorable and conscientious students at a disadvantage. The faculty should also be ready and willing to consult with students and should be responsive to their suggestions in these matters.

d) While an instructor’s failure to observe these guidelines might be viewed an extenuating circumstance in evaluating penalty options for a student’s misconduct, it would not preclude the initiation of an otherwise warranted charge against the student.

2. Specific Interpretations and Applications

a) “Third-Party Responsibility”: a primary responsibility assumed by students is to discourage violations of the Honor Code by others. Various methods are possible. Drawing attention to a suspected violation may stop it. Moral suasion may be effective. Initiating formal procedures is a necessary and obligatory remedy when other methods are inappropriate or have failed. Faculty members have like responsibilities when suspected violations come to their attention.

b) “Proctoring”: proctoring means being present in the examination room during a written examination, with the following exceptions:

1) The prohibition against proctoring should not be construed to prohibit an instructor or teaching assistant from remaining in the examination room for the first few minutes to distribute and explain the examination; or from visiting the examination room briefly to transmit additional information; or from returning at the end of the examination to collect the examination papers.
2. Nor does the prohibition againstproctoring prohibit an instructor or teaching assistant from visiting the examination room in response to specific reports from students that cheating has been observed, to investigate the basis for such reports. The instructor or teaching assistant may also visit the examination room briefly and infrequently in order to answer students' questions.

c) "Unusual and Unreasonable Precautions": in interpreting and applying this provision, consideration should be given to standard procedures that are customary at Stanford and the need for cooperation between students and faculty in making the Honor Code effective. The following situations are cited as examples.

An instructor should not require students to identify themselves before being admitted to an examination room, or require students to submit in advance to being searched for notes or other materials, or maintain surveillance upon students who leave the examination room. Nor should the instructor take deliberate steps to invite dishonesty in order to entrap students. Procedures of this kind would be unusual and unreasonable.

On the other hand, an instructor may require copies of an examination or test to be returned after the examination. When possible, alternate seating should be provided and used for all examinations. To avoid controversy in any rereading or regrading of students' work, the instructor may ask students to take measures by which the original work may be clearly identified. With clear advance notice, an instructor may systematically compare work submitted to current or previous submissions. An instructor who requires students to make up a missed test or examination may administer a different test or examination of equivalent range and difficulty. Such procedures are not to be construed as unusual or unreasonable.

d) "Procedures that Create Temptations to Violate the Honor Code": although students are expected to resist temptations to cheat, the faculty should endeavor to minimize inducements to dishonesty. Examples of undesirable procedures include the following: failure to give clear directions and instructions concerning course requirements and the limits of acceptable collaboration in course work; treating required work casually as if it were unimportant; carelessness or inconsistency in maintaining security of examinations or tests; reusing an examination that is neither kept secure from public exposure nor made available to all students. If take-home examinations are given, they should not be closed-book examinations, nor should there be a specified time limit less than the full period between the distribution of the examination and its due date. Such procedures place honorable and conscientious students in a difficult position and often at a disadvantage, and could be interpreted as mitigating factors by the judicial panel.

e) "Penalty Grading": students are not to be penalized for violations of the Honor Code without adjudication under the procedures specified by the Student Judicial Charter of 1997. An instructor may not, therefore, lower a student's grade or impose any other academic penalty on the grounds of dishonesty. Examples of desirable procedures include the following: failure to give clear directions and instructions concerning course requirements and the limits of acceptable collaboration in course work; treating required work casually as if it were unimportant; carelessness or inconsistency in maintaining security of examinations or tests; reusing an examination that is neither kept secure from public exposure nor made available to all students. If take-home examinations are given, they should not be closed-book examinations, nor should there be a specified time limit less than the full period between the distribution of the examination and its due date. Such procedures place honorable and conscientious students in a difficult position and often at a disadvantage, and could be interpreted as mitigating factors by the judicial panel.

f) "Instructor Discretion": procedures falling under instructor discretion would include exam location, alternate times for exams, and alteration of due dates. Tests will be taken from the classroom only with consent of the instructor.

STANFORD UNIVERSITY'S STUDENT CONDUCT PENALTY CODE AS AMENDED 1999

Stanford University's Student Conduct Penalty Code (as amended 1999) is to be used in conjunction with the Student Judicial Charter of 1997, and is applicable only to the actions of the judicial entities who have determined that a violation of the Honor Code, the Fundamental Standard, or another rule or policy governing student conduct has occurred.

In all cases in which a student is found guilty the student shall be informed by a letter of censure of the penalty or penalties assessed for an offense. The letter shall list all penalties imposed on the student. No information contained in a student's disciplinary record will be released without the written consent of the student.

The Judicial Advisor shall inform any member of the community whose role in implementing the penalty requires that person to be informed of a penalty imposed by the Judicial Panel. The Judicial Advisor shall also inform the complainant of any penalties imposed by the Panel.

Until a student has satisfied all conditions of a penalty, he or she is ineligible to receive any Stanford Degree.

TYPES AND DEFINITIONS OF PENALTIES

After determining a violation has occurred, the Judicial Panel hearing the case shall impose a penalty, or a combination of penalties, in accordance with the nature and seriousness of the offense, the motivation underlying the offense, and precedent in similar cases. This Code provides a list of the available penalties. The order of the penalties in the list does not suggest their frequency or likelihood, or the proper penalty in a particular case.

Only the following penalties may be applied:

A. Formal Warning—The Judicial Panel may give a student a Formal Warning. Should the student later be found guilty of any other offense the Judicial Advisor shall inform the Panel during the penalty phase of deliberations that the student received a Formal Warning for a prior offense.

B. Probation—

1. The Panel may place a student on probation for a specific period of time, during which time a penalty or some part of a penalty is postponed. The time period, terms or conditions, and the reasons for granting probation must be communicated in writing by the Judicial Panel hearing the case.

2. Probationary status will be automatically revoked and the postponed penalties automatically reinstated, effective immediately, if the probationer is found guilty by a Judicial Panel of committing another act of misconduct while on probation, unless that Panel specifically deems the subsequent violation as trivial or irrelevant to the offense for which the probation was granted. Successful completion of probation cancels the postponed penalties.

3. The Judicial Panel determining penalties for a subsequent violation may allow the reinstated penalty to suffice for both violations, or impose additional penalties to the original penalties, or impose independent penalties.

C. Deprivation of Rights and Privileges—Loss of particular student rights and privileges for a specified time, including but not limited to: taking part in intercollegiate activities, including athletic events; serving in positions of trust and responsibility; using University facilities, such as libraries, gymnasiums.

D. Monetary Restitution—

1. A specific amount of money to be paid by a specific date. A student may be assessed a reasonable monetary penalty to defray actual financial losses to the University, individuals, or student organizations attributable to and caused by the offense for which the student was found guilty.

2. The student will be provided documentation of actual financial losses, and the money collected will be used only to reimburse those individuals and/or organizations incurring the loss. No monetary penalties will be assessed to defray costs associated with the investigation and adjudication of the offense by the University.

3. A student who fails to pay as ordered shall be treated as though suspended from the University until full payment is made.

E. Community Service—

1. A specific number of hours to be worked in unpaid University or public service within a specific period of time.

2. Ordinarily, community service should be limited to on-campus facilities or organizations. Off-campus community service may be appropriate in some cases, but must be related to educational, charitable or public service organizations. Written confirmation by the person responsible for supervising the student that he or she worked satisfactorily for the specified number of hours will conclusively establish
CAREER DEVELOPMENT CENTER

The Career Development Center (CDC) is committed to educating the Stanford community about the world of work and helping individuals understand their relationship to it. We encourage both undergraduate and graduate students to consider how their academic course work and other experiences may affect their career decisions. Through a variety of programs and services, the Career Development Center staff helps students and alumni clarify their interests, skills, and values; explore possible career fields; and prepare for the job search in a variety of fields. These programs and services include:

Career counseling
Career interest, skills, and personality inventories
Fall Career Fair
Full-time, part-time, internship, and summer job listings available in binders and on the World Wide Web
Job Connection Day
Liberal Arts Career and Internship Fair
On-Campus Recruiting Program
Reference file service
Resource library, which includes books, periodicals, handouts, and audio/video tapes
Workshops on getting started at the CDC, resume writing, interviewing, and the summer and full-time job search process
Check the CDC web page at http://www.stanford.edu/dept/CDC/ for up-to-date information on programs and events.

COWELL STUDENT HEALTH SERVICE

Student Health Insurance (650-723-2135)—All registered students are required to have health insurance. Cowell offers a comprehensive and affordable University-sponsored insurance plan, Cardinal Care, which is administered and insured by Blue Cross of California. Health insurance policies for spouses, domestic partners, children of students, and visiting scholars are available. Voluntary dental insurance is also offered.

HAAS CENTER FOR PUBLIC SERVICE

The Haas Center for Public Service serves as a focal point for students, faculty, and staff interested in public and community service. The Haas Center maintains and coordinates volunteer, internship, and community research opportunities for undergraduate and graduate students in the San Francisco Bay Area, nationally and internationally. Through the “study-service connections” initiative, the staff assists students and faculty seeking to integrate service-based learning with academic study and administers a Public Service Scholars honors research program.

The Haas Center is the campus base for Stanford in Washington, an academic program that combines seminars, tutorials, and internships in the nation’s capital. The center also houses student organizations including the Stanford Volunteer Network, Stanford in Government, the East Palo Alto/Stanford Summer Academy (EPASSA), and the You Can Make a Difference Conference. It administers numerous fellowship programs which provide financial support to students undertaking public and community service work during the summer and post-graduation.
Deputized Patrol Officers: uniformed officers patrol the campus and Community Service Officers: CSOs enforce parking regulations. The general divisions:
cases of sexual harassment, see the "Non-Academic Regulations" section of the University's code. Services include the shipping of purchases, gift certificates, and repair service needs; telephone: 1-800-533-2670.

The Track House Sports Shop at the corner of Campus Drive and Galvez Street sells sports apparel and equipment. Tresidder Express in Tresidder Union offers snack foods, beverages, newspapers, health and beauty aids, and grocery items. The Stanford Bookstore Palo Alto at 135 University Avenue, Palo Alto carries medical, technical, and business books. The University Shop in the Stanford Shopping Center, and the University Shop at 250 University Avenue, Palo Alto, sell Stanford apparel and souvenirs.

OMBUDSPERSON

The original charge for an ombudsperson at Stanford described the purpose of the office in this way: "The Ombudsperson's task is to protect the interests and rights of members of the Stanford community from injustices or abuses of discretion, from gross inefficiency, from unnecessary delay and complication in the administration of University rules and regulations, and from inconsistency, unfairness, unresponsiveness, and prejudice in the individual's experience with University activities. The Ombudsperson's office exists to receive, examine, and channel the complaints and grievances of members of the Stanford community, and to secure expeditious and impartial redress."

Any troublesome matter in the University community may be discussed in confidence with the University ombudsperson. Services of the office are available to students, staff, and faculty.

Although possessing no decision-making authority, the Ombudsperson has wide powers of inquiry. The Ombudsperson will refer matters to the proper person or office expeditiously and, where appropriate, as necessary.

POLICE SERVICES

The Stanford Department of Public Safety, (650) 723-9633, is located at the corner of Campus Drive and Serra Street. It is composed of several divisions:

Deputized Patrol Officers: uniformed officers patrol the campus and respond to calls. They are fully empowered by Santa Clara County and have authority to stop vehicles, make arrests, and enforce all laws.

Plain-clothes detectives follow up on cases as necessary.

Community Service Officers: CSOs enforce parking regulations. The citations they issue for parking violations are payable to Santa Clara County and go to warrant if not paid. The night CSOs check on building security and provide a uniformed presence.

The Special Services Unit: SSU is a campus resource center providing crime prevention and safety awareness programs to the Stanford community. Its free services include pamphlets, videos, and presentations about bicycle safety, earthquake preparedness (earthquake information, 723-0569), personal safety, and property protection. Call 723-0806 to reach the SSU.

For police, fire, or ambulance response at any time, dial 9-1-1, a free call from all pay phones. From University phones (723-, 725-, 497-, or 498- prefix), dial 9-911. Blue Emergency Phone Towers are now in place across campus for emergency assistance.

For additional safety information, see the Stanford Safety and Security Almanac, which is available from the Special Services Unit of the Stanford Department of Public Safety (723-0806).

STANFORD EVENTS

Stanford Events is responsible for the production of all official University ceremonies, including New Student Orientation Convocation, Founders' Day, Commencement, and other ceremonies or events as designated by the President's Office. Stanford Events also communicates University policies that govern events to campus organizations that request to host an event on or off campus. In addition, the Visitor Information Center, Stanford Ticket Office, and the Lively Arts at Stanford function within Stanford Events.

Organizations that may request use of University facilities for public events include academic departments, administrative offices, official organizations of the Association Students of Stanford University (ASSU), and voluntary student organizations registered with the Office of Student Activities (OSA). Voluntary student organizations sponsoring events must have the approval of the ASSU student financial manager and the OSA before their requests are presented to the Registrar's Office for scheduling.

Copies of the Public Events Policy Manual, which sets forth University policies and procedures for events, are available from Stanford Events, 527 Lomita Mall, Stanford, CA 94305-2250, or at http://www.stanford.edu/dept/Events.

Stanford Ticket Office—The Stanford Ticket Office provides ticketing services including printing, sales, and box office staffing to Stanford University events, except athletics. The Ticket Office handles sales for Stanford Lively Arts, the Department of Music, and various campus organizations. BASS sales are also available through the Ticket Office for events in the greater Bay Area.

The Ticket Office is centrally located in the Tresidder Student Union and may be reached by phone at (650) 725-ARTS.

Stanford Lively Arts—Stanford Lively Arts presents a full season of professional, world-class music, dance, and theater performances from around the globe. Venues include Memorial Auditorium, Dinkelspiel Auditorium, Memorial Church, and Proctor Amphitheater. For more information about Stanford Lively Arts and coming performances, telephone (650) 725-ARTS, or visit the Lively Arts web site at http://livelyarts.stanford.edu.

CONFERENCE SERVICES

A "conference" is any student or adult group that is not a part of a regular or summer academic session for registered students, whether convening for only part of a day (including a luncheon), overnight, or for several days.

Arrangements for conferences are the responsibility of the Manager of Conferences. Summer Conference Services (650-723-3126) coordinates conferences from June 23 through September 15. Non-academic Facilities Scheduling in the Registrar's Office, (650) 723-6755, coordinates conferences September 16 through June 22. Policies concerning
conferences are the responsibility of the President’s and Provost’s Offices.

Outside organizations wishing to meet at Stanford must have the sponsorship of a University department. Conferences initiated by organizations within or outside the University must be closely related to the academic program of the University. The sponsoring department submits its proposal to the Manager of Conferences for review in terms of available facilities and for approval of the President’s Office.

Arrangements for campus housing and/or meeting room facilities are made with the Manager of Conferences.

Housing and dining service accommodations in campus residences usually are available on the Sunday following Commencement until August 31. Assistance with arrangements for tables, chairs, audiovisual aids, signs, and other equipment may be made with Summer Conference Services.

AWARDS AND HONORS

FACULTY AND STAFF

KENNETH M. CUTHBERTSON AWARD

The Kenneth M. Cuthbertson Award was established in 1981 for recognition of exceptional service to Stanford University. It was established by members of the faculty who wish to remain anonymous. All members of the Stanford community are eligible for the award; the sole criterion is the quality of the contribution that the recipients have made to the University. The award provides a way of honoring members of the staff and faculty for their efforts on behalf of the University.

Ordinarily, one award is made each year. The award was first presented in 1981 to the person for whom it is named. Kenneth M. Cuthbertson was one of the early architects of Stanford’s long-term financial planning and fundraising program. His service to Stanford has set an enduring standard for those who will come after him. The award is made annually at the University Commencement Ceremony.

LLOYD W. DINKELSPIEL AWARDS

The Lloyd W. Dinkelspiel Awards recognize distinctive and exceptional contributions to undergraduate education at Stanford University. The two principal awards are made to the faculty or staff members adjudged to have made the most distinctive contribution to the development and enrichment of undergraduate education in its broadest sense. Two awards are also made to graduating seniors who combine academic achievement with effective contributions to undergraduate student life. Preference is given to service in the School of Humanities and Sciences in the area of liberal education. The awards are made from an endowment fund established in memory of Lloyd W. Dinkelspiel, a Stanford alumnus and trustee. The awards are made annually at the University Commencement Ceremony.

WALTER J. GORES AWARDS

The Walter J. Gores Faculty Achievement Awards for excellence in teaching were established by bequest of Walter J. Gores, Stanford Alumnus of the Class of 1917 and a professor at the University of Michigan for 30 years. Teaching is understood in its broadest sense and includes, in particular, lecturing, leading discussions, tutoring, and advising at the undergraduate or professional levels. Any member of the teaching staff of the University is eligible for an award, including all faculty of professorial rank, instructors, lecturers, teaching fellows, and teaching and course assistants. Ordinarily, awards are made to a senior faculty member (associate or full professor) or senior lecturer; a junior faculty member or member of the teaching staff; and a teaching assistant (graduate or undergraduate student). The awards are made annually at the University Commencement Ceremony.

ALLAN COX MEDAL FOR FACULTY EXCELLENCE FOSTERING UNDERGRADUATE RESEARCH

The Allan Cox Medal for Faculty Excellence Fostering Undergraduate Research is awarded annually to a faculty member who has established a record of excellence directing undergraduate research over a number of years. It may also go to a faculty member who has done an especially outstanding job with just one or two undergraduates who demonstrated superior work. The medal was established in memory of the former professor of Geophysics and Dean of the School of Earth Sciences, a strong supporter of faculty-student research collaboration.

HERBERT HOOVER MEDAL FOR DISTINGUISHED SERVICE

David Starr Jordan’s firm belief that every academic degree should represent work actually done in or under the direction of the institution granting it has meant that, since its founding, Stanford has awarded no honorary degrees. As a means of recognizing extraordinary individuals who deserve special acknowledgment, the Stanford Alumni Association in 1962 voted to establish the Herbert Hoover Medal for Distinguished Service. The name pays tribute to the former President’s example of service to his University, to his country, and to the cause of world humanitarianism. Indeed, Mr. Hoover was the first award recipient. The gold medal is presented following selection by an anonymous committee appointed by the Chair of the Board of Directors of the Alumni Association. There have been 11 honorees.

STUDENT

BOOTHE PRIZE FOR EXCELLENCE IN WRITING

Awarded during the freshman year, the Boothe Prize recognizes excellence in writing. Students are selected for this honor on the basis of essays written for courses fulfilling the Introduction to the Humanities requirement or in Writing and Critical Thinking. The prize is named for Mr. and Mrs. D. Power Boothe, Jr., whose gifts to the University reflect their interest in the humanities.

PRESIDENT’S AWARD FOR ACADEMIC EXCELLENCE IN THE FRESHMAN YEAR

The President’s Award honors students who have exceptionally distinguished academic records that exemplify a strong program of study in the freshman year. Students eligible for the award normally have completed Writing and Critical Thinking and the Introduction to the Humanities requirement during their first year at Stanford.

DEANS’ AWARD FOR ACADEMIC ACHIEVEMENT

The deans of Earth Sciences, Engineering, and Humanities and Sciences recognize from five to ten undergraduate students each year for their academic endeavors. Honorees are cited for noteworthy accomplishments which represent more than a high grade point average or success in course work. Faculty nominate students who have exceptional tangible achievements in classes or independent research, national academic competitions, a presentation or publication for a regional or national audience, or exceptional performance in the creative arts.

FIRESTONE MEDAL FOR EXCELLENCE IN RESEARCH

The Firestone Medal is awarded to seniors in recognition of excellence in undergraduate research. Departments in the School of Humanities and Sciences nominate students who have completed outstanding honors projects in the social, physical, and natural sciences.

ROBERT M. GOLDEN MEDAL FOR EXCELLENCE IN THE HUMANITIES AND CREATIVE ARTS

The Golden Medal recognizes outstanding achievement in the humanities and the creative arts. Seniors receive these medals upon nomination by their major department.
Hoefer Prize for Excellence in Undergraduate Writing

The Hoefer Prize recognizes students and faculty for their work in courses that meet the University Writing Requirement for writing in the major. Prizes are awarded in each of the five areas of the undergraduate curriculum: humanities, social sciences, natural sciences, engineering, and earth sciences.

Frederick E. Terman Engineering Scholaristic Award

The School of Engineering annually presents the Terman Award to seniors for outstanding academic achievement. The awardees share their award with a high school teacher of their nomination.

Phi Beta Kappa

Phi Beta Kappa is a nationwide society honoring students for the excellence and breadth of their undergraduate scholarly accomplishments. Membership in the Stanford Chapter (Beta of California) is open to undergraduates of all majors. To be elected to Phi Beta Kappa at Stanford, a student must achieve academic distinction in the major as well as in courses across a broad range of fields.

Approximately a tenth of the members of a graduating class are elected to Phi Beta Kappa. Of this number, about one fifth are chosen in their junior year, the remainder in their senior year.

The chapter’s election guidelines (revised July, 1997) define “breadth” of study as excellence beyond the major field. To be considered for election, a student must have taken, by the time elections are held in early in the Spring Quarter, at least three courses in each of the following three major domains of knowledge: Humanities; Science, Engineering, and Math; and Social Sciences. To be considered for election, transfer students must have taken at least two courses at Stanford in two of these major domains and must have completed a minimum of 75 units of academic work at Stanford by the end of Winter Quarter.

Examples of courses that will satisfy the Phi Beta Kappa breadth criterion include those listed in the Stanford Bulletin Appendix for the undergraduate General Education Requirements (GER) in Areas 2 to 4. Courses taken for GER Area 1 are not considered as satisfying the PBK breadth criterion.

A grade of ‘+’ or ‘CR’ is not considered a sign of distinction. Minimally satisfying the “breadth” criterion is not considered a sign of distinction.

The academic records of all students are automatically reviewed, so no special action is required for students wishing to be considered for membership. Anonymity in the election process is ensured by removal of the students’ names from their academic records before consideration. Students who desire that their records not be made available for consideration by the Stanford chapter of Phi Beta Kappa should inform the Registrar, room 133, Old Union.

Exchange Programs and Cross-Enrollment Agreements

Stanford has exchange programs and cross-enrollment agreements with a number of other colleges and universities. The purpose of these programs and agreements is to offer Stanford students courses and training that are not available in the Stanford curriculum.

Exchange Programs Undergraduate

Stanford has exchange programs with four colleges and universities that allow students to exchange schools for a quarter/semester or for a year, depending on the school. These programs are best suited to students in their junior year, when the major area of study has been determined. Stanford students register for zero units at Stanford during the quarter(s) in which they are attending another college or university and pay the regular Stanford tuition. Courses taken at the other institution are treated as transfer credit back to Stanford. Students should contact the Transfer Credit Evaluator in the Academic Standing Office to determine whether the courses taken through an exchange program may qualify for credit toward a Stanford degree. Only the number of units accepted in transfer, not the course titles or the grades received, are recorded on the Stanford transcript.

Exchange programs are currently available at three historically black institutions: Howard University in Washington D.C.; Morehouse College in Atlanta, GA; and Spelman College in Atlanta, GA. The exchange program at Dartmouth College in Hanover, NH, focuses on Native American Studies. Further information is available at the Undergraduate Advising Center.

Graduate

The Exchange Scholar Program is open to doctoral students in the fields of humanities, social sciences, and sciences who have completed one full year of study at one of the participating institutions. These students may apply to study at Stanford for a maximum of one academic year to take advantage of particular educational opportunities not available on the home campus. The participating institutions are Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, University of Pennsylvania, and Yale University. Further information on the program may be obtained from the Degree Progress Office, Old Union, or from the graduate dean’s office at participating institutions. Some institutions may place restrictions on specific departments.

Stanford also has separate exchange programs with the University of California, Berkeley and the University of California, San Francisco. Further information may be obtained at the Registrar’s Office.

Cross-Enrollment Agreements for ROTC

Stanford has cross-enrollment agreements for the Reserve Officers’ Training Corps (ROTC) with the Navy and the Marine Corps ROTC program at the University of California at Berkeley, the Army ROTC program at Santa Clara University, and the Air Force ROTC program at San Jose State University. The purpose of these agreements is to allow Stanford students to engage in military training while working on their degrees from Stanford. Courses taken in ROTC programs are offered by and through UC Berkeley, Santa Clara, and San Jose State. The courses do not qualify to be used towards the 12 unit requirement for full-time registration status or satisfactory academic progress requirements for Stanford undergraduates. Certain ROTC courses may be eligible to be used as transfer credit if they qualify under Stanford’s transfer credit practices.

Normally, students who participate in ROTC training complete a four-year course of instruction at the respective institution that consists of two years of basic courses during the freshmen and sophomore years, and an advanced course of instruction during the junior and senior years. Students who accept ROTC scholarships are generally subject to a service obligation, depending on the regulation of the particular service.

Stanford students who are enrolled in ROTC programs under the cross-enrollment agreements are eligible to compete for scholarships to include full tuition and a monthly stipend (Navy and Air Force), or other varying amounts (Army). Students normally compete for national scholarships as high school seniors, although current Stanford students may be eligible to enroll in ROTC on a non-scholarship basis. Non-scholarship ROTC students are eligible to compete for scholarships, and individual services may offer additional scholarship programs to current qualifying undergraduate and graduate students. Interested students should contact the appropriate military professor at the host institution to obtain information on these programs and to initiate application procedures (see below).
Students who satisfactorily complete an ROTC program and are awarded a Stanford degree qualify for a commission as a Second Lieutenant in the U.S. Army, an Ensign in the U.S. Navy, a Second Lieutenant in the U.S. Marines, or a Second Lieutenant in the U.S. Air Force.

For questions concerning the ROTC programs, Stanford students should consult one of the following: Naval ROTC, 152 Hearst Gym, UC-Berkeley, Berkeley CA 94720-3640, telephone (800) 430-3014; Army ROTC, Department of Military Science, Santa Clara University, Santa Clara, CA 95053, telephone (800) 227-7682; Air Force ROTC, San Jose State University, San Jose, CA 95192-0051, telephone (800) 924-2960.

**COURSES**

**AIR FORCE ROTC**

The following are offered by San Jose State University:

- **Introduction to the Air Force Today**—Freshman year.
- **The Air Force Way**—Sophomore year.
- **Field Training**—Sophomore year.
- **Air Force Leadership and Management**—Junior year.
- **National Security Affairs/Preparation for Active Duty**—Senior year.

**Leadership Laboratory**—Mandatory and complements the list above. During freshman and sophomore years, includes the study of Air Force customs and courtesies, drill and ceremonies, and military commands. During junior and senior year, it consists of advanced leadership experiences involving the planning and controlling of military activities of the cadet corps, the preparation and presentation of briefings, and other oral and written communications.

**ARMY ROTC**

The following are offered by Santa Clara University:

- **Fundamentals of Leadership and Management**—Basic course. First and second year are designed for beginning students who want to qualify for entry into the Advanced Course in a normal progression. Introduces key terms needed to address the leadership challenges and problem-solving methods used in the Advanced Course. Communication skills are taught, practiced, and mastered, ensuring that students entering the Advanced Course are prepared to take charge of groups and organize the activities of the group in problem-solving exercises and labs. Associated extracurricular activities are: the leadership reaction course; a physically orienteering.

- **The following are offered for the Army ROTC Basic Course:**
  - **Basic Leadership Development and Communicative Skills**—Freshman year.
  - **History of the U.S. Army Military Profession**—Freshman year.
  - **Applied Leadership Development**—Freshman year.
  - **Organizational Leadership Theory**—Sophomore year.
  - **Team Development**—Sophomore year.
  - **Troop Leading Procedures/U.S. Army**—Sophomore year.
  - **Advanced Leadership and Management**—Advanced sophomores.

This sequence is open to students who have completed the Basic Course or earned placement credit for it. Placement credit can be achieved through prior military training or completion of the six-week summer course known as Camp Challenge at Fort Knox, KY. Students who want to qualify for the Advanced Course, via Camp Challenge, should plan to attend the camp as early as the summer before their junior year at Stanford. Students must complete the Advanced Course in the sequence prescribed by the Department of Military Science at Santa Clara University.

The following are offered for the Army ROTC Advanced Course:

- **Leading Small Organizations I**—Junior year.
- **Leading Small Organizations II**—Junior year.
- **Advanced Tactics**—Junior year.

**NAVAL ROTC**

The Department of Naval Science at UC Berkeley offers programs of instruction for men and women leading to active duty reserve commissions in the U.S. Navy or U.S. Marine Corps. Navy option students enrolled in either the four- or two-year program normally complete the following courses during their junior and senior years.

- **NS1. Introduction to Naval Science**—Freshman year.
- **NS2. Sea Power and Maritime Affairs**—Freshman year.
- **NS3. Leadership and Management**—Sophomore year.
- **NA10. Ship Systems**—Sophomore year.

Navy option students enrolled in either the four- or two-year program normally complete the following courses during their junior and senior years.

- **NS12A. Navigation and Naval Operations I**—Junior year.
- **NS12B. Navigation and Naval Operations II**—Senior year.

- **NS401. Naval Ship Systems**—Senior year.
- **NS412. Leadership and Ethics**—Senior year.

In addition to the above courses, Navy option ROTC students are required to participate in weekly professional development laboratories (drill) at UC Berkeley and complete a number of other courses at Stanford including one year of calculus, physics, and English, and one quarter of computer science, leadership and management, and military history or national security policy.

In lieu of NS401, NA10, and NS12B, Marine option students may participate in Marine Seminars and complete MA154, History of Littoral Warfare and MA20, Evolution of American Warfare (or a designated equivalent course). Marine option students also participate in the weekly professional development laboratories.
Nonacademic Regulations

STATEMENT OF NONDISCRIMINATORY POLICY

Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. It does not discriminate against students on the basis of sex, race, age, color, disability, religion, sexual orientation, or national and ethnic origin in the administration of its educational policies, admissions policies, scholarships, loan programs, athletic and other University-administered programs.

AMERICANS WITH DISABILITIES ACT/REHABILITATION ACT GRIEVANCE PROCEDURE

POLICY

Stanford University, in compliance with state and federal laws and regulations including the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973 (Section 504), does not discriminate on the basis of disability in the administration of its education-related programs and activities and has an institutional commitment to provide equal educational opportunities for disabled students who are otherwise qualified.

Students who believe they have been subjected to discrimination on the basis of disability, or have been denied access to services or accommodations required by law, have the right to use this grievance procedure.

APPLICABILITY

The grievance procedure set forth below is applicable to undergraduate and graduate students of the University. In general, it is designed to address disputes concerning the following:
1. Disagreements regarding a requested service, accommodation, or modification of a University practice or requirement
2. Inaccessibility of a program or activity
3. Harassment or discrimination on the basis of disability
4. Violation of privacy in the context of disability

For disputes regarding certain specific academic accommodations or modification of academic requirements (such as reduction in the number of academic course units taken quarterly or yearly, requests for substitution of courses, or issues relating to academic standing), the alternate procedure set forth in Section V (C) of the Stanford University Policy and Procedure for Student Requests for Services and Accommodations should be followed. For questions regarding which procedure is applicable, contact one of the Compliance Officers at the Office of Campus Relations.

These two sets of procedures supplant the Statement on Student Academic Grievance Procedures (set forth in the Stanford Bulletin) for disability-related grievances.

COMPLIANCE OFFICERS

Stanford University's Compliance Officers are responsible for administering this grievance procedure as well as ensuring compliance with applicable laws. The designated Compliance Officers are: Rosa Gonzalez (ADA/Section 504 Compliance Officer) and Sally Dickson (Director of the Office of Campus Relations). They have offices in Building 310 in the Main Quad and may be reached by calling (650) 723-3484, TTY 723-1216, fax 725-3326.

INFORMAL RESOLUTION/SECOND REVIEW

1. Prior to initiating the formal complaint procedure set forth below, and as a prerequisite to it, the student shall contact a Compliance Officer for assistance in resolving the matter informally within seven calendar days of the determination communicated by the DRC (if there was such a determination).

If the Compliance Officer is not successful within quickly achieving a satisfactory resolution (that is, generally within seven calendar days), the Compliance Officer will take the steps described in subparagraph "2" below.

2. Second Review Panel: in accordance with the informal resolution procedures outlined in Section VII of the Stanford University Policy and Procedure for Student Requests for Services and Accommodations, the Compliance Officer will convene an ad-hoc second review panel to review the issues raised. The panel will consist of the following (or their designees): the Compliance Officer reviewing the request, the Director of the DRC, the Dean of Students, and (depending upon the issues) other academic or administrative personnel as may be appropriate. This panel will review the request, investigate, and attempt to resolve the issues within seven calendar days of the request for or initiation of a second review. No formal report need be issued by the panel, but the panel will document the outcome of its review in a letter to the student. If the student is not satisfied with the panel's disposition of the matter, the student may file a formal complaint in accordance with the procedure described below.

FORMAL COMPLAINT

If the procedure set forth above for informal resolution does not yield a successful resolution, then the student may file a formal complaint in the following manner:

1. When to File Complaint: complaints shall be filed within ten calendar days of the end of the informal resolution process described above.
2. What to File: a complaint must be in writing and include the following:
   a) The grievant's name, address, email address, and phone number
   b) A full description of the problem
   c) A statement of the remedy requested
   d) A copy of the letter from the Second Review Panel setting forth the outcome of the informal grievance procedure described above
3. Where to File Complaint: the complaint shall be filed with the Compliance Officer at the Office of Campus Relations, Building 310 (mail code 2040; fax 650-725-3326).
4. Notice of Receipt: upon receipt of the complaint, the Compliance Officer reviews the complaint for timeliness and appropriateness for this grievance procedure, and provides the grievant with written notice acknowledging its receipt.

5. Investigation: the Compliance Officer or his or her designee (hereafter collectively referred to as the "grievance officer") shall promptly initiate an investigation. In undertaking the investigation, the grievance officer may interview, consult with and/or request a written response to the issues raised in the grievance from any individual the grievance officer believes to have relevant information, including faculty, staff, and students.
6. Representation: the grievant and the party against whom the grievance is directed shall have the right to have a representative. The party shall indicate whether he or she is to be assisted by a representative and, if so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.
7. Findings and Notification: upon completion of the investigation, the grievance officer will prepare and transmit to the student, and to the party against whom the grievance is directed, a final report containing a summary of the investigation, written findings, and a proposed disposition. This transmission will be expected within 45 calendar days of the filing of the formal complaint. The deadline may be extended by the Compliance Officer for good cause. The final report shall also be provided, where appropriate, to any University officer whose
authority will be needed to carry out the proposed disposition or to
determine whether any personnel action is appropriate.
8. Final Disposition: the disposition proposed by the grievance officer
shall be put into effect promptly. The grievant or any party against
whom the grievance or the proposed disposition is directed may ap-
peal. The appeal to the Provost (as set forth below) will not suspend
the implementation of the disposition proposed by the grievance of-
fer, except in those circumstances where the Provost decides that
good cause exists making the suspension of implementation appro-
priate.

URGENT MATTERS
Whenever the application of any of the time deadlines or procedures
set forth in this grievance procedure creates a problem due to the nature
of the complaint, the urgency of the matter, or the proximity of the up-
coming event, the Compliance Officer will, at the request of the griev-
ant, determine whether an appropriate expedited procedure can be fash-
ioned.

REMEDIES
Possible remedies under this grievance procedure include corrective
steps, actions to reverse the effects of discrimination or to end harass-
ment, and measures to provide a reasonable accommodation or proper ongo-
ing treatment. As stated above, a copy of the grievance officer’s report
may, where appropriate, be sent to University officer(s) to determine
whether any personnel action should be pursued.

APPEAL
Within ten calendar days of the issuance of the final report, the griev-
ant or the party against whom the grievance is directed may appeal to the
Provost the grievance officer’s determination.

An appeal is taken by filing a written request for review with one of the
Compliance Officers at the Office of Campus Relations, Building 170,
Room 114 (mail code 2040; fax 650-725-3326).

The written request for review must specify the particular substan-
tive and/or procedural basis for the appeal, and must be made on grounds
other than general dissatisfaction with the proposed disposition. Further-
more, the appeal must be directed only to issues raised in the formal com-
plaint as filed or to procedural errors in the conduct of the grievance pro-
cedure itself, and not to new issues.

The Compliance Officer shall forward the appeal to the Provost, and
also provide copies to the other party or parties. The review by the Prov-
est or his or her designee normally shall be limited to the following con-
considerations:
1. Were the proper facts and criteria brought to bear on the decision or,
   conversely, were improper or extraneous criteria brought to bear on
   the decision?
2. Were there any procedural irregularities that substantially affected the
   outcome?
3. Given the proper facts, criteria, and procedure, was the decision a
   reasonable one?

A copy of the Provost’s written decision will be expected within 30
calendar days of the filing of the appeal and shall be sent to the parties,
the Compliance Officer and, if appropriate, to the University officer
whose authority will be needed to carry out the disposition. The deadline
may be extended by the Provost for good cause. The decision of the Prov-
est on the appeal is final.

TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

It is the policy of Stanford University to comply with Title IX of the
Education Amendments of 1972 and its regulations, which prohibit dis-
crimination on the basis of sex. Sally Dickson, Director of the Office of
Multicultural Development, has been appointed to coordinate the Uni-
versity’s efforts to comply with the law. Anyone who believes that, in
some respect, Stanford is not in compliance with Title IX and its regula-
tions should contact Ms. Dickson at (650) 723-3484.

OWNERSHIP AND USE OF STANFORD NAME

Stanford registered marks, as well as other names, seals, logos and other
symbols and marks that are representative of Stanford, may be used
solely with permission of Stanford. Items offered for sale to the public
bearing Stanford’s names and marks must be licensed.

1. Names and Marks Policy
   a) Legal Protection: the name “Stanford,” certain seals of Stanford
      University and the Block S symbol all are registered with the
      U.S. Patent and Trademark Office. Additional registrations
      have been made with the California Secretary of State. These
      and any other Stanford registered marks, as well as other names,
      seals, logos, and other symbols and marks that are representative
      of Stanford or its entities (hereinafter referred to as “names
      and marks”), whether or not registered, are the property of
      Stanford University. Such names and marks may be used solely
      with permission of Stanford, and their unauthorized use is in
      violation of this policy and is likely to be in violation of
      California, federal, or other law.
   b) Appropriate Use: the names and marks covered by this policy
      should be used only on materials that have been produced, or
      in connection with activities that are being engaged in, by faculty,
      students, staff, agents, or volunteers as part of their legitimate
      Stanford-sponsored or Stanford-sanctioned activities*. As
      already indicated, this is true not only in instances where the
      names or marks are registered, but in all instances where the
      impression may be created that the objects or activities in
      connection with which the names or marks are used are
      authorized by Stanford University. This policy restricts the
      use of the Stanford name or seal on business cards, and the
      use of the name or seal on letterhead for communications that
      are outside of an individual’s Stanford-sponsored activities or
      functions.
   c) Approval for Use: the President has delegated authority as
      follows for approving use of Stanford’s names and marks:
      To the Provost: for use in connection with educational and research
      activities;
      To the Chief Financial Officer: for use in connection with business
      activities; and
      To the Dean of the School of Medicine: for use in connection with
      medical activities.
   d) Sellers’ Responsibility: University departments, student groups,
      or entities having academic or business relationships with the
      University (such as Stanford Alumni Association, ASSU, and
      Stanford Bookstore, Inc.), or faculty/staff/students selling items
      bearing Stanford names and marks for fund raising or other
      purposes must acquire such items from a licensed supplier or
      be licensed if they are self-producing the items or using a non-
      licensed supplier.
   e) Design Review: OTL reviews the quality of the product bearing
      the names or marks and the design incorporating the names or
      marks prior to licensing.
   f) Artwork: camera-ready artwork of Stanford names and marks
      is provided with the License Agreement.
   g) Fees: there is a royalty fee, normally seven and one-half percent
      (7 1/2%) of the wholesale value of items sold. Net proceeds
      from the licensing program are designated for undergraduate
      student financial aid.
f) Give-Away Items: use of Stanford names or marks on items not sold to the public (such as give-away items or for charity events) requires permission and may be subject to a use fee.

3. Further Information

a) Approval Questions: questions as to the proper office for approval of use of Stanford's name and marks may be directed to the Office of the Director of University Communications.
b) Licencing Program: further information on the use of the registration symbols in conjunction with the registered marks, the use of the names and marks on clothing and other merchandise, license application forms, and sample license agreements may be obtained from the Office of Technology Licensing.

4. Related Policies: the following policies are related to the policy on ownership and Use of Stanford Name:

- Academic and Business Relationships with Third Parties (Guide Memo 14)
- Partisan Political Activities (Guide Memo 15.1)

* Where appropriate, registered marks may be shown with the symbol, designating their status as federally registered trademarks.

COPYING PRINTED MATERIAL FOR TEACHING AND RESEARCH

Federal copyright law governs copying intellectual property such as books and articles, including the making of copies for teaching and research. It is each faculty member's responsibility to be aware of and abide by the law, and the Provost’s Office periodically issues memoranda reminding faculty and staff members of their responsibilities in this area.

The memoranda, in addition, list those publishers with whom Stanford has an experimental photocopying license that permits Stanford faculty, staff, and students to make as many copies as they need of excerpts of any length (but not an entire book or issue of a periodical) in connection with the educational, research, or administrative functions of the University. For the most current information on this subject, faculty members should consult their department chair or the Provost’s Office.

DOMESTIC PARTNERS

In October 1990, Stanford University adopted a domestic partners policy. This policy, which implements the University's nondiscrimination policy, makes services that have historically been available to married students available on an equal basis to students with same-sex or opposite-sex domestic partners. These services include access to student housing, a courtesy card that provides access to University facilities, and the ability to purchase medical care at Cowell Health Service. A domestic partnership is defined as an established long-term partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare.

SEXUAL HARASSMENT

What follows is a summary of the University's Sexual Harassment Policy, which is published in its complete form in the Administrative Guide Memo 23.2.

POLICY

Stanford University strives to provide a place of work and study free of sexual harassment, intimidation, or exploitation. It is expected that students, faculty, and staff will treat one another with respect.

All students, faculty, and staff are subject to this policy. Individuals who violate this policy are subject to discipline up to and including discharge, expulsion, or other appropriate sanction.

Reports of sexual harassment are taken seriously and will be dealt with promptly. The specific action taken in any particular case depends on the nature and gravity of the conduct reported, and may include intervention, mediation, investigation, and the initiation of grievance and disciplinary processes as discussed more fully below. Where sexual harassment is found to have occurred, the University will act to stop the harassment, act to prevent its recurrence, and discipline those responsible.

The University recognizes that confidentiality is important. Sexual harassment advisers and others responsible to implement this policy will respect the confidentiality and privacy of individuals reporting or accused of sexual harassment to the extent reasonably possible. Examples of situations where confidentiality cannot be maintained include circumstances when the University is required by law to disclose information (such as in response to legal process) and when disclosure is required by the University's outweighing interest in protecting the rights of others.

Reprisals against an individual who in good faith reports or provides information in an investigation about behavior that may violate this policy are against the law and will not be tolerated. Intentionally providing false information, however, is grounds for discipline.

Stanford is committed to the principles of free inquiry and free expression. Vigorous discussion and debate are fundamental to the University, and this policy is not intended to stifle teaching methods or freedom of expression generally, nor will it be permitted to do so. Sexual harassment, however, is neither legally protected expression nor the proper exercise of academic freedom; it compromises the integrity of the University, its tradition of intellectual freedom and the trust placed in its members.

WHAT IS SEXUAL HARASSMENT?

Unwelcome sexual advances, requests for sexual favors, and other visual, verbal, or physical conduct of a sexual nature constitute sexual harassment when:

1. It is implicitly or explicitly suggested that submission to or rejection of the conduct will be a factor in academic or employment decisions or evaluations, or permission to participate in a University activity; or
2. The conduct has the purpose or effect of unreasonably interfering with an individual's academic or work performance, or creating an intimidating or hostile academic, work, or student living environment.

Determining what constitutes sexual harassment depends upon the specific facts and the context in which the conduct occurs. Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example:

- It may be conduct toward an individual of the opposite sex or the same sex.
- It may occur between peers or between individuals in a hierarchical relationship.
- It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.
- It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

The University’s Policy on Sexual Assault (see Stanford Administrative Guide Memo 23.3) may also apply when sexual harassment involves physical contact.

WHAT TO DO ABOUT SEXUAL HARASSMENT

The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

CONSULTATION

Consultation about sexual harassment is available from the Sexual Harassment Advisers (including residence deans), human resources personnel, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons, and others. A list of Sexual Harassment Advisers is available in the brochure, Understanding Stanford's Sexual Harassment Policy. The brochure can be obtained from the Sexual Harassment Policy Office, Building 310, Main Quad, Room 201, Stanford, CA 94305, (650) 723-1583. The information contained in the brochure, including an up-to-date list of Sexual Harassment Advisers, is available on-line at http://www.stanford.edu/
THIRD PARTY INTERVENTION

Depending on the circumstances, third party intervention in the workplace, student residence, or academic setting may be attempted. Third party interveners may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University.

When third party intervention is used, typically the third party will meet privately with each of the persons involved, try to clarify their perceptions, and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases.

Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assignments, substitution of one class for another, or other relief, where appropriate.

FORMAL GRIEVANCE AND DISCIPLINARY PROCESSES

Grievance or disciplinary processes may be pursued as applicable. The applicable grievance procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the grievant's submission of a written statement, an investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

If the identified grievance officer has a conflict of interest, an alternate will be arranged, and the Sexual Harassment Policy Office can help assure that this occurs.

In most cases, grievances must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance.

The following are the established grievance procedures. They are available through Stanford’s website; copies may also be obtained from the Sexual Harassment Policy Office.

Academic Staff Grievance Procedure (see Research Policy Handbook)
Collective Bargaining Agreements for unit members
Faculty Grievance Procedure (see Faculty Handbook)
Staff Dispute Resolution, including student employees (see Stanford Administrative Guide Memo 22.10)

Student Academic Grievance Procedure (see Stanford University Bulletin, Information and Regulations Governing Student Conduct and Procedures for their Enforcement)

Student Nonacademic Grievance Procedure (for additional information, consult the Director of the Office of Campus Relations)

In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement on Faculty Discipline and students to the Fundamental Standard.

PROCEDURAL MATTERS

INVESTIGATIONS

If significant facts are contested, an investigation may be undertaken. The investigation will be conducted in a way that respects, to the extent possible, the privacy of all of the persons involved. In appropriate cases, professional investigators may be asked to assist in the investigation. The results of the investigation may be used in the third party intervention process or in a grievance or disciplinary action.

RECORD KEEPING

The Sexual Harassment Policy Office will track reports of sexual harassment for statistical purposes and report at least annually to the University President concerning their number, nature, and disposition.

In the other instances (third party intervention, grievances, and disciplinary actions), the Sexual Harassment Policy Office may keep confidential records of reports of sexual harassment and the actions taken in response to those reports, and use them to identify individuals or departments likely to benefit from training so that training priorities can be established. No records will be retained in cases where the individual accused was not informed that there was a complaint.

COSTS

California law provides, in part, “an employer shall indemnify its employee for all that the employee necessarily expends or loses in direct consequence of the discharge of his or her duties as such . . . .” The issue of indemnification obviously turns on the facts and circumstances of each situation. On the other hand, individuals who violate this policy and/or their schools, institutes, or other units may be required to contribute to any costs and expenses incurred as a result of behavior that is wrongful and/or contrary to the discharge of an employee’s duties.

RESOURCES FOR DEALING WITH SEXUAL HARASSMENT

Persons who have concerns about sexual harassment should contact any Sexual Harassment Adviser listed in the brochure, or the Sexual Harassment Policy Office. Reports should be made as soon as possible: the earlier the report, the easier it is to investigate and take appropriate remedial action. When reports are long delayed, the University will try to act to the extent it is reasonable to do so, but it may be impossible to achieve a satisfactory result after much time has passed.

Likewise, anyone who receives a report or a grievance involving sexual harassment should promptly consult with a Sexual Harassment Adviser.

There are a number of individuals specially trained and charged with specific responsibilities in the area of sexual harassment. In brief:

Sexual Harassment Advisers—Sexual Harassment Advisers serve as resources to individuals who wish to discuss issues of sexual harassment, whether because they have been harassed or because they want information about the University’s policy and procedures. There is usually at least one adviser assigned to each of the schools at the University and to each large work unit; the residence deans also have been appointed as Sexual Harassment Advisers.

Director of the Sexual Harassment Policy Office—He/she is responsible for the implementation of this policy; provides advice to individuals when requested; supervises the other advisers; encourages and assists prevention education for students, faculty, and staff; keeps records show-
ing the disposition of complaints; and generally coordinates matters arising under this policy. Because education and awareness are the best ways to prevent sexual harassment, developing awareness, education and training programs, and publishing informational material are among the most important functions of the Sexual Harassment Policy Office.

As indicated earlier, individuals with concerns about sexual harassment may also discuss their concerns informally with psychological counselors (for example, through CAPS or the HELP Center), chaplains (through the Memorial Chapel), or University or Medical School ombudspersons.

EXTERNAL REPORTING

Sexual harassment is prohibited by state and federal law. In addition to the internal resources described above, individuals may pursue complaints directly with the government agencies that deal with unlawful harassment and discrimination claims, for example, the U.S. Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights (OCR) of the U.S. Department of Education, and the State of California Department of Fair Employment and Housing (DFEH). These agencies are listed in the Government section of the telephone book.

NOTE ON CONSENSUAL RELATIONSHIPS

There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions (such as teacher and student, supervisor and employee, or student resident and the individual who supervises the day-to-day student living environment). Parties in such a relationship assume those risks. Such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the student–faculty relationship. They may, moreover, be less consensual than the individual whose position confers power believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint when that relationship gives undue access or advantage, restricts opportunities, or creates a hostile environment for others. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to a romantic involvement, this past consent does not remove grounds for a charge based upon subsequent unwelcome conduct.

POLICY REVIEW AND EVALUATION

This policy went into effect on October 6, 1993, and was amended on November 30, 1995. It is subject to periodic review, and any comments or suggestions should be forwarded to the Sexual Harassment Policy Office.

POLICY REFERENCE

Stanford’s Sexual Harassment policy is published in its entirety as Administrative Guide Memo 23.2. The Administrative Guide is a public document available for review with local personnel administrators, at any Personnel Office, at the reference desk in Green Library, and on-line in Portfolio in the Office category.

RESOURCES

A brochure containing the policy, a list of current sexual harassment advisers, confidential resources, and other helpful information is available on-line at http://www.stanford.edu/group/SexHarass/, and in printed form from the Sexual Harassment Policy Office at (650) 723-1583, Building 310, Main Quad, room 201, MC: 2100. Copies of the University policy on sexual assault, which complements this sexual harassment policy, as well as all other documents mentioned in this section, are also available at the Sexual Harassment Policy Office.

All faculty, staff, and students who have questions regarding this policy and its enforcement can consult with a Sexual Harassment Adviser or can be directed to the local Personnel Officer or Regional Human Relations Manager. Faculty members should contact their dean or department chair, and students should contact the Vice Provost and Dean of Student Affairs.

POLICY ON SEXUAL ASSAULT

What follows is a summary of the University’s Policy on Sexual Assault which is published in complete form in the Administrative Guide Memo 23.3.

Background—Stanford University’s policy and procedures on sexual harassment are published in Administrative Guide Memo 23.2 and are republished annually in the Stanford Bulletin and elsewhere. This statement supplements them, providing Stanford University’s policy and procedures specifically concerning sexual assault. This statement has been enacted by Stanford University in accordance with California State Law, Assembly Bill 3098, Postsecondary Education: Student Safety, July, 1990.

Definition—For the purposes of this statement by the University, “sexual assault” includes, but is not limited to, rape, forced sodomy, forced oral copulation, rape by a foreign object, sexual battery, or threat of sexual assault.

Policy—Sexual assault by force or coercion, including deliberate coercion through the use of drugs or alcohol, is absolutely unacceptable at Stanford University. Any member of the Stanford community who commits sexual assault at or on the grounds of the University, or at any of the University’s off-campus facilities or activities, or at the facilities or activities of any affiliated student organization, will face maximal institutional sanctions, in addition to any prosecutions external authorities may undertake. Stanford University is committed to providing information on services, resources, and treatment available to victims of sexual assault.

Notification—With the consent of the victim, charges of sexual assault received by University offices or personnel shall be communicated promptly to the Department of Public Safety, 711 Serra Street, telephone (9)-911 for emergency response or (650) 723-9633 during normal business hours, or, in the case of a student, to the sexual assault response team at Counseling and Psychological Services (CAPS) at Cowell Student Health Center, 606 Campus Drive, telephone 723-3785.

Legal Reporting Requirements—Health care professionals are expected to fulfill legally mandated reporting requirements.

Emergency Services Available to Victims—Victims of sexual assault are urged to seek immediate attention from emergency police, medical, and counseling services. On the Stanford campus and in the immediate vicinity, the following provide 24-hour response and will arrange for police assistance, medical assistance, emotional support services, and advocacy and support:

“911” Emergency Network: dial 9-911 from University phones or 911 from outside phones.

Santa Clara Valley Medical Center, 751 South Bascom Avenue, San Jose, telephone (408) 299-5311.

Mid-Peninsula Rape Crisis Center, 4161 Alma Street, Palo Alto, telephone (650) 493-RAPE.

Sexual Assault Response Team (CSART), for students, at the Cowell Student Health Center, telephone (650) 723-3785.

Stanford University Hospital, 300 Pasteur Drive, Stanford, telephone (650) 723-5111.

Non-Emergency Resources—Additional resources for students are available at Cowell Student Health Center (650-723-3785), including short-term counseling, referral to long-term therapy, follow-up pregnancy testing, and testing and treatment for sexually transmitted diseases.
behalf of the University in the political arena, they must do so in accord-

Some threshold of time or money spent on lobbying that triggers reg-

istration and reporting requirements. Regardless of thresholds, how-

ever, no University employee—other than the following individuals,
on matters under their jurisdiction—may lobby on behalf of the Uni-

versity without specific authorization:

POLITICAL ACTIVITIES

Stanford University, as a charitable entity, is subject to federal, state,

and local laws and regulations regarding political activities—campaign

activities, lobbying, and the giving of gifts to public officials.

While all members of the University community are naturally free to

express their political opinions and engage in political activities to what-

ever extent they wish, it is very important that they do so only in their

individual capacities and avoid even the appearance that they are speak-

ing or acting for the University in political matters.

In the limited circumstances where individuals must speak or act on

behalf of the University in the political arena, they must do so in accord-

dance with the provisions of this Guide Memo.

1. Summary of Legal Requirements and Restrictions

a) Campaign Activities: contributions of money, goods, or services
to candidates for political office and in support of or opposition to
ballot measures are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of rules. Because of the University’s tax-exempt status, the University is legally prohibited from endorsing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.

b) Lobbying: lobbying can generally be described as any attempt to
influence the action of any legislative body (for example, Congress, state legislatures, county boards, city councils, and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels but can differ widely in scope, depending on the jurisdic-
tion. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and offices in the executive branch (for example, lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually

Ongoing Case Management Procedures—Both informal procedures and formal grievance procedures for case management of sexual assault charges are given in the University’s policy on Sexual Harassment appearing as Administrative Guide Memo 23.2 and published annually in the Stanford Bulletin. Victims are to be kept informed by those responsi-
ble for those procedures of the status of any disciplinary proceedings and the results of any disciplinary action or appeal, providing that the victim agrees in advance, in writing, to treat this information as confi-
dential. The offices of the Dean of Students are available to help student victims deal with academic difficulties that may arise because of the victimization and its impact.

Information Requests and Confidentiality—The University offices responding to charges of sexual assault have established protocols for protecting confidentiality and for handling inquiries from the press, concerned students, and parents.

Information about Options—The University offices responding to charges of sexual assault will inform victims, at a minimum, of the options of: criminal prosecution, civil prosecution, the disciplinary process, responding to charges of sexual assault have established protocols for victimization and its impact.

Victims are to be kept informed by those responsible for those procedures of the status of any disciplinary proceedings and the results of any disciplinary action or appeal, providing that the victim agrees in advance, in writing, to treat this information as confi-
dential. The offices of the Dean of Students are available to help student victims deal with academic difficulties that may arise because of the victimization and its impact.

In the limited circumstances where individuals must speak or act on

behalf of the University in the political arena, they must do so in accord-

dance with the provisions of this Guide Memo.

1. Summary of Legal Requirements and Restrictions

a) Campaign Activities: contributions of money, goods, or services
to candidates for political office and in support of or opposition to
ballot measure campaigns are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of rules. Because of the University’s tax-exempt status, the University is legally prohibited from endorsing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.

b) Lobbying: lobbying can generally be described as any attempt to
influence the action of any legislative body (for example, Congress, state legislatures, county boards, city councils, and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels but can differ widely in scope, depending on the jurisdic-
tion. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and offices in the executive branch (for example, lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually
4) No person supporting candidates for public office or engaging in other political activities may use University space or facilities or receive University support, except in the limited ways described in section 3A, below.

5) No person may use for lobbying activities federally-funded contracts or grant money received by the University.

Even the foregoing activities that are only restricted, rather than prohibited, may be subject to limitations imposed by law. Therefore, any person engaging in the activity, or contemplating doing so, should consult with the Director of Government and Community Relations.

b) Guidelines for Avoiding Prohibited Partisan Political Activities: the following guidelines should assist in preventing the involvement or apparent involvement of the University in political activities in support of or opposition to any candidate for elective public office, that is, partisan political activities. Except in the limited circumstances set forth in section 3A, below:

1) Use of Name and Seal: neither the name nor seal of the University or of any of its schools, departments, or institutions should be used on letters or other materials intended for partisan political purposes.

2) Use of Address and Telephones: no University office should be used as a return mailing address for partisan political mailings, and telephone service that is paid by the University, likewise, should not be used for partisan political purposes. (Obviously, a student's dormitory room and telephone service that are personal to the student may be used for these purposes.)

3) Use of Title: the University title of a faculty or staff member or other person should be used only for identification and should be accompanied by a statement that the person is speaking as an individual and not as a representative of the University.

4) Use of Services and Equipment: University services, such as Interdepartmental Mail; equipment, such as duplicating machines, computers, and telephones; and supplies should not be used for partisan political purposes.

5) Use of Personnel: no University employee may, as part of his or her job, be requested to perform tasks in any way related to partisan political purposes.

3. Permissible Activities

a) In General: as noted above, the federal, state, and local laws which limit the partisan political activities that can take place in University facilities and with University support in no way inhibit the expression of personal political views by any individual in the University community. Nor do they forbid faculty, students, or staff from joining with others in support of candidates for office or in furtherance of political causes. There is no restriction on discussion of political issues or teaching of political techniques. Academic endeavors which address public policy issues are in no way affected.

Because the University encourages freedom of expression, political activities which do not reasonably imply University involvement or identification may be undertaken so long as regular University procedures are followed for use of facilities. Examples of permissible activities are:

1) Use of areas, such as White Plaza, for tables, speeches, and similar activities.

2) Use of auditoriums for speeches by political candidates, but subject to rules of the Internal Revenue Service, the Federal Election Commission, and the California Fair Political Practices Commission, and other applicable laws. Arrangements must be made with University Events and Services. (See also Guide Memo 82.1, Public Events, for more information.)

To reiterate, because tax and political compliance laws impose restrictions, and even prohibitions, on certain political activities and on the use of buildings and equipment at a non-profit institution such as the University, any such activities must be in compliance with these legal requirements. Individuals taking political positions for themselves or groups with which they are associated, but not as representatives of the University, should clearly indicate, by words and actions, that their positions are not those of the University and are not being taken in an official capacity on behalf of the University.

b) Limited University Political Activities: limited activities relating to specific federal, state, or local legislation or ballot initiatives are permissible where (1) the subject matter is directly related to core interests of the University's activities; (2) the President has determined that the University should take a position; and (3) the individuals who speak or write on the University's behalf are specifically authorized to do so.

4. Responsibility for Interpretation: the Director of Government and Community Relations, in consultation with the General Counsel, is the administrative officer responsible for interpretation and application of the above guidelines. Questions on whether planned student activities are consistent with the University's obligations should be directed to the Dean of Students, who will consult with the Director of Government and Community Relations and/or the General Counsel. All other questions on whether planned activities are consistent with the University's obligations should be addressed directly to the Director of Government and Community Relations or the General Counsel.

CAMPUS DISRUPTION

What follows is a summary of the University's policy on campus disruption, which is published in its complete form in the Administrative Guide.

Because the rights of free speech and peaceful assembly are fundamental to the democratic process, Stanford firmly supports the rights of all members of the University community to express their views or to protest against actions and opinions with which they disagree.

All members of the University also share a concurrent obligation to maintain on the campus an atmosphere conducive to scholarly pursuits, to preserve the dignity and seriousness of University ceremonies and public exercises, and to respect the rights of all individuals.

The following regulations are intended to reconcile these objectives.

It is a violation of University policy for a member of the faculty, staff, or student body to (1) prevent or disrupt the effective carrying out of a University function or approved activity, such as lectures, meetings, interviews, ceremonies, the conduct of University business in a University office, and public events; (2) obstruct the legitimate movement of any person about the campus or in any University building or facility.

Members of the faculty, staff, and student body have an obligation to leave a University building or facility when asked to do so in the furtherance of the above regulations by a member of the University community acting in an official role and identifying himself or herself as such; members of the faculty, staff, or student body also have an obligation to identify themselves, when requested to do so by such a member of the University community who has reasonable grounds to believe that the person(s) has violated section (1) or (2) of this policy and who has so informed the person(s).

The policy has been applied to the following actions: refusal to leave a building which has been declared closed; obstructing the passage into or out of buildings by sitting in front of doorways; preventing University employees from entering their workplace; preventing members of a class from hearing a lecture or taking an examination, or preventing the instructor from giving a lecture, by means of shouts, interruptions, or chants; preventing others from hearing a scheduled speaker by means of shouts, interruptions, or chants; refusing to leave a closed meeting when unauthorized to attend; and intruding upon or refusing to leave a private interview.

It should be understood that while the above are examples of extraordinary disruptive behavior, the application of the policy also takes situational factors into consideration. Thus, for example, conduct appropriate at a political rally might constitute a violation of the Policy on Campus Disruption if it occurred within a classroom.

There is no "ordinary" penalty which attaches to violations of the Policy on Campus Disruption. In the past, infractions have led to penal-
The University, as an educational institution, approaches student conduct in its student conduct Program at Cowell Student Health Service. The goal of this Policy is to reduce the abuse and illegal use of alcohol and other drugs, and the human and material costs associated with it. The University, as an educational institution, approaches student conduct from a perspective that places emphasis on individual responsibility and development. Education about and prevention of alcohol and other drug-related problems will continue to be the primary emphasis and goal. However, the University expects students, as individuals and as members of groups, to conduct themselves in accordance with this and all other University policies governing student conduct.

* Controlled substances are those defined in 21 U.S.C. 812; they include, but are not limited to, such substances as marijuana, heroin, cocaine, and amphetamines.

POLICY

It is the policy of the University to maintain a drug-free workplace and campus. The unlawful manufacture, distribution, dispensation, possession, and/or use of controlled substances or the unlawful possession, use, or distribution of alcohol is prohibited on the Stanford campus, in the workplace, or as part of any of the University’s activities. The workplace and campus are presumed to include all Stanford premises where the activities of the University are conducted. Violation of this policy may result in disciplinary sanctions up to and including termination of employment or expulsion of students. Violations may also be referred to the appropriate authorities for prosecution. This policy will be reviewed at least biennially.

The University will continue to comply with all applicable state and federal laws, including the Americans with Disabilities Act.

SOME APPLICATIONS

No University funds or funds collected by the University may be used in a way which violates the policy. In student residences, house funds (funds collected by the University) may not be used to buy alcohol that is then served to persons under the age of 21. Therefore, because the majority of freshmen are under 21, house funds for all-freshman residences should not be used to buy alcohol. In other residences, the decision to use student-collected or house funds to buy alcohol should be made thoughtfully, fairly, lawfully, and in a way that respects the views of the students.

Party planners are responsible for planning and carrying out events in compliance with this Policy. At least one house or organization officer must assume responsibility for an event’s compliance with the Policy, and their names must be made available to Stanford’s Department of Public Safety and the University upon request.

CONSEQUENCES OF VIOLATION

Educational and rehabilitative measures will be the preferred response to infractions of the Policy unaccompanied by more egregious misconduct. Penalties are calibrated according to the severity of the violation. Misbehavior associated with drug or alcohol use and abuse may result in one or more of the following University consequences:

- Individuals who violate the University Residence Agreement may lose their University student housing privileges.
- Individuals who violate the University’s terms and conditions for student organization recognition as defined in the Student Organization Handbook may be subject to expulsion from the student organization.
- Student groups which violate the Policy may face suspension of social privileges, as well as the loss of University recognition, meeting space, and housing or other related privileges.
- Individual students who violate the Fundamental Standard may be subject to the University’s student judicial process.

“Students should understand that inebriation is never an excuse for misconduct, that the careless or willful reduction, through the use of alcohol or other intoxicants, of their own ability to think clearly, exercise good judgment, and respond to rational intervention may invoke more stringent penalties than otherwise might be levied.

Penalties will be imposed according to the facts and circumstances of each case. They can be imposed singly or in combination by the Office of Residential Education/Graduate Residences, the Office of Student Activities, the Dean of Students Office, and the Office of Judicial Affairs.

CIVIL LIABILITY

While the law regarding civil liability is complex, it is important to know that under some circumstances party hosts, sponsors, bartenders, or others might be held legally liable for the consequences of serving alcohol to underage drinkers or to obviously intoxicated persons. Social
hosts or party planners could be sued and found personally responsible for damages to the injured party(ies) including:

Specific damages. These are damages which are measurable. For example, when bodily injury results in medical expenses or lost wages.

General damages. These are damages which cannot be specifically measured in terms of dollar amount. For example pain and suffering resulting from bodily injury.

Punitive damages. These are damages which are intended to serve as an example to others and to discourage behavior which is deemed highly undesirable to society.

CRIMINAL LIABILITY

Stanford University is not a sanctuary from the enforcement of state and local laws. Students and others on campus who violate the law may be and have been arrested and prosecuted. Primary responsibility for law enforcement, including that related to alcohol, rests with law enforcement agencies, primarily the Stanford Police Department. Uniformed officers who patrol the campus and respond to calls are deputized by the Sheriff of Santa Clara County and are fully empowered and authorized to stop vehicles, make arrests, and enforce all laws. Laws are subject to change; consequently, the following information is illustrative but must not be relied on as a complete and current citing of relevant laws. More information is available at the Stanford Department of Public Safety, 711 Serra Street.

Generally, as of January, 1997, it is a criminal offense:

1. To provide any alcoholic beverage to a person under 21 (California Business and Professions Code 25638).
2. To provide any alcoholic beverage to an obviously intoxicated person (California Business and Professions Code 25602).
3. For any person under age 21 to purchase alcohol (California Business and Professions Code 25628).
4. To be under the influence of alcohol or another drug in a public place and unable to exercise care for one's own safety or that of others (California Penal Code 647(f)).
5. For persons under 21 to possess alcohol in any public place or any place open to the public (for example, public places in student residences) (Business and Professions Code 25662).
6. To operate a motor vehicle while under the influence of alcohol or any other drug. Presumed to be driving under the influence (DUI) with a blood alcohol level (BAL) of 0.08% or higher. Can be shown to be DUI with a BAL of 0.05% or higher (California Vehicle Code 23152).
7. For people under the age of 21 to drive with a BAL of 0.01% or greater (California Vehicle Code 23136 and 23137).
8. For people under the age of 21 to drive with a BAL of 0.05% or greater (California Vehicle Code 23140).
9. To operate a motor vehicle while under the influence of alcohol or any drug and cause injury to another (California Vehicle Code 23153).
10. To ride a bicycle while under the influence of alcohol, drugs, or both (California Vehicle Code 21200.5).
11. To have an open container of alcohol in a motor vehicle; and, for persons under 21 to drive a vehicle carrying alcohol or to possess alcohol while in a motor vehicle (California Vehicle Code 23223, 23221).
12. To have in one's possession, or to use, false evidence of age and identity to purchase alcohol (California Business and Professions Code 25661).
13. To manufacture a fraudulent driver's license or identification (California Penal Code 470).
14. To possess an open container of alcohol in a public place or any place open to the public. Applies in Palo Alto jurisdiction (Business and Professions Code 25620).
15. To be in possession of an unregistered keg. All kegs sold must be registered at the time of purchase. Identification tags must be placed on all kegs in order to allow kegs to be traced if the contents are used in violation of the law (Business and Professions Code 25659.5).
16. Rape. To have sex with a person who is unable to provide informed consent, for example, under the influence of alcohol or another drug or unconscious (passed out) (California Penal Code 261).
17. To unlawfully possess certain controlled substances, including Rohypnol, amphetamines, certain hallucinogens, depressants, and designer drugs (California Health and Safety Code 11377).
18. To illegally manufacture, sell, distribute, or possess controlled substances (those listed in Schedules I through V of the Controlled Substances Act) (21 SC 812; 21 SC 828, 841, 844, 845, 845A).
20. To transport, sell, or distribute marijuana to a minor or to use a minor to transport, sell, or distribute marijuana (California Health and Safety 11361).

WHERE TO GET HELP

In the event of a life threatening emergencies call 9-911 from on-campus and 911 from off-campus.

Campus Resources—(Area Code 650). Counseling and Psychological Services, 24 hours (723-3785); The Alcohol and Other Drug Abuse Prevention Program (723-3429); Stanford Alcohol and Drug Treatment Center (723-6682); Cowell Student Health Center's Medical Advice Line, 24 hours (723-4841); Campus Ministries (723-3114); The Bridge, 24-hour Peer Counseling (723-3392).

The Alcohol and Other Drug Abuse Prevention Program at Cowell: provides information and referral, educational trainings and workshops, and non-clinical consultations for groups and individuals. The program utilizes a harm reduction approach to prevent problems associated with the use of alcohol, tobacco, and other drugs (723-3429).

The Office of Student Activities at Tresidder Memorial Union: provides workshops and training, publications, and party planning consultations. Web site: http://www-leland.stanford.edu/dept/OSA/party/ (723-2733).

Community Resources—The National Council for Alcoholism and Drug Dependency, 24-hour hotline (408) 292-9945, Alcoholics Anonymous (650) 573-6811 or (408) 297-3555, Alanon (650) 873-2356 or (408) 379-1 051, Cocaine Anonymous (800) 234-0420 or (408) 374-8009, Narcotics Anonymous (650) 572-3257 or (408) 298-4200.

SMOKE-FREE ENVIRONMENT

What follows is a summary of the University's policy on a smoke-free environment, which is published in its complete form in the Administrative Guide.

Policy—It is the policy of Stanford University that smoking of tobacco products in enclosed buildings and facilities and during indoor or outdoor events (and the selling of tobacco products) on the campus is prohibited. Subject to renegotiations, the University will comply with any current lease agreement permitting the sale of tobacco products on the campus.

Applicability—This policy applies to all academic and administrative units of Stanford University, including SLAC, and all Residence Halls. This policy does not supersede more restrictive policies which may be in force in compliance with federal, state, or local laws or ordinances. The policy was effective in the Residence Halls and other campus student housing locations at the beginning of the 1994-1995 academic year.

Guidelines—Smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in covered walkways, in University vehicles, during indoor and outdoor athletic events, and during other University sponsored or designated indoor or outdoor events.

Ashtrays will not be provided in any enclosed University building or facility. Tobacco products will not be sold at the University. "Smoking Prohibited" signs will be posted.

Smoking is permitted in outdoor areas, except during organized events. Outdoor smoking areas should be located far enough away from doorways, open windows, covered walkways, and ventilation systems to prevent smoke from entering enclosed buildings and facilities. To
accommodate faculty, staff, and students who smoke. Vice Presidents, Vice Provosts, and Deans may designate certain areas of existing courtyards and patios as smoking areas in which case ashtrays must be provided. Costs associated with providing designated smoking areas and ashtrays will be absorbed by the specific academic or administrative unit(s).

Enforcement—This policy relies on the consideration and cooperation of smokers and non-smokers. It is the responsibility of all members of the University community to observe and follow this policy and its guidelines.

Smoking cessation programs are available for faculty and staff through the Center for Research in Disease Prevention, and the Health Improvement Program (HIP). Students may contact the Health Promotion Program (HPP) through the Student Health Center for smoking cessation information or programs.

Faculty, staff, and students repeatedly violating this policy may be subject to appropriate action to correct any violation(s) and prevent future occurrences.

Implementation and Distribution—Copies of this policy will be disseminated by the Vice President for Faculty and Staff Services, and the Vice Provost for Student Affairs to all faculty, staff, and students and to all new members of the University community.

UNIVERSITY STATEMENT ON PRIVACY

Stanford University has an interest in ensuring that the privacy of its students, faculty, and staff is respected, and that no activities interfere with education, research, or residential life.

The University is private property; however, some areas of the campus typically are open to visitors. These areas include White Plaza, public eating areas (such as those at Tresidder Union), outdoor touring areas, and locations to which the public has been invited by advertised notice (such as for public educational, cultural, or athletic events). Even in these locations, visitors must not interfere with the privacy of students, faculty, and staff, or with educational, research, and residential activities. The University may revoke at any time permission to be present in these, or any other areas. Visitors should not be in academic or residential areas unless they have been invited for appropriate business or social purposes by the responsible faculty member, student, or staff member.

No commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus without the University’s permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violators of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.

COMPUTER AND NETWORK USAGE POLICY

POLICY STATEMENT

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources and to respect the rights of others. This policy provides guidelines for the appropriate and inappropriate use of information technologies.

POLICY PURPOSE

The purpose of the Computer and Network Usage Policy is to ensure an information infrastructure that promotes the basic missions of the University in teaching, learning and research. Computers and networks are powerful enabling technologies for accessing and distributing the information and knowledge developed at the University and elsewhere.

As such, they are strategic technologies for the current and future needs of the University. Because these technologies give individuals the ability to access and copy information from remote sources, users must be mindful of the rights of others to their privacy, intellectual property and other rights. This Usage Policy codifies what is considered appropriate usage of computers and networks with respect to the rights of others. With the privileges to use the information resources of the University come specific responsibilities outlined in this Policy.

SUMMARY

Users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain unauthorized access, and respect the rights of other computer users. This policy covers appropriate use of computers, networks, and information contained therein.

1. POLICY SCOPE AND APPLICABILITY
a) Applicability: this policy is applicable to all University students, faculty and staff and to others granted use of Stanford University information resources. This policy refers to all University information resources whether individually controlled or shared, stand-alone or networked. It applies to all computer and computer communication facilities owned, leased, operated, or contracted by the University. This includes word processing equipment, personal computers, workstations, mainframes, minicomputers, and associated peripherals and software, regardless of whether used for administration, research, teaching or other purposes.

b) Locally Defined and External Conditions of Use: individual units within the University may define "conditions of use" for information resources under their control. These statements must be consistent with this overall policy but may provide additional detail, guidelines and/or restrictions. Where such "conditions of use" exist, enforcement mechanisms defined therein shall apply. These individual units are responsible for publicizing both the regulations they establish and their policies concerning the authorized and appropriate use of the equipment for which they are responsible. Where use of external networks is involved, policies governing such use also are applicable and must be adhered to.

c) Legal Process: the University does not exist in isolation from other communities and jurisdictions and their laws. Under some circumstances, as a result of investigations, subpoena or lawsuits, the University may be required by law to provide electronic or other records or other information related to those records or relating to use of information resources.

2. POLICIES: a user of University information resources who is found to have purposely or recklessly violated any of the following policies will be subject to disciplinary action up to and including discharge, dismissal, expulsion, and/or legal action.

a) Copyrights and Licenses: computer users must respect copyrights and licenses to software and other on-line information.

1) Copying: all software protected by copyright must not be copied except as specifically stipulated by the owner of the copyright or otherwise permitted by copyright law. Protected software may not be copied into, from, or by any University facility or system, except pursuant to a valid license or as otherwise permitted by copyright law.

2) Number of Simultaneous Users: the number and distribution of copies must be handled in such a way that the number of simultaneous users in a department does not exceed the number of original copies purchased by that department, unless otherwise stipulated in the purchase contract.

3) Copyrights: in addition to software, all other copyrighted information (text, images, icons, programs, etc.) retrieved from computer or network resources must be used in conformance with applicable copyright and other law. Copied material must be properly attributed. Plagiarism of computer information is sub-

670
b) Integrity of Information Resources: computer users must respect the integrity of computer-based information resources.

1) Modification or Removal of Equipment: computer users must not attempt to modify or remove computer equipment, software, or peripherals that are owned by others without proper authorization.

2) Encroaching on Others' Access and Use: computer users must not encroach on others' access and use of the University's computers. This includes but is not limited to: the sending of chain-letters or excessive messages, either locally or off-campus; printing excess copies of documents, files, data, or programs; running grossly inefficient programs when efficient alternatives are known by the user to be available; unauthorized modification of system facilities, operating systems, or disk partitions; attempting to crash or tie up a University computer or network; and damaging or vandalizing University computing facilities, equipment, software or computer files.

3) Unauthorized or Destructive Programs: computer users must not intentionally develop or use programs which disrupt other computer users or which access private or restricted portions of the system and/or damage the software or hardware components of the system. Computer users must ensure that they do not use programs or utilities which interfere with other computer users or which modify normally protected or restricted portions of the system or user accounts. Computer users must not use network links for any use other than permitted in network guidelines. The use of any unauthorized or destructive program may result in legal civil action for damages or other punitive action by any injured party, including the University, as well as criminal action.

4) Academic Pursuits: the University recognizes the value of research on game development, computer security, and the investigation of self-replicating code (e.g., computer viruses and worms). The University may restrict such activities in order to protect University and individual computing environments, but in doing so will take account of legitimate academic pursuits.

c) Unauthorized Access: Computer users must refrain from seeking to gain unauthorized access to information resources or enabling unauthorized access.

1) Abuse of Computing Privileges: users of University information resources must not access computers, computer software, computer data or information, or networks without proper authorization, or intentionally enable others to do so, regardless of whether the computer, software, data, information, or network in question is owned by the University. For example, abuse of the networks to which the University belongs or the computer at other sites connected to those networks will be treated as an abuse of University computing privileges.

2) Reporting Problems: any defects discovered in system accounting or system security must be reported to the appropriate system administrator so that steps can be taken to investigate and solve the problem.

3) Password Protection: a computer user who has been authorized to use a password-protected account may be subject to both civil and criminal liability if the user discloses the password or otherwise makes the account available to others without permission of the system administrator.

d) Usage: computer users must respect the rights of other computer users. Most University systems provide mechanisms for the protection of private information from examination by others. Attempts to circumvent these mechanisms in order to gain unauthorized access to the system or to another person's information are a violation of University policy and may violate applicable law. Authorized system administrators may access computer users' files at any time for maintenance purposes. System administrators will report suspected unlawful or improper activities to the proper authorities.

1) Unlawful Messages: use of electronic communication facilities (such as mail or talk, or systems with similar functions) to send fraudulent, harassing, obscene, threatening, or other messages that are a violation of applicable federal, state or other law or University policy is prohibited.

2) Mailing Lists: users must respect the purpose and charters of computer mailing lists (including local or network news groups and bulletin-boards). The user of an electronic mailing list is responsible for determining the purpose of the list before sending messages to or receiving messages from the list. Subscribers to an electronic mailing list will be viewed as having solicited any material delivered by the list as long as that material is consistent with the list's purpose. Persons sending to a mailing list any materials which are not consistent with the list's purpose will be viewed as having sent unsolicited material.

3) Advertisements: in general, the University's electronic communication facilities should not be used to transmit commercial or personal advertisements, solicitations or promotions (see Commercial Use, below). Some public bulletin boards have been designated for selling items by members of the Stanford community, and may be used appropriately, according to the stated purpose of the list(s).

4) Information Belonging to Others: users must not intentionally seek or provide information on, obtain copies of, or modify data files, programs, or passwords belonging to other users, without the permission of those other users.

e) Political, Personal and Commercial Use: the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state and local laws regarding sources of income, political activities, use of property and similar matters. It also is a contractor with government and other entities and thus must assure proper use of property under its control and allocation of overhead and similar costs.

1) Political Use: University information resources must not be used for partisan political activities where prohibited by federal, state or other applicable laws, and may be used for other political activities only when in compliance with federal, state and other laws and in compliance with applicable University policies.

2) Personal Use: University information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner.

3) Commercial Use: University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are reminded that the "EDU" domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the EDU domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

3. System Administrator Responsibilities: while the University Trustees are the legal "owners" or "operators" of all computers and networks purchased or leased with University funds, oversight of any particular system is delegated to the head of a specific subdivision of the University governance structure, such as a Dean, Department Chair, Administrative Department head, or Principal Investigator. For University-owned or leased equipment, that person is the responsible administrator in the sense of the policies in this Guide memo.

The responsible administrator may designate another person to manage the system. This designate is the "system administrator". The system administrator has additional responsibilities to the University as a whole for the system(s) under his/her oversight, regardless of
the policies of his/her department or group, and the responsible administrator has the ultimate responsibility for the actions of the system administrator.

4. **Computer Security Officer Responsibilities:** the University’s Computer Security Officer or the person designated by the University’s Chief Information Officer shall be the primary contact for the interpretation, enforcement and monitoring of this policy and the resolution of problems concerning it. Any issues concerning law shall be referred to the Legal Office for advice.

a) **Policy Interpretation:** the Computer Security Officer shall be responsible for interpretation of this policy, resolution of problems and conflicts with local policies, and special situations.

b) **Policy Enforcement:** where violations of this policy come to his or her attention, the Computer Security Officer is authorized to work with the appropriate administrative units to obtain compliance with this policy.

c) **Inspection and Monitoring:** only the University’s Computer Security Officer or designate can authorize the inspection of private data or monitoring of messages (including electronic mail) when there is reasonable cause to suspect improper use of computer or network resources.

5. **Consequences of Misuse of Computing Privileges**

a) **Cooperation Expected:** users, when requested, are expected to cooperate with system administrators in any investigation of system abuse. Users are encouraged to report suspected abuse, especially any damage to or problems with their files. Failure to cooperate may be grounds for cancellation of access privileges, or other disciplinary actions.

b) **Corrective Action:** if system administrators have persuasive evidence of misuse of computing resources, and if that evidence points to the computing activities or the computer files of an individual, they should pursue one or more of the following steps, as appropriate to protect other users, networks and the computer system.

Provide notification of the investigation to the University’s Computer Security Officer or designate, as well as the user’s instructor, department or division chair, or supervisor.

Temporarily suspend or restrict the user’s computing privileges during the investigation. A student may appeal such a suspension or restriction and petition for reinstatement of computing privileges through the Dean of Students. A staff member may appeal through applicable dispute resolution procedures. Faculty members may appeal through the Dean of their School.

With authorization from the University’s Computer Security Officer or designate, inspect the user’s files, diskettes, tapes, and/or other computer-accessible storage media.

Refer the matter for possible disciplinary action to the appropriate University unit, i.e., the Dean of Students Office for students, the supervisor for staff, and the Dean of the relevant School for faculty or other teaching or research personnel.

c) **Student Honor Code and Fundamental Standard:** Unless specifically authorized by a class instructor, all of the following uses of a computer are examples of possible violations of the Honor Code:

- Copying a computer file that contains another student’s assignment and submitting it for credit;
- Copying a computer file that contains another student’s assignment and using it as a model for one’s own work;
- Collaborating on an assignment, sharing the computer files and submitting the shared file, or a modification thereof, as one’s individual work.

In addition, student misuse of a computer, network or system may violate the Fundamental Standard. Examples would be, but are not limited to: theft or other abuse of computer time, including unauthorized entry into a file, to use, read, or change the contents; unauthorized use of another person’s identification or password; use of computing facilities to send abusive messages; or use of computing facilities to interfere with the work of another student or the work of a faculty or staff member.

For cases involving a student, referring the case to the Judicial Affairs Office is the recommended course of action. This ensures that similar offenses may be considered for similar punishments, from quarter to quarter, year to year, and instructor to instructor. It also allows the detection of repeat offenders.

6. **Cognizant Office:** Chief Information Officer

7. **Related Policies**

a) **Student Discipline:** see Student Life/Codes of Conduct/Fundamental Standard/Honor Code

b) **Staff Discipline:** see Guide Memo 22.15, Corrective Action

c) **Faculty Discipline:** see the Statement on Faculty Discipline

d) **Patents and Copyrights:** see Research Policy Handbook 5.1 and 5.2

e) **Partisan Political Activities:** see Guide Memo 15.1

f) **Ownership of Documents:** see Research Policy Handbook 5.2 and Guide Memo 15.6

g) **Incidental Personal Use:** see Research Policy Handbook 4.1 and Guide Memo 15.2
UNIVERSITY PUBLICATIONS

Many of the publications listed below, including this bulletin, may be viewed on the World Wide Web at www.stanford.edu.

Admissions Information and Applications can be obtained from the Office of Undergraduate Admissions, and Graduate Admissions in the Registrar's Office (Old Union).

Financial Aid Information For undergraduate and graduate students is available from the Financial Aid Office (Old Union).

Library guides, facts, maps, and borrowing regulations are available at service desks of all Stanford libraries (address request to Green Library).

Maps and Visitors' Guides can be obtained at the Visitors' Information Office in Memorial Court, at the Stanford Bookstore, or by writing to the Guide and Visitors Service at the Office of Public Affairs (Building 170).

Minority Students, undergraduate and graduate, and their opportunities and experiences at Stanford are addressed in special publications directed to Alaska Natives, American Indians, Blacks, Chicanos, Mexican/Americans, and Puerto Ricans. The Office of Undergraduate Admissions and the recruitment officers of each of the respective schools will respond to requests for the appropriate publication.

Stanford University Bulletins may be obtained as follows: the Stanford Bulletin may be purchased from the Bookstore or by sending a $7.45 check or money order ($11.30 if domestic first class mail is desired) to the Registrar's Mailroom (California residents add $.60 sales tax).

Summer Session Catalogue or Summer Session for High School Student Catalogue may be obtained from the Summer Session Office. Individual schools and departments may be contacted directly for more specific information.

Students from other countries contact the Graduate Admissions, the Registrar's Office for Information for International Applicants; Bechtel International Center also provides helpful information to the international community.

The Time Schedule (course listings and registration information) is published quarterly and may be obtained at the Information Window in the Office of the Registrar (Old Union) and in Portfolio on the web.

Other publications of interest:

Access Stanford, a guide for the physically limited, available at the Office of the Dean of Student Affairs (Old Union) and the Disability Resource Center (Meyer Library).

ASSU: Constitution and By-Laws, inquire at Associated Students of Stanford University (Tresidder Union).

ASSU Course Guide, summaries of student evaluations of approximately 200 undergraduate courses, available at the ASSU Office (Tresidder Union).

Charter of the Senate of the Academic Council of Stanford University, available at the Academic Secretary's Office.

Committee and Senate Handbook, available at Academic Secretary's Office.

Conference Planning at Stanford, available at the Conference Office (Encina Commons).

Graduate Student Handbook, an introduction to offices and people who serve graduate students, available at the Office of the Dean of Graduate Research and Policy.

Handbook for Academic Council Faculty, Medical Center Line Faculty, Academic Staff-Teaching and Other Teaching Staff, available from the Provost's Office, Faculty Affairs section (Bldg. 170).

Human Resources and Development Course Catalogue, published twice-yearly by Stanford's Human Resources Services Office.

Information for Prospective Applicants, an introduction to graduate study and graduate programs at Stanford, available at Graduate Admissions, the Registrar's Office, Old Union.

Life Off the Farm, a guide to off-campus goods, services, and activities, available at the Office of Residential Education (Old Union) and the Stanford Bookstore.

The Lively Arts at Stanford, season brochure of concerts and other performances, available at University Events (Press Bldg.).

Rosters of the Senate, Advisory Board, and Various Committees, available at the Academic Secretary's Office.

Stanford Daily, the student newspaper, available at many pickup sites on campus and by request to the Daily office (Storke Bldg.).

Stanford Directory, on sale at Stanford Bookstore and Stores.

Stanford from the Beginning, a history, available at the Visitors' Information Office in Memorial Court (write Guide and Visitors Service, Bldg. 170), and the Stanford Bookstore.

Stanford Map, on sale at the Stanford Bookstore.

Stanford Memorial Church, a guide and history, available at the Visitors' Information Office in Memorial Court (write Guide and Visitors Service, Bldg. 170) and the Stanford Bookstore.

The Stanford Observer, a newspaper for alumni, parents of students, and the University's other friends, available from News Service (Press Bldg.).

Stanford Report, the weekly faculty/staff newspaper (includes events calendar and employment opportunities), available from News Service (Press Bldg.).

Stanford Today, a detailed description of undergraduate opportunities, available from the Office of Undergraduate Admissions (Old Union). Teach at Stanford: An Introductory Handbook for Faculty, Academic Staff Teaching, and Teaching Assistants, available at the Center for Teaching and Learning (Sweet Hall).

Training Opportunities for the Stanford Community, available at the Forstythe Hall information desk.

Books about Stanford that are out of print or hard to find are available to scholars from the University Archives, Green Library. The Stanford University Archives manuscript and archival collections now number more than six million items. These are of related interest.

COURSES CERTIFIED FOR 1999-2000 AS FULFILLING THE UNDERGRADUATE GENERAL EDUCATION REQUIREMENTS

Information regarding the General Education Requirements may be found in the "Undergraduate Degrees" section of this bulletin.

The following courses have been certified as fulfilling the General Education Requirements in 1999-2000. Certain sequences must be completed in their entirety for General Education Requirement fulfillment, and those sequences are noted below.

Courses offered overseas during 1999-2000 which satisfy the General Education Requirements are listed at the end of this section.

GENERAL EDUCATION REQUIREMENTS, 1999-2000

AREA 1

All freshmen entering in Autumn Quarter 1997 and thereafter must satisfy the Area 1 Requirement by completing three courses from among the following options:

INTRODUCTION TO THE HUMANITIES

(Offered Autumn)

Introduction to the Humanities 1; Great Works I
Introduction to the Humanities 12; Word and the World
Introduction to the Humanities 14; The Good Life
Introduction to the Humanities 16; Freedom and Eros in Philosophy and Art
Introduction to the Humanities 17; Themes and Variations
Introduction to the Humanities 18; Narrative: Telling it the Way it Is?
Introduction to the Humanities 19; The Self, the Sacred, and the Human Good

(Offered Winter and Spring)

Introduction to the Humanities 2, 3; Great Works: The Hereafter, the Here-and-Now (2 must be taken in conjunction with 3)
Introduction to the Humanities 8A, 9A; Myth and Modernity (8A must be taken in conjunction with 9A)
Introduction to the Humanities 20A, 20B; The Humanities: Breaking Boundaries (20A must be taken in conjunction with 20B)
Introduction to the Humanities 21A, 21B; The Literature of Transformation (21A must be taken in conjunction with 21B)
Introduction to the Humanities 23A, 23B; Reason, Passion, and Reality (23A must be taken in conjunction with 23B)
Introduction to the Humanities 24A, 24B; Ten Days that Shook the World (24A must be taken in conjunction with 24B)
Introduction to the Humanities 26A, 26B; Democratic Society in Europe and America (26A must be taken in conjunction with 26B)
Introduction to the Humanities 27A, 27B; Encounters and Identities (27A must be taken in conjunction with 27B)
Introduction to the Humanities 28A, 28B; Poetic Justice: Order and Imagination in Russia (28A must be taken in conjunction with 28B)
Introduction to the Humanities 30A, 30B; Transculturations (30A must be taken in conjunction with 30B)
SLE 91, 92, 93; Program in Structured Liberal Education (entire sequence must be completed and thereby also satisfies Area 3a)

AREA 2: NATURAL SCIENCES, APPLIED SCIENCE AND TECHNOLOGY, AND MATHEMATICS

Science, Mathematics, and Engineering 1A, B, C; Earth Resources and the Sustainability of Life (if entire sequence is completed, satisfies Area 2)
Science, Mathematics, and Engineering 2A, B, C; The Heart: Principles of Life Systems (if entire sequence is completed, satisfies Area 2)
Area 6 under the 1991 DR System

Physics 61; Advanced Freshman Physics
Physics 63; Advanced Freshman Physics
Physics 65; Advanced Freshman Physics
Physics 70; Modern Physics
Physics 100; Introduction to Observational and Laboratory Astronomy
Psychology 20; Brain and Behavior

Area 2B: APPLIED SCIENCE AND TECHNOLOGY

Area 6 under the 1991 DR System

Computer Science 99D; SIS: The Science of Art
Computer Science 105; Introduction to Computers
Computer Science 106A; Programming Methodology
Computer Science 106B; Programming Abstractions
Computer Science 106X; Programming Methodology and Abstractions
Computer Science 109; Introduction to Computer Science
Engineering 14; Applied Mechanics: Statics and Deformables
Engineering 15; Dynamics
Engineering 20; Introduction to Chemical Engineering
Engineering 25; Biotechnology
Engineering 30; Thermodynamics
Engineering 40; Introductory Electronics
Engineering 50; Introductory Science of Materials
Engineering 62; Introduction to Optimization
Engineering-Economic Systems and Operations Research 152; Introduction to Decision Analysis
Geological and Environmental Sciences 130; Environmental Earth Sciences I
Geophysics 40; The Earth from Space
Linguistics 35; Computers and Human Language
Linguistics 138; Introduction to Computational Linguistics
Petroleum Engineering 103; Energy Resources
Petroleum Engineering 104; The Coming Energy Revolution
Petroleum Engineering 109Q; SIS: What Determines the Price of Oil
Petroleum Engineering 110Q; SIS: Soap Bubbles, Rain Drops, and Ink Jets

Area 4C: MATHEMATICS

Area 4 under the 1991 DR System

Economics 50; Economic Analysis I
Economics 80 (same as Statistics 190); Introduction to Statistical Methods for Social Scientists
Mathematics 19; Calculus
Mathematics 20; Calculus
Mathematics 21; Calculus
Mathematics 41; Single Variable Calculus
Mathematics 42; Single Variable Calculus
Mathematics 51; Linear Equations and Differential Calculus
Mathematics 51H; Honors Calculus
Mathematics 103; Matrix Theory and its Applications
Philosophy 57; Logic, Reasoning, and Argumentation
Philosophy 159; Basic Concepts in Mathematical Logic
Political Science 95A; Introduction to Political Data Analysis I
Political Science 95B; Introduction to Political Data Analysis II
Political Science 95C; Introduction to Political Data Analysis III
Psychology 10 (same as Statistics 60); Introduction to Statistical Methods
Sociology 181B; Sociological Methods I: Statistics
Statistics 40N; SIS: Chance, Experiments, and Interface
Statistics 41N; SIS: News and Numbers—Interpreting Information
Statistics 42N; SIS: Monte Carlo Methods
Statistics 43N; SIS: Data Analysis and Flow Cytometry
Statistics 50N; SIS: Mathematics and Sports
Statistics 60; Introduction to Statistical Methods: Precalculus
Statistics 110; Statistical Methods in Engineering and the Physical Sciences
Statistics 116; Theory of Probability
Statistics 190; Introduction to Statistical Methods: Postcalculus

Area 3: HUMANITIES AND SOCIAL SCIENCES

Area 3A: HUMANITIES

Area 7 under the 1991 DR System is indicated by (7)
Area 8 under the 1991 DR system is indicated by (8)
American Studies 114; Visions of the 1960s (7) or (8)
American Studies 151; Transformation of American Thought and Culture (8)
American Studies 200; Perspectives on American Identity (8)
American Studies 214; The American 1960s: Thought, Protest, and Culture (8)
Art and Art History 1; Introduction to the Visual Arts (7)
Art and Art History 2; Ideas and Forms in Asian Art (7)
Art and Art History 3; Introduction to the History of Architecture (7)
Art and Art History 100A/200A (same as Classics 100A); Archaic Greek Art (7)
Art and Art History 100B/200B (same as Classics 100B); Ancient Art II: Classical and Hellenistic Greek Art (7)
Art and Art History 100C/200C (same as Classics 100C); Roman Art (7)
Art and Art History 105; Sites and Images of Power in 12th-Century Europe (7)
Art and Art History 110D; The Venetian Renaissance (7)
Art and Art History 122; Art under Hitler and Stalin (7)
Art and Art History 123A; Object after Minimalism (7)
Art and Art History 123B; The Feminist Legacy in Contemporary Art (7)
Art and Art History 134; The History of Photography (7)
Art and Art History 140/240; Introduction to Film Study (7)
Art and Art History 143; The Hollywood Musical (7)
Art and Art History 146; Cyborgs and Synthetic Humans (7)
Art and Art History 181; Theories of Architecture (7)
Asian Languages 73; Chinese Language, Culture, and Society (7)
Asian Languages 91; Traditional East Asian Civilization: China (7)
Asian Languages 92; Traditional East Asian Civilization: Japan (7)
Asian Languages 95; The Japanese Language in Culture and Society (7)
Asian Languages 131; Chinese Poetry in Translation (7)
Asian Languages 132; Chinese Fiction and Drama in Translation (7)
Asian Languages 135; Classic Japanese Drama (7)
Asian Languages 138; Modern Japanese Literature in Translation (7)
Asian Languages 141; Chinese Mythology and Lyric Imagination (7) or (8)
Asian Languages 187/287; Romance, Desire, and Sexuality in Modern Japanese Literature (7)
Classics 12; Greek Tragedy (7)
Classics 18; Greek Mythology (8)
Classics 30Q; SIS: Literature and Culture of Modern Greece (7)
Classics 169; Introduction to Socrates, Plato, and Aristotle (8)
Comparative Literature 20N; SIS: Worlds (No Longer) Apart (7)
Comparative Literature 25N (same as Spanish and Portuguese 125N); SIS: Latin American Nobel Prize Winners (7)
Comparative Literature 30N; SIS: Opera and Literature (7)
Comparative Literature 70N; SIS: Bible and World Culture (7) or (8)
Comparative Literature 80N; SIS: The Science Wars (7)
Comparative Literature 84Q; SIS: Shakespeare, Playing, Gender (7)
Comparative Literature 103; Egyptian East/Egyptian West (7) or (8)
Comparative Literature 115Q; SIS: Thinking in the Present (7)
Comparative Literature 113; Voice and Literature in Russia and America (7)
Comparative Literature 134E; Exoticism in Literature and the Arts (7)
Comparative Literature 167; Comedy (7)
Comparative Literature 199; Senior Seminar on Literary Theory (7)
Drama 12N; SIS: Antigone—From Ancient Democracy to Contemporary Dissent (7) or (8)
Drama 14N; SIS: Contemporary German Drama (7)
Drama 15N; SIS: The Shakespearean Era (7)
Drama 17N; SIS: Re-Viewing Valdez in Year 2000 (7)
Drama 19N; SIS: The Arts and Civic Dialogue (7)
Drama 65; American Musical Theater (7)
Drama 161; Performance and Politics (7)
Drama 162; Performance and the Actor (7)
