Courses given in CSRE have the subject code CSRE. For a complete list of subject codes, see Appendix.
UNDERGRADUATE PROGRAMS

MAJORS

CORE CURRICULUM

The Interdisciplinary Program in Comparative Studies in Race and Ethnicity (CSRE) provides students the opportunity to structure a major or minor in comparative ethnic studies or to focus their course work in a single ethnic studies area. Four majors and minors (Asian American Studies, Comparative Studies, Chicana/o Studies, and Native American Studies) are offered as part of CSRE. All courses taken for the major must be taken for a letter grade. In addition, majors in the Program in African and African American Studies and in the Program in Jewish Studies enroll in the core curriculum offered by CSRE. The directors of the programs and of each major constitute the CSRE curriculum committee, the policy making body for the interdisciplinary program.

Students who declare any of the five majors participate in a common curriculum of the CSRE consisting of at least two introductory core courses and a senior seminar. Individually designed majors in Jewish Studies may also enroll in the CSRE core curriculum.

MINORS

Students who wish to minor in the study areas must complete six courses (a minimum of 30 units) from the approved CSRE course list, two of which must be introductory core courses. Proposals for the minor must be approved by the director of each study area.

DIRECTED READING AND RESEARCH

Directed reading and research allows students to focus on a special topic of interest. In organizing a reading research plan, the student consults with the director of the major and one or more faculty members specializing in the area or discipline.

SENIOR SEMINAR

Research and the writing of the senior honors thesis or senior paper is under the supervision of a faculty project adviser. The seminar is offered in Autumn Quarter, and discussions take students through the process of research (conceptualization, development of prospectus, development of theses, research, analysis, and writing). This course meets the Writing the Major requirement (WIM). Those who opt to write senior papers are organized into tutorial groups in Autumn Quarter. All CSRE-related students, even those who opt to write honors theses in other departments and programs, must enroll in CSRE 200X, Senior Seminar.

RELATED PROGRAMS

CSRE-related majors have several unique opportunities available to them. The program supports full-time paid summer internships for those who apply to work in a non-profit or government agency in a public policy-related area. The CSRE Public Policy/Leadership Institute is a two-week, pre-Autumn Quarter seminar that provides exposure to critical public policy issues and is taught by a leading faculty member. The residence-based institute provides room and board and all seminar materials for participants, including a visit to Sacramento to meet with policy makers. The CSRE program also sponsors quarterly career workshops and informal luncheons for all majors and minors.

HONORS

Majors in each of the study areas who meet academic qualifications (at least a grade point average of 3.5 in CSRE-related courses) may apply for admission. Majors are expected to participate in a Spring Quarter junior workshop in preparation for their honors thesis research. Prizes for the best undergraduate honors theses are awarded annually by the Curriculum Committee of CSRE.

AFRICAN AND AFRICAN AMERICAN STUDIES (AAAS)

Director: John Rickford

Since 1997-98, AAAS has been a CSRE-related major. For major and minor descriptions and requirements, see the “African and African American Studies” section of this bulletin.

ASIAN AMERICAN STUDIES

Director: Purnima Mankekar

Asian American Studies (AAS) provides an interdisciplinary approach to understanding the historical and current experiences of persons of Asian ancestry in the United States. In using the term “Asian American,” the AAS faculty recognize that the term seeks to name a rapidly developing, complex, and heterogeneous population and that there is neither a single Asian American identity nor one community that comprises all Asian Americans. Asian Americans include those with ancestral ties to countries or regions in East Asia, South Asia, Southeast Asia, or the Philippines, among others.

AAS brings together courses that address the artistic, historical, humanistic, political, and social dimensions of Asian Americans and is an appropriate course of study for students interested in a variety of concerns related to Asian Americans, including: artistic and cultural contributions, current social significance, historical experiences, immigration, intellectual, policy issues, relationships with other social groups, and the construction of Asian American as it addresses important theoretical and practical issues.

REQUIREMENTS

AAS offers undergraduates opportunities for either a major or a minor. In addition to the 15 units in the CSRE core curriculum, 45 units are distributed as follows: 5 units in a course with an international dimension; 30 units in Asian American focus courses selected from among historical studies, social sciences, and humanities; and 10 units in courses offering comparative perspectives. In certain instances, students are able to apply credit from the study of an Asian language to help meet requirements and receive a special citation for relevant language study. For students already fluent in an Asian language, the citation may also be earned by using the language in a substantial way in the research for their senior papers. An honors option is available. Minors take 30 units in a program of study similar in form to that of majors.

Students interested in the major or minor in AAS work with a faculty adviser to develop a specific program of study. Proposals for the major and minor, and admission to the CSRE honors program must be approved by the director. The policies and programs for the major and minor are guided by the CSRE curriculum committee.

CHICANA/O STUDIES

Director: Yvonne Yarbro-Bejarano

Chicana/o Studies is an interdisciplinary major focusing on the Mexican-origin population of the U.S., the second largest ethnic group in the nation. Students who major or minor in Chicana/o Studies have an opportunity to select from a wide variety of courses in the humanities and social sciences as well as selected courses offered by affiliated faculty in the School of Education. In addition to the CSRE introductory core courses, students who major and minor in Chicana/o Studies are required to enroll in ENGLISH 172A/HISTORY 162, Introduction to Chicana/o Life and Culture.

REQUIREMENTS

Together with their faculty mentors, majors design a thematic concentration consisting of eight courses (40 units). The substantial number of courses available across the disciplines permits majors to develop unique and innovative thematic concentrations. Students also have opportunities to participate in public service-learning internships related to their academic course of study. Proposals for the major and minor, and admission to the CSRE honors program must be approved by the director. The policies and programs for the major and minor are guided by the CSRE curriculum committee.

A Spanish Language Proficiency option is offered to majors interested in using Spanish in their course work or for their research. This option, modeled on programs of foreign language study across the curriculum at other institutions, is aimed at students who have a strong interest in using the Spanish language proficiency they have acquired in meaningful contexts outside of foreign language courses. There are several ways
to complete the Spanish Language Proficiency option. Consult with the Director of Chicana/o Studies for details about these options.

Students who wish to minor in Chicana/o Studies must enroll in one CSRE introductory core course (the course must be comparative in nature) and ENGLISH 172A/HISTORY 162, Introduction to Chicana/o Life and Culture. The remaining four courses, 20 units, must be designed around a general theme or topic.

**COMPARATIVE STUDIES IN RACE AND ETHNICITY**

**Director:** Paula Moya

The major and minor in Comparative Studies in Race and Ethnicity (CSRE) offer students a unique opportunity in higher education: to study the topics of race and ethnicity from comparative national and international perspectives. How to manage and to understand ethnic differences and conflicts has long been a central issue in international affairs, especially since the end of the Cold War, and an intense debate has developed in the United States on how to achieve justice and equality in an ethnically diverse, multicultural society. The themes of both interethnic cooperation and conflict are critical for comprehending the history and current social reality of racial and ethnic groups worldwide. Students have an opportunity to structure a major or minor through CSRE that encourages the study of these and other important issues facing the U.S. and other societies.

**REQUIREMENTS**

Students who major in CSRE enroll in the core curriculum, and in consultation with the director of the program and a faculty mentor, develop a thematic course of study focusing on the comparative dimensions of race and ethnicity. Though majors and minors in CSRE must complete the CSRE core introductory courses before they focus their work on the thematic concentration, students have great flexibility to structure and design their comparative curriculum. For example, students may opt to develop a concentration comparing two or more groups within the U.S., or they may choose to study groups in the U.S. in comparison to ethnic groups elsewhere in the world. Or, they may opt to study the diaspora of a single group or the sovereignty of indigenous peoples within and across different national contexts. In different examples of thematic concentrations for the CSRE major, students may prefer to study issues of international migration or how social constructions of racial identities are influenced by gender or class.

The thematic course of study developed by CSRE majors must be approved by the CSRE director. Proposals for the major and minor, and admission to the CSRE honors program must be approved by the director. The policies and programs for the major and minor are guided by the CSRE curriculum committee.

**NAS**

NAS offers undergraduates opportunities for either a major or minor. The major requires 60 units of course work. In addition to the 15 units of CSRE core courses, 45 units are distributed as follows: 30 units in Native American focus courses selected from among humanities and social sciences; 5 units in a course devoted to the methodologies, theories, or field research in a particular area of study; and 10 units in courses offering comparative perspectives. Students may acquire credit from a service-learning internship option. Minors take 30 units in a program of study similar in form to that of majors. Proposals for the major and minor, and admission to the CSRE honors program must be approved by the director. The policies and programs for the major and minor are guided by the CSRE curriculum committee.

**COURSES**

**CORE**

**COMPARATIVE LITERATURE**

COMPLIT 202. Comparative Fictions of Ethnicity

5 units, Win (Palumbo-Liu)

**COMPARATIVE STUDIES IN RACE AND ETHNICITY**

CSRE 200X. CSRE Senior Seminar—WIM

5 units, Aut (Arellano, Moya)

**THEMATIC FOR MAJORS AND MINORS**

**AFRICAN AND AFRICAN AMERICAN STUDIES**

For courses in African and African American Studies with the subject code AFRICAAM, see the “African and African American Studies” section of this bulletin.

**ASIAN AMERICAN STUDIES**

ASNAMST 173D. Queer Asian American Literature—(Same as CSRE 173D.)

5 units, Win (Dariotis)

ASNAMST 174D. Vietnamese American Literature, Film, and History—(Same as CSRE 174D.) Vietnamese American lives and how Vietnam has been imagined in America. How Vietnamese American texts intervene in debates about cultural production, race, and transnationalism in Asian American studies and American literature. The relationship between these works and postmodernism. Aesthetic practices and concepts; relationships to other Asian American and American writers.

5 units, Spr (Nguyen)

**NATIVE AMERICAN STUDIES**

**Director:** Teresa LaFromboise

Native American Studies provides an intensive approach to understanding the historical and contemporary experiences of Native American people. Attention is paid not only to the special relationship between tribes and the federal government, but to issues across national boundaries, including tribal nations within Canada, and North, Central, and South America. In using the term “Native American,” the NAS faculty recognize the heterogeneous nature of this population. Native Americans include the Alaska Native population, which comprises Aleuts, Eskimos, and other Native American people residing in Alaska.

The purpose of the Native American Studies major and minor is to introduce students to a broad range of approaches in the academic study of Native American people, history, and culture. Students who major in Native American Studies have the opportunity of doing advanced work in a number of related fields, including literature, sociology, education, and law. In addition to specialized course work on Native American issues, students also are expected to concentrate in a traditional discipline such as anthropology, history, or psychology to ensure they have a well rounded educational experience. The area of concentration and related course work should be selected in consultation with a faculty adviser in Native American Studies. All courses in the program in some way promote the ongoing discussion of how academic knowledge about Native Americans relates to the historical and contemporary experiences of Native American people and communities.
SCHOOL OF HUMANITIES AND SCIENCES

ABLE ECONOMIC DEVELOPMENT AND PROTECTION OF POLITICAL AND CULTURAL

ATION, GAMING, AND CULTURAL TOURISM. 21ST-CENTURY STRATEGIES FOR SUSTAIN-

ABLE ECONOMIC DEVELOPMENT. CASE STUDIES INCLUDE MINERAL RESOURCE EXTRAC-

TIONS, AND THE LEGAL, POLITICAL, SOCIAL, AND CULTURAL IMPLICATIONS FOR TRIBAL

AS CSRE 109B.) THE HISTORY OF COMPETING TRIBAL AND WESTERN ECONOMIC

FEMINIST STUDIES
FEMST 101. Introduction to Feminist Studies—(Same as HISTORY
173C.)
5 units, Win (Arellano)

FEMST 120. Introduction to Queer Studies
4-5 units, Aut (Arellano)

HISTORY
HISTORY 59. Introduction to Asian American History
5 units, Aut (Chang)

HISTORY 137/337. The Holocaust
5 units, Win (Rodrigue)

HISTORY 148C. Africa in the 20th Century
5 units, Aut (R. Roberts)

HISTORY 150B. Introduction to African American History: The
Modern African American Freedom Struggle
4-5 units, Spr (Carson)

HISTORY 187B. The Middle East in the 20th Century
5 units, Aut (Al-Qattan)

HISTORY 251A. Poverty and Homelessness in America
5 units, Win (Camarillo)

HISTORY 251B. Poverty and Homelessness in America II
5 units, Spr (Camarillo)

HISTORY 256A. California History
5 units, Win (Camarillo)

HISTORY 265/365. New Research in Asian American History
5 units, Spr (Chang)

JAPANESE GENERAL
JAPANGEN 77. Telling the Difference: Reading Race in Modern
Japan
4 units, Aut (Scott)

LINGUISTICS
LINGUIST 146. Language and Gender
4 units (Eckert) not given 2004-05

LINGUIST 150. Language in Society
4-5 units, Aut (Buchstaller)

MUSIC
MUSIC 16Q. Ki ho’alu: The New Renaissance of a Hawaiian Musical
Tradition
3 units, Aut (Sano)

MUSIC 17Q. Perspectives in North American Taiko
4 units, Spr (Sano, Uyechi)

POLITICAL SCIENCE
POLISCI 111. Peace Studies—(Same as PSYCH 165.)
5 units, Spr (Bland, Ross, Holloway)

POLISCI 121. Urban Politics
5 units, Win (Fraga)
POLISCI 131. Children’s Citizenship: Justice Across Generations  
5 units, Spr (Adcock)

POLISCI 141. The Global Politics of Human Rights  
5 units, Win (Karl)

POLISCI 225R. Black Politics in the Post-Civil Rights Era  
5 units, Win (Gay)

POLISCI 325S. Race and Place in American Politics  
5 units, Spr (Gay)

PSYCHOLOGY  
PSYCH 215. Mind, Culture, and Society  
3 units, Win (Markus, Steele)

PSYCH 217. Topics and Methods in Cultural Psychology  
3 units (Tsai) not given 2004-05

SOCIOLOGY  
SOC 45Q. Understanding Race and Ethnicity in American Society  
5 units, Spr (Snipp)

SOC 120. Interpersonal Relations  
5 units, Aut (Ridgeway)

SOC 138/238. American Indians in Comparative Historical Perspective  
5-5 units, Aut (Snipp)

SOC 139/239. American Indians in Contemporary Society  
5 units, Win (Snipp)

SOC 140. Introduction to Social Stratification  
5 units, Spr (Sandefur)

SOC 141A/241A. Social Class, Race/Ethnicity, Health  
4 units, Win (Barr)

SOC 142. Sociology of Gender  
3-5 units, Spr (Ridgeway)

SOC 145/245. Race and Ethnic Relations  
5 units (Ozlak) not given 2004-05

SOC 148/248. Racial Identity  
5 units (McDermott) not given 2004-05

SOC 149/249. The Urban Underclass  
5 units (Rosenfeld) not given 2004-05

SOC 220. Interpersonal Relations  
5 units, Aut (Ridgeway)

SPANISH LITERATURE  
SPANLIT 101N. Visual Studies and Chicana/o Art  
3-5 units, Aut (Yarbro-Bejarano)

Courses given in Cultural and Social Anthropology have the subject code CASA. For a complete list of subject codes, see Appendix.

The courses offered by this department are designed to: (1) provide undergraduates with instruction in cultural and social anthropology; (2) provide undergraduate majors in anthropology with a program of work leading to the bachelor’s degree; and (3) prepare candidates for advanced degrees in cultural and social anthropology.

Cultural and social anthropology addresses a wide range of issues in the comparative study of society and culture. These include issues of race, class, national origin, gender, sexual orientation, and religion as they are shaped by the experiences of education, history, and migration through which people in past and contemporary societies have defined themselves in relation to others. The scope of cultural and social anthropology includes our own society and culture as well as those of other parts of the world, especially as these are drawn together and shape one another in increasingly transnational and global interactions.

The Department of Cultural and Social Anthropology offers a wide range of approaches to the various subfields and topics within anthropology including: archaeology, environmental anthropology, linguistics, medical anthropology, political economy, science and technology studies, and sociocultural anthropology. Methodologies for the study of micro- and macro-social processes are taught through the use of qualitative and quantitative approaches. Training is offered in ethnographic research; the collection and interpretation of oral histories, surveys, and archival materials; the analysis of material culture, including mapping, cataloguing, and interpretation of material objects; and methodologies in the performative arts, including visual and performing studies. The department provides students with excellent training in theory and methods to enable them to pursue graduate study in any of the above mentioned subfields of anthropology. Students interested in the biological and evolutionary approaches to anthropology are urged to consult the Department of Anthropological Sciences.
UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of Cultural and Social Anthropology (CASA) offers a B.A. degree in Cultural and Social Anthropology and an honors program. The major provides students with expertise for understanding social and cultural transformations from an international and cross-cultural perspective. In addition to gaining an excellent foundation for graduate research and study, students majoring in Cultural and Social Anthropology can pursue careers in government, international business, international development agencies, international education, law, mass media, non-profit organizations, and public policy.

Within the major, students may include course offerings in other departments such as Anthropological Sciences, Classics, Economics, English, History, Political Science, Psychology, and Sociology, as well as course offerings in programs such as African Studies, American Studies, Archaeology, Comparative Studies in Race and Ethnicity, East Asian Studies, Feminist Studies, Latin American Studies, Public Policy, and Urban Studies.

To declare a major in Cultural and Social Anthropology, students should contact the department’s student peer adviser or student program coordinator. The department checklist for the major can be downloaded in .pdf format from http://www.stanford.edu/dept/anthroCASA/programs/undergrad.html. The checklist must be signed by the CASA faculty program adviser for the major. Submit the checklist to the student program coordinator and apply for the major in AXESS.

All undergraduate majors in Cultural and Social Anthropology (CASA) must fulfill the following requirements:

1. A program of 65 units, with at least 40 units in Cultural and Social Anthropology. The remaining 25 units may be taken from courses in related departments, including Anthropological Sciences, or transferred from other anthropological study programs, such as overseas programs. The 65 units must form a coherent program of study and be approved by the student’s faculty adviser.

2. A grade of ‘B-’ or better in CASA 90. This course is required of all CASA majors and should be taken within a year of declaring the major or before the end of the junior year. It introduces students to anthropological theory and prepares them for upper-division courses in the department.

3. The units required for the CASA major must include at least one course from four of the six topical categories listed below:
   a) Archaeology
   b) Gender and Feminism
   c) Globalization and Transnationalism
   d) Linguistic and Symbolic Anthropology
   e) Race and Ethnicity
   f) Science, Technology, or Medicine

4. Students must choose a concentration, taking at least 15 units in three or more courses on one theme or topic. Concentrations can be defined by subject matter or cultural area. Some examples of themes for a concentration are: cultural studies, economic development, kinship, mass media, material culture, migration and immigration, political economy, popular culture, race and ethnicity, religion, urban cultures, or a particular culture area, that is, Japan, Europe, South Asia. Students must have areas of concentration approved by their advisers.

5. A minimum of 15 units must be in CASA seminars numbered 100 or above.

6. Competence in a foreign language beyond the first-year level. Such competence is usually demonstrated by completing a 5 unit course at the second-year level with a grade of ‘B-’ or better. The requirement may be met by special examination administered through the Language Center.

7. 10 units from IHUM 27A,B (Introduction to the Humanities) may be counted towards the major. Students whose programs require non-English language study as part of a geographical or linguistics focus may ask their faculty adviser to approve up to 5 units from language courses toward the degree if such courses are at the second-year level and above, or are in a second non-English language. No more than 10 units of CASA 96, Directed Individual Study, may be counted towards the major, and may only be included among the 25 “related units” permitted for the major. All required units for the undergraduate degree program must be passed with a grade of ‘C’ or better, and not more than 10 (maximum of 5 units in Cultural and Social Anthropology and 5 units in related subjects) of the required 65 units may be taken for a “satisfactory/no credit” grade.

Majors are strongly encouraged to develop field research projects under the supervision of a CASA faculty member. The department has research grants available to support individually designed research, faculty mentoring research, and public service research in cultural and social anthropology. Eligibility for application to the research grants program requires that a student have completed a minimum of two CASA courses with a grade point average of 3.3 (B+) or better. One of the two courses may be completed in the quarter in which the grant application is submitted to the department. Michelle Z. Rosaldo Summer Field Research grants applications for individually designed field research are due by the end of the fifth week in Winter Quarter. Faculty Mentoring and Public Service grant applications are due by the end of the fifth week in Autumn, Winter, or Spring quarters. Required course work for the research grants program includes CASA 93, Prefield Research Seminar, and CASA 94, Postfield Research Seminar. Suggested course work for the research grants program includes CASA 95A, Research in Anthropology, CASA 96, Directed Individual Study, and CASA 199, Senior and Master’s Thesis Writing Workshop. Contact the student program coordinator for more information.

Prospective majors may meet with the chair of the Undergraduate Committee and/or the undergraduate peer adviser for initial advice on choosing an appropriate faculty adviser in the department. In consultation with their faculty advisers, students must develop a coherent program of study for the major. Students are required to submit the application form for the major, including their completed proposed plan of study, to the student program coordinator, no later than the beginning of the Winter Quarter of the junior year.

Majors are required to meet with their faculty advisers at least once every quarter. Each student’s progress towards fulfilling the major requirements is recorded in a file kept in the student program coordinator’s office. It is the student’s responsibility to see that this file is kept up to date.

MINORS

The department checklist for the minor can be downloaded in .pdf format from http://www.stanford.edu/dept/anthroCASA/programs/undergrad.html. The checklist must be signed by the CASA faculty program adviser for the minor. Submit the checklist to the student program coordinator and apply for the minor in AXESS.

Requirements for the minor are:

1. A faculty adviser in Cultural and Social Anthropology (assistance may be obtained from the department’s student program coordinator).

2. 30 units of CASA course work. IHUM 27A,B may be applied to the 30 units. Only 5 units of directed individual study may apply towards the 30 units in the minor. All units for the minor must be passed with a grade of ‘C’ or better

3. Up to 10 of the 30 units may be taken for instructor-elected, satisfactory/no credit grade.

4. At least 15 of the 30 units must be from CASA 70 course work, or above.

5. A minimum of 5 of the 30 units must be taken in an area course numbered between CASA 30 and 130B.

Deadline for Declaring the Minor—Students must complete the declaration process (both planning form submission and Axess registration) by the last day of the quarter, two quarters prior to degree conferral (for example, by the last day of Autumn Quarter if Spring graduation is intended).
SENIOR PAPER AND DEPARTMENTAL HONORS

The senior paper program in Cultural and Social Anthropology provides majors the opportunity to conduct original research under the guidance of a faculty advisor. The senior paper program is open to all majors in the department. Students must initiate their participation in the senior paper program by filing an application of intent with the student program coordinator. The application must include a description of the proposed project, a program of study, and a letter of approval from a faculty sponsor. Students are encouraged to apply to the senior paper program in their junior year prior to initiating fieldwork or other research. The senior paper application of intent must be submitted no later than the second week of Autumn Quarter in the senior year.

All CASA majors are encouraged to write a senior paper. Majors should begin research for a senior paper during their junior year with guidance from their CASA faculty adviser. At the latest, department majors must submit an application of intent to write a senior paper to the student program coordinator no later than the end of the second week of Autumn Quarter in the senior year. Enrollment in CASA 95A, Research in Anthropology, is recommended during Autumn and Winter quarters. The Senior Paper Checklist must be completed, signed by the program adviser, and handed in to the student program coordinator by the end of the second week in Autumn Quarter in the senior year. Students must enroll in CASA 95B, Senior Paper, in the final quarter in the undergraduate degree program before graduating. The senior paper is submitted in the final quarter before graduation. For more information, see the student program coordinator.

All CASA majors are encouraged to write an honors paper. Majors should begin research for an honors paper prior to the last quarter of the junior year with guidance from their CASA faculty adviser. At the latest, department majors must submit an application of intent to write an honors paper to the student program coordinator no later than the end of Spring Quarter (or the third quarter) in the junior year. Department majors are eligible to apply for honors candidacy with a 3.5 GPA in the department major and a 3.0 GPA in overall course work. Enrollment in CASA 95A, Research in Anthropology, is recommended during Autumn and Winter quarters. The Honors Checklist and Timeline must be completed, signed by the program adviser, and handed in to the student program coordinator by the end of the second week in Autumn Quarter in the senior year. Students must enroll in CASA 95B, Senior Paper, in the final quarter in the undergraduate degree program before graduating. A senior paper to be considered for departmental honors is submitted in the final quarter before graduation. Senior papers with a letter grade of ‘A-’ or better may be awarded departmental honors. For more information, see the student program coordinator.

GRADUATE PROGRAMS

University requirements for the degrees of Master of Arts and Doctor of Philosophy are described in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS

The Department of Cultural and Social Anthropology offers the M.A. degree to four groups of students: (1) Stanford undergraduates who enroll in the coterminal program; (2) Stanford graduate students taking advanced degrees in other departments or schools at Stanford who enroll in the terminal M.A. program; (3) Ph.D. students in Cultural and Social Anthropology who fulfill the M.A. requirements on the way to the Ph.D. degree; and (4) students who apply from outside Stanford for entry into the terminal M.A. program.

Applicants whose ultimate goal is the Ph.D. degree should apply directly to the Ph.D. program. Students accepted for the terminal M.A. degree program cannot transfer to the Ph.D. program; they must reapply on the same basis as other Ph.D. applicants and in competition with other Ph.D. applicants. Ph.D. students who decide to take the M.A. on the way to the Ph.D. are governed by separate requirements described in the department’s Guide to the Ph.D. Program.

COTERMINAL B.A./M.A. PROGRAM

The deadline for graduate applications to the coterminal M.A. degree program is March 14, 2005. Prospective applicants should refer to the department’s web site for information about application for graduate admission. Successful applicants for the M.A. program usually enter in Autumn Quarter. Applicants must submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should also submit three letters of reference, recent original transcripts, and a statement of purpose.

The department prerequisite requirements for application to the coterminal M.A. program are listed below. Stanford undergraduates who are currently enrolled and interested in making a coterminal M.A. application to the department’s graduate M.A. degree program are required to enroll in CASA 90, Theory in Cultural and Social Anthropology, and in a minimum of 10 additional units of CASA course work with a grade of ‘A-’ or better. An overall undergraduate GPA of 3.3 (B+) or better is also required.

Graduate enrollment at Stanford for at least three quarters of full tuition for a minimum of 45 units is required of all candidates for the master’s degree, including coterminal students. Coterminal M.A. students in Cultural and Social Anthropology must take a minimum of 45 quarter units in social and cultural anthropology course work beyond the undergraduate degree with a grade point average (GPA) of 3.0 (B) or better. 45 units constitute the University minimum for the M.A. degree. However, the department requires 60 units of course work towards the coterminal M.A. degree. Of the required 60 units, 15 units may be accepted from previous undergraduate or other course work. Course work must be at or above the 100-level. 18 of the 45 units required from Cultural and Social Anthropology course work must be in courses designated primarily for graduate students (typically at least at the 200 level). Course work applied to the coterminal M.A. degree may not also be applied to the requirements for the undergraduate degree, or any other degree program.

Within the 45 units taken at Stanford, students must take CASA 290, History and Theory in Cultural and Social Anthropology, and two additional graduate-level seminars in the department. The remaining units may be made up of courses selected in consultation with the faculty adviser to meet the needs and interests of the student.

The coterminal program usually requires more than one year of study. However, full-time students entering the program with appropriate background can complete the coterminal program in one calendar year. To provide a meaningful M.A. program within a one-year period, advance planning of course work with an adviser is required.

A field or library research paper, read and approved by at least two departmental faculty members, must be presented. Coterminal students must submit an acceptable project/paper proposal for the master’s paper to their faculty adviser for approval no later than the end of the fourth week in the first quarter of the graduate degree program. In addition, an acceptable Master’s Degree Program Proposal must be submitted no later than the end of the fourth week in the first quarter of the graduate degree program. Coterminal students should enroll in CASA 399, Masters Research Paper, or CASA 801, TGR Project, in the final quarter during which they will submit the M.A. paper.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

TERMINAL MASTER’S DEGREE PROGRAM

The deadline for graduate applications to the terminal M.A. degree program is January 11, 2005. Prospective applicants should refer to the department web site for information about application for graduate admission. Successful applicants for the M.A. program may enter only in the following Autumn Quarter. Applicants must file a report of their Graduate Record Examination score electronically, and submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should also submit three letters of reference, recent original transcripts, and a statement of purpose.

Graduate enrollment at Stanford for three consecutive quarters of full tuition for at least 45 units is required of all candidates for the master’s
degree. M.A. students in Cultural and Social Anthropology must take a minimum of 45 units in social and cultural anthropology course work beyond the undergraduate degree with a grade point average (GPA) of 3.0 (B) or better. 45 units constitute the University minimum for the M.A. degree. Courses must be at or above the 100 level, and 18 of the 45 units must be in courses designated primarily for graduate students, typically at least at the 200 level.

Within the 45 units taken at Stanford, students must take CASA 302, Anthropological Research Methods, and CASA 290, History and Theory in Cultural and Social Anthropology; three additional graduate-level seminars in the department (usually offered at the 200 level or above); and three courses from one of these department tracks:

1. Feminist Anthropology
2. Heritage and Museum
3. Race and Ethnicity
4. Science, Technology, and Medicine
5. Globalization and Transnationalism

The remaining units may be made up of courses selected in consultation with the faculty adviser to meet the needs and interests of the student.

The M.A. program usually requires more than one year of study. However, full-time students entering the program with appropriate background can complete the M.A. program in one calendar year. All requirements for the M.A. degree must be completed within three calendar years (consecutive) after the student’s first quarter of enrollment in the graduate M.A. degree program. The University allows no transfer units to the M.A. program. To provide a meaningful M.A. program within a one-year period, advance planning of course work with an adviser is required.

A field or library research paper, read and approved by at least two departmental faculty members, must be presented. Ph.D. students in the department may submit the first-year paper in fulfillment of this requirement. Terminal M.A. students may select a paper, written for one of the courses taken in Cultural and Social Anthropology, and present the extended paper to the faculty member responsible for the course in which the paper was written originally. Terminal M.A. students must submit an acceptable project/paper proposal for the master’s paper to their faculty adviser for approval no later than the end of the fourth week in the first quarter of the graduate degree program. In addition, an acceptable Master’s Degree Program Proposal must be submitted no later than the end of the fourth week of the first quarter of enrollment in the graduate degree program. Terminal M.A. students should enroll in CASA 399, Master’s Research Paper, or CASA 801, TGR Project, in the final quarter during which they will submit the M.A. paper.

DOCTOR OF PHILOSOPHY

The deadline for graduate applications to the Ph.D. degree program is January 11, 2005. Prospective applicants should reference the department web site for information about application for graduate admission. Successful applicants for the Ph.D. program may enter only in Autumn Quarter. It is department policy not to defer graduate admission. Applicants must file a report of their Graduate Record Examination score electronically, and submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should also submit three letters of reference, recent original transcripts, and a statement of purpose. In addition to a clear statement of research interests in the statement of purpose, it is especially important for those applicants who will choose the Archaeology Track to provide a detailed description of the area of specialization as well as the topical interests for dissertation research.

The Ph.D. program includes a number of required courses and examinations. It also allows the student to develop a flexible program reflecting special interests, under the supervision of a faculty committee chosen by the student. Students are encouraged to plan for completion of all work for the Ph.D. in five years.

The Ph.D. requirements for students who matriculate beginning 2004-05 are as follows (those matriculating earlier should consult the department’s Ph.D. Handbook for their entering cohort year). Ph.D. students in Cultural and Social Anthropology must take a minimum of 135 quarter units with a minimum grade point average (GPA) of 3.0 (B). The maximum allowable number of transfer units is 45.

1. Pass within the first year, with a grade of ‘B+’ or better:
   a) at least three of the graduate-level courses in the department designated by the faculty as theory/evaluation courses, including CASA 301, History of Anthropological Theory, during Autumn Quarter; CASA 300, Reading Theory Through Ethnography, or CASA 373, Introduction to Archaeological Theory, during Winter Quarter.
   b) CASA 302, Anthropological Research Methods, or a primary-level methods survey or advanced-level methods course, relevant to research interests, during Spring Quarter.
   c) satisfy the department ethics requirement by attending a special meeting of CASA 302, Anthropological Research Methods, set aside for the review of ethics in Cultural and Social Anthropology.
   d) at least 45 units of completed course work overall.

2. Submit an acceptable, substantial research paper (First-Year Paper) in the Spring Quarter. Register for CASA 395A, First-Year Paper, during Winter Quarter for 2-3 units and register for CASA 395B, First-Year Paper, during Spring Quarter for 2-3 units (no more than 5 units total for both courses over two quarters).

3. In the second year, pass at a satisfactory level:
   a) additional graduate-level theory/evaluation courses in the department to make a total of six such courses with a grade of ‘B+’ or better over the first two years of the program.
   b) CASA 394. Proposal Writing Seminar (offered Spring Quarter).
   c) at least 40 units of completed course work overall for a total of at least 85 units of course work by the end of the second year.

4. At the beginning of Autumn Quarter in the second year, attend the teaching apprenticeship workshop.

5. Serve as a teaching assistant for one quarter in the second year.

6. By the first week of Winter Quarter in the second year, recruit two of four qualifying paper committee members for the first qualifying paper for topic or area.

7. By the end of the fourth week in Winter Quarter in the second year, declare and submit the title and preliminary bibliography for the first of two qualifying papers for topic or area. During Winter Quarter, enroll in CASA 397, Directed Individual Study, in preparation for the first qualifying paper due at the end of Spring Quarter in the second year.

8. By the first day of finals week in Spring Quarter in the second year, submit the first of two qualifying papers for the topic or area. During Spring Quarter, enroll in CASA 391A, Qualifying Paper (Topic), or CASA 391B, Qualifying Paper (Area).

9. For those whose native language is English, pass, by the end of Spring Quarter of the second year, an examination in a language other than English in which there is a substantial body of general theoretical literature relevant to anthropology. For those whose native language is not English, demonstrate satisfactory command of English, as evidenced by successful completion of the first two years of graduate study. The examination may be taken through the Stanford Language Center, other Stanford language departments, or by appointment with the department’s linguist.

10. During Spring Quarter, enroll in CASA 394, Proposal Writing Seminar.

11. Upon completion of the above requirements, and upon recommendation of the CASA faculty, petition the University for candidacy by the end of Spring Quarter of the second year.

12. Upon completion of the above requirements, and upon recommendation of the Cultural and Social Anthropology faculty, request the Master’s Degree on the way to the Ph.D. degree program by the end of Spring Quarter of the second year.

13. In the third year, complete the following:
   a) during the Autumn Quarter, submit three dissertation research grant proposals, with human subjects protocols.
b) by the first week in Autumn Quarter in the third year, recruit the remaining two of four qualifying paper committee members for the second qualifying paper for topic or area.

c) by the end of the fourth week of Autumn Quarter in the third year, declare and submit the title and preliminary bibliography for the second of two qualifying papers for topic or area. During Autumn Quarter, enroll in CASA 397, Directed Individual Study, in preparation for the second Qualifying Paper due at the end of Winter Quarter in the third year.

d) by November 15 in the third year, provide a statement to the Committee on Higher Degrees declaring the date planned for the oral examination and submit declaration of the oral examination committee to the student program coordinator.

e) by the last day of finals week in Winter Quarter in the third year, submit the second of two qualifying papers for topic or area. During Winter Quarter, enroll in CASA 391A, Qualifying Paper (Topic), or CASA 391B, Qualifying Paper (Area).

f) By the fourth week in Spring Quarter, schedule and pass the University oral examination in the form of a dissertation proposal defense. During this exam, file the dissertation reading committee form and confirm the committee’s revisions to the dissertation proposal for fieldwork and dissertation research. Secure approval for the revised dissertation proposal before leaving for dissertation fieldwork.

14. In the fifth year, complete the following requirements:

   a) during the fifth year and after returning from fieldwork, complete one or more teaching assistant quarters in the department. During the fifth year, attend minimum four out of five dissertation writers seminars, CASA 392, Dissertation Writers Seminar. Each quarter, chapter drafts of the dissertation should be handed in to the dissertation reading committee for review.

   b) after submission of the penultimate draft of the dissertation and before the quarter preceding the quarter in which the dissertation will be submitted for Ph.D. degree, deliver an oral presentation of the dissertation in the department.

PH.D. MINOR

Prospective Ph.D. minors in Cultural and Social Anthropology should request an application from the student program coordinator. The requirements for a minor in Cultural and Social Anthropology consist of the following:

1. Complete 30 units of courses in the Department of Cultural and Social Anthropology (CASA) at Stanford with a grade point average (GPA) of 3.0 or better. Course work for a minor cannot also be used to meet requirements for a master’s degree.

2. Enlist a faculty member within CASA at Stanford who will provide written consent to serve as the adviser for the minor and serve on the student’s oral examination and dissertation committees (see the student program coordinator for a listing of faculty and office hours).

3. In conjunction with the program adviser, determine a coherent course of study related to the Ph.D. program, including CASA 301, History of Anthropological Theory, two additional CASA theory courses, and one CASA course in a geographical area. For a list of current theory courses, see the student program coordinator.

4. File the necessary paperwork with the student program coordinator. Please note that the department requirements, listed above, are more extensive than the University requirements.

FINANCIAL SUPPORT

The department endeavors to provide needed financial support (through fellowships, teaching and research assistantships, and tuition grants) to all students admitted to the Ph.D. program who maintain satisfactory degree progress. Applicants for the Ph.D. program must file a request for financial aid when applying to the program if they wish to be considered for support. First-year students in the Ph.D. program who have not entered with outside funding are required to make at least one extramural application for predissertation improvement funding by the end of Autumn Quarter in the first year. Second-year students in the Ph.D. program are required to perform one teaching assistantship quarter. Third-year students in the Ph.D. program who have not secured outside funding are required to make at least three extramural applications for dissertation research funding by the end of Autumn Quarter of the third year. Fourth-year students must submit a department application for funding as a predoctoral research affiliate before leaving for fieldwork. Fifth-year students in the Ph.D. program may be required to perform one teaching assistantship quarter. Fifth-year students in the Ph.D. program who have not secured extramural funding for the sixth year and beyond are advised to make at least two dissertation write-up funding applications and secure extramural funding for dissertation write-up from the sixth year and beyond.

In order to be eligible for department funding of summer fieldwork and research, first- through fifth-year students must make at least one intramural or extramural summer funding application for each summer of research and fill-out and hand in the department’s application establishing eligibility for the summer funding.

No financial support is available to students enrolled for the M.A. degree.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, consult the “School of Education” section of this bulletin or address the inquiry to the Credential Administrator, School of Education.

COURSES

Undergraduates register in courses numbered in the 100s or below. Graduate students register in courses numbered in the 200s or above.

WIM indicates that the course satisfies the writing in the major requirements.

UNDERGRADUATE

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Cultural and Social Anthropology department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Cultural and Social Anthropology are advised to consider satisfying their GER:1b,c requirements by registering for the following IHUM courses.

IHUM 27A.B. Encounters and Identities—The formation of ideas about individual and collective identities in S. Africa, W. Europe, and the U.S. Contemporary ideas about identity, including national, racial, ethnic, and gender identity; historical encounters and social transformations linking these areas. Challenging popular assumptions about the origins of identities through similarities and differences among ideas of individual and collective identity in different regions of the world.

GER:1b,1c (two quarter sequence)

IHUM 27A. 5 units. Win (Ferguson)

IHUM 27B. 5 units, Spr (Yanagisako)

INTRODUCTORY

Open to all students, these courses are introductory in the sense that prior knowledge is not assumed. Students who want a general introduction to human behavior and culture are advised to take CASA 1; those who are interested in introductory courses focused on specific areas of anthropological inquiry should choose from among the courses numbered 2 through 18.

CASA 1/201. Introduction to Cultural and Social Anthropology—Crosstcultural anthropological perspectives on human behavior, including cultural transmission, social organization, sex and gender, culture change, technology, war, ritual, and related topics. Case studies illustrating the basic principles of the cultural process. Films. GER:3b,4a

5 units, Win (Costanzo-Kapur)
CASA 4. Language and Culture—Language in relation to inequality and power. Focus is on the roles of linguistic practices in constituting and reproducing social relationships, institutional arrangements, and political interests and identities. How language is implicated in differing contexts of domination and struggle including class, race, gender, and sexuality, using existing empirical studies of the language-power linkage. Student projects involve data collection, transcription, analysis, theoretical implications, and connections to existing literature. GER:3b
5 units (Inoue) not given 2004-05

CASA 5. Introduction to Linguistic Anthropology—The role of linguistic practice in constructing identities, social relationships, and institutions, and in reproducing ideologies and power relations. GER:3b
5 units (Inoue) not given 2004-05

CASA 8N. The Anthropology of Globalization—Stanford Introductory Seminar. Preference to freshmen. Anthropological approach to how cultural change, economic restructuring, and political mobilization are bound up together in the process of globalization. Is this a new world of planet-wide interconnections and prosperity and democracy, or a grim world of exploitative transnational corporations that exploit labor and markets to produce culturally homogeneous consumer goods? How new forms of social and political organization are restructuring a world that is culturally diverse, interconnected, and increasingly unequal. GER:3b
3-4 units, Aut (Ferguson)

CASA 14. Anthropology and Art—Modernity. How the concept of art appears timeless and commonsensical in the West, and with what social consequences. Historicizing the emergence of art. Modernist uses of primitive, child art, asylum, and outsider art. GER:3a
5 units, Aut (Malkki)

CASA 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America—What does it mean to be a Native American in the 21st century? Beyond traditional portrayals of military conquests, cultural collapse, and assimilation, the relationships between Native Americans and American society. Focus is on three themes leading to in-class moot court trials: colonial encounters and colonizing discourses; frontiers and boundaries; and sovereignty of self and nation. Topics include gender in native communities, American Indian law, readings by native authors, and Indians in film and popular culture. GER:3b,4b
5 units (Wilcox) not given 2004-05

CASA 17. Anthropological Approaches to Rights—What are rights? How did we come to believe that we have them? Is the idea of rights a Western cultural concept; can it be the foundation of a universal or global politics? The relation between rights and equality. GER:3b
5 units (Ferguson) not given 2004-05

THEORY AND RESEARCH (UNDERGRADUATE AND MASTER’S)

CASA 88. Theories in Race and Ethnicity—Concepts and theories of race and ethnicity in the social sciences and cultural studies. U.S. based definitions, ideas, and problems of race and ethnicity are compared to those that have emerged in other areas of the world. GER:3b
5 units, Win (Yanagisako)

CASA 90. Theory of Cultural and Social Anthropology—For CASA majors only. Anthropological interpretations of other societies contain assumptions about Western societies. How underlying assumptions and implicit categories have influenced the presentation of data in major anthropological monographs. Emphasis is on Marx, Durkheim, Weber, and anthropological analyses of non-Western societies. WIM
5 units, Win (Hart)

CASA 92. Undergraduate Research Proposal Writing Workshop—Practicum. Students develop independent research projects and write research proposals. How to formulate a research question; how to integrate theory and field site; and step-by-step proposal writing.
1-3 units, Aut, Win (Costanzo-Kapur)

CASA 93. Prefield Research Seminar—Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnography, and the use of documentary materials. Strategies of successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork. Prerequisites: two CASA courses or consent of instructor.
5 units, Spr (Yanagisako)

CASA 93B. Prefield Research Seminar: Non-Majors—Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnography, and the use of documentary materials. Strategies for successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork.
5 units (Staff) not given 2004-05

CASA 94. Postfield Research Seminar—Undergraduates analyze and write about material gathered during summer fieldwork, emphasizing writing and revising as steps in analysis and composition. Students critique classmates’ work and revise their own writing in light of others’ comments. Ethical issues in fieldwork and ethnographic writing, setting research write-up concerns within broader contexts. Goal is to produce an ethnographic report based on original field research.
5 units, Aut (Freidenfelds)

CASA 94B. Postfield Research Seminar: Non-Majors—Goal is to produce an ethnographic report based on original field research. Student critiques. Ethical issues in fieldwork and ethnographic writing. Research writing concerns within broader contexts.
5 units (Staff) not given 2004-05

CASA 95A. Research in Anthropology—Independent research conducted under faculty supervision, normally taken junior or senior year in pursuit of a senior paper or an honors project. May be taken more than one quarter for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

CASA 95B. Senior Paper—Takent in the final quarter before graduation. Independent study and work on senior paper for students admitted to the program. Prerequisite: consent of program adviser and instructor.
1-10 units, Aut, Win, Spr, Sum (Staff)

CASA 96. Directed Individual Study—For undergraduate students with special needs, and showing the capacity to do independent work. Prerequisite: consent of instructor.
1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 102. Archaeological Field Methods: Presidio San Francisco—For students who participated in the archaeological dig at the Presidio during the summer. GER:3b
5 units, Aut (Voss)

CASA 103/203. Laboratory Methods in Archaeology—What do archaeologists do with the things they dig up, and how can they use artifacts to learn about past cultures? Hands-on experience cataloging, analyzing, and interpreting an archaeological collection. Students are exposed to standard methods in cataloging and curation, and in analysis of different types of artifacts, animal bone, and botanical remains. Individual or group analysis projects with reports that communicate the research findings. GER:3b
5 units (Voss) not given 2004-05

CASA 108. History of Archaeological Thought—(Same as ARCHLGY 103.) Introduction to the history of archaeology and the forms that the discipline takes today, emphasizing developments and debates over the past five decades. Historical overview of culture, historical, processual and post-processual archaeology, and topics that illustrate the differences and similarities in these theoretical approaches.
5 units, Win (Voss)
CASA 137E/237E. Excavation at Catalhoyuk, Turkey—Archaeological field experience by participating in Stanford’s excavation at Catalhoyuk in Summer. Focus is on the urban character of this earliest of towns. Course prepares student for the Summer dig. 
3-5 units, Spr (Hodder)

CASA 155. Virtual Communities: Online Technologies and Ethnographic Practice—Theoretical and practical approaches to ethnographic projects involving online technologies. Focus is on virtual communities. The methodological implications of online ethnographic research: researcher roles, the notion of identities, human subject issues, distributed collaboration, and alternative representations. Conceptual implications such as interpreting online technologies as virtual environments for human interaction versus a cultural artifact, and the nature of the Internet as both setting and technology for ethnography. GER:3b
5 units, Aut (Engel)

CASA 190/290. History and Theory in Cultural and Social Anthropology—Goal is to place anthropology in historical and national contexts and treat theoretical and methodological issues that inform contemporary theory and practices. Readings include Marx, Weber, Durkheim, and anthropological analysis of non-Western societies. 190 is limited to undergraduate non-CASA majors; 290 is limited to CASA undergraduate majors and master’s students. GER:3b
5 units, Win (Baviskar)

CASA 199/299. Senior and Master’s Thesis Writing Workshop—For students writing a senior thesis. Techniques of interpreting data, organizing bibliographic materials, writing, editing and revising. Also preparation of papers for conferences and publications in anthropology. Undergraduate seniors register for 199; master’s students register for 299.
2 units (Staff) not given 2004-05

GENERAL AREA COURSES

CASA 71. Asian American Representation in Mass Media—How Asians are represented as a racial category in N. American mass media. The history of racialized representations of Asians in mainstream film and television; mass media as a means through which knowledge of and about Asia, Asians, and Asian Americans have been produced for American audiences. GER:3b
5 units, Spr (Joo)

CASA 72. Dance and Culture in Latin America—(Enroll in DANCE 168.)
4 units, Spr (Cashon)

CASA 74. South Asian Histories and Cultures through Popular Film: Bollywood and Beyond—Indian cinema has been a site for the articulation of ideas about nation, beyond, class, gender and sexuality, community, and diaspora. Focus is on Bollywood films, and Indian cinema in general, as social, cultural, and political phenomena. How cinematic form, production and distribution networks, and audience reception mediate the emergence of postcolonial forms of identity and consciousness. Film screenings. GER:3b,4a
5 units (Mankekar) not given 2004-05

CASA 77/277. Japanese Society and Culture—Focus is on power, identity, and the politics of knowledge production. How transnational interactions influence Japanese identity. How anthropological knowledge has contributed to understanding Japanese culture and society. Gender, race and class; contemporary ethnographies. Modernity and globalization. Cultural politics, domestic work, labour management, city planning, ad images, anime, martial art, fashion, theatre, leisure, and tourism. GER:3b,4a
5 units, Spr (Satsuka)

CASA 83. Gender in South Asian Communities at Home and Abroad—The relationship between men and women in S. Asian communities in India, Pakistan, Bangladesh, Sri Lanka, Nepal, and overseas communities. Focus is on the relationship between the practices and ideologies of gender, and other social institutions including religion, family, state, mass media, and ideologies of communalism and nationalism. Prerequisite: 12 or consent of instructor.
3-5 units (Mankekar) not given 2004-05

CASA 111X. Introduction to Language Change—(Enroll in ANTHSCI 110.)
4-5 units, Win (Fox)

CASA 116X. Language, Culture, and Education in Native North America—(Enroll in NATIVEAM 116, CSRE 116.)
5 units (Nelson-Barber) not given 2004-05

CASA 118A. Silicon Valley in Perspective: Culture and Ecology of New Industrialism—Silicon Valley as a site of global discussion of technology and society. The history of the S. San Francisco Bay Area. The development of high-tech regions elsewhere. Popular stories of Silicon Valley emphasizing technology, industrialism, and entrepreneurship, and a counter-history concerned with gender and racial divisions of labor, the gap between rich and poor, and environmental consequences. Theoretical frameworks that go beyond such binary perspectives of high-tech development. GER:3b
5 units, Aut (Lee)

CASA 124. Violence and the Politics of Memory in East Asia—How memories of critical events from the 20th century past, such as state violence, colonialism, terrorism, ethnic cleansing, and international armed conflicts, inform gender, class, and ethnic relations in China, Korea, and Japan. Sources include ethnographies, theory, and films. GER:3b
5 units, Spr (Mitsui)

CASA 125. South Asian Diasporas—The history of migration from S. Asian to the U.S., Canada, and the U.K., and the configuration of South Asian identities and politics. How migration is shaped by the countries of arrival and departure. How S. Asian immigrants negotiate citizenship, identity, and belonging while maintaining ties to their homelands. How they figure in the host country’s politics of race and ethnicity. The impact of gender, sexuality, and class on the formation of identities? GER:3b
5 units, Spr (Ameeriar)

CASA 127. Tibetan Ritual Life—(Same as RELIGST 217A.) The human life cycle, the calendar year, and pilgrimage are used as organizing principles to examine Buddhist and lay rituals that mark important occasions, bless people and places, ward off danger, heal wounds, alleviate suffering, predict the future, affirm Tibetan identity, and inspire political activism. Also covered: material culture of rituals including butter sculpture, thangka painting, and costumes; performative aspects including monastic dance, chanting, instrumental music, song, and opera; and the meanings of rituals to those who participate in them. The role of ritual in human culture more generally. GER:3a,4a
5 units (Diehl) not given 2004-05

CASA 128. The Anthropology of Japan—(Same as ANTHSCI 24.) Cultural history of Japan since WWII. Transformation of religion, kinship, gender, education, work, leisure, ideology, and national identity as interconnected institutions. The legacy of Tokugawa and prewar Japan as antecedents to postwar developments. (HEF I, II) GER:3b
3-5 units, Win (Befu)

CASA 128B. Globalization and Japan—(Same as ANTHSCI 128B/ 228B.) Globalization theories in anthropology and sociology, and Japan in the context of these theories. Ethnographic cases of Japan’s global presence from the 15th century to the present. Processes of globalization in business management, popular culture, and expatriate communities. Japan’s multiculturalization through its domestic globalization. (HEF IV) GER:3b,4a
3-5 units (Befu) not given 2004-05

CASA 135/235. Native Peoples of the Americas: Prehistory, Contacts, and Contemporary Debates—Using archaeological, ethnographic, and historical sources, exploration of the distinctive features and cultural traditions of Indigenous societies in the Americas. Pre-Colu-
bian religion, arts, and the construction of power, social complexity, official history, and myth. Continuities and changes in those traditions resulting from Spanish conquest, colonial rule, and subsequent global changes in the 20th century. Rise of nationalism, indigenous movements, and the changing roles of anthropologists and archaeologists. GER:3b,4b
5 units (Wilcox) not given 2004-05

CASA 145A/245A. Poetics and Politics of Caribbean Women’s Literature—Mid-20th century to the present. How historical, economic, and political conditions in Haiti, Cuba, Jamaica, and Guadeloupe affected women. How Francophone, Anglophone, and Hispanic women novelists, poets, and short story writers respond to similar issues and pose related questions. Caribbean literary identity within a multicultural and diasporic context, the place of the oral in the written feminine text, family and sexuality, translation of European master texts. History, memory, and myth, and responses to slave history, colonialism, neocolonialism, and globalization. GER:3b,4c
5 units, Win (Duffy)

CASA 171. Mythology, Folklore, and Oral Literature of Central Asia—Central Asian cults, myths, and beliefs from ancient time to modernity. Life crisis rites, magic ceremonies, songs, tales, narratives, taboos associated with childbirth, marriage, folk medicine, and calendrical transitions. The nature and the place of the shaman in the region. Sources include music from the fieldwork of the instructor and the Kyrgyz epoch Manas. The cultural universe of Central Asian peoples as a symbol of their modern outlook. GER:3b
5 units, Aut (Kunanbaeva)

CASA 183D/283D. Border Crossings and American Identities—How novelists, filmmakers, and poets perceive racial, ethnic, gender, sexual preference, and class borders in the context of a national discussion about the place of Americans in the world. How Anna Deavere Smith, Sherman Alexie, or Michael Moore consider redrawing such lines so that center and margin, or self and other, do not remain fixed and divided. How linguistic borderlines within multilingual literature by Caribbean, Arab, and Asian Americans function. Can Anzaldúa’s conception of borderlands be constructed through the matrix of language, dreams, music, and cultural memories in these American narratives? Course includes examining one’s own identity. GER:3a,4b
5 units, Aut (Duffy)

CASA 187/287. Contemporary China: Social Change, Ruptures of the Everyday—What happened to Maoism? Where have all these karaoke bars and cell phones come from? Cultural shifts in contemporary China in order to theorize connections and conflicts between macro and micro-level social transformations. In China today, how do macro-level processes of privatization, consumerism, and the restructuring of the party-state relate to changes in everyday experiences for diverse groups? Focus is on the changing experiences of inequality, body politics, family relations, identity, new media, and spatial mobility. GER:3b,4a
5 units (Kohrman) not given 2004-05

TOPIC COURSES

CASA 82/282. Medical Anthropology—Emphasis is on how health, illness, and healing are understood, experienced, and constructed in social, cultural, and historical contexts. Topics: biopower and body politics, gender and reproductive technologies, illness experiences, medical diversity, and social suffering and the interface between medicine and science. GER:3b,4a
5 units, Win (Kohrman)

CASA 82A. Race and Medicine—Race, identity, culture, biology, and political power in the history of medicine and healthcare in the U.S. The emergence of racial categories, critical race theory, biological theories of racial ordering and of race and sexuality, and the medicalization of race. Topics include: colonial history and medicine, the politics of racial ordering, the protection of human subjects and research ethics, current health disparities between racially identified populations in the U.S., and recent developments in human genetic variation research.
5 units (Lee) not given 2004-05

CASA 113X. Political Anthropology from Rousseau to Freud—A confrontation between ways of accounting for society in an individualistic framework: the social contract; political economy; individualistic sociology; society as crowd; mass psychology; and sociopolitical institutions. A typology of ways in which a given anthropology constrains conceptions of the social and political order. Writers include Rousseau, Hume, Smith, Constant, Tocqueville, Marx, Durkheim, Weber, and Freud.
3-5 units, Spr (Dupuy)

CASA 121. Global Feminisms—Feminist theorists and writers including Moraga, Anzaldúa, Morrison, Neale-Hurston, Silko, Hong Kingston, Yamamoto, Xinran, de Beauvoir, Cott, Pateman, and Fraser. GER:3b
5 units, Win (Chertow)

CASA 122. Anthropology of Development—from the genome to the Amazon rain forest, nature as the center of competing claims. How do cultural arrangements shape ideas and practices about nature? Social science perspectives on the environment. Focus is on environmental struggles in historical and geographical context and in relation to capitalism and colonialism, to examine the cultural politics of nature. GER:3b
5 units, Spr (Baviskar)

CASA 126. Mediating Desire: Gender, Race, and Representation—How glamour, drag, punk rock, beauty queens, and ghetto-fabulous style have served marginalized people to create possibilities for survival, identity, and desire. How marginality and mediated images of other lives are understood, performed, embraced, and rejected through representations. The process of mediation and the transformation of events into messages. Theories of communication, identity, and representation. GER:3b
5 units, Spr (Ochoa)

CASA 132. Science, Technology, and Gender—Why is engineering often seen as a masculine profession? What have women’s experiences been in entering fields of science and technology? How has gender been defined by scientists? The struggles of women in science to negotiate misogyny and cultural expectations, reproductive issues, how the household became a site of consumerism and technology, and the cultural issues at stake as women join the ranks of scientists. GER:3b,4c
3-5 units (Jain) not given 2004-05

CASA 135X. Pilgrimage and Sacred Landscapes—(Same as RELIGST 235.) Perspectives include cultural, spiritual, psychological, medical, economic, and political. Christianity, Buddhism, Hinduism, Islam, Native American, and secular; sources include Europe, Tibet, India, Native America, and the Middle East. Why do pilgrims often make their journeys difficult and painful? How do landscapes become sacred? What happens when places such as Jerusalem are intersections for groups with different belief systems? Contemporary U.S. destinations such as Grace-land and the Vietnam Memorial; journeys of personal or non-parochial cultural significance. GER:3a
4 units, Aut (Diehl)

CASA 144/244. Sex, Blood, Kinship, and Nation—What do these terms have to do with each other, with belonging, with identity? Against a background of traditional anthropological theories about sex, procreation, and kinship, the transformations in the last 25 years, taking up notions of sex and gender, new reproductive technologies, adoption, and the use of blood to include and exclude certain people and groups. What is the significance of biology, culture, cosmology, and agency in the construction of these concepts and in the implications for practice in everyday life? GER:3b,4c
5 units (Delaney) not given 2004-05

CASA 147/247. Archaeology and the Public Imagination—The image of archaeology in the public imagination revolves around the romanticized exploits of an Indiana Jones or Lara Croft whose discoveries are depicted in mass media. Goal is to use archaeological tropes and stereotypes to explore the practices and investigations of explorers, travelers, colonizers, conquerors, collectors, looters, detectives, artists, scholars, and romantics. GER:3a
3-5 units, Win (Carter)
CASA 152. Archaeology: World Cultural Heritage—Focus is on issues dealing with rights to land and the past on a global scale including conflicts and ethnic purges in the Middle East, the Balkans, Afghanistan, India, Australia, and the Americas. How should world cultural heritage be managed? Who defines what past and which sites and monuments should be saved and protected? Are existing international agreements adequate? How can tourism be balanced against indigenous rights and the protection of the past? GER:3b
   5 units, Aut (Hodder)

CASA 158X. Culture and Learning—(Same as EDUC 287.) Learning in institutional settings in the U.S. and around the globe. Learning in families, in schools, on the job, and on the streets. Emphasis is on the cultural organization of success and failure in American schools. Tentative consideration of opportunities for making less inequality.
   3-4 units (McDermott) not given 2004-05

CASA 164. Ritual Musics of the World—(Same as MUSIC 164.) The roles that music plays in human ritual life: physical effects of music, shamanic healing, spirit possession, and rites of worship. Gender issues in ritual music, the power of music to create and affirm communities, and as a medium for spiritual knowledge. What can be known about people, places, and cultures through sound? How does music express and shape social identity? How are belief systems and patterns of social interaction manifested in musical practices? Sources include readings and guided listening to recorded music from cultural and religious traditions around the world. GER:3a,4a
   4 units, Win (Diehl)

ADVANCED UNDERGRADUATE AND GRADUATE SEMINARS

AREA SEMINARS

CASA 117/217. Archaeology of the American Southwest: Contemporary Peoples, Contemporary Debates—Cultural diversity and archaeology from paleo-indians to the present. Focus is on cultural fluorescence in areas such as the Mimbres Valley, Chaco Canyon, Mesa Verde, the Rio Grande, and the Hohokam in the Phoenix Basin. The development of agriculture, theories of social complexity and political economy, and the relationships between contemporary Native Americans, archaeologists, and the production of the past. GER:3b
   5 units (Wilcox) not given 2004-05

CASA 118/218. Literature, Politics, and Gender in Africa—Intersections of gender, power, and desire; the politics of colonialism and Christianity; and nationalism and postcoloniality. Emphasis is on the politics of writing and critical imagination in historical and social context. Readings include novels and texts by African writers. GER:3b,4c
   5 units (Maliki) not given 2004-05

CASA 119/219. The State in Africa—Postcolonial African states in historical and ethnographic context. Focus is on contemporary African states not as failures, but as the products of distinctive regional histories and political rationalities. GER:3b,4a
   5 units (Ferguson) not given 2004-05

CASA 173/273. Nomads of Eurasia—The nomads of the Eurasian steppes, their lifestyles, and cultural history, including Mongolia, Kazakhstan, Kyrgyzstan, and Turkmenistan. Languages, traditional economies, art, the relationships between sedentary and nomadic peoples, and the early background and gradual Turkification and Islamization of Central Asia and Lamaization of S. Siberia. Regional trade networks (the Silk Road) where nomads were the mediators in innovations, the Mongol empire and its fate, Imperial Russian expansion, and the incorporation of inner Asia into the USSR. GER:3b
   4-5 units, Spr (Kunanbaeva)

CASA 178/278. Archaeology of the Middle East—The roles of memory, archives, and deep time in the periods before writing in the Middle East and Europe. Prehistoric societies and relationships with their own pasts. How these societies constructed histories before writing. GER:3b
   5 units (Hodder) not given 2004-05

CASA 179/279. Anthropology of the Middle East—The roles of memory, archives, and deep time in the periods before writing in the Middle East and Europe. Prehistoric societies and relationships with their own pasts. These societies constructed complex histories well in advance of writing. GER:3b,4a
   5 units (Delaney) not given 2004-05

TOPIC SEMINARS

CASA 112/212. The Archaeology of Cities—Case study approach. The archaeological evidence of urban life from first cities formed nearly 8,000 years ago through the archaeological remains of urban life in the San Francisco Bay Area. Focus is on the material and spatial aspects of urban cultures. Field trips to Bay Area archaeological sites and collections.
   GER:3b
   5 units (Voss) not given 2004-05

CASA 130A/230A. Bioethics and Anthropology—(Same as ANTHSCI 174/274.) The relevance of moral and ethical issues in health and illness, the development of scientific knowledge, and applications of biomedical technology from an anthropological perspective. The ways moral problems in science and technology are culturally situated, defined, and resolved in specific historical, political, social, and economic contexts. Research ethics for anthropologists studying health and illness. Focus is on cultural production of moral dilemmas in biomedicine and healing practices in diverse cultures. (HEF IV) GER:3b
   5 units, Spr (Koenig)

CASA 131. Archaeology and Anthropology of Visual Culture—Archaeological and anthropological inquiry into visual images and aspects of cultures.
   5 units (Staff) not given 2004-05

CASA 134/234. Archaeology of Architecture—How archaeologists have approached the interpretation of architectural remains. Emphasis is on the cultural and social aspects of spatial arrangements in the past and includes ethnographic, ethnoarchaeological, and archaeological case studies. Technical and analytical strategies are integral to the interpretive process. The ways in which archaeological data are identified, analyzed, and deployed in social interpretation of structured space. GER:3a
   5 units (Voss) not given 2004-05

CASA 138. Feminist Practice in Archaeology—Graduate seminar. Focus is on theoretical standpoints and analytical strategies in archaeological studies of gender. The history of feminist thought in archaeology, including the relationship between archaeology and feminist inquiries in anthropology, history, and the natural sciences. Case studies that have played a key role in the development of feminist theory and practice in archaeology. The growing influence of third-wave feminist thought and queer theory.
   5 units (Voss) not given 2004-05

CASA 140/240. An Archaeology of Death—Responses including fascination, anger, and contestation. Funerary data provides information on ancient populations and societies, and the identity and status of the deceased. Questions asked by archaeologists about bodies of evidence. Classic texts: what it means to bury, cremate, exhume, manipulate, commemorate, fear, and worship the dead. Readings from archaeology, anthropology, and sociology. GER:3b
   3-5 units, Aut (Carter)

CASA 146/246. Masculinity: Technologies and Cultures of Gender—What is masculinity? How are masculinities invested with power and meaning in cultural contexts? How is anthropological attention to them informed by and extending inquiry across the academy in spheres such as culture studies, political theory, gender studies, history, and science and technology studies? Limited enrollment. GER:3b
   5 units, Win (Kohrman)

CASA 151/251. Cultural Studies—Identity, community, and culture; their interactions and formation. GER:3b
   5 units, Aut (Joo)
CASA 157/257. Fundamentalism and Modernity—Why is fundamentalism becoming more popular around the world? Is fundamentalism a reaction against or an integral aspect of modernity? Prerequisite: consent of instructor. GER:3b,4c
5 units (Jain) not given 2004-05

CASA 201X. Readings in Science, Technology, and Society—Focus is on anthropological approaches and contributions to the field. Prerequisite: consent of instructor. GER:3b,4c
5 units (Jain) not given 2004-05

GRADUATE SEMINARS

Courses in this section numbered 300 through 380, except 302, satisfy the department's evaluation course requirement.

CASA 239. Introduction to Cultural Studies of Science and Technology—Theories about science as a system of knowledge production. The nature of scientific inquiry and scientific communities; cultural and ideological aspects of scientific practices, institutions, and theories. Evolutionary theory including Darwin. The creation of development as an economic and social discipline. New relations of technology, society, and identity made possible by the Internet. Prerequisite: consent of instructor.
5 units, Aut (Luthra)

CASA 253. Anthropology and Tourism—The influence of anthropology and tourism upon each other. How similar practices deal with travel, culture, and knowledge of others. Cultural and ethnic tourism. The power of exotic places and peoples, and how travel shapes understanding them. Prerequisite: consent of instructor.
5 units, Aut (Satsuka)

CASA 300. Reading Theory Through Ethnography—Required of and restricted to first-year CASA Ph.D. students. Focus is on contemporary ethnography and related cultural and social theories generated by texts. Topics include agency, resistance, and identity formation, and discourse analysis. Prerequisite: consent of instructor.
5 units, Win (Yanagisako)

CASA 301. History of Anthropological Theory—Required of all CASA Ph.D. students. The history of cultural and social anthropology is studied in relation to historical and national contexts and to key theoretical and methodological issues as these continue to inform contemporary theory and practices of the discipline. Prerequisite: consent of instructor.
5 units, Aut (Ferguson)

CASA 302. Anthropological Research Methods—Required of all CASA Ph.D. students; open to all graduate students. Research methods and modes of evidence building in ethnographic research. Prerequisite: consent of instructor.
5 units, Spr (Mankaker)

CASA 313. Anthropology of Neoliberalism—How is the recent worldwide restructuring under the name neoliberalism understood as a social, cultural, and economic phenomenon? Focus is on interrogation of analytic categories, and ethnographic explorations of social and political processes. Prerequisite: consent of instructor.
5 units (Ferguson) not given 2004-05

CASA 319. Naturalizing Power: Kinship, Gender, Race, and Sexuality—The discursive and material practices through which social relations of inequality are naturalized. Theories of community, kinship, gender, and sexuality compared to the parallel processes of naturalization and mutual affirmation, and the role of anthropological theory in these naturalizations. Prerequisite: consent of instructor.
5 units (Yanagisako) not given 2004-05

CASA 327. Language and Political Economy—Theories of language: Saussure, Jakobson, Hymes, Marx, Foucault, Butler, and Derrida. The theorization of language in its linkages to power, social relations, and history. Prerequisite: Linguistics or Anthropology course work.
5 units (Jain) not given 2004-05

CASA 330. Multivocality and Archaeology—Archaeological legislation, NAGPRA, and the ethics of representation. Prerequisite: consent of instructor.
5 units (Wilcox) not given 2004-05

CASA 343. Culture as Commodity—Focus is on theories of commodification, interests in tourism, national cultures as marketable objects, and how identities are constituted through production and consumption. Prerequisite: consent of instructor.
5 units (Yanagisako) not given 2004-05

CASA 344. Ethical Criticism: Poststructuralism, Feminism, Psychoanalysis—Theories of the ethics of inquiry in the humanities and human sciences in the light of postmodernist challenges to traditional notions of value, subjectivity, and action. Topics include: ethics of ambiguity, situationism, and care; legality and morality; and authenticity, sincerity, truthfulness, and forgiveness. Contemporary preoccupations concerning heritage, relationship to the other, research ethics, and ethics codes. Prerequisite: Anthropology or Linguistics.
5 units, Win (Yanagisako)

CASA 346A. Sexuality Studies in Anthropology—Current research on sexuality from perspectives including paleoanthropology, archaeology, ethnography, and linguistic anthropology. Readings on sexuality paired with case studies that explore theoretical and methodological issues. Prerequisite: Anthropology.
5 units, Spr (Domanska)

CASA 348. The Postcolonial City—Cities as modes of cultural experience. Relationships between urban spatiality and subject formation in postcolonial cities. Sources include ethnographic works on informality, globalization, and governmentality.
5 units, Spr (Baviskar)

CASA 349. Seminar on Studying Up—Issues in cultural theory and methodology through research on people who have greater material and cultural resources than those usually studied by anthropologists. How ideas about ideology, hegemony, identity, power, and practice are altered in studying those considered to be agents of power rather than the subaltern. Themes: global capitalism, masculinicity, white racial subjectivity. Prerequisite: Anthropology.
4-5 units (Yanagisako) not given 2004-05

CASA 350. Nationalism and Gender—The co-implication of discourses of nationalism and gender, focusing on nationalist movements and ideologies in newly-independent countries and Third World contexts. Themes: discourses and practices of nationalism with institutions such as the state, mass media, and the family; masculinity, femininity, and militarization; and questions of representation, historiography, location, and strategy.
5 units (Mankekar) not given 2004-05

CASA 352. Foucault: The Question of Method—Foucault as methodological exemplar for historical and social research. Emphasis is on his historical studies of clinical medicine, prisons, and sexuality, and on applying his methods to empirical studies of topics such as colonialism, race, and liberal governmental rationality.
5 units, Win (Ferguson)
CAS 354. Narrative, History, and Memory—Interdisciplinary. The debates surrounding theories of narrative and their relevance to ideas of history and memory. Methodological implications and applicability to analysis of social research, particularly anthropology and history.
3-5 units (Ebron) not given 2004-05

CAS 357. Anthropology of Space and Architecture—Topics include: phenomenological versus political approaches to space; the interpretation of indigenous architectures; the body and its orientation in space; architecture as a semiotic system; the house, kinship, cosmology, and social organization; architectural modernism and postmodernism. Case studies oriented to student interest and may include: carceral space; colonial and postcolonial segregation; race and place; home and homelessness; and the gender of building. Readings include architects, historians, social theorists, philosophers, and ethnographers.
5 units, Win (Hart)

CAS 362. Topics in Political Economy—Emphasis is on Marxist approaches. Topics: the development and articulation of capitalism, imperialism, colonialism, dependency, and world systems; 20th-century capitalism, post-Fordism, and postmodernism; the political economy of race, gender, and ethnicity; class relations and productive inequalities in the Third World; the discourse of development; and the cultural mediation of political economic transformation. The ethnographic material that employs these theories is used to examine specific sociohistorical contexts.
5 units, Win (Baviskar)

CAS 370P. Advanced Pro Seminar: Topics in Archaeology
1-15 units (Voss) not given 2004-05

CAS 372. Materiality—The relationships between people and things. The world of objects plays a major role in materialism and the anthropology of material culture. Approaches that break down subject-object opposition. New social and psychological approaches that explore the mutual constitution of people and things, and object and subject. Approaches in which objects are seen to have agency, and people are seen as entangled in object worlds. Authors include Hegel, Marx, Benjamin, Miller, Gell, and Latour.
5 units (Hodder) not given 2004-05

CAS 373. Introduction to Archaeological Theory—The history of archaeological thought, concentrating on debates that have dominated the discipline in recent decades. Evolutionary theories, behavioral archaeology, processual and cognitive archaeology, and approaches termed feminist and post-processual archaeology in the context of wider debates in adjacent disciplines, focusing on the application and integration of theory in working through archaeological problems and issues.
5 units, Win (Hodder)

CAS 375. Archaeology and Globalism—The emergence of archaeology as a discipline in the context of the rise of the nation state. Global economies and other issues have created a new context for archaeology. How are archaeology and heritage responding? The idea of world heritage. The impact of postcolonialism. The commodification of the past: the past as theme park, as travel tourism or nostalgia, as exotic and other. Conflict between uses of the past for identity and as theme park; between heritage and resource or play. The impact of the Goddess, New Age, and other movements. Archaeology and human rights issues including forensic archaeology.
4-5 units, Spr (Hodder)

CAS 380. Practice and Performance: Bourdieu, Butler, and Giddens—Ethnography and archaeological, poststructuralist theories of iteration and mimesis are used by social scientists to negotiate the tension between social structure and social practice. Readings of three prominent theoretical frameworks in this area: Giddens’ structuration theory, Bourdieu’s practice theory, and Butler’s theories of gender performativity. Ethnographic and archaeological case studies that employ methodologies inspired by these approaches. Intersections and contradictions among these theorists’ work. Their use in anthropological practice. Emphasis is on gender, sexuality, and ethnicity.
5 units (Voss) not given 2004-05

CAS 391A,B. Qualifying Paper—Required of second- and third-year Ph.D. graduate students.
A. Topic, B. Area—2-5 units, Aut, Win, Spr (Staff)

CAS 392. Dissertation Writers Seminar—For graduate students in the process of writing dissertations and preparing for professional employment.
1-5 units, Aut, Win, Spr (Malkki)

CAS 393. Internship
1-15 units, Aut, Win, Spr (Staff)

CAS 394. Proposal Writing Seminar—Required of Ph.D. students in anthropology in their second year. The conceptualization of dissertation research problems, the theories behind them, and the methods for exploring them. Participants draft a research prospectus suitable for dissertation proposals and research grant applications. Limited enrollment. Prerequisite: 212 or consent of instructor.
5 units, Spr (Voss)

2-5 units, A: Win, B: Spr (Malkki)

CAS 396. Research Apprenticeship—Supervised work with an individual faculty member on a research project. May be taken for more than one quarter.
1-15 units, Aut, Win, Spr (Staff)

CAS 397. Directed Individual Study—For CASA Ph.D. students, supporting the qualifying paper and pre-dissertation field research.
1-15 units, Aut, Win, Spr, Sum (Staff)

CAS 397A. Directed Individual Tutorial—For CASA Ph.D. students working directly with a faculty member on specialized course work supporting a research area of interest.
1-15 units, Aut, Win, Spr, Sum (Staff)

CAS 397B. Dissertation Fieldwork—For CASA Ph.D. students conducting 4th-year dissertation field research.
1-15 units, Aut, Win, Spr, Sum (Staff)

CAS 398. Teaching Apprenticeship—Supervised experience as an assistant in one undergraduate course.
1-15 units, Aut, Win, Spr, Sum (Staff)

CAS 399. Master’s Research Thesis—Research in connection with the master’s paper.
1-15 units, Aut, Win, Spr, Sum (Staff)

CAS 444. Cultural and Social Anthropology Colloquium—Required of first-year CASA Ph.D. students.
1 unit, Aut, Win, Spr, Sum (Staff)

CAS 445. Cultural and Social Anthropological Symposium—Current topics and trends in cultural and social anthropology, cultural archaeology, and archaeology.
1 unit, Aut, Win, Spr (Staff)

OVERSEAS STUDIES
Courses approved for the Cultural and Social Anthropology major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.
Dr. Alice Rayner, Chair, Drama Division

Professors: Jean-Marie Apostolidès (French and Italian, Drama), Harry J. Elam, Jr., Peggy Phelan, Rush Rehm (Drama, Classics), Carl Weber

Associate Professors: William S. Eddelman, Alice Rayner

Assistant Professor: Ehren Fordyce

Professor (Teaching): Michael F. Ramsaur

Associate Professor (Teaching): Janice Ross

Senior Lecturers: Patricia Ryan, Connie Strayer

Lecturers: Margaret Booker, Alison Duxbury, Erik Flatmo, Amy Freed, Kathryn Kostopoulos, Katherine Romack

Visiting Professor: Les Waters

Artist in Residence: Cherrie Moraga

Black Performing Arts Division

Director: Harry J. Elam, Jr.

Steering Committee: Jan Barker (BCSC), Elena Becks (Committee on Black Performing Arts), Deborah Burke (student), Chris Clarke (El Centro Chicano), Regina Covington (King Papers), Paulla Ebron (Anthropology), Kim Fowler (Committee on Black Performing Arts), Jennifer Eberhard (Psychology), Vera Grant (African and African American Studies), Ashley Hannah (student), Tony Kramer (Dance), Cherrie Moraga (Drama), Cindy Ng (AAAC), Laura Selznick (VPU), Malika Williams (student)

Dance Division

Director: Tony Kramer

Senior Lecturers: Susan Cashion, Tony Kramer

Lecturers: Kasey Brown, Kristine Elliott, Diane Frank, Aleta Hayes, Robert Moses, Richard Powers, Ronnie Reddick, Perry Quashie, Keith Urban

Mail Code: Drama, 94305-1010; Dance, 94305-8125

Phone: (650) 723-2576

Email: radavies@stanford.edu

Web Site: http://www.stanford.edu/dept/drama/

Courses given in Drama have the subject code DRAMA. Courses given in Dance have the subject code DANCE. For a complete list of subject codes, see Appendix B.

Drama Division

The Department of Drama bases its undergraduate and graduate programs on the integration of theory and performance. The faculty commit themselves to the idea that artists must be able to analyze their creative work and that scholars must approach their own specializations creatively. The department prepares students for continued work at the graduate level, either in the academy or in conservatory programs that educate artists for careers in the theater within a comprehensive liberal arts education. The Ph.D. program, which demands that its candidates work as both scholars and theater artists, prepares the students to pursue a career in university teaching and research, and to undertake further work in professional and university theaters.

Undergraduate Programs

Bachelor of Arts

The requirements for the B.A. degree in Drama are planned to integrate the critical and historical study of drama with the study and experience of performance. The major provides aesthetic and critical opportunities for students to develop special aptitudes. For example, a student may elect an emphasis in acting, directing, design, or critical theory, or may combine areas of emphasis. Examples of how students can structure course work to take advantage of such an emphasis are available from the major adviser. Students are encouraged to declare a major in their sophomore year.

The core program of Drama courses required of all majors is:

1. Performance/Literature/History: four of the following: 161, 162, 163, 164, 165, 166
2. Stage Management Project: 134 or 34 plus two of 39A,B,C, or D
3. Senior Project: Drama majors must complete an approved senior project in the area of their specialization: a minimum of 2 units in DRAMA 200.

Two years of a college-level foreign language are recommended. All majors, in addition to completing the core described above, are required to complete one of the following seven specializations:

1. Acting:
   a) DRAMA 120A,B. Fundamentals of Acting
   b) The student must have completed at least 4 units of DRAMA 29 and acted in at least two department productions.
   c) DRAMA 28. Makeup for the Stage
   d) two units of studio class in Dance
   e) three additional acting classes
   f) one course in dramatic literature
   g) six units of approved electives in Drama or Dance
   h) one of 39A,B,C, or D

2. Directing:
   a) DRAMA 170A. Introduction to Directing; 170B. Advanced Directing; and 171. Undergraduate Theater Workshop
   b) one course in dramatic literature
   c) DRAMA 30. Introduction to Theatrical Design
   d) DRAMA 31. Introduction to Lighting and Production
   e) one course in acting
   f) one of 39A,B,C, or D
   g) nine units of approved electives in Drama

3. Playwriting/Dramaturgy:
   a) DRAMA 177. Playwriting
   b) DRAMA 178. Intensive Playwriting
   c) DRAMA 170A. Introduction to Directing, 170B. Advanced Directing, and 171 Undergraduate Theater Workshop
   d) DRAMA 176. Undergraduate Dramaturgy Project
   e) one course in dramatic literature
   f) one course in acting
   g) one of 39A,B,C, or D
   h) four units of approved electives in Drama

4. Design:
   a) DRAMA 30. Introduction to Theatrical Design
   b) DRAMA 31. Introduction to Lighting and Production
   c) two of 131, 132, 133
   d) two units each: 39A,B, and C
   e) two of 231, 232, 233, or 235
   f) one course in acting
   g) nine units of approved electives in Drama or Art

5. Technical Production/Stage Management:
   a) DRAMA 30. Introduction to Theatrical Design
   b) DRAMA 31. Introduction to Lighting and Production
   c) one of 131, 132, 133
   d) two units each: 39A,B, and C
   e) DRAMA 34. Stage Management
   f) one course in acting
   g) DRAMA 136. Drafting or MUSIC 19
   h) DRAMA 135. Sound Design for Theater
   i) nine units of approved electives in Drama

6. Dance:
   a) DANCE 158. The Body in Motion
   b) DANCE 169. Choreography, Creation, Staging, and Reconstruction
   c) one additional dance theory class from DANCE 160, 161, 166, 168, 197, or 242
   d) DRAMA 31. Introduction to Lighting and Production
   e) one of DRAMA 39A,B,C, or D
   f) ten classes of studio work: at least one dance class from modern, jazz, world, ballet, social dance and improvisation plus contact, and acting; and two classes of Dance Performance: 23, 27, 100, 105, 106, 150
   g) three units of approved electives in Music and Art
7. Performance Theory and Cultural Studies:
   a) DRAMA 159. Shakespeare
   b) one course in acting
   c) one of 39A,B,C, or D
   d) three courses in dramatic literature
   e) an ethnic drama class
   f) six units of course work in dramatic literature, criticism, theater history, history, art history to be determined in consultation with the undergraduate adviser

SENIOR PROJECT

Work for this project normally begins in Spring Quarter of the junior year and is completed by the end of the senior year. The student must do a senior project in his or her area of specialization: Acting, Directing, Playwriting/Dramaturgy, Design, Technical Production/Stage Management, Dance, or Performance Theory and Cultural Studies. The project can be a creative or research project, or a combination of both. The student has the option of writing an essay associated with the project. Projects receive credit for senior projects through DRAMA 200, Senior Project.

Students pursuing senior projects should consult with both the Department of Drama undergraduate adviser and a faculty adviser in the project’s specialty area. These consultations should take place early in the junior year. Students must petition approval of senior projects through the Department of Drama undergraduate adviser. Projects are typically approved by the department faculty at the end of Spring Quarter of the junior year or the end of Autumn Quarter of the senior year.

The proposal should include an outline of the courses the student has taken and grades received in the area requirements, and should describe the courses in which the student plans to enroll as part of the project. It should describe in detail the purpose and methods involved in the project; a bibliography, if appropriate; and a one-to-two page abstract of the associated essay if an essay is part of the project.

MINORS

For students wishing to minor in Drama, the following core requirements must be met:

1. The three quarter sequence in Performance/Literature/History: three of the following: DRAMA 161, 162, 163, 164, 165, 166.
2. Stage Management Project: 134, or 34 plus two of 39A,B,C, or D.
3. A practical production class in technical theater or performance: one of 29, 39A,B,C, or D.
4. Elective courses totaling a minimum of 15 units from the specified courses in any one of the seven specializations listed above would constitute a minor concentration in: Acting, Directing, Playwriting/Dramaturgy, Design, Technical Production/Stage Management, Dance, or Performance Theory and Cultural Studies.

HONORS PROGRAMS

DRAMA

For a limited number of students, the department confers the degree of Bachelor of Arts with Departmental Honors in Drama. To be considered for departmental honors, students must meet the following requirements in addition to the other requirements of the Drama major:

1. Application involves a written submission (including transcript) establishing the student’s work-to-date in the department and outlining the area of research that the student wishes to pursue. No students are admitted to the honors program with a grade below ‘B-’ in a course (departmental or otherwise) that constitutes part of their Drama major.
2. Students must complete the Drama core requirements by the end of their junior year, earlier if possible. Only in exceptional circumstances can this requirement be waived; transfer from another university, extended overseas study, temporary withdrawal from the major due to illness might constitute extenuating circumstances.
3. Students also must have completed half of the courses in their specialization by the end of their junior year.
4. Students must complete 4 units in the Honors Colloquia (described below), beginning Spring Quarter of their junior year and continuing the following three regular quarters. Each quarter’s colloquium is offered for 1 unit, S/NC. In extenuating circumstances (overseas study, for example), an honors program student may substitute other equivalent work for one quarter of the colloquium, with the approval of the honors adviser.
5. GPA in courses counting towards the major must be 3.5 by the time of graduation.
6. By the end of the seventh week of the quarter in which they plan to graduate, all students in the honors program must submit an honors thesis (described below), to be read and evaluated by their thesis committee.
7. On the basis of a student’s work in the Drama core, in the area of specialization, on the senior project, in the honors colloquia, and on the honors thesis, the faculty determines and confers honors on graduating students who have successfully completed the honors program.
8. Failure to meet any of these requirements, or to make satisfactory progress on the honors thesis, leads to dismissal from the honors program.

HONORS COLLOQUIA AND THESIS

The honors colloquia aim to engage honors program students in an ongoing discussion of important issues in the field, with particular focus on the students’ areas of specialization and research. The honors program adviser convenes the colloquia three times per quarter and set the agenda for meetings and discussion. The colloquia offer venues for honors students to discuss their work in the department (their senior projects, for example), and to present and discuss their research for their honors thesis. The honors thesis represents an extended engagement with an important issue or subject, determined by the student, the honors program adviser, and the student’s senior project adviser. It typically consists of a long essay (7,500-10,000 words) presenting the student’s research on the subject. As an honors thesis may deal with issues related to the student’s senior project, or with issues related to the student’s specialization, the honors program adviser, the senior project adviser, and another faculty member constitute the student’s honors thesis committee. They read and evaluate the thesis, and make recommendations to the faculty at large regarding its strengths and weaknesses. In the case of an honors program student whose senior project does not involve production or performance but takes written form, the requirements for the honors thesis change. In discussions with the student’s honors committee, the student develops a performance/production-based project that provides the equivalent of a written honors thesis.

HUMANITIES

An honors program in Humanities is available for Drama majors who wish to supplement their major with related and carefully guided studies. See the “Interdisciplinary Studies in Humanities” section of this bulletin for a description of the honors program. Students who enroll in this program may offer HUMNTIES 160 and two seminars from 190-198 in fulfillment of the departmental elective requirement.

GRADUATE PROGRAMS

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of the bulletin.

All graduate study in the Department of Drama leads to the Ph.D. degree. The doctoral program in Drama aims to integrate practical theater work with the critical and historical study of dramatic literature and theory. All candidates are expected to function both as scholars and as theater directors. The curriculum offers a two-year practical concentration in directing along with the study of critical and performance theory, aesthetics, history, and literature. The goal of the program is to give students a thorough knowledge of the field that leads to original and significant scholarly work grounded in practice as well as an inventive directorial practice that is based on solid scholarly analysis.

The following department requirements are in addition to the University’s basic requirements for the doctorate.
UNITS AND COURSE REQUIREMENTS
1. A minimum of 135 units of graduate courses and seminars in support of the degree. These units are in addition to units for the doctoral dissertation.
2. The sequence in Performance and Critical Theory (DRAMA 300, 301, 302).
3. Six additional graduate seminars within the Department of Drama. These must include at least one seminar in each of the following fields: a) intersections of theory and performance (designated by suffix A in course number) b) theater history (designated by suffix B in course number) c) dramatic literature (designated by suffix C in course number)
4. The five workshops in directing: DRAMA 370, 371, 372, 373, 374. In the first two years, students take 370, Concepts of Directing; 372, Projects in Directing; 371, Visual Aesthetics for the Director; and 373, Directing and Dramaturgy. The Projects class consists of the conceptual development, design, and production of a short play in a multi-form space. In the second year, students take 374, Graduate Directors’ Performance Project, to stage a more fully developed production chosen in consultation with the faculty.

LANGUAGE REQUIREMENT
The candidate must demonstrate knowledge of one foreign language in which there is a major body of dramatic literature. The language requirement may be fulfilled in any of the following ways:
1. Achievement of a sufficiently high score (70th percentile) on the foreign language examination prepared by the Educational Testing Service (ETS). Latin and Greek are not tested by ETS.
2. A reading examination given each quarter by the various language departments, except for Latin and Greek.
3. Pass with a grade of ‘B’ or higher a course in literature numbered 100 or higher in a foreign language department at Stanford.
The language requirement must be met before the student can be advanced to candidacy.

TEACHING REQUIREMENT
Four quarters of supervised teaching at half time are a required part of the Ph.D. program. The requirement is normally met by teaching three courses during the fourth year and one course during the fifth year.

EXAMINATIONS
Candidates must complete three examinations (one comprehensive and two qualifying) by the end of the first three years of study at Stanford.
The comprehensive examination is taken over a weekend in the Spring Quarter of the first year. The exam is based on texts given to the student by the department at the beginning of the first year. Students study these texts independently throughout the year. For the exam, they should be able to identify and compare plays and playwrights from the list of texts in terms of dramatic genres, styles, and periods, and to address comparatively and analytically critical issues of texts and performance.
The first qualifying exam, which must be completed before advancement to candidacy at the end of the second year, consists of three 15-25 page essays written in consultation with a faculty adviser, covering a specific period of dramatic literature and theater history. These essays should not duplicate any written work from seminars. One essay should deal with practical aspects of the period, for example, directing; one essay should focus on theater history of the period; and one essay should focus on dramatic criticism related to a specific text of the period. After approval by the adviser, the Graduate Studies Committee reads and evaluates these essays, one in each of Autumn, Winter, and Spring quarters.
The second qualifying examination is a departmental oral with three faculty members, at least two of whom should be from the Department of Drama. This oral covers a second period of dramatic literature and theater history. The format of this exam approximates that of the University oral.

APPLICATION FOR CANDIDACY
By the end of the second year of residence, the following requirements or appropriate equivalents must be completed:
1. Performance and Critical Theory sequence (DRAMA 300, 301, 302) and four seminars
2. The directing workshop series (DRAMA 370-374), including the successful production of two works in public performance
3. A foreign language
4. At least two examinations
Based on its evaluation of the student’s progress, the Graduate Studies Committee certifies the student’s qualifications for candidacy. Upon favorable action, the student files a formal application for candidacy, as prescribed by the University, by the end of Summer Quarter of the second year.

RESEARCH ASSISTANTSHIP
Generally, the third year is devoted to graduate study and research assistantships with faculty members.

DISSERTATION PROSPECTUS
The dissertation prospectus must be approved by the candidate’s adviser and by the departmental Graduate Studies Committee by the end of Spring Quarter of the third year.

UNIVERSITY ORAL EXAMINATION
The University oral examination, to be taken during the fourth year, is to demonstrate the candidate’s ability to conduct significant research in the general area of the dissertation. The examining committee consists of four faculty members, at least two of whom must be from the Department of Drama, as well as one faculty chair from outside the department. The University oral covers the area of the dissertation and is based on the prospectus and bibliography of the candidate.

DISSERTATION
Normally, the Ph.D. program is completed in five years. The first two years should be devoted to full-time graduate study, and the third, fourth, and fifth years to research, teaching, and writing the dissertation. Following formal admission to candidacy (typically at the end of the second year), the dissertation must be completed and approved within five years from the quarter in which candidacy is granted. A candidate taking more than five years is required to reinstate candidacy by repassing the written examinations on dramatic literature.

APPLICATION AND FELLOWSHIPS
Applicants for the Ph.D. program may write directly to the Department of Drama for information and to Graduate Admissions, Registrar’s Office, Old Union, 520 Lasuen Mall, Stanford, CA 94305-3005, for an application. Online graduate applications are available by following the links at http://gradadmissions.stanford.edu/. In addition to the required
The Committee on Black Performing Arts (CBPA) is an interdisciplinary program supporting the presence of Black art forms at Stanford. Started as a student project in 1968, the committee became an official University program in 1972, and a division under the Department of Drama in 1997.

The CBPA functions as: (1) a liaison with departments in hiring faculty and developing courses in Black performing arts; (2) a presenter of performances, master classes, and symposia with arts professionals in dance, drama, music, and film, framed by related academic study in anthropology, dance, drama, history, philosophy, and sociology; (3) a producer of student productions; and (4) a resource for student organizations promoting artistic expression in the Black cultural tradition. While the offerings do not constitute an academic minor, students are able to concentrate studies in Black performing arts as part of the B.A. major in African and African American Studies or Drama.

The CBPA publishes a journal, the Black Arts Quarterly (BAQ), twice a year. BAQ provides an outlet for reflective explorations on performativity by or about Black artists from Africa and the Black diaspora. It is an international forum for artists, students, academics, and activists to showcase their original works of art, criticism, and commentary that addresses the material impact of Black representation in the arts, literature, media, and popular culture.

The CBPA has developed a strong relationship with the city of East Palo Alto through artist residencies in the community and its collaboration with the city on “Dreams of a City: The East Palo Alto Project.” The project produced two commissioned plays and a video documentary, which was a finalist at Sundance, based on oral histories of city residents. An accompanying archive housed at the CBPA further documents community history. The CBPA’s community programming continues with Resident Dialogues, funded by the Ford Foundation, which brings artists to campus to work with students in conversation with community members, and to create performance works shown on campus and in community settings. The 2003-04 Resident Dialogues artist was choreographer and Stanford alumna ’(91) Aleta Hayes. In 2004-05, the CBPA hosts Sekou Sundiata, a poet and theater artist, who also works on campus with the Institute for Diversity in the Arts.
INTRODUCTORY

DRAMA 3. Production Processes—Workshop, introducing the production process and preparation for creating a show. The role of the producer, from the hiring of the staff to the scheduling of a production, and that of the technical director.
1-2 units (Duxbury) not given 2004-05

DRAMA 12N. Antigone: From Ancient Democracy to Contemporary Dissent—Stanford Introductory Seminar. Preference to freshmen. The tensions inherent in the democracy of ancient Athens; how the character of Antigone emerges in later drama, film, and political thought as a figure of resistance to illegitimate authority; and her relevance to contemporary struggles for women’s and workers’ rights, and national liberation. Readings and screenings include versions of Antigone by Anouilh, Brecht, Fugard, Kani, Ntshona, Paulin, Glowacki, Gurney, and von Trotta. GER:3a,4c
4 units, Aut (Rehm)

3 units, Win (Moraaga)

DRAMA 18N. American Performance Traditions—Stanford Introductory Seminar. Preference to freshmen. Hybrid traditions behind American performance. Materials drawn from the performing arts and sociocultural performances. Topics include blackface minstrelsy, melodrama, and vaudeville; the acting tradition known as the method; and multiethnic performances surrounding the 1992 L.A. riots. GER:3a
4 units, Aut (Fordyce)

DRAMA 20. Introduction to Acting—Theater games and physical exercises in concentration, attention, playing an objective, voice, movement, stage terminology, characterization, performing a monologue, and rehearsal techniques. Provides an experiential overview of actor training and prepares actors for advanced courses. Limited enrollment.
2 units, Aut, Win, Spr (Staff)

DRAMA 22. Scene Work—For actors who complete substantial scene work with graduate directors in the graduate workshop.
1-2 units, Aut, Win, Spr (Staff)

DRAMA 25. Shakespearean Skills—Scansion, stage combat, period movement, vocal production, and other skills for the Shakespearean actor.
1-2 units, Aut, Win, Spr (Kostopoulos)

DRAMA 28. Make-up for the Stage—The basic techniques of make-up application for the artist and/or actor: aging, prosthetics, stylization, characterization, animals, and fantasy make-up.
2 units, Aut (Strayer)

DRAMA 29. Theater Performance: Acting—Students cast in department productions receive credit for their participation as actors: 1-2 units for graduate directing workshop projects and 1-3 units for major productions (units determined by instructor). May be repeated. Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

DRAMA 30. Introduction to Theatrical Design—Lecture/lab. The basic skills of visual communication used in stage productions. Design and construction methods for stage scenery, costumes, and lighting.
4 units, Win (Flato)

DRAMA 31. Introduction to Lighting and Production—The technical and aesthetic aspects of lighting and the production process.
4 units, Aut (Ramsaur)

DRAMA 32. Textiles—Introduction to fabric techniques and processes for stage costumes.
2-3 units (Strayer) not given 2004-05

DRAMA 34. Stage Management Techniques—The production process and the duties and responsibilities of a stage manager. Skills needed to stage manage a production.
2-3 units, Aut, Win (Duxbury)

DRAMA 35. Introduction to Sound for the Theater—Lecture/lab. The practical handling of sound equipment, acoustics, and editing. Analysis, creation, and implementation of theatrical sound effects, live and recorded.
3-4 units, Aut (Duxbury)

DRAMA 36A.B. Scene Shop Techniques—Lecture/lab. Practical handling of shop equipment used in theatrical production. Prerequisite for 36B: 36A or consent of instructor.
1-2 units, A: Aut; B: Win (Duxbury)

DRAMA 36C. Scene Shop Techniques: Introduction to Furniture Making—Lecture/lab. Practical handling of shop equipment used in theatrical production.
1-2 units, Spr (Duxbury)

DRAMA 39A.B.C.D. Theater Performance: Crew—Participation in the design and technical areas of department productions. Students commit to a specific show and receive credit for preparation and construction as a member of a running crew in a specific area.

DRAMA 39A. Theater Performance: Scenery and/or Property
DRAMA 39B. Theater Performance: Lighting/Sound
DRAMA 39C. Theater Performance: Costumes/Makeup
DRAMA 39D. Theater Performance: Prosser Stage Management
1-3 units, Aut, Win, Spr (Staff)

DRAMA 42. Costume Construction—Lecture/lab. The basic skills of constructing costumes for the stage.
2-3 units, Win (Strayer)

DRAMA 53. Greek Tragedy—(Enroll in CLASSGEN 12.)
3-5 units, Aut (McCall)

INTERMEDIATE

Primarily for the major, but open to all undergraduates who have the necessary prerequisites.

DRAMA 103. Improvising—The improvisational theater techniques that teach spontaneity, cooperation, team building, and rapid problem solving, emphasizing common sense, attention to reality, and helping your partner. Based on TheatreSports™ by Keith Johnstone. Required readings, written papers, and attendance at performances of improvisational theater. Limited enrollment.
3 units, Win, Spr (Ryan)

DRAMA 110. Cartographies of Race: The Institute for Diversity in the Arts at Stanford—Students work with one of four visiting California artists on artistic projects concerning diversity, culture, and race. Workshops include service learning within a community population to probe diversity and social change through the arts. GER:3a
5 units, Win (Elam)

DRAMA 111. Artists in Communities—Seminar. Themes, issues, and experiential research in the work that artists and arts organizations do to contribute to community transformations. Prerequisite: 110.
2 units, Spr (Elam)

DRAMA 120A.B. Acting: The Fundamentals—Two quarter sequence. For students who intend to begin serious actor training. First quarter: understanding and using the vocabulary of objective and action. Theater games and improvisation develop the ability to act with focus, intention, and energy. The basics of characterization and transformation. Second quarter: the actor’s spontaneity and imagination are used to reveal the life
of a play (working with dramatic texts). Approaches to the actor’s craft include character biography and moment-to-moment truthful playing. Exercises include Strasberg, Meisner, Chaikin, and Linklater. Scene and monologue work primarily from naturalistic plays. Outside rehearsal time required.

3 units, A: Aut, Win (Freed), B: Win, Spr (Freed)

DRAMA 121C. Acting: The Craft of Comedy—The basics of comedy playing, from its origins in the utterly truthful to its destination in the over-the-top. Characterization, mask, and exaggeration; class work on non-verbal scenes. The actor’s understanding of the mechanics of comedy, timing, and clowning are developed through improvisation and in-class exercises designed to free the imagination. Texts may include scenes from Feydeau, Woody Allen, Moss Hart, and Alan Ayckbourne.

4 units, Aut (Freed)

DRAMA 121P. Acting: Period and Style—Opportunity to expand acting range through an exploration of heightened language. Scenes from non-contemporary dramatic literature including texts from Shakespeare, Shaw, Turgenev, Ibsen, and Strindberg.

4 units (Freed) alternate years, given 2005-06

DRAMA 121R. Acting American Realism—Skills appropriate to the work of major American playwrights including Williams, Miller, and Mamet.

4 units (Freed) alternate years, not given 2005-06

DRAMA 121V. Vocal Production and Audition—Vocal mechanism with development of voice and articulation for the stage. Phonetics, verbal action, and text analysis applied to the actor’s process in preparation for audition. Emphasis is on relaxation, selection of appropriate material, and versatility to show contrast and range.

4 units (Kostopoulos) alternate years, given 2005-06

DRAMA 121W. Actors Who Write/ Writers Who Act—The development of dramatic scripts for solo performance and multi-character plays. Work happens on its feet, with writing deadlines and an informal workshop environment in which students present scripts, with support and feedback in dramaturgy, and help with performance and staging issues.

4 units, Spr (Freed)

DRAMA 122C. Contemporary Scene Study—Acting approach to contemporary plays.

4 units (Kostopoulos) alternate years, given 2005-06

DRAMA 131. Lighting Design—Lecture/lab. Practical and aesthetic aspects of lighting: electricity, light sources, color instrumentation, control, drafting, plotting, and the aesthetic principles of lighting design, interpretation, and concept. Prerequisites: 30, 31, or consent of instructor.

4 units, Win (Ramsaur)

DRAMA 132. Costume Design—A visual analysis of the historical styles of costume design, interpreted for the modern theater and developed by the student in various presentational media. Prerequisite: 30 or consent of instructor.

4 units, Spr (Strayer)

DRAMA 133. Stage Scenery Design—Creations of increasing complexity involve text analysis, historical and artistic style, visual research, spatial organization, drafting, sketching, model building, and director-designer collaboration. Prerequisite: 30, or consent of instructor.

4 units, Spr (Flato)

DRAMA 134. Stage Management Project—For students stage managing a Department of Drama production.

2-9 units, Aut, Win, Spr (Duxbury)

DRAMA 135. Sound Design—All aspects of sound for the theater from equipment, acoustics, and editing to the creation of theatrical sound effects, live and recorded.

4 units, Win (Duxbury)

DRAMA 140. Projects in Theatrical Production—(Graduate students register for 240.) Assistant directing; stage, costume, lighting, and sound design; technical production, stage managing, or other work in connection with Department of Drama productions. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Staff)

DRAMA 157J. Black Social Dance Performance Workshop—(Graduate students register for 257J.) Techniques in dance, drama, and music within the social context and cultural practices of African Americans. Course culminates in an original theatrical presentation.

4 units, Aut (Hayes)

DRAMA 159. Shakespeare—(Enroll in ENGLISH 163.)

5 units, Aut (Friedlander), Win (Orgel)

DRAMA 159F. Shakespearean Dilemmas: Moral Choice in Classical and Renaissance Drama—(Enroll in ENGLISH 105D.)

5 units, Win (Friedlander)

DRAMA 159R. Sex and Violence in Elizabethan Drama—(Enroll in ENGLISH 113.)

5 units, Win (Riggs)

DRAMA 161. Performance and Politics—(Graduate students register for 261.) Greek tragedy and modern variants on the theme of art and politics. Readings from plays by Euripides, Sophocles, Lope de Vega, Calderón, Shakespeare, Buechner, O’Casey, Brecht, Duerrenmatt, Beckett, Gogol, Kaiser, Arden, Smith, Weiss, Genet, Oedets, Stoppard, Handke, Fugard, and Friel. GER:3a,WIM

5 units, Aut (Rehm)

DRAMA 162. Performance and the Text—(Graduate students register for 262.) Formal elements in Greek, Elizabethan, Noh, Restoration, romantic, realistic, and contemporary world drama; how they intersect with the history of performance styles, character, and notions of action. Emphasis is on how performance and media intervene to reproduce, historicize, or criticize the history of drama. GER:3a,WIM

5 units, Spr (Rayner)

DRAMA 163. Performance and America—(Graduate students register for 263.) Dramas by women, men, Asian Americans, Latino Americans, and African Americans are examined with regard to the role of dramatic performance within contemporary American society, and as an affective and effective arena for inducing social change. GER:3a,4b,WIM

5 units (Elam) not given 2004-05

DRAMA 164. Performance and Gender—(Graduate students register for 264.) The intersectionality of race, sex, gender, and class in the formation of gendered performance. Readings from the work of Judith Butler, Eve Sedgwick, David Savran, Judith Halberstam, and David Eng. Case studies include: M. Butterfly, The Crying Game, Paris is Burning, Angels in America, and American Idol. GER:3a,WIM

5 units (Phelan) not given 2004-05

DRAMA 165. Theater History: Classical to 1750—(Graduate students register for 265.) Erotic drama. Performance and sexuality as part of the cultural and material context of the theater. GER:3a

4 units, Aut (Romack)

DRAMA 166. Theater History: 1750-1970—(Graduate students register for 266.) Erotic drama. Performance and sexuality as part of the cultural and material context of the theater. GER:3a

4 units, Win (Lyons)

DRAMA 170A. Introduction to Directing—Traditions of psychological and political realism from Stanislavsky to Brecht. Practices of stage composition, work with the actor, approaches to character, and techniques of storytelling. Prerequisite: consent of instructor.

4 units, Aut (Fordyce)
DRAMA 170B. Advanced Directing—Reinterpreting classics from Shakespeare on. Non-psychological and non-representational theater practices in Meyerhold, Stein, and Artaud. Devised theater and non-text based directing. Prerequisite: 170A or consent of instructor. GER:3a 4 units, Win (Fordyce)

DRAMA 171. Undergraduate Theater Workshop—Undergraduate directors present one act plays in workshop performances. Credit available for actors and directors. Prerequisite: 170A/170B or consent of instructor. 1-4 units, Spr (Booker, Duxbury)

DRAMA 172. Late Postmodern Experimental Theater—(Graduate students register for 272.) History and theory behind artists such as Richard Foreman, Robert Wilson, The Wooster Group, Forced Entertainment, Goat Island, and Societas Raffaello Sanzio. Assignments include critical writing, creative writing, and mise-en-scène. GER:3a 4-5 units, Win (Fordyce)

DRAMA 176. Dramaturgy Project—(Graduate students register for 276.) Serve as a dramaturg on any department production. Research the production’s text source, the writing of program notes, the compilation and editing of the playbook, and possible adapting/editing of the performance text or translating text from a foreign language. 2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 177. Playwriting—(Graduate students register for 277.) The autobiographical monologic/poetic possibilities in performance art are explored to learn the elements of playwriting. GER:3a 5 units, Win (Moraga)

DRAMA 178. Intensive Playwriting—(Graduate students register for 278.) Goal is to develop new material for the stage or complete a play-in-progress. Focus is on the most essential elements of playwriting, emphasizing the process of revision, and culminating in public readings of highlights of plays-in-progress. Prerequisite: prior experience in playwriting or consent of instructor. GER:3a 5 units (Moraga) alternate years, given 2005-06

DRAMA 179A. Teatro America Workshop: The Theater of Native/Chicano America—A Chicana feminist and indigenist approach to the study of the theory and practice of performance, as well as an introduction to writing for the stage. Readings include plays, stories, and performance texts by Chicano/a and Native American writers. Culminates in a public performance. Prerequisite: consent of instructor. GER:3a 5 units, Spr (Moraga)

DRAMA 180Q. Noam Chomsky: The Drama of Resistance—Stanford Introductory Seminar. Preference to sophomores. The ideas and work of Noam Chomsky who challenged the political and economic paradigms governing the U.S. over the last 30 years. Chomsky’s model for linguistics; his work in the U.S., S.E. Asia, the Middle East, Central America, and E. Timor; the media, terrorism, ideology and culture; student and popular movements; and the role of resistance. GER:3a 3 units, Aut (Rehm)

DRAMA 189Q. Mapping and Wrapping the Body—Stanford Introductory Seminar. Preference to sophomores. Investigation into the concepts behind gender boundaries and clothing systems. Prerequisite: consent of instructor. GER:3a 3 units, Aut (Eddelman)

DRAMA 190. Special Research—Individual project on the work of a playwright, period, or genre. Prerequisite: consent of instructor. 1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 191. Independent Study—Individual supervision of off-campus internship. Prerequisite: consent of instructor. 1-18 units, Aut, Win, Spr, Sum (Staff)

ADVANCED COURSES

Courses numbered 200 through 299 are designed for advanced undergraduates and graduates.

DRAMA 200. Senior Project—See “Undergraduate Programs” for description. 1-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 201A,B,C,D. Honors Colloquium—See “Undergraduate Programs” for description. 1 unit, Aut, Win, Spr, Sum (Fordyce)

DRAMA 202. Honors Thesis—See “Undergraduate Programs” for description. 2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 210A,B. Actor in Performance—Preference to Drama majors and minors and to the serious student interested in further training in the performing arts. Taught in the professional conservatory tradition, with the creation of an acting ensemble. Skill building in the areas of acting, movement, voice, and speech. How to analyze and play the dramatic action of the text. Guest teachers from the professional theater complement and expand the work of the ensemble. Limited enrollment. Prerequisite: interview with instructor. 4-5 units; A: Aut; B: Win (Kostopoulos)

DRAMA 210C. Actor in Performance: Ensemble Workshop 4-5 units, Spr (Kostopoulos)

DRAMA 213. Stanford Improv Ensemble—By audition only, for members of the improvisation troupe. Special project work. Prerequisite: 103. (AU) 1-2 units, Win, Spr (Ryan)

DRAMA 231. Advanced Stage Lighting Design—Individually structured class in lighting mechanics and design through experimentation, discussions, and written reports. Prerequisite: 131 or consent of instructor. 1-5 units, Aut, Win, Spr, Sum (Ramsaur)

DRAMA 232. Advanced Costume Design—Individually structured tutorial for costume designers. Prerequisite: 132 or consent of instructor. 1-5 units, Aut, Win, Spr, Sum (Strayer)

DRAMA 233. Advanced Scene Design—Fast-paced, individually structured workshop. Prerequisite: 133 or consent of instructor. 1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 234. Advanced Stage Management Project—For students stage managing a Department of Drama production. Prerequisite: 134. 2-9 units, Aut, Win, Spr, Sum (Duxbury)

DRAMA 235. Advanced Sound Design—Individually structured tutorial for sound designers. Prerequisite: 135 or consent of instructor. 1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 240. Projects in Theatrical Production—(Same as 140; see 140.) 1-5 units, Aut, Win, Spr (Staff)

DRAMA 242. The Work of Art and the Creation of Mind—(Enroll in EDUC 200.) 4 units, Win (Staff)

DRAMA 257J. Black Social Dance Performance Workshop—(same as 157J; see 157J.) 4 units, Aut (Hayes)

DRAMA 261. Performance and Politics—(Same as 161; see 161.) 5 units, Aut (Rehm)

DRAMA 262. Performance and the Text—(Same as 162; see 162.) 5 units, Spr (Rayner)

DRAMA 263. Performance and America—(Same as 163; see 163.) 5 units (Elam) not given 2004-05
DRAMA 264. Performance and Gender—(Same as 164; see 164.)
5 units (Phelan) not given 2004-05

DRAMA 265. Theater History: Classical to 1750—(Same as 165; see 165.)
4 units, Aut (Romack)

DRAMA 266. Theater History: 1750-1970—(Same as 166; see 166.)
4 units, Win (Lyons)

DRAMA 272. Late Postmodern Experimental Theater—(Same as 172; see 172.)
4-5 units, Win (Fordyce)

DRAMA 276. Dramaturgy Project—(Same as 176; see 176.)
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 277. Playwriting—(Same as 177; see 177.)
5 units, Win (Moraga)

DRAMA 278. Intensive Playwriting—(Same as 178; see 178.)
5 units (Moraga) alternate years, given 2005-06

DRAMA 290. Special Research—Individual project on the work of a playwright, period, or genre.
1-5 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

Open to advanced undergraduates with consent of instructor.

5 units, Aut (Rayner)

5 units, Spr (Apostolidès)

DRAMA 302. Research Methods in Drama—Projects involving the examination of live performance, play texts, and theories of drama. The principles of argument. Goal is a foundation for course work and writing the dissertation.
5 units, Aut (Elam)

3-5 units, Win (Romack)

DRAMA 320. Basic Approaches to Teaching Acting—Workshop on the pedagogy of acting to prepare graduate student teachers for introductory classes in acting.
1-3 units, Aut (Kostopoupolous)

DRAMA 321. Pro Seminar—Workshop on the skills needed to participate in the academic profession from abstract through conference presentation to dissertation or book chapter.
1-3 units (Phelan) alternate years, given 2005-06

3-5 units, Aut (Moraga)

DRAMA 356A. Postwar Dance: 1945-1965—Cultural and aesthetic histories of the body in postwar American, German, Japanese, and Israeli dance and performance. Crossreadings of the dancing body against issues of participatory theater, beat and hippie culture, task performance, social protests, military occupation, and erasure.
3-5 units, Spr (Ross)

DRAMA 370-374. Graduate Directing Workshop—Core curriculum for graduate students in directing. Prerequisite: consent of instructor.

DRAMA 370. Concepts of Directing—The basic directorial definitions of time, space, movement, and the performer/spectator relationship. Experimentation with texts chosen from literary and other sources, including works from the realistic tradition in drama, using a multi-form performance space.
5 units, Aut (Waters)

3 units, Win (Eddelman)

5 units, Win (Ramsaur, Weber)

DRAMA 373. Directing and Dramaturgy—Discussion/application of dramaturgy, directorial methods, and visual concepts in the production of plays from the Elizabethan tradition to postmodernist texts. Work on the text is tested in the staging of scenes.
3-5 units, Win (Weber)

DRAMA 374. Graduate Directors’ Performance Project—Production of a full-length play, selected in consultation with faculty. Project is designed by graduate students, sometimes in collaboration with undergraduate design students, under the supervision of design faculty. Four to five weeks rehearsal. Public performance.
3-5 units, Aut, Win, Spr, Sum (Ramsaur, Staff)

DRAMA 375. Graduate Directors’ Dramaturgy Project—Serve as a dramaturg on any department production. Work includes research on the production’s text source, the writing of program notes, and the compilation and editing of the playbill. Possible adapting/editing of the performance text, and translating text from a foreign language.
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 376. Graduate Directors’ Preliminary Dramaturgy Project—For graduate directors planning a show for the following year’s season. Work includes textual analysis and interpretation preliminary to arriving at a production concept.
2-5 units (Phelan) alternate years, given 2005-06

DRAMA 377. Graduate Directors’ Staged Reading Project—Presentation of a new or newly adapted work for the stage, in a mode employed in professional theater for the development of new plays. Two to four rehearsals. Public performance.
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 390. Tutorial
1-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 399. Dissertation Research
1-9 units, Aut, Win, Spr, Sum (Staff)
BLACK PERFORMING ARTS DIVISION

Students should consult the quarterly Time Schedule for offerings.

DANCE DIVISION

Registration for most dance classes takes place at the first class meeting; further registration information is printed in the Time Schedule each quarter. Some class sizes are limited and require advanced registration in the Dance office in Roble Gym. Series classes (I, II, III) should be taken in order or with consent of instructor.

INTRODUCTORY

Open to all students. No previous dance experience needed.

DANCE 40. Modern Dance I—The technical and creative principles of modern dance to develop the body as a creative instrument.
  2 units, Aut (Urbani), Win, Spr (Cashion)

DANCE 42. Dances of Latin America—Dances of Argentina, Brazil, Chile, Colombia, Cuba, Mexico, Peru, and Puerto Rico.
  2 units, Win (Cashion)

DANCE 43. Afro-Brazilian and Afro-Peruvian Dance—Brazilian dance forms of the Northeast: samba, coco, maculele, bloco afro. Peruvian dance of the coastal region: festoejo and zamacueca.
  2 units, Win (Cashion)

DANCE 44. Jazz Dance I—Basic techniques emphasizing current styles.
  2 units, Aut, Win, Spr (Kramer)

DANCE 45. Improvisation Plus Contact—The development of improvisational skills as a creative performance practice and as a basis for choreography; techniques of contact improvisation.
  2 units, Aut, Win (Kramer), Spr (Urbani)

DANCE 46. Social Dances of North America I—Introduction to the partner dances found in American popular culture: waltz, swing, tango, club two step, cha cha, merengue, and salsa. Fee. (AU)
  1 unit, Aut, Win, Spr (Powers)

DANCE 47. Social Dances of North America II—Basic techniques emphasizing current styles. Historical jazz steps enhance understanding of contemporary jazz forms.
  2 units, Aut, Win, Spr (Kramer)

  2 units, Aut (Elliott), Win (Brown)

DANCE 51. West African Dance: Ghana—Traditional choreographer dances, drumming, and songs.
  1 unit, Aut (Quarshie)

DANCE 58. Beginning Hip Hop—Steps and styling in one of America’s 21st-century vernacular dance forms.
  1 unit, Win (Reddick)

  1 unit, Win (Reddick)

INTERMEDIATE

Open to all undergraduates with dance experience.

DANCE 140. Modern Dance II—Intermediate technique. Improvisation and composition in directed studies.
  2 units, Aut, Spr (Kramer), Win (Frank)

DANCE 144. Jazz Dance II—Intermediate level. Alignment, control, rhythmic coordination, and movement combinations.
  2 units, Aut, Spr (Mosely)

DANCE 146. Social Dances of North America II—Lindy hop, Viennese waltz, cross-step waltz, foxtrot, and hustle.
  2 units, Aut, Spr (Powers)

DANCE 147. Living Traditions of Swing—Swing dancing: the early Lindy of the 20s; 6- and 8-count Lindy hop, shag, Big Apple. Partnering and improvisation. Swing’s crosscultural influences and creativity.
  2 units, Win (Powers)

DANCE 148. Intermediate Ballet—Continuation of 48, repeating the fundamentals with increased complexity and introducing additional movement vocabulary.
  2 units, Aut, Spr (Brown)

ADVANCED

Open to all undergraduates with dance experience.

  2 units, Win, Spr (Frank, Staff)

DANCE 145. Jazz Dance III—Advanced level of technical proficiency. Focus is on performance skills of projection and movement quality. Prerequisite: consent of instructor.
  2 units, Aut, Spr (Mosely)

DANCE 149. Advanced Ballet—A professional-level class in a supportive environment. Classes are comprehensive of classical ballet technique including pointe work if the student desires. Opportunity to perform classical repertoire.
  2 units, Aut, Win, Spr (Elliott)

DANCE 156. Social Dances of North America III—Advanced survey of the partner dances found in American popular culture: hustle, waltz, redowa, tango, cha cha, salsa, samba. Prerequisite: 146 or equivalent experience.
  2 units, Win (Powers)

PERFORMANCE

DANCE 23. Public Performance—For students participating in movement oriented performance. (AU)
  1 unit, Aut, Win, Spr (Kramer)

DANCE 27. Faculty Choreography—Rehearsal and performance of faculty choreography. Selection by audition.
  2 units, Aut, Win, Spr (Staff)

DANCE 57. Guest Artist
  2 units (Staff) not given 2004-05

DANCE 100. Performance Workshop—Dance material of Latin America, including folk and carnival, is arranged for performance with performing experiences off and on the Stanford campus. Prerequisite: experience in Latin American dance, or consent of instructor.
  2 units, Win, Spr (Frank, Kramer)

DANCE 105. Grupo Folklorico Los Decanos—Dance material of Latin America such as folk and carnival, arranged for performance off and on the Stanford campus. Prerequisite: experience in Latin American forms, or consent of instructor.
  1 unit, Win, Spr (Cashion)

THEORY

Classroom or classroom/studio combination courses on topics in Dance and Performance.

DANCE 133. History of the Waltz—From Vienna in 1800. Redowa and mazurka, waltz variations, the 20th-century hesitation waltz, Parisian valse musette, and 30s Boston and waltz swing. Studio technique with attention to performance practice for stage.
  2 units, Aut (Powers)

DANCE 158. The Body in Motion—Approaches and methods in body therapy: body maintenance and conditioning, the Laban movement system, body-mind centering. GER:3a
  3 units (Shapiro) not given 2004-05

DANCE 160. Dance, Gender, and History—19th- and 20th-century ballet and modern dance history through changing ideologies of the body and gender. Romantic, classical, and neoclassical ballet and modern dance history in the context of aesthetic, cultural, and political change. GER:3a,4c
  4 units, Win (Ross)
DANCE 161. Postmodern Dance—History and development of postmodern dance and performance art. Topics include Dandyism, Bauhaus experiments, Black Mountain College, Judson Church, contact improvisation, the culture wars, and performance and illness. GER:3a,4c
4 units, Win (Ross)

DANCE 166. History of Social Dance in Western Culture—Movement and historic social dance from the past five centuries, including studio technique and history. Performance practices for stage, including deportment, body language, and demeanor distinctive to each era. GER:3a
2 units, Spr (Powers)

DANCE 168. Dance and Culture in Latin America—Dance forms of Latin America as aspects of human behavior. Emphasis is on cultural influences (European, African, and indigenous) that have shaped the ritual and social dance forms of Argentina, Brazil, Chile, Cuba, Mexico, and Puerto Rico. GER:3a,4a
4 units, Spr (Cashion)

DANCE 169. Choreography: Creation, Staging, and Reconstruction—Skills and criteria for the choreographic process. Invention, staging, and reconstruction. The creative process and practical considerations in making a dance work.
3 units, Aut (Frank, Urban)

DANCE 190. Special Research—Topics related to the discipline of dance.
1-5 units, Aut, Win, Spr, Sum (Staff)

DANCE 191. Independent Research—Individual supervision of off-campus internship. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

DANCE 197. Art and Community: Dance in Prisons—Participatory seminar. The nexus of art, community, and social action, using dance to study how the performing arts affect self-construction, perception and experiences of embodiment, and social control for incarcerated teenagers in Santa Clara Juvenile Hall. GER:3a
4 units, Win (Ross)

DANCE 199. Advanced Research—Individual project on the work of any choreographer, period, genre, or dance-related topic.
1-18 units, Aut, Win, Spr, Sum (Staff)

5-5 units, Spr (Ross)

OVERSEAS STUDIES

Courses approved for the Drama major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

DRAMA 101A. Contemporary Theater—(Same as GERLIT 195.)
5 units, Aut (Kramer)

DRAMA 158M. German Film and the Berlin Film Festival
4 units, Win (Rehm)

DRAMA 158W. Opera in Berlin
4 units, Win (Rehm)

EAST ASIAN STUDIES

Director: Jean C. Oi

Affiliated Faculty and Staff:

Art and Art History: Michael Sullivan (emeritus), Melinda Takeuchi, Richard Vinograd

Asian Languages: Fumiko Arao, Kazuko M. Busbin, Steven Carter, Chengzhi Chu, Marina Chung, Richard Dashner, Albert E. Dienes (emeritus), Hee-sun Kim, Mark Lewis, Wan Liu, Hisayo O. Lipton, Momoyo Kubo Lowdermilk, William A. Lyell (emeritus), Yoshiko Matsumoto, Susan Matisoff (emerita), James Reichert, Yu-ihwa Liao Rozelle, Haun Saussy (on leave), Chaofen Sun, Melinda Takeuchi, Makoto Ueda (emeritus), Huazhi Wang, John C. Y. Wang, Hong Zeng, Qi Zhu

Business: Henri-Claude de Bettignies, Kenneth Singleton

Comparative Literature: David Palumbo-Liu

Cultural and Social Anthropology: Harumi Befu (emeritus), Miyako Inoue (on leave), Matthew Kohrman

Economics: Masahiko Aoki (emeritus), John J. Gurley (emeritus), Lawrence Lau (on leave)

Education: Thomas Rohlen (emeritus)

History: Beth Berry, Lucien Bianco, Gordon Chang, John DeBoer, Peter Duus (emeritus), Harold L. Kahn (emeritus), Mark Lewis, Mark Mancall, Chiho Sawada, Matthew Sommer, Lyman P. Van Slyke (emeritus), Karen Wigen

Linguistics: Peter Sells

Philosophy: David S. Nivison (emeritus)

Political Science: John W. Lewis (emeritus), Lyman Miller, Daniel Okimoto, Jean C. Oi, Kurt Steiner (emeritus), Robert E. Ward (emeritus)

Religious Studies: Carl Bielefeldt (on leave), Keila Diehl, Bernard Faure, Naoko Kumada, Fabrizio Pregadio, Noa Ronkin, Lee H. Yearley, Michael Zimmermann

Sociology: Gi-Wook Shin, Andrew Walder

Other Stanford faculty with teaching or research interests related to East Asia: Takeshi Amemiya (Economics), Barton Bernstein (History), Walter P. Falcon (Institute for International Studies), William B. Gould (Law), Thomas Metzger (Hoover Institution), David Montgomery (Business), Ramon Myers (Hoover Institution), Leonard Ortolano (Civil and Environmental Engineering), Mark Peattie (Hoover Institution), Pan A. Yotopoulos (emeritus)

Center Offices: Building 50, Main Quad
Mail Code: 94305-2034
Phone: (650) 723-3362, 723-3363; fax: (650) 725-3350
Web Site: http://www.stanford.edu/dept/CEAS/

The Center for East Asian Studies (CEAS) coordinates all University instructional, research, and special activities related to East Asia. Faculty and students who share a common interest in the study of East Asia are brought together by the center from a broad range of academic concerns covering nearly every discipline and historical period. As a National Resource Center designated by the Department of Education, Title VI, the center is also involved in programs that link the University’s resources on East Asia with civic groups, secondary schools, and local colleges in the San Francisco Bay Area. CEAS is also affiliated with the Asia/Pacific Research Center which focuses on interdisciplinary research projects on contemporary issues in Asia, and with the Center for Buddhist Studies.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major in East Asian Studies enables students to obtain a comprehensive understanding of East Asia broadly conceived, which is the vast area stretching from Japan through Korea and China to the contiguous areas of the Central Asian land mass. Majors in East Asian
Studies begin or continue the mastery of Chinese, Japanese, or Korean. Within the humanities or social sciences, they focus on a particular subregion, for example, Japan, South China, Hong Kong and Taiwan; or western China and Central Asia; or a substantive issue involving the region as a whole, such as environment, public health, rural development, historiography, cultural expression, Buddhism’s impact on East Asian cultures, or traditional Japanese civilization. The major seeks to reduce the complexity of a region to intellectually manageable proportions and illuminate the interrelationships among the various facets of a society.

Potential majors must submit a Student Proposal for a Major in East Asian Studies not later than the end of the first quarter of the junior year for approval by the East Asian Studies Subcommittee on the Bachelor of Arts program. Majors must complete at least 75 units of course work on China, Japan, and/or Korea. Courses to be credited toward major requirements must be completed with a grade of ‘C’ or better. Requirements are:

1. **Language:** proficiency in Chinese, Japanese, or Korean language at the second-year level or above, to be met either by course work or examination. Students who meet the requirement through examination are still expected to take an additional 15 units of language at a higher level, or literature courses taught in the language, or the first year in an additional Asian language. No more than 30 units of language courses are counted toward the major.

2. **Gateway Courses:** a minimum of three gateway courses, one in each area. The gateway courses are:
   - a) Art, Literature and Religion
   - ARTHIST 2. Asian Art and Culture
   - CHINGEN 91. Traditional East Asian Civilization: China
   - JAPANGEN 92. Traditional East Asian Civilization: Japan
   - b) History
   - HISTORY 92A. The Historical Roots of Modern East Asia
   - HISTORY 192B. China: Early Empires
   - c) Contemporary Social Sciences
   - ANTHSCI 11. Identities and Peoples of China
   - POLSCI I 148S: The U.S. and Asia During the Cold War
   - SOC 167A. Asia-Pacific Transformation

3. **Substantive Concentration:** additional courses on East Asia, one of which must be a seminar.

4. **Capstone Essay:** completion of a paper of approximately 7,500 words, written either in a directed reading course or for one of the courses in item 3 above, which should be built upon the student’s thematic interest. A 1-unit Spring Quarter course is required for all majors, in which they discuss and work through their capstone essays or senior honors theses.

5. At least one quarter overseas in the country of focus.

Majors are encouraged to distribute their course work among at least three disciplines and two subregions in Asia. (The subregions need not be traditionally defined. Examples include China, Japan, or Korea; or, in recognition of the new subregions which are emerging: South China, Hong Kong, and Taiwan; or Central Asia, Xinjiang, and Mongolia.) At least four courses must have a thematic coherence built around a topic such as:

- Buddhism’s impact on East Asian cultures
- Culture and society of modern Japan
- Economic development in South China NETS (Natural Economic Territories)
- Environmental issues of Asia
- Fine arts and literature in late imperial China
- Political economy of postwar Japan
- Social transformation of modern China
- Traditional Japanese civilization

An East Asian Studies course that satisfies the University Writing in the Major requirement (WIM) should be completed before beginning the senior essay. This year, CHINGEN 133, JAPANGEN 138, and POLISCI 148 satisfy the WIM requirement, as do Department of History courses marked as WIM in the “Interdepartmental Offering” section below.

The courses for the major must add up to at least 75 units and all must be taken for a letter grade.

**MINORS**

The goal of the minor in East Asian Studies is to provide the student with a broad background in East Asian culture as a whole, while allowing the student to focus on a geographical or temporal aspect of East Asia. The minor may be designed from the following, for a total of six courses. All courses should be taken for a letter grade.

1. Three gateway courses, one in each area (see above for listing of gateway courses).
2. One undergraduate seminar and two other courses from among those listed each quarter as approved for East Asian Studies majors, including literature courses but excluding language courses.

Applications for the minor are due no later than the second quarter of the junior year.

**HONORS PROGRAM**

Majors with a grade point average (GPA) of 3.25 or better in all courses related to East Asia may apply for the honors program no later than the final quarter of the junior year. Application entails submitting an honors prospectus to the student’s adviser for approval. Admission is granted by the subcommittee on the B.A. program, acting on the adviser’s recommendation.

Honors requirements are satisfactory completion of:

1. An honors thesis of high quality of ca. 10,000 words to be submitted in lieu of the senior capstone essay otherwise required for the major
2. 5 to 10 units of directed individual study in connection with the thesis project
3. One advanced level colloquium or seminar dealing with China, Japan, or Korea

**COTERMINAL BACHELOR’S AND MASTER’S PROGRAM**

The center admits a limited number of Stanford undergraduates to work for a coterminal M.A. degree in East Asian Studies. While the coterminal degree program permits admission to a graduate program as early as the eighth quarter and no later than the end of the eleventh quarter of undergraduate study at Stanford, the Center accepts M.A. applications only once a year. Therefore, applications must be submitted by January 11 of the junior year. Applicants are expected to meet the same general standards as those seeking admission to the M.A. program: they must submit a written statement of purpose; a Stanford transcript; three letters of recommendation, at least two of which should be from members of the department of concentration; and scores from the General Test of the Graduate Record Exam. In addition, applicants must provide a list of courses they intend to take to fulfill degree requirements. The decision on admission rests with the M.A. Admissions Committee of the Center for East Asian Studies. Students must meet all requirements for both B.A. and M.A. degrees. They must complete a total of 15 full-time quarters (or the equivalent), or three full quarters after completing 180 units for a total of 225 units.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

**EAST ASIAN STUDIES (PAYSON J. TREAT) THEME HOUSE**

EAST House, on campus at Governor’s Corner, is an undergraduate residence that houses 60 students and offers them a wide variety of opportunities to expand their knowledge, understanding, and appreciation of Asia. A member of the East Asian Studies faculty serves as resident fellow of EAST House. Assignment is made through the regular undergraduate housing draw.

**STANFORD IN BEIJING**

Stanford in Beijing allows Stanford undergraduates to live and study in an international dorm at Peking University, one of the most highly respected universities in China. Classes are taught in English by a Stanford faculty-in-residence and Peking University professors. Students are considered enrolled in Peking University and may participate in athletic
and musical activities on campus, including Chinese art and calligraphy, tai-chi, and wu shu. For more information, contact the Overseas Studies office at Sweet Hall, or see web at http://osp.stanford.edu/program/beijing/.

KYOTO CENTER FOR JAPANESE STUDIES

Students interested in the study of Japanese language, history, culture, and social organization can apply to the Kyoto Center for Japanese Studies, a September-to-April program managed by Stanford that includes students from eight other American universities. Every Spring Quarter, the Stanford Center in Technology and Innovation, also at the Kyoto Center, offers an academic quarter focused on Japanese organizations and the political economy of research, development, and production of high technology and advanced industries. An internship in a Japanese firm, laboratory, or agency follows the training program. For information about the Kyoto Center, contact the Overseas Studies office at Sweet Hall, telephone (650) 723-3558.

GRADUATE PROGRAMS

MAJOR OF ARTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The M.A. program in East Asian Studies is designed both for students who plan to complete a Ph.D., but who have not yet decided on the particular discipline in which they prefer to work, and for students who wish to gain a strong background in East Asian Studies in connection with a career in nonacademic fields such as business, law, education, journalism, or government service. However, career-oriented students should realize that a master’s degree in East Asian Studies alone may provide insufficient preparation for work in many professions, and they are advised to plan for additional professional training.

The master’s degree program allows a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. The director of the center assigns faculty advisers to all students. Members of the staff and faculty are available for academic and career planning. The M.A. program is normally completed in two academic years, but students can shorten this time by receiving credit for prior language work or by attending summer sessions. Students are urged to complete the degree requirements within one year if their background makes it possible.

Applicants must submit scores for the General Test of the Graduate Record Examination. Foreign applicants are also required to take the Test of English as a Foreign Language. Applications for admission and financial aid may be made on-line or obtained by writing to Graduate Admissions, Old Union, 520 Lasuen Mall, Stanford University, Stanford, California 94305-3005. The deadline for completed applications for admission and financial aid is January 11.

The basic requirements for the M.A. degree in East Asian Studies are as follows:

Language Requirement—Students must complete the equivalent of Stanford’s first three years of language training in either Chinese, Japanese, or Korean. Students entering the program without any language preparation should complete first- and second-year Chinese, Japanese, or Korean within the first year of residence at Stanford. This will necessitate completing a summer language program. Language courses taken at Stanford must be for letter grades.

In the language requirement may be satisfied in part or in full by placing into an appropriate Stanford language class through the language proficiency exam given by the Department of Asian Languages. Students who fulfill this minimum three-year language requirement before completing other requirements are encouraged to continue language study, or take courses in which Chinese or Japanese are used, for as long as they are in the program. Language courses beyond the third-year level may be applied to the Area Studies requirement discussed below.

Students in the M.A. program are eligible to apply for the Inter-University Language programs in Taipei, Beijing, and Yokohama. For further information, see the “Institute for International Studies” section of this bulletin. Work completed in one of these programs may be counted toward the M.A. degree’s language requirement.

Area Studies Requirement—Students must complete the 3-unit core course, EASTASN 330, and an additional nine courses numbered 100 or above related to East Asia. (Chinese and Japanese language courses numbered 100-199 are considered to be at the third-year level and do not count toward the courses required for the degree.) The nine courses must be 3 or more units, taken for a letter grade. At least 23 units must be designated primarily for graduate students (typically at the 200-300 levels).

An integral part of the program is training in research and a demonstration of research ability in a discipline. Three courses, one of which must be a seminar, colloquium, or advanced course in which a research paper on China, Korea, or Japan is written, must be within a single department. The six additional area courses may be taken in departments of the student’s choosing. Some theory-oriented or methodological courses may be used to meet part of these requirements provided they are demonstrably useful for understanding East Asian problems. Credit toward the Area Studies requirement is not given for courses taken before entering the M.A. program. Students in this program may, however, take courses for exchange credit at the University of California, Berkeley, with the approval of their adviser and the Office of the Registrar.

M.A. Thesis Requirement—A master’s thesis, representing a substantial piece of original research, should be filed with the center’s program office as part of the graduation requirements. With the adviser’s approval, the master’s thesis requirement may be satisfied by expanding a research paper written for an advanced course.

DUAL DEGREE PROGRAMS

EAST ASIAN STUDIES AND BUSINESS

This program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. It is designed to train students interested in a career in teaching, research, or the practice of law related to East Asian legal affairs. Students must apply separately to the East Asian Studies M.A. program and to Stanford Business School and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student’s background and level of training in Chinese, Japanese, or Korean.

EAST ASIAN STUDIES AND EDUCATION

This program grants an M.A. degree in East Asian Studies and a secondary school teaching credential in social studies. To be eligible for this program, students should apply to the M.A. program in East Asian Studies and then apply to the Stanford Teacher Education Program during the first year at Stanford. Completing the dual program requires at least two years, including one summer session when beginning the education component of the program.

EAST ASIAN STUDIES AND BUSINESS

This program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. Students must apply separately to the East Asian Studies M.A. program and the Graduate School of Business and be accepted by both. Completing this combined course of study requires approximately three academic years (perhaps including summer sessions), depending on the student’s background and level of training in Chinese, Japanese, or Korean.

DOCTORAL PROGRAMS

Stanford does not offer a Ph.D. in East Asian Studies. However, there are more than 100 doctoral students with a specialization on China, Korea, or Japan within various departments and schools of the University. The departments that offer an East Asian concentration are: Anthropological Sciences, Art and Art History, Asian Languages, Comparative Literature, Cultural and Social Anthropology, Economics, History, Linguistics, Political Science, Religious Studies, and Sociology. It is also possible to specialize in East Asia within some of the doctoral programs of the professional schools of Business, Education, and Law. Inquiries should be directed to the individual department or school concerned.
POSTDOCORAL PROGRAMS

The Center for East Asian Studies offers two postdoctoral fellowships in Chinese Studies each year. Two postdoctoral fellowships in Japanese Studies are available from the Institute of International Studies, and the Asia/Pacific Research Center has a new postdoctoral program in contemporary Chinese Studies.

FINANCIAL AID

Students in graduate programs who plan to do work in Chinese, Japanese, or Korean language, and area studies courses, may be eligible for Foreign Language and Area Studies (FLAS) fellowships and are encouraged to apply for them at the time of application to Stanford. Recipients of FLAS fellowships must be American citizens or permanent residents. For further information, see “Resources” at http://www.stanford.edu/dept/CEAS/.

COURSES

The courses listed below deal primarily with China, Japan, and/or Korea. Many other theoretical and methodological courses within the various departments at Stanford are taught by faculty who are East Asian specialists; these courses often have a substantial East Asian component and may be found under the department listings in this bulletin.

EAST ASIAN LANGUAGES

For courses in Chinese, Japanese, and Korean language instruction with the subject codes CHINLANG, JAPANLNG, and KORLANG, see the “Language Center” section of this bulletin.

UNDERGRADUATES, GATEWAY

EASTASN 5. East House Seminar
1 unit, Spr (Oi)

EASTASN 181J. Resolving Conflicts: Comparative Study of the Japanese and American Judicial Systems—Distinguished practitioner course. The former Prosecutor General of Japan examines the roles and functions of the justice system in Japan compared with the U.S. Mechanisms for avoiding disputes, and how problems are solved when conflicts arise.
5 units, Win (Harada)

ADVANCED

EASTASN 191. Journal of East Asian Studies
1 unit, Aut, Win, Spr (Staff)

EASTASN 198. Senior Colloquium in East Asian Studies
1 unit, Spr (Oi)

EASTASN 199. Directed Reading
1-9 units, Aut, Win, Spr, Sum (Staff)

EASTASN 330. Core Seminar: Issues and Approaches in East Asian Studies
1-3 units, Aut, Win, Spr (Oi)

INTERDEPARTMENTAL OFFERINGS

See the respective department listings for course descriptions and General Education Requirements (GER) information.

ANTHROPOLOGICAL SCIENCES

ANTHSCI 7. Marriage and Kinship
4-5 units, Win (J. Wolf)

ANTHSCI 23. Identity and Peoples of China
3-5 units (Brown) not given 2004-05

ANTHSCI 24. Anthropology of Japan
3-5 units, Win (Befu)

ART HISTORY

ARThIST 2. Asian Art and Culture
5 units, Spr (Vinograd)

ARThIST 186/386. Theme and Style in Japanese Art
4 units, Win (Takeuchi)

ARThIST 187/387. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868
4 units, Spr (Takeuchi)

ARThIST 280A. Encountering Contemporary Chinese Art
5 units, Win (Vinograd)

ARThIST 284A. Art Discourses and Art Production in Late Ming China
5 units, Win (Vinograd)

ARThIST 285A. Asian Ceramics
5 units, Aut (Listopad)

ARThIST 286. Shini-e: The Performance of Death in Japanese Actor Prints
5 units, Aut (Takeuchi, Guth)

ARThIST 485. The Situation of the Artist in Traditional Japan
5 units, Spr (Takeuchi)

CHINESE GENERAL

CHINGEN 51. Chinese Calligraphy
1-2 units, Spr (Chuang)

CHINGEN 73/173. Chinese Language, Culture, and Society
4 units, Aut (Sun)

CHINGEN 91. Traditional East Asian Civilization: China
5 units, Aut (Rusk)

CHINGEN 131/231. Chinese Poetry in Translation
4 units, Aut (Jahshan)

CHINGEN 132/232. Chinese Fiction and Drama in Translation
4 units, Win (J. Wang)

CHINGEN 133/233. Modern and Contemporary Chinese Literature in Translation
4 units, Win (Lyell)

CHINGEN 135. Lovers, Drinkers, and Fighters: The World of the Chinese Martial Arts Novel
4 units, Spr (Kam)

CHINESE LITERATURE

CHINLIT 125,126,127/205,206,207. Beginning Classical Chinese
2-5 units, 125/205: Aut, 126/206: Win, 127/207: Spr (Sun)

CHINLIT 161. Passion in Late Imperial Literature
4 units, Win (Lewis)

CHINLIT 223. Advanced Classical Chinese: Literary Essays
2-4 units, Spr (J. Wang)

CHINLIT 261A. Passion in Late Imperial Literature
4 units, Win (Lewis)

CHINLIT 271. Traditional Chinese Fiction: Short Stories
4 units, Win (J. Wang)

CHINLIT 272. Traditional Chinese Fiction: Novels
4 units, Spr (J. Wang)

CHINLIT 392. Topics in East Asian Syntax—(Same as LINGUIST 278C.)
1-4 units, Spr (Sells)

CHINLIT 381. Early Chinese Thought
5 units, Spr (Lewis)
CULTURAL AND SOCIAL ANTHROPOLOGY

CASA 124. Violence and the Politics of Memory in East Asia  
5 units, Spr (Mitsui)

CASA 135X. Pilgrimage and Sacred Landscapes  
4 units, Aut (Diehl)

CASA 164. Ritual Musics of the World—(Same as MUSIC 164.)  
4 units, Win (Diehl)

CASA 171. Mythology, Folklore, and Oral Literature of Central Asia  
5 units, Aut (Kunanbaeva)

CASA 173/273. Nomads of Eurasia  
4-5 units, Spr (Kunanbaeva)

ECONOMICS

ECON 124. Contemporary Japanese Economy  
5 units (Staff) not given 2004-05

ELECTRICAL ENGINEERING

EE 402A. Topics in International Technology Management  
1 unit, Aut (Dashner)

HISTORY

HISTORY 90Q. Buddhist Political and Social Theory  
5 units, Win (Mancall)

HISTORY 92A. The Historical Roots of Modern East Asia  
5 units, Win (Sommer, Wigen)

HISTORY 192B/392B. China: The Early Empires  
5 units, Spr (M.E. Lewis)

HISTORY 194A. Japan from Earliest Times to 1560  
5 units (Berry) not given 2004-05

HISTORY 195. Introduction to Korean History and Culture  
5 units, Win (Sawada)

HISTORY 196E. Postwar Japan: From Occupation to Global Power, 1945-2000  
5 units, Spr (de Boer)

HISTORY 206B/306B. Design and Methodology for International Field Research  
1 unit, Win (N. Kollmann, Roberts)

HISTORY 275A/375A. U.S.-China Relations: From the Opium War to Tiananmen—WIM  
5 units, Win (Chang)

HISTORY 291. Peasants and the Chinese Communist Party, 1920-2005  
5 units, Spr (Bianco)

HISTORY 292/392. Cultures of Japanese Imperialism  
5 units, Aut (Wigen)

HISTORY 292D. Japan in Asia  
5 units, Aut (de Boer)

HISTORY 293. Korean History and Culture through Film  
5 units, Spr (Sawada)

HISTORY 293A/393A. Tokyo: From Castle Town to Megalopolis  
5 units, Win (Duus)

HISTORY 295D/395D. Samurai: Killing, Conscience, and Identity  
5 units, Aut (Berry)

HISTORY 296A/396A. Chinese Women’s History  
5 units, Spr (Sommer)

HISTORY 296B/396. Law and Society in Late Imperial China  
5 units, Aut (Sommer)

HISTORY 299/399. Japan in the Age of Courtiers and Warriors, 1180-1333  
5 units, Win (Berry)

HISTORY 394A. Directions in Asian Studies  
5 units, Win (Wigen)

HISTORY 395A. Early Medieval Japan  
5 units, Win (Berry)

HISTORY 395B. Late Medieval and Early Modern Japan  
4-5 units (Berry) not given 2004-05

HISTORY 396. Law and Society in Late Imperial China  
5 units, Aut (Sommer)

JAPANESE GENERAL

JAPANGEN 51/151. Japanese Business Culture  
1-5 units, Win (Dashner)

JAPANGEN 72N. Nature and the Japanese Condition  
4 units, Win (Carter)

JAPANGEN 77. Telling the Difference: Reading Race in Modern Japan  
4 units, Aut (Scott)

JAPANGEN 92. Traditional East Asian Civilization: Japan  
5 units, Win (Levy)

4 units, Spr (Reichert)

JAPANGEN 138/238. Survey of Modern Japanese Literature in Translation  
4 units, Spr (Levy)

JAPANGEN 148/248. Modern Japanese Narratives: Literature and Film  
4 units, Spr (Levy)

JAPANESE LITERATURE

JAPANLIT 157. Points in Japanese Grammar  
4 units, Win (Matsumoto)

JAPANLIT 201. Proseminar: Introduction to Graduate Study in Japanese  
4-5 units, Win (Carter)

JAPANLIT 246. Introduction to Premodern Japanese  
3-5 units, Aut (Carter)

JAPANLIT 247. Readings in Premodern Japanese  
5 units, Win (Reichert)

JAPANLIT 296. Readings in Modern Japanese Literature  
4 units, Spr (Levy)

JAPANLIT 350. Japanese Historical Fiction  
3-5 units, Spr (Carter)

JAPANLIT 381. Topics in Pragmatics and Discourse Analysis  
3-5 units, Aut (Matsumoto)

JAPANLIT 395. Early Modern Japanese Literature  
3-5 units, Win (Reichert)
POLITICAL SCIENCE

POLISCI 112/312. Japanese Foreign Policy
5 units, Aut (Okimoto)

POLISCI 140L. China in World Politics
5 units, Spr (Miller)

POLISCI 148/348. Chinese Politics: The Transformation and the Era of Reform
5 units, Win (Oi)

POLISCI 148S. The U.S. and Asia During the Cold War
5 units, Aut (Miller)

POLISCI 345R. Political Economy of Japan
3-5 units, Aut (Okimoto)

RELIGST 443S. Political Economy of Reform in China
5 units, Spr (Oi)

RELIGST 6N. The Life of the Buddha
3 units, Win (Zimmermann)

RELIGST 14. Introduction to Buddhism
4 units, Spr (Zimmermann)

RELIGST 55. Introduction to Chinese Religions
4 units, Win (Pregadio)

RELIGST 113. Zhuangzi and the Daoist Idea of Sainthood
4 units, Spr (Pregadio)

RELIGST 213. Daode Jing
4 units, Aut (Pregadio)

RELIGST 217/317 Japanese Studies of Religion in China
3 units, Aut (Kumada)

RELIGST 267. Readings in East Asian Religious Texts
4 units, Spr (Pregadio)

RELIGST 313. Buddhist Iconography and Ritual
3-5 units, Win (Faure)

RELIGST 370. Comparative Religious Ethics
4 units, Spr (Yearley)

SOCIOLGY

SOC 111. State and Society in Korea
5 units, Spr (Shin)

SOC 117A/217A. China Under Mao
5 units, Aut (Walder)

SOC 167A. Asia-Pacific Transformation
5 units, Win (Shin)

SOC 337. Workshop on Korean Studies
2 units, Aut, Win, Spr (Shin)

ECONOMICS

Chair: Timothy F. Bresnanhan

Associate Professor: Mark McClellan

Assistant Professors: Liran Einav, Peter Hansen, Jonathan Levin, Aprajit Mahajan, David McKenzie, Muriel Niederle, Luigi Pistaferri, Antonio Rangel, Esteban Rossi-Hansberg, Steven Tadelis, Michele Tertilt, Edward Vytlacil, Mark Wright

Courty Professors: David Baron, Jay Bhattacharya, John Ferejohn, Alan Garber, Kenneth Judd, David Kreps, Rosamond Naylor, Bruce Owen, A. Mitchell Polinsky, Peter C. Reiss, D. John Roberts, James Strnad, Barry Weingast, Robert Wilson

Senior Lecturer: Geoffrey Rothwell

Lecturers: Eric Hanushek, Barbara McCutcheon, Gregory Rosston

Visiting Professors: Alfonso Gambardella, Timur Kuran, Jurgen Schroeder

Web Site: http://www-econ.stanford.edu/

Courses given in Economics have the subject code ECON. For a complete list of subject codes, see Appendix B.

The department’s purpose is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in civil service, private enterprise, teaching, or research.

The undergraduate program provides an excellent background for those going on to graduate work in the professional schools (for example, business and law) and may also be structured to prepare students for a Ph.D. program in economics. The department’s curriculum is an integral part of Stanford’s programs in International Relations, Public Policy, and Urban Studies.

The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 25 to 30 students are admitted each year.

The faculty represent a wide spectrum of interests and conduct research on a broad range of topics. Most fields of economics are covered, including behavioral economics, comparative institutional analysis, econometrics, economic development, economic history, experimental economics, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, and public finance.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The total number of units required for the major is 75. Students are encouraged to complete the core courses 1-5 below, as early as possible. Ideally, students should complete the core during the sophomore year,
before taking upper division courses. Courses may not be taken before the prerequisites are completed. The required number of field courses is four. There is great flexibility in the choice of electives, including upper-division math and statistics.

Of the 75 units required for the major, at least 50 must be taken at Stanford in California. Students cannot declare Economics as their major until they have completed ECON 50 with a grade of ‘B’ or better.

REQUIREMENTS FOR THE ECONOMICS MAJOR
(75 UNITS)

1. ECON 1 (5 units): principles of economics.
2. ECON 102A (5 units): introduction to statistical methods. It is recommended that students satisfy this basic statistics requirement before proceeding with the rest of the program. Prerequisite: MATH 41 or equivalent.
3. ECON 50 (5 units): basic price theory. Prerequisite: ECON 1 and 50M or MATH 51, or passed diagnostic test (administered at the beginning of ECON 50) on multi-variable calculus.
4. ECON 51 and 52 (10 units): intermediate micro- and macroeconomics. Prerequisite: ECON 50.
5. ECON 102B (5 units): econometrics. Prerequisites: ECON 50 and 102A. Material in ECON 102B is used in a number of field courses. Students are strongly advised to design their program of study so that ECON 102B is not taken in their senior year but early in their program.

Field Courses (must be taken at Stanford in California; 20 units) —
Four courses must be chosen from among ECON 111, 118, 121, 140,* 141, 145, 149, 150, 154, 155, 156, 157, 160, 165 (5 units each).

Writing in the Major Course (5 units) —This requirement is fulfilled by ECON 101. This course should be taken only after completing ECON 51 and 52, 102B, and at least two field courses.

Electives (20 units) —Choose from Economics courses numbered from 100 through 198, excluding 190 and 191. Up to 10 units may be satisfied by MATH 52, 53, 103, 104, 113, 114, 115, or STATS 200.

A maximum of 10 units of transfer credit or of ECON 139D, Direct-ed Reading, may be taken under this section. Suitable transfer credit must be approved in writing by the Associate Director of Undergraduate Studies. Advanced undergraduate majors with strong quantitative preparation may enroll in graduate (200-level) courses with permission of the Director of Undergraduate Studies and the course instructor. Some courses offered by Overseas Studies may be counted towards this requirement. The department does not give credit for internships.

* Students may not count units from both ECON 135 and 140 towards their major as the courses are too similar in content.

OTHER REQUIREMENTS

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit, and 50 of the 75 units required for the major must be taken at Stanford in California.

Students with sufficiently high scores on the Advanced Placement Microeconomics and Macroeconomics tests can receive AP credit which enables them to fulfill the Economics major without taking ECON 1. However, these students nevertheless must take 75 units of economics courses to obtain the major: the AP credit does not yield any units toward the major.

A grade point average (GPA) of 2.0 (C) or better must be received for all units applied toward the preceding requirements.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department’s Associate Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements (see the Information Book for Economics Majors).

The time limit for satisfactory completion of a course is one year from the date an “incomplete” is given, although instructors may set a shorter time limit. Students are responsible for seeing that all grades of incomplete are cleared within the time limit.

SAMPLE PROGRAMS

Sample listings of upper-division economics electives may be examined in the department’s Information Book for Economics Majors, available in the Economics Building, room 136. Sample programs are provided for the following areas of emphasis: (1) liberal arts, (2) pre-business, (3) quantitative, (4) international, (5) political economy and regulation, and (6) preparation for graduate school in economics.

MINORS

The minor in Economics has two main goals. The first is to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors. The second is to allow students to build basic competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

COURSE WORK

1. ECON 1 (5 units): principles of economics.
2. ECON 50 (5 units): basic price theory. Prerequisites: ECON 1 and 50M or MATH 51, or passed diagnostic test (administered at the beginning of ECON 50) on multi-variable calculus.
3. ECON 51 and 52 (10 units): intermediate micro- and macroeconomics. Prerequisite: ECON 50.
4. Two field courses (must be taken at Stanford in California; 10 units) may be chosen from the following list: ECON 102B, 111, 118, 121, 140,* 141, 145, 149, 150, 154, 155, 156, 157, 160, 165.
5. One elective (5 units) from Economics courses numbered 100 through 198, excluding 190 and 191.

* Students may not count units from both ECON 135 and 140 towards their major as the courses are too similar in content.

OTHER REQUIREMENTS

If the candidate’s major requires basic Economics courses (items 1 through 3), then only half of the units from those courses apply toward the economics minor. To attain the overall 35 units required by the minor, the student must take additional Economics courses under items 4 and 5. At least 20 out of the 35 units for the minor must be taken at Stanford. No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit. A grade point average (GPA) of 2.0 or better must be received for all units applied toward the minor.

Students must complete their declaration of the minor no later than the last day of the preceding quarter before their degree conferral.

HONORS PROGRAM

The honors program offers an opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with course and research work of exceptional quality. Honors students may participate in an Honors Research Symposium during Spring Quarter, with those nominated for prizes making oral presentations. The honors program requires:

1. Completing all requirements for the major.
2. Achieving a grade point average (GPA) of at least 3.5 for the 75 units required of the Economics major. See details in the Information Book for Economics Majors.
3. Complete ECON 102B and at least two lecture courses most relevant for the proposed topic of the honors thesis by the end of the junior year. (These can be included in the basic 75 units.)
4. Candidates must write an honors thesis in their senior year for at least one unit and up to 10 units of credit (ECON 199D). The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of 199D do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors. Students who take ECON 199D for 10 units may apply 5 of those units to meet the Writing in the Major (WIM) requirement. Such students complete the major with at least 80 units overall.
Juniors interested in the honors program should attend an informational meeting scheduled by the honors program director during the first week of each quarter. At this meeting, students receive information on organizing an honors project and are given details on honors programs. Prospective candidates for the honors program should submit an application to the director no later than the end of the first month of the third quarter before graduation (typically Autumn Quarter of the senior year). Also required, later in the same quarter, is a three-page thesis proposal that must be approved by the thesis adviser.

**GRADUATE PROGRAMS**

Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics.

**MASTER OF ARTS**

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The department does not admit students who plan to terminate their graduate study with the M.A. degree. Students may (but need not) elect this degree in preparation for the Ph.D. degree. A master’s option is also available to Ph.D. candidates from other departments.

**Admission**—Prospective students must have completed the Stanford requirements for a B.A. in Economics or approximately equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected. Prospective applicants should submit their credentials together with a plan of study to the Director of Graduate Study for approval.

**Requirements**—A master’s program must satisfy these criteria:

1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor’s degree, of which at least 40 units must be in the Department of Economics. Students must complete ECON 202 and at least three other 200-level courses. They must receive a grade of 'B-' or better in ECON 202. Undergraduate courses must be numbered 105 or higher. No seminar courses numbered 300 or above can be counted.

2. Demonstrating competence in empirical methodology by receiving a grade of 'B-' or better in both ECON 270 and 271, or by receiving a grade of 'B-' or above in each of ECON 102A, B, and C.

3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 10 units of credit can be earned for a thesis toward the 45-unit degree requirement.

4. A grade point average (GPA) of 3.0 must be maintained for all master’s level work. All courses must be taken for a letter grade.

**DOCTOR OF PHILOSOPHY**

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

Admitted students must be adequately prepared in calculus, linear algebra, and statistics (see above). When deemed appropriate, a student may be required to complete the necessary background preparation at Stanford. All students take a common core curriculum at the outset and later branch out into the desired fields of specialization. Well-prepared students should anticipate spending, with some overlap, approximately two years in coursework and another two years in seminars, independent study, and dissertation research. The goal is to complete the program in four years, although some types of research programs may require at least five years to complete. The department has a strong commitment to guiding students through the program expeditiously.

Questions and petitions concerning the program and the admissions process should be addressed to the Director of Graduate Study, who has responsibility for administering the graduate program.

Specific requirements are best discussed in two stages, the first consisting of requirements for admission to candidacy and the second involving further requirements for earning the degree.

**Admission to Candidacy for Ph.D.—** A student may apply for admission to candidacy when the following minimal requirements are met:

1. Successful results on comprehensive examinations in core economics (the examinations based on material from ECON 202, 203, 204; and 210, 211, 212), and econometrics (the examination based on material from ECON 270, 271, 272).

2. Completing the requirements in two additional fields of specialization from the list below or, if approved in advance by the Director of Graduate Study, in one such field together with a substantial amount of work toward a second field taught in a related department. Advanced fields include econometrics, economic development, economic history, industrial organization, international economics, labor economics, microeconomic theory, monetary theory and advanced macroeconomics, and public finance.

Each field listed above can be satisfied by completing two courses, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. All courses (or comprehensive exams, when offered) must be passed with a grade ‘B’ or better.

3. Completing a candidacy paper, normally written in conjunction with one of the special fields selected above.

It is expected that the student will meet, and indeed exceed, the above standard by the beginning of the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the second year. Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After approval, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances.

**Further Requirements for the Ph.D. Degree—**

1. **Distribution Requirement:** Students must complete four other graduate-level courses meeting the following requirements:
   a) at least one course from the area of economic history, unless history is one of the two fields of specialization.
   b) courses in at least two fields other than the two fields of specialization. Distribution courses cannot be crosslisted in those fields.
   c) with advance approval of the Director of Graduate Study, some of these distribution courses may be drawn from related fields taught in other departments. However, including courses taken to meet either the specialization or distribution requirements, no more than two courses in total may be taken outside the Economics department.

2. **Teaching Experience:** each student must serve as a teaching assistant for at least one quarter. It is strongly recommended that this requirement be satisfied before the final year of residence.

3. **Seminar Participation:** each student is expected to participate in at least two all-year research seminars by the end of the fourth year of residence. Normally, participation in a seminar requires one or more oral presentations and the submission of a research paper (which, however, need not be completely separate from dissertation research).

4. **Ph.D. Dissertation:** the process involves selecting a topic, choosing an appropriate adviser, submitting a prospectus (signed by the adviser) outlining the proposed research, selecting a three-member reading committee (usually all from the Department of Economics, although
exceptions can be made under certain circumstances), passing the University oral examination at which these three faculty (and two other members of the Academic Council) ask questions about the completed research, and submitting a final draft of the work signed by all members of the reading committee. The student is advised to initiate this process as early as possible.

**PH.D MINOR**

To be recommended for the Ph.D. degree with Economics as a minor subject, a student must qualify in three fields of economics, at least one of which must be in the core economics sequence. The standard of achievement in these fields is the same for major as for minor candidates, including the department’s comprehensive examinations where appropriate.

**JOINT DEGREE PROGRAMS WITH THE SCHOOL OF LAW**

The Department of Economics and the School of Law offer a joint program leading to the Ph.D. in Economics and the J.D. degree in Law. See the Stanford University bulletin Law School for descriptions of its participation in the joint program.

To qualify, the student’s program objectives must clearly justify such a joint program. Decisions are made by the Director of Graduate Study. A student’s program in economics must satisfy the same standards as a Ph.D. degree in Economics taken with a minor in Law. It is expected that dissertation research will cross department lines and that members of the dissertation committee will be drawn from both faculties.

Students normally spend the first year full time either in Economics or in Law and the second year full-time in the other department. After the second year, courses in economics and law may be pursued simultaneously.

Other joint programs may be arranged; for example, the Ph.D. in Economics combined with one or two years of study in the School of Law, leading either to the nonprofessional Master of Legal Studies (M.L.S.) degree or the nonprofessional Master of Jurisprudence (J.M.). See the bulletin Law School for the requirements. Conversely, a student taking the J.D. in the School of Law may apply for an M.A. in Economics.

**FELLOWSHIPS AND ASSISTANTSHIPS**

The department awards a number of fellowships for graduate study. Many first-year and a few select second or third-year students are awarded full fellowships, including a stipend and tuition. All students whose records justify continuation in the program may be assured support for the second through fourth years in the form of employment as a teaching or research assistant. These half-time appointments provide a stipend and tuition allowance. Entering students are not normally eligible for research or teaching assistantships.

Applications should be submitted before January 1 to the department admissions committee.

**COURSES**

WIM indicates that the course satisfies the Writing in the Major requirements.

5 units, Aut (Boskin), Win (Wright), Spr (Clerici-Arias)

**ECON 11N. Understanding the Welfare System**—Stanford Introductory Seminar. Preference to freshmen. Welfare reform legislation and the devolution revolution. The transfer of responsibility for antipoverty programs to the states. How recent reforms change the welfare system and who is likely to be affected. Food stamps, AFDC, TANF, SSI, and Medicaid. Income transfer programs such as earned income tax credit and income taxes, and labor market regulations such as minimum wages and overtime rules. Economic principles to understand the effectiveness of these programs and their consequences on the behavior of families. Prerequisite: ECON 1. Recommended: basic understanding of labor markets, taxes, and transfers.

2 units, Aut (McCurdy)

**ECON 17N. Energy, the Environment, and the Economy**—Stanford Introductory Seminar. Preference to freshmen. The relationship between energy production and consumption, and environmental quality. Social costs of fossil fuel, nuclear power, nonrenewable sources, and renewable sources such solar and wind. The implicit subsidies of conventional energy, and the societal costs of these subsidies. Regulatory and legal barriers to environmentally friendly energy sources. Factors hindering the development of renewable energy sources.

2 units, Spr (Wolak)

**ECON 50M. Mathematical Preparation for Economics**—Preparation for 50 and 102A for students who either did not pass the diagnostic test administered at the beginning of 50 or who have not taken MATH 51. Elements of multi-variable calculus, constrained optimization, and matrix algebra. Prerequisites: 1 and MATH 41.

5 units, Aut (Jacob), Win (Ahooibim), Spr (Asmundson)

**ECON 50. Economic Analysis I**—Individual consumer and firm behavior under perfect competition. The role of markets and prices in a decentralized economy. Monopoly in partial equilibrium. Economic tools are developed from multi-variable calculus, using partial differentiation and techniques for constrained and unconstrained optimization. Prerequisites: 1, and 50M or MATH 51, or passed diagnostic test (administered at the beginning of 50) on multivariable calculus. GER:2c

5 units, Aut (Johnson), Win (Tendall)

**ECON 51. Economic Analysis II**—Introduction to neoclassical analysis of general equilibrium, welfare economics, imperfect competition, externalities and public goods, intertemporal choice and asset markets, risk and uncertainty, game theory, adverse selection, and moral hazard. Multivariable calculus is used. Prerequisite: 50.

5 units, Win (Johnson), Spr (Tadelis)

**ECON 52. Economic Analysis III**—Growth and fluctuations in the economic system as a whole. National income accounts and aggregate relationships among stocks and flows in markets for goods, labor, and financial assets. Economic growth, inflation, and unemployment. The role of macroeconomic policies in the short and long run. Prerequisite: 50.

5 units, Win (Tertilt), Spr (Klenow)

**ECON 90. Introduction to Financial Accounting**—Graduate students register for 190.) How to read, understand, and use corporate financial statements. Oriented towards the use of financial accounting information (rather than the preparer), and emphasizes the reconstruction of economic events from published accounting reports.

5 units, Aut (Stanton), Win (Guttman)

**ECON 91. Introduction to Cost Accounting**—Graduate students register for 191.) The use of internal financial data for managerial decision making.

5 units, Spr (Stanton)

**ECON 93Q. Investments Worldwide**—Stanford Introductory Seminar. Preference to sophomores. Focus is on the operation of stock markets in the U.S.: the New York and American stock exchanges, and the over-the-counter NASDAQ market, on which high-tech companies are traded. Financial institutions in the U.S. (stock markets, mutual funds) and how they relate to international markets. Inflation, interest-rate trends, U.S. government agencies, and the impact of the Federal Reserve Bank on capital markets and capital flows. Macroeconomic factors that drive capital flows.

3 units, Win (Marotta)

**ECON 101. Economic Policy Analysis**—Analysis, writing, and presentation. Topics vary with instructor. Limited enrollment. Prerequisites: 51, 52, 102B, and two field courses; additional prerequisites for some sections.

5 units, Aut (Ruston, Gould), Win (Johnson, Clerici-Arias, Yoong), Spr (Johnson, McCutcheon, Gould, Hatfield)
ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists—Description and examples of the use of statistical techniques relevant to economics. Basic rules of probability, conditional probability, discrete and continuous probability distributions. Point estimation, tests of hypotheses, confidence intervals, and linear regression model. Prerequisite: MATH 41 or equivalent. GER:2c
5 units, Aut (Tendalli), Win (Nicholson)

5 units, Win (Vytlačil), Spr (Hansen)

ECON 102C. Advanced Topics in Econometrics—Identification and estimation of the effect of human capital variables on earnings (e.g., the return to education, tenure), and identification and estimation of labor supply models, focusing on microeconomic data. Topics: instrumental variable estimation, limited dependent variable models (probit, logit, and tobit models), and panel data techniques (fixed effect and random effect models, dynamic panel data models).
5 units, Spr (Pistaferri)

ECON 103. Applied Econometrics—The construction and use of econometric models for analyzing economic phenomena. Students complete individual projects and core material. Topics vary with instructor. Limited enrollment. Prerequisites: 52, 102B.
5 units, Win (Staff)

ECON 106. World Food Economy—The interrelationships among food, populations, resources, and economic development. The role of agricultural and rural development in achieving economic and social progress in low-income nations. Emphasis is on the public sector decision making as it relates to food policy.
5 units, Win (Falcon, Naylor)

ECON 111. Money and Banking—Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of the Federal Reserve System and the conduct of monetary policy in the U.S.
Prerequisites: 50, 52.
5 units, Aut (McKinnon)

ECON 113. Technology and Economic Change—The economic causes and consequences of technological change. The historical experience of advanced industrial countries and the more recent experience of less developed economies. Topics: the origins of modern industry in the U.S. and Europe, and the growth of large-scale organizations, late-comers to industrialization (Japan and newly industrializing countries), economic growth and slowdown in mature industrial countries, and present concerns and future prospects (the influence of technology on employment, civilian spillover from military R&D, and coping with rapid technological change).
5 units, Win (Gambardella)

ECON 114. Economy and Economics of Ancient Greece—Introduction to the history of Greek civilization from the Mycenaean period to the 4th century B.C. The formalist-substantivist controversy: what behavioral assumptions should be made in order to understand the working of the Athenian economy. The economics and ethical thoughts of Plato and Aristotle in contrast to utilitarianism, which became a foundation of modern economics. Prerequisite: 1. GER:4a
5 units (Staff) not given 2004-05

ECON 115. European Economic History—Economic changes and growth in W. Europe from antiquity to the present. The transformation of Europe from an economically and culturally backward part of the world to the center of the world economy pre-WW I. Topics: the role of technics and sciences, variations of the extent of market activities, institutional changes, international politics, demography. GER:3b
5 units (Gref) not given 2004-05

ECON 116. American Economic History—From colonial times to the present. The application of economic analysis to historical issues, and the role of historical context in economics. Topics: American economic growth in international perspective; the economics of slavery and regional divergence; the origins and consequence of the American system of technology and business organization; recent U.S. economic performance in historical perspective. Prerequisite: 1. GER:3b,4b
5 units, Spr (Wright)

ECON 117. Economic History and Modernization of the Islamic Middle East—From the rise of Islam to the present. Transformation of region from economically advanced to underdeveloped. Role of religion in economic successes and failures. Current obstacles to development. Topics: Islamic economic institutions; innovation and change; political economy of modernization; interactions with other regions; and economic consequences of Islamism.
5 units, Aut (Kuran)

ECON 118. Development Economics—The economic problems and policy concerns of developing countries. Theories of growth and development; inequality and poverty; credit and labor markets; population growth and fertility choice; migration; sustainable development and globalization. Emphasis on economic models rather than case studies.
Prerequisites: 50, 52, 102B. GER:4a
5 units, Spr (Johnson)

ECON 120. Socialist Economies in Transition—Privatization, restructuring, and institutional change in E. Europe and the former Soviet Union. Analysis of property rights, corporate governance, incentives, and resource allocation in socialist and transitional economies. Emphasis is on liberalization and privatization policies (including mass and voucher programs) as the primary instruments to induce changes in behavior.
5 units, Spr (Gathmann)

ECON 121. Development Economics, with Special Reference to East Asia—The macroeconomic aspects of economic development: structural transformation, resource utilization, mobilization, and allocation; the sources of economic growth; intersectoral transfers; the role of the external sector; money and finance in development; stabilization in closed and open economies; strategies for economic development; the role of intangible capital; and endogenous technical progress. Cases studies. Prerequisite: 52. GER:4a
5 units (Staff) not given 2004-05

ECON 124. Contemporary Japanese Economy—The Japanese economy in comparative and historical perspective. Micro and institutional aspects including firms, the employment system, corporate governance and financial institutions, and the macro economy. Elementary applications of macro and micro economics. Prerequisite: 50. GER:4a
5 units (Staff) not given 2004-05

ECON 135. Finance I for Non-MBAs—(Same as FINANCE 221, MS&E 245G.) For graduate students and advanced undergraduates. The foundations of finance with applications in corporate finance and investment management. Major financial decisions made by corporate managers and investors with focus on process valuation. Criteria for investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities. Corporate financial instruments including debt, equity, and convertible securities. Limited enrollment. Prerequisites: 51 or ENGR 60 or equivalent; ability to use spreadsheets, and basic probability and statistics concepts including random variables, expected value, variance, covariance, and simple estimation and regression.
4 units Win (Admati)
ECON 136. Auctions and Market Design—Competitive bidding for asset purchases and procurement of industrial needs; bidder entry decisions; design of mechanisms for complicated resource allocation problems. Prerequisites: 51, 160.
5 units, Win (Milgrom)

ECON 137. Information and Incentives—Incentives in situations where one part has more information than another. A part may have better information about things that it controls (moral hazard), or about things that are outside of its control (adverse selection). The general structure of incentive problems and the design of contracts and institutions to deal with such problems. Applications: executive and employee compensation, sharecropping, financial contracts and credit rationing, insurance, markets with unobservable quality, monopolistic price discrimination, regulation of natural monopolies, income taxation and redistribution, the provision of public goods, and auctions.
5 units (Staff) not given 2004-05

ECON 138. Risk and Insurance—Financial risk management that addresses how individuals and corporations can use financial instruments to hedge risk factors. Moral hazard, asymmetric information, and adverse selection. Why some insurance markets exist and others don’t. The main risk factors that corporations face such as fluctuations in exchange rates, interest rates, and oil prices. How to set up hedging strategies based on trades in futures and options markets. Credit, weather, energy, and insurance derivatives. Prerequisite: 50.
5 units, Aut (McCUTCHEON)

ECON 139D. Directed Reading
1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 140. Introduction to Financial Economics—Introduction to modern portfolio theory and corporate finance. Topics: properties of various financial instruments, including financial futures, mutual funds, the Capital Asset Pricing Model, and models for pricing options and other contingent claims. Prerequisites: 51, 102B.
5 units, Spr (Kurz)

ECON 141. Public Finance and Fiscal Policy—What role should and does government play in the economy? What are the effects of government expenditure, borrowing, and taxation? Policy topics: budget surpluses/deficits; tax reform; social security, public goods, and externalities; fiscal federalism; public investment; and cost-benefit analysis. Prerequisites: 51, 52.
5 units, Spr (Ho)

ECON 142. The Political Economy of the Federal Budget—(Enroll in PUBLPOL 196.)
5 units (Staff) not given 2004-05

5 units, Win (Hammond)

5 units, Win (Pencavel)

ECON 148. Urban Economics—The economics of urban areas. Costs and benefits of cities, city location, land rent and land use, suburbanization, zoning, poverty, housing and segregation, homelessness, local government finance, transportation, schools, and crime. Prerequisites: 50, 102A.
5 units (Staff) not given 2004-05

5 units, Spr (Segal)

ECON 150. Economic Policy Analysis—(Same as PUBLPOL 104.) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Readings: the theoretical foundations of policy making and policy analysis, and applications to the adoption and implementation of programs.
5 units, Win (Noll)

ECON 152. Mass Media Economics and Policy—(Enroll in PUBLPOL 172.)
4-5 units, Aut (Owen)

ECON 153. Economics of the Internet—Applications of microeconomic theory to Internet businesses: auctions, online transactions, export barriers, valuation, pricing of facilities, policy for broadband communications, network economics, standards, economics of information. Prerequisites: 51 and one of 102B, 103, 104, 113, 135, 137, 140, 149, 157, or 160.
5 units (Staff) not given 2004-05

ECON 154. Economics of Legal Rules and Institutions—The design and consequences of legal rules. Common ideas that run through law including individual rationality, economic efficiency, conventional and Coasian analyses of externalities, enforcement, costs, and market consequences of legal restrictions on contract terms. Private versus public enforcement of law; the tradeoff between certainty and severity of punishment; the choice between ex post and ex ante sanctions; and the choice between property and liability rules. Applications to property, intellectual property, contract, criminal, tort, family, and environmental law. Prerequisite: 51.
5 units, Win (Owen)

ECON 155. Environmental Economics and Policy—(Same as EARTH-SYS 112.) Economic sources of environmental problems and alternative policies for dealing with them (technology standards, emissions taxes, and marketable pollution permits). Evaluation of policies addressing regional air pollution, global climate change, water allocation in the western U.S., and the use of renewable resources. Connections between population growth, economic output, environmental quality, and human welfare. Prerequisite: ECON 50. GER:2a
5 units, Spr (Goulder)

ECON 156. Economics of Health and Medical Care—(Graduate students register for 256; same as BIOMEDIN 156/256.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: ECON 50 and ECON 102A or equivalent statistics, or consent of instructor. Recommended: ECON 51.
5 units, Aut (Bhattacharya)

ECON 157. Imperfect Competition—The interaction between firms and consumers in markets that fall outside the benchmark competitive model. How firms acquire and exploit market power. Game theory and information economics to analyze how firms interact strategically. Topics include monopoly, price discrimination, oligopoly, collusion and
cartel behavior, anti-competitive practices, the role of information in markets, anti-trust policy, and e-commerce. Sources include theoretical models, real-world examples, and empirical papers. Prerequisite: 51.

5 units (Staff) not given 2004-05

ECON 158. Antitrust and Regulation—The history, economics, and legal background of the institutions under which U.S. industry is subject to government control. Topics: antitrust law and economics; the economics and practice of public utility regulation in the communications, transportation, and energy sectors; and the effects of licensing. Emphasis is on the application of economic concepts in evaluating the performance and policies of government agencies. Prerequisite: 51.

5 units, Win (Riskind)

ECON 160. Game Theory and Economic Applications—Mathematically rigorous introduction to game theory and its applications to economics. Topics: strategic and extensive form games, Nash equilibrium, subgame-perfect equilibrium, Bayesian equilibrium, and perfect Bayesian equilibrium. The theory is applied to repeated games, auctions, and bargaining. Examples from economics and political science. Prerequisites: 51 and calculus course, or consent of instructor.

5 units, Spr (Riskind)

ECON 162. Monetary Economics—The role of money and monetary policy in the macro economy, using calculus. Topics: the exchange process and the role of money; inside and outside money; inflation and the inflation tax; international monetary systems; the indeterminacy of floating exchange rates; policies to fix the exchange rate and inflationary incentives; currency crises and speculative attacks; money and interest-bearing government debt; the government’s budget constraint and the coordination of monetary and fiscal policies; hyperinflations and stabilizations; the effect of the national debt on consumption, savings, investment and output; time consistency of government policies. Prerequisite: 52.

5 units (Staff) not given 2004-05

ECON 165. International Economics—Comparative advantage in production and trade among nations; trade policy; increasing returns, imperfect competition and trade; the international monetary mechanism; domestic monetary, fiscal, and exchange rate policies and their relationship to foreign trade; global financial crises and trade. Prerequisites: 1, 51, 52.

5 units, Aut (Rossi-Hansberg)

ECON 167. European Monetary and Economic Integration—The economics of the European Community and the internal market. Analysis of current competition, transportation, and factor market policies, including the problems of agriculture and unemployment. Fiscal harmonization and mercantilist rivalry. European Monetary Union (EMU): genesis, implementation, and consequences of a common currency and central bank. Foreign exchange and foreign trade. Prerequisites: 51, 52, or equivalents.

5 units, Win (Schroeder)

ECON 168. Path Dependence and Economic Analysis—Historically contingent change in the economy; theoretical and applied research on path-dependent phenomena and their implications for economic policy. Topics: self organization in economics; relationships among micro level irreversibilities, branching processes, positive feedback dynamics and the generation of emergent properties at the macroeconomic level; non convexities, lock-in to suboptimal equilibria, and the economics of QWERTY. Historical antecedents and modern formalizations of historical economics, applications of paradigmatic models of non-ergodic stochastic processes. Case studies. Prerequisites: two upper-level economics courses in applied fields. Limited enrollment.

5 units (Staff) not given 2004-05

ECON 169. International Financial Markets and Monetary Institutions—Graduate students register for 269.) How nations interact to ensure that international trade is monetized and multilateral rather than bartered and bilateral. Hedging exchange and interest rate risks; selection of currencies of invoice and trade credit; parity relationships among futures, swaps, and options contracts. The exchange rate and the trade balance. Regulating excess volatility in exchange rates and capital flows. Alternative international monetary standards from gold to the dollar to the European Monetary System. Prerequisite: 165. Recommended: knowledge of money and banking.

5 units (Staff) not given 2004-05

ECON 170. Intermediate Econometrics I—Graduate students register for 270; see 270.)

2-5 units, Aut (Vyticil, Wolak)

ECON 171. Intermediate Econometrics II—Graduate students register for 271; see 271.)

2-5 units, Aut (Wolak, Mahajan)

ECON 172. Intermediate Econometrics III—Graduate students register for 272; see 272.)

2-5 units, Win (Macurdy)

ECON 178. Neuroeconomics—Graduate students register for 278; see 278; same as PSYCH 278.)

3 units, Aut (Knutson, Rangel)

ECON 179. Experimental Economics—Methods and major subject areas that have been addressed by laboratory experiments. Focus is on a series of experiments that build on one another. Topics include decision making, two player games, auctions, and market institutions. How experiments are used to learn about preferences and behavior, trust, fairness, and learning. Final presentation of group projects. Prerequisites: 50, 51, 102A.

5 units, Spr (Niederle)

ECON 190. Introduction to Financial Accounting—(Same as 90; see 90.)

5 units, Aut (Stanton), Win (Guttman)

ECON 191. Introduction to Cost Accounting—(Same as 91; see 91.)

5 units, Spr (Stanton)

ECON 198. Junior Honors Seminar

5 units, Spr (Rothwell)

ECON 199D. Honors Thesis Research—In-depth study of an appropriate question and completion of a thesis of very high quality. Normally written under the direction of a member of the Department of Economics (or some closely related department). See description of honors program. Register for at least 1 unit for at least one quarter. Meets first week of Autumn Quarter (see Stanford Daily for details).

1-10 units, Aut, Win, Spr, Sam (Rothwell)

PRIMARILY FOR GRADUATE STUDENTS

ECON 239D. Directed Reading

1-10 units, Aut, Win, Spr, Sam (Staff)

ECON 299. Practical Training—Students obtain employment in a relevant research or industrial activity to enhance their professional experience consistent with their degree programs. At the start of the quarter, students must submit a one page statement showing the relevance of the employment to the degree program along with an offer letter. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program.

1-10 units, Aut, Win, Spr, Sam (Staff)

ECON 400. Ph.D. Dissertation

1-15 units (Staff)

A. CORE ECONOMICS

ECON 202. Core Economics: Modules 1 and 2—(Non-Economic graduate students register for 202N.) Open to advanced undergraduates with consent of instructors. Theory of the consumer and the implications of constrained maximization; uses of indirect utility and expenditure functions; theory of the producer, profit maximization, and cost minimization; behavior under uncertainty; partial equilibrium analysis and in-
introduction to models of general equilibrium. Limited enrollment. Prerequisite: thorough understanding of the elements of multivariate calculus and linear algebra.

ECON 202N. 202 For Non-Economics Ph.D. Students—Core Economics modules 1 and 2 for non-Economics Ph.D. students.
2-5 units, Aut (Levin)

2-5 units, Win (Bernheim)

ECON 203N. 203 For Non-Economics Ph.D. Students
2-5 units, Win (Staff)

ECON 204. Core Economics: Modules 9 and 10—The theory of contracts, emphasizing contractual incompleteness and the problem of moral hazard. Incentive regulation. Competition with imperfect information, including signaling and adverse selection. The theory of resource allocation over time, competitive equilibrium, and intertemporal efficiency. Limited enrollment. Prerequisite: 203.
2-5 units, Spr (Milgrom)

2-5 units, Aut (M. Wright)

ECON 211. Core Economics: Modules 11 and 12—Capital asset pricing models, equilibrium with securities, pricing of securities, and arbitrage. Overlapping generations models with incomplete market structure and sunspots. Foundations of Bayesian Dynamic learning. Investment theory and empirics, including adjustment costs and the q theory; consumption theory and empirics, focusing on the life-cycle model; and the labor market. Limited enrollment. Prerequisite: 210.
2-5 units, Win (Kocherlakota)

ECON 212. Core Economics: Modules 4 and 8—Monetary theory; evidence on the nature of economic fluctuations, the role of money (overlapping generations, cash in advance, money in the utility function), the dynamic impact of changes in money on the economy, the natural rate of unemployment and job creation/destruction, exchange rate determination, international transmission of money, dynamic stochastic general equilibrium models. Macroeconomic policy: theoretical rationale or central bank independence, time inconsistency, the impact of public debt, rules versus discretion, interest rate versus money rules, international monetary policy coordination, rational expectations, econometric policy evaluation. Limited enrollment. Prerequisite: 203, 211.
2-5 units, Spr (Klenow, Tertilt)

ECON 301A,B,C. Microeconomic Workshop
1-10 units, Aut, Win, Spr (Staff)

ECON 305A,B,C. Economic Applications Workshop
1-10 units, Aut, Win, Spr (Staff)

ECON 310A,B,C. Macroeconomic Workshop
1-10 units, Aut, Win, Spr (Staff)

B. ECONOMIC DEVELOPMENT

To receive comprehensive credit in the field, students must complete 214 and 217, and submit a paper from one of these two courses. Students wishing to do research in the field are strongly advised to take courses in international economics, such as 266, and in comparative institutional analysis.

ECON 214. Development Economics: Microeconomic Issues—Microeconomic analysis of markets and institutions in developing countries. Topics: the role of the household; models of savings, credit, and risk; adjustment to aggregate shocks; occupational choice, credit constraints, and credit market imperfections; health and nutrition; new technology; and education. Emphasis is on empirical tests of and evidence for theoretical models.
2-5 units, Aut (Mahajan)

ECON 216. Development Economics and Growth: Macroeconomics—The historical experience of economic development; patterns of economic growth; sources of economic growth; models of economic development (two-gap models, dual economy models, open economy models, new growth models), savings and capital accumulation; the role of money and finance; inflation; taxation; stabilization in closed and open economies with incomplete and/or imperfect markets; human and other forms of intangible capital; infrastructural capital and externalities; income distribution; numerical general equilibrium models.
2-5 units (Staff) not given 2004-05

2-5 units, Win (McKinnon)

ECON 267. Special Topics in International Economics—The level and growth effects of trade and trade liberalization in neoclassical and endogenous growth models. The empirical evidence (country specific and cross country), on the effects of trade liberalization on growth, poverty, and inequality within and between countries. Implications for national and international policies. Multilateral versus preferential trade liberalization including the Doha round of multilateral trade negotiations.
2-5 units, Spr (Staff)

ECON 315A,B,C. Development Workshop
1-10 units, Aut, Win, Spr (Staff)

C. ECONOMIC HISTORY/INSTITUTIONS

The requirement for the field is one research paper on a subject approved by one of the faculty teaching any of the following courses.

ECON 224. Science, Technology, and Economic Growth—Upper-division undergraduates may attend with consent of instructor. The roles played by the growth of scientific knowledge and technical progress in the development of industrial societies. Emphasis is on the interactions between science and technology, and the organizational factors which have influenced their effectiveness in contributing to productivity growth.
2-5 units, Win (Gambardella)

ECON 226. U.S. Economic History—The American economy from colonial times to the present. The role of economic history as a distinctive intellectual approach to the study of economics. Topics: American growth record and its determinants, the origins and character of U.S. technology, slavery, the Great Depression, recent U.S. performance in historical perspective.
2-5 units, Spr (Wright)

ECON 228. Institutions and Organizations in Historical Perspective
2-5 units, Win (Greif)

ECON 325A,B,C. Economic History Workshop
1-10 units, Aut, Win, Spr (Staff)
D. MONETARY THEORY AND ADVANCED MACROECONOMICS

Requirements for the field are successful completion of 233 and 234.

ECON 233. Monetary Theory and Advanced Macro I—Topics in the theory of fluctuations and growth.
2-5 units, Aut (Rossi-Hansberg)

ECON 234. Monetary Theory and Advanced Macroeconomics II—Topics in the theory of fluctuations and growth.
2-5 units, Win (Hall, Tertilt)

ECON 235. Monetary Theory & Advanced Macro III—Topics in the theory of fluctuations and growth.
2-5 units, Spr (Klenow, Kocherlakota)

E. PUBLIC FINANCE

To receive credit for the field, students must complete 241 and 242 by passing the final examinations, and submit an acceptable research paper on a topic approved by the instructor for either course. Students may take Public Finance as a field and still count 243 and/or 244 toward satisfying their distribution requirements.

2-5 units, Win (Bernheim, Hanushek)

2-5 units, Spr (Rangel)

ECON 243. Economics of Environment—Open to upper-division undergraduates with consent of instructor. Sources of environmental problems in market economies and policy options for addressing these problems. Topics: choice of policy instruments (taxes, standards, tradeable permits), environmental risk assessment, valuation of non-marketed commodities (environmental amenities, biodiversity), environmental policy making under uncertainty, the optimal mix of corrective and distortionary tax instruments, and the dynamics of economic growth in the presence of non-reproducible natural resources.
2-5 units (Staff) not given 2004-05

ECON 244. Psychology And Economics—Experimental and field evidence related to the psychological mechanisms behind static choice, intertemporal choice, choice under risk and uncertainty, choice in social situations, and hedonics. Models of economic choice based on these findings, and how they improve the explanatory and predictive value of standard theories. Prerequisites: 202, 203, 204, 270, and 271, or consent of instructor.
2-5 units (Staff) not given 2004-05

ECON 341A,B,C. Workshop on the Economics of the Public Sector—Issues in measuring and evaluating the economic performance of government tax, expenditure, debt, and other policies; their effects on private economic activity, saving, investment, labor supply; alternative policies and methods of evaluation. Workshop format combines student research, faculty presentations, and guest speakers. Prerequisite: 241 or consent of instructor.
1-10 units, Aut, Win, Spr (Staff)

ECON 343A,B,C. Workshop in Environmental and Natural Resources Economics—Economic analyses of environmental and natural resource problems and policies. Presentations by faculty and graduate students.
1-10 units, Aut, Win, Spr (Staff)

F. ECONOMICS OF LABOR

To receive credit for the field, students must complete two from 246, 247, and 248.

2-5 units, Aut (Pencavel)

ECON 247. Labor Economics II—The economics and econometrics of program evaluation. The impact of public policies on labor demand, labor supply, human capital and wage determination. Social, natural, and quasi-experiments.
2-5 units, Win (Pisterri)

ECON 249. Personnel Economics—(Enroll in MGTECON 652.)
4 units (Staff)

ECON 345A,B,C. Economic Applications Workshop
1-10 units, Aut, Win, Spr (Staff)

G. ECONOMICS OF INDUSTRY

To receive credit for the field, students must complete 257 and 258 and submit one research paper, the subject of which has been approved in advance by one of the faculty teaching 257, 258, or 260.

ECON 256. Economics of Health and Medical Care—(Same as 156; see 156.)
5 units, Aut (Bhattacharya)

ECON 257,258. The Economics of Industry, Regulation, and Firm Organizations I and II—Theoretical and empirical analyses of the determinants of market structure; firm behavior and market efficiency in oligopolies; price discrimination; price dispersion and consumer search; differentiated products; the role of information in markets, including insurance and adverse selection; auctions; collusion and cartel behavior; advertising; entry and market structure; market dynamics; strategic behavior.
2-5 units, 257: Aut (Bresnahan, Einav), 258: Win (Noll, Wolak)

ECON 260. Special Topics in Industrial Organization and Regulation—Current research and policy interest. Topics may include: empirical tests of oligopoly theories; non-price competition; entry and market structure; the role of information in markets; auctions; e-commerce; dynamics of change in regulatory policy; theory of economics institutions; antitrust status of joint ventures; and use of capacity, innovation, and product variety as a barrier to entry. Significant unresolved research issues and promising ways to attack them. Prerequisite: 257. Recommended: 258.
2-5 units, 257, Spr (Einav, Noll)

ECON 355A,B,C. Industrial Organization Workshop—Current research in the field by visitors, presentations by students, and discussion of recent papers. Students write an original research paper, make a formal presentation, and lead a structured discussion.
1-10 units, Aut, Win, Spr (Staff)
H. INTERNATIONAL ECONOMICS

To receive comprehensive credit in this field, students must complete 266 and either 265 or 269, and submit a paper from one of these three courses. All three courses are recommended. For students doing research in the field, further supporting courses are found in the fields of economic development, industrial organization, and public finance.

ECON 265. Open Economy Macroeconomics—Theoretical foundations of international macroeconomics and empirical evidence. The intertemporal approach to the current account, international asset trade, exchange rate economics, balance of payments crises, international capital flows and sovereign risk, and welfare economics of exchange rate regimes.

2-5 units, Spr (M. Wright)

2-5 units, Win (Rossi-Hansberg)

ECON 269. International Financial Markets and Monetary Institutions—(Same as 169; see 169.)

5 units (Staff) not given 2004-05

ECON 365A,B,C. International Trade Workshop

1-10 units, Aut, Win, Spr (Staff)

I. ECONOMETRICS

A student may satisfy the requirements for the econometrics field by completing the requirements of one of two subfields:

I1: Theoretical Econometrics: To receive credit in the theoretical econometrics subfield, students must complete 273A and 273B.

I2: Applied Econometrics: To receive credit in the applied econometrics subfield, students must complete 273A and either 274 or 275. As well, the student must complete a course (or set of courses) that is empirically oriented. The last requirements must be approved by the Director of Graduate Study, in consultation with the instructor of 274 or 275.

ECON 270. Intermediate Econometrics I—(Same as 170.)

2-5 units, Aut (Vytlacil, Wolak)

ECON 271. Intermediate Econometrics II—(Same as ECON 171.)

Linear regression model, relaxation of classical-regression assumptions, simultaneous equation models, linear time series analysis. Limited enrollment. Prerequisite: 270.

2-5 units, Aut (Wolak, Mahajan)

ECON 272. Intermediate Econometrics III—(Same as ECON 172.)

Continuation of 271. Nonlinear estimation, qualitative response models, limited dependent variable (Tobit) models. Limited enrollment. Prerequisite: 271.

2-5 units, Win (McCurdy)

ECON 273A. Advanced Econometrics I—Parametric asymptotic theory. Large-sample properties of estimators defined as the solution to an optimization problem, under a variety of assumptions for the true data generation process. General large sample results for maximum likelihood, nonlinear least squares, nonlinear instrumental variables estimators, including the generalized method of moments estimator under general conditions. Asymptotic hypothesis testing procedures derived for each estimation framework.

2-5 units, Aut (Amemiya)

ECON 273B. Advanced Econometrics II—Simulations methods. Semiparametric and nonparametric methods. Optimal rate of convergence and semiparametric efficiency bounds. Prerequisite: 273A.

2-5 units, Win (Mahajan)

ECON 274. Limited Dependent Variables—Discrete choice models; Tobit models; Markov chain and duration models. Prerequisite: 273 or consent of instructor.

2-5 units (Staff) not given 2004-05

2-5 units, Spr (Hansen)

ECON 276. Advanced Econometrics—Possible topics: robust estimation, stochastic control, prediction theory, Bayesian analysis, factor analysis, pooling of time series and cross section data. Prerequisites: 273A,B.

2-5 units (Staff) not given 2004-05

ECON 370A,B,C. Econometrics Workshop

1-10 units, Aut, Win, Spr (Staff)

J. MICROECONOMIC THEORY

To receive credit for this field, students must complete two courses in one of the following two tracks:

Track 1: General Theory: 280, 281, 284, 286 and 287

Track 2: Decisions, Contracts and Incentives: 282, 283, 286 and 289

(Note: taking one course from each track does NOT satisfy the microeconomic theory field requirement)

ECON 278. Neuroeconomics—(Same as 178, PSYCH 278.) Techniques from neuroscience and psychology to study how the brain makes economic decisions; implications for the social sciences, especially economics and political science. Topics include: brain processes related to reward, control, and attention; role of emotion in decision making; morality; emotion in social encounters; bargaining and strategic thinking; decision making and probability assessment in risky situations; intertemporal decision making; and addiction. Prerequisite: graduate background in neuroscience or economics, or consent of instructor.

3 units, Aut (Knutson, Rangel)

ECON 279. Experimental Economics—An introduction to experimental economics, its methods, and major subject areas that have been addressed by laboratory experiments. Focus is on a series of experiments that build on one another, and allow researchers with different theoretical dispositions to narrow the range of potential disagreement. Prerequisites: 202, 203, 204, or consent of instructor.

2-5 units, Win (Niederle)

ECON 280. Welfare Economics—Social choice theory with and without interpersonal comparisons; Pareto efficiency with public goods, externalities, and non-convexities; potential Pareto improvements. Private information, incentive constraints, and mechanism design. Welfare measurement, cost benefit analysis, and analysis of economic policy reform.

2-5 units (Staff) not given 2004-05

2-5 units, Spr (Hammond)

ECON 282. Contracts, Information, and Incentives—Issues and recent developments in mechanism design and the theory of contracts. Topics: hidden characteristics and hidden action models with one and many agents, role of commitment and renegotiation in long-term relationships, incomplete contracts and applications to the theory of the firm.

2-5 units, Win (Segal)

ECON 283. Advanced Topics in Contracts and Organization—Recent developments and promising research. Topics may change from year to year, but may include: reputational concerns and implicit contracts in long-term relationships, property rights and the hold-up problem, multilateral contracting, communication requirements of allocation problems, communication without full commitment (cheap talk). Prerequisite: 282 or consent of instructors.

2-5 units, Spr (Tadelis)
ECON 284. Topics in Dynamic Financial Economics—Dynamic general equilibrium asset pricing and economic volatility. Characteristics of real and financial volatility, the equity risk premium, the term structure of interest rates, and the forward premium. The role of dynamic learning and diversity of beliefs in the propagation of economic volatility, and the relationship of such diversity to money non-neutrality, the real effect of monetary shocks, and real business cycles theories; implications for problems of time consistency in monetary policy, rules versus discretion and alternative monetary rules. Recent papers presented by students. Prerequisites: 204 or equivalent, basic probability theory, or consent of instructor.

2-5 units (Staff) not given 2004-05

ECON 285. Market Design—Analysis of rules that govern the operation of markets with and without the assistance of prices. Emphasis is on markets in which complicated preferences and constraints, limitations on the use of cash, or variations in contract details among bidders decisively impair the performance of simple market rules. Matching markets such as the National Resident Matching Program and airline slot exchanges, asset auctions such as the spectrum auctions, electricity markets, and Internet procurement services.

2-5 units, Spr (Milgrom, Niederle)

ECON 286. Game Theory and Economic Application—Solution concepts for non-cooperative games, repeated games, games of incomplete information, reputation, and experiments. Standard results and current research topics. Prerequisite: 203 or consent of instructor.

2-5 units, Aut (Levin)

ECON 287. General Equilibrium Theory—Existence, efficiency, and Walrasian equilibrium in exchange economies. Production, financial markets, incomplete markets, sequence economies with infinitely-lived agents. Prerequisites: 204 or consent of instructor.

2-5 units (Staff) not given 2004-05

ECON 288. Computational Economics—Computational approaches to solving economic problems. Overview of numerical analysis. Economic problems in computationally tractable forms, and the use of numerical analysis techniques to solve them. Examples of problems solved numerically (general equilibrium models, optimal taxation, dynamic programming, economic growth, life-cycle models, intervention in commodity markets, Bayesian econometrics, equilibria of dynamic and repeated games, and nonlinear rational expectations equilibria with asymmetric information). Prerequisite: equivalent of first-year graduate core economics sequence.

2-5 units, Win (Judd)

ECON 289. Advanced Topics in Game Theory and Information Economics—Topics include repeated games with informational asymmetries, including applications to collusion as well as government policy games and dynamic insurance problems; advanced topics in auction theory and mechanism design; intrapersonal games, such as self-control problems and dynamic inconsistency; information acquisition in decision problems, games, and mechanisms.

2-5 units (Staff) not given 2004-05

ECON 290. Multiplayer Decision Theory—(Same as MGTECON 608.) Students and faculty review and present recent research papers on theories and economic applications of decision theory, game theory, and mechanism design. Applications include market design and analyses of incentives and strategic behavior in markets, and topics such as auctions, bargaining, contracting, and computation.

4 units (Staff) not given 2004-05

ECON 292. Comparative Analysis of Organizations and Institutions—Game theoretic; classic and evolutionary analysis of institutions as multiple equilibria. Norms, social embeddedness, organizations as conventions, contract enforcement and corporate governance mechanisms, and states. Institutional complementarities and diachronic institutional linkage.

2-5 units (Staff) not given 2004-05

ECON 385A,B,C. Mathematical Economics Workshop

1-10 units, Aut, Win, Spr (Staff)

ECON 391A,B,C. Seminar in Comparative Institutional Analysis—Game theoretic (classic and evolutionary analysis of institutions as multiple equilibria). Norms, social embeddedness, organizations as conventions, contract enforcement and corporate governance mechanisms, and states. Institutional complementarities and diachronic institutional linkage.

1-10 units, Aut, Win, Spr (Staff)

OVERSEAS STUDIES

Courses approved for the Economics major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

ECON 161X. The German Economy in the Age of Globalization

4-5 units, Win (Klein)

FLORENCE

ECON 79X. Exploratory Data Analysis

3 units, Aut (Loeb)

OXFORD

ECON 117X. Economic and Social History of England, 1750-1950

3-5 units, Aut (Greif)

ECON 122X. Explorations in England’s Premodern Economic, Social, and Political History

3-5 units, Aut (Greif)

PARIS

ECON 124X. Building the European Economy: Economic Policies and Challenges Ahead

5 units, Aut (Le Cacheux)

ECON 125X. Globalization and Its Effect on France and the European Union

5 units, Spr (Germanaune)

SANTIAGO

ECON 119X. The Chilean Economy: History, International Relations, and Development Strategies

5 units, Spr (Muñoz)

ECON 160X. Latin America in the International Economy—(Same as LATINAM 119X.)

5 units, Win (Muñoz)

ECON 165X. Latin American Economies in Transition—(Same as LATINAM 130X.)

5 units, Aut (Muñoz)

Chair: Robert M. Polhemus
Director of Creative Writing Program: Eavan Boland

Professorships: John B. Bender (English, Comparative Literature; on leave Spring), Eavan Boland, Terry Castle (on leave Winter, Spring), W. S. Di Piero (on leave Autumn), J. Martin Evans, John Felsiner (on leave), Kenneth W. Fields, Shelley Fisher Fishkin, Jay W. Fliegelman, Roland Greene (English, Comparative Literature), Seth Lerer (English, Comparative Literature), Andrea A. Lunsford, Franco Moretti (English, Comparative Literature; on leave), Stephen Orgel, Patricia A. Parker (English, Comparative Literature; on leave), Robert M. Polhemus, Arnold Rampersad, David R. Riggs, Ramón Saldívar (English, Comparative Literature), Elizabeth Tallent (on leave Autumn), Tobias Wolff

Associate Professors: Ursula Heise, Gavin Jones, Paula Moya, Jennifer Summit (on leave)

Assistant Professors: Brett Bourbon, Denise Gigante (on leave Autumn), Nicholas Jenkins, Robert Kaufman, Sianne Ngai (on leave Autumn), Christopher Rovee, Alex Woloch

Professor (Teaching): Larry Friedlander

Senior Lecturers: Claude Reichard

Lecturers: Andrew Altschul, Gabrielle Calvo-Crespi, Peter Campion, Lisa Cooper, Susan Dunn, Steve Elliott, Angus Fletcher, Adam Johnson, Tom Kealey, David MacDonald, Tom McNeely, Joyce Moser, Katherine Noel, Hilton Obenzinger, Eric Puchner, Malena Watrous, Marvina White (on leave)

Acting Professors: Helen B. Brooks, Carol Shloss

Consortium Professor: Bryan Wolf

Consulting Assistant Professor: Matthew Jockers

Visiting Professor: Heather McHugh

Visiting Associate Professor: Michele Birnbaum

Visiting Assistant Professor: Judith Richardson

Department Offices: Building 460, Room 201

Mail Code: 94305-2087

Phone: (650) 723-2635

Web Site: http://english.stanford.edu

Courses given in English have the subject code ENGLISH. For a complete list of subject codes, see Appendix.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The English Major is designed to provide students with both an understanding of the development of literatures in English and an appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

PREPARATION FOR THE MAJOR

The following departmental requirements are in addition to the University’s basic requirements for the bachelor’s degree. With the exception of the course in Poetry and Poetics or any other when taken to satisfy the Writing in the Major (WIM) requirement, any two of the requisite courses may be taken on a satisfactory/no credit basis at the discretion of the instructor.

MAJOR PROGRAMS OF STUDY

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several majorprograms of study. Each of these has different objectives and requirements; students should consider carefully which major corresponds most closely to their personal and intellectual objectives. Students who have declared a major before Autumn Quarter 2002 may choose to follow the department’s previous guidelines for the major. Please consult the departmental website or the undergraduate English coordinator for details about requirements for the major before Autumn 2002.

MAJOR IN ENGLISH LITERATURE

This program provides for the interests of students who wish to understand the range and historical development of British and American literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis.

Students declaring a major in English Literature during Autumn Quarter 2002 and thereafter must choose a total of twelve 5-unit courses. At least one of these courses must be in American literature and at least one must be in British literature after 1750. The twelve courses must be chosen to fulfill the following six categories of requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. Five additional elective courses chosen from among those offered by the Department of English. Students must select three of these courses from one of the following concentrations:
   a) a specific genre: Drama, Film, Lyric Poetry, or Prose Fiction
   b) a specific historical period: Literature before 1750, Literature between 1750 and 1900, or Literature after 1900
   c) one of the following areas of interest: Gender and Sexuality, Language and Rhetoric, Literary Theory, Race and Ethnicity, or Single Authors

   Please consult the English Department for a list of the specific courses under each of these concentrations for 2004-05. In lieu of one of these concentrations, students may take three courses from another well-defined area of interest with the approval of their adviser and the Director of Undergraduate Studies.

   In place of one of these five elective courses, students may choose one upper-division course in a foreign language read in the original language. Students may petition the Director of Undergraduate Studies to transfer as many as four English courses taken at other approved universities towards their major.

   At least one of the courses satisfying the major must be a Major’s Seminar. A Major’s Seminar is any of the 5-unit seminar courses offered in the English department or an English seminar offered in the Stanford in Oxford program at St. Catherine’s College.

   Students are urged not to postpone satisfying this requirement until late in their major career. Undue tardiness may result in a delay of degree conferral. Students are encouraged to take seminar format courses in both the junior and senior years.

Foreign Language Requirement—There is no foreign language requirement for English majors beyond the university requirement, but students who plan to study English at the graduate level should be aware that advanced reading skills in one or more foreign languages enhance their chances of admission to and success in most Ph.D. programs.

EMPHASIS IN THE ENGLISH MAJOR

English with a Creative Writing Emphasis—This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or fiction. Students declaring an English major with a Creative Writing Emphasis must take a total of twelve 5-unit courses offered through the Department of English and the Program in Creative Writing and fulfill the seminar requirement. The twelve courses must be chosen to fulfill the following requirements:
ENGLISH WITH INTERDISCIPLINARY EMPHASIS

This major is intended for students who wish to combine the study of a broadly defined literary topic, period, genre, theme or problem with an interdisciplinary program of courses relevant to that inquiry. Students are required to fulfill the language and seminar requirements listed under the major in English. Students declaring an English major with an interdisciplinary emphasis during Autumn Quarter 2002 and thereafter must choose a total of fourteen 5-unit courses. These courses must fulfill the following requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
4. Two courses in British literature after 1900.
5. One course in 20th-century literature.
6. One course in 20th-century literature.
7. Three additional elective courses chosen from among those offered by the Department of English. Students must select two of these courses in relation to their interdisciplinary focus.

Four courses related to the area of inquiry from such disciplines as anthropology, the arts (including the practice of one of the arts), classics, comparative literature, European or other literature, feminist studies, history, modern thought and literature, political science, and African American studies. These courses should form a coherent program and they must be relevant to the focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by the interdisciplinary program director. In addition, students in the interdisciplinary program must write at least one interdisciplinary paper. This may be a senior honors essay (197), a senior independent essay (199), an individual research paper (194 or 198), or a paper integrating the material in two courses the student is taking in two different disciplines.

MINORS

Both the Department of English and the Creative Writing program offer a distinct minor.

English Literature—The minor in English Literature offers some flexibility for those students who want to pursue specific interests within British and American literature, while still requiring certain courses that ensure coverage of a variety of periods, genres, and methods of studying literature. In order to graduate with a minor in English, students must complete the following program of seven 5-unit courses, at least one of which must be a seminar:

1. ENGLISH 160. Poetry and Poetics.
2. One course from each of the following historical periods:
   a) British literature to 1750
   b) British literature from 1750 to 1900 or American literature before 1900
   c) 20th-century British or American literature
3. Shakespeare
4. Two elective courses.

One of the two elective courses may be a course in Creative Writing.

Creative Writing—The minor in Creative Writing offers a structured environment in which students interested in writing fiction or poetry develop their skills while receiving an introduction to literary forms. Students choose a concentration in either fiction or poetry. All courses must be taken for a letter grade.

1. Four writing workshops, three in the chosen concentration, one outside.
   a) Fiction minors must first take ENGLISH 90, Fiction Writing, then one or two quarters of 190, Intermediate Fiction Writing, or 290A Advanced Fiction Writing. The fourth writing course must be ENGLISH 92, Poetry Writing.
   b) Poetry minors must first take ENGLISH 92, Poetry Writing, then one or two quarters of 192, Intermediate Poetry Writing, or 292 Advanced Poetry Writing. The fourth writing course must be ENGLISH 90, Fiction Writing.
2. Two literature courses:
   a) Fiction minors must take ENGLISH 146, The Development of the Short Story; poetry minors must take ENGLISH 160, Poetry and Poetics.
   b) One elective course, selected with the approval of the Creative Writing program adviser. Beginning with academic year 2004-05, ENGLISH 94, Introduction to the Creative Writing Minor, is required instead of the elective literature Course.

INTERDEPARTMENTAL MAJORS

English and French Literatures—This major provides a focus in British and American literature with additional work in French literature. The program of each student must be approved by the Director of Undergraduate Studies in English and by the Department of French and Italian.

Students declaring a major in English and French during Autumn Quarter 2002 and thereafter must choose a total of thirteen 5-unit courses, at least one of which must be a seminar. In addition, at least one of the courses must be in American literature and at least one must be in British literature after 1750. These courses are to be selected from the following categories.

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. Two elective courses.
7. A coherent program of four courses in French literature, read in the original.

English and German Literatures—Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in German literature, read in the original, with approval by the departments involved as specified above.

English and Italian Literatures—Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in Italian literature, read in the original, with approval by the departments involved as specified above.

English and Spanish or Spanish American Literatures—Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in Spanish literature, read in the original, with approval by the departments involved as specified above.
ADVANCED WORK

INDIVIDUAL RESEARCH

Students taking 100- or 200-level courses may, with the consent of the instructor, write a follow-up 5-unit paper based on the course material and due no later than the end of the succeeding quarter (register for 194). The research paper is written under the direct supervision of the professor; it must be submitted first in a preliminary draft and subsequently in a final version.

INTEGRATED WORK

Students taking (either simultaneously or consecutively) two or three courses which have a clear thematic or historical relationship to each other may, with the consent of the relevant instructors, write one large-scale paper of 7,000-10,000 words integrating the material in the courses in question.

SENIOR INDEPENDENT STUDY

Independent study is open, on approval by the department, to seniors majoring in English literature who wish to work throughout the year on a critical or scholarly essay of about 10,000 words. In rare circumstances, advisers may nominate exceptional students for honors if the student’s thesis is outstanding and the program of study has been approximately equivalent to that required of regular honors students.

HONORS PROGRAM

Students who wish to undertake a more extensive program in English literatures, including the Honors Seminar and independent research, are invited to apply for the honors program no later than Autumn Quarter of the junior year. All outstanding students are encouraged to engage in an honors thesis project.

Admission is selective. Provisional admission is announced in December. Permission to continue in the program is contingent upon submission, by May 15 of the junior year, of a Senior Honors Essay proposal with a bibliography.

In the Spring Quarter of the junior year, students take a 5-unit honors seminar on critical approaches to literature. (Students who are studying at Oxford or at other institutions may be exempted from this seminar on request and with the approval of the director of the honors program). The junior year seminar is designed to help students develop proposals, pose methodological questions, investigate theoretical problems, and become aware of the various approaches to literary studies.

In Winter Quarter of the senior year, all honors students take a 3-unit essay workshop focused on the process of researching and writing the essay.

In the senior year, honors students complete the senior honors essay for 10 units under supervision of a faculty adviser. The deadline for submitting the honors essay is May 15.

Students in the honors program complete all the requirements of the major and the following:

Junior seminar and workshop, 8 units total
Senior Honors Essay, 10 units

Note—For other opportunities for extended essay projects, see Senior Independent Essay and ENGLISH 194 and 199.

HONORS PROGRAM IN HUMANITIES

An honors program in Humanities is available for English Literature majors who wish to supplement the major with a related and carefully guided program of study. See the “Interdisciplinary Studies in Humanities” section of this bulletin for a description of the program. Students wishing to take the Comparative Literature option within the honors program in Humanities should see the “Comparative Literature” section of this bulletin.

THE ENGLISH MAJOR AND THE OVERSEAS CAMPUSES

The flexibility of the English major permits students to attend an overseas campus in any quarter, but it is advisable, and in some cases essential, that students spend their senior year at Stanford if they wish to participate in the Honors Program or a special in-depth reading course. For more information on Stanford overseas programs, see the “Overseas Studies” section of this bulletin.

Students should consult their advisers and the undergraduate program officer to make sure that they can fulfill the requirements before graduation. The Stanford Program in Oxford usually offers courses which apply toward both University requirements and area requirements for the English major. In either case, students should save the syllabi from their courses if they wish to apply to use them to fulfill an English major requirement.

VISITING STUDENTS

Students who do not wish to become candidates for a graduate degree, but who are qualified to meet the standards of admission to a master’s or Ph.D. program, may apply to Graduate Admissions, Registrar’s Office, Stanford University for admission as nonmatriculated students for a period of not more than three consecutive quarters. Each quarter they may take up to three English courses numbered 101 to 299, or two such courses and (with the consent of the instructor) one English course numbered above 300.

GRADUATE PROGRAMS

For University regulations governing advanced degrees, see the “Graduate Degrees” section of this bulletin.

Eligibility—Students with a bachelor’s degree of acceptable quality may apply to pursue graduate work toward an advanced degree in English at Stanford. (Formal application for candidacy is a separate step taken somewhat later.) Students whose previous preparation is in a field other than English are expected to make up deficiencies. Credits for previous graduate work at Stanford or elsewhere more than five years old may be reevaluated or rejected.

Graduate students are admitted as candidates for only the Ph.D. or the M.A. in English and American Literature. The M.A. program is a terminal, one-year program without financial aid.

MASTER OF ARTS

Candidates may earn the master’s degree in English and American Literature by satisfying the following requirements:

1. Successful completion with a 3.0 (B) grade point average (GPA) of at least nine courses (a minimum of 45 units), two of which must be 300-level courses. Ordinarily, graduate students enroll in courses numbered 200 and above. They may take no more than three courses numbered 101-199 without the consent of the Director of Graduate Studies. The master’s student may take no more than 10 units of directed reading and research (ENGLISH 398). Interested students should consult their faculty adviser or the graduate program adviser for further details.

During the first two weeks of the first quarter, candidates for the master’s degree in English and American Literature should consult the adviser designated by the Director of Graduate Studies in order to draw up a three quarter study plan. The student’s program consists of five required courses: ENGLISH 296; two courses in literature before 1800 and two courses in literature after 1800; plus four elective courses representing a mixture of survey and specialized courses chosen to guarantee familiarity with a reasonable proportion of the works on the reading list for doctoral candidates. Students whose undergraduate transcripts do not show courses in the following areas must take courses in these areas as part of their M.A. program: Medieval, Renaissance, 18th century, 19th century, 20th century (the latter two in either British or American literature). Normally, no more than two courses taken outside the department may count toward the degree, but the Graduate Studies Committee considers exceptions.

Candidates who can demonstrate unusually strong preparation in the history of English literature may undertake a 40 to 60-page master’s thesis. Such candidates may register for up to 10 units of ENGLISH 399 with the faculty member who supervises the thesis.
work. Candidates who write a master’s thesis may petition to be excused from up to 10 units of the requirements described above. The additional 35 units normally consist of the five required courses and two elective courses. These courses are chosen by the student and approved by the adviser and the Director of Graduate Studies.

2. Demonstration of a reading knowledge of one foreign language. (For ways of fulfilling this requirement, see the section below on language requirements for the Ph.D.)

**COTERMINAL BACHELOR’S AND MASTER’S DEGREES IN ENGLISH LITERATURE**

Students in the major who are interested in further graduate work in English may apply for Stanford’s coterminal master’s program. Candidates for a coterminal master’s degree must fulfill all requirements for the M.A. in English (including the language requirement), as well as general and major requirements for the B.A. in English. A minimum GPA of 3.7 in the major is required of those applying for the coterminal master’s degree. Students must also take the GRE exam in the year in which they apply. No courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the M.A. No courses taken more than two quarters prior to admission to the coterminal master’s program may be used to meet the 45-unit University minimum requirement for the master’s degree.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

**COTERMINAL PROGRAM WITH SCHOOL OF EDUCATION**

Students interested in becoming middle school and high school teachers of English may apply for admission to the Coterminal Teaching Program (CTP) of the Stanford Teacher Education Program (STEP) in the School of Education. CTP students complete a special curriculum in English language, composition, and literature that combines a full English major with supplemental coursework in subjects commonly taught in California public schools and a core program of foundational courses in educational theory and practice. They are then admitted to STEP for a fifth year of pedagogical study and practice teaching. Students who successfully complete the curriculum requirements are able to enter STEP without the necessity of taking either the GRE or the usual subject matter assessment tests. At the end of five years, CTP students receive a B.A. in English, an M.A. in Education, and a California Secondary Teaching Credential. Students normally apply to the Coterminal Teaching Program at the end of their sophomore year or at the beginning of their junior year. For complete program details and for information on how to apply, consult the Director of Undergraduate Studies in English or the CTP coordinator in the School of Education.

**DOCTOR OF PHILOSOPHY**

University regulations regarding the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin.

The following department requirements, dealing with such matters as residence, dissertation, and examinations, are in addition to the University’s basic requirements for the doctorate. (Students should consult the most recent edition of The Ph.D. Handbook; copies are available in the English graduate studies office.)

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor’s degree. Candidates are required to complete at least 135 units of graduate work in addition to the doctoral dissertation. At least three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.

A student may count no more than 65 units of non-graded courses toward the 135 course units required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded units (normally fourteen courses) of the 135 required total units (396L, 397, 398, and 399 do not count toward the 70 graded units). No more than 15 units (normally three courses) may come from 100-level courses.

This program is designed to be completed in five years. Five quarters of supervised teaching, two as a teaching assistant in a literature course, one as a teaching apprentice, and two as the instructor of a Program in Writing and Rhetoric (PWR) course, are a requirement of the Ph.D. program.

In the first quarter of their first year, students take a 2-unit seminar in pedagogy as preparation for their initial teaching assistantship. In the first quarter of their second year, students take a pedagogy seminar and an apprentice teaching program. The seminar and apprentice teaching constitute a 50-percent teaching appointment. Apprentice teachers attend the classes and conferences of a senior mentor/instructor for two to three weeks. While teaching during the second and third quarters of the second year, students continue to participate in a series of PWR pedagogy workshops and visit one another’s classrooms.

**ENGLISH AND AMERICAN LITERATURE**

All students are expected to do course work across the full range of English and American literature. Students would be required to fulfill the following requirements. Note: fulfillment of requirements 1, 2, and 3 must be through Stanford courses; students will not be excused from these three requirements or granted credit for course work done elsewhere.

1. ENGLISH 396L, Introduction to Graduate Study for Ph.D. Students (5 units), a course that introduces students to the methods of literary study, and ENGLISH 396L, Pedagogy Seminar I, for first year students (2 units).

2. Graduate-level (i.e., at least 200-level) course work in English literature before 1700, and English and American literature after 1700 (at least 5 units of each).

3. Graduate-level (i.e., at least 200-level) course work in some aspect of literary theory (e.g., courses in literary theory itself, narrative theory, poetics, rhetoric, cultural studies, gender studies; at least 5 units).

4. Students concentrating in British literature are expected to take at least one course (5 units) in American literature; students concentrating in American literature are expected to take at least one course (5 units) in British literature.

5. Of all courses taken, a minimum of six courses for a letter grade must be graduate colloquia and seminars, of which at least three must be graduate seminars. The colloquia and seminars should be from different genres and periods, as approved by the adviser.

6. Completion, in Autumn Quarter of the second year, of a pedagogy seminar which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during Winter and Spring quarters. There are no units associated with this work.

7. The remaining units of graded, graduate-level courses and seminars should be distributed according to the adviser’s judgment and the candidate’s needs. A student may receive graduate credit for no more than three 100-level courses in the Department of English.

8. Consent of the adviser if courses taken outside the Department of English are to count toward the requirement of 70 graded units of course work.

9. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the graduate studies committee in consideration of the student’s overall record for the first year’s work in conjunction with performance on the examination. Note: A student coming to the doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The director of graduate studies considers the petition in conjunction with the student’s overall performance.

10. A University Oral Examination to be taken no later than the Spring Quarter of the student’s third year in the Ph.D. program. This examination covers the field of concentration as defined by the student and the student’s adviser.
ENGLISH AND COMPARATIVE LITERATURE

The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of England and of at least one foreign country, for one period. Approximately half of the student’s course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.

This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should consult a Department of English adviser, but faculty from Comparative Literature may also provide useful supplementary information.

The requirements are as follows:

1. Qualifications: see item 9 under requirements of the Ph.D. program in English literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350, but instead include on their reading list a selection of works from a foreign literature read in the original language.

2. A knowledge of the basic structure of the English language and of Chaucer. This requirement may be met by examination, or by taking 10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature including Chaucer. No particular courses are required of all students.

3. A 5-unit course, ENGLISH 396, Introduction to Graduate Study, and a 2-unit course, ENGLISH 396L, Seminar in Pedagogy I.

4. Completion, in Autumn Quarter of the second year, of a pedagogy seminar, which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during winter and spring quarter. There are no units associated with this work.

5. A knowledge of one foreign language sufficient to take graduate-level literature courses in a foreign-language department and an advanced reading knowledge of a second language.

6. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign literature read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this requirement may be satisfied through courses in reading and research. A student may receive graduate credit for no more than three 100-level courses in the Department of English.

7. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism.

8. A University oral examination covering the field of concentration (as defined by the student and the student’s adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study. However, those who spend the third year studying abroad may take this examination after their return early in the fourth year.

LANGUAGE REQUIREMENTS

All candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages. Candidates in the earlier periods must offer Latin and one of the following languages: French, German, Greek, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must offer either French, German, or Latin as one language and may choose the second language from the following: Greek, Latin, French, German, Italian, Spanish, Russian, or another language relevant to the student’s field of study. In all cases, the choice of languages offered must have the approval of the candidate’s adviser. Any substitution of another language must be approved by the Director of Graduate Studies.

The Graduate Studies Committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before registration in the following year), and the other by the end of the third year.

Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:

1. A reading examination given each quarter by the various language departments, except for Latin and Greek.

2. For Latin and Greek, an examination by the Department of English. The Latin examination is given before registration in the Autumn Quarter in order to permit those who need the course to register for Latin 3. It is also given in the eighth week of the Winter and Spring quarters, along with other department examinations for languages not tested by the Educational Testing Service.

3. Passage with a grade of ‘B’ or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford. As an alternative for Latin, French, Italian, German, and Spanish, passage of CLASSLAT 51 and 52, FRENLANG 50, ITALLANG 50, GERLANG 52, and SPANLANG 50, respectively, with a grade of ‘B’ or higher.

CANDIDACY

Students are expected to file for candidacy after successful completion of qualifying procedures and, in any event, by the end of the second year of doctoral study. Candidacy is valid for five years, and may be extended, subject to satisfactory progress.

DISSERTATION

As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work.

Immediately after the dissertation topic has been approved by the adviser, the candidate should file a formal reading committee form as prescribed by the University.

The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.

JOINT PH.D. IN ENGLISH AND HUMANITIES

The Department of English participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in English and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

PH.D. IN MODERN THOUGHT AND LITERATURE

Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half to interdisciplinary studies. Interested students should see the “Modern Thought and Literature” section of this bulletin and consult the chair of the program.
CREATIVE WRITING FELLOWSHIPS

The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are not degree-granting fellowships. Information is available in the Creative Writing office, (650) 725-1208.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

NUMBERING SYSTEM

Pre-1750:
100-110 Lecture Courses
111-119 Seminar Courses
1750-1900:
120-129 Lecture Courses
130-139 Seminar Courses
Post-1900:
140-149 Lecture Courses
150-159 Seminar Courses
Required Courses:
160-169
160 Poetry and Poetics
163, 163B, 163F Shakespeare
Themes and Topics:
170-179 Lecture Courses
180-189 Seminar Courses
Courses for Advanced Undergraduates and Graduate Students:
200-289
Graduate Colloquia:
300-313
Graduate Seminars:
314-389
Writing Courses, Workshops, Individual Study:
90-99, 190-199, 290-299, 390-399

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by English department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in English are advised to consider satisfying their GER:1b,c requirements by registering for the following IHUM courses.

IHUM 37A,B. Literature into Life: Alternative Worlds—The genres of poetry, drama, and fiction from the Renaissance to the present day, focusing on the relationship between art and life. How does literature come alive on the page? What goes into a vivid representation of lived social experience? How do writers respond to historical crises? Parallel cases from art and music. GER:1b,lc (two quarter sequence)

IHUM 37A. 5 units, Win (Riggs)
IHUM 37B. 5 units, Spr (Felsoner)

INTRODUCTORY COURSES

INTRODUCTORY SEMINARS

Suffix N = Preference to freshmen
Suffix Q = Preference to sophomores

ENGLISH 57N. Sex and Texts: Women in the History of Rhetoric—Stanford Introductory Seminar. Preference to freshmen. Rhetorical history with emphasis on gendered rhetorical practices. Comparison of male and female rhetors such as the Sumerian high priestess Enheduanna and Sappho compared with the male poet Alcaeus. Contemporary rhetorical practices of Gloria Anzaldúa, Audre Lorde, Anna Deavere Smith, and Spike Lee. Focus is on connections across texts, rhetorical strategies within texts, and how gender authorizes texts and rhetors. GER:3a
4 units, Win (Lunsford)

ENGLISH 21. Masterpieces of American Literature—(English majors and others taking 5 units, register for 121.) Political, racial, and sexual questions which inform works of American literature from the early Republic to the mid-20th century. GER:3a
3 units, Spr (Jones)

ENGLISH 22. Jane Austen into Film—(English majors and others taking 5 units, register for 122.) Jane Austen’s six novels and their transformation into films from the 40s to the present. Historical motives and psychological imperatives for recreating Austen’s work in cinematic form, emphasizing narrative techniques distictive to prose and camera. Fundamentals of narrative theory and cinematic analysis. GER:3a
3 units, Win (Shloss)

ENGLISH 37B. Literature into Life: Alternative Worlds—(English majors and others taking 5 units, register for 122.) Jane Austen’s six novels and their transformation into films from the 40s to the present. Historical motives and psychological imperatives for recreating Austen’s work in cinematic form, emphasizing narrative techniques distinctive to prose and camera. Fundamentals of narrative theory and cinematic analysis. GER:3a
3 units, Win (Shloss)

ENGLISH 37A. Literature into Life: Alternative Worlds—(English majors and others taking 5 units, register for 122.) Jane Austen’s six novels and their transformation into films from the 40s to the present. Historical motives and psychological imperatives for recreating Austen’s work in cinematic form, emphasizing narrative techniques distinctive to prose and camera. Fundamentals of narrative theory and cinematic analysis. GER:3a
3 units, Win (Shloss)

ENGLISH 45F. American Detective Fiction: From Low Art to High Culture—(English majors and others taking 5 units, register for 145F.)
GER:3a
3 units, Win (Moser)

ENGLISH 74. The Novel: Developments in Modern Prose Narrative Fiction—(English majors and others taking 5 units, register for 174.)

The genre which has dominated modern literary culture, defined the shared social world, and offered influential models of human consciousness and interiority. Turning points in the history of the novel and how formal breakthroughs are embedded within and speak to history. Possible authors include Defoe, Austen, Dostoevsky, Dickens, Flaubert, Woolf, Beckett, Nabokov, Perec, and McCarthy. GER:3a
3 units, Sup (Woloch)

ENGLISH 74A. Modern Drama Survey—(English majors and others taking 5 units, register for 174A.)
Types of drama, the demands it makes on the reader and viewer, and the evolution of dramatic form from the Greeks (Euripides) to the Elizabethans (Shakespeare) to the first moderns (Ibsen, Strindberg, Chekhov). Contemporary drama including plays by O’Neill, Miller, Williams, Beckett, Shaffer, and Albee. GER:3a
3 units, Aut (L’Heureux)

ENGLISH 20. Masterpieces of English Literature II: From the Enlightenment to the Modern Period—(English majors and others taking 5 units, register for 120.) From the 18th to the 20th centuries. Topics include the development of the novel, the rise of the lyric, Romanticism, realism, Modernism, characterization, representation of consciousness, and the cinematic imagination. GER:3a
3 units, Win (Rovee)

ENGLISH 43. Introduction to Afro-American Literature—(English majors and others taking 5 units, register for 143.) The slave narrative and representative genres (poetry, short stories, essays, novels). Works by Douglass, Jacobs, Chesnutt, Du Bois, Dunbar, Toomer, Hurston, Wright, Baldwin, and Morrison. GER:3a
3 units, Spr (Birnbaum)

ENGLISH 60. Poetry and Poetics—(English majors and others taking 5 units, register for 160.) Introduction to the reading of poetry, with emphasis on how the sense of poems is shaped through dictum, imagery, and technical elements of verse. GER:3a
3 units, Aut (Fields), Win (Jenkins), Spr (Boland)

ENGLISH 9. Masterpieces of English Literature I: Chaucer, Shakespeare, Milton, and their Contemporaries—(English majors and others taking 5 units, register for 109.) From the late 14th to the late 17th century. GER:3a
3 units, Aut (Fletcher)
ENGLISH 58N. Lost Innocence—Stanford Introductory Seminar. Preference to freshmen. Introduction to Blake, Coleridge, Wordsworth, Byron, the Shelleys, Keats, and Austen. Is innocence a spontaneous overflow of powerful emotions or a specious name for ignorance? Does experience bring the philosophic mind or simply a jaded heart? How the Romantics probed these states of consciousness in an age of political, industrial, and cultural revolution. GER:3a
3 units, Spr (Gigante)

ENGLISH 59N. American Imagination—Stanford Introductory Seminar. Preference to freshmen. Modern American poetry. The work of poets such as Robert Frost, William Carlos Williams, Marianne Moore, Lorine Niedecker, Robert Hayden, and James Schuyler. The signature imagination that shapes a poet’s body of work; how they contribute to a uniquely American poetic imagination. GER:3a
3 units, Win (Di PIERO)

ENGLISH 62N. Eros in Modern American Poetry—Stanford Introductory Seminar. Preference to freshmen. GER:3a
3 units, Win (Fields)

ENGLISH 68N. Mark Twain and American Culture—(Same as AMSTUD 68N.) Stanford Introductory Seminar. Preference to freshmen. Mark Twain defined the rhythms of American prose, the contours of its moral map, and its promise, failures, foibles, and flaws. How his work provides a window on his time and speaks to the present. Sources include his travel books, journalism, short stories, and novels. GER:3a
3 units, Aut (Fishkin)

ENGLISH 73N. Conflict and Resolution in the Novel—Stanford Introductory Seminar. Preference to freshmen. The social work of the novel, its strategies for articulating difference, and its capacity to objectify points of view and posit resolutions to ideological disputes. The novel as an artistic device, a part of material history, and a style of social consciousness. Its relationship to language and cultural systems of representation. Readings from Franz Kafka, Milan Kundera, Toni Morrison, Umberto Eco, and John Coetzee. GER:3a
3 units, Win (Shloss)

ENGLISH 77N. Living in the Past: Italy in the Anglo-American Imagination—Stanford Introductory Seminar. Preference to freshmen. How authors including Milton, Byron, D. H. Lawrence, and Robert Hellenga have represented Italy and Italians. GER:3a
3 units, Aut (Evans)

ENGLISH 79N. The Bard in Love and Hate—Stanford Introductory Seminar. Preference to freshmen. Focus is on the complexities of love as depicted in four plays by Shakespeare. Historical issues and theatrical practices. Students perform, direct, and design the production of the plays; how a unified interpretation and theatrical style emerges from the collaborative efforts of a production team. Sources include films. GER:3a
3 units, Aut (Friedlander)

ENGLISH 82Q. Shakespeare's Plays—Stanford Introductory Seminar. Preference to sophomores. Eight representative plays; sonnets. Student papers provide topics for discussion. Students direct and perform scenes from the plays studied. GER:3a
5 units, Win (Rebhuz)

3 units, Aut (DiPirro)

PRE 1750
Lecture courses: 100-109
Seminar courses: 110-119

ENGLISH 102. Chaucer—Chaucer’s major poem The Canterbury Tales with reference to the literary, historical, and critical contexts in which it was composed and read. Text in Middle English; issues of language and translation, medieval vernacular culture, and the poetic traditions in which Chaucer wrote. GER:3a
5 units, Spr (Cooper)

ENGLISH 105. The Renaissance—Literature of 16th- and 17th-century England. Readings include More’s Utopia, Sidney’s Defence of Poetry, Donne’s Songs and Sonnets, and Milton’s Paradise Lost. GER:3a
5 units, Win (Evans)

ENGLISH 105D. Shakespearean Dilemmas: Moral Choice in Classical and Renaissance Drama—Comparative exploration of Greek and Shakespearean tragedy with focus on moral dilemmas posed by plays. Themes include tension between public and private moral codes, state regulation of sexual behavior and revenge, and the limits of personal responsibility for moral choices. GER:3a
5 units, Win (Friedlander)

ENGLISH 107. Survey of 18th-Century Literature—The rise of the novel, the influence of women writers and readers, the emergence of the lyric, the place of literature within a commercial society, and the shifting boundary between the public and the private. GER:3a
5 units, Spr (Rovee)

ENGLISH 109. Masterpieces of English Literature I: Chaucer, Shakespeare, Milton, and their Contemporaries—(Same as 9; see 9.) GER:3a
5 units, Aut (Fletcher)

ENGLISH 113. Sex and Violence in Elizabethan Drama—Preference to majors. GER:3a
5 units, Win (Riggs)

5 units, Aut (Brooks)

ENGLISH 114B. Renaissance Drama—Renaissance drama was meant to be seen, not read. Historical context, theatrical traditions, and the structure of the texts. Focus is on performance of the works by students and on film. GER:3a
5 units, Spr (Friedlander)

ENGLISH 115D. Tragedy—The development of tragedy from Aristotle to Apocalypse Now. The origins of tragedy and its place in modern life. GER:3a
5 units, Aut (Fletcher)

ENGLISH 116A. The Poetry of John Milton—Poems include The Death of a Fair Infant, the Nativity Ode, Samson Agonistes, and Paradise Regained. GER:3a
5 units, Win (Evans)

ENGLISH 1750-1900
Lecture courses: 120-129
Seminar courses: 130-139

ENGLISH 120. Masterpieces of English Literature II: From the Enlightenment to the Modern Period—(Same as 20; see 20.) GER:3a
5 units, Win (Rovee)

ENGLISH 121. Masterpieces of American Literature—(Same as 21; see 21.) GER:3a
5 units, Spr (Jones)

ENGLISH 122. Jane Austen into Film—(Same as 22; see 22.) GER:3a
5 units, Win (Shloss)

ENGLISH 123. American Literature and Culture to 1855—(Same as AMSTUD 150.) Major issues in early American cultural and literary history; developments in the fine and domestic arts; and methodological issues central to American Studies. Texts include Cotton Mather and Melville. GER:3a
5 units, Win (Fliegelman)
ENGLISH 153H. Digital Humanities: Literature, Science, and Technology—(Same as HUMNTIES 198J.) How electronic texts, literary databases, computers, and digital corpora offer unique ways of reading, analyzing, and understanding literature. Intellectual and philosophical problems associated with an objective methodology within a traditionally subjective discipline. GER:3a
5 units, Win (Duffey)

ENGLISH 181F. Lyric Poetry and Sociopolitical Engagement Today—Focus is on 20th-century U.S. and British lyric poetry; its formal, sociopolitical, and historical relationships to political awareness and commitment. Some Latin American and European poetry. Theory and criticism on lyric poetry, aesthetics, and politics. GER:3a
5 units, Win (Kaufman)

ENGLISH 181G. Keats, Shelley, and Modern Poetry and Poetics—Major works and their role in dynamics worked out in modernist poetry. 20th-century readings include Owen, Eliot, Pound, Ashbery, Duncan, O’Hara, Baraka, Guest, Palmer, Mackey, and 20th-century criticism and aesthetic theory. GER:3a
5 units, Win (Kaufman)

ENGLISH 182A. Does Literature Matter?—(Enroll in COMPLIT 136.)
3-5 units, Spr (Gelder)

ENGLISH 182C. Modernism and the Avant Garde—Literature written in English produced within the context of early 20th-century international communities of writers and artists including Cubists, Futurists, Dadaists, and Surrealists.
5 units, Aut (Dunn)

ENGLISH 183D. The Author as Problem—Preference to English majors. Theories of literary and cinematic authorship through works by or about authors considered problematic. Authors include Sylvia Plath, Philip Roth, Henry James, Araki Yasusada, Binjamin Wilkomirski, and Vladimir Nabokov. GER:3a
5 units, Spr (Ngai)

ENGLISH 186D. Nabokov and Modernism—(Enroll in SLAVGEN 156/256, COMPLIT 156D/256D.)
3-5 units, Spr (Greenleaf)

UNDERGRADUATE WORKSHOPS AND DIRECTED READING

ENGLISH 191. Advanced Writing—(Enroll in PWR 191.)
3 units, Spr (Diogenes)

ENGLISH 192W. Projects in Research Writing and Rhetoric—(Enroll in PWR 192.)
1-5 units, Aut (Obenzinger)

ENGLISH 193. Writing the Honors Thesis—(Enroll in PWR 193.)
1-5 units, Win, Spr (Obenzinger)

5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 195W. Peer Writing Tutor Training Course—(Enroll in PWR 195.)
3 units, Spr (Moneyhun)

ENGLISH 196A. Honors Seminar: Critical Approaches to Literature—Required of all juniors in the English honors program.
5 units, Spr (Bourbon)

ENGLISH 196B. Honors Essay Workshop—Required of all English honors students.
3 units, Win (Staff)

ENGLISH 197. Seniors Honors Essay
1-10 units, in two quarters, Aut, Win, Spr (Staff)

ENGLISH 198. Individual Work—Undergraduates who wish to study a subject or area not covered by regular courses may, with consent, enroll for individual work under the supervision of a member of the department. 198 may not be used to fulfill departmental area or elective requirements without consent. Group seminars are not considered appropriate to 198.
1-5 units, Aut, Win, Spr, Sum (Staff)
ENGLISH 199. Senior Independent Study—Open, with department approval, to seniors majoring in English who wish to work throughout the year on a 10,000 word critical or scholarly essay (see note under honors program in English). Applicants should submit a sample of their expository prose and a proposed topic for independent study with a bibliography to the director of undergraduate studies before preregistration in May of the junior year. Each student accepted is responsible for finding a department faculty director.

1-10 units, in three quarters, Aut, Win, Spr (Staff)

CREATIVE WRITING

ENGLISH 28B. The Occasions of Poetry
3 units, Aut (McHugh)

ENGLISH 29. Reading for Writers
3 units, Spr (Staff)

ENGLISH 90. Fiction Writing—Basic problems of narrative and imaginative writing. Prerequisite: PWR 1.
5 units, Aut, Win (Kealey, McNeely, Noel, Watrous), Spr (Altschul, Elliott, Kealey, McNeely, Puchner)

ENGLISH 92. Reading and Writing Poetry—Introduction to the understanding and writing of poetry. Prerequisite: PWR 1.
5 units, Aut, Win, Spr (Calvocoressi, Campion)

ENGLISH 94. Introduction to the Creative Writing Minor—For minors in creative writing. The forms and conventions of the contemporary short story and poem. How form, technique, and content combine to make stories and poems organic. Prerequisite: 90 or 92.
5 units, Aut, Win, Spr (Johnson)

ENGLISH 190. Intermediate Fiction Writing—May be taken twice. Lottery. Priority to last quarter/year in school, to majors in English with Creative Writing emphasis, and to Creative Writing minors. Prerequisite: 90.
5 units, Aut, Win, Spr (Kealey, MacDonald, McNeely, Noel, Watrous)

ENGLISH 192. Intermediate Poetry Writing—May be taken twice. Lottery. Priority to last quarter/year in school, to majors in English with Creative Writing emphasis, and to Creative Writing minors. Prerequisite: 92.
5 units, Aut, Spr (Calvocoressi, Campion)

ENGLISH 290A. Advanced Fiction Writing—Promising fiction writers who have completed the 90 and 190 workshops engage in practical criticism, and the challenges of refining a short story, draft to draft. Students selected by instructor.
5 units, Win (MacDonald), Spr (Noel)

ENGLISH 292. Advanced Poetry Writing—Promising student poets write poetry in an atmosphere of mutual aid. Students selected by instructor.
5 units, Spr (Calvocoressi)

ENGLISH 390. Graduate Fiction Workshop—For Stegner Fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.
3 units, Aut (Wolff), Win (L’Heureux), Spr (Tallent)

ENGLISH 392. Graduate Poetry Workshop—For Stegner Fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.
3 units, Aut (Fields), Win (Boland), Spr (Di Piro)

ADVANCED UNDERGRADUATE/GRADUATE

ENGLISH 202. The History of the Book
5 units, Spr (Orgel)

ENGLISH 205. Old English—The earliest English language and literature from the 8th-12th centuries. The basics of Old English grammar, short prose passages of graduated difficulty, Anglo-Saxon poems, and selections from Beowulf comparing modern translations by Heaney and Liuzzi with the original.
5 units, Win (Brown)

ENGLISH 211. Readings in Middle English—Introduction to vernacular writings produced in England from the 12th-15th centuries. Lyric and poetry, school texts, religious treatises, courtesy manuals, chronicles, and works that mattered to late medieval readers.
5 units, Spr (Cooper)

ENGLISH 260B. The Language Wars—(Same as FEMST 260B.) While the U.S. was founded on principles of linguistic plurality, the English language has long held dominance; most power came to be associated with standard English. The struggle to share linguistic power and craft inclusive theories of language use; how gender, race, and class have shaped and responded to recent language wars reflected in fiction, music, and film.
5 units, Aut (Lunsford)

ENGLISH 260G. Century’s End: Race, Gender, and Ethnicity at the Turn of the Century—How race, gender, and ethnicity were constructed in America from 1890-1914. Works by Anna Julia Cooper, Charlotte Perkins Gilman, Mark Twain, Ida B. Wells, Theodore Dreiser, Paul Laurence Dunbar, W.E.B. Du Bois, Abraham Cahan and James Weldon Johnson. The cultural and historical context that shaped them through contemporary archival materials.
5 units, Win (Fishkin)

ENGLISH 263D. All of Shakespeare’s Plays: Comedies, Histories, and Early Tragedies—First of two quarter sequence. Plays include: Julius Caesar, Hamlet, Troilus and Cressida, Othello, All’s Well That Ends Well, Measure for Measure, Timon of Athens, Macbeth, King Lear, Antony and Cleopatra, Coriolanus, Pericles, Cymbeline, The Winter’s Tale, The Tempest, and Henry VIII.
5 units, Spr (Riggs)

ENGLISH 271A. Original Skin: Flaying, Writing, and Thinking the Self in Medieval Culture—(Enroll in COMPLIT 279.)
5 units, Aut (Kay)

ENGLISH 279F. Finnegans Wake
5 units, Spr (Bourbon)

ENGLISH 296. Introduction to Critical Theory: Literary Theory and Criticism Since Plato—Required colloquium for incoming M.A. students. The history of literary theory and criticism in the Western tradition. Emphasis is on attempts to define, locate, or engage the literary in relation to language, philosophy, history, politics, sexuality, gender, and race.
5 units, Aut (Kaufman)

GRADUATE COLLOQUIA

ENGLISH 303A. High and Low Life: Polite and Popular Forms in 18th-Century Literature
5 units, Aut (Castle)

5 units, Aut (Kaufman)

ENGLISH 305H. Readings in Close Reading—The difference between reading and reading closely. Is close reading a specific method of literary criticism or theory, or does it describe a sensibility that can
accompany any interpretation? Categories and frameworks for this ubiquitous, often undefined critical practice. Traditions of close reading: formalism, psychoanalysis, ideological critique, and hermeneutics. Focus is on Freud, Empson, Barthes, de Man and contemporary critics.

5 units, Spr (Woloch)

ENGLISH 306. American Enlightenment
5 units, Win (Ngai)

ENGLISH 308J. Top Ten Books—The works of American literature most frequently taught in U.S. English departments, including authors such as Nathaniel Hawthorne, F. Scott Fitzgerald, Toni Morrison, and Maxine Hong Kingston. Cultural and historical context, and the aesthetic, social, and institutional factors that canonize these literary texts.

5 units, Aut (Greene)

ENGLISH 310. The Transatlantic Renaissance—(Same as COMPLIT 310.) The emergence of early modern transatlantic culture, emphasizing how canonical works of the Renaissance may be reimagined in a colonial context and how the productions of the colonial Americas make sense as Renaissance works. Topics: mestizaje and creole identity, gender and sexuality, law, religion and the church, mining, commerce, and government. European and American authors: Thomas More, Philip Sidney, Thomas Lodge, William Shakespeare, the Inca Garcilaso de la Vega, and lesser known figures.

5 units, Aut (Greene)

ENGLISH 310A. The Novel of Modernity—(Same as COMPLIT 310A.) Formal features of the novel of modernity focusing on the relationships among modernism, modernization, and modernity in the late 19th- and 20th-century novel in a comparative, transnational context. The force of the social historical upon the aesthetic, especially in relation to the category of subaltern modernity. Readings: Cather, Wharton, Faulkner, Juan Rulfo, García Márquez, and Toni Morrison.

5 units, Win (Saldívar)

5 units, Aut (Bourbon)

ENGLISH 330A. Modernity and 19th-Century Visual Culture—(Enroll in ARTHIST 430A.)

5 units, Win (Wolff)

ENGLISH 337F. Poetry: Postwar to Cold War—What happened to poetry in English in the wake of modernism and in the aftermath of global war. Works and controversies from 1945-50 established the form and purview of Anglo-American poetry for the next 25 years. Writers include Eliot, Pound, Auden, Stevens, and Bishop.

5 units, Spr (Jenkins)

ENGLISH 362B. African American Literary Theory—Pivotal debates over art and politics in African American scholarship. Intramural literature as scholarship within and as a dialogue among black communities about the relationships among racial identity, literary representation, literary canons, and race politics.

5 units, Win (Birnbaum)

ENGLISH 362P. Passions of the Color Line
5 units, Spr (Moya)

ENGLISH 363J. Aesthetic Theory—The philosophy of art and aesthetics. How categories of social difference such as gender, race, and class bear on questions raised in this area. Philosophical readings. Focus is on poetics and the literary arts. Authors may include Kant, Schiller, Adorno, Heidegger, Langer, Goodman, Genette, and Felski.

5 units, Win (Ngai)

ENGLISH 366F. Media Theory—Theoretical approaches to media technologies, aesthetics, and literature in the 20th century including: debates about technology; Benjamin, Brecht, and Adorno on technique and politics; McLuhan, Debord, and Baudrillard on visual media and spectacle theory; and electronic textuality, hypertext, and the relationships among technology, ideology, and media. Sources include theoretical and literary readings in media including print, video, and electronic text.

5 units, Aut (Heise)

ENGLISH 366G. Poetic Thought—Modern forms of the idea that there is a special kind of non-rational thought exemplified in poetry, understood as metaphorical or analogical thought. How do metaphors and analogies mean? How can they be true or false? How do metaphors and analogies can be used to understand the kinds of things that poems are.

5 units, Win (Bourbon)

ENGLISH 369X. Introduction to Graduate Studies: Criticism as Profession—(Enroll in COMPLIT 369, GERLIT 369.)

5 units, Aut (Berman)

ENGLISH 371. Chaucer—Canterbury Tales with reference to his other major works and those of his contemporaries including Gower and Langland. Emphasis is on locating Chaucer in his historical and cultural environment. The relationship between formalist and historicist methods of literary study; how Chaucer developed a vernacular literary language in the late 14th century. How the material culture of the medieval manuscript and early printed book is represented in Chaucer and how it conditions his transmission and reception.

5 units, Spr (Lerer)

ENGLISH 372. Milton
5 units, Win (Greene)

ENGLISH 373A. Shakespeare: Text and Performance
4-5 units, Win (Orgel)

ENGLISH 373B. Shakespeare: Text and Performance
4-5 units, Spr (Orgel)

ENGLISH 384J. Romanticism and Science—Romantic writers shared an investment in life science (physiology, embryology, cognitive neuroscience), codified later in the 19th century as biology. Major poetic productions of early Romanticism, such as Smart’s Jubilate Agno and Blake’s Jerusalem, in relation to notions of organic form being worked out through contemporary science. Philosophical and theoretical texts by Kant, Schelling, and Coleridge. The use of concepts such as generation, power, and life by the Shelleys and Keats.

5 units, Spr (Gigante)

WORKSHOPS AND DIRECTED READING

ENGLISH 394. Independent Study—Preparation for qualifying examination and for the Ph.D. oral examination.

1-10 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 395. Ad Hoc Graduate Seminar—Three or more graduate students who wish in the following quarter to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the department to supervise it.

1-5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 396. Introduction to Graduate Study for Ph.D. Students—For incoming Ph.D. students. The major modes of research, criticism, and theory currently at work in the discipline of English studies.

5 units, Aut (Lerer)

ENGLISH 396L. Pedagogy Seminar I—(Same as COMPLIT 396L.) Required for first-year Ph.D. students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students doing their teaching in a foreign language). Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.

2 units, Aut (Lerer)
ENGLISH 397A. Pedagogy Seminar II—Apprenticeship for second-year graduate students in English, Modern Thought and Literature, and Comparative Literature who teach in the Program in Writing and Rhetoric. Each student is assigned as an apprentice to an experienced teacher and sits in on classes, conferences, and tutorials, with eventual responsibility for conducting a class, grading papers, and holding conferences. Meetings explore rhetoric, theories and philosophies of composition, and the teaching of writing. Each student designs a syllabus in preparation for teaching PWR 1.

1 unit, Aut (Lunsford)

ENGLISH 398. Research Course—A special subject of investigation under supervision of a member of the department. Thesis work is not registered under this number.

1-18 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 398R. Revision and Development of a Paper—Students revise and develop a paper under the supervision of a faculty member with a view to possible publication.

5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 399. Thesis

1-10 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

Courses approved for the English major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

OXFORD

ENGLISH 114Z. Renaissance Literature, 1509-1642
5 units, Aut (Wordsworth)

ENGLISH 116Z. Restoration Literature, 1642-1740
5 units, Win (Wordsworth)

ENGLISH 140Z. Drama: Ancient and Modern
5 units, Spr (L’Heureux)

ENGLISH 154Z. Romantic Literature, 1740-1832
5 units, Spr (Plaskitt)

ENGLISH 163X. Shakespeare: The Early Plays
5 units, Aut (Wordsworth)

ENGLISH 163Z. Shakespeare: The Late Plays
5 units, Win (Wordsworth)

PROGRAM IN ETHICS IN SOCIETY

Director: Debra Satz (Philosophy)
Steering Committee: Eamonn Callan (Education), Arnold Eisen (Religious Studies), John Ferejohn (Political Science), Barbara Fried (Law School), Agnieszka Jaworska (Philosophy), Barbara Koenig (Center for Biomedical Ethics), Scotty McLean (Dean of Religious Life), Rob Reich (Political Science, on leave), Eric Roberts (Computer Science), Debra Satz (Philosophy), Allen Wood (Philosophy), Lee Yearley (Religious Studies)

Affiliated Faculty: Kenneth Arrow (Economics, emeritus), Donald Barr (Sociology), Barton Bernstein (History), Michael Bratman (Philosophy), Albert Camarillo (History), Nadeem Hussain (Philosophy), David Kennedy (History), Tamar Schapiro (Philosophy), David K. Stevenson (Pediatrics), Sylvia Yanagisako (Cultural and Social Anthropology)

Mail Code: 94305-2155
Phone: (650) 723-0997
Email: joanieb@stanford.edu
Web Site: http://www.stanford.edu/dept/EIS

Courses given in Ethics in Society have the subject code ETHICSOC. For a complete list of subject codes, see Appendix B.

The Program in Ethics in Society is designed to foster scholarship, teaching, and moral reflection on fundamental issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as business, international relations, law, medicine, politics, and science.

Current and planned initiatives of the program include:

1. Supporting and fostering ethics research.
2. Supporting innovative teaching focusing on the ethical dimensions relevant to the different disciplines across the curriculum.
3. Establishing a yearly faculty-graduate seminar focusing on topics in ethics and public life.
4. Ethics at Noon, a weekly discussion by faculty, students, and staff on topics of ethical concern.

The program also sponsors several annual public lecture series, including the Tanner Lectures in Human Values and the Wesson Lectures in Problems of Democracy.

Students interested in pursuing studies that bring moral and political theory to bear on issues in public life should consult the director. There are many course offerings at Stanford that contain an ethical element. Not all of these courses are crosslisted with the Program in Ethics in Society. To inquire whether these courses can be applied towards the Ethics in Society honors or minor, please consult the director.

UNDERGRADUATE PROGRAM HONORS

The honors program in Ethics in Society is open to majors in every field and may be taken in addition to a department major. Students should apply for entry at the end of Spring Quarter of the sophomore year or no later than the beginning of the Autumn Quarter of the junior year. Applicants should have a cumulative grade point average (GPA) of 3.3 (B+) or higher. They should also maintain this minimum average in the courses taken to satisfy the requirements.

Requirements—

1. Required courses:
   a) ETHICSOC 20, Introduction to Moral Theory, or ETHICSOC 170. This is normally taken in the sophomore year.
b) ETHICSOC 30, Introduction to Political Philosophy, or ETHICSOC 171. This is normally taken in the sophomore year. At least one of (a) or (b) must be taken at the 100 level.

c) ETHICSOC 77. This course is aimed primarily at the junior year and is taken upon admission to the honors program.

2. One 4- or 5-unit undergraduate course on a subject approved by the honors adviser, designed to encourage students to explore those issues in Ethics in Society that are of particular interest to them. Courses of relevance to the Program in Ethics in Society are offered by members of the program committee and by other departments. Students may also take a course with the honors thesis in mind. To promote a broad interdisciplinary approach, this elective should normally be outside the Department of Philosophy. Students are not restricted to choosing from the sample of such courses included below.

3. ETHICSOC 190, Honors Seminar.

4. ETHICSOC 200A,B, Honors Thesis, on a subject approved by the honors adviser, collectively 5-10 units, with the work spread over two quarters.

A typical student takes ETHICSOC 20 or 170 and 30 or 171 in the sophomore year. Upon admission to the honors program as a junior, he or she takes ETHICSOC 190 in the Winter Quarter, ETHICSOC 77 in the Spring Quarter, and requirement 2 (the optional subject) at any time during the junior year, or possibly Autumn Quarter of the senior year. The honors thesis is normally written during the Autumn and Winter quarters of the senior year.

MINOR

A minor in Ethics in Society (ETHICSOC) requires six courses for a minimum of 25 and a maximum of 30 units toward the minor.

1. Three Ethics in Society courses:
   a) ETHICSOC 20, Introduction to Moral Philosophy; 5 units
   b) ETHICSOC 30, Introduction to Political Philosophy; 5 units
   c) ETHICSOC 77, Methodology in Ethics: Translating Theory into Practice; 4 units

2. Two courses at the 100-level or above and one course at the 200-level or above that bring the perspectives of moral and political theory to significant issues in private or public life. These courses should be focused around a central theme, e.g., biomedical ethics, ethics and economics, ethics and politics, or environmental ethics. The courses at the 100 and 200 level are normally taken after completion of ETHICSOC 20 and 30.

Subject to the approval of the Director of the Ethics in Society Program, a course covering similar subject matter in another department or program may be substituted for ETHICSOC 20 or 30. No course credited to the ETHICSOC minor may be double counted toward major requirements.

The Ethics in Society minor is open to students in any department who wish to enrich their studies through the exploration of moral issues in personal and public life. Students must complete their declaration of the minor no later than the last day of Autumn Quarter of their senior year, although they are strongly advised to declare sooner. The student should prepare a draft proposal that includes the title of your proposed minor and discuss the minor with a faculty adviser, selected from the Program in Ethics in Society faculty list. The minor is declared on Axess.

GRADUATE STUDIES

The program’s main provisions for graduate students are seminars on topics in applied ethics.

COURSES

UNDERGRADUATE

For course descriptions not listed, refer to the relevant department listings elsewhere in this bulletin. See the Time Schedule each quarter for any changes in listings. Additional courses on relevant topics are available at the program’s web site or by consultation with the program administrator.

ETHICSOC 20, Introduction to Moral Philosophy—(Same as PHIL 20.) What is the basis of moral judgments? What makes right actions right, and wrong actions wrong? What makes a state of affairs good or worth promoting? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER:3a
5 units, Aut (Schapiro)

ETHICSOC 30, Introduction to Political Philosophy—(Same as POLISCI 3.) How to engage with philosophical questions concerning politics. Topics include justice, authority, freedom of speech, multiculturalism, and patriotism.
5 units, Win (Stone)

ETHICSOC 77, Methodology in Ethics: Translating Theory into Practice—(Same as PHIL 77.) Ideally, social policies are informed by ethical thought and reflection, but doing good in the world requires the active translation of moral theory and political philosophy into action. What kinds of empirical data are relevant to social decision making, and how should those data be collected, evaluated, and integrated into normative analysis? What assumptions about human nature are in play? How should diverse cultural values be addressed? Case studies from biomedical science, business, and government. Required community service internship.
5 units, Spr (Staff)

ETHICSOC 78, Medical Ethics—(Same as PHIL 78.) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients’ autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:3a,4c
4 units, Spr (Jaworska)

ETHICSOC 108, Ethics and the Professions—Ethical challenges facing professionals in society. Readings and case studies. Individual moral obligations in relation to obligations as professionals. Topics: conflict of interest, client/professional privilege, and use of confidential information. Focus is on medicine, law, engineering, and ethical issues common to all professions.
4 units (Koenig) not given 2004-05

ETHICSOC 133, Ethics and Politics in Public Service—(Same as POLISCI 133.) Primarily for freshmen and sophomores who participate or intend to participate in service activities through the Haas Center or register for courses with service learning components. The basis for a connection between an undergraduate’s service activities and academic experiences at Stanford. What does it mean to do public service? Why should or should not citizens do volunteer work? Is public service a good thing? The history, hazards, responsibilities, and dilemmas of doing public service. Historical and ethical context of public service work in the U.S. GER:3a
5 units (Reich) not given 2004-05

ETHICSOC 170, Ethical Theory—(Same as PHIL 170/270.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:3a
4 units, Win (Schapiro)

ETHICSOC 171, Political Philosophy—(Same as PHIL 171/271.) What makes a society a just society? An exploration of this question in the context of the social contract tradition. Readings may include Hobbes, Locke, Rousseau, and Rawls. GER:3a
4 units, Spr (Schapiro)
ETHICSOC 190. Ethics in Society Honors Seminar—(Same as PHIL 178.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor. 3 units, Win (Satz)

ETHICSOC 199. Independent Studies in Ethics in Society 1-15 units, Aut, Win, Spr, Sum (Staff)

ETHICSOC 200A,B. Ethics in Society Honors Thesis—Limited to Ethics in Society honors students. 1-5 units, any two quarters (Staff)

INTERDEPARTMENTAL OFFERINGS

ANTHROPOLOGICAL SCIENCES

ANTHSCI 178. Contagion and Conflict 3-5 units (R. Barrett) not given 2004-05

CIVIL AND ENVIRONMENTAL ENGINEERING

CEE 137. Architectural Design of Individual Buildings: Ethics, Community Service, and Social Responsibility 3-6 units, Spr (Jann)

CLASSICS

CLASSGEN 317. The Professional Classicist 3-5 units, Aut, Spr (Gleason)

COMMUNICATION

COMM 131/323. Media Ethics and Responsibilities 4-5 units, Spr (Glasser)

COMM 236G/336G. Democracy, Justice, and Deliberation 1-5 units (Fishkin) not given 2004-05

COMPARATIVE LITERATURE

COMPLIT 234. Ethics in a Time of Uncertainty 5 units (Palumbo-Liu) not given 2004-05

COMPUTER SCIENCE

CS 201. Computers, Ethics, and Social Responsibility 3-4 units, Spr (Roberts)

CULTURAL AND SOCIAL ANTHROPOLOGY

CASA 108. History of Archaeological Thought 5 units, Win (Voss)

DRAMA

DRAMA 161/261. Performance and Politics 5 units, Aut (Rehm)

ECONOMICS

ECON 143. Ethics in Economics Policy 5 units, Win (Hammond)

ENGLISH

ENGLISH 105D. Shakespearean Dilemmas: Moral Choice in Classical and Renaissance Drama 5 units, Win (Friedlander)

HISTORY

HISTORY 251A/251B. Poverty and Homelessness in America 5 units, 251A: Win, 251B: Spr (Camarillo)

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 197. Ethics and Public Policy 5 units, Win (McGinn)

PHILOSOPHY

PHIL 377. Democratic Theory—(Same as POLISCI 333.) 3-5 units, Win (Ferejohn, Satz)

POLITICAL SCIENCE

POLISCI 1. Introduction to International Relations 5 units, Aut (Tomz)

POLISCI 14N. Ethics and War 5 units, Win (Sagan)

POLISCI 114S. International Security in a Changing World 5 units, Win (Sagan, Blacker, Perry)

POLISCI 130B/330B. History of Political Thought II: Early Modern Political Thought, 1500-1700 5 units, Win (Shapiro)

POLISCI 130C/330C. History of Political Thought III: Freedom, Democracy, and Power 5 units, Spr (Stone)

POLISCI 131. Children’s Citizenship: Justice Across Generations 5 units, Spr (Adcock)

POLISCI 231S. Contemporary Theories of Justice 5 units, Win (Stone)

PSYCHOLOGY

PSYCH 187. Exploring Human Nature 4 units, Win (Zimbardo)

PSYCH 270. The Psychology of Everyday Morality 6 units, Win (Monin)

PUBLIC POLICY

PUBLPOL 103B. Ethics and Public Policy—(Same as STS 110.) 5 units, Win (McGinn)

SOCIOLOGY

SOC 141A/241A. Social Class, Race/Ethnicity, Health 4 units, Win (Barr)

URBAN STUDIES

URBANST 177. Architectural Design of Individual Buildings: Ethics, Community Service, and Social Responsibility 3-6 units, Spr (Jann)
FEMINIST STUDIES

Director: Andrea Lunsford

Program Committee:
Benjamin Davidson (LGBT Community Resource Center), Charlotte Fonrobert (Religious Studies), Heather Hadlock (Music), Laura Harrison (Women’s Community Center), Andrea Lunsford (English), Londa Schiebinger (History), Myra Strober (Education), Elizabeth Tallent (English), Barbara Voss (CASA)

Resource Faculty and Staff:
Anthropological Sciences: Melissa Brown
Art and Art History: Wanda Corn, Pamela Lee, Suzanne Lewis, Melinda Takeuchi
Asian Languages: Yoshiko Matsumoto
Biological Sciences: Joan Roughgarden
Business: Sonja Grier, Joanne Martin
Classics: Joy Connolly, Maud Gleason, Susan Stephens, Yasmin Syed
Comparative Literature: Patricia Parker
Cultural and Social Anthropology: Carol Delaney, Paulla Ebron, Akhil Gupta, Miyako Inoue, Sarah Jain, Matthew Kohrman, Lisa Mal, Purnima Mankekar, Barbara Voss, Sylvia Yanagisako
Developmental Biology: Ellen Porzig
Drama: William Eddelman, Harry J. Elam, Cherrie Moraga, Peggy Phelan
Education: Jo Boaler, Susanna Loeb, Myra Strober, Joy Williamson
English: Eavan Boland, Terry Castle, Sandra Drake, Barbara Gelpi, Andrea Lunsford, Paula Moya, Siannie Ngai, Stephen Orgel, Ramón Saldívar, Jennifer Summit, Elizabeth Tallent
Feminist Studies: Patricia Karlin-Neumann, Susan Krieger
French and Italian: Carolyn Springer
German Studies: Russell Berman, Karen Kenkel, Kathryn Strachota

Email: nikhilapa@stanford.edu
Web Site: http://www.stanford.edu/dept/femstudies/

The Program in Feminist Studies is an interdisciplinary undergraduate program offering students the opportunity to investigate the significance of gender and sexuality in all areas of human life from the study of women and medicine to the study of transgender issues. Feminist analysis assumes that gender is a central factor in the organization of society, and that definitions of gender, sex, and sexuality do not stem from nature but are social constructions. As such, they vary across time and place, have strong ideological underpinnings, and serve political ends. The courses offered by the program use feminist perspectives to expand and reevaluate the assumptions at work in traditional disciplines in the study of individuals, cultures, social institutions, policy, and other areas of scholarly inquiry.

The Program in Feminist Studies coordinates the courses offered on women, gender, sexuality, and feminism throughout the University and facilitates the undergraduate major and minor in Feminist Studies. In addition, it encourages feminist analysis and teaching at Stanford, both in courses within the program and those housed within departments.

The program committee awards the annual Michelle Z. Rosaldo and Francisco Lopes prizes for the best undergraduate essays on women, gender, or feminism. The prizes are awarded in two divisions: a thesis division for senior honors theses and master’s papers written by undergraduates in coterm degree programs, and an essay division. The Rosaldo prizes are awarded for the best work in the social sciences and the Lopes prizes for the best work in the humanities. Submissions are due in the Feminist Studies office on April 4 for essays and May 14 for theses. Essays and theses completed later in Spring or Summer Quarter may be submitted for consideration the following year.

UNDERGRADUATE PROGRAMS

Curriculum guidelines and forms for the major, minor, and honors are available at the Feminist Studies office in Serra House, telephone (650) 723-2412, or at http://www.stanford.edu/dept/femstudies. Students interested in majoring, minoring, or doing honors in Feminist Studies should consult the program office.

BACHELOR OF ARTS

The major in Feminist Studies may be taken as a single major, as one of multiple majors, or as a secondary major. If taken as one major of multiple majors, none of the 60 units counted toward the major in Feminist Studies may overlap with units counted toward the major in another department or program. If taken as a secondary major, up to 30 of the units counted toward the Feminist Studies major may also be counted as fulfilling the major requirements in another department or program if that department or program consents. A maximum of 10 of the 60 units for the major may be taken on a credit/no credit or satisfactory/no credit basis; a maximum of 10 may be taken as independent study or directed reading. FEMST core courses must be taken for a letter grade.

The major should normally be declared by the beginning of a student’s junior year, and must be declared by the senior year. Majors should choose two faculty advisers from the list of resource faculty, one of whom is usually the director of the Feminist Studies program. Faculty advisers work closely with the student in helping design an appropriate program of study. A proposal explaining the rationale for the plan of study and signed by both advisers must be submitted to the program office to declare the major.

CURRICULUM

The major in Feminist Studies includes a total of at least 12 courses at the 100 level or above for 60 units, plus a practicum. The courses are divided among the core and the focus, plus electives (crosslisted courses in Feminist Studies) to reach the total course requirement.

THE CORE

1. FEMST 101. Introduction to Feminist Studies. This course must be taken before 102 and 103.
2. FEMST 102. Feminist Theory. There may be several offerings in a given year.
3. FEMST 103. Feminist Methodologies. There may be several offerings in a given year.
4. One Feminist Studies course in the social sciences. Courses that fulfill this requirement can be found among courses listed under Anthropological Sciences, Communication, Cultural and Social Anthropology, Education, History, Human Biology, Law, Medicine, Political Science, Psychology, and Sociology.
5. One Feminist Studies course in the humanities. Courses that fulfill this requirement can be found among courses listed in English, Linguistics, Philosophy, Religious Studies, the arts, and languages.

SCHOOL OF HUMANITIES AND SCIENCES
THE FOCUS

Every student must design a thematic focus consisting of at least five courses:
1. At least three of the focus courses should be Feminist Studies courses or be selected from the list of interdepartmental offerings.
2. At least one course should be a major survey, methodology, or theory course offered by a department or interdepartmental program as an initiation into the practice of study in the field.

The focus should be designed in consultation with the student’s advisers. The following are examples of common focuses, but students should note that they are encouraged to develop new foci:
- Crosscultural Perspectives on Gender
- Feminist Perspectives on Science, Technologies, and Health
- Gender and Education
- Gender and Popular Culture
- Gender in Language and Symbol
- Medieval Gender Studies
- Queer Studies
- Women and Health
- Women and Modernity
- Women and Religion
- Women and Work

WRITING IN THE MAJOR

Every student must complete the writing in the major (WIM) requirement. This requirement is fulfilled by FEMST 102L, Feminist Theories of Work and Families, FEMST 260B, The Language Wars, or by honors.

PRACTICUM

A practicum, in addition to the 60 units for the major, is required in order to bring together theory and practical, real-world experience. The practicum, taken for 3 to 6 units, should involve field research, community service, or other relevant experience such as a public service internship. Students plan their practicum (normally in the Winter and Spring quarters of their junior year) with the help of the Feminist Studies practicum mentor. The practicum is followed by FEMST 104 (2-4 units), which provides follow-up and reflection.

MINORS

Students interested in minoring in Feminist Studies should consult the program office. The minor proposal should be drafted in discussion with a faculty adviser selected from the Feminist Studies resource faculty list.

The minor in Feminist Studies consists of at least six courses, for a minimum of 30 and a maximum of 36 units. None of the units for the minor may count towards the student’s major. The minor in Feminist Studies should be declared by the Winter Quarter of a student’s junior year.

Requirements—
1. FEMST 101. Introduction to Feminist Studies. This must be taken before 102 or 103.
2. FEMST 102. Feminist Theory, or FEMST 103. Feminist Methodologies

FOCUS

A four course thematic focus may be designed by the student or may follow one of the suggested clusters listed above. One course within the thematic focus should address crosscultural issues.

HONORS CERTIFICATION

FEMINIST STUDIES MAJORS/MINORS

Admission—The honors program offers an opportunity to do supplemental independent research on a thesis of superior academic quality. It is open to students with a grade point average (GPA) of 3.3 or better in course work in Feminist Studies. Normally, students must apply for honors certification by the end of the junior year. To apply, students should design a project in consultation with their major adviser and the Feminist Studies honors mentor. A proposal signed by both advisers, describing the project and including the number of units to be awarded, must be submitted to the director of the program for final approval.

Requirements—
1. In addition to the normal requirements for the major, students enroll in FEMST 105 for 10-15 units of credit towards the preparation of the honors thesis.
2. Throughout the senior year, students work intensively with a faculty adviser and the Feminist Studies honors mentor. The final thesis must be submitted by May 30 and must be of acceptable quality to the student’s faculty advisers.

MAJORS IN OTHER DEPARTMENTS

Honors Certification in Feminist Studies for majors in other departments or programs, as distinguished from honors for students pursuing a major in Feminist Studies, is intended to complement study in any major. Students in any field of study are encouraged to apply.

Admission—Honors certification is open to students majoring in any field with a GPA of 3.3 or better.

As prerequisite, students must have completed the following courses with a grade of (B+) or better:
1. FEMST 101 and a core theory course
2. or three Feminist Studies courses related to the topic of their proposed honors research.

To apply, students must first consult the Director of the Program in Feminist Studies outlining the plan for course work, the rationale for the program, and an honors project. Students must apply for honors by the end of the junior year. The chair acts as one of the student’s faculty advisers, along with the faculty member(s) who advise the thesis.

Requirements—Students enroll in FEMST 105 for 10-15 units. The final thesis must be submitted by May 30, and must be of acceptable quality to the student’s faculty advisers.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Courses listed in Interdepartmental Offerings pay significant attention to gender difference, the situation of women in Western or non-Western cultures, or the role of sex/gender systems in social organization. Some courses are planned after this bulletin is printed. Updated listings, including courses not offered 2004-05, are available at the Feminist Studies office and at http://www.stanford.edu/dept/femstudies.

FEMINIST STUDIES COURSES

FEMST 101. Introduction to Feminist Studies—(Same as HISTORY 173C.) How gender inequality is created and perpetuated, and how feminist theory and movements emerge to respond to gender inequality. Topics: theories of inequality; history of feminism; international and multicultural perspectives on feminism; women’s work, health, and sexuality; creativity; spirituality; and movements for social change. GER: 3b, 4c
5 units, Win (Arellano)

FEMST 102L. Feminist Theories of Work and Families—(Same as EDUC 196.) Economic, sociological, and legal perspectives; mainstream and feminist theories are contrasted. Emphasis is on the present day U.S. with issues in other countries and/or other historical periods. Topics: labor force participation, occupational segregation, labor market discrimination, emotional labor, unpaid work, caring labor, child care, combining work and family, single-parent families, poverty, marriage, and divorce.
4-5 units (Strober) not given 2004-05

FEMST 103/203. Feminist Theories and Methods Across the Disciplines—(Graduate students register for 203.) The interdisciplinary foundations of feminist thought, and the nature of disciplines and of interdisciplinary work. The effects of feminism on scholarship and research, taught by a Feminist Studies resource faculty member from the discipline in question.
4-5 units, Spr (Staff)
FEMST 104. Practicum/Senior Seminar—For Feminist Studies majors only. Students present oral reports on the relation of the practicum to their academic work, submit a draft and revised written analysis of the practicum, and discuss applications of feminist scholarship. 2-4 units, Aut (Harrison)

FEMST 105. Honors Work 1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 108. Internship in Feminist Studies—For non-majors. Augments relevant course work in Feminist Studies with a supervised field, community, or lab experience, in law offices, medical research and labs, social service agencies, legislative and other public offices, and/or local and national women’s organizations. One unit represents approximately three hours work per week during a 10-week quarter. Required: a 3-5 page paper evaluating the internship and its relevance to Feminist Studies. Must be arranged in advance through the program office; see application form on the Feminist Studies web site. Prerequisites: at least one course in Feminist Studies, written consent of faculty sponsor. 1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 110/210. Women’s Voices, Identities, and Stories—(Graduate students register for 210.) Women’s styles of expression. Development of student’s voice in feminist personal essay writing fosters research skills. Emphasis is on women’s subjective experiences. Limited enrollment. Prerequisite: consent of instructor. 5 units (Kreiger) not given 2004-05

FEMST 120. Introduction to Queer Studies—Gay, lesbian, bisexual, transgender, transsexual, and queer political movement and theory; sexual identities and feminism; sexual identities and cultural representation; alternative family practices; queer theory in academia. Film screenings, guest speakers, and community field trips. GER:4c 4-5 units, Aut (Arellano)

FEMST 139. Rereading Judaism in Light of Feminism—During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism. GER:4c 4-5 units, Spr (Karlin-Neumann)

FEMST 140F. Gender and Sexuality in Modern Africa—Transformations in gender and sexual identities in 20th-century Africa. How these transformations took place within the historical contexts of colonial encounters, the transition to independence, nation building and independence, and contemporary Africa. How individuals and societies redefined sexual norms and deviancy through a themes including: women and marriage; masculinity and homosexuality; art and material and popular culture; sex work, crime, and violence; race and miscegenation; reproductive health; AIDS politics. Sources include scholarly texts, novels, films, and material culture. 4-5 units, Win (Ochoa)

FEMST 140G. Transgender Bodies—Literature by and about transgender and transsexual people. Autobiographical, cultural, historical and clinical perspectives on: gender bending, transvestitism, gender identity disorder, and marginality. Emphasis is on how trans people change theories about gender and oppression. Texts include testimonials, films, ethnography, social and literary theory, and clinical approaches. 4-5 units, Win (Ochoa)

FEMST 140H. What a Sight to See: Othered Bodies and Tourism Studies—The interdisciplinary field of tourism studies, its blind spots concerning race, ethnicity, gender, and sexuality. Tourism as a cultural practice shaping the sense of self and other; notions of work and leisure; normative whiteness and commodified ethnicity; masculinity and femininity; history, memory, and nostalgia; national identity and citizenship; production and consumption; and bodily pleasure and embodied performance. Historical, literary, and anthropological texts. Primary sources include film, visual art, and material culture. 4-5 units, Spr (Garcia)

FEMST 145. Women and Health Care—(Same as INDE 245.) Lecture and seminar series. Topics of interest to women as health care consumers and providers. The historical role of women in health care with current and future changes. 1-2 units, Aut (Gudzen, Maisen)

FEMST 195. Directed Reading 1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 260/360. Seminar in Women’s Health: Women and Disabilities—(Graduate students register for 360.) Topics include the diversity of women’s experiences of disabilities, visible and invisible disabilities, women’s strengths, women’s psychological and physical health, and feminist approaches to the study of disabilities. Limited enrollment. Prerequisite: consent of instructor. GER:3b,4c 5 units, Spr (Krieger)

FEMST 260B. The Language Wars—(Same as ENGLISH 260B.) While the U.S. was founded on principals of linguistic plurality, the English language has long held dominance; most power came to be associated with standard English. The long struggle to share the wealth of linguistic power and to craft inclusive theories of language use; how gender, race and class have shaped and responded to recent language wars. Varieties of English at work in contemporary fiction, music, and film. WIM 5 units, Aut (Lansford)

INTERDEPARTMENTAL OFFERINGS

See the respective department listings for course descriptions and General Education Requirements (GER) information.

ANTHROPOLOGICAL SCIENCES

ANTHSCI 7. Marriage and Kinship 4-5 units, Win (Wolf)

COMPARATIVE STUDIES IN RACE AND ETHNICITY

CSRE 103S. Native American Women, Gender Roles, and Status 5 units, Win (Shively)

CULTURAL AND SOCIAL ANTHROPOLOGY

CASA 88. Theories in Race and Ethnicity 5 units, Win (Tanagisako)

CASA 121. Global Feminisms 5 units, Win (Chertow)

CASA 126. Mediating Desire: Gender, Race, and Representation 5 units, Spr (Ochoa)

CASA 145A. Poetics and Politics of Caribbean Women’s Literature 5 units, Win (Duffey)

CASA 183D. Border Crossings and American Identities 5 units, Aut (Duffey)

CASA 346A. Sexuality Studies in Anthropology 5 units, Spr (Mankekar, Voss)

DANCE

DANCE 160. Dance, Gender, and History 4 units, Win (Ross)

DANCE 161. Postmodern Dance 4 units, Win (Ross)

DRAMA

DRAMA 189Q. Mapping and Wrapping the Body 3 units, Aut (Edelman)

EDUCATION

EDUC 197. Education and the Status of Women: Comparative Perspective 4-5 units, Spr (Staff)
EDUC 201. History of Education in the United States  
4 units, Win (Labaree)

EDUC 201B. Education for Liberation  
3-4 units, Spr (Williamson)

ENGLISH

ENGLISH 22/122. Jane Austen into Film  
3-5 units, Win (Jones)

ENGLISH 57N. Sex and Texts: Women in the History of Rhetoric  
3 units, Win (Lunsford)

ENGLISH 139B. American Women Writers, 1850-1915  
5 units, Spr (Richardson)

ENGLISH 150D. Women Poets  
5 units, Win (Boland)

HISTORY

HISTORY 36N. Gay Autobiography  
4 units, Spr (Robinson)

HISTORY 217/317. Men, Women, and Power in Early Modern Russia, 1500-1800  
5 units, Win (N. Kollmann)

HISTORY 225D/325D. East European Women and War in the 20th Century  
5 units, Aut (Jolluck)

HISTORY 296A/396A. Chinese Women’s History  
5 units, Spr (Sommer)

HUMAN BIOLOGY

HUMBIO 87Q. Women and Aging  
4 units, Win (Winograd)

HUMBIO 92Q. International Women’s Health and Human Rights  
3 units, Spr (Firth-Murray)

HUMBIO 95Q. Gender, Culture, and HIV/AIDS  
3 units, Win (Brown, Amarillas)

HUMBIO 108. Boys’ Psychosocial Development  
4 units, Spr (Chu)

HUMBIO 123. Sexuality in Adolescence  
3 units, Spr (Brown)

HUMBIO 126. Adolescent Development  
4 units, Win (S. Feldman)

HUMBIO 132. Seminar on Problem Behavior in Adolescence  
4 units, Spr (S. Feldman)

HUMBIO 169. Critical Issues in International Women’s Health  
4 units, Spr (Firth-Murray)

MEDICINE

MED 116Q. Women and Aging  
4 units, Win (Winograd)

MUSIC

MUSIC 14N. Women Making Music  
3 units, Aut (Hadlock)

POLITICAL SCIENCE

POLISCI 141. The Global Politics of Human Rights  
5 units, Win (Karl)

PSYCHOLOGY

PSYCH 162. The Psychology of Gender  
4 units, Win (Carstenson)

RELIGIOUS STUDIES

RELIGST 112. Handmaids and Harlots  
5 units, Win (Leveen, Pitkin)

SOCIOLOGY

SOC 142/242. Sociology of Gender  
3-5 units, Spr (Ridgeway)

SPANISH LITERATURE

SPANLIT 141. Contemporary Spanish Women Writers  
3-5 units, Aut (Haro)

OVERSEAS STUDIES

Courses approved for the Feminist Studies major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

FEMST 177B. Medieval Women Between Heathendom and Chris- 
tendom—(Same as GERGEN 177B.)  
4 units, Aut (Andersson)

FLORENCE

FEMST 135F. Women in Italian Cinema: Maternity, Sexuality, and the Image—(Same as ITALGEN 135F.)  
4 units, Spr (Campani)

FINANCIAL MATHEMATICS

Director: Amir Dembo

Core Faculty:

Business: D. Duffie, J. M. Harrison, K. Singleton
Economics: T. Amemiya, F. Kubler, M. Kurz, F. Wolak
Electrical Engineering: T. Cover
Management Science and Engineering: P. Glynn, D. Luenberger, J. Primbs
Mathematics: A. Dembo, P. Diaconis, V. Durrlemann, G. Papanicolaou

Steering Committee:

This is an interdisciplinary program that aims to provide a master’s level education in applied and computational mathematics, statistics, and financial applications to individuals with strong mathematical skills.

The departments of Mathematics and Statistics, in close cooperation with the departments of Economics, and Management Science and Engineering, as well as the Graduate School of Business, provide many of the basic courses.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The program requires that the student take 45 units of work. Of these 45 units of work, 12 courses must be taken from the offerings provided on the lists of required and elective courses. Ordinarily, four quarters are needed to complete all requirements.

Admission—To be eligible for admission, students are expected to have taken the following courses or their equivalent:

1. Linear algebra at the level of MATH 103.
2. Advanced calculus (Real Analysis) at the level of MATH 115.
3. Basic ordinary and partial differential equations at the level of MATH 131 and 132 (Basic Partial Differential Equations).
4. Probability and statistics at the level of STATS 116, 200, and preferably 217 and 219 (Stochastic Processes).
5. Computer programming at the level of CS 106A.
Candidates for admission must take the general Graduate Record Examination and preferably the subject test in Mathematics. Information about this exam can be found at http://www.gre.org.

Requirements—For the M.S. degree in Financial Mathematics, students must fulfill the following six required courses:

1. In stochastic processes and statistics:
   a) MATH 236. Introduction to Stochastic Differential Equations
   b) STATS 240. Statistical Methods in Finance or
   ECON 275. Time Series and Simultaneous Equation

2. In differential equations, simulation, and computing:
   a) MATH 220B. Partial Differential Equations of Applied Mathematics
   b) MATH 239. Computation and Simulation in Finance

3. In finance and economics:
   a) MATH 180. Introduction to Financial Mathematics or
      MS&E 242. Investment Science or
      FINANCE 620 (offered by GSB; contact GSB for description).
      Introduction to Financial Economics
   b) MATH 238/STATS 250. Mathematical Finance

These courses must be taken for letter grades where available, and an overall 2.75 grade point average (GPA) is required. There is no thesis requirement.

Courses that are equivalent to the above and have been taken previously may be waived by the adviser, in which case they must be replaced by elective courses in the same subject area.

In addition, students must take at least six approved elective courses from a list that can be found on the web site at http://math.stanford.edu/FinMath. With the approval of the instructor, credit can be obtained for practical training in industry. Students must sign up for MATH 201 and write a detailed report in order to receive credit.

A seminar in Financial Mathematics is an integral part of the program and an opportunity to interact with leading academic and industry speakers (for credit, enroll in STATS 239).

The requirements must be met within three years of entering the program.

COURSES

The following are required core courses.

ECONOMICS

2-5 units, Spr (Hansen)

4 units, Win (Staff)

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 242. Investment Science—Theory and application of modern quantitative investment analysis. How investment concepts are used to evaluate and manage opportunities, portfolios, and investment products including stocks, bonds, mortgages, and annuities. Topics: deterministic cash flows (time-value of money, present value, internal rate of return, term structure of interest rates, bond portfolio immunization, project optimization); mean-variance theory (Markowitz model, capital asset pricing); and arbitrage pricing theory. Group project. Prerequisites: 120, ENGR 60, MATH 51, or equivalents. Recommended: 140, ENGR 62, knowledge of spreadsheets.

3 units, Aut (Primbs)

3 units, Win (Levy)

3 units, Win (Papapicouloaou)

3 units, Aut (Durrleman)

3 units, Win (Papapicouloaou)

3 units, Spr (Durrleman)

STATISTICS

3-4 units, Spr (Lai)
Emeriti: (Professors) John G. Barson, Marc Bertrand, Robert G. Cohn, John Freccero, Raymond D. Giraud, René Girard, Ralph M. Hester, Pauline Newman-Gordon, Roberto B. Sangiorgi, Leo Weinstein
Chair: Robert Harrison
Director of Graduate Studies: Robert Harrison
Director of Undergraduate Studies: Joshua Landy (French), Carolyn Springer (Italian)
Professors: Jean-Marie Apostolidès, Margaret Cohen, Jean-Pierre Dupuy, Hans U. Gumbrecht, Robert Harrison, Jeffrey T. Schnapp, Michel Serres
Associate Professors: Elisabeth Mudimbe-Boyi, Carolyn Springer
Assistant Professors: Cécile Alduy, Dan Edelstein, Joshua Landy, Laura Wittman
Courtesy Professors: Paula Findlen, Michael Marrinan
Department Offices: Building 260, Room 122-123
Mail Code: 94305-2010
Department Phone: (650) 723-4183
Email: fren-ital@stanford.edu, vfahren@stanford.edu
Web Site: http://www.stanford.edu/dept/fren-ital/

Courses given in French and Italian have the subject codes FREN-GEN, FRENLIT, ITALGEN, and ITALLIT. For courses in French or Italian language instruction with the subject code FRENLANG or ITAL-LANG, see the “Language Center” section of this bulletin. For a complete list of subject codes, see Appendix B.

FRENCH SECTION

The French Section provides students with the opportunity to pursue course work at all levels in French language, literature, cultural and intellectual history, theory, film, and Francophone studies. It understands the domain of “French Studies” in the broadest possible sense: as encompassing the complex of cultural, political, social, scientific, commercial, and intellectual phenomena associated with French-speaking parts of the world, from France and Belgium to Canada, Africa, and the Caribbean.

Three degree programs are available in French: a B.A. (with two concentrations, one literary, the other interdisciplinary), a terminal M.A., and a Ph.D. (with various possible minors and combined degrees).

A curator for Romance Languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes a wealth of materials on 20th-century France and on French social and political movements.

A distinguished group of visiting faculty and instructors contribute regularly to the life of the French Section. The section maintains frequent contacts with the Ecole Normale Supérieure, the Institut d’Études Politiques, the Ecole Polytechnique, and other prestigious institutions.

France-Stanford Center for Interdisciplinary Studies—The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues from a broad range of perspectives. Its programs bring faculty and students from across Stanford’s departments and schools together and in contact with colleagues in France to explore issues of common intellectual concern. The center invites to campus French-speaking scholars who offer courses or give lectures or seminars in various University centers and programs. It currently facilitates internships for Stanford students in computer science and engineering in Sophia-Antipolis, France’s new high-tech center near Nice.

Stanford in Paris—The Stanford Overseas Studies Program in Paris offers undergraduates the opportunity to study in France during the Autumn, Winter, and Spring quarters. It provides a wide range of academic options, including course work at the Stanford center and at the University of Paris, independent study projects, and internships. In addition, the program promotes a high degree of interaction with the local community through volunteer employment, homestays, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Specialized offerings at the Stanford home campus and in Paris encourage engineering students to study abroad and to coordinate internships through the department to work in France. Students should consult with the Director of Undergraduate Studies before attending the program, and after returning, in order to ensure that course work and skills acquired abroad can be coordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the “Overseas Studies” section of this bulletin, the Stanford in Paris web site http://osp.stanford.edu/program/paris, or the Overseas Studies Program Office in Sweet Hall.
UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The French Section offers a three-track major in French and a minor. Each of these programs encourages students to pursue a course of study tailored to their individual needs and interests. The purpose of an undergraduate degree in French is necessarily variable. For some students, such a degree may serve as a stepping stone to entering the domains of international business or law; for others, it may provide training for a career as a translator or teacher; for others still, it may serve as preparation for graduate studies in French, History, or Comparative Literature. This variability argues for the sort of flexibility that characterizes the French major.

Three principal tracks are available. The first consists of a French Literature concentration. It corresponds to a traditional French major, with the bulk of course work done within the French Section and devoted to advanced language training and to the study of French literature, culture, and civilization. The second track consists of a French Studies concentration and is intended as a non-traditional, interdisciplinary alternative to the first concentration. It allows students to combine work in French with studies in fields such as African studies, art history, economics, history, international relations, music, and political science, or in other foreign languages and literatures. The third track, French and Philosophy, offers students the opportunity to pursue interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

Students who complete the department’s two quarter Great Works IHUM sequence (see above) are automatically credited with 5 units towards the French major or minor. Students enrolled in the French language discussion section of the Great Works IHUM sequence receive, in addition to these 5 units, an additional 4 units (2 per quarter), assuming that they complete the written work in French.

Prerequisites—Before declaring a French major, a student must be proficient in written and spoken French at a second-year college level. Such proficiency must be demonstrated either:

1. by having completed the entire language sequence up to and including FRENLANG 23;
2. by having scored a 5 or better on either the French language or the French literature Advanced Placement (AP) exams; or
3. by having demonstrated equivalent proficiency on the departmental placement exam offered at the beginning of each academic quarter.

Students not meeting at least one of these criteria are required to complete such portion of the language sequence as deemed necessary by the department before beginning to take courses toward the major.

Declaring a Major—Before declaring, the prospective major is required to schedule an appointment with the Director of Undergraduate Studies. This informal meeting is designed to introduce the student to the department and to answer any questions that the student may have regarding the various options that are available. After this meeting, the student is asked to draft a brief statement of purpose (one-to-two pages) describing his or her intellectual goals and interests within the discipline, and his or her intentions as regards the different concentrations. This statement is a nonbinding draft meant to encourage each student to carefully consider his or her course plans, with an eye towards the Senior Project (see below) or honors thesis.

Majors are formally accepted into the department upon review of the statement and of their language competency. Once accepted, a student should declare the French major online with the Registrar’s Office.

REQUIREMENTS

Irrespective of the concentration chosen, the French major requires a minimum of 56 units; all courses of which must be taken for a letter grade and must be selected in accordance with the following requirements:

1. Introductory series on French and Francophone literature and culture (12 units): three courses must be taken from the FRENLIT 130, 131, 132, and 133 sequence.

2. Advanced language (4 units): FRENLIT 261 (prerequisite: FRENLANG 121, 122, 123, 124, 125, or consent of instructor), or OSPPARIS 126P. FRENLIT 261 fulfills the Writing in the Major (WIM) requirement.

3. Research Seminar (3 units): a majors-only seminar, FRENLIT 289, must be taken in the Autumn Quarter of the senior year. This course prepares and assists students as they undertake either their senior project (see below) or honors thesis. It also familiarizes them with research resources in the department and University and helps students think critically about their research topics. By the end of the course, students must have chosen either a project adviser or a thesis adviser, generally a faculty member in the department, who offers support and feedback throughout the development of the senior project or honors thesis.

Senior Project—In order to demonstrate the quality of his or her scholarly work and command of written French, each major not writing an honors thesis (see “Honors Program” below) is required to submit a senior project to the project adviser before May 15 of the senior year. The project consists of a research paper with a target length of 20 pages and must be written in French.

The senior project is not graded and no credit is offered for it. However, acceptance of the senior project by the project adviser is a condition for graduation from the department. A paper deemed unsatisfactory by the project adviser is returned to the student for rework and resubmission by an agreed-upon date.

Students are advised to begin thinking about their senior projects as early as their junior year, even if they are in Paris. While in Paris, students should avail themselves of the unique resources the city has to offer for research on their chosen topic.

THE TWO CONCENTRATIONS

All majors, whether or not they are applying for honors, must choose one of the following two concentrations in structuring their course of study.

FRENCH LITERATURE

This concentration is appropriate for students whose interests are such that most of their course work towards the major is done within the French Section. In addition to the required courses listed above, they must enroll in at least nine additional courses. Of these nine, four must fulfill the Ancien Régime requirement detailed below.

1. Ancien Régime Courses (approx. 16 units): at least four courses must concern the period before July 1789. Courses fulfilling this requirement within the department must be drawn from the 120 level or above. Courses chosen from outside the department must be approved by the Director of Undergraduate Studies.

2. Remaining Courses (approx. 20 units): the student is encouraged to use the remaining five or more courses to develop a specialized knowledge of a specific domain related to either the senior project or the honors thesis.

FRENCH STUDIES

The department also accommodates students who would like to combine their interest in French with the study of other disciplines or literatures. In the past, students have completed majors in French and African Studies, French and Economics, French and English, French and European Studies, French and German, French and Italian, and French and Linguistics. Students who wish to elect the French Studies concentration are required to draw up a proposal for a rigorous and coherent course of study (consisting of a paragraph-long description of the field of concentration and a course plan) and present it to the Director of Undergraduate Studies for approval no later than May 15 of the junior year. Proposals must include no more than 24 units of study pursued outside the department, all of which must be at the upper-division level and must show obvious internal consistency and relevance to the chosen focus. (The sole exception to these stipulations is made in the case of French and African Studies, where a proposal may include between 6 and 8 units of courses on an African language above the normal 24 units of outside study.)
In addition to these language classes, the student must take a further 32 units of course work.)

In keeping with the course work, the senior project or honors essay submitted by a student in the French Studies concentration must be interdisciplinary in character.

RESTRICTIONS APPLYING TO BOTH CONCENTRATIONS
1. A maximum of 4 units (which can be substituted for one course) towards the major may be drawn from individual work (199).
2. No more than three courses numbered lower than 130 may be counted towards the major.
3. No more than 24 units (including courses used to satisfy the advanced language or Ancien Régime requirements detailed above) may be drawn from courses offered outside the department or overseas.
4. For a course offered within the department to count towards the major, all written assignments must be completed in French.

FRENCH AND PHILOSOPHY
A third option is now possible within the French major, offering students the opportunity to combine studies in literature and philosophy. Students take most of their courses alongside students from departments specializing in the intersection of literature and philosophy. The French and Philosophy major track requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:
1. Introductory Series on French and Francophone Literature and Culture (ca. 12 units): three courses must be taken from the FRENLIT 130, 131, 132, and 133 sequence.
2. French Writing in the Major (4 units): FRENLIT 261 (prerequisite: FRENLIT 123, 124, 125, or consent of instructor), or OSPPARIS 126P.
3. Philosophy Writing in the Major (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. Philosophy and Literature Gateway Course (4 units): FRENGEN 81 (same as PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
5. Aesthetics, Ethics, Political Philosophy (ca. 4 units): one course from the PHIL 170 series.
6. Language, Mind, Metaphysics, and Epistemology (ca. 4 units): one course from the PHIL 180 series.
7. History of Philosophy (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. Upper Division French Courses (ca. 12 units): at least three courses numbered FRENLIT/FRENGEN 190 or higher.
9. Related Courses (ca. 8 units): two upper division courses relevant to the student’s chosen area of specialization. One course (4 units) may be FRENLIT 199, Individual Work.
10. Capstone Seminar (ca. 4 units): to be selected from a set of seminars chosen by the undergraduate adviser of the program in philosophical and literary thought. This course must be taken in the student’s senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of French and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. No more than 24 units may be drawn from courses offered overseas. Substitutions, including transfer credit, will not normally be permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NS; the remainder must be taken for a letter grade.

EXTENDED MAJORS
Requirements for both extended majors are essentially identical to those of the French major with a concentration in French literature.

French and English Literatures—In addition to the requirements for the B.A. in French, candidates complete four English literature courses numbered 100 and above related to their French program.

French and Italian Literatures—In addition to the requirements for the B.A. in French, students complete four Italian courses numbered 200 and above related to their concentration in French.

MINORS
Students considering a minor in French are encouraged to design a course of studies that fosters their understanding of the interaction between French and their major field of specialization. A minimum of 24 units of undergraduate work beyond the French 23 level must be completed. All courses must be taken for a letter grade.

Requirements for the minor include one advanced language course (to be chosen from FRENLIT 121, 122, 123, 124, 124P, 125, 125P, 126P, and FRENLIT 261); three of the introductory series on French and Francophone literature and culture (FRENLIT 130-133); and a minimum of two additional courses in language or literature numbered 121 and above. Of these, only one may be taught in English (courses in the ‘E’ series). All courses must be chosen in consultation with the Director of Undergraduate Studies who is responsible for evaluating all study plans for the minor.

CROSSDISCIPLINARY STUDIES
FRENCH AND LINGUISTICS
Linguistics majors may elect to specialize in the French language. In addition to 50 units in Linguistics, of which two courses (LINGUIST 110 and 160) may be replaced by comparable courses in French, students opting for a French Language specialization must take three courses in the introductory series devoted to French and Francophone literature and culture (FRENLIT 130-133). For full details, contact the Department of Linguistics.

HONORS PROGRAM
Majors are eligible to apply to the honors program if they have maintained an average grade point average (GPA) of 3.5 in five upper-division French courses. The honors program candidate must fulfill all regular requirements for the major, save the senior project, from which he or she is exempt. Instead, the student undertakes the writing of a research paper no shorter than 50 pages in length, written in French, on a specialized topic. No later than the end of the Spring Quarter of the junior year, preferably after completion of the research seminar, the student must submit to the Director of Undergraduate Studies an “Application for Honors in French,” the central portion of which must contain an outline of the proposed honors essay. If it is in need of revisions, the Director of Undergraduate Studies helps the student through the revision process until the proposal is granted his or her approval. (The Director of Undergraduate Studies also helps the student identify an appropriate adviser for the essay.) Once the application is approved, the student may receive 9 to 12 units of credit for independent work on the honors essay by enrolling in FRENLIT 198. All honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of grade of ‘A-’ or better by the thesis adviser, honors are granted at the time of graduation.

Honors College—The Department of French and Italian encourages all honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages. The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by the Spring Quarter of the same calendar year. For more information, contact the department administrator.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM
Each year the department admits a very small number of highly motivated undergraduates to its coterminal B.A. and M.A. degree in French. Applications must be submitted by January 31 of the senior year to the department chair and must include: a written statement of purpose, two letters of recommendation from faculty at Stanford, and a transcript.
Students accepted into the coterminous program must have been undergraduate French majors and must meet all requirements that apply to both degrees.

For University coterminous degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

LA MAISON FRANÇAISE

La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings, and lectures by distinguished representatives of French and Francophone intellectual, artistic, and political life.

GRADUATE PROGRAMS

Admission to the M.A. and Ph.D. Programs—Applications and admissions information may be obtained from Graduate Admissions in the Registrar’s Office, or at http://gradadmissions.stanford.edu. Applicants should read the general regulations governing degrees in the “Graduate Degrees” section of this bulletin. They should have preparation equivalent to an undergraduate major in French and should also have reached a high level of speaking and writing proficiency in French. Previous study of a language other than French is also highly desirable. Recent Graduate Record Examination (GRE) results are required, as is a writing sample representative of the applicant’s best undergraduate work.

MASTER OF ARTS

The terminal M.A. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a grade point average (GPA) of 3.3, as well as pass the master’s examination at the end of their training. To fulfill the requirements in a single year, enrollment must be for an average of 12 units per quarter.

Applications for admission to the Masters of Arts program must be received by March 29 of the prior academic year. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

REQUIREMENTS

The basic program of 45 units requires the following course work:

1. One teaching methodology course, ordinarily APPLLING 201, The Learning and Teaching of Second Languages, the second-language pedagogy course offered by the Stanford Language Center.
2. A cultural history course (to be taken either inside or outside the Department of French and Italian).
3. A course in stylistics and textual analysis (FREN Lit 261 or equivalent).
4. All remaining units are to be taken in advanced French literature courses (200 level or above), three of which must be concerned with the prerevolutionary period of French cultural history.

FREN Lit 261, Stylistics and Textual Analysis, is the requirement designed to ensure that M.A. students have achieved a high level of proficiency in written and oral expository French and a familiarity with various modes of literary-critical writing. Master’s students who have already achieved a high degree of competence in writing in French (either at Stanford or elsewhere) may, with the approval of the Director of Graduate Studies, be exempted from this requirement upon presentation of a sample seminar paper in the quarter prior to that during which 261 would otherwise be taken.

EXAMINATION

The terminal M.A. examination is normally administered two weeks before the end of the Spring Quarter by the three members of the examination committee, selected each year by the Director of Graduate Studies. It consists of two parts:

1. The written exam (two hours) tests the candidate’s general knowledge of French literature and is based on the same reading list as that for the Ph.D. qualifying exam (see below).
2. The oral exam (90 minutes) assumes as its point of departure the student’s answers on the written exam. It examines the candidate’s knowledge and understanding of French literary history on the basis of the standard reading list.

At the conclusion of the oral exam, the examination committee meets in closed session and discusses the student’s performance on the written and the oral portions of the examination. If it is judged adequate, the M.A. degree is granted. In no event may the master’s written and oral exams be taken more than twice.

DOCTOR OF PHILOSOPHY

The Department of French and Italian provides students with the opportunity to pursue advanced work in French language, literature, cultural history, theory, and Francophone studies within a uniquely flexible interdisciplinary framework. Unlike conventional Ph.D. programs, it encourages students to construct a highly individualized course of study, integrating specialization in a particular literary period or area with work in such fields as art history, classics, film studies, the history of science and technology, linguistics, literary theory, music, and philosophy. The program is founded on the belief that such a balance between period/area specialization and interdisciplinary breadth is not only desirable but essential in a field such as French Studies. Students in the Ph.D. program are normally admitted as French Fellows on a four- to five-year fellowship plan that integrates their financial support with rigorous training as scholars and as prospective university faculty.

Students admitted to the program work closely with the Director of Graduate Studies in structuring a plan consistent with their needs and interests. Aside from the benefits of the program’s flexible structure, a number of unique resources are available to students. The French Section’s exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris.

ADVISING

Given the interdisciplinary nature of the Ph.D. program in French and the opportunity it affords each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Director of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the first year of study, each student must choose a faculty adviser whose expertise is appropriate to his or her own area of research and interests.

Entering graduate students are also paired with a faculty mentor as a function of their stated research interests at the time of admission. The role of the mentor is to advise the student on an informal basis regarding the student’s academic program and plans.

REQUIREMENTS

A candidate for the Ph.D. degree in French must complete at least 72 units of graduate-level study beyond the bachelor’s degree and teach five language courses in the section.
Students entering with a master’s degree or previous graduate work may receive credit as determined on a case-by-case basis, up to a maximum of 45 units. Fellowship funding and teaching requirements are adjusted according to University regulations.

REQUIRED/RECOMMENDED COURSES

Three courses are required:

1. FRENGEN 369, Introduction to Graduate Studies: Fragments of a Material History of Literature, a 5-unit seminar offered in the Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.

2. Definition and Inquiry: FRENGEN 201E, New Methods and Sources in French and Italian Studies, a three-unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.

3. APPLING 201, The Learning and Teaching of Second Languages, the second-language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.

In addition to the above-required courses, native English speaking students are encouraged to enroll in FREN 261, Stylistics and Textual Analysis.

Distribution of Elective Courses—Apart from these requirements, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. Of the 72 minimum units of graduate course work required for the Ph.D., at least 52 units must be taken within the Department of French and Italian.

Language Requirements—Attaining a native or near-native fluency in French is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree. In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and his or her adviser as a function of the student’s area of specialization. Such proficiency may be demonstrated either by successfully completing a third-year level or above undergraduate course or, better, a graduate seminar in the language in question; or by passing an exam that establishes a third-year or above level of competence in writing, reading, and speaking. (In no case is passage of a standard reading competence exam considered sufficient.) In the case of ancient Greek and Latin, a high level of proficiency means a level superior to a second year collegiate level of proficiency in reading and writing.

The second foreign language requirement should be completed as soon as possible, but in any case not later than the end of the third year for students who entered the program without an M.A.; and not later than the end of the second year for students who entered the program with a master’s degree. Completion of the language requirements is a prerequisite for taking the University Oral Examination.

EXAMINATIONS

There are three examinations: the 90-minute qualifying exam, the special topic exam, and the University oral examination.

Qualifying Examination—The first oral examination, which normally takes place at the end of Spring Quarter of the first year of study, tests the student’s knowledge of both French language and of French literature. The student is responsible for scheduling the exam one month in advance. The date and time chosen must be determined in consultation with the examining committee (see below).

The exam is based on a standard reading list covering major works from all periods of French literature, from the Middle Ages to the contemporary scene. The list may be expanded to reflect a student’s particular interests, but not abridged.

Half of the exam takes place in English, half in French (with the student free to choose which portion transpires in which language). The exam consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given either in English or in French and should engage, in a succinct and synthetic manner, an issue or set of issues of broad relevance to French literary history about which the student has been thinking as he or she has been preparing the exam. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion.

2. A 70-minute question and answer period in which the examining committee follows up on the candidate’s presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in French. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit.

The examining committee consists of two faculty members selected by the student, as well as the Director of Graduate Studies.

Two weeks before the exam, the student must also submit a graduate seminar paper which he or she considers representative of the quality of his or her graduate work at Stanford.

On the basis of this paper, the results of the qualifying examination, and an evaluation of the student’s overall progress, the members of the student’s examining committee vote for or against admission to candidacy for the Ph.D. The terminal master’s degree may be awarded to students who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall case for or against promotion to candidacy is deemed uncertain, students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis.

Subject to approval by the Director of Graduate Studies and department chair, students already holding an advanced degree in French Studies, when admitted to the French Ph.D. program, may be excused from the qualifying exam. However, they must present a formal request for a waiver to the Director of Graduate Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

Special Topic Examination—The second oral examination, which normally takes place at the end of Spring Quarter of the second year of study, concerns a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her adviser and the Director of Graduate Studies. Students should design research projects so that they have the breadth and focus of a book they might write or a seminar they might teach. The proposed topic should be discussed with the Director of Graduate Studies before the end of the quarter preceding the quarter in which they plan to take the exam. The student and the Director of Graduate Studies choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student’s adviser.) In addition to these two members, the examination committee includes the Director of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee.

At the beginning of the quarter in which he or she takes this examination, the student discusses research plans with committee members, who offer suggestions on the project and on the reading list. In general, the reading list should be between one and two single-spaced pages in length. In the course of the quarter, the student should regularly confer with committee members to discuss his or her progress. The actual examination lasts one hour. The candidate must present a tentative reading list to the members of the committee about twelve weeks before the examination and a final reading list at least one week before the examination. This list, to be headed by a title describing the topic of the examination, may be divided into two parts: core works that the student has found to be central to his or her topic, and works that fill out the periphery of the topic. Two copies of the final reading list must be submitted to the student services.
The University Ph.D. examination follows most of the same procedures outlined above. Normally students put one, and at most two, full-time quarters of study into preparation for the exam. The University oral exam should virtually always be taken at the end of Spring Quarter of the third year of study. Students must complete minimum course requirements (as listed in this bulletin) and all language and course requirements before the quarter in which they take the University oral examination.

Early in the quarter before they intend to take the University Ph.D. examination, students must discuss the scope and nature of the period to be covered, as well as the dissertation proposal, with the Director of Graduate Studies. The reading list should include works in all genres relevant to the period covered. The amount of non-literary or cross-disciplinary material on the reading list varies according to the period and the research interests of the student. Students ordinarily cover about a century of writing in great depth. As with the preceding examinations, the Director of Graduate Studies and the student determine the committee’s makeup.

The governing principle is that the University oral examination in French must be a period examination rather than one on the specific concerns of the dissertation proposal, which is dealt with separately in a later colloquium. It follows from this basic principle that the examination will cover the major authors and genres in the student’s period of choice. The lists may well include critical and scholarly works or texts from outside the traditional domain of French literary studies (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student’s “field.”

The aim of the University oral is to establish the student’s credentials as a specialist in the period of his or her choosing, so that the breadth of the reading list must be made up of texts that constitute the cultural baggage essential to any specialist. It follows that reading lists must not focus on the narrow area of the student’s research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work will prove relevant, but they should also remember that the examination is the central means of certifying their expertise in a literary period.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee and the student services officer for the Division of Literatures, Cultures, and Languages no later than two weeks preceding the examination. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the foreign language the student presents to meet the language requirements. The two-hour examination consists of the following two parts:

1. Forty minutes: a 20-minute talk by the candidate followed by a 20-minute question and answer period concerning the talk.

   Working with the committee members, the candidate’s adviser will prepare three or more questions to be presented to the candidate at 8:00 a.m. on the day of the examination. These questions concern broad topics pertinent to the candidate’s reading list and period of specialization, including concerns relevant, but by no means limited to, the student’s projected dissertation. The candidate chooses one of the questions and develops a 20-minute talk in response. Students must not read from a prepared text, but rather must speak from notes. They are free to consult any necessary materials while preparing the talk. The candidate is questioned for 20 minutes on the talk, with the dissertation adviser starting the questioning.

2. One hour, 20 minutes: questions on the area of concentration.

   Each member of the committee, except for the chair, is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications.

   The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student’s overall preparation as a candidate for the Ph.D. After the University orals, only the colloquium on the dissertation prospectus and certification of the final dissertation by the student’s reading committee stand in the way of conferral of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student’s preparation as a specialist in a given sector of French studies, but within a broader context than that provided by a single course, examination, or even the dissertation itself.

Dissertation

The doctoral dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

Colloquium on the Dissertation Proposal—The colloquium normally takes place in the quarter following the University oral examination; in most cases this means early in Autumn Quarter of the student’s fourth year of study. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student (lasting no more than ten minutes), and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double-spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project’s relation to prior scholarship on the topic, and lay out a complete chapter-by-chapter plan.
It is the student’s responsibility to schedule the colloquium no later than the first half of the quarter subsequent to the quarter in which the student passed the University oral examination. The student should arrange the date and time in consultation with the student services officer and with the three examiners. The student services officer schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

**JOINT DEGREES AND MINORS**

A candidate may also take a joint degree in French and Humanities, as described in the “Interdisciplinary Studies in Humanities” section of this bulletin. Minors are possible in Comparative Literature, Italian, Linguistics, Modern Thought and Literature, and other departments offering related courses such as Art and Art History, History, Music, Philosophy, and Spanish.

Students interested in a joint degree or a minor should design their course of study with their adviser(s). Joint degrees and minors usually require 24 additional units. With careful planning, students may complete course work for the Ph.D. and the minor in a total of nine quarters.

**Ph.D. Minor in French Literature**—The department offers a minor in French Literature. The requirement for a minor in French is successful completion of 24 units of graduate course work in the French Section with a grade point average (GPA) of 3.0 or above. Interested students should consult the graduate adviser.

**ITALIAN SECTION**

The Italian Section offers a variety of graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small and highly specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

On the undergraduate level, a number of options are available. In addition to the Italian major, students may choose from a minor in Italian, an honors program in the Humanities (see the “Interdisciplinary Studies in Humanities” section of this bulletin), an honors program in Italian, and two extended majors: one in Italian and French literature, and one in Italian and English literature.

On the graduate level, programs of study leading to the M.A. degree and the Ph.D. degree are offered in Italian literature. Joint programs for the Ph.D. degree with the graduate programs in Comparative Literature, Humanities, and Modern Thought and Literature are also available. Special collections and facilities at Stanford offer the possibility for extensive research in Italian studies and related fields. These include the undergraduate and graduate libraries and the Hoover Institution for the Study of War, Revolution, and Peace. Collections in Green Research Library are especially strong in the Medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the Western European collection at the Hoover Library; and the Music Library has excellent holdings in Italian opera.

**Stanford in Italy**—Stanford in Florence affords undergraduates with at least three quarters of Italian the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on two areas: Renaissance History and Art, and Contemporary Italian and European Studies. The program is structured to help integrate students fully as possible into Italian culture through homestays, Florence University courses, the Language Partners Program, research, internship and public service opportunities, and by conducting some of the program’s classes completely in Italian. Many of the courses offered in Florence may count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian Section requirements. Information on the Florence program is available in the “Overseas Studies” section of this bulletin, the Stanford in Florence web site http://osp.stanford.edu/program/florence, or at the Overseas Studies office in Sweet Hall.

**UNDERGRADUATE PROGRAMS**

**BACHELOR OF ARTS**

The Italian major offers students the opportunity to develop an in-depth knowledge of Italian literature, language, and civilization through a highly flexible program combining course work in Italian with work in such fields as art history, classics, comparative literature, economics, English, French, history, international relations, music, philosophy, and political science. All Italian majors are required to have completed three second-year language courses (or the equivalent taken at the Florence campus):

- ITALLANG 21. Second-Year Italian, First Quarter
- ITALLANG 22. Second-Year Italian, Second Quarter
- ITALLANG 23. Second-Year Italian, Third Quarter

Completion of the department’s two quarter Great Works IHUM sequence (see above) entitles a student to 5 units towards the Italian major or minor. Students considering an Italian major should consult with the Italian undergraduate adviser as early as possible (even before completing the language requirement) in order to ensure a maximum of flexibility in designing a course of study suited to individual needs and cultural interests.

Italian majors must complete 60 units of course work above the 100 level.

The remaining requirements for the major are:

1. A minimum of 32 units of Italian courses (selected from courses numbered 100 and above).
2. Of these courses, at least one on Dante is required, as well as at least one in each of the following areas: (a) the Middle Ages (b) the early modern period, and (c) the modern period. A Dante course may fulfill the Middle Ages requirement.
3. The intermediate-level survey sequence (ITALLIT 127, 128, 129).
4. One advanced language course beyond the level of ITALLANG 114.
5. Of the 60 units required for the major, up to 28 units of course work in related fields may be taken outside the department.

**ITALIAN AND PHILOSOPHY**

A second option is now possible within the Italian major, offering students the opportunity to combine studies in literature and philosophy. Students take most of their courses alongside students from departments specializing in the intersection of literature and philosophy. The Italian and Philosophy major track requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. **Italian Survey Sequence** (ca. 12 units): ITALLIT 127, 128, 129.
2. **Advanced Language Course** (ca. 4 units): ITALLANG 114 and above.
3. **Philosophy Writing in the Major** (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. **Philosophy and Literature Gateway Course** (4 units): ITALGEN 81 (same as PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
5. **Aesthetics, Ethics, Political Philosophy** (ca. 4 units): one course from the PHIL 170 series.
6. **Language, Mind, Metaphysics, and Epistemology** (ca. 4 units): one course from the PHIL 180 series.
7. **History of Philosophy** (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. **Upper Division Italian Courses** (ca. 12 units): at least three courses numbered ITALLIT/ITALGEN 100 or higher.
9. **Related Courses** (ca. 8 units): two upper division courses relevant to the student’s chosen area of specialization.
10. **Capstone Seminar** (ca. 4 units): to be selected from a set of seminars chosen by the undergraduate adviser of the program in philosophical and literary thought. This course must be taken in the student’s senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of Italian and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. No more than 24 units may be drawn from courses...
offered overseas. Substitutions, including transfer credit, will not normally be permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NS; the remainder must be taken for a letter grade.

EXTENDED MAJORS
Requirements for both extended majors are essentially identical to those of the Italian major with a concentration in Italian literature.

Italian and English Literatures—In addition to the 32 units required for the B.A. in Italian, candidates must complete four English literature courses numbered 100 and above related to the field of concentration in Italian Studies.

Italian and French Literatures—in addition to the 32 units required for the B.A. in Italian, candidates must complete four French literature courses numbered 100 and above related to the field of concentration in Italian Studies.

MINORS
Students considering a minor in Italian are encouraged to design a course of studies that fosters their understanding of the interaction between Italian and their second area of expertise. A minimum of 24 units of undergraduate work beyond the Italian 3 level must be completed.

Requirements for the minor include two intermediate language courses (chosen from ITALGEN 21, 22, and 23); all three of the introductory series on Italian literature and culture (ITALIT 127, 128, 129); and a minimum of one advanced course in language or literature numbered 114 and above. All courses must be chosen in consultation with the Director of Undergraduate Studies, who is responsible for evaluating all requests and individual study plans for the minor.

HONORS PROGRAMS
ITALIAN
Italian majors with a grade point average (GPA) of 3.3 (B+) or better in all Italian courses are eligible for department honors. In addition to the requirements listed above, honors candidates must complete an honors essay representing 6 to 9 units of academic work through enrollment in ITALIT 198. Proposals for essays must be submitted to the Italian faculty by the end of the candidate’s junior year. If the proposal is accepted, a member of the Italian faculty is assigned to serve as the student’s adviser for the essay. Students interested in the honors program should consult the Italian undergraduate adviser early in their junior year.

HUMANITIES
An honors program in the Humanities is available for Italian majors who wish to supplement their studies with a carefully structured program of humanistic studies. See the “Interdisciplinary Studies in Humanities” section of this bulletin for further information.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM
Each year the department admits a very small number of highly motivated undergraduates to its coterminal B.A. and M.A. degree in Italian. Applications must be submitted by January 31 of the senior year to the department chair and must include: a written statement of purpose, two letters of recommendation from faculty at Stanford, and a transcript. Students accepted into the coterminal program must have been undergraduate Italian majors and must meet all requirements that apply to both degrees.

LA CASA ITALIANA
La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works closely with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It often hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are regularly taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

GRADUATE PROGRAMS
Admission to the Program—Candidates are expected to be proficient in the Italian language and to have done significant course work in Italian literature and/or Italian studies on the undergraduate level. Candidates with a broad humanistic and linguistic background are especially encouraged to apply. Contact Graduate Admissions in the Registrar’s Office, Old Union, or see http://gradadmissions.stanford.edu, for application information. Recent Graduate Record Examination (GRE) results are required.

MASTER OF ARTS TERMINAL PROGRAM
The M.A. in Italian provides a combination of language, literature, civilization, and general courses designed to prepare secondary school, junior college, or college teachers. It is preferred that applicants have undergraduate degrees in Italian or in a related field. Knowledge of a second Romance language is desirable.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a GPA of 3.3 (B+), and pass a comprehensive oral examination (see “Qualifying Examination” section below for the Ph.D.). To fulfill the requirements in one year (four quarters), students should enroll for an average of 12 units per quarter.

The basic course program (45 units) is nine graduate courses in Italian, one of which may be in a related field. The option of substituting a master’s thesis for two literature courses is available.

Reading knowledge of a second Romance language is required. French is recommended.

Requirements for the completion of the M.A. include a comprehensive literature and language oral examination, which is given before the end of Spring Quarter or at the beginning of the following Autumn Quarter. Before taking the exam, a candidate for the degree must submit to the Italian faculty a sample graduate seminar paper representative of the quality of his or her graduate work. On the basis of this paper, the results of the comprehensive examination, and the student’s overall progress, members of the department vote for or against awarding of the M.A. degree.

Applications for admission must be received by May 31. Candidates for this degree are not eligible for financial aid or teaching assistantships.

DOCTOR OF PHILOSOPHY
Stanford’s Ph.D. program in Italian offers the opportunity for advanced work in Italian literature and studies within an unusually flexible interdisciplinary framework. It is fully independent of the Ph.D. program in French and aims to encourage students to bring broader methodological and interdisciplinary concerns to bear on the study of Italian literature. Like conventional Italian Ph.D. programs, it places primary emphasis on developing a command of Italian literature as a whole. Unlike conventional Italian Ph.D. programs, it allows students to construct a highly individualized course of study, integrating specialization in a particular literary period with work in such fields as art history, classics, comparative literature, feminist studies, film, French, history, history of science, linguistics, literary theory, Medieval or Renaissance studies, philosophy, and religion. The program is founded on the belief that this sort of balance between period specialization and interdisciplinary breadth is not only desirable but also essential in a small field such as Italian studies, particularly given the diversity of the Italian literary canon, which extends over a wide variety of disciplines.

Students admitted into the Ph.D. program in Italian work closely with the adviser in structuring a plan of study appropriate to needs and interests. Such a plan usually involves a mix of teaching and courses taken within the Italian program, courses taken in other departments, and independent work under supervision of a member of the Italian faculty, thus integrating financial support with training as scholars and prospective university teachers. Assuming satisfactory academic progress, fellowships are typically offered for three or four years. Graduate-level work completed elsewhere may be counted as fulfilling part of the requirements.
for the degree. Students in the fifth year normally apply for outside fellowships or part-time teaching positions in the department.

Aside from the benefits of the program’s structure and fellowship plan, a number of unique resources are available to Ph.D. students in Italian at Stanford. During their years of study, students may be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty. The Florence center, located in a palazzo along the Arno, is near important Florentine libraries and archives and the University of Florence. Graduate students also have at their disposal the resources of La Casa Italiana, a residential theme house which serves as an Italian cultural center and hosts such events as colloquia, lectures, and film series.

**REQUIREMENTS**

A candidate for the Ph.D. degree in Italian must complete at least 72 units of graduate-level study beyond the bachelor’s degree and teach five language courses in the section.

Students entering with a master’s degree receive credit for previous graduate work as determined on a case-by-case basis, up to a maximum of 45 units. Fellowship funding and teaching requirements are adjusted according to University regulations.

**Required/Recommended Courses**—Three courses are required:

1. ITALGEN 369, Introduction to Graduate Studies: Fragments of a Material History of Literature, a 5-unit seminar, offered in Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.
2. Definition and Inquiry: ITALGEN 201E, New Methods and Sources in French and Italian Studies, a 3-unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.
3. APPLLING 201, The Learning and Teaching of Second Languages, the second-language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.

Apart from the above requirements, students are granted considerable freedom in structuring a course of study appropriate to individual needs. During the first year, most course work is usually done within the Italian Section in order to ensure an adequate preparation for the qualifying examination. In the second and third years, the students’ programs normally consist of a combination of course work done inside and outside the Italian Section, supplemented by tutorials and independent work pursued under supervision of the Italian faculty.

**Language Requirements**—As soon as possible, but not later than the end of the third year, the candidate must have passed reading examinations in two additional foreign languages. If the candidate’s period of concentration is earlier than the Romantic period, one of these must be Latin; if Romantic or later, French. Completion of the language requirement is a prerequisite for taking the University oral examination.

**EXAMINATIONS**

There are three examinations: the 90-minute qualifying exam, the special topic exam, and the University oral examination.

**Qualifying Examination**—The first oral examination, which normally takes place at the end of Spring Quarter of the first year of study, tests the student’s knowledge of the Italian language and of Italian literature. The student is responsible for scheduling the exam one month in advance. The exam consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given either in English or in Italian and should engage, in a succinct and synthetic manner, an issue or set of issues of broad relevance to Italian literary history which the student has been thinking about as he or she has been preparing the exam. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion.

2. A 70-minute question and answer period in which the examining committee follows up on the candidate’s presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in Italian. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural-literary context into which they fit. The examination committee for the qualifying examination is made up of the members of the Italian faculty, including the student’s faculty adviser who chairs the examination.

Two weeks before the exam, the student must also submit a graduate seminar paper which the student considers representative of the quality of his or her graduate work at Stanford.

On the basis of this paper, the results of the qualifying examination, and an evaluation of the student’s overall progress, the members of the student’s examining committee vote for or against admission to candidacy for the Ph.D. The terminal master’s degree may be awarded to students who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall case for or against promotion to candidacy is deemed uncertain, students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis.

Subject to approval by the Director of Graduate Studies and department Chair, students already holding an advanced degree in Italian Studies, when admitted to the Italian Ph.D. program, may be excused from the qualifying exam. However, they must present a formal request for a waiver to the Director of Graduate Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

**Special Topic Examination**—The second oral examination, which normally takes place at the end of Spring Quarter of the second year of study, concerns a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her adviser and the Director of Graduate Studies. Students should design this research project so that it has the breadth and focus of a book they might write or a seminar they might teach. The proposed topic should be discussed with the Director of Graduate Studies before the end of the quarter preceding the quarter in which they plan to take the exam. The student and the Director of Graduate Studies choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student’s adviser.) In addition to these two members, the examination committee includes the Director of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee.

At the beginning of the quarter in which he or she takes this examination, the student discusses plans for the section with committee members, who offer suggestions on the project and on the reading list. In general, the reading list should be between one and two single-spaced pages in length. In the course of the quarter, the student should regularly consult with committee members to discuss his or her progress. The actual examination lasts one hour. The candidate must present a tentative reading list to the members of the committee about twelve weeks before the examination and a final reading list at least one week before the examination. This list, to be headed by a title describing the topic of the examination, may be divided into two parts: core works that the student has found to be central to his or her topic, and works that fill out the periphery of the topic. Two copies of the final reading list must be given to the
THE UNIVERSITY ORALS

The University Ph.D. examination follows most of the same procedures outlined above. Normally students put one, and at most two, full-time quarters of study into preparation for the exam. The University oral exam should virtually always be taken at the end of Spring Quarter of the third year of study. Students must complete minimum course requirements (as listed in this bulletin) and all language and course requirements before the quarter in which they take the University oral examination.

Early in the quarter before they intend to take the University Ph.D. examination, students must discuss the scope and nature of the period to be covered, as well as the dissertation proposal, with the Director of Graduate Studies. The reading list should include works in all genres relevant to the period covered. The amount of “non-literary” or cross-disciplinary material on the reading list varies according to the period and the research interests of the student. Students ordinarily cover about a century of writing in great depth. As with the preceding examinations, the Director of Graduate Studies and the student determine the committee’s makeup.

The governing principle is that the University oral examination in Italian must be a period examination rather than one on the specific concerns of the dissertation proposal, which is dealt with separately in a later colloquium. It follows from this basic principle that the examination will cover the major authors and genres in the student’s period of choice. The lists may well include critical and scholarly works or texts from outside the traditional domain of Italian literary studies (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student’s “field.”

The aim of the University oral is to establish the student’s credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that constitute the cultural baggage essential to any specialist. It follows that reading lists must not focus on the narrow area of the student’s research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and major genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work will prove relevant, but they should also remember that the examination is the central means of certifying their expertise in a literary period.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee and the student services officer for the Division of Languages no later than two weeks preceding the examination. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the two foreign languages the student presents to meet the language requirements. The two-hour examination consists of the following two parts:

1. Forty minutes: a 20-minute talk by the candidate followed by a 20-minute question and answer period concerning the talk.

   Working with the committee members, the candidate’s adviser prepares three or more questions to be presented to the candidate at 8:00 a.m. on the day of the examination. These questions concern broad topics pertinent to the candidate’s reading list and period of specialization, including concerns relevant, but by no means limited to, the student’s projected dissertation. The candidate chooses one of the questions and develops a 20-minute talk in response. Students must not read from a prepared text, but rather must speak from notes. They are free to consult any necessary materials while preparing the talk. The candidate is questioned for 20 minutes on the talk, with the dissertation adviser starting the questioning.

2. One hour, 20 minutes: questions on the area of concentration.

   Each member of the committee, except for the chair, is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications.

   The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student’s overall preparation as a candidate for the Ph.D. After the University orals, only the colloquium on the dissertation prospectus and certification of the final dissertation by the student’s reading committee stand in the way of conferral of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student’s preparation as a specialist in a given sector of Italian studies, but within a broader context than that provided by a single course, hour examination, or even the dissertation itself.

DISSERTATION

The fourth and (if necessary) fifth years of graduate study are devoted to writing and researching the doctoral dissertation. The dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

Colloquium on the Dissertation Proposal—The colloquium normally takes place in the quarter following the University oral examination; in most cases this means early in Autumn Quarter of the student’s fourth year of study. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student (lasting no more than ten minutes), and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium. The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double-spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the
dissertation, describe its methodology and the project’s relation to prior scholarship on the topic, and lay out a complete chapter-by-chapter plan.

It is the student’s responsibility to schedule the colloquium no later than the first half of the quarter subsequent to the quarter in which the student passed the University oral examination. The student should arrange the date and time in consultation with the student services officer and with the three examiners. The student services officer schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

**JOINT DEGREES AND MINORS**

A joint degree program in Humanities and Italian Literature is described in the “Interdisciplinary Studies in Humanities” section of this bulletin. Minors are possible in a wide variety of related fields. Joint degree programs and minors frequently require 24 additional units of work, making completion of all course requirements in nine quarters difficult if careful advance planning is not done.

*Ph.D. Minor in Italian Literature*—The section offers a minor in Italian Literature. The requirement for a Ph.D. minor is a minimum of 24 units of graduate course work in Italian literature. Students interested in a minor in Italian should consult the graduate adviser.

**COURSES**

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

**FRENCH SECTION**

*Note*—Changes in course offerings after this bulletin has gone to print are sometimes necessary. Students are advised to consult the department bulletin board regularly.

Courses in French, Technology, and Science (126-129)

Undergraduate courses in Literature and Culture (130-199)

Courses for Advanced Undergraduates and Graduates (200-299)

Graduate Seminars (300-399)

**FRENCH LANGUAGE COURSES**

The following courses in French language instruction represent a typical sequence for three years of French language study. Majors and prospective majors should consult the requirements for a B.A. in French above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at La Maison Française, see the “Language Center” section of this bulletin.

**FRENLANG 123, First-Year French**

5 units, Aut, Win, Spr (Dozer-Rabedeau, Staff)

**FRENLANG 22, Second-Year French**

4-5 units, Aut, Win, Spr 22, (Tsethlakai, Shashko, Staff), 23 (Dozer-Rabedeau, Tsethlakai)

**FRENLANG 120. Advanced Conversation: France Today**

3 units, Aut, Win, Spr (Werlings)

**FRENLANG 121. Introduction to French Texts**

3-4 units, Aut (Palambo-Liu)

**FRENLANG 124. Advanced French Grammar**

3-4 units, Win (Staff)

**FRENLANG 125. French Phonetics**

3-4 units, Spr (Palambo-Liu)

**INTRODUCTION TO THE HUMANITIES (IHUM)**

The following Introduction to the Humanities courses are taught by French and Italian department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER: 1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in French or Italian are advised to consider satisfying their GER: 1b, c requirements by registering for the following IHUM courses.

**IHUM 2,3. Epic Journeys, Modern Quests**—Great texts (religious, philosophical, and literary) that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds, and on its transformations or abandonment in modernity. Compares conceptions of the afterlife. How traditions about the afterlife are created and appropriated. The diminished importance of the dead and the increased emphasis on the power of the living in literary genres. GER: 1b, 1c (two quarter sequence)

IHUM 2. 5 units, Win (Harrison, Jacoff)

IHUM 3. 5 units, Spr (Edelstein, Landy)

**GENERAL (IN ENGLISH)**

These courses, with the subject code FRENGEN, do not require knowledge of French and are open to all students.

**FRENGEN 49N. Enlightenment: Passion versus Reason in 18th-Century French Literature**—Stanford Introductory Seminar. The basic struggle in Enlightenment thought: does enlightenment come through reason or the senses? Focus is on its dual epistemology as in semantic conflicts such as affection versus knowledge, or passion versus reason. The notion of sensibilité, a literary ideal that acquired cultural, philosophical, and political value. GER: 3a

3-4 units, Aut (Edelstein)

**FRENGEN 92N. French Culture in Films**—Stanford Introductory Seminar. Whether dealing with myth or reality, films reflect social tensions, political issues, and psychological problems of a generation, country, or gender, offering the material texture of the culture that produced them: how people live, love, think, talk, eat, rebel, and interact. French films and documentaries as a starting point to discuss French issues such as immigration, the sexual revolution, May ’68, gender, social exclusion, geographical polarities, and modernity and tradition. Film makers include Truffaut, Godard, Pialat, Kiewslowki, Leconte, and Bertolucci. Documentaries by Depardon and Varda. GER: 3a

3-4 units, Win (Alduy)

**FRENGEN 155. Women Writers and the Rise of the Novel in France**—How women writers played a defining role in the development of the modern novel. How they identify with a national tradition, and challenge patriarchy across national borders. How gender and sexuality are represented in literature and shape writers’ practices. Can we speak of a feminine writing or a female literary tradition? Can men write écriture féminine? Authors may include Lafayette, Richardson, Grafton, Harriet Beecher Stowe, Cixous, Irigaray, Armstrong, and Schor. In English. GER: 3a, 4c

4 units (Cohen) not given 2004-05

**FRENGEN 181. Philosophy and Literature Gateway**—(Same as ITALGEN 181, PHIL 81.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DLCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER: 3a

4 units, Win (Landy, Anderson)
FRENGEN 187. Bledi, Bledi: North African Youth and Contested Identities in Urban France, 1970-2005—The intersections between popular culture and Maghribi immigrant life in France; how individual and collective Maghribi identities have changed over the past 30 years. Issues include immigration and citizenship, poverty and unemployment, racism, Islam and the secular Republic, women’s roles and status, family and community. How immigration cinema has challenged hegemonic assumptions about French national identity. Sources include movies with aesthetic, politico-social, and historical agendas. Readings from fiction, poetry, and criticism. In English.
3-5 units, Aut (Le Breton)

FRENGEN 190Q. Parisian Cultures of the 19th and Early 20th Centuries—Stanford Introductory Seminar. Preference to sophomores. Political, social, and cultural events in Paris from the Napoleonic era and the Romantic revolution to the 30s. The arts and letters of bourgeois, popular, and avant garde cultures. Illustrated with slides. GER:3a
4 units, Spr (Bertrand)

FRENGEN 192E. Images of Women in French Cinema: 1930-1990—The myth of the feminine idol in French films understood in its historical and cultural context. The mythology of stars was the imaginary vehicle that helped France to change from a traditional society into a modern nation after 1945. Analysis of films from Renoir to Truffaut and Nelly Kaplan; the evolution of the role of women in France over 60 years. Lectures in English. Films in French, with English subtitles. GER:3a,4c
3-5 units, Spr (Apostolidès)

FRENGEN 201E. New Methods and Sources in French and Italian Studies—(Same as ITALGEN 201E.) Based on student interest. Chang-es in research methods: the use of digitized texts, resources, and databases available through Stanford Library’s gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the students’ prior knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.
1-4 units (Sussman) alternate years, given 2005-06

FRENGEN 205. Original Skin: Flaying, Writing, and Thinking the Self in Medieval Culture—(Enroll in COMPLIT 279.)
5 units, Aut (Kay)

FRENGEN 227. Samuel Beckett—Readings include Endgame, Watt, Molloy, Malone Dies, The Unnamable. GER:3a
3-5 units, Win (Landy)

FRENGEN 248. Theological Poets: Gods, Laws, and Rhythms in European Romanticism—Why are poets held in high esteem? How did the poet supersede the philosopher as a cultural authority? The cultural, philosophical, and political transformations behind this shift and Romantic ideology. From the late Enlightenment to the mid-1800s, the religious and revolutionary reasons for the poet’s relationships with human beings and gods. Readings include Vico, Rousseau, Kant, Schnel-ling, Hölderlin, Blake, Shelley, Keats, Lamartine, Hugo, and Musset. GER:3a
3-5 units, Win (Edelstein)

FRENGEN 253E. French Social Thought from Durkheim to Bourdieu—The originality, importance, and relevance of three distinctive features of French social thought: reflexive French human sciences, where the focus is on the social conditions in which such sciences are possible; epistemological and ontological issues (as opposed to empiri-cal realities) and the notions of collective representations, social hypocrisy, the collective unconscious, and collective self-deception; and emphasis on the indispensable role of religious mental structures for the understanding of social cohesion. Readings of Bourdieu, Durkheim, Mauss, Lacan, Lévi-Strauss.
3-5 units (Dupay) not given 2004-05

FRENGEN 256E. Political Anthropology from Rousseau to Freud—A confrontation between ways of accounting for society in an individualistic framework: the social contract; political economy; individualistic sociology; society as crowd; mass psychology; and sociopolitical institutions. Creating a typology of the ways in which a given anthropology constrains conceptions of the social and political order. Writers include Rousseau, Hume, Smith, Constant, Tocqueville, Marx, Durkheim, Weber, and Freud. GER:3a
3-5 units, Spr (Dupay)

FRENGEN 284. Philosophy and Poetry in 20th-Century French and Italian Theory—(Same as ITALGEN 284.) To what extent is poetry the other of modern philosophy? How does modern aesthetic theory understand the distinction and blur the boundaries between philosophical and poetic thinking? Authors include Croce, Gentile, Sartre, Bataille, Agamba, Ricoeur, Cacciari, Derrida, and Vattimo. GER:3a
3-5 units, Win (Wittman)

FRENGEN 288. Decadence and Modernism from Mallarmé to Marinetti—(Same as ITALGEN 288.) How the notion of decadence, initially a term of derision, shapes and underlies the positive terms of Symbolism and Modernism. Readings include theories of decadence and examples of Symbolist and Modernist texts that attempt to exercise decadent demons, such as lust, mysticism, and the retreat into artificiality. Authors include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d’Annunzio, Valry, Ungaretti, Marinetti, and Breton. GER:3a
3-5 units, Aut (Wittman)

FRENGEN 318E. Philosophy and Literature—(Same as PHIL 375.) Points of intersection between philosophy and literature. Philosophy on literature; philosophical approaches to the understanding of literary texts, and issues of truth, fiction, authorship, selfhood. Philosophy in literature; literary texts that invoke philosophical problems or approach-es, particularly those in ethics. Philosophy as literature; problems raised by philosophical texts whose proper use requires attention to their form. Readings from Sophocles, Beckett, Plato, Montaigne, Nehamas, Nuss-baum, MacIntrye, Walton.
2-4 units (Anderson, Landy) not given 2004-05

FRENGEN 319. Revolutionary Tides—(Same as ITALGEN 319.) Research seminar. The importance of collectivity in the era of popular sovereignty. Focus is on the role of the revolutionary crowd in the modern cultural imagination. Sources include 19th- and 20th-century crowd theorists, artworks, literature, and films dealing with crowds from the French Revolution to contemporary flash mobs. Students research and write labels for an exhibition at the Cantor Center for the Visual Arts, and assist in designing installations and programming.
3-5 units, Aut (Schnapp)

FRENGEN 344. Ethical Criticism: Poststructuralism, Feminism, Psychoanalysis—(Enroll in CASA 344.)
5 units, Spr (Domanska)

FRENGEN 352. The Romance of the Sea—Seafaring in the development of the modern novel. The sea as a cosmopolitan contact zone, its relation to the nation, and outlaws and rebels; poetics of the environment and labor; representation of violence and extreme conditions, and their relation to a romantic discourse on the sublime; how fictional and nonfictional seafaring narratives open a generic zone between realism and romance; and the use of the sea for transgressive literary experiments. Authors may include Champlain, Defoe, Smollett, Prévôt, Capt-ain Cook, de Saint-Pierre, Colderidge, Byron, Sue, Melville, Loti, Con-rad, and Woolf. Critical readings may include Bakhitn, Deleuze, Iriga-ray, Nietzsche, and Bataille.
3-5 units (Cohen) not given 2004-05

FRENGEN 353. Realism in France, 1830-34—Practices of the novel in the first years of modern French realism; the realist novel as part of a historically located generic system. The usefulness of genre as a category of literary analysis, the semi-autonomy of literature as part of a social formation, how to make sense of forgotten literature including its
challenge to norms of literary value, and materialist models for understanding literary production. Authors may include Stendhal, Balzac, Hugo, Sand, Paul de Kock, Eugène Sue, Edouard Corbière, Madame Charles Reybaud, and Théophile Gautier. Critical readings include Bourdieu, Jameson, Macherey, and Moretti.

3-5 units (Cohen) not given 2004-05

FRENZEN 369. Introduction to Graduate Studies: Criticism as Profession—(Enroll in COMPLIT 369, GERLIT 369.) 5 units, Aut (Berman)

FRENZEN 395A,B,C. Philosophical Reading Group—(Same as COMPLIT 395A,B,C, ITALGEN 395A,B,C.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht or R. Harrison is required.

1 unit, A: Aut, B: Win, C: Spr (Gumbrecht)

LITERATURE, THOUGHT, AND CULTURE

Courses in this section have the subject code FRENZLIT.

UNDERGRADUATE

FRENZLIT 130. Middle Ages and Renaissance France—Readings: epics (La Chanson de Roland), medieval romances (Tristan; Chrétien de Troyes’ Yvain), post-Petrarchan poetics (Du Bellay, Ronsard, Labé), and prose humanists (Rabelais, Montaigne).

4 units, Aut (Pop)

FRENZLIT 131. 17th- and 18th-Century France—Introduction to the literature and culture of France from the Baroque to the Enlightenment. Readings: Corneille (Petit Cyriaque), Diderot (Le Neveu de Rameau), Pascal (Pensées), Racine (Phèdre), Rousseau (Confessions), and Voltaire (Zadig), Criticism of excerpts from contemporary filmed versions of French classical literature. GER: 3a

4 units, Win (Richman)

FRENZLIT 132. 19th- and 20th-Century France—French literature from the beginning of the 19th century to the present, with the critical concepts necessary for an approach to the literary texts. The major literary genres and social and cultural contexts. Focus is on the emergence of new literary forms and new preoccupations in literature, as illustrated by such movements or schools as surrealisme, nouveau théâtre, and nouveau roman. The broadening of the traditional canon by taking into account questions of concern for feminist studies and Francophone writers outside France. GER: 3a

4 units, Spr (Boyi)

FRENZLIT 133. Literature and Society: Introduction to Francophone Literature from Africa and the Caribbean—(Same as COMPLIT 133.) Focus is on major African and Caribbean writers, and the issues raised in literary works which reflect changing aspects of the societies and cultures of Francophone Africa and the French Caribbean: meeting the challenge of acculturation and the search for identity; tradition competing with modernity; the use of oral tradition and writing; women’s role and status; writers’ social responsibility. Visual material: readings from fiction, poetry, plays, and criticism. In French. GER: 3a, 4a

4 units, Win (Boyi)

FRENZLIT 198. Honors—Open to juniors and seniors with consent of adviser; 9-12 units total credit for completion of honors essay.

3-12 units (Staff)

FRENZLIT 199. Individual Work—Open only to majors in French with consent of department. Normally limited to 4-unit credit toward the major.

1-12 units, by arrangement (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

FRENZLIT 219. The Renaissance Body—While the Renaissance is famous for discovering unknown continents and ancient texts, the body remains almost terra incognita in literature. Covered by canonical metaphors or disfigured in caricatures, it disappears from the cultural, aesthetic, and ideological norms of what can be exposed only to resurface as a symptom in emblem literature or metaphors of the text. How the body represents rather than is represented; attempts to subvert the taboo on anatomy and sexuality.

3-5 units (Alday) not given 2004-05

FRENZLIT 221. Give Me Libertinage or Death: The Politics of Pleasure—How revolutionary was the pursuit of happiness, or libertinage, a current in early modern culture illustrated by the phrase from the Declaration of Independence? This concept and practice from the perspectives of political context and cultural history; the revolutionary quality of libertine texts from the late-17th century to the French Revolution. French revolutionary culture: was Baudelaire correct in stating that the revolution was made by the voluptuous?

3-5 units, Win (Edelstein)

FRENZLIT 225. Multicultural Molière—Molière’s life and work as a point of departure for the notion of multiculturalism. Born in a bourgeois family, Molière was in contact with social milieux including the French peasantry for whom he wrote farces, and the court of Louis XIV for whom he provided spectacles at Versailles. Major plays, including Tartuffe, Le bourgeois gentilhomme and Le malade imaginaire as the expression of the new court culture. Sociohistorical and contemporary literary approaches: Molière as the unifying artistic figure in a multicultural France.

3-5 units, Spr (Apostolidès)

FRENZLIT 231. Denis Diderot—(Same as COMPLIT 231.) Seminar. The author and philosophe who embodied the desires, limits, forms, fascinations, genres, and discourses of the Enlightenment. All major texts by Diderot in their historical contexts. What value and position might the Enlightenment occupy in the 21st century? GER: 3a

3-5 units, Aut (Gumbrecht)

3-5 units, Spr (Richman)

FRENZLIT 250. When Poets Write Prose: 20th-Century French Poetry—Liberated from traditional forms and rhythms in the 19th century, poetry as an open field for exploration and self-redefinition in the 20th century. The poem as a fixed form, obsolete or artificial, endangers poetry as a privileged gate to truth, presence, ethics, or an authentic relation to the world. How in times of suspicion over the powers and failures of language, prose becomes the only truthful medium to approach a poetic essence beyond poetry. Readings include Mallarmé, René Char, Yves Bonnefoy, Philippe Jaccottet, Jacques Dupin, Jacques Réda, and literary critics.

3-5 units, Aut (Alday)

FRENZLIT 256. Mind and Body in 20th-Century French Fiction—How fiction articulates the tensions among the sensuous, the sensual, the embodied, and the aspiration to purity, abstraction, and transcendence. Focus is on questioning dichotomies such as nature/culture, masculine/feminine, sacred/profane, and written word/voice. Authors include Gide, Camus, Butor, Duras, and Tournier.

3-5 units, Win (Wittman)
FRENLIT 257. Self-Deception in Literature and Philosophy: Putting Philosophy at the Risk of Narrative—Why philosophy needs fiction to develop many of its theses, and why fiction often articulates ideas that escape the grasp of philosophy. With reference to self-deception or bad faith, the possibilities of cross-fertilization between continental and analytic philosophy. Literary works by Camus, Sartre, Gide, Dostoevsky, Borges, and McEwan. In French and English.
3-5 units, Spr (Dupuy)

FRENLIT 261. Stylistics and Textual Analysis—Goal is high-level proficiency in written French. Textual analysis and commentary on excerpts from various genres. Styles of criticism. The exposé, written and spoken. Prerequisite for undergraduates: 123. WIM
3-5 units, Spr (Picherit)

FRENLIT 278. Special Topics: Discourse of Self Representation—(Same as COMPLIT 278.) Critical analysis of major issues relating to literatures in French and outside France, focusing on Negritude and Surrealism, the question of the other, and the problematic of identity. Readings: Césaire, Dadié, Kane, Glissant, Sartre, Barthes, and Todorov.
3-5 units (Boyi) not given 2004-05

FRENLIT 289. Senior Research Seminar
4 units (Staff) not given 2004-05

FRENLIT 293A, B. Topics in French Literature and Philosophy—Five week course.
2 units, A: Aut, B: Spr (Serres)

FRENLIT 296. Occupation in France: Between History and Memory—How writers and film makers represent the WW II occupation of France. Collaboration, resistance, and deportation. The relationships between history and memory, and individual testimony and collective memory. Literary and nonliterary texts including Georges Perec, Verickers, France Christophe, Patrick Modiano, Pierre Nora, Suzan Suleiman, Cordier. Films include Clément’s Jeux interdits, Malle’s Au revoir les enfants, Ophuls’ Le chagrin et la pitié, Lanzmann’s Shoah, Berri’s Lucie Aubrac, and Melville’s Le silence de la mer.
3-5 units, Win (Bosi)

FRENLIT 299. Individual Work
1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

FRENLIT 375. Intellectuals, Literature, and Politics in France and in the Francophone World—(Same as COMPLIT 375.) Intellectuals’ positions on major issues of the 20th century and their reflection in literature, with a focus on decolonization (the Algerian War) and immigration. Questions such as nation and nationalism, and history and memory. Readings include Sartre, Camus, Fanon, Djebar, Ben Jelloun, Césaire, Begag, Cixous, Derrida, Nora, Noirel, and Stora. Visual materials. In French.
3-5 units, Spr (Boyi)

FRENLIT 399. Individual Work—For students in French working on special projects or engaged in predissertation research.
1-12 units, Aut, Win, Spr, Sum (Staff)

ITALIAN SECTION
Note—Changes in course offerings are sometimes necessary after this bulletin has gone to print. Students are advised to consult the department bulletin board on a regular basis.

Undergraduate courses in Literature and Culture (130-199)
Courses for Advanced Undergraduates and Graduates (200-299)
Graduate Seminars (300-399)

ITALIAN LANGUAGE COURSES
The following courses in Italian language instruction represent a typical sequence for three years of Italian language study. Majors and prospective majors should consult the requirements for a B.A. in Italian above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at La Casa Italiana, see the “Language Center” section of this bulletin.

ITALLANG 1.2.3. First-Year Italian
2-5 units, Aut, Win, Spr (Baldocchi, Devine, Gelmetti, Napolitano, Tempesta)

ITALLANG 21, 22, 23. Second Year Italian
3-4 units, Aut, Win, Spr, 21: (Baldocchi, Devine, Gelmetti), 22: (Devine, Gelmetti), 23: (Napolitano)

ITALLANG 114. Advanced Stylistics and Composition—WIM
3-4 units, Win (Napolitano)

GENERAL (IN ENGLISH)
These courses, with the subject code ITALGEN, do not require knowledge of Italian and are open to all students.

ITALGEN 166E. Women’s Voices in Contemporary Italian Literature—The canon of Italian literature consists almost exclusively of male authors, yet Italian women writers have been active since the time of Dante. Women’s prose fiction of the last 100 years. Issues include: sexual violence in female autobiographies; the experience of motherhood; the conflict between maternal love and self-determination and autonomy; and paths to political awareness. Authors include Sibilla Aleramo, Dacia Maraini, Anna Banti, Francesca Duranti, Fabrizia Ramondino. Eight novels in English translation; students encouraged to read excerpts in Italian. GER:3a
3 units, Win (Springer)

ITALGEN 181. Philosophy and Literature Gateway—(Same as FRENGEN 181, PHIL 81.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:3a
4 units, Win (Landy, Anderson)
ITALGEN 188Q. Saints, Witches, and Devils—Stanford Introductory Seminar. Preference to sophomores. Political, religious, and social interpretation of women’s persecution by the Inquisition from the 14th-16th centuries. Why did it codify women’s evil nature in Malefactor Malleficarum (The Hammer of Evil Deeds) when the Renaissance was raising physical feminine form to its apex? Contrast between dangerous and angelic influences of women. Films: The Devils and Joan of Arc. 3-4 units, Win (Napolitano)

ITALGEN 201E. New Methods and Sources in French and Italian Studies—(Same as FRENGEN 201E.) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Library’s gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the students’ prior knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly. 1-4 units (Sussman) alternate years, given 2005-06

ITALGEN 247. Petrarch and Boccaccio—Their respective roles as founders of European Petrarchism and modern Italian prose. Petrarch’s Canzoniere and My Secret Life and Boccaccio’s Decameron. Readings in Italian and translation. 3-5 units, Spr (Harrison)

ITALGEN 284. Philosophy and Poetry in 20th-Century French and Italian Theory—(Same as FRENGEN 284.) To what extent is poetry the other of modern philosophy? How does modern aesthetic theory understand the distinction and blur the boundaries between philosophical and poetic thinking? Authors include Croce, Gentile, Sartre, Bataille, Agamben, Ricoeur, Cacciari, Derrida, and Vattimo. GER:3a
3-5 units, Win (Wittman)

ITALGEN 288. Decadence and Modernism from Mallarmé to Marinetti—(Same as FRENGEN 288.) How the notion of decadence, initially a term of derision, shapes and underlies the positive terms of Symbolism and Modernism. Readings include theories of decadence and examples of Symbolist and Modernist texts that attempt to exercise decadent demons, such as lust, mysticism, and the retreat into artificiality. Authors include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d’Annunzio, Valry, Ungaretti, Marinetti, and Breton. GER:3a
3-5 units, Aut (Wittman)

ITALGEN 319. Revolutionary Tides—(Same as FRENGEN 319.) Research seminar. The importance of collectivity in the era of popular sovereignty. Focus is on the role of the revolutionary crowd in the modern cultural imagination. Sources include 19th- and 20th-century crowd theorists, artworks, literature, and films dealing with crowds from the French Revolution to contemporary flash mobs. Students research and write labels for an exhibition at the Cantor Center for the Visual Arts, and assist in designing installations and programming. 3-5 units, Aut (Schnapp)

ITALGEN 369. Introduction to Graduate Studies: Criticism as Profession—(Enroll in COMPLIT 369, GERLIT 369.) 5 units, Aut (Berman)

ITALGEN 395A,B,C. Philosophical Reading Group—(Same as COMPLIT 395A,B,C, FRENGEN 395A,B,C; see FRENGEN 395A,B,C.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht or R. Harrison is required.
1 unit, A: Aut, B: Win, C: Spr (Gumbrecht)

LITERATURE, THOUGHT, AND CULTURE

Courses in this section have the subject code ITALLIT.

UNDERGRADUATE

ITAL 127. Inventing Italian Literature: Dante, Boccaccio, Petrarch—Dante’s Inferno and Vita Nuova, Boccaccio’s Decameron, and the love lyrics of Petrarch. Prerequisite: 3 or equivalent. GER:3a
4 units, Win (Ferri)

ITAL 128. The Italian Renaissance and the Path to Modernity—The literature, art, and history of the Renaissance and beyond. Readings from the 15th through 18th centuries include Ariosto, Tasso, and Goldoni. Prerequisite: 3 or equivalent. GER:3a
4 units, Win (Ferri)

ITAL 129. Modern Italian History and Literature—The history of the Italian nation and national literary identity in the 19th and 20th centuries. Focus is on the origins and overthrow of Fascism, the changing status of women, and European integration. Readings include Leopardi, Verga, Pirandello, and Ginzburg. Prerequisite: 3 or equivalent. GER:3a
4 units, Spr (Springer)

ITAL 130. Italian Literature and History—GER:3a
4 units, Aut, Win, Spr (Staff)

ITAL 198. Honors—Open to juniors and seniors with consent of adviser; 9-12 units total credit for completion of honors essay.
3-12 units (Staff)

ITAL 199. Individual Work—For students engaged in special work. See instructor for section number.
1-12 units (Staff)

ADVANCED LITERATURE

ITAL 273. Past Imperfect: Revisiting World War II in Italian Fiction and Film—Art’s role, positive and negative, in rewriting traumatic historical events. Changing views of Fascism and WW II from the 30s to the present. Authors include Carlo Levi, Silone, Primo Levi, Morante, Bassani, and Moravia; directors include Rossellini, De Sica, Bertolucci, Scola, Cavani, and Benigni.
3-5 units, Aut (Wittman)

ITAL 299. Individual Work
1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

ITAL 399. Individual Work—For graduate students engaged in work on a special project in the field of Italian studies or predissertation research. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

Courses approved for the French or Italian major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

PARIS

FRENCH LITERATURE, THOUGHT, AND CULTURE

FREN 134P. Theater in Transition: Stage and Audience in France Today
4 units, Spr (Mervant-Roux)

FREN 178F. Literature and the City
4 units, Aut (Dupas)

FREN 186F. Contemporary African Literature in French—(Same as AFRICAAM 186F.)
4 units, Win (Mangeon)
GERMAN STUDIES

Emeriti (Professors) Theodore M. Andersson, Gerald Gillespie, Walter F. W. Lohnes, Katharina Mommsen, Kurt Müller-Vollmer
Chair: Amir Eshel
Professors: Russell A. Berman, Elizabeth Bernhardt, Orrin W. Robinson III
Associate Professor: Amir Eshel
Assistant Professors: Charitini Douvaldzi, Arthur C. Strum
Senior Lecturers: William E. Petig, Kathryn Strachota
Lecturer: Henry Lowood
Visiting Professor: Sylke Tempel (Autumn)
Director of Graduate Studies: Russell A. Berman
Director of Undergraduate Studies: Arthur C. Strum
Department Office: Building 260, Room 211
Mail Code: 94305-2030
Phone: (650) 723-3266
Email: germanstudies@stanford.edu
Web Site: http://www.stanford.edu/dept/german/

Courses given in German Studies have the subject code GERLANG and GERLIT. For courses in German language instruction with the subject code GERLANG, see the “Language Center” section of this bulletin. For a complete list of subject codes, see Appendix.

The department offers a variety of programs in German; and majors in German Studies formulate their plans in quarterly consultation with the Director of Undergraduate Studies.

By carefully planning their programs, students may fulfill the B.A. requirements for a double major in German Studies and another subject. An extended undergraduate major in English and German literature is available, as are co-terminal programs for the B.A. and M.A. degrees in German Studies, and joint programs for the Ph.D. degree with Comparative Literature, Interdisciplinary Studies in Humanities, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German Studies and related fields pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrand Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material of the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), and the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The department also has its own reference library. Extensive use is made of the language lab as well as the department’s own audio-visual equipment, films, tapes, and slides.

The Republic of Austria has endowed the Distinguished Visiting Professorship in Austrian Studies. The professorship rotates on a yearly basis through several departments.

Haus Mitteleuropa, the German theme house at 620 Mayfield, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The major in German Studies provides students with the linguistic and analytic facility to explore the significance of the rich cultural traditions and political histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, history, literature, media theory, philosophy, political science, and other areas, also encourages students to evaluate broader and contradictory legacies of modernity. For example, the literary, artistic, and cultural responses to the belated and rapid modernization of Germany allow for reflection on the modern condition in general.

Similarly, the German experience of national identity and political unification sheds light on wider issues of cultural cohesion and difference, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies not only encourages the student to consider the profound effects of German-speaking thinkers and artists on the modern world, but also provides a lens through which the particular contours of the present and past can be evaluated.

Majors must demonstrate basic language skills, either by completing GERLANG 1, 2, 3, First-Year German or the equivalent such as an appropriate course of study at the Stanford in Berlin Center. Students then enroll in intermediate and advanced courses on literature, culture, thought, and language. Requirements for the B.A. include at least three courses at the 130-139 level (introductory surveys on topics in German literature, thought, linguistics, and culture). Every major is expected to complete at least one Writing in the Major (WIM) course. Including GERLANG 1, 2, 3, the total requirement for the B.A. is a minimum of 60 units of work. With the approval of the Director of Undergraduate Studies, appropriate courses offered by other departments can be accepted toward this total, up to a maximum of 25 units.

Internships—Internships in Germany are arranged through the Overseas Studies program. In addition, students may consult with the department to arrange local internships involving German language use or issues pertaining to Germany or Central Europe. Interns who prepare papers based on their experience enroll in GERLIT 298.

Extended Major in English and German Literatures—Students may enter this program with the consent of the chairs of both departments. See the “English” section of this bulletin.

Multiple Majors—Students can combine a major in German Studies with a major in any other field. By carefully selecting courses in such disciplines as history, international relations, or economics, students can prepare themselves exceptionally well in the area of Central Europe. Multiple majors are especially recommended for students spending one or more quarters at the Stanford in Berlin Center.

GERMAN AND PHILOSOPHY

A second option is now possible within the German major, offering students the opportunity to combine studies in literature and philosophy. Students take most of their courses from departments specializing in the intersection of literature and philosophy.

The German and Philosophy major track requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. 35 units in German Studies, including:
   a) three courses at the 130 level
   b) a WIM course
2. PHIL 81, the gateway course in philosophy and literature, preferably in the sophomore year.
3. Requirements in Philosophy:
   a) PHIL 80. Prerequisite: introductory philosophy class
   b) a course in the PHIL 180 series
   c) a course in the Philosophy 170 series
   d) two courses in the history of philosophy numbered above 100
4. Two additional elective courses of special relevance to the study philosophy and literature as identified by the committee in charge of the program. In German, these courses include GERLIT 241-243, the Deutsches Geistesgeschichte series, and other advanced seminars in German thought and literature. Students must consult with their advisers, the Director of Undergraduate Studies, and undergraduate adviser of the program in philosophical and literary thought.
5. Capstone: in place of a standard capstone course in the major, students take a capstone seminar approved through the program in philosophical and literary thought. The student’s choice of capstone seminar must be approved in writing by the Director of Undergraduate Studies and undergraduate adviser of the program in philosophical and literary thought.
6. Units devoted to meeting the department’s language requirement are not counted toward the 65-unit requirement.

The capstone seminar and the two related courses must be approved by both the German Studies Director of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 2b, 3c, and 3d, and are not permitted under any circumstances for items 2, 5a, and 5. Up to 10 units taken in the Philosophy Department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

MINORS

There are two minor options.

German Language and Culture—Students may choose to minor in German Language and Culture if they are particularly interested in developing a strong ability in the German language, or in pursuing linguistic issues pertinent to German. Students satisfy the requirements for the minor in German Language and Culture by completing 35 units of course work, including at least three courses at the 100-129 level in either GERLANG or GERLIT, taught in German. Study at the Stanford in Berlin course work, including at least three courses at the 100-129 level in either GERLANG or GERLIT, taught in German. Study at the Stanford in Berlin Center for at least one quarter is highly recommended.

German Cultural Studies—Students who wish to study German literature, culture, or thought, without necessarily acquiring facility in the German language, may pursue a minor in German Cultural Studies. Students meet the requirements for the minor in German Cultural Studies by completing 35 units of course work in German literature, culture, and thought in translation, including at least three courses at the 130 or 140 level. (Five units of the Introduction to the Humanities sequence Myth and Modernity may be counted towards the completion of requirements for the minor in German Cultural Studies.)

HONORS

Majors with a minimum grade point average (GPA) of 3.3 in German courses are eligible for departmental honors. In addition to the requirements listed above, each honors candidate submits an essay representing 6 to 9 units of academic work. The essay topic is chosen in consultation with a faculty member of the department. Opportunities to commence research projects are offered at the Stanford in Berlin Center.

STANFORD IN BERLIN

All undergraduates interested in Germany are urged to enroll in the Berlin program, which is open for academic study during the Autumn, Winter, and Spring quarters. The program also offers internships in German industry, government, and cultural organizations year round. Through the Center, students with at least two years of college-level German can also take courses at the Freie Universität, Technische Universität, or Humboldt Universität. Most students live in homes with German hosts.

Most credits earned in Berlin can be applied to the undergraduate major in German Studies. All students who are planning to study at Stanford in Berlin or engage in an internship are encouraged to consult with their major Director of Undergraduate Studies and the Overseas Studies office about integrating work done abroad into their degree program. Returning interns who wish to develop a paper based on their experience should enroll in GERLIT 298. More detailed information is available at the Overseas Studies Program in Sweet Hall or with the faculty adviser in the department.

COTERMINAL PROGRAMS

Students may elect to combine programs for the B.A. and M.A. degrees in German Studies. For details, see the “Undergraduate Degrees” section of this bulletin.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

The University requirements for the M.A. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS

This program is designed for those who do not intend to continue studies through the Ph.D. degree. Students desiring the M.A. degree must complete a minimum of 45 units of graduate work. If students enroll for three quarters for a minimum of 15 units per quarter, they can fulfill the M.A. requirements in one year. The program normally includes at least one course in each of the three areas of concentration: language and linguistics, literature, and thought.

In addition, students must take graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

M.A. candidates must take an oral examination toward the end of their last quarter.

DOCTOR OF PHILOSOPHY

The requirements for the Ph.D. include: (1) a minimum of 36 graduate units during the first year of graduate study and a minimum of 9 units per quarter during the six quarters following the first year; (2) a reading knowledge of one language other than English and German, normally French; (3) a master’s oral examination, unless the student already has an M.A. upon entering the program; (4) a qualifying paper; (5) a qualifying examination; (6) the University oral examination; and (7) a dissertation. Students in Medieval Studies must also have a reading knowledge of Latin.

The first year of work, which leads to the M.A. degree, is designed to introduce each student to the three major areas of study. During Spring Quarter of the first year, all students, except those admitted with a master’s degree, must take an oral M.A. examination. During the one-hour examination, the student is questioned by three examiners, chosen by the student, on work undertaken in specific graduate courses.

By July 1 of the summer following the first year of graduate study, students should present as a qualifying paper an example of their course work. Although ordinarily not meant to represent an original contribution to scholarship, it should demonstrate the candidate’s ability to grasp complex subject matter with sufficient competence to organize materials and to present arguments in a clear and concise manner commensurate with scholarly standards. The paper is submitted to the department chair, who passes it on for approval by the student’s faculty adviser and a second reader appointed by the chair in consultation with the Director of Graduate Studies.

Students who enter the program with a master’s degree from another institution must submit, in lieu of a qualifying paper, a master’s thesis or a major research paper as evidence of ability to pursue advanced scholarly work.

At the end of the sixth quarter of study (and only if the qualifying paper has been accepted), the student takes a one-hour oral qualifying exam with two examiners, the student’s chosen adviser, and another faculty member appointed by the chair. The purpose of this examination is to demonstrate a broad familiarity with the literature of the major periods, movements, and some major figures. Only after successful completion of the qualifying procedure will the department approve the student’s admission to candidacy. A student who fails the qualifying examination may retake it once at the beginning of the seventh quarter.

The University oral examination in the Department of German Studies is based on the dissertation prospectus. After passing the qualifying exam, the student should consult with appropriate faculty members in order to develop a dissertation topic. It is important to consider scholarly significance, access to resources, and feasibility of completion within a reasonable period. The student then prepares a preliminary statement describing the topic (no more than five pages), which is circulated to the prospective committee members for discussion at a meeting normally held during the eighth quarter. The purpose of this meeting is to provide the student with feedback and guidance in the preparation of the formal
prospectus. The prospectus, normally 25 pages plus bibliography, elaborates on the topic, the proposed argument, and the organization of the dissertation. It must be distributed to the committee members and the outside chair at least two weeks before the formal University oral examination. Students should plan this examination for the end of the third year or the end of the subsequent summer. The examination lasts approximately two hours, permitting each of the four examiners a thirty-minute question period and reserving an optional ten minutes for questions from the chair of the examination. Students, regardless of their future fields of concentration, are expected to acquire excellence in German and thorough knowledge of the grammatical structure of German. The department expects Ph.D. candidates to demonstrate teaching proficiency in German; GERLIT 200, Learning of German, is required. The teaching requirement is six quarters during the second and third years of study.

The department expects candidates to demonstrate research skills appropriate to their special areas of study. The requirement can be fulfilled in the capacity of either a University Fellow or a Research Assistant.

Graduate students are also advised to start developing skills in the teaching of literature by participating in the teaching of undergraduate literature courses. Students can earn up to 3 units of graduate credit for practice teaching in literature.

All graduate students are expected to attend the department’s colloquium regularly and to make a formal presentation of their current work for public discussion.

INTERDISCIPLINARY PROGRAMS

The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in German Studies and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

Students may work toward a Ph.D. in German Studies with minors in such areas as comparative literature, modern thought and literature, linguistics, or history. Students obtaining a Ph.D. in such combinations may require additional training.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

GERMAN LANGUAGE COURSES

The following courses in German language instruction represent a typical sequence for three years of German language study. Majors and prospective majors should consult the requirements for a B.A. in German Studies above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at the Haus Mitteleuropa, see the “Language Center” section of this bulletin.

GERLANG 1,2,3. First-Year German
5 units, 1,2; Aut, Win (Petig, Strachota), 3; Spr (Staff)

GERLANG 21,22. Intermediate German
21: 3-4 units, Aut (Petig), 22: 4 units, Win (Petig)

GERLANG 100. Hundert Deutsche Jahre: One Hundred German Years
3-4 units (Strachota) not given 2004-05

GERLANG 101. Advanced Language Study I
3-4 units, Aut (Staff)

GERLANG 102. Advanced Language Study II
3-4 units, Spr (Staff)

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by German Studies faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in German Studies are advised to consider satisfying their GER:1 b,c requirements by registering for the following IHUM courses.

IHUM 8A.9A. Myth and Modernity: Culture in Germany—The tension between tradition and progress through an examination of German cultural history. The experience of modernity typically involves overcoming or denying the past, but that same past can return to haunt the present in the form of myths. The interplay of myth and modernity, the irrationality of narrative and the reason of progress, through the example of German culture, especially in literature, from the heroic epics of the medieval era through the catastrophes of the last century. GER:1b,1c (two quarter sequence)

IHUM 8A. 5 units, Win (Berman)
IHUM 9A. 5 units, Spr (Eshel, Strum)

GENERAL (IN ENGLISH)

These courses, with the subject code GERGEN, do not require knowledge of German and are open to all students.

GERGEN 81. Philosophy and Literature Gateway—(Enroll in FREN-GEN 181, ITALGEN 181, PHIL 81.)
4 units, Win (Landy, Anderson)

GERGEN 103A. 19th-Century Philosophy—(Enroll in PHIL 103.)
4 units, Spr (A. Wood)

GERGEN 121N. Memory and the Modernist Novel—Stanford Introductory Seminar. Preference to freshmen. The art of memory as one of the main characteristics of modernity. The relationship between memory and modernism through three major narrative texts: Rainer Maria Rilke’s The Notebooks of Malte Laurids Brigger; James Joyce’s A Portrait of the Artist as a Young Man; and Marcel Proust’s Combray. How is memory represented and what role does it play in the perception of external reality? How does it help constitute personal identity? What metaphors are used to define memory? Readings include theoretical and critical essays. No knowledge of French or German required; students may read texts in the original languages if able. GER:3a
4 units, Win (Douvaldzi)

GERGEN 122A. Yiddish Literature—(Enroll in SLAVGEN 122/222.)
5 units, Spr (Safran)

3 units, Spr (Grey)

4 units, Spr (Berman)

GERGEN 168A/268A. Freud and the Enterprise of Psychoanalysis—Psychoanalysis at the juncture of its multiple meanings as a therapeutic practice, a theory of the functioning of the human mind, a method of textual interpretation, a cultural critique, and a genealogy that accounts for the origins of morality, religion, art, and other social institutions. Readings include Freud’s major works, and writings by Nietzsche, Ferenczi, Lacan, Laplanche, de Certeau, Kristeva, and Irigaray. GER:3a
4 units, Aut (Douvaldzi)

GERGEN 168B. Culture of Terror: Nazi Germany—(Same as COM-PLIT 168B.) Cultural and intellectual sources of totalitarianism in Nazi Germany; spectacles of power and violence; complicity of intellectuals
and artists; culture in a regime of fear; mass culture and dictatorship; anti-Nazi literature; memoirs of the Holocaust, and the problem of post-war representation. GER:3a
4 units, Spr (Berman)

GERGEN 168C. Antisemitism and Anti-Zionism in Postwar Germany—(Same as JEWISHST 168C.) Antisemitism as a postwar political taboo. Topics include: its roots in postwar Germany; antisemitism and anti-Zionism in the German Left; influences from the Middle East and among immigrants; antisemitism and the anti-globalization movement. Is anti-Zionism necessarily antisemitic? GER:3a
4 units, Aut (Tempel)

GERGEN 201. The Learning and Teaching of Second Languages—(Same as APPLING 201.) Teaching second languages from a learning perspective, rather than traditional teaching methods. Focus is on instructional decision making within the context of the students’ intellectual and linguistic development in university settings to different populations. Readings in second language acquisition.
3-5 units, Spr (Bernhardt)

GERGEN 228A. Kant’s Critique of the Power of Judgment—(Enroll in PHIL 127/227.)
4 units, Win (A. Wood)

GERGEN 266A. Commerce and Culture in Latin America and Europe—(Enroll in SPANISH 366.)
3-5 units, Spr (Rosa, Strum)

INTERMEDIATE

At this level, students have several options depending on their interests. After completing GERLANG 3 or the equivalent, students may register directly for courses on the GERLIT 120-level, which consider special topics in German culture while advancing language learning. Alternatively, GERLANG 21, 22, and 101 emphasize a systematic review of the language, while GERLANG 21W, 22W, and 105 study the language of business and international relations. GERLANG 100, 110, and 111 develop German language skills in the context of media such as film, television, and newspapers. All language instruction courses with the subject code GERLANG are listed in the “Language Center” section of this bulletin.

GERLIT 123N. The Brothers Grimm and Their Fairy Tales—Stanford Introductory Seminar. Preference to freshmen. Historical, biographical, linguistic, and literary look at the Kinder- und Hausmärchen of Jacob and Wilhelm Grimm. Readings from the fairy tales, plus materials in other media such as film, television, and newspapers. All language instruction courses with the subject code GERLANG are listed in the “Language Center” section of this bulletin.

GERLIT 123Q. Heroic Fictions—Stanford Introductory Seminar. Preference to sophomores. Is there justification for the designation heroic epic? If so, how did it arise? Focus is on the Iliad. Students choose a second epic for individual study and class presentation. Recommended: familiarity with the Iliad. GER:3a
4 units, Spr (Andersson)

GERLIT 131A. The Young Goethe—Goethe’s 18th-century works and their contexts. The spirit of rebellion in Götz von Berlichingen, Prometheus, and Werther; the classical form of Iphigenie; the bourgeois idyll Hermann and Dorothea; and Faust I. In German. GER:3a,WIM
4 units, Win (Strum)

GERLIT 132B. Revolution and Literature, Literary Revolutions—Literary responses to the revolutions between the French Revolution in 1789 and the failed revolution in Germany in 1848. Focus is on aesthetics and new literary forms such as Romanticism which radically changed the concept of literature. GER:3a
4 units, Spr (Rebien)

GERLIT 133D. Insights and Outlooks: German Literature and Vergangenheitsbewältigung—Efforts to deal with the Nazi past. The legacies of WW II and the Holocaust as part of German political discourse. How is the experience of war and Holocaust, and division and unification explored in literature? Interaction of culture and politics in post-War German history. Authors such as Grass, Böll, Fühmann, Sebald, Wolf, Schulze, and Schlink. In German. GER:3a
4 units, Spr (Bernhardt)

GERLIT 133E. German Post-War Cinema in East and West—Artistic currents and social transformations which defined each decade of post-war German film; how politicized cinema often produced apolitical films. Competing definitions of German cinema as art, entertainment, political ideology, or rival of the Hollywood industry. GER:3a,WIM
4 units, Spr (Bach)

GERLIT 134B. Law and Justice in German Theater—How does law relate to justice? How does law promote or limit individual freedom, social responsibility, and political action? How are the crises of the legal system represented on stage? Sources include plays by Goethe, Kleist, Büchner, Brecht, and Weiss, a short story by Kafka, and Nietzsche and Foucault. In German. GER:3a,WIM
4 units, Win (Dovvaldzt)

GERLIT 146. German and Austrian Post-Colonialism—(Same as 246B.) Continuities and discontinuities among German literature, travelogues, and theory about race and colonialism in the 19th and 20th centuries. How critics interpret the political and aesthetic tropes around which these texts are organized. How colonial fantasies insisted on national differences between Germanic and other European powers; the assumption that they were male fantasies; and how women responded to them by writing themselves into the fantasies and negotiating the gulf between fantasy and colonial reality. GER:3a
4 units, Win (Bach)

GERLIT 158. German Dialects—(Same as 258.) Introduction to the major German dialects using native speakers, professionally-made tapes with transcripts, and secondary readings. Identification of the most salient linguistic characteristics of the various dialect areas. History of the study of language variation in Germany: traditional dialect grammars, dialect-geographical revolution, the insights of modern socio-linguistics. GER:3a
3-5 units, Aut (Robinson)

GERLIT 159. Reading Dutch—Introduction to grammar and vocabulary to develop reading facility. German useful but not required.
4 units, Aut (Robinson)

GERLIT 181F. Lyric Poetry and Sociopolitical Engagement Today—(Enroll in ENGLISH 181F.)
5 units, Win (Kaufman)

GERLIT 181G. Keats, Shelley, and Modern Poetry and Poetics—(Enroll in ENGLISH 181G.)
5 units, Win (Kaufman)

GERLIT 199. Independent Reading 36 hours of reading per unit, weekly conference with instructor. May be repeated for credit. Prerequisite: consent of instructor.
1-10 units, Aut, Win, Spr, Sum (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

GERLIT 200. Teaching of Second Language Literatures—(Same as APPLING 200.) Focus is on literacy development in a second language, emphasizing literary texts, and assessing the learners’ second-language linguistic level and requisite background knowledge with regard to particular literary texts. Instructional strategies and feedback techniques for written and oral work.
3 units, Spr (Bernhardt)

GERLIT 231. Hegel’s Aesthetics—A collective reading of Hegel’s Lectures on Fine Art focusing on its German philosophical and aesthetic contexts. Prerequisite: background in philosophy. In English. GER:3a
3-5 units, Spr (Strum)
GERLIT 234. The Bildungsroman and Other Biographical Fictions—Life hermeneutics practiced in the psychological novel, Bildungsroman, and autobiography. Intersections and contrasts among these genres. The origins of the notion of progress and its fictional translations; possibilities of historical and fictional closure; and the emergence of the novel’s protagonist as a disciplinary subject. Authors include Augustine, Rousseau, Goethe, Moritz, and Keller. GER:3a
3-5 units, Aut (Dowdwalczik)

GERLIT 246B. German and Austrian Post-Colonialism—(Same as 146; see 146.)
4 units, Win (Bach)

GERLIT 258. German Dialects—(Same as 158; see 158.)
3-5 units, Aut (Robinson)

GERLIT 261. Histories and Stories: Contemporary German Literature—Recent theories of and research methodologies for the contemporary novel. Focus is on the work of Grass, Kluge, Sebald, Ransmayr, Gstrein, Hacker, and Beyer. GER:3a
5 units, Spr (Eshel)

GERLIT 284. The Austro-Hungarian Grotesque—(Enroll in COMPLIT 283/383.)
5 units, Aut (Labov)

GERLIT 294. Translation as Literary and Cultural History: Toward a Hermeneutics of Cultural Transfer—Classical and modern theories of translation including Augustine, Schleiermacher, Benjamin, Jakobson, and Gadamer. Their relevance for and applicability to literary and philosophical translation. Literary and cultural transfer with examples from German-American and German-French literary relations. GER:3a
3-5 units, Aut (Müller-Vollmer)

GERLIT 298. Individual Work—Open only to German majors and to students working on special projects, including written reports for internships. Honors students use this number for the honors essay. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

GERLIT 299. Present Pasts: History, Fiction, Temporality—(Same as COMPLIT 299.) The crisis of temporality and aversion to traditional notions of history in late 20th-century Western culture. Sources include literary, philosophical, and historical works with focus on the cultural dislocations attending the rebellion against modernity and the difficulty of making sense of the relation between past and present as traditional values, ideologies, and utopias weaken. Readings may include Heidegger, Benjamin, Koselleck, Ricoeur, Sartre, Levi, Kafka, Agnon, Woolf, Celan, and Weiss. GER:3a
5 units, Win (Eshel, White)

GERLIT 304. The Other Side of Poesy: The Comical, the Satirical, and the Grotesque in Modern German Poetry—Major types and representatives, and their poetics. Authors include Heine, Morgenstern, Ringelnatz, anonymous Bändelsänger; their contemporaries in the literary cabaret and the music hall including Brecht, Kästner, Klabund, Reutter, and Wedekind; Expressionist and Dadaist poets and artists such as van Hoddis, Lichtenstein, Arp, Ball, Huelsenbeck, Schwitters; and modern experimentalists such as Gomringer, Heissenbüttel, and Jandl. GER:3a
5 units, Win (Müller-Vollmer)

5 units, Aut (Kaufman)

GERLIT 312A. Aesthetics and Criticism of Music, Ancients and Moderns: Plato to Nietzsche—(Enroll in MUSIC 312A.)
4 units, Aut (K. Berger) alternate years, not given 2005-06

GERLIT 312B. Aesthetics and Criticism of Music, Contemporaries: Heidegger to Today—(Enroll in MUSIC 312B.)
HISTORY

Chair: Carolyn Lougee Chappell

Associate Professors: Kennell A. Jackson Jr., Matthew H. Sommer, Amir Weiner (on leave), Kären E. Wigen

Assistant Professors: David R. Como (on leave), Robert Crews, James P. Daughton, Zephyr Frank, Sean Hanretta, Kathryn Miller (on leave Winter, Spring), Jessica Riskin, Priya Satia, Caroline Winterer

Courtesy Professors: Paul David, Avner Greif, Gavin Wright

Senior Lecturers: Joseph J. Corn, Katherine Jolluck

Lecturer: Martin W. Lewis

Visiting Professors: Mary Elizabeth Berry, Lucien Bianco, Eleazar Gutwirth

Mail Code: 94305-2024

Phone: (650) 723-2651

Web Site: http://history.stanford.edu/

Courses given in History have the subject code HISTORY. For a complete list of subject codes, see Appendix.

History courses teach the foundational knowledge and skills (analytical, interpretive, writing) necessary for understanding the deep connections between past and present. History is a pragmatic discipline in which the analysis of change over time involves sifting the multiple influences and perspectives that affect the course of events, as well as evaluating critically the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into a persuasive analysis lies at the heart of the department’s teaching. Graduates with a history major pursue careers and graduate study in law, public service, business, writing, and education. Further information on the department, its programs, and faculty can be found at http://history.stanford.edu/.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of History offers three pathways to the B.A. in History. The General Major emphasizes breadth of study among historical areas and periods as well as concentration in one selected field. The two Majors with Interdisciplinary Emphasis (Literature and the Arts, and History of Science and Medicine) combine the study of history with the methods and approaches of other disciplines, and involve substantial course work outside of History.

All History majors require the following:

1. Completion of a minimum of 58 units and at least twelve courses of at least 3-5 units each, to include:
   a) one Sources and Methods seminar
   b) two 200-level undergraduate colloquia
   c) at least one other small group course, to be chosen among the department’s undergraduate colloquia, research seminars, or Stanford Introductory Seminars taught by History faculty members.

2. All courses comprising the 58 units must be taken for a letter grade, and the student must maintain a grade point average (GPA) in History courses of 2.0 or higher.

3. At least six courses must be taken from regular members of the Department of History.

4. History’s Writing in the Major requirement is satisfied by completing one of the following: a WIM-option colloquium or seminar; an Honors thesis in History; or a 15-page research paper in History written under faculty direction. Work on the research paper must begin no later than Winter Quarter of the senior year (at least two quarters prior to graduation).

5. At least six quarters of enrollment in the major. Each candidate for the B.A. in History should declare a major by the Autumn Quarter of the third year of study (earlier, if possible).

One Directed Reading (200W) or Directed Research (200X) taken for 3-5 units and for a letter grade may be applied toward the twelve courses required for the B.A. in History. A maximum of five transfer courses may be applied toward the major. Advanced placement credits do not fulfill any major requirements.

Completion of the major requires planning. In Spring Quarter of the junior year, following consultation with faculty advisers. History majors are required to complete a departmental Degree Progress Review and submit it to the History office.

The department also strongly encourages students to acquire proficiency in foreign languages and study at one of Stanford’s overseas programs. Such studies are not only valuable in themselves; they can provide an opportunity for independent research and a foundation for honors essays and graduate study.

For information on specific History courses’ satisfaction of major requirements, refer to the Department of History course information website at http://history-db.stanford.edu/courses/.

THE GENERAL HISTORY MAJOR

In pursuing the above requirements for all History majors, the student in the General History major is required to satisfy breadth and concentration requirements.

1. Breadth: to ensure chronological and geographical breadth, at least two courses must be completed in a premodern chronological period and in each of three geographical fields: Field I (Africa, Asia, and Middle East); Field II (the Americas); and Field III (Europe, including Western Europe, Eastern Europe, and Russia). Courses fulfilling the premodern chronological period may also count for Fields I-III.

2. Concentration: to develop some measure of expertise, students must complete four courses in one of the following fields of concentration: Africa, Asia, Eastern Europe and Russia; Europe before 1700, Europe since 1700, Jewish history, Latin America, science and technology, the United States, the Middle East, international history, Comparative Empires and Cultures; or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture/high culture, and so on. The proposed concentration must be approved by the major adviser; a proposal for a thematic concentration must have the approval of both the adviser and the department’s Undergraduate Studies Committee. At least one and preferably two of these four courses should be an undergraduate colloquium or seminar.

Certain Introduction to the Humanities courses taught by History faculty in a Winter-Spring sequence count toward the General History major.

HISTORY MAJORS WITH INTERDISCIPLINARY EMPHASIS (HMIE)

These majors are designed for several types of students: students interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline; students in History who want to understand how interdisciplinary approaches can deepen their understanding of history; and students primarily interested in developing interdisciplinary approaches to historical scholarship by combining the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science and the humanities. In pursuing the above requirements for all History majors, students in HMIE are required to complete their twelve courses for the major as follows:
**Gateway Course** (one course)—Students are required to take the appropriate gateway course for their interdisciplinary major. This introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major.

**Methodological Cluster** (three courses)—This cluster is designed to acquaint students with the ways in which interdisciplinary methods are employed in historical scholarship, both by practicing historians and by scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for the appropriate Historical Methods courses.

**Geographic Cluster** (four courses)—History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

**Interdisciplinary Cluster** (four courses)—These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must provide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for appropriate interdisciplinary courses.

HMIE majors do not mandate the breadth or concentration requirements of the General History major. Introduction to the Humanities courses taught by History faculty may apply to HMIEs only insofar as their content is specifically appropriate to the particular methodological or geographic cluster. Courses preapproved for the clusters in interdisciplinary tracks are listed on the History advising web site.

**HISTORY, LITERATURE, AND THE ARTS**

The History, Literature, and the Arts major is designed for the student who wishes to complement his or her work in history with study in literature, particularly in a foreign language. For the purposes of this major, literature is defined broadly, including art, drama, films and poetry, memoirs and autobiography, novels, as well as canonical works of philosophy and political science. It appeals to students who are interested in studying literature primarily in its historical context, or who want to focus on both the literature and history of a specific geographical area while also learning the language of that area.

**Gateway Course**—HISTORY 204, History, Literature, and Arts, gives students a broad introduction to the study of literary texts in history.

**Methodological Cluster**—This cluster teaches students how historians, in particular, analyze literary texts as documentary sources. Students choose three courses from among the preapproved HLA Methodology curriculum; other courses must be approved by the HLA coordinator. These courses need not be in the student’s geographic concentration.

**Geographic Cluster**—Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological courses required above.

**Interdisciplinary Cluster**—Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student’s adviser must pre-approve all courses in this cluster; these courses may not be double-counted towards a minor or major other than History.

**General Requirements**—Among the history courses taken, students must include a Sources and Methods seminar, two 200-level courses, and one other small group class. In addition, the Writing in the Major (WIM) requirement must be completed.

**HISTORY, SCIENCE, AND MEDICINE**

The History, Science, and Medicine (HS&M) major is a collaborative program of the Department of History, the Program in the History and Philosophy of Science, and the Stanford School of Medicine. The major is designed for: (1) students who wish to complement their work in science and/or pre-clinical study with a History major that focuses explicitly on science and medicine; (2) students in the humanities and social sciences whose interest in science and medicine is primarily historical and contextual. This major allows students who are contemplating medical school to study the history of medicine and the medical humanities while fulfilling the pre-clinical curriculum.

**Gateway Course** (one course)—Students fulfill this requirement by taking the gateway course for HS&M that is offered annually: HISTORY 204A, Critical Studies: Science, Language, and Culture. This course is designed to introduce students to approaches and methods in the history of science, technology, and medicine. It is primarily concerned with definitions of scientific methodology, practice, and institutions, and exposes students to some of the fundamental debates in the history of science. Case studies vary depending upon the particular instructor.

**Methodological Cluster** (three courses)—These History courses focus on the history of science, technology, and medicine. Courses must be approved by the student’s adviser. The choice of courses depends on the student’s particular interests (for example, premodern science, medical history and literature, history of technology, medical anthropology).

**Geographic Cluster** (four courses)—Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East or Africa. These four courses must be taken in addition to the three methodological cluster courses. Courses in the history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted in the methodological cluster.

**Interdisciplinary Cluster** (four courses)—These courses are taken outside the Department of History. The cluster can be defined in any of four ways:

1. two medical humanities courses plus two complementary science courses
2. two courses about science (e.g., anthropology of science, sociology of science, philosophy of science) plus two complementary science courses
3. four courses in medical humanities
4. two courses in medical humanities and two about science. In all instances, the Interdisciplinary Cluster must be approved in advance by the student’s adviser.

**Medical Humanities Course in the Medical School**—Majors in the Medical Humanities track of the major in History, Science, and Medicine are expected to take at least one course in the School of Medicine.

**General Requirements**—Among the history courses taken, students must include a Sources and Methods seminar, two 200-level courses, and one other small group class. In addition, the Writing in the Major (WIM) requirement must be completed.

**MINORS**

Candidates for the minor in History must complete six courses, at least three of which must have a field or thematic focus. The department ordinarily defines fields in terms of geography or chronology, but it also invites students to pursue thematic topics that can be examined in broadly comparative terms. Students completing the minor may choose to concentrate in such fields as African, American, British, Asian, European (medieval, early modern, or modern), Russian and East European history, comparative empires and cultures, or such thematic topics as the history of gender, the family, religion, technology, or revolution. Students may also petition to have a concentration of their own design count toward the minor.

All six courses must be of at least 3 units each and must be taken for a letter grade. The student must maintain a grade point average (GPA) in History courses of 2.0 (C) or higher. Two of the six courses must be small-group in format (Stanford Introductory Seminars taught by History faculty, Sources and Methods Seminars, departmental colloquia and research seminars). History courses taken at overseas campuses may count toward the minor, but at least three of the six courses must be taken from
Stanford faculty. One History course from Introduction to the Humanities may count toward the six-course requirement, but not for the field concentration. One Directed Reading (200W) course may count towards the minor, if taken for 3-5 units and for a letter grade. A maximum of three transfer courses may be used toward the minor. Advanced placement credits do not fulfill any minor requirements.

Students must declare the minor in History no later than the Autumn Quarter of the senior year. They do so via Axess under Declare Major/Minor. Minor declarations are then approved by the Department of History and confirmation is sent via email to the student.

HONORS PROGRAM

For a limited number of majors, the department offers a special program leading to honors in History. Students accepted for this program, in addition to fulfilling the general requirements stated above, begin work on an essay in Spring Quarter of the junior year and complete the essay by mid-May of the senior year. In addition to the Junior Honors Colloquium, 200H, students normally take 11 to 15 units of Senior Research, to be distributed as best fits their specific project. For students in the honors program, Senior Research units (200A,B,C) are taken in addition to the twelve required courses in History.

To enter this program, the student must be accepted by a member of the department who agrees to advise the research and writing of the essay, and must complete the Junior Honors Colloquium (200H). An exception to the latter requirement may be made for those studying overseas Spring Quarter of the junior year, but such students should consult with the director of the honors program, if possible, prior to going overseas. Under exceptional circumstances, students are admitted to the program in the Autumn Quarter of the senior year.

In considering an applicant for such a project, the adviser and director of the honors program take into account general preparation in the field of the project and expect a GPA of at least 3.3 (B+) in the student’s previous work in History and in the University. Students completing the thesis with a grade of ‘B+’ or higher are eligible for honors in History. To enter the honors program, apply at the Department of History office.

Outstanding honors essays may be considered for the University’s Golden Medals, as well as for departmental James Birdsell Weter prizes.

SECONDARY (HISTORY) TEACHER’S CREDENTIAL

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding this program from the Credential Administrator, School of Education.

COTERMINAL B.A. AND M.A. PROGRAM

The department each year admits a limited number of undergraduates for coterminal B.A. and M.A. degrees in History. Coterminal applications are only accepted during Autumn Quarter; check with the History office for the application deadline. Applicants are responsible for checking their compliance with University coterminal requirements listed in the “Undergraduate Degrees and Programs” section of this bulletin. Applicants must meet the same general standards as those seeking admission to the M.A. program; they must submit a written statement of purpose, a transcript, GRE test scores, and three letters of recommendation, at least two of which should be from members of the Department of History faculty. To be competitive, coterminal applicants should have a 3.75 GPA in their undergraduate history major (or equivalent if they are entering without a History major.) The decision on admission rests with the department faculty upon recommendation by the Graduate Admissions Committee. Students must meet all requirements for both degrees. They must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three courses that fall within a single Ph.D. field.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

ADMISSION

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Guide to Graduate Admission, available from Graduate Admissions, the Registrar’s Office, Old Union or at http://registrar.stanford.edu/publications. Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

MASTER OF ARTS

University requirements for the M.A. degree are described in the “Graduate Degrees” section of this bulletin. The department requires the completion of nine courses (totaling not less than 45 units) of graduate work; seven courses of this work must be Department of History courses. Of the seven, one must be a seminar and four must be either graduate colloquia or graduate seminars. Directed reading may be counted for a maximum of 10 units. A candidate whose undergraduate training in history is deemed inadequate must complete nine courses of graduate work in the department. The department does not recognize for credit toward the M.A. degree any work that has not received the grade of ‘A’ or ‘B.’

Terminal M.A. Program—Applicants who do not wish to continue beyond the M.A. degree are admitted to this program at the discretion of the faculty in individual fields (U.S., modern Europe, and so on). Students admitted may not apply to enter the Ph.D. program in History during the course of work for the M.A. degree.

M.A. in Teaching (History)—The department cooperates with the School of Education in offering the Master of Arts in Teaching degree. For the general requirements, see the “School of Education” section of this bulletin. For certain additional requirements made by the Department of History, contact the department office. Candidates must possess a teaching credential or relevant teaching experience.

DOCTOR OF PHILOSOPHY

Students planning to work for the doctorate in history should be familiar with the general degree requirements of the University outlined in the “Graduate Degrees” section of this bulletin. Those interested in applying for admission to the M.A. and Ph.D. programs should contact Graduate Admissions, the Registrar’s Office, Old Union, in order to receive an application. Applications become available in September of the year prior to intended enrollment. The application filing deadline is January 1. Applicants must file a report of their general scores on the Graduate Record Examination and submit a writing sample of 10-25 pages on a historical topic. Successful applicants for the M.A. and Ph.D. programs may enter only in Autumn Quarter.

Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A decision as to whether she or he will be admitted to candidacy for the Ph.D. is normally made by the middle of the student’s third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.
REQUIREMENTS

1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:
   - Europe, 300-1400
   - Europe, 1400-1789
   - Europe since 1700
   - Jewish History
   - Russia
   - Eastern Europe
   - Middle East
   - East Asia before 1600
   - East Asia since 1600
   - Japan
   - Africa
   - Britain and the British Empire since 1460
   - Latin America
   - The United States (including colonial America)
   - History of Science and Technology

2. The department seeks to provide a core colloquium in every major concentration. Students normally enroll in this colloquium during the first year of graduate study.

3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.

4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
   a) One of the concentrations listed above (other than the student’s major concentration).
   b) One of the concentrations listed below, which falls largely outside the student’s major concentration:
      - The Ancient Greek World
      - The Roman World
      - Europe, 300-1000
      - Europe, 1000-1400
      - Europe, 1400-1600
      - Europe, 1600-1789
      - Europe, 1700-1871
      - Europe since 1848
      - England, 450-1460
      - Britain and the British Empire, 1460-1714
      - Britain and the British Empire since 1714
      - Russia to 1800
      - Russia since 1800
      - Eastern Europe to 1800
      - Eastern Europe since 1800
      - Jewish History
      - Middle East to 1800
      - Middle East since 1800
      - Africa
      - China before 1600
      - China since 1600
      - Japan before 1600
      - Japan since 1600
      - Latin America to 1825
      - Latin America since 1810
      - The United States (including Colonial America) to 1865
      - The United States since 1850
      - The History of Science and Technology

5. Each student, before conferral of the Ph.D., is required to satisfy the department’s teaching requirement.

6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. In no concentration is a student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Latin, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of language competence must be accomplished before a student takes the University oral examination.

7. The student is expected to take the University oral examination in the major concentration early in the third graduate year.

8. The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

JOINT PH.D. IN HISTORY AND HUMANITIES

The Department of History participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in History and Humanities. See the “Interdisciplinary Studies in Humanities” section of this bulletin.

RESOURCES

The above section relates to formal requirements, but the success of a student’s graduate program depends in large part on the quality of the guidance which he or she receives from the faculty and on the library resources available. Prospective graduate applicants are advised to study closely the list of History faculty and the courses this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described below.

The University Library maintains strong general collections in almost all fields of history. It has a very large microtext collection, including, for instance, all items listed in Charles Evans’ American Bibliography, and in the Short-Title Catalogues of English publications, 1474-1700, and virtually complete microfilmed documents of the Department of State to 1906. It also has a number of valuable special collections including the Borel Collection on the History of California; many rare items on early American and early modern European history; the Brasch Collection on Sir Isaac Newton and scientific thought during his time; the Gimon Collection on French political economy, and other such materials.

The rich, and in some respects unique, collection of the Hoover Institution on the causes, conduct, and results of WW I and WW II are being augmented for the post-1945 period. The materials include government documents, newspaper and serial files, and organization and party publications (especially the British and German Socialist parties). There are also important manuscript collections, including unpublished records of the Paris Peace Conference of 1919 and the Herbert Hoover archives, which contain the records of the Commission for Relief in Belgium, the American Relief Administration, the various technical commissions established at the close of WW I for reconstruction in Central and Eastern Europe, the personal papers of Herbert Hoover as United States Food Administrator, and other important personal papers. Other materials for the period since 1914 relate to revolutions and political ideologies of
international importance; colonial and minority problems; propaganda and public opinion; military occupation; peace plans and movements; international relations; international organizations and administration including the publications of the United Nations, as well as principal international conferences. The Hoover Institution also possesses some of the richest collections available anywhere on the British labor movement; Eastern Europe, including the Soviet Union; East Asia (runs of important newspapers and serials and extensive documentary collections, especially for the period of WW II); and Africa since 1860, especially French-speaking Africa, the former British colonies, and South Africa.

**FINANCIAL SUPPORT**

Students who are admitted with financial support are provided multiple years of support through fellowship, teaching and research assistantships, and tuition grants. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent residents who are interested in area language studies in East Asia, Latin America, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from the FLAS Coordinator, (650) 723-0564. The FLAS application deadline is mid-January.

**COURSES**

See the Time Schedule for changes in course offerings each quarter, and see the web at http://history.stanford.edu/courses/timeschedule.html for updated information.

**INTRODUCTORY UNDERGRADUATE**

Introductory undergraduate History courses are listed in the following subsection order:

- Stanford Introductory Seminars
- Introductory Lectures
- Sources and Method Seminars.

**STANFORD INTRODUCTORY SEMINARS**

Refer to the Time Schedule or contact the Stanford Introductory Studies office (123 Sweet Hall, 650-723-4504) for applications and information.

**HISTORY 20N. Early Modern European Views of Eastern Europe and Russia**—Stanford Introductory Seminar. The contrast between the early modern image of Europe as free, civilized, democratic, rational, and clean against the notion of New World Indians, Turks, and Chinese as savage. The more difficult, contemporary problem regarding E. Europe and Russia which seemed both European and exotic. Readings concerning E. Europe and Russia from the Renaissance to the Enlightenment; how they construct a positive image of Europe and conversely a negative stereotype of E. Europe. GER:3a

- 5 units, Spr (N. Kollmann)

**HISTORY 21N. Heretics and Inquisitors**—Stanford Introductory Seminar. Preference to freshmen. Catholic Church reforms and institutional centralization, and popular heresies interested in reform, beginning in the 11th century. How these processes collided by the 13th century as papally-appointed inquisitors started prosecuting religious dissenters. The how and why of heresy and inquisition. How leading historians have exploited inquisitorial records; what they reveal about daily life and belief in medieval Europe and the machine of repression and heretical belief. GER:3b

- 5 units, Spr (Buc)

**HISTORY 36N. Gay Autobiography**—Stanford Introductory Seminar. Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Barbin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers’ experiences? GER:3a,4c

- 4 units, Spr (Robinson)

- 5 units, Win (Daughton)

**HISTORY 42N. The Invention of Liberty and the English Revolution, 1640-1660**—Stanford Introductory Seminar. Preference to freshmen. The English Civil War and the 11-year period in which it became a republic ruled not by a hereditary king but by a lord protector. During this revolutionary period, English men and women wrote about freedom and liberty in terms of the individual and the state, and of religion and society. The meaning of these writings which sketched for the first time in premodern Europe what democracy and a democratic republic might entail. GER:3a

- 5 units, Win (Seaver)

**HISTORY 44N. Britain and the History of Human Rights**—Stanford Introductory Seminar. Key moments in the history of humanitarianism and human rights thinking. Contributions of capitalism, liberalism, socialism, the modern state, mass politics and culture, racism, war, and imperialism to the emergence of a humanitarian sensibility, humanitarian movements, and the legal framework of human rights. The controversial and contingent nature and origins of moral sentiments. GER:3a

- 5 units, Win (Satia)

**HISTORY 48Q. South Africa: Contested Transitions**—Stanford Introductory Seminar. Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet. GER:3a

- 3 units, Win (Samoff)

**HISTORY 49N. The Slave Trade**—Stanford Introductory Seminar. Preference to freshmen. GER:3b,4a

- 4-5 units, Win (Roberts)

**HISTORY 53N. Reflections on the American Condition: American History through Literature**—Stanford Introductory Seminar. Preference to freshmen. Classics of American literature, viewed as cultural and historical documents, cultivate critical skills in reading texts from various perspectives: aesthetic, biographical, social, and historical. Readings: Harriet Beecher Stowe, Uncle Tom’s Cabin; short stories by Henry James and Edith Wharton; Richard Wright, Native Son; and David Guterson, Snow Falling on Cedars. GER:3a

- 4 units, Aut (Kennedy)

**HISTORY 90Q. Buddhist Political and Social Theory**—Stanford Introductory Seminar. Preference to sophomores. Contemporary Buddhist political theory and its historical and textual roots, emphasizing Tibetan, Thai, and Sri Lankan Buddhism. Topics: society and polity in Buddhist thought, Buddhist spiritual practice as social and political practice, sovereignty, the individual and society, Buddhist economic theory and practice, Buddhism and the state, Buddhist political and social theory in practice, differences between Vajrayana (Tibetan) and Theravada (S.E. Asian) Buddhist social theory. GER:3b,4a

- 5 units, Win (Mancall)
INTRODUCTORY LECTURES

For students with little or no previous experience in college-level history, these courses survey a specific topic and introduce the methods of the discipline. All are meant to serve as foundations for more advanced course work within the department.

HISTORY 13. The Emergence of Modern Medicine—How did medicine emerge as a distinctive body of knowledge and a profession in the age of Vesalius and Harvey? Why did physicians, rather than other medical practitioners, come to dominate medicine? The history of medicine from ca. 1000 to 1700. Topics: the history of the body, the religious and cultural significance of disease, development of hospitals, the rise of public health systems. Compares medical knowledge and institutions in W. Europe and Islam. GER:3b
5 units (Findlen) not given 2004-05

HISTORY 33A. The Rise of Scientific Medicine—(Same as 333A.) Intellectual, social, and institutional dimensions, 19th and 20th centuries. How did medicine become scientific? What differences did science make to the practicing physician? Why did it displace other approaches to medicine? Topics: the development of experimental physiology, bacteriology, pharmacology, biomedical technology, nuclear medicine, biomedical imaging, computers in medicine, and prospects for bedside gene therapies; the effects of scientific developments on medical practice and therapy; the professionalization of medicine in comparative European and American contexts. GER:3b
4-5 units, Spr (Lenoir)

HISTORY 49. Twentieth-Century South Africa—Modern S. Africa, from its origins in the mineral revolution of the late 19th century to the end of apartheid in the early 90s. Topics include: the importance of the mining industry in the development of S. Africa’s economy and society; the issue of land dispossession from rural African communities; the roles of scientific racism and cultural difference in creating the apartheid system; and the politics of protest that have created the new S. Africa. Sources include historical monographs, journal articles, novels, and film.
5 units (R. Roberts) not given 2004-05

HISTORY 59. Introduction to Asian American History—The historical experience of people of Asian ancestry in the U.S. Immigration, labor, community formation, family, culture and identity, and contemporary social and political controversies. Readings: interpretative texts, primary material, and historical fiction. GER:3b
5 units, Aut (Chang)

HISTORY 64. Introduction to Race and Ethnicity in the American Experience—How ethnicity influenced the American experience and how prevailing attitudes about racial and ethnic groups over time have affected the historical and contemporary reality of the nation’s major minority populations. Focus is on the past two centuries. GER:3b,4b
5 units (Camarillo) not given 2004-05

HISTORY 75. The United States and East Asia—Political, social, military, and cultural interactions between the U.S. and the societies of E. Asia (China, Japan, Korea, Vietnam, and the Philippines) from the mid-19th century to the present. Major wars and diplomatic events, mutual perceptions, reciprocal consequences, and long-term trends generated by these events, and the circumstances that brought them about. An American narrative with E. Asian perspectives. GER:3a
5 units (Chang) not given 2004-05

HISTORY 80. Culture, Politics, and Society in Latin America—Introduction to the political and social history of Latin America. Emphasis is on the interaction between institutional change, social structure, and political movements, emphasizing the environment and cultural values. GER:3b,4a
5 units, Aut (Frank)

HISTORY 87. Empires and Cultures in the Modern World—The formation of modern European empires and their expansion into Asia, Africa, and the Middle East. Topics: cultural encounters, military conquest, economic integration, the new imperialism, colonialism, nationalism, the mutual constitution of colonial power and forms of knowledge, and the culture and politics of the postcolonial world. Readings: historical texts, films, and novels. GER:3b
5 units, Win (Lee)

HISTORY 92A. The Historical Roots of Modern East Asia—China and Japan before and during the transition to modernity. From the 17th century when E. Asia was populous, urbanized, economically advanced, and culturally sophisticated to the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire. GER:3b,4a
5 units, Win (Sommer, Wigen)

HISTORY 92B. East Asia in the Age of Imperialism—For students planning to do additional work on the region. Interdisciplinary. Political, social, cultural, and economic development of E. Asia, 1840-1945. Responses to Western penetration of the region. Asian perspectives.
5 units (Staff) not given 2004-05

SOURCES AND METHODS SEMINARS

These are intended to introduce the undergraduate major or prospective major to the processes of historical investigation and interpretation by which archival material becomes narrative description and explanation, and by which interpretation itself becomes open to disagreement and revision. The object is to take the beginning student into the historian’s workshop and to provide first hand experience in interpreting documents, constructing a coherent story from them, interpreting their larger implications, and in discovering why it is possible to agree on the facts but to disagree on what they mean. These courses are numbered 1 through 99 followed by the letter ‘S.’

HISTORY 10S. Imperial Encounters: Settlement, Identity, and Making of European Colonialism
5 units, Win (Salinas)

HISTORY 12S. Cabaret, Conflict, and a Constitution: The Weimar Republic, 1918-1933—Was Germany the key to the future of democracy in Europe’s 20th century? Intersections of politics, culture, and social life; competing ideas about modernity. Germany’s relationship to democracy. How did crisis affect daily life and influence culture? Sources include novels, propaganda, film, and art.
5 units, Spr (Blei)

HISTORY 16S. Coffee, Cocaine, and Chocolate: Consumption and Culture in Early Modern Europe—The revolutionary social and cultural impact of the importation of wondrous and profane goods. Tea, tobacco, porcelain, silk, potatoes, and illicit drugs as defining aspects of Western life since the 15th century. Why was the early modern coffee house seditious? What were the health benefits of tobacco? How did socks make the man in rural 14th-century Italy. Visual, material, and textual sources.
5 units, Win (Barreveld)

HISTORY 23S. Beyond the Shtetl: Jews and Poles, 1881-1946
5 units, Aut (Plocker)

HISTORY 24S. Bob Dylan and The Old, Weird America: American Cultures and Countercultures, 1930-1970
5 units, Spr (Morgan)

HISTORY 25S. Kids, Classrooms, and Culture: School and Youth in the 20th Century—How have relationships among child, school, and family been negotiated? What is the modern adolescent? Who have been the winners and losers in public education? How do experiences of childhood and the schoolhouse interact with a commercial society? Focus is on historical analysis of issues in education and childhood including immigration, urbanization, sexuality, and multiculturalism.
5 units, Spr (Mehlman)

HISTORY 28S. The End of the American Frontier—The rhetoric of the American frontier as a vanishing space and its influence on conceptions of civilization, race, gender, and nature. Encounters between Anglo and Native Americans, women and the taming of the Wild West, and the
emergence of western cities. Primary sources include ethnographic surveys, travelogues, memoirs, maps, editorials, paintings, photography, films, novels, and architecture.

5 units, Spr (Venit)

HISTORY 46S. Photography and African History—Issues relating to the rise of photography by Africans in Africa towns and cities since the late 1880s.

5 units, Aut (Jackson)

HISTORY 56S. Advertising and Consumer Culture in the United States—The history of modern materialism through the study of advertising. Theoretical and critical perspectives on consumption and recent historical interpretations of advertising and consumer culture in the U.S., focusing on the problems of using advertisements as sources for historical analysis. Prerequisite: consent of instructor before first class.

5 units, Aut (CORN)

HISTORY 57S. Revolutionary Scientific Ideas: Copernicus to Darwin—Classic questions in the history of science and recent controversies. The background, development, presentation, and reaction of the revolutionary scientific ideas of Copernicus, Galileo, Boyle, and Darwin. Sources include original documents in Stanford’s rare book collection, early scientific reports and notebooks, Inquisition letters, Victorian newsmagazines, and a reenactment of one of Galileo’s more obscure experiments.

5 units, Win (McCaskey)

HISTORY 65S. Masters, Neighbors, and Victims: The German-Jewish Dialogue from the Enlightenment to Modernity

5 units, Win (Levine)

UNDERGRADUATE LECTURES

Undergraduate lecture courses, which are numbered 100 through 199, are listed in the following subsection order:

General
Classics
Eastern Europe and Russia
Medieval and Early Modern Europe
Modern Europe
History of Science and Technology
Africa
The United States
Latin America
Jewish History
Middle East
South Asia
East Asia

GENERAL

HISTORY 101A. Global Human Geography: Asia and Africa—(Same as INTNLREL 161A, IPS 261A.) Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes. GER:3b,4a

5 units, Aut (M.W. Lewis)

HISTORY 101B. Global Environmental Geography—(Same as INTNLREL 162, IPS 262.) Basic physical geography; why different environmental conditions are encountered in different parts of the world. Relationships among climate, vegetation, soils, and landforms are stressed. The second portion of the class focuses on the main global hot spots of environmental degradation. GER:3b

5 units (M.W. Lewis) not given 2004-05

HISTORY 101D. History of Nuclear Weapons—(Same as POLISCI 116.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear has been avoided so far and whether it can be avoided in the future. GER:3b

5 units, Spr (Holloway)

HISTORY 102A. The History of the International System—World politics and international relations from the dominance of empires and nation states at the turn of the century to the present. The influence of communism, fascism, and anti-imperialism, and the emergence of society as a factor in international relations. Questions of sovereignty versus the new world order. GER:3b

5 units, Spr (Haslam)

HISTORY 102G. History of Ancient Political Thought I: Constructing and Questioning Political Obligation in the Ancient World—(Enroll in POLISCI 130A/330A.)

3-5 units, Aut (Adcock)

CLASSICS

HISTORY 101. The Greeks—(Enroll in CLASSHIS 101.)

4-5 units, Aut (I. Morris)

3-4 units (Manning) not given 2004-05

HISTORY 105. History and Culture of Ancient Egypt—(Enroll in CLASSHIS 105.)

3-5 units, Spr (Manning)

EASTERN EUROPE AND RUSSIA

HISTORY 119. Aristocracies and Absolutism: Early Modern Eastern Europe, 1400-1800—(Same as 319.) The societies and culture of E. Europe (Belorusia, Bohemia, Hungary, Poland, Ukraine) in the late medieval and early modern periods. The conflict of aristocratic parliamentary governments with absolutist states (Austria-Hungary, Prussia, Russia). E. Europe’s development is contrasted to the Russian historical experience. GER:3b

5 units, Spr (N. Kollmann)

HISTORY 120A. Russia, 988-1762—Culture, politics, and society from the beginnings to Catherine the Great. Orthodox Christianity; Vikings in Kievan Rus; the principality of Moscow and the Muscovite political system; church-state relations; the 15th-16th century Muscovite cultural synthesis in art and architecture and the shattering of that synthesis in the 17th century; the 17th-century schism in the church; cultural revolution and W. European elements under Peter the Great; Moscow versus St. Petersburg, or traditional versus westernized Russia; rise of serfdom; Catherine the Great as enlightened despot. GER:3a

4-5 units (N. Kollmann) not given 2004-05

HISTORY 120B. History of Imperial Russia—From the reign of Catherine the Great to the collapse of the monarchy in war and revolution in 1917. Themes include the ruling strategies of the Romanov dynasty, noble culture, serfdom, the expansion of the empire into Europe and Asia, the intelligentsia and radical movements, industrialization and urbanization, the geopolitics of Eurasia, and the challenges of nationalism and other revolutionary ideologies to autocratic Russia as a multi-religious and multi-ethnic empire. Novels, memoirs, visual images, music, architecture, and other primary sources. GER:3a

5 units, Spr (Crews)

HISTORY 120C. 20th-Century Russian and Soviet History—The Soviet polity from the 1917 Revolution to its collapse in 1991. Essentials of Marxist ideology; the Russian Empire in 1917. Causation in history; interpretations of the Revolution; state building in a socialist polity; social engineering through collectivization of agriculture, force-paced industrialization, and cultural revolution; terror as concept and practice; nationality policies in a multi-ethnic socialist empire; the routinization, decline, and collapse of the revolutionary ethos; and the legacy of the Soviet experiment in the new Russia. GER:3a

5 units, Aut (Patenaude)
HISTORY 120D. Russian Intellectual and Cultural History to 1917—Companion to 120B. The development of Russian intellectual and cultural life under the impact of Western influences, from the reign of Peter the Great to the end of the Empire. Focus is on primary texts and cultural products. Recommended: 120B. GER:3a
5 units (Staff) not given 2004-05

HISTORY 125. 20th-Century Eastern Europe—Major historical trends in 20th-century E. European history. Empires and national movements. The creation of independent Eastern Europe after WW I; social movements and the emergence of dictatorships and fascism in the interwar period. WW II, Stalinism, and destalinization in contemporary E. Europe. GER:3b
5 units

HISTORY 126. The History of the Cold War—(Same as 327A.) From its beginnings in the post-WW II period to its end with the collapse of the Soviet Union. Documents and insights from the new Cold War historiography are applied to questions about the worldwide struggle between the Soviet Union and the U.S. GER:3b
5 units (Naimark) not given 2004-05

MEDIEVAL AND EARLY MODERN EUROPE

HISTORY 100A. Europe from Late Antiquity to 1500—Preference to freshman. Seminar. Deviance from the norms of the Catholic church in the Middle Ages, and its social, economic, cultural or religious causes. How the Church tried, sometimes successfully, to bring heretics back to the fold, most famously through the Inquisition. Was this formative laboratory for techniques of social control and disciplining characteristically European? Introduction to medieval religion and its place in medieval society. Readings: descriptions of heresies, inquisitorial trial records, and secondary explanations of heresy and the inquisition. GER:3a
5 units, Aut (Buc)

HISTORY 100B. Machiavellian Moments: Europe’s History, 1492-1793—Survey of the intellectual and social currents from the voyages of Columbus to the French Revolution. GER:3b
5 units, Win (Longee Chappell)

HISTORY 100C. Introduction to Modern Europe—The main lines of European history from the French Revolution through the post-WW II era. How Europeans coped with an increasingly democratic politics and technological and economic changes. Readings focus on writers from the period such as Tocqueville, Nietzsche, Gosse, and de Beauvoir. Cultural resources that Europeans had for responding to social changes. GER:3a
5 units, Spr (Daughton)

HISTORY 100D. Medieval Europe—Although often looked upon as a period of mindless superstition, docile religious obedience, and cruel violence, the European middle ages were a period of remarkable social and intellectual transformation. The central religious, political, and cultural developments that shaped the European world in the 4th and 5th centuries, from Constantine’s conversion to Christianity to the dawn of the Protestant Reformation.
5 units (Staff) not given 2004-05

HISTORY 107. Crescent or Cross? Christianity and Islam in the Medieval Mediterranean—GER:3a
5 units (Miller) not given 2004-05

HISTORY 108. The Spanish Inquisition and the Jews, from the 15th to the 17th Centuries—GER:3a
5 units, Win (Gutwirth)

HISTORY 126B. Protestant Reformation—16th-century evangelical reformers such as Luther and Calvin, and reform movements such as the Lutheran, Reformed, and Anabaptist, in their medieval contexts. GER:3a
4 units, Aut (Pitkin)

HISTORY 126B. Protestant Reformation—16th-century evangelical reformers such as Luther and Calvin, and reform movements such as the Lutheran, Reformed, and Anabaptist, in their medieval contexts. GER:3a
4 units, Aut (Pitkin)

HISTORY 126B. Protestant Reformation—16th-century evangelical reformers such as Luther and Calvin, and reform movements such as the Lutheran, Reformed, and Anabaptist, in their medieval contexts. GER:3a
4 units, Aut (Pitkin)

HISTORY 141. Yorkist and Tudor England—GER:3a
5 units (Como) not given 2004-05

HISTORY 142. Revolutionary England: The Stuart Age—The history of England from the accession of King James I in 1603 to the death of Queen Anne in 1714. 17th-century England witnessed a brutal civil war, the execution of one anointed king, and the deposition of another. Topics include the causes and consequences of the English Revolution, the origins of Anglo-American democratic thought, the rise and decline of Puritanism, and the emergence of England as an economic and colonial power. GER:3a
5 units (Como) not given 2004-05

HISTORY 143. Shakespeare’s England, 1558-1640—Introduction to a period of early modern English history when England was still a minor power and when Elizabeth Tudor and then her Stuart cousins tried to exploit the new powers acquired by the monarchy under Henry VIII, before the society was torn apart by civil war. This society produced three of its greatest dramatists, perhaps its greatest philosopher of science, and an unrivaled outpouring of poetry. It would be reductionist to argue that social, political, and economic developments explain this period of literary production, but the social, political, and religious world in which it took place is sketched. GER:3a
5 units (Seaver) not given 2004-05

HISTORY 188D. Convivencia: Jews, Christians, and Muslims in Medieval Iberia—GER:3a
5 units (Gutwirth) not given 2004-05

MODERN EUROPE

HISTORY 106A. The French Revolution—GER:3a
5 units, Spr (K. Baker)

HISTORY 134. European Economic History—(Enroll in ECON 115.) GER:3a
5 units (Greif) not given 2004-05

HISTORY 136A. European Thought and Culture in the 19th Century—Major European thinkers and intellectual movements from the Enlightenment to Modernism. Readings include Matthew Arnold, Jane Austen, Karl Marx, John Stuart Mill, Friedrich Nietzsche, Emile Zola. GER:3a
5 units (Robinson) not given 2004-05

HISTORY 136B. European Thought and Culture in the 20th Century—European thinkers and intellectual movements from Freud to Foucault. GER:3a
5 units, Win (Robineg)

HISTORY 137. The Holocaust—(Same as 337.) The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry. GER:3a
5 units, Win (Rodrique)

HISTORY 140D. Modern Britain and the Empire—British history from American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain. GER:3a
5 units, Aut (Satia)

HISTORY 144. Britain, 1832-1914—The emergence of Britain as the world’s first modern commercial and industrial nation from the Glorious Revolution to the democratic Reform Act of 1832. Britain from a variety of angles: political, artistic, imperial, and economic. Emphasis is on the ways the British came to understand their own society in this era of profound social and cultural change. GER:3a
5 units (Staff) not given 2004-05
HISTORY 133. The Darwinian Revolution—(Same as 333.) Conceptual developments leading to the major unifying paradigm of biological science, the theory of evolution by natural selection. Biological thought before Darwin, 1800-36. The voyage of the Beagle and the formation of Darwin’s thought in terms of its broader intellectual and social context. The Origin of Species. Descent of Man. The difficulties the theory had to overcome and its resolution in the union of evolutionary biology and population genetics in the 30s and 40s. GER:3b
4 units, Win (Lenoir)

HISTORY 13A. The History of Women and Gender in Science—(Same as 33A.) Women’s participation in science from the 17th century to the present in Europe and the U.S. with comparisons around the world. Why were 14 percent of German astronomers women in 1700, but only 6 percent today. Why are there many women biologists but few women physicists? Women scientists, cultural and scientific ideals of gender, changing structures of scientific institutions, and gender in the results of scientific research. GER:3a
5 units, Spr (Schiebinger)

HISTORY 135. World History of Science: From Prehistory to the Scientific Revolution—The earliest developments in science, the prehistoric roots of technology, the scientific revolution, and global voyaging. Theories of human origins and the oldest known tools and symbols. Achievements of the Mayans, Aztecs, and native N. Americans. Science and medicine in ancient Greece, Egypt, China, Africa, and India. Science in medieval and Renaissance Europe and the Islamic world including changing cosmologies and natural histories. Theories of scientific growth and decay; how science engages other factors such as material culture and religions. GER:3b
5 units, Aut (Riskin)

AFRICA

HISTORY 146A. Religion and the State in Premodern Africa—
GER:3a
5 units, Win (Hanretta)

HISTORY 147A. African History in Novels and Film—The principal episodes in African history have been captured in novels and, to a lesser extent, in film. What happens to history and historical understanding as they undergo transformation in imaginative literature and film? Does the African novel fairly represent history? Is film only an imperfect vision of African past events? GER:3a,4a
5 units (Jackson) not given 2004-05

HISTORY 148C. Africa in the 20th Century—The challenges facing Africans from when the continent fell under colonial rule until independence. Case studies of colonialism and its impact on African men and women drawn from West, Central, and Southern Africa. Novels, plays, polemics, and autobiographies written by Africans. GER:3b,4a, WIM
5 units, Aut (Roberts)

HISTORY 149. African Intellectuals: 1940-2000—Africans thinkers including philosophers, contemporary artists, and historians, and how they have responded over the last half century to the world, Africa’s trajectory, and Africans. Also, thinkers from everyday African life. GER:3a
5 units, Spr (Jackson)

THE UNITED STATES

HISTORY 115. Technology and Culture in 19th-Century America—The social and cultural aspects of technological change from the American Revolution through WW I. Emphasis is on technologies of production and consumption (armory practice, department stores); of temporal and spatial transformation (telegraphic time signals, railroads); simulation and reproduction (photography, phonograph); and communication and control (telephone, scientific management). GER:3b
5 units, Win (CORN)

HISTORY 150B. Introduction to African American History: The Modern African American Freedom Struggle—Focus is on political thought and protest movements after 1930. Individuals who have shaped and been shaped by modern African American struggles for freedom and justice. Sources include audiovisual materials. Research projects required for fifth unit. GER:3b,4b
4-5 units, Spr (Carson)

HISTORY 151. 19th Century U.S. Intellectual History—GER:3a
5 units, Spr (Winterer)

HISTORY 152. American Spaces: An Introduction to Material Culture and the Built Environment—American history through the evidence of things, including spaces, buildings, and landscapes of the built environment. How to read such artifacts using methods and theories from anthropology, cultural geography, history, and other disciplines. GER:3a
5 units, Spr (CORN)

HISTORY 162. Introduction to Chicana/o Life and Culture—(Same as ENGLISH 172A.) Team-taught. The history and culture of Mexican Americans in the U.S. Readings include Américo Paredes, Luis Rodriguez, Tomás Rivera, and Sandra Cisneros. GER:3b
5 units, Aut (Camarillo, Moya)

HISTORY 165A. Colonial and Revolutionary America—Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution. GER:3b,4b
5 units, Aut (Rakove)

HISTORY 165B. 19th-Century America—Emphasis is on the causes and consequences of the Civil War. Topics: Jacksonianism and the market revolution, slavery and the old South, sectional conflict, the rise and fall of Reconstruction, late 19th-century society and politics, and the crisis of the 1890s. GER:3b,4b
5 units, Win (White)

HISTORY 165C. The United States in the Twentieth Century—Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War. GER:3b,4b
5 units, Spr (Kennedy)
HISTORY 166. American Economic History—(Enroll in ECON 116.)
3-4 units, Spr (Wright)

HISTORY 168. American History in Film: Since World War II—
U.S. society, culture, and politics since WW II through feature films.
Topics include: McCarthyism and the Cold War; ethnicity and racial
identify; changing sex and gender relationships; the civil rights and anti-
war movements; and mass media. Films include The Best Years of Our Lives, Salt of the Earth, On the Waterfront, Raisin in the Sun, Medium
Cool, and Broadcast News. GER:3a
3-4 units (Carroll) not given 2004-05

HISTORY 172A. The United States Since 1945—Focus is on foreign
policy and politics with less attention to social and intellectual history.
Topics include nuclear weapons in WW II, the Cold War, the Korean
and Vietnam wars, Eisenhower revisionism, the Bay of Pigs and Cuban
missile crisis, civil rights and the black freedom struggle, the women’s
movement, the Great Society and backlash, welfare policy, conservatism
and liberalism, the ’60s anti-war movement, Watergate and the growth
of executive power. Iran-Contra and Reagan revisionism, Silicon Valley,
the Gulf War, the Clinton impeachment controversy, 2004 election, and
9/11 and Iraq war. GER:3b,4b
4-5 units, Win (Bernstein)

HISTORY 173B. U.S. Women’s History, 1820-1980—The transfor-
mation of Victorian womanhood in the late 19th century, including the
workforce participation of immigrant and black women and the educa-
tional and professional opportunities for middle class white women,
the impact of wars and depression on 20th-century women’s lives, and
the rebirth of feminism. GER:3b,4c
5 units (Freedman) not given 2004-05

LATIN AMERICA

HISTORY 177. Modern Latin America—Latin America since the early
19th century, concentrating primarily on Mexico, Brazil, Argenti-
na, and Cuba. Emphasis is on Latin America’s role in the world econ-
omy and the effect that this has had on economic growth, social structure,
and politics. GER:3b,4a
5 units (Haber) not given 2004-05

HISTORY 178. Colonial Latin America—The Iberian and indigenous
roots of Latin American culture and society. The colonial era: the
encounter and conquest through the eyes of the victors and the van-
quished; strategies of domination and resistance for Central Mexico, the
Andes, and Brazil. The mature structures of colonial life, socioeconomic
and cultural; sources of tension and change within colonial Latin Amer-
ica during the 18th century. Interpretations of the breakdown of colonial
authority and the rise of independence movements. GER:3b
5 units (Frank) not given 2004-05

HISTORY 180A. Social Revolution in Latin America
5 units, Win (Segal)

HISTORY 181. Latin America Since the 16th Century: Problems of
Governance and Development—Political organization and the politi-
cal basis of economic development from before European colonization
to the present day. GER:3b
5 units (Haber) not given 2004-05

JEWS HISTORICAL

HISTORY 188C. Jews in the Modern World—Possible themes: the
restructuring of Jewish existence during the Enlightenment and legal
emancipation at the end of the 18th century in W. Europe, the transfor-
mation of Jewish life in E. Europe under the authoritarian Russian regime,
colonialism in the Sephardic world, new ideologies (Reform Judaism and
Jewish nationalisms), the persistence and renewal of anti-semitism, the
destruction of European Jewry under the Nazis, new Jewish centers in
the U.S., and the State of Israel. GER:3a
5 units (Zipperstein) not given 2004-05

HISTORY 189C. Nationalism, Socialism, and Modern Jewish
History—GER:3a
5 units, Aut (J. Frankel)

MIDDLE EAST

HISTORY 187. Palestine, Zionism, and the Arab-Israeli Conflict—
From the mid-19th century to the present. Topics: Palestine under late
Ottoman rule, the development of Zionism, Palestinian nationalism, the
Palestine mandate, the establishment of the state of Israel, the Arab-Israeli
wars, U.S. policy toward the conflict, the Camp David agreements, both
Palestinian uprisings, and the Oslo Accords. Readings from a range of
viewpoints. GER:3b,4a
5 units (Beinin) not given 2004-05

HISTORY 187B. The Middle East in the 20th Century—The history
of the Middle East since WW I, focusing on the eastern Arab world,
Egypt, the Fertile Crescent, and the Arabian Peninsula (the Mashriq),
with some attention to Turkey, Iran, and Israel. GER:3b,4a
5 units, Aut (Al-Qattan)

SOUTH ASIA

HISTORY 186A. Modern South Asia: History, Societies, Cultures—
Focus is on the period after the 16th century. The relationship between
geography and society. Traditional society, culture, and politics. Mughal
India and its culture. The British Raj. Indian response and resistance.
Independence movements in S. Asia. The multiethnic Indian state.
Pakistan, Sri Lanka, and Nepal in search of national identities, political
culture and style, secularism, communalism, development and environ-
ment, inter-regional and international relationships. GER:3b,4a
5 units (Mancall) not given 2004-05

HISTORY 186B. Perspectives on India—Topics include: Gandhi and
his influence on independent India, environmental problems and politics,
economic development, Hindu fundamentalism in politics, and Indian-
American relations. Guest lectures.
2 units (Mancall) not given 2004-05

HISTORY 190A. Introduction to the History of Buddhism—Focus
is on Central, S., and S.E. Asia. The historical Buddha. The development,
evolution and spread of Buddhist institutions and practices. Political,
social, and economic aspects. Buddhism and the state. Law and social
thought. Modern and contemporary Buddhist social movements. The
spread of Buddhism in the West.
5 units (Mancall) not given 2004-05

HISTORY 191A. Modern Southeast Asia—The emergence and de-
velopment of mainland and insular S.E. Asia from the 14th century. The
spread and impact of Indic civilizations; Hindu and Islamic influences;
external trade from the Middle East and Europe; extra-regional empires
and regional and local communities, institutions, and identities; the
consequences of trade, modernization, and industrialism; nationalism
and revolutions; dialectics between national states and regional issues,
common material and mental cultures, and local formations; and ASEAN.
5 units (Mancall) not given 2004-05

EAST ASIA

HISTORY 192B. China: The Early Empires—(Same as 392B.) Major
developments of the first unitary empires in China: the Qin and the Han.
Institutions and social patterns that defined imperial China as a political
form and social type. Topics include geography, urbanism, the peasantry,
military organization, kinship, religion, intellectual life, literary genres,
and changing forms of imperial cohesion. GER:3a
5 units, Spr (M.E. Lewis)

HISTORY 193. East Asia in the Early Buddhist Age—Evolution of
cities in imperial China through early imperial, medieval, and early
modern periods. Topics include physical structure, social order, cultural
forms, economic roles, relations to rural hinterlands, and the contrast
between imperial capitals and other cities. Comparative examination of
cases from European history. GER:3a,4a
5 units (M.E. Lewis) not given 2004-05

404
HISTORY 194A. Japan from Earliest Times to 1560—The prehistoric origins of the people and culture, emergence of the first polity, Chinese influences, the flowering of the native culture, and samurai and feudal government.
5 units (Berry) not given 2004-05

HISTORY 194B. Late Medieval and Early Modern Japan—From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community.
5 units (Daus) not given 2004-05

HISTORY 194D. The Rise of Modern Japan—Japanese history from 1840 to the present. Topics include the Meiji Restoration and its background, building a modern state, industrialization of the economy, the emergence of an imperialist power, the reorientation of postwar Japan, the economic miracle, and socioeconomic change and political developments. GER:3b,4a
4-5 units (Daus) not given 2004-05

HISTORY 195. Introduction to Korean History and Culture—Ancient kingdoms to early modern dynasties; challenges of the modern transition, 1700s to mid-1900s; and contemporary issues. Topics include archeological records, philosophical and religious traditions, literature and the performing arts, international relations, socioeconomic change, immigration and Asian American experiences, gender issues, and popular and youth cultures. GER:3a,4a
5 units, Win (Sawada)

HISTORY 196. China from 1895 to 1949—The main events of the half century: crisis, attempts at reform, and fall of the Qing dynasty; regional warlords, nationalism, and cultural awakening including the May 4th Movement; nationalist revolution and the Nanking decade; WW II and the Communist victory. Focus is on the cultural, social, and nationalist causes of the Chinese revolution, a long-term process starting at the end of the 19th century and shaped by the Chinese past and foreign influences. GER:3b
5 units, Win (Bianco)

HISTORY 196E. Postwar Japan: From Occupation to Global Power, 1945-2000—Japan’s transformation from a defeated and occupied country to the second most powerful economy in the world. Political, economic, and social dimensions, and the causes and costs of Japan’s rise to prominence. Topics include occupation and reform, independence and Cold War politics, high-speed economic growth, conservative hegemony, the culture of affluence and global expansion, the bursting of the bubble economy, the lost decade of the 90s, and Japan’s search for an international role in a changing world. GER:3b
5 units, Spr (de Boer)

UNDERGRADUATE COLLOQUIA AND RESEARCH SEMINARS

Colloquia consist of reading and discussion on specific historical themes. Short papers, reports, historiographical essays, and a final exam may be required. In all cases, colloquia are designed to examine issues of historical interpretation. Oral presentations are encouraged.

Undergraduate research seminars provide students with opportunities to conduct research using primary documents, engage in historiographical debate, or to interpret major historical events. Seminars may be offered for one or two quarters and they may be combined with a colloquium. In all cases, students write preliminary drafts of their research findings, present oral reports, and revise their papers.

Courses 200-299 are primarily for juniors and seniors majoring in history. Admission is by consent of the instructor. Undergraduate colloquia and research seminars are listed in the following subsection order:

- General
- Interdisciplinary Gateway Colloquium
- Eastern Europe and Russia
- Medieval and Early Modern Europe
- Modern Europe
- History of Science and Technology
- Africa
- The United States
- Latin America
- Jewish History
- Middle East
- East Asia

HISTORY 200A. Senior Research I—WIM 1-5 units, Aut, Win, Spr (Staff)

HISTORY 200B. Senior Research II—WIM 1-5 units, Aut, Win, Spr (Staff)

HISTORY 200C. Senior Research III—WIM 1-5 units, Aut, Win, Spr (Staff)

HISTORY 200H. Junior Honors Colloquium 3 units, Win (Winterer)

HISTORY 200M. Undergraduate Directed Research: Martin Luther King, Jr., Papers Project 1-4 units (Carson) not given 2004-05

HISTORY 200W. Undergraduate Directed Reading 1-5 units, Aut, Win, Spr (Staff)

HISTORY 200X. Undergraduate Directed Research and Writing—WIM 1-5 units, Aut, Win, Spr (Staff)

GENERAL

HISTORY 201D. International History and International Relations Theory—(Same as 301D, POLISCI 316.) Texts that relate the theory and history of international relations. GER:3b
5 units, Win (Holloway)

HISTORY 201E. History and Geography of Contemporary Global Issues—(Same as 301E, INTNLREL 163, IPS 263.) The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of The New York Times and The Economist. Topics vary according to what is happening in the world. Student presentations. GER:3b, WIM
5 units, Spr (M.W. Lewis)

HISTORY 202C. Biography and History—(Same as 302C.) The relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (A. S. Byatt’s Possession, Bernard Malamud’s Dubin’s Lives) that illuminate the intellectual underpinnings of biographical labor. GER:3a
5 units (Zipperstein) not given 2004-05

HISTORY 202E. Historical Geography: Maps in the Early Modern World—(Same as 302E.) Historians have recently generated a body of spatially attuned work, probing territorial identities, human-environmental interaction, the use and misuse of maps, and the spatial patterning of social life. Focus is on cartography in the early modern period, and recent studies from Asian, European, and N. American contexts that highlight cartography’s role in exploration, empire building, and boundary making in the early modern world. GER:3a
5 units (Wigen) not given 2004-05

HISTORY 205A. Private Lives, Public Stories: Autobiography in Women’s History—Changing contexts of women’s lives and the way women’s actions have shaped and responded to those contexts. GER:3a,4c
5 units (Lougee Chappell) not given 2004-05
HISTORY 206B. Design and Methodology for International Field Research—(Same as 306B.)
1 unit, Win (N. Kollmann, Roberts)

INTERDISCIPLINARY GATEWAY COLLOQUIA

HISTORY 204. Not Quite Masterpiece Theater: Art and Life in Postwar Britain—(Same as 304D.) British society in the 19th century and its novels, poetry, buildings, images, and music. The works in themselves and what they reveal about the society that produced them. GER:3a, WIM
5 units, Aut (Stansky)

HISTORY 206P. Origins and History of the Scientific Fact—(Same as 306P.) Gateway course for graduate students and advanced undergraduates. Focus is on the early modern emergence of notions that operate at the crux of modern science, including fact, evidence, experiment, demonstration, and objectivity. The development and transformation of these notions over the last four centuries, and the recent body of historical writing on the history of evidence, the history of objectivity, and the history of the modern fact. GER:3b, WIM
5 units, Aut (Riskin)

EASTERN EUROPE AND RUSSIA

HISTORY 212A. Major Topics in the History of the Russian Orthodox Church—(Same as 312A.) The role of the church in Russian history from earliest times to the present. The church both as an institution and as a set of beliefs and practices. Topics include the conversion of early Rus to Orthodox Christianity; popular and pagan elements in Russian Christianity; politics and the church in Muscovite times; the 17th-century Schism and the Old Belief; parish clergy and their parishioners in Imperial Russia; Soviet persecution; post-Soviet rebirth. Primary and secondary readings, reports, short papers. GER:3a
4-5 units (J. Kollmann) not given 2004-05

HISTORY 212B. Peter the Great and the Cultural Revolution in Russia, 1682-1725—Child of 17th-century Muscovite Russia, father of 18th-century Imperial Russia, Peter has been regarded as reformer, revolutionary, tyrant, and enlightened monarch who presided over an era of change in which W. European culture became the new standard. What, in Peter’s view, was wrong with traditional Muscovite Russia? Why did he turn to Europe for fresh ideas and institutions in politics, education, the military, religion, society, economy, art, and architecture? The nature, purposes, and extent of Peter’s reforms. How was Russia different, or unchanged, after Peter? GER:3a
4-5 units (J. Kollmann) not given 2004-05

HISTORY 213. The Scientific Revolution—(Same as 313.) What do we know and how do we know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes and Newton, the early Royal Society, and less well-known contemporaries. Observing, collecting, experimenting, and philosophizing took on new meaning in this period. Their ramifications in relationship to the political, religious, and cultural events of early modern Europe. GER:3a, WIM
5 units (Findlen) not given 2004-05

HISTORY 217. Men, Women, and Power in Early Modern Russia, 1500-1800—(Same as 317.) Social values, gender relations, and social change in an era of rapid change; challenges to established norms by new constructions of deviance (witchcraft, religious reform, and revolt) and new standards of civility; encounters with non-Russians and the construction of national consciousness. Social values as political ethos: patrimonial autocracy and the reality of female rule in the late 17th and 18th century. GER:3a,4c,WIM
5 units, Win (N. Kollmann)

HISTORY 217B. The Woman Question in Modern Russia—Russian radicals believed that the status of women provided the measure of freedom in society and argued for extending rights to women as a principle of social progress. The social status and cultural representations of Russian women from the mid-19th century to the present. Arguments and actions of those who fought for women’s freedom in the 19th century, theories and policies of the Bolsheviks, and the reality of women’s lives under them. How the status of women today reflects on the measure of freedom in post-Communist Russia. GER:3b,4c
5 units, Spr (Jolluck)

HISTORY 217C. Love, Marriage, and Family in Early Modern Europe and Russia—Family structures, marriage customs, and the place of love in life and marriage in the early modern period. Sources include W. Europe (France, England, Germany, Italy), central Europe (Poland) and Russia, providing for sharp contrasts in the status of women, the nature of marriage, and emergence of private life. Readings include historical monographs and primary sources including dowry agreements, litigations, Reformation tracts, and memoirs. GER:3a,4c,WIM
5 units (N. Kollmann) not given 2004-05

HISTORY 217D. Art and Ideas in 19th-Century Russia—(Same as 317D.) Why did so many artistic, intellectual, and revolutionary figures including Pushkin, Tolstoy, Dostoevsky, Mussorgsky, Tchaikovsky, and Lenin emerge from autocratic imperial Russia? How did the czarist state and society shape their work? Focus is on Russia’s cultural engagement with Europe and Asia through literature, music, painting, architecture, and political thought. Controversies in 19th-century thought and culture surrounding conservatism, Westernization, Slavophilism, socialism, nihilism, populism, revolutionary terrorism, empire, anti-Semitism, national identity, and revolutionary change. GER:3a
5 units (Crews) not given 2004-05

HISTORY 218. Russia and the West, 1815-1917—Tsarist foreign policy from the end of the Napoleonic Wars to the Russian Revolution emphasizing Russia’s place in Europe. Major European power struggles, wars, diplomatic congresses, and treaties. The Crimean War and its aftermath, the Congress of Berlin, the Russo-Japanese War, and the road to WW I. Russia’s imperial expansion into Central Asia and the Far East in the framework of the European balance of power. The role of Russian military strategy in the disaster of 1914. GER:3a
5 units, Aut (Patenaude)

HISTORY 219S. The Soviet Civilization—(Same as 419.) Socialist visions and practices of the organization of society and messianic politics; the Soviet understanding of mass violence, political and ethnic; and living space. Primary and secondary sources. Research paper or historiographical essay. GER:3b
5 units (Weiner) not given 2004-05

HISTORY 220A. Violence, Islam, and the State in Central Asia—(Same as 320.) The uses of violence in projects of empire and national state formation that have competed with Islamic and other political alternatives to shape modern Central Asia from the onset of the British and Russian imperial eras through the flight of the Taliban. Focus is on shared experiences and geopolitics of the former Soviet republics and Afghanistan. Themes include colonial wars and imperial competition, state formation, mass mobilization, women’s emancipation, cultural revolution, developmentalism, anti-Soviet jihad, the Taliban movement, and contemporary Islamist, nationalist, and regionalist contests for the state. GER:3b
5 units, Win (Crews)

HISTORY 220B. Central Asia in the 20th Century—From the Russian Revolution to recent Muslim radicalism, focus is on factors shaping the cultural identity and ideology of the emerging nations of Central Asia, the legacy of the Soviet Union and Muslim modernism, and national and Muslim consciousness in the post-Soviet space. Islam and nationality in contexts including: the crisis of modernity that drove Central Asia into the Soviet fold; the shaping of national identity; and the persistence of cultural identity. GER:3b
4-5 units, Aut (Rouland)
HISTORY 221C. Historiography of the Soviet Union—(Same as 321C.) Major schools of interpretation of the Soviet phenomenon through works representative of a specific school, in chronological order, from the first major interpretation of the Soviet polity by Trotsky to postmodernist theories. GER:3b
5 units (Weiner) not given 2004-05

HISTORY 222B. Circles of Hell: Poland in World War II—(Same as 322B.) In September 1939, Poland disappeared from the map of Europe, and the next six years brought unspeakable horrors. The experience and representation of Poland’s wartime history from the Nazi-Soviet Pact of 1939 to the aftermath of Yalta in 1945. Nazi and Soviet ideology and practice regarding the Poles and the ways Poles responded, resisted, and survived. The traditional self-characterization of Poles as innocent victims, and their involvement (some would say complicity) in the Holocaust, thus engaging in a passionate debate currently raging in Polish society. GER:3b
5 units, Spr (Jolluck)

HISTORY 223A. Cold War Russia—(Same as 323A.)
5 units, Spr (Haslam)

HISTORY 223S. Stalin and Europe; Europe and Stalin—(Same as 423.) The immediate post-WW II history of communism in Europe, examining the intentions and actions of the Soviet Union in various countries of the continent. The state of the communist movement in Europe (East and West) 1945-1953 and how its goals and the desires of the peoples of Europe were influenced by the development of the Cold War. Substantial research paper. GER:3b
5 units (Naimark) not given 2004-05

HISTORY 225D. Modernity, Revolution, and Totalitarianism—(Same as 326.) Analysis of modern revolutionary and totalitarian politics based on readings of monographs on the medieval, Reformation, French Revolutionary, and the Great War eras which deal with relevant themes. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities. GER:3b, WIM
5 units (Weiner) not given 2004-05

MEDIEVAL AND EARLY MODERN EUROPE

HISTORY 207D. Other Renaissancees: Jewish History, from the 14th to the 17th Centuries—(Same as 307D.) The interaction between Renaissance and Jewish and converso history and cultures. Focus is on the Iberian peninsula, Italy, and the Ottoman Empire. Science, arts, and languages. The conversos: their political history, patronage, and reading at the origins of Jewish modernity. GER:3a
5 units, Aut (Gutwirth)

HISTORY 208A. Medieval Antisemitism—(Same as 308A.) The religions based on the New Testament, by virtue of having an old to which to refer the new, entertain a complicated relationship with Judaism. Focus is on the relationship of Christianity to Judaism and Jews under Christian rule during the formative medieval centuries. The formation of anti-Semitism as a factor both in this interaction and the self-identity of Christian communities. The connections between medieval anti-Semitism and modern forms of racism. GER:3b, WIM
5 units, Win (Buc)

HISTORY 208D. From Ha-Levi to Leon Hebreo: Medieval and Renaissance Jewish Culture—(Same as 308D.) GER:3a
5 units, Win (Gutwirth)

HISTORY 210. Poverty and Charity in Medieval Christianity, Judaism, and Islam—(Same as 310.) GER:3a
5 units, Aut (Miller)

HISTORY 211. Body, Gender, and Society in Medieval Europe—(Same as 311.) Historical, literary, theological, and anthropological sources. Issues: transformations in representations of the body, gender, sexuality, and in women’s place in society or social representation in W. Europe from the 3rd-14th centuries. Were these processes related to one another and to social changes? Analytically straddles the realm between bodification of spiritual powers and control or manipulation of the body in society, from the cult of relics to asceticism. GER:3a,4c, WIM
5 units (Buc) not given 2004-05

HISTORY 213B. Heretics, Prostitutes, and Merchants: Venice and its Empire—(Same as 313B.) Why was the myth of Venice so powerful? From the 13th-17th centuries, the Republic of Venice created an empire at the boundary between East and West, that controlled much of the Mediterranean, with a merchant society that allowed many social groups, religions, and ethnicities to coexist. Venetian society as a microcosm of late medieval and early modern Europe. The relationship between center and periphery, order and disorder, orthodoxy and heresy, and the role of politics, art, and culture in the Venice Renaissance. The decline of Venice as a political power and its reinvention as a tourist site, living museum, and subject for literature and film. GER:3a
5 units (Findlen) not given 2004-05

HISTORY 214C. Science and Culture Wars: From Galileo’s Trial to the Sokal Hoax—GER:3a
5 units, Win (Riskin)

HISTORY 214D. Empire and Information—GER:3a
5 units (Satia) not given 2004-05

HISTORY 216. When Worlds Collide: The Trial of Galileo—(Same as 316.) In 1633, the Italian mathematician Galileo was condemned by the Catholic Church for the heresy of believing the sun to be the center of the universe. Not until 1992 did the Catholic Church officially admit that Galileo was right. What does this event reveal about the relationship between science and religion? Why has the Galileo affair been one of the most discussed episodes in Italian history and the history of science? Documents from Galileo’s life and trial and related literature on Renaissance Italy. The historians’ interpretations of the trial in relation to its documentation. GER:3a, WIM
5 units, Spr (Findlen)

HISTORY 240. Shakespeare’s London: The Social and Cultural Consequences of Growth—From 1500-1700, London grew from a late medieval town of 50-60,000 to a metropolis of more than 500,000, the largest city in W. Europe. The problems such unprecedented growth generated including Crown attempts to control growth and city magistrates’ measures to meet the needs of the poor and sick. The official image of the city in the Lord Mayor’s shows and the image of urban life in popular theater. GER:3a, WIM
5 units (Seaver) not given 2004-05
HISTORY 241. English Society Through Fiction, 1714-1914.—(Same as 341.) England from the mid-18th century to the present through novels. Possible texts: Henry Fielding’s Joseph Andrews, Jane Austen’s Mansfield Park, George Eliot’s Middlemarch, E.M. Forester’s Howards End, Evelyn Waugh’s A Handful of Dust. Focus is on the novels themselves, literary works on their own terms, and how they illuminate the history and nature of English society. GER:3a
5 units, Aut (Stansky)

HISTORY 244. Religion and Politics in Early Modern England.—(Same as 344.) English political and religious culture from the end of the Wars of the Roses to the Civil Wars of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the civil war. GER:3a
5 units (Como) not given 2004-05

HISTORY 245. Heresy, Witchcraft, and Social Change in Early Modern England.—(Same as 345.)) The Pendle Hill region of northern England witnessed a series of extraordinary events and processes during the first decades of the 17th century, including one of the last great witchhunts in British history, the emergence of a heretical underground sect, and the evolution of a proto-industrial textile economy. Primary sources introduce historical methodologies, raise questions in early modern European history, and test the possibility of writing a total history of an early modern community. GER:3a, WIM
5 units (Como) not given 2004-05

HISTORY 245E. Artisans, Courtiers and Rabbis: Jews of Spain in the Middle Ages.—(Same as 345E.) GER:3a
5 units, Spr (Gutwirth)

MODERN EUROPE

HISTORY 227. War and Peace in the 20th Century.—(Same as 327.) The diplomatic and military crises from the origins of WW I to the collapse of Yugoslavia. Readings include historical analyses and original documents. GER:3b
5 units (Sheehan) not given 2004-05

HISTORY 228D. Cultures of Violence in Twentieth-Century Europe.—Political, social, and cultural factors that made the 20th century the most violent in history; the triumph of European civilization and an age of catastrophe. The social and political uses of and intellectual and cultural responses to violence. How people witnessed, coped with, survived, and remembered violent episodes. State violence, and political, ethnic, and religious conflict that pitting neighbor against neighbor. Topics include: colonialist violence, the WW I and II, the Holocaust, the Russian Revolution and Stalinism, decolonization, the IRA, and the former Yugoslavia. GER:3b
5 units, Aut (Daughton)

HISTORY 229A. Colonial Exchange: Eighteenth-Century Europe and Its Colonies.—(Same as 329A.) Global exchange of knowledge, technologies, plants, peoples, disease, and medicines. focus is on French, British, and Dutch interests in the W. Indies. New markets in profitable plants such as coffee, tea, sugar cane, pepper, nutmeg, cotton, and ipecacuanha. Military and strategic importance of science, business, botany, and cartography for positioning emerging nation states in struggles for land and resources. Readings include primary and secondary texts on voyaging, colonialism, science, medicine, slavery, and environmental transformation. GER:3b
5 units, Win (Schiebinger)

HISTORY OF SCIENCE AND TECHNOLOGY

HISTORY 203A. History of the Senses.—(Same as 303A.) GER:3b
5 units, Spr (Riskin)

HISTORY 204B. The Prehistory of Computers.—(Same as 304B.) From the automata of Hero of Alexandria in the 1st century A.D. to Charles Babbage’s Analytical and Difference Engines in the 1830s, the evolution of areas of inquiry during the emergence of modern computers.

HISTORY 246. Successful Futures for Africa: An Inventory of the 1970s-2000s.—(Same as 346.) How the world has talked and written about Africa as a land of major crises. The discourses of Africa’s failures, helping Africa, and choosing new development tactics. GER:3a,4a
5 units, Aut (Jackson)

HISTORY 246S. Popular Culture in Africa.—(Same as 446.) African popular culture as a growing field for historical research. Students explore a topic through primary research. GER:3a,4a, WIM
5 units, Aut (Jackson)

HISTORY 247. Greater East Africa and Its Historical Writing.—(Same as 347.)Kenya, Tanzania, Uganda, Ethiopia, parts of Zaire, and Mozambique. Historical literature especially about women, the colonial period, and the purpose of history. GER:3a
4-5 units (Jackson) not given 2004-05

HISTORY 247B. Health and Society in Africa.—(Same as 347A.) The history of disease, therapeutic and diagnostic systems, and the definition of health in precolonial, colonial, and postcolonial Africa. The social and political histories of specific epidemics, including sleeping sickness, influenza, TB, mental illness, and AIDS. The colonial contexts of epidemics and the social consequences of disease. GER:3b,4a
5 units (Roberts) not given 2004-05

HISTORY 247S. Intellectual and Cultural History in Modern Africa.—(Same as 447.) GER:3b
5 units, Spr (Hanretta)

HISTORY 248B. Islam in Africa.—(Same as 348B.) Topics include Sufism and sainthood, slavery, Islamic law and state order, Muslim identity and conversion, Islamic education systems, trade and social change. Islamic reform movements, gender and African Islam, orthodoxy and invention, African Islam and colonialism, and the Islamic postcolonial response. GER:3a
5 units, Aut (Hanretta)

HISTORY 248D. Law and Colonialism in Africa.—(Same as 348D.) Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases are a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority. GER:3b, WIM
4-5 units, Spr (Roberts)
HISTORY 248S. African Societies and Colonial States—(Same as 448A.) The encounter between African societies and European colonialism in the colony or region of their choice. Approaches to the colonial state; tours of primary source collections in the Hoover Institution and Green Libraries. Students present original research findings and may continue research for a second quarter. GER:3b, WIM
5 units (Roberts) not given 2004-05

HISTORY 249B. North African State and Society to Independence
5 units, Win (Gatelian)

HISTORY 249S. African Cultural History in the 20th Century—(Same as 449.) Popular culture in Africa and the cultural products of African intellectuals. Emphasis is on pathbreaking popular culture and avant garde intellectual cultures and those instances that created a sense of the new over the 20th century. Primary sources research. GER:3a,WIM
5 units (Jackson) not given 2004-05

THE UNITED STATES

HISTORY 250B. Topics in Constitutional History—(Same as POLISCI 222S.) Topics in the history of the American Constitution and its interpretation, including the invention of the concept of the written constitution in the Revolutionary era, the crisis of Civil War and Reconstruction, and the controversies over interpretation and the rights revolution in the 20th century. GER:3b,4b
5 units (Rakove) not given 2004-05

5 units, Win (Carson)

HISTORY 251A,B. Poverty and Homelessness in America—Students participate in an internship with the Emergency Housing Consortium, the primary agency providing shelter for homeless people in Santa Clara and San Mateo counties, while learning about homelessness and poverty through readings and discussions. Prerequisite: interview with instructor.
GER:3b
5 units, A: Win, B: Spr (Camarillo)

HISTORY 252. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis—(Same as 352.) For advanced undergraduates and graduate students. Integrates primary documents and secondary literature to understand the three sets of events. GER:3b
5 units, Aut (Bernstein)

HISTORY 253. California Dreaming—The consequences of dreaming: how groups and individuals have imposed their dreams, whether or not compatible or sustainable, upon the golden land of California. California as ecoregion, indigenous homeland, Spanish and Mexican province, American state, transnational and international space, and symbol. Emphasis is on local case studies including Stanford.
5 units, Spr (Farmer)

HISTORY 254A. The Civil War—GER:3a
5 units, Spr (Hilde)

HISTORY 254B. American Slavery From the British Colonies through Jim Crow
5 units, Win (Hilde)

HISTORY 256A. California History—The myths and realities about California’s past, focusing on the 20th century. The origins of California’s diverse society. Social, political, economic, demographic, and cultural dimensions of the state’s history. GER:3b
5 units, Win (Camarillo)

HISTORY 257A. Race and Ethnicity in the American Metropolis: A Case Study of Los Angeles—(Same as 357.) Contemporary history of ethnic and racial groups in urban America. Historical and social science literature focusing on groups in the Los Angeles area. Topics include immigration, poverty, education, demographic changes, political participation, conflict and cooperation, and cultural life in the modern, multicultural metropolis. GER:3b,4b, WIM
5 units (Camarillo) not given 2004-05

HISTORY 259A. Statecraft and Strategy: Theory and Practice from the 18th Century to the Present—(Same as 359A.) Changing views of the international order from the Enlightenment to the present. Readings include George Washington, Edmund Burke, Carl von Clausewitz, Alfred Thayer Mahan, Woodrow Wilson, E.H. Carr, George Kennen, and Henry Kissinger. GER:3a, WIM

HISTORY 260A. Perspectives on American Identity—(Same as AMSTUD 160.) Required for American Studies major. Changing interpretations of American identity and Americanness. GER:3a,4b, WIM
5 units (Carson) not given 2004-05

HISTORY 261S. Building Silicon Valley—Why is Silicon Valley where it is? Why does it look the way it does? What political, economic, and cultural changes during the past 60 years shaped its development? Stanford’s role in the building of Silicon Valley, and the impact of Silicon Valley on the shape of the postindustrial city. GER:3b
5 units (O’Mara) not given 2004-05

HISTORY 263. 20th-Century Nonviolent Social Transformation—(Same as 363.) GER:3b
5 units (Carson) not given 2004-05

HISTORY 266A. Mayors, Machines, and Masses: The History of San Francisco’s City Government—The evolution of urban politics in the U.S. from the 19th-century advent of political parties, grass-roots activists, or voters? How has this changed? The evolution of urban politics in the U.S. from the 19th-century advent of the political machine to the present. How social transformations and mass movements have affected urban governance. Possible topics include: bosses and reformers, ethnic and racial coalitions, the role of state and federal governments, neighborhood activism, and urban-suburban relations.
GER:3b
5 units (Kahan) not given 2004-05
HISTORY 267. Yesterday’s Tomorrows: Technology and the Future in History—American expectations regarding the development and consequences of science and technology. Topics: the emergence of a culture of prognostication in the late 19th century; turn-of-the-century new communications technologies; 30s World Fairs and Depression futures; the 60s, technology assessment, and anti-technology. GER:3b
5 units (Corn) not given 2004-05

HISTORY 267A. The Politics and Ethics of Modern Science and Technology—(Same as 367A.) The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:3a
5 units, Spr (Bernstein)

HISTORY 268. The Other Wests—GER:3a
5 units (White) not given 2004-05

HISTORY 268A. Popular Culture and American Nature—Despite John Muir, Aldo Leopold, and Rachel Carson, it is arguable that the Disney studios have had more to do with molding popular attitudes toward the natural world than politicians, ecologists, and activists. Disney as the central figure in the 20th-century American creation of nature. How Disney, the products of his studio, and other primary and secondary texts see environmentalism, science, popular culture, and their interrelationships.
5 units, Spr (White)

HISTORY 268S. American Wests: Studies in Culture and the Environment—(Same as 468.) GER:3a
5 units (White) not given 2004-05

HISTORY 270A. Cities in the North American West, 1840-1940—Political, social, economic, and environmental forces shaping development of the major metropolitan areas of the Rocky Mountain and Pacific from Mexican pueblos to Gold Rush boomtowns to shipping capitals and military metropolises. Comparison with cities in other regions of the U.S. Topics include immigration and migration patterns, local politics, architecture and city planning, urban infrastructure, and relationships to the natural environment. GER:3b
4-5 units (O’Mara) not given 2004-05

HISTORY 271A. The Suburban West—(Same as 371A.) How and why the Western U.S. suburbanized after WW II. The political, technological, cultural, and environmental effects of this transformation. Topics include the role of the Cold War defense complex, construction of the highway system and the rise of automobile culture, water and land use policy, architecture and planning of suburbs, and the effect of suburbanization on national politics. GER:3b
5 units (O’Mara) not given 2004-05

HISTORY 271B. Politics and Politicians in the American West—(Same as 371B.) Elected officials from western states including Leland Stanford, Lyndon Johnson, Barry Goldwater, and Arnold Schwarzenegger as dominant figures on the national political stage. Political biography as a tool to survey the political history of the West from the Gilded Age to the present. The social, economic, and environmental characteristics of the West that shaped the careers of these politicians, and the effect of western political culture upon national electoral politics and policy.
5 units, Aut (O’Mara)

HISTORY 272. Creating the American Republic—(Same as 372, POLISCI 321.) Concepts and developments in the late 18th-century invention of American Constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources. WIM
5 units (Rakove) not given 2004-05

HISTORY 274D. An American Place: The Lower Mississippi Valley since 1500—(Same as 374D.) GER:3a
5 units, Win (C. Morris)

HISTORY 275A. U.S.-China Relations: From the Opium War to Tiananmen—(Same as 375A.) The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. GER:3b,4a, WIM

4-5 units (Beinin) not given 2004-05
HISTORY 286A. The New Global Economy, Oil, and Islamic Movements in the Middle East—(Same as 386A.) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market combined with case studies of Egypt, Iraq, and Palestine. GER:3b,4a, WIM
5 units (Beinin) not given 2004-05

HISTORY 287S. Research Seminar on the Modern Middle East—(Same as 487.) Student-selected research topics with guided historiographical reading and discussions as an introduction. GER:3b
3-5 units (Beinin) not given 2004-05

HISTORY 288. Palestine and the Arab-Israeli Conflict—(Same as 388.) The Palestine-Zionist conflict 1882 to the present through reading and comparing representative expressions of competing historical interpretations. U.S. policy towards the conflict since 1948. GER:3a, WIM
5 units, Aut (Al-Qatan)

EAST ASIA

HISTORY 291. Peasants and the Chinese Communist Party, 1920-2005—Crisis, reform, and the fall of the Qing dynasty; regional warlords, nationalism, and cultural awakening: national revolution and the Nanjing decade; WW II and the Communist victory. The Communist era’s early successes; Mao-instigated failures; and post-Mao reforms, successes, and difficulties.
5 units, Spr (Bianco)

HISTORY 292. Cultures of Japanese Imperialism—(Same as 392) GER:3b
5 units, Aut (Wigen)

HISTORY 292A. Modern China Colloquium
5 units (Staff) not given 2004-05

HISTORY 292D. Japan in Asia—The interconnectedness of 20th-century Japanese history with developments in Asia. Regional Asian dynamics and Japan’s modern political, economic, and social history. Emphasis is on how Japan’s role in Asia changed and the significance of nationalism during the Shōwa period, 1926-1989. Themes include Pan-Asianism, colonialism and anti-colonialism, communism and anti-communism, non-alignment, pacifism, economic nationalism, and regionalism and internationalism. GER:3b
5 units, Aut (de Boer)

HISTORY 293. Korean History and Culture through Film—Focus is on S. Korea in the postcolonial era, 1945-present, including seminal political events, family/communal structures, educational institutions, gender norms, socioeconomic and cultural change. Analytical approaches include aesthetics, formalist readings of cinematic and literary texts, and media/cultural studies approaches that underscore political-economic issues of representation. Films and videos have English subtitles; readings in English translation. GER:3a,4a
5 units, Spr (Sawada)

HISTORY 293A. Tokyo: From Castle Town to Megalopolis—(Same as 393A.) The transformation of Edo, one of the world’s largest early modern cities, into Tokyo, one of the contemporary world’s largest conurbations. Topics include: the founding of Edo; the early modern built environment; the Meiji Restoration; urban social structure and residential patterns; popular culture; the 1923 earthquake; and wartime destruction and postwar reconstruction. GER:3a
5 units, Win (Duus)

HISTORY 294S. Modern China Lecture
5 units (Staff) not given 2004-05

HISTORY 295A. The Meiji Culture—(Same as 395E.) The political and social culture of Japan in the wake of the Meiji Restoration. Topics include the ideology of civilization and enlightenment; political dissent and social criticism; the success ethic and the new middle class; capitalism and the new business culture; urbanization and the working class; gender ideology and the family; war and militarism in popular culture; and conservatism and racial ideology. Readings from historical sources in translation including literary works. GER:3a
5 units (Duus) not given 2004-05

HISTORY 295D. Samurai: Killing, Conscience, and Identity—(Same as 395D.) Samurai history and culture through texts including The Book of Five Rings, Hagakure, and The Treasury of Loyal Retainers, and films including Ran and The Last Samurai. Questions of ethics: why do samurai fight; whom do they serve; what rules govern killing; what role is accorded personal conscience; and how has the samurai been romanticized.
5 units, Aut (Berry)

HISTORY 296A. Chinese Women’s History—(Same as 396A.) The lives of women in the last 1,000 years of Chinese history. Focus is on theoretical questions fundamental to women’s studies. How has the category of woman been shaped by culture and history? How has gender performance interacted with bodily disciplines and constraints such as medical, reproductive, and cosmetic technologies? How relevant is the experience of Western women to women elsewhere? By what standards should liberation be defined? Readings include primary sources in translation including fiction, memoirs, and oral histories of the Maoist era. GER:3a,4c
5 units, Spr (Sawada)

HISTORY 296B. Law and Society in Late Imperial China—(Same as 396B.) Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history. GER:3b
5 units, Aut (Sommer)

HISTORY 297A. Modernizing Women in Japan—(Same as 397A.) Women have been both the objects and the agents of radical experiments in social change in the modern world. Focus is on the issues touched off by modernizing Japanese women from the late 19th- through the 20th-century. Sources include film, fiction, journalism, essays, diaries, and secondary works. Required research paper using primary sources. Recommended: prior coursework on Japan or gender. GER:3a,4c, WIM
5 units (Wigen) not given 2004-05

HISTORY 298. Imperialism, Colonialism, and National Identity in Modern Japan—(Same as 398.) The linkages between state building, economic change, territorial expansion, and national consciousness in late 19th- and early 20th-century Japan. Topics: the construction of race, the alien and the barbarian; the nature of the modern Japanese state; the economic roots of territorial expansion; styles and schemes of colonial domination and management; debates on Japan’s relationships with Asia, the West, and its colonial subjects. GER:3a
5 units (Duus) not given 2004-05

HISTORY 298B. The Great East Asia War—GER:3b
5 units, Win (Duus)

HISTORY 299. Japan in the Age of Courtiers and Warriors, 1180-1333—(Same as 399.) Government and society during the period of Japan’s transition from classical to medieval. Topics: law, justice, family, inheritance, war, religion, and the economy, through primary documents, chronicles, and sources in translation.
5 units, Win (Berry)

HISTORY 474. Race, Ethnicity, and Class in the 20th Century
5 units, Win (Winterer)

HISTORY 475. U.S. Intellectual History: 1750-1900
—Major methods and issues in U.S. intellectual history. Goal is to produce a research paper based on primary sources suitable for inclusion in a doctoral dissertation or submission to a peer-reviewed scholarly journal. Topics include: compiling primary and secondary source bibliographies; primary and secondary source issues; and how to articulate an argument. Students produce a prospectus by the end of Winter Quarter. Spring Quarter meetings to discuss outlines, drafts, and problems, culminating in presentation of papers in scholarly conference format.
5 units, Win (Winterer)

JEWISH HISTORY

HISTORY 485A. Modern Jewish History
4-5 units, Win (Zipperstein)

MIDDLE EAST

HISTORY 487. Research Seminar on the Modern Middle East—
(Same as 287S.) Student-selected research topics with guided historiographical reading and discussions as an introduction. GER:3b
3-5 units (Beinin) not given 2004-05

HISTORY 489. Ottoman/Turkish History
4-5 units (Rodrigue) not given 2004-05

EAST ASIA

HISTORY 492. Society in Ancient and Medieval China—Proseminar on conducting research in ancient or medieval China. Focus is on the theme of the emotions of the period. Sources include theoretical and comparative materials in secondary literature and primary sources. Students present research paper to class.
5 units, Win (M.E. Lewis)

HISTORY 496A,B. Qing Legal Documents
5 units, 496A: Win, 496B: Spr (Sommer)

OVERSEAS STUDIES

These courses are approved for the History major and taught overseas at the campus indicated. Students should discuss with their major advisers which courses would best meet individual needs. Descriptions are in the “Overseas Studies” section of this bulletin or at the Overseas Studies office, 126 Sweet Hall.

BEIJING

HISTORY 193V. The Chinese Past: The Golden Age of Chinese Archaeology—(Enroll in CHINGEN 158B.)
5 units, Aut (Dien)

HISTORY 291V. The Emperor's City: Imperial Conceptions of Urban Space—(Same as URBANST 158V.)
5 units, Spr (Kahn)

HISTORY 292V. Food in Chinese History
5 units, Spr (Kahn)

BERLIN

HISTORY 105V. Industry, Technology, and Culture, 1780-1945
4 units, Win (Neckenig)

HISTORY 229V. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity—(Same as ARTHIST 110Y, STS 119V, URBANST 143U.)
4 units, Spr (Neckenig)

FLORENCE

HISTORY 80V. Citizenship and Constitutionalism in Contemporary Europe—(Same as POLISCI 248P.)
4-5 units, Win (Rakove)

HISTORY 106V. Italy: from an Agrarian to a Post-industrial Society—(Same as POLISCI 145P.)
4 units, Aut (Mammarella)

HISTORY 188V. History and Culture of Jews in Italy
4 units, Win (Levi)

HISTORY 189V. Machiavelli—(Same as POLISCI 249P.)
4-5 units, Win (Rakove)

HISTORY 235V. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema—(Same as ITALGEN 191F, ARTHIST 160Y, COMM 53.)
5 units, Win (Campani)

OXFORD

HISTORY 138V. The European City
5 units, Spr (Tyack)

HISTORY 141V. European Imperialism and the Third World, 1870-1970—(Same as POLISCI 148P.)
5 units, Spr (Darwin)

HISTORY 142V. Archaeology of the British Isles
3 units, Win (Rowley)

HISTORY 145V. Britain in the Twentieth Century
5 units, Win (Tyack)

HISTORY 244V. Art and Society in Britain—(Same as ARTHIST 221Y.)
5 units, Aut (Tyack)

PARIS

HISTORY 87V. Empires and Cultures in the Modern World
5 units, Spr (Beinin)

HISTORY 139V. France During the Second World War: Between History and Memory
5 units, Win (Virgili)

HISTORY 140V. Franco-Arab Encounters
5 units, Spr (Beinin)
PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

Co-chairs: Michael Friedman (Philosophy), Timothy Lenoir (History)

Committee-in-Charge: Barton Bernstein (History), Joe Corn (History), Paula Findlen (History), Michael Friedman (Philosophy), Sarah Jain (Cultural and Social Anthropology), Timothy Lenoir (History), Reviel Netz (Classics)

Program Committee: Paula Findlen (History), Michael Friedman (Philosophy), Timothy Lenoir (History), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Londa Schiebinger (History)

Professors: Barton Bernstein (History), Paula Findlen (History), Michael Friedman (Philosophy), David Holloway (History, Institute for International Studies, Political Science), Timothy Lenoir (History), Robert Proctor (History), Londa Schiebinger (History, Institute for Research on Women and Gender), Richard White (History)

Assistant Professors: Sarah Jain (Cultural and Social Anthropology), Reviel Netz (Classics), Jessica Riskin (History)

Senior Lecturer: Joseph Corn (History)

Lecturer: Tom Ryckman (Philosophy)

Other Affiliation: Henry Lowood (Stanford University Libraries), Michael Riordan (SLAC), Audrey Shafer (Anesthesiology), Larry Zaroff (Anesthesiology)

Mail Code: 94305-2024

Email: rogers@stanford.edu

Web Site: http://HPST.stanford.edu

Courses in History and Philosophy of Science and Technology have the subject code HPS. For a complete list of subject codes, see Appendix.

The Program in History and Philosophy of Science and Technology (HPST) is an interdisciplinary program focusing on the historical and contemporary aspects of science, medicine, and technology. It offers graduate degrees at the doctoral level through the departments of History and Philosophy, as well as at the master’s level through a variety of affiliated department and programs, principally Classics, Cultural and Social Anthropology, English, and Modern Thought and Literature. In addition, graduate students in such affiliated departments and programs may participate in the HPST program by taking selected courses (see below). Its courses span the period from antiquity to the late 20th century, with special emphasis on ancient and Islamic science; Renaissance science; the scientific revolution; history of medicine and the body; history and philosophy of biology; history and philosophy of modern physics; history of the philosophy of science in the modern period; history of computers and information sciences; and gender, science, and technology. These courses are designed both for students looking for a humanistic perspective on the sciences and for students trying to understand the relationship of the sciences to humanistic knowledge.

HPST has unique resources for the history and philosophy of science. Situated in the heart of Silicon Valley at an institution with a long and distinguished tradition in many sciences, the University is surrounded by archives for the recent history of science and technology. Stanford University Libraries has rich holdings in Special Collections for the Scientific Revolution, as well as the modern and contemporary study of science and technology. The University is in close proximity to some of the most interesting public science museums in the country: the California Academy of Sciences, the Exploratorium, the Computer History Museum, and the Tech Museum. Graduate students can take advantage of faculty, classes, and archives at UC Berkeley through Stanford’s exchange program. The core of the community is the colloquium series which brings together faculty and students several times a quarter to discuss the work of invited speakers on topics of broad concerns to science and technology studies.

UNDERGRADUATE DEGREES

Students who wish to pursue the history and philosophy of science and technology should major in the Department of History, which offers an interdisciplinary major in History and Science, in the Department of Philosophy, which offers a specific degree in History and Philosophy of Science, or in the Program in Human Biology, which offers a concentration in history of science and medicine. A concentration in the anthropology of science or in ancient science can be arranged with the departments of Cultural and Social Anthropology and Classics respectively. Alternatively, students may consult with a member of the Committee-in-Charge to construct an individually designed major. The major must conform to the requirements for Individually Designed Majors (see the “Individually Designed Majors” section of the bulletin).

GRADUATE DEGREES

Students can pursue a Ph.D. in HPST through the departments of History and Philosophy. Students can pursue an M.A. in HPST through any of the participating departments and programs. Students completing the requirements of the HPST program for the M.A. or Ph.D. (including appropriate dissertation work) graduate with a diploma stating their concentration in HPST. In addition, students may also participate in the HPST program on a non-degree basis. The degree and program requirements are as follows:

- All students participating in the program are required to attend the HPST colloquium series and are expected to present their own research at least once in the course of their studies at Stanford. The colloquium series meets four times per quarter as a one-unit course.
- All students participating in the program take the HPST core graduate seminar (a one quarter, 6-unit course). This course is offered every other year, crosslisted in HPST, History, and Philosophy, and is taught by two faculty as an introduction to historical and philosophical perspectives on science and technology. In alternate years, both History and Philosophy offer their departmental core seminars in history or philosophy of science and technology respectively.

The core seminars are designated each year by the HPST program committee.

In addition to the HPST colloquium series, all doctoral students in HPST complete a four-course sequence:
1. HPST core seminar
2. Department core seminar in History or Philosophy
3. One elective seminar in history of science and/or technology
4. One elective seminar in philosophy of science and/or technology

In addition to participating in the HPST colloquium series, all master’s students in HPST are required to complete a three-course sequence:
1. HPST core seminar (or department core in alternate years)
2. One elective in history of science
3. One elective in philosophy of science

In addition to participating in the HPST colloquium series, all students in other programs participating in HPST are required to complete a two-course sequence:
1. HPST core seminar
2. One elective seminar in history or philosophy of science

Electives, in all cases, are to be selected from a list approved each year by the HPST program committee.

COURSES

INTRODUCTORY

HPS 60. Introduction to Philosophy of Science—(Same as PHIL 60.) Survey of 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:3a 5 units, Spr (Tanona)
SCIENCE IN HISTORY

This sequence is designed to introduce students to fundamental aspects of the history of science from antiquity to the 20th century. Students concentrating in the history of science are advised to take most or all of this sequence as a core foundation.

HPS 102. The Scientific Revolution—(Enroll in HISTORY 213/313.)
5 units (Findlen) not given 2004-05

HPS 103. The Darwinian Revolution—(Enroll in HISTORY 133/333.)
4 units, Win (Lenoir)

5 units, Aut (Riskin)

MEDECINE IN HISTORY

This sequence is designed to introduce students to fundamental aspects of the history of medicine from antiquity to the 20th century. Students concentrating in the history of medicine are advised to take most or all of this sequence as a core foundation.

HPS 122. The Rise of Scientific Medicine—(Enroll in HISTORY 33A/333A.)
4-5 units, Spr (Lenoir)

PHILOSOPHICAL PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY

This sequence is designed to introduce students to fundamental aspects of the philosophy of science. Students concentrating in the philosophy of science are advised to take HPS 60 above as a starting point, and combine a number of the electives listed below in conjunction with courses in the other concentrations that address their specific interests.

HPS 140. Popper, Kuhn, and Lakatos—(Enroll in EDUC 214, PHIL 156.)
3 units, Spr (Phillips)

HPS 141. Philosophical Applications of Cognitive Science—(Enroll in PHIL 189.)
4 units (Staff) not given 2004-05

HPS 142. Central Topics in the Philosophy of Science: Theory and Evidence—(Enroll in PHIL 164/264.)
4 units, Aut (Ryckman)

HPS 143. Philosophy of Physics—(Enroll in PHIL 165/265.)
4 units, Spr (Ryckman)

HPS 144. Philosophy of Biology—(Enroll in PHIL 167A/267A.)
4 units, Aut (Zaroff)

HPS 145. Philosophy, Biology, and Behavior—(Enroll in PHIL 167B/267B.)
4 units (Staff) not given 2004-05

HPS 146. Plato’s Ethics—(Enroll in PHIL 108/208.)
4 units, Spr (Moravcsik)

HPS 146A. Plato’s Ontology and Math—(Enroll in PHIL 107/207.)
3 units, Win (Moravcsik)

HPS 147. Kant’s Philosophy of Physical Science—(Enroll in PHIL 224.)
4 units (Friedman) not given 2004-05

HPS 148. Seminar in Philosophy of Science: Structural Realism—(Enroll in PHIL 365.)
4 units, Spr (Ryckman)

HPS 149. Methodological Problems in Population Biology—(Enroll in PHIL 242A.)
3 units (Staff) not given 2004-05

HPS 150. Core Seminar in Philosophy of Science—(Enroll in PHIL 360.)
4 units, Win (Friedman, Ryckman)

ADVANCED

HISTORICAL PERSPECTIVES ON SCIENCE

The following classes focus on specific episodes in or approaches to the history of science.

HPS 151. History of the Senses—(Enroll in HISTORY 203A/303A.)
5 units, Spr (Riskin)

HPS 154. When Worlds Collide: The Trial of Galileo—(Enroll in HISTORY 216/316.)
5 units, Spr (Findlen)

HPS 155. The Prehistory of Computers—(Enroll in HISTORY 204B/304B.)
3-5 units (Riskin) not given 2004-05

5 units, Win (Proctor)

CONTEMPORARY PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY

The following classes focus on contemporary cultural and social science approaches to science, technology, and medicine.

5 units, Win (Schiebinger)

4-5 units, Win (Lenoir)

HPS 163. History of Computer Game Design: Technology, Culture, and Business—(Enroll in STS 145.)
4 units, Win (Lowood)

HPS 164. Science, Technology, and Gender—(Enroll in CASA 132.)
3-5 units (Jain) not given 2004-05

HPS 167. Health Care as Seen Through Medical History, Literature, and the Arts—(Enroll in HUMBIO 175.)
4 units, Aut (Zaroff)

HPS 171. The History of Women and Medicine in the U.S.—(Enroll in HISTORY 264.)
5 units (Horn) not given 2004-05

HPS 172. SHL: R. Buckminster Fuller, Polymath—(Enroll in COMPLIT 355E.)
3-5 units (Schnapp, Quimby) not given 2004-05

HPS 173. The History of Women and Gender in Science—(Enroll in HISTORY 134A/334A.)
5 units, Spr (Schiebinger)
HPS 196. Minds and Worlds from Aristotle to Newton to Einstein—
(Enroll in HISTORY 106.)
1-5 units, Aut (Riskin)

HPS 199. Directed Reading
1-15 units, Aut, Win, Spr, Sum (Staff)

HPS 200. Senior Colloquium
—Key analytical and theoretical texts treating the natures and interplay of science, technology, and society. Only STS majors writing senior honors theses may take for 2 units. Prerequisite: STS major with senior standing and four STS core courses, or consent of instructor.
2-4 units, Win (Riskin), Spr (Findlen)

HPS 201. HPST Colloquium—Several meetings per quarter to discuss the work of invited speakers on topics of broad concerns to science and technology studies. Required of students participating in the program. See http://hpst.stanford.edu/colloquia.html for times and locations.
1 unit, Aut, Win, Spr (Staff)

HPS 299. Graduate Individual Work
1-15 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

Descriptions of these courses are in the “Overseas Studies” section of this bulletin or at the Overseas Studies office, 126 Sweet Hall. Students overseas are encouraged to participate in a wide range of internships and independent research as well.

FLORENCE

HPS 104V. In the Footsteps of Freud in Florence
4 units, Aut (Pallanti)

OXFORD

HPS 103V. Roots of Modern Biology
4 units, Win (Hintz)

PROGRAM IN HUMAN BIOLOGY

Emeriti: (Professors) Clifford Barnett (Anthropological Sciences), Paul Bascom (Education), Luigi Cavalli-Sforza (Genetics), Carl Djerassi (Chemistry), Sanford Dornbusch (Sociology), Albert H. Hastorf (Psychology), Herant Katchadourian (Human Biology), Donald Kennedy (Biological Sciences), Carol Winograd (Medicine)

Director: Jeffrey Wine
Associate Director: Shirley Feldman

Professors: Dennis Carter (Mechanical Engineering, Bioengineering), William H. Durham (Anthropological Sciences), Marcus Feldman (Biological Sciences), Russell D. Fernald (Biological Sciences), James Ferrell (Molecular Pharmacology), Margaret Fuller (Developmental Biology), Dolores Gallagher-Thompson (Psychiatry and Behavioral Sciences), Linda Giudice (Obstetrics and Gynecology), Larry Goulder (Economics), Deborah Gordon (Biological Sciences), H. Craig Heller (Biological Sciences), Dale Kaiser (Biochemistry), Richard Klein (Anthropological Sciences), Timothy Lenoir (History), Michael Marmor (Ophthalmology), Gordon Matheson (Medicine), Daria Mochly-Rosen (Molecular Pharmacology), Roel Nusse (Developmental Biology), Robert Sapolsky (Biological Sciences), Stephen H. Schneider (Biological Sciences), Matthew Scott (Developmental Biology), Marcia L. Stefanick (Medicine), Shripad Tuljapurkar (Biological Sciences), Brian Wandell (Psychology), Arthur B. Wolf (Anthropological Sciences)

Associate Professors: Christos Constantinou (Urology), Anne Fernald (Psychology), Paul Fisher (Neurology and Neurological Sciences), James Fox (Anthropological Sciences), John Gabrieli (Psychology), Peter Godfrey-Smith (Philosophy), David Katzenstein, (Medicine), Barbara Koenig (Neurology and Neurological Sciences), Lorene Nelson (Epidemiology), John Rick (Anthropological Sciences), Debra Satz (Philosophy), William Talbot (Developmental Biology)

Assistant Professors: Ronald Barrett (Anthropological Sciences), Rebecca Bird, Melissa Brown (Anthropological Sciences), Christopher Gardner (Medicine), Jamie Jones (Anthropological Sciences), Joanna Mountain (Anthropological Sciences), Rob Reich (Political Science), Ewen Wang (Emergency Medicine)

Professors (Teaching): Ellen Porzig (Developmental Biology, Molecular Pharmacology)
Associate Professor (Teaching): Donald Barr (Sociology, Human Biology), Robert Siegel (Microbiology and Immunology)

Visiting Associate Professor: Catherine Heaney

Other Teaching Faculty and Staff: William Abrams, Wesley F. Alles, Douglas Bird (Anthropological Sciences), Carol Boggs (Biological Sciences), Nancy Brown, Judy Chu, Anne Firth-Murray, Anne Friedlander, Daniel Garza, Catherine Heaney, Geoffrey Heller, Renu Heller, William B. Hurlbut, Judy Illes, Dominique Irvine (Anthropological Sciences), Alan Launer, Philip Lee, Ria Popat, Armin Rosencranz, Lynn Rothschild, Merritt Ruhlen (Anthropological Sciences), Darwin Scott Smith, Stan Wanat, Larry Zaroff

Student Advisers: Stella Aslibekyan, Megan Baumgartner, Laura Billadello, Vanya Choumanova, Becky DeBoer, Joe Sanford

Advising Chair: Robert Siegel
Honors Chair: Shirley Feldman

Program Offices: Building 80
Mail Code: 94305-2160
Phone: (650) 725-0336
Email: cacciari@stanford.edu (Student Services)
Web Site: http://www.stanford.edu/dept/humbio/

Courses given in Program in Human Biology have the subject code HUMBIO. For a complete list of subject codes, see Appendix.

The Program in Human Biology is an interschool, interdepartmental, undergraduate major. It provides an interdisciplinary perspective on the relationship between the biological and social aspects of humanity’s origin, development, and prospects.
The program has three goals:
1. To provide a broad and rigorous introduction to the biological and behavioral sciences and their interrelationships.
2. To relate these sciences to the problems raised by the relationships of human beings to one another and to their environment.
3. To help each student achieve a high level of understanding by focusing on one aspect of the biological and behavioral sciences, and its application.

The Human Biology curriculum draws on faculty from diverse University departments and schools. To complete the requirements for the major, students must take courses from the offerings of the program and from the listings of other University departments. The program culminates in a B.A. in Human Biology.

Human Biology majors are well prepared for advanced training in professional schools (for example, Education, Law, Medicine, Public Policy) and graduate programs in the behavioral, natural, and social sciences, depending on their choice of upper-division courses. Undergraduates in Human Biology often enter coterminous master’s degree programs in a number of other University departments.

Additional information about the major may be obtained from the program’s offices or the web site at http://www.stanford.edu/dept/humbio.

UNDERGRADUATE PROGRAMS
BACHELOR OF ARTS

The B.A. in Human Biology (HUMBIO) requires a minimum of 84 units in the major divided between four levels of courses:

1. **Fundamental Program:** at least 38 units, to include
   - Human Biology Core (30 units)
   - Statistics (4-5 units)
   - Internship (HUMBIO 197; 4 units)
   The Human Biology Core refers to HUMBIO 2A and 2B, 3A and 3B, and 4A and 4B. See “Required Courses” below for more information.
   - HUMBIO 3B fulfills the policy requirement of the major. Other courses which satisfy the policy requirement may be obtained from the program office. A course used to fulfill the program’s policy requirement may not be used in the student’s foundation or area of concentration or as one of the three required upper-division courses.
   - Statistics may be selected from: STATS 60 or 141, PSYCH 10, ECON 102A, EDUC 160, or BIOSCI 141.
   - The core and a statistics course must be taken for a letter grade by majors.
   - The internship requirement, an independent field experience project, is graded satisfactory/no credit only.

2. **Foundation Courses:** 20-unit minimum. Total units vary, depending on the focus of study selected by the student for the area of concentration. They may include practicums, labs, and introductory-level courses from across the University. A maximum of 10 premed units (from the chemistry, physics, and calculus series, and biology lab courses) and 4 research units are allowed.

3. **Area of Concentration:** a minimum of five courses totaling at least 20 units. This in-depth area of study enables the student to focus on educational and post-baccalaureate goals. Courses must be numbered 100 to 189. Three or more departments must be represented in the concentration. Each course must be taken for a minimum of 3 units. Final approval of the concentration rests with the student advisers and faculty adviser. All area of concentration courses must be taken for a letter grade. Examples of numerous possible areas of concentration are available in the Human Biology Student Handbook.

4. **Upper-Division Courses:** students must take three Human Biology upper-division courses numbered 100 to 189. Students are expected to enroll in courses outside of the area of concentration for breadth. Lab courses cannot be used to fulfill the upper-division requirement. One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. All non-laboratory advanced courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement, including those that say “enroll in” another department.

A prospective major must consult with the student and faculty advisers to obtain detailed information about the program and guidance in the development of an individual course of study. At the time the major is declared, the student must submit a brief written statement of academic and long-term goals and a proposed roster of courses satisfying the requirements for the major. The proposal is reviewed by the student advisers who then help identify an appropriate faculty adviser. Final approval of the proposed course of study rests with the faculty adviser. It is important to declare early, preferably by the end of Spring Quarter of the sophomore year, but not later than the end of Autumn Quarter of the junior year; students must petition to declare later than Autumn Quarter of the junior year.

There are three specialized upper-division tracks offered within the program: Health Policy, Human Health and Performance, and Environmental Policy. Students with interests in these programs should contact the appropriate coordinator.

Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

MINORS

A minor in Human Biology provides an introductory background to the relationship between the biological and social aspects of humanity’s origin, development, and prospects. Many of the major problems facing human civilization today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived, integrating what we know of the biological with an understanding of the social and cultural setting in which they exist. Students with a minor in Human Biology will have a strong background in the integration between the biological and social aspects of humans.

To minor in Human Biology, students must take the core curriculum (HUMBIO 2A, 2B, 3A, 3B, 4A, and 4B) and one additional upper-division course (for example, any course offering by Human Biology numbered 100-189, including courses crosslisted with other departments or programs). These must be taken for a minimum letter grade of ‘C’-. Courses that count towards the fulfillment of major requirements may not be counted towards the minor.

Students declaring a minor in Human Biology must do so no later than two quarters prior to their intended quarter of degree conferral (for example, a student must declare a minor before the end of the Autumn Quarter to graduate the following Spring Quarter).

HONORS PROGRAM

The honors program in Human Biology affords qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including: topics introduced in the core or upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences. Students may apply to the honors program once they have completed the Human Biology core, have an overall Stanford grade point average (GPA) of 3.2, and meet other requirements detailed in the honors handbook. Interested students should consult resources in the Human Biology office including the Human Biology Honors Handbook, the honors program application available from the student services office, and appointments during office hours with the Human Biology honors chair.

Specific courses of interest to honors students include: HUMBIO 19, Introduction to Honors in Human Biology, HUMBIO 193, Research in Human Biology, and HUMBIO 194, Honors. Most honors projects involve a total of 10 to 15 units of course work in HUMBIO 193 and 194.

Admission to the honors program is by application, normally between mid-April of the junior year and mid-October of the senior year (for 2004-05). Students planning to undertake honors begin research or preparation during their junior year. The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Each honors student then presents a brief summary of honors research at the Human Biology
Honors Symposium in May. Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year. For applications, contact the program office.

STOREY HOUSE

Storey House, 544 Lasuen Mall, is an undergraduate residence for the Human Biology Academic Theme House, devoted to developing an intellectual community among Human Biology majors at Stanford, and allowing faculty and students to become acquainted and share their Human Biology interests and research. Its goals are to foster intellectual discussion in the residential lives of the students living in Storey House, mentoring relationships between upperclassmen and core students in the house, and stimulating events for all Human Biology majors. Assignment is made through the regular undergraduate housing draw.

STUDENT ADVISERS

Human Biology has an advising program comprising faculty and student advisers. Before declaring Human Biology as their undergraduate major, each student must meet with one of six student advisers who assist them in developing a coherent study plan based on an individualized area of concentration, and the selection of foundation, concentration, and upper-division courses. They also assist students in selecting an appropriate faculty adviser and a suitable internship for their area of concentration and career goals. Student advisers offer drop-in services during scheduled office hours every weekday. The student advisers also sponsor events including the Advising Extravaganza, the Internship Faire, and Beyond HumBio. To maintain high standards of advising that respond to the needs of individual students, student advisers meet weekly with the program’s faculty advising chair and the student services coordinator to review the program’s policies and specific student inquiries and petitions concerning the program.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. AU indicates that the course is subject to the University Activity Unit limitations (5 units maximum).

The faculty and staff of Human Biology prepare a student handbook, on the web at http://www.stanford.edu/dept/humbio/, that provides a detailed description of the Human Biology major and outlines possible areas of concentration. It reflects the most up-to-date information for the academic year and is the definitive guide for all Human Biology majors.

REQUIRED CORE

Required Core sequences (2A, B, 3A, B, and 4A, B) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series and take the core in sequence. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are not permitted to enroll. Majors must take the core courses for a minimum letter grade of ‘C-.’

HUMBIO 2A. Genetics, Evolution, and Ecology: Culture, Evolution, and Society

HUMBIO 2A. Genetics, Evolution, and Ecology — Introduction to the basic principles of classical and modern genetics, evolutionary theory, and population biology. Topics: micro- and macro-evolution, population and molecular genetics, population dynamics, and community ecology, emphasizing the genetics of the evolutionary process and applications to human populations. GER:2a

5 units, Aut (Durham, Mountain)

HUMBIO 2B. Culture, Evolution, and Society — Introduction to the evolutionary study of human diversity. Hominid evolution, the origins of social complexity, social theory, and the emergence of the modern world system, emphasizing the concept of culture and its influence on human differences. GER:3b

5 units, Aut (Klein, Brown)

HUMBIO 3A,B. Cell Biology and Developmental Biology: The Human Predicament

HUMBIO 3A. Cell and Developmental Biology — The basic principles of the biology of cells: the principles of human developmental biology, the biochemistry of energetics and metabolism, the nature of membranes and organelles, hormone action and signal transduction in normal and diseased states (diabetes, cancer, autoimmune diseases), drug discovery, immunology, and drug addiction. GER:2a

5 units, Win (Fuller, Kaiser, Nusse, Scott, Talbot)

HUMBIO 3B. The Human Predicament — The relationship of the biological sciences to public policy in resource management and conservation practices, the regulation of environmental and health risks, agricultural production, the delivery of health services, the protection of biodiversity, and global climate change. Assigned policy challenges in lectures and section meetings. Readings on actual cases. GER:3b,WIM

5 units, Win (Goulder, Barr)

HUMBIO 4A,B. Cell Biology and Developmental Biology: Biology and Culture in Human Development

HUMBIO 4A. The Human Organism — Organ system physiology, beginning with the basic principles of neurobiology and endocrinology, and the functions of body organs. The mechanisms of control, regulation, and integration of organ systems function. GER:2a

5 units, Spr (R. Fernald, Heller)

HUMBIO 4B. Biology and Culture in Human Development — Introduction to the research and theory on early human development. How psychobiological factors shape the developing child, and how cultural practices shape the environments of childhood and influence human cognitions, emotions, moral judgments, relationships, and social behavior from birth through adolescence. GER:3b

5 units, Spr (A. Fernald)

ADDITIONAL INTRODUCTORY OFFERINGS

HUMBIO 4Y. Practicum in Child Development — Practical experience at Bing Nursery School for 3.5 hours per week. Pre- or corequisite: 4B. (AU)

1 unit, Spr (A. Fernald)

HUMBIO 5. The Biology and Evolution of Language — (Enroll in ANTHSCI 5/214.)

4-5 units (Fox) alternate years, given 2005-06

HUMBIO 6. Human Origins — (Enroll in ANTHSCI 6/206.)

5 units, Win (Klein)

HUMBIO 12. Querying Human Nature — (Enroll in ANTHSCI 12.)

5 units (Wolf) not given 2004-05

5 units (Findlen) not given 2004-05

HUMBIO 17A,B,C. Bioethics — Year-long introductory series on social, ethical, philosophical, and religious issues associated with advances in biomedical science. Guest speakers with discussion format. Each course may be taken in any sequence or as single course.

HUMBIO 17A. Bioethics — Topics: ethics and human origins, the human genome project, genetic screening and eugenics, genetic engineering, beauty and disgust as agents of evolution, religion in the age of Darwinism, and evolution and the future of humanity. Prerequisite: Human Biology core, Biological Sciences core, or consent of instructor.

1-2 units, Aut (Hurlbut)

HUMBIO 17B. Bioethics — Topics: in vitro fertilization, intrauterine surgery, growth hormone, cosmetic surgery, the nature of desire and sexuality, anorexia nervosa, cloning and human stem cells, natural aging and extending the lifespan. Prerequisite: Human Biology core, Biology core, or consent of instructor.

1-2 units, Win (Hurlbut)
HUMBIO 17C. Bioethics — Topics: terraforming Mars, psychophysiology of space travel, computer mediated surgery, virtual reality, ecology and human disease, global warming, and biowarfare. Prerequisite: Human Biology core, Biology core, or consent of instructor.
1-2 units, Spr (Hurlbut)

HUMBIO 19. Introduction to Honors in Human Biology — Guest speakers discuss honors research. Students attend at least one of the Honors Symposium presentations in May.
1 unit, Spr (Wine, S. Feldman)

HUMBIO 21. Introduction to Brain and Behavior — (Same as BIOSCI 20) Evolutionary principles to understand how the brain regulates behavior, described in physiological terms, and is influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. Recommended: PSYCH 1.
GER:2a
3 units, Aut (R. Fernald) alternate years, not given 2005-06

HUMBIO 27. Traditional Chinese Medicine — The philosophy and history behind traditional Chinese medicine. Concepts such as Qi, Yin/Yang, meridians, Chinese organs, and the 5 elements. How these concepts are applied through techniques such as acupuncture, herbal medicine, Qi gong, and massage. How traditional Chinese medicine is understood from a scientific standpoint. Political and socioeconomic implications. Observation of an acupuncturist. Readings on the integration of Eastern and Western medicine and on traditional Chinese medicine.
1 unit, Spr (Golianu)

HUMBIO 60. Population Studies — (Enroll in BIOSCI 146.)
1 unit, Win (Feldman)

HUMBIO 61. Introduction to Philosophy of Science — (Enroll in PHIL 60, HPS 60.)
5 units, Spr (Tanona)

HUMBIO 82A. Qualitative Research Methodology — Goal is to develop knowledge and skills for designing and conducting qualitative research studies including purposes, conceptual contexts, research questions, methods, validity issues, and interactions among these facets. Each student designs a qualitative research study.
3 units, Aut, Win, Spr (Wanat)

HUMBIO 82B. Advanced Data Analysis in Qualitative Research — For students writing up their own qualitative research. Students prepare a complete draft presenting their own qualitative research study including results, with reports drafted section by section, week by week. Class provides feedback, guidance, support.
2-4 units, Aut (Wanat)

HUMBIO 82C: Writing in Qualitative Research — Students prepare a complete draft presenting their own qualitative research study including results, with reports drafted section by section, week by week. Class provides feedback, guidance, support.
2-4 units, Win, Spr (Wanat)

STANFORD INTRODUCTORY SEMINARS

3 units, Aut (Gallagher-Thompson)

HUMBIO 87Q. Women and Aging — Stanford Introductory Seminar. Preference to sophomores. Biology, diseases, demographics, and politics of aging; relationships and sexuality; wise woman and grandmother; lifestyles and scientific articles, fiction, art, and film. Students write a research paper or participate in a service learning experience with older women.
GER:4c
4 units, Win (Winograd)

HUMBIO 88Q. Neuroethics: Neurotechnology, Free Will, and the Privacy of Human Thought — Stanford Introductory Seminar. Preference to sophomores. Focus is on research. Neurotechnology and pharmacology for imaging and manipulating the brain. What can versus what should be done with frontier neurotechnologies in research, clinical medicine, and public areas such as education, athletics, and law. No prior experience in research required.
3 units, Win (Illes)

HUMBIO 89Q. The Eye and the Implications of Vision — Stanford Introductory Seminar. Preference to sophomores. The working of the eye and vision; comparisons to animal eyes. The role of vision in pursuits such as art, history, literature, and sports. Experience in research and presentation.
3 units, Win (Marmor)

HUMBIO 90Q. Contemporary Issues in Human Experimentation — Stanford Introductory Seminar. Preference to sophomores. Current principles to protect human subjects in terms of informed consent and protection of privacy; ethical issues relating to compensatory mechanisms for inherent risks; historical perspective and the development of the current mechanisms to safeguard the privacy and integrity of the individual; examples of use and abuse of human experimentation during medieval, Nazi, and modern times. Guest speakers currently performing human experiments or involved in approving such experimentation.
3 units, Win (Constantinou)

HUMBIO 91Q. Neuroethology: The Neural Control of Behavior — Stanford Introductory Seminar. Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat. GER:2a
3 units, Aut (R. Fernald)

HUMBIO 92Q. International Women’s Health and Human Rights — Stanford Introductory Seminar. Preference to sophomores. Focus is on women in poorer countries. Issues include women’s status, poverty, violence, and unequal access to education, food, and health care. Maternal mortality, sexually transmitted diseases, refugee situations, traditional practices affecting women’s and girls’ health, trafficking and prostitution, and women’s roles as they age. Readings include materials from women’s organizations outside the U.S. GER:4c
3 units, Spr (Firth-Murray)

HUMBIO 93Q. Human Subjects in Biomedical Research: The Media Perspective — Stanford Introductory Seminar. Preference to sophomores. Media reports on advances in treatment aimed towards cure or palliation of life threatening situations, or involving quality of life improvement. The media’s perspective on sources in scientific literature; practices in recruiting and compensating human subjects and in ensuring safety and confidentiality; non-technical discussion of results in scientific publications; and how the media interpret and popularize findings.
2 units, Spr (Constantinou)

HUMBIO 94Q. The Nation’s Health — Stanford Introductory Seminar. Preference to sophomores. Topics include: trends in population health; health disparities and the determinants of health; community problem solving; health care, health insurance, and health system organization; health care financing including Medicare and Medicaid; quality of care; and the politics of health. Weekly student presentations.
3 units, Aut (Lee, G. Heller)
HUMBIO 95Q. Gender, Culture, and HIV/AIDS—Stanford Introductory Seminar. Preference to sophomores. Issues include individual HIV risk, societal vulnerability, and gender. Sources include web resources, primary research, and primary data on HIV/AIDS including the National Health and Social Life Survey (NHSLS). Student presentations. GER:4c
3 units, Win (Brown, Amarillas)

HUMBIO 96Q. The Death Penalty: Policy, Philosophy, and Controversy—Stanford Introductory Seminar.
3-4 units, Spr (Abrams)

HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine—Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women’s issues, fitness and health, and sports science. Case studies. GER:4c
3 units, Spr (Matheson)

HUMBIO 99Q. Doctors Writing, Writing Doctors: Readings from Medical School, Medical Training, Medical Practice—Stanford Introductory Seminar. Preference to sophomores. For students considering medicine as a career. Goal is to acquaint students with medical school, training in medicine and surgery, and the practice of medicine and surgery. Topics include: how to pick a medical school and a residency; how medicine affects family life, especially children; the differences between surgical and medical specialties; the advantages and disadvantages among academic/teaching, pure research, group practice, HMO, hospital staff, or private practice; malpractice concerns; and financial considerations.
3 units, Aut (Zaroff)

ADVANCED

Open to non-majors with the proper prerequisites. Human Biology majors have preference when enrollment is restricted. All classes listed here fulfill the Human Biology upper-division requirement, including those that say “enroll in” another department.

HUMBIO 102A-B. Children, Youth, and the Law—Analysis of the legal rights of children and adolescents in the U.S. and how those rights are defined, protected, and enforced through the legal process within the context of the developmental needs of children and youth and competing societal interests. Topics: the origins and definitions of children’s rights; adoption; custody; the juvenile justice system (abused, neglected, and dependent children, status offenders such as runaways and truants, and minors accused of crimes); education; informed consent; health care; protection from harm and child welfare; due process; privacy, freedom of expression, and exercise of First Amendment rights. Interactive, using hypotheticals for discussion and analysis. A and B alternate every other year; students may take one, or both.
A: 5 units, Win (Abrams)
B: (Abrams) alternate years, given 2005-06

HUMBIO 103. Parasites/Pestilence: Infectious Public Health Challenges—(Same as MI 103.) Parasitic and other diseases with public health impact. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context to understand public health policy approaches to halting disease transmission. Focus is on WHO TDR (World Health Organization Tropical Disease Research) targeted disease entities: river blindness (onchocerciasis), sleeping sickness (African Trypanosomiasis), leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, intestinal helminthiasis, and miscellaneous and emerging infections. Guest lecturers and experts in disease control and research of local and international renown. Problem sets, exams, and original proposal to solve a current disease.
3 units, Spr (Smith)

HUMBIO 104. Aging: From Biology to Social Policy—(Enroll in ANTHSCI 171.)
5 units, Spr (Barrett)

HUMBIO 105. Bioethics and Anthropology—(Enroll in ANTHSCI 174/274, CASA 130A/230A.)
5 units, Spr (Koenig)

HUMBIO 106. The Anthropology of Death and Dying—(Enroll in ANTHSCI 175/275.)
5 units, Aut (R. Barrett)

HUMBIO 107. Astrobiology and Space Exploration—Evolution is cast against space and time, focusing on the emergence of life, intelligence, and civilization on Earth and, possibly, elsewhere. The phenomenon of human space exploration and the biological, psychological, sociological, and ultimately, philosophical issues that emerge. Integrates information from astrophysics, biochemistry, chemistry, evolutionary biology, geology, paleontology, physiology, psychology, and sociology. Taught by scientists from NASA Ames Research Center. Enrollment limited to 30. Prerequisite: one year college-level mathematics, physics, chemistry, biology, or psychology.
3 units, Win (Rothschild)

HUMBIO 108. Boys’ Psychosocial Development—From early childhood through adolescence. Emphasis is on how boys’ lives and experiences are embedded within their interpersonal relationships and social and cultural contexts. Interdisciplinary approach including perspectives from fields such as psychology, sociology, anthropology, family studies, and education. GER:4c
4 units, Spr (Chu)

HUMBIO 109. Human Behavioral Biology—(Enroll in BIOSCI 150/250.)
3-6 units (Sapolsky) alternate years, given 2005-06

HUMBIO 110. Vertebrate Biology—The evolution, form, function, and behavior of the vertebrates including primitive fishes, birds, mammals, and human beings. Prerequisite: Biological Sciences or Human Biology core. GER:2a
3-4 units, Spr (Porzig) alternate years, not given 2005-06

HUMBIO 111. Human Physiology—(Enroll in BIOSCI 112/212.)
4 units (C. Heller; Garza) alternate years, given 2005-06

HUMBIO 113. The Economic Individual in the Behavioral Sciences—Seminar. The idea of the economic individual or Homo economicus, and how this idea is reflected in the behavioral sciences. Empirical evidence for the notion that Homo economicus maximizes his utility and cooperates with others only when rational; associated models in economics. Applications to animal behavior. Readings include political philosophy, psychology, evolutionary biology, and recent research articles on empirical work in animal behavior. Student presentations.
3 units, Spr (Gordon; Satz)

HUMBIO 114. The Human Genome and Disease: Simple Organisms as Model Systems, for Mice and Men—(Same as BIOSCI 109/209.) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Overview of the concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and direct interaction between students and guest lecturers. GER:2a
3 units, Spr (R. Heller)

HUMBIO 115B. The Vaccine Revolution—(Same as MI 115B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries especially in the area of vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize it into a literature review on a topic. Emphasis is on the development of critical reading, analysis, experimental design, and interpretation of data. Students give four oral presentations and lead discussions based on their scientific journal reading. Enrollment limited to 10. Prerequisite: 115A.

HUMBIO 116. Eye and Implications of Vision—The physiology of vision and how visual capabilities influence human endeavors. Topics: mechanisms of vision, vision in animals, illusions, visual physiology of art, the eye in history and literature, and vision in sports. Student presentations.

HUMBIO 117. Community Health Assessment—How to measure the health of a community, and the challenges involved in collaborations between health professionals and communities. Course includes a service learning component. Community organizations partner with the class.

HUMBIO 117S. Work, Stress, and Health—How work is experienced in the U.S. and how it affects American health and quality of life. Topics include technological innovations, global competition, and demographic and social transitions.

HUMBIO 118. Human Diversity: A Linguistic Perspective—(Same as ANTHSCI 112.) The diversity and distribution of human language and its implications for the origin and evolution of the human species. The origin of existing languages and the people who speak them. Where did the languages that we currently see in the world come from and how can this diversity be used to study human prehistory? Evidence from related fields (archaeology and human genetics). Topics: the origin of the Indo-European languages, the peopling of the Americas, and the evidence that all human languages share a common origin. GER:4a

HUMBIO 119. Conservation Biology—(Same as BIOSCI 144.) The principles and application of the science of preserving biological diversity. Topics: sources of endangerment of diversity; the Endangered Species Act; conservation concepts and techniques at the population, community, and landscape levels; reserve design and management; conflict mediation. Case studies and local field trips. 4 units for students taking recommended field trips. Prerequisites: BIOSCI 101, or HUMBIO 2A with consent of instructor. GER:2a

HUMBIO 120. Human Nutrition—The study of food and nutrients. Their actions, interactions, and balance in relation to health and disease. Emphasis is on the biological, chemical, and physiological processes by which humans ingest, digest, absorb, transport, utilize, and excrete food. Dietary composition and individual choices in relation to the food supply, population, and cultural, race, ethnic, religious, and socioeconomic diversity. Relationships between nutrition and disease: eating disorders; ethnic diets; vegetarianism; nutritional deficiencies; nutritional supplementation; phytochemicals; and food safety. Prerequisite: Human Biology core or consent of instructor.

HUMBIO 121. Ethical Issues in the Neurosciences—Multidisciplinary. How recent advances relate to medical therapy, social policy, and considerations of human nature including consciousness, free will, personal identity, and moral responsibility. Discussions with leading research scientists, legal experts, philosophers, and theologians. Topics: neurogenetics, fetal brain tissue therapy, medicalization of criminal behavior, cosmetic psychopharmacology, and the neurobiological basis of love, sexuality, and gender. Enrollment limited to 15. Prerequisite: Human Biology core, Biological Sciences core, or consent of instructor.

HUMBIO 122. International Health Policy: Comparative National Health Care Systems—Emphasis is on reform strategies advocated for national health systems in industrialized countries, designed to deal with the challenges that rising costs and utilization, demographic shifts, and changing public perceptions pose to the organization and financing of services and the principle of equity. Student presentations. Prerequisite: 160, and consent of instructor.

HUMBIO 123. Sexuality in Adolescence—Developmental perspective. Issues related to scientific, historical, and cultural perceptions; social influences on sexual development; sexual risk; and the limitations and future directions of research. Sexual identity and behavior, sexually transmitted diseases including HIV, pregnancy, abortion, gay and lesbian youth, sex education and condom availability in schools, mass media, exploitative sexual activity, and difficulties and limitations in studying adolescent sexuality. Legal and policy issues, gender differences, and international and historical trends. Research project, including original data collection. Limited enrollment. GER:4c

HUMBIO 124. Principles of Sleep Research—(Enroll in BIOSCI 149/249.)

HUMBIO 125. Environmental Policy and Law—The role of government and citizens in formulating, implementing, and enforcing environmental policy. Using case studies, background readings, law cases, and statutes, seminar investigates the formal and informal political mechanisms involved in controlling pollution and protecting the environment. Topics: the respective roles of courts, legislatures, executive agencies, and nongovernmental organizations in shaping U.S. environmental policy. The pros and cons of regulatory and economic approaches to pollution control; environmental politics and ethics; air and water pollution; environmental justice; toxic substances and risk assessment; economics and trade; hazardous wastes.

HUMBIO 126. Adolescent Development—Adolescence from sociological, psychological, and psychiatric perspectives. Topics: physical, physiological, and cognitive development; identity; peer group; parent/child relations; impact of school; vocational development; and problem outcomes (eating disorders, violence, and teen pregnancy). Prerequisite: 3B or PSYCH 1, or consent of instructor.

HUMBIO 127. Seminar on Conducting Research—For juniors preparing for honors research in their senior year. Small groups design, conduct, analyze, and write up original research. Research skills including how to design a survey, enter data on a computer, and data analysis. Enrollment limited to 12. Pre- or corequisite: PSYCH 10 or equivalent, or consent of instructor.

HUMBIO 129. Ethnicity and Medicine—(Enroll in INDE 244.)

HUMBIO 130. Biology, Technology, and Human Life—Interdisciplinary approach to biomedical ethics. Social, moral, and aesthetic values guiding biomedical technology. How advances in biology are reshaping our relationship with nature, attitudes toward the body, and ideas about...
the meaning of human life. Topics: the use of medical technology to alter appearance and enhance performance, cloning, stem cells, and fetal tissue transplantation, biotherapy for criminal behavior, treatment of aging as a disease, and alteration of the body for space travel. Guests from the scientific and religious communities. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.

3-4 units, Win (Hurlbut)

HUMBIO 131. Natural Resources Policy—Focus is on federal public land and natural resources policy; mining, timber, and grazing law and policy; the legal aspects of forest, range, park, wilderness, wetlands, and wildlife management; recreation and preservation; and related issues. The role of the courts, administrative discretion, the Endangered Species Act, and the tension between protecting resources and respecting property rights. Students research one aspect of law and policy governing the management of natural resources.

5 units (Rosencranz) not given 2004-05

HUMBIO 132. Seminar on Problem Behavior in Adolescence—Lecture/seminar. Risk, protective factors, treatments, and intervention programs designed to ameliorate or prevent these problems. Externalizing behaviors (violence, delinquency, drug abuse, risk taking), internalizing problems (depression, eating disorders, suicide), and sexuality-related problems (teen pregnancy, date violence, STDs/HIV). Enrollment limited to 20. Prerequisite: 126 or consent of instructor.

4 units, Spr (S. Feldman)

HUMBIO 134. Ecological Anthropology—(Enroll in ANTHSCI 164/264.)

3-5 units, Spr (R. Bird)

5 units, Win (Rosencranz)

HUMBIO 137. Demography: Health, Development, Environment—(Same as BIOSCI 102.) Demographic methods and their application to understanding and projecting changes in human infant, child, and adult mortality and health, fertility, population, sex ratios, and demographic transitions. Progress in human development, capabilities, and freedoms. Relationships between population and environment. Prerequisites: numeracy and basic statistics, GER:3b

3 units, Aut (Tuljapurkar)

2-4 units (Nelson, Popat) not given 2004-05

HUMBIO 139. Primate Societies—(Enroll in ANTHSCI 131B/231B.)

5 units, Spr (Jablonski)

HUMBIO 140. Social Class, Race/Ethnicity, Health—(Enroll in SOC 141A/241A.)

4 units, Win (Barr)

HUMBIO 142P. HIV Prevention in East Africa Prefield Seminar—HIV risk reduction in Swahili speaking regions of Africa. Practical aspects of the biology of HIV; cultural, language, and international field work issues; and educational and research methodological issues. Student presentations.

3 units, Spr (Siegel)

HUMBIO 143. Globalization, Labor, and the Environment—Interdisciplinary. The responsibility of multinational corporations and institutions (World Bank, WTO, IMF) in the global economy, emphasizing labor and environmental standards in developing countries. Local and global case studies and research focus on social justice and empowerment for domestic and foreign victims of labor, environmental, and human rights abuses, the role of certain multinational institutions and corporations in those abuses, and potential tools for holding these bodies accountable. Service-learning component with Bay Area organizations.

4 units, Spr (Rosencranz)

HUMBIO 144. Environmental Dynamics—(Enroll in ANTHSCI 169/269.)

3-5 units, Spr (D. Bird)

HUMBIO 145. Children’s Citizenship: Justice Across Generations—(Enroll in POLISCI 131.)

5 units, Spr (Adcock)

HUMBIO 146. The AIDS Epidemic: Biology, Behavior and Global Response—Interdisciplinary approach to the HIV/AIDS pandemic from the view of public health, public policy nationally and internationally. The global epidemic of a fatal, sexually transmitted disease has led to attempts to change human behavior, produce a vaccine, and other approaches that bring into sharp focus the need for cost effectiveness analysis as a part of influencing public policy.

3 units, Aut (Katzenstein)

HUMBIO 147. Controlling Climate Change in the 21st Century—(Enroll in EARTHSYS 147/247, BIOSCI 147/247.)

3 units, Win (Schneider, Rosencranz) alternate years, not given 2005-06

HUMBIO 148. Promoting Health Over the Life Course: Multidisciplinary Perspectives—Disease prevention and health promotion topics pertinent to stages of the life span including nutrition, physical activity, obesity, and other risk factors. Focus is on scientific investigation, the application of behavioral science to risk reduction strategies, and health promotion as a social and economic imperative.

3 units, Aut (Alles, Stefanick)

HUMBIO 149. Birds to Words: Cognition, Communication, and Language—(Enroll in PSYCH 137.)

3 units, Win (A. Fernald, Ramscar)
HUMBIO 150. Current Topics and Controversies in Women’s Health—Interdisciplinary approach. Topics include health research, legal and policy issues, sex and gender differences, scientific and cultural perspectives, social influences, environmental and lifestyle effects on health, complementary medicine, and issues related to special populations.

3 units, Spr (Giudice)

HUMBIO 151. The Rise of Scientific Medicine—(Enroll in HISTORY 33A/333A.)

4-5 units, Spr (Lenoir)

HUMBIO 152. Environment and Growth in Developing Countries—
(Enroll in INTNLREL 135.)

5 units, Aut (Rosencranz)

HUMBIO 153. Reading: Science, Education, and Politics—The intellectual foundations of reading curriculum development including contributions of scientists, educators, and policy makers. Neural mechanisms of reading including the methodology used to measure complex behavior. Intervention studies to improve reading skills, and the implications of basic and applied science for social policy.

3 units, Spr (Wandell)

HUMBIO 154. Epidemiology and Cancer—Basic methods of epidemiology relevant to human research in cancer. The concepts of risk, case-control, cohort, and cross-sectional studies; clinical trials; bias; confounding; interaction; screening; and causal inference will be introduced. Knowledge of these principles will be applied to social, political, economic, and ethical controversies surrounding cancer screening, prevention, and research.

4 units, Win (Fisher)

HUMBIO 155. Exercise Physiology—How body systems respond to the stress of acute exercise and adapt to chronic exercise training. How the cardiovascular system adapts to optimize oxygen delivery and utilization; how muscles generate force and hypertrophy in response to training; how metabolic and biochemical pathways are regulated to support the increased energy demand of exercise. Theories on the causes of fatigue and muscle soreness, and what limits human performance. Applied topics such as the effects of aging, gender, and environmental conditions (high altitude, heat, cold) on exercise capacity. Prerequisite: Human Biology core or consent of instructor.

4 units, Aut (Friedlander) not given 2005-06

HUMBIO 155S. Applied Topics in Exercise Physiology and Metabolism—Student-selected topics in exercise physiology. Emphasis is on readings of scientific research. Student presentations. Summary paper. Enrollment limited to 12. Prerequisites: 155, consent of instructor.

3 units, Spr (Friedlander)

HUMBIO 156. Human Developmental Biology and Medicine—(Same as DBIO 156.) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene and sex; grand multiple pregnancies; prematurity; in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the development biology of humans. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.

3-4 units (Porzig) not given 2004-05

HUMBIO 157. Human Ecology of the Amazon—(Enroll in ANTH-SCI 25.)

5 units, Spr (Ocampo-Raeder)

HUMBIO 158. Human Abilities—(Enroll in EDUC 255, PSYCH 133.)

3 units, Win (Shavelson)

HUMBIO 159. Sports Medicine—Sports, exercise, health, and medicine integrated throughout the human performance continuum, from the use of exercise as a form of therapy to the injuries and illnesses that result from sports and exercise. Content in the basic and applied sciences is from physiology, nutrition, psychology, and biomechanics. Medical topics in the problems exacerbated or caused by exercise and sport; maximizing performance in elite athletes; and population-based issues such as exercise and its relationship to health, women’s issues, drugs in sport, and exercise and aging. Prerequisite: medical school or upper-division Human Biology standing, or consent of instructor.

4 units, Win (Garza)

4 units, Aut (Barr)

HUMBIO 160A. American Health Policy—Key issues in health care policy making, the evolution of current systems, and theories underlying contemporary efforts for change. The national search for solutions to the problems of the uninsured; and the feasibility, options and the ramifications of universal health insurance in the light of past experience and principal stakeholders. Student presentations. Prerequisites: HUMBIO 160, consent of instructor.

3 units, Spr (Lee, G. Heller)

HUMBIO 160B. Senior Honors Colloquium in Health Policy—
(Same as SOC 201H.) Limited to students doing senior honors research in Human Biology or Sociology. Year-long class to assist students doing honors research pertaining to sociology or social policy. Weekly discussions center around defining the research question, identifying data acquisition methods, carrying out data analysis, and writing the honors thesis. Prerequisite: consent of instructor.

1 unit (Barr, G. Heller, Lee) not given 2004-05

HUMBIO 160W. Seminar in Federal Health and Environment Programs/Agencies—Priority to students going to Stanford in Washington during Winter Quarter. Health policy making in Washington, D.C., emphasizing federal agencies responsible for developing and carrying out health and environmental policy. Student presentations and guest faculty from government agencies. Enrollment limited to 25.

3 units, Aut (Lee)

HUMBIO 161. Human Behavioral Ecology—(Enroll in ANTHSCI 163/263.)

3-5 units, Spr (R. Bird)

HUMBIO 162. Primate Evolution—(Enroll in ANTHSCI 131A.)

5 units (Jablonski) not given 2004-05

HUMBIO 163. Neural Systems and Behavior—(Enroll in BIOSCI 163/263.)

4 units (Fernald) alternate years, given 2005-06

HUMBIO 164A. Ethnoecology—(Enroll in ANTHSCI 164A/264A.)

5 units (Irvine) not given 2004-05

HUMBIO 166. The Death Penalty: Human Biology, Law, and Policy—Combines academic study and student involvement in forensic research and case investigation including DNA evidence, psychological and physiological development, mental and physical disabilities, and witness interviews. Philosophy, structure, and application of capital punishment in the U.S. Goal is to understand, and challenge issues in the death penalty from the perspective of involvement in a real case. No preconceived belief or political or philosophical agenda except to involve students in an intellectual challenge of policy and philosophy.

3 units, Aut, Win, Spr (Abrams)

HUMBIO 167. International Health—Health and wellness, major descriptors and determinants of health status, international organizations and control programs, disease-related problems within population groups from an epidemiologic viewpoint, health care delivery methods, efforts to improve health through examination of programs and projects currently underway and previously implemented. Emphasis is on cultural, economic, and political contexts in international health. Prerequisite: Human Biology core or consent of instructor.

4 units, Spr (Staff)
HUMBIO 168. Medical Anthropology—(Enroll in ANTHSCI 10.)
3-5 units, Spr (R. Barrett)

HUMBIO 169. Critical Issues in International Women’s Health—
Women’s lives, from childhood through adolescence, reproductive years,
and aging. Economic, social, and human rights factors, and the impor-
tance of women’s capacities to have good health and manage their lives
in the face of societal pressures and obstacles. Emphasis is on life or death
issues of women’s health that depend on their capacity to negotiate or feel
empowered, including maternal mortality, violence, HIV/AIDS, access to
abortion, and sex trafficking. Organizations addressing these issues. GER:4c
4 units, Spr (Firth-Murray)

HUMBIO 170. Social Policy for Sustainable Resource Use—(Enroll
in ANTHSCI 167/267.)
5 units, Win (Irvine)

HUMBIO 171. Indigenous Peoples and Environmental Problems—
(Same as ANTHSCI 162/262.) The social and cultural consequences of
temporary environmental problems. The impact of market econo-
mies, development efforts, and conservation projects on indigenous
peoples, emphasizing the Amazon, E. Africa, Alaska, and Central
America. The role of indigenous grass roots organizations in combating
environmental destruction and degradation of homeland areas. (HEF II,
IV) (DA-A) GER:3a,4a
3-5 units (Durham, Irvine) not given 2004-05

HUMBIO 173. Medical Ethics—(Enroll in PHIL 78, ETHICSCOC 78.)
4 units, Spr (Jaworska)

HUMBIO 174. Ethics and Politics in Public Service—(Enroll in
POLSCI 133, ETHICSCOC 133.)
5 units (Reich) not given 2004-05

HUMBIO 175. Health Care as Seen Through Medical History,
Literature, and the Arts—The differences between disease as pathol-
ogy and as the patient’s experience. Topics include patient-doctor
relationships, medical technology, the changing focus on illness, gender
issues, mental illness, sick children, death and dying.
4 units, Spr (Zaroff)

HUMBIO 175S. The Literature of Health Care: Novels and Theater
of Illness—Illness and disease through novels and plays by authors
including Shakespeare, Miller, Sophocles, Hemingway, and Camus.
How sickness involves the patient, family, community, and state.
3 units, Spr (Zaroff)

HUMBIO 176. Development and Disease Mechanisms—(Enroll in
DBIO 201.)
4 units, Aut (Scott, Crabtree, Porzig, Kingsley, Kim)

HUMBIO 177. Skeletal Development and Evolution—(Enroll in
BIOE 280, ME 280.)
3 units, Spr (Carter)

HUMBIO 179. Environmental Change and Emerging Infectious
Diseases—(Enroll in ANTHSCI 179.)
3-5 units, Win (Durham, Jones)

HUMBIO 180. Human Osteology—(Same as ANTHSCI 133A/233A.)
The human skeleton. Focus is on identification of fragmentary skeletal
remains. Analytical methods such as paleopathology, taphonomy, and
forensic techniques. Students work independently in laboratory with the
collection. (HEF LV) (DA-B) GER:2a
5 units, Win (DeGusta)

HUMBIO 180G. Introduction to Anthropological Genetics—(Enroll
in ANTHSCI 14.)
5 units, Spr (Mountain)

HUMBIO 183. Hunter-Gatherers in Archaeological Perspective—
(Enroll in ANTHSCI 141/241.)
4-5 units, Aut (Trancser)

HUMBIO 184. The Darwinian Revolution—(Enroll in HISTORY
133/333.)
4 units, Win (Lenoir)

HUMBIO 185. Science and Religion—(Enroll in RELIGST 270.)
4 units (Bergman, Eisen) not given 2004-05

HUMBIO 186. Evolution of Human Disease—(Enroll in ANTHSCI
172/272.)
5 units (R. Barrett) not given 2004-05

HUMBIO 187. Introduction to Imaging and Image-Based Human
Anatomy—(Enroll in RAD 220.)
3 units, Win (Gold, Butts)

HUMBIO 189. Philosophy of Biology—(Enroll in PHIL 167A/267A.)
4 units, Aut (Tamona)

HUMBIO 193. Research in Human Biology—Independent research
conducted under faculty supervision, taken junior or senior year, normally
(but not necessarily) in pursuit of an honors project. May be taken more
than one quarter for credit. Students must complete application in student
services office.
1-5 units, Aut, Win, Spr (Staff)

HUMBIO 194. Honors—Completion of the honors project, normally
taken in the student’s final quarter. First component: the honors thesis, a
final paper providing evidence of rigorous research, fully referenced, and
written in an accepted scientific style. Second component: participation
in the honors symposium, including a 10-minute oral presentation
followed by a brief question and answer session. Prerequisites: 193 or
199), and acceptance into the honors program.
1-10 units, Aut, Win, Spr (Staff)

HUMBIO 197. Human Biology Internship—Limited to and required
of Human Biology majors. Combines course work with a supervised
field, community, or lab experience of student’s choosing. Must be pre-
approved by Human Biology faculty adviser and student adviser before
work begins, and initiated at least three quarters prior to graduation.
Prerequisite: Human Biology Core.
1-4 units, Aut, Win, Spr (Staff)

HUMBIO 197S. Service Learning Internship in Human Biology—
(Fulfills the Human Biology internship requirement.) Provides 100
hours of work in service capacity with a non-profit, community health
agency. Students are required to go through an orientation to their
community and participate in organized reflection activities throughout
their experience. Prerequisite: consent of instructor and admittance into
the Human Biology Service-Learning Program.
1-4 units, Aut, Win, Spr (Wanat)

HUMBIO 198. Senior Tutorial in Human Biology—Intensive reading
for Human Biology majors in exceptional circumstances and under
sponsorship of Human Biology associated faculty. Students must apply
through Human Biology student services before registering. Reading
list, paper, and evaluation required.
1-5 units, Aut, Win, Spr (Staff)

HUMBIO 199. Directed Reading/Special Projects—Human Biology
majors must obtain a sponsor from the Human Biology associated faculty
or the Academic Council. Non-majors and/or students who have not
declared must obtain a sponsor only from the Human Biology associated
faculty. Students must complete application in student services office.
1-4 units, Aut, Win, Spr (Staff)

HUMBIO 200. Teaching of Human Biology—For upper division
undergraduates and graduate students. Practical experience in teaching
Human Biology or serving as an assistant in a lecture course.
1-5 units, Aut, Win, Spr (Staff)
OVERSEAS STUDIES

Descriptions of these courses are in the “Overseas Studies” section of this bulletin and at the Overseas Studies office, 126 Sweet Hall. Students overseas are encouraged to participate in a wide range of internships and independent research as well.

AUSTRALIA

HUMBIO 61X. Coral Reef Ecosystems—(Same as BIOSCI 109Z, EARTHSYS 120X.)
3 units, Aut (Arrigo, Dove, Hoegh-Guldberg)

HUMBIO 62X. Coastal Resource Management—(Same as BIOSCI 110Z, EARTHSYS 121X.)
3 units, Aut (Johnstone, Udy)

HUMBIO 63X. Coastal Forest Ecosystems—(Same as BIOSCI 111Z, EARTHSYS 122X.)
3 units, Aut (Duke, Pole)

PARIS

HUMBIO 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time—(Same as PUBLPOL 111.)
4-5 units, Win (Grenier-Sennelier)

PROGRAM FOR INDIVIDUALLY DESIGNED MAJORS

The Individually Designed Major program (IDM) is overseen by the School of Humanities and Sciences, located in Building 1. See also the “School of Earth Sciences” and the “School of Engineering” sections of this bulletin for IDMs in these curriculum areas.

This program is intended for currently registered undergraduates in good academic standing interested in pursuing an area of scholarly inquiry that falls outside the purview of an established academic department or program of the University. Students submit proposals for consideration by the Curriculum Committee. These should be intellectually coherent majors designed by the students themselves, with the assistance of faculty members of their choice. IDM students are required to complete a capstone requirement either as an honors project or a senior project. Information about proposal procedures, and the procedure for an honors project, is available at the Undergraduate Advising Center, Sweet Hall, first floor, and the School of Humanities and Sciences (Building 1).

In designing a major, the student consults with three faculty members (all must be Academic Council members and be from three separate departments); one of the faculty members is selected as the student’s primary adviser. In helping the student design the major and in signing the proposal requesting approval from the Curriculum Committee, the faculty members are committing themselves to act as a regular academic advisory group for the student until graduation. The committee does not consider proposals without the approval of the faculty advisory group.

APPLICATION PROCEDURE AND CURRICULUM COMMITTEE REVIEW

The program is administered by the Curriculum Committee, the School of Humanities and Sciences, and the dean’s office in the School of Humanities and Sciences. Applications are due by the fifth week of the Spring Quarter of the sophomore year.

The committee acts in lieu of a regular department of the University. This role involves certifying the scholarly merit of the program and includes the obligation to consider, approve, and recommend changes in each proposed major.

In carrying out its role, the committee reserves the right to reject proposals that, in its opinion, lack scholarly merit or are not clearly interdisciplinary. Occasionally, the committee must reject a proposal that, though of considerable academic merit, requires resources not available at Stanford. The committee also reserves the right to recommend additions to a student’s faculty advisory group.

ADVISING AND PROPOSAL

Students who are seriously interested in the program and have met with UAC adviser Sally Mentzer, are directed to the dean’s office in the School of Humanities and Sciences to speak with the Cognizant Dean for Graduate and Undergraduate Studies. The final stage of the process is the application review by the Curriculum Committee.

The proposal should begin with a statement that describes the major, articulates the motivation for and the justification and ultimate goal of the major, and shows how the courses listed relate to and fulfill the major’s goal. This statement should be followed by a list of the proposed core courses to be counted toward the major and, as far as possible, the sequence in which they are to be taken. The proposal must be signed by the selected faculty advisory group; their signatures certify that they endorse the major as described in the proposal and agree to serve as the student’s permanent advisory group. The proposal must be accompanied by a letter of recommendation from each of the three advisers giving separate appraisals of the academic viability of the proposed major. The proposal must also include a current copy of the student’s unofficial transcript.

These specific requirements are in addition to the general guidelines discussed under “The Major” section of this bulletin. The monitoring of the requirements and subsequent changes to the original proposal must be approved by the Cognizant Dean for Graduate and Undergraduate Studies.

THE GUIDELINES

To establish the IDM program as being fully equivalent to a Stanford B.A. or B.S. degree in an established department or program, the Senate of the Academic Council has approved specific requirements. The criteria for approval of proposals submitted include:

1. Each major shall consist of at least 75 units, all in courses at or above the 100 level (or their equivalent).
2. A maximum of 5 units of these 75 units may be taken on a credit/no credit basis.
3. A maximum of 8 units of these 75 units may be taken in practical or directed reading.
4. None of the 75 units can count towards another major or other special program.
5. Students are required to take a core sequence and WIM course in the department of one of their advisers.
6. There is a grade point requirement of 3.5.
7. The proposed major must constitute a coherent academic program that fulfills the student’s objectives and achieves a clear academic goal.
8. The proposed major must be comparable in quality and in academic rigor to degrees obtained by students in other degree-granting programs offered at Stanford.
9. The proposed major must achieve both breadth and depth within the academic discipline(s), involve interdisciplinary study, and be compatible with a liberal arts education.
10. The proposed major must not duplicate or be achievable through a major already offered by another degree-granting program or department.
11. Students must present evidence that demonstrates their ability to do independent work.
12. Students proposing individually designed majors must have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee.
INTERDISCIPLINARY STUDIES IN HUMANITIES

Emeriti: (Professors) Kurt Mueller-Vollmer, Lawrence V. Ryan
Director: Paul Robinson
Associate Director: Helen Brooks
Steering Committee: (Chair) Paul Robinson, Helen Brooks (English, Interdisciplinary Studies in Humanities), Thomas Grey (Music), Christina Knight (Undergraduate student representative), Emily Levine (Graduate Program in Humanities student representative), Hilton Ozenzinger (English), Linda Paulson (English), Rush Rehm (Drama), Casey Riffel (Undergraduate student representative), Sebastian Salvado (Graduate Program in Humanities student representative), Rega Wood (Philosophy)

Department Offices: Building 250, Room 251F
Mail Code: 94305-2020
Department Phone: (650) 723-3413
Email: idstudies.moore@stanford.edu
Web Site: http://www.stanford.edu/group/HSP/GPH/

Courses given in Interdisciplinary Studies in Humanities have the subject code HUMNTIES. For a complete list of subject codes, see Appendix.

The office of Interdisciplinary Studies in Humanities administers the following programs:

1. Honors Program in Humanities
2. Interdisciplinary Major in Humanities
   a) Interdisciplinary Major
   b) Interdisciplinary Major for Premeds
   c) Interdisciplinary Major in Digital Humanities
   d) Interdisciplinary Major in Philosophical and Literary Thought
3. Graduate Program in Humanities
   a) Master of Arts
   b) Joint Ph.D.
4. American Studies (see the “American Studies” section of this bulletin.)
5. Medieval Studies (see the “Medieval Studies” section of this bulletin.)
6. Program in Modern Thought and Literature (see the “Modern Thought and Literature” section of this bulletin.)

UNDERGRADUATE PROGRAMS

See also the “Honors Program” below.

BACHELOR OF ARTS

THE MAJOR IN INTERDISCIPLINARY STUDIES IN HUMANITIES

This undergraduate major is designed for students with a strong commitment to interdisciplinary study in the various humanities. A student may choose to pursue the B.A. degree in Humanities through one of four concentration options: (1) the standard student designed thematic concentration; (2) the concentration designed for students who also plan to complete the established premedical curriculum for careers in the health sciences; (3) the concentration in digital humanities; or (4) the concentration in philosophical and literary thought. For all options, the B.A. degree conferred is in Humanities. Each student chooses a field that reflects the focus of study, which is noted on the transcript after degree conferral.

Unlike the disciplines in natural and social sciences, the humanities focus on the formation of ideas through language. The goal of the program is to introduce students to different disciplinary methods as well as their intersections. Students interested in Interdisciplinary Studies in Humanities have the opportunity to arrange their courses by thematic subject matter, genre, or historical period.

Each applicant to the major submits a study plan, accompanied by a statement of purpose which outlines the rationale for a particular field of study. Students who wish to major in Humanities should receive approval of their fields before the end of the junior year.

Students may complete fields in
1. Culture and Politics
2. Digital Humanities (see below)
3. Early Modern Studies
4. Ecology, Philosophy, and Literature
5. Film Studies
6. Medieval Studies
7. Modern Thought and Literature
8. Performance Studies
9. Philosophical and Literary Thought (see below)
10. Philosophy and the Visual Arts

REQUIREMENTS FOR THE MAJOR

With the exception of the premed option, each program of study must include at least 12 courses for a minimum of 60 units over and above the requirements of the Humanities honors program (30 units). However, students may count one of the core seminars taken for the honors program (see below) as one of the courses toward the major if appropriate to the area of concentration.

INTERDISCIPLINARY MAJOR

The program of study for the thematic concentration include:

1. A statement of purpose designating the field and outlining the rationale for the program of study.
2. Six courses in one of the three areas: literary, historical, or philosophical study.
3. Three courses in each of the other two areas above.
4. The requirements for the Humanities honors program.

If additional courses are needed to make up the 60 unit minimum, the student may take those courses in any of the three areas. Each program of study must be signed by a Stanford faculty member who has agreed to act as the student’s academic adviser; the proposed program must then be approved by the director. Changes in the study plan must be approved by the student’s adviser and kept on file in the program office.

For some fields, such as film studies or modern thought and literature, specific courses or types of courses may be strongly recommended. Consult the student handbook for such recommendations.

INTERDISCIPLINARY MAJOR FOR PREMDS

The Interdisciplinary Major in Humanities offers an option for students who are preparing to attend medical school, but who wish to focus their studies in the humanities. This program of study gives students a coherent way to organize interdisciplinary interests by theme, nationality, or historical period. In addition, students choosing this track take all the courses usually required by medical schools (two years of organic and inorganic chemistry with labs, one year of physics, one year of biology with labs, and one or two courses to provide proficiency in quantitative skills as determined by a premed adviser), as well as course work in various humanities disciplines (eight courses and a minimum of 40 units) distributed as follows:

1. A statement of purpose choosing one of the fields listed above.
2. Four courses in the student’s chosen field. Generally these four courses address different aspects of literature, history, and philosophy.
3. Three courses in medical ethics, history or philosophy of science, science, and the humanities.
4. One course in the arts.
5. The courses recommended by the Undergraduate Advising Program to fulfill medical school entrance requirements.
6. The requirements for the Humanities honors program.

INTERDISCIPLINARY MAJOR IN DIGITAL HUMANITIES

The development of new technologies has produced new topics for scholarly discussion in the humanities as well as new forms of cultural expression. The Interdisciplinary Major in Humanities offers a track for students who wish to concentrate study in the new field of Digital Humanities with the following course requirements:

429
The concentration in philosophical and literary thought is available in association with the crossdisciplinary Program for the Study of Philosophical and Literary Thought. Students wishing to major in Humanities with this focus must consult with the director or associate director of Interdisciplinary Studies in Humanities. Students prepare a program of study including at least 12 courses in literary, philosophical, and historical study, of which six courses are in philosophical or literary thought, and three in each of the other two categories. Requirements:

1. A statement of purpose defining a focus in philosophical or literary thought.
2. PHIL 81, Philosophy and Literature Gateway, which can be counted toward the course requirements for philosophical study or toward the requirements for literary study.
3. PHIL 80, Mind, Matter, and Meaning
4. Courses in philosophical study normally include at least one course from the PHIL 170 sequence and one course from the PHIL 180 sequence.
5. Courses in literary study should focus on one national literature.
6. Courses in historical study should include at least one course in the history of philosophy.
7. The requirements of the Humanities honors program.
8. Students in this track are strongly encouraged, where possible, to select one or two Interdisciplinary Core Seminars which are approved courses of special relevance for philosophical and literary thought.

Interested students should consult the director of undergraduate studies in the Program for the Study of Philosophical and Literary Thought for a listing of courses of special relevance to the study of philosophy and literature (which includes some of the HUMNTIES interdisciplinary core seminars).

HONORS PROGRAM

The Honors Program in Humanities aims to heighten a sense of the relations among various humanistic disciplines, and to study issues in intellectual and cultural history through aesthetic, literary, historical, religious, social, and ethical perspectives.

ADMISSION

As an extra-departmental honors program, the Humanities Honors Program is open to any qualified undergraduate at Stanford, regardless of major. Interested students may obtain information from the program office. Students are encouraged to register for the program at the earliest opportunity and to take the Core Colloquium in the sophomore year. However, students may join the program as late as the junior year under certain circumstances (e.g., transfer students). Students enrolled in the crossdisciplinary majors affiliated with the Program for the Study of Philosophical and Literary Thought, whether through the Philosophy major or one of the literature majors, are strongly encouraged to write their honors essays through the Humanities honors program. Students must meet the following entrance requirements before being admitted to the program:

1. Completion of at least two quarters of the Area One requirement, except in the case of transfer students, who will be granted exception.
2. A grade point average (GPA) of at least 3.3 (B+) in all course work in the humanities. Such course work includes any Area One sequence and all Program in Writing and Rhetoric sections; all courses in the departments of Art and Art History, Drama, and Music (except studio or performance courses); all courses in the departments of Asian Languages, Classics, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese (except first-year language courses); all courses in the departments of Comparative Literature, History, Philosophy, and Religious Studies; and all courses in the programs in Feminist Studies and Modern Thought and Literature.

REQUIREMENTS

1. Completion of 100, Honors Core Colloquium: Humanities, 3 units, preferably in the sophomore year.
2. Two different seminars in the series 190-198: 8-10 units, sophomore, or junior year. Both seminars must be completed by the end of the tenth quarter of undergraduate study in order for students to remain members in good standing.
3. At least one survey course in intellectual or cultural history, 4-5 units, in a field relevant to the anticipated topic of the senior essay, choosing from among courses in history, philosophy, religious studies, literature, and the arts. Students should consult the course list in the program office.
4. Unless students have compelling intellectual reasons for doing otherwise, they must fulfill their World Cultures (GER-4a) and American Cultures (GER-4b) requirements from courses offered in humanities disciplines.
5. In order to develop the requisite knowledge and methodological background to write a Humanities honors essay, students must take, during their sophomore and junior years, the required Humanities honors courses and additional humanities courses in disciplines germane to their honors essays.
6. Enrollment in 200A, one unit each, Winter and Spring quarters of the junior year.
7. An honors essay on a topic approved by the Steering Committee (usually 5 units Autumn Quarter and 5 units Winter Quarter, senior year).
8. A minimum GPA of 3.3 (B+) in all courses taken for the Honors Program, as well as an overall minimum GPA of 3.0 (B) in all course work in order to remain in the program.

GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS

The Master of Arts program within the Graduate Program in Humanities is designed to broaden the student’s academic background and cultural knowledge through a series of seminars that study intellectual history from the classical period to the modern era. Students gain added depth by taking four advanced courses within a defined field of study.

Application is made through the Interdisciplinary Studies in Humanities office. Application procedures are available on the web at http://gradadmissions.stanford.edu. The M.A. program in Humanities is ideally completed as a half-time, two-year program, but under some circumstances it may be completed in one year as a full-time program. The department does not offer financial aid for the master’s program. Qualified undergraduates at Stanford may petition to complete the M.A. program coterminal with their bachelor’s degrees. The deadline for applying to the M.A. program is mid-February for both outside and coterminal applications. Please check web site for specific date.

REQUIREMENTS

1. Complete the five Interdisciplinary Studies in Humanities seminars (321-325).
2. Complete four graduate-level courses in an approved, established discipline to be determined in consultation with the director. At least one of these must be a graduate-level research seminar for which a research paper is required. Under “Statement of Purpose” on the application form, the candidate must indicate the field of study (for example, art history, early modern studies, philosophy, etc.) from which the graduate-level courses are drawn. The candidate must also note his or her qualifications for undertaking graduate study in that designated field. Once admitted, the student submits a proposed program of study to the director, specifying the particular courses to be taken. The proposed program is approved on its own merits to ensure that the chosen graduate courses are suited to the M.A. in Humanities.

3. Satisfactory completion of 298, the (Spring Quarter) Graduate Program in Humanities Symposium, or prior completion of the Symposium Paper by special permission.

The minimum number of units for the M.A. degree is 45. Additional elective units may be taken at the option of the student.

Undergraduates wishing to pursue the M.A. as part of a coterminal program should speak with the program administrator about the application procedures for coterminal students.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

JOINT PH.D.

The Graduate Program in Humanities (GPH) provides graduate students in different disciplines an opportunity to broaden their knowledge of intellectual and cultural history by focusing on texts and ideas which have been central to all humanistic disciplines from the ancient world to the present. The program’s seminars usually focus on specific topics or issues in the context of historical, literary, philosophical, religious, and other disciplinary and theoretical orientations. The program provides a unique opportunity to study highly influential texts with a view to their relevance to the student’s own disciplinary field.

Because the GPH is a supplementary program, its members must be students earning the Ph.D. in an academic department at Stanford.

Students may register for the program at any time, usually during the first quarter of graduate study. Members of the program are given first preference in registration for all of its offerings. Students complete the five GPH seminars (321-325). The course of study culminates in the GPH student symposium, which is developed and organized by the students in the program.

Although students in the GPH generally complete the program course work in their first two years of graduate study, requirements of some participating departments may necessitate completion of the GPH over three years. In some instances, one or more of the GPH seminars may fit within the requirements of the student’s home department.

The following are participating departments in the program: Art and Art History, Classics, Comparative Literature, Drama, Education, English, French and Italian, German Studies, History, Modern Thought and Literature, Music, Philosophy, Religious Studies, Slavic Languages and Literatures, and Spanish and Portuguese. Doctoral students from other departments may participate with permission of their home departments and approval of the Director of Interdisciplinary Studies in Humanities.

REQUIREMENTS

1. Continue satisfactory work in the student’s major field, in accordance with department requirements.

2. Complete the five GPH seminars. To qualify for candidacy, students should complete at least three seminars in the first two years of graduate residence. Exemption from, or permission to audit, a seminar may be secured by petition if the student can show coverage of the material at an advanced level.

3. Participate in the GPH student symposium, usually at the end of the second year of GPH course work (298; registration for units is optional).

4. At least one quarter of teaching for Interdisciplinary Studies in Humanities, normally a teaching internship in the third or fourth year (299; registration for units is optional).

5. Reading knowledge of at least one foreign language, ancient or modern, to be certified in the first two years of graduate work.

6. Passing the University oral examination according to the schedule prescribed by the major department with one GPH representative, approved by the director, as a member of the examining committee.

7. Submission of a Ph.D. dissertation acceptable to a committee which includes one representative of the GPH, approved by the director.

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Interdisciplinary Studies in Humanities department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Interdisciplinary Studies in Humanities are advised to consider satisfying their GER:1.b,c requirements by registering for the following IHUM courses.

IHUM 20A, B. Anatomies of Change—The persistent reappearance of interdisciplinarity from the classical to the present. How texts provide the terms for interdisciplinary methods of interpretation. Readings cross disciplinary boundaries to encompass intellectual, social, literary, ethical, and artistic concerns. How ideas become established, what their intellectual and social boundaries are, and what historical pressures break boundaries down. GER:1.b,c (two quarter sequence)

IHUM 20A. 5 units, Win (Rayner)

IHUM 20B. 5 units, Spr (Brooks)

COURSES

See quarterly Time Schedule for changes in listings.

HUMNTIES 100. Honors Core Colloquium: Humanities—Required of all students in the Humanities Honors Program. Introduction to Interdisciplinary Studies in Humanities through the study and application of a range of theoretical approaches to a major literary text. This year, focus is on Hamlet, including film adaptations. Experience in both disciplinary and interdisciplinary analysis and writing is designed to help prepare students to write their honors essays in Humanities. GER:3a

3 units, Win (Brooks, Robinson)

HUMNTIES 170. Media Studies Internship—Practical experience working with a film or media company for six to eight weeks. Students must make arrangements with companies individually and receive the consent of the Director of the Humanities Honors Program. Credit is awarded for submitting a paper after completing the internship, focused on a topic relevant to the student’s studies.

2-3 units, Aut, Win, Win, Spr, Sum (Robinson)

HUMNTIES 175. Individual Work—

1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 191-198. Interdisciplinary Core Seminars in Humanities—Students in the Humanities honors program must complete two different seminars from different areas before the end of the tenth quarter of undergraduate study. Other students may enroll if space allows and with the instructor’s consent.

HUMNTIES 193L. Montaigne—(Same as PHIL 193L.) Preference to Humanities honors students and Philosophy majors. Philosophical and literary aspects of Montaigne’s Essays including the nature of the self and self-fashioning, skepticism, fideism, and the nature of Montaigne’s philosophical project. Montaigne’s development of the essay as a literary genre. GER:3a

4 units, Win (Anderson)

HUMNTIES 193Y. The Moral Status of Human Beings—(Same as PHIL 193Y.) The conviction that human beings have a unique moral status among animals, plants, and things, and that all humans have equal moral status is at the heart of ethics. Views which question these beliefs, attempts to defend them, and their implications for practical ethical issues such as abortion, euthanasia, new reproductive technologies, and the treatment of animals. GER:3a

4 units, Spr (Jaworska)
HUMNTIES 194G. William Blake: Poet and Painter—(Same as ENGLISH 135E.) Romantic philosopher, religious renegade, political revolutionary, social misfit and cult hero, critic of education, the church, and Newton, theorist of life science, anatomist, botanist, and follower of phrenology. Blake has inspired American rock artists, beat poets, countercultural film makers and all who think creatively about life. Focus is on his illuminated poetry. GER:3a
5 units, Win (Gigante)

HUMNTIES 196B. Religion, Reason, and Romanticism—(Same as RELIGST 245.) The late 18th-century European cultural shift from rationalist to romantic modes of thought and sensibility. Debates about religion as catalysts for the new Zeitgeist. Readings include: the Jewish metaphysician, Mendelssohn; the dramatist, Lessing; the philosopher of language and history, Herder; the critical idealist, Kant; and the transcendental idealist, Fichte. GER:3a
5 units, Spr (Sockness)

HUMNTIES 196H. Religion, Politics, and American Democracy—(Same as RELIGST 211.) Should religious arguments have a public role in policy debates in a democratic society that includes conflicting religious conceptions of the good? Does the separation of church and state require a completely secular society? Readings include Rawls, Rorty, Carter, Hauerwas, and Stout.
5 units, Win (Harvey)

HUMNTIES 197B. Camera as Witness: International Human Rights Documentaries—(Same as INTNLREL 141B, SLAVGEN 197B.) Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. GER:3a
5 units, Win (Bojic)

HUMNTIES 197C. Camera as Witness: A Forum for Global Dialogue—(Same as INTNLREL 141C, SLAVGEN 197C.) Challenges facing film makers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and film maker roles as artists, activists, and journalists. GER:3a
5 units, Spr (Bojic)

HUMNTIES 197F. Tolstoy’s Anna Karenina and the Social Thought of Its Time—(Same as SLAVGEN 190/290.) Preference to Humanities honors students. Historical and cultural context, contesting major currents of social thought in Tolstoy’s time including Marx on class and history, Mill on sex equality, Nietzsche, Dostoevsky, and Shestov on morality and power, Freud on desire and the unconscious, Durkheim on the nature of religion, and Weber on legitimation and authority. Limited enrollment. See http://www.stanford.edu/~gfreidin/courses/AK/. GER:3a
5 units, Aut (Freidin)

HUMNTIES 1981. Digital Humanities: Literature, Science, and Technology—(Same as ENGLISH 153H.) How electronic texts, literary databases, computers, and digital corpora offer unique ways of reading, analyzing, and understanding literature. Intellectual and philosophical problems associated with an objective methodology within a traditionally subjective discipline. GER:3a
5 units, Aut (Jockers)

HUMNTIES 200A,B,C. Senior Research—Limited to Humanities honors students. A critical essay of about 15,000 words. Students develop a proposal beginning in Winter Quarter of the junior year, and research a topic and write the essay during senior year with the guidance of a faculty member, taking a total of 5 units each of 200B and 200C, spread out during senior year as best suits their schedules. Deadline for submitting essays is the first working day on or after May 15.

HUMNTIES 200A. Research Proposal—Preliminary planning and study. Student drafts a proposal in Winter Quarter of the junior year to submit to the committee in charge for suggestions regarding focus and bibliography. After revisions, the student resubmits a fully developed proposal to the committee for additional comment and/or final approval. 60 hours over two quarters are expected of students developing their essay proposals for 2 units, usually 1 unit each in Winter and Spring of the junior year. Students usually make revisions of some kind in either scope or formulation of the topic. Students overseas submit proposals and receive feedback by fax or email. WIM 1-2 units, Aut, Win, Spr (Robinson)

HUMNTIES 200B. Senior Research—Regular meetings with tutor (thesis adviser). Prerequisite: 200A. WIM 1-5 units, Aut, Win, Spr (Robinson)

HUMNTIES 200C. Senior Research—Regular meetings with tutor; submission of complete first draft at least two weeks before final deadline. Prerequisite: 200B. WIM 1-5 units, Aut, Win, Spr (Robinson)

HUMNTIES 201. Digital Humanities Practicum—For Humanities majors concentrating in digital humanities. Work related to the honors thesis under the supervision of a Stanford faculty or staff member usually affiliated with the Stanford Humanities Lab. Must be approved by the Director of Interdisciplinary Studies in Humanities. 2-5 units, Aut, Win, Spr (Staff)

GRADUATE

HUMNTIES 275. Directed Reading 1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 298. GPH Symposium—Required of doctoral and master’s students in the GPH. Participation in student-organized symposium; presentation of a paper informed by texts addressed in GPH seminars. 1-3 units, Spr (Robinson)

HUMNTIES 299. Teaching Internship—Required of doctoral students in the GPH. Preparation for teaching in interdisciplinary programs. Supervised teaching responsibilities in Humanities program courses. 1-3 units, Win, Spr (Brooks)

HUMNTIES 321. Classical Seminar—(Same as CLASSGEN 321.) The dialogue between literature and philosophy in Greek and Roman cultures. Homer, Greek tragedy, Plato, Lucretius, Virgil, and Augustine; Nietzsche’s Birth of Tragedy and Walcott’s Omeros. 3-5 units, Win (Nightingale)

HUMNTIES 322. Medieval Seminar—Cultural, literary, and artistic trends including: the Germanic ethos and heroic ideal; Celtic culture and the Arthurian romances; Provençal lyric poetry and the courtly love tradition; the emergence of Western art from Byzantine and Gothic sources and the Italian masters of the Trecento; scholasticism and Dante and Chaucer. Texts include: Beowulf, the Song of Roland, Chrétienn de Troyes, Dante, Boccaccio, Chaucer, and works on Romanesque and Gothic art. 3-5 units, Spr (Steidele)

HUMNTIES 323. Renaissance/Early Modern Seminar—The advent of printing; the reapropriation of classical thought; the expansion of trade; revolutions in religion; the exploration of uncharted realms of the self, world, and heavens; and the rise of historiography. Authors: de Pizan, Pico della Mirandola, Columbus, De Las Casas, Machiavelli, More, Luther, Montaigne, Marlowe, Donne, Shakespeare, and Galileo. 3-5 units, Aut (Brooks)

HUMNTIES 324. Enlightenment Seminar—(Same as HISTORY 431B.) The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality, and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet. 3-5 units, Win (Baker)

HUMNTIES 325. Modern Seminar—(Same as ENGLISH 325X.) Modern aesthetic and philosophical ideas about language and experience. Relationships among notions of aesthetic and psychological experience and roles ascribed to experience in theories of meaning. Readings may include literary texts by Joyce, Woolf, Stevens, Conrad, Eliot, Bishop, Ashbery, and Powers, and philosophical texts by Wittgenstein, Heidegger, Sellars, McDowell, and Davidson. 5 units, Aut (Bourbon)
INTERNATIONAL POLICY STUDIES

**Director:** Norman M. Naimark (History)

**Interim Director:** Martin W. Lewis (International Policy Studies, History)

**Executive Faculty Committee:** Coit D. Blacker (Stanford Institute for International Studies), James Fearon (Political Science), Judith L. Goldstein (Political Science), Stephen H. Haber (Political Science), Timothy Josling (Institute for International Studies), Michael McFaul (Political Science), Ronald I. McKinnon (Economics), Michael Tomz (Political Science)

**Lecturers:** Chonira Aturupane, Gili Drori, John Dunlop, Keith Hansen, Pawel Lutomski, Bertrand Patenaude, Helen Stacy

**Affiliated Faculty:** Jonathan Bendor (Business), Gordon Chang (History), Larry Diamond (Hoover Institution), Lynn Eden (Sociology), Walter P. Falcon (Stanford Institute for International Studies), Larry Gould (Economics), David J. Holloway (History, Stanford Institute for International Studies, Political Science), Simon Jackman (Political Science), Terry Karl (Political Science), Stephen D. Krasner (Political Science), Gail Lapidus (Stanford Institute for International Studies), Beatriz Magaloni (Political Science), Isabella Mares (Political Science), Rosamond Naylor (Stanford Institute for International Studies), Roger G. Noll (Economics), Jean Oi (Political Science), Daniel Okimoto (Political Science), Len Ortolano (Civil and Environmental Engineering), Robert A. Packenham (Political Science), William Perry (Stanford Institute for International Studies, Management Science and Engineering), Douglas Rivers (Political Science), Richard Roberts (History), Scott D. Sagan (Political Science), Stephen Stedman (Stanford Institute for International Studies, Political Science), Thomas Simons (History), Andrew Walder (Stanford Institute for International Studies, Sociology), Ann Wren (Political Science)

**Other Affiliation:** Michael Armacost (Stanford Institute for International Studies), Christopher Crombez (Stanford Institute for International Studies), Donald Emmerson (Stanford Institute for International Studies), Jonathan Greenberg (Law), Katherine Jolluck (History), Kathryn Stoner-Weiss (Stanford Institute for International Studies)

**Program Offices:** Encina Hall West, Room 216

**Mail Code:** 94305-6045

**Phone:** (650) 722-4547

**Web Site:** http://ips.stanford.edu

Courses given in International Policy Studies have the subject code IPS. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAM

MASTER OF ARTS

University requirements for the M.A. degree are described in the “Graduate Degrees” section of this bulletin.

International Policy Studies (IPS) is a highly analytical interdisciplinary program focusing on international policy analysis. Its goal is to provide students with in-depth exposure to a range of issues that they will face in the 21st century in international business and public policy, and to develop a foundation of skills and knowledge to address those issues. The program allows students to focus on: the international economic system, developing and transition societies, security issues, or the world environment. More information on IPS can be found on our web site at http://ips.stanford.edu.

IPS requires completion of the core and cognate requirements listed below which normally amount to 48 units of credit. Additional units are required for students who have not fulfilled the prerequisites for these requirements.

ADMISSION

IPS is designed for students who have a strong undergraduate background in economics and political science. To enroll in the program, students must have taken at least one undergraduate course in international relations, as well as calculus-based undergraduate courses in statistics, microeconomics, and macroeconomics. Stanford courses satisfying these requirements are POLISCI 1 or IPS 204, and ECON 51, 52, 102A. In addition, to fulfill the program requirements in one year, students must have completed one advanced undergraduate course in international economics, and one in either security studies or international political economy. Stanford courses that meet these requirements are ECON 165 and POLISCI 110B or C.

Applicants from schools other than Stanford or applicants from Stanford who did not apply in their senior year should submit a Graduate Admission Application including a statement setting forth relevant personal, academic, and career plans and goals; official transcripts; three letters of recommendation; Graduate Record Examination (GRE) scores; and a writing sample of at least ten pages. TOEFL scores are required for applicants for whom English is not their first language or who did not attend an undergraduate institution where instruction is in English. To apply online or for information on graduate admission, go to http://gradadmissions.stanford.edu. Applicants are expected to have a B.A. or B.S. degree from an accredited school. Complete information on applying to IPS is found in the Guide to Graduate Admission. Applications for admission beginning Autumn Quarter must be filed together with supporting credentials by the preceding December 14.

Undergraduates at Stanford may apply for admission when they have earned a minimum of 120 units toward graduation, including AP and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The application requires an official, current transcript, two letters of recommendation from University faculty, a course paper of at least ten pages, and a statement of relevant personal, academic, and career plans and goals. Students enrolled in the program in the Autumn Quarter following completion of all of their undergraduate requirements including at least 180 units and, if graduating with honors, a senior thesis. Applications are available at the Registrar’s Office and must be filed together with supporting credentials by the preceding December 14.

DEGREE REQUIREMENTS

To receive the M.A. degree in International Policy Studies, students must complete the items below. These requirements entail 23 units of core courses and an additional 25 units from the cognate curriculum. These courses have the following prerequisites, which cannot be counted toward any of the IPS degree requirements or for an area specialization: ECON 51, 52, 102A, and 165; POLISCI 1 and 110B or C.

Core—

1. **Seminar Requirement:** IPS 200, Issues in International Policies (3 units)

2. **Skills Requirement:** any three of the following nine courses (15 units)—ECON 102B, 102C, 150, 286; IPS 201A, 201B; POLISCI 350B, 350C, 352; PUBLPOL 105

3. **International Economics Requirement (5 units):** IPS 202, Topics in International Macroeconomics; IPS 203, Issues in International Economics

Cognate Curriculum—Students must take 25 units of other IPS approved courses for their cognate. At least 15 units must be in one of the following areas of specialization and 10 units must be in two other areas of specializations (a complete list of the courses in these areas is available in the IPS program office):

- International Political Economy
- Conflict/Security Studies
- Political and Economic Development
- Public Organizations and Policy Implementation
- World Environmental Policy
IPS program. Financial aid is not normally available for graduate students entering the program as coterminal students. Note that these petitions can only be made by the program director. Thesis units may not be counted toward the cognate curriculum requirement. (Register for IPS 290.)

In addition, students must meet the following deadlines:

1. Complete and file the IPS Program Proposal, available in the IPS office or on the web) for updated information on additional courses. See the IPS Degree Requirements (available in the IPS Program Office or on the web) for updated information on additional courses.

2. Use Axess to file an Application to Graduate by the appropriate deadline, and complete and file the IPS Program Requirement Completion Worksheet with the IPS office.

Grade Requirements—All courses to be counted toward the 45 units must be taken for a grade of “B-” or higher.

Financial Aid—Undergraduates may petition for a fifth year of financial aid ascoterminal students. Note that these petitions can only be made if the undergraduate degree has not been conferred. University-based financial aid is not normally available for graduate students entering the IPS program.

**CORE**

**SEMINAR REQUIREMENT**

IPS 200. Contemporary Issues in International Policies—For IPS students only. Lecture series. Scholars present their analysis of major international public policy issues.

1 unit, Aut, Win, Spr (M.W. Lewis)

**SKILLS REQUIREMENT**

Any three of the following classes:

IPS 201A. Basic Econometrics—First course in econometrics, with emphasis on linear regression analysis. Topics covered include bivariate and multivariate regression models, inference and hypothesis testing, heteroscedasticity, autocorrelation, and simultaneous-equation models.

5 units, Aut (Staff)

IPS 201B. Applied Econometrics—Emphasis is on practical experience.

5 units, Win (Staff)

**ECONOMICS**

ECON 102B. Introduction to Econometrics

5 units, Win (Vytlacil), Spr (Hansen)

ECON 102C. Advanced Topics in Econometrics

5 units, Spr (Pistaferri)

ECON 150. Economic Policy Analysis

5 units, Win (Noll)

ECON 286. Game Theory and Economic Application

2-5 units, Aut (Levin)

**POLITICAL SCIENCE**

POLISCI 350B. Political Methodology II

5 units, Win (Jackman, Rivers)

POLISCI 350C. Political Methodology III

3-5 units, Spr (Jackman, Rivers)

POLISCI 352. Introduction to Game Theoretic Methods in Political Science

5 units, Aut (Fearon)

**PUBLIC POLICY**

PUBLPOL 105. Quantitative Methods and Their Applications to Public Policy

5 units, Spr (Rothwell)

**INTERNATIONAL ECONOMICS REQUIREMENT**

IPS 202. Topics in International Macroeconomics—Topics: standard theories of open economy macroeconomics, exchange rate and stabilization policies, the economics of monetary unification and the European Monetary Union, and emerging markets financial and currency crises.

5 units, Win (Staff)

IPS 203. Issues in International Economics—Globalization, international trade and trade policy, including economic growth, regionalism, the World Trade Organization and the political economy of trade policy.

5 units, Spr (Staff)

**COGNATE**

Students must take 25 units in the cognate curriculum, 15 of which must be from the same track and the other 10 must be from 2 other tracks. The five tracks are: International Political Economy, Conflict/Security Studies, World Environmental Policy, Political and Economic Development, and Public Organizations and Policy Implementation.

**INTERNATIONAL POLITICAL ECONOMY**

IPS 204. Theories and Concepts in International Relations—Seminars. The major theoretical approaches to international relations, including concepts such as power, agency, the state, and the international system. Themes include conflict and cooperation among states, domestic influences on foreign policy, transnational relations, and international institutions and regimes. Case studies in international security, international political economy, and international law and organization.

5 units, Aut (Stoner-Weiss)

IPS 222A. The Political Economy of the European Union—(Same as INTNLREL 122A.) EU institutions, the legislative process, policies, relations with the U.S., and enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU’s constitutional convention.

5 units, Win (Crombez)

IPS 230. Science, Technology, and Development—(Same as INTNLREL 130.) Global and sociological perspective. The rates of global expansion of science, technology, and information technology, comparing nations and world religions. The social impact of these trends, primarily concerning economic development and notions of progress (democratization, human rights, welfare of local populations, and national security). Current discussions regarding globalization, science and technology policy, development, commodification of the public good, and social change. The implications of science and technology globalization, as they shape the diverging trajectory of nation states worldwide.

5 units, Aut (Drori)

IPS 249. The Economics and Political Economy of the Multilateral Trade System—(Same as INTNLREL 149.) The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations.

5 units, Win (Josling)
IPS 282. Southeast Asia: Issues and Perspectives—(Same as INTNLREL 182.) While long conventional to praise the Association of Southeast Asian Nations for its success, regional crises since 1997 have fostered a view of ASEAN as impotent, irrelevant, or both. It is said to have enlarged too fast to the detriment of its coherence and effectiveness, and to rely too much on national sovereignty viewed as an anachronism in a globalizing, borderless, and democratizing world. Emphasis is on Singapore and Indonesia.

5 units, Win (Emmerson)

ECONOMICS
ECON 224. Science, Technology, and Economic Growth
2-5 units, Win (Gambardella)

ECON 265. Open Economy Macroeconomics
2-5 units, Spr (M. Wright)

ECON 266. International Trade
2-5 units, Win (Rossi-Hansberg)

ECON 269. International Financial Markets and Monetary Institutions
5 units (Staff) not given 2004-05

MANAGEMENT SCIENCE AND ENGINEERING
MS&E 271. Global Entrepreneurial Marketing
4 units, Win, Spr (Kosnik)

POLITICAL SCIENCE
POLISCI 247T. The Politics of the European Union
5 units (Wren) not given 2004-05

POLISCI 312. Japanese Foreign Policy
5 units, Aut (Okimoto)

POLISCI 340S. Political Economy of Post-Communism
5 units (McFaul) not given 2004-05

POLISCI 345R. Political Economy of Japan
3-5 units, Aut (Okimoto)

POLISCI 345S. Japanese Politics
5 units (Staff) not given 2004-05

POLISCI 348. Chinese Politics: The Transformation and the Era of Reform
5 units, Win (Oi)

POLISCI 443R. Corporate Restructuring and Governance in Asia
5 units (Oi) not given 2004-05

POLISCI 443S. Political Economy of Reform in China
5 units, Spr (Oi)

SOCIOLOGY
SOC 214. Economic Sociology
5 units, Aut (Granovetter)

SOC 217A. China Under Mao
5 units, Aut (Walder)

SOC 264. Firms, Markets, and States
5 units (Staff) not given 2004-05

CONFLICT/SECURITY STUDIES
IPS 219C. Arms Control and Efforts to Prevent the Proliferation of Weapons of Mass Destruction—(Same as INTNLREL 119C.) The history of efforts to limit and reduce nuclear, biological, and chemical weapons of mass destruction (WMD), the nature of such weapons, threats posed by their proliferation, and prospects for efforts to prevent proliferation. Written analysis of a negotiation and simulated deliberation of policy options.
5 units, Spr (Hansen)

IPS 240B. International Criminal Court and Tribunals—(Same as INTNLREL 140B.) International criminal law as an instrument of human rights policymaking at the end of the Cold War. The growing corpus of law and policy including treaties, declarations, conventions, and customary law, Ethical and political implications of international criminal courts and tribunals for notions of sovereignty; the legal implications for universal human rights standards of non-Western national politics, and religious and cultural practices; and the use by some nations of universal jurisdiction within domestic courts to prosecute crimes that take place outside sovereign boundaries.
5 units (Stacy) not given 2004-05

IPS 240C. The U.S., U.N. Peacekeeping, and Humanitarian War—(Same as INTNLREL 140C.) The U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter’s provisions on the use of force, origins and evolution of peacekeeping, reasons for peace making and enforcement in the 90s, and debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia, Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan.
5 units, Spr (Patenaude)

IPS 266. Russia and Islam—(Same as INTNLREL 166.) Seminar. Focus is on 1985 to the present. The policies of Gorbachev toward the Muslim populace of the Soviet Union; how post-communist Russia under Yeltsin and Putin has dealt with its Muslim minorities; and the relationship of Russia to the newly independent states of Central Asia and the South Caucasus after the breakup of the USSR in 1991. The two wars Russia has fought with secessionist Chechnya.
5 units, Aut (Dunlop)

IPS 281. Contemporary Issues in U.S. Relations with Northeast Asia—(Same as INTNLREL 181.) The interaction among the great powers (China, Japan, Russia, and the U.S.) in East Asia and their impact on U.S. efforts to advance and defend its strategic, political, and economic interests in the area. Emphasis is on practical aspects of problems such as the U.S.-Japan alliance, preventing the proliferation of nuclear weapons and ballistic missiles in N. Korea, promoting peaceful coexistence in the Taiwan Straits, and fostering balanced economic relations between America and the export-led growth economies in the region.
5 units, Win (Armacost)

HISTORY
HISTORY 322B. Circles of Hell: Poland in World War II
5 units, Spr (Jolluck)

HISTORY 327. War and Peace in the 20th Century
5 units (Sheehan) not given 2004-05

HISTORY 375A. U.S.-China Relations: From the Opium War to Tiananmen
5 units, Win (Chang)

HISTORY 388. Palestine and the Arab-Israeli Conflict
5 units, Aut (Al-Qattan)

HISTORY 423. Stalin and Europe: Europe and Stalin
5 units (Naimark) not given 2004-05

MANAGEMENT SCIENCE AND ENGINEERING
MS&E 293. Technology and National Security
3 units, Aut (Perry, Paté-Cornell)

POLITICAL SCIENCE
5 units, Win (Sagan, Blacker, Perry)

POLISCI 114T. Major Issues in International Conflict Management
5 units (Stedman) not given 2004-05

POLISCI 312R. Domestic Politics and International Conflict
5 units, Spr (Schultz)

POLISCI 318S. State Building
5 units, Win (Krasner)
POLITICAL AND ECONOMIC DEVELOPMENT

IPS 209. Offshoring of Business Services—Economic, political, technological, and business aspects. Back-office services such as software and front-office services such as sales. Supply-chain strategies: offshoring software programming versus system design. Managerial models: in-house versus outsourced offshoring. Economic and political environments, and their impact on business and policy decisions.

5 units, Win (Dossani)

IPS 230. Science, Technology, and Development—For description, see “International Political Economy” subsection above.

5 units, Aut (Drori)

ANTHROPOLOGICAL SCIENCES

ANTHSCI 124/224A. Perspectives on Sustainable Development in Latin America

4-5 units (Staff) not given 2004-05

ECONOMICS

ECON 106. World Food Economy

5 units, Win (Falcon, Naylor)

ECON 214. Development Economics: Microeconomic Issues

2-5 units, Aut (Mahajan)

ECON 216. Development Economics and Growth: Macroeconomics

2-5 units (Staff) not given 2004-05

ECON 217. Development Economics: Money and Finance

2-5 units, Win (McKinnon)

HISTORY

HISTORY 347A. Health and Society in Africa

5 units, Spr (Roberts)

HISTORY 379. Latin American Development: Economy and Society, 1800-2000

5 units (Frank) not given 2004-05

HISTORY 386. Economic and Social History of the Modern Middle East

4-5 units (Beinin) not given 2004-05

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 249. Growth and Development

3 units, Sum (de La Grandville)

POLITICAL SCIENCE

POLISCI 141. The Global Politics of Human Rights

5 units, Win (Karl)

POLISCI 246R. Market-Oriented Reform and Development in Latin America

5 units, Spr (Packenham)

POLISCI 317R. The End of the USSR: Causes and Consequences

5 units, Win (Lapidus)

PUBLIC ORGANIZATIONS AND POLICY IMPLEMENTATION

IPS 211. Education for All? The Global and Local in Public Policy Making in Africa—(Same as INTNLREL 111.) Although international institutions, national governments, and non-governmental organizations agreed in 1990 to promote education for all within a decade, the goal has not been achieved. The need in Africa is great but education systems are underfunded and overstressed, schools are crowded and poorly equipped, and teachers are overburdened and underprepared. Focus is on policy making in Africa and the intersection of policy processes and their political and economic dimensions. Case studies.

5 units, Spr (Samoff)

IPS 219A. Intelligence and U.S. Foreign Policy—(Same as INTNLREL 119A.) The nature of intelligence, organization, and functions of the intelligence community, sources of intelligence information, intelligence support to policy makers, relations with and support to Congress, and the compatibility of secrecy and an open democratic society. Simulated intelligence and policy deliberations. Current intelligence analyses and national intelligence estimate on issue of student’s choosing.

5 units, Aut (Hansen)

IPS 219B. History of U.S. Intelligence—(Same as INTNLREL 119B.) The origin and evolution of U.S. intelligence, how intelligence has been used by Presidents, its role in international crises, intelligence successes and failures, and the policy requirements that drive intelligence collection, analysis, and covert action. Student analysis of the role and contribution of intelligence in a specific crisis. Simulated briefings to senior policy officials.

5 units, Win (Hansen)

IPS 219C. Arms Control and Efforts to Prevent the Proliferation of Weapons of Mass Destruction—For description, see “Conflict/Security Studies” subsection above.

5 units, Spr (Hansen)

IPS 231. Globalization and Organizations—(Same as INTNLREL 131.) Organizations serve as the carriers of globalization processes: expanding worldwide, organizations proliferate social procedures, establish isomorphic structures, and diffuse cultural patterns. Political structures, international relations, commercial organizations, cultural institutions. Global organizational expansion, forms of organizational adaptation, notions of national sovereignty under intensifying global organizational expansion, and forms of national and international governance. Studies of global organizational fields including science, rights, environment, development, combining theoretical, comparative, and case study pieces.

5 units, Win (Drori)

IPS 240A. International Law and International Relations—(Same as INTNLREL 140A.) What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? The foundational theories, principles, and sources of public international law. Prominent theories of international relations and how they address the role of law in international politics. Practical problems such as human rights, humanitarian intervention, and enforcement of criminal law. International law as a dynamic set of rules, at times influenced by power, at other times constraining it, but always essential to studying international relations.

5 units, Win (Luomski)

IPS 240B. International Criminal Court and Tribunals—For description, see “Conflict/Security Studies” subsection above.

5 units (Stacy) not given 2004-05

5 units, Spr (Patenaude)

IPS 240D. International Human Rights Law: Cultural Exceptions and Enforceability—(Same as INTNLREL 140D.) The expansion of international human rights law. How nation states exempt themselves from applying international human rights standards because of cultural exceptions such as religious and traditional practices, forced and juvenile marriages, child labor, abortion, environmental standards, and property rights. How international human rights treaties are made; how national states represent their cultural views. The effects of treaty reservations; legal processes for compliance and enforcement. Other mechanisms of inducement or coercion to produce compliance. How regional legal systems handle cultural difference and enforcement.

5 units, Win (Stacy)

IPS 314S. Decision Making in U.S. Foreign Policy—(Same as POLSCI 314S.) Priority given to students in International Policy Studies. The formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoret-
ical and analytical perspectives are supplemented by case studies. Preparation of policy memorandum and substantial research paper or take-home final.

5 units, Spr (Blacker)

HISTORY

HISTORY 352. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis
5 units, Aut (Bernstein)

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 234. Organizations and Information Systems
4 units, Win (Tabrizi)

MS&E 254. The Ethical Analyst
1-3 units, Spr (Howard)

POLITICAL SCIENCE

POLISC 346S. The Logic of Authoritarian Government
5 units, Win (Haber)

POLISC 362. New Economics of Organization
5 units, Spr (Weingast)

POLISC 365. Organizational Decision Making
5 units, Spr (Bendor)

SOCIOLOGY

SOC 214. Economic Sociology
5 units, Aut (Granovetter)

WORLD ENVIRONMENTAL POLICY

5 units, Aut (M.W. Lewis)

IPS 261B. Global Human Geography: Europe and Americas—(Same as INTNLREL 161B, HISTORY 101B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.
5 units, Win (M.W. Lewis)

IPS 263. History and Geography of Contemporary Global Issues—(Same as INTNLREL 163, HISTORY 201E.) The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of The New York Times and The Economist. Topics vary according to what is happening in the world. Student presentations.
5 units, Spr (M.W. Lewis)

CIVIL AND ENVIRONMENTAL ENGINEERING

CEE 171. Environmental Planning Methods
3 units, Win (Ortolano)

ECONOMICS

ECON 155. Environmental Economics and Policy
5 units, Spr (Goulder)

ECON 243. Economics of Environment
2-5 units (Staff) not given 2004-05

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 248. Economics of Natural Resources
3-4 units, Aut (Sweeney)

MS&E 250A. Engineering Risk Analysis
2-3 units, Win (Paté-Cornell)
UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Requirements for the major (65 units) are:

IR Core Courses (Numbers 1-5)

1. POLITSCI 1
2. POLITSCI 110A or 110B or 110C or 110D or HISTORY 172A
3. ECON 1 or 50 or 51 or 52
4. Two additional upper-division Economics courses from the IR approved course offerings list
5. At least one of the following skills classes:
   - ECON 102A
   - POLITSCI 150A
   - STATS 60
6. Complete either a Functional Specialization or an Area Specialization (see below for descriptions of specializations). Courses that are used in the core area (1-5 above) cannot also be counted for the specialization.
7. At least one course must be an upper-division seminar or colloquium.
8. At least one course designated as writing intensive (WIM) for International Relations.
9. No more than 20 units can be lower-division courses.
10. A minimum grade of ‘C’ is required for courses to count towards major requirements.
11. Completion of one quarter study overseas either through the Stanford Overseas Studies Program or an approved non-Stanford program.
12. Proficiency in a foreign language through two years of course work (second-year, third-quarter) or a proficiency exam.

FUNCTIONAL SPECIALIZATION

The three functional specializations are:

1. Comparative Political and Historical Analysis (CPHA)
2. Comparative Culture and Society (CCAS)
3. Comparative and International Political Economy (CIPE)

Students must complete a total of seven courses (35 units) for their functional specialization. Four courses must be from the student’s functional area (CPHA, CCAS, CIPE); two courses from a second track; and the final course from the third track (4-2-1). Consult the updated course offering lists available in the International Relations office or on the web at http://irweb.stanford.edu/ for IR approved courses in each track.

AREA SPECIALIZATION

The area specializations are: Africa, Europe, Latin America, and Russia/East Europe. Students must complete a total of seven courses (35 units) with five courses directly related to their area specialization. Three of these five courses must be in one of the three tracks (CPHA, CCAS, CIPE), one course in a second track, and the final course in the third track. The ten remaining units must be fulfilled by comparative or further area course work.

Students must also demonstrate proficiency in a language, other than English, commonly spoken in the area chosen by completing two years of language study or by passing a second-year, third-quarter proficiency exam. Students can fulfill the overseas studies requirement by participating in an IR-approved Overseas Studies Program in the area of specialization.

Check the IR office for updated information about the area specialization requirements.

DECLARING THE MAJOR

The International Relations major must be declared no earlier than the beginning of sophomore year and no later than the end of the second quarter of the junior year. Students must submit an acceptable proposal to the director of the program and declare IR on Axess. Students completing a double major, or fulfilling International Relations as a secondary major are also required to file a proposal by the end of the second quarter of the junior year.

Students who have already been accepted as majors in the program may petition to include courses for their specialization that are not listed in this section of the bulletin or in the updated course lists. Courses should be clearly international in nature and petitions should contain as much information as possible about the course in question (e.g., syllabi, reading lists). Petitions are available in the International Relations office.

MINORS

A minor in International Relations is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. Declaration of the minor must take place no later than the end of the second quarter of the junior year. To declare, complete the application for a minor on Axess.

Students complete the minor by taking seven unduplicated courses (35 units) from the IR curriculum, including the following:

1. POLITSCI 1
2. Two of the four following courses: POLITSCI 110A, 110B, 110C, 110D
3. Four courses from one of the three tracks (CPHA, CCAS, CIPE), or four courses relating to the same geographic region. Consult the updated course offering lists available in the International Relations office or on the web site.

HONORS PROGRAM

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing. In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students should submit their honors thesis proposal during Spring Quarter of their junior year.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students admitted to the honors program participate in either Honors College or the Autumn Quarter Honors Colloquium, enroll in research units each quarter with their faculty adviser, and present a formal defense of their thesis in mid-May. Students must receive at least a grade of ‘B+’ in order to graduate with honors in International Relations.

GRADUATE PROGRAM

MASTER OF ARTS

It is possible for students majoring in International Relations to work simultaneously for a coterminal master’s degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree requirements in both fields. For information on the M.A. program in International Policy Studies, see the “International Policy Studies” section in this bulletin. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement for International Relations.

CORE

ECONOMICS

- ECON 1. Elementary Economics
  5 units, Aut (Boskin), Win (Wright), Spr (Clerici-Arias)
- ECON 50. Economic Analysis I
  5 units, Aut (Johnson), Win (Tendall)
- ECON 51. Economic Analysis II
  5 units, Win (Johnson), Spr (Tadelis)
- ECON 52. Economic Analysis III
  5 units, Win (Tertilt), Spr (Klenow)
ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists
5 units, Aut (Tendall), Win (Nicholson)

HISTORY
HISTORY 172A. The United States Since 1945
4-5 units, Win (Bernstein)

POLITICAL SCIENCE
POLISCI 1. Introduction to International Relations
5 units, Aut (Tomz)

POLISCI 110A. Sovereignty and Globalization
5 units, Win (Krasner)

POLISCI 110B. Strategy, War, and Politics
5 units (Sagan) not given 2004-05

POLISCI 110C. America and the World Economy
5 units (Goldstein) not given 2004-05

POLISCI 110D. War and Peace in American Foreign Policy—WIM
5 units, Spr (Schultz)

POLISCI 150A/350A. Political Methodology I
5 units, Aut (Wand)

STATISTICS
STATS 60/160. Introduction to Statistical Methods: Precalculus
5 units, Aut (Walther), Win (Thomas), Spr, Sum (Staff)

ADDITIONAL OFFERINGS
The courses listed below fulfill the IR functional specialization track requirements in CPHA, CCAS, and CIPE, and can fulfill the area specialization option in Africa, Europe, Latin America, or Russia/East Europe. See the IR program web site or office for specific course designations. For course descriptions and General Education Requirement (GER) information, see the respective department listings. Additional relevant courses may be offered; for updated information, consult the course offerings in the IR program office or at http://irweb.stanford.edu.

COMPARATIVE POLITICAL AND HISTORICAL ANALYSIS (CPHA)

INTNLREL 70Q. India and Pakistan: History, Politics, and Security—Stanford Introductory Seminar. Preference to sophomores. From partition in 1947 to the present. Political developments, religions, cultures, national identities, communal rivalries, economic development, energy and environment, and military and security issues in each country. The Kashmir conflict and nuclear-bomb rivalry. Sources include a novel and films. Required research paper. Students collaborate with instructor to design and investigate research questions; some research may continue after the course.
4 units, Aut (Rosenzweig)

INTNLREL 119A. Intelligence and U.S. Foreign Policy—(Same as IPS 219A.) The nature of intelligence, organization, and functions of the intelligence community, sources of intelligence information, intelligence support to policy makers, relations with and support to Congress, and the compatibility of secrecy and an open democratic society. Simulated intelligence and policy deliberations. Current intelligence analyses and national intelligence estimate on issue of student’s choosing.
5 units, Aut (Hansen)

INTNLREL 119B. History of U.S. Intelligence—(Same as IPS 219B.) The origin and evolution of U.S. intelligence, how intelligence has been used by Presidents, its role in international crises, intelligence successes and failures, and the policy requirements that drive intelligence collection, analysis, and covert action. Student analysis of the role and contribution of intelligence in a specific crisis. Simulated briefings to senior policy officials.
5 units, Win (Hansen)

INTNLREL 119C. Arms Control and Efforts to Prevent the Proliferation of Weapons of Mass Destruction—(Same as IPS 219C.) The history of efforts to limit and reduce nuclear, biological, and chemical weapons of mass destruction (WMD), the nature of such weapons, threats posed by their proliferation, and prospects for efforts to prevent proliferation. Written analysis of a negotiation and simulated deliberation of policy options.
5 units, Spr (Hansen)

INTNLREL 131. Globalization and Organizations—(Same as IPS 231.) Organizations serve as the carriers of globalization processes: expanding worldwide, organizations proliferate social procedures, establish isomorphic structures, and diffuse cultural patterns. Political structures, international relations, commercial organizations, cultural institutions. Global organizational expansion, forms of organizational adaptation, notions of national sovereignty under intensifying global organizational expansion, and forms of national and international governance. Studies of global organizational fields including science, rights, environment, development, combining theoretical, comparative, and case study pieces. WIM
5 units, Win (Drori)

INTNLREL 140A. International Law and International Relations—(Same as IPS 240A.) What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? The foundational theories, principles, and sources of public international law. Prominent theories of international relations and how they address the role of law in international politics. Practical problems such as human rights, humanitarian intervention, and enforcement of criminal law. International law as a dynamic set of rules, at times influenced by power, at other times constraining it, but always essential to studying international relations.
5 units, Aut (Lutomski)

INTNLREL 163. History and Geography of Contemporary Global Issues—(Same as IPS 263, HISTORY 201E.) The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of The New York Times and The Economist. Topics vary according to what is happening in the world. Student presentations. GER:3b, WIM
5 units, Spr (M.W. Lewis)

INTNLREL 181. Contemporary Issues in U.S. Relations with Northeast Asia—(Same as IPS 281.) The interaction among the great powers (China, Japan, Russia, and the U.S.) in E. Asia and their impact on U.S. efforts to advance and defend its strategic, political, and economic interests in the area. Emphasis is on practical aspects of problems such as the U.S.-Japan alliance, preventing the proliferation of nuclear weapons and ballistic missiles in N. Korea, promoting peaceful coexistence in the Taiwan Straits, and fostering balanced economic relations between America and the export-led growth economies in the region.
5 units, Win (Armacost)

INTNLREL 182. Southeast Asia: Issues and Perspectives—(Same as IPS 282.) While long conventional to praise the Association of Southeast Asian Nations for its success, regional crises since 1997 have fostered a view of ASEAN as impotent, irrelevant, or both. It is said to have enlarged too fast to the detriment of its coherence and effectiveness, and to rely too much on national sovereignty viewed as an anachronism in a globalizing, borderless, and democratizing world. Emphasis is on Singapore and Indonesia.
5 units, Win (Emmerson)

INTNLREL 205. Ethics, Technology, and International Relations—Applicability of ethical principles to the analysis of international affairs including border control, intervention, transborder diffusion of national cultural products, foreign aid, national and international cultural patri- mony, and war and terrorism. The role of technology in challenging traditional thinking about ethical issues in international affairs. Emphasis is on the interplay of theory and practice. Case studies. Limited enrollment.
5 units, Spr (McGinn)
HISTORY
HISTORY 101D. History of Nuclear Weapons
5 units, Spr (Holloway)
HISTORY 102A. The History of the International System
5 units, Spr (Haslam)
HISTORY 120C. 20th-Century Russian and Soviet History
5 units, Aut (Patenaude)
HISTORY 125/325A. 20th-Century Eastern Europe
5 units, Win (Jolluck)
HISTORY 126/327A. The History of the Cold War
5 units (Naimark) not given 2004-05
HISTORY 137/337. The Holocaust
5 units, Win (Rodrigue)
HISTORY 148C. Africa in the 20th Century
5 units, Aut (R. Roberts)
HISTORY 165C. The United States in the Twentieth Century

POLISCI 241S. Regime Change: Comparative Theories
5 units (McFaul) not given 2004-05
POLISCI 245R. Politics in Modern Iran
5 units, Win (Milani)
POLISCI 247T. The Politics of the European Union
5 units (Wren) not given 2004-05
POLISCI 247U. Electoral and Party Politics in Developed Democracies
5 units (Wren) not given 2004-05
POLISCI 346S. The Logic of Authoritarian Government
5 units, Win (Haber)

COMPARATIVE CULTURE AND SOCIETY (CCAS)
INTNLREL 103. History, Memory, and Cultural Discourse in Germany, Austria, and Israel—Comparative, theoretical, and interdisciplinary approach to literary, visual, and cinematic representations and appropriations of WW II, the Holocaust, and the founding of Israel. The relationships among representation, memorialization, and cultural and political discourses: what are the implications of different modes of historical representation? How can the memory boom of the 90s and the beginning of the 21st century be explained? How does this interest in history and memory relate to cultural globalization?
5 units, Win (Essel)
INTNLREL 111. Education for All? The Global and Local in Public Policy Making in Africa—(Same as IPS 211.) Although international institutions, national governments, and non-governmental organizations agreed in 1990 to promote education for all within a decade, the goal has not been achieved. The need in Africa is great but education systems are underfunded and overstressed, schools are crowded and poorly equipped, and teachers are overburdened and underprepared. Focus is on policy making in Africa and the intersection of policy processes and their political and economic dimensions. Case studies. GER:4a
5 units, Win (Essel)
INTNLREL 140B. International Criminal Court and Tribunals—(Same as IPS 240B.) International criminal law as an instrument of human rights policy since the end of the Cold War. The growing corpus of law and policy including treaties, declarations, conventions, and customary law. Ethical and political implications of international criminal courts and tribunals for notions of sovereignty; the legal implications for universal human rights standards of non-Western national politics, and religious and cultural practices; and the use by some nations of universal jurisdiction within domestic courts to prosecute crimes that take place outside sovereign boundaries.
5 units (Stacy) not given 2004-05

INTNLREL 140C. The U.S., U.N. Peacekeeping, and Humanitarian War—(Same as IPS 240C.) The U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter’s provisions on the use of force, origins and evolution of peacekeeping, reasons for peace making and enforcement in the 90s, and debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia, Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan.
5 units, Spr (Patenaude)

INTNLREL 140D. International Human Rights Law: Cultural Exceptions and Enforceability—(Same as IPS 240D.) The expansion of international human rights law. How nation states exempt themselves from applying international human rights standards because of cultural exceptions such as religious and traditional practices, forced and juvenile marriages, child labor, abortion, environmental standards, and property rights. How international human rights treaties are made; how nation states represent their cultural views. The effects of treaty reservations; legal processes for compliance and enforcement. Other mechanisms of inducement or coercion to produce compliance. How regional legal systems handle cultural difference and enforcement.
5 units, Win (Stacy)

INTNLREL 141B. Camera as Witness: International Human Rights Documentaries—(Same as HUMNTIES 197B, SLAVGEN 197B.) Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics.
5 units, Win (Bojic)

INTNLREL 141C. Camera as Witness: A Forum for Global Dialogue—(Same as HUMNTIES 197C, SLAVGEN 197C.) Challenges facing film makers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and film maker roles as artists, activists, and journalists
5 units, Spr (Bojic)

INTNLREL 161A. Global Human Geography: Asia and Africa—(Same as IPS 261A, HISTORY 101A.) Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes.
GER:3b,4a
5 units, Aut (M.W. Lewis)

INTNLREL 161B. Global Human Geography: Europe and Americas—(Same as IPS 261B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.
GER:3b,4a
5 units, Win (M.W. Lewis)

INTNLREL 166. Russia and Islam—(Same as IPS 266.) Seminar. Focus is on 1985 to the present. The policies of Gorbachev toward the Muslim populace of the Soviet Union; how post-communist Russia under Yeltsin and Putin has dealt with its Muslim minorities; and the relationship of Russia to the newly independent states of Central Asia and the South Caucasus after the breakup of the USSR in 1991. The two wars Russia has fought with secessionist Chechnya.
GER:4a
5 units, Aut (Dunlop)

INTNLREL 205. Ethics, Technology, and International Relations—For description, see “Comparative Political and Historical Analysis” subsection above.
5 units, Spr (McGinn)

COMPARATIVE INTERNATIONAL POLITICAL ECONOMY (CIPE)

INTNLREL 122A. The Political Economy of the European Union—(Same as IPS 222A.) EU institutions, the legislative process, policies, relations with the U.S., and enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU constitutional convention.
5 units, Win (Crombez)

INTNLREL 130. Science, Technology, and Development—(Same as IPS 230.) Global and sociopolitical perspective. The rates of global expansion of science, technology, and information technology, comparing nations and world religions. The social impact of these trends, primarily concerning economic development and notions of progress (democratization, human rights, welfare of local populations, and national security). Current discussions regarding globalization, science and technology policy, development, commodification of the public good, and social change. The implications of science and technology globalization, as they shape the diverging trajectory of nation states worldwide. WIM
5 units, Aut (Drori)

INTNLREL 135. Environment and Growth in Developing Countries—Seminar. The environmental and development policies of eight developing countries as they cope with the pressures of economic growth, pollution, and resource depletion. Countries include China, India, Nigeria, and Brazil; class chooses four more. WIM
5 units, Aut (Rosencranz)

INTNLREL 149. The Economics and Political Economy of the Multilateral Trade System—(Same as IPS 249.) The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations.
5 units, Win (Josling)

INTRODUCTION TO THE HUMANITIES PROGRAM

Director: Orrin W. Robinson III
Assistant Vice Provost and Associate Director: Cheri Ross
Department Offices: Building 250, Room 251J
Mail Code: 94305-2020
Department Phone: (650) 723-0944
Email: ihum@vue.stanford.edu
Web Site: http://ihum.stanford.edu

COURSES

INTRODUCTION TO THE HUMANITIES

Students enrolled in Introduction to the Humanities courses satisfy, in two parts, the Area 1 requirement by pairing a one quarter, introductory course in Autumn Quarter with a two quarter, thematic sequence in Winter and Spring quarters. The Autumn Quarter introductory courses hone skills in humanistic disciplines through close reading and critical investigation of a limited number of works as preparation for further work in the humanities and, specifically, for any one of the Winter-Spring thematic sequences.

AUTUMN

IHUM 46. Visions of Mortality—If you are reading this sentence, you are now alive. If so, someday you will die. The basic issues arising from these two facts beginning with the most fundamental questions arising from the first-person confrontation with thoughts of our own mortality. Is death bad for a person, and if so, why? What can the badness or the indifference of death tell us about what makes life good? If death is the permanent end of existence, does this make human choices arbitrary and life meaningless? GER: 1a
5 units, Aut (Bobonich, Koenig)

IHUM 47. Citizenship—Conceptions of citizenship propounded by major thinkers from different times and places, and how citizenship has actually functioned in different political systems. What did citizenship mean for imperial China; in the classical Greek polis; and for the theorists of the modern nation state? What does citizenship mean in contemporary America and how have debates about the nature of citizenship in the U.S. been informed by earlier discussions? Is citizenship being transformed by globalization and other modern developments which seem to weaken the hold of the state? GER: 1a
5 units, Aut (Casper, Krasner, Saldívar)

IHUM 53. Thinking with Nature—Thinking about the place of human beings in the natural world is influenced by values, beliefs, and cultures, all of which change over time. How five modern writers represent and conceptualize the natural world, and how human beings include themselves as part of the natural world or define themselves against it. GER: 1a
5 units, Aut (Nightingale, White)

IHUM 54. Body Language: Spirits in the Material World—The connection between self and body. Does one need a body to have a self? If having a body and a self are not the same thing, how are they connected? How do media, social, and scientific transformations affect understanding of the person? How do people already live in multiple bodies? Classic concerns in literary, scientific, and cultural works; historical and philosophical background of ideas about the body; current debates about the nature of human experience. GER: 1a
5 units, Aut (Lenoir, Shanks)

IHUM 55. The Literature of Crisis—Most human lives contain major turning points or crises that transform an individual’s future development. Classical, medieval, and Renaissance texts illustrate crises in the lives of authors and characters as well as cultural crises that have altered the course of human history. Emphasis is on the conceptual framework to understand and cope with crisis. GER: 1a
5 units, Aut (Evans, McCall)

IHUM 56. Old World Encounters: Civilizations in Dialogue Before the Modern Age—Five moments of intellectual encounter among the far-flung civilizations of the eastern hemisphere in the premodern and early modern eras. Readings are landmark works of cultural translation and ethnographic analysis, penned by scholar travelers from across the old world, and associated with large-scale cultural movements that refashioned the human landscapes of the eastern hemisphere. GER: 1a
5 units, Aut (Lewis, Wigen)

IHUM 60. Sex: Its Pleasures and Cultures—How the pleasures of sex have been shaped. Focus is on enjoyment more than dangers and hygiene. Historical relativity in forms of sexual pleasure; theories contrasting stable biological dispositions with changing contexts of sexual forms; legitimate and illegitimate forms of sexuality, past and present; and whether there is a need for restraints to sexual behavior that cross historical boundaries. Multiple forms of sexual pleasure. Concepts and images from different cultural traditions. GER: 1a
5 units, Aut (Fonrobert, Giumbrecht)

IHUM 61. The Art of Survival—How do men and women survive physically, intellectually, creatively, and spiritually? Survival as represented in works that model strategies to overcome physical deprivation including enslavement, castration, religious persecution, and gender discrimination. How to survive the constraints of gender, race, nation, and history; for what purpose and at what cost does one survive? The possibilities for effecting social and personal change. Genres include drama, fiction, epistolaries, and a slave narrative. GER: 1a
5 units, Aut (H. Elam, M. Elam)

IHUM 62. Conflict, Cooperation, and Human Nature—Forms of social interaction and their relationship with what makes people human. Focus is on the construction of family systems, warfare, and slavery as uniquely human activities. How people manipulate classifications such as the nonhuman in an effort to define a potential spouse, an opponent in war, or a slave. Sources include anthropology, history, and comparative perspectives. GER: 1a
5 units, Aut (Hilde, Jones)

IHUM 63. Freedom, Equality, Difference—Which freedoms should a just society promote and which should be curtailed for the sake of justice? What equalities properly concern government and how can the achievement of equality be reconciled with respect for freedom? What roles should social and political institutions take in guaranteeing freedom and equality? Focus is on interdisciplinary inquiry including political philosophy, education, literature, history, and law. Abstract ideas and case histories, using one to shed light on the other. GER: 1a
5 units, Aut (Callan, Palumbo-Liu, Satz)

445
SCHOOL OF HUMANITIES AND SCIENCES

IHUM 64, Journeys—Works written across a span of 2,300 years from different cultural and historical situations, and in different forms and genres. Each presents an essential aspect of the shared human journey and the moral, spiritual, and emotional passages that challenge and transform people as they advance toward what the poet Thomas Gray called the inevitable hour. The penetration of their vision and the power of their art. GER:1a
5 units, Aut (Wolff, Yearley)

WINTER-SPRING SEQUENCES

IHUM 2,3. Epic Journeys, Modern Quests—Great texts (religious, philosophical, and literary) that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds, and on its transformations or abandonment in modernity. Compares conceptions of the afterlife. How traditions about the afterlife are created and appropriated. The diminished importance of the dead and the increased emphasis on the power of the living in literary genres. GER:1b,1c (two quarter sequence)

IHUM 2. 5 units, Win (Harrison, Jacoff)
IHUM 3. 5 units, Spr (Edelstein, Landy)

IHUM 8A,9A. Myth and Modernity: Culture in Germany—The tension between tradition and progress through an examination of German cultural history. The experience of modernity typically involves overcoming or denying the past, but that same past can return to haunt the present in the form of myths. The interplay of myth and modernity, the irrationality of narrative, and the reason of progress, through the example of German culture, especially in literature, from the heroic epics of the medieval era through the catastrophes of the last century. GER:1b,1c (two quarter sequence)

IHUM 8A. 5 units, Win (Berman)
IHUM 9A. 5 units, Spr (Eshel, Strum)

IHUM 20A,B. Anatomies of Change—The persistent reappearance of interdisciplinarity from the classical to the present. How texts provide the terms for interdisciplinary methods of interpretation. Readings cross disciplinary boundaries to encompass intellectual, social, literary, ethical, and artistic concerns. How ideas become established, what their intellectual and social boundaries are, and what historical pressures break boundaries down. GER:1b,1c (two quarter sequence)

IHUM 20A. 5 units, Win (Rayner)
IHUM 20B. 5 units, Spr (Brooks)

IHUM 23A,B. The Fate of Reason—the fate of Socrates’ proposal that answers to problems about what to believe and how to act should be guided by reason. The fate of reason in different cultural traditions. The basis for commitments about how to live, God, the world, and people’s place within it. The power of reason to improve lives versus the notion that rational principles demand too much or are insufficient to reach important truths. GER:1b,1c (two quarter sequence)

IHUM 23A. 5 units, Win (Bobonich)
IHUM 23B. 5 units, Spr (Wood)

IHUM 27A,B. Encounters and Identities—The formation of ideas about individual and collective identities in S. Africa, W. Europe, and the U.S. Contemporary ideas about identity, including national, racial, ethnic, and gender identity; historical encounters and social transformations linking these areas. Challenging popular assumptions about the origins of identities through similarities and differences among ideas of individual and collective identity in different regions of the world. GER:1b,1c (two quarter sequence)

IHUM 27A. 5 units, Win (Ferguson)
IHUM 27B. 5 units, Spr (Yanagisako)

IHUM 28A,B. Poetic Justice: Order and Imagination in Russia—The difference between justice and law in 19th- and 20th-century Russian writers. Focus is on the notion of poetic justice: the artistic representation of order whether divine, natural, or human. Goal is to heighten awareness of familiar narratives, mythologies, ideas, and images, and to convey a sense of a long-established national culture with its own dynamic vision. GER:1b,1c (two quarter sequence)

IHUM 28A. 5 units, Win (Safran)
IHUM 28B. 5 units, Spr (Budagkowa, Freidin)

IHUM 31A,B. Ancient Empires—A decisive place and period in world history: Mediterranean basin from 800 B.C. to 400 A.D. Great empires (Assyria, Persia, Macedonia, and Rome) were carved out in bloody wars and permanently changed the course of human development. Why did these empires arise when and where they did, how did they work, and what is their legacy? Their economic, religious, and artistic achievements are balanced against their records of genocide, enslavement, and brutal warfare by examining the rich evidence surviving from ancient literature and archaeology, and tracing the roles of religion, property, and freedom across these centuries, and what they mean for the shape of the world today. GER:1b,1c (two quarter sequence)

IHUM 31A. 5 units, Win (Morris)
IHUM 31B. 5 units, Spr (Scheidler)

IHUM 37A,B. Literature into Life: Alternative Worlds—The genres of poetry, drama, and fiction from the Renaissance to the present day, focusing on the relationship between art and life. How does literature come alive on the page? What goes into a vivid representation of lived social experience? How do writers respond to historical crises? Parallel cases from art and music. GER:1b,1c (two quarter sequence)

IHUM 37A. 5 units, Win (Riggs)
IHUM 37B. 5 units, Spr (Felstiner)

IHUM 38A,B. Roots and Routes: Narrative Geographies of the Americas—Colonialism, transnationalism, migration and immigration, and gender and language in the Americas through novels and shorter pieces from the Latin American, Chicano/a, and Latino/a traditions. GER:1b,1c (two quarter sequence)

IHUM 38A. 5 units, Win (Brotherston, Rosa, Yarbro-Bejarano)
IHUM 38B. 5 units, Spr (Brotherston, Rosa, Yarbro-Bejarano)

IHUM 68A,B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present—Challenges facing the world’s religions in responding to issues such as globalization, feminism, science and technology, individualism, and the demand for pluralism. How to think about these issues through the study of Judaism, Christianity, and Buddhism. How they changed or refused to change in their early histories, and the encounter between religion and the forces of change in the world today. GER:1b,1c (two quarter sequence)

IHUM 68A. 5 units, Win (Eisen, Gregg)
IHUM 68B. 5 units, Spr (Bielefeldt, Eisen)

PROGRAM IN STRUCTURED LIBERAL EDUCATION

Track Chair: Mark Mancell (History)

Structured Liberal Education (SLE) offers students an intensive, three quarter, residence-based learning experience, which simultaneously satisfies the Area 1 requirement, the University first-year writing requirement, and one General Education Requirement in the humanities (GER:3a).

SLE encourages students to live a life of ideas in an atmosphere that stresses critical thinking and a tolerance for ambiguity. The residence hall is the informal setting for lectures and small-group discussions. SLE instructors work closely with students and participate in dorm life. SLE enhances the classroom experience with other residence-based educational activities: a weekly film series throughout the year and a student-produced play each quarter.

SLE students receive intensive and individualized writing instruction from a team of instructors and peer writing tutors. See the “Structured Liberal Education” section of this bulletin.

10 units, Aut, Win, Spr (Mancell, Staff)
TAUBE CENTER FOR JEWISH STUDIES

Program Directors: Aron Rodrigue, Steven Zipperstein
Academic Advisory Committee: Zachary Baker (Stanford University Libraries), Joel Beinin (History), Arnold Eisen (Religious Studies), Amir Eshel (German Studies), John Felstiner (English), Charlotte Fonrobert (Religious Studies), Adriane Leveen (Religious Studies), Mark Mancall (History), Norman Naimark (History), Jack Rakove (History), Aron Rodrigue (History), David Rosenhan (Law; emeritus), Gabriella Safran (Slavic Languages and Literatures), Vered Shemtov (Division of Language and Literature), Peter Stansky (History), Amir Weiner (History), Steven Zipperstein (History)

Center Offices: Building 240, Room 103
Mail Code: 94305-2190
Phone: (650) 723-7589
Email: jewish.studies@stanford.edu
Web Site: http://www.stanford.edu/dept/jewishstudies/

Courses in Jewish Studies have the subject code JEWISHST. For a complete list of subject codes, see Appendix.

The Taube Center for Jewish Studies investigates all aspects of Jewish life in history, literature, language, and culture from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Taube Center for Jewish Studies. Details about the written procedures and documents necessary for application for an individually designed major can be obtained at the Undergraduate Advising Program, Sweet Hall, first floor, (650) 723-2426.

REQUIREMENTS

The faculty members in Jewish Studies have designed the following structure for the major:

<table>
<thead>
<tr>
<th>Category</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>History and Society:</td>
<td></td>
</tr>
<tr>
<td>Students must take one course in each of the three periods:</td>
<td></td>
</tr>
<tr>
<td>biblical and ancient, medieval and modern, and contemporary</td>
<td>20</td>
</tr>
<tr>
<td>Religion:</td>
<td></td>
</tr>
<tr>
<td>Biblical, rabbinic, medieval, modern</td>
<td>20</td>
</tr>
<tr>
<td>Literature:</td>
<td></td>
</tr>
<tr>
<td>Hebrew, Holocaust, American Jewish</td>
<td>15</td>
</tr>
<tr>
<td>Hebrew Language (second year or beyond):</td>
<td></td>
</tr>
<tr>
<td>Students who demonstrate by examination that they have completed the equivalent of at least two years of university-level Modern Hebrew may apply the 12 units required in this category to more work in one or the other categories required by the major, with the approval of their primary adviser.</td>
<td>12</td>
</tr>
<tr>
<td>Ancillary Courses:</td>
<td></td>
</tr>
<tr>
<td>Ancient history, medieval history, modern European history, history of philosophy, Islam, Christianity</td>
<td>8-10</td>
</tr>
<tr>
<td>Total number of units required</td>
<td>75-77</td>
</tr>
</tbody>
</table>

Students planning an Individually Designed Major in Jewish Studies are also strongly urged to write an honors thesis. Students interested in majoring in Jewish Studies should discuss this with their adviser(s) when discussing the major itself. Up to 10 honors thesis units may be included in the major.

No course proposed for the major may be counted as fulfilling more than one required category in the proposed major. Transfer credits from other universities must be approved by the appropriate Stanford authorities.

MINORS

The Jewish Studies minor is open to students in any department who wish to enrich their studies through an acquisition of knowledge in Jewish history, thought, religion, literature, and society. Students must complete their declaration of the minor no later than the last day of the quarter four quarters before degree conferral. For example, a student graduating in Spring Quarter must declare the minor no later than the last day of Spring quarter of the junior year.

Students must complete six courses for a maximum of 36 units toward the minor. All courses of study should be discussed and approved by a Jewish Studies faculty member in the departments of English, History, or Religious Studies, and by the program director. In addition to suggested introductory courses, students are also encouraged to take courses in Hebrew language as part of their Jewish studies minor, and are granted credit toward the minor for up to 5 units of language study. Any variations on the minor requirements must be approved in advance by the Director of the Program in Jewish Studies.

Courses credited toward the minor must be distributed as follows:

1. Three introductory courses at the 100 level or below in the fields of history, religious studies, literature, or Hebrew language (for a maximum of 5 units) or one of the designated introductory courses offered through the Program in Comparative Studies in Race and Ethnicity.
2. Two courses at the 100 level or above from any of the three areas of concentration (history, religious studies, or literature).
3. One seminar or undergraduate colloquium at the 200 level or above in one area of concentration (history, religious studies, or literature).

No course credited toward the Jewish Studies minor may be double counted toward major requirements.
COURSES

HEBREW LANGUAGE COURSES

The following courses in Hebrew language instruction are offered by the Language Center. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at the Haus Mitteleuropa, see the “Language Center” section of this bulletin.

AMELANG 127. Land and Literature
4 units, Win (Shemtov)

AMELANG 128A,B,C. Beginning Hebrew
4 units, A: Aut, B: Win, C: Spr (Shemtov)

AMELANG 129A,B,C. Intermediate Hebrew
2-4 units, A: Aut (Shemtov), B: Win, C: Spr (Porat)

AMELANG 130A,B,C. Advanced Hebrew
1-4 units, A: Aut, B: Win (Porat) C: Spr (Shemtov)

AMELANG 170A,B,C. Biblical Hebrew
1-4 units, A: Aut (Staff), B: Win (Porat), C: Spr (Staff)

JEWISH STUDIES

JEWISHST 101A,B,C. Beginning Yiddish—Reading, writing, and speaking.
1-5 units, 101A: Aut, 101B: Win, 101C: Spr (Staff)

JEWISHST 199A,B,C/299A,B,C. Directed Reading in Yiddish—(Graduate students register for 299A,B,C.) For intermediate or advanced students.
1-5 units, 199A/299A: Aut, 199B/299B: Win, 199C/299C: Spr (Staff)

3-5 units, Win (Plotkin)

INTERDEPARTMENTAL OFFERINGS

COMPARATIVE LITERATURE

COMPLIT 299. Present Past: History, Fiction, Temporality—(Same as GERLIT 299.)
5 units, Win (Eshel, White)

FEMINIST STUDIES

FEMST 139. Rereading Judaism in Light of Feminism
4-5 units, Spr (Karlin-Neumann)

GERMAN STUDIES

GERGEN 168B. Culture of Terror: Nazi Germany—(Same as COMPLIT 168B.)
4 units, Spr (Berman)

GERGEN 168C. Antisemitism and Anti-Zionism in Postwar Germany
4 units, Aut (Tempel)

HISTORY

HISTORY 12S. Cabaret, Conflict, and a Constitution: The Weimar Republic, 1918-1933
5 units, Spr (Blei)

HISTORY 23S. Beyond the Shtetl: Jews and Poles, 1881-1946
5 units, Aut (Plocker)

HISTORY 65S. Masters, Neighbors, and Victims: The German-Jewish Dialogue from the Enlightenment to Modernity
5 units, Win (Levine)

HISTORY 108. The Spanish Inquisition and the Judaiizers, from the 15th to the 17th Centuries
5 units, Win (Gutwirth)

HISTORY 137/337. The Holocaust
5 units, Win (Rodrigue)

HISTORY 189C. Nationalism, Socialism, and Modern Jewish History
5 units, Aut (J. Frankel)

HISTORY 207D/307D. Other Renaissances: Jewish History, from the 14th to the 17th Centuries
5 units, Aut (Gutwirth)

HISTORY 208A/308A. Medieval Antisemitism
5 units, Win (Buc)

HISTORY 208D/308D. From Ha-Levi to Leon Hebreo: Medieval and Renaissance Jewish Cultures
5 units, Win (Gutwirth)

HISTORY 210/310. Poverty and Charity in Medieval Christianity, Judaism, and Islam
5 units, Aut (Miller)

HISTORY 245E/345E. Artisans, Courtiers, and Rabbis: Jews of Spain in the Middle Ages
5 units, Spr (Gutwirth)

HISTORY 285C/385C. Jews and Muslims
5 units, Aut (Rodrigue)

HISTORY 288B. The History of East European Jews in the Mirror of Literature
5 units, Aut (E. Frankel)

HISTORY 384A. Core in Jewish History, 17th-19th Centuries
4-5 units, Aut (Rodrigue)

HISTORY 384B. Core in Jewish History, 20th Century
4-5 units, Spr (Zipperstein)

HISTORY 387B. Research Methods in Jewish Studies
4-5 units, Win (Z. Baker)

HISTORY 485A. Modern Jewish History
4-5 units, Win (Zipperstein)

RELIGIOUS STUDIES

RELIGST 112. Handmaids and Harlots
5 units, Win (Leveen, Pitkin)

RELIGST 133. Reading the Bible Today
4 units, Win (Leveen)

RELIGST 166/266. Eastern European Jewish Mysticism: The Hasidic Movement
4 units, Spr (Rapoport-Albert)

RELIGST 185. Prophetic Voices of Social Critique
4 units, Spr (Leveen)

RELIGST 221/321. Modern Judaism
5 units, Spr (Eisen)

RELIGST 225. The Secrets of the Dead Sea Scrolls
4 units, Win (Shemesh)

RELIGST 232. God: A Biography
4 units, Aut (Leveen)

RELIGST 325. Readings from the Literature of Hasidism
3-5 units, Spr (Rapoport-Albert)

SLAVIC STUDIES

SLAVGEN 122. Yiddish Literature
5 units, Spr (Safran)
The Stanford Language Center was created to oversee all language instruction at Stanford. The Center’s charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford’s language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages.

UNDERGRADUATE PROGRAM
MINOR IN MIDDLE EASTERN LANGUAGES, LITERATURES, AND CULTURES

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to the Arabic and Hebrew languages, as well as an introduction to the cultures and civilizations of the Middle East. Contact the minors adviser before declaring (khalil@stanford.edu).

Students declaring a minor must do so no later than the last day of the fourth quarter before degree conferral. For example, students graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of their junior year. If a student is not able to meet this deadline, he or she may petition the Language Center director and request a revised declaration date, which may be granted at the director’s discretion.

The requirements for a minor in Middle Eastern Languages, Literatures, and Cultures are:
1. Completion of six courses in either Track A, Cultural Studies, or Track B, Language Studies.
2. Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
3. All courses must be completed with a letter grade of ‘C’ or better.
4. Courses may not overlap with those taken for a major course of study.
5. Courses taken which also fulfill a GER count toward fulfilling both minor and GER requirements.
6. Students pursuing Track B, Language Studies, must complete the prerequisite of Beginning Arabic or Hebrew, or demonstrate equivalent competence.

CULTURAL STUDIES TRACK

Requirements are:
1. Successful completion of the prerequisite, Beginning Arabic (or Hebrew), or a demonstrated equivalent competence.
2. Completion of three of the AME Program courses from Appendix A.
3. Completion of three courses from Appendix B, or two courses from Appendix B and one course from Appendix A and one from Appendix B.

Course No. and Subject* Units

Appendix A:
AMELANG 50. Reading Hebrew 4
AMELANG 127. Land and Literature 4
AMELANG 161. The Contemporary Arab World through Literature and Culture 4
AMELANG 162. Contemporary Arab Women Writers and Issues† 4
AMELANG 163. The Arab World through Travel Literature† 4
AMELANG 195. B.C. Readings in Arabic Literature 2-4

Appendix B:
HISTORY 187. Palestine, Zionism, and the Arab-Israeli Conflict 5
HISTORY 289C. Problems in the History of Zionism and the State of Israel 5

* Consult minor adviser for more options.
† Units of course work earned from GER courses listed in the Language track and Cultural Studies track may be used to fulfill the unit requirements for the minor.

LANGUAGE TRACK

Requirements are:
1. Successful completion of the prerequisite, Beginning Arabic (or Hebrew), or a demonstrated equivalent competence.
2. Completion of one year of language study at the intermediate level (AMELANG 121A,B,C for Arabic, or AMELANG 129A,B,C for Hebrew).

3. Completion of three courses from Appendix B.

**GRADUATE PROGRAM**

**PH.D. MINOR IN APPLIED LINGUISTICS**

The Ph.D. minor in Applied Linguistics has been designed to give students the opportunity to examine and explore language as it pertains to teaching, learning, translation, education, and language policies.

The Ph.D. minor requires the completion of no less than 30 units of unduplicated course work. Course work must include LINGUIST 201 (Foundations of Linguistic Analysis, 4 units). At least one additional Linguistics course must also be taken. Courses taken for the minor must be incremental units beyond those used to satisfy the major (with the exception of Linguistics 201 for Linguistics students). At least 20 of the 30 units must be at the 200 level or above. Students may also supplement their Applied Linguistics training with an array of courses from the departments of Cultural and Social Anthropology, Linguistics, and Spanish and Portuguese.

Overlapping applied linguistics concentrations are available in Learning, Teaching, and Translation of Second Languages; and in Educational and Policy Applications of Linguistics.

Some suggested courses relevant to each track are listed below the track description; a more complete listing of courses which are appropriate for the minor can be found on the Language Center’s web site at http://language.stanford.edu/.

Students in either track should develop a program of study in consultation with an academic adviser and submit the proposed program of study for approval by the Applied Linguistics Steering Committee.

**THE LEARNING, TEACHING, AND TRANSLATION OF SECOND LANGUAGES TRACK**

This overall program concentration requires general reading in second language acquisition (SLA) and/or translation while offering students course work in the following areas:

1. Second language acquisition in instructed contexts
2. Elements of curricular design for university and college settings
3. The acquisition of second language literacy
4. The use of technology to enhance student performance
5. Linguistics and the teaching of foreign languages
6. Theoretical foundations in the translation of various languages

**COURSES**

Offerings in this section are ordered as follows:

- Applied Linguistics (APPLLING)
- African and Middle Eastern Languages (AMELANG)
- Chinese (CHINLANG)
- English for Foreign Students (EFSLANG)
- French (FRENLANG)
- German (GERLANG)
- Italian (ITALLANG)
- Japanese (JAPANLANG)
- Korean (KORELANG)
- Portuguese (PORTLANG)
- Russian (SLAVLANG)
- Spanish (SPANLANG)
- Special Languages (SPECLANG)

Students interested in either general courses concerning languages, cultures, and literatures, or in advanced study of language and literature should consult the following departments and subject codes:

- Asian Languages (CHIN, CHINLIT, JAPANGEN, JAPANLIT)
- French and Italian (FREN, FRENLANG, ITAL, ITALLANG)
- German Studies (GER, GERLANG)
- Spanish and Portuguese (SPANLIT, PORTLIT)
- Slavic Languages and Literatures (SLAV, SLAVLANG)

**APPLIED LINGUISTICS (APPLLING)**

- **APPLLING 200. Teaching of Second Language Literatures**—(Same as GERLIT 200.) Focus is on literacy development in a second language, emphasizing literacy texts, and assessing the learners’ second-language linguistic level and requisite background knowledge with regard to particular literary texts. Instructional strategies and feedback techniques for written and oral work.
  - 3 units, Spr (Bernhardt)

- **APPLLING 201. The Learning and Teaching of Second Languages**—(Same as GER 201.) Teaching second languages from a learning perspective, rather than traditional teaching methods. Focus is on instructional decision making within the context of the students’ intellectual and linguistic development in university settings to different populations. Readings in second language acquisition.
  - 3 units, Spr (Bernhardt)

  - 3 units Spr (Kautz)

- **APPLLING 203. Issues and Methods in the Teaching of Heritage Languages**—(Same as SPANLIT 300.) Teaching Spanish to students raised in Spanish-speaking homes. Issues include language variation in the Spanish-speaking world, English/Spanish bilingualism in the U.S., and second dialect acquisition. Techniques for developing the academic Spanish language skills of heritage students.
  - 3-5 units (Valdés) not given 2004-05

- **APPLLING 297. Directed Reading**—See instructor for section number.
  - 1-4 units, Aut, Win, Spr (Staff)

**AFRICAN AND MIDDLE EASTERN LANGUAGES AND LITERATURES (AMELANG)**

The African and Middle Eastern Languages and Literatures Program offers a number of languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for 2004-05 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2005-06 academic year should be made by Spring Quarter of this year at the AME Program office, Building 40, Room 42B.
AMELANG 100A,B,C. Beginning Amharic
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 101A,B,C. Intermediate Amharic
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 102A,C. Advanced Amharic
3 units, A: Aut, C: Spr (Staff)

AMELANG 106A,B,C. Beginning Swahili
4 units, A: Aut, B: Win, C: Spr (Muaka)

AMELANG 107A,B,C. Intermediate Swahili
2-4 units, A: Aut, B: Win, C: Spr (Muaka)

AMELANG 108A,B,C. Advanced Swahili
2-4 units, A: Aut, B: Win, C: Spr (Muaka)

AMELANG 109A,B,C. Beginning Yoruba
4 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 110A,B,C. Beginning Arabic
3 units, A: Aut, B: Win, C: Spr (Salti)

AMELANG 111A,B,C. Intermediate Arabic
2-5 units, A: Aut, B: Win, C: Spr (Salti)

AMELANG 112A,B,C. Advanced Arabic
2-5 units (Salti) not given 2004-05

AMELANG 120A,B,C. Beginning Arabic
5 units, A: Aut, B: Win, C: Spr (Barhoum, Salti)

AMELANG 121A,B,C. Intermediate Arabic
2-5 units, A: Aut, B: Win, C: Spr (Salti)

AMELANG 122A,B,C. Advanced Arabic
2-5 units (Salti) not given 2004-05

AMELANG 127. Land and Literature—Israel has captured the imagination of writers throughout the generations. It has been portrayed as promised land, holy land, homeland, empty land, occupied land, and land of dreams. Ideological views and political events have shaped writers’ conception of Israel. Readings include poems and prose by Hebrew/Israeli authors in translation, and theoretical texts about place and literature. No knowledge of Hebrew required. GER:3a,4a
4 units, Win (Shemtov)

AMELANG 128A,B,C. Beginning Hebrew
4 units, A: Aut, B: Win, C: Spr (Shemtov)

AMELANG 129A,B,C. Intermediate Hebrew
2-4 units, A: Spr (Shemtov), B: Win, C: Spr (Porat)

AMELANG 130A,B,C. Advanced Hebrew
1-4 units, A: Aut, B: Win (Porat) C: Spr (Shemtov)

2 units (Shemtov) not given 2004-05

AMELANG 132. The Contemporary Arab World and Culture through Literature—Introduces the Arab world through a survey of literary genres including novels, short stories, and poetry, providing a glimpse of contemporary Arab society and culture. Readings from prominent authors, dealing with dominant cultural topics such as gender and women, kinship and social concepts, nationalism, and religion. Texts delineating the cultural uniqueness of the Arab world include works by Naguib Mahfouz, Nawal El-Saadawi, Ghassan Kanafani, Tayeb Salih, Etell Adnan, and short stories and poetry. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:3a,4a
4-5 units, Aut (Barhoum)

AMELANG 162. Arab Women Writers and Issues—Fiction and non-fiction works by prominent Arab women writers, with analysis of the main cultural factors contributing to the shaping of their dominant feminist conceptions and attitudes. Readings: Fatima Mernissi, Nawal El Saadawi, Etel Adnan, Hanan al-Shaykh, Alifa Rifaat, and Sahar Khalifeh. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:3a,4c
4-5 units, Win (Barhoum)

AMELANG 163. The Arab World through Travel Literature—Western colonialist and postcolonialist portrayals of Arab culture and recent critical examinations of stereotypical depictions of Arabs and Islam. Readings include Flaubert in Egypt, Guests of the Sheik, Justine, Covering Islam, Nine Parts of Desire, and Motoring with Mohammed. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment GER:3a,4a
4-5 units, Spr (Barhoum)

AMELANG 170A,B,C. Biblical Hebrew—The basic lexicon and grammar of Hebrew of the Tanakh or Old Testament. Emphasis is on learning to read original Biblical materials.
1-4 units, A: (Staff), B: Win (Porat), C: Spr (Porat, Staff)
CHINESE LANGUAGE COURSES

FIRST- AND SECOND-YEAR LANGUAGE

Students registering for the first time in a first- or second-year course must take a placement test if they have had any training in Chinese before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 22, 2004. Consult the Language Center or http://language.stanford.edu/ for further information.

CHINLANG 1,2,3, First-Year Modern Chinese—Conversation, grammar, reading, elementary composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements.
5 units, 1: Aut; 2: Win; 3: Spr (Zeng, Staff)

CHINLANG 1B,2B,3B, First-Year Modern Chinese for Bilingual Students—For students with elementary comprehension and speaking skills who need work on conversation, grammar, reading, and composition.
3 units, 1B: Aut; 2B: Win; 3B: Spr (Rozelle, Lin)

CHINLANG 5, Intensive First-Year Modern Chinese—(Graduate students register for 5A.) Equivalent to 1,2,3 combined. Five weeks at Stanford and four weeks at Peking University.
8 units, Sum (Staff)

CHINLANG 6,7,8, Beginning Conversational Chinese—Three quarter sequence equips students with basic language skills in Mandarin to function abroad.
2 units, 6: Aut; 7: Win; 8: Spr (Rozelle, Staff)

CHINLANG 10,11,12, Beginning Southern Min (Taiwanese) Conversation—Three quarter sequence equips students with the basic language skills needed in everyday life situations.
2 units, 10: Aut; 11: Win; 12: Spr (Lin)

CHINLANG 15,16,17, Beginning Cantonese Conversation—Three quarter sequence equips students with the basic language skills needed in everyday life situations.
2 units, 15: Aut; 16: Win; 17: Spr (Dennig)

CHINLANG 18,19,20, Intermediate Cantonese Conversation—Continuation of CHINLANG 17.
2 units, 18: Aut; 19: Win; 20: Spr (Dennig)

CHINLANG 20A,B,C, Advanced Cantonese Conversation—Improving Cantonese through Hong Kong movies.
2 units, A: Aut; B: Win; C: Spr (Dennig)

CHINLANG 21,22,23, Second-Year Modern Chinese—Further study in grammar, reading, conversation, composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: 3 or equivalent.
5 units, 21: Aut; 22: Win; 23: Spr (Chung)

CHINLANG 21B,22B,23B, Second-Year Modern Chinese for Bilingual Students—For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Equivalent to 21,22,23.
3 units, 21B: Aut; 22B: Win; 23B: Spr (Zhu)

CHINLANG 25, Intensive Second-Year Modern Chinese—(Graduate students register for 25A.) Equivalent to 21,22,23 combined. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 3 or equivalent.
8 units, Sum (Staff)

CHINLANG 27,28,29, Intermediate Chinese Conversation—Prerequisite: 3 or consent of instructor.
2 units, 27: Aut; 28: Win; 29: Spr (Staff)

CHINLANG 99, Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

ADVANCED LANGUAGE

CHINLANG 101,102,103, Third-Year Modern Chinese—Goal is to further communicative ability in Chinese through contact with written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study. Prerequisite: 23 or equivalent.
5 units, 101: Aut; 102: Win; 103: Spr (Wang)

CHINLANG 101B,102B,103B, Third-Year Modern Chinese for Bilingual Students—For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Equivalent of 101,102,103.
3 units, 101B: Aut; 102B: Win; 103B: Spr (Wang)

CHINLANG 105, Intensive Third-Year Modern Chinese—(Graduate students register for 105A.) Equivalent to 101,102,103 combined. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 23 or equivalent.
8 units, Sum (Staff)

CHINLANG 121,122,123, Advanced Chinese Conversation—Prerequisite: 23 or equivalent.
2 units, 121: Aut; 122: Win; 123: Spr (Chung)

CHINLANG 131,132,133, Business Chinese—Commercial, economic, and business-related vocabulary. Materials include formal business conversations, newspaper and journal articles, and TV news on trade and economic. Technical language and business etiquette. Student oral and written reports on their own research regarding recent economic developments, using sources in China. Prerequisite: 23 or equivalent.
3-4 units, 131: Aut; 132: Win; 133: Spr (Wang)

CHINLANG 200, Directed Reading—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

CHINLANG 211,212,213, Advanced Modern Chinese—Year-long sequence. Goal is to become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, scholarly journals, and the Internet. Cultural and social science themes: students may take both themes for 5 units or one theme for reduced units. Prerequisite: three years of Chinese language.
2-5 units, 211: Aut; 212: Win; 213: Spr (Zhu)

CHINLANG 221,222,223, Advanced Modern Chinese for Social Sciences Students—Goal is to become functional speakers, readers, and writers of modern Chinese through articles, essays, newspapers, magazines, and scholarly journals in social sciences. Prerequisite: three years of Chinese.
3 units, 221: Aut; 222: Win; 223: Spr (Staff)

CHINLANG 394, Graduate Studies in Chinese Conversation—Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

CHINLANG 395, Graduate Studies in Chinese—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)
ENGLISH FOR FOREIGN STUDENTS

These courses, numbered from 690-698, represent offerings for non-native speakers in Autumn, Winter, and Spring quarters. Enrollment in one or more courses may be required of, or recommended to, current graduate students from other countries after they have taken the English placement examination. To enroll, students must go to http://www.stanford.edu/group/efs for directions on or before the first day of each quarter.

During the Summer Session, courses in spoken and written English are offered. Two six-week intensive courses are also offered during the summer. Summer visitors must apply directly to the EFS program.

EFSLANG 690A. Interacting in English—Strategies for effective one on one interaction. Emphasis is on functional language, including active listening, asking questions, and building working relationships. Activities include simulation and discussion, with feedback on pronunciation, grammar, and usage.

1-3 units, Aut, Win (Yerian)

EFSLANG 690B. Academic Discussion—The refinement and practice of discussion skills, with attention to pronunciation, grammar, and appropriateness for specific tasks. Preparation for effective participation in the classroom and research group communication. Detailed feedback on pronunciation, grammar, and usage. Prerequisite: 693A or consent of instructor.

1-3 units, Aut, Win, Spr, Summer (Rylance, Staff)

EFSLANG 691. Oral Presentation—For advanced graduate students. Practice in academic presentation skills; strategy, design, organization, and use of visual aids. Focus is on improving fluency and delivery style, with videotaping for extensive feedback on language accuracy and usage. Prerequisite: 695A or consent of instructor.

1-3 units, Aut, Win, Spr, Summer (Yerian, Staff)

EFSLANG 692. Speaking and Teaching in English—For non-native speakers who must teach in English. Focus is on developing clarity, intelligibility, and effectiveness through weekly presentations simulating actual teaching assistant responsibilities.

1-3 units, Aut, Win, Spr, Summer (Yerian, Staff)

EFSLANG 693A. Listening Comprehension—Strategies for effective listening in an academic setting, focusing on identifying key ideas in lectures. Practice in understanding words and phrases commonly encountered in classroom settings. Work with computer-based exercises promotes comprehension of rapid, natural speech.

1-3 units, Aut (Staff)

EFSLANG 693B. Listening and Communication—The development of listening strategies and vocabulary for understanding English in a variety of academic and non-academic contexts. Discussion and interpretation improve comprehension of communicative intent. Computer-based and video exercises, plus an individual project. Prerequisite: 693A or consent of instructor.

1-3 units, Aut, Win, Spr (Shabrami, Staff)

EFSLANG 694. Communication Strategies in Professional Life—For advanced graduate students. Task-based practice of language appropriate for professional settings in industry and related teamwork. Simulation of the roles of manager, applicant, subordinate, and coworker. Prerequisite: 693A, or consent of instructor.

1-3 units, Win, Spr (Shabrami)

1-3 units, Aut, Win, Spr, Summer (Mawson, Staff)

EFSLANG 695B. Advanced Pronunciation and Intonation—Continuation of 695A, focusing on American English sounds, stress, rhythm, and intonation patterns. Emphasis is on self-monitoring, integrated with short presentations. Biweekly tape assignments and tutorials. Prerequisite: 695A.

1-3 units, Aut, Win, Spr, Summer (Mawson)

EFSLANG 698A. Writing Academic English—Preparation of graduate students to write academic papers; emphasis is on fluency, organization, documentation, and appropriateness for specific writing tasks required in course work.

1-3 units, Aut, Win, Spr, Summer (Elliot, Shabrami, Rylance, Staff)

EFSLANG 698B. Advanced Graduate Writing—For graduate students experienced in English writing and currently required to write for courses and research. Class meetings and frequent individual conferences. Prerequisite: 698A.

1-3 units, Aut, Win, Spr, Summer (Hubbard, Staff)

FRENCH LANGUAGE COURSES

FIRST- AND SECOND-YEAR FRENCH

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in French before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 22, 2004. Consult the Language Center or http://language.stanford.edu/ for further information.

Basic French grammar and vocabulary are covered in French 1, 2, and 3. At the completion of 3, students will have acquired beginning-level functional proficiency in understanding comprehension, speaking, reading, and writing in satisfaction of the University foreign language requirement. Students may continue with second-year French courses (22 or 23) or higher level courses upon recommendation of the coordinator.

FRENLANG 1, 2, 3. First-Year French—Basic communicative skills using all-in-French, student-centered approach. Emphasis is on the development of authentic discourse through French texts and videos. Cultural context. Language lab, multimedia, and computer facilities.

5 units, Aut, Win, Spr (Dozer-Rabedeau, Staff)

FRENLANG 5A, 5B. Intensive First-Year French—Completes first-year language sequence in two rather than three quarters. Recommended for students with previous knowledge of French who place into 5A on the placement test. Others should take the regular sequence (1, 2, 3). 5B fulfills the University foreign language requirement. Prerequisite: French placement test and consent of instructor.

5 units, At, Win, B: Win, Spr (Shashko)

FRENLANG 10. First-Year French Conversation—French conversation for students who have completed 2 or equivalent. Emphasis is on the development of authentic discourse. May be repeated once for credit.

2 units, Aut, Win, Spr (Langmuir)

FRENLANG 15. French in Everyday Life—Second-year French. Topics include family, student life, films, theater, fashion, food, and politics.

2 units, Aut, Win, Spr (Langmuir)

FRENLANG 15S. Intermediate Conversation: French in Everyday Life—Same content as 15. Prerequisite: one year of college French or equivalent.

2 units, Summer (Staff)

FRENLANG 20A. France and Francophonie—Second-year French conversation based on themes from the regions of France and the Francophone world. Topics include travel, food, and crosscultural comparisons. Students returning from study abroad programs are encouraged to enroll. Prerequisite: 3 or equivalent.

2 units, Aut (Werlings)

FRENLANG 20B. French Cinema—Second-year French conversation for formal and informal situations. Useful for students planning to travel or study abroad. Prerequisite: 3 or equivalent.

2 units, Spr (Werlings)

FRENLANG 20C. Contemporary French Language—Second-year French conversation based on films. Emphasis is on speaking proficiency. Themes include: French filmmakers, stars, and trends. Film viewing in and outside the class in French. Prerequisite: 3 or equivalent.

2 units, Spr (Werlings)
FRENLANG 22. Second-Year French, Part A—Content-based. Integrates culture and language in the development of authentic discourse. Present and past narration, direct and indirect object pronouns, and pronominal verbs. Combines the study of grammar with discussion of French and Francophone texts. Language lab, multimedia, and computer facilities. Prepares students for advanced courses and for study abroad. Satisfies the foreign language requirement for students majoring in English. Prerequisite: 23 or equivalent, or consent of coordinator.
4-5 units, Aut, Win, Spr (Tsethlikai, Shashko, Staff)

FRENLANG 23. Second-Year French, Part B—Continuation of French 22. Content-based. Future, conditional, and subjunctive. Combines the study of grammar with discussion of French and Francophone texts. Language lab, multimedia, and computer facilities. Prepares students for advanced courses and for study abroad. Satisfies the foreign language requirement for students majoring in International Relations. Prerequisite: 22 or equivalent, or consent of coordinator.
4-5 units, Aut, Win, Spr (Dozer-Rabedeau, Tsethlikai)

FRENLANG 41A,B. Intensive First-Year French—Accelerated. All essential grammar. All-in-French, student-centered method. Written exercises, compositions, conversational practice, and daily work in the language lab. Stanford graduate students restricted to 9 units register for 241A,B.
5-10 units, Sum (Staff)

FRENLANG 50. Reading French—For graduate students or seniors seeking to meet the University reading requirement for advanced degrees. No previous knowledge of French required.
4 units, Aut (Tsethlikai)

FRENLANG 50S. Reading French—Same content as 50.
2-4 units, Sum (Staff)

MAISON FRANÇAISE

Other in-house courses may be announced.

FRENLANG 60A. Beginning French Conversation—(AU)
1 unit, Aut (Staff)

FRENLANG 60B. Intermediate French Conversation—(AU)
1 unit, Win (Staff)

FRENLANG 60C. Intermediate/Advanced French Conversation—(AU)
1 unit, Spr (Staff)

FRENLANG 60D. French Viticulture—(AU)
1 unit, Aut, Win, Spr (Staff)

FRENLANG 60E. French Cooking
1 unit, Aut, Win, Spr (Staff)

FRENLANG 60F. Filmmaking—(AU)
1 unit, Aut (Staff)

FRENLANG 60G. French Poetry—(AU)
1 unit (Staff) not given 2004-05

FRENLANG 60H. French Music—(AU)
1 unit (Staff) not given 2004-05

FRENLANG 60K. Thought for the 21st Century—(AU)
1 unit (Staff) not given 2004-05

FRENLANG 60L. Appreciating French Painting—(AU)
1 unit (Staff) not given 2004-05

FRENLANG 60M. Current French Comedy—(AU)
1 unit, by arrangement (Staff)

FRENLANG 60T. Teaching French Conversation—(AU)
1 unit, Aut, Win, Spr (Staff)

FRENLANG 110. French and Francophone Cultures
2 units, Spr (Staff)

ADVANCED FRENCH

FRENLANG 120. Advanced Conversation: France Today—Third-year conversation. Contemporary issues and topics of general interest. May be repeated for credit after two quarters. Prerequisite: 23 or equivalent.
3 units, Aut, Win, Spr (Werlings)

FRENLANG 121. Introduction to French Texts—Content-based. Major literary figures and themes from medieval times to the present. Prerequisite: 23 or equivalent, or consent of coordinator.
3-4 units (Staff) alternate years, given 2005-06

FRENLANG 122. Introduction to French Culture and Civilization—Content-based. French art, geography, history, political change, and social institutions. Prerequisite: 23 or equivalent.
3-4 units (Staff) alternate years, given 2005-06

FRENLANG 123. French Creative Writing—Creative writing as communication and literature. Model texts introduce students to genres and styles; review of grammar and vocabulary. Discussion of original writing by students. Prerequisite: 23 or equivalent. WIM
3-4 units (Staff) alternate years, given 2005-06

FRENLANG 124. Advanced French Grammar—For majors and other students who plan to enroll in advanced courses. Individual work in the language lab with class time on contextualized activities and textual analysis. Prerequisite: 23 or equivalent.
3-4 units, Win (Staff)

FRENLANG 125. French Phonetics—For majors and other students who plan to enroll in advanced courses. Study and practice of the French language sound system. Designed to improve students’ ability to speak French. Language lab, multimedia, and computer facilities. Prerequisite: 23 or equivalent.
3-4 units, Spr (Palumbo-Liu)

FRENLANG 199. Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

FRENLANG 394. Graduate Studies in French Conversation—Prerequisite: consent of the instructor.
1-3 units, Aut, Win, Spr (Staff)

FRENLANG 395. Graduate Studies in French—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

GERMAN LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in German before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 22, 2004. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST-YEAR GERMAN

GERLANG 1,2,3. First-Year German—Speaking, reading, writing, and listening to German. Authentic materials. Interactive approach with emphasis on developing communicative expression. Introduction to the cultural context in which German is spoken.
5 units, 1,2: Aut, Win (Petig, Strachota), 3: Spr (Staff)

GERLANG 4A,B. Accelerated First-Year German—Completes first-year language sequence in two rather than three quarters. Recommended for students with some previous knowledge of German but open to all students. 4B fulfills the University foreign language requirement.
5 units, 4A: Win, 4B: Spr (Staff)

GERLANG 5A,B. Intensive First-Year German—Equivalent of 1,2,3 combined. Stanford graduate students restricted to 9 units register for 205A,B.
5-10 units, Sum (Staff)
GERLANG 10. Elementary German for Seniors and Graduate Students—Intensive. For students who need to acquire reading ability in German for the Ph.D. and/or for advanced research in their own field.

3-4 units, Win, Sum (Petig)

GERLANG 11P. Individually Programmed Beginning German—For those who wish to complete more or fewer than 5 units a quarter, have scheduling conflicts, or prefer to work independently. Self-paced work on text and tapes; instructor available for consultation on a regular basis. 3-unit minimum for beginners. Conversational practice available for additional unit.

1-12 units, Aut, Win, Spr (Strachota), Spr (Petig)

INTERMEDIATE GERMAN

At this level, students have several options depending on their interests. After completing 3 or equivalent, students may enroll directly in courses at the 200 level which consider special topics in German culture while encouraging additional language learning. Alternatively, 21, 22 emphasize a systematic review of the language, while 21W, 22W study the language of business and international relations, and 100-level courses develop advanced language skills along with a cultural awareness.

3-4 units, Aut (Petig)

GERLANG 21S. Intermediate German—I: Readings in German, and a review of German structure. Discussions in German on readings and topics of current interest. Written exercises and compositions, oral reports, videos. Prerequisite: one year of college German or minimum of two years in high school.

4 units, Sum (Petig)

GERLANG 21W. Intermediate German I: German for Business and International Relations—Equivalent to 21, but focus is on business and the political and economic geography of Germany. Audiotapes and videos. For students planning to do a business internship in a German-speaking country. Prerequisite: 3.

4 units, Aut (Petig)

GERLANG 22. Intermediate German II—Continuation of 21, with greater emphasis on reading and writing skills. Literary texts of major 20th-century writers in historical context.

4 units, Win (Petig)

GERLANG 22W. Intermediate German II: German for Business and International Relations—Equivalent to 22, but continuation of 21W. Recommended for students planning to do a business internship in a German-speaking country. Prerequisite: 21 or 21W.

3-4 units (Petig) not given 2004-05

GERLANG 52. Readings in Humanities—For undergraduates and graduate students with a knowledge of German who want to acquire reading proficiency. Readings from scholarly works and professional journals. Recommended for students who need to pass the Ph.D. reading exam. Prerequisite: one year of German, or 10, or equivalent.

3-4 units, Spr (Petig)

GERLANG 99. Language Specials—Prerequisite: consent of instructor.

1-12 units, Aut, Win, Spr, Sum (Staff)

ADVANCED GERMAN

GERLANG 100. Hundert Deutsche Jahre: One Hundred German Years—Improves German language skills while introducing the history and culture of Germany as experienced by ordinary people over the course of the 20th century. Themes include Germans and democracy, money, Hitler, books, the Wall, and food. Video series, parallel readings, discussion in German. Extra listening, reading, or speaking for fourth unit.

3-4 units (Strachota) not given 2004-05

GERLANG 101. Advanced Language Study I—Short fictional and expository readings, discussions, compositions. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions.

3-4 units, Aut (Staff)

GERLANG 102. Advanced Language Study II—Continuation of 101.

3-4 units, Spr (Staff)

GERLANG 105. Advanced Business German—For students planning to work in a German-speaking country and for preparation of the International Business German exams. Case studies of typical business situations with accompanying videos, listening comprehension exercises, and class simulations. Business correspondence and reports in German. Prerequisite: 22 or equivalent.

4 units, Spr (Petig)

GERLANG 110. German Newspapers—For intermediate and advanced students. Read and discuss three articles a week from current newspapers and magazines, practice reading comprehension strategies with online news updates, and develop vocabulary. Writing practice if desired.

3-4 units, Aut (Strachota)

GERLANG 111. Television News from Germany—For intermediate and advanced students. Watch and discuss current news reports and features. Build listening comprehension and vocabulary. Extra listening, speaking, or writing practice for fourth unit.

3-4 units, Win (Strachota)

GERLANG 199. Individual Reading—Prerequisite: consent of instructor.

1-4 units, Aut, Win, Spr, Sum (Staff)

GERLANG 395. Graduate Studies in German—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

GERLANG 399. Independent Study—Prerequisite: consent of instructor.

1-6 units, Aut, Win, Spr, Sum (Staff)

HAUS MITTELEUROPA

Other in-house courses may be announced.

GERLANG 20A. Beginning German Conversation—(AU)

1 unit, Aut, Win, Spr (Staff)

GERLANG 20B. Intermediate German Conversation—(AU)

1 unit, Aut, Win, Spr (Staff)

GERLANG 20C. Advanced German Conversation—(AU)

1 unit, Aut, Win, Spr (Staff)

GERLANG 20D. German Drama—(AU)

1 unit, Aut (Staff)

GERLANG 20E. Fun Facts about Europe—(AU)

1 unit, Win (Staff)

GERLANG 20F. Introduction to German History—(AU)

1 unit, Spr (Staff)

GERLANG 20G. Europe Through Photographs—(AU)

1 unit, Spr (Staff)

GERLANG 20K. Küche Mitt (German Cooking Class)—(AU)

1 unit, Aut (Staff)

GERLANG 20M. Mitt Movie Series—(AU)

1 unit, Aut (Staff)

GERLANG 20N. Great German and Austrian Composers from J.S. Bach to Alban Berg—(AU)

1 unit, Win (Staff)

GERLANG 20P. European Lifestyles—(AU)

1 unit, Spr (Staff)

455
GERLANG 20Q. Highlights of German Literature—(AU)  
1 unit, Win (Staff)

GERLANG 20S. Speaking German Mitt—(AU)  
1 unit, Win (Staff)

GERLANG 20T. Teaching German Conversation—(AU)  
1 unit, Aut, Win, Spr (Staff)

ITALIAN LANGUAGE COURSES

Because the Italian Language Program does not have a formal placement test, students registering for the first time in a first- or second-year course must see the coordinator for proper placement if they have had any prior training in Italian. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR ITALIAN

ITALLANG 1,2,3. First-Year Italian—Emphasis is on speaking and oral comprehension. Language lab. Second quarter emphasizes reading and writing skills. Third quarter emphasizes cultural and literary readings. 2-5 units, Aut, Win, Spr (Baldocchi, Devine, Gelmetti, Napolitano, Tempesta)

ITALLANG 21,22,23. Second Year Italian—Review of grammatical structures. Reading, writing, and conversational competence through Italian culture, global awareness, and crosscultural understanding. Literary texts, news clippings, film, video, music, and web sites. Language lab. 22 emphasizes translation, stylistics, and composition. Students read an Italian novel by Sciascia in 23. Prerequisite: 3 or equivalent.

ITALLANG 21. 3-4 units, Aut, Win, Spr (Baldocchi, Devine, Gelmetti)  
ITALLANG 22. 3-4 units, Aut, Win, Spr (Devine, Gelmetti)  
ITALLANG 23. 3-4 units, Aut, Win, Spr (Napolitano)

ITALLANG 30. Conversation: Italy Today—For students planning to go to Florence. Films, slide shows, and lectures on Italian culture including opera, modern music, wine, and food. Preview of the Florentine experience. May be repeated for credit after one year. Limited enrollment Prequisite: consent of instructor. Recommended: two quarters of Italian. 3 units, Aut, Spr (Tempesta)

ITALLANG 31. Conversation: Talking about Italy—Open only to students who have studied at the Florence program. Students share their experiences from Florence concerning a favorite Italian wine or city, a favorite author, or movie director. Brief presentation to students in the beginning first-year Italian sequence. Limited enrollment. 3 units, Win (Tempesta)

ITALLANG 32. Italian Language Through Cinema—Use of film sequences to improve communication strategies and review intermediate/advanced grammatical structures. Italian film directors such as Tornatore, Salvatore, and new Italian cinema directors. Emphasis is on movie vocabulary. May be repeated for credit after one year. 3-4 units, Aut (Gelmetti)

ITALLANG 41,A,B,C. Intensive First-Year Italian—Covers 1-3 quarters of Italian. Conversational drills and daily work in language lab. All-in-Italian method. Listening, speaking, writing, and reading. Stanford graduate students restricted to 9 units register for 241A,B,C. 5-15 units, Sum (Staff)

ITALLANG 50. Reading Italian—Open to advanced undergraduates with consent of instructor; primarily for graduate students seeking to fulfill University foreign language requirements for advanced degrees. Accelerated acquisition of reading skills in Italian. 3 units, Win (Devine)

ITALLANG 60. Italian Opera from the Late 18th Century to the Early 20th Century: From Rossini to Puccini—Italian history through the operatic melodramas from the heroic epic of the Risorgimento to the social anguish of Verismo, which brings Italian opera to California as in the Girl of the Golden West by Puccini. Students view many grand operas in class, and attend at least one opera performance. 3-4 units, Aut (Napolitano)

ITALLANG 99. Language Specials—Prerequisite: consent of instructor. 1-5 units, Aut, Win, Spr, Sum (Staff)

ADVANCED ITALIAN

ITALLANG 114. Advanced Stylistics and Composition—Goal is a high level of proficiency in written and spoken Italian. Literary and non-literary texts with textual and grammatical analysis, oral reports, translations, and weekly writing assignments. Prerequisite: 22 or consent of instructor. WIM 3-4 units, Win (Napolitano)

ITALLANG 115. Translation and Composition—Continuation of 114. Emphasis is on composition, writing of short essays, and short stories. Prerequisite: 114 or consent of instructor. WIM 3-4 units, Spr (Napolitano)

ITALLANG 394. Graduate Studies in Italian Conversation—Prerequisite: consent of instructor.

ITALLANG 395. Graduate Studies in Italian—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

CASA ITALIANA

ITALLANG 126. Italy and Italians Today 2 units, Aut, Win, Spr (Staff)

JAPANESE LANGUAGE COURSES

Students registering for the first time in a course must take a placement test if they have had any training in Japanese before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 22, 2004. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR JAPANESE

JAPANLNG 1,2,3. First-Year Modern Japanese—Provides students with a solid foundation in grammar, conversation, reading, and basic composition (150 Kanji characters introduced). 5 units, 1: Aut, 2: Win, 3: Spr (Buchin)

JAPANLNG 7A,8A,9A. First-Year Japanese Language, Culture, and Communication A—Recommended for those who want to build communication skills in limited time. Online listening exercises, audio-visual materials, kanji tutorials. See http://www.stanford.edu/class/japanese7a. 3 units, 7A: Aut, 8A: Win, 9A: Spr (Lipton)

JAPANLNG 7B,8B,9B. First-Year Japanese Language, Culture, and Communication B—Recommended for those who want to become proficient in spoken and written Japanese. Upon completion of first-year sequence, students are able to converse, write, and read essays on topics such as personal history, experiences, familiar people. 300 Kanji characters. See http://www.stanford.edu/class/japanese7b. 5 units, 7B: Aut, 8B: Win, 9B: Spr (Lipton, Staff)

JAPANLNG 7C. Individualized Kanji Tutoring—For JLCC (7B, 8B, 9B) students only. 1-2 units, Aut, Win, Spr (Staff)

JAPANLNG 10. Intensive First-Year Japanese Language—(Stanford graduate students restricted to 9 units, register for 10G.) Equivalent to 7B,8B,9B combined. 9-12 units, Sum (Staff)

JAPANLNG 17A,18A,19A. Second-Year Japanese Language, Culture, and Communication A—For those who are interested in studying and/or working in Japan. Continuation of 9A; further understanding of Japanese language, culture, and communication. 3 units, 17A: Aut, 18A: Win, 19A: Spr (Nakamura)
JAPANLNG 17B,18B,19B. Second-Year Japanese Language, Culture, and Communication B—Goal is to express in spoken and written Japanese advanced concepts such as comparisons and contrasts of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include newspapers, essays, and novels. Prerequisite: 9B. See http://www.stanford.edu/class/japanese17.
5 units, 17B: Aut, 18B: Win, 19B: Spr (Lowdermilk, Staff)

9-12 units, Sum (Staff)

JAPANLNG 21,22,23. Second-Year Modern Japanese—Continuation of 3 or 5. Conversation and expression of ideas, advanced grammatical patterns, 600 kanji characters, simple compositions, and enhanced understanding of Japanese culture. Goal is to read original source material. Prerequisite: 3 or equivalent.

JAPANLNG 25. Intensive Second-Year Modern Japanese—Equivalent to 21, 22, and 23 combined. Prerequisite: 3 or equivalent. Stanford graduate students restricted to 9 units may take the course for 9 units.
9-12 units, Sum (Staff)

JAPANLNG 27,28,29. Intermediate Japanese Conversation—Develops oral proficiency through simple sentence patterns, audio tapes, and oral presentations. For the practical use of Japanese. Prerequisite: 3, 9B, or consent of instructor.
2 units, 27: Aut, 28: Win, 29: Spr (Bushin)

JAPANLNG 99. Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

THIRD-YEAR ADVANCED JAPANESE

JAPANLNG 101,102,103. Third-Year Modern Japanese—Beyond fundamental grammatical forms to reading and discussion of more complex material. Emphasis is on Japanese sentence structure in newspaper and journal articles, and readings from fiction, poetry, and essays. Polite language (keigo) skills. Videos of everyday Japanese spoken at normal speed develop listening skills. Prerequisite: 23 or equivalent.
5 units, 101: Aut, 102: Win (Arao) 103: not given 2004-05

JAPANLNG 111,112,113. Business Japanese—Conducted entirely in Japanese. Focus is on business-related topics: cultural attitudes and approaches, work ethic, the stock market, import-export trade. Introduction to business letters, job interviews, and resume writing. May be repeated for credit. Prerequisite: 23, 29 or 19B or consent of instructor.
3 units, 111: Aut, 112: Win, 113: Spr (Fu)

JAPANLNG 121,122,123. Advanced Japanese Conversation—Focus is on fine tuning grammatical points, explaining things in Japanese, and fluency. Audiovisual material and oral presentations. Prerequisite: 23, 29, 19B, or consent of instructor.
2 units, 121: Aut, 122: Win, 123: Spr (Lowdermilk)

3 units (Staff) not given 2004-05

5 units, 127B: Aut, 128B: Win, 129B: Spr (Tomiyama)

JAPANLNG 130. Intensive Third-Year Japanese—(Stanford graduate students restricted to 9 units, register for 130G.) Equivalent to 101,102,103 combined. Prerequisite: 23 or equivalent.
12 units, Sum (Staff)

JAPANLNG 200. Directed Reading—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

JAPANLNG 211,212,213. Advanced Japanese—Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: 103, 129B or equivalent.
3-5 units, 211: Aut, 212: Win, 213: Spr (Nakamura)

JAPANLNG 394. Graduate Studies in Japanese Conversation—Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

JAPANLNG 395. Graduate Studies in Japanese—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

KOREAN LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Korean before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 22, 2004. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR KOREAN

KORLANG 1,2,3. Beginning Korean—Basic communicative skills, vocabulary and grammar patterns. Culturally appropriate conduct relevant to contextual needs such as greetings, gestures, and body language.
5 units, 1: Aut, 2: Win, 3: Spr (Kim)

KORLANG 1H,2H,3H. Beginning Korean for Heritage Learners—For Korean background students. Focus is on reading, writing, and spelling rather than speaking and listening. Students cover beginning Korean course materials in meetings and individual study. Sources include textbook, workbook, and digitized listening materials. Prerequisite: consent of instructor.
1-3 units, 1H: Aut, 2H: Win, 3H: Spr (Kim)

KORLANG 21,22,23. Intermediate Korean—More complex sentences in grammatical patterns. Goal is conversation in daily situations such as making a polite request or suggestion, reading simple texts, and better knowledge of Korean culture. Prerequisite: 3 or consent of instructor.
3-5 units, 21: Aut, 22: Win, 23: Spr (Kim)

ADVANCED

KORLANG 101,102,103. Advanced Intermediate Korean—Materials about Korean culture and society to help students achieve proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: 23 or consent of instructor.
2-3 units, 101: Aut, 102: Win, 103: Spr (Kim)

KORLANG 120A,B,C. Korean Culture—Examination of Korean culture and society to develop fluency and vocabulary. Prerequisites: KORLANG 3 and consent of instructor.
1-2 units (Kim) not given 2004-05

KORLANG 150B. Korean Forum—Reading comprehension and vocabulary through newspaper articles and short essays related to contemporary Korea. Prerequisite: 103 or consent of instructor.
1-5 units (Staff) not given 2004-05

KORLANG 200. Directed Reading—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)
PORTLANG 109. Portuguese for Spanish Speakers—Equivalent to 1A. Recommended for graduate students of literature. Accelerated introduction to Portuguese. Proficiency-oriented approach, emphasizing speaking and oral comprehension. Students learn the language as they contrast Brazilian culture with their own. Lab. Prerequisites: graduate standing and advanced Spanish reading competence.
3-5 units, Win (Wiedemann)

ADVANCED PORTUGUESE
PORTLANG 297. Directed Reading—Prerequisite: consent of instructor.
1-4 units, Aut, Win, Spr (Staff)

PORTLANG 394. Graduate Studies in Portuguese Conversation—Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

PORTLANG 395. Graduate Studies in Portuguese—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

SLAVIC LANGUAGE COURSES
Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Russian before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 22, 2004. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR RUSSIAN
SLAVLANG 1, 2, 3. First-Year Russian—Essential Russian grammar. Discussions of Russian culture and the Russian view of reality.
5 units, 1: Aut, 2: Win, 3: Spr (Greenhill, Staff)

SLAVLANG 5, 6, 7. Russian for Native Speakers—Self-paced. Goal is to perfect reading and writing skills and the ability to communicate in formal and informal settings. Does not fulfill the University foreign language requirement.
2 units, 5: Aut, 6: Win, 7: Spr (Staff)

SLAVLANG 51, 52, 53. Second-Year Russian—More difficult areas of the grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills.
5 units, 51: Aut, 52: Win, 53: Spr (Gettys, Staff)

SLAVIANSKII DOM
Other in-house courses may be announced.

SLAVLANG 60A. Beginning Russian Conversation
1 unit, Aut (Staff)

SLAVLANG 60B. Intermediate Russian Conversation—(AU)
1 unit, Win (Staff)

SLAVLANG 60C. Advanced Russian Conversation
1 unit, Spr (Staff)

SLAVLANG 60D. East European Society and Culture—(AU)
1 unit, Spr (Staff)

SLAVLANG 60E. European Union Eastward Enlargement—(AU)
1 unit, Win (Staff)

SLAVLANG 60F. Slavic Films Series
1 unit, Win (Staff)

SLAVLANG 60P. Theme Projects—(AU)
1 unit, Win (Staff)

SLAVLANG 60T. Teaching Slavic Conversation—(AU)
1 unit, Aut, Win, Spr (Staff)

SLAVLANG 99. Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

THIRD-YEAR ADVANCED RUSSIAN
4 units, 111: Aut (Staff), 112: Win (Schupbach), 113: Spr (Greenhill, Gettys)

SLAVLANG 177, 178, 179. Fourth-Year Russian—Interactive. Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Discussions, role-playing, and creative assignments. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: 113 or equivalent.
3 units, 177, 178: Aut, Win (Greenhill), 179: Spr (Gettys)

SLAVLANG 181, 182, 183. Fifth-Year Russian—Language proficiency maintenance; appropriate for majors and non-majors with language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia.
3 units, 181: Aut (Staff), 182: Win (Gettys), 183: Spr (Schupbach)
SLAVLANG 199. Individual Work—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLANG 299. Independent Study—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLANG 395. Graduate Studies in Russian—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

SPANISH LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Spanish before entering Stanford. All entering students who have not taken the Advanced Placement (AP) Exam and received a score of 4 or 5, or who have not taken the SAT II with a score of 630 or above, must take Part I (written) of the placement test online during the summer, at http://language.stanford.edu/SPANISH, followed by Part II (oral), to be administered on campus September 22, 2004. Consult the Language Center or http://language.stanford.edu/ for further information.

Completion of SPANLANG 2A, 3, or 41C, fulfills the University language requirement.

Students who have never studied Spanish before should enroll in SPANLANG 1. Students who have studied Spanish before entering Stanford must take the placement test to determine the appropriate course for them. Students who have passed the AP exam with a 4 or 5 are exempted from the written test, but must take the oral on September 22, 2004 in order to determine their correct placement. These students are eligible for 10 units of credit in Spanish.

Students who grew up in homes where Spanish is spoken should take the placement test for the special series of courses (21B, 22B, 23B) designed for these speakers. The bilingual series fulfills the language requirement at Stanford. Potential home-background speakers should complete the questionnaire found at http://language.stanford.edu/HOMEBACKGROUND.

A grade of ‘C’ or better is required to enter the next higher course in the language sequence. Language courses may not be repeated for credit.

FIRST- AND SECOND-YEAR SPANISH

SPANLANG 1,2,3. First-Year Spanish—Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive and presentational spheres. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world.
5 units, Aut, Win, Spr (Staff, García-Denson, Guzmán, Schell, Urruela, Won, Zaragoza)

SPANLANG 1A,2A. Accelerated First-Year Spanish—Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: written and oral placement tests.
5 units, Aut, Win (Guzmán, Gorostarzu, Miano, Molitoris)

SPANLANG 10. Beginning Oral Communication—For students who have completed or are currently taking 2 and who wish to devote additional class time to developing pronunciation, usable vocabulary, and speaking skills. May be repeated once for credit.
1-2 units, Aut, Win, Spr (Corso)

SPANLANG 11C,12C,13C. Second-Year Spanish: Cultural Emphasis—Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic and professional contexts. Prerequisite: one year of college Spanish or equivalent.
4-5 units, Aut, Win, Spr (Kenna, Schell, Urruela, Won)

SPANLANG 11R,12R,13R. Second-Year Spanish: Emphasis on International Relations—Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: one year of college Spanish or equivalent.
4-5 units, 11R: Aut, 12R: Win, 13R: Spr (Perales, Sierra)

SPANLANG 15. Intermediate Oral Communication—Emphasis is on interaction in Spanish both locally and globally. Regional vocabularies and cultures at home and abroad. Interaction with local native Spanish speakers and communities globally via the Internet. May be repeated once for credit.
3 units, Aut, Win, Spr (Staff)

SPANLANG 19M. Spanish for Heritage and Foreign Language Pre-Med and Public Health Students—For pre-med or public health students who grew up in homes where Spanish is spoken or for students who possess a considerable command of Spanish. Focus is on developing the ability to provide information on health-related topics to Spanish speakers in the U.S. Students participate in the organization and delivery of information on preventive health care in a workshop setting to a Spanish-speaking community.
3-4 units, Spr (Sierra)

SPANLANG 41A,B,C. Intensive First-Year Spanish—Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units register for 241A,B,C.
5-15 units, Sum (Staff)

SPANLANG 50. Reading Spanish—For students who have already taken Spanish for at least one full year or have superior reading proficiency in another Romance language. Emphasis is on the comprehension of academic texts. Fulfills University reading requirements for advanced degrees if students earn at least a grade of ‘B.’
3 units, Spr (Sierra)

SECOND-YEAR COURSES FOR HERITAGE LANGUAGE STUDENTS

SPANLANG 21B,22B,23B. Second-Year Spanish for Heritage Language Students—Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, movies, radio, and television. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings.
3-5 units, 21B: Aut, 22B: Win, 23B: Spr (Staff)

SPANLANG 99. Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

ADVANCED COURSES

SPANLANG 100. Advanced Oral Communication—For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others’ points of view. Focus is on vocabulary enrichment and idiomatic expressions. Cultural, literary, political, and journalistic readings. May be repeated once for credit. Prerequisite: 13 or equivalent.
3 units, Aut, Win, Spr (Staff)

SPANLANG 101. The Structure of Spanish—Criteria and skills to understand and analyze Spanish grammatical structure. Identification of word functions in sentences and texts, types of sentences, and terminology. Structure of nouns, adjectives, and verbs, and their relationship with meaning. The differences between Spanish grammar as a formal system and its grammar in everyday life. Prerequisite: 13C, 13R, 23B, or equivalent.
3-5 units, Aut, Win (Sierra)
The Special Language Program (SLP) offers a number of foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for 2004-05 are listed below; however, not every course listed is taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2005-06 academic year should be made by Spring Quarter of this year at the Special Language Program office.

All beginning-level 3-unit courses are offered on a satisfactory/no credit basis only. Intermediate-level and 4-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year’s sequence of language study. Most 3-unit language courses are offered for a two-year, three-quarter sequence:

- All ‘A’ suffix courses are taught Autumn.
- All ‘B’ suffix courses are taught Winter.
- All ‘C’ suffix courses are taught Spring.

All beginning courses are 3 units except modern Greek and ASL. All intermediate and advanced courses are 3 units except modern Greek and ASL. In some circumstances, a beginning or intermediate level MAY be offered on alternate years.

FULFILLING THE LANGUAGE REQUIREMENT

Students can fulfill the language requirement by taking a special language. At least 12 units are needed to complete the requirement. Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request a language, apply via the web at http://www.stanford.edu/dept/SLP.

BEGINNING-LEVEL, FIRST-YEAR COURSES

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

INTERMEDIATE-LEVEL, SECOND-YEAR COURSES

Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions.

Specific purpose curricular objectives and enhanced understanding of the culture are built in the courses through a multimodal approach.

ADVANCED-LEVEL, THIRD-YEAR COURSES

Advanced-level, third year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic, print and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

For further information consult the Special Language Program, Building 40, Room 41B.

SPECLANG 75, Greek Culture, Ideas, and Themes—Introduction to Greek culture and its global influence in a social historical context. Images from its past, and institutions in Greek society. Focus is on changing experiences including identity, family relations, rituals, and language, from ancient to contemporary times. Limited enrollment. GER:3a,4a

3 units, Spr (Prinias)

SPECLANG 120A,B,C. Beginning Malayalam

3 units (Staff) not given 2004-05

SPECLANG 123A,B,C. Beginning Armenian

3 units (Staff) not given 2004-05
SPECLANG 126A,B,C. Beginning Turkish
3 units, A: Aut, B: Win, C: Spr (Kuey)

SPECLANG 127A. Intermediate Turkish
3 units (Staff) not given 2004-05

SPECLANG 132A,B,C. Beginning Tibetan
3 units, A: Aut, B: Win, C: Spr (Lama)

SPECLANG 138A,B,C. Beginning Navajo
3 units, A: Aut, B: Win, C: Spr (Staff)

SPECLANG 144A,B,C. Beginning Tagalog
3 units, A: Aut, B: Win, C: Spr (Paz)

SPECLANG 145A,B,C. Intermediate Tagalog
3 units, A: Aut, B: Win, C: Spr (Paz)

SPECLANG 146A,B,C. Beginning Persian
3 units, A: Aut, B: Win, C: Spr (Mohammadi)

SPECLANG 150A,B,C. Beginning Vietnamese
3 units, A: Aut, B: Win, C: Spr (Ha)

SPECLANG 151A,B,C. Intermediate Vietnamese
3 units, A: Aut, B: Win, C: Spr (Haas)

SPECLANG 152A,B,C. Beginning Hindi
3 units, A: Aut, B: Win, C: Spr (Malhotra)

SPECLANG 153A,B,C. Intermediate Hindi
3 units, A: Aut, B: Win, C: Spr (Malhotra)

SPECLANG 154A,B,C. Beginning Gujarati
3 units, A: Aut, B: Win, C: Spr (Ranchod)

SPECLANG 155A,B,C. Intermediate Gujarati
3 units, A: Aut, B: Win, C: Spr (Ranchod)

SPECLANG 156A,B,C. Beginning Indonesian
3 units, A: Aut, B: Win, C: Spr (Staff)

SPECLANG 159A,B,C. Beginning Punjabi
3 units, A: Aut, B: Win, C: Spr (Dhillon)

SPECLANG 160A,B,C. Intermediate Punjabi
3 units, A: Aut, B: Win, C: Spr (Dhillon)

SPECLANG 162A,B,C. Beginning Tamil
3 units, A: Aut, B: Win, C: Spr (Staff)

SPECLANG 164A,B,C. Beginning Czech
3 units, A: Aut, B: Win, C: Spr (Dusatko)

SPECLANG 165A,B,C. Intermediate Czech
3 units, A: Aut, B: Win, C: Spr (Dusatko)

SPECLANG 167A,B,C. Beginning Polish
3 units, A: Aut, B: Win, C: Spr (Kieturakis)

SPECLANG 168A,B,C. Intermediate Polish
3 units, A: Aut, B: Win, C: Spr (Kieturakis)

SPECLANG 170A,B,C. Beginning Modern Greek
2-4 units, A: Aut, B: Win, C: Spr (Prionas)

SPECLANG 171A,B,C. Intermediate Modern Greek
4 units, A: Aut, B: Win, C: Spr (Prionas)

SPECLANG 172A,B,C. Modern Greek Language and Culture through Literature and Film—Accelerated acquisition of reading, writing, comprehension, and conversation skills through literary texts and films. Grammatical structures, idiomatic expression usage, and vocabulary enrichment through complementary, multimedia-based, online materials. Alternates with 171A,B,C.
4 units, A: Aut, B: Win, C: Spr (Prionas)

SPECLANG 173A,B,C. Beginning Hungarian
3 units, A: Aut, B: Win, C: Spr (Mihalik)

SPECLANG 174A,B,C. Beginning Quechua
3 units, A: Aut, B: Win, C: Spr (Fajardo)

SPECLANG 176A,B,C. Beginning Thai
3 units, A: Aut, B: Win, C: Spr (Moore)

SPECLANG 177A,B,C. Intermediate Thai
3 units, A: Aut, B: Win, C: Spr (Moore)

SPECLANG 178A,B,C. Beginning Sign Language—Limited enrollment.
4 units, A: Aut, B: Win, C: Spr (Haas)

4 units, A: Aut, B: Win, C: Spr (Haas)

SPECLANG 183A,B,C. Beginning Sanskrit
3 units, A: Aut, B: Win, C: Spr (Porta)

SPECLANG 186A,B,C. Beginning Serbo-Croatian
3 units (Staff) not given 2004-05

SPECLANG 189A,B,C. Beginning Hawaiian
3 units, A: Aut, B: Win, C: Spr (Staff)

SPECLANG 190A,B,C. Intermediate Hawaiian
3 units (Staff) not given 2004-05

SPECLANG 192A. Beginning Kazakh
3 units (Staff) not given 2004-05

SPECLANG 195A. Beginning Kiche’e Mayan
3 units (Staff) not given 2004-05

SPECLANG 210A,B. Beginning Mycenaean
3 units (Porta) not given 2004-05

SPECLANG 297. Directed Reading—Prerequisite: consent of instructor.
1-4 units, Aut, Win, Spr, Sum (Staff)

SPECLANG 395. Graduate Studies in Special Language—Prerequisite: consent of instructor.
1-5 units Aut, Win, Spr (Staff)
UNDERGRADUATE PROGRAMS

Although the University does not offer a B.A. in Latin American Studies, it does offer an honors program and a minor. Stanford also has departmental and interdisciplinary degree programs in which a student may concentrate on Latin America. These include Anthropological Sciences, Cultural and Social Anthropology, History, Political Science, Spanish and Portuguese, and International Relations. Contact the respective departments for further information.

HONORS PROGRAM IN LATIN AMERICAN STUDIES

The Honors Program in Latin American Studies is open to majors in any field. The aim of the honors program is to prepare students to pursue individualized research on Latin America, culminating in the preparation of an honors thesis written under the supervision of a faculty adviser. The honors program is particularly suited to the student who wishes to go on to graduate school or pursue employment in an institution emphasizing research and independent work. Although not required, students are encouraged to undertake independent field research in Latin America for their thesis. It is strongly recommended that students enroll in HISTORY 206B (1 unit) in the sophomore or junior year for an overview of research design and methods for international field research.

Students should apply for entry into the program no later than the end of the winter quarter of the junior year; the application includes a proposal of thesis topic endorsed by a member of the faculty who is willing to serve as the student’s honors adviser. Applicants should have a cumulative grade point average (GPA) of 3.3 (B+) or higher, and maintain this average in courses taken to satisfy the requirements. All courses are to be taken for a letter grade where that option is available. Unlike the minor, courses credited toward LAS honors may be double counted toward the student’s major requirements.

The requirements for honors in Latin American Studies are:

1. Complete a total of 35 units in courses certified for honors by the Center for Latin American Studies. The 35 units must be distributed as follows:
   a) A survey: one 5-unit course surveying either all of Latin America or a major multi-country region therein, namely HISTORY 80 (Culture, Politics, and Society in Latin America). This is normally taken in the sophomore year. With the approval of the center and the honors adviser, students may substitute another such course, for example, a Stanford Introductory Seminar or a course offered through Stanford’s Overseas Studies.
   b) For breadth: two 4-5-unit courses at the 100-level or above with a focus on the region, offered through the Center for Latin American Studies or an affiliated department or program (such as Anthropological Sciences, History, Spanish and Portuguese, International Relations, or Stanford Overseas Studies). These courses are normally taken during the sophomore or junior years.
   c) For depth: one 4-5-unit course at the 100-level or above with a focus on the region that explores an issue in depth of particular interest to the student, approved by the honors adviser. This course may be taken with the honors thesis in mind. It is normally taken during the junior year or the beginning of the senior year.
   d) Of the courses applied to ‘b’ and ‘c’, above, 10 units may be completed in Overseas Studies and 5 units may be taken as directed individual study.
   e) LATINAM 198, Honors Thesis (2-10 units), under the supervision of the student’s faculty honors adviser. Normally these units are spread over two or three quarters of the senior year and are devoted to the completion of the honors thesis.
   f) LATINAM 199, Honors Seminar (5 units). This is normally taken in the Winter Quarter of the senior year.
   g) Enough additional courses focusing on Latin America to bring the total to 35 units. These must be at the 100-level or higher, except that up to 5 units may also come from study of Spanish or Portuguese beyond the seventh quarter, or of a second language of Latin America at any level, as outlined in the Foreign Language
FOREIGN LANGUAGE REQUIREMENT

Acquisition of a language of Latin America is critical to an in-depth understanding of Latin America, both for advanced study and fieldwork, and for future professional endeavors. The minimum requirement for completion of either the minor or the honors certificate is to obtain or demonstrate advanced proficiency in Spanish or Portuguese by any of the following means:

1. completion of seven quarters of college-level study of Spanish or Portuguese.
2. completion of a course on Spanish or Portuguese language or literature, or on some other subject but taught in Spanish or Portuguese, at the 100-level or higher, with a letter grade of ‘B’ (3.0) or better, unless grades are not available for the course.
3. achievement of the Advanced Proficiency level on the ACTFL scale in a test administered by the Department of Spanish and Portuguese, or, by petition, by some other department. Students with advanced proficiency in either Spanish or Portuguese are encouraged to enroll in a course in the other major language, such as Portuguese for Spanish Speakers; alternatively, students may study a Latin American Indian language such as Quechua, Yucatec (Maya), K’iche’ (Maya), Nahuatl, or Kreyol (Haitian). Up to 10 units in third-year Spanish or Portuguese, or at any level for a second Latin American language, may count toward the minor and honors provided they are approved by the student’s adviser and taken for a letter grade if that option is available.

HONORS COLLEGE

The LAS honors college, sponsored along with many other departmental and interdisciplinary honors colleges by the Vice Provost for Undergraduate Education, is an intensive three-week residential program offered directly preceding Autumn Quarter. It affords returning LAS honors students who have completed field work a debriefing and a focused series of presentations by a member of the CLAS-affiliated faculty and other Stanford instructors on adviser interaction, data preservation, bibliographic resources, writing strategies, statistical analysis, organizational techniques for completing the thesis process, and opportunities to socialize with other honors students in the college, all without cost to the students. Ample time is provided for library research, individual faculty consultations, and data analysis. Applications for honors colleges are available in the Spring prior to the senior year.

SUMMER FIELD RESEARCH

Each summer, the center awards research grants to a small number of undergraduates to conduct individual research projects in Latin America. Students must have demonstrated the ability to work independently, and possess the necessary language competence. Applications include a research proposal that has been reviewed and endorsed by a faculty member who agrees to serve as sponsor. A pre-field seminar is required the Spring Quarter before departure. Students from all departments are eligible to apply.

MINORS

The minor in Latin American Studies is offered for students in other majors who wish to develop a complementary concentration on the region. To pursue the minor, students must submit for approval an online proposal of coursework no later than the second quarter of their junior year. The minor must be completed by the second quarter of the senior year. Requirements for the minor include:

1. Completion of 25 units as follows: a 5-unit course surveying Latin America, for example, LATINAM 80 or an approved substitute; 20 additional units at the 100-level or higher which together comprise a coherent focus on a theoretical problem or issue of the region; for example, culture and identity, political economy, sustainable development. At least 10 of the total 25 units must be completed at Stanford.
2. Demonstration of proficiency in either Spanish or Portuguese, equivalent to the requirement for the honors certificate.
3. Field experience in Latin America (study abroad, summer research, internship, and so on) is recommended.

Upon satisfactory completion of all requirements, the center’s Subcommittee on Undergraduate Programs authorizes the designation of the Minor in Latin American Studies on the student’s transcript.

Units for a student’s major cannot be double-counted towards the minor.

GRADUATE DEGREE PROGRAMS

Although the University does not offer an M.A. or Ph.D. in Latin American Studies, Stanford has several departmental programs in which a student may concentrate on Latin America. These include Anthropological Sciences, Cultural and Social Anthropology, History, Political Science, and Spanish and Portuguese. Contact the respective departments for admission information.

COURSES

LATINAM 50Q. Social Justice in Latin America—Stanford Introduction Seminar. Preference to sophomores. Social injustice and human rights issues stemming from contemporary social, political, economic, and cultural conditions in Latin America. Sources include essays on justice in Latin America, testimonial literature, and fiction. Consequences of speaking out against injustice. Emphasis is on analyzing primary documents and literature, and multidisciplinary approaches to research questions.
5 units, Aut (Vitorte)

5 units, Aut (Di Filippo)

5 units, Win (Di Filippo)
5 units, Spr (Di Filippo)

LATINAM 133/233. Politics and Policy Analysis of Educational Reform in Latin America—Case studies of recent educational reform in Latin America, including Argentina, Brazil, and Chile. Focus is on reform ideologies and market- and state-driven strategies. Types of school reform; expansion, distribution, and transformation of opportunities to learn. Role of international actors and educational research and specialized knowledge in the reform process.
5 units, Win (Cox)

LATINAM 134/234. New Competencies and Social Cohesion: Society’s Requirements and Curriculum Reform in Latin America—Politics of curriculum construction and implementation. Curriculum reform as national answer to common requirements of new competencies and social cohesion of the knowledge society. Focus is on impact of new international standards on curricula; citizenship education; teachers’ ownership and management of new curricula as a problem of contemporary educational reforms.
5 units, Spr (Cox)

LATINAM 195. Prefield Research Seminar—Preparation for summer fieldwork in Latin America or other regions. Interdisciplinary research design and methodology; the relationship between evidence and argument; practicalities of field research in developing countries; and ethical and political considerations.
5 units, Spr (Staff)

LATINAM 197. Directed Individual Research—For students engaged in special interdisciplinary work that cannot be arranged by department.
1-10 units, Aut, Win, Spr (Staff)

1-10 units, Aut, Win, Spr (Staff)

LATINAM 199. Honors Seminar in Latin American Studies—For any senior writing an honors thesis related to Latin America.
5 units, Win (Staff)

INTERDEPARTMENTAL OFFERINGS

The courses listed below by department deal primarily with Latin America; all are given in 2004-05. See the respective department listings for course descriptions and General Education Requirement (GER) information. Additional relevant courses by resident or visiting faculty may be offered; for updated information, consult the quarterly Time Schedule. Contact the Center for Latin American Studies for a list of approved courses, including courses frequently given but not given in 2004-05.

BIOLOGICAL SCIENCES

BIOSCI 114. Field Course on Tropical Biogeochemistry: Amazon as Case Study—(Same as EARTHSYS 114.)
3 units, Aut (Vitonek)

HISTORY

HISTORY 80. Culture, Politics, and Society in Latin America
5 units, Aut (Frank)

HISTORY 206B/306B. Design and Methodology for International Field Research
1 unit, Win (N. Kollman, Roberts)

OVERSEAS STUDIES

Courses taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.
for advanced studies in such disciplines as Anthropology, Communication, Computer Science, Education (Language, Literacy, and Culture), hearing and speech sciences, languages, Law, Linguistics, Philosophy, and Psychology.

**REQUIREMENTS**

Requirements for the B.A. include at least 50 units of course work in Linguistics and approved courses in related fields. Of the 50 units required for the major, at least 16 must come from core Linguistics courses; no more than 12 of the 50 units may be below 100 level. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis.

*Core Courses*—The core courses are:

- LINGUIST 1. Introduction to Linguistics
- LINGUIST 110. Introduction to Phonetics and Phonology
- LINGUIST 120. Introduction to Syntax
- LINGUIST 130A. Introduction to Linguistic Meaning, or 130B. Introduction to Lexical Semantics
- LINGUIST 150. Language in Society, which fulfills the Writing in the Major requirement (WIM)

*Other Courses*—Other courses counting toward the unit requirement should form a coherent program with emphases from among the areas of concentration listed below. Students should consult with the Linguistics undergraduate studies chair when declaring the major, and maintain regular contact during the remainder of their Stanford career. Each student’s major program must be approved by the Linguistics undergraduate studies chair, or approved department adviser.

Students in the major must also take:

1. At least two 200-level Linguistics courses, typically in their area of concentration.
2. LINGUIST 197, Undergraduate Research Seminar, in the junior year. (Special arrangements can be made for transfer students and others who start the major late.)

*Other Requirements*

1. Foreign Language: majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This is usually demonstrated by the completion of six quarters of language study at Stanford or equivalent; level of proficiency is determined by the Language Center or the relevant language department.

   Students may petition to be exempted from the Language Requirement if they have grown up speaking a language other than English and can use it for everyday purposes and for linguistic analysis.

2. Junior Research Paper: this requirement is typically fulfilled by providing an additional stage of revision on a research paper previously submitted in a Linguistics course. It must be approved by both the instructor of the course and the Linguistics undergraduate studies chair.

**AREAS OF CONCENTRATION**

Students select one of the following areas of concentration or develop one themselves in advance consultation with the Linguistics undergraduate studies chair.

- **General Linguistics**—This program provides a broad education in linguistics and is advisable for students interested in advanced degrees in Linguistics.

- **Language and Society**—This concentration focuses on the social dimensions of language.

**Honors Program**

Students who wish to undertake a more intensive program of study, including independent research, should seek departmental honors. An application to pursue honors work should be presented to a Linguistics undergraduate adviser before the end of the junior year. Approval is given only to students who have maintained a grade point average (GPA) of 3.3 (B+) or better in the courses required for the major.

Honors students take a total of 60 units. These must include the 50 units for the major, 10 additional units of independent study and Honors Research, and an honors thesis based on research conducted with a principal adviser who must be a member of the Linguistics faculty, and a secondary faculty adviser who may, with the approval of the Undergraduate Studies Committee, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199.
Independent Study, to work closely with one of the advisers on the research project. In Winter and Spring quarters, honors students register in LINGUIST 198, Honors Research, with the principal adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

COTERMINAL PROGRAM

The Department of Linguistics admits a very limited number of undergraduates to work for their coterminal degree in Linguistics. Students are required to submit to the department a complete application, which includes a statement of purpose, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree rest with the Graduate Admissions Committee of the Department of Linguistics. For further application information, see the department’s web pages.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

MASTER OF ARTS

The University’s basic requirements for the master’s degree are discussed in the “Graduate Degrees” section of this bulletin. The following are additional departmental requirements. Candidates should review the department’s “Guidelines for the M.A. and Ph.D. Degrees” for further particulars concerning these requirements.

1. Courses: candidates must complete a minimum of 45 units of graduate work in linguistics, including at least four courses in the student’s area of specialization. No more than two courses should be at the 100 level.

Individual programs should be worked out in advance with an adviser who should ascertain that the necessary courses in the area of specialization are offered over the course of the year of anticipated enrollment. The overall grade point average (GPA) must be at least 3.0 (B) for all degree program coursework.

2. Language: reading knowledge of a non-native language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language, or in-depth research on the structure of a non-native language.

3. Thesis or Thesis Project: a research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of LINGUIST 395A,B, Research Workshop (1-2 units each), and by oral discussion in the Ph.D. guidelines guarantees that each student covers a sufficient set of subareas within the field.

Candidates must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 3.0 (B) and all of the basic courses should be completed with at least a ‘B.’

3. Research: the prospective Ph.D. candidate is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of the Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end of Spring Quarter of the second year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by LINGUIST 395A,B, Research Workshop (1-2 units each), and by oral discussion with a committee of at least three faculty members selected by the student and the faculty.

4. Candidacy: students must complete a prescribed portion of the basic course requirement (see item 2 above), one foreign language requirement (see item 1 above), and one qualifying paper (see item 3 above) by the end of their second year.

5. Teaching: at least three quarters serving as teaching assistant in a linguistics course.

6. Colloquia: two oral presentations exclusive of the oral presentation of the dissertation proposal (see item 7b below). This requirement is satisfied by class presentations, conference papers, or colloquium talks. Normally, both should be given during the first four years of study.

7. Dissertation:
   a) A written dissertation proposal is required by the end of the third year.
   b) Oral presentation of the dissertation proposal, preferably as a colloquium.
   c) Approval of the dissertation topic and appointment of a dissertation committee.
   d) Successful passing of a University oral examination on the dissertation and related areas.
   e) Dissertation (up to 15 units of LINGUIST 399).

PH.D. MINOR

1. Courses: the candidate must complete 30 units of course work in linguistics at the 100 level or above, including LINGUIST 110, 120, and either 130A or 130B (100-level courses are waived if 200-level courses in the same area are taken), and at least three courses related to the area of specialization. Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student’s Ph.D. minor adviser in linguistics.

2. Research Project (optional): the candidate may elect to present a paper which integrates the subject matter of linguistics into the field of specialization of the candidate.

3. The linguistics adviser or designee serves on the candidate’s University oral examination committee and may request that up to one-third of the examination be devoted to the minor subject.

Ph.D. Minor in Applied Linguistics—The Department of Linguistics participates in the Applied Linguistics Minor. See the “Language Center” section of this bulletin for full details.

COGNITIVE SCIENCE

Linguistics is participating with the departments of Computer Science, Philosophy, and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics. To receive this field designation, students must complete 30 units of approved courses, to be determined in consultation with the graduate studies adviser.
COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

LINGUISTICS

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics. Those with numbers 200 and above are primarily for graduate students, but with the consent of instructor some of them may be taken for credit by qualified undergraduates.

At all levels, the course numberings indicate a special area, as follows:

01-04 General
05-19 Phonetics, Phonology, and Morphology
20-39 Syntax, Semantics, and Pragmatics;
Mathematical and Computational Linguistics
40-49 Language Acquisition and Psycholinguistics
50-59 Sociolinguistics
60-69 Language Change, Language and Culture
70-84 Linguistic Analysis of a Language
85-94 Methods
95-99 Directed Work, Theses, Dissertations

LINGUIST 1. Introduction to Linguistics—The study of language and its structure including cognitive and social perspectives. What are the sounds of English and other languages? What structures are used in forming words and sentences? To what extent are human beings hard-wired for those structures, and how does this influence language learning? How do languages develop and diverge over time? What social meanings do different forms of language convey? The answers to these questions have implications for our understanding of everyday language interactions, social identity, and the relation between language and thought. GER:3b

4 units, Aut (Sells, Beaver)

LINGUIST 17N. Spoken Soul: Black English and Its Controversies—Stanford Introductory Seminar. Preference to sophomores. The vernacular of Black America, otherwise known as Ebonics or African American vernacular English, and its structure and controversies. The argument over whether it is a legitimate language variety or just slang. Its origins, history, and the relative importance of its English, African, and Creole ancestries. The Oakland Ebonics controversy. Its use by writers, preachers, and comedians.

3 units, Win (Rickford)

LINGUIST 30Q. Split Infinitives, Prepositions at End, and Other Horrors—Stanford Introductory Seminar. Preference to sophomores. Basic ideas in syntax as applied to English and where they come from. Questioning grammatical authority; where grammar manuals get the rules of grammar. The real system of English grammar and usage, including prepositions, pronouns, modifiers, syntactic functions such as subjects, and forms such as the accusative case. When can material be omitted in a sentence? What gives rise to ambiguities? GER:3b

4 units, Spr (Zwicky)

LINGUIST 40N. Nature versus Nurture—Stanford Introductory Seminar. Preference to freshmen. To what extent is human behavior determined by genetic endowment, and on upbringing and experiences? This long-debated question as the subject of modern social science research; why it remains controversial. Emphasis is on recent language acquisition research as a focal point of the controversy. GER:3b

3 units, Spr (Wasow)

LINGUIST 44N. Living with Two Languages—Stanford Introductory Seminar. Preference to freshmen. The nature of bi- and multilingualism with emphasis on the social and educational effects in the U.S. and worldwide, in individual versus society, and in child and adult. The social, cognitive, psycholinguistic, and neurological consequences of bilingualism. Participation in planning and carrying out a research project in language use and bilingualism. GER:3b

3 units, Spr (E. Clark)

LINGUIST 62. History of the English Language—(Enroll in ENGLISH 171.)

5 units, Aut (Brown)

LINGUIST 70. Structure of English Words—(Graduate students register for 270.) Patterns of structure and meaning in English vocabulary. Goals are to increase vocabulary, and to take the mystery out of the processes that have made vocabulary what it is today by discovering the principles behind changes in pronunciation, structure, and meaning. Students taking optional practicum register for 5 units. GER:3b

4-5 units, Aut (Leben)

LINGUIST 73. African American Vernacular English—(Graduate students register for 273.) Survey of the English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin’ and rappin’), and its educational implications. GER:3b

3-5 units (Rickford) not given 2004-05

LINGUIST 85. Teaching Spoken English—Practical approach to teaching English to non-native speakers. Survey of both teaching principles and the features of English which present particular difficulties. Preparation of lessons, practice teaching in class, and tutoring of non-native speaker.

3-4 units, Spr (Rylance)

LINGUIST 105. Phonetics—(Graduate students register for 205.) The study of speech sounds: how we produce them, how we perceive them, their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: equivalent of 110 or consent of instructor. GER:3b

4 units, Win (Scarborough)

LINGUIST 108A. Topics in Phonology: Metrics—(Graduate students register for 208A.)

1-4 units, Aut (Kiparsky)

LINGUIST 108C. Topics in Phonology: Intonation—(Graduate students register for 208C.) The phonetics and phonology of intonation and prosody.

1-4 units, Spr (Scarborough)

LINGUIST 110. Introduction to Phonetics and Phonology—Differences in the sounds of the world’s languages and how these sounds are made by the human vocal tract. Theories that account for cross-linguistic similarities in the face of all the differences. GER:3b

4 units, Spr (Leben)

LINGUIST 120. Introduction to Syntax—Analyses of various grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules. GER:3b

4 units, Aut (Wasow)

LINGUIST 124A. Introduction to Formal Universal Grammar—(Graduate students register for 224A.) Study a formal model of universal grammar explicitly designed to explain crosslinguistic variation in syntactic structure: nonconfigurationality in Australian aboriginal languages, incorporation in native American languages and the Bantu languages of Africa, scrambling and head movement in more familiar European languages. General issues such as universal grammar design, analytic problems from a variety of natural languages. Prerequisites: introduction to syntax and some familiarity with logic or other symbolic systems, or consent of instructor. GER:3b

4 units (Bresnan) not given 2004-05

LINGUIST 125. Seminar in Syntax: The Architecture of Grammar—(Graduate students register for 225; same as SYMBSYS 208.) Comparison of current debates about grammar architecture with similar ones in the 60s and 70s. Emphasis is on the relationship between syntax and
linguistics, and the role of transformations in it. The relevance of the generative semantics movement, and arguments against it, to contempo-
rary linguistic theory. Prerequisite: syntax course.
2-4 units, Win (Wasow)

LINGUIST 125A. Syntactic Variation—(Graduate students register for 225A.) Case studies in variations (between individual speakers, regional and social dialects, and styles) in the details of syntactic constructions, considering implications for syntactic theory.
1-4 units, Aut (Zwicky)

LINGUIST 128. Real English: The Syntax of Language Use—(Graduate students register for 228.) Hands-on experience with modern corpus methods, and natural spoken and written syntactic data. Introduce and develop syntax through the syntactic analysis of spontaneous spoken conversations as well as newspaper reportage, using tagged and parsed corpora such as the Penn Treebank. Topics include standard subject matter suitable for a syntax introduction, but each of the core topics is investigated empirically in natural English. GER:3b
4 units (Bresnan, Zaanen) not given 2004-05

LINGUIST 130A. Introduction to Linguistic Meaning—Linguistic meaning and its role in communication. How diagnostic tests can be used to categorize and separate semantic phenomena such as ambiguity and vagueness, entailment, and presupposition. How basic set theory and logic can be used to specify meanings and explain semantic phenomena. Pragmatic complications involving the assumptions and intentions of language users. For those who have not taken logic (such as PHIL 159), an associated credit/no credit 1-unit self-study lab is offered using Tarski's World. Prerequisite: 120 or consent of instructor. GER:3b
4 units, Win (Peters)

LINGUIST 130B. Introduction to Lexical Semantics—Issues in the study of word meaning. Focus is on the core semantic properties and internal organization of the four major word categories in natural languages: nouns, verbs, adjectives, and prepositions. GER:3b
4 units, Spr (Fong)

LINGUIST 130C. Logic Laboratory—Typically taken in conjunction with 130A/230A.
1 unit, Win (Peters)

LINGUIST 133A. Semantics Seminar: Tense and Aspect—(Graduate students register for 233A.) The temporal structure of different languages. Topics include the logic of time, the presentation of situations, and the semantics of tense and aspect in narrative discourse.
1-4 units, Win (Fong)

LINGUIST 138. Introduction to Computer Speech and Language Processing—(Graduate students register for 238.) Spoken language dialogue systems, speech recognition and synthesis, web-based question answering, and the ideas of parsing, grammars, semantic interpretation, and discourse processing. Focus is on writing scripts to use available online implementations of these applications, rather than on implementing the applications themselves. Prerequisite: CS 106B/X. GER:2b
4 units, Aut (Jurafsky)

LINGUIST 139M. Human and Machine Translation—(Graduate students register for 239M.) The process of translation by professional and amateur translators, and by existing and proposed machine-translation systems; what each might learn from the others. Prerequisite: advanced knowledge of a foreign language. GER:2b
4 units, Aut (Kay)

LINGUIST 139P. Programming and Algorithms for Natural Language Processing—(Graduate students register for 239P.) Construction of computer programs for basic linguistic processes such as string search, morphological, syntactic, and semantic analysis and generation, and simple machine translation. Emphasis on the algorithms that have proved most generally useful for solving such problems.
3-4 units, Win (Kay)

LINGUIST 140. Language Acquisition I—(Graduate students register for 240.) Survey of the processes of language acquisition in early childhood, with exposure to research questions and methods. GER:3b
4 units, Aut (E. Clark)

LINGUIST 144. Introduction to Cognitive Science—(Same as SYMB-SYS 100, PSYCH 130, PHIL 190.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:3b
4 units, Spr (Jurafsky, Richardson)

LINGUIST 145. Language and Thought—(Enroll in PSYCH 131.)
4 units, Aut (H. Clark)

LINGUIST 146. Language and Gender—The role of language in the construction of gender, the maintenance of the gender order, and social change. Linguistic resources and strategies to create gendered personae. Field projects explore hypotheses about the interaction of language and gender. No previous knowledge of linguistics required. GER:3b,4c
4 units (Eckerti) not given 2004-05

LINGUIST 150. Language in Society—How language and society affect each other. Social dialects, and class, ethnic, and gender differences in speech. Prestige and stigma associated with different ways of speaking and the politics of language. Stylistic practice; how speakers use language to construct styles and adapt their language to different audiences and social contexts. GER:3b,WIM
4-5 units, Aut (Buchstaller)

LINGUIST 151. Pidgin and Creole Sociolinguistics—(Graduate students register for 251.) Introduction to pidgins and creoles, organized around the three main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portuguese, Chinook, Motu, and Sango.
2-4 units, Spr (Rickford)

LINGUIST 152. Language and Adolescence—Adolescents are generally believed to have their own way of speaking relating directly to their life stage. Adolescence as a cultural construct, and the role of language use in this construct. Readings focus on real use data.
4 units (Staff) not given 2004-05

LINGUIST 153. Ebonics and Other Vernaculars in Schools and Society—The role that Ebonics and other vernaculars such as Gullah, Appalachian English, Hawaiian Pigid, and the Caribbean Creole varieties play in their speakers' schools and societies. Such vernaculars are often blamed for their speakers' difficulties with literacy and job mobility, but they play roles in the expressive fabric and social relationships of their speakers, and there is evidence that their potential usefulness in educational reform has been underestimated. GER:3b
4 units (Staff) not given 2004-05

LINGUIST 155B. Topics in Sociolinguistics: Reporting of Experience—How speakers use language to shape, report, and share their past experiences. Features of spoken language such as narrative structure, audience design, quotation, discourse markers, and spoken interaction.
1-4 units, Spr (Buchstaller)

LINGUIST 159. Language in the U.S.—(Graduate students register for 259.) The multifaceted nature of language in the U.S. Social, regional, and ethnic varieties such as African American vernacular English and Appalachian English; other languages including Spanish, Native American languages, Asian American voices, and American Sign Language; and the sociolinguistic situation including language attitudes and prejudices, rap and hip hop, the language of doctors and patients, and the English only and Ebonics controversies. GER:3b
3-5 units (Rickford) not given 2004-05
LINGUIST 160. Introduction to Language Change—(Enroll in ANTHSCI 110.)
4-5 units, Win (Fox)

LINGUIST 164. Language of Advertising—The use of language and imagery in advertising. How are commercials and print ads structured? What aspects of language in advertising are effective, and why? When advertising oversteps the bounds of everyday language use, do new patterns of language emerge? GER:3b
3-4 units (Sells) not given 2004-05

LINGUIST 175. African American English in Educational Context—(Enroll in EDUC 175/275.)
3 units (Staff) alternate years, given 2005-06

LINGUIST 187. Field Methods—(Graduate students register for 287.)
Hands-on-overview of the methods by which linguists gather raw linguistic data about a language and begin the task of analyzing its structure. Working with a speaker of a language not previously studied by class participants, students attempt to develop a description of key aspects of the grammar of the language and examine methodologies for obtaining, storing, and manipulating data.
2-4 units (Staff) not given 2004-05

LINGUIST 189. Linguistics and the Teaching of English as a Second/Foreign Language—(Graduate students register for 289.)
Methods and techniques for teaching languages, using ideas from modern linguistics, and language acquisition theory. Focus is on teaching English, but the principles underlying methods and techniques discussed are applicable to teaching any language. GER:3b
4-5 units, Win (Hubbard)

LINGUIST 197. Undergraduate Research Seminar—Introduction to research goals and methods in linguistics and related disciplines. Provides a forum for students to work on a small project that helps define a focus for their linguistic studies and to prepare for honors research. Presentations, discussion, and final paper.
2 units, Win (E. Clark)

LINGUIST 198. Honors Research
1-15 units, Win, Spr (Staff)

LINGUIST 199. Independent Study
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 200. Foundations of Linguistic Theory—Theories that have shaped 20th-century linguistics; recurrent themes and descriptive practice.
4 units, Aut (Kiparsky)

LINGUIST 201. Advanced Introduction to Linguistics—Primarily for graduate students. Introduction to the leading ideas of linguistic description and linguistic argumentation. The fundamental representational notions in phonology, syntax, and semantics, and the place of these notions in wider linguistic analysis.
4 units, Win (Zwicky)

LINGUIST 203. Research Methods in Linguistics—Presentations and in-class, hands-on exercises. Topics include use of corpus data, extraction of suitable data from corpora, use of human subjects, experimental design, and elicitation and observation in the field and laboratory. Restricted to first year Ph.D. and M.A. students in Linguistics.
3 units, Aut (Levin)

LINGUIST 205. Phonetics—(Same as 105; see 105.)
4 units, Win (Scarborough)

LINGUIST 206. Phonology—Introduction to phonological theory and analysis based on cross-linguistic evidence. Topics: phonological representations including features, syllables, metrical structure; phonological processes including assimilation and dissimilation; and phonological typology and universals.
4 units, Spr (Anttila)

LINGUIST 207A. Morphology—How morphology fits into the lexicon and how the lexicon fits into grammar. Inflection and word-formation: blocking, productivity, analogy. Morphological categories. The interaction of morphology with phonology within the lexicon: leveling, prosodic morphology. Review of English morphology and analysis of representative material from languages with richer morphologies.
4 units, Win (Anttila, Kiparsky)

LINGUIST 207B. Morphosyntax—The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Universal properties and typology of morphological categories; proposals towards their principled explanation in a restrictive theory of language.
2-4 units (Kiparsky) not given 2004-05

LINGUIST 208A. Topics in Phonology: Metrics—(Same as 108A; see 108A.)
1-4 units, Aut (Kiparsky)

LINGUIST 208B. Topics in Phonology
1-4 units, Win (Anttila)

LINGUIST 208C. Topics in Phonology: Intonation—(Same as 108C; see 108C.)
1-4 units, Spr (Scarborough)

LINGUIST 221A. Foundations of English Grammar—A systematic introduction to the formal analysis of English grammar using the framework of Head-Driven Phrase Structure Grammar (HPSG). Topics: feature structure modeling, lexical and phrasal organization in terms of type hierarchies and constraint inheritance, clausal types, patterns of complementation, the auxiliary system, extraction dependencies, wh-constructions, and the syntax-semantics interface.
1-4 units, Win (Sag)

LINGUIST 221B. Studies in Universal Grammar—Focus is on grammatical analysis of individual languages. Builds directly on the theoretical foundations presented in 221A. Topics vary each year.
1-4 units, Spr (Sag)

LINGUIST 222A. Lexicalist Foundations of Syntax—Introductory syntax focusing on the role of the verb and the lexicon in the determination of sentence syntax. Topics: the argument/adjunct distinction, subcategorization and argument structure, motivation for a lexicalist approach, principles governing argument expression, operations on argument structure and grammatical function changing rules, unbounded dependencies, and the approach to unbounded dependencies rooted in principles of lexical expression and subcategorization satisfaction.
2-4 units, Aut (Sells)

LINGUIST 222B. Lexical Foundations Seminar: Semantic Prominence and Argument Realization—The effect of semantic precedence relations among coarguments on their syntactic expression through a study of thematic hierarchies and proto-roles. Relative contributions to argument realization of event structure, causal order, and semantic properties of nouns. Case studies may include dative verbs, two-argument activity verbs, and psych-verbs. Prerequisite: 222A or 232A.
2-4 units, Spr (Levin)

LINGUIST 224A. Introduction to Formal Universal Grammar—(Same as 124A; see 124A.)
4 units (Bresnan) not given 2004-05

LINGUIST 224B. Advanced Topics in Lexical Functional Grammar—A formal model of universal grammar explaining radical cross-linguistic variation in syntactic structure.
1-4 units (Bresnan) not given 2004-05

LINGUIST 225. Seminar in Syntax: The Architecture of Grammar—(Same as 125; see 125.)
2-4 units, Win (Wasow)
LINGUIST 225A. Syntactic Variation—(Same as 125A; see 125A.)
1-4 units, Aut (Zwicky)

LINGUIST 227A. Research Seminar in Syntax: wh-movement
1-4 units, Aut (Sag)

LINGUIST 227B. Research Seminar on Optimization in Grammar—Current topics. Topics change annually; may be repeated for credit.
1-4 units (Bresnan) not given 2004-05

LINGUIST 228. Real English: The Syntax of Language Use—(Same as 128; see 128.)
4 units (Bresnan, Zaenen) not given 2004-05

LINGUIST 229. Syntax Research Seminar—Recent analyses of major syntactic phenomena using the approach of the minimalist program. Topics chosen according to student interest.
1-2 units, Win, Spr (Sells)

LINGUIST 230A. Introduction to Semantics and Pragmatics—Introduction to meaning in natural language. Topics: elementary set theory; propositional logic, predicate logic, and lambda calculus, and their relation to semantic analysis; model theoretic characterizations of meaning and semantic properties of English conjunctions and determiners. Grice’s theory of implicature, speech acts, Davidson’s theories of logical form, and Montague Grammar. Recommended: familiarity with elementary logic and set theory.
2-4 units, Win (Beaver)

LINGUIST 230B. Semantics and Pragmatics—Expands on 230A. Standard approaches to formal semantics (Montague grammar, DRT, and basic dynamic semantics). Analyses of selected semantic phenomena in these frameworks. Prerequisites: 230A; or combination of 130 and PHIL 159 and 160.
2-4 units (Beaver) not given 2004-05

LINGUIST 232A. Lexical Semantics—Introduction to issues in word meaning, focused primarily around verbs. Overview of the core semantic properties of verbs and the organization of the verb lexicon. Approaches to lexical semantic representation, including semantic role lists, protorefs, causal and aspectual theories of event conceptualization.
2-4 units, Aut (Levin)

LINGUIST 233A. Semantics Seminar: Tense and Aspect—(Same as 133A; see 133A.)
1-4 units, Win (Fong)

LINGUIST 233B. Semantics Seminar
1-4 units, Spr (Peters)

LINGUIST 234. Discourse Analysis—The organization of language above the sentence level, and the manifestation of language in context. Practical experience in working with discourse data.
4 units, Win (Buchstaller)

LINGUIST 235. Quantitative and Probabilistic Explanation in Linguistics—Capturing the soft constraints inherent in linguistic systems, based on quantitative evidence obtained from linguistic corpora. Computer tools for collecting and modeling data. Emphasis is on syntax.
3-4 units, Win (Manning)

LINGUIST 236. Speech Recognition and Synthesis—(Same as CS 224S.) Introduction to automatic speech recognition and speech synthesis/text-to-speech. Focus is on key algorithms including noisy channel model, hidden Markov models (HMMs), Viterbi decoding, N-gram language modeling, unit selection synthesis, and roles of linguistic knowledge. Prerequisite: programming experience. Recommended: familiarity with probability.
2-4 units, Win (Jurafsky)

LINGUIST 237. Natural Language Processing—(Same as CS 224N.) Algorithms for processing linguistic information and the underlying computational properties of natural languages. Morphological, syntactic, and semantic processing from a linguistic and an algorithmic perspective. Focus is on modern quantitative techniques in NLP, using large corpora, statistical models for acquisition, representation systems. Prerequisites: LINGUIST 138/238 or CS 121/221, and programming experience. Recommended: basic familiarity with logic and probability.
3-4 units, Spr (Manning)

LINGUIST 238. Introduction to Computer Speech and Language Processing—(Same as 138; see 138.)
4 units, Aut (Jurafsky)

LINGUIST 239D. Discourse and Dialogue Systems
3-4 units, Win (Peters)

LINGUIST 239E. Topics in Computational Linguistics: Grammar Engineering—Hands-on introduction to techniques for implementation of linguistic grammars, drawing on sound grammatical theory and engineering skills. The implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic knowledge of syntactic theory or 120. No prior programming skills required.
1-4 units, Win (Flickinger, Oepen)

LINGUIST 239F. Finite State Methods in Natural Language Processing—Introduction to the theory and available technology for finite state language processing. The applications range from tokenization to phonological and morphological analysis, disambiguation, and shallow parsing.
3-4 units, Aut (Karttunen)

LINGUIST 239I. Text Retrieval and Mining—(Enroll in CS 276A.)
3 units, Aut (Manning, RagHAVan)

LINGUIST 239J. Web Search and Mining—(Enroll in CS 276B.)
3 units, Win (Manning, RagHAVan)

LINGUIST 239M. Human and Machine Translation—(Same as 139M; see 139M.)
4 units, Aut (Kay)

LINGUIST 239P. Programming and Algorithms for Natural Language Processing—(Same as 139P; see 139P.)
3-4 units, Win (Kay)

LINGUIST 239S. Spoken Dialogue Systems—(Same as SYMBSYS 121K/221K.) Theories and practices around building speech recognition-based dialogue systems. Differences between speech and graphical interfaces. Skills in application design and implementation; design of usability experiments to gauge the effectiveness of application design principles. Recommended: some programming background.
2-4 units, Aut (Byrne, Cohen)

LINGUIST 240. Language Acquisition I—(Same as 140; see 140.)
4 units, Aut (E. Clark)

LINGUIST 241. Language Acquisition II: Advanced Topics in Language Acquisition—Ingredients for modeling language acquisition: general versus specialized learning mechanisms; memory; positive and negative evidence; single exemplars versus rules; paradigms and constructions.
1-4 units, Win (E. Clark)

LINGUIST 246. Psycholinguistics—(Enroll in PSYCH 214.)
1-3 units (H. Clark) not given 2004-05

LINGUIST 247. Seminar in Psycholinguistics: Psycholinguistics of Conversational Speech—(Same as PSYCH 227.) Psychological processes for spontaneous, conversational speech. Current theories and issues in production and comprehension. Possible topics include turn-taking, prosody in spontaneous speech, lexical choice, accommodation, collaboration, disfluencies, orientation, grammar, and methodological issues in conversational corpus investigation.
2-4 units, Spr (Jurafsky, H. Clark)
LINGUIST 250. Sociolinguistic Theory and Analysis—Introduction to theories of the interaction between language and social life, combining social and linguistic theory. Classic articles in variation, dialectology, the ethnography of speaking, verbal interaction, and language contact. Prerequisite: graduate standing in Linguistics or consent of instructor.
4 units, Aut (Rickford)

LINGUIST 251. Pidgin and Creole Sociolinguistics—(Same as 151; see 151.)
2-4 units, Spr (Rickford)

LINGUIST 255A. Topics in Sociolinguistics: Variation in Discourse and Grammaticalization—The quotative system. Prerequisites: 150/250 or consent of instructor.
1-4 units, Spr (Buchstaller)

LINGUIST 255B. Topics in Sociolinguistics: Community Studies of Variation—Prerequisites: 150/250 or consent of instructor.
1-4 units (Eckert) not given 2004-05

LINGUIST 258. Analysis of Variation—The quantitative studies of linguistic variability in time, space, and society. Theoretical issues are related to social and linguistic constraints in variation. Hands-on work with variable data. Prerequisites: 105/205 and 150/250, or consent of instructor.
4 units (Eckert) not given 2004-05

LINGUIST 259. Language in the U.S.—(Same as 159; see 159.)
3-5 units (Rickford) not given 2004-05

LINGUIST 260A. Historical Morphology and Phonology—Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction.
4 units (Kiparsky) not given 2004-05

LINGUIST 260B. Historical Morpho-Syntax—Morphological and syntactic variation and change. Reanalysis, grammaticalization. The use of corpora and quantitative evidence.
2-4 units, Spr (Kiparsky)

LINGUIST 270. Structure of English Words—(Same as 70; see 70.)
4-5 units, Aut (Leben)

LINGUIST 273. African American Vernacular English—(Same as 73; see 73.)
3-5 units (Rickford) not given 2004-05

LINGUIST 278C. Topics in East Asian Syntax—(Same as CHINLIT 392.) Claims and analyses in the transformational syntax literature concerning the structure of modern Chinese; comparisons include Japanese and Korean. Basic literacy in modern transformational approaches. Topics include: Chinese clausal structure, the syntax-phonology and syntax-semantics interfaces, including the notion of logical form. Readings according to student interest.
1-4 units, Spr (Sells)

LINGUIST 287. Field Methods—(Same as 187; see 187.)
2-4 units (Staff) not given 2004-05

LINGUIST 289. Linguistics and the Teaching of English as a Second/Foreign Language—(Same as 189; see 189.)
4-5 units, Win (Hubbard)

LINGUIST 292. The History of Chinese—(Enroll in CHINLIT 192/292.)
4 units (Sun) not given 2004-05

LINGUIST 390. M.A. Project
1-3 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 394. TA Training Workshop—For second year graduate students in linguistics.
1 unit, Aut (Sells)

LINGUIST 395A,B,C. Research Workshop—Restricted to students in the doctoral program. Student presentations of research toward qualifying papers.
1-2 units, A: Spr (E. Clark), B: Spr (Sag), C: Sum (Sells)

LINGUIST 396. Research Projects in Linguistics—Mentored research project for first-year graduate students in linguistics.
2-3 units, Win (Staff)

LINGUIST 397. Directed Reading
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 398. Directed Research
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 399. Dissertation Research
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 435A. Research Seminar in Applied Linguistics—(Enroll in EDUC 435X.)
1-4 units (Baugh) not given 2004-05
DIVISION OF LITERATURES, CULTURES, AND LANGUAGES

Division Head: Roland Greene
Division Offices: Building 260, Rooms 114-119
Mail Code: 94305-2005
Phone: (650) 724-1333
Email: dlcl@stanford.edu
Web Site: http://dlcl.stanford.edu

The Division of Literatures, Cultures, and Languages consists of six academic departments (Asian Languages, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese) as well as the Language Center which oversees language instruction at Stanford. All the departments of the division offer academic programs leading to B.A., M.A., and Ph.D. degrees. The division brings together scholars and teachers dedicated to the study of literatures, cultures, and languages from humanistic and interdisciplinary perspectives. The departments in the division are distinguished by the quality and versatility of their faculty, a wide variety of approaches to cultural tradition and expression, and the intense focus on the mastery of languages. This wealth of academic resources, together with small classes and the emphasis on individual advising, creates a superior opportunity for students who wish to be introduced to or develop a deeper understanding of non-English speaking cultures.

The division’s departments and the Language Center offer instruction at all levels, including introductory and general courses that do not require knowledge of a language other than English. As indicated, they satisfy a variety of undergraduate requirements and can serve as a basis for developing a minor or a major program in the member departments. The more advanced and specialized courses requiring skills in a particular language are listed under the relevant departments, as are descriptions of the minor and major programs.

COURSES

DLCL 309. The Teaching of Literature—Prepares graduate students in DLCL departments to teach literature at the undergraduate level. Topics include: the opportunities and problems of transposing a research project into a feasible course; the logic of syllabi and reading lists; the structuring of a course from week to week; and other matters relevant to first-time teachers of literature. Supervised by the Graduate Affairs Committee of the DLCL.
2 units, Au, Win, Spr (Staff)

DLCL 310. The Development of a Dissertation from Prospectus to Defense—Meets regularly throughout the year to advise and support dissertation-level students as they prepare a prospectus, begin writing, submit chapters, and complete their projects. Focus of the workshop shifts from term to term as appropriate to the participants. Supervised by the Graduate Affairs Committee of the DLCL.
2 units, Aut, Win, Spr (Staff)

DLCL 311. Professional Workshop—Meets regularly throughout the year to discuss issues in the professional study of literature. While the general focus is on the academic job market, other topics include: the place of literature in the higher education system of the U.S.; the shape of academic careers; and the challenges of research and teaching at different kinds of institutions. Supervised by the Graduate Affairs Committee of the DLCL.
2 units, Aut, Win, Spr (Staff)

MATHEMATICAL AND COMPUTATIONAL SCIENCE

Director: Bradley Efron
Associate Director: Susan Holmes
Committee in Charge: Takeshi Amemiya (Economics), Gunnar Carlsson (Mathematics), Richard Cottle (Management Science and Engineering), Thomas M. Cover (Electrical Engineering, Statistics), Bradley Efron (Statistics), Gene Golub (Computer Science), J. Michael Harrison (Graduate School of Business), Susan Holmes (Statistics), Doron Levy (Mathematics), Art Owen (Statistics), George Papanicolaou (Mathematics), Eric Roberts (Computer Science), David Rogosa (Education), David Siegmund (Statistics), Arthur F. Veinott Jr. (Management Science and Engineering), Julie Zelenski (Computer Science)

Program Administrator: Helen Tombropoulos
Program Offices: Sequoia Hall, 390 Serra Mall
Mail Code: 94305-4065
Phone: (650) 723-2620
Email: helen@stat.stanford.edu
Web Site: http://www.stanford.edu/group/mathcompisci

Courses given in Mathematical and Computational Science have the subject code MCS. For a complete list of subject codes, see Appendix.

This interdepartmental, interschool undergraduate program is designed as a major for students interested in the mathematical and computational sciences, or in the use of mathematical ideas and analysis in problems in the social or management sciences. It provides a core of mathematics basic to all of the mathematical sciences and an introduction to the concepts and techniques of automatic computation, optimal decision-making, probabilistic modeling, and statistical inference. It also provides an opportunity for elective work in any of the mathematical science disciplines at Stanford.
The program utilizes the faculty and courses of the departments of Computer Science, Management Science and Engineering, Mathematics, and Statistics. It prepares students for graduate study or employment in the mathematical and computational sciences or in those areas of applied mathematics which center around the use of computers and are concerned with the problems of the social and management sciences.

A biology track for students interested in applications of mathematics, statistics and computer science to the biological sciences (bioinformatics, computational biology, statistical genetics, neurosciences, etc.) is now offered.

**UNDERGRADUATE PROGRAMS**

**BACHELOR OF SCIENCE**

The requirement for the bachelor’s degree, beyond the University’s basic requirements, is an approved course program of 72 to 77 units, distributed as follows:

**Mathematics (MATH): 29-31 units**

- Calculus
  - 41. Calculus A 5
  - 42. Calculus A, W 5
- Linear Algebra & Differential Calculus of Several Variables
  - 51. Honors Advanced Calculus A 5
- Integral Calculus of Several Variables
  - 52. Honors Advanced Calculus W 5
- Ordinary Differential Equations with Linear Algebra
  - 53. Honors Advanced Calculus S 5
- Applied Group Theory (WIM)
- Field Theory (WIM)
  - 110. Field Theory (WIM) W 3
- Ordinary Differential Equations with Linear Algebra
  - 113. Linear Algebra and Matrix Theory A, W 3

**Computer Science (CS): 16-18 units**

- Discrete Structures (Accelerated)
  - 103X. Discrete Structures (Accelerated) A 3-4
- Discrete Mathematics for Computer Science
  - 103A. Discrete Mathematics for Computer Science A, W 3
- Programming Methodology and Abstractions (Accel.)
  - 106X. Programming Methodology and Abstractions (Accel.) A, W 3-5
- Programming Methodology
  - 106A. Programming Methodology A, W 3-5
- Programming Abstractions
  - 106B. Programming Abstractions W, S 3-5

And two of the following (CS):

- Programming Paradigms
  - 107. Programming Paradigms A, S 3-5
- Introduction to Scientific Computing (same as CME 110)
  - 137. Introduction to Scientific Computing (same as CME 110) W 3-4
- Automata and Complexity Theory
  - 154. Introduction to Automata and Complexity Theory A, S 3-4
- Analysis and Design of Algorithms
  - 161. Analysis and Design of Algorithms A, W 3-4

**Management Science and Engineering (MS&E): 8-9 units**

- Optimization (enroll in ENGR 62)
  - 111. Optimization (enroll in ENGR 62) A, S 3-4
- Stochastic Modeling
  - 121. Introduction to Stochastic Modeling W 4

Or three of the following:

- Linear and Nonlinear Optimization
  - 211. Linear and Nonlinear Optimization A 3-4
- Network and Integer Programming
  - 212. Network and Integer Programming W 3
- Stochastic Modeling
  - 221. Stochastic Modeling W 3
- Stochastic Decision Models
  - 251. Stochastic Decision Models W 3

**Statistics (STATS): 11 units**

- Theory of Probability
  - 116. Theory of Probability A, S 3-5
- Introduction to Applied Statistics
  - 191. Introduction to Applied Statistics S 3-4
- Intro. to Regression Models and Analysis of Variance
  - 203. Intro. to Regression Models and Analysis of Variance W 3-4
- Statistical Inference
  - 200. Statistical Inference W 3

**ELECTIVES (9 UNITS)**

Three courses in mathematical and computational science, 100-level or above, and at least 3 units each. At least one must be chosen from the following:

**Electives (9 units)**

- Advanced Topics in Econometrics
  - ECON 102C. Advanced Topics in Econometrics S 5
- Introduction to Financial Economics
  - ECON 140. Introduction to Financial Economics S 5
- Game Theory and Economic Applications (prerequisite ECON 51)
  - ECON 160. Game Theory and Economic Applications S 5
- Experimental Economics
  - ECON 179. Experimental Economics S 5
- The Fourier Transform and its Applications
  - EE 261. The Fourier Transform and its Applications A, W 3
- Linear and Nonlinear Optimization
  - MS&E 211. Linear and Nonlinear Optimization A 3-4
- Network and Integer Programming
  - MS&E 212. Network and Integer Programming S 3
- Stochastic Modeling
  - MS&E 221. Stochastic Modeling W 3
- Stochastic Decision Models
  - MS&E 251. Stochastic Decision Models W 3
- Mathematics of Sports (same as STATS 50)
  - MCS 100. Mathematics of Sports (same as STATS 50) (not given 2004-05) A 3
- Complex Variable
  - MATH 106. Functions of a Complex Variable A 3
- Introduction to Combinatorics and its Applications
  - MATH 108. Introduction to Combinatorics and its Applications A 3
- Functions of a Real Variable
  - MATH 115. Functions of a Real Variable A 3
- Complex Analysis
  - MATH 116. Complex Analysis S 3
- Numerical Analysis
  - MATH 118. Numerical Analysis A 3
- Partial Differential Equations I
  - MATH 131. Partial Differential Equations I A, W 3
- Partial Differential Equations II
  - MATH 132. Partial Differential Equations II S 3
- Nonlinear Dynamics and Chaos
  - MATH 135. Nonlinear Dynamics and Chaos S 3
- First-Order Logic
  - PHIL 151/251. First-Order Logic W 4
- Data Analysis
  - STATS 202. Data Analysis W 3
- Introduction to Stochastic Processes
  - STATS 217. Introduction to Stochastic Processes W 3

For Computer Science (CS), electives can include courses not taken as units under the CS list above and the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Object-Oriented Systems Design</td>
<td>WS 3-4</td>
</tr>
<tr>
<td>Operating Systems and Systems</td>

<td>A, W 3</td>
</tr>
</tbody>
</table>

With the adviser’s approval, courses other than those offered by the sponsoring departments may be used to fulfill part of the elective requirement. These may be in biology, economics, electrical engineering, industrial engineering, medicine, etc., that might be relevant to a mathematical sciences major, depending on the particular interest of the student.

1. At least three quarters before graduation, majors must file with their advisers a plan for completing degree requirements.
2. All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfactory/no credit only.
3. A course used to fulfill the requirements of one section of the program may not be applied toward the fulfillment of the requirements of another section.
4. The student must have a grade point average (GPA) of 2.0 or better in all course work used to fulfill the major requirement.

**MATHEMATICAL AND COMPUTATIONAL BIOLOGY TRACK**

Replace MATH 109/110 with either:

- Methods of Theoretical Population Biology
  - BIOSCI 221. Methods of Theoretical Population Biology A 4
- Nonlinear Dynamic Systems
  - MATH 135. Nonlinear Dynamic Systems W 3

Take at least 2 courses from the Biological Sciences core:

- Genetics and Biochemistry
  - BIOSCI 41. Genetics and Biochemistry A 5
- Cell Biology and Animal Physiology
  - BIOSCI 42. Cell Biology and Animal Physiology W 5
- Plant Biology, Evolution, and Ecology
  - BIOSCI 43. Plant Biology, Evolution, and Ecology S 5

Take a third course either from the Core or

- Genetics of Prokaryotes
  - BIOSCI 133. Genetics of Prokaryotes A 3
- Replication of DNA
  - BIOSCI 134. Replication of DNA W 3
- EvolutionaryPaleobiology
  - BIOSCI 136. Evolutionary Paleobiology A 4
- Advanced Genetics
  - BIOSCI 203. Advanced Genetics A 4

Honors students should take 3 of the following:

- Anthropological Genetics
- Genetic Structure of Populations
- Biostatistics
  - BIOSCI 141. Biostatistics A, W 4-5
- Statistical Models in Biology (not given 2004-05)

**Units**

473
MINORS

The minor in Mathematical and Computational Science is intended to provide an experience of the four constituent areas: Computer Science (CS), Mathematics (MATH), Management Science and Engineering (MS&E), and Statistics (STATS). Four basic courses are required:

CS 106X. Programming Methodology and Abstractions (Accelerated) or CS 106A.B. Programming Methodology
MATH 51. Linear Algebra and Differential Calculus of Several Variables or MATH 103. Matrix Theory and Its Applications
ENGR 62. Introduction to Optimization or MS&E 121. Introduction to Stochastic Modeling

In addition to the above, the minor requires a total of 3 courses from the following, two of which must be in different departments:

CS 107. Programming Paradigms
CS 137. Introduction to Scientific Computing (same as CME 108)
CS 138. MATLAB and MAPLE for Science and Engineering Applications
CS 154. Introduction to Automata and Complexity Theory
EE 261. The Fourier Transform and its Applications
ECON 102C. Advanced Topics in Econometrics
ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)
MS&E 211. Linear and Nonlinear Optimization
MS&E 212. Network and Integer Optimization
MS&E 221. Stochastic Modeling
MS&E 251. Stochastic Decision Models
MATH 103. Matrix Theory and Its Applications
MATH 106. Functions of a Complex Variable
MATH 108. Introduction to Combinatorics and its Applications
MATH 109. Applied Group Theory
MATH 110. Applied Number Theory and Field Theory
MATH 115. Functions of a Real Variable or MATH 171. Fundamental Concepts of Analysis
MATH 131. Partial Differential Equations I
MATH 132. Partial Differential Equations II
MATH 135. Nonlinear Dynamics and Chaos
PHIL 160A. First-Order Logic
STATS 200. Introduction to Statistical Inference
STATS 202. Data Analysis
STATS 205. Introduction to Regression Models and Analysis of Variance
STATS 217. Introduction to Stochastic Processes

Other upper-division courses appropriate to the program major may be substituted with the consent of the program director. Undergraduate majors in the constituent programs cannot count courses in their own departments.

HONORS PROGRAM

The honors program is designed to encourage a more intensive study of mathematical sciences than the B.S. program. In addition to meeting all requirements for the B.S., the student must:

1. Maintain an average letter grade equivalent in mathematical sciences courses of at least 3.4.
2. Complete at least 15 units in mathematical sciences in addition to the requirements for the major listed above. These courses should form a sustained effort in one area and constitute a program approved by the committee in charge of the Mathematical and Computational Science Program.
3. Include in the above 15 units at least one of the following:
   a) an approved higher-level graduate course
   b) participation in a small group seminar
   c) at least three units of directed reading

Students interested in doing honors work should consult with their advisers by the last quarter of the junior year to prepare a program of study for submission to the committee in charge for approval. Honors work may be concentrated in many fields outside the Mathematical and Computational Science programs, for example, biological sciences, medicine, physics.

COURSES

3 units (Cover) not given 2004-05

MATHEMATICS

Emeriti: (Professors) Kai Lai Chung, Robert Finn, Samuel Karlin, Joseph Keller, Georg Kreisel, Harold Levine, Robert Osserman, Hans Samelson, Mary Sunseri
Chair: Richard Schoen
Assistant Professors: Eleny Ionel, Doron Levy, Ravi Vakil
Szegő Assistant Professors: Benjamin Brubaker, Adrian Clingher, Razvan Fetecau, Tianhong Li, Brian Munson, Mihran Papikian
Courtesy Professors: Renata Kallosh, Grigori Mints
Lecturers: Alexander Elgart, Mark Lucianovic, Benjamin Schlein
Visiting Professor: Alice Silverberg
Web site: http://math.stanford.edu

Courses given in Mathematics have the subject code MATH. For a complete list of subject codes, see Appendix.

The Department of Mathematics offers programs leading to the degrees of Bachelor of Science, Master of Science, and Doctor of Philosophy in Mathematics, and participates in the program leading to the B.S. in Mathematical and Computational Science. The department also participates in the M.S. and Ph.D. degree programs in Scientific Computing and Computational Mathematics and the M.S. degree program in Financial Mathematics.

ADVANCED PLACEMENT FOR FRESHMEN

Students of unusual ability in mathematics often take one or more semesters of college-equivalent courses in mathematics while they are still in high school. Under certain circumstances, it is possible for such students to secure both advanced placement and credit toward the bachelor’s degree. A decision as to placement and credit is made by the department after consideration of the student’s performance on the Advanced Placement Examination in Mathematics (forms AB or BC) of the College Entrance Examination Board, and also after consideration of transfer credit in mathematics from other colleges and universities.

The department does not give its own advanced placement examination. Students can receive either 5 or 10 units of advanced placement credit, depending on their scores on the CEEB Advanced Placement Examination. Entering students who have credit for two quarters of single variable calculus (10 units) are encouraged to enroll in MATH 51-53 in multivariable mathematics, or the honors version 51H-53H. These three-course sequences, which can be completed during the freshman year, supply the necessary mathematics background for most majors in science and engineering. They also serve as excellent background for the major or minor in Mathematics, or in Mathematical and Computational Science.

Students who have credit for one quarter of single variable calculus (5 units) should take MATH 42 in the Autumn Quarter and 51 in Winter Quarter. Options available in the Spring Quarter include MATH 52, 53, or 103. For proper placement, contact the Department of Mathematics.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

The following department requirements are in addition to the University’s basic requirements for the bachelor’s degree.

MAJORS

Students wishing to major in Mathematics must satisfy the following requirements:

1. Department of Mathematics courses totaling at least 49 units credit; such courses must be taken for a letter grade. For the purposes of this requirement, courses crosslisted with another department, such as
MATH 105 (STATS 116) and MATH 160A and 160B (PHIL 151 and 152), count as Department of Mathematics courses.

2. Additional courses taken from Department of Mathematics courses numbered 100 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units cred- it. At least 9 of these units must be taken for a letter grade.

3. A Department of Mathematics adviser must be selected, and the courses selected under items ‘1’ and ‘2’ above must be approved by the department’s director of undergraduate study, acting under guidelines laid down by the department’s Committee for Undergraduate Affairs. The Department of Mathematics adviser can be any member of the department’s faculty.

4. To receive the department’s recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation. In any case, students are strongly encouraged to declare as early as possible, preferably by the end of the sophomore year.

Students are normally expected to complete either the sequence 19, 20, 21 or the sequence 41, 42 (but not both). Students with an Advanced Placement score of at least 4 in BC math or 5 in AB math may receive 10 units credit and fulfill requirement ‘1’ by taking at least 39 units of Department of Mathematics courses numbered 51 and above. Students with an Advanced Placement score of at least 3 in BC math or at least 4 in AB math may receive 5 units credit and fulfill requirement ‘1’ by taking at least 44 units of Department of Mathematics courses numbered 42 and above.

Sophomore seminar courses may be counted among the choice of courses under item ‘1’. Other variations of the course requirements laid down above (under items ‘1’ and ‘2’) may, in some circumstances, be allowed. For example, students transferring from other universities may be allowed credit for some courses completed before their arrival at Stanford. However, at least 24 units of the 49 units under item ‘1’ above and 9 of the units under item ‘2’ above must be taken at Stanford. In all cases, approval for variations in the degree requirements must be obtained from the department’s Committee for Undergraduate Affairs. Application for such approval should be made through the department’s director of undergraduate study.

It is to be emphasized that the above regulations are minimum requirements for the major; students contemplating graduate work in mathematics are strongly encouraged to include the courses 116, 120, 121, 147 or 148, and 171 in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items ‘1’ and ‘2’ above, including at least one 200-level course. Such students are also encouraged to consider the possibility of taking the honors program, discussed below.

To help develop a sense of the type of course selection (under items ‘1’ and ‘2’ above) which would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a few of a very large number of possible combinations of courses that could be taken in fulfillment of the Mathematics major requirements:

Example 1—A general program (a balanced program of both pure and applied components, without any particular emphasis on any one field of mathematics or applications) as follows:

a) either MATH 19, 20 and 21, or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 103; 106; 109; 110; 115

5. plus any selection of at least eight of the following courses, including

three Department of Mathematics courses: MATH 105 (STATS 116), 108, 131, 132, 143, 147, 148, 152, 161, 173; PHYSICS 51, 53, 55; CS 137; ECON 50. (These specific courses from other departments are only meant as an example. There are many suitable courses in several departments which can be taken to fulfill part or all of requirement 2.)

Example 2—A theoretical program (recommended for those contemplating possible later graduate work (see, also, the discussion of the honors program below), providing an introduction to the main areas of mathematics both broader and deeper than the general program outlined above):

a) either MATH 19, 20 and 21, or 41 and 42 (or satisfactory Advanced Placement credit)

b) either the sequence 51, 52, 53, or the sequence 51H, 52H, 53H; 106 or 116; 113, 120; 171

c) plus nine or more of the following courses, including at least one from each group: algebra sequence 114, 121, 152, 153, 156; analysis sequence 131, 132, 135, 151, 174A, 174B, 175; geometry/topology sequence 143, 145, 147, 148, 173; logic and set theory sequence 160A,B, 161.

In addition, those contemplating eventual graduate work in Mathematics should seriously consider including at least one graduate-level math course such as MATH 205A, 210A, or 215A or B. Such students should also consider the possibility of entering the honors program.

(Students taking 51, 52, 53 rather than 51H, 52H, 53H should consider taking 113 before attempting 114.)

Example 3*—An Applied Mathematics program:

a) either MATH 19, 20, and 21; or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 103; 105 (Statistics 116); 106; 108; 109; 110; 115; 131

b) plus at least 15 units of additional courses in Applied Mathematics, including, for example, suitable courses from the departments of Physics, Computer Science, Economics, Engineering, and Statistics.

* Students with interests in applied mathematics, but desiring a broader-based program than the type of program suggested in Example 3, including significant computational and/or financial and/or statistical components, are encouraged to also consider the Mathematics and Computational Science program.

MINORS

To qualify for the minor in Mathematics, a student should successfully complete, for a letter grade, at least six Department of Mathematics courses numbered 51 or higher, totaling a minimum of 24 units. It is recommended that these courses include either the sequence 51, 52, 53 or the sequence 51H, 52H, 53H. At least 12 of the units applied toward the minor in Mathematics must be taken at Stanford. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

HONORS PROGRAM

The honors program is intended for students who have strong theoretical interests and abilities in mathematics. The goal of the program is to give students a thorough introduction to the main branches of mathematics, especially analysis, algebra, and geometry. Through the honors thesis, students may be introduced to a current or recent research topic, although occasionally more classical projects are encouraged. The program provides an excellent background with which to enter a master’s or Ph.D. program in Mathematics. Students successfully completing the program are awarded a B.S. in Mathematics with Honors.

It is recommended that the sequence 51H, 52H, 53H be taken in the freshman year. Students who have instead taken the sequence 51, 52, 53 in their freshman year may be permitted to enter the honors program, but such entry must be approved by the Department of Mathematics Committee for Undergraduate Affairs.

To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

1. The selection of courses under items ‘1’ and ‘2’ above must include all the math courses 106 or 116, 120, 171 and also must include seven or more additional courses, with at least one from each of the groups: algebra sequence 114, 121, 152, 153, 156; analysis sequence 131, 132, 135, 151, 174A, 174B, 175; 176; geometry/topology sequence 143, 145, 147, 148, 173; logic and set theory sequence 160A, 160B, 161.

2. Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics faculty, and map out a concentrated reading program under the direction and guidance of the adviser. During the senior year, the student must enroll in MATH 197 for a total of 6 units (typically spread over two quarters), and work toward completion of the thesis under
the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for MATH 197 are required in addition to the course requirements laid out under items ‘1’ and ‘2’ above and in addition to all other requirements for math majors.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range). MATH 205A, 210A, and 215A or B are especially recommended in this context.

Students with questions about the honors program should see the Director of Undergraduate Advising.

BACHELOR OF SCIENCE IN MATHEMATICAL AND COMPUTATIONAL SCIENCE

The Department of Mathematics participates with the departments of Computer Science, Management Science and Engineering, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the “Mathematical and Computational Science” section of this bulletin.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The University’s basic requirements for the master’s degree are discussed in the “Graduate Degrees” section of this bulletin. Students entering Stanford in 2001 or later should pay particular attention to the University’s course requirements for graduate degrees. The following are specific departmental requirements:

Candidates must complete an approved course program of 45 units of courses beyond the department requirements for the B.S. degree, of which at least 36 units must be Mathematics Department courses, taken for a letter grade. The Mathematics courses must include at least 18 units numbered 200 or above. The candidate must have a grade point average (GPA) of 3.0 (B) over all course work taken in Mathematics, and a GPA of 3.0 (B) in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department’s Director of Graduate Studies.

For the M.S. degree in Financial Mathematics, see the “Financial Mathematics” section of this bulletin.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the “School of Education” section of this bulletin or address inquiries to Credential Secretary, School of Education.

MASTER OF ARTS IN TEACHING (MATHEMATICS)

In cooperation with the School of Education, the department offers a program leading to a Master of Arts in Teaching (Mathematics). It is intended for candidates who have a teaching credential or relevant teaching experience and wish to strengthen their academic preparation. Detailed requirements are outlined under the “School of Education, Master of Arts in Teaching” section of this bulletin.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the doctorate (residence, dissertation, examinations, etc.) are discussed in the “Graduate Degrees” section of this bulletin. The following are specific departmental requirements:

To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

Beyond the requirements for candidacy, the student must complete a course of study approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. In accordance with University requirements, Ph.D. students must complete a total of 135 course units beyond the bachelor’s degree. These courses should be Department of Mathematics courses or approved courses from other departments. The course program should display substantial breadth in mathematics outside the student’s field of application. The student must receive a grade point average (GPA) of 3.0 (B) or better in courses used to satisfy the Ph.D. requirement. In addition, the student must pass the Department area examination and the University oral examination and pass a reading examination in one foreign language, chosen from French, German, or Russian.

Experience in teaching is emphasized in the Ph.D. program. Each student is required to complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student. Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

For further information concerning degree programs, fellowships, and assistantships, inquire of the academic associate of the department.

PH.D. MINOR

The student should complete both of the following:

1. MATH 106 or 116, 131, 132
2. MATH 113, 114, 120 or 152

These courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable.

In addition, the student should complete 21 units of 200-level courses in mathematics. These must be taken at Stanford and approved by the Department of Mathematics’ Ph.D. minor adviser.

* A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for items ‘1’ or ‘2’.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

INTRODUCTORY AND UNDERGRADUATE

The department offers two sequences of introductory courses in single variable calculus.

1. MATH 41, 42 present single variable calculus. Differential calculus is covered in the first quarter, integral calculus in the second.
2. MATH 19, 20, 21 cover the material in 41, 42 in three quarters instead of two.

There are options for studying multivariable mathematics:

1. MATH 51, 52, 53 cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize application. MATH 51 covers differential calculus in several variables and introduces matrix theory and linear algebra, 52 covers integral calculus in several variables and vector analysis, 53 studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is strongly recommended for incoming freshmen with 10 units of advanced placement credit.
2. MATH 51H, 52H, 53H cover the same material as 51, 52, 53, but with more emphasis on theory and rigor.

The introductory course in modern algebra is Linear Algebra (103 or 113). There are no formal prerequisites for these courses, but appropriate mathematical maturity is expected. Much of the material in 103 is covered in the sequence 51, 52, 53.

MATH 19. Calculus—The content of MATH 19, 20, 21 is the same as the sequence MATH 41, 42 described below, but covered in three quarters, rather than two. GER:2c 3 units, Aut (Lucianovic), Win, Sum (Staff)

MATH 20. Calculus—Continuation of 19. Prerequisite: 19. GER:2c 3 units, Win (Lucianovic), Spr (Staff)

MATH 21. Calculus—Continuation of 20. Prerequisite: 20. GER:2c 4 units, Spr (Lucianovic)
MATH 51. Linear Algebra and Differential Calculus of Several Variables—Geometry and algebra of vectors, systems of linear equations, matrices, vector valued functions and functions of several variables, partial derivatives, gradients, chain rule in several variables, vector fields, optimization. Prerequisite: completion of 21, 42, or a score of at least 4 on the BC Advanced Placement Examination or 5 on the AB Advanced Placement Examination, or consent of instructor. GER:2c
5-6 units, Aut (Simon), Win (Liu), Spr (Humphries), Summer (Staff)

MATH 51A. Linear Algebra and Differential Calculus of Several Variables, ACE—GER:2c
5-6 units, Aut (White), Win (R. Cohen), Spr (Meckes)

MATH 51H. Honors Multivariable Mathematics—For prospective math majors in the honors program and students from other areas of science or engineering who have a strong mathematics background. Three quarter sequence covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Provides a unified treatment of multivariable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement Exam, or consent of the instructor. Recommended: complete at least the first two quarters. GER:2c
5 units, Aut (Ghrist), Win (Erickson), Spr (Meckes), Summer (Staff)

MATH 52. Integral Calculus of Several Variables—Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51.
5 units, Aut (Staff), Win (Wieczorek), Spr (J. Li)

MATH 52H. Honors Multivariable Mathematics—Continuation of 51H. Prerequisite: 51H.
5 units, Win (Simon)

5 units, Aut (Zinger), Win (Liu), Spr (Mazzio, T. Li), Sum (Staff)

MATH 53H. Honors Multivariable Mathematics—Continuation of 52H. Prerequisite: 52H.
5 units, Spr (Staff)

MATH 87Q. Mathematics of Knots, Braids, Links, and Tangles—Stanford Introductory Seminar. Preference to sophomores. Types of knots and how knots can be distinguished from one another by means of numerical or polynomial invariants. The geometry and algebra of braids, including their relationships to knots. Topology of surfaces. Brief summary of applications to biology, chemistry, and physics.
3 units, Spr (Bunin)

UNDERGRADUATE AND GRADUATE

Unless stated, there are no prerequisites for the courses listed below. Where a prerequisite is stated, it may be waived by the instructor.

MATH 103. Matrix Theory and its Applications—Linear algebra and matrices, emphasizing the computational and algorithmic aspects and the scientific problems in which matrix theory is applied. Solution of linear equations. Linear spaces and matrices. Orthogonal projection and least squares. Determinants, eigenvalues, and eigenvectors. GER:2c
3 units, Aut (T. Li, Thiem), Win (Elling, Thiem), Spr (Durrleman, Gromoll), Sum (Staff)

MATH 105. Theory of Probability—(Enroll in STATS 116.)
3-5 units Aut (Taylor), Spr, Sum (Staff)

MATH 106. Functions of a Complex Variable—Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. Prerequisite: 52.
3 units Aut (Galatius), Sum (Staff)

MATH 108. Introduction to Combinatorics and its Applications—Topics: graphs, trees (Cayley’s Theorem, application to phylogony), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or 103 or equivalent.
3 units, Aut (Thiem)

MATH 109. Applied Group Theory—Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. WIM
3 units, Win (Brubaker)

MATH 110. Applied Number Theory and Field Theory—Introduction to number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, with emphasis throughout on algorithms. WIM
3 units, Spr (Brubaker)

MATH 111. Computational Commutative Algebra—Introduction to the theory of commutative rings, ideals, and modules. Systems of polynomial equations in several variables from the algorithmic viewpoint. Groebner bases, Buchberger’s algorithm, elimination theory. Applications to algebraic geometry and to geometric problems. WIM
3 units, Win (Lucianovic)

MATH 113. Linear Algebra and Matrix Theory—Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization. WIM
3 units, Aut (Katznelson), Win (Milgram)

MATH 114. Linear Algebra and Matrix Theory II—Continuation of 113. Deeper study of 113 topics plus additional topics from invariant subspaces, canonical forms of matrices; minimal polynomials and elementary divisors; vector spaces over arbitrary fields; inner products; Jordan normal forms; Hermitian and unitary matrices; multilinear algebra; applications. WIM
3 units, Win (Katznelson), Spr (Milgram)

MATH 115. Functions of a Real Variable—The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Honors math majors and students who intend to do graduate work in mathematics should take 171. Prerequisite: 51.
3 units, Aut (Durrelman), Win (Gromoll)
3 units, Spr (Clingher)

3 units, Aut (Levy)

MATH 120. Modern Algebra—Basic structures in algebra: groups, rings, and fields. Elements of group theory: permutation groups, finite Abelian groups, p-groups, Sylow theorems. Polynomial rings, principal ideal domains, unique factorization domains. WIM
3 units, Aut (Diaconis), Spr (Thiem)

MATH 121. Modern Algebra II—Continuation of 120. Fields of fractions. Solvable and simple groups. Elements of field theory and Galois theory. Prerequisite: 120.
3 units, Win (Milgram)

MATH 131. Partial Differential Equations I—First-order equations, classification of second-order equations. Initial-boundary value problems for heat, wave, and related equations. Separation of variables, eigenvalue problems, Fourier series, existence and uniqueness questions. Prerequisite: 53 or 130 or equivalent.
3 units, Aut (Fetecau), Win (T. Li)

3 units, Spr (Nedelec)

MATH 135. Nonlinear Dynamics and Chaos—Topics: one- and two-dimensional flows, bifurcations, phase plane analysis, limit cycles and their bifurcations. Lorenz equations, fractals and strange attractors. Prerequisite: 51 and 53 or equivalent.
3 units, Win (White)

3 units, Aut (Dembo)

MATH 139. Introduction to the Mathematics of Medical Imaging—The mathematical background behind medical imaging problems. Basic model is X-ray tomography. Topics within the context of tomography include the Radon transform and its inversion formula, Fourier and Fourier series, sampling and filtering. Prerequisites: intermediate to advanced undergraduate; multivariable calculus; linear algebra.
3 units, Win (Mazzocco)

3 units, Aut (Khuri)

MATH 145. Algebraic Geometry—Real algebraic curves, Hilbert’s nullstellensatz, complex affine and projective curves, Bezout’s theorem, the degree/genre formula, Riemann surfaces, Riemann-Roch theorem. Prerequisites: 106 or 116 and either 120 or 109. Recommended: familiarity with surfaces, e.g., from one of 143, 147, 148, or 173.
3 units, Spr (Clingher)

MATH 147. Differential Topology—Smooth manifolds, transversality, Sard’s theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan curve theorem. Prerequisite: 115 or 171.
3 units (Staff) alternate years, given 2005-06

MATH 148. Algebraic Topology—Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or 120.
3 units, Spr (R. Cohen)

MATH 151. Introduction to Probability Theory—Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; central limit theorem and laws of large numbers. Prerequisite: 52 or consent of instructor.
3 units, Win (Liu)

MATH 152. Elementary Theory of Numbers—Euclid’s algorithm, fundamental theorems on divisibility; prime numbers, congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; Lagrange’s theorem and its applications; quadratic residues; introduction to the theory of binary quadratic forms.
3 units, Spr (Bump)

MATH 156. Group Representations—Designed for undergraduates. Experimental, primarily examining symmetries on objects such as vector spaces (“group representations”), geometric objects (“geometric group actions”), and discrete sets (combinatorics). Topics: group representations and their characters, classification of permutation group representations using partitions and Young tableaux, group actions on sets and the Burnside ring, and spherical space forms. Prerequisites: basic knowledge of linear algebra (51 and 53, or 103 or 113) and group theory (109 or 120).
3 units, Aut (Milgram)

MATH 160A. First-Order Logic—(Enroll in PHIL 151/251.)
4 units, Win (Segerberg)

MATH 160B. Computability and Logic—(Enroll in PHIL 152/252.)
4 units, Spr (Segerberg)

MATH 161. Set Theory—Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor’s Alephs and cardinal arithmetic. Open problems in set theory.
3 units, Win (White)

MATH 162. Philosophy of Mathematics—(Enroll in PHIL 162/262.)
4 units, Spr (Staff)

MATH 171. Fundamental Concepts of Analysis—Recommended for math majors and required of honors math majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisites: either 51, 52, 53; or 51H, 52H, 53H. WIM
3 units, Aut (Kerckhoff), Spr (Fetecau)

MATH 173. Analysis on Manifolds—Differentiable manifolds, tangent space, submanifolds, implicit function theorem, differential forms, vector and tensor fields. Frobenius’ theorem, DeRham theory. Prerequisite: 52 or 52H.
3 units, Win (Galatius)

MATH 174A,B. Topics in Analysis and Differential Equations with Applications—For students planning graduate work in mathematics or physics, and for honors math majors and other students at ease with rigorous proofs and qualitative discussion. 174A topics may include: geometric theory of ODE’s with applications to dynamics; mathematical foundations of classical mechanics including variational principles, Lagrangian and Hamiltonian formalisms, theory of integrable systems;
Mathematics

PRIMARILY FOR GRADUATE STUDENTS

MATH 201. Practical Training—Registration restricted to students in the M.S. degree program in Financial Mathematics. Students obtain employment in a relevant industrial or research activity, chosen to enhance their professional experience, and consistent with the MSFM degree program. Prerequisite: consent of adviser.

1-3 units, Aut, Win, Spr (Staff)

MATH 205A. Real Analysis—Basic measure theory and the theory of Lebesgue integration. Prerequisite: 171 or equivalent.

3 units, Aut (Simon)

MATH 205B. Real Analysis—Point set topology, basic functional analysis, Fourier series, and Fourier transform. Prerequisites: 171 and 205A or equivalent.

3 units, Win (Mazzeo)

MATH 205C. Real Analysis—Continuation of 205B.

3 units, Spr (Dembo)

MATH 210A. Modern Algebra—Groups, rings, and fields, introduction to Galois theory. Prerequisite: 120 or equivalent.

3 units, Aut (Vakil)

MATH 210B. Modern Algebra—Galois theory. Ideal theory, introduction to algebraic geometry and algebraic number theory. Prerequisite: 210A.

3 units, Win (Brumfiel)

MATH 210C. Modern Algebra—Continuation of 210B. Representations of groups and noncommutative algebras, multilinear algebra.

3 units, Spr (Bump)

3 units, Aut (J. Li)

MATH 215B. Complex Analysis, Geometry, and Topology—(MATH 215A is not a prerequisite for 215B.) Topics: fundamental group and covering spaces, homology, cohomology, products, basic homotopy theory, and applications. Prerequisites: 113, 120, and 171, or equivalent.

3 units, Win (Kerckhoff)

MATH 217A. Differential Geometry—Smooth manifolds and submanifolds, tensors and forms, Lie and exterior derivative, deRham cohomology, distributions and the Frobenius theorem, vector bundles, connection theory, parallel transport and curvature, affine connections, geodesics and the exponential map, connections on the principal frame bundle. Prerequisite: 173 or equivalent.

3 units, Aut (Khuri)

MATH 217B. Differential Geometry—Riemannian manifolds, Levi-Civita connection, Riemann curvature tensor, Riemannian exponential map and geodesic normal coordinates, Jacobi fields, completeness, spaces of constant curvature, bi-invariant metrics on compact Lie groups, symmetric and locally symmetric spaces, equations for Riemannian submanifolds and Riemannian submersions. Prerequisite: 217A.

3 units, Win (Ionel)

MATH 217C. Differential Geometry—First and second variation of arc length, index form and variational theory of geodesics, comparison theorems and consequences for manifolds of positive and negative curvature, almost complex manifolds and integrability, Hermitian and Kaehler metrics, connections on complex vector bundles and Chern classes, Hodge theory, vanishing theorems in the Riemannian and Kaehler settings.

3 units, Spr (Ionel)

3 units, Aut (Liu)

3 units, Win (Levy)

3 units, Spr (Papanicolaou)

SCHOOL OF HUMANITIES AND SCIENCES

MATH 224. Topics in Mathematical Biology — Mathematical models for biological processes based on ordinary and partial differential equations. Topics: population and infectious diseases dynamics, biological oscillators, reaction diffusion models, biological waves, and pattern formation. Prerequisites: 53 and 131, or equivalents.
3 units, Win (Levy)

MATH 228A. Ergodic Theory — Measure preserving transformations and flows, ergodic theorems, mixing properties, spectrum, Kolmogorov automorphisms, entropy theory. Examples. Classical dynamical systems, mostly geodesic and horocycle forms on homogeneous spaces of SL(2,R). Prerequisites: 265A, B.
3 units, Win, 228B: Spr (Ornstein)

MATH 230A,B,C. Theory of Probability — (Enroll in STATS 310A,B,C.)
2-4 units, A: Aut (Dembo), B: Win (Siegmund), C: Spr (Lai)

MATH 232. Topics in Probability — Possible topics include Brownian motion, coarse graining, concentration inequalities, discrete probability, Gibbs measures, interacting particle systems, percolation, random matrices, Poisson approximation, lace expansions. Prerequisite: exposure to measure theoretic probability and stochastic processes.
3 units (Staff) not given 2004-05

MATH 234. Large Deviations — (Same as STATS 374.) Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer’s and Sanov’s theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: 230A or STATS 310.
3 units (Staff) not given 2004-05

MATH 235A. Selected Topics in Ergodic Theory — Topics from the Kolmogorov-Sinai theory of entropy; the isomorphism theorem for Bernoulli shifts and Bernoulli flows; K-automorphisms applications to mechanical systems, and automorphisms of compact groups.
3 units (Staff) not given 2004-05

MATH 235B. Selected Topics in Ergodic Theory — Topics from the theory of flows on homogeneous spaces, with emphasis on applications to number theory. Ergodic theorems, unique ergodicity and equidistribution, horocyclic and geodesic flows. Howe-Moore theorem, Hedlund and Furstenberg theorems on the horocyclic flow, the Margulis lemma, Oppenheim’s conjecture, Ratner’s conjecture, and Ratner’s theorem. Rigidity of some algebraic Rd and Zd actions.
3 units (Staff) not given 2004-05

MATH 235C. Selected Topics in Ergodic Theory
3 units (Staff) not given 2004-05

3 units, Win (Papanicolaou)

MATH 237. Topics in Stochastic Analysis: Credit Risk — The analysis of structural models for credit default starting from the Black-Scholes-Merton theory and continuing with stochastic volatility models. The theory of reduced models of default risk and doubly stochastic, intensity-based, default models. Connections with actuarial insurance problems. Hybrid structural and intensity based models for the pricing of defaultable bonds and credit default swaps. Extensions to multi-asset models with correlated defaults.
3 units, Spr (Papanicolaou)

3 units, Win (Papanicolaou)

MATH 239. Computation and Simulation in Finance — (Formerly MATH 240.) Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing.
3 units, Spr (Durrett)

MATH 244. Riemann Surfaces — Compact Riemann surfaces: topological classifications, Hurwitz’ formula. Riemann-Roch formula, uniformization theorem. Abel’s theorem, Jacobian varieties. Some elements of harmonic analysis are developed with applications. Emphasis is on methods which are generally applicable to algebraic curves.
3 units (Staff) not given 2004-05

MATH 245A. Topics in Algebraic Geometry — Introduction to intersection theory in algebraic geometry.
3 units, Aut (Vakil)

MATH 245B. Topics in Algebraic Geometry — Introduction to moduli spaces. Topics include the moduli functors, the construction of moduli spaces, examples of moduli spaces, and the basic properties of moduli spaces of curves, stable maps, and stable vector bundles.
3 units, Spr (J. Li)

MATH 246. Symmetric Functions and Algebraic Combinatorics — Unified treatment of topics in classical enumeration via the study of symmetric polynomials. Classical symmetric functions, Schur functions, Young tableaux, Schensted correspondence, character theory of the symmetric group, introduction to random matrix theory. Prerequisite: 210 or equivalent.
3 units (Staff) not given 2004-05

MATH 247. Topics in Group Theory — Topics include the Burnside basis theorem, classification of p-groups, regular and powerful groups, Sylow theorems, the Frattini argument, nilpotent groups, solvable groups, theorems of P. Hall, group cohomology, and the Schur-Zassenhaus theorem. The classical groups and introduction to the classification of finite simple groups and its applications.
3 units, Spr (Diaconis)

MATH 248A. Algebraic Number Theory — Introduction to algebraic number theory: the arithmetic of local and number fields, and a brief introduction to class field theory. Prerequisite: 210A,B or equivalent.
3 units (Staff) not given 2004-05

MATH 248B. Algebraic Number Theory — Continuation of 248A. Topics may include modular forms, elliptic curves, and L-functions.
3 units (Staff) not given 2004-05

MATH 249B. Topics in Representation Theory and Number Theory — Review of basic algebraic number theory and group cohomology, class field theory, and construction of the Weil group.
3 units, Aut (Bump)

MATH 249B. Topics in Representation Theory and Number Theory — Continuation of 249A. Hecke and Artin L-series.
3 units, Win (Bump)

MATH 253. Regularity of Sets and Mapping — For students interested in any area of analysis. Topics: Lipschitz functions; smooth functions; Sobolev functions; various regularity and extension theorems including Rademacher, Kirszbraun, Whitney, and Sard. Critical sets of real-analytic, complex analytic functions. Affine approximation properties of subsets of R^n, including a discussion of rectifiability and non-rectifiability, structure theorem, and Reifenberg’s topological disc theorem.
3 units (Staff) not given 2004-05
MATH 256A,B,C. Partial Differential Equations—Introduction to
the theory of linear and non-linear partial differential equations, begin-
ning with linear theory involving use of Fourier transform and Sobolev
spaces. Topics: Schauder and L2 estimates for elliptic and parabolic
equations; De Giorgi-Nash-Moser theory for elliptic equations; non-
linear equations, e.g., the minimal surface equation, geometric flow
problems, and non-linear hyperbolic equations.
3 units, A: Aut, B: Win (You), C: not given 2004-05

MATH 257A,B. Symplectic Geometry and Topology—Linear sym-
plectic geometry and linear Hamiltonian systems. Symplectic manifolds
and their Lagrangian submanifolds, local properties. Symplectic geo-
metry and mechanics. Contact geometry and contact manifolds. Relations
between symplectic and contact manifolds. Hamiltonian systems with
symmetries. Momentum map and its properties.
3 units, A: Aut, B: Win (Eliashberg)

MATH 261A,B. Functional Analysis—Geometry of linear topological
spaces. Linear operators and functionals. Spectral theory. Calculus for
vector-valued functions. Operational calculus. Banach algebras. Special
topics in functional analysis.
3 units (Staff) not given 2004-05

MATH 263A,B. Lie Groups and Lie Algebras—Definitions, exam-
iples, basic properties. Semi-simple Lie algebras, their structure and
classification. Cartan decomposition; real Lie algebras. Representation
theory: Cartan-Stiefel diagram, weights. Weyl character formula. Orthog-
onal and symplectic representations. Prerequisite: 210 or equivalent.
3 units, A: Win (Brubaker, Munson), B: Spr (P. Cohen)

MATH 266. Computational Signal Processing and Wavelets—For
students interested in theoretical and computational aspects of signal
processing. Topics: time-frequency transforms; wavelet bases and wave-
let packets; linear and nonlinear multisresolution approximations; estima-
tion and restoration of signals; signal compression.
3 units, Aut (Levy)

MATH 267A,B. Topics in Functional and Harmonic Analysis—
Topics from functional analysis and from the Lp-theory of harmonic
analysis, the singular integral theory of Calderon and Zygmund and its
extensions, interpolation of operators, multiplier transformations, and
smoothness properties of functions. Sets of uniqueness for trigonometric
series, spectral syntheses, thin sets, spectral theory of convolution
operators, and applications. Prerequisite: knowledge of the elements of
Fourier analysis.
3 units, A: Aut, B: Win (Katznelson)

MATH 275. Topics in Singularity Theory—Topics may include: jet
spaces; Thom transversality theorem; h-principle type results in singu-
arity theory with applications to topology; Thom-Boardman singularities;
local classification problems and results in singularity theory; Picard-
Lefschetz theory; theory of oscillating integrals; Frobenius manifolds.
3 units (Staff) not given 2004-05

MATH 281A,B. Introduction to Algebraic and Differential
Topology—Fundamental group, covering spaces, embeddings and im-
mersions of manifolds, transversality, homotopy theory, homology and
cohomology of complexes, differential forms, Poincare Duality.
3 units (Staff) not given 2004-05

MATH 282A. Low Dimensional Topology—The theory of surfaces
and 3-manifolds. Curves on surfaces, the classification of diffeomor-
phisms of surfaces, and Teichmuller space. The mapping class group
and the braid group. Knot theory, including knot invariants. Decomposition
of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop
theorem, sphere theorem, incompressible surfaces. Geometric struc-
tures, particularly hyperbolic structures on surfaces and 3-manifolds.
3 units, Aut (Kerckhoff)

MATH 282B. Homotopy Theory—Homotopy groups, fibrations, spec-
tral sequences, simplicial methods, Dold-Thom theorem, models for
loop spaces, homotopy limits and colimits, stable homotopy theory.
3 units, Win (Carlsson)

MATH 282C. Fiber Bundles and Cobordism—Possible topics: prin-
cipal bundles, vector bundles, classifying spaces. Connections on bun-
dles, curvature. Topology of gauge groups and gauge equivalence
classes of connections. Characteristic classes and K-theory, including
Bott periodicity, algebraic K-theory, and indices of elliptic operators.
Spectral sequences of Atiyah-Hirzebruch, Serre, and Adams. Cobordism
theory, Pontryagin-Thom theorem, calculation of unoriented and com-
plex cobordism.
3 units, Spr (Brumfiel)

MATH 283. Topics in Algebraic and Geometric Topology
3 units, Spr (Carlsson)

MATH 285. Geometric Measure Theory—Hausdorff measures and
dimensions, area and co-area formulas for Lipschitz maps, integral
curves and-flat chains, minimal surfaces and their singular sets.
3 units (Staff) not given 2004-05

MATH 290A. Model Theory—(Formerly same as PHIL 290A.) Lan-
guage and models of the first order, predicate calculus, complete and
Prerequisites: 151 or equivalent.
3 units (Staff) not given 2004-05

MATH 290B. Model Theory—(Formerly same as PHIL 290B.) Kripke
(possible world) semantics of intuitionistic and modal logics. Complete-
ness results and strategies in automated deduction. Algebraic models.
Second order systems. May be taken independently of 290A. Prerequi-
tives: 151, 154, or equivalent.
3 units (Staff) not given 2004-05

MATH 291A,B. Recursion Theory—(Formerly same as PHIL 291A,B.)
Theory of recursive functions and recursively enumerable sets. Turing
machines and alternative approaches. Diophantine definability. Defini-
tability in formal systems. Godel’s incompleteness theorems. Recursive-
ly unsolvable problems in mathematics and logic. Introduction to recur-
sive ordinals and hierarchies. Prerequisites: PHIL 151, PHIL 152, and
MATH 161, or equivalents.
3 units (Staff) not given 2004-05

MATH 292A,B. Set Theory—(Formerly same as PHIL 292A,B.) The
basics of axiomatic set theory; the systems of Zermelo-Fraenkel and
Bernays-Godel. Topics: cardinal and ordinal numbers, the cumulative
hierarchy and the role of the axiom of choice. Models of set theory,
including the constructible sets and models constructed by the method of
forcing. Consistency and independence results for the axiom of choice,
the continuum hypothesis and other unsettled mathematical and set-
theoretical problems. Prerequisites: PHIL 151, PHIL 152, and MATH
161, or equivalents.
3 units (Staff) not given 2004-05

MATH 293A,B. Proof Theory—(Formerly same as PHIL 293A,B.) Gentzen’s natural deduction and sequential calculi for first-order prop-
ositional and predicate logics. Normalization and cut-elimination proce-
dures. Relationships with computational lambda calculi. Extensions to
infinitary calculus; ordinal measures of complexity. Applications to the
extraction of the constructive content of proofs in arithmetic and analy-
sis. Extensions of Hilbert’s consistency program. Prerequisites: PHIL
151, PHIL 152, and MATH 161, or equivalents.
3 units (Staff) not given 2004-05

MATH 294. Topics in Logic—(Enroll in PHIL 354.)
3 units (Staff) not given 2004-05

MATH 297. Algebraic Logic
1-3 units, Aut, Win, Spr, Sum (Staff)

MATH 298. Advanced Reading and Research
1-9 units, Aut, Win, Spr, Sum (Staff)
The student should take a minimum of 60 units of course work from the list of Medieval Studies courses or appropriate alternatives approved by the director, including ten courses as follows:

1. The introductory course, MEDVLST 165, Introduction to Medieval Culture. If 165 is not offered in a given year, students may petition to take a substitute course if necessary. For 2004-05, HISTORY 100A, Europe from Late Antiquity to 1500, fulfills this requirement. Petitions should be directed to the Director of Medieval Studies, Philippe Buc, at igorbuc@stanford.edu.

2. Two upper-division courses, ideally with an interdisciplinary component, in any field dealing with the Middle Ages.

3. Four courses in one of the following categories:
   a) Literature: English, French, German and Scandinavian, Italian, Latin, Slavic, Spanish
   b) History
   c) Art History, Drama, Music
   d) Humanities, Philosophy, Religious Studies (certain Humanities courses may fulfill requirements within other categories)

4. Two courses in a second category from the above list.

5. One course in a third category from the above list.

Students doing the Medieval Studies concentration for the Humanities major should use these requirements as guidelines for developing their programs of study.

In addition to the ten courses, a language proficiency equal to two years of college-level study is suggested in Latin or one of the following: French, German, Italian, or Spanish.

Medieval Studies has a Writing in the Major (WIM) requirement. It can be fulfilled in one of three ways:

1. Through a course designated as WIM by a department contributing to the Medieval Studies major.
2. Through a paper in a Medieval Studies course.
3. Through an independent paper with a member of the Medieval Studies faculty.

Check with the program office regarding specific requirements for each of these options.

**MINORS**

An undergraduate minor in Medieval Studies is available through the program. Students interested in completing the minor should inquire about enrollment procedures at the office of Interdisciplinary Studies in Humanities.

Requirements are as follows:

1. **Language**: in addition to the University foreign language requirement, at least a one-quarter course in a classical and/or medieval vernacular language is recommended, which may count as one of the five required courses for the minor listed under item 2a.

2. The minor consists of six courses, which include:
   a) Medieval Studies 165, Introduction to Medieval Culture (core course). If 165 is not offered in a given year, students may petition to take a substitute course if necessary. Petitions should be directed to the Director of Medieval Studies.
   b) an additional five courses dealing directly with the Middle Ages. If the student’s major department or program offers medieval courses, he/she should take two of them for the Medieval Studies minor, but those courses may not also count for the major. At least three courses must be taken outside the student’s major, selected from two or more of the following categories:
      1) Language and Literature
      2) History
      3) Art History, Drama, Music
      4) Humanities, Philosophy, Religious Studies
      5) From among the Medieval Studies faculty listed above, the student chooses an adviser, who assists in the selection of courses and the design of the program.

Courses applied to the minor in Medieval Studies must be taken for a letter grade. Courses applied to the minor cannot also be applied to a student’s major or another minor.
COURSES

MEDVLST 322. Medieval Seminar—(Same as HUMNTIES 322.) Major cultural, literary, and artistic including: the Germanic ethos and heroic ideal; Celtic culture and the Arthurian romances; Provençal lyric poetry and the courtly love tradition; the emergence of Western art from Byzantine and Gothic sources and the Italian masters of the Trecento; scholasticism and Dante and Chaucer. Texts include: Beowulf, the Song of Roland, Chrétien de Troyes, Dante, Boccaccio, Chaucer, and works on Romanesque and Gothic art.
3-5 units, Spr (Steidle)

INTERDEPARTMENTAL OFFERINGS

Courses suitable for self-designed majors in Medieval Studies are listed below. More detailed course descriptions are found under the various department headings. See quarterly Time Schedule for changes in listings.

ART AND ART HISTORY

ARTHIST 105/305. Introduction to Medieval Art
4 units (Pentcheva) not given 2004-05

ARTHIST 106/306. Byzantine Art and Architecture, 300-1453
4 units, Aut (Pentcheva)

ARTHIST 107/307. Age of Cathedrals
4 units, Aut (Pentcheva) not given 2004-05

ARTHIST 187/387. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868
4 units, Spr (Takeuchi)

ARTHIST 206. Virginity and Power: Mary in the Middle Ages
5 units (Pentcheva) not given 2004-05

ARTHIST 207. Light and Power: Mosaics and Stained Glass Windows in the Middle Ages.
5 units, Win (Pentcheva)

ENGLISH

ENGLISH 102. Chaucer
5 units, Spr (Cooper)

ENGLISH 171. History of the English Language
5 units, Aut (Brown)

ENGLISH 211. Readings in Middle English
5 units, Spr (Cooper)

FRENCH LITERATURE

FRENLIT 130. Middle Ages and Renaissance France
4 units, Aut (Pop)

HISTORY

HISTORY 21N. Heretics and Inquisitors
5 units, Spr (Buc)

HISTORY 100A. Europe from Late Antiquity to 1500
5 units, Aut (Buc)

HISTORY 208A/208A. Medieval Antisemitism
5 units, Win (Buc)

HISTORY 208D/308D. From Ha-Levi to Leon Hebreo: Medieval and Renaissance Jewish Cultures
5 units, Win (Gutwirth)

HISTORY 210/310. Poverty and Charity in Medieval Christianity, Judaism, and Islam
5 units, Aut (Miller)

HISTORY 211/311. Body, Gender, and Society in Medieval Europe
5 units (Buc) not given 2004-05

HISTORY 245E/345E. Artisans, Courtiers and Rabbis: Jews of Spain in the Middle Ages
5 units, Spr (Gutwirth)

HISTORY 288A. Jews and Christians in the Ottoman Empire
5 units, Aut (E. Frankel)

MUSIC

MUSIC 40. Music History to 1600
4 units, Aut (Gilbert)

MUSIC 140/240. Studies in Medieval Music
3-4 units, Aut (Gilbert) alternate years, not given 2005-06

MUSIC 141/241. Studies in Renaissance Music
3-4 units (Gilbert) alternate years, given 2005-06

MUSIC 221A. History of Music Theory: Ancient Through Baroque
4 units (Plebuch) alternate years, given 2005-06

MUSIC 301A. Analysis of Music: Modal
4 units, Aut (Mahrt)

MUSIC 310. Research Seminar in Musicology
3-5 units, Aut (Ford), Win (Hadlock), Spr (Gilbert)

PHILOSOPHY

PHIL 115/215. Problems in Medieval Philosophy: Scholastic Background to Kant
3-4 units, Win (R. Wood)

PHIL 248. Medieval Latin Paleography
3-5 units, Spr (R. Wood)

RELIGIOUS STUDIES

RELIGST 3N. Murder in the Cathedral
3 units, Aut (Gelber)

RELIGST 305. Medieval Daoist Texts
3-5 units (Pregadio) not given 2004-05
MODERN THOUGHT AND LITERATURE

Director: David Palumbo-Liu
Affiliated Faculty: Lanier Anderson (Philosophy), Anthony Antonio (Education), Khalil Barhoum (Literature, Culture, and Languages), Joel Beinin (History), Brett Bourbon (English), Elisabeth Boyi (French and Italian), Scott Bukatman (Art and Art History), Eamonn Callan (Education), Albert Camarillo (History), Terry Castle (English), Paulla Ebron (Cultural and Social Anthropology), Harry Elam (Drama), Shelley Fisher Fishkin (English), Jay Fliegelman (English), Richard Ford (Law), Theodore Glasser (Communication), Roland Greene (English, Comparative Literature), Hans U. Gumbrecht (French and Italian), Akhil Gupta (Cultural and Social Anthropology), David Halliburton (English), Matthew Kohrman (Cultural and Social Anthropology, on leave), Miyako Inoue (Cultural and Social Anthropology), Pamela Lee (Art and Art History), Timothy Lenoir (History, on leave), Andrea A. Lunsford (English), Purmina Mankekar (Cultural and Social Anthropology), Paula Moya (English), Siame Ngai (English), David Palumbo-Liu (Comparative Literature), Peggy Phelan (Drama, on leave), Robert Polhemus (English), Arnold Rampersad (English), Jessica Riskin (History), Richard Rosa (Spanish and Portuguese), Ramón Saldívar (English, Comparative Literature), Debra Satz (Philosophy), Jeffrey Schnapp (French and Italian), Helen M. Stacy (Institute for International Studies), Elizabeth Traugott (Linguistics), Robert Weissberg (Law), Richard White (History), Bryan Wolf (Art and Art History), Sylvia Yanagisako (Cultural and Social Anthropology), Yvonne Yarbro-Bejarano (Spanish and Portuguese)

Program Offices: Building 250, Room 251F

Email: idstudies.moore@stanford.edu
Web Site: http://www.stanford.edu/dept/MTL

Courses given in Modern Thought and Literature have the subject code MTL. For a complete list of subject codes, see Appendix.

The Program in Modern Thought and Literature is administered through the Office of Interdisciplinary Studies in Humanities. The program admits students for the Ph.D. and a very limited number for a coterminal B.A./M.A. Program.

UNDERGRADUATE PROGRAMS

Although Modern Thought and Literature has no formal undergraduate degree granting program, undergraduate students who are interested in completing a major in this field may do so through the undergraduate major in Interdisciplinary Studies in Humanities (see that section of this bulletin). This undergraduate program is designed for students with a strong commitment to interdisciplinary study in the various humanities. Students may devise majors that incorporate modern literature (since the 18th century), cultural history, and critical theory. Students may also create majors in other interdisciplinary concentrations such as Film Studies. For specific course guidelines, see the undergraduate Handbook for the Major in Interdisciplinary Studies in Humanities. Students wishing to declare the major in Interdisciplinary Studies in Humanities must apply for admission to the Humanities Honors Program and for graduation with honors in Humanities.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

Each year, one or two undergraduate students, who are exceptionally well prepared in literature and at least one foreign language, and whose undergraduate course work includes a strong interdisciplinary component, may petition to be admitted to the program for the purpose of completing a coterminal M.A. degree. Admission to this program is granted only on condition that in the course of working on their master’s degree they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is February 16.

To apply, applicants submit:
1. An unofficial grade transcript from AXESS.
2. A “Petition for Admission to the Coterminal Program” from Degree Progress in the Registrar’s Office.
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. A plan of study listing, quarter by quarter, each course by name, units, and instructor, to be taken in order to fulfill the requirements for the degree for a total of 45 units, including at least 20 units of advanced work in one literature, and at least 20 units in a coherent interdisciplinary program of courses taken in non-literature departments.
5. A writing sample of critical or analytical prose.
6. Two letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

REQUIREMENTS

The candidate for the M.A. must complete at least 45 units of graduate work, to be divided in the following manner:
1. The introductory seminar, MTL 334A, 5 units
2. At least 20 units of advanced course work in literature, to be approved by the director.
3. At least 20 units of course work in a coherent and individually arranged interdisciplinary program, to be approved by the director.

By the end of the course of study, each candidate must also demonstrate a reading knowledge of at least one foreign language.

GRADUATE PROGRAMS

The Ph.D. in Modern Thought and Literature is an interdisciplinary program combining work in modern literary/cultural studies with work in one or more other modern disciplines.

The Ph.D. program is designed specifically for students who have a strong interest in literature or culture, but whose approach or focus requires an interdisciplinary program; for example, students interested in anthropological or philosophical approaches to literature and culture; gender studies; ethnic studies; or in topics such as legal humanities, popular culture, and social or cultural theory.

Modern Thought and Literature is intended for students who plan to teach and write in literature departments or in interdisciplinary programs in the humanities, cultural studies, or humanistic social sciences, or for students intending to formulate cultural policy.

Course work in the program is divided about evenly between advanced courses in literature departments and advanced courses in non-literary departments.

MASTER OF ARTS

The Master of Arts is available to students who are admitted to the doctoral program. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D. who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an M.A. in Modern Thought and Literature.
DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin.

A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

2. A coherent program of eight courses of advanced work in literary studies to be worked out with the adviser, of which at least six must be regularly scheduled courses in literature. Courses in the teaching of composition (ENGLISH 396, 397), ad hoc graduate seminars (MTL 395), research courses (MTL 398), and thesis registration (MTL 802) may not be counted among these six courses; MTL 396L, 397, 399, 802 may not be counted toward these requirements under any circumstances.
3. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdisciplinary concentration, typically consisting of six courses. Departmental minors are available from the departments of Cultural and Social Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, and Sociology (see the relevant information in those sections of this bulletin). Approved interdisciplinary concentrations have been established in popular culture, ethnic studies, feminist and gender studies, and science and technology studies (specific course requirements are available from the program office). Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with each student’s academic adviser. Course restrictions noted above in item 2 also apply.
4. Qualifying Paper: this certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. The qualifying paper must be a substantial revision of a seminar paper written at Stanford during the first year and should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge. Qualifying papers must be submitted to the program office no later than the end of the third week of the fifth quarter of enrollment, normally, winter of the second year.
5. Teaching, an essential part of the program, is normally undertaken in conjunction with the Department of English. Candidates are required to demonstrate competence in teaching.
6. Students must demonstrate, by the end of the third quarter of the first year, a reading knowledge of one foreign language and, by the beginning of the first quarter of the third year, a reading knowledge of one other foreign language. Reading knowledge means the ability to make a genuine scholarly use of the language; that is, to read prose of ordinary difficulty.

Students may not take the University oral examination before completion of the foreign language requirement.
7. Candidacy: at the end of the second year, students apply for candidacy. The following qualifications are required before candidacy can be certified: the earlier submission of a satisfactory qualifying paper, demonstration of a reading knowledge of one foreign language; satisfactory progress in course work; a list of courses applicable to the degree, distinguishing between courses appropriate to the liter-
ary component and courses appropriate to the interdisciplinary component; designation of a departmental minor or an interdisciplinary concentration; and the submission of a statement outlining the scope and coherence of the interdisciplinary component of the program in relation to the literary component and noting the relevance of the course work to that program.
8. Annual Review: the program and progress of each student must be approved by the Committee in Charge at the end of each academic year.
9. University Oral Examination: this examination, covering the student’s areas of concentration, normally is taken in the third year of graduate study. It is a two-hour oral examination administered by four faculty members specializing in the student’s areas of concentration, and a chair from another department. The exam is based on a substantial reading list prepared by the student in conjunction with the faculty committee and designed to cover the areas of expertise pertinent to the student’s dissertation project.
10. Colloquium on the Dissertation Proposal: sometime after the University oral examination, or in conjunction with that examination, the dissertation committee assembles for up to one hour to discuss the dissertation proposal with the student. Prior to this meeting, the student should have consulted each member of the committee to discuss the proposal and compile a bibliography.
11. Dissertation: the fourth and fifth years are devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee on Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies.

HUMANITIES

The program participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Modern Thought and Literature and Humanities. For a description of the Humanities program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, and in the Division of Literatures, Cultures, and Languages. For other offerings, students should consult listings in the individual departments of interest. Consent of instructor is often required.

Students in the doctoral program in Modern Thought and Literature are advised to read through the offerings in English as well as offerings of the non-literature departments in which they wish to concentrate: for example, courses dealing with culture listed under Cultural and Social Anthropology, courses dealing with film under Communication or Art and Art History, courses in intellectual and cultural history under History. If the area of nonliterary interest is thematic rather than disciplinary, doctoral students should look under program listings such as Feminist Studies, African and African American Studies, or Comparative Studies in Race and Ethnicity.

MTL 175. Individual Work—For undergraduates only.
2-5 units, Aut, Win, Spr, Sum (Staff)

MTL 280. Interdisciplinary Pedagogy: Race and Social Justice—This workshop is a collective of graduate students from different disciplines interested in pedagogy for social justice. The collective interviews faculty, designs syllabi and teaching portfolios, serves as a support group for members currently teaching, and critiques course assignments, readings, and discussion formats. Focus this year is on performance and pedagogy: pedagogy as performative; and performances used and viewed as text within the classroom. Guest artists and educators.
1-5 units, Aut, Win, Spr (Zamora)
MTL 300. Modern Thought and Literature Colloquium—Required of first-year graduate students in the program; open to all students in the program and to others by consent of instructor. Weekly meeting of students in the program to discuss interdisciplinary scholarship, writing, and issues pertaining to the requirements for the Ph.D. Presentations by affiliated faculty and by student panels.
1-3 units, Spr (Palumbo-Liu)

MTL 334A. The Modern Tradition I—(Same as COMPLIT 334A.) Preference to first-year graduate students in Modern Thought and Literature and Comparative Literature. Basic texts that have formed the foundation for contemporary cultural and social theory including Marx, Weber, Freud, Durkheim, and Boas.
5 units, Aut (Palumbo-Liu)

MTL 334B. The Modern Tradition II—(Same as CASA 334B.) Responses, refutations, elaborations, modifications to basic texts in critical theory such as Gramsci, Lacan, Derrida, and postcolonial, postmodern, and feminist theory. Prerequisite: 334A.
3-5 units, Win (Mankekar)

MTL 390. Qualifying Paper—Preparation and writing of the qualifying paper for the Ph.D. in Modern Thought and Literature.
1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 395. Ad Hoc Graduate Seminar—Graduate students (three or more) who wish to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a suitable member of the faculty to supervise it.
1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 396L. Pedagogy Seminar I—(Enroll in ENGLISH 396L, COMPLIT 396L.)
2 units, Aut (Lerer)

MTL 397. Teaching Praxis—For Modern Thought and Literature doctoral students only. Teaching experience. Consent of program director required.
1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 398. Research—Students pursue a special subject of investigation under supervision of a member of the committee or another faculty member. Thesis work is not to be registered under this number.
1-15 units, Aut, Win, Spr, Sum (Staff)

MTL 399. Reading for Orals—Reading in preparation for the University Oral Examination.
1-15 units, Aut, Win, Spr, Sum (Staff)

MTL 400. Symposium—Preparation for and participation in the annual student symposium.
1-5 units, Win, Spr (Palumbo-Liu)
in department ensembles should note that auditions are held during reg-
istration week in Autumn Quarter. While there may be openings in some
private studios for qualified students during other quarters, it is to the
student’s advantage to audition in autumn, as most slots are filled for the
entire year.

The department is housed in Braun Music Center, Dinkelspiel Audi-
torium, and The Knoll, including two theaters for concert and recital
productions, two rehearsal halls, and a small chamber hall. Pianos, or-
gans, harpsichords, and a variety of early stringed and wind instruments
are available for student use. In addition, advanced students may use fine
old stringed instruments and bows from the Harry R. Lange Historical
Collection (http://music.stanford.edu/DeptInfo/Langecol.html).

The Music Library contains a comprehensive collection of scores,
books, and recordings with an emphasis on Western art music. In addi-
tion, the Department of Special Collections holds an invaluable collec-
tion of musical manuscripts and first and early editions, and the Archive
of Recorded Sound has a superb collection of historical recordings of all
types.

For more information on the Department of Music, see the Music

The Stanford Center for Computer Research in Music and Acoustics
(CCRMA) is a multi-disciplinary facility where composers and researchers
work together using computer-based technology both as an artistic
medium and as a research tool. Areas of ongoing interest at CCRMA
include: composition, applications hardware, applications software,
synthesis techniques and algorithms, physical modeling, real-time con-
trollers, signal processing, digital recording and editing, psychoacous-
tics and musical acoustics, music manuscripting by computer, and real-
time applications.

The CCRMA community consists of administrative and technical
staff, faculty, research associates, graduate research assistants, graduate
and undergraduate students, visiting scholars, visiting researchers and
composers, and industrial associates. Center activities include academic-
courses, seminars, small interest-group meetings, summer workshops,
and colloquia. Concerts of computer music are presented several times
each year with an annual outdoor computer-music festival in July.

CCRMA houses studios, computing facilities, and a networked sys-
tem of software that includes programs and tools for editing, viewing,
synthesizing, and analyzing sound. For a detailed and up-to-date descrip-
tion of facilities available, see the CCRMA home page at http://
ccrma.stanford.edu/.

The Center for Computer-Assisted Research in the Humanities
(CCARH), located in Braun Music Center, conducts research focused on
constructing computer databases for music and on creating programs that
allow student and staff researchers to access, analyze, print, and electron-
ically perform the music. For more information, see the CCARH home
page at http://www.ccarh.org/.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major in Music is built around a series of founda-
tion courses in theory, musicianship, and music history, in addition to
performance and the proficiency requirements outlined below. Because
of the sequence of courses, it takes more than two years to complete the
requirements for the major. Prospective majors are urged to consult the
undergraduate student services officer in the department as early as pos-
sible in order to plan a program that allows sufficient time for major course
work, practice, and University requirements outside the major. Early
planning is especially important for students wishing to double-major,
for those contemplating overseas study during their undergraduate years,
for those wishing to do an in-depth concentration in the music major, and
for those with particular musical talents and interests. All required courses
for the B.A. in Music and in the Music, Science, and Technology spe-
cialization must be taken for a letter grade. Electives may be taken cred-
it/no credit, but any courses taken towards concentration requirements
must also carry a letter grade.

1. Students are required to include the following foundation courses in
their programs:
   a) Theory: MUSIC 21, 22, 23
   b) History: MUSIC 40, 41, 42, and three from the series 140-148
   Writing in the Major (WIM) courses (two of which must be taken as
   4-unit WIM courses)
   c) Analysis: MUSIC 121 and two from 122A, B, or C

2. Additionally, Music majors must fulfill the following two performance
requirements:
   a) Instruction in instrumental and/or vocal performance: minimum of
   five quarters, comprising a minimum of 15 units.
   b) Ensemble: five quarters (5 units minimum) of work in one or more of
   the department’s organizations or chamber groups. MUSIC 156, “sic”;
   Improvisation Collective, and MUSIC 157, Mariachi Band, do not satisfy
   this requirement. MUSIC 181 may count for up to two of the ensemble-unit requirements for the music major. To
   fulfill the ensemble requirement, music majors need to participate
   at least three quarters in the department’s traditional large ensembles (MUSIC 159–167), with the exception of students
   whose primary instrument is harp, keyboard, or guitar, who need to
   participate at least one quarter in the ensembles above, but who may
   fulfill the rest of the requirement with chamber music (171).

3. Majors are required to pass a Piano Proficiency examination as a part
of the requirements to complete MUSIC 23. Offered separately from
the course at the end of the Autumn and Spring quarters or at other
times by appointment, it consists of scales and arpeggios, performance
of a simple tune (to be set by the examiner), sight reading, and the
performance of prepared pieces (consult the department undergraduate
advisor for details). Remedial skills are taught in MUSIC
12A,B,C.

4. Majors must also pass an Ear-Training Proficiency examination,
which is part of the requirements to complete MUSIC 23. It may be
taken by arrangement, demonstrating a student’s ability to hear mus-
ic accurately and to perform it at sight.

RECOMMENDED SCHEDULE FOR THE MUSIC MAJOR

The following sample schedule shows how a student may include
substantial work on a major in music while also fulfilling the University
General Education Requirements during the freshman and sophomore
years. The schedule also includes foreign language study, which is strongly
recommended for all music majors and especially for those expecting
to continue into graduate work in any area of music.

MUSIC, SCIENCE, AND TECHNOLOGY

The specialization in Music, Science, and Technology is designed for
those students with a strong interest in the musical ramifications of rap-
idly evolving computer technology and digital audio, and in the acous-
tic and psychoacoustic foundations of music. The program entails a re-

487
search project under faculty guidance and makes use of the highly multidisciplinary environment at CCRMA. This program can serve as a complementary major to students in the sciences and engineering.

1. Students in the program are required to include the following courses in their studies:
   a) Theory: 21, 22, 23, 121, 151 (WIM) (4 units each); 150 (3 units); 220A, B, C (4 units each); 250A (4 units)
   b) History: two from 40, 41, 42
   c) Applied: individual studies in performance (6 units) or 192A, B, and Ensemble or 192C (5 units)
   d) Research project: 220D (4 units)

2. Students in Music, Science, and Technology must also pass the Piano and Ear-Training Proficiency examinations required of all Music majors.

MINORS

Minors in Music and in the Music, Science, and Technology specialization provide the student with a core of essential Music courses in the disciplines that establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it.

CONCENTRATIONS

Concentrations are offered in performance, conducting, composition, or history and theory. In each concentration, 6 additional course units in the area of concentration beyond the basic requirements for the major are required. In addition, each concentration registers for an independent project (198, 4 units) in the senior year under faculty supervision, leading to a senior recital, a composition, a conducting project, or a senior research paper. Students wishing to pursue the concentration in performance must demonstrate private-lesson-level proficiency on their instrument. Specific guidelines and information on the concentration tracks are available from the Department of Music office.

HONORS PROGRAM

Honors in Music is awarded by the faculty to concentrators who have produced an independent project of exceptional quality and meet certain department standards in musicianship, scholarship, and academic standing. The conferral of honors is done solely through faculty consultation. Students do not petition for honors.

OVERSEAS STUDIES

Courses in Music are often available at Stanford overseas programs, especially in Berlin, Paris, and Oxford. See the Overseas Studies Program section of this bulletin immediately following this section for this year’s listings. Music majors and minors should talk to the Department of Music undergraduate administrator prior to going overseas.

GRADUATE PROGRAMS

University requirements for the M.A., D.M.A., and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin. The following statements apply to all the graduate degrees described below, unless otherwise indicated.

Admission—Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers, according to the proposed field of concentration) when they return the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 14 application deadline. All applicants, except those applying for the M.A. in Music, Science, and Technology (M.A./MST), are also required to submit a departmental entrance test in theory and musicianship, which is available from the Music Department. All components of the application are due by December 14. International students whose first language is not English are required to take the TOEFL exam (with certain exceptions: see the University Registrar’s web site at http://registrar.stanford.edu/).

Department Examinations—All entering graduate students except those in the M.A./MST program are required to take: (1) a diagnostic examination testing the student in theory (counterpoint, harmony, and analysis) and (for musicologists only) the history of Western art music, and (2) a proficiency examination in sight-singing and piano sight-reading. These exams are given at the beginning of study in the department (usually the week before school begins).

None of Stanford’s required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of ‘A,’ ‘B,’ or ‘Satisfactory’ (a passing grade in an instructor-mandated credit/no credit course) in music courses taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

MASTER OF ARTS

Residence—A minimum of 45 academic units is required for the master’s degree in Music.

MUSIC

Students in the doctoral programs who enter directly from the bachelor’s level may, upon completing 45 units and advancing to candidacy, be recommended for the M.A. degree. The Department of Music does not accept students for study only towards the M.A. degree except in the Music, Science, and Technology program, described below.

MUSIC, SCIENCE, AND TECHNOLOGY

This is a one-year program of 45 units focusing on the integration of music perception, music-related signal processing and controllers, and synthesis. The program is designed for students having an undergraduate engineering or science degree, or a degree that includes course work in engineering mathematics.

Required are:

- MUSIC 151. Psychophysics and Cognitive Psychology for Musicians 4
- MUSIC 154. Composition and Performance of Instrumental Music with Electronics 3
- MUSIC 192A. Foundations of Sound-Recording Technology 3
- MUSIC 192B. Advanced Sound-Recording Technology 3
- MUSIC 220A. Fundamentals of Computer-Generated Sound 4
- MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing 4
- MUSIC 220C. Research Seminar in Computer-Generated Music 4
- MUSIC 250A. HCI Theory and Practice 4
- MUSIC 320. Introduction to Digital Audio Signal Processing 4
- MUSIC 420. Signal Processing Models in Musical Acoustics 2
- MUSIC 421. Audio Applications of the Fast Fourier Transform 2
- Elective 8

Total 45
DOCTORAL PROGRAMS

Residence—The candidate must complete a minimum of 135 academic units (see Residency under the “Graduate Degrees” section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate Registration (TGR), after they have reached the required 135 academic units and have completed their Special Area examinations.

Foreign Language Requirement—At the time of advancement to candidacy, all D.M.A. students, and Ph.D. students in the Computer-Based Theory and Acoustics program, are required to have demonstrated a reading knowledge of one language other than English and the ability to translate into idiomatic English. Ph.D. students in Musicology are required to demonstrate proficiency in German and a similar competence in a second language, chosen from French, Italian, or Latin (or, on a case-by-case basis, another language, if it has significant bearing on the candidate’s field of study).

Qualifying Examination—A written and oral examination for admission to candidacy is given just prior to the fourth quarter of residence for D.M.A. students, and Ph.D. students in the Computer-Based Music Theory and Acoustics programs; for Ph.D. students in Musicology, the exams are given just prior to the eighth quarter of residence. This exam tests knowledge of history, theory, repertory, and analysis.

Teaching—All students in the Ph.D. or D.M.A. degree programs, regardless of sources of financial support, are required to complete six quarters of their supervised teaching at half time. Music 280 (given in Spring Quarter) is a required course for Teaching Assistants. Additional quarters of teaching may be required.

Basic Requirements—Doctoral programs in the Department of Music do not require a master’s degree as a prerequisite. All students entering directly from the bachelor’s degree level are required to take the following course (which is, however, required of all students in musicology, regardless of entering degree level): Course No. and Subject Units 200. Graduate Proseminar 4

All doctoral candidates must take:

301A,B,C. Music Analysis: Modal, Tonal, and Post-Tonal 12

DOCTOR OF MUSICAL ARTS IN COMPOSITION

The Doctor of Musical Arts (D.M.A.) degree in Composition is given breadth through collateral studies in other branches of music and in relevant studies outside music as seems desirable.

Examinations—A written Special Area examination in the candidate’s field of concentration, including a final project proposal, is required to be completed during the fourth year of study, no later than the last day of classes in Spring Quarter of that year and preferably prior to the start of Winter quarter. A public lecture-demonstration is also required during the last quarter of residence. It should be one hour in length, treating aspects of the final project.

Requirements—Besides those requirements listed above, candidates are expected to produce a number of works demonstrating their ability to compose in a variety of forms and for the common media: vocal, instrumental, and electronic music. If possible, the works submitted are presented in public performance prepared by the composer. Annual progress is reviewed by the composition faculty. The final project in composition is an extended work for instruments, voices, electronic media, or a combination of these. MUSIC 323, Doctoral Seminar in Composition (16 units), is a required course.

DOCTOR OF PHILOSOPHY

The Ph.D. in Music can be pursued in two concentrations: Musicology or Computer-Based Music Theory and Acoustics.

Examinations—

1. Special Areas: a written and oral examination testing the student’s knowledge of music and research in the student’s field of concentration is completed during the fourth year of study, no later than the last day of classes in Spring Quarter of that year and preferably prior to the start of Winter Quarter. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.

2. Ph.D. Orals: the University oral examination, taken once the dissertation is substantially underway, is an oral presentation and defense of dissertation research methods and results.

Requirements—Besides those requirements listed above, other requirements by concentration are:

MUSICOLGY

* The requirement is for eight seminars of 3-5 units each. Students may petition to take up to two graduate seminars in other departments, in consultation with their adviser.

COMPUTER-BASED MUSIC THEORY AND ACOUSTICS

JOINT PH.D. IN MUSIC AND HUMANITIES

The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Music and Humanities. For a description of the program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

Many Department of Music courses have pages on the web which are linked to the Music home page. Courses with web sites at press time are noted in their entries below.

GENERAL

MUSIC 2C. Men, Women, and Opera—Opera through the lenses of gender and sexuality. Topics include: Italian Romantic opera archetypes of the doomed soprano, seductive tenor, and repressive bass; queer and feminist appropriations of opera’s misogynist and heterosexual content; ambiguous representations of gender in Baroque opera in which high-voiced castrati and women played male heroes; female wit and sincerity versus male lust, aggression, and social power in comic opera. GER: 3a,4c 3 units, Win (Hadlock)

MUSIC 3B. A Revolution in Sensibility: American Popular Music, 1965–1975—Rock, funk, film music, and jazz. How a countercultural sensibility formerly confined to small, elite enclaves revolutionized mainstream American style, tastes, and manners. How the sensibility of the 60s was bound up with music to resonate in the present. How music, literature, visual art, theater, and film play reciprocal roles in defining countercultural sensibility. GER: 3a 3 units, Spr (P. Ford)

MUSIC 8A. Rock, Sex, and Rebellion—Development of critical listening skills and an understanding of musical parameters through an introduction to select genres within the history of rock music. Focus is on competing aesthetic tendencies and subcultural forces that shaped the music. Rock’s significance in American culture, and the minority communities that have enriched rock’s legacy as an expressively diverse form. Lectures, readings, careful listening, and video screenings. GER: 3a,4b 3 units, Spr (Applebaum)
MUSIC 10A. Tchaikovsky, Stravinsky, Shostakovich, and Beyond: A History of Russian Music—Introduction to Russian culture through classical music and folklore, including sacred, secular, oral, and written music. The variety of Russian sung folklore in its traditional context, and how it is reflected in the music of Russian composers including Glinka, Mussorgsky, Rimsky-Korsakov, Tchaikovsky, Skryabin, Stravinsky, Prokofiev, and Shostakovich. Listening assignments include fieldwork data and video recordings. 3 units, Spr (Zemtsovsky)

MUSIC 11N-32N. Stanford Introductory Seminars

MUSIC 11Q. The Allure of Chamber Music—Stanford Introductory Seminar. Preference to sophomores. Why is it that an intimate setting for a small group of independent instruments has engendered some of the most expressive works in the history of music? Class attends chamber music concerts, seeking to comprehend the setting in projecting that meaning. Preparation for each concert includes reading, listening, and discussion of the music to be performed; performer interviews when possible. Written reports on the concerts attended. GER:3a
3 units, Win (Cohen)

MUSIC 14N. Women Making Music—Stanford Introductory Seminar. Preference to freshmen. Women’s roles as composers and performers across history and cultures. Music from diverse cultures, styles, and eras as a medium for women to express individuality and build community. Women’s musical activities in folk and art music of Japan, India, Ireland, and Albania; women in popular music in America, Egypt, and Africa; female musicians of the medieval, Renaissance, Romantic, and contemporary eras. GER:3a,4c
3 units, Aut (Hadlock)

MUSIC 16N. Music, Myth, and Modernity: Wagner’s Ring Cycle and Tolkien’s Lord of the Rings—Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner’s operatic cycle and Tolkien’s epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner’s music dramas and the film version of Tolkien’s trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:3a,4a
3 units, Spr (Grey)

MUSIC 16Q. Ki ho’alu: The New Renaissance of a Hawaiian Musical Tradition—Stanford Introductory Seminar. Preference to sophomores. Developed in the Hawaiian Islands during the 1830s, ki ho’alu, or Hawaiian slack key guitar, is an art form experiencing newfound popularity in Hawaii’i and worldwide. Its rise in popularity coincides with the growth of political activism in Hawaiian culture. The musical, cultural, historical, and political perspectives of Hawaiian music in general, and ki ho’alu in particular, through hands-on experience, readings, discussion, and workshops. Hawaiian music and history and the relationship among performance, creative expression, community, and identity. GER:3a,4b
3 units, Aut (Sano)

MUSIC 17N. The Operas of Mozart—Stanford Introductory Seminar. Preference to freshmen. Four of Mozart’s mature operas have held the stage uninterruptedly since their premieres, the earliest works in the operatic repertoire never to go out of fashion. What accounts for this extraordinary staying power? Focus on the history of their composition, performance, and reception, and their changing significance from Mozart’s time to the present. GER:3a
3 units, Win (K. Berger)

4 units, Spr (Sano, Uyechi)

MUSIC 33N. Silence! The Music of John Cage—Stanford Introductory Seminar. Preference to freshmen. Music and philosophy of American composer John Cage. Seminar and a workshop environment with opportunities to experiment with piano preparations, compose chance pieces of literature, music, video, and visual art, and perform Cage’s music. Students collaboratively prepare short musical works in the spirit of Cage and perform them with the Merce Cunningham Dance Company. Prerequisite: willingness to perform in an experimental idiom. GER:3a,4b
4 units, Win (Applebaum)

MUSIC 34N. Music in Film—Stanford Introductory Seminar. Preference to freshmen. Film music from the silent days of cinema to the present. Films include Birth of a Nation, Sunset Boulevard, A Clockwork Orange, Amadeus, and Moulin Rouge. Goal is to enhance students’ experience and judgment of films through understanding the interaction of music, sound, images, dialogue and narrative. Recommended: basic knowledge of music. GER:3a
4 units, Spr (Plebuch)

MUSIC 35N. A Good Dissonance Like a Man: The Music and Ideas of Charles Ives—Stanford Introductory Seminar. Preference to freshmen. The life and work of Charles Ives, and the polarized reception his compositions received. Music includes Ives’ Victorian songs and his symphonic works; his philosophical and political writings, historic recordings, oral and photographic histories, and live performances. Hands-on work with original manuscripts and editions. Recommended: ability to read music. GER:3a,4b
4 units, Spr (Barth)

MUSIC 18A. Jazz History: Ragtime to Bebop, 1900-1940—From the beginning of jazz to the war years. GER:3a
3 units, Win (Berry)

MUSIC 18B. Jazz History: Bebop to Present, 1940-Present—Modern jazz styles from Bebop to the current scene. Emphasis is on the significant artists of each style. GER:3a
3 units, Spr (Berry)

MUSIC 20A. Jazz Theory—Introduces the language and sounds of jazz through listening, analysis, and compositional exercises. Students apply the fundamentals of music theory to the study of jazz. Prerequisite: 19 or consent of instructor. GER:3a
3 units, Aut (Nadel)

MUSIC 20B. Advanced Jazz Theory—Approaches to improvisation through listening and transcribing, and developing familiarity with important contributors to this music. Topics: scale theory, altered dominants, and substitute harmony. Prerequisite: 20A or consent of instructor. GER:3a
3 units, Win (Nadel)

MUSIC 20C. Jazz Arranging and Composition—Jazz arranging and composition for small ensembles. Foundation for writing for big band. Prerequisite: 20A or consent of instructor.
3 units, Win (Nadel)

MUSIC 127. Instrumentation and Orchestration—Study of individual instruments, instrumental groups within the orchestra, and combinations of groups. Arrangements from piano music to orchestral music. Score analysis with respect to orchestration. Practical exercises using chamber ensembles and school orchestra. Prerequisite: 23. GER:3a
4-5 units, Aut (Hess)

MUSIC 159X. Religion and the Arts in India—(Enroll in RELIGST 159/259A.)
4-5 units, Aut (Hess)

MUSIC 187. The Work of Art and the Creation of Mind—(Enroll in EDUC 200.)
4 units, Win (Staff)
FOUNDATION FOR B.A. MAJOR

Students with previous training in theory should take a placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study in MUSIC 21.

MUSIC 19. Introduction to Music Theory—For non-music majors and music majors or minors unable to pass the proficiency test for entry to 21. The fundamentals of music theory and notation, basic sight reading, sight singing, ear training, keyboard harmony; melodic, rhythmic, and harmonic dictation. Skill oriented, using piano and voice as basic tools to develop listening and reading skills. GER:3a

3 units, Aut, Spr (T. Berger)

MUSIC 21, 22, 23. Elements of Music—Melody, harmony, counterpoint, and rhythm are studied through analysis, composition, and exercises in practical musicianship. Emphasis is on tonal theory with components in melody, counterpoint, and harmony. Analytical and practical musicianship skills are taught, with analysis and compositional projects in historical styles. Students with previous training in theory should take a placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study in MUSIC 21.

MUSIC 21. Elements of Music I—Preference to majors. Introduction to tonal theory. Practice and analysis. Diatonic theory focusing on melodic and harmonic organization, functional relationships, voice-leading, and tonal structures. Ear-training and keyboard-harmony skills; analytical methods and listening strategies. Students intending to continue with 22-23 who do not have piano proficiency should begin 12 (class piano) concurrently. Enrollment limited to 40. Prerequisite: pass proficiency examination in basic musical skills on first day of class; students who do not pass may take 19. GER:3a

4 units, Aut, Win (Aquilanti), Win (Jones)

MUSIC 22. Elements of Music II—Preference to majors. Introduction to chromatic harmony focusing on secondary functions, modulations, harmonic sequences, mode mixture, and the Neapolitan, and augmented sixth chords. Analysis of musical forms and harmonization is complemented by harmonic and melodic dictation, sight singing, and other practical skills. Prerequisite: 21 or consent of instructor. GER:3a

4 units, Win (Aquilanti), Spr (Ulman)

MUSIC 23. Elements of Music III—Preference to majors. Continuation of chromatic harmony, complex forms, and introduction to early 20th-century techniques. Satisfactory passage of ear-training proficiency exam, part of the course’s final, is a requirement for course completion and for continuation in the major sequence. Passage of departmental piano-proficiency exam is also required to pass this course. Prerequisite: 22 or consent of instructor. GER:3a

4 units, Aut (A. Hills), Spr (Aquilanti)

MUSIC 40, 41, 42. Music History—The history of Western art music from Gregorian chant to the present, stressing major styles and genres in their intellectual and institutional settings.

MUSIC 40. Music History to 1600—Pre- or corequisite: 23. GER:3a

4 units, Aut (Gilbert)

MUSIC 41. Music History 1600-1830—Pre- or corequisite: 23. GER:3a

4 units, Win (Plebuch)

MUSIC 42. Music History Since 1830—Pre- or corequisite: 23. GER:3a

4 units, Spr (Grey)

MUSIC 121. Analysis of Tonal Music—Complete movements, or entire shorter works of the 18th and 19th centuries, are analyzed in a variety of theoretical approaches. Prerequisites: 23, or consent of instructor; and successful completion of the ear-training and piano-proficiency examinations. GER:3a

4 units, Win (Barth)

MUSIC 122A. Eighteenth-Century Counterpoint—Analysis and composition of two- and three-part inventions and three- and four-voice fugues. Use of keyboard, ear training, and sight singing underlies all written work. Prerequisites: 23, or consent of instructor; and successful completion of the ear-training and piano-proficiency examinations. GER:3a

4 units, Win (Jones)

MUSIC 122B. Harmonic Materials of 19th Century—Analysis of 19th-century music, with compositional exercises based on 19th-century models. Prerequisites: 23, or consent of instructor; and successful completion of the ear-training and piano-proficiency examinations. GER:3a

4 units, Spr (Plebuch)

MUSIC 122C. Introduction to 20th-Century Composition—Contemporary works, with emphasis on music since 1945. Projects in free composition based on 20th-century models. Prerequisites: 23, or consent of instructor; and successful completion of the ear-training and piano-proficiency examinations. GER:3a

4 units, Aut (Ferneyhough)

COMPOSITION

MUSIC 123. Undergraduate Seminar in Composition—Weekly discussion on current trends in composition. May be repeated for credit. Prerequisite: music major, and 23 or consent of instructor. GER:3a

3 units, Aut (Hills), Win (Applebaum)

MUSIC 125. Individual Undergraduate Projects in Composition—Individual projects in creative work. May be repeated for credit. Prerequisites: music major, and at least one quarter of 123.

1-3 units, Aut (Hills), Win (C. Jones), Spr (Ulman)

MUSIC 323. Doctoral Seminar in Composition—Illustrated discussions of compositional issues and techniques. Students present their own work to the class, and individually to the instructor.

4 units, Aut (Applebaum), Win (Ferneyhough), Spr (Ulman)

MUSIC 325. Individual Graduate Projects in Composition

1-5 units, Aut, Win, Spr, Sum (Staff)

HISTORY AND LITERATURE

MUSIC 140-148. Seminars in Music History—Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year. May be repeated for credit. Music majors may repeat the same seminar in music history only once for credit towards the major and must turn in different papers the second time. GER:3a, WIM

MUSIC 140. Studies in Medieval Music—(Same as 240.) Pre- or corequisite: 23 (WIM at 4-unit level only.)

3-4 units, Aut (Gilbert) alternate years, not given 2005-06

MUSIC 141. Studies in Renaissance Music—(Same as 241.) Pre- or corequisite: 23, (WIM at 4-unit level only.)

3-4 units, Spr (Gilbert) alternate years, given 2005-06

MUSIC 142. Studies in Baroque Music—(Same as 242.) Pre- or corequisite: 23, (WIM at 4-unit level only.)

3-4 units, Plebuch alternate years, given 2005-06

MUSIC 143. Studies in Classic Music—(Same as 243.) Pre- or corequisite: 23, (WIM at 4-unit level only.)

3-4 units, Spr (Hadlock) alternate years, not given 2005-06

MUSIC 144. Studies in Romantic Music—(Same as 244.) Pre or corequisite: 23, (WIM at 4-unit level only.)

3-4 units, Win (Hadlock) alternate years, not given 2005-06

MUSIC 145. Studies in Modern Music—(Same as 245.) Pre- or corequisite: 23, (WIM at 4-unit level only.)

3-4 units, Ford alternate years, given 2005-06

MUSIC 148. Musical Shakespeare: Theater, Song, Opera, and Film—(Same as 248, HUMNTIES 192G.) The role of music in productions, adaptations, and interpretations of Shakespeare’s plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic
and film adaptations; also incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include Romeo and Juliet, Othello, Macbeth, Hamlet, The Tempest, Midsummer Night’s Dream, and Twelfth Night. Pre- or corequisite: 23 (WIM at 4- or 5-unit level only.) GER:3a
3-5 units (Grey) alternate years, given 2005-06

MUSIC 164/264. Ritual Musics of the World—(Same as CASA 164.) The roles that music plays in human ritual life: physical effects of music, shamanic healing, spirit possession, and rites of worship. Gender issues in ritual music. The power of music to create and affirm communities, and as a medium for spiritual knowledge. What can be known about people, places, and cultures through sound? How does music express and shape social identity? How are belief systems and patterns of social interaction manifested in musical practices? Sources include readings and guided listening to recorded music from cultural and religious traditions around the world. GER:3a,4a
4 units, Win (Diehl)

MUSIC 221A.B. History of Music Theory—The principal theories, theorists, and treatises of Western art music. Issues and controversies. Two quarter sequence.

MUSIC 221A. Ancient Through Baroque
4 units (Peirce) alternate years, given 2005-06

MUSIC 221B. Classical Through Modern
4 units (Hinton) alternate years, given 2005-06

MUSIC 240-248. Seminars in Music History—For graduate students; topics as in 140-148. Participation in upper-class seminars, with additional in-depth research. Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year.

MUSIC 240. Studies in Medieval Music—(Same as 140.)
3-4 units, Aut (Gilbert) alternate years, not given 2005-06

MUSIC 241. Studies in Renaissance Music—(Same as 141.)
3-4 units (Gilbert) alternate years, given 2005-06

MUSIC 242. Studies in Baroque Music—(Same as 142.)
3-4 units (Peirce) alternate years, given 2005-06

MUSIC 243. Studies in Classic Music—(Same as 143.)
3-4 units, Win (Peirce) alternate years, given 2005-06

MUSIC 244. Studies in Romantic Music—(Same as 144.)
3-4 units, Spr (Hadlock) alternate years, not given 2005-06

MUSIC 245. Studies in Modern Music—(Same as 145.)
3-4 units (Ford) alternate years, given 2005-06

MUSIC 248. Musical Shakespeare: Theater, Song, Opera, and Film—(Same as 148, HUMNTIES 192G.)
3-5 units (Grey) alternate years, given 2005-06

MUSIC 310. Research Seminar in Musicology—For graduate students. Specialized topics vary each quarter.
3-5 units, Aut (Ford), Win (Hadlock), Spr (Gilbert)

MUSIC 312A.B. Aesthetics and Criticism of Music—For graduate students. Primary texts focusing on the nature, purposes, and uses of music and other arts.

MUSIC 312A. Ancients and Moderns: Plato to Nietzsche
4 units, Aut (K. Berger) alternate years, not given 2005-06

MUSIC 312B. Heidegger to Today
4 units, Win (K. Berger) alternate years, not given 2005-06

MUSIC 120. Auditory Remapping of Bioinformatics—Representation of data related to bioinformatics and medical imaging. Physiological and perceptual perspectives. Representations of complexity in sound and types of auditory display applied to representation of data sets. Term project involving developing tools for sonification and/or applying these tools to a representation problem. Recommended: basic knowledge and interest in music, computer programming, or one of the biological sciences. GER:2b
1-3 units, Aut (J. Berger)

MUSIC 120Z. Musique Concrète in the Digital Era—For music majors or non-majors, and novice or experienced composers; geared toward computer music beginners. Introduction to experimental music composition using computer software (Pro Tools). Topics include: compositional techniques; sound editing; basic signal processing; stereo and multi-channel diffusion; electronic music performance practice; historical overview of related electronic music; and the meaning of sound, the aesthetic and legal ramifications of plundervphonics, and metaphor in electronic music. Weekly composition études and larger projects presented in concert. GER:3a
3 units, Aut (Staff)

3 units, Spr (Smyth)

MUSIC 151. Psychophysics and Cognitive Psychology for Musicians—Elementary concepts and experiments relevant to the use of sound, especially synthesized, in music. Listening to sound examples. Emphasis is on salience and importance of auditory phenomena in music. Prerequisite: basic knowledge of music. See web site. GER:3a,WIM
4 units, Win (J. Berger)

MUSIC 154. Composition and Performance of Instrumental Music with Electronics—Aesthetic, analytical issues of mixed instrumental and electronic works. Focus is on one or a few works leading to a public performance at the end of the quarter. Prerequisite: experience in analysis of contemporary music and experience with electronic music.
1-3 units, Spr (J. Berger)

MUSIC 192. Theory and Practice of Audio Recording

MUSIC 192A. Foundations of Sound-Recording Technology—For upper-division undergraduates and graduate students; preference to music majors with MST specialization. Topics: elementary electronics, the physics of sound transduction and microphone operation, selection and placement; mixing consoles; connectors and device interconnection; grounding and shielding; the principles of analog magnetic recording; operation maintenance of recording equipment; the basic principles of recording engineering. Limited enrollment. Prerequisites: 151; algebra, physics basics, and consent of instructor. GER:2b
3 units, Aut (Kadis)

MUSIC 192B. Advanced Sound Recording Technology—Topics: noise reduction techniques; dynamics and time-delay audio effects; the principles of digital audio; disk- and tape-based digital recorders; digital audio workstations and editing; advanced multitrack techniques; SMPTE and MIDI time code and device synchronization; MIDI sequencing and synchronization. See http://ccrma.stanford.edu/courses/. Prerequisite: 192A. GER:2b
3 units, Win (Kadis)

MUSIC 192C. Session Recording—Independent engineering of recording sessions. May be repeated for credit. Prerequisites: 192A,B. 1-2 units, Aut, Win, Spr (Kadis)

MUSIC 220. Computer-Generated Music

MUSIC 220A. Fundamentals of Computer-Generated Sound—Techniques for digital sound synthesis, effects, and reverberation. Topics: summary of digital synthesis techniques (additive, subtractive, nonlinear, wavetable, spectral-modeling, and physical-modeling); digital effects algorithms (phasing, flanging, chorus, pitch-shifting, and vocoding); and techniques for digital reverberation. Majors (undergraduate or graduate) must take for 4 units. See http://ccrma.stanford.edu/courses/.
2-4 units, Aut (Chafe)
MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing—The use of high-level programming language as a compositional aid in creating musical structures. Advanced study of sound synthesis techniques. Simulation of a reverberant space and control of the position of sound within the space. See http://ccrma.stanford.edu/courses/. Prerequisite: 220A.
  1-4 units, Win (Lopez-Lezcano)

MUSIC 220C. Research Seminar in Computer-Generated Music—Individual projects in composition, psychoacoustics, or signal processing. See http://ccrma.stanford.edu/courses/. Prerequisite: 220B.
  2-4 units, Spr (Chafe)

MUSIC 220D. Research in Computer-Generated Music—Independent research projects in composition, psychoacoustics, or signal processing. May be repeated for credit. Prerequisite: 220C. See http://ccrma.stanford.edu/courses/.
  1-4 units, Aut, Win, Spr, Sum (Staff)

MUSIC 250. Seminar in Human-Computer Interfaces for Musical Purposes—Students also taking the full 220 series must take 250A before 220C.

MUSIC 250A. HCI Theory and Practice—HCI issues as they relate to music applications in composition and performance. Project-oriented, examining issues from the technical and theoretical perspectives of computer science, haptics, and music theory. See http://ccrma.stanford.edu/courses/250a/.
  3-4 units, Aut (Verplank)

  Prerequisite: 250A.
  1-4 units, Win (Verplank)

MUSIC 253. Musical Information: An Introduction—The kinds of musical information used in sound, graphical, and analytical applications. Emphasis is on independent concepts and principles in music representation and research objectives (reperatory analysis, performance analysis, theoretical models, similarity, and stylistic simulation). Examples from Western art music. Prerequisites: one year of music theory or equivalent; methods courses in fields such as musical analysis, symbolic systems, information processing, sound engineering, or intellectual property.
  1-4 units, Win (Selfridge-Field)

MUSIC 254. Applications of Musical Information: Query, Analysis, and Style Simulation—Participants explore the issues introduced in 253 in greater depth and take initiative for research projects related to a theoretical or methodological issue, a software project, or a significant analytical result. Prerequisite: 253 or consent of instructor.
  1-4 units, Spr (Selfridge-Field)

MUSIC 255. Orchestration and Timbral Analysis—Introduction to the art and craft of orchestration and timbral analysis. Combines a hands-on approach to orchestration with applied computational timbral analysis. Geared for music majors with a concentration or interest in composition or MST. Weekly assignments in orchestration and timbre analysis, along with computer-based timbre analysis. Final project involving either computer-based analysis or an advanced orchestration assignment. See http://ccrma.stanford.edu/courses/255/.
  1-4 units (J. Berger) not given 2004-05

MUSIC 319. Research Seminar on Computational Models of Sound Perception—All aspects of auditory perception, often with emphasis on computational models. Topics: music perception, signal processing, auditory models, pitch perception, speech, binaural hearing, auditory scene analysis, basic psychoacoustics, and neurophysiology. See http://ccrma.stanford.edu/courses/.
  1-3 units, Aut, Win, Spr (Slaney)

  2-4 units, Aut (J. Smith)

MUSIC 421. Audio Applications of the Fast Fourier Transform (FFT)—Spectrum analysis and signal processing using the FFT with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthesis. See http://ccrma.stanford.edu/courses/421/.
  Prerequisites: 420 or consent of instructor.
  3-4 units, Win (J. Smith)

MUSIC 422. Perceptual Audio Coding—History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple codecs. Topics: audio signals representation; quantization; time to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audio codec; perceptual audio codecs evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such as AC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See web site.
  3 units, Win (Bosi)

  1-4 units, Aut, Win, Spr (J. Smith)

MUSIC 424. Signal Processing Techniques for Digital Audio Effects—Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of MUSIC 320 or EE 2611; Matlab and modest C programming experience. Recommended: MUSIC 420 or EE 264; audio effects in mixing and mastering at the level of MUSIC 192.
  3-4 units, Spr (Staff)

PERFORMANCE GROUP INSTRUCTION

Note—Special fee of $100 per quarter for 12A,B,C (non-majors); 65A,B; 72, 73, 74, 75, 76, 77.

MUSIC 12A,B,C. Introductory Piano Class—(A=level 1; B=level 2; C=level 3) Preference given to music majors.
  1 unit, Aut, Win, Spr, Sum (Zerlang)
MUSIC 65A.B. Voice Class I, II—Group (7 students to a section) beginning voice for the non-major (A = level 1; B = level 2).
1 unit, Aut, Win, Spr (Giovannetti), Sum (Linduska)

MUSIC 65C. Voice Class (Majors and Ensemble Members)—For music majors and non-majors who are members of departmental choral ensembles.
1 unit, Aut, Win, Spr (Wait)

MUSIC 72-77. Small-Group, Intermediate-Level Instruction—Minimum enrollment required. May be repeated for credit.
MUSIC 72A. Intermediate Piano Class—For intermediate students. Prerequisites: 12C or equivalent, audition.
1 unit, Aut, Win, Spr (Thornburgh)

MUSIC 72B. Organ Class—For beginning organ students who have keyboard skills.
1 unit, Aut, Win, Spr (Morgan)

MUSIC 72C. Harpsichord Class—For beginning harpsichord students who have keyboard skills.
1 unit, Aut, Win, Spr (Thornburgh)

MUSIC 72D. Jazz Piano Class—By invitation only; priority to majors and jazz-ensemble participants.
1 unit, Aut, Win, Spr (Gustavson)

MUSIC 72E. Fortepiano Class
1 unit, Aut, Win, Spr (Thornburgh)

MUSIC 72F. Classical Guitar Class—For intermediate students
1 unit, Aut, Win, Spr (Ferguson)

MUSIC 72G. Percussion Class
1 unit,Aut, Win, Spr (Veregge)

MUSIC 172A/272A. Piano—Private lessons and group master class weekly.
1-3 units (Barth, Dahl, Schultz, Weldy)

MUSIC 172B/272B. Organ
1-3 units (Morgan)

MUSIC 172C/272C. Harpsichord
1-3 units (Thornburgh)

MUSIC 172D/272D. Jazz Piano—By invitation only; priority to majors and jazz-ensemble participants.
1-3 units (Gustavson)

MUSIC 172E/272E. Fortepiano
1-3 units (Barth)

MUSIC 173/273. Voice
1-3 units (Giovannetti, Lane, Wait)

MUSIC 174/274. Stringed Instruments
MUSIC 174A/274B. Violin
1-3 units (Kleyman, Harms, Nuttall, Shiffman)

MUSIC 174B/274B. Viola
1-3 units (Kleyman, Robertson)

MUSIC 174C/274C. Violoncello
1-3 units (S. Harrison, Costanza)

MUSIC 174D/274D. Contrabass
1-3 units (Mayer)

MUSIC 174E/274E. Viola Da Gamba
1-3 units (Dornenburg)

MUSIC 174F/274F. Classical Guitar
1-3 units (Ferguson)

MUSIC 174G/274G. Harp
1-3 units (Chauvel)

MUSIC 174H/274H. Baroque Violin
1-3 units (Martin)

MUSIC 174I/274I. Early Plucked Strings
1-3 units (Staff)

MUSIC 175/275. Woodwind Instruments
MUSIC 175A/275A. Flute
1-3 units (Blaisdell, Hawley, Holmes-Schaeffle, Maestre)

MUSIC 175B/275B. Oboe
1-3 units, Aut (Hubbard), Win, Spr (Matheson)

MUSIC 175C/275C. Clarinet
1-3 units (Brandenburg)

MUSIC 175D/275D. Bassoon
1-3 units (Olivier)

MUSIC 175E/275E. Recorder/Renaissance Wind Instruments
1-3 units (Myers)

MUSIC 175F/175F. Saxophone
1-3 units (Stein)

MUSIC 175G/275G. Baroque Flute
1-3 units (Claire)

MUSIC 176/276. Brass Instruments
MUSIC 176A/276A. French Horn
1-3 units (Ragent)

MUSIC 176B/276B. Trumpet
1-3 units (Johnson-Hamilton)

MUSIC 176C/276C. Trombone
1-3 units (Kenley)

MUSIC 176D/276D. Tuba
1-3 units (Clements)

MUSIC 177/277. Percussion
1-3 units (Veregge)

PERFORMANCE PRACTICES
MUSIC 126. Introduction to Thoroughbass—The development of continuo techniques and skills for figured-bass realization. Performance and analysis of selected repertoire, using thoroughbass principles and exercises based on historical theoretical treatises. Prerequisite: 21.
1-3 units, Win (T. Berger)

MUSIC 130. Elementary Conducting
MUSIC 130A. Introduction to Conducting—The fundamentals of baton techniques and rehearsal procedures. The development of coordination of the members of the body involved in conducting; fluency in the various beat patterns and meters; dynamics, tempi, cueing, and use of the left hand in conducting. Prerequisites: 121 and diagnostic musicianship exam given first day of class; preference given to students who have also completed 122B.
3 units, Aut (Aquilanti) alternate years, not given 2005-06

MUSIC 130B. Elementary Orchestral Conducting—Prerequisites: 127 or previous orchestral performance experience, 130A.
3 units, Spr (Cai) alternate years, not given 2005-06
MUSIC 130C. Elementary Choral Conducting—Techniques include: warm-ups, breathing, balance, blend, choral tone, isolation principles, recitative conducting, preparation, and conducting of choral/orchestral works. Prerequisite: 130A. 3 units, Win (Sano) alternate years, not given 2005-06

MUSIC 169A/269A. Seminar in Performance Practices—Performance techniques, theoretical principles, aesthetics, and musical resources of various historical periods. GER:3a 4 units (Gilbert) alternate years, given 2005-06

MUSIC 181. Solo Vocal Repertoire—Solo vocal repertoire for advanced vocal students. Song and operatic literature is studied and performed by class participants. Repertoire varies and/or spans more than one quarter, allowing students to repeat the course for credit.
1 unit, Aut, Win, Spr (Lane)

MUSIC 182. Diction for Singers—The international phonetic alphabet and its application to German, French, and Italian vocal literature. Open also to pianists interested in vocal coaching and choral conducting.
1 unit, Win (Dahl)

MUSIC 183. Art Song Interpretation—For advanced singers and pianists as partners. Performance class in a workshop setting. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers.
1 unit (Dahl) alternate years, given 2005-06

MUSIC 183A. German Art Song Interpretation—Including composers from Beethoven and Schubert to Wolf and Strauss. For advanced singers and pianists as partners. Performance class in a workshop setting. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers.
1 unit (Dahl) alternate years, given 2005-06

MUSIC 183B. French Art Song Interpretation—Composers include Fauré, Debussy, Ravel, and Poulenc. For advanced singers and pianists as partners. Performance class in a workshop setting. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers.
1 unit, Spr (Dahl) alternate years, not given 2005-06

MUSIC 184. Schumann Song Cycles—For advanced singers and pianists as partners. Focus is on Dichterliebe, and Frauenliebe und Leben. Performance class in workshop setting. Prerequisite: consent of instructor. Recommended: 170 or 182.
1 unit (Dahl) alternate years, given 2005-06

MUSIC 230. Advanced Orchestral Conducting—May be repeated for credit. Prerequisite: 130B. 2-4 units, Aut, Win, Spr (Cai)

MUSIC 231. Advanced Choral Conducting—May be repeated for credit. Prerequisite: 130C. 2-4 units, Aut, Win, Spr (Sano)

ENSEMBLE
An audition is required for admission to any University musical ensemble; audition schedules are posted during the registration period in Autumn Quarter. Audition is by appointment in Winter and Spring quarters: contact the ensemble director. Membership is open to all students including those who do not register for credit, although these courses may be repeated for credit. Many Department of Music ensembles tour on a regular basis, usually after commencement in June.

MUSIC 156. "sic": Improvisation Collective—Small ensemble devoted to learning trans-idiotic improvisation techniques and composing indeterminate pieces in a workshop setting. One major concert. Prerequisite: access to an instrument. Improvisational experience and conventional instrumental virtuosity not required.
1 unit, Win (Applebaum)

MUSIC 157. Introduction to Mariachi Ensemble—Introduction to the practice of mariachi music, tradition, and history. Focus is on learning traditional sones, rancheras, huapangos, and boleros. Requirements: ability to play and access to instruments (violin, trumpet, guitar, vihuela, and guitarron).
1 unit, Aut, Win, Spr (Lucero)

MUSIC 159. Early Music Singers—Small choir specializing in Medieval, Renaissance, and early Baroque vocal music. One major concert per quarter.
1 unit, Aut (Mahrt), Win, Spr (Gilbert)

MUSIC 159A. Shape-Note Singers—This ensemble sings early American sacred song including Psalms, anthems, fuging tunes of New England, and shape-note hymns from books such as The Southern Harmony and The Sacred Harp. Participants sing and take turns leading the group in tunes of their choice. General admission. Recommended: reading ability in music.
1 unit, Aut (Gilbert)

MUSIC 160. University Orchestra—70- to 100-member ensemble performing major orchestral works; minimum one concert per quarter.
1 unit, Aut, Win, Spr (Cai)

MUSIC 161. University Bands
MUSIC 161A. Stanford Wind Ensemble—40- to 50-member ensemble performing transcriptions of symphonic music, brass band music, and repertoire composed specifically for symphonic band. One concert per quarter.
1 unit, Aut, Win, Spr (Aquilanti)

MUSIC 161B. Jazz Orchestra—Big band format. Repertoire drawn primarily from the contemporary jazz-ensemble literature. One formal concert per quarter.
1 unit, Aut, Win, Spr (Berry)

MUSIC 161C. Red Vest Band—A small ensemble of the Leland Stanford Junior University Marching Band open to members of the LSJUMB by audition and consent of instructor. Members perform at all men’s and women’s home basketball games and travel to some away and post-season games. Twice-weekly rehearsals focus on introduction of new student arrangements and the LSJUMB’s repertoire of rock, funk, and traditional styles.
1 unit, Win (Aquilanti)

MUSIC 162. Symphonic Chorus—100- to 150-voice ensemble, performing major choral masterworks with orchestra. One concert per quarter.
1 unit, Aut, Win, Spr (Sano)

MUSIC 163. Memorial Church Choir—Official choir of Memorial Church, furnishing music for Sunday services and special occasions in the church calendar.
2 units, Aut, Win, Spr (Wait)

MUSIC 165. Chamber Chorale—24-voice chamber ensemble, specializing in virtuoso choral repertoire from all periods of Western art music.
1 unit, Aut, Win, Spr (Sano)

MUSIC 167. University Singers—Mixed-repertory chorus, performing a variety of choral repertoire from all periods of Western art music and from other world cultures.
1 unit, Aut, Win, Spr (Morgan)

MUSIC 169. Stanford Taiko—Select North American taiko ensemble, performing traditional and contemporary repertoire for Japanese drums. Multiple performances in Winter and Spring quarters, also touring; instrument construction and maintenance. Admission by audition in Autumn Quarter only.
1 unit, Aut, Win, Spr (Sano, Uyechi)

MUSIC 170. Collaborative Piano—Performance workshop. Techniques of collaboration with vocalists and instrumentalists in repertoire ranging from songs and arias to sonatas and concertos. Prerequisite: private-lesson-proficiency level in piano, or consent of instructor.
1 unit, Aut (Dahl)
MUSIC 171. Chamber Music—Small combinations for strings, winds, and keyboard instruments. Open to students at the private-lesson-proficiency level to hone ensemble skills, preferably while taking private lessons. Selected string instrument participants are invited to participate in a chamber orchestra, led by members of the St. Lawrence String Quartet, without conductor. Winter Quarter: chamber orchestra in conjunction with chamber chorale performing choral sacred music of the Baroque period, led by members of the St. Lawrence. All new and returning students are required to audition.

1 unit, Aut, Win, Spr (Staff)

UNDERGRADUATE DIRECTED READING AND RESEARCH

MUSIC 197. Undergraduate Teaching Apprenticeship—Work in an apprentice-like relationship with faculty teaching a student-initiated course. Prerequisite: consent of instructor.

1-2 units, Aut, Win, Spr (Staff)

MUSIC 198. Concentrations Project—For concentration program participants only. Must be taken in senior year.

4 units, Aut, Win, Spr (Staff)

MUSIC 199. Independent Study—For advanced undergraduates and graduate students to do work outside the regular curriculum. Before registering, student must present project and enlist a faculty sponsor.

1-5 units, Aut, Win, Spr, Sum (Staff)

GRADUATE RESEARCH AND SPECIAL STUDIES

MUSIC 200. Graduate Proseminar—Required of first-year graduate students in music. Introduction to research in music, bibliographical materials, major issues in the field, philosophy, and methods in music history. Guest lecturers and individual research topics.

4 units, Aut, Win, Spr (K. Berger)

MUSIC 269B. Research in Performance Practices—Directed reading and research.

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 280. TA Training Course—Required for doctoral students serving as teaching assistants. Orientation to resources at Stanford, guest presentations on the principles of common teaching activities, supervised teaching experience. Students who entered in the Autumn should take 280 in the Spring prior to the Autumn they begin teaching.

1 unit, Spr (Sargent)

MUSIC 300. Seminar in Notation—Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.

MUSIC 300A. Medieval Notation
4 units (Mahrt) alternate years, given 2005-06

MUSIC 300B. Renaissance Notation
4 units (Mahrt) alternate years, given 2005-06

MUSIC 301A. Analysis of Music: Modal
4 units, Aut (Mahrt)

MUSIC 301B. Analysis of Music: Tonal
4 units, Win (Grey)

MUSIC 301C. Analysis of Music: Post-Tonal
4 units, Spr (Ferneyhough)

MUSIC 302. Research in Musicology—Directed reading and research.

1-5 units, Aut, Win, Spr, Sum (Staff)

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 341. Ph.D Dissertation
1-9 units, Aut, Win, Spr, Sum (Staff)

MUSIC 399. D.M.A. Final Project
1-9 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES PROGRAM

Academic Director: Amos Nur

Stanford Program in Australia
Director, Centre for Marine Studies, University of Queensland: Ove Hoegh-Guldberg
Faculty: Kevin Arrigo, Tony Chiffings, Sophie Dove, Norman Duke, Maoz Fine, Ron Johnstone, Michael Pole, Roger Shore, James Udy, Lorenzo Veracini, Selina Ward

Stanford Program in Beijing
Director: Jason D. Patent
Faculty: Albert Dien, Min Hu, Harold Kahn, Wenjun Li, Dingcheng Ren, Xiaochun Sun, Daqing Zhang, Pei Zhang, Qi Zhang, Shiqui Zhang, Dunhua Zhao, Tong Zhu

Stanford Program in Berlin
Director: Karen Kramer
Faculty: Theodore Andersson, Maria Biege, Ulrich Brückner, Oksana Bulgakowa, Dubravka Friesel-Kopecki, Susanne Herzog, Wolf-D. Junghanns, Ingo Klein, Christa Maerker, Franz Nekkenig, Maurice Rehm, Sylke Tempel, Jochen Wohlfeil

Stanford Program in Florence
Director: Ermelinda Campani
Faculty: Khaled Allam, Antonio Cassese, Mark Cutkosky, Daniela Lamberini, Joseph Levi, Mirella Loda, Susanna Loeb, Charles Loverme, Giuseppe Mammarella, Leonardo Morlino, Stefano Pallanti, Lapo Pistelli, Fiorenza Quercioli, Jack Rakove, Filippo Rossi, Timothy Verdon

Stanford Center for Technology and Innovation (SCTI)—Kyoto
Kyoto Center for Japanese Studies (KCJS)
Director: Terry MacDougall
Faculty: Rebecca Copeland, Walter Edwards, Toshiko Fujiwara, Toshihiko Hayashi, Takashi Hikino, Fujiko Hotta, Mitsugu Ichikawa, James Ketelaar, Catherine Ludvik, Junko Minamoto, Dwight Nishimura, Melissa Rinne, Haruka Ueda, Mariko Uemiya, Chihiro Yamaoka, Emiko Yasumoto

Stanford Program in Oxford
Director: Geoffrey Tyack
Faculty: Giovanni Capoccia, John Darwin, Avner Greif, Raymond Hintz, Helen Kidd, John L’Heureux, Robert McMahon, Amanda Palmer, Emma Plaskitt, Derek Robinson, Trevor Rowley, John Senior, Jonathan Wordworth

Stanford Program in Paris
Director: Estelle Halevi
Faculty: Joel Beinin, Colette Deremble, Jean Paul Deremble, Benjamin Dupas, Marc Germanangue, Marie Grée, Catherine Grenier-Sennelier, Patrick Guedon, Marie-Claire Lavabre, Marc Lazar, Jacques Le Cacheux, Pamela Lee, Fabienne Maître, Anthony Mangeon Nonna Mayer, Florence Mercier, Marie-Madeleine Mervant-Roux, Elizabeth Molkou, Dominique Remy-Granger, Marie-Christine Ricci, Paul Switzer, Fabrice Virgili

Stanford Program in Santiago
Director: Edmundo Fuenzalida
Faculty: Lorenzo Agar, Germán Correa, Claudio Fuente, Maria Paz Haro, John Kunz, Oscar Muñoz, Veronica Poblete, Hernan Pons, Jorge Ruffinelli, Bernardo Subercaseaux, Teresa Valdés, Ignacio Walker

Program Offices: First Floor, Sweet Hall
Mail Code: 94305-3089
Phone: (650) 723-3558
Email: study@osp.stanford.edu
Web Site: http://osp.stanford.edu

Courses given in Overseas Studies Program have subject codes beginning with OSP. For a complete list of subject codes, see Appendix.
Stanford University encourages students to explore the opportunities of study abroad through programs in Australia, Beijing, Berlin, Florence, Kyoto, Oxford, Paris, and Santiago. Students may enroll for one or more quarters at most centers. Course offerings in engineering, humanities, sciences, and social sciences provide full Stanford credit. Many courses also count toward major requirements and/or fulfill General Education Requirements. Academic or paid internships are available at the Berlin, Florence, Kyoto-SCTI, Paris, and Santiago programs. Research opportunities are available in various formats at different centers. Minimum academic and language prerequisites are specific to each program. See http://osp.stanford.edu for information on these requirements.

While studying overseas through OSP, students remain registered at Stanford and pay regular tuition, along with the Overseas Studies fee which is based on Stanford room and board rates. Regular financial aid applies, and may be increased to cover additional costs. At most centers, students live in a homestay or with local students.

Overseas Studies, located on the first floor of Sweet Hall, has full-time staff members and student advisers to assist in planning for overseas study. The following information, while accurate at the time of printing, is subject to change. See http://osp.stanford.edu for updated information.

**COURSES**

(8U) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

International Relations has approved a number of Overseas Studies courses for major credit; these are listed in the “International Relations” section of this bulletin.

**AUSTRALIA**

**OSPAUSTL 10. Coral Reef Ecosystems**—(Enroll in BIOSCI 109Z, EARTHSYS 120X, HUMBIO 61X.) Key organisms and processes, and the complexity of coral reef ecosystems. Students explore the Great Barrier Reef from the southern end which demonstrates the physical factors that limit coral reefs, to the northern reef systems which demonstrate key aspects of these high biodiversity ecosystems. Human-related changes. Emphasis is on research experiences and development of analytical skills. Two units only counted for Biology major. GER:2b

3 units, Aut (Arrigo, Dove, Hoegh-Guldberg)

**OSPAUSTL 20. Coastal Resource Management**—(Enroll in BIOSCI 110Z, EARTHSYS 121X, HUMBIO 62X.) Problem solving, research, communication, teamwork, and social assessment skills in sustainable coastal zone management. Issues include: ecosystem functions and values at risk under proposed development in case study; environmental outcomes most desirable for the local stakeholders; features of the human communities and their function as they relate to the management options; tools or mechanisms for a sustainable management outcome. Taught by multidisciplinary team that includes Australian and developing country experts. Two units only counted for Biology major. GER:2b

3 units, Aut (Johnstone, Udy)

3 units, Aut (Duke, Pole)

**OSPAUSTL 40. Australian Studies**—Introduction to Australian society, history, culture, politics, and identity through lectures, tutorial work, and field trips. Two sections: one draws on social science framework and methodology; the other on literature, visual art, and popular culture.

3 units, Aut (Veracini)

**OSPAUSTL 50. Targeted Research Project**—Prior to arriving in Australia, students establish a link with University of Queensland faculty to develop project ideas that combine personal interests and career goals with opportunities presented by the Australian Coastal Studies program, such as how mangrove roots find sediment rich zones of the shore, or the dynamics of ecotourism in southern and northern coastal Queensland. Project report and presentation in Australia.

4 units, Aut (Hoegh-Guldberg)

**BEIJING**

**OSPBEIJ 10. The Chinese Past: The Golden Age of Chinese Archaeology**—(Enroll in CHINGEN 158B, HISTORY 193V.) China’s early history and archaeological discoveries through the Ming dynasty. How the articulation of these approaches illuminates problems in both fields. Guest lecturers from the Department of Archaeology at Peking University. Field trips to local sites. GER:3a,4a

5 units, Aut (Dien)

**OSPBEIJ 12. Environmental Challenges in China’s Development**—(Enroll in EARTHSYS 105X.) Pressures on China’s environment and natural resources resulting from its transition from a planned economy to a market economy. Social, economic, and environmental issues; health effects of environmental pollution; limitations on resources for development; Social responses to environmental challenges; and strategies for sustainable development. GER:3b

4 units, Aut (Zhu, Zhang, Hu, Li)

**OSPBEIJ 14. Comparing the Chinese and American Legal Systems**—China’s legal system and ongoing legal reforms with comparison to corresponding systems in the U.S. The framework of Chinese society, traditional legal culture, and changing social processes. GER:3b

4 units, Aut (Zhang, Q)

**OSPBEIJ 15. Cultural Competency: Navigating Chinese Culture**—Making sense of unfamiliar cultural and linguistic experiences. Encounters and obstacles resulting from cultural and linguistic differences, and the lessons to be gained.

1 unit, Aut (Patent)

**OSPBEIJ 16. Philosophy and Religion, East and West**—(Enroll in RELIGST 19B.) Sacred, secular, intellectual, practical, indigenous, and introduced elements in Chinese culture. Chinese religion, ethics, and philosophy through comparisons with Western counterparts: Confucianism, Taoism, and Zen Buddhism; Greek philosophy, Christianity, and modernity. Comparisons include: cosmology and moral metaphysics; human nature and original sin; Confucian humanity and Christian love; individualism and collectivism; shame culture and guilt culture; and Asian values and modernization. GER:3a

4 units, Aut (Zhao)

**OSPBEIJ 17. Careers in China**—Introduction to a wide variety of career options involving China. Weekly talks focusing on personal work experiences in China by speakers from all walks of life.

1 unit, Aut (Patent)

**OSPBEIJ 18. Chinese Literature**—Focus is on classical literature. Literary history of Chinese culture, most important authors, characteristics of the Chinese literary tradition. Comparative method applied to universal literary phenomena such as motif and genre. Recommended: ability to read Chinese. GER:3a

4 units, Spr (Zhang, P)

**OSPBEIJ 20. Beijing: The City and its Significance in History and Tradition**—(Enroll in CHINGEN 157B, URBANST 157V.) The city in China as exemplified by Beijing’s city planning, architecture, and strategic placement via-a-vis the Great Wall and the N. China Plain. Its influence as the capital on culture and artistic achievement, and on political thought. Students choose an aspect of Beijing such as architecture, religion, or neighborhoods for individual projects. Local and foreign scholars meet with students. GER:3b,4a

3 units, Aut (Dien)
OSPBEIJ 22. Language, Culture and Meaning: Understanding Human Cognition in a Crosscultural Context—Cognitive linguistics including metaphor, metonymy, image schemas, frame semantics, and mental spaces. Theorists and empirical investigations. Beijing as example: how cognition and culture interact; how human beings are cultural, and how culture and language influence behaviors and expectations. GER:3b
4 units, Spr (Patent)

OSPBEIJ 30. The Emperor’s City: Imperial Conceptions of Urban Space—(Enroll in HISTORY 291V, URBANST 158V.) Growth of Beijing as an imperial site and how the city changed the urban environment under dynastic visions of universal empire. How time, space, and architecture interconnect and reveal arrangements of political and cultural power and the ritual basis of authority. Past models of the Chinese imperial city, the legacy of the city-as-ruin in the 20th century, and its reinvention as museum and relic in the post-imperial age. GER:3a,4a
5 units, Spr (Kahn)

OSPBEIJ 32. Food in Chinese History—(Enroll in HISTORY 292V.) Production, processing, and consumption from the 10th-21st centuries. How grains have been grown and readied for consumption. Subsistence, the growth of markets and commerce, restaurants, and regional or ethnic foods. Why has food been medicalized in modern times? More reading and writing than eating. Local field trips. GER:3b,4a
5 units, Spr (Kahn)

CHINESE LANGUAGE PROGRAM
OSPBEIJ 2,3. Second-Year Modern Chinese—(Enroll in CHINLANG 21C/23C.)
5 units, 2: Aut, 3: Spr (Staff)

OSPBEIJ 4,5. Third-Year Modern Chinese—(Enroll in CHINLANG 101C/103C.)
5 units, 4: Aut, 5: Spr (Staff)

OSPBEIJ 6,7. Advanced Modern Chinese—(Enroll in CHINLANG 211C,213C.)
5 units, 6: Aut, 7: Spr (Staff)

BERLIN
OSPBER 18. Medieval Women Between Heathendom and Christendom—(Enroll in FEMST 177B, GERGEN 177B.) The status of Germanic women in Tacitus’ Germania from 98 C.E. Transformations in the images of women from the 4th century as the conversion to Christianity spread northward, including wicked queens and impeccable saints. Readings from the Merovingian, Carolingian, and Ottonian periods with focus on the 12th-century correspondence of Heloise and Abelard. The Christian encounter with family and legal structure represented in the legends and sagas of Scandinavia. Sources include contemporary literary texts, legal provisions, Church documents, and social institutions. GER:3a,4c
4 units, Aut (Andersson)

OSPBER 30. Berlin vor Ort: A Field Trip Module—The cultures of Berlin as preserved in museums, monuments, and architecture. Berlin’s cityscape as a narrative of its history from baroque palaces to vestiges of E. German communism, from 19th-century industrialism to grim edifices of the Sachsenhausen concentration camp. Competing political agendas and the criteria of historical selection in monument alteration and removal, renaming streets, and structuring the capital city. Focus is on the interface between sociopolitical life and artistic expression. In German. (AU)
1 unit, Aut, Win, Spr (Neckenig)

OSPBER 32. Film and Propaganda: Soviet and German Films of the 30s—(Enroll in SLAVGEN 153X.) The meaning of propaganda and its use in left- and right-wing dictatorial regimes through films including Riefenstahl’s The Triumph of the Will, Vertov’s Three Songs of Lenin, Chiaureli’s The Fall of Berlin, Harlan’s Jew Suss and Eisenstein’s Alexander Nevsky. Themes and archetypes; images of leader, masses, hero, enemy, and gender; deployments of historical parallels; personalization of ideological messages; and canons of representation. GER:3a
3-4 units, Aut (Bulgakowa)

OSPBER 37. Web Projects—Plan and develop a multimedia web project based on academic work associated with a concurrent course. Prerequisite: knowledge of web design or preparation on home campus.
1 unit, Aut, Win, Spr (Kramer)

OSPBER 38. Research Module—For continuing students. Research under the guidance of a local specialist in libraries, archives, research institutes, and/or in the field. Prerequisite: GERGEN 177A.
3-4 units, Spr (Kramer)

OSPBER 60. German Film and the Berlin Film Festival—(Enroll in DRAMA 158M.) Significant German films (1919-1980), and new films screened at the Berlin Film Festival. Students receive passes to the festival. GER:3a
4 units, Win (Rehm)

OSPBER 61. Opera in Berlin—(Enroll in DRAMA 158W.) Operas staged during the quarter at the three great opera houses: Staatsoper, Komischer Oper, and Deutsch Oper. Comparison study of interpretations of same opera staged at different houses. Secondary readings. Focus is on the intellectual and aesthetic richness represented by the form. GER:3a
4 units, Win (Rehm)

OSPBER 64. Film and Writing—(Enroll in ARTHIST 162Y.) German cinema through film. Sensitivity for film structure through creative writing tutorials and screening workshops. Composition and narrative structure (storyline, suspense, character development). Screen-writing exercises. GER:3a
3-4 units, Spr (Maerker)

OSPBER 93. Globalization: International Challenges, Regional Responses—(Enroll in POLSCI 110X.) The rigid system of the Cold War was replaced by the flexible, almost anarchic system of globalization. Post-cold war political and economical upheaval triggered large migrations. In the age of multinational corporations, many predict the end of the national state in the context of a single superpower without adequately powerful, independent, and compensating institutions. Negative consequences of the dynamic process of globalization are often accredited to the superpower. GER:3b
4-5 units, Spr (Tempel)

OSPBER 101A. Contemporary Theater—(Enroll in GERLIT 195, DRAMA 101A.) Texts of plays are supplemented by the theoretical writings of the respective playwrights and background reading in theater history and theory. Weekly theater trips, a tour of backstage facilities, attendance at a rehearsal, and discussions with actors, directors, or other theater professionals. In German. GER:3a
5 units, Aut (Kramer)

OSPBER 105V. Industry, Technology, and Culture, 1780-1945—(Enroll in HISTORY 105V, STS 120V.) From the steam engine to the modern factory, the engineer emerges as the hero of the innovative and the new in the modern world. The dialectical relationships among material, intellectual, and social culture using the example of modern materials, transport, and communications systems, the micro- and macrocosms discovered in physics, chemistry, and astronomy, and the revolutionizing influence of photography, film, and TV. GER:3a
4 units, Win (Neckenig)

OSPBER 60. German Film and the Berlin Film Festival—(Enroll in DRAMA 158M.) Significant German films (1919-1980), and new films screened at the Berlin Film Festival. Students receive passes to the festival. GER:3a
4 units, Win (Rehm)
OSPBER 61. Opera in Berlin—(Enroll in DRAMA 158W.) Operas staged during the quarter at the three great opera houses: Staatsoper, Komischer Oper, and Deutsch Oper. Comparison study of interpretations of same opera staged at different houses. Secondary readings. Focus is on the intellectual and aesthetic richness represented by the form. GER:3a
4 units, Win (Rehm)
OSPBER 64. Film and Writing—(Enroll in ARTHIST 162Y.) German cinema through film. Sensitivity for film structure through creative writing tutorials and screening workshops. Composition and narrative structure (storyline, suspense, character development). Screen-writing exercises. GER:3a
3-4 units, Spr (Maerker)
OSPBER 93. Globalization: International Challenges, Regional Responses—(Enroll in POLSCI 110X.) The rigid system of the Cold War was replaced by the flexible, almost anarchic system of globalization. Post-cold war political and economical upheaval triggered large migrations. In the age of multinational corporations, many predict the end of the national state in the context of a single superpower without adequately powerful, independent, and compensating institutions. Negative consequences of the dynamic process of globalization are often accredited to the superpower. GER:3b
4-5 units, Spr (Tempel)
OSPBER 101A. Contemporary Theater—(Enroll in GERLIT 195, DRAMA 101A.) Texts of plays are supplemented by the theoretical writings of the respective playwrights and background reading in theater history and theory. Weekly theater trips, a tour of backstage facilities, attendance at a rehearsal, and discussions with actors, directors, or other theater professionals. In German. GER:3a
5 units, Aut (Kramer)
OSPBER 105V. Industry, Technology, and Culture, 1780-1945—(Enroll in HISTORY 105V, STS 120V.) From the steam engine to the modern factory, the engineer emerges as the hero of the innovative and the new in the modern world. The dialectical relationships among material, intellectual, and social culture using the example of modern materials, transport, and communications systems, the micro- and macrocosms discovered in physics, chemistry, and astronomy, and the revolutionizing influence of photography, film, and TV. GER:3a
4 units, Win (Neckenig)
OSPBER 114X. The European Union: Superpower in the Making?—(Enroll in POLISCI 110P.) The single European currency, the Kosovo war, and initiatives for a common foreign and security policy (CFSP) challenge the EU to define its new role in the world. Topics: eastward enlargement, bilateral relationship with the U.S., Turkey, the Mediterranean area, and the future international role of the euro. The ability of the EU to become a global actor in security and economic affairs. GER:3b 4-5 units, Win (Brückner)

OSPBER 115X. The European Economy: Past and Present—(Enroll in ECON 115X, POLISCI 111P.) The history of the German economy in: the Wilhelmine Empire, the Weimar Republic, the Third Reich, the postwar real socialism of the GDR, and the free market economy of the FRG. The processes of economic transition since unification and the current challenges faced by united Germany as Europe’s first economic power and the world’s second largest export nation. GER:3b 4-5 units, Aut (Klein)

OSPBER 117V. The Industrial Revolution and its Impact on Art, Architecture, and Theory—(Enroll in STS 117V, ARTHIST 141Y.) The interlinking of architecture and painting with technological and scientific development. In a period of industrial revolution, the dominance of positivist thinking and empirical methods promotes in the cultural and artistic realm a response of euphoric acceptance or emphatic rejection. Artwork as a social, cultural, and spiritual symbol is a response to scientific and technological development, yet claims timeless validity. Topics: frictions between idealism and realism, photography and painting, historicism and functionalism, expression and dadaism, futurism and new sobriety, functionalism and Nazi classicism. GER:3a 5 units, Aut (Neckenig)

OSPBER 126X. A People’s Union? Money, Markets, and Identity in the EU—(Enroll in POLISCI 112P.) First of two quarter sequence. The changes in the European Union from a loose economic club for internal trade to a powerful regulatory center with a wide scope of competencies. How this process will change the European style of welfare states and create a new political system and a new type of EU citizenship. The future role of Germany in the EU. Field trips and guest speakers. GER:3b 4-5 units, Aut (Klein)

OSPBER 161X. The German Economy in the Age of Globalization—(Enroll in ECON 161X.) Germany’s role in the world economy: trade, international financial markets, position within the European Union; economic relations with Eastern Europe, Russia, the Third World, and the U.S. International aspects of the economic and environmental policies of the Red-Green Coalition Government. The globalization of the world’s economy and Germany’s competitiveness as a location for production, services, and R&D, focusing on the German car industry. GER:3b 4-5 units, Win (Klein)

OSPBER 174. Sports, Culture, and Gender in Comparative Perspective—(Enroll in GERGEN 174.) Introduction to the theory and history of mass spectator sports and their role in modern societies. Comparisons with U.S., Britain, and France: the peculiarities of sports in German culture. Body and competition cultures, with emphasis on the entry of women into sports, the modification of body ideals, and the formation and negotiation of gender identities in and through sports. The relationship between sports and politics, including an analysis of the 1936 Berlin Olympic Games. GER:3b,4c 5 units, Spr (Jungmanns)

OSPBER 177A. Culture and Politics in Modern Germany—(Enroll in GERGEN 177A.) Key paradigms of modern Germany: German romanticism, the belated state and national identity, National Socialism and the Holocaust, Germany divided and unified. Literary, analytical, and theoretical texts; newspaper articles; film and TV; oral history. GER:3b 4-5 units, Win (Kramer)

OSPFLOR 41. The Contemporary Art Scene in Tuscany: Theory and Practice—(Enroll in ARTSTUDI 147Y.) The ever-changing and multifaceted scene of contemporary art through visual and conceptual simulation. How art is thought of and produced in Italy today. Hands-on experience. Sketching and exercises on-site at museums and exhibits, plus workshops on techniques. GER:3a 3-5 units, Aut (Rossi)

OSPFLOR 42. Academic Internship—Mentored internships are offered in banking, education, the fine arts, health, media, not-for-profit organizations, publishing, and retail. 1-5 units, Win, Spr (Campani)

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema—(Enroll in ITALGEN 191F, ARTHIST 160Y, HISTORY 235V, COMM 53.) Filmic portrayals of Fascism and WW II through analysis of the structural and ideological attributes of narrative cinema, and theories of visual and cinematic representation. The ways film directors have translated history into stories, and war journals into visual images. Topics: the role of fascism in the development of Italian cinema and its phenomenology in film texts; cinema as a way of producing and reproducing constructions of history; film narratives as fictive metaphors of Italian cultural identity; film image, ideology, and politics of style. GER:3a 5 units, Win (Campani)

OSPFLOR 54. High Renaissance and Maniera—(Enroll in ITALGEN 150F, ARTHIST 112Y.) The development of 15th- and early 16th-century art in Florence and Rome. Epochal changes in the art of Michelangelo and Raphael in the service of Pope Julius II. The impact of Roman High Renaissance art on masters such as Fra’ Bartolomeo and Andrea del Sarto. The tragic circumstances surrounding the early manner: Pontormo and Rosso Fiorentino and the transformation of early Manerism into the elegant style of the Medicean court. Contemporary developments in Venice. GER:3a 5 units, Spr (Verdon)

1-5 units, Aut, Win, Spr (Staff)

OSPFLOR 57. History and Culture of Jews in Italy—(Enroll in HISTORY 188V.) Panoramic picture of the history of Italian Jews and their millenarian cultural history. Story of the main Jewish communities in Italy, past and present, gives a geographical, historical, and cultural perspective of present day’s Italian Judaism. Different historical periods of Italian Jewry and their connection with Italian European history from ancient times to the present. Main cultural currents of Italian Jewish history; present-day Jewish Italian identity. GER:3a

4 units, Win (Levi)

OSPFLOR 58. Jewish Italian Identity—(Enroll in ARTSTUD 141Y.) Recent trends in art, current artistic production, differences and the dialogue among visual arts, Events, schools, and movements of the 20th century. Theoretical background and practical training in various media. Work at the Stanford Center and on-site at museums, exhibits, and out in the city armed with a sketchbook and camera. Emphasis is on the importance of drawing as the key to the visual arts. Three workshops enable students to master the techniques introduced. GER:3a

3-5 units, Spr (Rossi)

OSPFLOR 78. An Extraordinary Experiment: Politics and Policies of the New European Union—(Enroll in POLISCI 42P.) Institutional design of EU, forthcoming changes, and comparison of the old and new designs. Interactions between the EU, member states, organized interests, and public opinion. Major policies of the EU that affect economics such as competition or cohesion policies, market deregulation, and single currency. Consequences of the expansion eastwards. The role of institutions as a set of constraints and opportunities for the economic actors; relationships between political developments and economic change in the context of regional integration; lessons for other parts of the world. GER:3b

5 units, Aut (Morlino)

OSPFLOR 79. Migrations and Migrants: The Sociology of a New Phenomenon—(Enroll in SOC 114S.) Interdisciplinary approach to the study of immigration. Typology of forms of migration through politics put into action by the EU and within single nations. Related cultural and religious questions which elicit symbolic borders, territorilization of cultural identities, and the often spatial differentiation of immigrants and locals. The politics of integration and the instruments necessary to manage it. GER:3b,4a

5 units, Spr (Allam)

OSPFLOR 80. Contemporary Italian Politics: The Berlusconi Era—(Enroll in POLISCI 142P.) Changes in Italian politics since the 2001 election when a new strong parliamentary majority gave the new prime minister, Silvio Berlusconi, the possibility of implementing new domestic and foreign policies that changed the content of Italian democracy. The main features of the crisis, the changes, and the Berlusconi era in comparative perspective. GER:3b

5 units, Win (Morlino)

OSPFLOR 83. Materials and Machines for Architecture: The Renaissance from Brunelleschi to Michelangelo—(Enroll in URBANST 183U.) Renaissance architecture in 15th-century Florence developed with the help of fortunate political, economic, social, and cultural circumstances, and scientific and technological components. The technical building aspects and materials on which the planning and construction of architecture is founded. Emphasis is on Florentine Renaissance architecture from the Cupola of the Cathedral to the Santa Trinita Bridge. The traces of history in building planning and architecture. GER:3b

4 units, AUT (Lamberini)

OSPFLOR 84. Democratic Quality in the Contemporary World—(Enroll in POLISCI 43P.) Theoretical framework for the notion of democratic quality, and a qualitative and quantitative assessment of the actual implementation of democracy and human rights at a worldwide level. Main theoretical notions related to democratic quality including rule of law, accountability, responsiveness, freedom, and equality. Tools for subversion, how political elites developed different modes to avoid responsibility and responsiveness in political activities. Case studies such as the post-communist countries or the Arab world, including assessment of democracy in the area. Assessment of American democracy. GER:3b

5 units, Spr (Morlino)

OSPFLOR 87. Schooling and Child Social Policy in Italy—Education and welfare policy in Italy and its effects on children, using the tools of economics. Topics include: early childhood intervention, aid to families, abandoned children, school resources, teacher labor markets, school choice, and accountability. Comparison of Italian policy with policies in the rest of Europe and in the U.S. with emphasis on incentives by policy initiatives. GER:3b

3 units, Aut (Loeb)

OSPFLOR 88. Exploratory Data Analysis—(Enroll in ECON 79X.) Quantitative data analysis with focus on descriptive statistics. Trends in International Mathematics and Science Study data on Italian principals, teachers, and students. Comparative study of Italy and other countries. Statistical programming in Stata, research problem definition, analysis design, graphing, variable distributions and transformations, bivariate relationships, statistical testing, and presentation of research results. 4 units, Aut (Loeb)

4-5 units, Win (Rakove)

OSPFLOR 90. Machiavelli—(Enroll in HISTORY 189V, POLISCI 249P.) His life and politics. Readings include The Prince and Discourses on Livy in translation and Italian, and biographies, essays, and criticism. Different ways in which historians and political theorists read the same text, depending on the importance they ascribe to the context in which the text was produced or the internal logic of its argument. GER:3b

4-5 units, Win (Rakove)

OSPFLOR 91. Citizenship and Constitutionalism in Contemporary Europe—(Enroll in HISTORY 80V, POLISCI 248P.) Topics include the internationalization of rights, the role of constitutional courts, and efforts to convert the treaties adopted since WW II into a European constitution. Focus is on Italian issues and materials. GER:3b

4-5 units, Win (Rakove)

OSPFLOR 94. Photography in Florence—(Enroll in ARTSTUD 70Y.) Introduction to the functioning of the camera, exposure, and b/w film processing and printing. Emphasis is on perceptive imagery and the development of technical proficiency. 35mm camera required. Limited enrollment.

4 units, Win (Loverme)
OSPFLOR 95. The Art of Engineering and the Engineering of Art in Early Renaissance Italy—(Enroll in ME 122F.) Innovations in technology that accompanied and made possible the proliferation of monumental art and architecture in the late 1400s. Examples include machines designed by Brunelleschi and da Vinci, novel construction and fresco techniques, and bronze casting advances. The social and political climate that made possible and demanded engineering expertise from prominent artists. GER:2b
3 units, Spr (Cutkosky)

OSPFLOR 96. Design for Wellbeing in 21st-Century Tuscany—(Enroll in ME 123F.) Efforts to improve the quality of life for the elderly and disabled in Central Tuscany, an area that may soon have the largest elderly population in Europe. Communities and assistive technologies that allow seniors to remain independent while preserving the Tuscan ambience and lifestyle. Scientific, cultural, and technological challenges. 3 units, Spr (Cutkosky)

OSPFLOR 97. Current Issues in Human Rights and International Justice—Roosevelt’s four freedoms, problematic notions of human rights, concept of fair trial, the forthcoming U.S. Supreme Court decision on Guantanamo detainees, current international protection against torture and rape. Is current international protection satisfactory? Did victors’ justice at Nuremberg serve any purpose? Is a jury necessary to establish guilt or innocence? What is genocide? How should post-conflict situations be handled? Why is the U.S. opposing the International Criminal Court? GER:3b
4 units, Win (Cassese)

OSPFLOR 106V. Italy: from an Agrarian to a Post-industrial Society—(Enroll in HISTORY 106V, POLISCI 145P.) Italian history from the Risorgimento to the present. Italian society, crises, evolution, values, and the relation to the political institutions existing in different periods. The ideologies, political doctrines, and historical events which contributed to the formation of modern Italy’s predominant subcultures, Catholic and Socialist. In Italian. GER:3b
4 units, Aut (Mammarella)

OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence—(Enroll in ARTHIST 111Y.) Lectures, site visits, and readings reconstruct the circumstances that favored the flowering of architecture, sculpture, and painting in Florence and Italy, late 13th to early 16th century. Emphasis is on the classical roots; the particular relationship with nature; the commitment to human expressiveness; and rootedness in the real-world experience, translated in sculpture and painting as powerful plasticity, perspective space, and interest in movement and emotion. GER:3a
4 units, Win (Verdon)

OSPFLOR 115V. The Duomo and Palazzo della Signoria: Symbols of a Civilization—(Enroll in ARTHIST 115Y.) The history, history of art, and symbolism of the two principal monuments of Florence: the cathedral and the town hall. Lectures, site visits, and readings grasp the points of common meaning and ideological difference between the religious and civic symbols of Florence’s history from the time of Giotto and the first Guelph republic to Bronzino and Giovanni da Bologna and the Grand Duchy. GER:3a
4 units, Aut (Verdon)

OSPFLOR 134F. Modernist Italian Cinema—(Enroll in ITALGEN 134F, ARTHIST 161Y, STS 125.) As the embodiment of modernity, cinema develops in the wake of modernism proper, but can be understood as one of its technological and aesthetic expressions. Topics: cinema’s archaeology in Futurist texts and theories with their nationalistic political flavor and their iconoclastic, radical, and interdisciplinary rethinking of the language and form of all the arts (Marinetti, Pirandello, D’Annunzio). GER:3a
5 units, Aut (Campani)

ITALIAN LANGUAGE PROGRAM

OSPFLOR 35. Second-Year Italian, First Quarter—(Enroll in ITAL-LANG 21F.) Review of grammatical structures; grammar in its communicative context. Listening, speaking, reading, and writing skills practiced and developed through authentic material such as songs, newspaper articles, video clips, and literature. Insight into the Italian culture and crosscultural understanding.
4 units, Aut, Win, Spr (Quercioli)

OSPFLOR 37. Second-Year Italian, Second Quarter—(Enroll in ITAL-LANG 22F.) Grammatical structures, listening, reading, writing, speaking skills, and insight into the Italian culture through authentic materials. Intermediate to advanced grammar. Content-based course, using songs, video, and literature, to provide cultural background for academic courses including the WWII Project.
4 units, Win (Quercioli)

OSPFLOR 66. Advanced Italian Conversation—(Enroll in ITAL-LANG 31F.)
4 units, Aut, Win, Spr (Quercioli)

ON VIDEOTAPE
See the “School of Engineering” section of this bulletin for course descriptions.

OSPFLOR 50F. Introductory Science of Materials—(Enroll in ENGR 50F.) GER:2b
4 units, Aut, Win, Spr (Bravman)

KYOTO
The Stanford Japan Center in Kyoto houses two separate academic programs: the Kyoto Center for Japanese Studies (KCJS) and the Stanford Center for Technology and Innovation (SCTI). KCJS is administered by Stanford for a consortium of American universities. For current information on KCJS, consult the web site at http://kcjs.stanford.edu or contact Overseas Studies for a brochure. The courses listed below are offered by the SCTI program.

OSPKYOTO 16. Undergraduate Seminar on Medical Imaging Systems—(Enroll in EE 69.)
3 units, Spr (Nishimura)

OSPKYOTO 17R. Religion and Japanese Culture—(Enroll in RELIGST 17R.) The importance of religion in Japanese culture, and its major traditions. Visits to religious centers for observation of current religious practices and participation as appropriate. Topics: the relation between religion and culture; ancient Japanese religion and Shinto; Buddhist schools of Heian Japan; Zen Buddhism as it flourished in the Kamakura period; Confucianism as originally conceived in ancient China, and as transmitted to Japan in the Edo period in its neo-Confucian form; and characteristic modern practices. GER:3a,4a
4-5 units, Spr (Ludvik)

OSPKYOTO 20. Research Project—Independent research projects on significant aspects of Japanese culture, society, or public policy. Students interested in developing the project as a web page should take a home campus class on creating web pages or have equivalent experience.
2-3 units, Spr (MacDougall)

OSPKYOTO 30. Immigration, Citizenship, and Identity in Japan—(Enroll in POLISCI 247P.) How Japan is coming to terms with the public policy challenges of asylum, immigration, and integration. The nature of the challenges, obstacles and opportunities for change, and proposals for progress. Lessons of the Western experience, and the difficult trade-offs and conditions with which the Japanese must deal. Opportunities for field research and collaboration with students studying immigration at other centers. GER:3b,4a
4-5 units, Spr (MacDougall)
OSPKYOTO 31. The Fourier Transform and its Applications—(Enroll in EE 261.) The Fourier transform as a tool for solving physical problems. Fourier series, the Fourier transform of continuous and discrete signals and its properties. The Dirac delta, distributions, and generalized transforms. Convolutions and correlations and applications; probability distributions, sampling theory, filters and analysis of linear systems. The discrete Fourier transform and the FFT algorithm. Multi-dimensional Fourier transform and use in imaging. Further applications to optics, crystallography. Emphasis is on relating the theoretical principles to solving practical engineering and science problems. Prerequisites: previous exposure to Fourier series at the level of 102A, and linear algebra.

3 units, Spr (Nishimura)

OSPKYOTO 32. Circuits II—(Enroll in EE 101B.) Second of two-course sequence. MOS large-signal and small-signal models. MOS amplifier design including DC bias, small signal performance, multi-stage amplifiers, frequency response, and feedback. Prerequisite: 101A. GER:2b

4 units, Aut, Spr (Shenoy)

4 units, Win (Olukotun), Spr (Kozyrakis)

OSPKYOTO 215X. The Political Economy of Japan—(Enroll in ECON 123X, POLISCI 240P.) Institutions and processes in the political organization of economic activity in modern Japan. The interaction of public and private sector institutions in the growth of its postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, government interaction, and public policy making. The transformation of industrial policy from the rapid growth of heavy and chemical industries to the promotion of high technology and communications industries. The international, political, and economic ramifications of the structure and importance of Japanese capitalism. GER:3b

4-5 units, Spr (Hayashi)

JAPANESE LANGUAGE PROGRAM

OSPKYOTO 9K. First-Year Japanese Language, Culture, and Communication B—(Enroll in JAPANLNG 9K.)

5 units, Spr (Fujisawa)

OSPKYOTO 17K. Second-Year Japanese Language, Culture, and Communication B—(Enroll in JAPANLNG 17K.)

5 units, Spr (Uemiyas)

OSPKYOTO 19K. Second-Year Japanese Language, Culture, and Communication B—(Enroll in JAPANLNG 19K.)

5 units, Spr (Yamaoka)

OSPKYOTO 103K. Upper Advanced Japanese—(Enroll in JAPANLNG 103K.)

5 units, Spr (Yamaoka)

OSPKYOTO 127K. Third-Year Japanese Language, Culture, and Communication B—(Enroll in JAPANLNG 127K.)

5 units, Spr (Hotta)

OSPKYOTO 129K. Third-Year Japanese Language, Culture, and Communication B—(Enroll in JAPANLNG 129K.)

5 units, Spr (Hotta)

ON VIDEOTAPE

See the “School of Engineering” section of this bulletin for course descriptions.

OSPKYOTO 40K. Introductory Electronics—(Enroll in ENGR 40K.)

5 units, Spr (Khuri-Yakub)

OSPKYOTO 50K. Introductory Science of Materials—(Enroll in ENGR 50K.)

5 units, Spr (Braunman)

OXFORD

OSPXFDRD 24. British and American Constitutional Systems in Comparative Perspective—(Enroll in POLISCI 244P.) Introduction to the study of constitutions and constitutional systems of government. Analysis of the detailed workings of the British and American systems of government. Comparative study of the most important constitutional issues facing Britain and the United States such as how suspected terrorists should be treated in a time of war. How we think about fundamental constitutional questions. GER:3b

5 units, Spr (McMahon)

OSPXFDRD 35. Modern UK and European Government and Politics—(Enroll in POLISCI 141P.) Background of main political systems in Europe and recent developments in European politics. Topics: Blair’s recent constitutional reforms; the consequences of the German reunification; Berlusconi’s rise to power in Italy; the recent electoral breakthrough of the extreme right in France; the adoption of the Euro by 11 European states; the enlargement of the EU to the former communist countries of East Central Europe; the writing of a constitution for Europe in the Laeken Convention. GER:3b

4 units, Aut (Capoccia)

OSPXFDRD 40. Economic and Social History of England, 1750-1950—(Enroll in ECON 117X.) Economic processes and events and how they interrelate to shape social and political processes. Readings include survey articles and detailed analyses. Choice of topics may be adjusted to fit student interests. Student presentations. GER:3b

3-5 units, Aut (Greif)

OSPXFDRD 41. Explorations in England’s Premodern Economic, Social, and Political History—(Enroll in ECON 122X.) The legacies of English industrialization, imperialism, democracy, and the rule of law. To what extent did England’s institutions and related economic, social, and political processes lead to these outcomes after 1750. Institutional aspects of English society. Readings include premodern and secondary sources. GER:3b

3-5 units, Aut (Greif)

OSPXFDRD 42. Comparative Health Care Systems: UK and U.S.—Differences between UK and U.S. health care systems from modern and historical perspectives. Evolution, current problems, future developments. Case of Canada as point of comparison. Attempts to maximize health gains while controlling costs, one system on the public service ideal, the other on market principles. Social, cultural, and ethical issues related to the development of health care systems; opportunities to interact with NHS doctors, nurses, and administrators. GER:3b

4 units, Spr (Senior)

OSPXFDRD 44. The Rise of the Novel—The many novels that flooded the literary market throughout the 18th century. Male canonical writers such as Richardson and Fielding, and also on those written by women. Topics include satire, sensibility, and the contemporary suspicion of the novel form as morally pernicious. GER:3a

5 units, Spr (Plaskitt)

OSPXFDRD 45. Roots of Modern Biology—(Enroll in HPS 103V.) Modern developments in human, cell, and molecular biology, and genetics in the context of the development of science in the UK in the 19th and early 20th century. Sources include classic papers and comparisons
to recent papers from biomedical literature. Development of scientific method in biology and medicine. Visits to laboratories and research institutes in Oxford, Cambridge, and London, and discussions with British scientists. GER:3b
4 units, Win (Hinz)

**OSPOXFRD 46. Workshop on Health Care Systems**—Health care delivery in Europe, including the UK, Sweden, France, Italy, and Germany, compared to pluralistic system in the U.S. Emphasis is on the British system. Discussions with doctors, visits to hospitals and clinics in the Oxford area, and interaction with British health care workers. GER:3b
3 units, Win (Hinz)

**OSPOXFRD 47. Drama: Ancient and Modern**—(Enroll in ENGLISH 140Z.) Introduction to the influences of the Greeks, Elizabethans, and moderns such as Ibsen, Strindberg, Chekhov on contemporary drama in England and the U.S. Weekly trips to London theater to develop the historical and generic sense of drama. What happens between script and production. GER:3a
5 units, Spr (L’Heureux)

**OSPOXFRD 70. The European City**—(Enroll in HISTORY 138V.) Population growth, technological change, and revolutionary social and architectural ideologies have transformed European cities. How and why the transformation occurred through key texts and the physical fabric of the cities. Topics: effects of Baroque patronage in the 17th and 18th centuries; rebuilding the city centers in the 19th century, the growth of suburbs; the impact of mass transportation; the influence of modernist doctrines in the 20th century; ongoing attempts by governments to tackle endemic problems of slums, poverty. Comparisons with U.S. cities. GER:3b
5 units, Spr (Tyack)

**OSPOXFRD 80. Britain in the Twentieth Century**—(Enroll in HISTORY 145V.) Political development, the evolution of urban society and Britain’s changing worldwide role. Topics: the impact of mass democracy, the effects of the two World Wars, the development of the welfare state, and recent challenges to the post-war consensus. Themes are a background against changing social relationships, standards of living, and popular culture. GER:3b
5 units, Win (Rowley)

**OSPOXFRD 93. Archaeology of the British Isles**—(Enroll in HISTORY 142V.) Relationship between human beings and their habitat in Britain from the Iron Age to the 15th century. Physical geography; changes in social and political organization as seen through archaeological record. Religion and ritual, emphasizing attitudes to death. The nature of archaeological evidence, the adoption of literacy, and links between archaeology and history. GER:3b
3 units, Win (Rowley)

**OSPOXFRD 98. Creative Writing Workshop**
3 units, Aut, Win, Spr (Kidd)

**OSPOXFRD 114Z. Renaissance Literature, 1509-1642**—(Enroll in ENGLISH 114Z.) Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine’s undergraduates. English literature from the beginning of Henry VIII’s reign to the onset of the Civil War, excluding Shakespeare. The poetry, prose, and drama of the period in their literary, cultural, and historical contexts. GER:3a
5 units, Aut (Wordsworth)

**OSPOXFRD 116Z. Restoration Literature, 1642-1740**—(Enroll in ENGLISH 116Z.) Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine’s undergraduates. English literature from the Civil War to the middle of the 18th century. The poetry, prose, and drama of the period in their literary, cultural, and historical contexts, and key texts. English major Area:E. GER:3a
5 units, Win (Wordsworth)

**OSPOXFRD 117W. Gender and Social Change in Modern Britain**—(Enroll in SOC 117W.) Changes in the social institutions, attitudes, and values in Britain over the past 20 years. Social changes occurring as a consequence of the Thatcher years of government. Changes to the British economy, the welfare state, National Health Service, the education system, the criminal justice system, gender relations, marriage, divorce, reproduction, and the family. The consequences in terms of British competitiveness, income distribution, wealth and poverty, social class, health and illness, educational attainment and skills development, crime, and family life. GER:3b,4c
4 units, Aut (Palmer)

**OSPOXFRD 141V. European Imperialism and the Third World, 1870-1970**—(Enroll in HISTORY 141V, POLISCI 148P.) European imperialism from its zenith in the late 19th century to the era of decolonization after WW II. The effects of Western imperialism in the Third World. The legacy of imperialism and decolonization to the modern world. GER:3b
5 units, Spr (Darwin)

**OSPOXFRD 154Z. Romantic Literature, 1740-1832**—(Enroll in ENGLISH 154Z.) Restricted to students majoring in English and related subjects. Taught jointly for Stanford and second-year St. Catherine’s undergraduates. Romantic texts beginning with Willima Collins and Thomas Gray and concluding with John Keats. GER:3a
5 units, Spr (Plaskitt)

**OSPOXFRD 163X. Shakespeare: The Early Plays**—(Enroll in ENGLISH 163X.) First of two courses on Shakespeare’s dramatic oeuvre. Emphasis is on sources, historical context, dramatic content, and use of language. Plays include: The Comedy of Errors, Loves Labour’s Lost, A Midsummer Night’s Dream, The Merchant of Venice, As You Like It, Twelfth Night, and Much Ado About Nothing. Limited enrollment; preference to students majoring in English, Drama, and related subjects. Taught jointly for Stanford and second-year St. Catherine’s undergraduates reading English Literature. GER:3a
5 units, Aut (Wordsworth)

**OSPOXFRD 163Z. Shakespeare: The Late Plays**—(Enroll in ENGLISH 163Z.) Second of two courses on Shakespeare’s dramatic oeuvre. Emphasis is on sources, historical context, dramatic content, and use of language. Plays include: Pericles, Cymbeline, Winter’s Tale, The Tempest, Measure for Measure, Troilus and Cressida, and All’s Well that Ends Well. Limited enrollment; preference to students majoring in English, Drama, and related subjects. Taught jointly for Stanford and second-year St. Catherine’s undergraduates reading English Literature. GER:3a
5 units, Win (Wordsworth)

**OSPOXFRD 166X. The Modern British Economy**—(Enroll in ECON 166X.) The nature of the modern British economy. Recent deployments in the main areas of the British economy, emphasizing the changes over the past 10 to 20 years. Sufficient economic concepts are introduced to allow students with basic economic knowledge to take part in the analysis of recent trends. Comparisons with other European countries and the U.S. Prerequisite: ECON 1, GER:3b
5 units, Win (Robinson)

**OSPOXFRD 221Y. Art and Society in Britain**—(Enroll in ARTHIST 221Y, HISTORY 244V.) Themes in 18th-, 19th-, and 20th-century British art. Painting, sculpture, and design. Comparisons between the British experience and that of continental Europe and the U.S. Readings address problems related to the role of art in modern society. GER:3a
5 units, Aut (Tyack)
OSPPARIS 25. Literature and the City—(Enroll in FRENLIT 178F.) Subtle and hidden aspects of Paris through the eyes of France’s greatest writers, poets, and philosophers including Balzac, Baudelaire, Zola, and Aragon. Essays, poems, and novels that portray the historical, social, and political reality of the city better than textbooks or guides. GER:3a
4 units, Aut (Dupas)

OSPPARIS 30. Statistical Thinking—(Enroll in STATS 30.) Origins of probabilistic reasoning and its rapid development by French scientists during the 18th and 19th centuries. Games of chance and Bernoulli’s binomial probabilities, Laplace’s rules of statistical inference, Poisson’s probability models for rare events, and Gauss’s laws for measurement errors and the bell-shaped curve. Original sources and modern interpretations. GER:2c
3 units, Aut (Switzer)

OSPPARIS 41. EAP: Perspective, Interior Decorating, Volume, and Design—(Enroll in ARTSTUDI 61Y.)
2 units, Aut, Win, Spr (Staff)

OSPPARIS 42. EAP: Drawing with Live Models—(Enroll in ARTSTUDI 140Y.)
2 units, Aut, Win, Spr (Staff)

OSPPARIS 43. EAP: Painting and Use of Color—(Enroll in ARTSTUDI 144Y.)
2 units, Aut, Win, Spr (Staff)

OSPPARIS 44. EAP: Graphic Art—(Enroll in ARTSTUDI 60Y.)
2 units, Aut, Win, Spr (Staff)

OSPPARIS 56. Theater in Transition: Stage and Audience in France Today—(Enroll in FRENLIT 143P.) The spectator, even static and silent, is the first partner of the stage and sometimes the co-creator of the theatrical event. Audience; new forms of performance; how space is reinvented; new light and sound effects; how texts are re-interpreted; and the changing role of the actor on the stage. GER:3a
4 units, Spr (Mervant-Roux)

OSPPARIS 57. Human Rights in Comparative Perspective—(Enroll in POLISCI 143P.) Human rights spring from Enlightenment principles but their status in the American and French constitutions differ. Have European court decisions created a transatlantic human rights model giving more weight to Anglo-Saxon legal tradition? Philosophical, historical, and legal resources; recent case studies from both sides of the Atlantic. GER:3b
4-5 units, Spr (Remy-Granger)

OSPPARIS 61. Paris by Numbers—(Enroll in STATS 99.) Parisian demographic trends over the past 100 years. Small teams assemble, condense, interpret, and critique statistical sources of demographic change. Sample surveys as a means of learning about present-day Paris, including a review of principles and pitfalls of survey design; design and execute small-scale surveys combining appreciation of practical limitations in the Parisian environment and direct contact with Parisian respondents. GER:2c
3 units, Aut (Switzer)

OSPPARIS 63. Postwar European Art—(Enroll in ARTHIST 179Y.) Major figures, movements, themes, and issues in France, Germany, Italy, and England from 1945 to the present. Political and aesthetic status of the avant garde; socially engaged or critical art. Yves Klein and Le Nouveau Realistes; Jean Tinguely and kinetic art; The Independent Group in England; Tachisme and Art Informel; Arte Povera, Joseph Beuys, and the Düsseldorf Academy; COBRA and l’International Situationiste; Daniel Buren and the critique of institution. Rise of mass media; ethics of historical memory; engaged or committed art; art and the culture industry; art of 1968; reactions to American hegemony. GER:3a
5 units, Win (Lee)

OSPPARIS 64. Paris of the Surrealists—(Enroll in ARTHIST 129Y.) The French surrealist movement through museum visits and exploration of Paris and its environs. Paris as the formative site of the Surrealist imagination. Paris’s collections of modern art visits to haunts of the Surrealists and locales treated in their work. Surrealist principles including the marvelous and the uncanny as embodied in the fabric of the city. Readings include history of art and primary texts. GER:3a
5 units, Win (Lee)

OSPPARIS 65. Franco-Arab Encounters—(Enroll in HISTORY 140V.) Encounters between France and the Arab world since the French Revolution and the Napoleonic expedition to Egypt in 1798 seen as inaugurating a relationship whose elements include the French cultural model as the standard of modernity and culture in the Arab world. French colonial presence in Algeria. How the settling of Arab Muslims in France has brought the empire home to France to live on in a new form. GER:3a
5 units, Spr (Beinin)

OSPPARIS 81. France During the Second World War: Between History and Memory—(Enroll in HISTORY 139V.) French politics and society from the causes of the collapse of the French Third Republic and the emergence of the French State at Vichy. The political and cultural measures of this regime in the shadow of Nazi Germany. Anti-Jewish laws and action; deportations by Vichy, the Germans, the French Fascists, and reactions to the fate of the Jews. Visions of the Resistance, the combat for liberation, and WW II in the collective memory of France. GER:3b
5 units, Win (Virgili)

OSPPARIS 87. Empires and Cultures in the Modern World—(Enroll in HISTORY 87V.) The formation of modern European empires and their expansion into Asia, Africa, and the Middle East. Topics: cultural encounters, military conquest, economic integration, the new imperialism, colonialism, nationalism, the mutual constitution of colonial power and forms of knowledge, and the culture and politics of the postcolonial world. Readings: historical texts, films, and novels. GER:3a,4a
5 units, Spr (Beinin)

OSPPARIS 91. Globalization and Its Effect on France and the European Union—(Enroll in ECON 125X.) Economic and political impact of globalization on France and the EU and influence of France and the EU on the process of globalization. Issues of sovereignty and national identity for France; protection from versus integration into the network of globalization. GER:3b
5 units, Spr (Germanangue)

OSPPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France—(Enroll in ARTHIST 107Y.) Artistic and cultural movements that changed France from the period of Suger in the 12th century through the reign of St. Louis in the 13th century. Monastic spirituality progressively gave way to an urban culture focused on man and secular knowledge, which developed daring and sophisticated building techniques. The years 1150-1250 represented a period of architectural renaissance and l’Île-de-France was its birthplace. GER:3a
4 units, Aut (Deremble)

OSPPARIS 120X. French Painting—(Enroll in ARTHIST 123Y.) Changes in artistic aims and the interaction between artist and society throughout the period. Weekly field trips to Paris museums holding paintings of David, Ingres, Delacroix, Courbet, Daumier, Manet, Renoir, Monet, Degas, and others. (In French and English) GER:3a
4 units, Win (Halevi)

OSPPARIS 122X. Europe: Integration and Disintegration of States, Politics, and Civil Societies—(Enroll in POLISCI 149P.) European integration is now an economic, social, and political reality. This integration has a history of mutation and a transformation of its very foundation. Topics: the evolution of welfare states, elites, political parties, and systems in Europe; lobbies, trade unions, voluntary associations, social movements, popular protest, citizenship, democracy. GER:3b
4-5 units, Win (Lazar)
OSPPARIS 124X. Building the European Economy: Economic Policies and Challenges Ahead—(Enroll in ECON 124X.) The main issues and challenges of European economic construction. The European Economic Union at the end of 50s; European industrial, agricultural, social, and monetary economic policies. Topics: wider definitions of Europe, Europe’s relations with industrial and developing countries, Europe’s challenge in confronting global economic crises. GER:3b
5 units, Aut (Fuenzalida)

OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time—(Enroll in HUMBIO 153X, PUBLPOL 111.) Health systems and the needs of a given population. What is the role of the state or the free market in the delivery of health care? Focus is on the evolution of the health profession in France and the U.S.; developments in health policy and reform; measures restraining professional autonomy such as prescription guidelines in the French Medical Convention between doctors and the state. Does increasing health expenditure and reduced access to health care mean the end of autonomy for the medical profession? GER:3b
4-5 units, Win (Grenier-Sennelier)

OSPPARIS 186F. Contemporary African Literature in French—(Enroll in AFRICAAM 186F, FRENLIT 186F.) Focus is on African and diaspora writers, bound together by a common history of slave trade, bondage, colonization, and racism. Their works belong to the past, including oral heritage of proverbs, story tales, and epics, but they are also strikingly contemporary. GER:3a,4a
4 units, Win (Mangeon)

OSPPARIS 211X. Political Attitudes and Behavior in Contemporary France—(Enroll in POLISCI 211.) The institutions of the Fifth Republic, the main political forces, and their evolution. Electoral behavior, taking into account other forms of political action such as the demonstrations for the defense of schools (1984) and the lycée students (1990), or the protest that followed the desecration of the Jewish cemetery in Carpentras. Attitudes and values are linked to voting choice. (In French and English) GER:3b
4-5 units, Aut (Mayer, Lavabre)

FRENCH LANGUAGE PROGRAM

OSPPARIS 22P. Intermediate French I—(Enroll in FRENLANG 22P.)
4 units, Aut, Win, Spr (Staff)

OSPPARIS 23P. Intermediate French II—(Enroll in FRENLANG 23P.)
4 units, Aut, Win, Spr (Staff)

OSPPARIS 124P. Advanced French I—(Enroll in FRENLANG 124P.)
4 units, Aut (Guedon)

OSPPARIS 125P. Advanced French II—(Enroll in FRENLANG 125P.)
4 units, Win, Spr (Ricci)

ON VIDEOTAPE

See the “School of Engineering” section of this bulletin for course descriptions.

OSPPARIS 40P. Introductory Electronics—(Enroll in ENGR 40P.)
GER:2b
5 units, Aut, Spr (Khuri-Yakub)

OSPPARIS 50P. Introductory Science of Materials—(Enroll in ENGR 50P.)
GER:2b
4 units, Aut, Win, Spr (Bravman)

SANTIAGO

OSPSANTG 5. Director’s Seminar—Weekly seminar with presentations on current issues and events in Chilean political and cultural life.
2 units, Aut, Win, Spr (Fuenzalida)

OSPSANTG 56. Contemporary Chilean Women Writers—(Enroll in SPANLIT 155X.) Poems by Nobel Prize Winner Gabriela Mistral. Novels by María Luisa Bombal (La última niebla), Carolina Geel (Cárcel de mujeres), Marta Brunet (María Nadie), Isabel Allende (La casa de los espiritus), Pía Barros (A horcajadas), and Marcela Serrano (Para que no me olvides). How these authors have articulated women’s consciousness and experiences and questioned their own world’s values from a feminist perspective. GER:3a,4c
3-5 units, Win (Haro, Paz)

OSPSANTG 57. Cinema of the Southern Cone—(Enroll in SPANLIT 131X.) Films of Argentina, Chile, and Uruguay including María Luisa Bomba’s Camila, Tatiana Gaviola’s Mi último hombre, Gonzalo Justiniano’s Amnesia, Miguel Litin’s El chocal de Nahualtoro, Orlando Lubbert’s Taxi para tres, Héctor Olivera’s No habrá más penas ni olvido, Marcelo Pineyro’s Caballos salvajes, Luis Puenzo’s La historia oficial, and Eusebio Subiela’s Hombre mirando al sudeste. Themes, genres, and styles; history and culture. GER:3a
3 units, Win (Haro, Paz)

OSPSANTG 58. Ethnobotany in Chile: A Land of Extremes—Overview of the varied natural environments in Chile followed by focus on a particular habitat. Extended field trip to chosen area allowing for study of ecology and ethnobotany of the habitat. Field work, readings, lectures and laboratory activities. GER:3b
5 units, Aut (Poblete)

OSPSANTG 63. The Chilean New Narrative—(Enroll in SPANLIT 243X.) Since the 90s, the new Chilean narrative has entered a phase of aesthetic and thematic renovation. One of the strongest national literatures from Latin America, it has reached out for new horizons beyond the dictatorship theme, including young women writers exploring personal and societal themes. Writers include Roberto Bolaño, Lina Meruane, Andrea Maturana, Pedro Lemebel, Alberto Fuguet, and Sergio Gómez. GER:3a
3-5 units, Aut (Ruffinelli)

OSPSANTG 64. Comparative Cinema and Latin America—(Enroll in SPANLIT 118X.) Differences in cultural approaches between Latin American films and their counterparts from the U.S., Africa, Europe, and Asia. Thematic subjects and aesthetics solutions pointing to cultural traits beyond similitudes. Chilean and Latin American culture through films with similar narrative styles and stories. Films include: Imagen latente, Blow Up, Johnny cien pesos, Dog Day Afternoon, La frontera, Le Samurai, Caballo salvaje, La historia oficial, and Marcela Serrano’s Para que no me olvides. Themes, genres, and styles; history and culture. GER:3a
3-5 units, Aut (Ruffinelli)

OSPSANTG 65. Virtual Design and Construction: Visualizing a 50-Year Evolution of the Heart of Santiago—(Enroll in CEE 143X.) Computer-based models in building design and construction. Virtual design and construction (VDC) is the use of multidisciplinary performance models of design-construction projects, including the product (facilities), work processes, organization of the design-construction-operation team, and economic impact (model of both cost and value of capital investments) in order to support business objectives. Successful participation may allow students a 4-day mini-internship at an A/E/C company over Spring break. Recommended: 241, 242. GER:2b
4 units, Spr (Kunz)

OSPSANTG 66. The Built Environmental History of Chile—(Enroll in CEE 33X.) Design and use of the built environment from the perspectives of the unusual geography of Chile, the evolving economy of the country, the Spanish and native American cultural heritage of the peoples, and the national political governance. Fields trips include major architectural sites in Santiago, art museums, and an economic center. Descriptions of built environment by writers, artists, and architects. Create simple electronic portfolios. GER:2b
3 units, Spr (Kunz)
OSPSANTG 104X. Modernization and Culture in Latin America—
(Enroll in ANTHSCI 104X, SPANLIT 290Z.) Intellectual and cultural expressions of Latin America against the background of modernization viewed as a constant tension between rationalization and subjectification, change and identity preservation, and the logic of development or economic expansion and the logic of the culture. Readings include Morande, *Cultura y modernización en América Latina* and Sarlo, *Una modernidad periférica.* GER:3a,4a
5 units, Aut (Subercaseaux)

OSPSANTG 111. Social Heterogeneity in Latin America—(Enroll in SPANLIT 164S, SOC 111S.) Latin America is characterized by social heterogeneity and inequality. An interpretation of these phenomena, focusing on the social, ethnic, gender, political, and economic dimensions. Their historical roots and unfolding during the periods of industrialization, the 60s, 70s, and 80s, and the contemporary situation. GER:3b,4c
5 units, Aut (Valdes)

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century—(Enroll in POLISCI 242P.) Chile’s strides towards becoming a developed country have engendered high levels of alienation and disaffection among significant sectors of the population. The roots of this apparent paradox of modernization, focusing on newly emerging actors in the Chilean political scene: Mapuche organizations, women’s groups, the environmental movement, and new features of the established ones like trade unions and human rights activists. GER:3b
5 units, Spr (Correa)

OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies—(Enroll in ECON 119X.) The Chilean economy in five stages, taking into account: the international economic position of Chile; internal economic structures closely related to the inherited historical conditions and to the changing international economic position of the country; and the economic strategies prevalent during the period and the concrete development policies conducted by government authorities. GER:3b
5 units, Spr (Muñoz)

OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective—(Enroll in POLISCI 243P.) The dynamics of the analytically interesting Chilean transition. Topics: the challenges faced by democratic governments in 90s, framed by the legacy of military rule, 1973-90; the country’s political culture; institutional traditions of democracy in Chile; and the Chilean process within the broader context of Latin American political development. GER:3b
5 units, Win (Muñoz)

OSPSANTG 129X. Latin America in the International System—
(Enroll in POLISCI 117P.) Latin America’s role in world politics, with emphasis on the history of and models for explaining U.S.-Latin American relations. Latin America’s evolving relationship in the international system. GER:3b
4-5 units, Win (Fuentes)

OSPSANTG 130X. Latin American Economies in Transition—
(Enroll in ECON 165X.) Introduction to the main debates and approaches developed to understand and analyze the economies of Latin America. Recent processes of transition to market economies. Common characteristics among countries of the region; the differences and special traits of individual countries. Historical, analytical, and empirical perspectives on topics at the center of controversies and specific policy problems over several decades. Recommended: ECON 1, 51, and 52. GER:3b
5 units, Aut (Muñoz)

OSPSANTG 141X. Politics and Culture in Chile—The relationship between politics and culture in Chile during the 20th century, reflecting on the effects of such relationships on esthetics and identity. The possibility that, in Chile, culture has been pulled by politics and social praxis, a condition that has created a deficit in cultural thickness. The oligarchic regime around 1920, the welfare state around 1940, projects of social transformation around 1970, dictatorship around 1980, women writers and Mapuche poetry in contemporary Chile. GER:3a
5 units, Spr (Subercaseaux)

OSPSANTG 160X. Latin America in the International Economy—
(Enroll in ECON 160X.) The external economic relations of Latin American countries. Similarities and differences among countries, focusing on the last 15 years. Analytical and empirical elements for interpretation of policies, and the outcome. Trade, external debt, capital flows, and the inter-relationships between domestic economy and overall growth. Recommended: ECON 1, 51, and 52. GER:3b
5 units, Win (Muñoz)

OSPSANTG 33A,B,C. Spanish Language Tutorial
2 units, A: Aut, B: Win, C: Spr (Pons)
Emeriti (Professors): Fred Dretske, Solomon Feferman, Georg Kreisel, David S. Nivison, Patrick Suppes, James O. Urmson
Chair: Debra Satz
Director of Graduate Study: Michael Bratman
Director of Undergraduate Study: Chris Bobonich
Professors: Michael Bratman, John Etchemendy, Dagfinn Føllesdal (Autumn), Michael Friedman, Grigori Mints (on leave), Julius Moravcsik, John Perry, Kenneth Taylor (on leave), Johan van Bentheim (Spring), Thomas Wasow, Allen Wood
Associate Professors: Lanier Anderson (on leave Autumn), Chris Bobonich, Mark Crimmins, Graciela Di Pietris, Debra Satz
Assistant Professors: Nadeem Hussain (on leave), Agnieszka Jaworska, Krista Lawlor, Tamar Schapiro
Professor (Research): Rega Wood
Lecturers: David Hills, Thomas Ryckman, Scott Tanona
Courtesy Professors: Professor (Research): Rega Wood
Lecturers: David Hills, Thomas Ryckman, Scott Tanona

Graduate students and undergraduate majors in philosophy have formed associations for discussion of philosophical issues and the reading of papers by students, faculty, and visitors. These associations elect student representatives to department meetings.

The Special Program in the History and Philosophy of Science enables students to combine interests in science, history, and philosophy. Students interested in this program should see the special adviser.

There is also a major program offered jointly with the Department of Religious Studies. To declare a major, a student should consult with the Director of Undergraduate Study and see the undergraduate student services administrator to be assigned an adviser and work out a coherent plan. The department strongly urges proficiency in at least one foreign language.

GENERAL PROGRAM
1. Course requirements, minimum 55 units:
   a) Preparation for the major: an introductory course (under 100) and 80. (PHIL 80 should normally be taken no later than the first quarter after declaring the major.) Students taking both quarters of the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track can count 5 units toward the introductory Philosophy requirement.
   b) The core, 24 additional Philosophy units, as follows:
      1) Logic: one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
      2) Philosophy of science: any course from 60, 61, 156, 163-168
      3) Moral and political philosophy: one from 170-173
      4) Metaphysics and epistemology: one from 180-189
      5) History of philosophy: 100 and 102 are required of each major
   c) One undergraduate philosophy seminar from the 194 series.
   d) Electives: courses numbered 10 or above, at least 13 units of which must be in courses numbered above 99.

2. Units for Tutorial, Directed Reading (PHIL 196, 197, 198), The Dualist (PHIL 198), Honors Seminar (PHIL 199), or affiliated courses may not be counted in the 55-unit requirement. No more than 10 units completed with grades of “satisfactory” and/or “credit” may be counted in the 55-unit requirement.

3. A maximum of 10 transfer units or two courses can be used for the departmental major. In general, transfer courses cannot be used to satisfy the five area requirements or the undergraduate seminar requirement. Students may not substitute transfer units for the PHIL 80 requirement.

SPECIAL PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE
Undergraduates may major in Philosophy with a degree field in History and Philosophy of Science under the Department of Philosophy. Each participating student is assigned an adviser who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

1. Three science courses (for example, biology, chemistry, physics) for 12 units.
2. The following Philosophy (PHIL) core courses must be completed with a letter grade by the end of the junior year:
   a) one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b) 60 or 61
   c) 80
3. Three history of science courses.
4. Three philosophy of science courses, of which one must be PHIL 164.
5. Three additional courses related to the major, in philosophy or history, to be agreed on by the adviser.
6. At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or The Dualist

3. A maximum of 10 transfer units or two courses can be used for the departmental major. In general, transfer courses cannot be used to satisfy the five area requirements or the undergraduate seminar requirement. Students may not substitute transfer units for the PHIL 80 requirement.

SPECIAL PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE
Undergraduates may major in Philosophy with a degree field in History and Philosophy of Science under the Department of Philosophy. Each participating student is assigned an adviser who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

1. Three science courses (for example, biology, chemistry, physics) for 12 units.
2. The following Philosophy (PHIL) core courses must be completed with a letter grade by the end of the junior year:
   a) one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b) 60 or 61
   c) 80
3. Three history of science courses.
4. Three philosophy of science courses, of which one must be PHIL 164.
5. Three additional courses related to the major, in philosophy or history, to be agreed on by the adviser.
6. At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or The Dualist
A minor in Philosophy consists of at least 30 units of Philosophy courses satisfying the following conditions:
1. IHUM 23A and B (The Fate of Reason) may be counted for a maximum of 5 units.
2. At least 10 units must be from courses numbered 100 or above.
3. The 30 units must include one of:
   a) a history of philosophy course numbered 100 or above
   b) two quarters of Area 1 (only 5 of the 10 units can count towards 30-unit requirement)
4. One course from any two of the following three areas (PHIL):
   a) Philosophy of science and logic: 60, 61, 156, 163-168; 50(formerly 57), 150(formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b) Moral and political philosophy: 20, 30, 170-172
   c) Metaphysics and epistemology: 10, 80, 180-189
5. Units for tutorials, directed reading, and affiliated courses may not be counted.
6. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring a major. The number of transfer units is generally limited to a maximum of 10.
7. No more than 6 units completed with grades of “satisfactory” and/or “credit” count towards the 30-unit requirement.

Students must declare their intention to minor in Philosophy in a meeting with the Director of Undergraduate Study. This formal declaration must be made no later than the last day of the quarter two quarters before degree conferral. The Permission to Declare a Philosophy Minor (signed by the Director of Undergraduate Study) lists courses taken and to be taken to fulfill minor requirements. This permission is on file in the department office. Before graduation, a student’s record is checked to see that requirements have been fulfilled, and the results are reported to the University Registrar.

Students who wish to undertake a more intensive and extensive program of study, including seminars and independent work, are invited to apply for the honors program during Winter Quarter of the junior year. Admission is selective on the basis of demonstrated ability in philosophy, including an average grade of at least 'A-' in a substantial number of philosophy courses and progress towards satisfying the requirements of the major.

With their application, candidates should submit an intended plan of study for the remainder of the junior and the senior years. It should include at least 5 units of Senior Tutorial (196) during Autumn and/or Winter Quarter(s) of the senior year. Students who are applying to Honors College may use the same application for philosophy honors. In the quarter preceding the tutorial, students should submit an essay proposal to the Philosophy undergraduate director and determine an adviser.

Students applying for honors should enroll in Junior Honors Seminar (199) during the Spring Quarter of the junior year.

The length of this essay may vary considerably depending on the problem and the approach; usually it falls somewhere between 7,500 and 12,500 words. The honors essay may use work in previous seminars and courses as a starting point, but it cannot be the same essay that has been used, or is being used, in some other class or seminar. It must be a substantially new and different piece of work reflecting work in the tutorials.

A completed draft of the essay is submitted to the adviser at the end of the Winter Quarter of the senior year. Any further revisions must be finished by the fifth full week of the Spring Quarter, when three copies of the essay are to be given to the undergraduate secretary. The honors essay is graded by the adviser together with a second reader, chosen by the adviser in consultation with the student. The student also provides an oral defense of the thesis at a meeting with the adviser and second reader. The essay must receive a grade of ‘A-’ or better for the student to receive honors.

The honors tutorials represent units in addition to the 55-unit requirement.

The Department of Philosophy cooperates with the honors component of the “Interdisciplinary Studies in Humanities” as described in that section of this bulletin.
JOINT MAJOR IN PHILOSOPHY AND RELIGIOUS STUDIES

The joint major in Philosophy and Religious Studies consists of 60 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major or the special concentration. Affiliated courses cannot be used to satisfy this requirement.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit or credit/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

CORE REQUIREMENTS

1. Philosophy (PHIL) courses:
   a) 80
   b) 16 units, including at least one Philosophy course from each of the following areas:
      1) Logic and philosophy of science: 50 (formerly 57), 60, 61, 150
         (formerly 159), 151 (formerly 160A), 154 (formerly 169), 156, 162-168
      2) Ethics and value theory: 170-173
      3) Epistemology, metaphysics, and philosophy of language: 180-189
      4) History of philosophy: 100-103

2. Religious Studies courses: 20 units, including at least two courses in diverse religious traditions (for example, an Eastern and a Western or a literate and a preliterate tradition) and including at least one seminar.

General Major Requirements—Five additional courses (approximately 20 units) divided between the two departments. No more than 5 of these units may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

Special Concentration—With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the adviser.

Directed Reading and Satisfactory/No Credit Units—Units of directed reading for fulfilling requirements of the joint major are allowed only with special permission. No more than 10 units of work with a grade of ‘satisfactory’ count toward the joint major.

HONORS PROGRAM

Students pursuing a joint major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

It is possible to earn an M.A. in Philosophy while earning a B.A. or B.S. This can usually be done by the end of the fifth undergraduate year, although a student whose degree is not in philosophy may require an additional year. Standards for admission to, and completion of, this program are the same as for M.A. applicants who already have the bachelor’s degree when matriculating. Applicants for the coterminal program are not, however, required to take the Graduate Record Exam. Information about applying is available from Graduate Admissions in the Registrar’s Office. The application deadline for Philosophy is January 14.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

The department is prepared to direct and supervise individual study and research to supplement instruction offered in the courses listed below. In addition, advanced seminars not listed in the catalog are frequently organized in response to student interest. Candidates for advanced degrees are urged to discuss their entire program of study with their department advisers as early as possible.

Applications to graduate programs in the Department of Philosophy can be obtained from Graduate Admissions, the Registrar’s Office. Applicants must take the Graduate Record Examination by October of the year the application is submitted.

MASTER OF ARTS

University requirements for the M.A. are discussed in the “Graduate Degrees” section of this bulletin.

Four programs lead to the M.A. in Philosophy. One is a general program providing a grounding in all branches of the subject. The others provide special training in one branch.

Admissions—All prospective master’s students, including those currently enrolled in other Stanford programs, must apply for admission to the program. The application deadline is March 29 of the academic year preceding entry into the program. In exceptional circumstances, consideration may be given to applications received after the March 29 deadline but before April 30. No fellowships are available. Entering students must meet with the director of the master’s program and have their advisers’ approval, in writing, of program proposals. The master’s program should not be considered a stepping stone to the doctoral program; these two programs are separate and distinct.

Unit Requirements—Each program requires a minimum of 45 units in philosophy. Students in a special program may be allowed or required to replace up to 9 units of philosophy by 9 units in the field of specialization. Although the requirements for the M.A. are designed so that a student with the equivalent of a strong undergraduate philosophy major at Stanford might complete them in one year, most students need longer. Students should also keep in mind that although 45 units is the minimum required by the University, quite often more units are necessary to complete department requirements. Up to 6 units of directed reading in philosophy may be allowed. There is no thesis requirement, but an optional master’s thesis or project, upon faculty approval, may count as the equivalent of up to 8 units. A special program may require knowledge of a foreign language. At least 45 units in courses numbered 100 or above must be completed with a grade of ‘B-’ or better at Stanford. Students are reminded of the University requirements for advanced degrees, and particularly of the fact that for the M.A., students must complete three full quarters as measured by tuition payment.

GENERAL PROGRAM

The General Program requires a minimum of 45 units in Philosophy courses numbered above 99. These courses must be taken for a letter grade and the student must receive at least a ‘B-’ in the course. Courses taken to satisfy the undergraduate core or affiliated courses may not be counted in the 45 units. The requirement has three parts:

1. Undergraduate Core: students must have when they enter, or complete early in their program, the following undergraduate courses (students entering from other institutions should establish equivalent requirements with a master’s adviser upon arrival or earlier):
   a) Logic: 50(formerly 57), 150(formerly 159), or 151(formerly 160A)
   b) Philosophy of science: any course from 60, 61, 163-167
   c) Moral and political philosophy: one from 170-173
   d) Metaphysics and epistemology: one from 80, 180-189
   e) History of philosophy: two history of philosophy courses numbered 100 or above

2. Graduate Core: students must take at least one course numbered over 105 from three of the following five areas (courses used to satisfy the undergraduate core cannot also be counted toward satisfaction of the graduate core). Crosslisted and other courses taught outside the Department of Philosophy do not count towards satisfaction of the core.

3. Electives: students must complete 18 units of electives that are approved by the master’s program committee. These electives may include directed reading or seminars, and may be in philosophy, religious studies, or other interdisciplinary programs. Students may also petition the master’s program committee to accept additional units for graduate credit in courses not listed in the catalog.
a) Logic and semantics  
b) Philosophy of science and history of science  
c) Ethics, value theory, and moral and political philosophy  
d) Metaphysics, epistemology, and philosophy of language  
e) History of philosophy  

Each master’s candidate must take at least two courses numbered above 200 (these cannot be graduate sections of undergraduate courses). One may be a graduate core seminar (360, 370, 380, 381), but no student is admitted to a core seminar before completing undergraduate requirements in the area of the seminar and securing the approval of the instructor.

3. Specialization: students must take at least three courses numbered over 105 in one of the five areas.

SPECIAL PROGRAM IN SYMBOLIC SYSTEMS

Students should have the equivalent of the Stanford undergraduate major in Symbolic Systems. Students who have a strong major in one of the basic SSP disciplines (philosophy, psychology, linguistics, computer science) may be admitted, but are required to do a substantial part of the undergraduate SSP core in each of the other basic SSP fields. This must include the following three philosophy courses or their equivalents: 80-151 (formerly 160A); and one from 181, 183, 184, 186. This work does not count towards the 45-unit requirement.

COURSE REQUIREMENTS

1. Four courses in philosophy at the graduate level (numbered 200 or above), including courses from three of the following five areas:  
a) Philosophy of language  
b) Logic  
c) Philosophy of mind  
d) Metaphysics and epistemology  
e) Philosophy of science  

At most two of the four courses may be graduate sections of undergraduate courses numbered 100 or higher.

2. Three courses numbered 100 or higher from outside Philosophy, chosen in consultation with an adviser. These courses should be from two of the following four areas:  
a) Psychology  
b) Linguistics  
c) Computer Science  
d) Education  

Remaining courses are chosen in consultation with and approved by an adviser.

SPECIAL PROGRAM IN THE PHILOSOPHY OF LANGUAGE

Admission is limited to students with substantial preparation in philosophy or linguistics. Those whose primary preparation has been in linguistics may be required to satisfy all or part of the undergraduate core requirements as described in the General Program. Those whose preparation is primarily in philosophy may be required to take additional courses in linguistics.

COURSE REQUIREMENTS

1. Philosophy of language: two approved courses in the philosophy of language numbered 180 or higher.

2. Syntactic theory and generative grammar: 384 and LINGUIST 231.

3. Logic: at least two approved courses numbered 151 (formerly 160A) or higher.

4. An approved graduate-level course in mathematical linguistics or automata theory.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the Ph.D. degree (residence, dissertation, examination, and so on) are discussed in the “Graduate Degrees” section of this bulletin. The requirements detailed here are department requirements.

All courses used to satisfy proficiency requirements must be passed with a letter grade of ‘B-’ or better (no satisfactory/no credit).

At the end of each year, the department reviews the progress of each student to determine whether the student is making satisfactory progress, and on that basis to make decisions about probationary status and termination from the program where appropriate.

Any student in one of the Ph.D. programs may apply for the M.A. when all University and department requirements have been met.

PROFICIENCY REQUIREMENTS

1. Course requirements, to be completed during the first two years:  
a) four core graduate courses and seminars in philosophy of language (381); philosophy of mind, metaphysics, and epistemology (380); value theory (370); and philosophy of science (360)
b) three of the four items listed below: 1) three history courses, each consisting of an approved graduate-level course in the history of philosophy. Courses satisfying this seven-out-of-eight requirement must include at least one history course in ancient philosophy, one in modern.

2) PHIL 151 (formerly 160A)

2) PHIL 150 (formerly 159) or the equivalent

d) A total of at least 49 units of course work in the Department of Philosophy numbered above 110, but not including Teaching Methods (PHIL 239) or affiliated courses. Units of Individual Directed Reading (PHIL 240) may be included only with the approval of the Director of Graduate Study.

2. Teaching Assistance: a minimum of five quarters of teaching assistance at 25 percent time, usually during the second and third years.

3. Candidacy: to continue in the Ph.D. program, each student must be approved for candidacy during the sixth academic quarter (normally the Spring Quarter of the student’s second year). Students may be approved for candidacy on a conditional basis if they have only one or two outstanding deficiencies, but are not officially advanced to candidacy until these deficiencies have been removed. Approval for candidacy indicates that, in the department’s judgment, the student can successfully complete the Ph.D. In reaching this judgment, the department considers the overall quality of the student’s work during the first six quarters and the student’s success in fulfilling course requirements.

4. During the third year of graduate study, and after advancement to candidacy, a Ph.D. student should successfully complete at least three graduate-level courses/seminars, at least two of which must be in philosophy. Courses required for candidacy are not counted toward satisfaction of this requirement. Choice of courses/seminars outside philosophy is determined in consultation with a student’s adviser.

5. During the summer of their second year, students are required to attend a dissertation development seminar given by the department.

6. Dissertation work and defense: the third and fourth (and sometimes fifth) years are devoted to dissertation work.

a) Dissertation Proposal: by Spring Quarter of the third year, students select a dissertation topic, a reading committee, and some possible thesis relative to that topic. The topic and thesis should be sketched in a proposal of three to five pages, plus a detailed, annotated bibliography indicating familiarity with the relevant literature. The proposal should be approved by the reading committee before the meeting on graduate student progress late in Spring Quarter.

b) Departmental Oral: during Autumn Quarter of the fourth year, students take an oral examination, called the “Departmental Oral,” based on at least 30 pages of written work, in addition to the proposal. The aim of the exam is to help the student arrive at an acceptable plan for the dissertation and to make sure that the student, thesis, topic, and adviser make a reasonable fit. In cases where such an exam is deemed inappropriate by the reading committee, the student may be exempted by filing a petition with the Director of Graduate Study, signed by the student and the members of the reading committee.

c) Fourth-Year Colloquium: no later than the Spring Quarter of the fourth year, students present a research paper in a seminar open to the entire department. This paper should be on an aspect of the student’s dissertation research.

510
d) *University Oral Exam:* Ph.D. students must submit a completed draft of the dissertation to the three-person reading committee at least one month before the student expects to defend the thesis in the University oral exam. If the student is given permission to go forward, the University orals take place approximately two weeks later. A portion of the exam consists of a student presentation based on the dissertation and is open to the public. A closed question period follows. If the draft is ready by Autumn Quarter of the fourth year, the student can request that the University oral count as the department oral.

**SPECIAL GRADUATE PROGRAMS**

The department recognizes that some students may need to spend a large amount of time preparing themselves in some other discipline related to their philosophical goals, or in advanced preparation in some area within philosophy. In such circumstances, the department may be willing to waive some of the Ph.D. requirements. Such an exemption is not automatic; a program must be worked out with an adviser and submitted to the department some time in the student’s first year. This proposal must be in writing and must include:

1. The areas to be exempted (see below).
2. A program of additional courses and seminars in the special area (usually at least 12 units).
3. A justification of the program that considers both intellectual coherence and the student’s goals.

The department believes there is plenty of room for normal specialization within the program as it stands, and that all students specialize to some extent. Thus, the intent is not to exempt courses on a one-to-one basis, but only to grant exemptions when a student plans an extensive and intensive study of some relevant area.

Special program students may be exempted from no more than two of the following:

1. One additional item from the items listed above in requirement 1(a)
2. PHIL 150 (formerly 159); but in this case, a student must take PHIL 50 (formerly 57)
3. The breadth requirement

If a student’s special program involves substantial course work outside of philosophy then, with the approval of the adviser, the student may petition the department to reduce requirement 1(d) (the Philosophy unit requirement for the first two years). Normally this requirement is not reduced below 32 units.

**PH.D. MINOR**

To obtain a Ph.D. minor in Philosophy, students must follow these procedures:

1. Consult with the Director of Graduate Study to establish eligibility, and select a suitable adviser.
2. Give to the department academic assistant a signed copy of the program of study (designed with the adviser) which offers:
   a) 30 units of courses in the Department of Philosophy with a letter grade of ‘B’- or better in each course. No more than 3 units of directed reading may be counted in the 30-unit requirement.
   b) At least one course or seminar numbered over 99 to be taken in each of these five areas:
      1) Logic
      2) Philosophy of science
      3) Ethics, value, theory, and moral and political philosophy
      4) Metaphysics, epistemology, and philosophy of language
      5) History of philosophy
   c) Two additional courses numbered over 199 to be taken in one of those (b) five areas.
3. A faculty member from the Department of Philosophy (usually the student’s adviser) serves on the student’s doctoral oral examination committee and may request that up to one third of this examination be devoted to the minor subject.
4. Paperwork for the minor must be submitted to the department office before beginning the program.

**INTERDEPARTMENTAL PROGRAMS**

**GRADUATE PROGRAM IN HUMANITIES**

The Department of Philosophy also participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Philosophy and Humanities. It is described in the “Interdisciplinary Studies in Humanities” section of this bulletin.

**GRADUATE PROGRAM IN COGNITIVE SCIENCE**

Philosophy participates with the departments of Computer Science, Linguistics, and Psychology in an interdisciplinary program in Cognitive Science. It is intended to provide an interdisciplinary education, as well as a deeper concentration in philosophy, and is open to doctoral students. Students who complete the requirements within Philosophy and the Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Philosophy. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of philosophy. The list of approved courses can be obtained from the Cognitive Science program located in the Department of Psychology.

**SPECIAL TRACK IN PHILOSOPHY AND SYMBOLIC SYSTEMS**

Students interested in interdisciplinary work relating philosophy to artificial intelligence, cognitive science, computer science, linguistics, or logic may pursue a degree in this program.

**Prerequisites**—Ideally, admitted students have covered the equivalent of the core of the undergraduate Symbolic Systems Program requirements as described in that section of this bulletin, including courses in artificial intelligence (AI), cognitive science, linguistics, logic, and philosophy. The graduate program is designed with this background in mind. Students missing part of this background may need additional course work. Aside from the required course work below, the Ph.D. requirements are the same as for the regular program.

**Courses of Study**—The program consists of two years of courses and two years of dissertation work. Students are required to take the following courses in the first two years:

1. Six Philosophy courses:
   a) two of the following: 360, 370, 380, 381
   b) one course in the history of modern philosophy
   c) two quarters of graduate logic courses from among 350A, 351A, 352A, 353A
   d) at least one additional seminar in the general area of symbolic systems: e.g., 206, 206, 382, 386, 389
2. Five cognitive science and computer science courses:
   a) at least two courses in cognitive psychology
   b) two or three graduate courses in computer science, at least one in AI and one in theory
3. Three linguistics and computational linguistics courses:
   a) graduate courses on natural language that focus on two of the following areas: phonetics and phonology, syntax, semantics, or pragmatics
   b) one graduate course in computational linguistics, typically LINGUIST 239
4. At least two additional graduate seminars at a more advanced level, in the general area of the program, independent of department. These would typically be in the area of the student’s proposed dissertation project.

The requirements for the third year are the same as for other third-year graduate students in philosophy: a dissertation proposal, creation of a dissertation committee, and at least three approved graduate courses and seminars. The dissertation committee must include at least one member of the Department of Philosophy and one member of the Program in Symbolic Systems outside the Department of Philosophy.

The requirement for the fourth year is the same as for the other graduate students in philosophy: a department oral on an initial draft of part of the dissertation, a fourth year colloquium, and a University oral exam when the dissertation is essentially complete.
JOINT PROGRAM IN ANCIENT PHILOSOPHY

This program is jointly administered by the Departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers (with a strong specialization in ancient languages and philosophy) or classicists (with a concentration in philosophy).

Students are admitted to the program by either department. Graduate students admitted by the Philosophy department receive their Ph.D. from the Philosophy department; those admitted by the Classics department receive their Ph.D. from the Classics department. For Philosophy graduate students, this program provides training in classical languages, literature, culture, and history. For Classics graduate students, this program provides training in the history of philosophy and in contemporary philosophy.

Each student in the program is advised by a committee consisting of one professor in each department.

Requirements for Philosophy Graduate Students:

These are the same as the proficiency requirements for the Ph.D. in Philosophy with the following exceptions:

1. The student is exempted from the breadth requirement.
2. The student has already taken two courses in modern philosophy, hence she does not need to take a course in modern philosophy to satisfy the breadth requirement.

One year of Greek is a requirement for admission to the program. If students have had a year of Latin, they are required to take three courses in second- or third-year Greek or Latin (at least one of which must be in Latin). If they have not had a year of Latin, they are then required to complete a year of Latin, and take two courses in second- or third-year Greek or Latin.

Students are also required to take at least three courses in ancient philosophy at the 200 level or above (one of which must be in the Classics department and two of which must be in the Philosophy department).

GRADUATE DEGREES IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

See the description in the “History and Philosophy of Science and Technology” section of this bulletin.

GRADUATE FELLOWSHIPS AND ASSISTANTSHIPS

A limited amount of fellowship support is available for Ph.D. students in philosophy. Students request aid by checking the appropriate box on the application form. Details of this program may be obtained from the department. Note that a condition of financial aid may be teaching assistance that goes beyond the Ph.D. requirement.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement. See the quarterly Time Schedule for revised listings.

INTRODUCTORY TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Philosophy department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Philosophy are advised to consider satisfying their GER:1b,c requirements by registering for the following IHUM courses.

IHUM 23A-B. The Fate of Reason—The fate of Socrates’ proposal that answers to problems about what to believe and how to act should be guided by reason. The fate of reason in different cultural traditions. The basis for commitments about how to live, God, the world, and people’s place within it. The power of reason to improve lives versus the notion that rational principles demand too much or are insufficient to reach important truths. GER:1b,1c (two quarter sequence)

IHUM 23A. 5 units, Win (Bobonich)
IHUM 23B. 5 units, Spr (A. Wood)

INTRODUCTORY

These courses acquaint the student with some of the most important problems, positions, and methods in Philosophy. Some are designed to give general preparation for further work in Philosophy. Some apply the philosopher’s approach to particular problems and subjects encountered in other areas of study.

PHIL 10. God, Self, and World: An Introduction to Philosophy—Traditional philosophical problems including the existence of God, how and what one can know about the world, how to understand the nature of the mind and its relation to the body, and whether people have free will. Paradoxes. Readings include classical and contemporary texts. GER:3a 5 units, Aut (Perry)

PHIL 11N. Skepticism—Stanford Introductory Seminar. Preference to freshmen. Historical and contemporary philosophical perspectives on the limits of human knowledge of a mind-independent world and causal laws of nature. The nature and possibility of a priori knowledge. GER:3a 3 units, Aut (De Pierris)

PHIL 12N. Introduction to Metaphysics—Stanford Introductory Seminar. Preference to freshmen. Introduction to philosophical thinking through paradoxes about logic, meaning, rationality, and infinity. GER:3a 3 units, Win (Moravcsik)

PHIL 15N. Paradoxes—Stanford Introductory Seminar. Preference to freshmen. Introduction to philosophical thinking through paradoxes about logic, meaning, rationality, and infinity. GER:3a 3 units, Aut (De Pierris)

PHIL 16N. Values and Objectivity—Stanford Introductory Seminar. Preference to freshmen. What is meant by the objectivity of beliefs and attitudes? Can the commitment of science to truthfulness be free of particular perspectives and subjectivity influence? Is objectivity a matter of degree relative to the kind of inquiry undertaken? Readings from philosophy of science, moral philosophy, and welfare economics. GER:3a 3 units, Win (Ryckman)

PHIL 20. Introduction to Moral Philosophy—(Same as ETHICSOC 20.) What is the basis of moral judgments? What makes right actions right, and wrong actions wrong? What makes a state of affairs good or worth promoting? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER:3a 5 units, Aut (Schipper)

PHIL 30. Introduction to Political Philosophy—(Enroll in POLISCI 3.) 5 units, Win (Stone)

PHIL 50. Introductory Logic—(Formerly ST 57.) Propositional and predicate logic; emphasis is on translating English sentences into logical symbols and constructing derivations of valid arguments. GER:2c 4 units, Win, Spr (Barker-Plummer)

PHIL 60. Introduction to Philosophy of Science—(Same as HPS 60.) Survey of 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:3a 5 units, Spr (Tanona)

PHIL 61. Philosophy and the Scientific Revolution—(Same as HPS 61.) The relationship between the scientific revolution of the 17th century that resulted in the birth of modern science and the contemporaneous intellectual developments constituting the birth of modern philosophy. Readings focus on Galileo and Descartes. GER:3a 5 units, Aut (Friedman)

PHIL 77. Methodology in Ethics: Translating Theory into Practice—(Same as ETHICSOC 77.) Ideally, social policies are informed by empirical evidence and ethical insight. The experience of the 20th century has demonstrated both these insights to be true. This course serves as an introduction to the philosophy of law and the nature of legal procedure.”,512
How should diverse cultural values be addressed? Case studies from biomedical science, business, and government. Required community service internship.

PHIL 78. Medical Ethics—(Same as ETHICSOC 78.) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients’ autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:3a,4c
4 units, Spr (Jaworska)

PHIL 80. Mind, Matter, and Meaning—Central topics in philosophy: free will and determinism, the relation of mind and body, and whether machines can think. Emphasis is on analytical writing skills. Prerequisite: introductory philosophy course. GER:3a,WIM
5 units, Aut (Lawlor), Spr (Crimmins)

PHIL 81. Philosophy and Literature Gateway—(Same as FRENGEN 181, ITALGEN 181.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DLCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:3a
4 units, Win (Landy, Anderson)

PHIL 100. Greek Philosophy—Greek philosophical thought, covering Socrates, Plato, Aristotle, and the Hellenistic schools (the Epicureans, the Stoics, and the Skeptics). Topics: the nature of the soul, virtue and happiness, knowledge, and reality. GER:3a
4 units, Aut (Bobonich)

PHIL 102. Modern Philosophy, Descartes to Kant—Major figures in early modern philosophy in epistemology, metaphysics, and philosophy of mind. Writings by Descartes, Locke, Leibniz, Berkeley, Hume, and Kant. GER:3a
4 units, Win (De Pierris)

PHIL 103. 19th-Century Philosophy—Focus is on ethics and the philosophy of history. Works include Mill’s Utilitarianism, Hegel’s The Philosophy of World History, Marx’s Economic and Philosophic Manuscripts, Kierkegaard’s The Sickness Unto Death, and Nietzsche’s On the Genealogy of Morals. GER:3a
4 units, Spr (A. Wood)

PHIL 107/207. Plato’s Ontology and Mathematics—(Graduate students register for 207.) Plato’s theories on parts of reality.
4 units, Win (Moravcsik)

PHIL 108/208. Plato’s Ethics—(Graduate students register for 208; formerly 116/216.) Plato’s ethics compared to modern ethics. Study of the human ideal.
4 units, Spr (Moravcsik)

PHIL 115/215. Problems in Medieval Philosophy: Scholastic Background to Kant—(Graduate students register for 215.) Aquinas, Baumgarten, and Kant on psychology, cosmology, and theology. What is the nature of the soul for Aquinas, and how is his answer related to Baumgarten? What is the origin of the world according to Aquinas, and how does Kant’s approach differ? Can the existence of God be proven, and how does Baumgarten’s answer depend on Aquinas? GER:3a
3-4 units, Win (R. Wood)

PHIL 117/217. Recovering the Original Aristotle—(Graduate students register for 217.) Did Aristotle have a coherent notion of substantiality, and if so, what key properties must substances have? The implications of Aristotle’s theory of categories for his theories of substance.
4 units (Moravcsik) not given 2004-05

PHIL 120/220. Hume—(Graduate students register for 220.) Hume’s theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self. GER:3a
4 units, Win (De Pierris)

PHIL 121/221. Descartes—(Graduate students register for PHIL 221.) Descartes’ philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world. GER:3a
4 units, Aut (De Pierris)

PHIL 122/222. Hegel’s Philosophy of Right—(Graduate students register for 222.) Introduction to Hegel’s philosophy through his last major work, Elements of the Philosophy of Right (1821). Emphasis is on his philosophy of natural rights, morality, society, politics, and history. GER:3a
4 units (A. Wood) not given 2004-05

PHIL 125/225. Kant’s First Critique—(Graduate students register for 225.) The founding work of Kant’s critical philosophy, emphasizing contributions to metaphysics and epistemology and the attempt to limit metaphysics to objects of possible experience. Prerequisite: course in systematic issues in metaphysics or epistemology, or the history of modern philosophy. GER:3a
4 units, Spr (Anderson)

PHIL 126/226. Kant’s Ethical Theory—(Graduate students register for 226.) Kant’s moral philosophy, based primarily on the Groundwork of Metaphysics of Morals, the Critique of Practical Reason, and The Metaphysics of Morals. GER:3a
4 units (Schapiro) not given 2004-05

PHIL 127/227. Kant’s Critique of the Power of Judgment—(Graduate students register for 227.) Kant’s third and final critique investigates the transcendental grounds of aesthetic taste and the use of teleology in the study of nature, with the aim of unifying theoretical and practical reason in the critical system. The analytic of the beautiful, the role of taste and artworks in human life, and the methodology of teleological judgment which is to unite the teleology of nature and morals into a single system of practical reason. GER:3a
4 units, Win (A. Wood)

PHIL 132/232. Existentialism—(Graduate students register for 232.) The existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one’s relation to the divine? How can one live a meaningful life? What is the significance of death? A rethinking of the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including their social and political consequences in light of 20th-century fascism and feminism. GER:3a
4 units (Anderson) not given 2004-05

PHIL 133/233. Major Figures in 20th-Century Philosophy—(Graduate students register for 233.) Husserl, Heidegger, Sartre, Gadamer, Wittgenstein, Quine, Davidson, and Rawls. Readings from their central writings. GER:3a
4 units (Føllesdal) not given 2004-05

PHIL 134/234. Phenomenology, Existentialism, and Hermeneutics—(Graduate students register for 234.) Husserl’s phenomenology as a key to understanding contemporary continental philosophy including Heidegger’s and Sartre’s existentialisms, Gadamer’s hermeneutics, and recent trends in contemporary German and French philosophy. The role of intentionality in contemporary debates in cognitive science. Husserl’s Ideas and Cartesian Meditations read in full; selections from Heidegger, Sartre, and Gadamer. GER:3a
4 units, Aut (Føllesdal)
PHIL 135/235. Wittgenstein—(Graduate students register for 235.) The main themes and claims in Wittgenstein’s later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his *Philosophical Investigations*. Emphasis is on the relationship between the novel arguments of the Investigations and its ways of writing up the results of philosophical questioning. GER:3a
4 units, Spr (Hills)

PHIL 138/238. Recent European Philosophy—(Graduate students register for 238.) Themes and thinkers in 20th-century continental philosophy. Emphasis is on novel understandings of time, language, and cultural power. Thinkers include Heidegger, Benjamin, Saussure, and Foucault, together with precursors and contemporary admirers and critics. GER:3a
4 units, Spr (Hills)

LOGIC AND PHILOSOPHY OF SCIENCE

PHIL 150/250. Basic Concepts in Mathematical Logic—(Graduate students register for 250; formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability. GER:2c
4 units, Aut (Segerberg)

PHIL 151/251. First-Order Logic—(Graduate students register for 251; formerly 160A.) The syntax and semantics of sentential and first-order logic. Introduction to the basic concepts of model theory. Gödel’s Completeness Theorem and its consequences: the Löwenheim–Skolem Theorem and the Compactness Theorem. Prerequisite: 150 (formerly 159) or consent of instructor. GER:2c
4 units, Win (Segerberg)

PHIL 152/252. Computability and Logic—(Graduate students register for 252; formerly 160B.) Approaches to effective computation: recursive functions, register machines, and various programming styles. Proof of their equivalence, discussion of Church’s Thesis. Elementary recursion theory. These techniques are used to prove Gödel’s Incompleteness Theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151 (formerly 160A). GER:2c
4 units, Spr (Segerberg)

PHIL 154/254. Modal Logic—(Graduate students register for 254; formerly 169.) Introduction to the basics of modal logic, with an emphasis on action and information. Topics show the interdisciplinary nature of the field, among philosophy, computer science, linguistics, mathematics, and economic game theory. Prerequisite: 150 (formerly 159) or preferably 151 (formerly 160A). GER:2c
4 units, Spr (van Benthem)

PHIL 155/255. Concepts of Freedom—(Graduate students register for 255.) Historical and current concepts of freedom. The views of Hume, Kant, Mill, A.V. Dicey, and Hayek; recent works, including economic concepts of freedom. Recent work on free will as a properly empirical concept. GER:3a
4 units, Spr (Suppes)

PHIL 156. Popper, Kuhn, and Lakatos—(Same as EDUC 214.) These 20th-century philosophers of science raise fundamental issues dealing with the nature of scientific progress: the rationality of change of scientific questioning. GER:3a
3 units, Spr (Phillips)

PHIL 157/257. Topics in the Philosophy of Logic—(Graduate students register for 257.)
4 units (Staff) not given 2004-05

PHIL 161. Set Theory—(Enroll in MATH 161.)
3 units, Win (White)

PHIL 162/262. Philosophy of Mathematics—(Graduate students register for 262.) Introduction to 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. The schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: 151 (formerly 160A) or consent of instructor.
4 units, Spr (Staff)

4 units, Aut (Ryckman)

PHIL 165/265. Philosophy of Physics—(Graduate students register for 265.) The philosophy of space and time. Absolute and relational theories of space, time, and motion. Special relativity and the conventionalism of simultaneity. Mach’s principle and general relativity. Metric conventionalism. Space-time substantivalism, Einstein’s hole argument, and the meaning of general covariance. Causally pathological space times and space-time singularities. GER:3a
4 units, Spr (Ryckman)

PHIL 167A/267A. Philosophy of Biology—(Graduate students register for 267A.) Philosophical questions raised by evolutionary biology. The concepts of fitness and adaptation. How are hypotheses about adaptation to be tested? How should organisms be classified? How can the history of the phylogenetic branching process be inferred? Are there laws in evolutionary biology? Are theories in biology reducible to theories in physics? What does evolutionary biology contribute to the understanding of human mind and culture? GER:3a
4 units, Aut (Tanona)

PHIL 167B/267B. Philosophy, Biology, and Behavior—(Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: altruism, group selection, genetic determinism. Prerequisite: 167A, or some philosophy background and Biological Sciences or Human Biology core, or equivalent with consent of instructor.
4 units (Staff) not given 2004-05

ETHICS, AESTHETICS, AND SOCIAL AND POLITICAL PHILOSOPHY

PHIL 170/270. Ethical Theory—(Graduate students register for 270; same as ETHICSOC 170.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:3a
4 units, Win (Schapiro)

PHIL 171/271. Political Philosophy—(Graduate students register for 271; same as ETHICSOC 171.) What makes a society a just society? Focus is on the social contract tradition. Readings may include Hobbes, Locke, Rousseau, and Rawls. GER:3a
4 units, Spr (Schapiro)

PHIL 172. Kantian Value Theory—The role of autonomy, principled rational self-governance, in Kant’s account of the norms to which humans beings are answerable as moral agents, citizens, empirical inquirers, and religious believers. Relations between moral values (goodness, rightness) and aesthetic values (beauty, sublimity). GER:3a
4 units (Hills) not given 2004-05

PHIL 176/276. Political Philosophy: The Social Contract Tradition—(Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the
PHIL 177. Philosophical Issues Concerning Race and Racism—(Same as POLISCI 136.) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance between the competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion and various explanations. Ger: 3a, 4b

PHIL 178. Ethics in Society Honors Seminar—(Same as ETHICSOC 190.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.

PHIL 181/281. Philosophy of Language—(Graduate students register for 281.) Conceptual questions about language as a focus of contemporary philosophy both for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, the science of science, metaphysics, and ethics. Key concepts and debates about meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic.

PHIL 184/284. Theory of Knowledge—(Graduate students register for 284.) Competing theories of epistemic justification (foundationalism, coherenceism, and externalism) against the background of radical skepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor. Ger: 3a

PHIL 186/286. Philosophy of Mind—(Graduate students register for 286.) Debates concerning the nature of mental states, their relation to straightforwardly physical states of the human body, the manner in which they acquire their content, the ways people come to know about them in themselves and in others, and the roles they play in the explanation of human conduct.

PHIL 187/287. Philosophy of Action—(Graduate students register for 287.) What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is it to act intentionally? What is it to act for a reason? Are the reasons for which one acts causes of one’s action? What is it to act autonomously? Readings: Davidson, Frankfurt, and others. Prerequisite: 80. Ger: 3a

PHIL 188. Personal Identity—People seem to remain the same despite the various changes they undergo during their lives. Why? The answer can profoundly influence one’s beliefs about whether people are essentially bodies or minds, and whether one’s own survival matters. Readings include John Locke, Thomas Reid, David Hume, Bernard Williams, and Derek Parfit. Ger: 3a

PHIL 189. Philosophical Applications of Cognitive Science—The relevance of recent discoveries about the mind to philosophical questions in metaphysics, epistemology and philosophy of science, and ethics. Questions include: is there a right way to carve up the world into categories? Are the rules of logic objective, or just the way we happen to think? Is there such a thing as objective right and wrong?

PHIL 190. Introduction to Cognitive Science—(Same as LINGUIST 144, SYMBSYS 100, PSYCH 130.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. Ger: 3b

PHIL 193Y. The Moral Status of Human Beings—(Same as HUMNTIES 193Y.) The conviction that human beings have a unique moral status among animals, plants, and things, and that all humans have equal moral status is at the heart of ethics. Views which question these beliefs, attempts to defend them, and their implications for practical ethical issues such as abortion, euthanasia, new reproductive technologies, and the treatment of animals.

PHIL 194B. Undergraduate Seminar: Time and Free Will

PHIL 194C. Undergraduate Seminar: Philosophy of Friendship—What philosophers say about friendship.

PHIL 194D. Undergraduate Seminar: Free Will and Moral Responsibility—Priority to majors. Enrollment limited to 12. Prerequisite: background in philosophy, 80.

PHIL 194E. Undergraduate Seminar: Beauty and Other Forms of Value—The nature and importance of beauty and the human capacity to discern and respond to it as discussed by philosophers and artists from different historical periods. Attempts to work out the relations between beauty and ethical values such as moral goodness, and cognitive values such as truth.

PHIL 196. Tutorial, Senior Year

PHIL 197. Individual Work, Undergraduate

PHIL 198. The Dualist—Weekly meeting of the editorial board of The Dualist, a national journal of undergraduate work in philosophy. Open to all undergraduates. May be taken 1-3 quarters. (AU)

PHIL 199. Seminar for Prospective Honors Students—Open to juniors intending to do honors in philosophy. Methods of research in philosophy. Topics and strategies for completing honors project.
PRIMARILY FOR GRADUATE STUDENTS

Graduate students should also consult previous entries in the catalog for courses with graduate student numbers.

PHIL 206S. Seminar in Foundations of Neuroscience—Topic this year is physical models of memory retrieval emphasizing associative networks and concepts of resonance. 4 units, Win (Suppes)

PHIL 223. Medieval Commentary on Aristotle’s De Anima—Aristotle’s view on mental representation, interpreted, refined, and criticized by Thomas Aquinas and other medieval philosophers. Reading of original texts in translation and of recent historical and systematic discussion. 3 units (Follesdal, Suppes) not given 2004-05

PHIL 224. Kant’s Philosophy of Scientific Physics—Kant’s Metaphysical Foundations of Natural Science (1786), published between the first (1781) and second (1787) editions of the Critique of Pure Reason, in the scientific and philosophical context provided by Newtonian natural philosophy and the Leibnizean tradition. The place of this work in the development of Kant’s thought. Prerequisite: prior acquaintance with either Kant’s theoretical philosophy or the contemporaneous scientific context, principally Newton, Leibniz, and Euler. 4 units (Friedman) not given 2004-05

PHIL 230. The Philosophical and Educational Thought of John Dewey—(Enroll in EDUC 304.) 4 units, Aut (Phillips)

PHIL 237. Nietzsche—Preference to Ph.D. students. Nietzsche’s later works emphasizing The Gay Science, Beyond Good and Evil, and On the Genealogy of Morals. The overall shape of Nietzsche’s philosophical and literary projects, and his core doctrines such as eternal recurrence, will to power, and perspectivism. Central problems such as the proper regulation of belief, and the roles of science, morality, art, and illusion in life. 4 units (Anderson) not given 2004-05

PHIL 239. Teaching Methods in Philosophy—For Ph.D. students in their second or third year who are teaching assistants for the department. Discussion of issues about the teaching of philosophy. 1-4 units, Aut, Win, Spr (Staff)

PHIL 240. Individual Work for Graduate Students 1-15 units, Aut, Win, Spr (Staff)

PHIL 241. Dissertation Development Seminar 3 units, Sum (Staff)

PHIL 242A. Methodological Problems in Population Biology—How hypotheses ought to be tested; how the data generated by a test ought to be interpreted. Examples involve hypotheses about natural selection and phylogenetic relationships. The use of model selection criteria in population biology such as the Akaïke information criteria. 3 units (Staff) not given 2004-05

PHIL 243. Saving Phenomena—(Same as CLASSGEN 134/234.) The determination of theory by empirical evidence is at the heart of the philosophy of science. Readings include seminal works of Western science: Ptolemy’s Almagest, focusing on theories of the Sun and the Moon; Galen’s On Natural Faculties, focusing on the theory of the urinary bladder; Archimedes’ Planes in Equilibrium, focusing on the theory of balance. Each represents a different use of empirical evidence in scientific theory, and combining evidence provides a richer theory of saving the phenomena. GER:3a 4 units (Netz, Suppes) not given 2004-05

PHIL 248. Medieval Latin Paleography—(Formerly 314.) The history of medieval scripts and editing medieval texts in philosophy, physics, and theology. Dating and placing Latin European medieval manuscripts. Medieval abbreviation, punctuation, and codicology. Class project: a French commentary on Aristotle’s ethics preserved in a Florentine manuscript. 3-5 units, Spr (R. Wood)

PHIL 258. Minds and Machines—Readings on arguments concerning mechanical models of the mind including Turing machine models to which Gödel’s incompleteness theorems are relevant, and connectionist (neural net) models. Prerequisites: 151 (formerly 160A), 152, or equivalents. Recommended: 389. 4 units, Win (Feferman)

PHIL 272. Kantian Value Theory—The role of autonomy, principled rational self-governance, in Kant’s account of the norms to which humans beings are answerable as moral agents, citizens, empirical inquirers, and religious believers. Relations between moral values (goodness, rightness) and aesthetic values (beauty, sublimity). 4 units (Hills) not given 2004-05

PHIL 286B. Seminar on Lexical Semantics—How to specify the meanings of lexical terms. Fodor on atomism-holism. Do meanings have primarily psychological reality, or also ontological reality? Theories include instructor’s own proposal. 4 units (Moravcsik) not given 2004-05

PHIL 288. Ontology and Realism—What entities really exist, what is it to commit oneself to things existing, and what grounds might there be for so committing oneself? Ordinary things, abstract objects, unobservables. Connections with larger questions of objectivity and realism. 4 units (Crimmins) not given 2004-05

PHIL 289. Seminar on the Language of Thought—The relation of recent research that favors the hypothesis that mental phenomena can be understood as computations over representations in a language of thought enunciated in people’s brains. How this program promises solutions to traditional problems in the philosophy of mind while leaving behind pretheoretic intuitions such as about qualia or consciousness. Readings include Rey, Fodor, Dennett, Searle, and Levine. 4 units (Rey) not given 2004-05

PHIL 298. Logic, Language, and Information—Logical systems for analyzing information structures, communication, and other cognitive actions. Special topics: systems for information update; logic and game theory. Prerequisite: 154 or an equivalent background in modal logic. 3 units (van Benthem) not given 2004-05

PHIL 313. Aristotle’s Psychology and Philosophy of Mind—Primary reading is De Anima. 4 units, Win (Bobonich)

PHIL 318. Aristotle’s Ethics—Aristotle’s ethical views through the Protrepticus and the Eudemian Ethics. 4 units (Bobonich) not given 2004-05

PHIL 328. Fichte’s Theory of Intersubjectivity—The founder of the German Idealist movement who adopted but revised Kant’s project of transcendental philosophy basing it on the principle of awareness of free self-activity. The awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place of intersubjectivity in his theory of experience. 4 units, Aut (A. Wood)

PHIL 350A,B. Model Theory—(Enroll in MATH 290A,B; formerly PHIL 290A,B.) 3 units (Staff) not given 2004-05

PHIL 351A,B. Recursion Theory—(Enroll in MATH 291A,B; formerly PHIL 291A,B.) 3 units (Staff) not given 2004-05

PHIL 352A,B. Set Theory—(Enroll in MATH 292A,B; formerly PHIL 292A,B.) 3 units (Staff) not given 2004-05

PHIL 353A,B. Proof Theory—(Enroll in MATH 293A,B; formerly PHIL 293A,B.) 3 units, A: Win (Feferman), B: (Staff) not given 2004-05
PHIL 354. Topics in Logic—(Same as MATH 294; formerly PHIL 294.) Epsilon calculus. Syntax and semantics of first order epsilon calculus. Hilbert’s epsilon substitution method. Recent progress and open problems. Prerequisites: 151 (formerly 160A), 152, or equivalents.

3 units (Staff) not given 2004-05

PHIL 356. Applications of Modal Logic—Applications of modal logic to knowledge and belief, and actions and norms. Models of belief revision to develop a dynamic doxastic logic. A workable modeling of events and actions to build a dynamic deontic logic on that foundation.

3 units, Win (Segerberg)

PHIL 359. Advanced Modal Logic—(Formerly 269.) Mathematical analysis of modal systems, including bisimulation and expressive power, correspondence theory, algebraic duality, completeness and incompleteness, and extended modal logics, up to guarded fragments of first-order logic, fixed-point logics, and second-order logic. Prerequisite: 151 (formerly 160A), 154/254, or an equivalent background.

4 units, Spr (van Benthem)

PHIL 360. Core Seminar in Philosophy of Science—(Formerly 260.) For first- and second-year Philosophy Ph.D. students.

4 units, Win (Friedman, Ryckman)

PHIL 365. Seminar in Philosophy of Science: Structural Realism—This recent version of scientific realism and its differences with standard realism and antirealism. Historical antecedents in Hertz, Poincaré, Russell, Eddington, and Weyl.

4 units, Spr (Ryckman)

PHIL 370. Core Seminar in Ethics—(Formerly 270.) For first- and second-year Philosophy Ph.D. students.

4 units (Satz) not given 2004-05

PHIL 372. Selected Problems in Kantian Ethics

4 units, Spr (Schapiro)

PHIL 374. Valuing—What is it to value something? How is valuing related to desiring, judging something to be valuable, caring, the emotions, or having policies? What is the relation between valuing and the will? Are there reasons for valuing things or pursuing what we value? Readings from contemporary literature including Bratman, Frankfurt, Harman, Helm, Raz, Scheffler, and Velleman.

4 units, Win (Jaworska)

PHIL 377. Topics in Democratic Theory—(Same as POLISCI 333.) Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Pettit, Iris Marion Young, Ian Shapiro, and Amy Gutman.

3-5 units, Win (Satz, Ferejohn)

PHIL 379. Seminar in Metaethics—Theories about the meaning of ethical terms and the content of ethical judgments. Do these theories fit with best accounts of human agency and practical deliberation? Readings from recent literature. Prerequisites 173B/273B, 181, 187/287 or equivalent.

4 units (Hussain) not given 2004-05

PHIL 380. Core Seminar in Metaphysics and Epistemology—(Formerly 280.) For first- and second-year Philosophy Ph.D. students.

4 units (Crimmins) not given 2004-05

PHIL 381. Core Seminar in Philosophy of Language—(Formerly 281.) For first- and second-year Philosophy Ph.D. students.

4 units, Aut (Perry)

PHIL 386. Self, Meaning, and Consciousness—Issues about the sorts of meaning mental states have, and how this relates to issues of self-knowledge, self-identity, and consciousness.

4 units, Win (Perry)

PHIL 383. Justification and Entitlement—The idea of rationalist and empiricist philosophers that one is entitled to beliefs without having to justify them. What might epistemic entitlement be; does anyone have it, and what is it good for? Readings include Goldman, Burge, Peacocke, Sellars, and Williams.

4 units, Win (Lawlor)

PHIL 384. Seminar in Metaphysics and Epistemology: the Concept of a Priori

4 units, Aut (Moravcsik)

PHIL 385. Philosophy of Language Seminar

4 units, Spr (Crimmins)

PHIL 387. Practical Reason—Contemporary work on practical rationality.

4 units, Spr (Bratman)

PHIL 389. Mind and Brain—Nine seminars from October 11-29 analyzing contemporary work in neuroscience and its bearing on philosophical problems of mind. Guest speakers include Anne Fagot-Largeault and Jean-Pierre Changeux from Collège de France. Credit requires a paper to be presented in November and attendance at an organizational meeting on September 29.

4 units, Aut (Føllesdal, Suppes)

PHIL 450. Thesis

1-15 units, Aut, Win, Spr (Staff)
Emeriti: (Professors) Stanley S. Hanna, William A. Little, Walter E. Meyerhof, David M. Ritson, H. Alan Schwettman, Mason R. Yerian; (Professor, Research) John P. Turneaure; (Professor, Courtesy) Peter A. Sturrock
Chair: Stanley G. Wojcicki
Associate Chair: Robert Wagoner
Director of Graduate Study: Renata Kallosh
Director of Undergraduate Study: Patricia Burchat
Associate Professors: Giorgio Gratta, Shamit Kachru, Roger W. Romani, Eva Silverstein
Assistant Professors: Sarah Church, David Goldhaber-Gordon, Hari Manoharan, Scott Thomas
Professors (Research): John A. Lipa, Phillip H. Scherrers, Todd I. Smith
Courtesy Professors: Richard Taylor, Richard N. Zare
Lecturers: Alexander Kosovichev, Gregorz M. Madejski, Richard L. Pam
Consulting Professors: Ralph DeVoe, Barbara Jones, Alan Title
Visiting Professors: Gerald Fisher, Allen Tucker, Jan Zaanen
Department Offices: 382 Via Pueblo Mall
Mail Code: 94305-4060
Phone: (650) 723-4344
Web Site: http://www.stanford.edu/dept/physics

Courses in Physics have the subject code PHYSICS. For a complete list of subject codes, see Appendix.

The Russell H. Varian Laboratory of Physics, the nearby W. W. Hansen Experimental Physics Laboratory (HEPL), the E. L. Ginzton Laboratory, and the Geballe Laboratory for Advanced Materials (GLAM) together house a range of physics activities from general courses through advanced research. At the Stanford Free Electron Laser Center, located in HEPL, tunable picosecond optical beams are available for materials and biomedical research at wavelengths that extend from the visible to the far infrared. Ginzton Lab houses research on optical systems, including quantum electronics, metrology, optical communication and development of advanced lasers. GLAM houses research on novel and nanopatterned materials, from high-temperature superconductors and magnets to organic semiconductors, subwavelength photon waveguides, and quantum dots. GLAM also supports the broader materials community on campus with a broad range of characterization tools, and will be the site for Stanford’s new Nanocharacterization Lab.

The Stanford Linear Accelerator Center (SLAC) is just a few miles from the Varian Laboratory. SLAC is a high-energy physics lab with a two-mile-long linear accelerator that can accelerate electrons and positrons up to 50 GeV, and produce highly polarized electron beams. The PEP-II asymmetric-energy electron-positron storage ring is used to study CP violation in the B meson system. The Stanford Synchrotron Radiation Laboratory (SSRL) uses intense x-ray beams produced with another smaller storage ring on the SLAC site.

The Ginzton Laboratory, HEPL, GLAM, SLAC, and SSRL are listed in the “Academic Programs and Centers, Independent Research Laboratories, Centers, and Institutes” section of this bulletin. Students may also be interested in research and facilities at two other independent labs: the Center for Integrated Systems, focused on electronics and nanofabrication; and the Clark Center, a new interdisciplinary biological sciences laboratory.

The Physics Department and SLAC have together launched the Kavli Institute for Particle Astrophysics and Cosmology, a new institute serving as a focus of Stanford research in this interdisciplinary area. Substantial increase in the associated faculty, and in student opportunities for research in astrophysics and cosmology, is underway. Stanford is a member of the Hobby-Eberly Telescope Consortium, operating an innovative 10.4 meter telescope at McDonald Observatory in Texas. Students may also participate in research using this instrument. A particle astrophysics program of searches for dark matter, the CDMS (cryogenic dark matter search) experiment, is operated in an underground laboratory on the Stanford campus and in the Soudan mine in Minnesota.

The Stanford Institute for Theoretical Physics is devoted to the investigation of basic structure of matter (string theory, M-theory, quantum cosmology, condensed matter physics).

The Physics Library, a center for the reading and study of physics and astronomy at all levels, includes print and electronic access to current subscriptions and back sets of important journals together with textbooks, dissertations, scholarly monographs, and the collected works of the most eminent physicists.

Course work is designed to provide students with a sound foundation in both classical and modern physics. Students who wish to specialize in astronomy, astrophysics, or space science should also consult the “Astronomy Course Program” section of this bulletin.

Three introductory series of courses include labs in which undergraduates carry out individual experiments. The Intermediate and Advanced Physics Laboratories offer facilities for increasingly complex individual work. Laboratories provide students with a sound basis for more advanced laboratory work, including the conception, design, and fabrication of laboratory equipment. Undergraduates are also encouraged to participate in research; most can do this through the honors program and/or the summer research program.

Graduate students find opportunities for research in the fields of astrophysics, atomic physics/laser science, biophysics, coherent optical radiation, condensed matter physics, cosmology, high energy physics, intermediate energy physics, low temperature physics, materials research, novel imaging technologies, particle astrophysics, quantum electronics, and theoretical physics. Faculty advisers are drawn from multiple departments, including Physics, Applied Physics, Materials Science and Engineering, Electrical Engineering, and Biological Sciences. Opportunities for research are also available with the faculty at SLAC in the areas of theoretical and experimental particle physics, particle astrophysics, cosmology, and accelerator design.

The number of graduate students admitted to the Department of Physics is strictly limited. Students should submit applications by December 14 for the following Autumn Quarter. Graduate students may normally enter the department only at the beginning of Autumn Quarter.

UNDERGRADUATE PROGRAMS

The study of physics is undertaken by three principal classes of undergraduates: those including physics as part of a general education; those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering; and those preparing for teaching or research careers in physics or related fields. Physics courses numbered below 200 are intended to serve all three of these groups. The courses numbered above 200 meet the needs mainly of the third group, but also of some students majoring in other branches of science and in engineering.

ENTRY-LEVEL SEQUENCES

The Department of Physics offers three year-long entry level physics sequences, the PHYSICS 20, 50 (formerly 40), and 60 series. The first of these is non-calculus-based, and is intended primarily for those who are majoring in the biological sciences. Such students with AP credit, particularly those who are considering research careers, may wish to consider taking the physics series, however, as it provides adequate depth and emphasis on problem solving to be of significantly more value in biological research which today involves considerable physics based technology.
For those intending to major in engineering or the physical sciences, or simply wishing to get a stronger background in physics, the department offers the PHYSICS 50 and 60 series. Either of these will satisfy the entry level physics requirements of any Stanford major. Both cover the same topics in three terms, but the 60 series is intended for those who have already taken a Physics course at the level of the 50 series, or at least have a strong background in mechanics as well as a strong background in calculus. The 50 series begins with the topics of light and heat in PHYSICS 51 and proceeds to mechanics in 53 and electromagnetism and 55. It is recommended that most students begin this sequence in the Winter Quarter with mechanics in PHYSICS 53. Only those who have had strong physics preparation in high school (e.g., a score of at least 4 on the Physics Advanced Placement B or C exam) are recommended to start with PHYSICS 51 in Autumn Quarter.

**BACHELOR OF SCIENCE**

A calculus-based entry level series is required, either PHYSICS 61, 63, 64, 65, and 67 or 51, 52, 53, 55, and 56 (or preferably 67 rather than 56). In addition, the following more advanced courses are required: 70, 105, 107 (WIM), 108, 110, 120, 121, 130, 131, 170, and 171; MATH 51, 52, 53, 131; one additional Mathematics course numbered 100 or higher, or PHYSICS 112. MATH 51H, 52H, and 53H may substitute for MATH 51, 52, and 53. It is strongly recommended that students intending to complete a Ph.D. in Physics also take PHYSICS 113, 134 and one or more of the following, depending upon their interests: 160, 161, 172, 181, 204 and/or 262. PHYSICS 113 is designed to be taken in parallel with 110. The department advises the study of some computer science, for example, CS 106. Mathematics and Physics courses taken to satisfy the department’s major requirements cannot be taken on a credit/no credit basis. Prospective Physics majors are also recommended to take PHYSICS 59, Current Research Topics.

To decide which introductory sequence is appropriate, students contemplating majoring in Physics are urged to consult with the instructor of PHYSICS 61 or 51, or the Undergraduate Program Coordinator, at the earliest possible date to see which sequence is the most suitable. Students who begin taking an entry level Physics course after their freshman year and wish to major in Physics are generally advised to take the PHYSICS 61, 63, 65 sequence, provided they have previously taken MATH 41.

Undergraduates are offered help with physics problems in the department tutoring center, the Reference Frame, which is staffed Monday through Thursday.

* These courses are not required, but 113, 134, and 290 are recommended for students who intend to complete a Ph.D. in Physics.

**CONCENTRATION IN PHYSICS**

The primary purpose of concentrations in the Physics major is to provide consistent and more formal advising to students who want to concentrate in a particular area of physics during their undergraduate education, or prepare for future studies (e.g., graduate studies) in a particular area of physics. Physics majors are not required to choose a concentration and a concentration does not add any formal requirements to the Physics major. Upon graduation, students will receive a certificate of completion of a concentration.

Students seeking further advice on a given concentration should contact the professor whose name appears next to the respective title of each section below.

**A. THEORETICAL PHYSICS (Andrei Linde)**

At least four, one quarter courses selected from the following courses, or three courses plus an honors thesis:

Course No. and Subject

- PHYSICS 204. Advanced Seminar in Theoretical Physics
- PHYSICS 212. Statistical Mechanics
- PHYSICS 230, 231, 232. Quantum Mechanics
- PHYSICS 252. Introduction to High Energy Physics
- PHYSICS 260. Introduction to Astrophysics and Cosmology
- PHYSICS 262. Introduction to Gravitation
- PHYSICS 330, 331, 332. Quantum Field Theory
- PHYSICS 351, 352. Elementary Particle Physics
- PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology
- PHYSICS 364. Advanced Gravitation

Notes to students taking this concentration:

1. No more than one of the courses should be taken for CR/NC.
2. Students should take either the undergraduate Quantum Mechanics series (PHYSICS 130-132) or the graduate series (PHYSICS 230-232), but not both for credit.
3. Students should discuss the choice of courses with members of the Institute for Theoretical Physics and/or their major adviser.

**B. APPLIED PHYSICS (Hari Manoharan)**

At least four, one quarter courses selected from the following courses, or three courses plus an honors thesis:

**Solid State:**

- APPPHYS 172. Physics of Solids I
- APPPHYS 270. Magnetism and Long Range Order in Solids
- MATSCI 195. Waves and Diffraction in Solids

**Biophysics:**

- APPPHYS 192. Introductory Biophysics

**Lasers:**

- PHYSICS 181. Introduction to Modern Optics
- APPPHYS 231A. Introduction to Lasers

**Lab Methods:**

- APPPHY 207, 208. Laboratory Electronics, Analog and Digital
- APPPHY 304. Lasers Laboratory

**C. BIOPHYSICS (David Goldhaber-Gordon)**

We recommend that Physics majors interested in pursuing a career in biophysics consider a minor in Biological Sciences.
D. ASTROPHYSICS (Roger Romani, Sarah Church)

Requirements:
PHYSICS 100. Introduction to Observational and Laboratory Astronomy
PHYSICS 160. Introduction to Stellar and Galactic Astrophysics
PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology

Plus one elective from below or an honors thesis:
PHYSICS 211. Continuum Mechanics
PHYSICS 260. Introduction to Astrophysics and Cosmology
PHYSICS 262. Introduction to Gravitation
PHYSICS 312. Basic Plasma Physics
(prerequisites are PHYSICS 210 and PHYSICS 220)

E. GEOPHYSICS (Rosemary Knight, Geophysics)

At least four, one quarter courses selected from the following courses,
or three courses plus an honors thesis:
GEOPHYS 102. Geophysics
GEOPHYS 112. Exploring Geosciences with MATLAB
GEOPHYS 140. Introduction to Remote Sensing
GEOPHYS 150. General Geophysics and Physics of the Earth
GEOPHYS 180. Geophysical Inverse Problems
GEOPHYS 182. Reflection Seismology
GEOPHYS 190. Near-Surface Geophysics
GEOPHYS 262. Rock Physics
GEOPHYS 288. Crustal Deformation

INDIVIDUALLY DESIGNED MAJOR PROGRAM IN TEACHING PHYSICAL SCIENCE

This major, a joint effort of the Department of Physics and the Stanford Teacher Education Program, is designed for students to prepare themselves as high school teachers of physics and general science. Students complete 45-47 units of Physics and related Mathematics courses, 40-43 units of course work in other sciences such as the life sciences, chemistry, and geosciences, and in general issues of science, and 9-15 units of concentration and depth courses. Total program units. 94-105.

Students interested in this program should consult Professor Patricia Burchat, Director of Undergraduate Studies in Physics (burchat@stanford.edu, 725-5771), and Frederic Stout, coordinator of the STEP Criterial Terminal Program in the School of Education (fstout@stanford.edu, 725-6321)

CORE PHYSICS COURSES:

Course No. and Subject Qtr. and Units
Mechanics:
PHYSICS 53. Mechanics 4
  or PHYSICS 61. Advanced Freshman Physics I 5
Heat:
PHYSICS 51. Light and Heat 2
PHYSICS 52. Light and Heat Lab 4
Electricity and Magnetism:
PHYSICS 65. Advanced Freshman Physics III 2
  or
PHYSICS 67. Advanced Freshman Physics Lab 5-6
Electricity and Magnetism:
PHYSICS 67. Advanced Freshman Physics Lab 5-6
  or
PHYSICS 63. Advanced Freshman Physics II 2
PHYSICS 64. Electricity and Magnetism Lab 3
  and
PHYSICS 105. Electronics for Physicists (Lab) 8-9
Wave Motion:
PHYSICS 107. Laboratory Seminar. Optics (WIM) 3
Modern Physics:
PHYSICS 70. Modern Physics 4
Applications:
PHYSICS 59. Current Research Topics 2
Mathematics (Physics-departmental requirement):
MATH 51, 52, 53. Multivariable Calculus 2
a course in Statistics (choose one):
STATS 110. Statistical Methods in Engineering and the Physical Sciences
STATS 116. Theory of Probability
STATS 141. Biostatistics
STATS 166. Statistical Methods in Computational Genetics
STATS 191. Introduction to Applied Statistics 18-20
Total .......................................................... 45-47

ADDITIONAL SCIENCE BREADTH COURSES

Life Sciences:
BIOSCI 41. Evolution, Genetics, and Ecology 12
BIOSCI 42. Biochemistry, Molecular Biology, and Cell Biology 12
BIOSCI 43. Development and Physiology of Organisms 12
HUMBIO 2A,B. 3A,B. 4A,B
Chemistry:
CHEM 31. Chemical Principles 2
CHEM 33. Structure and Reactivity 8
Geosciences:
EARTH SYS 10. Introduction to Earth Systems 5
PHYSICS 15. The Nature of the Universe 5
PHYSICS 16. Cosmic Horizons 8

General Issues of Science:
STS 101. Science, Technology, and Contemporary Society 6
or HUMBIO 25, 35, 45
HUMBIO 2S, 3S, 4S
and EDUC 180. Directed Reading in History of Science 3
and ENGR 103. Public Speaking and Presentation Development 3

CONCENTRATION AND DEPTH COURSES

3 courses (100 level or above) in a single area of concentration 9-15
Total units for the Physical Science program ........................................ 94-105

This individually designed major program in Physical Science includes all the elements of a Program of Subject Matter Preparation for Secondary Teachers of Physics and General Science that has been approved by the California Commission on Teacher Credentialing (CCTC). Students who complete the program are exempt from taking the CSET examination in Physics and General Science for admission to the Stanford Teacher Education Program (STEP) or any other accredited secondary teacher education program in California. Full details of the CCTC-approved program may be found at http://ed.stanford.edu/suse/programs-degrees/program-co-terminal-step.html. Note: the Stanford individually designed major program in Physical Science requires course work beyond the CCTC-approved program, specifically 9-15 units of depth courses in a field of concentration: Physics, Astrophysics, Biological Sciences, Chemistry, Earth Sciences, Human Biology, or Computational Mathematics. See the adviser in the Physics department or the School of Education for more details.

MINORS

Students who take the 20 or 50 series at Stanford in support of their major may count those units toward the minor. Those who have fulfilled Physics requirements at the 20 or 50 series level by enrollment at another accredited university, or through advanced placement credits, may count credits toward 21 and 23, or 53 and 55, respectively. 25/26, or 51/52 for a technical minor, should be taken at Stanford even if similar material has been covered elsewhere. With the 21/23 or 53/55 exception noted above, all courses for the minor must be taken at Stanford University for a letter grade, and a grade of “C” or better must be received for all units applied toward the minor. The minor declaration deadline is three quarters before graduation, i.e., beginning of Autumn Quarter if the student is graduating at the end of Spring Quarter.

MINOR IN PHYSICS

An undergraduate minor in Physics requires the following course work:

Non-Technical—For students whose majors do not require the PHYSICS 50 or 60 series:
Course No. Units
PHYSICS 21, 22, 23, 24, 25, and 26 12
Any combination of Physics courses totaling 15 units or greater 15
Total .......................................................... 27

Technical—For students whose majors require the PHYSICS 50 or 60 series:
Course No. Units
PHYSICS 51/52, 53, 55/56 or PHYSICS 61, 63/64, 65/67 14-15
PHYSICS 70 4
Any three courses above PHYSICS 100 9-12
Total .......................................................... 2-15
MINOR IN ASTRONOMY

Students wishing to pursue advanced work in astrophysical sciences should major in physics and concentrate in astrophysics. However, students outside of physics with a general interest in astronomy may organize their studies by completing one of the following minor programs:

An undergraduate minor in astronomy requires the following courses:

Non-Technical—For students whose majors do not require the PHYSICS 50 series:

Course No.                  Units
PHYSICS 21, 23, 25/26       10
PHYSICS 50 or 100 (Observatory Lab)  3-4

Choose two courses from the following:

PHYSICS 15, 16, 17, 18      6

Total .................................................... 19-20 (9-10 in addition to the 20 series)

Technical—For students whose majors require the PHYSICS 50 series:

Course No.                  Units
PHYSICS 51/52, 53, 55       13
PHYSICS 70                  4
PHYSICS 100 (Observatory Lab)  4

Choose two courses from the following:

PHYSICS 160,* 161,* 164*          6

Total ............................................................ 27 (14 in addition to the 50 series)

* With approval of the minor adviser and the chair of the Astronomy Course Program, 3 units of PHYSICS 169, Independent Study in Astrophysics, may be substituted for one course of astronomy (e.g., 160, 161, 164). This independent study can either be constituted as a directed reading program or participation in a research project. Students are also strongly encouraged to take the electricity and magnetism/optics lab of the appropriate Physics series (24, 56) for 1 additional unit.

To be accepted to the minor program, the student must obtain an adviser from the faculty in the Astronomy Course Program.

HONORS PROGRAM

The department offers a program leading to the degree of Bachelor of Science in Physics with Honors as follows:

1. Students must submit an Honors Program Proposal to the Undergraduate Program Coordinator once they find a physics project, either theoretical or experimental, in consultation with individual faculty members. Proposal forms are available from the Physics Undergraduate Center and must be submitted by November 1 of the year in which the students’ degree will be conferred.

2. Credit for the project is assigned by the adviser within the framework of PHYSICS 205. The work done in the honors program may not be used as a substitute for regularly required courses.

3. Both a written report and a presentation of the work at its completion is required for honors. By mid-May, each honors candidate is required to present his or her project at the department’s Honors Presentations. (This event is publicized and is open to the general public. The expectation is that the student’s adviser, second reader, and all other honors candidates attend.)

4. The decision as to whether a given independent study project does or does not merit award of honors is made jointly by the student’s honors adviser and the second reader for the written thesis. This decision is based on the quality of both the honors work and the other work in physics.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The department does not offer a coterminal degree program, or a separate program for the M.S. degree, but this degree may be awarded for a portion of the Ph.D. degree work.

University requirements for the master’s degree, discussed in the “Graduate Degrees” section of this bulletin, include registration for at least three quarters at full tuition as a graduate student and completion of 36 units of course work after the bachelor’s degree. Among the department requirements are a grade point average (GPA) of at least 3.0 (B) in courses 210, 211, 212, 220, 221, 230, 231, 232, or their equivalents. Up to 6 of these required units may be waived on petition if a thesis is submitted.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin. The minimum department requirements for the Ph.D. degree in Physics consist of completing all courses listed below, and at least one quarter from each of two subject areas (among condensed matter, quantum optics and atomic physics, astrophysics and gravitation, and nuclear and particle physics) chosen from courses with numbers above 232, except 290 and 294. The requirements in the following list may be fulfilled by passing the course at Stanford or passing an equivalent course elsewhere: 210 or 211, 220, 221, 230, 231, 290, 294. A grade point average (GPA) of at least 3.0 (B) is required in all the courses taken toward the degree.

All Ph.D. candidates must have math proficiency equivalent to the following Stanford math courses: 106, 113, 114, 131, 132.

Prior to making an application for candidacy, each student is required to pass a comprehensive qualifying examination on undergraduate physics. This closed book exam is given in the month of January immediately following the student’s arrival at Stanford. This is a written examination held over two days, covering particle mechanics, electricity and magnetism, quantum mechanics, statistical mechanics, thermodynamics, special relativity, and general physics. A thesis proposal must be submitted during the third year. In order to assess the direction and progress toward a thesis, an oral report and evaluation are required during the fourth year. After completion of the dissertation, each student must take the University oral examination (defense of dissertation). Three quarters of teaching (including a demonstrated ability to teach) are a requirement for obtaining the Ph.D. in Physics.

Students interested in applied physics and biophysics research should also take note of the Ph.D. granted independently by the Department of Applied Physics and by the Biophysics Program. Students interested in astronomy, astrophysics, or space science should also consult the “Astronomy Course Program” section of this bulletin.

PH.D. MINOR

Minors in Physics must take at least six courses numbered 210 to 232 among the 20 required units. All prospective minors must obtain approval of their Physics course program from the Physics Graduate Study Committee at least one year before award of the Ph.D.

FELLOWSHIPS AND ASSISTANTSHIPS

The Department of Physics makes an effort to support all its graduate students through fellowships, teaching assistantships, research assistantships, or a combination of sources. Information on application procedures is mailed with the admission information.

TEACHING CREDENTIALS

For information on teaching credentials, consult the “School of Education” section of this bulletin or address an inquiry to the Credential Administrator, School of Education.
There are four series of beginning courses. One course from the teen series (11, 15, 16, 17, 19) is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics. The 20 series (21, 22, 23, 24, 25, 26) is recommended for general students and for students preparing for medicine or biology. The 50 series (51, 52, 53, 55, 56) is for students of engineering, chemistry, geology, mathematics, or physics. The advanced freshman series (61, 63, 64, 65, 67) is for the well-prepared student and is the preferred introductory series for those Physics majors who have the appropriate background.

Both the 20 and 50 series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments correlated to the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the two series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the 50 series.

Courses beyond 99 are numbered in accordance with a three-digit code. The first digit indicates the approximate level of the course:
- 100 undergraduate courses
- 200 first-year graduate courses
- 300 more advanced courses
- 400 research, special, or current topics

The second digit indicates the general subject matter:
- 00 laboratory
- 10, 20, 30 general courses
- 40 nuclear physics
- 50 elementary particle physics
- 60 astrophysics, cosmology, gravitation
- 70 condensed matter physics
- 80 optics and atomic physics
- 90 miscellaneous courses

### ASTRONOMY

For further information on astronomy and astrophysics courses, consult the Astronomy Course Program.

**PHYSICS 15, 16, 17. Topics in Modern Astronomy**—Designed for, but not restricted to, undergraduates not majoring in the physical sciences. Emphasis is on aspects of modern astronomy, astrophysics, and cosmology. No mathematics beyond algebra used. Courses may be taken individually or in sequence.

**PHYSICS 15. The Nature of the Universe**—Introduction to the structure, origin, and evolution of the major components of the Universe: planets, stars, and galaxies. Emphasis is on the formation of the Sun and planets, the evolution of stars, and the structure and content of our galaxy. Topics: cosmic enigmas (dark matter, black holes, pulsars, x-ray sources), star birth and death, and the origins of and search for life in our solar system and beyond. GER:2a

3 units, Win (Cabrera)

**PHYSICS 16. Cosmic Horizons**—Introduction to the origin and evolution of our universe and its contents: stars, galaxies, quasars. The overall structure of the cosmos and the physical laws that govern matter, space, and time. Topics include the evolution of the cosmos from its primeval fireball, the origin of the elements and the formation of stars and galaxies, exotic astronomical objects (black holes, quasars, supernovae, and gamma ray bursts), dark matter, and the fate of the cosmos. GER:2a

3 units, Aut (Romani)

**PHYSICS 17. Black Holes**—Newton’s and Einstein’s theories of gravitation and their relationship to the predicted properties of black holes. Their formation and detection, and role in galaxies and high-energy jets. Hawking radiation and aspects of quantum gravity. GER:2a

3 units, Spr (Blandford, Wagoner)

**PHYSICS 50. Astronomy Laboratory and Observational Astronomy**—Introduction to observational astronomy with emphasis on the use of optical telescopes. Observations of stars, nebulae, and galaxies are pursued during laboratory sessions with 16- and 24-inch telescopes at the Stanford Observatory. Lectures and analysis are descriptive; no calculations or previous physics required. Limited enrollment. Lab. GER:2a

3 units, Aut (Church)

**PHYSICS 85Q. Cosmology in the 21st Century**—Stanford Introductory Seminar. Preference for sophomores. Current topics at the frontier of research in cosmology including dark matter, dark energy, the cosmic microwave background, inflation, matter-antimatter asymmetry, and the origin of the big bang.

1 unit, Spr (Thomas)

**PHYSICS 100. Introduction to Observational and Laboratory Astronomy**—Introduction to observational techniques in astronomy for physical science or engineering students. Emphasis is on the quantitative measurement of fundamental astronomical parameters such as distance, temperature, mass, composition of stars, galaxies, and quasars. Lecture and observation using the 0.4m and 0.6m telescopes at the Stanford Observatory. Limited enrollment. Prerequisites: one year of physics; prior or concurrent registration in 25, 65, or 70; and consent of instructor. GER:2a

4 units, Spr (Romani)

**PHYSICS 160. Introduction to Stellar and Galactic Astrophysics**—Physics of the sun. Evolution and death of stars. White dwarfs, novae, planetary nebulae, supernovae, neutron stars, pulsars, binary stars, x-ray stars, and black holes. Galactic structure: interstellar medium, molecular clouds, HI and HII regions, star formation and element abundances. Prerequisites: calculus and one year of college physics at the level of the PHYSICS 50 series or equivalent.

3 units, Win (Romani)

**PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology**—Observations of the distances and compositions of objects on cosmic scales: galaxies, galaxy clusters, quasars, and diffuse matter at high redshift. Big bang cosmology, physical processes in the early universe, the origin of matter and the elements, inflation, and creation of structure in the universe. Observational evidence for dark matter and dark energy. Future of the universe. Prerequisites: calculus and one year of college physics at the level of the PHYSICS 50 series.

3 units, Win (Romani)

3 units, Aut (Lissauer)

**PHYSICS 169A, B, C. Independent Study in Astrophysics and Honors Thesis**—Detailed study of a problem in astrophysics with one or more faculty members. While not all projects require three quarters, the sequence below suggests the format most projects are expected to follow. Projects may commence in Autumn, Winter, Spring, or Summer.

1-9 units, Aut (Staff)

**PHYSICS 169A. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem**—Selection of the problem to be studied and development of the theoretical apparatus or initial interpretation of the selected problem. Preparation of a detailed description of the problem and its background and a comprehensive discussion of the work planned in the subsequent two quarters.

1-9 units, Aut (Staff)

**PHYSICS 169B. Independent Study in Astrophysics and Honors Thesis: Continuation of Project**—Substantial completion of the required computations or data analysis for the research project.

1-9 units, Win (Staff)
PHYSICS 169C. Independent Study in Astrophysics and Honors Thesis: Completion of Project—Completion of research and writing of a detailed paper presenting methods used and results.
1-9 units, Spr (Staff)

PHYSICS

PHYSICS 11N. The Basic Rules of Nature—Stanford Introductory Seminar. Preference to freshmen. Physicists have developed successful descriptions of the basic behavior of matter on microscopic scales (inner space) and on scales characteristic of the universe as a whole (outer space). Despite these successes, deep mysteries remain. Elements of these successful descriptions including quantum mechanics, particle physics, and general relativity. Remaining mysteries and the leading approaches that physicists hope will unravel them including string theory and M theory. Discussions are semiquantitative. Term project paper. Prerequisite: high school physics or equivalent. GER:2a
3 units, Aut (Shenker)

PHYSICS 18N. Revolutions in Concepts of the Cosmos—Stanford Introductory Seminar. Preference to freshmen. Physicists have developed successful descriptions of the basic behavior of matter on microscopic scales (inner space) and on scales characteristic of the universe as a whole (outer space). Despite these successes, deep mysteries remain. Elements of these successful descriptions including quantum mechanics, particle physics, and general relativity. Remaining mysteries and the leading approaches that physicists hope will unravel them including string theory and M theory. Discussions are semiquantitative. Term project paper. Prerequisite: high school physics or equivalent. GER:2a
3 units, Spr (Wojcicki)

PHYSICS 19. How Things Work: An Introduction to Physics—Examines familiar objects such as microwave oven, refrigerator, and pop-up toaster, and uses them to present basic principles of physics in an approachable and understandable context. Emphasis on developing an intuitive perspective. Make estimates of real quantities from simple calculations. Prerequisite: high school algebra and trigonometry. GER:2a
3 units, Win (I. R. Fisher)

PHYSICS 21. Mechanics and Heat—For biology, social science, and premedical students. Introduction to Newtonian mechanics, fluid mechanics, theory of heat. Calculus is used as a language and developed as needed. Prerequisite: working knowledge of elementary algebra and trigonometry. GER:2a
3 units, Aut (Wojcicki)

PHYSICS 21S. Mechanics and Heat with Laboratory—Equivalent to 21 and 22. GER:2a
4 units, Sum (G. Fisher)

PHYSICS 22. Mechanics and Heat Laboratory—Pre- or corequisite: 21. 1 unit, Aut (Staff)

PHYSICS 23. Electricity and Optics—Electric charges and currents, magnetism, induced currents; wave motion, optics; interference, diffraction, geometrical optics. Prerequisite: 21. GER:2a
3 units, Win (Church)

PHYSICS 24. Electricity and Optics Laboratory—Pre- or corequisite: 23. 1 unit, Win (Staff)

PHYSICS 25. Modern Physics—Introduction to modern physics. Relativity, quantum mechanics, atomic theory, radioactivity, nuclear reactions, nuclear structure, high energy physics, elementary particles, astrophysics, stellar evolution, and the big bang. Prerequisite: 23 or consent of instructor. GER:2a
3 units, Spr (Linde)

PHYSICS 25S. Modern Physics with Laboratory—Equivalent to 25 and 26. GER:2a
4 units, Sum (G. Fisher)

PHYSICS 26. Modern Physics Laboratory—Pre- or corequisite: 25. 1 unit, Spr (Staff)

PHYSICS 28. Mechanics, Heat, and Electricity—For biology, social science, and premedical students. The sequence 28 and 29 fulfills, in ten weeks, the one-year college physics requirement with lab of most medical schools. Topics: Newtonian mechanics, fluid mechanics, theory of heat, electric charges, and currents. Calculus is used as a language and developed as needed. Prerequisite: working knowledge of elementary algebra and trigonometry. GER:2a
6 units, Sum (G. Fisher)

PHYSICS 29. Electricity and Magnetism, Optics, Modern Physics—Magnetism, induced currents; wave motion, optics; relativity, quantum mechanics, atomic theory, radioactivity, nuclear structure and reactions, elementary particles, astrophysics, and cosmology. Prerequisite: 28. GER:2a
6 units, Sum (G. Fisher)

PHYSICS 51. Light and Heat—Reflection and refraction, lenses and lens systems; polarization, interference, and diffraction; temperature, properties of matter, introduction to kinetic theory of matter. Prerequisites: high school physics or 53, and MATH 19 or 41, or consent of instructor. GER:2a
4 units, Aut (Mitchelson)

PHYSICS 51N. Advanced Topics in Light and Heat—Stanford Introductory Seminar. Preference to freshmen. Expands on the subject matter presented in 51 to include optics and thermodynamics in our everyday lives, and applications in the research laboratory. Corequisite: 51 or advanced placement.
1 unit, Aut (Manoharon)

PHYSICS 52. Light and Heat Laboratory—(Formerly 48.) Pre- or corequisite: 51.
1 unit, Aut (Staff)

PHYSICS 53. Mechanics—Vectors, particle kinematics and dynamics, work, energy, momentum, angular momentum; conservation laws; rigid bodies; mechanical oscillations and waves. Discussions based on use of calculus. Corequisite: MATH 19 or 41, or consent of instructor. GER:2a
4 units, Win (Burchat)

1 unit, Win (Burchat)

PHYSICS 55. Electricity and Magnetism—Electrostatics, including fields, potentials, capacitors, and dielectrics. Steady state currents, and circuits with batteries and resistors. RC circuits. Time varying currents and fields, inductance, Maxwell’s equations. Prerequisites: 53, and MATH 19 or 41. Corequisite: MATH 20 or 42, or consent of instructor. GER:2a
4 units, Spr (Osheroff)

PHYSICS 56. Electricity and Magnetism Lab—(Formerly 46.) Pre- or corequisite: 55.
1 unit, Spr (Staff)

PHYSICS 59. Current Research Topics—Recommended for all prospective physics majors. Major areas of current research. Topics: fundamental particles, solid state physics, low temperature physics, biophysics, and astrophysics. Lectures by faculty and physicists with research interests in these fields.
1 unit, Aut (Burchat)
PHYSICS 61,63,65. Advanced Freshman Physics—Recommended for students contemplating a major in Physics and other students interested in a more rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, Lagrangian mechanics, special relativity, and electricity and magnetism; topics in heat and light in Spring Quarter. Lectures and small discussion sections. Diagnostic quiz in calculus and conceptual Newtonian mechanics at first meeting of 61 to help students decide if course is appropriate; instructor may suggest some students would benefit more from the 50 series. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable); prior or concurrent registration in MATH 42, 61, 63, 65 each satisfy GER:2a

PHYSICS 61. Advanced Freshman Physics: Mechanics
4 units, Aut (Goldhaber-Gordon)

PHYSICS 63. Advanced Freshman Physics: Electromagnetism
4 units, Win (Goldhaber-Gordon)

PHYSICS 65. Advanced Freshman Physics: Thermodynamics and Optics
4 units, Spr (Zhang)

1 unit, Aut (Gratta)

1 unit, Win (Thomas)

PHYSICS 64. Advanced Electromagnetism Laboratory—Experimental work in mechanics, electricity and magnetism. Corequisite 63.
1 unit, Win (Staff)

PHYSICS 65N. Applications of Thermodynamics and Optics—Stanford Introductory Seminar. Preference to freshmen. Possible topics include failure of classical statistical physics and the introduction of quantum ideal gases, entropy and information theory, phase transitions, statistical mechanics of photons, and simple transport phenomena. Corequisite: 65. GER:2a
4 units, Spr (Kapitulnik)

2 units, Spr (Fisher)

PHYSICS 70. Modern Physics—Relativity, the experimental basis of quantum theory, Schrödinger equation, atomic structure, nuclear structure, high energy physics, elementary particles. Prerequisite: 50 or 60 series. Recommended: prior or concurrent registration in MATH 53 or 130. GER:2a
4 units, Aut (Kaseевич)

PHYSICS 80N. The Technical Aspects of Photography—Stanford Introductory Seminar. Preference to freshmen. How cameras record photographic images on film and electronically. The technical photographic processes needed to use cameras effectively. Camera types and advantages, how lenses work and their limitations, shutters, light meters and the proper exposure of film, film types, depth of focus, focal plane and perspective, and special strategies for macro and night photography. View cameras and range finder technical cameras. Students exploit the flexibility of these formats to take photographs around campus. Prerequisite: elementary physics; some background in photography.
3 units, Win (Osheroff)

PHYSICS 83N. Physics in the 21st Century—Stanford Introductory Seminar. Preference to freshmen. Current topics at the frontier of modern physics. Topics include subatomic particles and the standard model, symmetries in nature, extra dimensions of space, string theory, supersymmetry, the big bang theory of the origin of the universe, black holes, dark matter, and dark energy of the universe. Why does the sun shine; cosmology and inflation. GER:2a
3 units, Win (Dimopoulos)

PHYSICS 85Q. Cosmology in the 21st Century—Stanford Introductory Seminar. Preference to sophomores. Current topics at the frontier of research in cosmology including dark matter, dark energy, the cosmic microwave background, inflation, matter-antimatter asymmetry, and the origin of the big bang.
1 unit, Spr (Thomas)

PHYSICS 105,107,108. Intermediate Physics Laboratory Sequence—Sequence in experimental techniques required of all Physics majors.

PHYSICS 105. Intermediate Physics Laboratory I: Analog Electronics—Analog electronics, from Ohm’s Law and passive circuits to transistor and op amp circuits, with an emphasis on developing practical circuit design skills to prepare undergraduates for laboratory research. Course culminates in a short design project. Minimal use of math and physics, no prior electronics experience assumed beyond introductory physics. Prerequisite: PHYSICS 55 or 63 or other introductory electricity and magnetism course.
3 units, Aut (Pam)

PHYSICS 107. Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis—Experiments on lasers, Gaussian optics, and atom-light interaction, with emphasis on data and error analysis techniques. Students describe a subset of experiments in scientific paper format. Prerequisites: 50 or 60 series, 70, and 105. Recommended: 130, prior or concurrent enrollment in 120. WIM
4 units, Win (Kaseевич)

3 units, Spr (Moler)

PHYSICS 110. Intermediate Mechanics—The mechanics of systems of particles and rigid bodies. Newtonian mechanics; linear and nonlinear oscillations; Hamilton’s principle, Lagrangian and Hamiltonian dynamics; central forces, planetary motion; collisions; non-inertial reference systems; rigid body dynamics; coupled oscillations; and introductory fluid mechanics oscillations. Prerequisites: 53 or 61, and MATH 53 or 130.
4 units, Spr (Gratta)

PHYSICS 112. Mathematical Methods of Physics—Theory of complex variables, complex functions, and complex analysis. Fourier series and Fourier transforms. Special functions such as Laguerre, Legendre, and Hermite polynomials, and Bessel functions. The uses of Green’s functions. Covers material of MATH 106 and 132 most pertinent to Physics majors. Prerequisites: MATH 50 or 50H series, MATH 131.
4 units, Win (Fetter)

PHYSICS 113. Computational Physics—Introduction to numerical methods for solving problems in mechanics, electromagnetism, quantum mechanics, and statistical mechanics. Methods include numerical integration; solutions of ordinary and partial differential equations; solutions of the diffusion equation, Laplace’s equation and Poisson’s equation with relaxation methods; statistical methods including Monte Carlo techniques; matrix methods and eigenvalue problems. Short introduction to MatLab, used for class examples; class projects may be programmed in any language such as C. Prerequisites: 110, 121, and MATH 53 or 130. Previous programming experience not required.
4 units, Spr (Cabrera)

PHYSICS 120,121. Intermediate Electricity and Magnetism—Vector analysis, electrostatic fields, including multiple expansion; dielectrics. Special relative and transformation between electric and magnet-
ic fields. Maxwell’s equations. Static magnetic fields, magnetic materials. Electromagnetic radiation, plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation. Wave guides and cavities. Prerequisites: 55 or 63; concurrent or prior registration in MATH 53 and 131 for 120 and 121, respectively. Recommended: concurrent or prior registration in 112.

PHYSICS 120. 4 units, Win (Thomas)

PHYSICS 121. 4 units, Spr (Shen)

PHYSICS 130, 131. Quantum Mechanics—The origins of quantum mechanics, wave mechanics, and the Schrödinger equation. Heisenberg’s matrix formulation of quantum mechanics, solutions to one-dimensional systems, separation of variables and the solution to three-dimensional systems, the central field problem and angular momentum eigenstates, spin and the coupling of angular momentum, Fermi and Bose statistics, time-independent perturbation theory. Prerequisites: 70, 110; concurrent or prior registration in 120, 121, and MATH 131.

PHYSICS 130. 4 units, Aut (Silverstein)

PHYSICS 131. 4 units, Win (Silverstein)

PHYSICS 152. Introduction to High Energy Physics—(Graduate students register for 252.) The standard model of particle physics; unified weak and electromagnetic interactions; quantum chromodynamics and strong interactions; flavor violating processes; grand unified theories; and early cosmology and baryogenesis. Prerequisite: 121.

PHYSICS 170, 171. Thermodynamics, Kinetic Theory, and Statistical Mechanics—The derivation of laws of thermodynamics from basic postulates; the determination of the relationship between atomic substructure and macroscopic behavior of matter. Temperature; equations of state, heat, internal energy; entropy; reversibility; applications to various properties of matter; absolute zero and low-temperature phenomena. Distribution functions, transport phenomena, fluctuations, equilibrium between phases, phase changes, the partition function for classical and quantum systems, Bose-Einstein condensation, and the electron gas. Cooperative phenomena including ferromagnetism, the Ising model, and lattice gas. Irreversible processes. Prerequisites: 51 or 65, and MATH 53 or 130.

PHYSICS 170. 4 units, Aut (Zhang)

PHYSICS 171. 4 units, Win (Zhang)

PHYSICS 172. 3 units, Spr (I. R. Fisher)

PHYSICS 173. Magnetism and Long Range Order in Solids—(Enroll in APPPHYS 270.)

PHYSICS 173. 3 units (Fisher) not given 2004-05

PHYSICS 173B. Concepts in Condensed Matter Physics—Introduction to advanced concepts in condensed matter physics using simple, archetypical examples. Topics include interaction and correlation, emergent order and symmetry breaking, new states of matter, pattern formation, and nonlinear dynamics in material systems. Prerequisite: introductory course in solid state or condensed matter physics.

PHYSICS 181. Introduction to Modern Optics—(Enroll in EE 268.)

PHYSICS 211. Continuum Mechanics—Elasticity, fluids, turbulence, waves, gas dynamics, shocks, and MHD plasmas. Examples from everyday phenomena, geophysics, and astrophysics.

PHYSICS 212. 3 units, Spr (Thomas)

PHYSICS 215B. Numerical Methods for Physicists and Engineers—(Enroll in APPPHYS 215A.)

PHYSICS 215B. 3 units, Aut (Moler)

PHYSICS 216. Back of the Envelope Physics—Techniques to make order-of-magnitude estimates of physical effects. Goal is to sharpen physical intuition and promote a synthesis of physics through the application of undergraduate physics to problems, some not included in the standard curriculum. Techniques such as scaling and dimensional analysis. Applications include properties of materials, geophysics, astrophysics and cosmology, biomechanics, and particle physics. Prerequisites: undergraduate mechanics, statistical mechanics, electricity and magnetism, and quantum mechanics.

PHYSICS 220, 221. Classical Electrodynamics—Electrostatics and magnetostatics: conductors and dielectrics, magnetic media, electric and magnetic forces, and energy. Maxwell’s equations: electromagnetic waves, Poynting’s theorem, electromagnetic properties of matter, dispersion relations, wave guides and cavities, magneto hydrodynamics.
Special relativity: Lorentz transformations, covariant, equations of electrodynamics and mechanics, Lagrangian formulation, Noether’s theorem and conservation laws. Radiation: dipole and quadrupole radiation, electromagnetic scattering and diffraction, the optical theorem, Liénard-Wiechert potentials, relativistic Larmor’s formula, frequency and angular distribution of radiation, synchrotron radiation. Energy losses in matter: Bohr’s formula, Cherenkov radiation, bremsstrahlung and screening effects, transition radiation. Prerequisites: 121 or equivalent; MATH 106 and 132, or PHYSICS 210.

PHYSICS 220. 4 units, Aut (Fetter)
PHYSICS 221. 4 units, Spr (Church)

PHYSICS 223. Applied Quantum Mechanics II—(Enroll in EE 223.)
3 units, Win (Vuckovic)

PHYSICS 226. Physics of Quantum Information—(Enroll in APPHYCS 226.)
3 units, Win (Yamamoto) alternate years, not given 2005-06

PHYSICS 230, 231, 232. Quantum Mechanics—Prerequisites: Quantum mechanics at the undergraduate level and a strong course on differential equations.

PHYSICS 230. Quantum Mechanics—Fundamental concepts. Introduction to Hilbert spaces and Dirac’s notation. Postulates are applied to simple systems, including those with periodic structure. Symmetry operations and gauge transformation. The concept of propagators and path integral quantization. Problems related to measurement theory. The quantum theory of angular momenta and central potential problems (hydrogen, quarkonium).
3 units, Aut (Zaanen)

3 units, Win (Kivelson)

3 units, Spr (Kivelson)

PHYSICS 252. Introduction to High Energy Physics—See 152.
3 units, Win (Dimopoulos)

3 units, Aut (Petrosian)

PHYSICS 262. Introduction to Gravitation—Review of special relativity. An introduction to general relativity. Curvature, energy-momentum tensor, Einstein field equations. Newtonian limit of general relativity. Introduction to black holes, gravitational waves, cosmology. Prerequisites: 121 or other courses including special relativity.
3 units, Spr (Kallosh)

PHYSICS 272. Solid State Physics I—(Enroll in APPHYCS 272.)
3 units, Win (Manoharan)

PHYSICS 273. Solid State Physics II—(Enroll in APPHYCS 273.)
3 units, Spr (Manoharan)

PHYSICS 275. Electrons in Nanostructures—The behavior of electrons in metals or semiconductors at length scales below 1 micron, smaller than familiar macroscopic objects but larger than atoms. Ballistic transport, Coulomb blockade, localization, quantum mechanical interference, and persistent currents. Topics may include quantum Hall systems, spin transport, spin-orbit coupling in nanostructures, magnetic tunnel junctions, Kondo systems, and 1-dimensional systems. Readings focus on the experimental research literature, and recent texts and reviews. Prerequisite: undergraduate-level familiarity with quantum mechanics and solid state physics.
3 units (Goldhaber-Gordon) not given 2004-05

PHYSICS 290. Research Activities at Stanford—Required of all first-year physics graduate students and strongly suggested for junior physics majors for 1 unit; no registration needed for graduate students. Review of research activities in the department and elsewhere at Stanford at a level suitable for entering graduate students.
1-3 units, Aut (Church)

PHYSICS 291. Practical Training—Opportunity for practical training in industrial labs. Arranged by student with the research advisor’s approval. Required summary of activities, approved by the research advisor.
3 units, Sum (Staff)

PHYSICS 293. Literature of Physics—Intensive study of the literature of any special topic. Preparation, presentation of reports. If taken under the supervision of a faculty member outside the department, approval of the Physics chair required. Prerequisites: 25 units of college physics, consent of instructor.
1-15 units, Aut, Win, Spr, Sum (Staff)

PHYSICS 294. Teaching of Physics Seminar—Required of all teaching assistants in Physics concurrent with the first quarter of a teaching appointment; registration not required. Techniques of teaching physics by means of weekly seminars/discussions, simulated teaching situations, and evaluation of in-class teaching performance.
1 unit, Aut, Win, Spr (Pam)

PHYSICS 301. Astrophysics Laboratory—Seminar/lab. Astronomical observational techniques and physical models of astronomical objects. Observational component uses the 24-inch telescope at the Stanford Observatory and ancillary photometric and spectroscopic instrumentation. Emphasis is on spectroscopic and photometric observation of main sequence, post-main sequence, and variable stars. Term project developing observational equipment or software. Limited enrollment. Prerequisite: consent of instructor.
3 units, Spr (Romani)

PHYSICS 312. Basic Plasma Physics—For the nonspecialist who needs a working knowledge of plasma physics for space science, astrophysics, fusion, or laser applications. Topics: orbit theory, the Boltzmann equation, fluid equations, MHD waves and instabilities, EM waves, the Vlasov theory of ES waves and instabilities including Landau damping and quasilinear theory, the Fokker-Planck equation, and relaxation processes. Advanced topics in resistive instabilities and particle acceleration. Prerequisite: 210 and 220, or consent of instructor.
3 units, Win (Kosovichev)

PHYSICS 315. Methods in Computational Biology—(Enroll in APPHYCS 315.)
3 units (Doniach) alternate years, given 2005-06

3 units (Kasevich) not given 2004-05
PHYSICS 323. Laser Cooling and Trapping—Principles of laser cooling and atom trapping. The general treatment of optical forces on atoms, the various forms of laser cooling, atom optics and atom interferometry, ultra-cold collisions, and an introduction to Bose condensation of dilute gases. Emphasis is on the development of the general formalisms currently used to treat these topics. Applications of the cooling and trapping techniques: atomic clocks, internal sensors, measurements that address high-energy physics questions, studies of many-body effects, polymer science, and biology. Prerequisite: 231 or equivalent.

3 units (Kasevich) not given 2004-05

PHYSICS 324. Introduction to Accelerator Physics—(Enroll in APPPHYS 324.)

3 units (Siemann) alternate years, given 2005-06

PHYSICS 330,331,332. Quantum Field Theory—Introduction to the concepts and methods of quantum field theory. Prerequisites: 210, 221, 232.

3 units, Win (Peskin)

3 units, Win (Peskin)

3 units, Spr (Peskin)

PHYSICS 351. Elementary Particle Physics: Introduction to the Standard Model—Theory of electroweak interactions, electroweak unification, neutral flavor conservation, GIM mechanism. Theory of strong interactions, QCD confinement. Specialized topics chosen by the instructor.

3 units (Dimopoulos) not given 2004-05

3 units, Win (Vogel)

PHYSICS 360. Physics of Astrophysics—Theoretical concepts and tools for modern astrophysics. Radiation transfer equations; emission, scattering, and absorption mechanisms: Compton, synchrotron and Bremsstrahlung processes; photoionization and line emission. Equations of state of ideal, interacting, and degenerate gasses. Application to astrophysical sources such as III regions, supernova remnants, cluster of galaxies, and compact sources such as accretion disks, X-ray, gamma-ray, and radio sources. Prerequisites: 121, 171 or equivalent.

3 units, Aut (Madejski)

PHYSICS 361. Stellar and Galactic Astrophysics—Basic astronomical data on stars, star clusters, interstellar medium, and the Milky Way galaxy. Basic theory of stellar structure; hydrostatic equilibrium, radiation balance, and energy production. Stellar formation, Jean’s mass, and protostars. Evolution of stars to the main sequence and beyond to red giants, white dwarfs, neutron stars, and black holes. Structure of the Milky Way; the disk and spiral arms, central bulge or bar, black hole, the halo, and mass of the galaxy. Prerequisites: 221, and 260 or 360.

3 units, Win (Petrosian)

PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology—Basic observational data on the content and activities of galaxies, the content of the universe, the cosmic microwave background radiation, gravitational lensing, and dark matter in the universe. Models of the origin, structure, and evolution of the universe based on the theory of general relativity. Test of the models and nature of dark matter and dark energy. Physics of the early universe, inflation, baryosynthesis, nucleosynthesis, and galaxy formation. Prerequisites: 210, 211, 260 or 360.

3 units, Spr (Wagoner, Blandford)

3 units (Kosovichev) not given 2004-05

3 units, Aut (Linde)

3 units (Zhang) not given 2004-05

PHYSICS 372. Condensed Matter Theory I—(Enroll in APPPHYS 372.)

3 units (Staff) not given 2004-05

PHYSICS 373. Condensed Matter Theory II—(Enroll in APPPHYS 373.)

3 units (Staff) not given 2004-05

3 units (Laughlin) not given 2004-05

PHYSICS 377. Literature of Condensed Matter Physics—Key discoveries in condensed matter physics in the past 15 years, with emphasis on experiment. Topics: sliding charge density waves in layer compounds, the first pressure-induced Mott transition and organic superconductor, the discovery of superfluid 3He, quasicrystals, the Shervin effect, the Quantum Hall effect, and reentrant superconductivity. Journal club format with presentations by students. Offered occasionally.

3 units (Staff) not given 2004-05

PHYSICS 383. Introduction to Atomic Processes—(Enroll in APPPHYS 383.)

3 units (S. Harris) alternate years, given 2005-06

PHYSICS 387. Quantum Optics and Measurements—(Enroll in APPPHYS 387.)

3 units (Yamamoto) alternate years, given 2005-06
PHYSICS 388. Mesoscopic Physics and Nanostructures—(Enroll in APPPHYS 388.)
3 units (Yamamoto) alternate years, given 2005-06

PHYSICS 392. Topics in Molecular Biophysics—(Enroll in APPPHYS 392.)
3 units, Spr (Doniach) alternate years, not given 2005-06

PHYSICS 450-451,452. Theoretical Physics of Particles and Fields—Advanced topics in theoretical high-energy physics. Topics change by quarter and year to provide a background in all areas of current theoretical research. Prerequisite: 332.

PHYSICS 450. Introduction to Supersymmetry and Supergravity—Construction of quantum field theories with supersymmetry. Superspace, nonrenormalization theorems, supersymmetry breaking, and supergravity. Models of supersymmetry in elementary particle physics. Extended and high-dimensional supersymmetry. Supergravity in 5, 11, and other higher dimensions. Prerequisite: 332.
3 units, Aut (Kallosh)

3 units, Win (Hewett)

PHYSICS 452. Behind the Horizon—What current understanding of quantum gravity and string/M theory says about physics behind horizons. Goal is to develop areas for future research.
3 units, Aut (Kachru)

PHYSICS 453. Special Topics in Astrophysics: Experimental Cosmology—Content varies depending on interests of staff and students. Topics may include measurements of fluctuations in the cosmic microwave background, large-scale structure in the distributions of galaxies, the magnitude-redshift relation of Type 1a supernovae, the cosmic shear produced by weak gravitational lensing, and the mass and redshift distribution of clusters of galaxies. Theoretical framework and experimental issues.
3 units (Staff) not given 2004-05

PHYSICS 457A. Condensed Matter Physics—(Enroll in APPPHYS 473A.)
2 units (Greven) not given 2004-05

PHYSICS 457B. Disordered Superconductors and the Superconductor-Insulator Transition—(Enroll in APPPHYS 473B.)
3 units, Aut (Kapitulnik)

PHYSICS 490. Research—Open only to Physics graduate students, with consent of instructor. Work is in experimental or theoretical problems in research, as distinguished from independent study of a non-research character in 190 and 293.
1-15 units, Aut, Win, Spr, Sum (Staff)

POLITICAL SCIENCE
Chair: Terry M. Moe
Associate Professors: Luis R. Fraga, Simon D. Jackman, Michael A. McFaul (Stanford in Washington), Kenneth A. Schultz
Assistant Professors: Alberto Diaz-Cayeres, Claudine Gay, Beatriz Magaloni, Isabella Mares, Rob Reich (on leave), Peter Stone, Michael R. Tomz, Carolyn Wong, Anne T. Wren, Jonathan Wand, Jeremy Weinstein
Professor (Research): Norman Nie
Lecturers: Mary I. Dakin, Andrew R. Rutten, David Victor
Courtesy Professors: David P. Baron, Jonathan B. Bendor, Coit D. Blacker, Gerhard Casper, Larry Diamond, Gerald A. Dorfman, Jean-Pierre Dupuy, James Fishkin, Lawrence Friedman, Keith Krehbiel, Gail W. Lapidus, Roger Noll, Stephen J. Stedman
Visiting Associate Professors: Joy P. Connolly, Debra M. Satz
Visiting Professors: Robert Adcock, Jean Leca, Barbara Shapiro
Visiting Associate Professor: H. Lyman Miller
Visiting Lecturers: Abbas Milani, Mary Sprague
Department Offices: Encina Hall West, Room 100
Mail Code: 94305-6044
Phone: (650) 723-1806
Web Site: http://polisci.stanford.edu

Undergraduate Programs
Bachelor of Arts
To receive a B.A. in Political Science, a student must:
1. Submit an application for the Political Science major to the undergraduate administrator, and declare on Axess. Forms are available in Encina Hall West, Room 100. For additional information, drop by or phone (650) 723-1608. Students must complete their major declaration no later than the last day of the first quarter of their junior year.
2. Complete 60 units:
   a) 35 Political Science course units must complete the breadth requirements.
   b) 15 Political Science units must be completed by taking other Political Science courses including directed reading, other introductory-level courses, and freshman/sophomore seminar courses.
   c) The remaining 10 units may be from: other Political Science courses; college outside the department that are related to the student’s interests in political science and are not entry-level courses in other disciplines such as ECON 1 or PSYCH 1; or Political Science honors students may apply 10 thesis units (POLISCI 299A,B,C).
3. Satisfy breadth requirements (35 units): each major must take two courses out of the following Political Science courses, one of which must be in the primary concentration; the other may be in any field:
   POLISCI 1, Introduction to International Relations
   POLISCI 2, American National Government and Politics
   POLISCI 3, Introduction to Political Philosophy
   POLISCI 4, Introduction to Comparing Political Systems
   POLISCI 151A, Doing Political Science, or POLISCI 151B, Data Analysis for Political Science
The primary concentration must be completed by fulfilling the depth requirement with at least 20 units (see Statement 4).
Each major should declare a secondary concentration in another subfield, with at least 10 units in that concentration. Each major should take at least 5 units in a third subfield.
4. Satisfy a depth requirement. Each major should declare a primary concentration in one subfield and take at least 20 units in this concentration, including the introductory course for that subfield. Subfields include:
   - International Relations (1, 110-119, 210-219, 310-319)
   - American Politics (2, 120-129, 220-229, 320-329)
   - Political Theory (3, 130-139, 230-239, 330-339)
   - Comparative Politics (4, 140-149, 240-249, 340-349)
5. Demonstrate the capacity for sustained research and writing in the discipline. This requirement is satisfied by taking a Political Science course which has been designated a Writing in the Major (WIM) course.
6. Take at least one 5-unit, advanced undergraduate seminar in Political Science.
7. Students may apply a maximum of 10 units from Stanford Summer Session or courses outside Stanford. Transfer students are allowed up to 20 units of transfer units or summer session. All transfer cases require petitions which must be reviewed and approved by the Director of Undergraduate Studies.
8. Directed reading units may not be used to fulfill a breadth requirement, and no more than 10 units of directed reading may count toward the required 50 Political Science units.
9. All courses counting toward the 60-unit requirement must be taken for a letter grade, although units in excess of the required 60 may be taken on a credit/no credit basis. A minimum grade of ‘C’ is required for courses to count towards major requirements.

MINORS

Students must complete their declaration of the minor no later than the last day of the quarter two quarters before degree conferral. Students must declare via AXESS. For example, a student graduating in June (Spring Quarter) must declare the minor no later than the last day of Autumn Quarter of the senior year.
To receive a minor in Political Science, a student must complete a minimum of 30 unduplicated units. All units must be in courses listed or crosslisted in the Department of Political Science. A maximum of 5 units of directed reading may count if supervised by a member of the department.
All units are for a letter grade. A minimum grade of ‘C’ is required for courses to count towards minor requirements.
Concentration—The student selects a subfield in which three courses are taken. One of these courses is the introductory course, the other two at a more advanced level (numbered above 100). Where a linked set of advanced courses is offered (as with the Political Theory 130A, B, C series), the introductory course need not be taken.
The concentration corresponds to one of the subfields the department has in place, namely, international relations, American politics, political theory, and comparative politics.
Distribution—Three courses must be in the area of concentration, as specified above, for 15 units. An additional 10 units of intermediate and advanced courses (100 level or above) must be in two additional subfields.
Transfer Work—A maximum of 10 units of work completed outside Stanford may be given Political Science credit toward the minor for transfer students. A maximum of 5 units of work completed in Stanford Summer Session or outside of Stanford for non-transfer students may be given Political Science credit toward the minor. All such cases must be individually reviewed and approved by the Director of Undergraduate Studies.

PRIZES

There are three annual prizes for undergraduate students: the Arnaud B. Leavelle Memorial Prize for the best paper in the History of Political Thought sequence (POLISCI 130A, B, C), a cash prize for the best thesis written in political theory, and the Lindsay Peters, Jr., Memorial Prize for the outstanding student each year in POLISCI 2.

HONORS PROGRAM

The honors program offers qualified students an opportunity to conduct independent research, write a thesis summarizing their findings, and make a presentation of their work. During the process of research, analysis, thinking, drafting, rethinking, and redrafting, students work closely with a faculty adviser and their fellow students.
Applicants must have a 3.5 grade point average (GPA) in Political Science courses, and an adviser who must be a regular faculty member. Application forms should be completed by the Spring Quarter of the junior year, and can be obtained from the department office.
Students who are interested in writing a thesis are encouraged to enroll in POLISCI 299Q, Junior Research Seminar, in the Winter Quarter of their junior year. This credit/no-credit course is designed to help students find a manageable thesis topic and adviser.
Students who are accepted into the program should plan to make the thesis the focus of their senior year. They should enroll in POLISCI 299A, B, C, which covers research and writing directed by the student’s adviser. In addition, students must enroll in POLISCI 299R, a 3-unit Autumn Quarter seminar designed to develop research and writing skills. In the Winter and Spring quarters, students enroll in POLISCI 299S and T, which are credit/no credit tutorials in which students work with other students and tutors to finish their research.
Most students find themselves in one of two groups: (1) those who already have substantial background in their thesis topic, and can expect to complete the honors program in two or three quarters for a total of 10-15 units completed in POLISCI 299A, B, C; or (2) those who have little or no previous work on the topic, and can expect to complete the program in three quarters with 15 units of work.
To complete the honors program, students must:
1. Complete all requirements for the major
2. Enroll in POLISCI 299R
3. Complete a thesis of honors quality (B+ or better).
Honors work done for credit (POLISCI 299A, B, C) may not be counted toward the required 50 units in Political Science but may be counted as all or part of the additional 10 units which relate to the student’s interest in political science.

GRADUATE PROGRAMS

Admission—Prospective graduate students should see http://gradadmissions.stanford.edu for application materials; for a printed application, write to Graduate Admissions, the Registrar’s Office, 520 Lasuen Mall, Old Union Building, Stanford University, Stanford, CA 94305-3005. Applicants for admissions to graduate work are required to submit a recent writing sample (not to exceed 35 pages). All applicants are required to submit a sample of their writing and to take the General Test of the Graduate Record Examination. Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). The TOEFL requirements are waived for applicants who have recently completed two or more years of study in an English-speaking country. For details concerning these tests, see the Guide to Graduate Admission, available at http://registrar.stanford.edu/publications. The application deadline is December 7. Admission is offered for the Autumn Quarter only. The department expects all students to pursue a full-time program except for time devoted to teaching or research assistantships.

MASTER OF ARTS

The M.A. degree may be pursued as part of a joint degree program with one of the University’s professional schools. Students interested in a joint degree should apply for admission to the M.A. program in Political Science during the Autumn Quarter of the first year in the Stanford professional school.
Doctoral candidates may elect to take the M.A. degree when they have met the following requirements:
1. Completion of at least three quarters of residency as a graduate student with 45 units of credit of which at least 25 units must be taken in Political Science graduate seminars of 300 level and above. Not more than 25 units of the 45-unit requirement may be taken in a single field.
2. At least two graduate seminars in each of two fields and at least one graduate seminar in a third field.
3. Of the remaining 20 units, not more than 10 units of work from related departments may be accepted in lieu of a portion of the work in Political Science. Not more than 10 units may be taken as directed reading.
4. Courses must be numbered above 300.
5. A grade point average (GPA) of 2.7 (B-) or better must be attained for directed reading and all course work.

The department does not offer a coterminal bachelor’s and master’s degree.

Doctoral candidates may pursue master’s degrees from other departments. Recent examples include but are not restricted to master’s degrees in Statistics and Economics. Students interested in this option should consult the relevant sections of this bulletin for both University and department requirements for master’s degrees.

MASTER OF ARTS IN TEACHING

The M.A. degree in Teaching is offered jointly by this department and the School of Education. The degree is intended for candidates who have a teaching credential or relevant teaching experience and wish to further strengthen their academic preparation. The program consists of a minimum of 25 units in Political Science courses and 12 units in the School of Education. A student’s program must be approved by the Director of Graduate Studies before the courses are taken. Detailed program requirements are outlined in the “School of Education” section of this bulletin.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the Ph.D. degree are discussed in the “Graduate Degrees” section of this bulletin.

Programs of study leading to the Ph.D. degree are designed by the student, in consultation with advisers and the Director of Graduate Studies, to serve his or her particular interests as well as to achieve the general department requirements. A student is recommended to the University Committee on Graduate Studies to receive the Ph.D. degree in Political Science when the following program of study has been completed:

1. The candidate for the Ph.D. degree must offer three of the following concentrations in political science: American politics, comparative politics, international relations, methodology, political theory, and public organizations. Upon petition, a special field (for example, public law, or urban politics) may be offered as a third concentration. Students concentrate on two of these areas by fulfilling, depending on the concentration, combinations of the following: written qualifying examinations, research papers, research design, or course work. The requirement for the third concentration may be satisfied by taking either a written examination in that area or by offering a minimum of 10 units with a grade point average (GPA) of 3.0 (B) or better in the third concentration from among the formal graduate-level courses in the five divisions of the department. The third concentration cannot be satisfied by courses taken as a requirement for a first or second concentration. A third concentration in theory requires two courses in addition to the 5 units necessary to fulfill the program requirement. Completion of special concentrations may require more than 10 units of course work. Students are not permitted to use the following combination of concentrations for the purposes of fulfilling the requirements for the Ph.D.: American politics, political organizations, and methodology.

Students wishing to concentrate in American politics, political organizations, and methodology are not prohibited from doing so, but must add another field of concentration to their course of study.

2. The Ph.D. candidate is required to demonstrate competence in a language and/or skill that is likely to be relevant to the dissertation research. The level of competence needed for successful completion of the research is determined by the student’s adviser. All candidates must complete 5 units of statistical methods or its equivalent. Students who are in the concentration of international relations, American politics, or political organizations are required to take an additional 5 units of methods. Previous instruction can be counted towards this requirement only if approved by the Director of Graduate Studies.

3. Every Ph.D. candidate must complete at least five units of graduate-level instruction in political theory.

4. By the start of the fourth quarter in residence, each first-year graduate student submits to the student’s adviser a statement of purpose. This statement indicates the student’s proposed major concentrations of study, the courses taken and those planned to be taken to cover those fields, the student’s plan for meeting language and/or skill requirements, plans for scheduling of comprehensive examinations and/or research papers, and, where possible, dissertation ideas or plans. This statement is discussed with, and must be approved by, the student’s adviser. In the Autumn Quarter following completion of their first year, students are reviewed at a regular meeting of the department faculty. The main purposes of this procedure are, in order of importance: to advise and assist the student to realize his or her educational goals; to provide an incentive for clarifying goals and for identifying ways to achieve them; and to facilitate assessment of progress toward the degree.

5. Students must take the comprehensive exams in two major fields by the end of their second year in the program. Students are expected to have passed these examinations and to have faculty approval of their research paper by the end of their second year.

6. Upon completion of one research paper and two comprehensive exams in his or her two major concentrations, the student files an Application for Admission to Candidacy for the Ph.D. which details program plans and records. The University and the department expects that students be admitted to candidacy by the completion of their sixth quarter as a full-time student. Each second-year student is reviewed and considered for admission to candidacy in a meeting of the faculty that is typically held during the tenth week of Spring Quarter. Since completion of two comprehensive exams and a research paper are prerequisites for admission to candidacy, students should plan their first- and second-year studies so that these requirements are satisfied by the time of the faculty review meeting. In particular, students should submit their research paper to the relevant faculty readers no later than the start of Spring Quarter, since revisions of the paper are often required prior to obtaining faculty approval.

7. During the third year, a formal dissertation proposal is submitted by the student to a thesis committee of three faculty members, including the principal adviser. The dissertation proposal requires approval by the student’s dissertation adviser and the Director of Graduate Studies. Dissertation proposals must be approved by the end of the third year.

8. A candidate for the Ph.D. in Political Science is required to serve as a teaching assistant (TA) in the department for a minimum of three quarters.

9. Doctoral candidates who apply for the M.A. degree are awarded that degree on completion of the requirements outlined in the description of the M.A. program.

10. The candidate must pass the University oral examination on the area of the dissertation at a time, after the passing of the written comprehensive examinations, suggested by the candidate’s dissertation committee.

11. The candidate must complete a dissertation satisfactory to the Dissertation Reading Committee and the University Committee on Graduate Studies.

PH.D. MINOR

Candidates in other departments offering a minor in Political Science select two concentrations in political science in consultation with the Director of Graduate Studies and submit to her or him a program of study for approval. Written approval for the program must be obtained from the Director of Graduate Studies before application for doctoral candidacy. Students are required to complete at least 20 units in Political Science courses. Two of these courses, in separate concentrations of political science, must be 300 level and above. All grades must be a GPA of 3.0 (B) or better. Candidates may be examined in their concentrations in the general oral examination by a member of the Department of Political Science, chosen in consultation with the Director of Graduate Studies.
COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Summer Quarter—During Summer Quarter, the Department of Political Science offers a variety of courses and seminars. The specific offerings depend on the faculty available during the Summer Quarter.

The department uses the following course numbering system:

001-099 Introductory Courses
100-199 Intermediate Undergraduate Lecture Courses
200-299 Advanced Undergraduate Seminar Courses
300-400 Advanced Undergraduate/Graduate Courses
400-500 Graduate Courses

Course information is accurate when the Stanford Bulletin goes to press; however, students should be aware that there may be changes and should check the quarterly Time Schedule for up-to-date information.

INTRODUCTORY

POLISCI 1. Introduction to International Relations—Approaches to the study of conflict and cooperation in world affairs. Applications to war, terrorism, trade policy, the environment, and world poverty. Debates about the ethics of war and the global distribution of wealth. GER:3b

5 units, Aut (Tomz)

POLISCI 2. Introduction to American National Government and Politics—The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy. GER:3b

5 units, Win (Ferejohn, Fiorina)

POLISCI 3. Introduction to Political Philosophy—How to engage with philosophical questions concerning politics. Topics include justice, authority, freedom of speech, multiculturalism, and patriotism. GER:3a

5 units, Win (Stone)

POLISCI 4. Introduction to Comparing Political Systems—Understanding politics in major regime types (democratic, authoritarian, and communist) and how different types of politics affect economic development and state/society relations. GER:3b,4a

5 units, Spr (Oi)

POLISCI 14N. Ethics and War—Stanford Introductory Seminar. Preference to freshmen. The role of ethical considerations in statesman’s and soldiers’ decisions about going to war and conduct in war. Consideration of just war theory in different religious traditions and political philosophies. Case studies in terrorism and violations of non-combatant immunity, the ethics of intervention and preventive war, and organizational implementation of ethical decisions. Recommended: concurrent enrollment in 114S. GER:3b

5 units, Win (Sagan)

POLISCI 16N. Politics of Economic Development—Stanford Introductory Seminar. Preference to freshmen. Why are some countries rich and others poor? What explains the policies that governments adopt, and how do those policies affect economic performance? Readings from political science and economics about Latin America and other regions. GER:3b

5 units, Spr (Tomz)

POLISCI 21N. The Evolution of Voting Rights in the U.S.—Stanford Introductory Seminar. Preference to freshmen. The evolution of voting rights in the U.S. from the 1965 Voting Rights Act to the present. Emphasis is on identifying conditions under which expansion was possible as a result of the removal of barriers. Current issues in the interpretation and implementation of provisions of the Voting Rights Act. Participation in a mock trial. GER:3b

5 units, Spr (Fraga)

POLISCI 21Q. The Presidency—Stanford Introductory Seminar. Preference to sophomores. The American presidency, including the history of the office, constitutional and statutory powers, electoral politics, relations with Congress and pursuit of legislation, the rise of the institutional presidency, management and control of the bureaucracy, leadership in foreign policy and war, formulation of the domestic agenda, appointments to the courts.

5 units (Moe) not given 2004-05

5 units (Moe) not given 2004-05

3 units, Win (Hansot)

POLISCI 45N. Civil War Narratives—Stanford Introductory Seminar. Preference to freshmen. Focus is on a new statistics-based theory to account for the susceptibility of countries to civil war. How do historical perspectives diverge from a theory-based narrative? Students write and present an original historical narrative focusing on how well the theory explains a particular historical event and new factors to explain civil war onset. GER:3b

5 units, Aut (Laitin)

POLISCI 46N. Contemporary African Politics—Stanford Introductory Seminar. Preference to freshmen. Focus is on the last decade. Patterns of economic collapse and recovery; shifts toward more democratic political systems; and increasing levels of political violence and civil conflict including warlordism and genocide. Trends across the continent, with emphasis on Sierra Leone’s emergence from conflict and Zimbabwe’s persistent political and economic decline. Students design strategies for diplomatic engagement in these environments to be presented to former U.S. policy makers at the conclusion of the course. GER:3b,4a

5 units, Aut (Weinstein)

POLISCI 48G. The Historical Roots of Modern East Asia—(Enroll in HISTORY 92A.)

5 units, Win (Sommer, Wigen)

POLISCI 48H. East Asia in the Age of Imperialism—(Enroll in HISTORY 92B.)

5 units (Staff) not given 2004-05

INTERMEDIATE UNDERGRADUATE LECTURES

INTERNATIONAL RELATIONS

Students interested in international relations are encouraged to take POLISCI 1, Introduction to International Relations. While not a formal prerequisite for many of the courses listed below, POLISCI 1 provides a desirable background for more advanced work.

The courses in international relations offered by the Department of Political Science can be divided into two groups: those dealing with global political, military, and economic problems; and those dealing with the foreign relations of specific nations or geographic regions. Students concentrating in international relations are encouraged to select their courses from both groups.

Students interested in a major in international relations are encouraged to refer to the “International Relations” section of this bulletin, which lists international relations courses in other departments.
POLISCI 110A. Sovereignty and Globalization—The relationship between globalization and the viability of state sovereignty, the development of international institutions, and the international distribution of wealth and security. GER:3b
5 units, Win (Krasner)

POLISCI 110B. Strategy, War, and Politics—Traditional and modern theories on the causes of war and sources of peace. Contrasting explanations for the origins of WW I and II; alternative theories of deterrence in the nuclear age; the causes of war in the Persian Gulf, ethnic conflicts, and terrorism in the post-Cold War era. GER:3b
5 units (Sagan) not given 2004-05

POLISCI 110C. America and the World Economy—American foreign economic policy. Issues: the evolution of American tariff and trade policy, the development of mechanisms for international monetary management, and American foreign investment policy reflected in the changing political goals pursued by American central decision makers. Prerequisite: 1 or equivalent. GER:3b
5 units (Goldstein) not given 2004-05

POLISCI 110D. War and Peace in American Foreign Policy—The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER:3b,WIM
5 units, Spr (Schultz)

POLISCI 111. Peace Studies—(Same as PSYCH 165.) Interdisciplinary. The challenges of pursuing peace in a world where the sources of conflict are many, and regional, ethnic, and religious antagonisms are rising. The art of creating and maintaining peace from historical, social, psychological, and moral perspectives. Goal is to illustrate the contributions of academic disciplines and critical analyses to the study of peace, and to prepare students to think critically and to act responsibly and effectively on behalf of peace. Students explore a conflict and offer contributions to the building of peace. Limited enrollment. GER:3b
5 units, Spr (Bland, Ross, Holloway)

POLISCI 111D. British Politics—Over the last two decades, Margaret Thatcher and Tony Blair have provoked major changes in policies, politics, and the institution of government. The impact of these changes on the world’s oldest democracy. GER:3b,4a
5 units, Spr (Dorffman)

POLISCI 112. Japanese Foreign Policy—(Same as 312.) The origins of WW II in the Pacific; Japan’s role in international security; the N. Korean nuclear crisis; Japan’s evolving security policies; and the U.S.-Japan trade conflict. GER:3b,4a
5 units, Aut (Okimoto)

POLISCI 114R. Technology and National Security—(Enroll in MS&E 193/293.)
3 units, Aut (Perry, Paté-Cornell)

POLISCI 114S. International Security in a Changing World—The major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in arms control, the military legacy of the Cold War, regional security conflicts, proliferation of advanced weapons capabilities, ethnic conflicts, and terrorism. GER:3b
5 units, Win (Sagan, Blacker, Perry)

POLISCI 114T. Major Issues in International Conflict Management—Conflict prevention, mediation and implementation of peace agreements, peacekeeping, peacebuilding, and humanitarian intervention. Topics: ethical dilemmas of conflict management, evaluation of international, regional, and non-governmental organizations in conflict management, the future of the UN, and the use of economic sanctions. GER:3b
5 units (Stedman) not given 2004-05

POLISCI 116. History of Nuclear Weapons—(Same as HISTORY 101D.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear has been avoided so far and whether it can be avoided in the future. GER:3b
5 units, Spr (Holloway)

POLISCI 135R. Political Theory and International Relations—For description, see “Political Theory” subsection below.
5 units, Spr (Sprague)

AMERICAN POLITICS

POLISCI 120A. American Political Sociology and Public Opinion: Who We Are and What We Believe—First of team-taught, intermediate-level, three-part sequence designed to introduce students to topics in American politics and government. The sociology of the U.S. and the political beliefs and values of Americans. Students may enroll for one, two, or three quarters, but the course is cumulative so maximum benefit results from enrollment in the entire sequence. Completion of 2 is assumed but not required. GER:3b
5 units (Fiorina, Sniderman) not given 2004-05

POLISCI 120B. Parties, Interest Groups, the Media, and Elections—The role of political parties, interest groups, and the media in the American political system. Rules, resources, voter turnout, and vote choice in U.S. elections. GER:3b
5 units, Aut (Sprague)

POLISCI 120C. American Political Institutions: Congress, the Executive Branch, and the Courts—How politicians, once elected, work together to govern America. The roles of the President, Congress, and Courts in making and enforcing laws. Focus is on the impact of constitutional rules on the incentives of each branch, and on how they influence law. GER:3b
5 units, Win (Rutten)

POLISCI 120D. The Congress—Nomination and election, constituent relations, committees and parties, internal rules and norms, and policy formation. GER:3b
5 units, Spr (Sprague)

POLISCI 121. Urban Politics—Introduces the major actors, institutions, processes, and policies of sub-state government in the U.S., focusing primarily on city general-purpose governments through a comparative examination of historical and contemporary politics. The issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: 2 or consent of instructor. GER:3b
5 units, Win (Fraga)

POLISCI 122. Introduction to American Law—(Same as AMSTUD 179, LAW 106.) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general. GER:3b
3-5 units, Aut (Friedman)

POLISCI 123. Politics and Public Policy—(Same as PUBLPOL 101.) The domestic policy making process, emphasizing how elected officials, bureaucrats, and interest groups shape government policies in areas including tax, environmental, and social welfare policy, given their goals and available tactics. How public policies are formulated and implemented. The results of this process using equity and efficiency criteria. Prerequisite: POLISCI 2. GER:3b
5 units, Spr (Brady)

POLISCI 124R. Judicial Politics and Constitutional Law: The Federal System—The impact of constitutional rules on policy making in the U.S. with a focus on structural issues such as separation of powers and federalism. Topics such as: the role of unelected judges in a democracy; the rule of law; and the constitutionality of the war in Iraq. Prerequisites: 2 or equivalent, and sophomore standing. GER:3b,WIM
5 units, Aut (Rutten)
POLISCI 124S. Judicial Politics and Constitutional Law: Civil Liberties—The role and participation of courts, primarily the U.S. Supreme Court, in public policy making and the political system. Judicial activity in civil liberty areas (religious liberty, free expression, race and sex discrimination, political participation, and rights of persons accused of crime). Prerequisites: 2 or equivalent, and sophomore standing. GER:3b
5 units, Win (Rutten)

POLISCI 124T. Legislatures, Courts, and Public Policy—(Same as PUBLPOL 124T.) How courts exert power and play a role in creating policy in the U.S. Can or should judges read their own values into law? Can the elected branches check the power of unelected judges? What is good government and how do courts fit it into? Focus is on the Civil Rights Act of 1964 examining the political maneuvers to pass it and recent Supreme Court decisions applying it to affirmative action. 5 units, Spr (Rutten)

POLISCI 126. Issues of Race and Minority Representation in American Politics—How the mass citizenry and organized interests are represented in American politics and the policy making process. Problems of representations in controversies over social and economic policies that evoke economic and ethnic cleavages in society. Problems of minority representation, including a comparison of the issues confronting Asian American, Chicano/a, Native American, and African American groups. Prerequisite: 2 or consent of instructor. GER:3b,4b
5 units, Win (Wong)

POLISCI 127. Organizations and Public Policy—(Enroll in PUBLPOL 102.)
5 units, Win (Wilson)

POLISCI 127R. California Government and Politics—(Enroll in PUBLPOL 188.)
5 units, Spr (Wilson)

POLISCI 127S. Mass Media Economics and Policy—(Enroll in PUBLPOL 172.)
4-5 units, Aut (Owen)

POLISCI 128. Colonial and Revolutionary America—(Enroll in HISTORY 165A.)
5 units, Aut (Rakove)

POLISCI 129. Special Projects: The Death Penalty, Human Biology, Law, and Policy—(Enroll in HUMBIO 166.)
3 units, Aut, Win, Spr (Abrams)

POLITICAL THEORY

POLISCI 130A. History of Ancient Political Thought I: Constructing and Questioning Political Obligation in the Ancient World—(Same as 300A.) Political philosophy in classical antiquity, focusing on canonical works of Plato, Aristotle, Cicero, and St. Augustine. Historical background. Topics include: political obligation, citizenship, and leadership; and tensions between political obligation and the claims of family, philosophy, and faith. GER:3a
5 units, Aut (Adcock)

POLISCI 130B. History of Political Thought II: Early Modern Political Thought, 1500-1700—(Same as 300B.) The development of constitutionalism, Renaissance humanism and the Reformations, changing relationships between church and states. Emphasis is on the relationships among political thought, institutional frameworks, and immediate political problems and conflicts. The usefulness of the history of political thought to political science. GER:3a
5 units, Win (Shapiro)

POLISCI 130C. History of Political Thought III: Freedom, Democracy, and Power—(Same as 330C.) Classic works in political theory on the themes of freedom, democracy, or power since the American and French revolutions. Readings include Kant, Hegel, Marx, Nietzsche, Dewey, and Foucault. GER:3a
5 units, Spr (Stone)

POLISCI 131. Children’s Citizenship: Justice Across Generations—Focus is on social institutions that play a role in the moral and civic education of children including schools, families, and civil society. Content and goals of moral and civic education and how egalitarian and integrationist goals relate to them. How these institutions shape, promote, or hinder such education. Conflicts and priorities. Readings include political theorists on justice, the family, and education; court cases concerning public education. GER:3a
5 units, Spr (Adcock)

POLISCI 133. Ethics and Politics in Public Service—(Same as ETHICSOC 133.) Primarily for freshmen and sophomores who participate or intend to participate in service activities through the Haas Center or register for courses with service learning components. The basis for a connection between an undergraduate’s service activities and academic experiences at Stanford. What does it mean to do public service? Why should or should not citizens do volunteer work? Is public service a good thing? The history, hazards, responsibilities, and dilemmas of doing public service. A historical context of public service work in the U.S., introducing the range of ethical concerns involved with service. GER:3a
5 units (Reich) not given 2004-05

POLISCI 134. Democracy and the Communication of Consent—(Enroll in COMM 136/236.)
4-5 units, Aut (Fishkin)

POLISCI 135R. Political Theory and International Relations—Classical political theories of modern international relations: Hobbes on sovereignty and the state of nature; Machiavelli, Rousseau, and Hegel on war and peace; the Grotian countertradition; Kant and early cosmopolitanism; the emergence of the idea of international community. 20th-century debates: Schmitt, Morgenthau, and Aron; realism, neorealism, and liberal internationalism; constructivism, Rawls, and the law of people. The new cosmopolitanism and current concepts of an international community. Democratic peace and the Kantian legacy. Legalisation and rational design; international governance and the disaggregation of sovereignty. Policing the world or waging just wars.
5 units, Spr (Leca)

POLISCI 135S. International Human Rights Law: Cultural Exceptions and Enforceability—(Enroll in INTNLREL 140D, IPS 240D.)
5 units, Win (Stacy)

POLISCI 136S. Political Philosophy—(Enroll in ETHICSOC 171, PHIL 171/271.)
4 units, Spr (Schapiro)

POLISCI 137. Liberalism, Democracy, and Empire—19th-century Western liberalism focusing on diversity and ambivalence in liberal views of democracy in Europe and America, and on European imperial rule overseas. How would liberty fare under democratic conditions? Would extending suffrage to lower classes threaten constitutional rule and political stability? Could Europe’s imperial endeavors be supported without violating core liberal commitments? Readings: Alexis de Tocqueville, John Stuart Mill, and other 19th-century liberal thinkers. GER:3b
5 units, Win (Adcock)

POLISCI 138. Modern Political Ideologies—Prominent political ideologies that define the terms of contemporary political discourse including liberalism, conservatism, feminism, and anarchism through the intellectual debates generated by the French Revolution. Readings include Price, Burke, Godwin, Wollstonecraft, and Paine. GER:3a
5 units (Stone) not given 2004-05
COMPARATIVE POLITICS

Undergraduate courses and seminars in comparative politics generally fall into two groups: those dealing with a particular country or region, and those dealing with major political problems or processes. Students are encouraged to take courses from both groups, and are also urged to do course work in more than one country or region.

POLISCI 140. Political Economy of Development—Emphasis is on the interplay between political economic processes, and national and international factors from Latin America, Africa, and Asia. Do governments provide the foundations for economic development? The role of the state in solving problems of violence and capital accumulation. GER:3b,4a
5 units, Spr (Diaz-Cayeros)

POLISCI 140L. China in World Politics—The implications of the rise of China in contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions. GER:3b,4a
5 units, Spr (Miller)

POLISCI 141. The Global Politics of Human Rights—The global development and changing nature of human rights and the rise of an international human rights movement. Conflicts between national sovereignty and rights, and among types of rights. Case studies include genocide in Rwanda, holding torturers accountable in Chile and El Salvador, factory workers versus Nike, and the rights of women in S. Africa. GER:3b
5 units, Win (Karl)

POLISCI 141R. Russian Politics—The evolution of the Russian political system including the Soviet era, reform attempts from Khrushchev to Gorbachev, and the collapse of the USSR. Post-communist political institutions including the Russian federal system, executive-legislative relations, political parties, and lobbies; social and economic conditions and the post-communist relationship between political and economic reform; and foreign relations with the former Soviet states and the West. GER:3b,4a
5 units, Aut (Dakin)

POLISCI 142. Political Economy of Western Europe—Analytical and historical introduction to the political economy of W. Europe. Fundamental differences in economic performance are explained by examining the relative importance of institutional variables and the strategic choices of key political actors. Topics: macroeconomic policy, wage determination and income inequality, welfare state expansion and retrenchment, European integration. Readings focus on Britain, Germany, and Sweden. GER:3b,4a
5 units, Win (Mares) not given 2004-05

POLISCI 142R. Representative Government in Europe—How does representative government in European countries differ from the U.S.? How electoral institutions, party systems, and structures of interest group representation differ across European countries, and between Europe and the U.S. How these variations in institutional configuration influence the structure and content of ideological debate and mediate its influence on the policy making process. How European integration is altering the structure of citizen representation in EU member states. GER:3b
5 units, Spr (Wren)

POLISCI 144S. Democracies and Autocracies—The study of political regimes. The main characteristics of democratic versus authoritarian regimes. What determines that political order is established in the form of democracy or authoritarianism? How democracies and autocracies operate; how each regime achieves political order, adopts public decisions, and impacts economic performance. GER:3b
5 units, Aut (Magaloni)

POLISCI 145. Politics and Development in Latin America—Political, economic, and social development in Brazil, Mexico, Cuba, and Argentina. Emphasis is on historical and comparative analyses and policy and theoretical issues such as ideologies of development, democracy and its alternatives, constraints on national autonomy, and civil-military, state-society, and state-market relations. GER:3b,4a
5 units, Win (Packenham)

POLISCI 147. Comparative Democratic Development—Social, cultural, political, economic, and international factors affecting the development and consolidation of democracy in historical and comparative perspective. Individual country experiences with democracy, democratization, and regime performance. Emphasis is on the third wave of democratization over the past three decades and contemporary possibilities for democratic change. GER:3b,4a
5 units, Win (Oti)

POLISCI 148G. Asia-Pacific Transformation—(Enroll in SOC 167A.) 5 units, Win (Shim)

POLISCI 148S. The U.S. and Asia During the Cold War—International relations perspective. WW II and its impact on international relations; the efforts of Allied statesmen to design a stable postwar order; the Chinese civil war; the American occupation of Japan; the Korean War; S.E. Asian independence struggles; the American alliance system in the 50s, the Sino-Soviet alliance; Indo-Pakistani conflicts; the Vietnam War; strategic realignment in the 70s; and the legacy of the Cold War on the region’s international agenda and American policy priorities. The relevance of the region to the international system. GER:3b,4a
5 units, Aut (Miller)

POLITICAL METHODOLOGY

POLISCI 150A. Political Methodology I—(Same as 350A.) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus. GER:2c
5 units, Aut (Wand)

POLISCI 150B. Political Methodology II—(Same as 350B.) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses. GER:2c
5 units, Win (Jackman, Rivers)

POLISCI 150C. Political Methodology III—(Same as 350C.) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory. Prerequisite: 150B/350B.
3-5 units, Spr (Jackman, Rivers)

POLISCI 151A. Doing Political Science—For students planning a major in Political Science. An introduction to social science methodological approaches, from case studies and formal models, to the study of politics and government. Beneath the diversity of means that political scientists use to pursue knowledge lies a common language, core concepts, and scholarly goals. Concepts and their use through the research of Stanford Political Science professors. In addition to the instructors, 6-8 other faculty appear in various course sessions. Goal is to prepare students to do political science, not just study it. GER:2c
5 units (Fiorina, Jackman) not given 2004-05
POLISCI 151B. Data Analysis for Political Science — Elementary analysis of quantitative data for political science: operationalization of concepts, measurement, scale construction, finding and pooling/merging data, cross-tabulations, tests of association, comparison of means, correlation, scatterplots, and regression models. How to present the results of data analysis in research reports, essays, and theses. Emphasis is on getting and using data with appropriate statistical software. Prior mathematics not required. GER: 2c
5 units (Jackman) not given 2004-05

POLISCI 152. Introduction to Game Theoretic Methods in Political Science — (Same as 352.) Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes’ theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.
5 units, Aut (Fearon)

ADVANCED UNDERGRADUATE SEMINARS
INTERNATIONAL RELATIONS

POLISCI 215. Explaining Ethnic Violence — What is ethnic violence and why does it occur? Should elite machinations, the psychology of crowds, or historical hatreds be blamed? Case studies and theoretical work on the sources and nature of ethnic violence. GER: 3b, WIM
5 units, Aut (Fearon)

POLISCI 216R. The Political Economy of Energy Policy — How political and organizational forces determine outcomes in oil, gas, and electricity markets rather than economic or technological imperatives. Case studies from energy policy in the U.S. and overseas illustrate theories. Topics include: the regulation of U.S. oil production; international oil trading and OPEC; antitrust regulation in oil and electricity markets; market competition for electricity; global warming; and supplying energy to low-income areas. GER: 3b
5 units, Win (Victor)

POLISCI 218. U.S. Relations in Iran — The evolution of relations between the U.S. and Iran. The years after WW II when the U.S. became more involved in Iran. Relations after the victory of the Islamic republic. The current state of affairs and the prospects for the future. Emphasis is on original documents of U.S. diplomacy (White House, State Department, and the U.S. Embassy in Iran). Research paper. GER: 3b
5 units, Aut (Milani)

AMERICAN POLITICS

POLISCI 221R. Urban Policy — Public finance, housing, education, transportation, and crime in major metropolitan areas in the U.S. Students are placed in internships in government departments, social service agencies, or community-based organizations. Primary requirement is a policy brief integrating theory with the internship experience. GER: 3b, 4b
5 units (Fraga) not given 2004-05

POLISCI 221S. Civic Capacity and Urban Youth — The logic and possibilities of mobilizing urban youth to overcome the decline in civic engagement across American society. Can youth be trained to be effective advocates for their interests in education? Can they be trained to be effective advocates for their interests in local government generally? If youth are successfully mobilized, can this serve as a catalyst to mobilize their parents and other adults? Class requirements include an internship of at least 7 hours per week in the John W. Gardner Center for Youth and their Communities. GER: 3b, 4b, WIM
5 units (Fraga) not given 2004-05

POLISCI 221T. Politics of Race and Ethnicity in the United States — Race and ethnicity issues used to understand current challenges to political development of the U.S. Focus is on political institutions and how current issues such as campaigning, affirmative action, and voting rights operate within parameters set by these institutions. Fundamental national values underlying current notions of identity, citizenship, justice, and the public interest. GER: 3b, 4b
5 units, Win (Fraga)

POLISCI 222S. Topics in Constitutional History — (Same as HISTORY 250B.) Topics in the history of the American Constitution and its interpretation, including the invention of the concept of the written constitution in the Revolutionary era, the crisis of Civil War and Reconstruction, and the controversies over interpretation and the rights revolution in the 20th century. GER: 3b, 4b
5 units (Rakove) not given 2004-05

POLISCI 223R. Philanthropy: Effecting Social Change and Innovation in the Public Sector — (Enroll in URBANST 122.)
4 units, Aut (Arrillaga)

POLISCI 223S. The Imperial Temptation: U.S. Foreign Policy in a Unipolar World — How the collapse of the Soviet Union liberated the U.S. from the constraints of bipolarity. How current policy fits into earlier traditions such as Wilsonianism or realism. Normative questions; what is America’s proper role in the world? GER: 3b
5 units, Aut (Jeoff)

POLISCI 225R. Black Politics in the Post-Civil Rights Era — The shift among Black Americans from protest to politics. Emphasis is on the development and use of political resources as means to achieve policy objectives. Topics: political attitudes and participation, voting rights and representation, party politics, multiracial coalition building. GER: 3b, 4b
5 units, Win (Gay)

POLISCI 226S. Asian Americans in Politics — The participation and representation of Asian Americans in American politics at the national, state, and local levels. The politics of immigration, civil rights, affirmative action, and language. Multi-ethnic and multi-issue coalitions. Comparative perspectives on Asian ethnic politics in the U.S., Canada, and Australia. GER: 3b, 4b
5 units, Win (Wong)

POLITICAL THEORY

POLISCI 231S. Contemporary Theories of Justice — Social and political justice and contemporary debates in political theory. Recent works that develop the principles of justice, and the political arrangements that best satisfy their requirements. Limited enrollment. GER: 3a, WIM
5 units, Win (Stone)

POLISCI 232. Introduction to Civil Society and the Nonprofit Sector — (Enroll in PUBLPOL 189, URBANST 121.)
2-4 units, Spr (Sievers)

4-5 units (Fishkin) not given 2004-05

COMPARATIVE POLITICS

POLISCI 240T. American Efforts at Promoting Democracy Abroad: Theory and Reality — Given at Stanford in Washington. Theoretical and intellectual debates about democracy promotion; realism versus liberal- ism. The evolution of these debates with attention to the Cold War, the 90s, and American foreign policy after 9/11. Tools for and bureaucratic struggles over how to promote democracy. Contemporary case studies.
5 units, Spr (McFaul)

POLISCI 241S. Regime Change: Comparative Theories — Comparison of structural and actor-centric theories, and evolutionary versus revolutionary models. Emphasis is on theories of democratization and revolution. Case studies from the 20th and 21st century. GER: 3b, 4a
5 units (McFaul) not given 2004-05

POLISCI 242T. Social Protection Around the World — The political origin of differences in and recent challenges faced by social protection policies across developed and developing countries. Why some countries provide old-age or sickness benefits to all citizens while others offer no protection during employment-related risks. The relative importance of economic, political, and institutional variables in explaining these differences in outcomes. Prerequisite: 4.
5 units, Aut (Mares)
POLISCI 242U. Varieties of Capitalism—Core differences in institutions and policies across advanced industrialized democracies. Are there meaningful distinctions among models of capitalism? Do these differences persist in the face of economic globalization? Topics: industrial relations, corporate governance, and social insurance. Prerequisite: 4. GER:3b
5 units, Aut (Mares)

POLISCI 244R. Political Economy of Disease: AIDS in Historical Perspective—Demographic, economic, cultural, and political changes in the wake of AIDS. The social dimensions of infectious diseases and epidemics; the impact of epidemics on political and economic institutions; and the political economy of responses to the AIDS crisis. Students conduct original research on causes and/or consequences of AIDS or AIDS-related policies. GER:3b
5 units, Win (Weinstein)

POLISCI 245R. Politics in Modern Iran—Modern Iran has been a smoky for political movements, ideologies, and types of states. Movements include nationalism, constitutionalism, Marxism, Islamic fundamentalism, social democracy, Islamic liberalism, and fascism. Forms of government include Oriental despotism, authoritarianism, Islamic theocracy, and liberal democracy. These varieties have appeared in Iran in an iteration shaped by history, geography, proximity to oil and the Soviet Union, and the hegemony of Islamic culture. GER:3b, 4a
5 units, Win (Milani)

POLISCI 245S. Islam and the West—Neither the West nor Islam has appeared in monolithic form, nor has the relative power and vitality of each side remained constant. The relationship in the Middle Ages revolved around power and domination, and since the Renaissance around modernity. Focus is on Muslims of the Middle East. GER:3b, 4a
5 units, Spr (Packenham)

POLISCI 246R. Market-Oriented Reform and Development in Latin America—Preference to juniors and seniors. Theoretical and policy approaches to Latin American development in recent decades emphasizing policies since the 80s and their effects on economic, social, and political development. GER:3b
5 units, Spr (Packenham)

POLISCI 247S. Politics and Economic Policy in Advanced Industrial Democracies—Political economic approaches to patterns of economic policy making and performance in the advanced industrial democracies of W. Europe and N. America. What is the role of political ideology and government partisanship in influencing economic outcomes? How do the political parties interact with organized interest groups in the formation of economic strategies? Can voters influence patterns of economic policy making and how is this influence felt? What are the cross-national impacts of globalization and the increasing openness of trade and capital markets? What constraints are placed on domestic political actors by the development of supranational political organizations like the EU?
5 units, Spr (Wren)

POLISCI 247T. The Politics of the European Union—The origins and the current structure of the EU. The effects of the EU on domestic politics, the electoral landscape, the distribution of political power, the power of national governments to formulate public policy, and economic and social policies. Current issues in EU politics including the creation of the EU constitution; the enlargement of the EU to include countries from the former Soviet bloc; the future of European welfare states; and the EU’s military role. GER:3b, 4a
5 units (Wren) not given 2004-05

POLISCI 248. Mexican Politics—Why did Mexico fail to eliminate poverty and destitution despite resources channeled to that end and a rhetoric of social justice inherited from the Revolution? The durability of the political regime, the peculiar characteristics of the Mexican process of democratization, and the regime’s incentives to repress ancestral problems of inequality and destitution. Emphasis is on crafting research projects on the political economy of Mexican development, and hypotheses testing with empirical data. GER:3b, 4a, WIM
5 units, Spr (Diaz-Cayeros)

POLISCI 248S. Latin American Politics—Fundamental transformations in Latin America in the last two decades: why most governments are now democratic or semidemocratic; and economic transformation as countries abandoned import substitution industrialization policies led by state intervention for neoliberal economic polices. The nature of this dual transformation. GER:3b
5 units, Spr (Magaloni)

RESEARCH

POLISCI 299A,B,C. Senior Project—Independent research towards a senior honors thesis. See “Honors Program” above.
3-5 units, Aut, Win, Spr, Sum (Staff)

POLISCI 299Q. Junior Research Seminar—For students interested in writing a senior honors thesis. Finding a manageable topic and adviser.
2 units, Win (Rutten)

POLISCI 299R. Senior Research Seminar—Required of students writing honors theses. Focus is on acquiring research skills and developing an appropriate research design. WIM
3 units, Aut (Rutten)

POLISCI 299S,T. Senior Honors Tutorial—Required of students writing honors theses. Focus is on solving problems in writing a thesis such as keeping on schedule and rewriting drafts. Students work with other honors students and graduate student tutors.
2 units, Win, Spr (Staff)

ADVANCED UNDERGRADUATE/GRADUATE INTERNATIONAL RELATIONS

POLISCI 310A. International Relations Theory, Part I—First of a three-part graduate sequence. History of international relations, current debates, and applications to problems of international security and political economy.
5 units, Aut (Tomz)

POLISCI 310B. International Relations Theory, Part II—Second of a three-part graduate sequence. History of international relations theory, current debates, and applications to problems of international security and political economy. Prerequisite: 310A.
5 units, Win (Schultz)

POLISCI 310C. Research in International Relations—Third of a three-part graduate sequence. Focus is on developing research papers begun in 310A or B, and exploring active areas of research in the field. Prerequisite: 310B.
3-5 units, Spr (Goldstein)

POLISCI 311A,B. Workshop in International Relations—For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.
1-5 units, Aut, Win (Goldstein, Tomz)

POLISCI 312. Japanese Foreign Policy—For graduate students; see 112.
5 units, Aut (Okimoto)

POLISCI 312R. Domestic Politics and International Conflict—Theoretical and empirical research on the effects of domestic politics and political institutions on the incidence, outcome, and resolution of international conflict. Topics include the democratic peace, diversionary conflict, economic sources of war and peace, domestic influences on war outcomes, and the politics of resolving international rivalries.
5 units, Spr (Schultz)

POLISCI 314S. Decision Making in U.S. Foreign Policy—(Same as IPS 314S.) Priority to students in International Policy Studies. Formal and informal processes in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytic perspectives; case studies. Policy memorandum and substantial research paper or take-home final.
5 units, Spr (Blacker)
POLISCI 316. International History and International Relations Theory—(Same as HISTORY 210D/310D.) Texts that relate the theory and history of international relations. GER:3b
5 units, Win (Holloway)

POLISCI 317R. The End of the USSR: Causes and Consequences—(Same as REES 317R.) The dissolution of the USSR and the emergence of 15 independent states in its place as the culmination of interrelated developments precipitated by Gorbachev’s perestroika: the end of the Communist system, the Soviet empire in E. Europe, and the cold war. Explorations of the causes of Gorbachev’s reforms including domestic and international influences, the factors which shaped it, and unanticipated consequences at home and abroad.
5 units, Win (Lapidus)

POLISCI 318S. State Building—Past and present efforts by external actors to influence domestic authority structures. Topics may include: colonialism; production of minority rights in the 19th and first half of the 20th century; U.S. intervention in the Caribbean and Central America; U.S. and Soviet intervention in Europe after WW II; Afghanistan; and Iraq. For Ph.D. students; others with consent of instructor.
5 units, Win (Lapidus)

AMERICAN POLITICS

POLISCI 321. Creating the American Republic—(Same as HISTORY 272/372.) Concepts and developments in the late 18th-century invention of American constitutionalism; the politics of constitution making and ratifying; theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources. WIM
5 units (Rakove) not given 2004-05

POLISCI 322. Campaign Finance and Elections—The strategies and behavior of special interest groups, parties, candidates, and voters in the U.S. Emphasis is on statistical models and empirical tests of formal models. Prerequisite: 350B; 351 sequence or 352; or equivalents.
5 units, Aut (Wand)

POLISCI 323R. The Press and the Political Process—(Same as COMM 160/260.) Analysis of the role of mass media and other channels of communication in political and electoral processes. GER:3b
4-5 units, Aut (Iyengar)

POLISCI 323S. Analysis of Political Campaigns—(Same as COMM 262.) The evolution of American political campaigns, and the replacement of the political party by the mass media as intermediary between candidates and voters. Academic literature on media strategies, the relationship between candidates and the press, the effects of campaigns on voter behavior, and controversies concerning inconsistencies between media campaigns and democratic norms. Do media-based campaigns enable voters to live up to their civic responsibility? Has the need for well-financed campaigns increased the influence of elites over the nomination process? Have ordinary citizens become disengaged by their limited involvement? Discussions in context of 2000 campaign. GER:3b
4-5 units (Iyengar) not given 2004-05

POLISCI 324R. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives—(Enroll in COMM 239.)
4 units, Spr (Krosnick)

POLISCI 325S. Race and Place in American Politics—The political opinions of individuals cannot be explained apart from the environments within which they occur. How features of neighborhood environments, including their racial and socioeconomic composition, shape the politics and political behavior of Americans. How shifting patterns of residential segregation and suburbanization affect the attitudes and behaviors of African Americans and whites.
5 units, Spr (Gay)

POLISCI 326R. Urban Politics and Public Policy—Major theoretical approaches regarding democracy, participation, representation, economic development, and governance.
5 units, Spr (Fraga)

POLISCI 327R. American Politics of Race and Ethnicity: Comparative Perspectives—The political participation and representation of American and ethnic minority groups. Comparative analysis of the political experiences of African Americans, Latinos, Asian Americans, and Native Americans in late 20th-century America. Contemporary policy issues of importance to minority populations.
5 units, Aut (Wong)

POLITICAL THEORY

POLISCI 330A. History of Ancient Political Thought I: Constructing and Questioning Political Obligation in the Ancient World—(For graduate students; see 130A.)
5 units, Aut (Adcock)

POLISCI 330B. History of Political Thought II: Early Modern Political Thought, 1500-1700—(For graduate students; see 130B.)
5 units, Win (Shapiro)

POLISCI 330C. History of Political Thought III: Freedom, Democracy, and Power—(For graduate students; see 130C.)
5 units, Spr (Stone)

POLISCI 332. American Social Science and the Democratic Polity—The history of American social science, particularly political science, from its 19th century professionalization to the 60s focusing on the study of democracy. What makes a polity democratic. The character of the American polity, the role of academic social science in it, and its place in world politics.
5 units, Spr (Adcock)

POLISCI 333. Topics in Democratic Theory—(Same as PHIL 377.) Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Petit, Iris Marion Young, Ian Shapiro, and Amy Gutman.
3-5 units, Win (Ferejohn, Satz)

POLISCI 334R. Democracy, Justice, and Deliberation—(Enroll in COMM 236G/336G.)
1-5 units (Fishkin) not given 2004-05

POLISCI 334S. Democracy, Press, and Public Opinion—(Enroll in COMM 344.)
1-4 units, Spr (Fishkin)

POLISCI 335. Analytical and Continental Perspectives on Political Theory—Analytical theory as more ahistorical and concerned with logic and coherence; continental theory as more historical and concerned with metaphysical issues. The scientific and political worlds in which they are rooted; truth and justice; order and peace. Student groups assess theoretical and practical differences by selecting common political issues such as democratic theory, minority rights, the meaning of legislation, the judicialization of politics, gender issues, the welfare state, environmental issues, institutional design, hegemony, war, and peace.
5 units, Spr (Leca)

POLISCI 338G. Political Anthropology from Rousseau to Freud—(Enroll in FRENGEN 256E.)
3-5 units, Spr (Dupuy)

COMPARATIVE POLITICS

POLISCI 340R. Political Economics—How governments collect revenue, allocate spending, and obtain credit, as determined by variations in institutional and political conditions. In a democracy, the emphasis is on the provision of public goods and services and representative accountability. In less democratized settings, the emphasis lies in the extractive capacity of the state, the temporal horizons of rulers, and the purchase of political support with money.
5 units, Aut (Díaz-Cayeros)
POLISCI 340S. Political Economy of Post-Communism—The sources of the collapse of the communist states in E. Europe and the former Soviet Union. Issues facing the formation and consolidation of post-communist states and societies including democratization, privatization, nationalism, and foreign relations between newly independent states. Models and historical analogues for analyzing the emergence of post-communist politics.

5 units (McFaul) not given 2004-05

POLISCI 341T. Comparative Democratization and Regime Change—Issues of democracy, its definition, problems of transition and consolidation, and comparison. The relationship between democracy and the military, the economy, and the interstate system.

5 units, Aut (Karl)

POLISCI 344S. Comparative Political Institutions—Overview of existing political institutions and their impact on political-economic outcomes. The roles of political institutions and what determines their stability, how they are chosen, and which processes enable their transformation over time. The main variances in institutional settings, emphasizing the menu of democratic institutions, including parliamentary, semi-presidential, and presidential systems; electoral rules; bicameralism; federalism; and legislative-executive relations. The effect of political institutions on economic growth and political stability.

3-5 units, Win (Magalon)

POLISCI 344U. Political Culture—An approach to culture that emphasizes its equilibrium attributes by working through the relationship of culture, choice, coordination, and common knowledge. Implications for the study of political processes and institutions. Required paper on the role of culture in a political institution.

5 units (Latini) not given 2004-05

POLISCI 345R. Political Economy of Japan—Institutions and processes in the political organization of economic activity in Japan. The interaction of public and private sector institutions in the growth of Japan’s postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, and public policy making. Comparison of Japan’s political economy before the bursting of the bubble in 1990-91 with the current situation; why it fell into stagnation and why it has taken Japan so long to recover.

3-5 units, Aut (Okimoto)

POLISCI 345S. Japanese Politics—Major theories used to explain the structure and dynamics of Japanese politics, including the developmental state, bureaucratic politics, interest group coalitions, single party domination, network theory, and rational choice. Student presentations.

5 units (Staff) not given 2004-05

POLISCI 346S. The Logic of Authoritarian Government—If authoritarianism is less economically efficient and a less stable form of political organization than democracy, then why historically are there more authoritarian governments than democracies? The theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

5 units, Win (Haber)

POLISCI 347S. Comparative Political Economy of Developed Democracies—Theoretical approaches to fundamental differences in economic policy and performance across the advanced industrial democracies. What is the relative importance of government partisanship and ideology, social cleavages, and institutional structures in explaining patterns in economic policy and outcomes? How do these political models compare with models emphasizing economic variables such as capital market integration, trade openness, or technological change?

3-5 units (Wren) not given 2004-05

POLISCI 348. Chinese Politics: The Transformation and the Era of Reform—(For graduate students; see 148.)

5 units, Win (Oi)

POLISCI 348H. China Under Mao—(Enroll in SOC 117A/217A.)

5 units, Aut (Walder)

POLITICAL METHODOLOGY

POLISCI 350A. Political Methodology I—(For graduate students; see 150A.)

5 units, Aut (Wand)

POLISCI 350B. Political Methodology II—(For graduate students; see 150B.)

5 units, Win (Jackman, Rivers)

POLISCI 350C. Political Methodology III—(For graduate students; see 150C.)

3-5 units, Spr (Jackman, Rivers)

POLISCI 351A. Foundations of Political Economy—(Same as POLECON 680.) Emphasis is on formal models of collective choice, public institutions, and political competition. Topics include voting theory, social choice, institutional equilibria, agenda setting, interest group politics, bureaucratic behavior, and electoral competition.

4 units, Aut (Shotts)

POLISCI 351B. Economic Analysis of Political Institutions—(Same as POLECON 681.) Applying the techniques of microeconomic analysis and game theory to the study of political behavior and institutions, including information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations. Applications include agenda formation in legislatures, the implications of legislative structure, government formation, lobbying, electoral competition and interest groups, the control of bureaucracies, interest group competition, and collective choice rules.

4 units, Win (Baron)

POLISCI 351C. Applied Formal Models: Governmental Decision Making—(Same as POLECON 682.) Focus is on empirical applications of formal models to the study of legislatures. How such skills can be applied to obtain a more comprehensible and systematic understanding of collective decision making. Prerequisites: 351A,B, or equivalent technical skills.

4 units, Spr (Krehbiel)

POLISCI 352. Introduction to Game Theoretic Methods in Political Science—(For graduate students; see 152.)

5 units, Aut (Fearon)

POLISCI 353A,B,C. Workshop in Statistical Modeling—Theoretical aspects and empirical applications of statistical modeling in the social sciences. Guest speakers. Students present a research paper. Prerequisite: 350B or equivalent.

1-5 units, Aut, Win, Spr (Jackman, Rivers, Wand)

POLITICAL ORGANIZATIONS

POLISCI 362. New Economics of Organization—(Same as OB 686.) Survey of economic approaches to organization, emphasizing theory and application, with attention to politics.

5 units, Spr (Weingast)

POLISCI 365. Organizational Decision Making—Behavioral theories of organization. Emphasis is on the institutional applications of bounded rationality. Models of incrementalism; evolutionary models of change; organizational learning. The differences between predictions of theories of perfect rationality and those of imperfect rationality. Organizational responses (constructive and pathological) to constraints on information processing. Institutional contexts; public agencies and firms.

5 units, Spr (Bendor)
GRADUATE

POLISCI 411A,B.C. Research Seminar in International Security and Social Science—Advanced graduate students, faculty, and visitors present current research on contemporary problems in international security. 1 unit, Aut, Win, Spr (Eden, Sagan)

POLISCI 420A. Approaches to the Study of American Politics—Theories of American politics, focusing on Congress, the presidency, the bureaucracy, and the courts. 5 units, Aut (Weingast)

POLISCI 420B. Topics in American Political Behavior—For graduate students with some background in American politics embarking on their own research. Current research in American politics, emphasizing political behavior and public opinion. Possible topics: uncertainty and ambivalence in political attitudes, heterogeneity in public opinion, the structure of American political ideology, political learning, the media as a determinant of public opinion, and links between public opinion and public policy. 5 units, Win (Gay)

POLISCI 420C. American Political Institutions—Field seminar. Prerequisites: 420A,B 5 units, Spr (Ferejohn)

POLISCI 422. Campaigns, Elections, and Public Opinion—Research seminar. Frontiers in mass political behavior. Sources include data sets from the 2004 election cycle. Prerequisite: 420B or equivalent. 5 units, Win (Fiorina)

POLISCI 422A,B. Research Seminar in American Political Institutions—Two quarter sequence. Recent work on American institutions including Congress, the courts, and administrative agencies. Some attention to issues of federalism. 5 units (Ferejohn) not given 2004-05

POLISCI 424. Introduction to Political Psychology—Current issues in the study of public opinion and political psychology, focusing particularly on the design and analysis of experiments embedded in survey research. Focus is on reviewing the research literature one week, then analyzing relevant data sets the next. 5 units (Sniderman) not given 2004-05

POLISCI 427. The Political Economy of Immigration—The theoretical and empirical literature on migration politics and the economic causes and effects of migration. The political economy of American immigration in comparative perspective. The immigration dilemmas of governments in W. Europe, Asia, and Australia. 5 units, Spr (Wong)

POLISCI 435. Topics in the Philosophy of Social Science—Topics relevant to present-day political science practice including: the foundation of probability theory; theories of scientific progress; the scope and limits of rational choice theory; and interpretive social science. 5 units (Stone) not given 2004-05

POLISCI 436. Rational Choice—The scope and limits of rational choice theory. Possible topics: explanatory and normative uses of rational choice; self-interest versus altruism; the nature of social norms; incommensurable choices; and bounded rationality. 5 units, Spr (Stone)

POLISCI 440A. Theories in Comparative Politics—Required of all Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of instructor. Theories addressing major concerns in the comparative field including democracy, regime change, the state, revolutions, national heterogeneity and economic performance. 5 units, Aut (Laitin)

POLISCI 440B. Comparative Political Economy—Required of all Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. Micro- and macro-level explanations for variation in economic policies and outcomes. The formation of cleavages and political coalitions, and the economic and political consequences of variation in partisanship, political institutions, regime types, and economic openness. 5 units, Win (Haber)

POLISCI 440C. Methods in Comparative Politics—Required of all Political Science Ph.D. candidates with comparative politics as a first or second concentration; others by consent of instructor. Current methodological standards in comparative politics. Students develop their own research design that meets these standards. 5 units, Aut, Spr (Laitin)

POLISCI 440D. Workshop in Comparative Politics—Faculty, guest speakers, and graduate students conducting research in comparative politics present work-in-progress. Graduate students may enroll for up to 5 total units apportioned by quarter. Auditors welcome. Graduate students whose major or minor field is comparative politics must make at least one presentation to the seminar. 1-5 units, Aut (Díaz-Cayeros, Magaloni), Win (Díaz-Cayeros, Mares), Spr (Magaloni, Mares)

POLISCI 441. Politics of Development—Theoretical understanding of how political processes and institutions are reflected in poverty and inequality; the creation of land, labor, and credit markets; and the configuration of fiscal, monetary, and trade policies. The politics of developing countries with emphasis on contrasts between Latin America and Africa. 5 units (Díaz-Cayeros) not given 2004-05

POLISCI 442. Qualitative and Field Methods—Qualitative methods for data gathering and analysis in political science. Theoretical literature on research design; challenges associated with analysis; techniques for fieldwork. Topics include case selection, levels of analysis, process tracing, ethical concerns in the field, participant observation, interviewing, archival research, survey design, and field experiments. Prerequisites: 440A,B.C. 5 units, Win (Weinstein)

POLISCI 443R. Corporate Restructuring and Governance in Asia—The political economy of state-business relations and attempts at reform. Problems that have emerged since the 1997 financial crisis and the reforms and restructuring that have been introduced. Focus is on the politics that surround the reforms and their consequences for corporate governance. Cases include China, Japan, and Korea. 5 units (Oi) not given 2004-05

POLISCI 443S. Political Economy of Reform in China—The content, process, and problems of China’s post-Mao reforms. Changes in property rights, markets, credit, and the role of the state in economic development. Comparative insights about reform in the Chinese communist system that distinguishes it from the experience of regimes in Eastern Europe and the former Soviet Union. Readings in Chinese and English. Prerequisite: basic knowledge of the government and politics of post-1949 China. 5 units, Spr (Oi)

OVERSEAS STUDIES

Courses approved for the Political Science major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

POLISCI 110P. The European Union: Superpower in the Making?—4-5 units, Win (Brückner)

POLISCI 110X. Globalization: International Challenges, Regional Responses—4-5 units, Spr (Tempel)

POLISCI 111P. The German Economy: Past and Present—4-5 units, Aut (Klein)
POLISCI 112P. A People’s Union? Money, Markets, and Identity in the EU
4-5 units, Aut (Brückner)

FLORENCE
POLISCI 42P. An Extraordinary Experiment: Politics and Policies of the New European Union
5 units, Aut (Morlino)

POLISCI 43P. Democratic Quality in the Contemporary World
5 units, Spr (Morlino)

POLISCI 142P. Contemporary Italian Politics: The Berlusconi Era
5 units, Win (Morlino)

POLISCI 145P. Italy: From an Agrarian to a Postindustrial Society—(Same as HISTORY 106V.)
4 units, Aut (Mammarella)

POLISCI 248P. Citizenship and Constitutionalism in Contemporary Europe—(Same as HISTORY 80V.)
4-5 units, Win (Rakove)

POLISCI 249P. Machiavelli—(Same as HISTORY 189V.)
4-5 units, Win (Rakove)

KYOTO
POLISCI 240P. The Political Economy of Japan
4-5 units, Spr (Hayashi)

POLISCI 247P. Immigration, Citizenship, and Identity in Japan
4-5 units, Spr (MacDougall)

OXFORD
POLISCI 141P. Modern UK and European Government and Politics
4 units, Aut (Capoccia)

POLISCI 148P. European Imperialism and the Third World, 1870-1970—(Same as HISTORY 141V.)
5 units, Spr (Darwin)

POLISCI 244P. British and American Constitutional Systems in Comparative Perspective
5 units, Spr (McMahon)

PARIS
POLISCI 143P. Human Rights in Comparative Perspective
4-5 units, Spr (Remy-Granger)

POLISCI 149P. Europe: Integration and Disintegration of States, Politics, and Civil Societies
4-5 units, Win (Lazar)

POLISCI 241P. Political Attitudes and Behavior in Contemporary France
4-5 units, Aut (Mayer, Lavabre)

SANTIAGO
POLISCI 117P. Latin America in the International System
4-5 units, Win (Fuentes)

POLISCI 242P. Modernization and its Discontents: Chilean Politics at the Turn of the Century
5 units, Spr (Correa)

POLISCI 243P. Political Transition and Democratic Consolidation: Chile in Comparative Perspective
5 units, Aut (Walker)

MORRISON INSTITUTE FOR POPULATION AND RESOURCE STUDIES

Faculty: (Director) Marcus W. Feldman (Biological Sciences); Carl Djerassi (Chemistry), William Durham (Anthropological Sciences), Paul R. Ehrlich (Biological Sciences), Lawrence H. Goulder (Economics, Institute for International Studies), Mary Lake Polan (Obstetrics and Gynecology), Shripad Tuljapurkar (Biological Sciences)

Institute Office: 371 Serra Mall (Gilbert 116)
Mail Code: 94305-5020
Phone: (650) 723-7518
Email: morrinst@stanford.edu
Web Site: http://www.stanford.edu/group/morrinst/

Although Stanford University does not have a degree program in population studies, it does have scholars of international reputation in specialties such as demographic history, demographic methods, economic demography, epidemiology, population biology, population genetics, and the sociology and anthropology of populations.

The Morrison Institute for Population and Resource Studies is an interdisciplinary group serving three major functions: (1) encouraging graduate work in population and resource studies through fellowship grants and supervision, (2) instituting courses and seminars in population and resource studies, and (3) bringing visiting faculty to Stanford to strengthen existing course offerings. The institute also organizes an interdisciplinary Colloquium on Population Studies to introduce upper-division undergraduates and graduate students to issues in population-related specialties.

COURSES

Many departments offer courses focusing on issues related to the study of populations and resource use. The following course is sponsored by the Morrison Institute.

BIOSCI 146. Population Studies—Series of talks by distinguished speakers introducing approaches to population and resource studies.
1 unit, Win (Feldman)
PSYCHOLOGY

Emeriti: (Professors) John H. Flavell, Albert H. Hastorf, Eleanor E. Maccoby, David L. Rosenhan, Roger N. Shepard, Carl Thoresen, Philip G. Zimbardo; (Senior Lecturer) Lyn K. Carlsmith

Chair: Ian H. Gotlib (Autumn), Laura L. Carstensen (Winter, Spring, Summer)

Associate Professors: Anne Fernald (on leave Spring), James J. Gross

Assistant Professors: Lera Boroditsky, Jennifer L. Eberhardt, Kalanit Grill-Spector, Susan C. Johnson (on leave), Natasha Kirkham, Brian Knutson, Benoît Monin, Michael Ranscar, Jeanne L. Tsai (on leave), Anthony Wagner

Courtesy Professors: William C. Dement, Gary H. Glover, Jon Kroosnick, William T. Newsome, Richard J. Shavelson

Lecturers: Joseph L. Brown, H. Jazmin Quill, Jeanne Lepper, Daniel Richardson

Other Affiliation: Albert Ahumada, Jr., Donald Norman, Andrew B. Watson

Director, Bing Nursery School: Jeanne Lepper

Department Offices: Jordan Hall, Building 420

Mail Code: 94305-2130

Department Phone: (650) 725-2400

Web Site: http://psychology.stanford.edu/

Courses given in Psychology have the subject code PSYCH. For a complete list of subject codes, see Appendix.

The courses and research opportunities in the Department of Psychology introduce students to the vast corpus of data on, and explanations of, human nature and human behavior. Through the study of abnormal behavior, aging, child development, cognitive processes, decision making, emotion, group behavior, infancy, language, learning and memory, personality, social perception, visual perception, and other related topics, students are introduced to the properties of sensory, cognitive, and affective systems, and of their interrelationships; to the reciprocal effects of one person on another; and to the effects on behavior of the physical, social, and cultural environment. The research programs of the faculty and students focus on the study of basic psychological mechanisms and, where appropriate, on relating basic research to the analyses and solutions of important societal problems.

The department, housed in Jordan Hall, maintains shop facilities and many computer-equipped laboratories. Bing Nursery School, located on campus at 850 Escondido Road, provides a laboratory for child observation, training in nursery school teaching, and research. It was constructed with funding from the National Science Foundation and a special grant from Mrs. Anna Bing Arnold and Dr. Peter Bing.

The department provides (1) courses designed for the general student, (2) a major program leading to the degree of Bachelor of Arts, including options for honors and a specialization in one of four content area tracks, (3) a minor program, (4) a coterminal master’s degree program leading to the degree of Master of Arts, and (5) programs of graduate study and research leading to the degree of Doctor of Philosophy. Applications are not accepted for the master’s degree except as noted below.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Major Requirements—All students declaring a major in Psychology must complete a minimum of 55 units of course work in Psychology. All courses taken to satisfy the 55-unit requirement must be taken for a grade of ‘C-‘ or better (except for courses offered only on a satisfactory/no credit basis). All majors must take PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable Statistics course. Advanced placement (AP) credit may no longer be used toward the Psychology major requirements. Beyond these two required courses, students must complete at least five of the following ten core Psychology courses, with a minimum of two from each area A and B:

Area A Courses:
- 20. Introduction to Brain and Behavior
- 30. Introduction to Perception
- 40. Introduction to Cognitive Psychology
- 45. Introduction to Learning and Memory
- 50. Introduction to Cognitive Neuroscience (formerly Introduction to Human Neuropsychology)

Area B Courses:
- 60. Introduction to Developmental Psychology
- 70. Introduction to Social Psychology
- 75. Introduction to Cultural Psychology (formerly PSYCH 161)
- 80. Introduction to Personality Psychology
- 90. Introduction to Clinical Psychology
- 95. Introduction to Abnormal Psychology

Students who declared a major in Psychology prior to the 2002-03 academic year may choose any five of the ten core courses.

Students must take one Writing in the Major course (designated WIM) in Psychology, and should check the Stanford Bulletin yearly as these courses may change. The department also strongly recommends that all majors take at least one advanced seminar.

Students may count up to 10 units of independent study and practica (including but not limited to PSYCH 194, 195, 281) toward the Psychology major. Students enrolled in the senior honors program are allowed up to 15 units in independent study and practica, including PSYCH 197 and 198. Any units beyond the limit of 10 or 15 may be counted toward the 180 required for graduation.

Summer Quarter Psychology courses are not equivalent to courses given during the regular academic year and, while applicable toward the 55 units needed for the major, may not be used to fulfill the core course requirement. Additionally, a course taken during the Summer Quarter cannot be used to replace the grade of a non-Summer Quarter course, even if the title and units of the two courses are the same.

Beyond the Minimal Requirements—The following recommendations may be helpful to students who wish to plan a program which goes beyond the minimal requirements listed above:

1. Within the general major, the student may take advanced undergraduate or graduate courses, including seminars. The student may also take advantage of widespread opportunities for directed research, working closely with individual faculty and graduate students.
2. The student may apply to the Senior Honors Program, described below.
3. The student may elect to pursue one of four specialization tracks: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience, described below.

The training obtained from the pursuit of any of these options is valuable not only for students considering graduate work in psychology, but also for those thinking of professional careers outside of psychology in fields such as business, counseling, education, law, or medicine.

MINORS

Declaration—Students who wish to declare a minor field of concentration in Psychology must do so no later than the deadline for their application to graduate.

Requirements—Completion of a minimum of seven courses in Psychology is required for the minor. In addition to PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable Statistics course. Advanced placement (AP) credit may no longer be used toward the Psychology minor. The minor must include three of ten core courses, with a minimum of one from each of two areas
SCHOOL OF HUMANITIES AND SCIENCES

SPECIALIZATION TRACKS

may be counted toward the Psychology minor. Both majors and minors toward their major at Stanford. No more than 10 units of transfer credit toward their minor requirements. To have a course evaluated, students complete transcript from the External Credit Evaluation section showing the number of Stanford units granted for the course.

Psychology majors must complete at least 28 units of course work toward their major at Stanford. No more than 10 units of transfer credit may be counted toward the Psychology minor. Both majors and minors may use only one transfer course towards fulfilling the core course requirements. Additional courses may be used to fulfill the 55 unit requirement, but do not count as core courses.

SPECIALIZATION TRACKS

Students in the major program, including those in the Senior Honors Program, may elect to specialize in one of four tracks: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience. Specialization tracks consist of a coherent set of courses leading to advanced undergraduate or even graduate level courses in an area. In the ideal case, the student who specializes would acquire an understanding of a range of psychological processes, as well as an appreciation of the significance of these processes in the chosen area of application. In this way, specialization could facilitate the student’s preparation for a professional career in, for example, medicine, business, or counseling, as well as for graduate work in Psychology.

Specialization in a track is optional, although students who do not wish to complete all the requirements for a track may still want to use the track as a guideline for an integrated program in Psychology. Students who choose to complete a specialization track must meet the requirements for the major plus the additional requirements designated for the track. Typically the courses required for a track include one or two required courses, four to six recommended courses in Psychology, one or two advanced seminars, and three to four courses in related disciplines. Psychology courses completed for the track count toward satisfying the major requirements, but courses from other departments listed for the tracks do not unless they are designated as approved for major requirements. The Mind, Culture, and Society track includes at two quarter research practicum and students are encouraged to apply to the track by Autumn Quarter of their junior year. Application forms are available from the student services office. There is no application for the other tracks, but all tracks must be declared on Axess. Completion of a track is noted on a student’s transcript, but not on the diploma. Information about the required and recommended courses for each track is available from the student services office.

HONORS PROGRAM

The senior honors program is designed for exceptionally able Psychology majors who wish to pursue a year of intensive supervised independent research. Admission to the program is made at the end of the student’s junior year on the basis of (1) excellent academic performance, (2) previous research experience, and (3) recommendations by faculty and/or graduate students. An information meeting about the program is held in Winter Quarter. Applications are available late Spring Quarter from and are to be turned in to the student services office with a current transcript by June 30 prior to the student’s senior year.

Students interested in the program should involve themselves in research as early as possible and should acquire a broad general background in Psychology, including statistics, and a deep background in their chosen area. The honors program is particularly appropriate for students planning to go to graduate school in Psychology or in other social sciences, as well as in computer science, business, law, and medicine.

During Autumn Quarter of their senior year, honors program students participate in a weekly seminar. Initially, discussions are on general methods and issues in psychological research, but most of the sessions are devoted to discussions of students’ presentations of their proposed research. During the quarter, students meet with their advisers to develop their experimental program and begin data collection. At the end of Autumn Quarter, students turn in a written proposal. Winter and Spring quarters are devoted to completing the research, analyzing and making sense of the data, and writing the thesis, which is submitted mid–May. Students give oral presentations of their projects at the annual Honors Convention, scheduled for the day between classes and exams. This convention is attended by undergraduates, graduate students, and faculty.

GRADUATE PROGRAMS

MASTER OF ARTS

The Department of Psychology normally offers a Master of Arts degree only to students concurrently enrolled in its Ph.D. program or to students currently pursuing Stanford B.A. or M.A. degrees. Application to the program is by Psychology faculty nomination only. All applicants must satisfy University residency requirements for the degree and are responsible for consulting with their primary departments or the Financial Aid Office about the effects of the proposed program on their current funding. General University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

Stanford undergraduate students who would like advanced training in Psychology may apply for a coterminal M.A. degree in Psychology. To do so, students should consult with the student services officer in the department. Along with a coterminal program application, applicants must submit (1) a statement of purpose, (2) a preliminary program plan specifying the courses in which they intend to enroll to fulfill degree requirements, (3) at least two letters of recommendation from Stanford faculty members familiar with their academic work, (4) a current Stanford undergraduate transcript, and (5) a written nomination by a member of the Psychology faculty willing to serve as the student’s master’s degree adviser. This program is limited in size and admission is selective. Applicants must have earned a minimum of 120 units toward graduation as shown on the undergraduate transcript. The department’s deadline for the submission of an application to the coterminal program is January 10.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

In exceptional cases, students concurrently enrolled in another doctoral or professional program at Stanford may also apply for the M.A. degree. Such applicants also consult with the department’s student services officer.

Students must complete at least 45 units of Psychology courses for the degree. (For coterminal degree students, course work for the master’s degree may not duplicate courses taken for the undergraduate degree.) Of these 45 units, at least 27 must be in Psychology courses numbered 200 or above. Units from research, teaching, independent study, and lab courses, such as PSYCH 222, 258, 269, 275, 281, 282, and 297, may not be counted toward these 27 units. Two of the graduate courses of at least 3 units each (one from Area A and one from Area B below) are required. In addition, at least one upper division statistics course is required. The course must be approved by the student’s adviser. It is recommended that all coterminal students enroll in PSYCH 196, Contemporary Psychology.

All courses to be counted toward the master’s degree must be passed with a grade of ‘B’ or better (unless the course is offered only on a satisfactory/no credit basis). Units from research, teaching, independent study, and lab courses, such as PSYCH 222, 258, 269, 275, 281, 282, and 297, may be counted toward the remaining required 18 units. Psychology
courses numbered in the 100-level and courses from other Stanford departments may be used to satisfy the remaining 18 units. Courses specifically for undergraduates (i.e., undergraduate honors courses) may not be counted toward the master’s program unit requirements. Demonstration of competence in the design and execution of psychological research is also required for receipt of the master’s degree. This demonstration entails completion of a master’s thesis. If the student is currently doing a senior honors thesis, this honors thesis may be accepted as proof of research competence provided the honors thesis is judged to be master’s level research by the student’s adviser and the department’s Committee on Graduate Studies. If the student has just completed an honors thesis in Psychology in the prior year, the student would be expected to continue independent research during the coterminous year and to submit thesis research in a written report which, together with the completed honors thesis, would constitute the master’s thesis. All students are required to make an oral presentation of their research during the Spring Quarter, and to present their thesis or written report by June 1.

Area A Courses:
- 202. Cognitive Neuroscience
- 205. Foundations of Cognition
- 210. Memory and Learning
- 214. Psycholinguistics
- 221. Applied Vision and Image Systems
- 228. Ion Transport
- 251. Affective Neuroscience
- 261. Learning and Cognition in Activity
- 277. Seminar on Emotion

Area B Courses:
- 211. Developmental Psychology
- 212. Social Psychology
- 213. Personality and Psychopathology
- 215. Mind, Culture, and Society
- 216. Personality Disorders
- 217. Topics and Methods in Cultural Psychology
- 259. Emotions: History, Theories, Research
- 271. Applications of Social Psychology

**DOCTOR OF PHILOSOPHY**

There are no specific course requirements for admission to the doctoral program. However, an applicant should have research experience as an undergraduate, as well as the equivalent of an undergraduate major in psychology. The major focus of the doctoral program is on research training, and admission is highly selective.

Applicants for admission must submit their scores on the Graduate Record Examination (both general and psychology subject tests) as part of the application. This examination may be taken at most universities and colleges.

General University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

In addition to fulfilling Stanford University requirements for the degree, the following departmental requirements are stipulated.

**First-Year Course Requirements**—During the first year of graduate study, the student must take 207, Proseminar for First-Year Ph.D. Graduate Students, at least one approved graduate statistics course, and at least two core courses from the list below:
- 202. Neuroscience
- 205. Foundations of Cognition
- 211. Developmental Psychology
- 212. Social Psychology
  or 215. Mind, Culture, and Society
- 213. Personality

Students in each area may be required to take up to two additional non-core graduate courses in their area of specialization.

The student is expected to spend at least half of the time in research from the beginning of the first year of graduate study to the completion of the Ph.D., normally taking no more than 10 units of course work each quarter. At the end of the first year of graduate study, the student must file with the department a written report of the first-year research activities. The deadline for filing this report is June 1.

**Second-Year Course Requirements**—By the end of the second year of graduate study, the student must complete the core courses listed above and take a second approved graduate course in statistics.

**Third-Year Major Area Paper**—During the first week of Autumn Quarter of the fourth year, the student must turn in a Conceptual Analysis of the Dissertation Area (CADA). This paper provides a general framework for the research topic of the dissertation, addresses the central issues within the specialty area, and reviews the pertinent literature. Typically, the analysis has the kind of scope found in the opening chapters of the more traditional dissertations, but the exact format and scope of the paper is a joint decision made by student and adviser.

Prior to Autumn Quarter, the student should select two faculty members to read this paper and give feedback and commentary on it. These should be two faculty members most likely to serve later on the orals committee of the dissertation. A portion of the paper, revised as appropriate, can then become the first section of the actual dissertation proposal.

If the student should radically change the area of the dissertation research after the CADA has been written, the formal CADA procedure does not need to be repeated for the second dissertation topic. The student is still expected, however, to be knowledgeable about the literature and problems of any research topics being pursued for the dissertation.

**Minor Requirements**—The candidate must complete either a University minor satisfactory to the minor department, or elect to have the minor waived by selecting 12 upper-level units. These 12 units may be fulfilled by either (a) non-core graduate courses in Psychology, excluding any non-core graduate courses required by a particular area, or (b) graduate-level courses in other departments comparable in quality to Psychology’s graduate courses. If there is any question about comparability, students should consult the Graduate Education Committee before taking the course.

**Dissertation Reading Committee**—The candidate must select a dissertation reading committee satisfactory to the department. The minimum membership of this committee must be (1) the principal dissertation adviser, (2) a second member from within the department, and (3) a third member chosen from Psychology or another department.

**Orals**—The candidate must pass the University oral examination, which is based on the dissertation proposal, not on the completed dissertation. The reason for this policy is to permit the oral examination to serve the function of guiding and improving the proposed research. This function can best be served if the oral examination is scheduled early in the year in which the dissertation research is conducted. It is therefore expected that the oral examination be taken by the end of the Autumn Quarter of the fourth year.

**Dissertation Requirements**—The candidate must complete a dissertation satisfactory to the dissertation reading committee.

Ph.D. candidacy expires five years after admission to candidacy at the end of the second year of study. Reapplication requires department reexamination.

**STUDENT EVALUATIONS**

**First-Year Evaluation**—It is the department’s policy to evaluate the progress of each graduate student at the end of the first year of graduate study. As part of the procedure, each student is required to file with the department a report of the first-year research activities.

Students should discuss this report and the evaluation procedures with their adviser as early as possible in their first year. The report is due on June 1. If the student fulfills the academic promise displayed upon entrance, he or she is invited to continue to the doctorate.

The first-year evaluation is primarily based on three factors:
1. quality of research carried out in the first year
2. performance in courses (especially required courses)
3. recommendations of the adviser (including a commitment on the part of that adviser to continue in that role)

**Second-Year Evaluation**—A similar evaluation is conducted at the end of the second year of graduate training involving the same criteria.
as the first year; however, the student is not required to submit a paper. Students who do not make satisfactory progress during the second year may be dropped from the program.

THE DOCTORAL TRAINING PROGRAM

As indicated by the requirements described above, a student may concentrate in any one of several areas within psychology. Regardless of area, however, the training program places emphasis on the development of research competence, and students are encouraged to develop those skills and attitudes that are appropriate to a career of continuing research productivity.

Two kinds of experience are necessary for this purpose. One is the learning of substantial amounts of technical information. A number of courses and seminars are provided to assist in this learning, and a student is expected to work out a program, with his or her adviser, to attain this knowledge in the most stimulating and economical fashion.

A second aspect of training is one that cannot be gained from the courses or seminars. This is firsthand knowledge of, and practical experience with, the methods of psychological investigation and study. These methods include ways of behaving with the people or animals being studied. Students are provided with whatever opportunities they need to reach those levels of competence representative of doctoral standing. Continuing research programs, sponsored by members of the faculty, offer direct opportunities for experience in fields represented by the faculty's many research interests.

Each student achieves competence in unique ways and at different rates. Each student and adviser share in planning a program leading to the objectives discussed. The student is expected to spend half of his or her time on research and normally takes no more than 10 units of course work per quarter.

TEACHING REQUIREMENT

The department views experience in supervised teaching as an integral part of its graduate program. Regardless of the source of financial support, all students serve as teaching assistants for five Psychology courses during their graduate study. Of the courses, two should be PSYCH 1, Introduction to Psychology, and/or PSYCH 10, Statistical Methods. Students are discouraged from participating in teaching during the first year of graduate study. Students typically progress from closely supervised teaching to more independent work. Some students may be invited to offer a supervised, but essentially independent, seminar during their final year of graduate study.

PH.D. MINOR

Candidates for the Ph.D. degree in other departments may elect a minor in Psychology. To obtain a minor, the student must complete 20 units of course work at the graduate level in the Department of Psychology, excluding PSYCH 275 (graduate-level research). Crosslisted graduate courses can be used to satisfy this requirement. All courses counting toward the Ph.D. minor must be passed with a grade of “B-” or better (unless the course is offered only on a satisfactory/no credit basis).

COGNITIVE SCIENCE PROGRAM

Psychology participates, along with the departments of Computer Science, Linguistics, and Philosophy, and the School of Education, in an interdisciplinary program of cognitive science. The program is intended to provide students with an interdisciplinary education as well as a deeper concentration in psychology. Doctoral students in Psychology are eligible to participate in the cognitive science program. Students who complete the requirements receive a special designation in cognitive science along with the Ph.D. in Psychology. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of psychology. For information or course approval, see the student services officer.

PSYCHOLOGY COLLOQUIUM

The Psychology Colloquium meets on most Wednesday afternoons at 3:45. Speakers from Stanford and other institutions present topics of current interest. Graduate students are expected to attend.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

SUMMER SESSION

The courses announced for the Summer Session are those regularly scheduled in the department curriculum. Additional courses may be announced by Stanford Summer Session on their web site at http://summer.stanford.edu/.

STANFORD INTRODUCTORY SEMINARS

PSYCH 2N. Aging and Time Perspective—Stanford Introductory Seminar. Preference to sophomores. Debates concerning how biology guides linguistic development; theories about the nature and origins of human language abilities; and experimental research on the emergence of understanding in infancy.

3 units, Win (Carstensen)

PSYCH 7Q. Language Acquisition—Stanford Introductory Seminar. Preference to sophomores. Debates concerning how biology guides linguistic development; theories about the nature and origins of human language abilities; and experimental research on the emergence of understanding in infancy.

3 units, Win (A. Fernald)

PSYCH 8N. Life Span Development—Stanford Introductory Seminar. People continue to change in systematic ways throughout life, but developmental psychology has focused mostly on childhood. Focus is on conceptual models that direct developmental research on adulthood and old age, and the empirical literature concerning developmental changes in cognition, motivation, and emotion.

3 units, Spr (Carstensen)

PSYCH 9N. The Social Psychology of Race, Gender, and Culture—Stanford Introductory Seminar. Preference to freshmen. Focus is on the role that one’s social context, or one’s position in society and social identity, plays in shaping the psychology of the individual and the collective psychology of society more generally.

3 units, Spr (Steele)

PSYCH 11N. The Origin of Medical Life—Stanford Introductory Seminar. Preference to freshmen. Fundamental questions about the nature of human cognition require discovering how thinking originates and the nature of thinking in infancy. Recent advances in psychological theory that permit answers to once intractable questions. Methods, hypotheses, and evidence about how the human mind develops. Students observe ongoing research in cognitive development.

3 units, Win (Markman)

PSYCH 12Q. Emotion—Stanford Introductory Seminar. Preference to sophomores. What is emotion? Why do people have emotions? Can people change their emotions? How do people’s emotions differ? Can emotions make people sick? Focus is on experimentally tractable questions, and empirical research findings relevant to these questions, emphasizing critical thinking and writing skills. Limited enrollment.

2 units, Aut (Gross)

OPEN TO ALL STUDENTS

Additional courses not listed here are frequently offered by selected postdoctoral or terminal Ph.D. personnel in the areas of their special research. These are listed in the quarterly Time Schedule; the course descriptions are circulated in advance.

PSYCH 1. Introduction to Psychology—Human behavior and mental processes including the nervous system, consciousness, learning, memory, development, emotion, psychopathology, interpersonal process, society, culture, and current research.

5 units, Aut (Quill), Win (Quill, Kirkham), Spr (Quill, Monin)
PSYCH 10. Introduction to Statistical Methods: Precalculus—(Same as STATS 60/160.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:2c
3 units, Aut (Walther), Win (Thomas), Spr, Sum (Staff)

PSYCH 20. Introduction to Brain and Behavior—(Enroll in BIOSCI 20.)
3 units, Aut (R. Fernald) alternate years, not given 2005-06

PSYCH 30. Introduction to Perception—Perceptual psychology and sensory neuroscience, emphasizing vision and hearing. Topics include anatomy and physiology of the eye and ear, and of the visual and auditory areas of the brain, pitch and loudness perception, speech perception, color vision, depth and motion perception, and object and face recognition. Recommended: 1. GER:2a
3 units, Win (Grill-Spector)

PSYCH 40. Introduction to Cognitive Psychology—Survey and analysis of major topics in cognitive psychology, including perception, memory, problem solving, and reasoning. Emphasis is on contemporary research and theory. Recommended: 1 and 10. GER:2a
4 units, Win (Davies)

3 units, Spr (Wagner)

4 units, Win (Gabrieli)

PSYCH 60. Introduction to Developmental Psychology—Psychological development from birth to adulthood, emphasizing infancy and the early and middle childhood years. The nature of change during childhood and theories of development. Recommended: 1. GER:3b,WIM
3 units, Win (Flavell)

PSYCH 60A. Introduction to Developmental Psychology Section—Guided observation of children age 2-6 at Bing Nursery School. Corequisite: 60.
2 units, Win (Winters, Hartman)

PSYCH 70. Introduction to Social Psychology—A survey of theory and empirical research in social psychology: conformity, obedience, helping, and aggression; attitudes, persuasion, identity and roles; person perception, attribution, and social judgment; interpersonal and intergroup relationships, social conflict, prejudice, and stereotyping. Original research proposal. Recommended: 1. GER:3b,WIM
4 units, Spr (J. Brown)

PSYCH 75. Introduction to Cultural Psychology—The cultural sources of diversity in thinking, emotion, motivation, self, personality, morality, development, and psychopathology. Recommended: 1. WIM
5 units, Spr (Markus) alternate years, not given 2005-06

PSYCH 80. Introduction to Personality Psychology—Concepts and research methods, major theoretical approaches, and related empirical findings. The psychodynamic, trait, biological, humanistic, behavioral, social learning, cognitive, and cultural perspectives. Recommended: 1. GER:3b
3 units, Win (Knutson)

PSYCH 90. Introduction to Clinical Psychology—Topics include the history of clinical psychology, models and assessment of personality, behavior, cognition, psychopathology, and approaches to the treatment of abnormal behavior. Emphasis is on current theory, research, issues in, and the role of clinical psychology in contemporary society. Recommended: 1. GER:3b
3 units, Aut (Gotlib)

PSYCH 110. Research Methods and Experimental Design—Structured research exercises and design of an individual research project. Prerequisite: consent of instructor. WIM
5 units, Spr (M. Lepper)

PSYCH 120. Cellular Neuroscience: Cell Signaling and Behavior—Neural interactions underlying behavior. Prerequisites: 1 or basic biology. GER:2a
4 units (Wine) not given 2004-05

PSYCH 121. Ion Transport and Intracellular Messengers—Graduate students register for 228. Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Lab demonstrations and hands-on introduction to techniques such as patch clamping. Recommended: 120 or introductory course in biology or human biology.
3 units, Spr (Wine)

PSYCH 122. Human Behavioral Biology—(Enroll in BIOSCI 150/250.)
3-6 units (Sapolsky) alternate years, given 2005-06

PSYCH 129. Reading, Science, Education, and Politics—Controversies concerning how children are taught to read emphasizing those with reading disabilities; the reading wars. The intellectual foundation of reading curriculum development. How scientists, educators, and policy makers can work together to produce an effective curriculum. Neurological properties of students who have extraordinary difficulty in learning to read, and what might be done to assist them.
3 units, Spr (Wandell, Dougerty)

PSYCH 130. Introduction to Cognitive Science—(Same as LINGUIST 144, SYMBSYS 100, PHIL 190.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:3b
4 units, Spr (Jurafsky, Richardson)

PSYCH 131. Language and Thought—The psychology of language, including production and understanding in utterances; from speech sounds to speaker’s meaning; children’s acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1.
GER:3b
4 units, Aut (H. Clark)

PSYCH 133. Human Abilities—(Same as EDUC 255.) Psychological theory and research on human cognitive abilities; their nature, development, and measurement; and their importance in society. Persistent controversies and new areas of research, recent perspectives on the nature-nurture debate and the roles of genetics, health and education in shaping HCAs. Prerequisite: PSYCH 1 or equivalent. (PSE) GER:3b
3 units, Win (Shavelson)

PSYCH 134. Seminar on Language and Deception—Deceptive, exploitative, and other noncooperative uses of language. How is language used to deceive or exploit? Where are these techniques practiced and why? What are the personal, ethical, and social consequences of these practices? Prerequisite: 131, LINGUIST 1, or PHIL 181. GER:3b
3 units, Win (H. Clark)

PSYCH 137. Birds to Words: Cognition, Communication, and Language—Although the communicative abilities of all animals are determined by their genetic endowment, and human communicative
skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:3b

3 units, Win (A. Fernald, Ramscar)

**PSYCH 140. Research Methods in Developmental Psychology**—Conceptual and methodological issues related to research on early development, training in experimental design, lab, and observational procedures, and the collection, analysis, and interpretation of data. Students conduct supervised experiments with infants and preschoolers at the Center for Infant Studies in the Department of Psychology and at Bing Nursery School. Limited enrollment. Lab required. GER:3b

5 units (Markman, Johnson) not given 2004-05

**PSYCH 141. Cognitive Development**—Topics and issues on cognitive development, developmental changes in memory, conceptual organization, logical reasoning, and communication skills. Prerequisite: 1. GER:3b

3 units, Aut (Markman)

**PSYCH 143. Developmental Anomalies**—(Graduate students register for 239.) Neurodevelopmental disorders and impairments. What can the sparing of isolated mental abilities in otherwise devastating disorders (or vice versa) tell about the mind and its development in the normal case? Disorders and impairments: autism, congenital blindness, deafness, dyslexia, and Williams syndrome. Prerequisites: 60, 141 or LINGUIST 1. GER:3b

3 units, Aut (Markman) not given 2004-05

**PSYCH 145. Seminar on Infant Development**—For students interested in research skills. Focus is on conceptual and methodological issues related to research on early development; training in experimental design, lab, and observational procedures; and the collection, analysis, and interpretation of data. Limited enrollment.

1-2 units, Aut (A. Fernald)

**PSYCH 146. Observation of Children**—Learning about children through guided observations at Bing Nursery School, Psychology’s lab for research and training in child development. Physical, emotional, social, cognitive, and language development. Recommended: 60. GER:3b

3-5 units, Aut, Spr (Winters, Hartman)

**PSYCH 147. Development in Early Childhood**—Supervised experience with young children at Bing Nursery School. 3 units require 4 hours per week in Bing classrooms throughout the quarter; 4 units require 7 hours per week; 5 units require 10.5 hours per week. Weekly seminar on developmental issues in the teaching-learning environment at Bing School. Prerequisite: 60 or 146, or consent of instructor.

3-5 units, Aut, Win, Spr (J. Lepper)

**PSYCH 149. The Infant Mind: Cognitive Development over the First Year**—How do babies learn so much in so little time? Emphasis is on cognitive and perceptual development, and the relationship between brain and behavior in infancy. Prerequisite: 1. Recommended: 60 or 141. GER:3b

3 units, Spr (Kirkham)

**PSYCH 152. Mediation for Dispute Resolution**—(Same as EDUC 131X.) Mediation is more effective and less expensive than other forms of settling disputes such as violence, lawsuits, or arbitration. How mediation can be structured to maximize the chances for success. Simulated mediation sessions.

3 units, Aut (Krambolz)

**PSYCH 155. Introduction to Comparative Studies in Race and Ethnicity**—(Same as CSRE 196C, ENGLISH 172D.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:3b

5 units (Markus, Moya) alternate years, given 2005-06

**PSYCH 156. Applications of Social Psychology**—(Graduate students register for 271.) The application of social psychological theory and research to evaluating the impact of social interventions, strategies, and shortcomings in personal and social decision making; the effects of mass media and other sources of social persuasion; conflict resolution and negotiation; applications in legal, medical, educational, and business settings. Prerequisites: 1 and 10, or consent of instructor.

4 units (Ross) not given 2004-05

**PSYCH 158. Emotions: History, Theories, and Research**—(Graduate students register for 259.) Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction between emotion and cognition.

3 units, Aut (Zajonc)

**PSYCH 161. Emotion**—(Graduate students register for 261.) Overview of the scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas. GER:3b

3 units, Aut (Gross)

**PSYCH 162. The Psychology of Gender**—Research and theory on the socialization and psychological development of women and men. The biological, cultural, and social factors that influence gendered behavior. GER:4c

4 units, Win (Carstensen)

**PSYCH 163. Interpersonal Basis of Abnormal Behavior**—The role of interpersonal problems and processes in producing forms of psychopathology including neurotic reactions and schizophrenia. Conventional empirical methods clarify the origin, nature, and treatment of emotional and personality disorders. GER:3b

3 units (Horowitz) not given 2004-05

**PSYCH 165. Peace Studies**—(Same as POLISCI 111.) Interdisciplinary. The challenges of pursuing peace in a world where the sources of conflict are many, and regional, ethnic, and religious antagonisms are rising. The art of creating and maintaining peace from historical, social, psychological, and moral perspectives. Goal is to illustrate the contributions of academic disciplines and critical analyses to the study of peace, and to prepare students to think critically and to act responsibly and effectively on behalf of peace. Students explore a conflict and offer contributions to the building of peace. Limited enrollment. GER:3b

5 units, Spr (Bland, Ross, Holloway)

**PSYCH 166. Seminar on Personal and Social Change**—Social cognitive approaches to personal and social change. Applications of socio-cognitive theory to the modification of psychological dysfunctions in familial, educational, medical, and organizational settings. Ethical and value issues in behavior change.

3 units, Spr (Bandura)

**PSYCH 167. Seminar on Aggression**—The causes and modification of individual and collective aggression. Major issues in aggression: social labeling of injurious conduct, social determinants of aggression, effects of the mass media, institutionally sanctioned violence, terrorism, psychological mechanisms of moral disengagement, modification of aggressive styles of behavior, and legal sanctions and deterrence doctrines.

3 units, Win (Bandura)

**PSYCH 168. Emotion Regulation**—(Graduate students register for 268.) GER:3b

3 units, Win (Gross)

**PSYCH 171. Research Seminar on Aging**—Two quarter practicum exposes students to multiple phases of research by participating in a laboratory focusing on social behavior in adulthood and old age. Review of current research; participation in ongoing data collection, analysis, and interpretation. Prerequisites: 1, research experience, and consent of instructor.

4 units, Aut, Win, Spr (Carstensen)
PSYCH 173. Mind, Culture, and Society Research Lab—For juniors in the Mind, Culture, and Society track. Offered over two quarters. Lecture series on current research topics. Research project in second quarter.

2-3 units, Win, Spr (Markus)

PSYCH 176. Carl Jung and Analytical Psychology—Introduction to the person of Jung, his seminal philosophical perspectives, and their impact on modern thought and life. The formation of analytical psychology with regards to Jung’s past relationship with Freud and later emergence as a prominent 20th-century thinker. Emphasis is on the archetypal themes of the shadow, anima/animus (feminine/masculine), and puér/senex (youth/elder). The function of dreams and the interplay between the Jungian paradigm and spirituality. GER:3b

4 units, Aut (Daher)

PSYCH 177. Senior Seminar on Mind, Culture, and Society—For seniors in the Mind, Culture, and Society track.

3 units, Aut (Markus)

PSYCH 178. Stigma and Marginality—(Graduate students register for 263.) The perceptions and strategies of the targets of prejudice and discrimination, with emphasis on race and ethnicity. Topics: social perceptions and the judgments of targets, racial identity, behavioral consequences of prejudice and discrimination, and legal/policy implications. Readings from social psychology, African American studies, sociology, and law. Limited enrollment. GER:3b

3 units (Eberhardt) not given 2004-05

PSYCH 180. Social Psychological Perspectives on Stereotyping and Prejudice—(Graduate students register for 245; see 245.)

3 units (Eberhardt) not given 2004-05

PSYCH 185. Contemporary Issues in Peace Studies—(Graduate students register for 285.) Interdisciplinary. The challenges of pursuing peace in a world of conflict and regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Current research in social psychology, political science, international relations, and negotiation theory. Student involvement in real-world efforts to identify and overcome the barriers that impede a peace settlement. Prerequisite: consent of instructor. GER:3b

3 units, Spr (Bland, Ross, Holloway)

PSYCH 187. Exploring Human Nature: A Life-Changing Experience—Experiential projects concerning: ethics; social influence, mind control, and cults; evil and terrorism; time perspective and hypnosis; and shyness, liking, loving, and human sexuality. Students examine and alter some basic aspect of their lives. Expert speakers. Prerequisite: 1.

4 units, Win (Zimbardo)

PSYCH 192. Career and Personal Counseling—(Same as EDUC 134/234.) Methods of integrating career and personal counseling with clients and counselors from differing backgrounds. Practice with assessment instruments, Case studies of bicultural role conflict. Informal experience in counseling. (PSE)

3 units, Spr (Kramholz)

PSYCH 194. Reading and Special Work—Independent study. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr, Sum (Staff)

PSYCH 195. Special Laboratory Projects—Independent study. May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.

1-6 units, Aut, Win, Spr, Sum (Staff)

PSYCH 196. Contemporary Psychology: Overview of Theory, Research, Applications—A capstone experience for juniors and seniors that bridges previous course work with future research opportunities. Lectures representing each of the department’s areas: social, personality, developmental, neuroscience, and cognitive psychology. Each Tuesday, a different faculty member presents his or her current psychological research and engages with students on issues related to that field of study. Thursday discussions led by advanced graduate students working in the field represented by that week’s guest. Students are guided by the instructors to write their own research proposal. Small grants available to students interested in conducting a pilot study of their proposed research. Limited enrollment. GER:3b

3 units, Aut (Thomas)

PSYCH 197. Advanced Research—Limited to students in senior honors program. Weekly research seminar, independent research project under the supervision of an appropriate faculty member. A detailed proposal is submitted at the end of Autumn Quarter. Research continues during Winter and Spring quarters as 198. A report demonstrating sufficient progress is required at the end of Winter Quarter.

1-4 units, Aut (Eberhardt)

PSYCH 198. Senior Honors Research—Limited to students in the senior honors program. Work includes finishing the research and data analysis, written thesis, and presentation at the Senior Honors Convention.

1-4 units, Win, Spr (Eberhardt)

PRIMARILY FOR GRADUATE STUDENTS

Undergraduates admitted only by consent of instructor.

3 units, Spr (Gabrieli, Wandell, Grill-Spector, Wnbe)

PSYCH 204A. Computational Neuroimaging—(Same as NBIO 204.) Advanced seminar. For students working with functional magnetic resonance imaging (fMRI). Review of current understanding of the physiological basis of the signal measured using fMRI. Possibilities for experiment design and interpretation of the signal with respect to other physiological and behavioral measurements. Emphasis is on experimental design, software tools, and pulse sequences for fMRI experiments.

1-3 units, Aut (Wandell) alternate years, not given 2005-06

PSYCH 204B. Computational Neuroimaging: Analysis Methods—Data analysis techniques to analyze neuroimaging data using real and simulated data sets. Rethinking basic assumptions. Topics include: linearity of the fMRI signal; time versus space resolution tradeoffs; and correlation analysis. Reverse engineering: can cognitive states be predicted from brain activation?

1-3 units (Wandell, Grill-Spector) alternate years, given 2005-06

PSYCH 205. Foundations of Cognition—Topics: attention, memory, language, similarity and analogy, categories and concepts, learning, reasoning, and decision making. Emphasis is on processes that underlie the capacity to think and how these are implemented in the brain and modeled computationally. The nature of mental representations, language and thought, modular versus general purpose design, learning versus nativism. Prerequisite: 207 or consent of instructor.

1-3 units, Aut (Ramscar)

PSYCH 207. Professional Seminar for First-Year Ph.D. Graduate Students—Required of and limited to first-year Ph.D. students in Psychology. Survey of major issues in contemporary psychology with their historical backgrounds.

2-3 units, Aut (Carstensen, Boroditsky, Dweck)

PSYCH 210. Foundations of Memory—Memory and human cognition. Behavioral and neural data indicate that memory is not a unitary faculty but consists of multiple systems that support learning and remembering, each with its own processing characteristics and neurobiological substrates. What is known about memory emphasizing the cognitive and neural architectures of working, declarative, and non-declarative memory.

3 units, Aut (Wagner)
PSYCH 211. Developmental Psychology—Prerequisite: 207 or consent of instructor. 1-3 units, Win (Markman, A. Fernald, Kirkham)

PSYCH 212. Social Psychology—Prerequisite: 207 or consent of instructor. 1-3 units, Aut (M. Lepper, Ross)

PSYCH 213. Personality and Psychopathology—Survey of theory and research in personality and psychopathology. Prerequisite: 207 or consent of instructor. 1-3 units, Spr (Horowitz)

PSYCH 214. Psycholinguistics—Prerequisite: graduate standing in Psychology or consent of instructor. 1-3 units (H. Clark) not given 2004-05

PSYCH 215. Mind, Culture, and Society—Social psychology from the context of society and culture. The interdependence of psychological and sociocultural processes: how sociocultural factors shape psychological processes, and how psychological systems shape sociocultural systems. Theoretical developments to understand social issues, problems, and policy. Works of Baldwin, Mead, Asch, Lewin, Burner, and contemporary theory and empirical work on the interdependence of psychology and social context as constituted by gender, ethnicity, race, religion, and region of the country and the world. Prerequisite: 207 or consent of instructor. 3 units, Win (Markus, Steele)

PSYCH 217. Topics and Methods in Cultural Psychology—Discussion and critical examination of conceptual and methodological issues in cultural psychology. Possible topics: the mechanisms by which culture influences psychological and social processes in monocultural and multicultural contexts; the relations between culture and biology; the measurement of culture; the development of culturally appropriate instruments and tasks; and the use of various questionnaire, interview, observational, and physiological methods to study cultural influences on human behavior. 3 units (Tsai) not given 2004-05

PSYCH 219. Topics in Cognition—Prerequisite: consent of instructor. 1-3 units (Tversky) not given 2004-05

PSYCH 220. Topics in Cognitive Development—Prerequisite: graduate standing in Psychology or consent of instructor. 1-3 units, Spr (Markman)

PSYCH 221. Applied Vision and Image Systems—The design and control of color imaging devices (display, printers, cameras, and scanners). Aspects of human vision relevant to software and hardware design. Topics: digital halftoning, color calibration, color metrics, flicker sensitivity, motion compensation, human spatial resolution, visual masking, JPEG principles, printer design, scanner design, and color software architecture. Lab. 1-3 units (Wandell) not given 2004-05

PSYCH 222. Graduate Seminar in Cognitive Neuroscience—For students who are already or planning to become involved in research. Critical reviews of theory and ongoing research in human cognitive neuroscience. Prerequisite: consent of instructor. 1-2 units, Aut, Win, Spr (Gabrieli)

PSYCH 223. Social Norms—(Same as OB 630.) Research and theory on the origins and function of social norms. Topics include the estimation of public opinion, the function of norms as ideals and standards of judgment, and the impact of norms on collective and individual. How to identify and formulate tractable research questions. 4 units (Miller) not given 2004-05

PSYCH 224. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives—(Enroll in COMM 239.) 4 units, Spr (Krosnick)

PSYCH 225. Theories of Thought—Mechanisms and patterns underlying human thought and the prospects for thinking machines. Topics: use of concepts and symbols; detection of patterns and inferences regarding causal relationships; learning and memory; reason and creativity; consciousness; emotion and decision making; neural network theory; and artificial intelligence. Perspectives include psychology, evolutionary theory, cognitive science, neurobiology, philosophy, and computer science. 3 units, Win (Wandell, Pabo)

PSYCH 227. Seminar in Psycholinguistics: Psycholinguistics of Conversational Speech—(Same as LINGUIST 247.) Psychological processes for spontaneous, conversational speech. Current theories and issues in production and comprehension. Possible topics include turn-taking, prosody in spontaneous speech, lexical choice, accommodation, collaboration, disfluencies, orientation, grammar, and methodological issues in conversational corpus investigation. 2-4 units, Spr (Jurafsky, H. Clark)

PSYCH 228. Ion Transport and Intracellular Messengers—(Undergraduates register for 121; see 121.) 1-3 units, Spr (Wine)

PSYCH 231. Graduate Seminar on Self-Efficacy—The origins, mediating mechanisms, and diverse effects of people’s beliefs in their efficacy to exercise control over events in their lives. Alternative theories of perceived control; the nature and structure of self-efficacy belief systems; major sources of efficacy beliefs; the processes through which they affect human functioning; developmental analysis of efficacy beliefs over life course; the application of self-efficacy theory to cognitive development, health functioning, clinical dysfunctions, organizational functioning, and athletic performance; the exercise of collective efficacy to accomplish social change. 1-3 units (Bandura) alternate years, given 2005-06

PSYCH 234. Topics in Affective Disorders—Current research topics in the study of affective disorders. Topics: epidemiology and phenomenology of affective disorders, psychological theories of depression, gender differences in affective disorders, cognitive and social functioning of depressed persons, psychobiology of affective disorders, depression in children, postpartum depression, suicide issues in the treatment of depression, and cultural aspects of affective disorders. Prerequisite: graduate standing in Psychology or consent of instructor. 1-3 units (Gotlib) not given 2004-05

PSYCH 235. American Indian Mental Health and Education—(Enroll in EDUC 340X.) 3-5 units, Spr (LaFromboise)

PSYCH 239. Developmental Anomalies—(Undergraduates register for 143; see 143.) 3 units (Johnson) not given 2004-05

PSYCH 240. Language Acquisition I—(Enroll in LINGUIST 140/240.) 4 units, Aut (E. Clark)

PSYCH 241. Language Acquisition II: Advanced Topics in Language Acquisition—(Enroll in LINGUIST 241.) 1-4 units, Win (E. Clark)

PSYCH 243. General Development Seminar—Prerequisite: consent of instructors. 1-2 units, Win (Markman, A. Fernald, Kirkham)

PSYCH 244. Psychology of Aging—Theory and research in gerontology. Normal and abnormal changes that occur in biological, cognitive, and psychological aging. Emphasis is on the environmental factors that influence the aging process. Prerequisite: graduate standing in Psychology or consent of instructor. 1-3 units (Carstensen) alternate years, given 2005-06
PSYCH 245. Social Psychological Perspectives on Stereotyping and Prejudice—(Undergraduates register for 180.) Classic and contemporary social psychological approaches to prejudice and stereotyping. Emphasis is on how stereotypes are employed and maintained, and the influence of stereotyping and prejudice on behavior in domains including education, employment, politics, and law. Limited enrollment. 3 units (Eberhardt) not given 2004-05

PSYCH 248. Introduction to Test Theory—(Enroll in EDUC 252.) 3-4 units (Haertel) not given 2004-05

PSYCH 249A. Problems in Measurement: Item Response Theory—(Enroll in EDUC 353A.) 3 units (Haertel) not given 2004-05

PSYCH 250. High Level Vision—Theories and ongoing research. Topics: behavioral studies pertaining to representation of objects; generalization and invariances; learning new categories; neuropsychological deficits; properties of high level visual areas in monkey and humans; theories and models of object and face recognition. 1-3 units, Aut (Grill-Spector)

PSYCH 251. Affective Neuroscience—Focus is on theory and research in the field of affective neuroscience. Comparative and human research approaches map affective function to both neuroanatomical and neurochemical substrates. Prerequisite: consent of instructor. 3 units, Aut (Knutson)

PSYCH 252. Statistical Methods for Behavioral and Social Sciences—For students who seek experience and advanced training in empirical research. Analysis of data from experimental through factorial designs, randomized blocks, repeated measures; regression methods through multiple regression, model building, analysis of covariance; categorical data analysis through two-way tables. Integrated with the use of statistical computing packages. Prerequisite: 10 or equivalent. (PSE) 1-6 units, Aut (Thomas)

PSYCH 253. Statistical Theory, Models, and Methodology—Practical and theoretical study of advanced data analytic techniques such as loglinear models, signal detection, meta-analysis, logistic regression, reliability theory, and factor analysis. Prerequisite: 252 or EDUC 257. 3 units (Thomas) alternate years, given 2005-06

PSYCH 254. Frontiers of Personality—In the 70s, personality research almost disappeared from psychology. Recently, there has been a resurgence of interest in it, especially from fields outside traditional psychology. New findings from fields such as genetics, neuroscience, medicine, and health psychology. Readings from current science journals with an emphasis on the interdisciplinary integration and applications of personality research. 3 units (Knutson) not given 2004-05

PSYCH 255. Topics in Personality and Abnormal Psychology—Graduate seminar. Prerequisite: consent of instructor. 1-3 units, Aut (Horowitz)

PSYCH 256. Topics in Language and Cognition—Prerequisite: consent of instructor. 1-3 units, Spr (Ramscar)

PSYCH 258. Graduate Seminar in Social Psychology Research—For students who are already or are planning to become involved in research on social construal and the role that it plays in a variety of phenomena, notably the origin and escalation of conflict. 1-3 units, Aut, Win, Spr (Zajonc)

PSYCH 259. Emotions: History, Theories, and Research—(Undergraduates register for 158; see 158.) 1-3 units, Aut (Zajonc)

PSYCH 261. Emotion—(Undergraduates register for 161; see 161.) 3 units, Aut (Gross)
PSYCH 279. Topics in Cognitive Control—The processes that enable flexible behavior by biasing contextually relevant perceptual, mnemonic, and response representations or processing pathways. Cognitive control is central to volitional action, allowing work with memory, task/goal states, and overriding inappropriate responses. Current models of cognitive control, functional neuroimaging, and neuropsychological evidence. 1-3 units, Spr (Wagner)

PSYCH 281. Practicum in Teaching—Enrollment limited to teaching assistants in selected Psychology courses. May be repeated for credit. 1-4 units, Aut, Win, Spr, Sum (Staff)

PSYCH 282. Practicum in Teaching PSYCH 1—Logistical T.A. training including: preparing for sections; creating, proctoring, correcting exams; grading an iterative writing assignment; office hours; review sessions; A/V expertise; communicating via coursework. Review of student evaluations with instructor to set goals and strategies. Limited to current PSYCH 1 T.A.s. 1-2 units, Aut, Win, Spr (Quill)

PSYCH 283. Interdisciplinary Seminar on Conflict and Dispute Resolution—(Same as LAW 611, MS&E 459.) Problems of conflict resolution and negotiation from an interdisciplinary perspective. Presentations by faculty and scholars from other universities. 1 unit, Win (Hensler, Ross)

PSYCH 285. Contemporary Issues in Peace Studies—(Undergraduates register for 185; see 185.) 3 units, Spr (Bland, Ross, Holloway)

PSYCH 290. Graduate Research Methods—Primary tool use for psychologists: basics of experiment design; computer-based experiments; web-based experiments; data analysis packages and data presentation; exploratory statistics; eye-tracking methods; psychophysiology methods; survey construction; corpus and discourse analysis; and perhaps hypnosis. Prerequisite: Ph.D. standing in Psychology. 2 units, Win (Richardson)

PSYCH 296. Methods in Personality and Social Psychology—Practicum. Focus is on developing methodological skills in personality and social psychology. Experimental survey and multivariate methods. Topics: archival and correlational studies; experimental and quasi-experimental design; formulating the research problem; going from abstract ideas to concrete instances; handling research artifacts; measuring and analyzing change data; observational techniques; organizing data; professional and ethical issues; triangulation; validity and reliability of measurement. Research proposal. Prerequisite: graduate standing in Psychology or consent of instructor. 1-3 units (Lepper, Steele) not given 2004-05

PSYCH 297. Seminar for Coterminal Master of Arts—Contemporary issues and student research. Student and faculty presentations. 1-2 units, Aut, Win, Spr (Thomas)

PSYCH 459. Frontiers in Interdisciplinary Biosciences—(Crosslisted in departments in the schools of H&S, Engineering, and Medicine; student register through their affiliated departments; otherwise register for CHEMENG 459) See CHEMENG 459 or http://biox.stanford.edu/courses/459_announce.html. 1 unit, Aut, Win, Spr (Robertson)

PUBLIC POLICY PROGRAM

Director: David Brady (Political Science, Hoover Institution)
Associate Director: Geoffrey Rothwell (Senior Lecturer, Economics)
Executive Committee: Jonathan Bendor (Business), Morris Fiorina (Political Science), Luis Fraga (Political Science), Daniel Kessler (Business and Law), Roger Noll (Economics), Susan Olzak (Sociology), Leonard Ortolano (Civil and Environmental Engineering), Debra Satz (Philosophy)

Affiliated Faculty and Staff: Donald Barr (Human Biology), Coit Blacker (Stanford Institute for International Studies), Timothy Bresnahan (Economics), M. Kate Bundorf (Health Research and Policy), John Cogan (Hoover Institution), Ken Dauber (Sociology), Luis Fraga (Political Science), Judith Goldstein (Political Science), Lawrence Gould (Economics, Institute for International Studies), Henning Hillmann (Sociology), Mark Hlatky (Health Research and Policy), Nicholas Hope (Center for Research on Economic Development and Policy Reform), Michael Kirst (Education), Thomas MaCurdy (Economics), Mark McClellan (Economics, School of Medicine; on leave), Robert McGinn (Management Science and Engineering), Milbrey McLaughlin (Education), Debra Meyerson (Eduatin), Terry Moe (Political Science), Norman Nie (Political Science), Bruce Owen, (Economics), James Phillips (Business), A. Mitchell Polinsky (Law), Andy Rutten (Political Science), Timothy Stanton (Health Research and Policy), Myra Strober (Education), Barton Thompson (Law), Nancy Brandon Tuma (Sociology), Barry Weingast (Political Science), Scott Wilson, Frank Wolak (Economics)

Lecturers: Laura Arrillaga, Christophe M. Crombez, Melanie Edwards, Paul Frankel, William Hauk, Jongryn Mo, Roger Printup, Bruce Sievers, Mary Sprague, Jeffrey M. Steen, Peter Stone, Scott Wilson, Patrick Windham

Visiting Professor: Christopher M. Crombez

Visiting Associate Professor: Eva Meyerson Milgrom

Department Offices: Encina Hall West, Room 100
Mail Code: 94305-6050
Department Phone: (650) 723-3452
Web Site: http://www.stanford.edu/dept/publicpolicy/

Courses given in Public Policy Program have the subject code PUBLPOL. For a complete list of subject codes, see Appendix.

Government plays an important, ubiquitous role in contemporary society. Moreover, the growing complexity of public policies, the political processes that give rise to them, and the organizations that implement them have created a need in government, business, and the nonprofit sector for people who understand how government operates. The Public Policy Program provides students with the foundational skills and institutional knowledge necessary for understanding the policy process, and provides an interdisciplinary course of study in the design, management, and evaluation of public sector programs and institutions. The major in Public Policy is useful as preparation for employment as an analyst in government agencies or business; as a foundation for postgraduate professional schools in business, education, law, and public policy; and as preparation for graduate study in the social sciences, especially economics, political science, and sociology. For more details about the Public Policy Program, including updated information about course offerings and other activities, see http://www.stanford.edu/dept/publicpolicy/.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The core courses in the Public Policy Program develop the skills necessary for understanding the political constraints faced by policy makers, assessing the performance of alternative approaches to policy implementation, evaluating the effectiveness of policies, and appreciating the sharp conflicts in fundamental human values that often animate the policy debate. After completing the core, students apply these skills by focusing their studies in one of several areas of concentration. The
areas of concentration address specific field of public policy, types of institutions, or a deeper development of the tools of policy analysis. A list of recommended courses for each concentration is available in the Public Policy Program office. Areas of concentration are:

- Advanced Methods of Policy Analysis
- Business Policies
- Design of Public Institutions
- Development and Growth Policies
- Education
- Environment, Resources, and Population
- Health Care
- International Policies
- Law and the Legal System
- Media and Policy
- Science and Technology Policy
- Social Entrepreneurship
- Social Policy: Discrimination, Crime, Poverty
- Urban and Regional Policy

Completion of the program in Public Policy requires 83 units of course work.

1. 35 units of prerequisite courses: POLISCI 2; ECON 1, 50, 102A, 102B; SOC 160 or MS&E 180; and either MATH 19 and 20, or 41. In addition, students may be required to take ECON 50M before enrolling in ECON 50, and are encouraged to take MATH 42 and 51, and at least one course in linear algebra.

2. Five additional units of analytical skills courses. Among the courses that satisfy the requirement are ECON 51, 52, 102C; HISTORY 206 and POLISCI 151A, 152. For current information about courses that fulfill this requirement, check with the program office.

3. The 25-unit sequence of 5-unit core courses, which students should plan to complete by the end of their junior year (see below for descriptions 101-105). To satisfy the core requirement in Philosophy, students must take PUBLPOL 103A or 103B.

4. Majors must complete 15 units of course work in an area of concentration. The 15 units of post-core course work must be approved by an adviser, who is appointed when the student selects an area of concentration. This usually is done midway through the junior year, and must be done no later than the end of the second week of Autumn Quarter of the senior year.

5. Seniors are required to participate in one quarter (3 units) of the Senior Seminar (PUBLPOL 200). Majors also must submit at least one research paper during the senior year and present it before the Senior Seminar. The senior paper may be a term paper for either the senior seminar or another course, or an honors thesis.

6. A maximum of 10 units may be taken on a satisfactory/no credit basis in the prerequisite courses for the Public Policy core. All remaining courses required for Public Policy majors must be taken for a letter grade.

7. Students must complete the Public Policy core and their concentration area courses with a grade point average (GPA) of 2.0 or higher.

8. To become a major in Public Policy and to be nominated for the B.A. degree, students must complete an application, available in the Public Policy Program office.

The Public Policy Program encourages students to participate in various Stanford internship programs, including those available through the Haas Center for Public Service and Stanford in Washington. Students may also participate in the Integrated Scholar Intern Program, combining directed reading and research with an internship. Information about this program is available in the Public Policy program office.

**MINORS**

The Public Policy Program offers a minor that is intended to provide students with interdisciplinary training in applied social sciences. Students who pursue the minor are required to take the courses listed below for a total of 34 units in Public Policy and its supporting disciplinary departments. Because University rules prohibit double-counting courses, the requirements for a minor differ according to the student’s major requirements.

For students whose major department or program requires no courses in economics, political science, or sociology, the requirements for a Public Policy minor are:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1, 50; PUBLPOL 104</td>
<td>15</td>
</tr>
<tr>
<td>POLISCI 2 and PUBLPOL 101</td>
<td>10</td>
</tr>
<tr>
<td>MS&amp;E 180 and PUBLPOL 102</td>
<td>9</td>
</tr>
</tbody>
</table>

For students who are Economics majors or who satisfy a major requirement by taking ECON 50, but no courses in political science, the requirements for a Public Policy minor are:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLISCI 2; PUBLPOL 101</td>
<td>10</td>
</tr>
<tr>
<td>PUBLPOL 103</td>
<td>5</td>
</tr>
<tr>
<td>PUBLPOL 104</td>
<td>5</td>
</tr>
<tr>
<td>PUBLPOL 105</td>
<td>5</td>
</tr>
<tr>
<td>MS&amp;E 180 and PUBLPOL 102</td>
<td>9</td>
</tr>
</tbody>
</table>

For students who are Political Science majors or who satisfy a major requirement by taking POLISCI 2 but no courses in Economics, the requirements for a Public Policy minor are:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1, 50, 102A; PUBLPOL 104</td>
<td>20</td>
</tr>
<tr>
<td>PUBLPOL 103</td>
<td>5</td>
</tr>
<tr>
<td>PUBLPOL 104</td>
<td>5</td>
</tr>
<tr>
<td>MS&amp;E 180 and PUBLPOL 102</td>
<td>9</td>
</tr>
</tbody>
</table>

For Sociology majors, the requirements for a Public Policy minor are:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1, 50, 102A; PUBLPOL 104</td>
<td>20</td>
</tr>
<tr>
<td>POLISCI 2; PUBLPOL 101</td>
<td>10</td>
</tr>
<tr>
<td>PUBLPOL 103</td>
<td>5</td>
</tr>
</tbody>
</table>

For students who major in another interdepartmental program (such as International Relations) and who satisfy major requirements by taking ECON 50, POLISCI 2, and an introductory course in statistics (such as ECON 102A or STATS 60), the requirements for a Public Policy minor are:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 102B; PUBLPOL 105</td>
<td>10</td>
</tr>
<tr>
<td>PUBLPOL 101</td>
<td>5</td>
</tr>
<tr>
<td>PUBLPOL 103</td>
<td>5</td>
</tr>
<tr>
<td>PUBLPOL 104</td>
<td>5</td>
</tr>
<tr>
<td>MS&amp;E 180 and PUBLPOL 102</td>
<td>9</td>
</tr>
</tbody>
</table>

**HONORS PROGRAM**

The Public Policy Program offers students the opportunity to pursue honors work during the senior year. To graduate with honors in Public Policy, a student must:

1. Apply for admission to the honors program no later than the end of the second week of Autumn Quarter of the senior year.

2. Complete the requirements for the B.A. in Public Policy and achieve a grade point average (GPA) of 3.3 in the following courses: the Public Policy core, the student’s concentration area courses, the Senior Seminar, and PUBLPOL 199 (senior research). Courses not taken at Stanford are not included in calculating the GPA.

3. Enroll in at least 8 but no more than 15 units of PUBLPOL 199 during the senior year and receive a final grade on the senior thesis of at least a 'B+.'

Students who intend to pursue honors work should plan their academic schedules so that most of the core courses are completed before the beginning of the senior year, and all of the core and concentration courses are completed by the end of Winter Quarter of senior year. This scheduling gives students both the time and the necessary course background to complete a senior research project in Spring Quarter. In addition, honors students are encouraged to enroll in PUBLPOL 197, Junior Honors Seminar, during Winter Quarter; this course focuses on developing a research plan and the research skills necessary to complete a thesis. Also, students should plan on taking PUBLPOL 105 during their junior year.

To apply, a student must submit a completed application to the Public Policy Program office with a brief description of the thesis. The student must obtain the sponsorship of a faculty member who approves of the thesis description and who agrees to serve as a thesis adviser. Students intending to write a thesis involving more than one discipline may wish to have two advisers, at least one of which is from the faculty listed above.

The honors thesis must be submitted to both the thesis adviser and the Public Policy Program office. Graduation with honors requires that the thesis be approved by both the adviser and the Director of the Public Policy Program. The role of the director is to assure that the thesis deals
with an issue of public policy and satisfies the standards of excellence of the program. However, the grade for the honors thesis is determined solely by the adviser. The thesis adviser sets the deadlines for receiving the final draft of the thesis; the director sets the deadline for theses to be considered for University and department awards. To graduate with honors at the Spring commencement, a student must submit a final bound copy and an electronic copy of the thesis to the Public Policy program office no later than the last Friday in May. To be considered for awards given to outstanding senior theses, a student must submit a copy of the thesis to the Public Policy program office no later than the third Wednesday in May.

Members of the core faculty in Public Policy are available to provide assistance in selecting a senior thesis topic.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

PUBLPOL 50SI. Current Trends in Policy Making—Guest lectures by and discussions with experts concerning election policy, the budget, health care reform, welfare reform, education, crime, state government, and foreign policy. (AU)
2 units, Spr (Brady)

PUBLPOL 101. Politics and Public Policy—(Same as POLISCI 123.) The domestic policy making process, emphasizing how elected officials, bureaucrats, and interest groups shape government policies in areas including tax, environmental, and social welfare policy, given their goals and available tactics. How public policies are formulated and implemented. Evaluating results of this process using equity and efficiency criteria. Prerequisite: POLISCI 2. GER:3b
5 units, Spr (Brady)

PUBLPOL 102. Organizations and Public Policy—Analysis of public organizations, stressing problems of effective management and incentives in a non-market environment. Prerequisite: SOC 160 or MS&E 180. GER:3b
5 units, Spr (Wilson)

PUBLPOL 103A. Introduction to Political Philosophy—(Enroll in POLISCI 3.)
5 units, Win (Stone)

PUBLPOL 103B. Ethics and Public Policy—(Same as MS&E 197.) Ethical issues in science- and technology-related public policy conflicts. Goal is to develop rigorous critical analysis of complex, value-laden policy disputes. Topics: the natures of ethics and morality; the natures of and rationales for liberty, justice, and human rights; and the use and abuse of these concepts in recent and current policy disputes. Cases from biomedicine, environmental affairs, the technical professions, communications, and international relations. GER:3a
5 units, Win (McGinn)

PUBLPOL 104. Economic Policy Analysis—(Same as ECON 150.) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Readings: theoretical foundations of policy making and analysis, and applications to the adoption and implementation of programs. WIM
5 units, Win (Noll)

PUBLPOL 105. Quantitative Methods and Their Applications to Public Policy—Reviews material covered in prerequisites with applications of quantitative independent variable techniques to labor market data. Maximum likelihood estimation and qualitative dependent variable models with an application to voting models. Final papers estimate influence of quantitative and qualitative independent variables on Congressional voting probabilities. Prerequisites: ECON 102A,B. GER:3b
5 units, Spr (Rothwell)

PUBLPOL 124T. Legislatures, Courts, and Public Policy—(Same as POLISCI 124T.) How courts exert power and play a role in creating policy in the U.S. Can or should judges read their own values into law? Can the elected branches check the power of unelected judges? What is good government and how do courts fit into it? Focus is on the Civil Rights Act of 1964 examining the political maneuvers to pass it and recent Supreme Court decisions applying it to affirmative action.
5 units, Spr (Rutten)

PUBLPOL 149L. Special Projects: The Death Penalty: Human Biology, Law, and Policy—(Enroll in HUMBIO 166.)
3 units, Aut, Win, Spr (Abrams)

PUBLPOL 150. Social Entrepreneurship Startup—(Enroll in ENGR 150/250.)
1-6 units, Aut, Win, Spr (Behrman)

PUBLPOL 154. Economics of Legal Rules and Institutions—(Enroll in ECON 154.)
5 units, Win (Owen)

PUBLPOL 163. Formal Organizations—(Enroll in SOC 160/260.)
5 units, Win (Hillmann)

PUBLPOL 164. Comparative Public Policy—Problems, answers, underlying political philosophies, and impacts of public policy choices in areas such as aging populations, health care costs, illegal immigration, terrorism, pollution, and competition from low-cost countries. Focus is on N. America and Europe. GER:3b
3 units, Win (Crombez)

PUBLPOL 168. The Matrix of Change: Managing Diversity—(Same as SOC 168/268.) Diversity in organizations consists not only of racial, cultural, and gender differences, but also differences in perspectives and interests among employees based on profession, assignments, or compensation. Diversity can be a source of strength when different perspectives lead to insight and information, and when pay differences leave room to reward superior performance. It can also be a barrier to communication and cooperation. Policy and managerial issues concerning when and how far to encourage diversity and how to harness its strengths and mitigate the conflicts it can create. GER:3b
5 units, Win (Meyerson Milgrom)

5 units (Mo) not given 2004-05

PUBLPOL 172. Mass Media Economics and Policy—Consumer demand for, the economic structure of, and federal regulation and policies affecting print and electronic mass media industries including the Internet. Topics include economies of scale and first-copy costs, production of non-rivalrous consumption goods, demand and supply of diversity and localism, ownership concentration, access barriers, technological change, the role of networks, and efficient risk bearing. Prerequisite: ECON 50 or equivalent preparation in microeconomics. GER:3b
4-5 units, Aut (Owen)

PUBLPOL 180. Social Innovation—The mechanisms and features of social innovation defined as the process of inventing, securing support for, and implementing novel solutions to social needs and problems. Focus is on the social, economic, technical, and organizational mechanisms underlying innovations. Sources include social science theory and research, and insights from the practical world.
4 units, Spr (Phills)

PUBLPOL 181. Environmental Entrepreneurship—The role of business in environmentalism and vice versa. The principles of market forces for positive environmental and economic outcomes. Theoretical issues: defining environmental capitalism and the commons, and market failures and incentives. Practical issues: entrepreneurial solutions to environmental issues, building a strategy, evaluating performance, managing
the enterprise, and creating sustained positive environmental impact and economic value. Business school cases, and theoretical and practical readings. Prerequisites: ECON 1 and 50.

4 units, Aut (Frankel, Steen)

PUBLPOL 181L. Environmental Entrepreneurship Lab—Evaluating and solving environmental needs through market analysis, and designing a business to profitably meet those needs. Models include ecotourism, clean technology ventures, and biodiversity investment vehicles. Students inventory global environmental needs, network across the Stanford campus for innovations, and develop a business plan to launch profitable, sustainable companies. Prerequisites: 181.

3-5 units, Win (Frankel, Steen)

PUBLPOL 182A. Policy Making and Problem Solving at Local and Regional Level: Contested Issues in Silicon Valley—Theory and practice of local and regional integrated service provision and policy formulation and implementation focusing on issues in Silicon Valley including land use, transportation, housing, public finance, and environmental protection. Social, institutional, and organizational landscapes in metropolitan regions, and theories of metropolitan politics. Optional internships with corporate, government, and nonprofit organizations. Students with an internship also register for 182B. Prerequisite: consent of instructor after formal application.

3 units, Win (Stanton)

PUBLPOL 182B. Policy Making and Problem Solving at Local and Regional Level: Community and Economic Development—(Same as INDE 272.) Alternative theories and practice of community and economic development and cross-sector collaboration as approaches to influencing public policy making and problem solving. Emphasis is on non-hierarchical, participatory, and collaborative processes across economic sectors, neighborhoods, and ethnic groups. Regional and local policies and community contexts that support or inhibit such processes. Field trips; optional internships with corporate, government, and nonprofit organizations involved in public issues. Prerequisites: consent of instructor after formal application; internship; 182A.

5 units, Spr (Stanton)

4 units, Aut (Arrillaga)

PUBLPOL 185. Managing Public Policy—The role of public administration in contemporary government. Major issues: administrative structure, control, relations with other branches of government, the problems of internal organization and management, methods of innovation and change, budgeting, and personnel. GER:3b

5 units, Aut (Printup)

PUBLPOL 187. IT and Society: Unanticipated Consequences of New Technologies—How human inventions impact other inventions, society, the individual, and history. Unintended social consequences of technologies, such as railroads, telegraphs, telephones, automobiles, and jet travel. Group project focusing on the design of a national survey to gauge the social effects of Internet technology (IT) on how people spend their time, including the impact of Internet use on non-work activities such as sleep and time spent with friends and family. Practical and innovative techniques in statistical analysis. GER:3b

3-4 units, Win (Nie)

PUBLPOL 188. California Government and Politics—California, with 34 million people and the world’s fifth largest economy, would rank as a superpower if it were a nation. Are California’s political institutions suited to these responsibilities? California’s social, political, and institutional history, and its politics, elections, and policy making. Distinctive political features such as term limits, the open primary system, and the difficulties posed by Proposition 13. GER:3b

5 units, Spr (Wilson)

PUBLPOL 189. Introduction to Civil Society and the Nonprofit Sector—(Same as URBANST 121.) Development of the idea of civil society from early Enlightenment Europe to the contemporary U.S. Historical and theoretical foundations. Contemporary features of the nonprofit sector including its legal, economic, political, and ethical dimensions. The structure and operation of modern philanthropy and the challenges of the 21st century.

2-4 units, Spr (Siegerv)

PUBLPOL 190. Social Innovation and the Social Entrepreneur—(Enroll in URBANST 163A.)

1 unit, Aut (Staff)

4 units, Win (Staff)

PUBLPOL 192. Introduction to Social Entrepreneurship—(Enroll in URBANST 163C.)

4 units, Aut (Edwards)

PUBLPOL 193. Social Entrepreneurship Collaboratory—(Enroll in URBANST 163L.)

1-5 units, Aut, Win, Spr (Edwards)

PUBLPOL 194. Technology Policy—The evolution of U.S. technology policy and the way in which policy is made. Topics: federal technology policy before and after WW II, the debate over using R&D programs and other measures to promote economic growth and competitiveness, the impact of federal policy on the development of the Internet and biotechnology, and Internet privacy and genetic privacy as examples of controversies over the social impact of technological activities. Prerequisites: ECON 1, POLISCI 2.

5 units, Win (Windham)

PUBLPOL 195. Business and Public Policy—The relationships among business, government, and interest groups as strategic actors in the non-market environment. Companies attempt to shape public policy through government processes and international politics; interest groups through government processes and by influencing business. Politicians mediate conflicts among businesses and interest groups. Each relationship transcends the conventional view of a business as a market-focused entity that accepts government actions and ignores interest groups. Media and private collective action, business strategies in government arenas, international business and the non-market environment, and corporate responsibility and ethics. Prerequisites: ECON 1, POLISCI 2.

5 units, Win (Hauk)

PUBLPOL 196. The Political Economy of the Federal Budget—Applies the tools of economic analysis to study how the federal government makes its budgetary decisions. The factors that have contributed to the growth in federal spending, taxation, and the national debt; congressional and executive branch budget processes and their effects on government policymakers; spending programs (Social Security, Medicare, welfare, and infrastructure programs). Prerequisites: ECON 50, 52; ECON 52 may be taken concurrently.

5 units (Staff) not given 2004-05

PUBLPOL 197. Junior Honors Seminar—Primarily for students who expect to write an honors thesis. Weekly sessions discuss writing an honors thesis proposal (prospectus), submitting grant applications, and completing the honors thesis. Readings focus on writing skills and research design. Students select an adviser, outline a program of study for their senior year, and complete a prospectus by the end of the quarter. Seniors working on their theses also may enroll and present their research to the seminar participants. Seniors are required to make substantial progress on their thesis by the end of the quarter. Enrollment limited to 25.

5 units, Win (Rothwell)

PUBLPOL 198. Directed Readings in Public Policy

1-5 units, Aut, Win, Spr (Staff)
PUBLPOL 199. Senior Research  
1-15 units, Aut, Win, Spr (Staff)

PUBLPOL 200A,B,C. Senior Seminar—Designed to give Public Policy students the opportunity to make oral presentations and to write a paper on a topic in public policy. Topic and methods of analysis used are determined by student in consultation with instructor. How to conduct good research in public policy. Prerequisites: completion of core courses in Public Policy or consent of the instructor.  
3 units, A: Aut, B: Win, C: Spr (Sprague)

PUBLPOL 209. Economics and Public Policy—(Enroll in MGTECON 309.)  
4 units (Kessler) not given 2004-05

OVERSEAS STUDIES

Courses approved for the Public Policy major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

PARIS

PUBLPOL 111. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time—(Same as HUMBIO 153X.)  
4-5 units, Win (Grenier-Senneller)

RELIGIOUS STUDIES

Emeriti: (Professors) René Girard, Edwin M. Good, Van Harvey, David S. Nivison  
Chair: Arnold Eisen  
Professors: Carl W. Bielefeldt (on leave), Arnold M. Eisen, Bernard R. Faure, Robert C. Gregg, Thomas Sheehan, Lee Yearley  
Associate Professor: Hester G. Gelber (on leave)  
Assistant Professors: Charlotte Fonrobert (on leave), Brent Sockness, Michael Zimmermann  
Lecturers: Keila Diehl, Linda Hess, Dayna Kalleres, Naoko Kumada, Noa Ronkin  
Senior Lecturer: Adriane Levene  
Acting Associate Professor: Fabrizio Pregadio  
Acting Assistant Professor: Barbara Pitkin  
Visiting Professor: Ada Rapoport-Albert  
Visiting Associate Professor: Aharon Shemesh  
Affiliated Staff: Jean-Pierre Dupuy (French and Italian), Maud Gleason (Classics), Jack Kollmann (Russian, East European and Eurasian Studies)

Department Offices: Building 70  
Mail Code: 94305-2165  
Phone: (650) 723-3322  
Web Site: http://www.stanford.edu/dept/relstud/

Courses given in Religious Studies have the subject code RELIGST. For a complete list of subject codes, see Appendix.

The purpose of Religious Studies is to understand and interpret the history, literature, thought, and social structures of various religious traditions and cultures. The department offers courses at several levels, described below.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

A Bachelor of Arts in Religious Studies requires 60 units of coursework. At least 50 units are taken in courses numbered above 100. Ten units out of the 60 may be taken for the grade of satisfactory/no credit.

1. At least eight of the 60 units must be courses specifically designed as introductions to the major. Students may satisfy this requirement by taking either:
   a) the department’s two quarter Introduction to the Humanities (IHUM) Winter/Spring sequence, or
   b) two introductory courses designated as gateway courses. SIS courses are not counted as introductions to the major.

2. 37 units are to be taken in intermediate lecture and seminar courses numbered 100-289. Of these, at least two seminars are required from courses numbered above 200. Language courses relating to students’ study of religion within the department (such as Arabic, biblical Hebrew, New Testament Greek, Chinese, or Japanese) may, with departmental approval, be counted among these 37 units.

3. 15 units in integrative courses:
   a) Majors’ Seminar: RELIGST 290, Theories of Religion (5 units)  
   b) Senior Essay Research: RELIGST 297 (3-5 units; up to 10 units over two quarters); see below for description of the required senior essay.  
   c) Senior Majors’ Colloquium: RELIGST 298 (5 units, Spring Quarter)

4. Each student, in close consultation with his/her adviser, works out a focus of study centering either on a particular religious tradition or on a theme or problem which cuts across traditions such as ritual, ethics, scripture, or gender.

SENIOR ESSAY

Majors in Religious Studies write a senior essay at least 30 pages in length. The essay allows students to apply knowledge and skills learned in the classroom to a topic of particular academic interest. It also provides a focused scholarly experience under the guidance of a Religious Studies faculty member, thereby offering students a chance to improve research and writing skills indispensable to graduate work in the humanities and useful in a wide variety of professions.

The essay may be on any approved topic in Religious Studies. Students should begin conversations about the senior essay with Religious Studies faculty and the undergraduate director soon after declaring the major. While the bulk of the essay is generally written during the senior year, students are advised to begin conceptualizing a project at the end of the junior year in order to take advantage of summer research opportunities. Students unsure about which faculty member would be most knowledgeable in the area of interest should ask the undergraduate assistant in the department for a copy of the leaflet, Religious Studies at...
Stanford. A proposal for the senior essay, consisting of a completed application form and a 1-2 page description of the topic signed by the prospective essay adviser, should be submitted by the end of Spring Quarter of the junior year, and in no case later than the end of the third quarter prior to graduation. The application is reviewed by the undergraduate director who either approves the project or requests resubmission with revisions. Further details and guidelines for the senior essay are available from the department undergraduate assistant.

HONORS

Those senior essays judged by a faculty committee to be of exceptional merit and scope receive the honors distinction. Seniors who successfully earn honors are acknowledged publicly during the department’s commencement exercise, and the honors distinction is also recorded on the final University transcript and the diploma.

MINORS

A minor in Religious Studies requires a minimum of 7 courses (30-36 units of graded work). Students must declare the minor no later than the last day of the quarter, two quarters before degree conferral.

Requirements for the minor include:

1. Two introductory courses; SIS courses are not counted as introductions to the minor. To satisfy this requirement, students take either:
   a) the department’s two quarter Introduction to the Humanities (IHUM), Winter/Spring sequence, or
   b) two gateway courses numbered below 100.
2. Five intermediate lecture and seminar courses, 100-289.
3. One course in directed reading (RELIGST 199) may count towards the minor.
4. Students may petition for other Stanford courses to fulfill minor requirements, but they must take courses from at least two Religious Studies faculty members.
5. Students are strongly encouraged to focus their program of study either in a religious tradition or in a theme which cuts across traditions.

In consultation with their advisers, students may design the minor in Religious Studies to complement their major.

MAJOR IN RELIGIOUS STUDIES AND PHILOSOPHY

The departments of Religious Studies and Philosophy jointly nominate for the B.A. students who have completed a major in the two disciplines. See a description of this joint major under the “Philosophy” section of this bulletin, or in the guidelines available from the undergraduate director of either department.

GRADUATE PROGRAMS

MASTER OF ARTS

University regulations pertaining to the M.A. are listed in the “Graduate Degrees” section of this bulletin. The following requirements are in addition to the University’s basic requirements.

The student completes at least 45 units of graduate work at Stanford beyond the B.A. degree, including a required graduate seminar (304A or B). Residence may be completed by three quarters of full-time work or the equivalent.

The student’s plan of courses is subject to approval by the Graduate Director. No field of specialization is expected, but students may focus work in particular areas. Advanced and graduate courses in other departments may be taken. No thesis is required; a thesis, if elected, may count for as many as 9 units.

Each student demonstrates reading knowledge of at least one foreign language.

DOCTOR OF PHILOSOPHY

University regulations regarding the Ph.D. are found in the “Graduate Degrees” section of this bulletin. The following requirements are in addition to the University’s basic requirements.

Residence—Each student completes three years (nine quarters) of full-time study, or the equivalent, in graduate work beyond the B.A. degree, and a minimum of 135 units of graduate course work (excluding the dissertation).

Field of Study—The Ph.D. signifies special knowledge of a field of study and potential mastery of an area of specialization within it. The faculty of the department have established certain fields of study in which the department’s strengths and those of other Stanford departments cohere. They are: East Asian religions, Christianity, Judaism, religious ethics, and modern Western religious thought. Students who wish to specialize in other fields must obtain early approval by the faculty.

Stages of Advancement—

1. In the first two years, the student refines an area of specialization within the chosen field of study in preparation for candidacy;
2. After attaining candidacy, the student concentrates on the area of specialization in preparation for the qualifying examination, and
3. The student writes a dissertation and defends it in the University oral examination.

Languages—Each student demonstrates a reading knowledge of two foreign languages, including French or German. Each student also demonstrates reading knowledge of other ancient or modern languages necessary for the field of study, area of specialization, and dissertation topic.

Courses—Each student satisfactorily completes the two graduate seminars (304A, B), two quarters of the pedagogy seminar (391), and one reading seminar before the candidacy decision. Other courses are taken with the approval of a faculty adviser in consideration of the student’s field of study.

Candidacy—At the end of each academic year, the department’s faculty recommend second-year students for candidacy on the basis of all relevant information, and especially on the student’s candidacy dossier which includes the approved declaration of an area of specialization, certification for one foreign language, and two substantial papers written for courses during the previous two years.

Paper-in-Field—During the third year, under the supervision of their adviser, students prepare a paper suitable for submission to an academic journal in their field. The paper is read and approved by at least two faculty members in the department.

Teaching Internship—At least one teaching internship under the supervision of faculty members is undertaken at a time negotiated with the Graduate Director. Students receive academic credit for the required internship, which is a project of academic training and not of employment.

Qualifying Examination—To qualify for writing a dissertation, the student must successfully pass a comprehensive examination in the chosen field and the area of specialization. The student must complete the second language requirement before taking qualifying examinations.

Dissertation—The dissertation contributes to the humanistic study of religion and is written under the direction of the candidate’s dissertation adviser and at least two other members of the Academic Council. The University oral examination is a defense of the completed dissertation.

PH.D. MINOR IN RELIGIOUS STUDIES

Candidates for the Ph.D. in other departments may select a Ph.D. minor in Religious Studies. The minor requires at least 24 units in Religious Studies at the 200 level or above. Four of the 24 units should be in “Theories and Methods.”

JOINT PH.D. IN RELIGIOUS STUDIES AND HUMANITIES

Religious Studies participates in the Graduate Program in Humanities leading to the joint Ph.D. in Religious Studies and Humanities, described in the “Interdisciplinary Studies in Humanities” section of this bulletin.
INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Religious Studies department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Religious Studies are advised to consider satisfying their GER:1b,c requirements by registering for the following IHUM courses.

IHUM 68A,B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present—Challenges facing the world’s religions in responding to issues such as globalization, feminism, science and technology, individualism, and the demand for pluralism. How to think about these issues through the study of Judaism, Christianity, and Buddhism. How they changed or refused to change in their early histories, and the encounter between religion and the forces of change in the world today. GER:1b,1c (two quarter sequence)

IHUM 68A. 5 units, Win (Eisen, Gregg)
IHUM 68B. 5 units, Spr (Bielefeldt, Eisen)

INTRODUCTORY COURSES

RELIGST 3N. Murder in the Cathedral—Stanford Introductory Seminar. Preference to freshmen. The history and meaning of Canterbury Cathedral as a sacred site. Its origin in 956 as a center for Christian missionary work; its archbishops’ disputes with the Norman kings ending in the martyrdom of Thomas à Becket which reverberates in the work of T.S. Eliot and Black Adder; its emergence as a pilgrimage destination in the time of Chaucer. How Henry VIII destroyed St. Thomas’ tomb; how the Anglican church appropriated the site for the Archbishops of Canterbury. What makes a sacred site? Why is Canterbury special? Sources include art, architecture, literature, chronicles, and histories. GER:3a

3 units, Aut (Gelber)

RELIGST 6N. The Life of the Buddha—Stanford Introductory Seminar. Preference to freshmen. Who was the historical Buddha Siddhartha and what is known about him, his time, and his society? The oldest texts attributed to him and what they reveal about him and his ideas. Sources include Indian literary works in translation, archeology, and art. GER:3a,4a

3 units, Win (Zimmermann)

RELIGST 9N. Faith and Reason—Stanford Introductory Seminar. Preference to freshmen. History of the dialogues between faith and reason, supernaturalism and secular humanism, and theology and philosophy within Christianity insofar as it begins within and emerges from Second Temple Judaism. GER:3a

3 units, Aut (Sheehan)

RELIGST 11. Religious Classics of Asia: India’s Ramayana Epic—The Ramayana as one of the most important religious and cultural texts of India. Its heroes, Rama and Sita, as incarnations of the supreme God and Goddess and models for ideal manhood and womanhood. Textual and performative versions including Valmiki’s 2,000-year-old Sanskrit poem, medieval vernacular versions, rural women’s folk songs, and the TV serial of 1988-89. Ramayana traditions through the lenses of religion, literature, performance, popular culture, gender, and politics. GER:3a,4a

4 units, Win (Hess)

RELIGST 12. Introduction to Hinduism—Historical study from earliest period to the present, including religious poetry, narrative, performance, concepts of self and liberation, yoga, ritual, God and gods, views of religion through history, region, class, caste, and gender.

4 units (Hess) not given 2004-05

RELIGST 14. Introduction to Buddhism—Basic tenets of Buddhism with focus on its origin, intellectual developments, ethical foundations, and meditative practices. Translations of Buddhist texts from different periods and cultures. The spread of Buddhism throughout Asia and, since the last century, the West. GER:3a,4a

4 units, Spr (Zimmermann)

RELIGST 15. The Hebrew Bible—Cultural and religious context including its interactions with Sumerian and Phoenician epic. Recent archeological discoveries that shed light on Israelite religion. Readings of key theological passages. GER:3a

4 units (Leeven) not given 2004-05

RELIGST 16. Introduction to S. Asian Buddhism—Focus is on Buddhist intellectual developments from the time of its founder, the historical Buddha Shakyamuni, to contemporary forms in Nepal and Sri Lanka. Basic aspects of Buddhist ethics, ritual, and art. GER:3a,4a

4 units (Zimmermann) not given 2004-05

RELIGST 18. Zen Buddhism—Introduction to classical Zen thought in China, its background, origins, and development. GER:3a,4a

4 units (Bielefeldt) not given 2004-05

RELIGST 23. Introduction to Judaism—The historical development of Jewish religious thought and practice, from the biblical period to the present. Various kinds of texts reflecting that development: scriptural, liturgical, midrashic, legal, historical, and philosophical. The Sabbath, and yearly festivals and sacred days. GER:3a

4 units (Staff) not given 2004-05

RELIGST 24. Introduction to Christianity—GER:3a

4 units (Pitkin) not given 2004-05

RELIGST 27. Introduction to Islam—Foundational texts, sources, and ideas that have shaped the spiritual, intellectual, and institutional pluralism of Muslim societies in historical and contemporary contexts. Readings from the Qur’ân, life of the Prophet (sîra), and other source materials in translation. GER:3a,4a

4 units (Staff) not given 2004-05

RELIGST 32. The Problem of God—Gateway course. Monotheism is a belief for which people continue to live and die. Philosophical inquiry into the concept of God through its classic formulations, modern critics, and contemporary defenders. What has the idea of God meant to serious minds in the past? And in the modern or postmodern world? GER:3a

4 units, Win (Sockey)

RELIGST 53. Jews and Judaism in America—Development of the Jewish religious tradition in 20th-century America and its role in the life of its ethnic community. Comparison to the role of the church in the life of the African American community. Historical, sociological, and theological works complemented by novels, poetry, films, and TV. GER:3a,4b

4 units (Eisen) not given 2004-05

RELIGST 55. Introduction to Chinese Religions—Confucianism, Daoism, Buddhism, and the interchange among these belief systems and institutions. Set against the background of Chinese history, society, and culture, with attention to elite and popular religious forms. GER:3a,4a

4 units, Win (Pregadio)

RELIGST 56. Introduction to Daoism—Historical survey from origins to the present. Main schools, notions, communal rites, and individual practices, and the relation of Daoism to different facets of Chinese culture. GER:3a

4 units (Pregadio) not given 2004-05

RELIGST 82. Approaches to the Study of Religion: Christianity—Gateway course. Historical and contemporary Christianity from four viewpoints: ritual and prayer; sacred texts and creeds; ethics and life; and community governance. GER:3a

4 units, Aut (Sheehan)

RELIGST 84. Mystics, Pilgrims, Monks, and Scholars: Religious Devotion in Medieval Christianity—Gateway course. The variety and vitality of religious expression in medieval Christian Europe. How Christians sought God through mystical encounter, the structure of monastic life, visits to shrines, devotion to the saints, and the study of scripture and ancient Christian wisdom. Readings focus on primary texts. GER:3a

4 units, Spr (Pitkin)
UNDERGRADUATE LECTURES

RELIGST 105. Spiritual, not Religious: What Does this Phrase Mean?—Does this often-voiced formula mark a significant cultural change? Viewpoints and philosophies that present themselves as spiritual in books and films, and in the language and practices of adherents. What are the central ideas and convictions of the spiritual, not religious, person or group? What do spirit and spiritual connotate that creates distance from religious ideas and practices? GER:3a,4a
4 units, Win (Gregg)

RELIGST 107/207. Hindus and Muslims in South Asia—Hindus and Muslims have been living together in S. Asia for over 1000 years in peace and conflict, creating composite cultures and interdependent social worlds. In 1947, they split violently into separate nations, yet 100 million Muslims remain in India. The history of Hindu and Muslim life in the subcontinent, including religious literature, arts, practices, and sociopolitical formations. GER:3a,4a
5 units, Spr (Hess)

RELIGST 112. Handmaids and Harlots—Miraculous births, wandering in the wilderness, encounters with angels: scriptural stories of women such as Hagar, Sarah, Hannah, and Mary, and how their tales are read and re-told by later Jews and Christians. Sources include the Hebrew Bible and New Testament, Jewish and Christian commentary, and religious iconography. GER:3a,4c,WIM
5 units, Win (Leveen, Pitkin)

RELIGST 113. Zhuangzi and the Daoist Idea of Sainthood—Passages of the Zhuangzi with reference to its views of the Dao and the application of those views to self-cultivation, ethics, government, and the ideal of sainthood. GER:4a
4 units, Spr (Pregadio)

RELIGST 117. New Testament and Christian Origins—The origins of Christianity from its roots in 1-st century Judaism and Greco-Roman culture to the 2nd century C.E. Close reading of the New Testament and related texts to set the varieties of early Christianity in their historical, economic, social, and political contests. GER:3a,4a
5 units, Win (Kalleres)

RELIGST 119/219. Gandhi and Nonviolence—Gandhi’s life; his advocacy and practice of nonviolence in political movements in India and S. Africa; Indian religious sources of ahimsa or nonviolence; political interpretations of the Bhagavad Gita; Gandhian theory of nonviolence; adaptations of Gandhian nonviolence for conflict resolution in the world; critiques of Gandhi. GER:3a,4a
4 units, Win (Hess) alternate years, given 2005-06

RELIGST 120. Islam in Asia—The historical diversity and development of Muslim life, thought, and culture in S. Asia, home to a third of the world’s Muslims. The contemporary situation of Muslims in S. Asian countries such as Afghanistan, Bangladesh, India, and Pakistan. GER:3a,4a
4 units, Aut (Staff) not given 2004-05

RELIGST 122. Radical Catholicism—Past, present, and future of Roman Catholicism in Europe and the Americas. Its roots in Second Temple Judaism and the Greco-Latin world, the structural crises of contemporary Catholicism in governance, spirituality, doctrines, and morals, and the possibility of radical change in those areas. GER:3a
4 units, Win (Sheehan)

RELIGST 125. Catholic Reformation—Reform and renewal of Roman Catholicism in the 16th century through key figures and movements such as Erasmus, Ignatius of Loyola, Teresa of Avila, and the Council of Trent. GER:3a
4 units, Win (Pitkin) not given 2004-05

RELIGST 126. Protestant Reformation—16th-century evangelical reformers (Luther, Calvin) and reform movements (Lutheran, Reformed, Anabaptist) in their medieval context. GER:3a
4 units, Aut (Pitkin)

RELIGST 127. Introduction to Classical Judaism—the genres of classical Jewish literature and the issues which shaped its worldview. Selections from rabbinic (Jewish sacred) texts in English translation: Midrash, Mishnah, and Talmud. Topics include the biblical background, the emergence and nature of rabbinic authority and its institutions, the religious importance of discipleship, the legitimacy of dissent, diaspora versus Israel, perceptions of other religions and cultures, the tension between commitment to family and to commitment to religious life. GER:3a
4 units (Fonrobert) not given 2004-05

RELIGST 133. Reading the Bible Today—How did Israelites identify themselves? Did the Exodus happen? Why did Deborah have so much power? The influence of recent interpretations such as ethnic studies, literary approaches, feminist critique, and archeological discoveries on contemporary readings and reception of the biblical texts. GER:3a
4 units, Win (Leveen)

RELIGST 138. Faith, Doubt, and Ethics—Comparative examination of five 20th-century theological classics from the Protestant, Jewish, and Roman Catholic traditions: Karl Barth’s Epistle to the Romans, Martin Buber’s I and Thou, Reinhold Niebuhr’s Moral Man and Immoral Society, Paul Tillich’s Courage to Be, Abraham Heschel’s Man Is Not Alone, and Karl Rahner’s Foundations. GER:3a
4 units, Spr (Sockness)

RELIGST 156/256. Goddesses and Gender in Indian Religion—(Graduate students register for 256.) Introduction to the abundant female forms of the divine in India: goddesses’ stories, iconographies, worship; lives and religious practices of women and men; constructions of gender in religion and society. Readings in history, myth, poetry, ritual, ethnography, sociology. Films. GER:3a,4c
4 units (Hess) not given 2004-05

RELIGST 159/259. Religion and the Arts in India—(Graduate students register for 259.) Focus is on relationship between the ancient and present in religion and music. Guest Indian musicians demonstrate, discuss, and teach practical basics of music. Readings on mantra, sound as ultimate reality, aesthetic theory, music as yoga, guru-disciple relationship, devotional poetry and song, gods’ iconographies and stories, history, musicians’ lives, types of music including classical, folk, Hindu, Muslim, and Sikh. North Indian musical forms, instruments, and theories. GER:3a,4a
4-5 units, Aut (Hess)

RELIGST 164. Ritual Music of the World—(Enroll in CASA 164, MUSIC 164)
4 units, Win (Diehl)

RELIGST 165/265. Religious Ritual—(Graduate students register for 265.) What is ritual? Why is it such an important human activity? Is there something specifically religious about it? The nature of ritual; religious and secular, public and private examples; and theories of ritual. GER:3a
4-5 units (Staff) not given 2004-05

RELIGST 166/266. Eastern European Jewish Mysticism: The Hasidic Movement—(Same as JEWISHST 166/266; graduate students register for 266.) The emergence of Hasidism as a religious revival movement, its rapid spread in the face of militant opposition, and the evolution of its religious doctrine and patterns of social organisation, from the mid-18th century to the present. Issues include the historiography of Hasidism, kabbalistic origins, messianic orientation, diversity of styles, charismatic leadership, the position of women, and literary output. 4 units, Spr (Rapoport-Albert)

RELIGST 169. Christianity in Late Antiquity—Communal struggles, personal rivalries, theological conflicts, and social controversies in the early church (2nd-6th centuries C.E.) that shaped Christianity and its history. Issues include: heresy and orthodoxy; hierarchy and charisma; gender and class; persecution and martyrdom; paganism and classical tradition; creeds and councils; asceticism and the body; church and state; and eastern and western Christianity. GER:3a
4 units, Spr (Kalleres)
RELIGST 172. Sex, Body, and Gender in Medieval Religion—Anxiety about sex and the body increased during the early years of Christianity, while the doctrine of the Incarnation put the human body at the center of religious concern. Ideals of virginity, chastity, ascetic self-denial of necessities like food, sleep, and freedom from pain were central to lay and clerical piety. The religious theory and practice associated with questions about sex, body, and gender in the Middle Ages as constructed in literature, mythology, ritual, mystic, and monastic texts. GER:3a, 4c
4 units (Gelber) not given 2004-05

RELIGST 181A. Adventures in Religious Poetry.—(Same as ENGLISH 181A.) Preference to majors. GER:3a
5 units (Fields, Yearley) not given 2004-05

RELIGST 185. Prophetic Voices of Social Critique—Judges, Samuel, Amos, and Isaiah depict and question power, strong leaders who inevitably fail, the societal inequities and corruption inevitable in prosperity, and the interplay between prophet as representative of God and the human king. How these texts succeed in their scrutiny of human power and societal arrangements through attention to narrative artistry and poetic force, and condemnation of injustice. May include a service-learning component in conjunction with the Haas Center. GER:3a
4 units, Spr (Leveen)

UNDERGRADUATE DIRECTED READING

RELIGST 199. Individual Work.—Prerequisite: consent of instructor and of the department.
1-15 units, Aut, Win, Spr (Staff)

UNDERGRADUATE SEMINARS

RELIGST 211. Religion, Politics, and American Democracy.—(Same as HUMNTIES 196H.) Seminar. Should religious arguments have a public role in policy debates in a democratic society that includes conflicting religious conceptions of the good? Does the separation of church and state require a completely secular society? Readings include Rawls, Rorty, Carter, Hauerwas, and Stout.
5 units, Win (Harvey)

RELIGST 212. Chuang Tzu—Interpretive approaches to the challenges presented by the Taoist text, the Chuang Tzu. Limited enrollment. GER:3a
4 units (Yearley) not given 2004-05

RELIGST 213. Daode Jing—Passages from the Daode jing (Scripture of the Way and its Virtue) and their interpretation in major traditional commentaries. Topics include Daoist metaphysics, the ideal of saint-hood, the view of rulership and society, and the Daoist notions of non-action, spontaneity, and return to the Dao. GER:4a
4 units, Aut (Pregadio)

RELIGST 216/316. Doctrine and Practice in Theravada Buddhism—(Graduate students register for 316.) The religious principles, practices, underlying doctrines, and the accommodation between religion and society in the Theravada tradition of Sri Lanka and S.E. Asia. The origins of Buddhism in ancient India, the consolidation of the Theravada tradition, the development of its monastic, intellectual, and lay communities, its spread across S.E. Asia, and modern transformations and trends. Anthropological and textual perspectives, and methodological difficulties. GER:4a
4-5 units, Win (Kumada, Ronkin)

3 units, Aut (Kumada)

RELIGST 218/318. Buddhist Ethics: Nonviolence and Compassion—(Graduate students register for 318.) Approaching Buddhist ethics descriptively. The position of ethics in Indian Buddhism, its relation to Buddhist soteriological goals, and changes since the founder. Themes include nonviolence (ahimsa), compassion, bodhisattva, the ascetic saint (arhat), and social activism. Readings of Buddhist literature in translation. GER:4a
4 units, Spr (Zimmermann)

RELIGST 221/321. Modern Judaism.—(Graduate students register for 321.) Changes in Judaism over the last two centuries with focus on emancipation, Zionism, and developments in theology and practice. GER:3a
5 units, Spr (Eisen)

RELIGST 225. The Secrets of the Dead Sea Scrolls—The scrolls discovered between 1947 and 1960 in the caves near Hирbat Qumran on the N.W. shore of the Dead Sea provide first-hand information on a Jewish group living at the time of the Second Temple. Contents and main genres of scroll literature. The sect’s community social structure, member beliefs, and religious law and practices. New information concerning the origins of Christianity and Rabbinic Judaism.
4 units, Win (Shemesh)

RELIGST 232. God: A Biography—Readings in the Hebrew Bible illuminate a God who walks among human beings, appears on mountain top and in cloud, and can be challenged and conciliated. Genesis, Exodus, the prophet Ezekiel, and Job convey the dimensions in which the religious imagination encounters the Hebrew God. Recent works such as The God of Old, The Divine Symphony, and An Early History of God in which ancient multidimensional approach to God re-emerges. GER:3a
4 units, Aut (Leveen)

RELIGST 235. Pilgrimage and Sacred Landscapes.—(Same as CASA 135X.) Perspectives include cultural, spiritual, psychological, medical, economic, and political. Christianity, Buddhism, Hinduism, Islam, Native American, and secular; sources include Europe, Tibet, India, Native America, and the Middle East. Why do pilgrims often make their journeys difficult and painful? How do landscapes become sacred? What happens when places such as Jerusalem are intersections for groups with different belief systems? Contemporary U.S. destinations such as Grace-land and the Vietnam Memorial; journeys of personal or non-parochial cultural significance. GER:3a
4 units, Aut (Diehl)

4 units, Win (Sheehan)

RELIGST 245. Religion, Reason, and Romanticism—(Same as HUMNTIES 196B.) The late 18th-century European cultural shift from rationalist to romantic modes of thought and sensibility. Debates about religion as catalysts for the new Zeitgeist. Readings include: the Jewish metaphysician, Mendelssohn; the dramatist, Lessing; the philosopher of language and history, Herder; the critical idealist, Kant; and the transcendental idealist, Fichte. GER:3a
5 units, Spr (Sockness)

RELIGST 245S. Islam and the West.—(Enroll in POLISCI 245S.)
5 units, Spr (Milani)

RELIGST 251/351. Readings in Indian Buddhist Texts—(Graduate students register for 351.) Introduction to Buddhist literature through reading original texts in Sanskrit. No prior knowledge of Sanskrit required. GER:3a
4-5 units, Win (Zimmermann)

RELIGST 256E. Political Anthropology from Rousseau to Freud—(Enroll in FRENGEN 256E.)
3-5 units, Spr (Dupay)

3-5 units (Staff) not given 2004-05

4 units, Spr (Pregadio)
RELIGST 268. Model Selves: Francis of Assisi—Francis as the model of a model self through his works and the stories that grew up around him. Emphasis is on the idea of model self in myth and history with reference to other such selves, both male and female. GER:3a
4 units (Gelber) not given 2004-05

RELIGST 270. Science and Religion—Team-taught. Relations between the fields via case studies drawn primarily from biology and Judaism highlighting both similarities and differences. A review of current debates, with emphasis on genetics, the evolution of learning, communication, ritual and tradition, and the role of religious and scientific communities. GER:3a
4 units (Bergman, Eisen) not given 2004-05

RELIGST 271A,B. Dante’s Spiritual Vision—Mysticism, poetry, ethics, and theology in Dante’s Divine Comedy. Supplementary readings from classical authors such as St. Augustine and St. Thomas, and from modern writers. Students may take 271A without B. GER:3a 4 units, A: Win, B: Spr (Yearley)

RELIGST 275/375. Kierkegaard and Religious Existentialism—(Graduate students register for 375.) Close reading of Kierkegaard’s pivotal work, Concluding Unscientific Postscript. The discovery and appropriation of Kierkegaard in the 20th century by Christian and Jewish thinkers. GER:3a 4 units, Aut (Sockness)

RELIGST 278. Heidegger, Rahner, and God—A critical presentation of the post-1989 paradigm shift in Heidegger research and its relevance to questions of religion and God. Prerequisite: consent of instructor. GER:3a 5 units (Sheehan) not given 2004-05

RELIGST 290. Majors Seminar—Majors seminar. An introduction to Religious Studies through the fields and approaches represented by the faculty of the Stanford Department of Religious Studies. WIM 4 units, Win (Faure)

RELIGST 297. Senior Essay—Prerequisite: consent of instructor and of the department. 3-5 units, Aut, Win, Spr (Staff)

RELIGST 298. Senior Colloquium—For Religious Studies majors writing the senior essay. Students present in progress, and pass and respond to others. Approaches to research and writing in the humanities. 5 units, Spr (Hess)

GRADUATE SEMINARS, RESEARCH, AND TEACHING

Topics of directed research (numbers ending in 9) vary each year according to student initiative and faculty research interests.

RELIGST 304A,B. Theories and Methods—Required of all graduate students in Religious Studies. Various approaches to the study of religion. Prerequisite: consent of instructor. RELIGST 304A. 4 units (Yearley) not given 2004-05
RELIGST 304B. 4 units, Aut (Faure)

RELIGST 305. Medieval Daoist Texts—Readings from primary sources: classical Chinese. 3-5 units (Pregadio) not given 2004-05

RELIGST 310. Buddhist Intellectual History: Buddha-Nature—The Mahayana ideal that all sentient beings have the nature of a buddha (tathagatagarbha), formulated in 3rd-century C.E. India, and its impact on the intellectual history of Central and E. Asia. The basic scriptures of buddha-nature thought and the forms of its expression in India. Hermeneutical problems concerning the interpretation of buddha-nature thought in the Indo-Tibetan tradition. 3-5 units (Zimmermann) not given 2004-05

RELIGST 311A,B. Buddhist Studies Seminar 5 units (Faure) not given 2004-05

RELIGST 312. Buddhist Studies Proseminar—Research methods and materials. Prerequisite: reading knowledge of Chinese or Japanese. 2 units (Staff) not given 2004-05

RELIGST 313. Buddhist Iconography and Ritual 3-5 units, Aut (Faure)

RELIGST 322. Readings in Rabbinic Texts 3-5 units (Fonrobert) not given 2004-05

RELIGST 323. Biblical Conceptions of Tradition—Competing biblical notions of tradition and of memory in Numbers and Deuteronomy. 3-5 units (Leven) not given 2004-05

RELIGST 325. Readings from the Literature of Hasidism—Prima- rily for graduate students. Readings in Hebrew with English translation when available. Prerequisite: Hebrew. 3-5 units, Spr (Rapoport-Albert)

RELIGST 338. Medieval Seminar—Medieval literature as a branch of ethics with the purpose of teaching people how to fulfill the functions of their station in life and please God. The culture of the period through ethical ideals in philosophical, theological, and literary texts. Connections among ethics, cosmology, sacred history, anthropology, and soteriology in the medieval world view. Medieval ethical beliefs as a window on medieval intellectual culture. 4 units (Gelber) not given 2004-05

RELIGST 340. Comparative Religious Ethics—The difference the notion of the religious makes in religious ethics and how it affects issues of genre. Theoretical analyses with examples from W. and E. Asia. May be repeated for credit. Prerequisite: consent of instructor. 4 units, Spr (Yearley)

RELIGST 345. Kierkegaard and Religious Existentialism—(Same as 275; see 275.) 4 units, Aut (Sockness)

RELIGST 356. The Holy: Readings in Phenomenology—Prerequisite: consent of instructor. 3-5 units (Sheehan) not given 2004-05

RELIGST 389. Individual Work for Graduate Students—Prerequisite: consent of instructor. 1-15 units, Aut, Win, Spr (Staff)

RELIGST 390. Teaching in Religious Studies—Required supervised internship. 4 units, Aut, Win, Spr (Staff)

RELIGST 391. Pedagogy—Required of Ph.D. students. 1 unit, Aut, Win, Spr (Staff)

RELIGST 392. Candidacy Essay—Prerequisite: consent of graduate director. 1-15 units, Aut, Win, Spr (Staff)

RELIGST 395. Master of Arts Thesis 2-9 units, Aut, Win, Spr (Staff)

RELIGST 399. Recent Works in Religious Studies—Readings in secondary literature for Religious Studies doctoral students. 1-2 units, Spr (Sockness)

OVERSEAS STUDIES

Courses approved for the Religious Studies major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING
RELIGST 19B. Philosophy and Religion, East and West 4 units, Aut (Zhao)

KYOTO
RELIGST 17R. Religion and Japanese Culture 4-5 units, Spr (Ludvik)
CENTER FOR RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES

Emeriti: Terence L. Emmons, Joseph N. Frank, Alex Inkeles, Joseph Van Campen, Henry Rowen, Wayne S. Vucinich
Director: Nancy S. Kollmann (History)
Associate Director: Mary Dakin
Academic Coordinator: Jack Kollmann
Professors: Lazar Fleishman (Slavic Languages), Gregory Freidin (Slavic Languages), David J. Holloway (History, Political Science), Nancy S. Kollmann (History), David Laitin (Political Science), Norman Naimark (History, on leave), Aron Rodrigue (History), Richard D. Schubbach (Slavic Languages), Nancy B. Tuma (Sociology), Steven J. Zipperstein (History)
Associate Professors: Maria Gough (Art History), Monika Greenleaf (Slavic Languages), Michael McFaul (Political Science), Gabriella Safran (Slavic Languages), Amir Weiner (History, on leave)
Assistant Professors: Robert Crews (History), Pavle Levi (Art History), Bissera Pentcheva (Art History)
Courtesy Professors: Coit Blacker (Political Science), Gail Lapidus (Political Science)
Senior Lecturers: Rima Greenhill (Slavic Languages), Katherine Jollick (History), Geoffrey Rothwell (Economics)
Lecturers: Jasmina Bojic (Humanities), Mary Dakin (Political Science), John Dunlop (International Policy Studies), Jack Kollmann (REEES), Bertrand Patenaude (History), Izaly Zemtsovsky (Music)
Visiting Professors: Oksana Bulgakowa (Slavic Languages), John Connelly (History), Jonathan Haslam (History), Alma Kunanbaeva (Cultural and Social Anthropology), Alan Timberlake (Slavic Languages), Viktor Zhivov (Slavic Languages)
Instructors: Christine Gathmann (Economics), Michael Rouland (History)
Affiliates: Michael Bernstam (Hoover Institution), Robert Conquest (Hoover Institution), Elena Danielson (Hoover Institution), John B. Dunlop (Hoover Institution), Joseph D. Dwyer (Hoover Institution), Bertrand Patenaude (Hoover Institution), Karen Rondestvedt (Stanford Libraries), Kathryn Stoner-Weiss (Stanford Institute for International Studies), Wojciech Zalewski (Stanford Libraries)
Center Offices: Building 40, Main Quad
Mail Code: 94305-2006
Phone: (650) 723-3562
Web Site: http://CREEES.stanford.edu

The Center for Russian, East European and Eurasian Studies (CREEES) coordinates the University’s teaching, research, and extra-curricular activities related to the former Soviet Union and Eastern Europe, and administers two interdisciplinary academic programs: an undergraduate minor and an M.A. graduate degree program. Information on center programs and activities is available at http://CREEES.stanford.edu. CREEES and its degree programs are directed by the CREEES Steering Committee, composed of faculty members associated with the Center. The programs draw on the strengths of nationally recognized area faculty and research affiliates and significant library and archival collections at Stanford. The Center is a U.S. Department of Education Title VI National Resource Center for Russia and East Europe.

UNDERGRADUATE PROGRAMS

MINORS

The minor in Russian, East European, and Eurasian Studies (REEES) is an interdisciplinary area studies program that allows the participating student significant opportunity to select REEES courses in various departments according to his or her interests.

REQUIREMENTS

1. Two core courses: one on Russia/Eurasia, one on Eastern Europe, to be selected by the student from an annual list of qualifying courses issued by CREEES.
2. At least four additional REEES courses, totaling at least 20 units.
3. The student’s courses, core and additional, must be distributed among at least three departments. In addition to REEES courses in the departments of History, Political Science, and Slavic Languages and Literatures, REEES courses in Cultural and Social Anthropology, Economics, Sociology, and so on, when offered, may qualify. The CREEES academic coordinator determines which courses qualify for the minor.
4. A capstone experience in REEES, including, but not limited to, one of the following:
   a) a departmental seminar course for advanced undergraduates
   b) directed reading and research with a Stanford faculty member or a CREEES-approved resident or visiting scholar
   c) participation in the Stanford Overseas Studies Program in Moscow.

Foreign Language—The REEES minor has no language requirement, but the participating student is strongly encouraged to attain working competence in Russian or another relevant language. Courses at the third-year level or above in Russian or another language of the former Soviet Union or Eastern Europe (excluding German) may be counted towards the REEES minor, up to a maximum of 3 units per academic quarter, 9 units total.

Additional Information—The total number of courses applied to the REEES minor must be at least six, but the minor should total no more than 36 units. Courses counting towards the REEES minor may not be counted towards the student’s major. Courses taken at Stanford overseas campuses (particularly the Moscow campus) may count towards the REEES minor, with the approval in each case of the CREEES academic coordinator; at least three courses for the minor must be taken in residence at Stanford.

Approval of CREEES Academic Coordinator—Students interested in pursuing the REEES minor should consult the CREEES academic coordinator. The minor is declared online using the AXESS system. Students declaring the REEES minor must do so no later than three quarters prior to their intended quarter of degree conferral. Approval of minor declarations and certification of requirements are made by the academic coordinator.

Students pursuing the REEES minor work with the CREEES academic coordinator, who is responsible for determining that requirements for the minor are satisfied.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

To qualify for a coterminal M.A. degree in Russian, East European, and Eurasian Studies, besides completing University requirements for the B.A. degree, a student must:

1. Submit a coterminal application for admission to the program no later than the quarter prior to the expected completion of the undergraduate degree, normally the Winter Quarter prior to Spring Quarter graduation. Students with advanced placement and transfer credit must apply at least four quarters before the expected master’s degree conferral date. Applications may be obtained at http://registrar.stanford.edu/publications/. The deadline for all coterminal applications to the M.A. program in Russian, East European and Eurasian Studies is January 11, 2005.
2. Include in the application a program which outlines, by quarter, the schedule of courses the student plans to complete toward the M.A. degree. The student should seek the advice of the CREEES academic coordinator in drafting this schedule. The application also should include: (a) a current Stanford transcript; (b) a one-page statement of purpose; and (c) two letters of recommendation from Stanford professors. Applicants must have a grade point average (GPA) of at least 3.0 (B). Coterminous applicants must take the general test of the Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.

3. Complete 15 full-time quarters or the equivalent, or three quarters in full-time residence after completing 180 units; and complete, in addition, the 180 units required for the bachelor’s degree, a minimum of 48 units for the master’s degree.

The same courses may not be counted to meet both undergraduate and graduate requirements, and no courses taken before the junior year may be used to meet the course requirements for the master’s degree. Requirements for completion of the M.A. degree are summarized below; a more detailed description of the program and requirements is available from the center.

SLAVIC THEME HOUSE

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence which houses 50 students and offers a wide variety of opportunities to expand knowledge, understanding, and appreciation of Russia, the former Soviet Union, and Eastern Europe.

OVERSEAS STUDIES PROGRAMS

Undergraduate students interested in the study of languages, history, culture and social organization of the countries of Russia, Eurasia, and Eastern Europe can apply to study at the Stanford center in Berlin. Participation in these programs is encouraged and easily integrated into the REEES minor. Information about these programs is available at http://osp.stanford.edu.

GRADUATE PROGRAMS

MASTER OF ARTS

CREEES offers a one-year intensive interdisciplinary master’s degree program in Russian, East European, and Eurasian Studies for students with a strong prior language and area studies background. The program structure allows students the flexibility to pursue their particular academic interests, while providing intellectual cohesion through a required core curriculum that addresses historical and contemporary processes of change in the former Soviet Union and Eastern Europe. This core curriculum consists of three core courses and the REES 200, Core Seminar Series. The program may be taken separately or coterminal with a B.A. degree program. The interdisciplinary M.A. program typically serves three types of students:

1. Those who intend to pursue careers and/or advanced degrees in such fields as business, education, government, journalism, or law, and who wish to establish competence in Russian, East European, and Eurasian studies.
2. Those who intend to apply to a Ph.D. program involving Russian, East European, and Eurasian studies and who need to enhance their academic skills and credentials.
3. Those who are as yet undecided on a career but who wish to continue an interest in Russian, East European, and Eurasian studies.

ADVISING

The advising structure is two-tiered: each M.A. candidate works with the CREEES academic coordinator who advises on the program of course work and monitors the student’s progress toward completing the degree. Candidates are also assigned a faculty adviser from the Academic Council faculty, who provides intellectual and academic guidance.

ADMISSION

Applicants are encouraged to apply electronically; see http://gradadmissions.stanford.edu/ for a link to the electronic application and general information regarding graduate admission, or to request a written application. In addition, prospective applicants are strongly encouraged to consult with the academic coordinator at CREEES regarding the application process.

To qualify for admission to the program, the following apply:

1. Applicants must have earned a B.A. or B.S. degree, or the equivalent.
2. Applicants must have completed at least three years of college-level Russian language study or the equivalent prior to beginning the program. Other languages of Eastern Europe or the former Soviet Union may be accepted on a case-by-case basis.
3. Applicants whose native language is not English are ordinarily expected to take the Test of English as a Foreign Language (TOEFL) and have the results sent to Graduate Admissions, Office of the University Registrar.
4. All applicants must take the General Test of the Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.

The deadline for submission of applications for admission and for financial aid is January 11, 2005. Admission is normally granted for Autumn Quarter, but requests for exceptions are considered.

The successful applicant generally demonstrates the following strengths: requisite foreign language study, significant course work in Russian, East European, and Eurasian studies in multiple disciplines, outstanding grades in previous academic work, high GRE scores (particularly verbal and analytical writing), study or work experience in the region, strong letters of recommendation, and a persuasive statement of purpose explaining why and how the program fits the applicant’s academic and career goals.

DEGREE REQUIREMENTS

Candidates for the M.A. degree must meet University requirements for an M.A. degree as described in the “Graduate Degrees” section of this bulletin.

The M.A. program in REEES can ordinarily be completed in one academic year by a well-prepared student; longer periods of study are permitted.

Requirements to complete the interdisciplinary M.A. degree are principally ones of distribution, with the exception of three required core courses and a core seminar, as described below. Each student, with the advice of the CREEES academic coordinator, selects courses according to the student’s interests, needs, and goals.

All students in the M.A. REEES program must complete a minimum of 48 academic credit units within the following guidelines.

1. Core Courses: students must complete three, one quarter core courses. Each year, four to six courses, typically from the History, Political Science, and Slavic Languages and Literatures departments, are designated as M.A. core courses; students may select three of these to meet the core course requirement. Courses selected as core courses examine subject areas of fundamental importance within modern Russian, East European, and Eurasian Studies, and address questions of research, methodology, and current scholarship.
2. Core seminar 200, Current Issues in Russian, East European, and Eurasian Studies, is required of all students in the M.A. program for a total of three academic quarters. The goal of this course is to survey current methodological and substantive issues in Russian, East European, and Eurasian studies, acquaint students with Stanford resources and faculty, and present professional development and career options.
3. Interdisciplinary Course Work: a minimum of five graduate courses in Russian, East European, and Eurasian studies must be completed and distributed among at least three departments. All course work applied to the 48-unit minimum must deal primarily with Russian/Eurasian or East European studies.
4. Language Study: students in the program are expected to study Russian or another language of the former Soviet Union or Eastern Eu-
rope. Credit towards the 48-unit minimum (maximum 3 units per quarter, 9 units total) is allowed for advanced language work; in the case of Russian, "advanced" is defined as third-year Russian language instruction and above. Similar standards apply for other languages.

5. All course work qualifying for the 48-unit minimum (except REES 200) must have a letter grade of 'B' or higher. ('B-' does not count for degree credit, nor does 'S' or 'CR'.)

6. All courses counting towards the 48-unit minimum must be approved by the CREEES academic coordinator, who ensures that planned course work satisfies requirements towards the degree. The CREEES director and steering committee determine the requirements.

A description of the M.A. program is also available on the web at http://CREEES.stanford.edu/GraduatePrograms.html and by request from the Center for Russian, East European and Eurasian Studies.

FINANCIAL AID

Subject to funding, CREEES may have a limited number of Foreign Language and Area Studies (FLAS) fellowships for U.S. citizens or permanent residents. Additional financial aid may also be available from CREEES. Applicants in the M.A. program have priority in the annual FLAS competition; in recent years CREEES has also awarded FLAS fellowships in the Graduate School of Business, the School of Medicine, and the School of Law. Consult the CREEES academic coordinator for further information about the application and award process. Applications for FLAS fellowships can be obtained at http://CREEES.stanford.edu/FellowshipsGrants.html.

DOCTORAL PROGRAMS

Since the University does not offer a Ph.D. in Russian, East European, and Eurasian Studies, students wishing to pursue a REEES-related doctoral program must apply to one of the departments offering a Ph.D. with an emphasis on Russia, Eurasia, or Eastern Europe, such as the departments of History, Political Science, or Slavic Languages and Literatures.

COURSES

REEES 200. Current Issues in Russian, East European, and Eurasian Studies—Enrollment limited to REEES students. Scholars present analyses of methodologies, challenges, and current issues in the study of Russia, Europe, and Eurasia.

1 unit, Aut, Win, Spr (Kollmann)

INTERDEPARTMENTAL OFFERINGS

The courses listed below by department deal at least in part with Russia, the former Soviet Union, or Eastern Europe. See the respective department listings for course descriptions. Additional relevant courses by resident or visiting faculty may be offered; for updated information, consult the quarterly Time Schedule or contact the Center for Russian, East European and Eurasian Studies. Students in the area studies M.A. program must have their course list approved each quarter by the Academic Coordinator prior to enrollment.

ART AND ART HISTORY

ARTHIST 106/306. Early Christian and Byzantine Art and Architecture, 300-1453
4 units, Aut (Pentcheva)

ARTHIST 166/366. Aesthetics and Politics in East European Cinema
4 units, Win (Levi)

ARTHIST 410. Aesthetics of the Icon
5 units, Aut (Pentcheva)

CULTURAL AND SOCIAL ANTHROPOLOGY

CASA 171. Mythology, Folklore, and Oral Literature of Central Asia
5 units, Aut (Kunanbaeva)

CASA 173/273. Nomads of Eurasia
4-5 units, Spr (Kunanbaeva)

ECONOMICS

ECON 120. Socialist Economies in Transition
5 units, Spr (Gathmann)

HISTORY

HISTORY 20N. Early Modern European Views of Eastern Europe and Russia
5 units, Spr (Kollmann)

HISTORY 23S. Beyond the Shtetl: Jews and Poles, 1881-1946
5 units, Aut (Plocker)

HISTORY 101D. History of Nuclear Weapons
5 units, Spr (Holloway)

HISTORY 102A. The History of the International System
5 units, Spr (Haslam)

5 units, Spr (Kollmann)

HISTORY 120B. History of Imperial Russia
5 units, Spr (Crews)

HISTORY 120C. 20th-Century Russian and Soviet History
5 units, Aut (Patenaude)

HISTORY 125/325A. 20th-Century Eastern Europe
5 units, Win (Jolluck)

HISTORY 137/337. The Holocaust
5 units, Win (Rodrigue)

HISTORY 189C. Nationalism, Socialism, and Modern Jewish History
5 units, Aut (J. Frankel)

HISTORY 206B/306B. Design and Methodology for International Field Research
1 unit, Win (N. Kollmann, Roberts)

HISTORY 217/317. Men, Women, and Power in Early Modern Russia, 1500-1800
5 units, Win (N. Kollmann)

HISTORY 217B. The Woman Question in Modern Russia
5 units, Spr (Kollmann)

HISTORY 218. Russia and the West, 1815-1917
5 units, Aut (Patenaude)

HISTORY 220A/320. Violence, Islam, and the State in Central Asia
5 units, Win (Crews)

HISTORY 220B. Central Asia in the 20th Century
4-5 units, Aut (Rouland)

HISTORY 222B/322B. Circles of Hell: Poland in World War II
5 units, Spr (Jolluck)

HISTORY 223A/323A. Cold War Russia
5 units, Spr (Haslam)

HISTORY 225D/325D. East European Women and War in the 20th Century
5 units, Aut (Jolluck)

HISTORY 288B. The History of East European Jews in the Mirror of Literature
5 units, Aut (E. Frankel)

HISTORY 321A. Topics in Early Modern Russian Historiography
5 units, Win (Kollmann)

HISTORY 321B. Imperial Russian Historiography
5 units, Spr (Crews)

HISTORY 322. Readings in Eastern European History
5 units, Win (Connelly)
INTERDISCIPLINARY STUDIES IN HUMANITIES
HUMNTIES 197C. Camera as Witness: A Forum for Global Dialogue
  5 units, Spr (Bojic)

INTERNATIONAL RELATIONS
INTNLREL 166. Russia and Islam—(Same as IPS 266.)
  5 units, Aut (Dunlop)

LANGUAGE CENTER
  For courses in Russian, Eastern European, and Eurasian language instruction with the subject code SLAVLANG or SPECLANG, see the “Language Center” section of this bulletin.

MUSIC
MUSIC 9A. Tchaikovsky, Stravinsky, Shostakovich, and Beyond: A History of Russian Music
  3 units, Spr (Zemtsovsky)

POLITICAL SCIENCE
  5 units, Win (Sagan, Blacker, Perry)
POLISCI 141R. Russian Politics
  5 units, Aut (Dakin)
POLISCI 317R. The End of the USSR: Causes and Consequences
  5 units, Win (Lapidus)
POLISCI 341T. Comparative Democratization and Regime Change
  5 units, Aut (Karl)

SLAVIC GENERAL
SLAVGEN 77Q. Russia’s Weird Classic: Nikolai Gogol
  3 units, Aut (Fleishman)
SLAVGEN 122/222. Yiddish Literature
  5 units, Spr (Safran)
SLAVGEN 133A/233A. Deviating From Dogma: Film in East Europe from 1956 to 1968
  4 units, Win (Bulgakowa)
SLAVGEN 145/245. The Age of Experiment, 1820-50—(Same as COMPLIT 145S/245S.)
  3-4 units, Aut (Greenleaf)
SLAVGEN 146/246. The Age of Transgression: The Great Russian Novel
  4 units, Win (Safran)
SLAVGEN 148/248. The Age of Dissent: A Survey of Russian Literature and Culture, 1953 to the Present
  2-4 units, Spr (Freidin) alternate years, not given 2005-06
SLAVGEN 151/251. Dostoevsky and His Times—(Same as COMPLIT 151S.)
  4 units, Win (Frank)
SLAVGEN 156/256. Nabokov and Modernism—(Same as COMPLIT 156D/256D.)
  3-5 units, Spr (Greenleaf)
SLAVGEN 158/258. Sergei Eisenstein and his Vision of Film Theory
  4 units, Win (Bulgakowa)
SLAVGEN 165/265. Poetry, Painting, and Music of the Russian Avant Garde
  4 units, Win (Fleishman)
SLAVGEN 190/290. Tolstoy’s Anna Karenina and the Social Thought of its Time—(Same as HUMNTIES 197F.)
  5 units, Aut (Freidin)

SLAVIC LITERATURE
SLAVLIT 129/229. Poetry as System: Introduction to Theory and Practice of Russian Verse
  4 units, Win (Fleishman)
SLAVLIT 187/287. Russian Poetry of the 18th and 19th Centuries
  3 units, Win (Fleishman)
SLAVLIT 189/289. Literature from Old Rus’ and Medieval Russia
  4 units, Spr (Zhivov)
SLAVLIT 200A. Introduction to Library and Archival Research in Slavic Studies
  1-5 units, Aut (Fleishman)
SLAVLIT 211. Introduction to Old Church Slavic
  3 units, Win (Timberlake)
SLAVLIT 212. Old Russian And Old Church Slavic
  3 units, Spr (Timberlake)
SLAVLIT 213. The Literary Dialogue of Pushkin and Gogol in the Formative Context of the 1830s
  2-4 units, Aut (Greenleaf)
SLAVLIT 305. Russian Critical Traditions
  3-4 units, Aut (Safran)
SLAVLIT 310. Civilizing Process: Paradigms of Society and Culture in Modern Russian Literature and Film
  2-4 units, Win (Freidin)
SCIENCE, TECHNOLOGY, AND SOCIETY

Emeriti: James Adams (Management Science and Engineering, Mechanical Engineering), Alex Inkeles (Sociology), Walter Vincenti (Aeronautics and Astronautics)

Director: Robert McGinn (Management Science and Engineering; Science, Technology, and Society)

Program Committee: Stephen Barley (Management Science and Engineering), Ursula K. Heise (English), Brad Osgood (Electrical Engineering), Eric Roberts (Computer Science), Scott Sagan (Political Science), Fred Turner (Communication)

Lecturers: Monique Canto-Sperber, Henry Lowood, Patrick Windham

Consulting Professor: Naushad Forbes (Science, Technology, and Society)

Affiliated Faculty and Staff: Stephen Barley (Management Science and Engineering), Barton Bernstein (History), Scott Bukatman (Art and Art History), Thomas Byers (Management Science and Engineering), Joseph Corn (History), Jean-Pierre Dupuy (French), Paula Findlen (History), David Freyberg (Civil and Environmental Engineering), Ursula K. Heise (English), Sarah Jain (Cultural and Social Anthropology, on leave), Joseph Manning (Classics), Gilbert Masters (Civil and Environmental Engineering), Brad Osgood (Electrical Engineering), Jessica Riskin (History), Eric Roberts (Computer Science), Nathan Rosenberg (Economics), Scott Sagan (Political Science), Michael Shanks (Classics, Cultural and Social Anthropology), Paul Turner (Art and Art History), Gavin Wright (Economics)

Mail Code: 94305-2120
Phone: (650) 723-2565
Web Site: http://www.stanford.edu/group/STS/

Courses given in Science, Technology, and Society have the subject code STS. For a complete list of subject codes, see Appendix.

Technology and science are activities of central importance in contemporary life, intimately bound up with society’s evolving character, problems, and potentials. If scientific and technological pursuits are to further enhance human wellbeing, they and their effects on society and the individual must be better understood by non-technical professionals and ordinary citizens as well as by engineers and scientists. Issues of professional ethics and social responsibility confront technical practitioners. At the same time, lawyers, public officials, civil servants, and business people are increasingly called upon to make decisions requiring a basic understanding of science and technology and their ethical, social, and environmental consequences. Ordinary citizens, moreover, are being asked with increasing frequency to pass judgment on controversial matters of public policy related to science and technology. These circumstances require education befitting the complex sociotechnical character of the contemporary era.

Science, Technology, and Society (STS) is an interdisciplinary program devoted to understanding the nature of science and technology in modern and contemporary societies. Achieving this understanding requires critical analysis of the interplay of science and technology with human values and worldviews, political and economic forces, and cultural and environmental factors. Hence, students in STS courses study science and technology in society from a variety of perspectives in the humanities and social sciences. To provide a basic understanding of technology and science, STS majors are also required to achieve either literacy (B.A.) or a solid grasp of fundamentals (B.S.) in some area of engineering or science.

GENERAL INFORMATION

Selected STS courses may be used, individually or in groups, for various purposes:
1. To satisfy University General Education Requirements
2. To satisfy the Technology in Society Requirement of the School of Engineering
3. To comprise parts of student-designed concentrations required for majors in fields such as Human Biology and Public Policy
4. To satisfy the requirements of the STS Honors Program complementing any major (see below)
5. To satisfy requirements for majors in STS (see below)
6. To satisfy requirements for a minor in STS (see below)

STS courses are particularly valuable for undergraduates planning further study in graduate professional schools (for example, in business, education, engineering, law, journalism, or medicine) and for students wishing to relate the specialized knowledge of their major fields to broad technology and science-related aspects of modern society and culture.

The STS Program is a unit of the Center for the Interdisciplinary Study of Science and Technology (CISST). For further information about CISST see the “Academic Centers” section of this bulletin.

UNDERGRADUATE PROGRAMS

Degree programs in STS are interdisciplinary curricula devoted to understanding the nature and significance of technology and science in modern society. Majors analyze phenomena of science and technology in society from ethical, aesthetic, historical, economic, and sociological perspectives. In addition, students pursuing the B.A. degree study a technical field in sufficient depth to obtain a grasp of basic concepts and methods, and complete a structured concentration on a theme, a particular STS issue, problem, or area of personal interest related to science and technology in society. Those seeking the B.S. degree complete at least 50 structured units in technology, science, and mathematics. The particular technical courses chosen reflect the student’s special interest in science and technology in society. Specific requirements for the bachelor’s degree in STS are as follows:

BACHELOR OF ARTS

1. STS Core (eight courses):
   a) Interdisciplinary Foundational course: STS 101 or 101Q
   b) Disciplinary Analyses (five courses with at least one in each category):
      1) Philosophical perspectives: STS 110, 112, 113, 114, 116, 117, 118
      2) Historical perspectives: STS 102, 120, 121, 122, 123A, 124, 125, 126, 128, 130, 132, 134
      3) Social Science perspectives: STS 138, 152, 155, 162, 171, 172
   c) Advanced courses (one course in each category):
      1) Disciplinary analysis: STS 207, 210, 212, 215, 217, 218, 219, 221, 229, 231, 255
      2) Senior Colloquium: STS 200

2. Technical Literacy (four courses):
   a) CS 105 or 106A or equivalent; and
   b) A four-course sequence (minimum of 12 units) in one field of engineering or science (sample sequences available in the STS office); or
   c) Four of the following Engineering Fundamentals courses: Engineering 10, 14, 15, 20, 30, 40, 50, 60, 62, 70A (see course descriptions in the “School of Engineering” section of this bulletin).

3. Thematic Concentration (minimum of 20 units, at least five courses, one each from among those designated on the appropriate concentration course list as foundational and advanced): Thematic concentrations are organized around an STS-related problem or area. The following thematic concentration topics have been pre-certified: the intersections of technology and science with aesthetics, development, history and philosophy, information and society, public policy, social change, and work and organizations.
Course lists for these concentration topics are available in the STS office. A student selecting one of the certified topics may include one or more courses not on the corresponding course list if they are germane to the concentration and meet the student’s special interests. Alternatively, the student may choose to design a thematic concentration topic and course package subject to program approval. Each thematic concentration, certified or self-designed, requires the signature of an appropriate faculty adviser. See the program chair for details.

BACHELOR OF SCIENCE

The student pursuing the B.S. degree shall complete the STS Core and a structured package of at least 50 units of technical courses intended to enable students to understand socially significant technical phenomena in some field of engineering or science. Introductory courses in mathematics or physics (for example, MATH 19 or PHYSICS 19) are normally not counted as parts of this technical depth component.

The B.S. candidate follows one of two models in fulfilling the minimum 50-unit requirement:

1. **Focused Depth:** at least seven courses amounting to at least 25 units in a single field of science or engineering, with the remaining units (except for at most two stand-alone courses) grouped in clusters of at least three courses each in other fields of science or engineering. For example, a Focused Depth package might contain eight mechanical engineering, three physics, three mathematics, and three computer science courses, and one course each in electrical engineering and chemistry. At least five of the seven courses in the focused depth area must be advanced, that is not normally taken in the first year of study in that field.

2. **Clustered Depth:** two or more clusters of at least five courses and 15 units each in different fields of science or engineering, with at most two stand-alone courses, and remaining courses, if any, in sequences of three or more courses. For example, a Clustered Depth package might contain five-course clusters in computer science, electrical engineering, and physics, three courses in civil engineering, and one course each in biology and chemical engineering. At least two courses in each cluster area must be advanced.

It is recommended that B.S. majors complete CS 106A or equivalent.

MINORS

Students planning careers in many technical and non-technical fields, including business, education, engineering, science, law, medicine, and public affairs, are faced with important STS issues in their professional practice. Therefore, a minor in STS is likely to prove practically valuable as well as intellectually stimulating.

Requirements—The STS minor requires successful completion of six courses satisfying the following four requirements:

1. **Foundational Course:** STS 101 or 101Q
2. **One disciplinary analysis course from each of the following three categories:**
   a) Philosophical/Ethical Perspectives: STS 110, 112, 113, 114, 115, 116, 117, 118, 119
   b) Historical Perspectives: STS 102, 120, 121, 122, 123A, 124, 125, 126, 128, 130, 132, 134
   c) Social Scientific/Policy: STS 138, 150, 152, 155, 162, 171, 172
3. Two advanced courses, from one or two of the following categories, building on courses taken under requirements 1 and 2:
   a) Philosophical/Ethical Perspectives: STS 210, 212, 215
   b) Historical Perspectives: STS 221, 229
   c) Social Scientific/Policy Perspectives: STS 207, 218, 219, 231, 255, 279, 280A
4. At least one of the courses taken under requirements 1 to 3 should incorporate a weekly, small group discussion.
5. With at most one exception, all courses taken to satisfy STS minor requirement must be taken for a letter grade where available. The exception cannot be STS 101 or 101Q.

Note—Students wishing to use a course not listed above to satisfy one of the requirements for a minor in STS may petition to do so. For details, inquire at the STS office, Building 370, Room 109.

HONORS PROGRAM

STS offers a limited number of students an opportunity to achieve honors through in-depth study of the interaction of science and technology with society. The honors program is open to students majoring in any field (including STS). Students accepted for this program carry out an honors project, the work for which normally begins in Spring Quarter of the junior year and is completed by mid-May of the senior year. Students who want their theses to be considered for the Firestone Prize must submit them to STS by May 20, 2005; all theses must be submitted to STS by June 1, 2005. STS thesis projects usually entail writing an honors essay, although occasionally students have chosen to produce a technical artifact or carry out some other work that itself represents original thinking. When a project results in a work other than an essay, students must also submit an accompanying scholarly exegesis of the work in question.

ADMISSION

Application for admission to the STS honors program is typically made during the last quarter of the student’s junior year. By the eighth week of that quarter, interested students must have completed, or be completing that quarter, at least two of the four courses required to satisfy honors requirements 1 to 4 listed below. Each applicant must also have submitted a formal proposal for her or his project to the STS Honors Committee, including the name of the primary thesis adviser. For proposal parameters, see the brochure Honors Program Requirements, available in the STS office. Students whose proposals are approved are encouraged to apply to attend Honors College in early September to get a running start on their theses. STS honors students are also encouraged to sign up for 2-5 units of credit per quarter in STS 190A,B,C for work on the honors project. While not required, doing so leaves the student sufficient time to finish the thesis in three quarters. Writing a senior honors thesis while simultaneously carrying a full academic load each quarter is a very difficult task to complete with distinction. STS majors pursuing honors in STS or another honors program take STS 200 for 2 units instead of 4 and do not write a research paper for this required course. However, failure to complete the thesis requires additional research work in STS 200. (Note: under exceptional circumstances, a student may be admitted to the STS honors program early in the first quarter of his or her senior year.)

REQUIREMENTS

For non-STS Majors

1. **Foundational Course:** STS 101 or 101Q
2. One Philosophical/Ethical Perspectives course: STS 110, 112, 113, 114, 115, 116, 117, 118, 210, 212, 215
3. One Historical Perspectives course: STS 102, 120, 121, 123A, 124, 125, 128, 130, 221, 229
4. One Social Science Perspectives course: STS 132, 138, 149, 152, 155, 162, 171, 172, 176, 219, 231, 255, 279
5. Honors Project: an original critical essay (or investigative project with accompanying explanatory essay) on an STS topic of general importance (up to 12 units may be taken while working on the thesis). Past honors projects are on file in the STS office library.

For STS majors

1. Completion of STS core.
2. **Requirement 5 above.**

To earn honors, the project must receive a grade of at least ‘B’ on the completed thesis. The student not majoring in STS must also achieve a grade point average (GPA) of at least 3.3 in the courses taken to satisfy requirements 1 to 4 above. In the case of STS majors, the student must compile a GPA of at least 3.3 in the entire STS core. If all these requirements are met, the designation “Honors Program in Science, Technology, and Society” is affixed to the student’s permanent record and appears in the commencement program.
INTRODUCTORY

STS 101. Science, Technology, and Contemporary Society—(Graduate students register for 201: same as ENGR 130.) Key social, cultural, and values issues raised by contemporary scientific and technological developments; distinctive features of science and engineering as sociotechnical activities; major influences of scientific and technological developments on 20th-century society, including transformations and problems of work, leisure, human values, the fine arts, and international relations; ethical conflicts in scientific and engineering practice; and the social shaping and management of contemporary science and technology. GER:3b
4-5 units, Aut (McGinn)

STS 101Q. Technology in Contemporary Society—Stanford Introductory Seminar. Preference to sophomores. Introduction to the STS field. The natures of science and technology and their relationship, what is most distinctive about these forces today, and how they have transformed and been affected by contemporary society. Social, cultural, and ethical issues raised by recent scientific and technological developments. Case studies from areas such as information technology and biotechnology, with emphasis on the contemporary U.S. Unexpected influences of science and technology on contemporary society and how social forces shape scientific and technological enterprises and their products. Enrollment limited to 12. GER:3b
3-5 units, Aut (McGinn)

STS 110. Ethics and Public Policy—(Same as MS&E 197, PUBLPOL 103B.) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs; technical professions, communications, and international relations. GER:3a, WIM
5 units, Win (McGinn)

STS 112. Science, Technology, and Culture: The Design of Ten Artifacts—(Same as CLASSART 113/213.) How does design work? Connections among science, technology, society, and culture by looking at: a palaeolithic hand axe; the pyramids at Giza; an ancient Greek perfume jar; a medieval castle; a Wedgwood china teapot; an electric light bulb; a computer mouse; a Sony Walkman; a supersonic aircraft; and the BMW Mini. Interdisciplinary perspectives include archaeology, cultural anthropology, science, history and sociology of technology, cognitive science, and evolutionary psychology.
4-5 units, Spr (Shanks)

STS 113. Science, Ethics, and Society: Debates and Controversies in Europe and in America—Public concern regarding scientific and political responsibility (precautionary principle, public health policy, nuclear deterrence), medical research (biotechnology, cloning), bioethics (abortion, euthanasia, experiments on human beings), and the modernization of society (affirmative action for women in politics, civil contract as an alternative to marriage, prostitution, pornography). The ethical principles and values underlying how these questions are settled in Europe. An approach to French culture and society based on the specificity of moral and scientific controversies. The French vision of modernity against the background of similar debates in America.
3-5 units, Spr (Canto-Sperber)

STS 114. Technology, Ecology, and the Imagination of the Future—(Same as ENGLISH 153G.) Seminar. Literary visions of the future from the 60s to the present. How such texts imagine new and existing technologies in interrelation with the evolution of natural ecosystems. The development of wild habitats, alterations of the human body, and visions of the future city. The role of images and stories about globalization. Literary, scientific, and technical texts.
5 units, Spr (Heise)

STS 115. Ethical Issues in Engineering—(Same as ENGR 131.) Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; the ethics of whistle blowing; ethical conflicts of engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations; ethical issues arising from engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies, guest practitioners, and field research. Limited enrollment. GER:3a
4 units, Spr (McGinn)

STS 116. Philosophy and the Scientific Revolution—The relationship between the scientific revolution of the 17th century that resulted in the birth of modern science and the contemporaneous intellectual developments constituting the birth of modern philosophy. Readings focus on Galileo and Descartes. GER: 3a
5 units, Aut (Friedman)

STS 117. Art and Technology—Introduction to the thematic of technology as it has been treated through modern art. The relationships among technology, industrialization, mass culture, communication, and social engineering and control from the invention of photography to recent visual practices. Emphasis is less on machine aesthetics than technological rationality such as the art of the last 30 years (kinetic art, video, digital photography). Recommended: some familiarity with modern art. (MOD- EU) GER:3a
4 units (Lee) not given 2004-05

STS 118. The Invention of Modern Architecture—(Enroll in ARTHIST 141/341.)
4 units, Aut (Turner)

STS 119. Cyborgs and Synthetic Humans—(Enroll in ARTHIST 162/362.)
4 units (Bukatman) not given 2004-05

STS 120. Science and Technology in Ancient Egyptian Society—(Same as CLASSHIS 131.) From 3000 B.C.E. to the Roman period. What was the source of technological change and innovation in Egypt? Why is the ancient Egyptian legacy important for later developments? What was the balance between changes internal and external to Egypt? Topics: ancient texts concerned with science, technology, mathematics, astronomy, medicine; Egyptian material culture and building techniques; the economic role of technology; Alexandrian science and its legacy.
4 units, Win (Manning)

STS 121. Technology and Culture in 19th-Century America—(Enroll in HISTORY 115.)
5 units, Win (Corn)

STS 122. American Spaces: An Introduction to Material Culture and the Built Environment—(Enroll in HISTORY 152.)
5 units, Spr (Corn)

STS 123A. The Scientific Revolution—(Enroll in HISTORY 213/313.)
5 units (Findlen) not given 2004-05

STS 124. American Economic History—(Enroll in ECON 116.)
5 units, Spr (Wright)

STS 126. The Prehistory of Computers—(Enroll in HISTORY 204B/304B.)
3-5 units (Riskin) not given 2004-05

WIM indicates that the course satisfies the Writing in the Major requirements.

The STS web site (http://www.stanford.edu/group/STS/) has updated course scheduling information, course syllabi, faculty and staff information, and information about how to declare a major or a minor in STS.
STS 128. Science and Technology in WWII and What Happened Afterward—The efforts of engineers, mathematicians, and scientists during WWII. The effect on the postwar world in areas such as information, communication, transportation, materials, and medicine. Science and engineering in the war effort, and what became of them after the war, drawn from: encryption and computation; radar, communication, and electronics; control and optimization; materials; drugs and medicine. GER:2b
3 units (Osgood) not given 2004-05

STS 130. Origins and History of the Scientific Fact—(Enroll in HISTORY 206P/306P.)
5 units, Aut (Riskin)

STS 132. Yesterday’s Tomorrows: Technology and the Future in History—American expectations regarding the development and consequences of science and technology. Topics: the emergence of a culture of prognostication in the late 19th century; turn-of-the-century new communications technologies; 30s World Fairs and Depression futures; the 60s, technology assessment, and anti-technology. GER:3b
5 units (Corn) not given 2004-05

STS 134. History of the Senses—(Same as HISTORY 203A/303A.) Technological, medical, philosophical, and scientific history of the five senses, drawing upon readings from antiquity to the present. How physiologists and philosophers have explained the functioning of the senses; how doctors have tampered with them both to help and to hinder; and how technologies including medical devices, scientific instruments, and tools of the arts have continually transformed the nature and experience of sensation.
5 units, Spr (Riskin)

5 units, Win (Sagan, Blacker, Perry)

STS 145. History of Computer Game Design: Technology, Culture, and Business—Historical contexts include entertainment media, computing technology, applications of gaming technology, and business history. Topics: play in human culture, early computer games from chess to Spacewar, the role of artificial intelligence research, the history of computer graphics and sound technology, the evolution of techniques and genres of computer game design, video game machines, games and the microcomputer revolution, networking, gaming, gadgets and games as factors in the evolution of software and hardware, marketing, gendering of games and game play, virtual worlds, simulation, video and computer game industries, and technology transfer such as military simulations. Enrollment limited to 90.
4 units, Win (Lowood)

STS 145A. History of Computer Game Design: Technology, Culture, and Business—Optional discussion section for 145.
1 unit, Win (Staff)

STS 152. Digital Media in Society—(Enroll in COMM 120/220.)
4-5 units, Spr (Turner)

STS 155. Science, Technology, and Gender—(Enroll in CASA 132.)
3-5 units (Jain) not given 2004-05

STS 162. Computers and Interfaces—(Enroll in COMM 169/269.)
4-5 units, Win (Nass)

STS 171. Technology and National Security—(Enroll in MS&E 193/293.)
3 units, Aut (Perry, Paté-Cornell)

STS 172. Issues in Technology and Work for a Post-Industrial Economy—(Enroll in MS&E 181.)
3 units, Spr (Barley)

STS 173. Introduction to High Technology Entrepreneurship—(Enroll in ENGR 145.)
4 units, Win (Byers, Komisar)

STS 176. Technology and Politics—The impact of politics and government on new technologies, and the effects that new technologies have on political life. Topics include how politics have shaped the development, use, and regulation of the Internet and nanotechnology, and how technologies such as television and the Internet have affected key elements of democratic politics, including freedom, equality, and political participation. Focus on U.S. politics, with some attention to developments elsewhere.
5 units, Aut (Windham)

STS 184. Technology Policy—(Enroll in PUBLPOL 194.)
5 units, Win (Windham)

STS 190. Honors Seminar—For juniors intending to pursue honors in STS or a related discipline. Goal is to identify a research problem and identify key components of honors research and thesis writing such as literature reviews, methodologies, theoretical frameworks, and writing standards.
4 units, Win (Staff)

STS 195A,B,C. Honors Project—For students in STS honors program.
STS 195A. Submission of Proposal
2-5 units, Aut (Staff)
STS 195B. Continued Study and Writing
2-5 units, Win (Staff)
STS 195C. Final Work on Project
2-5 units, Spr (Staff)

STS 199. Individual Work
1-5 units, Aut, Win, Spr (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

STS 200. Senior Colloquium—Key analytical and theoretical texts treating the natures and interplay of science, technology, and society. Only STS majors writing senior honors theses may take for 2 units. Prerequisite: STS major with senior standing and four STS core courses, or consent of instructor.
2-4 units, Win (Riskin), Spr (Findlen)

STS 201. Science, Technology, and Contemporary Society—(Same as 101, ENGR 130; see 101.)
4-5 units, Aut (McGinn)

STS 207. Science, Technology, and Economic Growth—(Enroll in ECON 224.)
2-5 units, Win (Gambardella)

STS 210. Ethics, Science, and Technology—Ethical issues raised by advances in science and technology. Topics: biotechnology including agriculture and reproduction, the built environment, energy technologies, and information technology. Prerequisite: 110 or another course in ethics. Limited enrollment. GER:3a
4 units (McGinn) not given 2004-05

STS 212. Ethics, Technology, and International Relations—(Enroll in INTNLREL 205.)
5 units, Spr (McGinn)

STS 215. Computers, Ethics, and Social Responsibility—(Enroll in CS 201.)
3-4 units, Spr (Roberts)

STS 217. Good Products, Bad Products—(Formerly 214.) The characteristics of industrial products that cause them to be successes or failures: the straightforward (performance, economy, reliability), the complicated (human and cultural fit, compatibility with the environment, craftsmanship, positive emotional response of the user), the esoteric (elegance, sophistication, symbolism). Engineers and business people must better understand these factors to produce more successful products. Projects, papers, guest speakers, field trips. Limited enrollment. GER:2b
3-4 units, Win (Beach)
STS 218. The Role of the University in the Knowledge Economy—The industrial world has come to consist of knowledge economies; economic performance has come to depend upon the ability to advance knowledge in science and technology. University research activities are sources of commercial advantage. Many universities routinely take out patents, some of which are highly profitable. The historical forces and the social and economic policy implications behind the new economic importance of universities. Emphasis is on Stanford’s role in Silicon Valley.

3 units, Win (Rosenberg)

STS 219. Management and Organization of Research and Development—(Enroll in MS&E 281.)

3 units, Win (Barley)

STS 221. The Politics and Ethics of Modern Science and Technology—The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:3a

5 units, Spr (Bernstein)

STS 229. When Worlds Collide: The Trial of Galileo—(Enroll in HISTORY 216/316.)

5 units, Spr (Findlen)

STS 231. Technology and Work—(Enroll in MS&E 284.)

3 units (Barley) alternate years, given 2005-06

STS 240. Understanding and Participating in Cyberlaw and Policy Making—(Enroll in CS 203.)

3 units, Aut (Gelman)

STS 269. Experimental Research in Advanced User Interfaces—(For undergraduates and M.A. students; Ph.D. students, register for 368G.) Project-based course involves small groups designing and implementing an experiment concerning voice and agent user interfaces. Each group is involved in a different, publishable research project. Prerequisites: consent of instructor.

1-5 units (Nass) not given 2004-05

STS 279. Technology, Policy, and Management in Newly-Industrializing Countries—Technology as the key to development and prosperity in most parts of the world. Building technological capability in newly industrializing countries at the national and firm level. Government intervention, the concept of technology leader and follower environments, the transfer of technology from leader countries, indigenous technological capability, human capital, culture and innovation, the role of small firms and new enterprises in technological capability. How innovation is different in technology followers, organizing for shop floor innovation, building an innovation culture, the role of R&D, design, and technology strategy in followers. Cases from Korea, India, Brazil, Singapore, and other NICs.

2-4 units, Aut (Forbes)

STS 280A. Research Workshop: Knowledge Networks—(Enroll in EDUC 374A, SOC 274A.)

1-3 units, Aut (Powell)

STS 299. Advanced Individual Work

1-5 units, Aut, Win, Spr (Staff)

OVERSEAS STUDIES

Courses approved for the Science, Technology, and Society major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

STS 117V. The Industrial Revolution and its Impact on Art, Architecture, and Theory

5 units, Aut (Neckenig)

STS 119V. Architecture and the City, 1871-1990: Berlin as a Nexus of Modernity

4 units, Spr (Neckenig)

STS 120V. Industry, Technology, and Culture, 1780-1945

4 units, Win (Neckenig)

FLORENCE

STS 125. Modernist Italian Cinema—(Same as ARTHIST 161Y, ITALGEN 134F.)

5 units, Aut (Campani)

SLAVIC LANGUAGES AND LITERATURES

Emeritis: (Professors) Joseph Frank,* Joseph A. Van Campen Chair: Monika Greenleaf

Professors: Lazar Fleishman, Gregory Freidin, Richard D. Schupbach Associate Professors: Monika Greenleaf, Gabriella Safran Senior Lecturer: Rima Greenhill Lecturer: Serafima Gettys Visiting Professors: Oksana Bulgakowa, Alan Timberlake, Viktor Zhivov

Director of Graduate Studies: Gabriella Safran

Director of Undergraduate Studies: Monika Greenleaf

* Recalled to active duty.

Department Offices: Building 40, Room 41C

Mail Code: 94305- 2006

Phone: (650) 723-4438

Email: slavic@stanford.edu, ncampau@stanford.edu

Web Site: http://www.stanford.edu/dept/slavic/

Courses given in Slavic Languages and Literatures have the subject code SLAVGEN, SLAVLANG, and SLAVLIT. For a complete list of subject codes, see Appendix.

The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy. Particular requirements for each degree are described below.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of Slavic Languages and Literatures (Slavic) offers two concentrations for undergraduate majors: Russian Language and Literature, and Russian Language, Culture, and History.

Writing in the Major—All Stanford undergraduates who entered in 1996-97 or thereafter are required by the University to pass at least one writing-intensive course in their field of concentration in order to graduate. Majors in Russian Language and Literature, or Russian Language, Culture, and History, may satisfy the writing requirement by enrolling in and receiving a passing grade in SLAVGEN 146.

RUSSIAN LANGUAGE AND LITERATURE

The concentration in Russian Language and Literature is designed for those students who desire to gain a firm command of the Russian language and to study the nation’s literary tradition. Emphasis is placed on the linguistic and philological study of literature, as well as the history of Russian literature and related media in the broader context of Russian culture. Students may explore historically related literary traditions (for example, English, French, German), as well as other related fields. The Russian Language and Literature concentration also welcomes students with an interest in Russian and Slavic linguistics.

Prerequisites—Successful completion of SLAVLANG 51, 52, 53, or the equivalent, as determined by the results of the department placement examination.
Candidates for the B.A. degree with a concentration in Russian Language and Literature must complete an additional 52 units according to the following distribution:

**Russian Language**—A minimum of 12 units selected from the following Slavic Languages and Literatures courses: SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183.

**Russian Literature**—The 20-unit core literature sequence consisting of the following Slavic Languages and Literatures courses: SLAVGEN 145, 146, 147, SLAVLIT 187, 188.

**Electives**—Students must take 20 units of electives embracing at least two of the following categories: (1) Russian language or linguistics; (2) Russian literature; and (3) historically related literatures. These courses are selected in consultation with the undergraduate director. With department permission, work in related academic fields may apply toward the degree requirements. Students who have completed IHPM 28A, B (Poetic Justice: Order and Imagination in Russian Culture) with a grade ‘B’ or better may count these 10 units towards their elective courses required for the major in Russian Languages and Literature or the major in Russian Language, Culture, and History.

Majors who concentrate in Russian Language and Literature must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

**RUSSIAN LANGUAGE, CULTURE, AND HISTORY**

The concentration in Russian Language, Culture, and History is for students who would like to obtain a firm command of the Russian language and to pursue a broad, interdisciplinary study of Russian literature, other expressive media (including film), as well as cultural traditions and institutions. Emphasis is placed on the relation of the Russian literary tradition to disciplines that have enriched the historical understanding of Russian literature: primarily history, but also anthropology, communications, political science, and sociology.

**Prerequisites**—Successful completion of the following or the equivalent as determined by the results of the department placement examination:

SLAVLANG 51, 52, 53. Second-Year Russian

**Requirements**

Candidates for the B.A. degree with a concentration in Russian Language and Literature and Culture must complete an additional 52 units according to the following distribution.

**Russian Language**—A minimum of 12 units from the following:

- SLAVLANG 111, 112, 113. Third-Year Russian
- SLAVLANG 177. Fourth-Year Russian: Wedded Strangers
- SLAVLANG 178. Fourth-Year Russian: Children of Russia
- SLAVLANG 181, 182, 183. Fifth-Year Russian

**19th-Century Russian Literature and History**—A minimum of 8 units chosen from the following courses or the equivalent; students must choose one course from Slavic and one course from History:

- SLAVGEN 145, 146
- HISTORY 120B, 121

**20th-Century Russian Literature and History**—A minimum of 8 units chosen from the following or the equivalent; students must choose one course from Slavic and one course from History:

- SLAVGEN 147
- HISTORY 120C

**Electives**—In order to complete the basic degree requirements, students must take 24 additional units of course work embracing at least two of the following categories: (1) Russian language; (2) Russian literature; and (3) Russian history. These courses are selected in consultation with the undergraduate director. With department permission, work in related academic fields (for example, anthropology, communications, political science, religion, sociology) may apply toward the degree requirements.

Majors with a concentration in Russian Language, Culture, and History must earn a GPA of 2.0 (C) or better in order to receive credit toward the major.

**MINORS**

The Department of Slavic Languages and Literatures offers three undergraduate minor programs in Russian Language, Literature, and Culture.

The minor program is designed for students who, while pursuing a major in another program, seek a comprehensive introduction to Russian culture, whether primarily through (1) Russian language courses; or (2) a combination of minimal proficiency in Russian and courses in the history of Russian culture; or (3) courses on Russian literature in translation and, depending on the student’s interest, other forms of the country’s cultural expression and social institutions. Students seeking a Slavic minor are particularly encouraged to take advantage of Stanford’s Overseas Studies Program in Moscow. Students who have chosen one of the minor programs in Russian may use 5 units of IHPM credit toward their electives.

**RUSSIAN LANGUAGE**

**Prerequisites**—The minor concentration in Russian Language requires the successful completion of SLAVLANG 1A, 2B, 3C, First-Year Russian, and SLAVLANG 51, 52, 53, Second-Year Russian, or a demonstrated equivalent competence as determined by the departmental Russian language placement examination.

**Requirements**—Candidates for the B.A. degree with a minor concentration in Russian Language must complete 24 units of Russian language and literature courses according to the following distribution: 12 to 15 units selected from SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183. The remaining 9 to 12 units should be selected from SLAVGEN 145, 146, 147, SLAVLIT 187, 188, other monograph courses offered by the Department of Slavic Languages and Literatures or, with the approval of the department’s undergraduate adviser, in history, politics, linguistics, or other relevant programs.

**RUSSIAN LANGUAGE, LITERATURE, AND CULTURE**

**Prerequisites**—The minor concentration in Russian Language, Literature, and Culture requires the successful completion of SLAVLANG 1A, 2B, 3C, First-Year Russian, or the equivalent as determined by the departmental Russian language placement examination.

**Requirements**—Candidates for the B.A. degree with the minor concentration in Russian Language, Literature, and Culture must complete 28 units according to the following distribution:

1. A minimum of 16 units of courses on literature and culture selected from the following Slavic Languages and Literatures courses: two quarters in the SLAVGEN 145, 146, 147 sequence, Russian Literature in English Translation, or one quarter in the SLAVGEN 145, 146, 147 sequence and one quarter in the SLAVLIT 187, 188 sequence, Russian Poetry (prerequisite: Second-Year Russian); and at least one monograph course focusing on a single writer.

2. 12 units of elective courses in the Department of Slavic Languages and Literatures or, with the approval of the Slavic department’s undergraduate adviser, in History, Linguistics, Political Science, or other relevant programs.

**RUSSIAN CULTURE**

Candidates for the B.A. degree with the minor concentration in Russian Culture must complete 36 units according to the following distribution: a minimum of 20 units of courses on literature and culture selected from the following Slavic Languages and Literatures courses; three quarters in the SLAVGEN 145, 146, 147 sequence, Russian Literature in English Translation, and two monograph courses focusing on one single writer. In addition, one course in Russian history is selected from HISTORY 120B or 120C. No knowledge of Russian is required.
SCHOOL OF HUMANITIES AND SCIENCES

History of Philosophy:

- Electives—11 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the Slavic department’s undergraduate adviser, in Art, History, Linguistics, Political Science, or other relevant programs.

- The deadline for minor declarations in all concentrations is no later than the last day of the third quarter before degree conferral.

RUSSIAN AND PHILOSOPHY

- The concentration in Russian and Philosophy offers students the opportunity to combine studies in Russian literature and philosophy. Students gain a firm command of the Russian language and study the nation’s literary tradition, while gaining a strong background in philosophical thought, broadly construed. They take courses alongside students in other departments participating in the program in Philosophical and Literary Thought, with administrative staff in the DLCL.

- Prerequisites—Successful completion of SLAVLANG 51, 52, 53, or the equivalent as determined by the results of the department placement examination.

REQUIREMENTS

- Candidates for the B.A. degree with a concentration in Russian and Philosophy must complete an additional 67 units according to the following distribution:
  - Russian Language—A minimum of 12 units selected from the following Slavic Languages and Literatures courses: SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183.
  - Russian Literature—A minimum of 16 units of Russian literature, including the following:
    1. SLAVGEN 145 and 146
    2. SLAVGEN 147 or 148
    3. SLAVLIT 187 or 188
  - Electives—At least 12 units of electives in Russian language and literature, selected in consultation with the undergraduate director.

- Philosophy and Literature Gateway Course (4 units): FRENGEN 181 (same as PHIL 81).

- Philosophy Writing in Major (5 units): PHIL 80; prerequisite: introductory philosophy course.

- Philosophy Core—12 units, including the following:
  1. Value Theory: a course in the PHIL 170 series
  2. Theories of Mind, Language, Action: a course in the PHIL 180 series
  3. History of Philosophy: a course from the PHIL 100-139 series

- Related Course—An upper division course of special relevance to philosophy and literature. A list of approved courses is available from the program director.

- Capstone Seminar—To be taken in the senior year, and selected from a list of seminars approved by the director of the program in philosophical and literary thought.

- Majors who concentrate in Russian and Philosophy must earn a grade point average (GPA) of 3.3 (B+) or better in their major courses and 2.0 (C) or better in order to receive credit toward the major. Courses in other departments may not, in general, be counted toward the Russian language, Russian literature, and elective requirements, but may be counted toward the other requirements.

HONORS PROGRAM

- Students in either concentration with a grade point average (GPA) of 3.3 (B+) or better in their major courses are eligible to participate in the department’s honors program. In addition to the basic program requirements above, honors students must also complete the following:
  1. One advanced course, usually taken during the Spring Quarter of the junior year and related to the area of the student’s expected research. Majors in either concentration who propose a senior project in literature must take a course in literary or cultural theory. Students concentrating in Russian Language, Culture, and History and pursuing a project in cultural history are required to take a course in literary or cultural theory, or a graduate seminar in the area of their topic. Students concentrating in Russian Language and Literature who propose a senior project in Russian language select their course in consultation with the undergraduate director.
  2. SLAVLIT 199, Individual Work: a minimum of 8 units during the senior year. To qualify for honors, the candidate must receive a grade of ‘B’ or better on the thesis or project completed during this period.

SLAVIC THEME HOUSE

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence that offers a wide variety of opportunities to expand one’s knowledge, understanding, and appreciation of Russian and Eastern Europe.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

The department allows a limited number of undergraduates to work for coterminal B.A. and M.A. degrees in Slavic Languages and Literatures with a concentration on Russian. In addition to University requirements for the B.A. degree, the student must:

1. Submit an application for admission by January 31 of the senior year.

- Applicants must meet the same general standards as those seeking admission to the M.A. program. Applicants must submit: an application for admission; a written statement of purpose; a transcript; and three letters of recommendation, at least two of which should be from members of the Department of Slavic Languages and Literatures faculty.

2. Meet all requirements for both the B.A. and M.A. degrees. Applicants must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units.

- During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three graduate-level courses.

- For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

MASTER OF ARTS

University requirements for the M.A. degree are discussed in the “Graduate Degrees” section of this bulletin.

Admission—The requirements for admission to the master’s degree program in Russian are:

1. A B.A. (or its equivalent) from an accredited college or university.

2. A command of the Russian language sufficient to permit the student to do satisfactory graduate work in an area of specialization.

3. A familiarity with Russian literature sufficient to permit the student to perform adequately in courses at the graduate level.

The applicant’s previous academic training in Russian language and literature must normally serve as a tentative indication of competence. Accordingly, the department does not ordinarily consider applications from students who have not had at least three years of college Russian and some undergraduate training in Russian literature of the 19th and 20th centuries.

- Before registering for the first quarter’s work in the department, entering graduate students are required to take placement examinations in language and literature. Students who fail to perform satisfactorily on such examinations must register for remedial courses in the areas in which they are deficient. Such remedial courses, normally completed within the first three quarters of residence, carry no credit toward either the M.A. or the Ph.D. degree.

Course Requirements—Candidates for the M.A. who are not also candidates for the Ph.D. should plan course work that ensures adequate preparation for the M.A. final examination at the end of the third quarter of work. Ph.D. candidates should attempt to include as many of the department’s basic course offerings as possible in the first-year program to ensure sufficient time to complete the M.A. thesis during the fifth quarter of registration. In any case, course work should be planned in consultation with the graduate adviser, whose written approval of the overall course load is required.
Candidates for the M.A. must complete a program of 45 units, of which 36 units must be selected from courses given by the department. The other 9 units may, with approval of the candidate’s adviser, be selected from courses in related fields. Of the 36 units in the department, a minimum of 9 may be in language and a minimum of 9 in literature. The remaining 18 units may be distributed in accordance with the needs and interests of the student, and with the advice and approval of the department adviser.

No credit toward the M.A. degree is allowed for first- or second-year courses in non-Slavic languages required for the Ph.D. degree.

The M.A. Thesis—A requirement for candidates for a Ph.D., the M.A. thesis represents a complete article-length research paper (6-9,000 words) that, in both form and substance, qualifies for submission to English language professional publications in the Slavic field. The M.A. thesis must be submitted to the thesis adviser no later than the fifth quarter and approved no later than the sixth quarter of registration.

Final Examination—Students not enrolled in the Ph.D. program may either submit an M.A. thesis or take a final examination. In the latter case, regardless of the area of specialization, the student must demonstrate in a written examination: (1) command of the phonology, morphology, syntax, and lexicology of contemporary Standard Russian sufficient to teach beginning and intermediate courses at the college level; (2) an ability to read contemporary Standard Russian sufficient to assist students studying contemporary Russian poetry or literary prose; and (3) sufficient familiarity with Russian literature of either the 19th or 20th century to successfully handle survey courses dealing with a chosen period of specialization.

The examination should be passed at the end of the final quarter of required course work.

MASTER OF ARTS IN TEACHING

The degree of Master of Arts in Teaching is offered jointly by the department and the School of Education. It is intended for candidates with a teaching credential or relevant teaching experience who wish to further strengthen their academic preparation. Requirements for the degree are outlined in the “School of Education” section of this bulletin. The program includes 45 units, of which 25 must be in the teaching field and 12 in education. Specific language requirements are established in consultation with the department.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin. Students enrolled in the Ph.D. program in Slavic Languages and Literatures are expected to fulfill the following requirements:

1. Minor or Related Fields: during the course of study, students must develop substantial expertise in a field contiguous to the area of specialization. A candidate may elect to present a full minor or, in consultation with the graduate adviser, develop a special program in a related field.

a) Related Field: a student is required to complete a sequence of basic courses (12 units) in a chosen discipline outside the Department of Slavic Languages and Literatures. The choice of patterns is one of the following:

1) a sequence of three courses in one West European literature, selected in consultation with the adviser, or

2) three basic courses in comparative literature to be selected in consultation with the graduate adviser and the Department of Comparative Literature.

b) Minor: if the student elects a minor (for example, French, German, Spanish, or Russian history), he or she should take six graduate courses in that department with a minimum of 20 units at the graduate level, according to the minor requirements established by that department. Students considering minors in other departments, such as Asian Languages, English, or Comparative Literature, should consult with the adviser, the Chair of the Department of Slavic Languages and Literatures, and the chair of the minor department. Students who wish to enroll in the Graduate Program in the Humanities should apply there.

2. Admission to Candidacy: candidates should read carefully the general regulations governing the degree, as described in the “Graduate Degrees” section of this bulletin. No student is accepted as a candidate until the equivalent of the M.A. degree requirements, including the M.A. thesis described above, are completed. Admission to candidacy is determined early in the sixth quarter of graduate study. The candidate by that time must have demonstrated commitment to graduate study by completion of a minimum of 60 quarter units of credit and with a grade point average (GPA) of 3.3 (B+) or better. Candidates must (1) submit to the graduate adviser copies of three seminar papers completed in the Department of Slavic Languages and Literatures, and (2) submit a complete draft of an M.A. thesis. Failure to comply with the above requirements results in termination of enrollment for the Ph.D. degree. The terminated student may, at the discretion of the faculty, be given the opportunity to take the M.A. written examinations. If successful, the student is then awarded the M.A. degree, but is not accepted as a candidate for the Ph.D. degree.

3. Proficiency Test: administered for all entering graduate students, this test determines whether the student’s knowledge of Russian language and literature falls below the department’s standard. Students who fail to excel in this test are asked to complete appropriate courses in the first year of graduate study.

4. Course Requirements: before qualifying for the department oral and written examinations, a Ph.D. candidate is expected to accumulate at least 72 quarter units of credit for courses taken while in graduate school. No less than half of this course work (36 units) must be done in the Department of Slavic Languages and Literatures, including at least 24 units of credit for seminar-level courses. (All entering graduate students are expected to enroll in SLAVLIT 200.) The candidate must submit to the department’s Academic Progress Committee three seminar-level papers completed at the Department of Slavic Languages and Literatures, as well as the M.A. thesis.

5. Foreign Languages: a candidate must demonstrate reading knowledge of French and German by passing written examinations.

6. Examinations: a candidate must pass the departmental general qualifying examinations. The written part covers:

a) the history and structure of the Russian language and its relationship to the other Slavic languages. (Students are excused from this portion of the examination if they have completed SLAVLIT 211 and 212 with a grade point average (GPA) of 2.7 (B-) or better.)

b) the history of Russian literature, including its relationship to the development of other Slavic literatures, or West European literature, or to Russian intellectual history.

The oral portion follows shortly after the successful completion of the written portion. The department oral examination is designed to test the student’s knowledge of the major cultural and literary trends in a period of their choice as well as the student’s ability to participate in a challenging scholarly discussion. It can be used most profitably as an opportunity to do intensive reading in the period of a candidate’s projected dissertation work. Preparation for the oral should begin immediately following the successful completion of the department’s written examination. After consulting with members of the faculty, the student proposes a reading list, which, once approved, serves as the basis for the examination. The exam structure requires that the student make an opening presentation on a topic or set of topics of particular interest or relevance to the period in question. After an open discussion of the presentation, each examiner is given the chance to question the student on other topics related to the reading list.

Following the department examinations, a candidate must pass a University oral examination, which is a defense of a dissertation proposal covering content relevant to the area of study, rationale for the proposed investigation, and strategy to be employed in the research.

Specialization—Candidates in Slavic Languages and Literatures specialize in literature and related media. Candidates may draw up individual programs of study and research in consultation with the graduate adviser. Requirements vary according to the nature of the specialized program requested.
JOINT PH.D. IN SLAVIC LANGUAGES AND LITERATURES AND HUMANITIES

The Department of Slavic Languages and Literatures participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Slavic Languages and Literatures and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University activity unit limitation (8 unit maximum).

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

RUSSIAN LANGUAGE COURSES

The following courses in Russian language instruction represent a typical sequence for three years of Russian language study. Majors and prospective majors should consult the requirements for a B.A. in Russian above. For descriptions, other information, and additional courses including special emphasis, intensive, and summer courses, and for other Slavic languages under the SPECLANG subject code, see the “Language and Literature” section of this bulletin.

SLAVLANG 1, 2, 3. First-Year Russian
5 units, 1: Aut, 2: Win, 3: Spr (Greenhill, Staff)

SLAVLANG 11, 12, 13. Second-Year Russian
5 units, 11: Aut, 12: Win, 13: Spr (Greenhill, Staff)

SLAVLANG 51, 52, 53. Third-Year Russian
4 units, 51: Aut, 52: Win, 53: Spr (Greenhill, Staff)

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Slavic Languages and Literatures department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Slavic Languages and Literatures are advised to consider satisfying their GER:1b,c requirements by registering for the following IHUM courses.

IHUM 28A, B. Poetic Justice: Order and Imagination in Russia—
The difference between justice and law in 19th- and 20th-century Russian writers. Focus is on the notion of poetic justice: the artistic representation of order whether divine, natural, or human. Goal is to heighten awareness of familiar narratives, mythologies, ideas, and images, and to convey a sense of a long-established national culture with its own dynamic vision. GER:1b,1c (two quarter sequence)
IHUM 28A. 5 units, Win (Safra"
IHUM 28B. 5 units, Spr (Bulgakowa, Freidin)

GENERAL

This curriculum covers topics of general interest. Courses are open to all students and have no prerequisites. Some courses may be taken for graduate credit. Additional work in the original language may be arranged with individual instructors.

The courses:
1. introduce students to the major authors and texts in the Russian literary and cultural tradition,
2. offer broad conceptual frameworks for understanding the material covered, and
3. demonstrate the dynamic interaction between cultural texts and a variety of contexts (literary, intellectual, and sociopolitical).

Continuation—Continuation in the Ph.D. program is contingent on: for first-year students, a high quality of performance in course work (decided by department evaluation); for second-year students, an M.A. thesis, which should be completed no later than the end of the second quarter of the second year.

Course Work, Breadth Requirements, and Overall Scheduling—
1. Candidates for the Ph.D. degree are allowed as much freedom as possible in the selection of course work to suit their individual program of study. However, candidates are held responsible for all of the areas covered by the general examinations, regardless of whether they have registered for the department’s offerings in a given field. For this reason, it is strongly recommended that before taking Ph.D. examinations, students complete seminar-level work directly related to the following broad areas:
   a) Russian poetry
   b) the Russian novel
   c) 20th-century Russian literature
   d) 19th-century Russian literature (the Age of Pushkin and after)
   e) 18th-century Russian literature (from the early 1700s to the Age of Pushkin)
   f) Medieval Russian literature
   g) a monograph course on a major Russian author
   h) theory of literature

   Students may not normally register for individual work in a given area until they have covered the basic course offerings in that area.

First-year students may register for individual work only under special circumstances and must obtain the written approval of the graduate adviser. Those candidates who are also candidates for the M.A. degree should consult the course requirements for that degree in planning their first year’s work. The M.A. thesis or written examination should be completed by the end of the fifth quarter of graduate study at the latest. The remainder of the second year should be devoted to course work preparing the student for the general qualifying examination and to fulfill the requirements of the minor, if any. The department’s general qualifying examinations must be taken by the end of the first quarter of the third year of study; they may be taken during the second year if the student and the adviser feel this is appropriate.

During the two quarters following the general qualifying examinations, the student should be concerned primarily with preparation for the University oral examination, which should take place no later than the end of the third quarter of the third year. However, students may, if necessary, do limited amounts of course work not directly related to the dissertation proposal. The fourth and fifth years should be devoted to research and writing leading to completion of the Ph.D. dissertation.

2. Students possessing the equivalent of the Stanford M.A. are normally expected to adhere to the schedule for the second, third, and fourth years of work outlined under item 1 above.

3. Students in the Ph.D. program are required to do four quarters of teaching in partial fulfillment of the requirements of the Ph.D. degree: three quarters of first-year Russian, and one quarter of literature as a teaching assistant to a faculty member (usually for one of the survey courses in translation: SLAVGEN 145, 146, 147). While teaching a section of first-year Russian supervised by a faculty member, students are required to enroll in the department’s teaching colloquium (SLAVLANG 206).

Non-Slavic Language Requirements—Credit toward either the M.A. or the Ph.D. degrees is not given for first- or second-year courses in non-Slavic languages. It is assumed that, on entering the program, the student has a reading knowledge of both German and French or, at the very least, one of these languages. The reading examination in one of these languages must be passed by the end of the first year of study. The reading examination in the second language must be passed by the end of the second year of study. Both language examinations must be passed before the candidate takes the University oral examination, that is, before the end of the third year.
While these goals are pursued to some extent in all of the courses, the general curriculum may be roughly classified according to contextual emphasis to assist students in choosing courses according to their interests.

Literary Movements and Genres: SLAVGEN 145, 146, 147, 155, 156
Literature and Intellectual History: SLAVGEN 151, 190
Literature and Social History: SLAVGEN 141, 149
Media, Gender, Ethnicity: SLAVGEN 148, 152, 154, 158, 161, 162, 163, 165, 166, 167, 168, 221

SLAVGEN 13N. Russia, Russian, Russians—Stanford Introductory Seminar. Preference to freshman. The political and cultural history of Russia and the Russians; prominent persons, prominent events, and how they shape current attitudes and society. Short works by Russian authors.
GER:3a
3-4 units, Spr (Schupbach)

SLAVGEN 60A,B,C. Introduction to Russian and East European Culture—Open to all; gives priority for housing in Slavianskii Dom. Topics vary by quarter.
1 unit, Aut, Win, Spr (Staff)

SLAVGEN 61. Slavic Folk Choir—Repertoire from the Russian, Ukrainian, and Bulgarian traditions. Songs learned orally. No previous knowledge of Slavic languages necessary, but students should be able to sing in multipart harmony. Venues include the Russian Center of San Francisco and Fort Ross National Historical Site.
1 unit, Aut (Staff)

SLAVGEN 77Q. Russia’s Weird Classic: Nikolai Gogol—Stanford Introductory Seminar. Preference to sophomores. The work and life of Nikolai Gogol, the eccentric founder of Fantastic Realism. The relationship between romanticism and realism in Russian literature, and between popular Ukrainian culture and high Russian and Western European traditions in Gogol’s oeuvre. The impact of Gogol’s work on 20th-century modernist literature, music, and art, including Nabokov, literature of the absurd, Shostakovich, Meyerhold, Chagall. GER:3a
3 units, Aut (Fleishman)

SLAVGEN 122/222. Yiddish Literature—The humor, drama, anger, and artistry of modern of E. European and American Yiddish writers including Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Chaim Grade, and Yankev Glatshtyin. In English. GER:3a,4a
5 units, Spr (Safran)

SLAVGEN 133/233. Poles and Others: Literature and History in Modern Poland—The physical and cultural territories of the former Polish-Lithuanian Commonwealth have long been objects of contest. The 20th century witnessed two or three rebirths of Poland and one or two deaths; a belated modernization of Polish society; the final inclusion of Polish-speaking peasants and burghers in a Polish national identity; and the exclusion of Jews, Germans, Lithuanians, Belarusians, Ukrainians, and others from the state and participation in a partially shared culture.
GER:3a
3-4 units (Staff) not given 2004-05

SLAVGEN 133A/233A. Deviating From Dogma: Film in East Europe from 1956 to 1968—Filmic development in the Soviet Union, Poland, Hungary, Czechoslovakia, Yugoslavia, and the German Democratic Republic. The films of Andrei Tarkovskii, Andrzej Wajda, Miklos Jancso, Milos Forman, Vera Chytilova, and Konrad Wolf try to break the old canon of representation (Social Realism) in connection with political and cultural changes and under the influence of international film development from Italian neorealism to French nouvelle vogue. GER:3a
4 units, Win (Bułgakowa)

SLAVGEN 141/241. Staging the Revolution: Russian Theater and Society, 1917-1937—Between 1917 and 1937, artistic experimentation in the Russian theater coincided with political and social changes in Russian society. Modernist artists interpreted the revolution as an artistic possibility to demolish conventions of representation. Mass festivals, circus, and street performances replaced the old theater. In the time of the Great Terror and staged trials, theater and opera remained among the leading arts, but state patronage caused a major reorientation of artistic practices. Readings include plays by Mayakovksy, Bulgakov, Babel, Tretiakov, and Erdman. Readings in English. GER:3a
4 units (Staff) not given 2004-05

SLAVGEN 144. Major Topics in the History of the Russian Orthodox Church—(Enroll in HISTORY 212A/312A.)
4-5 units (J. Kollmann) not given 2004-05

SLAVGEN 145/245. The Age of Experiment, 1820-50—(Same as COMPLIT 145S/245S.) After the Napoleonic Wars, the Russian Empire made an accelerated leap into European culture. The Golden Age of Russian literature is a period of experiments. Pushkin’s Eugene Onegin, Belkin Tales, and Captian’s Daughter; Lermontov’s Hero of Our Time; Gogol’s Petersburg Tales, Inspector-General, and Dead Souls; Tolstoy’s Childhood; Dostoevsky’s Double and Notes from the Dead House, in the context of Russian culture and contemporary European trends.
GER:3a,4a
3-4 units, Aut (Greenleaf)

SLAVGEN 146/246. The Age of Transgression: The Great Russian Novel—Readings of Bely’s Petersberg, Tolstoy’s Anna Karenina, Dostoevsky’s Brothers Karamazov focus on the conflict between the individual (son, woman) and authority (social, moral, political) as a characteristic feature of the 19th-century Russian novel. Leskov’s and Chekhov’s short fiction as examples of the deformation and adaptation of this tradition at the end of the age of Realism. Literary, social, and political contexts.
GER:3a,4a,WIM
4 units, Win (Safran)

SLAVGEN 147/247. The Age of Revolution: A Survey of Russian Literature and Culture, 1905-53—A survey of Russian culture, with an emphasis on literature, in the context of Russia’s Soviet and post-Soviet history. Russian modernism. The role of literature and the arts in the creation of Soviet civilization. Literature in opposition. Russian culture after communism. Texts in English translation. Graduate students may receive graduate credit for a research paper undertaken as part of the course. See http://www.stanford.edu/~gfreidin/courses/147/. GER:3a,4a
3-4 units, Spr (Freidin)

SLAVGEN 148/248. The Age of Dissent: A Survey of Russian Literature and Culture, 1953 to the Present—From the death of Stalin to post-communist Russia. Literature of the thaw and de-Stalinization, official and unofficial literature of dissent, samizdat, village and urban prose, literature of the new emigration, late Soviet underground, sots-art, perestroika, and post-communist literature and culture. Texts in English translation. For graduate credit for research paper, register for SLAVLIT 399, GER:3a,4a
2-4 units, Spr (Freidin) alternate years, not given 2005-06

SLAVGEN 151/251. Dostoevsky and His Times—Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture and intellectual history.
GER:3a
4 units, Win (Frank)

SLAVGEN 152/252. Modernism in the Russian Theater, 1898-1913—Theater in the most fertile period of Russian cultural history, from the 1898 premiere of Chekhov’s Seagull to the 1913 experiments of Russian futurists. Dramatic texts include Naturalist, Symbolist, and Expressionist plays by Andreev and Blok. Theories of performance central to modernist culture including Evreinov’s concept of theatricality, Ivanov’s idea of theater as ritual, Meyerhold’s principle of stylization, and Malevich’s vision of theatrical space. Analysis in light of European authors such as Nietzsche, Wagner, Wilde, IbSEN, Maeterlinck, Marinetti, and Artaud. Knowledge of Russian optional; Russian-speaking students read some texts in Russian.
GER:3a
4 units (Staff) not given 2004-05

SLAVGEN 157. Second LanguageRussian for Native Speakers—(Open to native speakers of Russian.)—Two-quarter sequence for native speakers of Russian. Intensive practice of listening, reading, speaking, and writing skills. Readings in Russian literature, Russian culture, and life in Russia.
5 units, Autumn (Zubkova), Winter (Zubkova)
SLAVGEN 153/253. Film and Propaganda: Soviet and German Films of the 30s—The meaning of propaganda and its use in left- and right-wing dictatorial regimes through films including Leni Riefenstahl’s The Triumph of the Will, Dziga Vertov’s Three Songs of Lenin, Mikhail Chiaureli’s The Fall of Berlin, Veit Harlan’s Jew Suss and Eisenstein’s Alexander Nevsky. The use of themes and archetypes, the images of leader, masses, hero, enemy, and gender, the deployments of historical parallels, the personalization of ideological messages, and the canons of representation. GER:3a
3-4 units (Bulgakowa) not given 2004-05

SLAVGEN 155/255. Anton Chekhov and the Turn of the Century—Chekhov’s art in its Russian literary, historical, philosophical, and political contexts. Short stories and major plays; supplemental readings for graduate students from Chekhov’s letters and works by his friends and contemporaries, such as Leskov, Tolstoy, Korolenko, and Gorky. GER:3a
3-4 units (Staff) not given 2004-05

SLAVGEN 156/256. Nabokov and Modernism—(Same as COMPLIT 156D/256D.) Nabokov’s stories, novels, and a film script in the context of: modernist writers such as Bergson, Proust, and Joyce; media including painting, film, and photography; and philosophical thought. Critical approaches that elude the author’s control. Readings include Bend Sinister, Lolita, Pale Fire, Speak Memory, and Ada. GER:3a
3-5 units, Spr (Greenleaf)

SLAVGEN 158/258. Sergei Eisenstein and his Vision of Film Theory—Films and theater work such as Valkyre at the Bolshoi. His partially realized theory drafts towards the absolute theoretical system. In English. GER:3a
4 units, Win (Bulgakowa)

SLAVGEN 161/261. Poetess: The Grammar of the Self when the Poet is a Woman—(Same as COMPLIT 161/261.) Seminar. Lyrical works by women poets from the U.S., Russia, E. Europe, and Germany (Dickinson, Moore, Brooks and the Harlem Renaissance, Bishop, Akhmatova, Tsveetaeva, Sachs, Plath, Cisneros, Angelou, Graham, Howe, and Szymborska.) Theoretical and practical issues: breaking and entering the male preserve of high poetry in different eras; the interaction of written and oral, political, and performative modes of expression; new representations of the feminine body and experience in the visual arts; and the development of a female lineage and modes of poetic legitimation, association, and inspiration. GER:3a,4c
4 units (Greenleaf) not given 2004-05

SLAVGEN 162/261. Gender Images in Film—Film creates permanent new images of femininity. One of its conscious prerequisites is the notion of social stereotypes. The development of enduring images of the film heroine, 1914-90, through a comparison of the Russian, American, and W. European cinema, and analytical approaches to them from feminist film theory. GER:4c
3 units (Staff) not given 2004-05

SLAVGEN 164/264. Literature and Terrorism: Russian Roots—What makes a person commit a terrorist act? Can terrorism ever produce justice? The waves of terror in the Russian Empire inspired songs, poems, stories, novels, and films about terrorists and terrorism in Russian and other languages. Works of fiction and non-fiction about Russian terrorism, including novels by Fedor Dostoevsky and Joseph Conrad, and literary, historical, and sociopolitical methods to analyze them. Can or should the meaning of an act of violence be controlled? In English. GER:3a,4a
4 units (Safran) not given 2004-05

SLAVGEN 165/265. Poetry, Painting, and Music of the Russian Avant Garde—Interrelationships between poetry and other arts in Russia, 1905-30. The pursuit of synthesis of arts and the modernist agenda of life creation and immortality. Parallel developments in literature, painting, and music, and style and poetics. Russian modernist poetry in the context of changes in the language of visual arts and music). Women poets and artists. Native sources and Western influences; non-Russian elements and transnational tendencies. The impact of scientific discoveries and technological inventions on artistic experimentation. 4 units, Win (Fleishman)

SLAVGEN 167/267. Models of Film Analysis—Films from different film schools, fictional and non fictional, narrative and non-narrative. Film techniques and structures, and methods of analysis. GER:3a
4 units (Bulgakowa) not given 2004-05

SLAVGEN 170/270. Tolstoy’s Anna Karenina and the Social Thought of Its Time—(Same as HUMNTIES 170F.) Preference to Humanities honors students. Historical and cultural context, contesting major currents of social thought in Tolstoy’s time including Marx on class and history, Mill on sex equality, Nietzsche, Dostoevsky, and Shestov on morality and power, Freud on desire and the unconscious, Durkheim on the nature of religion, and Weber on legitimation and authority. Limited enrollment. See http://www.stanford.edu/~gfreidin/courses/AK/. GER:3a
5 units, Win (Freidin)

SLAVGEN 178B. Camera as Witness: International Human Rights Documentaries—(Same as HUMNTIES 178B, INTNLREL 178B.) Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. 5 units, Win (Bojic)

SLAVGEN 190/290. Tolstoy’s Anna Karenina and the Social Thought of Its Time—(Same as HUMNTIES 190F.) Preference to Humanities honors students. Historical and cultural context, contesting major currents of social thought in Tolstoy’s time including Marx on class and history, Mill on sex equality, Nietzsche, Dostoevsky, and Shestov on morality and power, Freud on desire and the unconscious, Durkheim on the nature of religion, and Weber on legitimation and authority. Limited enrollment. See http://www.stanford.edu/~gfreidin/courses/AK/. GER:3a
5 units, Win (Freidin)

SLAVGEN 197A. Camera as Witness: International Human Rights Documentaries—(Same as HUMNTIES 197A, INTNLREL 197A.) Challenges facing film makers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and film maker roles as artists, activists, and journalists. 5 units, Win (Bojic)

SLAVGEN 229A. Poetry, Poetology, Poetics
1-2 units, Aut, Win, Spr (Fleishman)

SLAVGEN 283. The Austro-Hungarian Grotesque—(Enroll in COMPLIT 283, COMPLIT 383.)
5 units, Aut (Labov)

SLAVGEN 313. Visuality and Literacy Workshop—Workshop. The mutual relationships among the visual arts, theater, and literature in the culture of modernity. 1-2 units (Staff) not given 2004-05

ADVANCED UNDERGRADUATE AND GRADUATE

SLAVLIT 129/229. Poetry as System: Introduction to Theory and Practice of Russian Verse—Classical and modern systems of Russian versification over three centuries, contrasting notions of meter, rhythm, and rhyme between Russian and English and W. European traditions. Required: reading knowledge of Russian. GER:3a
4 units, Aut (Fleishman)

SLAVLIT 182. Pushkin’s Eugene Onegin—Russian literature’s central masterpiece. In Russian. 4 units (Fleishman) not given 2004-05

SLAVLIT 183/283. Readings in the Russian Press—For students at the fifth-year Russian level. Advanced language training based on Russian newspapers and magazines. Discussion of issues regarding the Russian media and reading articles of a typical Russian press format. 4 units (Staff) not given 2004-05

SLAVLIT 184/284. History of the Russian Literary Language—Major structural and semantic changes from the 10th to the 19th centuries. Recommended: 211, 212 3-4 units (Schupbach) not given 2004-05
3-4 units (Fleishman) not given 2004-05

SLAVLIT 187/287. Russian Poetry of the 18th and 19th Centuries—Required of all majors in Russian language and literature; open to undergraduates who have completed three years of Russian, and to graduate students. The major poetic styles of the 19th century as they intersected with late classicism, the romantic movement, and the realist and post-realist traditions. Representative poems by Lomonosov, Derzhavin, Zhukovskii, Pushkin, Baratynskii, Lermontov, Tютчев, Nekrasov, Fet, Soloviev. In Russian.
3 units, Win (Fleishman)

SLAVLIT 188/288. From Alexander Blok to Joseph Brodsky: Russian Poetry of the 20th Century— Required of all majors in Russian literature. Developments in Russian poetry of the 20th century including symbolism, acmeism, futurism, and literature of the absurd from Zinaida Hippius and Andrey Bely to Marina Tsvetaeva and Joseph Brodsky. Emphasis is on close readings of individual poems. Discussions in Russian.
3 units (Fleishman) not given 2004-05

SLAVLIT 189/289. Literature from Old Rus’ and Medieval Russia—From earliest times through the 17th century. The development of literary and historical genres, and links among literature and art, architecture, and religious culture. Readings in English; graduate students read in original.
4 units, Spr (Zhidov)

SLAVLIT 194A/294A. Russia and The Other: A Cultural Approach—Seminar for students returning from Moscow; required of Slavic majors working on honors thesis; recommended for Slavic majors and minors. Russian cultural identity and its emergence in literature and art dealing with the other (W. Europe; the Orient including Central Asia, Siberia and the Caucasus, and marginal groups including Jews, Gypsies, and American students of Russian). Works of literature and other cultural texts; introduction to literary analysis, cultural and social theory. Class presentation.
4-5 units (Safran, Freidin) not given 2004-05

SLAVLIT 194B/294B. Russia and The Other: A Cultural Approach—For students who choose to develop their ideas further by doing additional research and writing a scholarly paper, possibly an honors thesis in Slavic literature or related field. Class presentation and research paper. Prerequisite: 194A.
4-5 units (Freidin, Safran) not given 2004-05

SLAVLIT 199. Individual Work for Undergraduate Students—Open to Russian majors or students working on special projects. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

SLAVLIT 200. Proseminar in Literary Theory and Study of Russian Literature—Required of first-year graduate students in Slavic. Introduction to graduate study in Slavic languages and literatures. Discussion of the profession, discipline, and literary theory complement theoretical readings and practical exercises in versification and narrative analysis.
4 units, Aut (Safran)

SLAVLIT 200A. Introduction to Library and Archival Research in Slavic Studies—Familiarizes students with major Western and Slavic language sources and search methodologies pertaining to Russian and E. European area studies. Tailored to research interests of the students enrolled in the course.
1-5 units, Aut (Fleishman)

SLAVLIT 211. Introduction to Old Church Slavic—Introduction to the grammar of Old Church Slavic, the first written language of the Slavic peoples. Brief survey of grammar, selected texts. Primarily a skills course, with attention to the historical context of Old Church Slavic.
3 units, Win (Timberlake)

SLAVLIT 212. Old Russian and Old Church Slavic—Continuation of 211. Readings in additional canonical Old Church Slavic texts, following the Church Slavic tradition as it develops in early Rus (Kiev, Novgorod). Selections from the Primary Chronicle, Boris and Gleb, The Life of Theodosius. The general issues of writing and the reception of Byzantine culture in early Rus.
3 units, Spr (Timberlake)

SLAVLIT 213. The Literary Dialogue of Pushkin and Gogol in the Formative Context of the 1830s—Pushkin and Gogol’s poetic, fictional, and journalistic works of the 1830s as an implicit dialogue about the emerging artistic and national directions of Russian literature, the Petersburg text, journalism, and theater. Paired Pushkin and Gogol texts read against the background of Belinsky, Pogodin, Senkovsky, Shakhovskoi, St. Beuve, Jules Janin, Balzac, and L. Ginzburg. Prerequisite: Russian.
2-4 units, Aut (Greenleaf)

SLAVLIT 225. Readings in Russian Realism—Open to graduate students and advanced undergraduates. Russian realist and naturalist prose emerged in a historical context that fostered specific ideas about the form and literary genre of the work. Readings from Turgenev, Goncharov, Leskov, Saltykov-Shchedrin, Dostoevsky, Garshin, Tolstoy, Chekhov, Gorky, Bunin. Discussions in English.
4 units (Safran) not given 2004-05

SLAVLIT 227. Boris Pasternak and the Poetry of the Russian Avant Garde—Pasternak’s works within a cultural context to identify and analyze characteristic features of the Russian avant garde poetic tradition. Readings in Russian.
3-4 units (Staff) not given 2004-05

SLAVLIT 270. Pushkin—Major poems and prose with detailed examination of his cultural milieu. Emphasis is on changes in understanding of literary concepts relevant to this period of Russian literature (poetic genres, the opposition between poetry and prose, romanticism).
2-3 units (Staff) not given 2004-05

SLAVLIT 270C. Pushkin and The Moderns—(Same as COMPLIT 270.) Graduate seminar. Pushkin’s major poetic texts and a study of the Pushkin function in specific works of 20th-century Russian literature. Prerequisite: knowledge of Russian.
3-5 units (Greenleaf) not given 2004-05

SLAVLIT 271. Poema: Russia’s Long Narrative Poem—Russian long narrative poems of the 19th and 20th centuries in literary and historical context.
3-4 units (Fleishman) not given 2004-05

SLAVLIT 299. Individual Work for Graduate Students—For graduate students in Slavic working on theses or engaged in special work. Prerequisite: written consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

SLAVLIT 305. Russian Critical Traditions—The Russian intelligentsia invested its literature with esthetic and ethical value, and developed critical apparatuses that have inspired Western approaches to text. Readings in theorists from the 19th-20th centuries including positivists and formalists. Possible topics: 19th-century radicals, futurist manifestoes, formalists, Freudian and Marxist models, Bakhtin, and the Tartu semioticians. Readings in English. Prerequisite: familiarity with the Russian canon.
3-4 units, Aut (Safran)

SLAVLIT 310. Civilizing Process: Paradigms of Society and Culture in Modern Russian Literature and Film—Texts representing theoretical models of society and culture in confrontation with Russian fiction and film. Emphasis is on Norbert Elias’s civilizing process and related theories. Topics: body and desire (Freud, Bakhtin); manners and civilizing process (Elias, Cuddihy, Lotman); symbolic forms, ritual, and systems (Geertz, Zorin); identities and practices (de Certeau, Bourdieu); subcultures (Hedidge). Authors include Mayakovsky, Babel, Mandelstam, Bulgakov, Platonov, Zoshchenko, Erofeev, Pelevin, Trifonov, and Petrushevskiaia; film makers: Mamin and Rogozhkin. Recommended: knowledge of Russian.
2-4 units, Win (Freidin)
SLAVLIT 369. Introduction to Graduate Studies: Criticism as Profession—(Enroll in COMPLIT 369, GERLIT 369.)
5 units, Aut (Berman)

SLAVLIT 399A,B,C. Advanced Research Seminar in Russian Literature—Offered as follow-up to 200- or 300-series seminars, as needed.
2-4 units, Aut, Win, Spr (Staff)

OVERSEAS STUDIES

Courses approved for the Slavic Languages and Literatures major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

SLAVGEN 153X. Film and Propaganda: Soviet and German Films of the 30s
3-4 units, Aut (Bulgakowa)

SOCILOGY

Chair: Mark Granovetter

Professors: Karen Cook, Paula England, Mark Granovetter, David Grusky, Michael T. Hannan, Douglas McAdam, Susan Olzak, Cecilia Ridgeway, C. Matthew Snipp, Nancy B. Tuma, Andrew Walder

Associate Professor: Gi-Wook Shin

Assistant Professors: Henning Hillmann, Noah Mark, Monica McDermott, Michael Rosenfeld, Rebecca L. Sandefur

Associate Professor (Teaching): Donald Barr

Lecturer: Robin Cooper

Courtesy Professors: Anthony Bryk, Larry Diamond, Glenn Carroll, Joanne Martin, Clifford J. Nass, Walter Powell, Francisco Ramirez

Courtesy Associate Professor: Michele Landis Dauber

Courtesy Assistant Professor: Daniel McFarland

Consulting Professor: George Bohrnstedt

Consulting Associate Professor: Ruth Cronkite

Visiting Associate Professor: Eva-Maria Meyerson Milgrom, Patricia Thornton

Department Offices: Building 120, Room 160
Mail Code: 94305-2047
Phone: (650) 725-3956
Web Site: http://www.stanford.edu/dept/soc/

Courses given in Sociology have the subject code SOC. For a complete list of subject codes, see Appendix.

Sociology is concerned with the full spectrum of social behavior (of individuals, small groups, large organizations, communities, institutions, and societies) and provides a strong intellectual background for students considering careers in the professions or business. Students may pursue degrees in sociology at the bachelor’s, master’s (coterminal), or doctoral levels.

UNDERGRADUATE PROGRAMS

Sociology offers two programs leading to the B.A. degree: the general sociology major and the specialized major. Both are designed around a core curriculum, the intent of which is to ensure adequate coverage of basic sociological knowledge and to provide enough flexibility for tailoring the degree program to fit individual needs and interests. The general major consists of the core curriculum plus a selection of additional courses intended to provide breadth of exposure to the variety of areas encompassed by sociology. The specialized major consists of the core curriculum plus a concentrated set of courses in one area of sociology. Areas of concentration include Social Psychology and Interpersonal Processes; Organizations, Business, and the Economy; Social Stratification and Inequality; and Political and Comparative Sociology. If a specialized major is completed, the student’s transcript will reflect his or her specialized field of study. These programs and the requirements for each are described below.

CORE CURRICULUM AND GENERAL SOCIOLOGY MAJOR

All recipients of the B.A. degree in Sociology must complete a minimum of 60 units of course work in the major. All units applied to the major must be taken for a grade (except for SOC 190-193) and a grade point average (GPA) of 2.0 (C) or better must be achieved. Related course work from other departments may fulfill part of this requirement, but such work must be approved in advance by a department adviser and must not exceed 15 units. All degree candidates must fulfill the following core requirements:
1. Introduction to Sociology (1). It is recommended that students take this course early in their program.
2. Methods for Sociological Research (180), or its equivalent.
3. An introductory course in statistics such as SOC 181B, STATS 60, PSYCH 60, or equivalent.
4. Classics of Modern Social Theory (170), or an equivalent course in social theory.
5. At least three foundation courses, each from a different area of concentration.
6. Senior Seminar: Honors (200H) or Senior Seminar for Majors (200), to be taken during the senior year. These courses fulfill the Writing in the Major (WIM) requirement.

To complete the general Sociology major, students must also complete 20 additional units of work.

**SPECIALIZED SOCIOLOGY MAJOR**

The department recognizes that some students may wish to engage in more in-depth study than that provided by the major in general Sociology. The specialized Sociology major permits students to pursue a more focused program in one of the four areas of concentration described below. To complete the requirements for the B.A. degree in Sociology with a field designation in Social Psychology and Interpersonal Processes; Organizations, Business, and the Economy; Political and Comparative Sociology; or Social Stratification and Inequality, the student must (1) complete all core and foundation requirements, and (2) complete 20 units of course work in the selected area of concentration.

**CONCENTRATION AREAS**

Each area identifies a specialized area of inquiry, a set of skills within sociology, and basic preparation for a variety of careers. A brief description of each area follows.

**Social Psychology and Interpersonal Processes**—This area of inquiry focuses on the social organization of individual identity, beliefs, and behavior; and upon social structures and processes which emerge in and define interpersonal interactions. Processes studied include social acceptance and competition for prestige and status, the generation of power differences, the development of intimacy bonds, the formation of expectations which govern performance in task oriented groups, and social pressures to constrain deviance. Foundation courses emphasize the effect of social processes on individual behavior and the analysis of group processes. This area provides excellent training for careers with a significant interpersonal component, including advertising and marketing, business, education, law, management, medicine and health, or social work.

**Organizations, Business, and the Economy**—This area of inquiry focuses on arrangements societies construct for the provision of material goods or services. A formal organization which provides goods or services for profit and sell them through a market is called a business, and the economic system is capitalism. Social needs are also met through not-for-profit organizations, such as garden clubs, hospitals, prisons, and the Red Cross. Some private and social needs are met outside of organizations, such as health care provided by family members and exchange of favors among friends. Courses stress the factors that determine whether needs that people define are met through markets or by non-market allocation, through organizations or by other means. They also investigate the environmental and technical factors that shape organization structure, the determinants of how efficiently organizations operate, and the interpersonal processes that shape individual behavior within organizations. Careers related to this area include management and administration in business or public settings, management consulting and analysis, and legal studies related to corporations, organizations, and business.

**Social Stratification and Inequality**—This area offers a comprehensive overview of various forms of social inequality. It examines the shape and nature of social inequalities; the competition for power; the allocation of privilege; the production and reproduction of social cleavages; and the consequences of class, race, and gender for such outcomes as attitudes, political behavior, and lifestyles. Many courses emphasize changes in the structure of social inequalities over time, and the processes which produce similarities or differences in stratification across nations. Topics include educational inequality, employment history, gender differences, income distributions, poverty, race, and ethnic relations, social mobility, and status attainment. Careers related to this field include administration, advertising, education, foreign service, journalism, industrial relations, law, management consulting, market research, public policy, and social service.

**Political and Comparative Sociology**—This area concerns the emergence, reproduction, and change of political systems and institutions, especially focusing on why and how different political systems appear in different times and places, and how varied are the systems referred to with simple descriptions such as democracy or capitalism. Transitions among democracy and dictatorship or socialism and capitalism are related to historical patterns and to social structure and organization. The origins and significance for change of social movements, including nationalism and revolutions, are studied in comparative and historical perspective. Careers related to this area include law, government service, and national and international business applications.

**CONCENTRATION AREA COURSES**

Many of the department courses can be categorized as primarily oriented to one of the four areas of concentration; a few courses are relevant to more than one area. Within each area of concentration, one or more undergraduate foundation courses are identified which provide a general introduction to the area or some portion of it. Courses, classified by area, are as follows:

1. **Social Psychology and Interpersonal Processes**
   - Foundation courses: 120, 121
   - Other courses: 125-128, 132, 142, 150, 220-227, 242

2. **Organizations, Business, and the Economy**
   - Foundation courses: 114, 160
   - Other courses: 110, 115, 130, 161-169, 260-268

3. **Social Stratification and Inequality**
   - Foundation course: 140
   - Other courses: 132, 134, 139, 142-149, 150, 240-249

4. **Political and Comparative Sociology**
   - Foundation courses: 110, 130
   - Other courses: 112-118, 131, 136, 133, 138, 210-218, 230, 231, 236

**MINORS**

The minor in Sociology is intended to familiarize students with the basic concepts and methods of the discipline. In addition to ensuring considerable breadth of exposure to the fundamental issues and approaches of the field of sociology, students are encouraged to obtain some depth of exposure to one of the specialized areas of study.

The requirements for a minor in sociology are as follows:

**Course No. and Subject**

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 1. Introduction to Sociology</td>
<td>5</td>
</tr>
<tr>
<td>SOC 180. Methods for Sociological Research</td>
<td>5</td>
</tr>
<tr>
<td>Two foundation courses, one each from two of the four concentration areas (e.g., Social Psychology; Organizations, Business and the Economy; Stratification; Political and Comparative Sociology)</td>
<td>10</td>
</tr>
<tr>
<td>Additional course work in the department, preferably in the areas of concentration associated with the foundation course taken (consult listing of courses for each area described elsewhere in the Stanford Bulletin)</td>
<td>15</td>
</tr>
<tr>
<td>Total course work required</td>
<td>35</td>
</tr>
</tbody>
</table>

All courses qualifying for the minor must be taken for a letter grade, and a grade point average (GPA) of 2.0 (C) or better must be achieved.

**HONORS PROGRAM**

Students desiring to undertake an independent scholarly project under the direction of a faculty member are encouraged to apply for admission to the department’s honors program. To enter the program, the student must be accepted by a faculty member of the department who agrees to advise on the research and writing of the essay. It is possible in some cases for students to work with faculty advisers in other departments, but such arrangements must be approved by the chair of the Undergraduate Studies Committee. Admission to the program requires a grade point...
average (GPA) of 3.5 or higher in courses taken within the major, and an overall GPA of 3.3 (B+) or higher in all undergraduate course work.

Work on the project can begin earlier, but ordinarily is initiated in connection with meeting the course requirements of SOC 200H, Honors Senior Seminar. Students are encouraged to begin designing their honors project in connection with this seminar, in consultation with the seminar leader and a faculty member who is willing to serve as sponsor for the honors project. If admitted to the program, the work can then be completed during Winter and Spring Quarters.

To formally enter the program, a student must complete an application form available from the department office. The form requires the endorsement of the faculty sponsor and is to be accompanied by a brief description of the project to be undertaken and a copy of the student’s undergraduate transcript. Prospective candidates must submit the copy of the completed application to the chair of the Undergraduate Studies Committee no later than the end of the third quarter before graduation (typically Autumn Quarter of the senior year).

Honors students may earn up to 12 units credit for work leading to completion of the required honors thesis (excluding units associated with the Senior Seminar). To be eligible for an honors degree, a grade of ‘A’- or better must be earned on the honors thesis. If an ‘A’- is not earned, the thesis credit counts toward meeting the standard major requirements.

Successful completion of honors in Sociology requires (1) completion of all requirements for the major; and (2) completion of a thesis of honors quality (a grade of ‘A’- or higher). The thesis is due on or before the beginning of the End-Quarter period in the student’s final quarter before graduating. If the thesis has been sponsored by a faculty member outside the department, it must be submitted to both that sponsor and to the chair of the Undergraduate Studies Committee, who appoints a departmental reader to evaluate the paper. Both the sponsor and the reader must agree that the paper merits honors. In every case, two copies of the final paper must be submitted. One is retained by the department and becomes a part of the department’s permanent collection.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

Stanford undergraduate students who wish additional training in sociology (whatever their undergraduate major), and who have a good academic record (a GPA of at least 3.5 in previous undergraduate work is required), may apply to the coterminal master’s program as described in the “Undergraduate Degrees” section of this bulletin.

To apply for admission to the coterminal program, students should submit the coterminal application and the following: (1) a statement of purpose providing the rationale for the proposed program of study, (2) a proposed program that specifies at least 45 units of course work relevant to the degree program and at least 36 units in Sociology, (3) a current undergraduate transcript, and (4) two letters of recommendation from Stanford faculty familiar with the student’s academic work.

All 45 course units to be counted toward the graduate degree must be at or above the 100 level; at least 18 course units must be above the 200 level. Because the acquisition of research skills is an important component of graduate training in the social sciences, it is recommended that coterminal students take one or more research methodology courses, for example, SOC 280, 281A, and 281B. All units applied to the coterminal master’s degree must be taken for a grade and an overall grade point average (GPA) of 3.0 (B) or better is required.

Most coterminal students propose programs that concentrate on one of the four areas of concentration offered by the department: Social Psychology and Interpersonal Relations; Organizations, Business, and the Economy; Political and Comparative Sociology; or Social Stratification and Inequality. This approach helps to ensure program coherence.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degree are described in the “Graduate Degrees” section of the bulletin.

Admission—Applicants to the doctoral program should have some undergraduate preparation in sociology; however, the department does consider for admission those without such preparation. Each applicant must submit results from the general Graduate Record Examination (GRE); the sociology subject test is not required. Foreign students must take the TOEFL exam (a minimum score of 600 is required). Applicants must also submit a writing sample, three letters of recommendation, and transcripts. To request an application and to obtain more specific information, go to http://gradadmissions.stanford.edu.

MASTER OF ARTS

The department does not admit students who are candidates solely for the M.A. in Sociology. This degree is, however, granted as a step toward the fulfillment of Ph.D. requirements. To receive the M.A., students must complete a minimum of 45 units of approved course work with a grade point average (GPA) of 3.0 (B) or better. All 45 units are to be taken in courses taught by Sociology faculty and must be taken for a grade whenever possible. Research and directed reading courses are acceptable, but must be approved in advance. All course work must be at the 100 level or above; 18 units must be above the 200 level.

A master’s option is also available to Ph.D. candidates from other departments. In this instance, the usual admission requirements are waived and course requirements are determined in consultation with a Sociology adviser. Students must complete a minimum of 45 units with a grade point average (GPA) of 3.0 (B) or better. All 45 units must be taken in courses taught by Sociology faculty and must be taken for a grade whenever possible. Research and directed reading courses are acceptable, but must be approved in advance. All course work must be at the 100 level or above; 18 units must be above the 200 level. Interested students should contact the department for additional information and advance approval of their programs.

DOCTOR OF PHILOSOPHY

The department admits only those students who appear to have the aptitude and qualities to complete the Ph.D. program in the Department of Sociology successfully. The curriculum and degree requirements are designed to provide students with the necessary knowledge and skills to become proficient as both scholars and teachers. The courses and requirements also provide faculty with essential information on the progress of each student and on areas of difficulty or deficiency requiring attention and improvement. Doctoral students in the department must take all required courses for a grade and are expected to earn a grade of B+ or better in each course. Any grade of B or below is considered to be less than satisfactory.

Students must complete the following department requirements for the Ph.D. degree in Sociology:

1. In order to receive a thorough introduction and orientation to the field of sociology, the department, and the faculty, each student must enroll in the Graduate Proseminar. The proseminar is a one-quarter course given during the Autumn Quarter of the first year of residence. One unit of credit is given for this course; grading is on a satisfactory/no credit basis. The proseminar leader also serves as the academic adviser for all first-year students. After the first year, students are allowed to select their academic adviser from among members of the department’s faculty.

2. As partial preparation for becoming an accomplished researcher, each student must complete three quarters of research experience, working under the supervision of one or more faculty members (including regular, emeritus, and affiliated faculty). The experience may involve paid work as a Research Assistant (RA), or unpaid work as a research apprentice, carried out to obtain research experience. With the approval of the chair of Graduate Studies, research experience may be acquired by involvement in research projects outside the department, for example, the American Institute for Research or the Veteran’s
As partial preparation for becoming an accomplished teacher, each student must complete three quarters of teaching apprenticeship in departmental courses, or in other courses by approval. Students will be assigned an academic advisor to help them identify areas of strengths and potential weaknesses. At the end of the second year of residency, the faculty again review the progress of all doctoral students in the program. Students who are performing well, as indicated by their course work, teaching and research apprenticeship performance, and second-year paper, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are still on probation at this stage may be (1) advanced to candidacy; (2) retained on probation, again with guidelines for necessary remedial steps; or (3) terminated from the program.

At any point during the degree program, evidence that a student is performing at a level less than satisfactory may be cause for a formal academic review of that student.

REQUIREMENTS

SURVEY COURSES

Four from among courses approved by the department; see ‘4’ above.

RESEARCH METHODS

281A/381A. Sociological Methodology I: Computer-Assisted Data Analysis
281B. Sociological Methodology IB: Statistics (required only of students with little statistics background)
382. Sociological Methodology II: The General Linear Model
383. Sociological Methodology III: Advanced Models for Discrete Outcomes

THEORY

370A. Sociological Theory: Social Structure, Inequality, and Conflict or 370B. Sociological Theory: Social Interaction and Group Processes
372. Theoretical Analysis and Design

Students must complete additional course work sufficient to prepare them to write their second-year paper.

PH.D. MINOR

Sociology offers a minor for School of Education doctoral students. Students must complete a minimum of 30 graduate-level units with a grade point average (GPA) of 3.0 (B) or better. All 30 units for the minor are to be in courses taught by Sociology faculty with the following exception: 5 units may be taken in a statistics or methods course taught in another department. All units must be taken for a grade. Research and directed reading courses are acceptable, but must be approved in advance. The specific program must be approved by a Sociology adviser and filed with the Department of Sociology.
The School of Law and Department of Sociology conduct joint programs leading to either a combined J.D. or J.M. degree with an M.A. degree in Sociology or to a combined J.D. or J.M. degree with a Ph.D. in Sociology. Normally, the student interested in pursuing an M.A. degree in Sociology completes one full year of the law program, applying for admission to the Department of Sociology during the first year of law school. Once admitted, the student must complete regular Department of Sociology master’s degree requirements. Applications for a joint program must be approved by the Research and Interdisciplinary Studies Committee of the School of Law and by the Department of Sociology. Faculty advisers from both the department and the school participate in the planning and supervise the study program of students admitted to joint degree status.

The joint J.D.-Ph.D. degree program is designed for students who wish to prepare themselves for research or teaching careers in areas relating to legal and sociological concerns. Participation requires application to both the School of Law and the Department of Sociology and acceptance by each. Upon admission, students may elect to begin their study program in either the School of Law or the Department of Sociology. Normally, the student spends the first full year in one program and the second full year in the other. Thereafter, the student may take courses concurrently until requirements for both degree programs have been met.

**COURSES**

Courses are open to all students without prerequisites, unless specifically indicated. Courses numbered 200-299 are open to advanced undergraduate and graduate students. Courses numbered 300 and above are normally offered to matriculated doctoral students only. Courses with an ‘X’ suffix are taught at an overseas campus only.

**OPEN TO ALL STUDENTS**

**INTRODUCTORY**

**SOC 1. Introduction to Sociology**—The central concepts, methods, and theoretical orientations of the discipline. Sociological imagination is illustrated by recent theory and research. Possible topics: the persistence of class cleavages; ethnic, racial, and gender inequalities; religious beliefs and the process of secularization; functions and dysfunctions of educational institutions; criminology and social deviance; social movements and social protest; production and reproduction of culture; rise of organizational society. GER:3b

5 units, Aut (Sandefur), Spr (Snipp)

**SOC 22N. The Roots of Social Protest**—Stanford Introductory Seminar. Preference to freshman. The conditions under which social protest occurs; the emergence, success, and viability of contemporary social movements. Examples include the women’s civil rights, ecology, anti-war, and anti-globalization movements in the U.S. and elsewhere. Sociological theories to explain the timing, location, and causes of mobilization, and how researchers evaluate these theories. Comparison of tactics, trajectories, and outcomes of similar social movements in different countries. GER:3b

5 units, Win (Olzak)

**SOC 32N. Law in Society**—Stanford Introductory Seminar. Preference to freshmen. For students interested in law and social inequality. Major sociological perspectives on where the law comes from, what law and justice systems do, and how they work. Enrollment limited to 16. GER:3b

5 units, Aut (Sandefur)

**SOC 44N. Race, Class, and Culture in Urban America**—Stanford Introductory Seminar. Preference to freshmen. How dividing lines of race and class are enacted, reinforced, or altered in large cities in the U.S. Emphasis is on the experience of urban life, white flight, the development of a code of the streets, and the social construction of neighborhoods as good or bad. Enrollment limited to 16. GER:3b

5 units, Spr (McDermott)

5 units, Win (Snipp)

**POLITICAL AND COMPARATIVE SOCIOLOGY**

**SOC 108. Population and Society**—(Graduate students register for 208.) Population size, composition, geographical distribution, and change in contemporary and historical perspective. Determinants of important processes affecting population including births, deaths, marriages, and geographical moves. Social, economic, and political consequences of population characteristics and population change. Population problems and policies. GER:3b

5 units (Tuna) not given 2004-05

**SOC 109. Sociology of Terrorism**—(Graduate students register for 209.) Is one person’s terrorist another’s freedom fighter? Emphasis is on conceptual and theoretical understandings of the origins and dynamics of modern terrorism. Globalization and resistance, clash of civilizations, blowback from American policies, and anger and resentment in the Middle East. Topics: defining and conceptualizing terrorism; current social scientific perspectives; forms and types of terrorism including individual, organized group, and nation state; and international terrorism. GER:3b

5 units, Spr (Staff)

**SOC 110. Politics and Society**—(Graduate students register for 210.) Themes of political sociology, the origins and expansion of the modern state, linkages between state and society, the impact of the modern world system on national policies, the internal distribution of power and authority, and the structure of political group formation and individual participation in modern states. Emphasis is on modern empirical literature. GER:3b

5 units (Meyer) not given 2004-05

**SOC 111. State and Society in Korea**—(Graduate students register for 211.) 20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience. GER:3b,4a

5 units, Spr (Shin)

**SOC 112. Comparative Democratic Development**—(Enroll in POLISCI 147.)

5 units, Spr (Diwaley)

**SOC 113A. Sociology of State Socialist and Post-Socialist Societies**—(Graduate students register for 213A.) What was the main cause of the collapse of the Soviet bloc: the lack of political and civic freedoms or economic inefficiency? What has happened to the former socialist countries since the fall of the Berlin Wall? Has the transition from socialism translated into capitalism? Basic concepts, ideas, and theories that scholars have employed to understand state socialism, post-socialist transition, and their effects including stratification and inequality, consumption, everyday life, popular culture, and gender and ethnic divides. GER:3b

5 units, Spr (Staff)

**SOC 117A. China Under Mao**—(Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China’s reforms in 1978: the creation of a socialist economy, the reorganization of rural society and urban workplaces, the emergence of new inequalities of power and opportunity, and the new forms of social conflict during Mao’s Cultural Revolution of 1966-69 and its aftermath. GER:4a

5 units, Aut (Walder)

**SOC 117B. Chinese Politics: The Transformation and the Era of Reform**—(Enroll in POLISCI 148/348.)

5 units, Win (Otto)
SOC 118. Social Movements and Collective Action—(Graduate students register for 218.) Contemporary theory and research on social movements and collective action. The strategies used by researchers for collecting and analyzing information on collective events, protests, conflicts, and social movements organizations. Analysis of different theories and methods that try to account for the rise and fall of social movement activity over time. GER:3b
3-5 units, Win (Olzak)

SOC 130. Education and Society—(Same as EDUC 220C; graduate students register for 230.) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling. GER:3b
4-5 units, Aut (Ramirez)

SOC 131. World, Societal, and Educational Change: Comparative Perspectives—(Same EDUC 136/306D; graduate students register for 231.) Theoretical perspectives and empirical studies on the structural and cultural sources of educational expansion and differentiation, and on the cultural and structural consequences of educational institutionalization. Research topics: education and nation building; education, mobility, and equality; education, international organizations, and world culture. GER:3b
4-5 units, Win (Ramirez)

SOC 133. Computers and Interfaces—(Enroll in COMM 169/269.)
4-5 units, Win (Nass)

SOC 136. Law and Society—(Graduate students register for 236.)—
Major issues and debates in the sociology of law. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books; organizational responses to the law in context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement.
5 units, Aut (Landis Dauber)

SOC 138. American Indians in Comparative Historical Perspective—
(Graduate students register for 238.) Comparative historical framework surveys the demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty. GER:4b
3-5 units, Aut (Snipp)

SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES

SOC 105. Status, Friendship, and Social Pressure—The basic social processes that structure the individual’s experience in interpersonal situations, including group pressure on individual choices, social control of deviants, operation of status distinctions (sex and race), and formation of friendships and intimate (love) relationships. Structured exercises and simulation gaming in section meetings provide experience with these processes. Lectures examine the processes in terms of theoretical ideas, empirical research, and clinical strategy. Enrollment limited to 30. GER:3b
5 units (Staff) not given 2004-05

SOC 120. Interpersonal Relations—(Graduate students register for 220.) Forming ties, developing norms, status, conformity, deviance, social exchange, power, and coalition formation; important traditions of research have developed from the basic theories of these processes. Emphasis is on understanding basic theories and drawing out their implications for change in a broad range of situations, families, work groups, and friendship groups. GER:3b
5 units, Aut (Ridgeway)

SOC 121. Social Psychology and Social Structure—(Graduate students register for 221.) Understanding the individual’s relationship to social groups, from two-person groups to society at large. Emphasis is on how social structure shapes individuals and how individuals in turn affect their social environment. Topics: identity, agency, interpersonal relations, social dilemmas, the life course, and collective behavior. GER:3b
5 units, Win (Cooper)

SOC 122. Sociology of Culture—(Graduate students register for 222.) Why do different people like different kinds of culture? How do cultural taste and practice affect friendship patterns, academic success, occupational attainment, and marital selection? Emphasis is on the relationship between culture and social structure with attention to social networks, social class, cultural capital, and symbolic exclusion. Topics include musical taste, arts participation, leisure activity, urban legends, names chosen for children, and opinions, beliefs, and values. GER:3b
5 units, Win (Mark)

SOC 123. Sex and Love in Modern Society—(Graduate students register for 223.) Social influences on private intimate relations involving romantic love and sexuality. Topics include the sexual revolution, contraception, dating, hook-ups, cohabitation, sexual orientation, and changing cultural meanings of marriage, gender, and romantic love. GER:3b
5 units, Win (England)

SOC 125. Sociology of Religion—(Graduate students register for 225.) The social patterns of religious belief and practice, and the classical and contemporary theoretical approaches to understanding these patterns. Topics: churches, sects and cults, sources of religious pluralism, relationships between religion and aspects of social structures including the economy, class structure, ethnicity, social networks, and the state. GER:3b
5 units, Spr (Mark)

SOC 126. Introduction to Social Networks—(Graduate students register for 226.) Introduction to social network theory, methods, and research. Basic network concepts such as density, homogeneity, and centrality are defined and applied to a variety of substantive areas. The impact of social network structure on individuals and groups in such areas as communities and neighborhoods, families, work life, and innovations. GER:3b
5 units, Win (Mark)

SOC 127. Bargaining, Power, and Influence in Social Interaction—(Graduate students register for 227.) Lab/discussion. Introduction to research and theoretical work on bargaining, social influence, and issues of power and justice in various social settings, including teams, work groups, and organizations. The basic theoretical approaches to the study of the exercise of power and influence in social groups and related issues in the study of social interaction, e.g., the promotion of cooperation, the effects of competition and conflict, negotiation, and inter-group relations. Enrollment limited to 40. GER:3b
3-5 units, Aut (Cooper)

SOC 150. The Family—Examines American families, employing theories of social psychology to study the interactions within the family and between the family and other institutions. Topics: the nature and history of the family, state regulation of families, variations by class and ethnicity, family violence, gender roles, parenting, and divorce. GER:3b
5 units (Staff) not given 2004-05

SOCIAL STRATIFICATION AND INEQUALITY

SOC 132. Sociology of Education—(Same as EDUC 110/310; graduate students register for 232.) Sociological approaches to school organization and its effects. Introduction to topics and case studies that elaborate on the embeddedness of classrooms and schools in social environments, spanning school processes such as stratification, authority, moral and technical specialization, curricular differentiation, classroom instruction, voluntary associations, social crowds, and peer influence. GER:3b
4 units, Spr (McFarland)
evidence on the concentration of African Americans in urban ghettos, 249.) Recent research and theory on the urban underclass, including —(Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history. GER:4b
5 units, Win (Snipp)

SOC 140. Introduction to Social Stratification—(Graduate students register for 240.) The main classical and modern explanations of the causes of social, economic, and political inequality. Issues include: power; processes that create and maintain inequality; the central axes of inequality in contemporary societies (race, ethnicity, class, and gender); the consequences of inequality for individuals and groups; and how social policy can mitigate and exacerbate inequality. Cases include technologically simple groups, the Indian caste system, and the modern U.S. GER:3b
5 units, Spr (Sandefur)

SOC 141A. Social Class, Race/Ethnicity, Health—(Graduate students register for 241A.) Socioeconomic, racial, and ethnic differences in health status. Access to care of racial/ethnic minorities and those from lower social classes. Institutional factors such as government programs as well as individual factors such as unconscious racial bias on the part of care providers or distrust of providers on the part of patients. The intersection of lower social class and ethnic minority status in health status and health care access. GER:3b,4b
4 units, Win (Barr)

SOC 142. Sociology of Gender—(Graduate students register for 242.) Gender inequality in contemporary American society with explanations for how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Three analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes. Arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations. GER:4c
3-5 units, Spr (Ridgeway)

SOC 145. Race and Ethnic Relations—(Graduate students register for 245.) Race and ethnic relations in the U.S. and elsewhere. The processes that render ethnic and racial boundary markers, such as skin color, language, and culture, salient in interaction situations. Why only some groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements. GER:4b
5 units (Olzak) not given 2004-05

SOC 146. Race, Community, and Urban Sociology—Group relations and community processes in an urban environment from a sociological perspective. How racial attitudes, residential segregation, and employment opportunities influence the wellbeing of different groups in the city. 5 units, Aut (Staff)

SOC 148. Racial Identity—(Graduate students register for 248.) The construction and meanings of racial identities in the U.S. Attention is on multiracial identities and the shifting boundaries of racial categories in contemporary America. GER:4b
5 units (McDermott) not given 2004-05

SOC 149. The Urban Underclass—(Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Analysis of ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:3b
5 units (Rosenfeld) not given 2004-05

ORGANIZATIONS, BUSINESS, AND THE ECONOMY
SOC 114. Economic Sociology—(Graduate students register for 214.) The sociological approach to production, distribution, consumption, and markets emphasizing the impact of norms, power, social structure, and institutions on the economy. Comparison of classic and contemporary approaches to the economy among the social science disciplines. Topics: consumption, labor markets, organization of professions such as law and medicine, the economic role of informal networks, industrial organization, including the structure and history of the computer and popular music industries, business alliances, capitalism in non-Western societies, and the transition from state socialism in E. Europe and China. GER:3b
5 units, Aut (Granovetter)

SOC 115. Topics in Economic Sociology—(Graduate students register for 215.) Discussion of topics initially explored in 114/214, with emphasis on countries and cultures outside N. America. Possible topics: families and ethnic groups in the economy, corporate governance and control, corporate strategy, relations among firms in industrial districts and business groups, the impact of national institutions and cultures on economic outcomes, transitions from state socialism and the role of the state in economic development. Possible case studies: the U.S., Germany, Italy, Britain, France, Brazil, Korea, India, Japan, and China. Prerequisite: 114/214 or 314. GER:3b
5 units (Staff) not given 2004-05

SOC 116. Globalization and Organizations—(Enroll in INTNLREL 131, IPS 231.)
5 units, Win (Drori)

5 units, Aut (Drori)

5 units, Win (Hillmann)

SOC 161. The Social Science of Entrepreneurship—(Graduate students register for 261.) Who is likely to become an entrepreneur and where is entrepreneurship likely to occur? Classic and contemporary theory and research. Interaction with expert practitioners in creating entrepreneurial opportunities including venture and corporate capitalists. The role of culture, markets, hierarchies, and networks in entrepreneurship. Theories of market creation and change, and factors that affect success of new organizations. Field projects on entrepreneurial environments such as technology licensing offices, entrepreneurial development organizations, venture capital firms, and corporate venturing groups. GER:3b
5 units, Spr (Thornton)

SOC 163. Division of Labor—(Graduate students register for 263A.) How work is divided into market work, non-market work, and shadow market work; occupations, professions, and just-jobs; between individuals and members of different groups; and between nations across the globe. Major sociological perspectives on the division of labor and its consequences; empirical evidence supporting and refuting different perspectives. GER:3b
5 units (Sandefur) not given 2004-05

SOC 164. Firms, Markets, and States—(Graduate students register for 264.) The relationships among business organizations, state economic policies, and market competition. How state intervention and institutional factors influence and delimit the organization of firms. How such factors create different forms of market competition. GER:3b
5 units (Staff) not given 2004-05
SOC 165. Power, Gender, and the Professions—(Graduate students register for 265.) Alternative views of professions and professionals, combining theories of professions and gender. The institutionalization of professional power and professional structure in the 20th century. Changing professional roles in the face of increasing bureaucratization of professional work. The role of gender in professional work, and alternative explanations for gender-based differences. How these forces operate, particularly in the professions of medicine, law, and academics. GER:3b
5 units, Spr (Barr)

SOC 166. Networks and Institutions: Sociological Perspectives on Economic Organizations—(Graduate students register for 266.) Network approach and institutional analysis as major frameworks in the field. Topics include the concept of embeddedness, social network analysis, status dynamics, and institutional analysis. Empirical case studies on industries and countries: legal environments of business organizations, university-industry interfaces, high-tech regions, and business groups in E. Asia.
5 units, Spr (Staff)

SOC 167A. Asia-Pacific Transformation—Post-WW II transformation in the Asia-Pacific region, with focus on the ascent of Japan, the development of newly industrialized capitalist countries (S. Korea and Taiwan), the emergence of socialist states (China and N. Korea), and the changing relationship between the U.S. and these countries. GER:3b,4a
5 units, Win (Shin)

SOC 168. The Matrix of Change: Managing Diversity—(Graduate students register for 268; same as PUBLPOL 168.) Diversity in organizations consists not only of racial, cultural, and gender differences, but also differences in perspectives and interests among employees based on profession, assignments, or compensation. Diversity can be a source of strength when different perspectives lead to insight and information and when pay differences leave room to reward superior performance. It can also be a barrier to communication and cooperation. Policy and managerial issues concerning when and how far to encourage diversity and how to harness its strengths and mitigate the conflicts it can create. GER:3b
5 units, Win (Meyerson Milgrom)

SOC 169. Health Care in America: The Organizations and Institutions that Shape the Health Care System—(Enroll in HUMBIO 160X.)
4 units, Aut (Barr)

SOC 169A. American Health Policy—(Enroll in HUMBIO 160A.)
3 units, Spr (Lee, G. Heller)

SOCIOLOGICAL THEORY

SOC 170. Classics of Modern Social Theory—(Graduate students register for 270.) The enduring contributions of Marx, Weber, and Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the impact of these traditions. GER:3b
5 units, Aut (McDermott)

RESEARCH METHODS

SOC 180. Introduction to Sociological Research—(Graduate students register for 280.) Methods used in contemporary sociological research focusing on strategies for designing research and analyzing data. GER:3b
5 units, Spr (Hillmann)

SOC 181A. Sociological Methods 1A: Computer-Assisted Data Analysis—(Graduate students register for 281A/381A.) For Sociology majors only. Introduction to the computer as a research tool and to common data sets in the social sciences. Emphasis is on development of the necessary skills for other courses in sociology methodology. Enrollment limited to 15.
3 units (Staff) not given 2004-05

SOC 181B. Sociological Methods IB: Statistics—(Graduate students register for 281B.) Emphasizes the statistical methods of principal relevance to sociology: contingency tables, correlation, and regression. Recommended: 181A/281A. GER:2c
5 units (Staff) not given 2004-05

SOC 200. Senior Seminar for Majors—Capstone course in which sociological problems are framed, linked to theories, and answers pursued through appropriate research designs. WIM
5 units, Spr (Cooper)

SOC 200H. Senior Seminar for Honors—WIM
5 units, Aut (McDermott)

SOC 201H. Senior Honors Colloquium in Health Policy—(Same as HUMBIO 160B.) Limited to students doing senior honors research in Human Biology or Sociology. Year-long class to assist students doing honors research pertaining to sociology or social policy. Weekly discussions center around defining the research question, identifying data acquisition methods, carrying out data analysis, and writing the honors thesis. Prerequisite: consent of instructor.
1 unit (Barr, G. Heller, Lee) not given 2004-05

SOC 202. Preparation for Honors Thesis—(Same as URBANST 200.) For juniors in Urban Studies or Sociology thinking about writing a senior honors thesis; Urban Studies seniors writing the honors thesis; and sophomores who plan to be off-campus Winter Quarter of their junior year and are interested in writing an honors thesis. Juniors register for 4 or 5 units to write a research prospectus and grant proposal seeking research funding. Urban Studies seniors writing an honors thesis register for 1 unit to make presentations of their work. Prerequisites: GPA that qualifies for honors; sophomores require consent of instructor; prerequisite for WIM: junior or sophomore registering for 3 or more units. WIM
1-5 units, Win (Tuma, Kahan)

INDIVIDUALIZED LEARNING EXPERIENCES, PRIMARILY FOR UNDERGRADUATE MAJORS

SOC 190. Undergraduate Individual Study
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 191. Undergraduate Directed Research—Work on a project of student’s choice under supervision of a faculty member. Prior arrangement required.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 192. Undergraduate Research Apprenticeship—Work in an apprentice-like relationship with faculty on an on-going research project. Prior arrangement required.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 193. Undergraduate Teaching Apprenticeship
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 196. Senior Thesis—Work on an honors thesis project under faculty supervision (see description of honors program). Must be arranged early in the year of graduation or before.
1-15 units, Aut, Win, Spr, Sum (Staff)

FOR ADVANCED/COTERMINAL UNDERGRADUATES AND MASTER’S STUDENTS

POLITICAL AND COMPARATIVE SOCIOLOGY

SOC 208. Population and Society—(For graduate students; see 108.)
5 units (Tuma) not given 2004-05

SOC 210. Politics and Society—(For graduate students; see 110.)
5 units (Meyer) not given 2004-05

SOC 211. State and Society in Korea—(For graduate students; see 111.)
5 units, Spr (Shin)

583
SOC 213A. Sociology of State Socialist and Post-Socialist Societies—
(For graduate students; see 113A.)
5 units, Spr (Staff)
SOC 217A. China Under Mao—(For graduate students; see 117A.)
5 units, Aut (Walder)
SOC 218. Social Movements and Collective Action—(For graduate students; see 118.)
3-5 units, Win (Ozak)
SOC 230. Education and Society—(For graduate students; see 130.)
4-5 units, Aut (Ramirez)
SOC 231. World, Societal, and Educational Change: Comparative Perspectives—(For graduate students; see 131.)
4-5 units, Win (Ramirez)
SOC 234. Research Seminar on Access to Justice—(Graduate students register for 334.) The functions and dysfunctions of modern legal systems. Topics include: official statements of the U.S. and the EU about the rights of parties to civil disputes; the roles of lawyers as gatekeepers and facilitators; the filtering process by which injuries and experiences become the basis for legal claims; access to and use of courts; the balance of power and advantage between individual persons and organizations in disputes. Prerequisite: advanced undergraduate or graduate standing, or consent of instructor.
5 units, Spr (Sandefur)
SOC 236. Law and Society—(For graduate students; see 136.)
3-5 units, Aut (Landis Dauber)
SOC 238. American Indians in Comparative Historical Perspective—(For graduate students; see 138.)
3-5 units, Aut (Snipp)
SOC 239. American Indians in Contemporary Society—(For graduate students; see 141A.)
4 units, Win (Snipp)
SOC 240. Introduction to Social Stratification—(For graduate students; see 140.)
5 units, Spr (Sandefur)
SOC 241A. Social Class, Race/Ethnicity, Health—(For graduate students; see 141A.)
4 units, Win (Barr)
SOC 242. Sociology of Gender—(For graduate students; see 142.)
3-5 units, Spr (Ridgeway)
SOC 245. Race and Ethnic Relations—(For graduate students; see 145.)
5 units (Ozak) not given 2004-05
SOC 248. Racial Identity—(For graduate students; see 148.)
5 units (McDermott) not given 2004-05
SOC 249. The Urban Underclass—(For graduate students; see 149.)
5 units (Rosenfeld) not given 2004-05
SOC 253E. French Social Thought from Durkheim to Bourdieu—(Enroll in FRENGEN 253E.)
3-5 units (Dupuy) not given 2004-05
SOC 260. Formal Organizations—(For graduate students; see 160.)
5 units, Win (Hillmann)
SOC 261. The Social Science of Entrepreneurship—(For graduate students; see 261.)
5 units, Spr (Thornton)
SOC 263A. Division of Labor—(For graduate students; see 163.)
5 units (Sandefur) not given 2004-05
SOC 264. Firms, Markets, and States—(For graduate students; see 164.)
5 units (Staff) not given 2004-05
SOC 265. Power, Gender, and the Professions—(For graduate students; see 165.)
5 units, Spr (Barr)
SOC 268. The Matrix of Change: Managing Diversity—(For graduate students; see 168.)
5 units, Win (Meyerson Milgrom)
SOC 270. Classics of Modern Social Theory—(For graduate students; see 170.)
5 units, Aut (McDermott)
SOC 274A. Research Workshop: Knowledge Networks—(Same as EDUC 374A.) Factors shaping processes of transferring basic knowledge into commercial development. Topics: the sociology and economics of science, intellectual property and patenting, university-industry relations, cross-national differences in knowledge transfer and science/technology policy, and entrepreneurial activity in universities. Students are expected to have or develop related research projects. Undergraduate prerequisite: consent of instructor.
1-3 units, Aut (Powell)
SOC 280. Introduction to Sociological Research—(For graduate students; see 180.)
3 units, Spr (Hillmann)

SOC 281A. Sociological Methods 1A: Computer-Assisted Data Analysis—(For graduate students; see 181A.)
3 units (Staff) not given 2004-05

SOC 281B. Sociological Methods 1B: Statistics—(For graduate students; see 181B.)
5 units (Staff) not given 2004-05

PRIMARILY FOR DOCTORAL STUDENTS
300-level courses are limited to matriculated doctoral students; other students require consent of instructor.

GENERAL
SOC 300. Workshop: Teaching Development—For first-year Sociology doctoral students only. The principles for becoming an effective instructor, adviser, and mentor to undergraduates. Topics: ethics, course organization and syllabus development, test construction and grading, conflict resolution, common classroom problems, and University policies related to matters such as sexual harassment. Technologies and other topics related to making effective presentations, and campus resources to improve classroom performance. Roundtable discussions with faculty and advanced graduate students known for teaching excellence. Students may be asked to give a demonstration lecture.
2 units, Spr (Staff)

SOC 305. Graduate Proseminar—For first-year Sociology doctoral students only. Introduction and orientation to the field of Sociology.
1 unit, Aut (Staff)

SOC 308. Social Demography—For graduate students and advanced undergraduates. Topics: models of fertility behavior, migration models, stable population theory, life table analysis, data sources, and measurement problems. How population behavior affects social processes, and how social processes influence population dynamics. Recommended: knowledge about sociological research methods; a basic understanding of regression analysis and log linear models.
5 units, Spr (Snipp)

POLITICAL AND COMPARATIVE SOCIOLOGY
SOC 310. Political Sociology—A survey of theory and research on the relationship between social structure and politics. Social foundations of political order, the generation and transformation of ideologies and political identities, social origins of revolutionary movements, and social consequences of political revolution. Prerequisite: doctoral student.
5 units, Spr (Walder)

SOC 311A,B,C. Comparative Systems—(Same as EDUC 387A,B,C.) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)
1-5 units, A: Aut, B: Win, C: Spr (Meyer, Ramirez)

SOC 312. Workshop: Collective Action and Social Movements
1-5 units, Aut, Win, Spr (Olzak)

SOC 316. Historical and Comparative Sociology—Theory and research on macro-historical changes of sociological significance such as the rise of capitalism, the causes and consequences of revolutions, and the formation of the modern nation state and global world system. Methodological issues in historical and comparative sociology.
5 units (Shin) not given 2004-05

SOC 318. Social Movements and Collective Action—Past and contemporary scholarship. Topics: causes of social movements; dynamics of movement development; the question of movement outcomes; the organizational dimensions and dynamics of collective action; and the causes and consequences of individual activism.
5 units (Olzak) not given 2004-05

SOC 334. Research Seminar on Access to Justice—(For graduate students; see 234.)
5 units, Spr (Sandefur)

SOC 337. Workshop on Korean Studies—Focus is on Korea related topics from comparative and sociological perspectives. Discussions of assigned readings, present findings from projects, or participate in the faculty’s ongoing research projects. Primarily intended for graduate or undergraduate students working on honors theses.
2 units, Aut, Win, Spr (Shin)

SOC 285. Seminar on Social Networks—How the study of social processes in rapidly changing societies. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Win, Spr (Walder)

SOC 300. Workshop: Teaching Development—For first-year Sociology doctoral students only. The principles for becoming an effective instructor, adviser, and mentor to undergraduates. Topics: ethics, course organization and syllabus development, test construction and grading, conflict resolution, common classroom problems, and University policies related to matters such as sexual harassment. Technologies and other topics related to making effective presentations, and campus resources to improve classroom performance. Roundtable discussions with faculty and advanced graduate students known for teaching excellence. Students may be asked to give a demonstration lecture.
2 units, Spr (Staff)

SOC 305. Graduate Proseminar—For first-year Sociology doctoral students only. Introduction and orientation to the field of Sociology.
1 unit, Aut (Staff)

SOC 308. Social Demography—For graduate students and advanced undergraduates. Topics: models of fertility behavior, migration models, stable population theory, life table analysis, data sources, and measurement problems. How population behavior affects social processes, and how social processes influence population dynamics. Recommended: knowledge about sociological research methods; a basic understanding of regression analysis and log linear models.
5 units, Spr (Snipp)

SOC 310. Political Sociology—A survey of theory and research on the relationship between social structure and politics. Social foundations of political order, the generation and transformation of ideologies and political identities, social origins of revolutionary movements, and social consequences of political revolution. Prerequisite: doctoral student.
5 units, Spr (Walder)

SOC 311A,B,C. Comparative Systems—(Same as EDUC 387A,B,C.) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)
1-5 units, A: Aut, B: Win, C: Spr (Meyer, Ramirez)

SOC 312. Workshop: Collective Action and Social Movements
1-5 units, Aut, Win, Spr (Olzak)

SOC 316. Historical and Comparative Sociology—Theory and research on macro-historical changes of sociological significance such as the rise of capitalism, the causes and consequences of revolutions, and the formation of the modern nation state and global world system. Methodological issues in historical and comparative sociology.
5 units (Shin) not given 2004-05

SOC 318. Social Movements and Collective Action—Past and contemporary scholarship. Topics: causes of social movements; dynamics of movement development; the question of movement outcomes; the organizational dimensions and dynamics of collective action; and the causes and consequences of individual activism.
5 units (Olzak) not given 2004-05

SOC 334. Research Seminar on Access to Justice—(For graduate students; see 234.)
5 units, Spr (Sandefur)

SOC 337. Workshop on Korean Studies—Focus is on Korea related topics from comparative and sociological perspectives. Discussions of assigned readings, present findings from projects, or participate in the faculty’s ongoing research projects. Primarily intended for graduate or undergraduate students working on honors theses.
2 units, Aut, Win, Spr (Shin)

SOC 310. Political Sociology—A survey of theory and research on the relationship between social structure and politics. Social foundations of political order, the generation and transformation of ideologies and political identities, social origins of revolutionary movements, and social consequences of political revolution. Prerequisite: doctoral student.
5 units, Spr (Walder)

SOC 311A,B,C. Comparative Systems—(Same as EDUC 387A,B,C.) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)
1-5 units, A: Aut, B: Win, C: Spr (Meyer, Ramirez)

SOC 312. Workshop: Collective Action and Social Movements
1-5 units, Aut, Win, Spr (Olzak)

SOC 316. Historical and Comparative Sociology—Theory and research on macro-historical changes of sociological significance such as the rise of capitalism, the causes and consequences of revolutions, and the formation of the modern nation state and global world system. Methodological issues in historical and comparative sociology.
5 units (Shin) not given 2004-05

SOC 318. Social Movements and Collective Action—Past and contemporary scholarship. Topics: causes of social movements; dynamics of movement development; the question of movement outcomes; the organizational dimensions and dynamics of collective action; and the causes and consequences of individual activism.
5 units (Olzak) not given 2004-05

SOC 334. Research Seminar on Access to Justice—(For graduate students; see 234.)
5 units, Spr (Sandefur)

SOC 337. Workshop on Korean Studies—Focus is on Korea related topics from comparative and sociological perspectives. Discussions of assigned readings, present findings from projects, or participate in the faculty’s ongoing research projects. Primarily intended for graduate or undergraduate students working on honors theses.
2 units, Aut, Win, Spr (Shin)

SOC 310. Political Sociology—A survey of theory and research on the relationship between social structure and politics. Social foundations of political order, the generation and transformation of ideologies and political identities, social origins of revolutionary movements, and social consequences of political revolution. Prerequisite: doctoral student.
5 units, Spr (Walder)

SOC 311A,B,C. Comparative Systems—(Same as EDUC 387A,B,C.) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)
1-5 units, A: Aut, B: Win, C: Spr (Meyer, Ramirez)

SOC 312. Workshop: Collective Action and Social Movements
1-5 units, Aut, Win, Spr (Olzak)

SOC 316. Historical and Comparative Sociology—Theory and research on macro-historical changes of sociological significance such as the rise of capitalism, the causes and consequences of revolutions, and the formation of the modern nation state and global world system. Methodological issues in historical and comparative sociology.
5 units (Shin) not given 2004-05

SOC 318. Social Movements and Collective Action—Past and contemporary scholarship. Topics: causes of social movements; dynamics of movement development; the question of movement outcomes; the organizational dimensions and dynamics of collective action; and the causes and consequences of individual activism.
5 units (Olzak) not given 2004-05

SOC 334. Research Seminar on Access to Justice—(For graduate students; see 234.)
5 units, Spr (Sandefur)

SOC 337. Workshop on Korean Studies—Focus is on Korea related topics from comparative and sociological perspectives. Discussions of assigned readings, present findings from projects, or participate in the faculty’s ongoing research projects. Primarily intended for graduate or undergraduate students working on honors theses.
2 units, Aut, Win, Spr (Shin)

SOC 285. Seminar on Social Networks—How the study of social processes in rapidly changing societies. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Win, Spr (Walder)

SOC 321. Workshop: Social Psychology—Current theories and research agendas, reviews of recent publications, presentations of ongoing research by faculty and students. May be repeated for credit. Prerequisite: consent of instructor.
2-5 units (Staff) not given 2004-05

SOC 324. Seminar on Social Networks—How the study of social networks contributes to sociological research. Theoretical understanding and empirical application of core concepts to analyze patterns of relations among actors, including: connectivity and clusters, duality of categories and networks, centrality and power, balance and transitivity, structural equivalence, and blockmodels. Friendship and kinship networks, diffusion of ideas and infectious diseases, brokerage in markets and organizations, and patronage and political influence in historical contexts.
3-5 units, Win (Hillmann)

SOC 326. Workshop: Sociology of Culture—Current theories and research agendas, critical reviews of recent publications, presentations of ongoing research by faculty and students. May be repeated for credit. Prerequisite: consent of instructor.
2-5 units (Staff) not given 2004-05

SOC 327. Frontiers of Social Psychology—Advanced topics and current developments; underlying theoretical questions and empirical research. Possible topics include social identity processes, status beliefs and processes, social exchange, affect and social cohesion, legitimacy, social difference and inequality, norms, and social dilemmas.
3-5 units, Spr (Ridgeway)
SOC 342B. Gender and Social Structure—The role of gender in structuring contemporary life. Social forces affecting gender at the psychological, interactional, and structural levels. Gender inequality in labor markets, education, the household, and other institutions. Theories and research literature.

3-5 units, Aut (England)

SOCIAL STRATIFICATION AND INEQUALITY

SOC 336. Sociology of Law—Classical perspectives and contemporary developments in the sociological investigation of law and legal systems. Foundational works in the sociology of law, contemporary statements, and topics of interest to participants. Possible topics include: legal services markets; the effects of law on behaviors and attitudes; the workings of concrete components of legal institutions; and comparative legal systems. May be repeated for credit.

3-5 units (Sandefur) not given 2004-05

SOC 340. Social Stratification—Classical and contemporary approaches to the unequal distribution of goods, status, and power. Modern analytic models of the effects of social contact, cultural capital, family background, and luck in producing inequality. The role of education in perpetuating or undermining stratification. The causes and consequences of inequality by race and gender. The structure of social classes, status groupings, and prestige hierarchies in various societies. Labor markets and their role in inequality. The implications of inequality for individual lifestyles. The rise of the new class, the underclass, and other emerging groupings, and prestige hierarchies in various societies. Labor markets and their role in inequality. The implications of inequality for individual lifestyles. The rise of the new class, the underclass, and other emerging forms of stratification. Prerequisite: Ph.D. student or consent of instructor.

5 units, Spr (Grusky)

SOC 342A. Race and Ethnic Relations—Presentations of current work by faculty, students, and guest speakers. Recent publications and contemporary issues. May be repeated for credit. Prerequisite: consent of instructor.

3-5 units, Aut, Win, Spr (McDermott)

SOC 345. Seminar in Comparative Race and Ethnic Relations—Factors that create, maintain, and diminish the salience of race and ethnic boundaries. Theoretical debates surrounding the emergence, persistence, and change in racial and ethnic boundaries, nationalism and sovereignty, and mobilization. Empirical evidence on race and ethnic tensions, conflict, and warfare. The relationship between democracy, immigration, and diversity.

5 units (Olzak) not given 2004-05

ORGANIZATIONS, BUSINESS, AND THE ECONOMY

SOC 314. Economic Sociology—Survey of the classical and contemporary literature in economic sociology, covering the sociological approach to markets and the economy, and comparing it to that of other disciplines. Topics: consumption, labor, professions, industrial organization, and the varieties of capitalism; historical and comparative perspectives on market and non-market provision of goods and services, and on transitions among economic systems. The relative impact of culture, institutions, norms, social networks, technology, and material conditions. Prerequisite: enrollment in a doctoral program or consent of the instructor.

5 units, Win (Granovetter)

SOC 355. Higher Education and Society—(Enroll in EDUC 355X.)

3 units (Gumport) not given 2004-05

SOC 360. Foundations of Organizational Sociology—Core problems in the sociology of organizations, main theoretical perspectives, and research programs directed at evaluating these perspectives.

5 units (Staff) not given 2004-05

SOC 361. Social Psychology of Organizations—(Same as OB 671.) Seminar. Social psychological theories and research relevant to organizational behavior. Current research topics in micro-organizational behavior, linking these to foundations in cognitive and social psychology and sociology. Topics include models of attribution, social comparison and justice, commitment, stereotyping informal relationships, groups, and leadership. Prerequisites: Ph.D. student; graduate-level social psychology course.

4 units, Spr (Staff)

SOC 362. Organization and Environment—(Same as OB 672.) Leading sociological approaches to analyzing relations of organizations and environments with emphasis on dynamics. Theoretical formulations, research designs, and results of empirical studies. Prerequisite: Ph.D. student.

4 units, Win (Staff)

SOC 363. Social and Political Process in Organizations—Seminar. Focus is on cognition, attitudes, and behavior in organizations, drawing on psychological and sociological research at the meso level of analysis. Topics vary each year, including organizational learning and decision making; power and conflict; emotions in organizations; mobility and stratification; gender inequality and discrimination; networks; organizational justice and legitimacy; cultural perspectives on organizations. Prerequisite: Ph.D. student.

4 units (Staff) not given 2004-05

SOC 363A. Seminar on Organizational Theory—(Same as EDUC 375A.) For Ph.D. students. The social science literature on organizations. Readings introduce major theoretical traditions and debates. The intellectual development of the field reflects shifts in emphasis in studies from workers to managers, from organizational processes to outputs, and from single organizations to populations of organizations.

5 units, Aut (Powell)

SOC 363B. Seminar on Organizations: Institutional Analysis—(Same as EDUC 375B.) The fruitfulness of research programs from institutional, network, and evolutionary perspectives in explaining large-scale change in organizational populations and institutions.

3-5 units, Win (Powell)

SOC 367. Institutional Analysis of Organizations—Reading and research on the nature, origins, and effects of the modern institutional system. Emphasis is on the effects of institutional systems on organizational structure.

3-5 units, Win (Scott)

SOC 369. Network Analysis of Formal and Informal Organizations—(Enroll in EDUC 316.)

4-5 units, Spr (McFarland)

SOC 369A. Perspectives on Organizations and Environments 1-5 units, Win (Hannan)

SOC 374A.B. Commercialization of Knowledge—Research workshop. Key lines of research on organizational change. The fruitfulness of research programs in, and institutional, network, and evolutionary perspectives on, explaining large-scale change in organizational populations and institutions.

2-3 units, A: Aut (Powell), B: not given 2004-05

SOC 376. Perspectives on Organization and Environment—(Enroll in OB 674.) Theories in organizational behavior: organizational ecology and social exchange theory. Students may enroll for either or both; for further information, see class section notes. May be repeated for credit.

4 units, Spr (Staff)

SOC 377. Comparing Institutional Forms: Public, Private, and Nonprofit—(Same as GSBGEN 346.) Seminar. For students interested in the nonprofit sector, and those in the joint Business and Education program. The missions, functions, and capabilities of nonprofit, public, and private organizations. Focus is on sectors with significant competition among institutional forms, including health care, social services, the arts, and education. Sources include scholarly articles, cases, and historical materials. Advanced undergraduates may enroll with consent of instructor.

4 units, Win (Powell)
SOCIOLOGICAL THEORY

SOC 370A. Sociological Theory: Social Structure, Inequality, and Conflict—The traditions of structural analysis derived from the work of Marx, Weber, and related thinkers. Antecedent ideas in foundational works are traced through contemporary theory and research on political conflict, social stratification, formal organization, and the economy.
3-5 units, Aut (Olzak)

SOC 370B. Social Interaction and Group Process—The analyses of social solidarity and group processes derived from such thinkers as Durkheim, Simmel, and Mead. Antecedent ideas in foundational works are traced through contemporary theory and research on small group processes, social networks, group identification, and related subjects.
3-5 units, Spr (Zelditch)

SOC 372. Theoretical Analysis and Design—Theoretical analysis and the logical elements of design, including the systematic analysis of the logical structure of arguments, the relationship of arguments to more encompassing theoretical or metatheoretical assumptions, the derivation of logical implications from arguments, assessments of theoretically significant problems or gaps in knowledge.
3-5 units, Aut (Zelditch)

RESEARCH METHODS

SOC 380. Qualitative Methods—Same as 180/280, but restricted to doctoral candidates in Sociology or Sociology of Education. Methods used in contemporary sociological research, focusing on strategies for designing research and analyzing data.
5 units (Staff) not given 2004-05

SOC 381A. Sociological Methods IA: Computer-Assisted Data Analysis—(Graduate section; see 181A/281A.)
3 units, Aut (Staff)

SOC 382. Sociological Methodology II: The General Linear Model—The general linear model for discrete and continuous variables. Introduction to model selection, the principles of estimation, assessment of fit, and modeling diagnostics. Prerequisites: 281A,B, or equivalents.
3-6 units, Spr (Tuma)

3-6 units, Win (Tuma)

SOC 387. Frontiers of Quantitative Sociological Research—Advanced topics in quantitative sociological research, especially recently developed models and methods. Possible topics: robust regression methods, boot-strapping, local likelihood estimation, quantile regression, two-sided logit models, event count models, event sequence models, heterogeneous diffusion models, and models for change in social networks.
3-5 units (Tuma) not given 2004-05

SOC 388. Log-Linear Models—Analysis of categorical data with log-linear, and negative binomial models. Discussion of measures of fit, and hypothesis testing.
5 units (Rosenfeld) not given 2004-05

SOC 389. Mixed Method Research Design and Analysis—Research designs that incorporate qualitative and quantitative analyses in a single project. The tension between thinking case-wise and variable-wise; how the focus on relationships between variables that is the hallmark of the quantitative approach can be brought into qualitative work.
3-5 units, Spr (England)

GRADUATE INDIVIDUAL STUDY

SOC 390. Graduate Individual Study
1-15 units (Staff)

SOC 391. Graduate Directed Research
1-15 units (Staff)

SOC 392. Research Apprenticeship
1-15 units (Staff)

SOC 393. Teaching Apprenticeship
1-15 units, Aut, Win, Spr, Sum (Staff)

SOC 394. Thesis
1-15 units, Aut, Win, Spr, Sum (Staff)

SOC 395. Research Internship—Graduate students integrate internship work into their academic program. Students register in the quarter following internship work and complete a research report outlining their work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets requirements for Curricular Practical Training for students on F-1 visas. Work completed cannot be counted toward the departmental research assistantship requirement.
1-15 units (Staff)

OVERSEAS STUDIES

These courses are approved for the Sociology major and taught at the campus indicated. Course descriptions can be found in the “Overseas Studies” section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

FLORENCE

SOC 114S. Migrations and Migrants: The Sociology of a New Phenomenon
5 units, Spr (Allam)

OXFORD

SOC 117W. Gender and Social Change in Modern Britain
4 units, Aut (Palmer)

SANTIAGO

SOC 111S. Social Heterogeneity in Latin America—(Same as SPANLIT 164S.)
5 units, Aut (Valdés)
CENTER FOR SPACE SCIENCE AND ASTROPHYSICS

Director: Robert V. Wagoner
Associate Directors: Umran S. Inan, Roger W. Romani, Philip H. Scherrer

Professors: Roger Blandford (Physics, SLAC), Elliot Bloom (SLAC), W. Gary Ernst (Geological and Environmental Sciences), Lambertus Hesselink (Electrical Engineering), Umran S. Inan (Electrical Engineering), Steven Kahn (Physics, SLAC), Peter F. Michelson (Physics), Vahe Petrosian (Physics), Norman H. Sleep (Geophysics), G. Leonard Tyler (Electrical Engineering), Robert V. Wagoner (Physics)

Associate Professors: Bruce B. Lusignan (Electrical Engineering), Roger W. Romani (Physics), Howard Zebker (Electrical Engineering, Geophysics)

Assistant Professors: Sarah Church (Physics), Guenther Walther (Statistics)

Professors (Research): C-W. Francis Everitt (Hansen Laboratory), Philip H. Scherrer (Physics)

Associate Professor (Research): Chris Chyba (Geological and Environmental Sciences)

Consulting Professors: Alan M. Title, Martin Walt (Electrical Engineering)

SLAC Staff Physicist: Grzegorz Madejski

Center Offices: Varian, Room 304
Mail Code: 94305-4060
Phone: (650) 723-1439
Email: danav@stanford.edu
Web Site: http://www.stanford.edu/group/CSSA/

Courses given in Center for Space Science and Astrophysics have the subject code SPACESCI. For a complete list of subject codes, see Appendix.

The center is an interdepartmental organization coordinating teaching and research in space science and astrophysics. Its members are drawn from the Department of Geological and Environmental Sciences in the School of Earth Sciences; the departments of Aeronautics and Astronautics, Electrical Engineering, and Mechanical Engineering in the School of Engineering; the departments of Applied Physics, Physics, and Statistics in the School of Humanities and Sciences; the W. W. Hansen Experimental Physics Laboratory; and the Stanford Linear Accelerator Center. Its membership also includes all faculty and appropriate staff at the Kavli Institute for Particle Astrophysics and Cosmology, located at SLAC and the Physics department.

Research now in progress covers a wide array of investigations and is approached in a variety of ways, including experiments flown on rockets, satellites, and space probes; ground-based observations made from the Hobby-Eberly Telescope, the Wilcox Solar Observatory, and from national observatories; and theoretical research including computer modeling. Topics currently being studied include cosmology, gamma-ray astronomy, gravitation theory and experiments, including gravitational waves (LIGO, LISA), guidance and control, high-energy astrophysics, ionospheric and magnetospheric physics, microwave and infrared astronomy, planetary sciences, solar physics, solar-terrestrial phenomena, stellar structure, theoretical astrophysics, x-ray and extreme ultraviolet astronomy, and the study of life in the universe. Some of these projects involve opportunities for collaboration with scientists at the Lockheed-Martin Research Laboratory through the Stanford-Lockheed Institute for Space Research, the NASA/Ames Research Center, and the SETI Institute.

Stanford is a member of the Universities Space Research Association, a consortium of universities which operates the Lunar Science Institute in Houston, Texas; the University Corporation for Atmospheric Research in Boulder, Colorado; and the San Diego Supercomputer Consortium.

Stanford is the lead institution for the GLAST gamma-ray observatory, Gravity Probe B, and the Solar Oscillations Investigation on the Solar and Heliospheric Observatory spacecraft (SOHO); and participates in the USA X-ray satellite and the Soft X-Ray Telescope program on the Japanese Yohkoh spacecraft.

Stanford is also a member of the Hobby-Eberly Telescope Consortium which has constructed a 10-meter telescope at the McDonald Observatory of the University of Texas. Full science operations are in progress.

The facilities of the center are available to any interested and qualified student, who must be admitted by and registered in a department. The departments of Aeronautics and Astronautics, Applied Physics, Electrical Engineering, Mechanical Engineering, and Physics offer opportunities leading to an M.S. or Ph.D. degree for work in space science or astrophysics. The center also offers opportunities to undergraduates who may, for instance, participate in research projects in their junior or senior years, on a part-time basis during the school year or on a full-time basis during the summer. The Astronomy Course Program operates a small student observatory where students may gain practical experience in astronomical observing. The course list at the end of this entry includes courses of interest to undergraduates, as well as courses primarily of interest to graduate students.

Further information is available from the director.
SPANISH AND PORTUGUESE

Emeriti: (Professors) Fernando Alégría, Bernard Gicovate, Mary Pratt, Isabel Maña Schevill, Sylvia Wynter
Chair: J. Gordon Brotherton
Professors: J. Gordon Brotherton, Michael P. Predmore, Jorge Raffinelli (Santiago, Chile, in Autumn), Guadalupe Valdés, Yvonne Yarbo-Bejarano
Assistant Professors: Richard Rosa, Lúcia Sá
Professor (Teaching): María-Paz Haro (Santiago, Chile, in Winter)
Senior Lecturers: Susan Cashion (by courtesy), Irene Corso, Lyris Wiedemann
Courtesy Professors: John Felstiner, Roland Greene, Hans U. Gumbrecht, Ramón Saldívar
Courtesy Associate Professors: James A. Fox, Paula Moya
Visiting Professor: Paul Julian Smith
Visiting Assistant Professors: Jose Cartagena-Calderón, Juan Poblete
Spanish Language Program Coordinator: Alice Miano
Portuguese Language Coordinator: Lyris Wiedemann
Majors and Minors Coordinator: Caridad Kenna
Directors of Undergraduate Studies: Richard Rosa, Lúcia Sá
Graduate Advisers: J. Gordon Brotherton, Yvonne Yarbo-Bejarano
Department Offices: Building 260, Room 214
Mail Code: 94305-2014
Phone: (650) 723-4977
Web Site: http://www.stanford.edu/dept/span-port/

Courses given in Spanish and Portuguese have the subject codes PORTLANG, PORTLIT, SPANLANG, and SPANLIT. For a complete list of subject codes, see Appendix.

The department is committed to four main educational purposes: (1) to provide students with expert training in the Spanish and Portuguese languages at all levels and to enable them to develop their skills in these languages according to their goals and interests; (2) to acquaint students with the literatures and cultures of the Spanish and Portuguese speaking world (Iberia, Latin America, the United States) in terms of both contemporary realities and 1,000 years of written and oral tradition; (3) to prepare undergraduates for advanced study in Iberian, Latin American, and Luso-Brazilian languages, literatures, and cultures and/or in language education; and (4) to provide doctoral students with advanced training as research scholars and teachers, in preparation for careers as university teachers or related roles.

The faculty represent a broad range of interests and approaches. In general, the department’s programs are characterized by: (1) a commitment to undergraduate and graduate teaching at the highest intellectual level; (2) a strong interdisciplinary focus that combines the study of literature with that of other forms of cultural expression; (3) a sociohistorical perspective on language, literature, and culture; (4) an effort to maintain a balance among Latin American, Iberian, and U.S. Latino/Chicano fields; and (5) language study tailored to a range of educational intellectual goals and native and non-native experience with the Spanish and Portuguese languages.

The department works closely with the Center for Latin American Studies, Comparative Studies in Race and Ethnicity, El Centro Chicano, the Overseas Studies program in Santiago, Chile, and selected overseas programs in Spain. It makes extensive use of the resources of the language laboratory and the Language Center. The University library maintains world class collections in Latin American and Iberian Studies and one of the largest research archives in the country in Chicano history and literature. The Hoover Library is a valuable resource for particular research topics on Spanish and Latin American intellectual history. Department faculty teach in the School of Education, Comparative Literature, Comparative Studies in Race and Ethnicity, Drama, Feminist Studies, Film Studies, Introduction to the Humanities Program, and Modern Thought and Literature. The department houses a Brazilian Writer-in-Residence program developed in cooperation with the Brazilian Ministry of Culture, and hosts visiting faculty from Spain and Latin America on a regular basis.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The major in Spanish is designed to enable students to develop a concentration in a particular area of interest, accompanied by basic work in two secondary areas. Students are normally expected to declare the major during the sophomore year, but it is possible to declare during the junior year as well, particularly after overseas study in Santiago, Chile.

The major in Spanish requires 50 units in addition to completion of one of the second-year language sequences, or equivalent:

SPANLANG 11C, 12C, 13C. Second-Year Spanish: Cultural Emphasis
SPANLANG 21B, 22B, 23B. Second-Year Spanish for Heritage Language Study

Course work for the major is grouped under the following subject area; students are required to take four courses in one of these areas, two courses in a second and one in a third:

1. Latin American/Caribbean studies (including Brazil)
2. Iberian Studies (including Portugal)
3. U.S. Latino/Chicano studies
4. Language in the Spanish-speaking world
5. Luso-Brazilian language and culture

Course work for the major must include:

1. One quarter of Portuguese language (counts for area 5 above)
2. SPANLIT 101. Structure of Spanish (counts for area 4 above)
3. SPANLIT 140. Introduction to Methods of Literary and Cultural Analysis (counts for area 1, 2, or 3 above)
4. One writing-intensive course
5. SPANLIT 278. Senior Seminar

All courses in the department numbered 101 or above count toward the major. With the consent of the student’s adviser, up to 10 units of relevant course work outside the department and up to 10 units of course work done in English may be counted toward the major, more if the major subject area is Latino/Chicano studies. With the consent of the adviser, up to 25 units of relevant course work taken abroad may be counted toward the major. Courses taken credit/no credit do not count toward the major.

How to Declare a Major—Students interested in declaring a Spanish major should see the majors and minors coordinator, Caridad Kenna, or the undergraduate adviser, Richard Rosa.

Double Majors—The major in Spanish and Portuguese is designed to combine readily with a second major in another field and with study abroad. Students may not count the same course to fulfill requirements in both majors.

Courses for Heritage Language Speakers—The Language Center offers a series of second- and third-year courses especially designed for students who grew up in homes where Spanish is spoken and who wish to develop their existing linguistic strengths. See the “Language Center” section of this bulletin for these courses. The suffix “B” in course numbers indicates these courses.

MINORS

The department offers two minor concentrations. With the consent of the student’s adviser, up to 10 units of relevant course work outside the department, and up to 15 units of relevant course work taken abroad, may count toward the following minors:

LANGUAGE AND CULTURE STUDIES

This minor is intended for students who wish to focus on developing advanced linguistic competence in Spanish and/or Portuguese, or who wish to combine acquisition of linguistic competence with the study of the literature, thought, culture, or language systems of the Spanish- or Portuguese-speaking world.

Requirements—Thirty units of course work at the level of Spanish 11 or above, and/or in Portuguese at any level. Students must take at least three courses in one of the following subject areas:

1. Latin American and Iberian Studies: recommended are SPANLIT 130, 131, 132, 133 and 134; and 150, 151, 160, 161

589
3. Advanced Language: any combination of second-year Spanish and/or first- and second-year Portuguese, plus a selection of 100- and 200-level language courses. Recommended: SPANLIT 203, 204, 205, 206, 207.
4. Luso-Brazilian Language and Culture: recommended are PORTLANG 11A, 12A, 133, 134, 170, and 171.

CULTURE AND AREA STUDIES
This minor is intended for students who wish to study the literature, culture, or thought of the Spanish- and Portuguese-speaking world without necessarily acquiring proficiency in Spanish or Portuguese language. Students choosing this minor are strongly encouraged to take language courses in Spanish or Portuguese, including reading courses (such as SPANLANG 50 or PORTLANG 50). Such courses count toward, but are not required for, this minor.

Requirements—Thirty units of course work in Latin American, Iberian, U.S. Latino/Chicano, or Luso-Brazilian literature, culture, language, and thought studied in the original or in translation at the level of SPANLANG 11 or above.

HOW TO DECLARE A MINOR
For minors in the School of Humanities and Sciences, students must complete their declaration of the minor no later than the last day of the quarter two quarters before degree conferral. For example, a student graduating in June (Spring Quarter) must declare the minor no later than the last day of Autumn Quarter of senior year. Students declaring a minor should meet with the majors and minors coordinator, Caridad Kenna.

HONORS PROGRAM
Spanish and Portuguese majors in the junior year, with a grade point average (GPA) of 3.3 (B+) or better in all major courses, may apply to the honors program. Honors students are eligible to participate in the honors college at the beginning of their senior year. Students should submit an application for the honors program and a proposal outline by the end of Winter Quarter of the junior year. Each honors student must write an honors essay of 20 to 25 pages under the direction of a faculty member who serves as adviser. Work on the essay normally begins in the Spring Quarter of the junior year and must be completed by the end of the third week of March of the senior year. Consult the undergraduate adviser for additional information on the honors program.

OVERSEAS STUDIES
All majors are strongly encouraged to study abroad. To transfer credits from non-Stanford programs abroad, consult the Office of the Registrar. Depending on course selections, up to 25 units of course work taken abroad may be applied toward the major and 15 units toward the minor in Spanish. Students planning study abroad, or returning from study programs, are encouraged to consult with the majors and minors coordinator or an undergraduate adviser to coordinate the course work from abroad with their degree program.

Both the department and Bechtel International Center maintain information banks on study abroad programs. Stanford sponsors the following options.

STANFORD IN SANTIAGO, CHILE
The Stanford Program in Santiago, Chile, requires one year of college Spanish to begin study in Autumn, one year plus one quarter to begin in Winter, and completion of two years to begin in Spring. Course work in Santiago is done entirely in Spanish, with the opportunity to attend classes at Chilean universities during Spring Quarter. Detailed information, including curricular offerings, is listed in the “Overseas Studies” section of this bulletin, or on the Overseas Studies Program web site at http://osp.stanford.edu. Internships and research opportunities may be arranged for two quarter students.

BRAZIL AND PORTUGAL
The University maintains a relationship with the Universidade Estadual do Rio de Janeiro in Brazil. Students interested in study in Brazil or Portugal should contact Professor Sá or Lyris Wiedemann.

SPAIN
The Department of Spanish and Portuguese recommends study in Spain with the Hamilton College Academic Year in Spain program, administered by the Department of Romance Languages of Hamilton College in cooperation with faculty members of Williams and Swarthmore colleges. Two distinguishing features of this program are: (1) Spanish must be spoken at all times, both in and outside of class; all students are required to sign a pledge to this effect before their arrival in Madrid; (2) the arrangement of independent study projects in lieu of regular courses. The program is based in Madrid, where the cultural, educational, social, and geographical benefits are optimal.

An additional excellent program recommended by the department is the Madrid campus of St. Louis University. This program has many of the features of the Hamilton College program. In addition, it has its own buildings and facilities located on the outskirts of the University of Madrid campus. This is the only U.S. overseas studies program in Spain which has received full accreditation by the Spanish authorities.

Students interested in study in Spain should consult Professors Haro or Predmore.

TEACHING CREDENTIALS
For information concerning the requirements for teaching credentials, see the “School of Education” section of this bulletin and the credentials administrator, School of Education.

COTERMINAL B.A. AND M.A.
The requirements for the coterminal B.A. are the same as those outlined below for the M.A. No course can count for both the B.A. and M.A. degrees. Contact Graduate Admissions at the Registrar’s Office for information.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

STEP COTERMINAL TEACHING PROGRAM
The Department of Spanish and Portuguese, in cooperation with the Stanford Teacher Education Program (STEP) of the School of Education, offers a special course of study for students interested in becoming teachers. By following this course of study in Spanish Language, Literatures, and Cultures and enrolling in the STEP Coterminal Teaching Program, students can, after 5 years, receive a B.A. in Spanish and Portuguese, an M.A. in Education, and a California Teaching Credential.

The Spanish Language, Literatures, and Cultures curriculum consists of approximately 50 quarter units in addition to demonstrated proficiency in the language, defined as listening, speaking, reading, and writing at a level equivalent to advanced on the ACTFL Oral Proficiency Interview. This course of study fulfills all the major requirements of the Department of Spanish and Portuguese and includes coursework in linguistics and language diversity studies, the history of the Spanish-speaking world, and Spanish literature and cultures.

Students enrolled in the STEP Coterminal Teaching Program are also expected to complete a series of core courses during their undergraduate years. These include one course in developmental psychology; one course in cognitive psychology; one course in the social foundations of education; one course on the role of race, class, and ethnicity in American society; a structured internship experience in a community-based organization serving youth and/or their families; and a teaching practicum offered by the School of Education.

For more information about this option, please consult Professor Valdés and/or the coordinator of the STEP Coterminal Teaching Program in CERAS 309; (650) 725-6321 or (650) 725-0652.
GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS IN SPANISH AND PORTUGUESE

This terminal M.A. degree program is for students who do not intend to continue their studies through the Ph.D. degree. Students in this program may not apply concurrently for entrance to the Ph.D. program. Students must complete a minimum of 45 graduate-level units, 36 of which must have a grade point average (GPA) of 3.0 or above.

The requirements of the M.A. are:
1. One linguistics course (LINGUIST 203, 204, 205, 206, 207), one course in language pedagogy, and one course in literary or cultural theory
2. Two 200-or-above courses in Latin American or Latino/Chicano literature and culture
3. Two 200-or-above courses in Peninsular literature or Luso-Brazilian literature
4. Reading knowledge of one foreign language other than Spanish (preferably Portuguese for students concentrating in Spanish)

Independent study courses (SPANLIT 299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by permission of one of the graduate advisers, Yvonne Yarbro-Bejarano or Gordon Brotherston.

In addition, students may take approved courses in related fields such as classics, comparative literature, education, history of art, linguistics, modern thought, and philosophy.

DOCTOR OF PHILOSOPHY

The requirements of the Ph.D. are:
1. 90 units of graduate-level course work with a grade point average (GPA) of 3.0 (B) or above. Units completed toward the M.A. degree can be counted for the Ph.D.
2. One course in Spanish linguistics, one course on methods of teaching Spanish, and one course on introduction to literary theory
3. A reading knowledge of Portuguese and one other foreign language
4. The qualifying paper, the comprehensive, and the University oral examinations, as described below
5. Teaching of three to five courses in the department
6. Completion of a dissertation

Independent study courses (299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by permission of the graduate adviser. For basic residency and candidacy requirements, see the “Graduate Degrees” section of this bulletin. For further information, consult the department’s Graduate Student Handbook.

In preparation for teaching, Ph.D. candidates must take SPANLIT 201 in the first year.

In consultation with the adviser, students select one major field of study from the following:
1. Spanish Literature of the Golden Age
2. Modern Spanish Literature
3. Spanish American Literature to Independence
4. Spanish American Literature of the 19th and 20th Centuries
5. Chicano Literature and Culture

In addition, candidates select two secondary areas of study outside the major field from the following:
1. Spanish Medieval Literature
2. Spanish Literature of the Golden Age
3. Modern Spanish Literature
4. Spanish American Literature of the Colonial Period
5. Spanish American Literature from Independence
6. Chicano Literature
7. Literary Theory
8. Linguistics
9. Spanish American Film
10. Brazilian Literature

At least four courses must be taken in the major field of study. At least two courses must be taken in each secondary area. Students whose major field is in Spanish-American or Latino/Chicano Literature must choose one secondary area in Peninsular literature and vice versa. One secondary area of concentration may be taken outside the department in consultation with the adviser.

In addition to the department’s course offerings, students may take relevant courses with the approval of their adviser in other departments and programs, such as the graduate programs in Comparative Literature, Feminist Studies, History, Humanities, or Modern Thought and Literature. It is also possible to complete a minor in another department with approval of the adviser. Normally, not more than 25 units are taken outside the department.

After the first year of study, the student’s progress is evaluated by the faculty to determine whether continuation to the Ph.D. is recommended and whether there are particular areas where improvement is needed. For this evaluation, students submit a research paper of approximately 20 pages by the third week of Winter Quarter of the second year. The requirements for this paper are outlined in the Graduate Student Handbook.

If approval of the qualifying paper is granted, the student should file a formal application for candidacy no later than the end of the second year, as prescribed by the University. Course requirements are usually completed by the third year of study. A written comprehensive examination on the major field and secondary areas is then taken. The examination is based on a list of readings, selected in consultation with the adviser, which integrates major and secondary topics in both Peninsular and Latin American or Latino/Chicano Studies. At this time, students hand in a long research paper to be evaluated by the faculty. For further details, consult the Graduate Student Handbook.

Following the comprehensive examination, students should find a topic requiring extensive original research and request that a member of the department serve as dissertation adviser. The student must complete the Reading Committee form and request that the chair approve a committee to supervise the dissertation. The committee may advise extra preparation within or outside the department, and time should be allowed for such work. The University oral examination usually takes place one or two quarters after passing the comprehensive examination. The oral examination covers plans for the dissertation based on a prospectus approved by the committee (15 to 20 pages), and may be taken in English, Spanish, or Portuguese.

The dissertation must be submitted to the reading committee in substantially final form at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree. Ph.D. dissertations must be completed and approved within five years from the date of admission to candidacy. Candidates taking more than five years must apply for reinstatement of candidacy.

PH.D. MINOR

For a minor in Spanish or Portuguese, the student must complete 25 units, with a grade point average (GPA) of 3.0 or above, selected from courses numbered 200 or higher.

Students who choose a minor in another department should consult with advisers in that department.

JOINT PH.D. PROGRAMS

The Department of Spanish and Portuguese participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Spanish and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.
COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, and Slavic Languages and Literatures, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

OVERVIEW

1. Stanford Introductory Seminars, freshman and sophomore preference
2. Literature, Culture, Linguistics, and Theory (120-399)
   a) Undergraduate Courses (130-199)
   b) Courses for Advanced Undergraduates and Graduates (200-299)
      Language, Linguistics, and Theory (200-212)
      Peninsular Literature (213-239)
      Latin American Literature (240-279)
      Latino/Chicano Literature (280-289)
      Individual Work (299)
3. Graduate Seminars (300-399)
   a) Undergraduate Courses (130-199)
   b) Courses for Advanced Undergraduates and Graduates (200-299)
      Language, Linguistics, and Theory (200-212)
      Peninsular Literature (213-239)
      Latin American Literature (240-279)
      Latino/Chicano Literature (280-289)
      Individual Work (299)

SPANISH AND PORTUGUESE LANGUAGE COURSES

The following courses in Spanish and Portuguese language instruction represent a typical sequence for three years of Spanish and Portuguese language study. Majors and prospective majors should consult the requirements for a B.A. in Spanish or Portuguese above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at the Yost House, see the "Language Center" section of this bulletin.

SPANLANG 1,2,3. First-Year Spanish
5 units, Aut, Win, Spr (Staff, García-Denson, Guzmán, Schell, Urruela, Won, Zaragoza)

SPANLANG 11C,12C,13C. Second-Year Spanish: Cultural Emphasis
4-5 units, Aut, Win, Spr (Kenna, Schell, Urruela, Won)

4-5 units, 11R: Aut, 12R: Win, 13R: Spr (Perales, Sierra)

SPANLANG 15. Intermediate Oral Communication
3 units, Aut, Win, Spr (Staff)

SPANLANG 100. Advanced Oral Communication
3 units, Aut, Win, Spr (Staff)

SPANLANG 101. The Structure of Spanish
3-5 units, Aut, Win (Sierra)

SPANLANG 102. Composition and Writing Workshop
3-5 units, Aut (Kenna)

PORTLANG 1,2,3. First-Year Portuguese
5 units, 1: Aut, 2: Win, 3: Spr (Delgado)

PORTLANG 11A,12A. Accelerated Second-Year Portuguese
3-5 units, Aut, Win, Spr (Delgado, Wiedemann)

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Spanish and Portuguese department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Spanish or Portuguese are advised to consider satisfying their GER:1b,c requirements by registering for the following IHUM courses.

IHUM 38A,B. Roots and Routes: Narrative Geographies of the Americas—Colonialism, transnationalism, migration and immigration, and gender and language in the Americas through novels and shorter pieces from the Latin American, Chicano/a, and Latino/a traditions. GER:1b,1c (two quarter sequence)
   IHUM 38A. 5 units, Win (Brotherston, Rosa, Yarbro-Bejarano)
   IHUM 38B. 5 units, Spr (Brotherston, Rosa, Yarbro-Bejarano)

STANFORD INTRODUCTORY SEMINARS

SPANLIT 101N. Visual Studies and Chicana/o Art—Stanford Introductory Seminar. Preference to freshmen. Images, context, and spectatorship. Who is seen and not seen in visual contexts? Whose gaze is privileged? Which aspects of the past are circulated as visual representations? Whose fantasies are fed by which visual images? In what circumstances is looking and returning the gaze an act of political resistance? How do people interact with images to make and remake the world in the shape of their own desires and fantasies? GER:3a,4b
   3-5 units, Aut (Yarbro-Bejarano)

SPANLIT 103N. Literature and Social Exclusion: the Poor in Brazilian Narrative—Stanford Introductory Seminar (Same as PORTLIT 103N.) How does literature represent the poor in a country where they are the majority? Themes include political denunciation, middle-class guilt, and literary representation. 19th-century writers include as Machado de Assis and Alúisio Azevedo; contemporary writers include Patricia Melo and Paulo Lins. In English. GER:3a
   3-4 units, Spr (Haro)

SPANLIT 111N. Contemporary Spain: The Challenge of Change—Stanford Introductory Seminar. Preference to freshmen. Years marked by experimentation and change in life in Spain. Society and culture from postwar times and the transition years from the Franco regime to the present democratic state. Student research project. Prerequisite: AP score of 4 or 5 in Spanish language or literature, or equivalent. GER:3a
   3-4 units, Win (Sá)

SPANLIT 116N. New World Creation Narratives—Stanford Introductory Seminar. Indigenous narratives from Middle America, Amazonia, Anasazi, and the Andes recount how the world began while detailing their own environments and realities. Readings in translation include Legends of the Suns, Popol vuh, Watunna, Finding the Center, and The Huarochari Manuscript: What they say provides insight into the cultural foundations of Latin America. GER:3a
   3-4 units, Aut (Brotherston)

   3 units, Win (Moraga)
PORTLIT 193Q. Spaces and Voices of Brazil through Films—Stanford Introductory Seminar. (Same as SPANLIT 193Q.) Preference to sophomores. Brazilian culture through films that portray its five cultural-geographical regions. Focus is on movies and complementary texts on Brazilian culture to understand the forces that shaped the multicultural reality of modern Brazil.
3-5 units, Aut (Wiedemann)

LITERATURE, CULTURE, LINGUISTICS, AND THEORY

UNDERGRADUATE

SPANLIT 42. Dances of Latin America—(Enroll in DANCE 42.)
2 units, Win (Cashion)

SPANLIT 43. Afro-Brazilian and Afro-Peruvian Dance—(Enroll in DANCE 43.)
2 units, Win (Cashion)

SPANLIT 105. Grupo Folklorico Los Decanos—(Enroll in DANCE 105.)
1 unit, Win, Spr (Cashion)

SPANLIT 105C. The Literature of the Americas—(Enroll in COM- PLIT 105, ENGLISH 172E.)
5 units (Greene, Saldivar) not given 2004-05

SPANLIT 128. Contemporary Brazilian Fiction—(Same as PORTLIT 128.) Authors such as Silviano Santiago, Paulo Lins, Milton Hatoum, Ana Miranda, and Elvira Vigna. In Portuguese. GER:3a
3-5 units, Spr (Sá)

SPANLIT 136. Introduction to Modern Peninsular Spanish Literature—Representative works of Spanish literature from the 1830s to the 1930s: Larra, Espronceda, Bécquer, Rosalia de Castro, Galdós, Unamuno, Valle-Inclán, Machado, and García Lorca. Emphasis is on texts related to the problem of Spain within the democratic tradition of Spanish liberalism. In English. GER:3a
3-5 units, Win (Predmore)

SPANLIT 140. Introduction to Methods of Literary and Cultural Analysis—Focus is on central issues of Spanish, Latin American, and Latino texts. Topics include: the problem of identity and its discursive articulation; truth, narrative, and history; enlightenment, modernity, and cultural autonomy; race, colonialism, and representation. Readings include theoretical or philosophical texts, literary fiction, and essays, by authors such as Cervantes, Martí, Cortázar, Rulfo, Derrida, White, and Rama.
3-5 units, Aut (Rosa)

SPANLIT 141. Contemporary Spanish Women Writers—The speed of change and vitality of contemporary Spain is illustrated by studying literary women. Works by prominent women narrators of Franco’s era such as Matute and Martín Gaite. Novels by the new generations of women writers such as Tusquets, Montero, Mayoral, Ortíz, and Etxebarría, who are transforming their experiences, values, and ideologies into a new literature about the relationships among gender, creativity, and social mores. Feminist consciousness, how it has developed, and how it is changing to face challenges. GER:3a,4c
3-5 units, Aut (Haro)

SPANLIT 145. Gender, Race, and Sexualities in Pre- and Early Modern Hispanic Literature—The construction of masculinities, femininities, and non-normative sexualities in medieval and early modern Spanish literature and culture. Topics include: becoming male in medieval Spain; masculine alterity in Reconquest Castile; sexual underworlds in 15th-century Spain; gender, race, and national identity in imperial Spain; acts of queerness in early modern Spanish stage; gender trouble in the New World; and the drama of honor, male bonding, and anxious masculinity in 17th-century Spain. GER:3a
3-5 units, Aut (Cartagena-Calderón)

SPANLIT 188D. Convivencia: Jews, Christians, and Muslims in Medieval Iberia—(Enroll in HISTORY 188D.)
5 units (Gutwirth) not given 2004-05

SPANLIT 192. Spanish Films of the 90s: Society through the Eye of the Camera—A new generation of film directors. Modern film making, story telling, and reflecting on contemporary Spanish society. Film makers include Amenábar, Bollaín, de la Iglesia, Gutiérrez, León de Aranoa, and Zambrano. GER:3a
3-5 units, Aut (Haro)

PORTLIT 193. Spaces and Voices of Brazil—Brazilian culture through movies that portray aspects of its five cultural-geographic regions. Focus is on the movies and complementary texts on Brazilian culture, to understand the forces that shaped its modern multicultural reality.
3-5 units, Aut (Wiedemann)

SPANLIT 193. Only Almodóvar—The films of Pedro Almodóvar, the enfant terrible of the 80s whose eccentric, gender-bending melodramas helped to reinvent post-Franco Spain. Is he really the genius that critics rave about? Is his cinematography unique, outrageous, and transgressive? Themes, characters, places, objects, cinematic perspectives, and aesthetics. Prerequisite: ability to understand spoken Spanish.
3 units, Spr (Haro)

SPANLIT 199. Individual Work—Open only to students in the department, or by consent of instructor. Spanish and Portuguese.
1-12 units, Aut, Win, Spr, Sum (Staff)

ADVANCED UNDERGRADUATES AND GRADUATES

LANGUAGE, LINGUISTICS, AND THEORY

SPANLIT 205. Spanish Dialectology—Focus is on the major varieties of Spanish as they are spoken in Spain and in the Americas. Introduction to dialect geography and to the study of social and regional variation from a sociolinguistic perspective.
3-5 units, Spr (Valdés)

SPANLIT 206. Language Use in the Chicano Community—The significance and consequences of language diversity in the culture and society of the U.S. Experiences of non-English background individuals through focus on Spanish-English bilingual communities.
3-5 units, Aut (Valdés)

SPANLIT 212. The Cinema of Pedro Almodóvar—The complete works of contemporary Spain’s most successful director. Almodóvar in the context of audiovisual production in Spain and Europe. Questions of narrative and ideology; critical readings to which the films have given rise. Film form through analysis of clips viewed in class.
3-5 units, Aut (Smith)

PENINSULAR LITERATURE

SPANLIT 217. Early Modern Women’s Writing in the Spanish Empire—(Graduate students register for 317.) The interrelationship between gender and cultural authority in early modern Spain and the Atlantic world. Topics include: how women writers asserted authority to write when discouraged from doing so; forms in which women writers followed, discarded, or transformed male-authored models; the representation of gender and sexual dissidence; and the development of a proto-feminist consciousness advocating social justice. Focus is on women-authored texts. GER:3a
3-5 units, Aut (Cartagena-Calderón)

SPANLIT 225E. Theater, Society, and Politics in 20th-Century Spain—Ramón del Valle-Inclán and Federico García Lorca. The avant garde nature of their major plays and their engagement with social and political issues of the times including feudalism, the emerging liberal state, women’s protest, class struggle, and civil war. Symbolism, expressionism, and realism.
3-5 units, Spr (Predmore)
SPANLIT 242. The Boom of the Latin American Novel—The main works of the main authors of the Latin American boom of the 60s: Julio Cortázar, Gabriel García Márquez, Mario Vargas Llosa. The history, characteristics, and ending of the new Latin American novel. GER:3a
3-5 units, Spr (Ruffinelli)

SPANLIT 245. Discourses of Race and Identity in Latin America—(Same as PORTLIT 245.) How has Latin America defined itself over time and how have its intellectuals dealt with questions related to race, class, and culture? Focus is on essays from 1800s-1970s by influential intellectuals. GER:3a
3-5 units, Win (Sá)

SPANLIT 248. Isabel Allende: From The House of Spirits to My Invented Country—Woman, Chilean American, writer, exile, journalist, mother, wife, best-selling author, celebrity, and benefactor: the facets of Isabel Allende’s world as expressed in her work. GER:3a
3-5 units, Spr (Ruffinelli)

SPANLIT 278. Senior Seminar: Literature and Democracy in Latin America—The reception and assentilation of political ideologies of democracy as narrativized in Latin American texts. How writers and artists articulated a democratic rhetoric, and the limits and obstacles they encountered. How representation intersects political and literary theory; the incorporation of artistic and literary techniques in efforts to rearrange social power. Republicanism, liberalism, and Marxism; the incorporation of the region into the commercial world system; metaphors of the body politic; the representation of racial, geographical, and cultural components. Readings include Bolívar, Martí, Paz, García Márquez, Manchú, Rama, Pocock, Skinner, and Ankersmit.
3-5 units, Win (Rosa)

SPANLIT 282. Creative Non-Fiction Writing Workshop—(Same as 217; see 217.) The main philosophical currents, ideas, and configurations from the First to the Second Spanish Republics. Did processes of productive reception replace nationally independent philosophical practices in the 19th and 20th centuries? Krausismo, Unamuno, and Ortega y Gasset. The reconstruction of the historical processes of assimilation, reception, and transformation; how modern philosophy in Spain impacted Spanish-speaking countries. Prerequisite: reading knowledge of Spanish. Recommended: reading knowledge of German and French.
3-5 units, Win (Gumbrecht)

SPANLIT 288. Significant Others: Representing Alterity in Early Modern Spanish Theater—The formation of otherness and its manifestations in Spanish Golden Age theater. Focus is on plays representing groups marked as other against which national and imperial identity was constructed. Such groups include non-Christians; colonial and imperial others including Amerindians, Indians, Africans, and Afro-Spaniards; and sexual others including sodomites, transvestites, hermaphrodites, and prostitutes.
3-5 units, Win (Cartagena-Calderón)

SPANLIT 339. Philosophy in Spain, 1850-1935—Seminar. The main philosophical currents, ideas, and configurations from the First to the Second Spanish Republics. Did processes of productive reception replace nationally independent philosophical practices in the 19th and 20th centuries? Krausismo, Unamuno, and Ortega y Gasset. The reconstruction of the historical processes of assimilation, reception, and transformation; how modern philosophy in Spain impacted Spanish-speaking countries. Prerequisite: reading knowledge of Spanish. Recommended: reading knowledge of German and French.
3-5 units, Win (Gumbrecht)

LATIN AMERICAN LITERATURE

SPANLIT 347. Spanish Colonial Writing and Native Sources—The Spanish version of conquest in America as a pillar of Europe’s master narrative yet challenged by indigenous history and philosophy. The consequent tensions through works by Sahagún, Durán, and Gamboa in New Spain, and Ávila and Murúa in Peru and their native sources. In Spanish.
3-5 units, Aut (Brotherston)

SPANLIT 349. Deconstructing Latin American Critical Literary Thinking—Influential Latin American critics including Rama, Cornejo, Sarlo, Ludner, and Cancrini in relation to U.S. and British Latin Americans including Franco and Rowe.
3-5 units, Spr (Ruffinelli)

SPANLIT 352. Slaves, Women, and Unreliable Narrators on the Capitalist Periphery: The Novels of Machado de Assis—(Same as PORTLIT 352.) The works of the mulatto who became Brazil’s celebrated writer. Novels include Yaya Garcia, Posthumous Memoirs of Brás Cubas, Quincas Borba, D. Casmurro, Esau and Jacob, and Counselor Ayre’s Memorial. Critical works including Roberto Schwarz’s A Master on the Periphery of Capitalism.
3-5 units, Spr (Sá)

SPANLIT 366. Commerce and Culture in Latin America and Europe—(Same as GERLIT 266A.) Processes of exchange between literature and art and the commercial world from the 18th-20th centuries. How features of commercial society such as property, exchange, consumption, and credit are legitimated in culture while changing the terms of cultural exchange. Discursive articulations such as the opposition between Rousseau’s republicanism and Hume’s commercialism; peripheral texts which introduced issues such as gender, race, sexuality, and geographical location. Projects of individual or communal affirmation; finance, metaphor, and philosophy; property, race, and the Enlightenment; and liberalism, communitarianism, and bourgeois life. In English.
3-5 units, Spr (Rosa, Strum)

SPANLIT 369C. Introduction to Graduate Studies: Criticism as Profession—(Enroll in COMPLIT 369, GERLIT 369.)
5 units, Aut (Berman)

CHICANO LITERATURE

SPANLIT 381. Working with the Archive: Chicana/o Culture—Archival research in Chicana/o writing, Theories of the archive and the position of the investigator. Presentation of research findings from the writers’ personal papers held in Special Collections. Writers include Arturo Islas, Cherríe Moraga, Bernice Zumora, Harry Gamboa, Jr., Juan Felipe Herrera, Raúl Salinas, Ricardo Sánchez, and Jimmy Santiago Baca. In English.
3-5 units, Aut (Yarbro-Bejarano)
SPANLIT 385. The Rite to Remember: Performance and Chicana/Indigena Thought—(Enroll in DRAMA 355M.)
3-5 units, Aut (Moraga)

INDIVIDUAL WORK
PORTLIT 399. Individual Work—For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)
SPANLIT 399. Individual Work—For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES
Courses approved for the Spanish and Portuguese majors and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

SANTIAGO
SPANLIT 118X. Comparative Cinema and Latin America
3-5 units, Aut (Ruffinelli)
SPANLIT 155X. Contemporary Chilean Women Writers
3-5 units, Win (Haro)
SPANLIT 164S. Social Heterogeneity in Latin America—(Same as SOC 111S.)
5 units, Aut (Valdes)
SPANLIT 183X. Cinema of the Southern Cone
3 units, Win (Haro)
SPANLIT 243X. The Chilean New Narrative
3-5 units, Aut (Ruffinelli)
SPANLIT 290Z. Modernization and Culture in Latin America—(Same as ANTHSCI 104X.)
5 units, Aut (Subercaseaux)

STATISTICS
Chair: David O. Siegmund
Associate Professor: Guenther Walther
Assistant Professor: Jonathan Taylor
Associate Professor (Teaching): Susan Holmes
Courtey Professors: Richard A. Olshen, Neil Risch, Robert Tibshirani
Courtey Associate Professors: Simon Jackman, David Rogosa
Consulting Professor: Charles Chui
Mail Code: 94305-4065
Phone: (650) 723-2620
Web Site: http://www-stat.stanford.edu

Courses given in Statistics have the subject code STATS. For a complete list of subject codes, see Appendix.

The department’s goals are to acquaint students with the role played in science and technology by probabilistic and statistical ideas and methods, to provide instruction in the theory and application of techniques that have been found to be commonly useful, and to train research workers in probability and statistics. There are courses for general students as well as those who plan careers in statistics in business, government, industry, and teaching.

The requirements for a degree in statistics are flexible, depending on the needs and interests of the students. Some students may be interested in the theory of statistics and/or probability, whereas other students may wish to apply statistical and probabilistic methods to a substantive area. The department has long recognized the relation of statistical theory to applications. It has fostered this by encouraging a liaison with other departments in the form of joint and courtesy faculty appointments: Economics (Anderson), Education (Olkin, Rogosa), Electrical Engineering (Cover), Geological and Environmental Sciences (Switzer), Genetics (Risch), Health Research and Policy (Brown, Efron, Hastie, Johnstone, Moses, Olshen, Tibshirani, Wong), Mathematics (Dembo, Diaconis), Political Science (Jackman), and the Stanford Linear Accelerator (Friedman). The research activities of the department reflect an interest in both applied and theoretical statistics, and probability. There are workshops in biology-medicine and in environmental factors in health.

In addition to courses for Statistics majors, the department offers a number of service courses designed for students in other departments. These tend to emphasize the application of statistical techniques rather than their theoretical development.

The Department of Statistics is well equipped for statistical applications and research in computational statistics. Computer facilities include several networked Unix servers and a PC lab for general research and teaching use. The Mathematical Sciences Library serves the department jointly with the departments of Mathematics and Computer Science.

The department has always drawn visitors from other countries and universities. As a consequence, there is usually a wide range of seminars offered by both the visitors and our own faculty.

UNDERGRADUATE PROGRAMS
MAJOR
Students wishing to build a concentration in probability and statistics are encouraged to consider declaring a major in Mathematical and Computational Sciences. This interdepartmental program is administered in the Department of Statistics (Bradley Efron, chair) and provides a core training in computing, mathematics, operations research, and statistics, with opportunities for further elective work and specialization. See the “Mathematical and Computational Science” section of this bulletin.

MINORS
The undergraduate minor in Statistics is designed to complement major degree programs primarily in the social and natural sciences. Students with an undergraduate Statistics minor should find broadened possibilities for employment. The Statistics minor provides valued preparation for professional degree studies in postgraduate academic programs.

The minor consists of a minimum of six courses with a total of at least 20 units. There are two required courses (8 units) and four qualifying or elective courses (12 or more units). An overall 2.75 grade point average (GPA) is required for courses fulfilling the minor.
1. **Qualifying Courses:** at most, these two courses may be counted toward the six course requirement for the minor: MATH52, STAT191.
2. **Required Courses:** STATS116 and 200.
3. **Elective Courses:** at least one of the elective courses should be a STATS 200-level course. The remaining two elective courses may also be 200-level courses. Alternatively, one or two elective courses may be approved courses in other departments. Special topics courses and seminars for undergraduates are offered from time to time by the department and these may be counted toward the course requirement. Examples of elective course sequences are:

- STATS 202, 203, 204, emphasizing data analysis and applied statistics
- STATS 205, 206, 207, emphasizing statistical methodology
- STATS 206, ECON160, 181, emphasizing economic optimization
- STATS 206, PSYCH156, 160, emphasizing psychology modeling and experiments
- STATS 207, EE264, 279, emphasizing signal processing
- STATS 217, BIOSCI283, emphasizing genetic and ecological modeling
- STATS 217, 218, emphasizing probability and its applications
- STATS 240, 250, 351, emphasizing mathematical finance
GRADUATE PROGRAMS

MASTER OF SCIENCE

The department requires that the student take 45 units of work from offerings in the Department of Statistics or from authorized courses in other departments. Ordinarily, four or five quarters are needed to complete all requirements.

Each student should fulfill the following requirements for the M.S. degree:

1. STATS 116, 203, 200, and 217. Courses previously taken may be waived by the adviser, in which case they must be replaced by other graduate courses offered by the department.

2. One of MATH 103, 113, 115, 171; and one of CS 106X (3 units), 137 (3 units), 138A. Substitution of other courses in Mathematics and Computer Science may be made with consent of the adviser.

3. At least four additional courses from graduate offerings in the department (202-399). Consent of the adviser is required in order to take more than 6 units of STATS 260, 390, or 399.

4. Additional units to complete the requirements may be chosen from the list available from the department. Other graduate courses (200 or above) may be authorized by the adviser if they provide skills relevant to statistics or deal primarily with an application of statistics or probability and do not overlap courses in the student’s program. There is sufficient flexibility to accommodate students with interests in applications to business, computing, economics, engineering, health, operations research, and social sciences.

Students with a strong mathematical background who may wish to go on to a Ph.D. in Statistics should consider applying directly to the Ph.D. program.

All statistics courses required for the M.S. degree (116, 200, 217, and three additional Statistics graduate courses) must be taken for letter grades, and an overall 2.75 grade point average (GPA) is required.

DOCTOR OF PHILOSOPHY

The department looks for motivated students who want to prepare for research careers in statistics or probability, either applied or theoretical. Advanced undergraduate or master’s level work in mathematics and statistics provides a good background for the doctoral program. Quantitatively oriented students with degrees in other scientific fields are also considered for admission. The program normally takes four years.

Program Summary—STATS 300A,B,C, 305, 306A,B, and 310A,B,C (first-year core program); pass two of three of the qualifying examination (beginning of second year); breadth requirement (second or third year); University oral examination (end of third year or beginning of fourth year); dissertation (fourth year).

In addition students are required to take 9 units of advanced topics courses offered by the department (including at least two of the following: 314, 317, 318, 315A, or 315B, but not including literature, research, or consulting), and 3 units of statistical consulting.

First-Year Core Courses—STATS 300 systematically surveys the ideas of estimation and of hypothesis testing for parametric and nonparametric models involving small and large samples. 305 is concerned with linear regression and the analysis of variance. 306 surveys a large number of modeling techniques, related to but going beyond the linear models of 305. 310 is measure-theoretic probability theory, beginning with the basic concepts of analysis. Students who do not have enough mathematics background can take 310 after their first year but need to have their first-year program approved by the Ph.D. program adviser.

Qualifying Examinations—These are intended to test the student’s level of knowledge when the first-year program, common to all students, has been completed. There are separate examinations in the three core subjects of statistical theory and methods, applied statistics and probability theory, and all are given before the beginning of the Autumn Quarter of the student’s second year. Students may take two or three of these examinations and are expected to show acceptable performance in two examinations.

Breadth Requirement—Students are advised to choose an area of concentration in a specific scientific field of statistical applications; this can be realized by taking at least 15 units of course work approved by the Ph.D. program adviser.

Current areas with suggested course options include:

Computational Biology and Statistical Genomics—Students are expected to take 9 units of graduate courses in genetics or neurosciences (imaging), such as GENE 203/BIOSCI 203, as well as 9 units of classes in Statistical Genetics or Bioinformatics, GENE 344A and B, STATS 345, STATS 366, STATS 367.

Machine Learning—Courses can be chosen from the following list:
- Statistical Learning: STATS 315A and 315B
- Data Bases: CS 245, 346, 347
- Probabilistic Methods in AI: CS 221, 354
- Statistical Learning Theory and Pattern Classification: CS 229

Applied Probability—Students are expected to take 15 units of graduate courses in some of the following areas:
- Control and Stochastic Calculus: MS&E 322, 351, MATH 237, EE 363
- Finance: STATS 250, 351, FINANCE 622, MATH 236
- Information Theory: EE 376A, 376B
- Monte Carlo: STATS 318, 345, 362, MS&E 323
- Queuing Theory: MS&E 335, GSB 661, 663
- Statistical Mechanics: STATS 365
- Stochastic Processes: STATS 317, MATH 234

Earth Science Statistics—Students are expected to take:
- STATS 317 (Stochastic Processes)
- STATS 318 (Monte Carlo Markov Chains)
- STATS 352 (Spatial Statistics)
- three courses from the GES or Geophysics departments, such as GES 290 (Geological Time Series), GES 296 (Geographic Information Systems), GEOPHYS 210 (Earth Imaging).

Social and Behavioral Sciences—Students are expected to take three advanced courses from the department with an applied orientation such as:
- STATS 261/262 (Discrete Data and Survival Analysis)
- STATS 324 (Multivariate Analysis)
- STATS 343 (Time Series)
- STATS 354 (Bootstrap and Resampling)
- and three advanced quantitative courses from departments such as Psychology, Sociology, Political Science, Anthropology, Economics, and the Schools of Education, Business or Medicine.

University Oral Examination—The University oral examination is taken on the recommendation of the student’s research adviser after the thesis problem has been well defined and some research progress has been made. Usually, this happens early in the student’s fourth year. The oral examination consists of a 40-minute presentation on the thesis topic, followed by two question periods. The first relates directly to the student’s presentation and the second is intended to explore the student’s familiarity with broader statistical topics related to the thesis research.

Financial Support—Students accepted to the Ph.D. program are offered financial support. All tuition expenses are paid and there is a fixed monthly stipend determined to be sufficient to pay living expenses. Financial support can be continued for five years, department resources permitting, for students in good standing. The resources for student financial support derive from funds made available for student teaching and research assistantships. Students receive both a teaching and research assignment each quarter which, together, do not exceed 20 hours. Students are strongly encouraged to apply for outside scholarships, fellowships, and other forms of financial support.

PH.D. MINOR

The Department of Statistics devises individual Ph.D. minor programs, but the department urges all graduate students in other fields who wish to have a subspecialty in statistics to study for an M.S. degree instead. The unit requirement for an M.S. degree is 45 units, whereas the number of units required for a minor averages around 30. This difference
of 15 units can be made up by the student by including in the M.S. program courses from his or her own field which are related to statistics or applications of statistics.

**COURSES**

**INTRODUCTORY**

Introductory courses for any student with an interest in the problems of descriptive statistics and statistical inferences are STATS 30, 50, 60, and 141. These courses have no mathematical prerequisites. STATS 30, 43N, 49N, and 141 are certified to meet the General Education Requirement (GER) in mathematics. STATS 43N and 49N are Stanford Introductory Seminars offering introductions to topics in a small group format with a preference to freshmen. STATS 60 and 141 explain the techniques and methods of statistical inference. STATS 60 emphasizes applications in the social sciences and STATS 141 applications in the biological sciences. STATS 60 and 141 can be followed by STATS 191 which explains more advanced methods and their applications.

STATS 110, 116, 200, 217-218 are introductory but have a calculus prerequisite. STATS 110 covers the most important techniques used in the analysis of experimental data in engineering and science. STATS 110 can be followed by STATS 191. STATS 116 provides a general introduction to the theory of probability. It may be followed by STATS 200 which deals with statistical theory, or by 217 and 218 which deal with stochastic processes. The sequence 116, 200 is a basic two quarter sequence in mathematical statistics; the sequence 116, 217, 218 is a basic one-year course in probability theory.

**STATS 43N. Statistics in the News and the Display of Quantitative Information—Stanford Introductory Seminar. Preference to freshmen. Statistical techniques in the context of newspaper accounts, fallacies, and assumptions underlying conclusions. Emphasis is on principles for displaying data and envisioning information, and how these principles apply to new media such as the Internet. Student presentations. GER:2c

3 units, Win (Walther)

**STATS 45N. Our Fractal World?—Stanford Introductory Seminar. Preference to freshmen. Over the last 30 years, mathematicians, physicists, and other scientists have claimed evidence of patterns such as fractals and multifractals throughout nature, and even in non-natural phenomena such as finance. Such patterns involving infinitely repeated geometric structures are beautiful to look at and fun to learn about, but the claims of the proponents of these ideas have invited backlash. The evidence for fractal-like behavior in different fields and why these ideas can be so attractive to proponents and yet invite reactions. GER:2c

3 units, Spr (Donoho)

**STATS 50. Mathematics of Sports—(Same as MCS 100.) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and the determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116. GER:2c

3 units (Cover) not given 2004-05

**STATS 60. Introduction to Statistical Methods: Pre-calculus—Graduate students register for 160; same as PSYCH 10.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:2c

5 units, Aut (Walther), Win (Thomas), Spr, Sum (Staff)

**STATS 110. Statistical Methods in Engineering and the Physical Sciences—Introduction to statistics for engineers and physical scientists. Topics: descriptive statistics, probability, interval estimation, tests of hypotheses, nonparametric methods, linear regression, analysis of variance, elementary experimental design. Prerequisite: one year of calculus. GER:2c

4-5 units, Aut, Sum (Staff)

**STATS 116. Theory of Probability—Probability spaces as models for phenomena with statistical regularity. Discrete spaces (binomial, hypergeometric, Poisson). Continuous spaces (normal, exponential) and densities. Random variables, expectation, independence, conditional probability. Introduction to the laws of large numbers and central limit theorem. Prerequisite: MATH 52 and some familiarity with infinite series, or equivalent. GER:2c

3-5 units Aut (Taylor), Spr, Sum (Staff)

**STATS 121. Probability, Induction, Statistics—Foundations of randomness and uncertainty with emphasis on philosophical underpinnings. History of probability from Greek and Talmudic sources to Pascal, Fermat, and Bernoulli. The calculus of probability (permutations, the bell-shaped curve). Interpretations of probability (axioms, subjective probability). Psychology of probability (heuristics and biases). The problem of induction. Exchangeability and de Finetti’s answer to Hume. Statistical inference. Alternatives and caveats. Prerequisites: calculus at the level of MATH 42. Recommended: probability and statistics. GER:2c

4-5 units, Spr (Diaconis)

**STATS 141. Biostatistics—(Same as BIOSCI 141.) Introduction to the statistical analysis of biological data. Topics: discrete and continuous distributions, testing hypotheses and confidence procedures, fixed and random effects analysis of variance, regression, and correlation. Wilcoxon and other nonparametric procedures, inference on contingency tables and other data arising from counts. Tests of goodness of fit. Emphasis is on finding numerical solutions to biostatistical problems, and practical interpretations and their implications. GER:2c

3 units, Spr (Romano), Win (Staff)

**STATS 160. Introduction to Statistical Methods: Precalculus—(Same as 60, PSYCH 10; see 60.)

5 units, Aut (Walther), Win (Thomas), Spr, Sum (Staff)

2-3 units, Aut (Holmes)

**STATS 191. Introduction to Applied Statistics—Statistical tools for modern data analysis. Topics include regression and prediction, elements of the analysis of variance, bootstrap, and cross-validation. Emphasis is on conceptual rather than theoretical understanding. Applications to social/biological sciences. Student assignments/projects require use of the software package R. Recommended: 60, 110, or 141. GER:2c

3-4 units, Spr (Taylor)

**STATS 199. Independent Study—For undergraduates.

1-15 units, Aut, Win, Spr, Sum (Staff)

**STATS 200. Introduction to Statistical Inference—Modern statistical concepts and procedures derived from a mathematical framework. Statistical inference, decision theory; point and interval estimation, tests of hypotheses; Neyman-Pearson theory. Bayesian analysis; maximum likelihood, large sample theory. Prerequisite: 116.

3 units, Win (Romano), Sum (Staff)
CONTINUATION

Courses in this category have been designed for particular use in applications. Generally, they have introductory statistics or probability as prerequisites.

STATS 202. Data Analysis—Data mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in very large data bases or through web mining. Topics: decision trees, neural networks, association rules, clustering, case based methods, and data visualization.
3 units, Win (Taylor)

STATS 203. Introduction to Regression Models and Analysis of Variance—The most widely used statistical techniques; interpretation of observational data and empirical model building. Topics: simple and multiple linear regression, nonlinear regression, analysis of residuals and model selection, design of one-way and two-way factorial experiments, fixed and random effects models. Prerequisite or corequisite: 200.
3 units, Win (Taylor)

STATS 205. Introduction to Nonparametric Statistics—Nonparametric analogs of the one- and two-sample t tests and analysis of variance; the sign test, median test, Wilcoxon’s tests, and the Kruskal-Wallis and Friedman tests, tests of independence. Nonparametric regression and nonparametric density estimation, modern nonparametric techniques, nonparametric confidence interval estimates.
3 units (Staff) not given 200-04

STATS 206. Applied Multivariate Analysis—Introduction to the statistical analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Prerequisite: 200; concurrent registration in 200 is permitted.
3 units (Staff) not given 200-04

STATS 207. Introduction to Time Series Analysis—Time series models used in economics and engineering. Trend fitting, autoregressive and moving average models and spectral analysis, Kalman filtering, and state-space models. Seasonality, transformations, and introduction to financial time series. Prerequisite: basic course in Statistics at the level of 200.
3 units (Staff) not given 200-04

STATS 208. Introduction to the Bootstrap—The bootstrap is a computer-based method for assigning measures of accuracy to statistical estimates. By substituting computation in place of mathematical formulas, it permits the statistical analysis of complicated estimators. Topics: nonparametric assessment of standard errors, biases, and confidence intervals; related resampling methods including the jackknife, cross-validation, and permutation tests. Theory and applications. Prerequisite: course in statistics or probability.
3 units (Staff) not given 200-04

STATS 210. Statistical Methods in Biology and Medicine—Topics include linear regression, nonparametric statistics, the 2x2 table, the odds ratio, logistic regression, Kaplan-Meier methods, Cox regression, and manipulating and analyzing data in SAS. Emphasis is on applications.
3 units, Sum (Cobb)

STATS 211. Statistical Methods in Meta-Analysis—(Same as EDUC 493B.) Meta-analysis is a quantitative method for combining results of independent studies, and enables researchers to synthesize the results of related studies. Examples from the medical, behavioral, and social sciences. Topics: literature search, publication and selection bias, statistical methods (contingency tables, cumulative methods, sensitivity analyses, non-parametric methods). Project. Prerequisite: basic sequence in Statistics.
1-3 units, Win (Olkin)

STATS 212. Applied Statistics with SAS—Data analysis and implementation of statistical tools in SAS. Topics: reading in and describing data, categorical data, dates and longitudinal data, correlation and regression, nonparametric comparisons, ANOVA, multiple regression, multivariate data analysis, using arrays and macros in SAS. No previous knowledge of SAS is required. Knowledge of statistical techniques at the level of stats 191 or 203 is assumed.
3 units, Sum (Staff)

STATS 214. Randomness in the Physical World—(Enroll in APP-PHYS 214.)
3 units, Win (Diaconis, S. Holmes, Kapitulnik, Shenkar)

STATS 215. Statistical Models in Biology—Poisson and renewal processes, Markov chains in discrete and continuous time, branching processes, diffusion. Applications to models of nucleotide evolution, recombination, the Wright-Fisher process, coalescence, genetic mapping, sequence analysis. Theoretical material approximately the same as in STATS 217, but emphasis is on examples drawn from applications in biology, especially genetics. Prerequisite: 116 or equivalent.
3 units (Staff) not given 2004-05

3 units, Win (Romano), Sum (Staff)

3 units, Spr (Siegmund), Sum (Staff)

STATS 219. Stochastic Processes—(Enroll in MATH 136.)
3 units, Aut (Deinbo)

3 units, Spr (Holmes)

STATS 230. Experimental Design—(Same as STATS 340.) For graduate students in science, engineering, and statistics. Emphasis is on the how and why of doing experiments, and analyzing and presenting the results. Topics: control groups, anova, blocking and balance, factorial experiments, fractional factorials, screening designs, response surfaces, binary outcomes, Taguchi methods, computer experiments. Prerequisite: 116. Recommended: experience with experimentation or data analysis.
3 units (Staff) not given 2004-05

STATS 235. Decision Making Under Uncertainty in Financial Services—Introduction to retail banking, credit scoring, and risk analysis. Experimental design in market research. Modern statistical methods to analyze data incorporating domain knowledge. Adaptive control concepts for decisions under uncertainty.
3 units, Sum (Staff)

3 units, Sum (Staff)

STATS 239A,B. Workshop in Quantitative Finance—Topics of current interest.
1 unit, A: Win, B: Spr (Durrelman)

STATS 240. Statistical Methods in Finance—Regression analysis and applications to the Capital Asset Pricing Model and multifactor pricing models. Principal components and multivariate analysis. Smoothing
techniques and estimation of yield curves. Statistical methods for financial
time series; value at risk. Term structure models and fixed income
research. Estimation and modeling of volatilities. Hands-on experience
with financial data.

3-4 units, Spr (Lai)

STATS 250. Mathematical Finance—(Same as MATH 238.) Stochastic
models of financial markets. Forward and futures contracts. European
options and equivalent martingale measures. Hedging strategies and
management of risk. Term structure models and interest rate derivatives.
Optimal stopping and American options.

3 units, Win (Papanicolaou)

STATS 252. Data Mining and Electronic Business—The Internet and
related technologies have caused the cost of communication and trans-
actions to plummet, and consequently the amount of potentially relevant
data to explode. The underlying principles, statistical issues, and algorithmic
approaches to data mining and e-business, with real world examples.

3 units, Sum (Staff)

STATS 253. Spatial Statistics—(Same as STATS 352.) Statistical
descriptions of spatial variability, spatial random functions, grid models,
spatial partitions, spatial sampling, linear and nonlinear interpolation and
smoothing with error estimation, Bayes methods and pattern simulation
from posterior distributions, multivariate spatial statistics, spatial classification,
nonstationary spatial statistics, space-time statistics and estimation of
time trends from monitoring data, spatial point patterns, models of
attraction and repulsion. Applications to earth and environmental sciences,
meteorology, astronomy, remote-sensing, ecology, materials. GER:2c

3 units (Switzer) not given 2004-05

STATS 260A,B,C. Workshop in Biostatistics—(Same as HRP
260A,B,C.) Applications of statistical techniques to current problems in
medical science. Enrollment for more than 2 units of credit involves extra
reading or consulting and requires consent of instructor.

STATS 260A. 1-3 units, Aut (Lazzersoni, Olshen, Bloch, Efron, Hastie,
Lavori, Tibshirani, Wong)

STATS 260B. 3 units, Win (Lazzersoni, Olshen, Bloch, Efron, Hastie,
Lavori, Tibshirani, Wong)

STATS 260C. 1-5 units, Spr (Lazzersoni, Olshen, Bloch, Efron, Hastie,
Lavori, Tibshirani, Wong)

STATS 261. Intermediate Biostatistics: Analysis of Discrete Data—
(Same as BIOMEDIN 233, HRP 261.) The 2x2 table. Chi-square test.
Fisher’s exact test. Odds ratios. Sampling plans; case control and cohort
studies. Series of 2x2 tables. Mantel Hanzel. Other tests. k x m tables.
Matched data logistic models. Conditional logistic analysis, application
to case-control data. Log-linear models. Generalized estimating equations
for longitudinal data. Cell phones and car crashes: the crossover
design. Special topics: generalized additive models, classification trees,
bootstrap inference.

3 units, Win (Hastie)

STATS 262. Intermediate Biostatistics: Regression, Prediction, Sur-
vival Analysis—(Same as HRP 262.) Linear and inherently nonlinear
models. Prediction versus testing. Sample reuse methods. Analysis and
components of variance. Introduction to multivariate analysis: the normal
distribution. Principal components and k-means clustering. Survival analysis:
the actuarial and Kaplan-Meier methods. The log-rank test.
Weibull models. The Cox model, including estimation of baseline hazard.

3 units, Spr (Cobb)

STATS 270. A Course in Bayesian Statistics—(Same as STATS 370.)
Bayesian statistics including theory, applications, and computational
tools. Topics: history of Bayesian methods, foundational problems (what
is probability?), subjective probability and coherence, exchangeability
and deFinetti’s theorem. Conjugate priors. Laplace approximations,
Gibbs sampling, hierarchical and empirical Bayes, nonparametric meth-
ods, Dirichlet and Polya tree priors. Bayes robustness, asymptotic
properties of Bayes procedures.

3 units (Staff) not given 2004-05

STATS 298. Industrial Research for Statisticians—Masters-level
research as in 299, but must be conducted for an off-campus employer.
Final report required. Prerequisite: enrollment in Statistics M.S. or Ph.D.
program (prior to candidacy).

1-9 units, Aut, Win, Spr, Sum (Staff)

STATS 299. Independent Study—For Statistics M.S. students only. Reading or research program under the supervision of a faculty member
in the Statistics department.

1-3 units, Aut, Win, Spr, Sum (Staff)

PRIMARILY FOR DOCTORAL STUDENTS

Sequences 300A,B,C, 305, 306A,B, and 310A,B,C comprise the
fundamental sequence which serves as a general introduction to and
prerequisite for further work. Subsequent courses delve more deeply into
special topics.

STATS 300. Advanced Topics in Statistics
3 units, Sum (Staff)

STATS 300A,B,C. Theory of Statistics—Elementary decision theory;
loss and risk functions, Bayes estimation; UMVU estimator, minimax
estimators, shrinkage estimators. Hypothesis testing and confidence
intervals: Neyman-Pearson theory; UMP tests and uniformly most
accurate confidence intervals; use of unbiasedness and invariance to
eliminate nuisance parameters. Large sample theory: basic convergence
concepts; robustness; efficiency; contiguity, locally asymptotically nor-
mal experiments; convolution theorem; asymptotically UMP and max-
imin tests. Asymptotic theory of likelihood ratio and score tests. Rank
permutation and randomization tests; jackknife, bootstrap, subsampling
and other resampling methods. Further topics: sequential analysis, optimal
experimental design, empirical processes with applications to statistics,
Edgeworth expansions, density estimation, time series.

2-4 units, A: Aut (Romano), B: Win (Walther), C: Spr (Romano)

STATS 305. Introduction to Statistical Modeling—The linear model:
simple linear regression, polynomial regression, multiple regression,
aanova models; and with some extensions, orthogonal series regression,
wavelets, radial basis functions, and MARS. Topics: normal theory
inference (tests, confidence intervals, power), related distributions (t,
chi-square, F), numerical methods (QR, SVD), model selection/regular-
ization (Cp, AIC, BIC), diagnostics of model inadequacy, and remedies
including bootstrap inference, and cross-validation. Emphasis is on
problem sets involving substantial computations with data sets, includ-
ing developing extensions of existing methods. Prerequisite: consent of
instructor, 116, 200, one applied statistics course, CS 106A, MATH 114.

2-4 units, Aut (Hastie)

statistical methods, including computational methods. Topics: nonlinear
least squares (including robust regression), generalized linear models,
time series (autocorrelation, autoregression, periodogram, spectrum),
survey sampling (finite populations, stratification, clustering, ratio esti-
mation), nonparametric regression (kernels, splines, projection pursuit,
CART, MARS), survival analysis (Kaplan-Meier, Mantel-Haenszel,
Cox model), design (factorial experiments, response surfaces), random
number generation, numerical linear algebra, numerical optimization,
sample reuse (bootstrap, jackknife, cross-validation, other Monte Carlo),
matrix based multivariate statistics (canonical correlation, T-squared,
factor analysis, principal components), and other topics briefly. Prerequi-
site: 305 or equivalent.

2-4 units, Win (Efron), Spr (Donoho)

STATS 310A. Theory of Probability—Mathematical tools: asymptot-
ics, metric spaces; measure and integration; Lp spaces; some Hilbert
spaces theory. Probability: independence, Borel-Cantelli lemmas, almost
sure and Lp convergence, weak and strong laws of large numbers.
Weak convergence and characteristic functions; central limit theorems;
2-4 units, Win (Siegmund)

2-4 units, Spr (Lai)

STATS 314. Advanced Statistical Methods—This year’s topic is multivariate analysis.
2-3 units, Aut (Diaconis)

STATS 315A.B. Modern Applied Statistics: Learning—Two-part sequence on new techniques for predictive and descriptive learning using ideas that bridge gaps among statistics, computer science, and artificial intelligence. Emphasis is on statistical aspects of their application and integration with more standard statistical methodology. Predictive learning refers to estimating models from data with the goal of predicting future outcomes, in particular, regression and classification models. Descriptive learning is used to discover general patterns and relationships in data without a specific predictive goal. From a statistical perspective, it can be viewed as computer automated exploratory analysis of usually large complex data sets.
2-3 units, A: Win (Tibshirani), B: Spr (Friedman)

STATS 316. Introduction to Stochastic Differential Equations—(Enroll in MATH 236.)
3 units, Win (Papanicolaou)

2-3 units (Staff) not given 2004-05

2-3 units (Staff) not given 2004-05

STATS 319. Literature of Statistics—Literature study of topics in statistics and probability culminating in oral and written reports.
1-3 units, Win (Lai), Spr (Walther)

STATS 323. Computational Methods for Geometric Design and Imaging—Multiresolution approximation analysis as a mathematical tool for the construction of wavelets and sub-banding coding schemes; modifications and extensions of this have contributed to the advancement in curve/surface design and image manipulation. Computational methods for geometric design and image processing. Curve and surface subdivision schemes, and computational schemes based on the anisotropic diffusion model. The diffusion framework applied to the analysis and visualization of higher dimensional data sets by introducing diffusion kernels and metrics.
2-3 units, Win (Chai)

2-3 units, Aut (Diaconis)

2-3 units, Spr (Wong)

STATS 352. Spatial Statistics—(Same as STATS 253; see 253.)
3 units (Switzer) not given 2004-05

STATS 362. Monte Carlo Sampling—Fundamentals of Monte Carlo simulation methods. Topics include uniform and nonuniform random number generation, Monte Carlo integration, variance reduction by stratification, antithetic and control variables, importance sampling, Metropolis and Gibbs sampling, sequential importance sampling. Application of these methods to Bayesian computation.
2-3 units, Win (Wong)

STATS 366. Computational Biology—(Same as STATS 166, BIO-MEDIN 366; see 166.)
2-3 units, Aut (Holmes)

STATS 367. Statistical Models in Genetics—Stochastic models and related statistical problems in linkage analysis of qualitative and quantitative traits in humans and experimental populations; sequence alignment and analysis; and population genetics/evolution, both classical (Wright-Fisher-Kimura) and modern (Kingman coalescent). Computational algorithms as applications of dynamic programming, Markov chain Monte Carlo, and hidden Markov models. Prerequisites: knowledge of probability through elementary stochastic processes and statistics.
2-3 units (Staff) not given 2004-05

STATS 370. A Course in Bayesian Statistics—(Same as STATS 270; see 270.)
3 units (Staff) not given 2004-05

STATS 374. Large Deviations—(Same as MATH 234.) Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer’s and Sanov’s theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: 230A or STATS 310.
3 units (Staff) not given 2004-05

STATS 376A.B. Information Theory—(Enroll in EE 376A,B.)
3 units, A: Win, B: Spr (Cover) alternate years, not given 2005-06

STATS 390. Consulting Workshop—Provides the skills required of practicing statistical consultants, including exposure to statistical applications. Students participate as consultants in the department’s drop-in consulting service, analyze client data, and prepare formal written reports. Seminar provides supervised experience in short-term consulting. Prerequisites: course work in applied statistics or data analysis, and consent of instructor.
1-3 units, Aut (Taylor), Win (Olshen), Spr (Rogosa)

STATS 398. Industrial Research for Statisticians—Doctoral research as in 298, but must be conducted for an off-campus employer. Final report required. Prerequisite: Statistics Ph.D. candidate.
1-9 units, Aut, Win, Spr, Sum (Staff)

STATS 399. Research—Research work as distinguished from independent study of nonresearch character listed in 199.
1-10 units (Staff)
STATS 459. Frontiers in Interdisciplinary Biosciences—(Crosslisted in departments in the schools of H&S, Engineering, and Medicine; student register through their affiliated departments; otherwise register for CHEMENG 459) See CHEMENG 459 or http://biox.stanford.edu/courses/459_announce.html.
1 units, Aut, Win, Spr (Robertson)

OVERSEAS STUDIES

Courses approved for the Statistics major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

PARIS

STATS 30. Statistical Thinking
3 units, Aut (Switzer)

STATS 99. Paris by Numbers
3 units, Aut (Switzer)

PROGRAM IN STRUCTURED LIBERAL EDUCATION

Director and Professor: Mark Mancall (History)
Coordinator: Suzanne Greenberg

The Program in Structured Liberal Education (SLE) is designed specifically for first-year students interested in an interdisciplinary approach to the liberal arts. The program emphasizes intellectual rigor and individualized contact between faculty and students. SLE has three basic purposes: to present a coherent program of instruction; to develop a student’s ability to ask effective questions of texts, teachers, the culture, and themselves; and to develop intellectual skills in logical reasoning, critical reading, expository writing, and group discussions. SLE stresses inquiry, criticism, and a tolerance for ambiguity. Neither the instructors nor the curriculum provides ready-to-serve answers to the questions being dealt with; rather, SLE encourages a sense of intellectual challenge, student initiative, and originality.

Freshmen interested in enrolling in SLE should indicate this preference for their Area One assignment. SLE is designed as a three quarter sequence and students should be willing to make a commitment for the entire year.

Correspondence regarding the program should be addressed to Program in Structured Liberal Education, Florence Moore Hall, Stanford University, Stanford, CA 94305.

COURSES

SLE 91, 92, 93. Structured Liberal Education—SLE demands approximately 60 percent of the average academic workload during freshman year. Autumn Quarter focus is on the mythological and cultural foundations of ancient Greece and Israel. Winter Quarter focus is on the religious, ideological, and aesthetic transformations that occurred in Europe, Asia, and the New World as a result of the Middle Ages, Renaissance, Scientific Revolution, and Enlightenment. Spring Quarter focus is on the social, political, and artistic forces that shape the modern world. Completion of the SLE program satisfies the GER: 1 Requirement, the University Writing and Rhetoric Requirement, and one humanities GER.

91: 10 units, Aut
92: 10 units, Win
93: 10 units, Spr (Staff)

PROGRAM IN SYMBOLIC SYSTEMS

Director: Thomas A. Wasow
Director of Graduate Study: Ivan A. Sag
Program Coordinator: Todd Davies
Program Committee: Lera Boroditsky, Todd Davies, Daphne Koller, Krista Lawlor, Byron Reeves, Ivan A. Sag, Paul Skokowski, Thomas A. Wasow
Undergraduate Advising Fellows: Tanya Breshears, Emmy Davis, Heesoo Kim, Brendan O’Connor, Itamar Rosenm, Mahesh Srinivasan
Program Faculty:
Applied Physics: Bernardo Huberman (Consulting Professor)
Classics: Reviel Netz (Assistant Professor)
Communication: Jeremy Bailen (Assistant Professor), Clifford Nass (Professor), Byron Reeves (Professor), Frederick Turner (Assistant Professor)
Computer Science: David Dill (Professor), Brian Jeffrey Fogg (Consulting Assistant Professor), Michael Genesereth (Associate Professor), Margaret Johnson (Senior Lecturer), Scott Klemmer (Assistant Professor), Jean-Claude Latom (Professor), Marc Levo (Associate Professor), Christopher Manning (Assistant Professor), John McCarthy (Professor Emeritus), Andrew Ng (Assistant Professor), Nils Nilsson (Professor Emeritus), Vaughn Pratt (Professor Emeritus), Eric Roberts (Professor, Teaching), Terry Winograd (Professor)
Economics: Antonio Rangel (Assistant Professor)
Education: Raymond P. McDermott (Professor), Roy Pea (Professor), Daniel Schwartz (Associate Professor)
Electrical Engineering: John R. Koza (Consulting Professor), Krishna Shenoy (Assistant Professor)
Linguistics: Arto Antilla (Assistant Professor), David Beaver (Assistant Professor), Joan Bresnahan (Professor), Eve Clark (Professor), Vivienne Fong (Lecturer), Daniel Jurafsky (Associate Professor), Ronald Kaplan (Consulting Professor), Laura Karttunen (Consulting Professor), Martin Kay (Professor), Beth Levin (Professor), Christopher Manning (Assistant Professor), Stanley Peters (Professor), Ivan A. Sag (Professor), Hinrich Schutze (Consulting Assistant Professor), Peter Sells (Professor), Thomas A. Wasow (Professor), Annie Zaenen (Consulting Professor)
Management Science and Engineering: Pamela Hinds (Assistant Professor)
Mathematics: Persi Diaconis (Professor), Solomon Feferman (Professor Emeritus)
Medicine: Russ Altman (Associate Professor), John R. Koza (Consulting Professor)
Music: Jonathan Berger (Associate Professor), Christopher Chafe (Associate Professor), Eleanor Selfridge-Field (Consulting Professor), William L. Verplank (Lecturer)
Neurobiology: Ben Barres (Associate Professor), Jennifer Raymond (Assistant Professor)
Philosophy: Michael Bratman (Professor), Mark Crimmins (Associate Professor), John Etchemendy (Professor), Solomon Feferman (Professor Emeritus), Dagfinn Follesdal (Professor), David Israel (Consulting Associate Professor), Krista Lawlor (Assistant Professor), Grigor Mints (Professor), Raymond Peraullt (Consulting Associate Professor), John Perry (Professor), Kenneth Taylor (Associate Professor), Johan van Benthem (Professor), Thomas A. Wasow (Professor)
Psychology: Lera Boroditsky (Assistant Professor), Herbert H. Clark (Professor), Anne Fernald (Associate Professor), John Gabrieli (Professor), Susan Johnson (Assistant Professor), Brian Knutson (Assistant Professor), Ellen Markman (Professor), Michael Ramscar (Assistant Professor), Daniel Richardson (Lecturer), Barbara Tversky (Professor), Anthony Wagner (Assistant Professor), Brian Wandell (Professor)
Statistics: Persi Diaconis (Professor), Susan P. Holmes (Associate Professor)
Symbolic Systems: William Byrne (Consulting Assistant Professor), Michael Cohen (Consulting Professor), Richard Crouch (Consulting Associate Professor), Todd Davies (Lecturer), Tracy King (Consulting Associate Professor), Pat Langley (Consulting Professor), Jeff Shrager (Consulting Associate Professor), Paul Skokowski (Consulting Professor)
Other Affiliation: David Barker-Plummer (Engineering Research Associate), Keith Devlin (Senior Research Engineer, CSLI Executive Director), Daniel Flickinger (CSLI Senior Research Engineer), John Kunz (Senior Research Engineer), Stephan Oepen (CSLI Senior Research Engineer)

Program Offices: Margaret Jacks Hall, Building 460, Room 40E
Mail Code: 94305-2181
Phone: (650) 723-4284
Email: ssp-af@csli.stanford.edu
Web Site: http://symsys.stanford.edu

Courses given in the Program in Symbolic Systems have the subject code SYMBSYS. For a complete list of subject codes, see Appendix.

Both human beings and computers can manipulate symbols. This observation lies at the heart of Symbolic Systems, an interdisciplinary program focusing on the relationship between natural and artificial systems that represent, process and act on information. Computer programs, natural languages, the human mind, and the Internet are all examples of symbolic systems. As such, they all embody concepts whose study forms the core of the Symbolic Systems curriculum: concepts such as computation, representation, communication, and intelligence. A body of knowledge and theory has developed around these notions, from disciplines like philosophy, computer science, linguistics, psychology, statistics, neurobiology, and communication. Since the invention of computers, researchers have been working across these and other disciplines to study questions such as: In what ways are computers and computer languages like humans and their languages? How can the interaction between people and computers be made easier and more beneficial? Can we build computers and robots that think and feel?

The Symbolic Systems Program (SSP) offers an opportunity to explore these issues. The core requirements include courses in symbolic logic, the philosophy of mind, formal linguistics, cognitive psychology, programming, the mathematics of computation, statistical theory, artificial intelligence, and interdisciplinary approaches to cognitive science. The core courses are designed to prepare students with the vocabulary, theoretical background, and technical skills needed for more concentrated study and research at the advanced undergraduate and graduate levels. Most of the courses in SSP are drawn from affiliated departments. Courses designed specifically for the program are aimed at integrating and supplementing topics covered by the department-based offerings. The curriculum includes humanistic approaches to questions about language and intelligence, as well as training in science and engineering.

SSP offers both B.S. and M.S. degree programs. Both programs require students to master a common core of required courses, and to choose an area of specialization.

UNDERGRADUATE PROGRAMS
BACHELOR OF SCIENCE

The program leading to a B.S. in Symbolic Systems provides students with a core of concepts and techniques, drawing on faculty and courses from various departments. The curriculum prepares students for advanced training in the interdisciplinary study of language and information, or for postgraduate study in any of the main contributing disciplines. It is also excellent preparation for employment immediately after graduation.

Symbolic Systems majors must complete a core of required courses plus a concentration consisting of six additional courses. All major courses are to be taken for letter grades unless an approved course is offered satisfactory/no credit only. All core courses must be passed with a grade of ‘C-’ or better. Students who receive a grade lower than this in a core course must alert the program of this fact, so that a decision can be made about whether the student should continue in the major.

CORE REQUIREMENTS

In order to graduate with a B.S. in Symbolic Systems, a student must complete the following requirements. (Please note that some of these courses have other courses as prerequisites. Students are responsible for completing each course’s prerequisites before they take it.)

1. Cognitive Science: either SYMBSYS 100, Introduction to Cognitive Science, or one of the following:
   - LINGUIST 237/CS 224N. Natural Language Processing
   - PHIL 189. Philosophical Applications of Cognitive Science
   - PSYCH 131. Language and Thought
   - PSYCH 137. Birds to Words: Cognition, Communication, and Language

2. Computer Programming:
   - a) CS 106A. Programming Methodology, and 106B. Programming Abstractions; or 106X. Programming Methodology and Abstractions (Accelerated); and
   - b) CS 107. Programming Paradigms

3. Discrete Structures: CS 103B. Discrete Structures; or 103X. Discrete Structures (Accelerated)

4. Logic: PHIL 150. Basic Concepts in Mathematical Logic, and 151. First-Order Logic

5. Statistics/Probability: one of the following:
   - EE 178. Introduction to Probability and Statistics
   - MATH 151. Introduction to Probability Theory
   - MSE 120. Probabilistic Analysis
   - STAT 110. Statistical Methods in Engineering and the Physical Sciences
   - STAT 116. Theory of Probability
   - STAT 121. Probability, Induction, Statistics

7. Cognitive Psychology: PSYCH 40. Introduction to Cognitive Psychology

8. Formal Linguistics:
   - LINGUIST 120. Introduction to Syntax; and one of the following:
   - LINGUIST 130A. Introduction to Linguistic Meaning
   - LINGUIST 130B. Introduction to Lexical Semantics
   - LINGUIST 230A. Introduction to Semantics and Pragmatics

9. Artificial Intelligence: CS 121. Introduction to Artificial Intelligence; or 221. Artificial Intelligence: Principles and Techniques

10. Turing Computability:* one of the following:†
    - CS 103B. Discrete Structures
    - CS 154. Introduction to Automata and Complexity Theory
    - PHIL 152. Computability and Logic
    - SYMBSYS 100. Introduction to Cognitive Science

11. Advanced Small Seminar: † an upper-division, limited-enrollment seminar drawing on material from other courses in the core. Courses listed under Symbolic Systems Program offerings with numbers from SYMBSYS 201 through 209 are acceptable, as are other courses which will be announced at the beginning of each academic year.

* CS 103X does not fulfill this requirement.
† A course taken to fulfill one of these requirements can also be counted toward another requirement, as part of either the core or a student’s concentration, but not both (see below).

CONCENTRATION AREAS

In addition to the core requirements listed above, the Symbolic Systems major requires each student to complete a concentration consisting of six courses that are thematically related to each other. Students select concentrations from the list below or design others in consultation with their advisers.
MINORS

Students may minor in Symbolic Systems by completing either item 1 or item 2 below.

1. One course in each of the following core areas (please note that several of these courses have prerequisites):
   a) Cognition: SYMBSYS 100* or PSYCH 40
   b) Logic and Computation: PHIL 150 or 151, or CS 103B, 103X, or 154
   c) Computer Programming: CS 106B, 106X, or 107
   d) Philosophical Foundations: SYMBSYS 100* or PHIL 80
   e) Formal Linguistics: LINGUIST 120, 130A, or 130B
   f) Artificial Intelligence: CS 121 or 221

2. SYMBSYS 100, plus an interdisciplinary SSP concentration listed on the SSP web site at http://symsys.stanford.edu. To qualify, the selection of courses used for the minor must be interdisciplinary; i.e., it must either include courses from at least three departments, or include more than one course from each of two departments.

*SYMBSYS 100 may not be counted for both areas ‘a’ and ‘d’.

UNDERGRADUATE RESEARCH

The program strongly encourages all SSP majors to gain experience in directed research by participating in faculty research projects or by pursuing independent study. In addition to the Symbolic Systems Honors Program (see below), the following avenues are offered.

1. Summer Internships: students work on SSP-related faculty research projects. Application procedures are announced in the winter quarter for SSP majors.

2. Research Assistantships: other opportunities to work on faculty research projects are typically announced to SSP majors as they arise during the academic year.

3. Independent Study: under faculty supervision, students work on independent projects. For course credit they may enroll in SYMBSYS 196.

Contact SSP for more information on any of these possibilities, or visit the program’s web site at http://symsys.stanford.edu. In addition, the Undergraduate Research Opportunities office on campus offers numerous grants and scholarships supporting student research projects at all levels; see http://uro.stanford.edu.

HONORS PROGRAM

Seniors in SSP may apply for admission to the Symbolic Systems honors program prior to the beginning of their final year of study. Students who are accepted into the honors program can graduate with honors by completing an honors thesis under the supervision of a faculty member. Course credit for the honors project may be obtained by registering for SYMBSYS 190, Honors Tutorial, for any quarters while a student is working on an honors project. Juniors who are interested in doing an honors project during their senior year are strongly advised to take SYMBSYS 91, Junior Honors Seminar. SYMBSYS 191, Senior Honors Seminar, is recommended for honors students during the senior year. Contact SSP or visit the program’s web site for more information on the honors program, including deadlines and policies.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

Many SSP majors also complete coterminal M.S. or M.A. degrees in affiliated departments. In addition to the Symbolic Systems M.S. program (see below), the Department of Philosophy offers a special Symbolic Systems track for interdisciplinary graduate level work.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

The University’s basic requirements for the M.S. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

MASTER OF SCIENCE

The M.S. degree in Symbolic Systems is designed to be completed in the equivalent of one academic year by coterminal students or returning students who already have a B.S. degree in Symbolic Systems. Admission to the program is currently limited to Stanford undergraduates or those who have completed the B.S. in Symbolic Systems at Stanford. Admission is competitive, providing a limited number of students with the opportunity to pursue course and project work, in consultation with a faculty adviser who is affiliated with the Symbolic Systems Program. The faculty adviser may impose requirements beyond those described here.

Admission to the program as a coterminal student is subject to the policies and deadlines described in the “Undergraduate Degrees” section of this bulletin (see “Coterminal Bachelor’s and Master’s Degrees”). Applicants to the M.S. program are reviewed each quarter during the academic year. Information on exact deadlines and required procedures for applying are available from the Symbolic Systems Program’s Student Services Coordinator in the Linguistics Department office (460-127E).

REQUIREMENTS

A candidate for the M.S. degree in Symbolic Systems must complete a program of 45 units. At least 36 of these must be graded units, passed with an average grade of 3.0 (B) or better, and any course taken to fulfill requirements A, B, or C below must be taken for a letter grade unless the course is offered S/NC only. The 45 units may include no more than 21 units of courses from those listed below under Requirements A and B. Furthermore, none of the 45 units to be counted toward the M.S. degree may include units counted toward an undergraduate degree at Stanford or elsewhere. Course requirements are waived only if evidence is provided that similar or more advanced courses have been taken, either at Stanford or another institution. Courses that are waived rather than taken may not be counted toward the M.S. degree.

Each candidate for the M.S. degree must fulfill the following requirements:

REQUIREMENT A

Demonstrated competence in the core requirements for the B.S. degree in Symbolic Systems. Candidates who have gone through the Symbolic Systems undergraduate program will satisfy this requirement in the course of the B.S. degree in Symbolic Systems. Undergraduates in other majors at Stanford who are admitted as candidates for a coterminal Symbolic Systems M.S. degree must complete all of the Symbolic Systems undergraduate core requirements, with the exception of the advanced seminar requirement.

REQUIREMENT B

1. Completion of two additional skill requirements:
   a) Computer Programming: CS 108, Object-Oriented Systems Design; and
   b) Empirical Methods: one of the following:
      COMM 206. Communication Research Methods
      LINGUIST 237/Computer Science 224N. Natural Language Processing
      PSYCH 110. Research Methods and Experimental Design
PSYCH 252. Statistical Methods for Behavioral and Social Science (for 3 or more units)  
PSYCH 253. Statistical Theory, Models, and Methodology (for 3 units)  
STATS 191. Introduction to Applied Statistics  
STATS 200. Introduction to Statistical Inference

2. Completion of three quarters of the Symbolics Systems Program M.S. Seminar (SYMSYS 291).

REQUIREMENT C

Completion of an approved specialization track. All tracks of the Symbolic Systems M.S. program require students to do a substantial project. The course requirements for each track are designed to prepare a student to undertake such a project. The nature of the project depends on the student’s focus, but may include software development, user testing, or a combination of these. In all cases, a written thesis or paper describing the project is required. The project normally takes three quarters, and work on the project may account for up to 15 units of a student’s program. Each track of the SSP M.S. program has its own core requirements, as well as unit requirements from a set of elective courses. The tracks and their requirements are given below.

The Human-Computer Interaction (HCI) Track—The HCI Core:
CS 161. Design and Analysis of Algorithms;  
CS 147. Introduction to HCI Design; and  
CS 247A. HCI: Interaction Design Studio

The Natural Language Technology (NLT) Track—For the NLT core, in addition to the courses below, students in the NLT track must complete LINGUIST 237/CS 224N, Natural Language Processing, which can be used as the empirical methods course for Requirement B above.

1) An in-depth theory of English grammar course such as LINGUIST 221A, Foundations of English Grammar  
2) A graduate-level semantics course (if not already taken as part of Requirement A) such as LINGUIST 232A, Lexical Semantics, or 230B, Semantics and Pragmatics  
3) A two-course sequence in Computational Linguistics: LINGUIST 238. Introduction to Computer Speech and Language Processing, and LINGUIST 239P. Programming and Algorithms for Natural Language Processing

The NLT Electives (at least 8 units from the following list):

CS 145. Introduction to Databases  
CS 147. Introduction to HCI Design  
CS 161. Design and Analysis of Algorithms  
CS 221. Artificial Intelligence: Principles and Techniques  
CS 222. Knowledge Representation  
CS 224M. Multi-Agent Systems  
CS 228. Probabilistic Models in Artificial Intelligence  
CS 229. Machine Learning  
CS 276A. Text Retrieval and Mining  
CS 329. Topics in Artificial Intelligence  
LINGUIST 205. Phonetics  
LINGUIST 221B. Studies in Universal Grammar  
LINGUIST 222A. Lexicalist Foundations of Syntax  
LINGUIST 224A. Introduction to Formal Universal Grammar  
LINGUIST 227A. Research Seminar in Syntax: wh-movement  
LINGUIST 230B. Semantics and Pragmatics  
LINGUIST 233A. Semantics Seminar  
LINGUIST 234. Discourse Analysis  
LINGUIST 237D. NLP Reading Seminar  
LINGUIST 239F. Finite State Methods in Natural Language Processing  
LINGUIST 239M. Human Machine Translation  
PHIL 298. Logic, Language, and Information  
PSYCH 205. Foundations of Cognition  
PSYCH 214. Psycholinguistics  
PSYCH 272. Special Topics in Psycholinguistics

The Individually Designed Option—Students wishing to design their own M.S. curriculum in Symbolic Systems must present a project plan as part of their application. This plan must be endorsed by the student’s adviser prior to admission to the Symbolic Systems M.S. program. The application must also specify at least 20 units of coursework that the student will take in support of the project.

Students are admitted under this option only if they present well-developed plans whose interdisciplinary character makes them inappropriate for any departmental master’s program, but appropriate for Symbolic Systems.

COURSES

SYMSYS 10. Symbolic Systems Forum—A weekly lecture series, featuring different speakers who report on research of general interest to Symbolic Systems students and faculty. Regular attendance required for credit. May be repeated for credit.

1 unit, Aut, Win, Spr (Staff)

SYMSYS 100. Introduction to Cognitive Science—(Same as LINGUIST 144, PSYCH 130, PHIL 190.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:3b  
4 units, Spr (Jurafsky, Richardson)

SYMSYS 121K/221K. Spoken Dialogue Systems—(Same as LINGUIST 239S; graduate students register for 221K.) Theories and practices around building speech recognition-based dialogue systems. Differences between speech and graphical interfaces. Skills in application design and implementation; design of usability experiments to gauge the effectiveness of application design principles. Recommended: some programming background.

2-4 units, Aut (Byrne, Cohen)

SYMSYS 143/243. Cognitive Architectures—(Graduate students register for 243.) Cognitive architectures provide software infrastructure for creating computational systems that demonstrate human levels of intelligence, and are critical for applications ranging from simulation-based training environments to autonomous spacecraft to computer games. Emphasis is on integrated approaches to knowledge representation, reasoning, problem solving, sensing, execution, and learning. Students design and implement a cognitive system within one of these frameworks, and/or contribute to materials for future classes. Prerequisite: basic course in artificial intelligence or cognitive psychology. Recommended: programming experience. See http://www-csli.stanford.edu/cll/cogarch.html. GER:3b  
3 units, Spr (Freed, Shapiro)

SYMSYS 145. Cognition in Interaction Design—Interactive systems from the standpoint of human cognition. Topics include skill acquisition, complex learning, reasoning, language, perception, methods in usability testing, special computational techniques such as intelligent and adaptive interfaces, and design for people with cognitive disabilities. Students conduct analyses of real world problems of their own choosing and redesign/analysis project of an interactive system. GER:3b  
3 units, Spr (Shrager)

SYMSYS 150. Computers and Social Decisions—Issues in the design of systems for interactive and collective decision making. Topics such as theories of games and social choice; qualitative and quantitative procedures for making collective decisions; psychological effects of presentation and framing on expressions of preference; features of
dialogue systems and online communities; the ideal speech situation and related notions; online voting; the digital divide; and privacy, security, and trust. GER:3b
3 units (Davies) not given 2004-05

SYMSYS 202. The Rationality Debate—Evidence and perspectives on whether or not the human mind is generally rational. Normative frameworks for rationality such as probability and utility theory are contrasted with descriptive, experimental studies. Opposing views are represented through readings from disciplines including psychology, statistics, philosophy, and economics. Prerequisites: STATS 116 or 90, or familiarity with the basic theory of probability. Recommended: PSYCH 40. Limited enrollment. GER:3b
3 units (Davies) not given 2004-05

SYMSYS 205. Systems: Theory, Science, and Metaphor—Systems science explores abstract properties of systems such as network connectivity, complexity, and emergence, with applications in natural, social, and artificial domains. How useful are these theories? Are their claims testable or generalizable? Do they change the way people think and talk? Topics announced during the previous quarter on course web site. Limited enrollment. Prerequisites: Symbolic Systems undergraduate core course in each of philosophy, psychology or linguistics, and computer science.
3 units, Spr (Davies)

SYMSYS 208. Seminar in Syntax: The Architecture of Grammar—(Same as LINGUIST 125/225.) Comparison of current debates about grammar architecture with similar ones in the 60s and 70s. Emphasis is on the relationship between syntax and semantics, and the role of transformations in it. The relevance of the generative semantics movement, and arguments against it, to contemporary linguistic theory. Prerequisite: syntax course.
2-4 units, Win (Wasow)

RESEARCH

SYMSYS 91. Junior Honors Seminar—Recommended for juniors doing an honors project during the following year. Defining a topic, choosing an adviser, considering overall goals. Resources at Stanford and some experiences of seniors discussed with guest speakers.
2 units, Win (Davies)

SYMSYS 190. Senior Honors Tutorial—Under the supervision of their faculty honors adviser, students work on their senior honors project. May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

SYMSYS 191. Senior Honors Seminar—Recommended for seniors doing an honors project. Under the leadership of the Symbolic Systems program coordinator, students meet, discuss, and present their honors project.
2 units, Aut (Davies)

SYMSYS 196. Independent Study—Independent work under the supervision of a faculty member. Can be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

SYMSYS 291. Master’s Program Seminar—Enrollment limited to students in the Symbolic Systems M.S. degree program. Can be repeated for credit.
1 unit, Aut, Win, Spr (Davies)

INTERDEPARTMENTAL OFFERINGS

See the respective department listings for course descriptions and General Education Requirements (GER) information.

BIODIVERSITY AND ECOSYSTEMS

BIOSCI 20. Introduction to Brain and Behavior
3 units, Aut (Fernald) alternate years, not given 2005-06

BIOSCI 150/250. Human Behavioral Biology
3-6 units (Sapolsky) alternate years, given 2005-06

BIODIVERSITY AND ECOSYSTEMS

BIOSCI 20. Introduction to Brain and Behavior
3 units, Aut (Fernald) alternate years, not given 2005-06

SYMSYS 202. The Rationality Debate—Evidence and perspectives on whether or not the human mind is generally rational. Normative frameworks for rationality such as probability and utility theory are contrasted with descriptive, experimental studies. Opposing views are represented through readings from disciplines including psychology, statistics, philosophy, and economics. Prerequisites: STATS 116 or 90, or familiarity with the basic theory of probability. Recommended: PSYCH 40. Limited enrollment. GER:3b
3 units (Davies) not given 2004-05

SYMSYS 205. Systems: Theory, Science, and Metaphor—Systems science explores abstract properties of systems such as network connectivity, complexity, and emergence, with applications in natural, social, and artificial domains. How useful are these theories? Are their claims testable or generalizable? Do they change the way people think and talk? Topics announced during the previous quarter on course web site. Limited enrollment. Prerequisites: Symbolic Systems undergraduate core course in each of philosophy, psychology or linguistics, and computer science.
3 units, Spr (Davies)

SYMSYS 208. Seminar in Syntax: The Architecture of Grammar—(Same as LINGUIST 125/225.) Comparison of current debates about grammar architecture with similar ones in the 60s and 70s. Emphasis is on the relationship between syntax and semantics, and the role of transformations in it. The relevance of the generative semantics movement, and arguments against it, to contemporary linguistic theory. Prerequisite: syntax course.
2-4 units, Win (Wasow)

PROGRAM ON URBAN STUDIES

Director: Nancy Brandon Tuma (Sociology, Hoover Institution)
Associate Director: Michael Kahan (Lecturer, History and Urban Studies)
Executive Committee: Albert Camarillo (History), Milbrey McLaughlin (Education), Roger Noll (Economics), Jeff Wachtel (President’s Office)
Affiliated Faculty: Scott Bukatman (Art and Art History), Albert Camarillo (History), Samuel Chiu (Management Science and Engineering), Richard Ford (Law), Luis Fraga (Political Science), Steven Gerelick (Geological and Environmental Sciences), Miyako Inoue (Cultural and Social Anthropology), Sarah Jain (Cultural and Social Anthropology), Monica McDermott (Sociology), Raymond McDermott (Education), Daniel McFarland (Education), Milbrey McLaughlin (Education), Roger Noll (Economics), Leonard Ortolano (Civil and Environmental Engineering), Boyd Paulson (Civil and Environmental Engineering), Michael Rosenfeld (Sociology), Lucía Sá (Spanish and Portuguese), Rebecca Sandefur (Sociology), Karen Seto (Institute for International Studies), Jennifer Trimble (Classics), Paul Turner (Art and Art History), Barbara Voss (Cultural and Social Anthropology).

Lecturers: Laura Arrillaga, Frank Benest, Melanie Edwards, Radford Hall, Michael Kahan, Joseph Kott, Beth Scarloss, Laura Scher, Jackie Schmidt-Posner, Bruce Sievers, Frederic Stout
Visiting Associate Professor: Gerald Gast
Department Offices: Encina Hall West, Room 100
Mail Code: 94305-6050
Phone: (650) 723-3452
Email: urbanstudies@stanford.edu
Web Site: http://www.stanford.edu/dept/URBS

Courses given in the Program on Urban Studies have the subject code URBANST. For a complete list of subject codes, see Appendix.

The Urban Studies program treats urbanism as an interdisciplinary field: it brings together students, faculty, and outside specialists concerned with cities, and the problems and impacts of cities on society and on people’s lives. The Urban Studies major encourages students to inquire deeply into both the nature of cities and the techniques used to modify the urban environments. Two basic themes are stressed: the development of a critical understanding of how cities evolve, and the acquisition of analytical and practical tools for improving the quality of urban life.

A major in Urban Studies prepares students for a variety of careers and advanced academic pursuits. Urban Studies graduates have established careers in fields including architecture, community service, education, environmental planning, real estate development, urban design, and urban planning; many have obtained graduate degrees in architecture, business, law, public policy, urban design, and urban planning from major universities across the country, including Columbia, Harvard, MIT, UC Berkeley, UCLA, and Yale. Information on graduate programs pursued by Urban Studies alumni is available from the Urban Studies program office.

UNDERGRADUATE PROGRAMS

All students majoring in Urban Studies must complete the Urban Studies core. Those who specialize in urban planning and design, urban education, or community organization must complete their majors by meeting the appropriate requirements for their chosen option, supplemented by restricted electives that bring the total units to a minimum of 70. URBANST 198, URBANST 199, and prerequisites for required courses and for restrictive electives do not count towards the 70-unit minimum. No course may be used to satisfy both a core requirement and a requirement for the student’s chosen option. Students who wish to develop their own concentration (for example, in urban health care) must complete the Urban Studies core, design the remaining units to satisfy the 70-unit minimum under the guidance of an academic adviser who is a member of the Academic Council, and obtain the Program Director’s approval of their proposed concentration; see Self-Designed option below.
Courses used to satisfy requirements for the major must be taken for a letter grade. Qualified students may write a senior honors thesis and graduate with honors; see details in the “Honors Program” section below. Students interested in declaring Urban Studies as a major are required to meet first with one of the program directors; they then declare the Urban Studies major through the Registrar’s Office using Axess.

**URBAN STUDIES CORE**

Urban Studies majors should take URBANST 110, Introduction to Urban Studies, before Winter Quarter of their junior year. In addition, students interested in writing an honors thesis should take URBANST 200 in Winter Quarter of their junior year, or in their sophomore year if they plan to be away Winter Quarter of their junior year.

Urban Studies majors are required to take each of the following:

- ECON 1, Elementary Economics
- URBANST 110, Introduction to Urban Studies
- URBANST 170, Introduction to Urban Design

All Urban Studies majors must also take at least one course from each of the following categories:

**Urban Anthropology and Sociology:***
- ANTHSCI 164. Ecological Anthropology
- CASA 88. Theories of Race and Ethnicity
- CASA 112. The Archaeology of Cities
- EDUC 110. Sociology of Education
- EDUC 212X. Urban Education
- SOC 108. Population and Society
- SOC 110. Politics and Society
- SOC 118. Social Movements and Collective Action
- SOC 140. Introduction to Social Stratification
- SOC 145. Race and Ethnic Relations
- SOC 146. Race, Community, and Urban Sociology
- SOC 148. Racial Identity
- SOC 149. The Urban Underclass

**Urban History:**
- HISTORY 64. Introduction to Race and Ethnicity in the American Experience
- HISTORY 152. American Spaces: An Introduction to Material Culture and the Built Environment
- HISTORY 193. East Asia in the Early Buddhist Age
- HISTORY 213B. Heretics, Prostitutes, and Merchants: Venice and its Empire
- HISTORY 251. Poverty and Homelessness in America
- HISTORY 270A. Cities in the North American West, 1840-1940
- HISTORY 271A. The Suburban West
- HISTORY 293A. Tokyo: From Castle Town to Megalopolis

**Urban Politics:**
- POLISCI 121. Urban Politics
- POLISCI 221R. Urban Policy
- POLISCI 325S. Prefield Research Seminar
- URBANST 166. Mayors, Machines, and Masses: The History of Urban Politics in America
- URBANST 189. Managing Local Governments

**Usage of Computers:**
- CS 105. Introduction to Computers
- CS 106A. Programming Methodology
- CEE 111. 3D and 4D Modeling Plus Analyses
- CEE 135. Introduction to CAD
- CEE 143. Use of Virtual (Computer-Based) Models in Building Design and Construction
- GES 144. Fundamentals of Geographical Information Science

Students who plan to do graduate study in architecture are strongly advised to take CEE 111 and are also advised to take CEE 143. Students in urban planning and design are required to take GES 144, and it is recommended that they also take one of the other courses listed above. Students in the other options are advised to take CS 105 or 106A.

**Social Science Research Methods:**
- ANTHSCI 193. Prefield Research Seminar
- CASA 93. Prefield Research Seminar
- COMM 106. Communication Research Methods
- COMM 135. Survey Research Methods: Describing Large Populations with Small Samples and Precise Measures
- HUMBIO 82A. Qualitative Research Methodology
- SOC 180. Methods for Sociological Research

**Statistical Analysis:**
- ECON 101A. Introduction to Statistical Methods (Postcalculus) for Social Scientists
- GES 160. Statistical Methods for Earth and Environmental Sciences
- POLISCI 151B. Data Analysis for Political Science
- SOC 181B. Sociological Methods IB: Statistics
- STATS 60. Introduction to Statistical Methods: Precalculus
- Public Speaking:
  - CTL 117. The Art of Effective Speaking
  - ENGR 103. Public Speaking

**WRITING IN THE MAJOR (WIM):**

These courses are typically taken in the senior year, but students who plan to write a senior honors thesis should complete URBANST 200 in their junior year.

- ARTHIST 254. Utopia and Reality in Modern Urban Planning
- POLISCI 221S. Civic Capacity and Urban Youth
- URBANST 120. Building Communities
- URBANST 200. Preparation for Honors Thesis

For students not planning to write an honors thesis: Those who choose the Urban Planning and Design option should enroll in ARTHIST 254. Those in the Community Organization option should enroll in either POLISCI 221S or URBANST 120. Those in the Urban Education option should enroll in POLISCI 221S.

In addition to the required courses, it is recommended that all Urban Studies students obtain basic quantitative skills by completing MATH 19, 20, and 21, preferably before junior year.

Most Urban Studies students profit from having an internship in an urban organization in the public or private sector. Urban Studies majors may enroll in one course for credit for such an internship. Students can consult the Haas Center for Public Service to obtain information on courses with internship placements at community organizations.

Urban Studies students are strongly encouraged to spend at least one quarter studying at an overseas studies program to have the opportunity to learn first hand how cities vary across societies. Some Urban Studies core course requirements, as well as restricted electives, can be satisfied at Stanford overseas campuses. Courses offered overseas vary considerably from year to year, and students should check in advance with both the Overseas Studies and the Urban Studies programs to learn which courses meet Urban Studies requirements. It is often possible to arrange a summer placement relevant to an Urban Studies major at Stanford’s overseas locations.

**COMMUNITY ORGANIZATION OPTION**

The curriculum for the option in Community Organization explores the concepts of community and organization, and their manifestations in the public and private sectors. Courses concerned with public service and community organizations provide a foundation for more advanced studies of community conflict resolution and the nonprofit sector. Other courses introduce students to business skills and aspects of urban planning and design. This option prepares students to enter graduate programs concerned with urban affairs and community service, and to work with local governmental agencies and for-profit and not-for-profit organizations engaged in community service and development.

Students who may want to pursue a graduate degree in business or city planning are encouraged to take ECON 50, Economic Analysis I.

**REQUIRED TO COMPLETE THE MAJOR**

- POLISCI 133. Ethical and Public and Política in Public Service
- SOC 118. Social Movements and Collective Action
- URBANST 163B. Business Concepts and Skills for the Social Sector

Select one of the following courses on organizations:

- MS&E 180. Organizations: Theory and Management
- SOC 160. Formal Organizations

Select two of the following courses on delivery of community services:

- CEE 148. Design and Construction of Affordable Housing
- URBANST 121. Introduction to Civic Society and the Nonprofit Sector
- URBANST 122. Philanthropy: Effecting Social Change and Innovation in the Public Sector
- URBANST 162. Spirituality and Nonviolent Social Transformation
- URBANST 163L. Social Entrepreneurship Collaboratory

Select one of the following courses in urban planning and design:

- MS&E 196. Transportation Systems and Urban Development
- PUBLPOL 182A. Local Policy Making and Problem Solving: Contested Issues in Silicon Valley
- PUBLPOL 182B. Local Policy Making and Problem Solving: Community and Economic Development
- URBANST 124. Sustainable Urban and Regional Transportation Planning
In addition, students who choose the Community Organization option are required to take a course involving an internship with a governmental or nongovernmental organization that provides urban services. Students can meet this requirement with a course from the Urban Studies core such as POLISCI 221R or HISTORY 251.

**RESTRICTED ELECTIVES**

Restricted electives are used to bring the total number of units to 70. They may include any course in the Urban Studies core; any 100-level course offered by the Program on Urban Studies, and any course listed below.

CEE 147. Cases in Personality, Leadership, and Negotiation
CEE 151. Negotiation
EDUC 130. Introduction to Counseling
EDUC 177. Education of Immigrant Students
EDUC 193. Peer Counseling
HISTORY 257. Race and Ethnicity in the American Metropolis

**URBAN EDUCATION OPTION**

The purpose of the Urban Education option is to provide a rigorous undergraduate background for students wishing to prepare for a career in urban education, especially teaching in inner-city schools, development of urban educational policies, or community youth development. This option may be a useful basis for graduate study in educational policy, law, or business. It is especially appropriate for students who have been admitted by the School of Education to pursue a coterminal master’s degree in the Stanford Teacher Education Program (STEP); Policy, Organization and Leadership Studies Program (POLS); or the John Gardner Center for Youth and their Communities. Application and admission to a coterminal degree in these programs occurs during the Autumn Quarter of the junior year and is handled entirely by the School of Education.

Opportunities to obtain teaching and advising experience are available in nearby schools through Upward Bound and other programs administered by the Haas Center for Public Service as well as through courses offered by the School of Education.

Students who choose this option may be eligible for the undergraduate honors program of the School of Education, in which case they should enroll in EDUC 199A, B, or C during their senior year.

**REQUIRED TO COMPLETE THE MAJOR:**

EDUC 110. Sociology of Education
EDUC 177. Education of Immigrant Students
EDUC 179. Urban Youth and their Institutions: Research and Practice
EDUC 212X. Urban Education
Select one of the following urban education practicums:
EDUC 101X. Undergraduate Teaching Practicum
EDUC 103A, B, or C. Exploring Elementary Teaching
Select one of the following developmental psychology courses:
HUMBIO 126. Adolescent Development
PSYCH 60. Introduction to Developmental Psychology

**RESTRICTED ELECTIVES**

Restricted electives are used to bring the total number of units to 70. They may include any course from the Urban Studies core, any 100-level course offered by Urban Studies, and any course listed below.

EDUC 102. Culture, Class, and Educational Opportunity
EDUC 156A. Understanding Racial and Ethnic Identity
EDUC 167. Educating for Equity and Democracy
EDUC 179B. Best Practice and Policy for Youth Development
EDUC 201. History of Education in the United States
EDUC 201A. History of African American Education through 1940
EDUC 201B. Education for Liberation
EDUC 204. Philosophy of Education
EDUC 220A. Introduction to the Economics of Education
EDUC 220B. Politics of Education
EDUC 220C. Education and Society
EDUC 221A. Policy Analysis in Education
URBANST 144. Dilemmas in Urban Education

**URBAN PLANNING AND DESIGN OPTION**

Required courses for the Urban Planning and Design option introduce the approaches and techniques used by city and regional planners. A course applying economics to the solution of urban or regional problems is a key element of this option. Students are also required to take courses on urban policy making. Because urban and regional planners rely heavily on computers, the major requires an introduction to geographic information systems. The Urban Planning and Design option provides excellent preparation for graduate programs in urban and regional planning and in public policy.

**PREREQUISITES**

ECON 50. Economic Analysis I
ECON 50M. Mathematical Preparation for Economics
MATH 41, or MATH 19 and 20. Calculus

**REQUIRED TO COMPLETE THE MAJOR**

PUBLPOL 102. Organizations and Public Policy
URBANST 189. Managing Local Government
Select one of the following urban planning and design courses:
MS&E 196. Transportation Systems and Urban Development
PUBLPOL 182A. Local Policy Making and Problem Solving: Contested Issues in Silicon Valley
PUBLPOL 182B. Local Policy Making and Problem Solving: Community and Economic Development
URBANST 124. Sustainable Urban and Regional Transportation Planning
URBANST 183. Land Use Control
Select one of the following economics courses:
ECON 118. Development Economics
ECON 148. Urban Economics
ECON 150. Economic Policy Analysis
ECON 154. Economics of Legal Rules and Institutions
ECON 155. Environmental Economics and Policy

**RESTRICTED ELECTIVES**

Restricted electives are used to bring the total number of units to 70. They may include any course in the Urban Studies core, any 100-level course offered by Urban Studies, and any course listed below.

CEE 100. Managing Sustainable Building Projects
CEE 147. Cases in Personality, Leadership, and Negotiation
CEE 148. Design and Construction of Affordable Housing
CEE 171. Environmental Planning Methods
CEE 172. Air Quality Management
GES 140. Introduction to Remote Sensing
GES 142. Remote Sensing of Land Use and Land Cover Change
ME 101. Visual Thinking
ME 120. History and Philosophy of Design
MS&E 180. Organizations: Theory and Management
PUBLPOL 182B. Local Policy Making and Problem Solving: Community and Economic Development
PUBLPOL 183. Land Use Control

**SELF-DESIGNED OPTION**

Students who wish to concentrate in an area of urban studies other than one of the above options must complete the Urban Studies core and design additional units to bring the total to at least 70 units. The self-designed portion of the major should concentrate on a particular area of urban study, such as urban health care or urban environmental management. Additional units must be approved by both the Director of Urban Studies and an academic adviser who is a member of the Academic Council and has expertise in the particular area of interest to the student. Proposals for courses in the self-designed portion of the option should include a list of courses at the 100-level or above and a description of how each course meets the student’s educational objectives. A proposal for a self-designed option must be accompanied by a letter to the Director of Urban Studies indicating that the academic adviser has examined and approved the final version of this.

Students pursuing a self-designed option must submit proposals for approval by the Director of Urban Studies by the middle of the second quarter of the student’s junior year. Applications received after that deadline are not considered. Students interested in designing their own option are strongly encouraged to meet with the Director of Urban Studies before the end of the first quarter of their junior year.
MINORS

The minor in Urban Studies is designed to accomplish two things: first, it introduces students to the approaches of several different disciplines to the study of cities; second, it provides students with an opportunity to explore their interests in one of five specialized fields: (1) Architecture, (2) Community Organization, (3) Social Innovation, (4) Urban Education, or (5) Urban Planning and Design. Students must declare a minor in Urban Studies no later than the last day of the quarter that is four quarters before degree conferral.

The minor in Urban Studies requires completion of seven courses for a letter grade, including URBANST 110, Introduction to Urban Studies. Three of the seven courses (two of the seven in the case of Social Innovation) must be completed from the following categories listed in the Urban Studies core: Urban History, Urban Politics, and Urban Anthropology/Sociology. At least one course must be from each category.

All courses in any one of the following groups must be completed:

1. Architecture
   a) ME 101. Visual Thinking
   b) one introductory architecture studio course
   c) one course on the history of architecture (ARTHIST 3 is recommended)

2. Community Organization
   a) SOC 118. Social Movements and Collective Action
   b) URBANST 121. Introduction to Civil Society and the Nonprofit Sector
   c) URBANST 163B. Business Concepts and Skills for the Social Sector

3. Social Innovation
   Students in this option take one course in Urban Politics and one course in Urban Anthropology/Sociology, in addition to URBANST 110, and complete the following four courses to complete the minor:
   a) URBANST 121. Introduction to Civil Society and the Nonprofit Sector, or URBANST 122. Philanthropy: Effecting Social Change and Innovation in the Public Sector
   b) URBANST 163B. Business Concepts and Skills for the Social Sector
   c) PUBLPOL 180. Social Innovation, or PUBLPOL 181L. Environmental Entrepreneurship Lab (must be taken for 4 or 5 units for the minor), or PUBLPOL 181L. Environmental Entrepreneurship Lab (must be taken for 4 or 5 units for the minor), or PUBLPOL 183L. Social Entrepreneurship Collaboratory (must be taken for 4 or 5 units for the minor)

4. Urban Education
   a) EDUC 110. Sociology of Education
   b) EDUC 179. Urban Youth and their Institutions: Research and Practice
   c) EDUC 212X. Urban Education

5. Urban Planning and Design
   a) CEE 148. Design and Construction of Affordable Housing
   b) MS&E 196. Transportation Systems and Urban Development, or URBANST 170. Introduction to Urban Design
   c) one course from the Urban Studies Core course listings for Urban Politics, or one course meeting the Economics course requirement listed for the Urban Planning and Design Option.

HONORS PROGRAM

The honors program offers qualified students an opportunity to conduct independent research and to write a thesis summarizing the results. Before being accepted to the honors program in Urban Studies, a student must satisfy three requirements: an overall GPA of at least 3.3 and a GPA of at least 3.5 for courses satisfying requirements for an Urban Studies major at the time of application for honors; URBANST 200, Preparation for Honors Thesis; and an honors proposal approved by an adviser. If the principal adviser for honors is not a member of Stanford’s Academic Council, the student must also have a second reader who is an Academic Council member and who also approves the honors proposal.

Students interested in pursuing honors must submit an application, including a one-page thesis abstract, and the signature of an adviser and (where applicable) of a second reader, to the Urban Studies program office no later than June 1 of their junior year. The director of the Urban Studies honors program must approve the application.

Honors students must register for 7-15 units in URBANST 199, Senior Honors Thesis, over the course of their senior year. These units do not count towards the 70-unit requirement for graduating with a B.A. in Urban Studies. Honors work is considered to be above and beyond regular graduation standards.

URBANST 200 is required for all juniors who plan on writing honors theses. Sophomores who plan to be away during Winter Quarter of their junior year are advised to take URBANST 200 in the Winter Quarter of their sophomore year. Students who wish to write an honors thesis and are unable to fulfill this requirement in either their sophomore or junior year must petition the director of the Urban Studies honors program in writing, explaining the circumstances and describing how they will acquire the necessary research skills to carry out their project.

In Winter Quarter of senior year, all students writing honors theses must register for one unit of URBANST 200. In URBANST 200, senior honors students present portions of their theses as models for the juniors taking this class. They also meet separately to present their work-in-progress and to comment on one another’s work. All honors students are required to present their theses at the Senior Honors Colloquium in Spring Quarter of senior year.

To graduate with honors, students must receive a grade of at least ‘A’- in the honors work and have a GPA of at least 3.5 in courses for the Urban Studies major at the time of graduation.

COTERMINAL PROGRAMS

Undergraduates in Urban Studies may enter coterminal master’s degree programs in a number of departments and schools in the University. In recent years, Urban Studies majors have developed coterminal programs with the departments of Civil and Environmental Engineering, Cultural and Social Anthropology, and Sociology, and with the School of Education. A special coterminal program with the School of Education exists for students in the Urban Education option, but other coterminal programs can also be arranged through the School of Education. Information and applications for coterminal degree programs are available at the Undergraduate Advising Office. Students should discuss the coterminal program with a program director during their junior year.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

COURSES

Further descriptions and details of current courses offered by the Program on Urban Studies can be obtained from the program office before each quarter.

URBANST 110. Introduction to Urban Studies—The study of cities and urban civilization. History of urbanization and disciplinary methodologies comprising the field of urban studies including economics, political science, sociology, urban design, urban history, and urban public policy. GER:3b

4 units, Aut, Win (Stout), Spr (Kahan)

URBANST 120. Building Communities—Capstone course for Urban Studies majors in the Community Organization track. Builds on student’s experience in community work and service-learning education. Classic texts in the literature of community and community organization: Thoreau, Gandhi, Saul Alinsky, and Martin Luther King, Jr. The development and completion of a major writing-oriented class project such as the publication of a book of original essays or an anthology of edited papers. WIM

4 units (Staff) not given 2004-05
URBANST 121. Introduction to Civil Society and the Nonprofit Sector—(Same as PUBLPOL 189.) Development of the idea of civil society from early Enlightenment Europe to the contemporary U.S. Historical and theoretical foundations. Contemporary features of the nonprofit sector including its legal, economic, political, and ethical dimensions. The structure and operation of modern philanthropy and the challenges of the 21st century.
2-4 units, Spr (Sievers)

URBANST 122. Philanthropy: Effecting Social Change and Innovation in the Public Sector—Philanthropy’s role in modern society and the translation of its vision and capital into social action. How individuals, foundations, corporations, and philanthropic organizations engage in social investing. Topics: the individual and philanthropy; philanthropic history and industry; foundation strategy and infrastructure; philanthropy and the political landscape; corporate philanthropy and social responsibility; global social investing; grant-making; outcome assessment; and social innovation. Readings: business school cases, and theoretical and industry articles. Guest speakers include global philanthropists, foundation presidents, and Silicon Valley business leaders. Final project: students write grant proposals. Enrollment limited to 25.
4 units, Aut (Arrillaga)

URBANST 123. Introduction to Community-Based Research—Principles and practice of community-based research as a collaborative enterprise between academic researchers and community members. Guest speakers from community organizations, faculty members, and alumni of the Public Service Scholars Program. How previous experience with community organizations provides a starting point for developing community-based senior theses or independent research projects.
1 unit, Aut (Schmidt-Posner)

URBANST 124. Sustainable Urban and Regional Transportation Planning—Environmental, economic, and equity aspects of urban transportation in 21st-century U.S. Expanded choices in urban and regional mobility that do not diminish resources for future generations. Implications for the global environment and the livability of communities.
5 units, Aut (Kott)

URBANST 144. Dilemmas in Urban Education—Dichotomies such as large, traditional schools versus small schools, or segregation versus integration. Teacher certification or large-scale testing. Topics: interaction of the city in the school through gang activity or job placement programs; current legal challenges; class size reduction; tracking; and retention and social promotion policies. Students contribute their own experiences. Goal is to explore issues facing education in an urban setting not to solve problems.
5 units, Win (Scarloss)

URBANST 145. Urban Education—(Enroll in EDUC 212X.)
3-4 units, Spr (McDermott)

URBANST 146. Race, Community, and Urban Sociology—Group relations and community processes in an urban environment from a sociological perspective. How racial attitudes, residential segregation, and employment opportunities influence the well-being of different urban groups.
5 units, Aut (Thompson)

URBANST 150. Social Entrepreneurship Startup—(Enroll in ENGR 150.)
1-6 units, Aut, Win, Spr (Behrman)

URBANST 162. Spirituality and Nonviolent Social Transformation—A life of engagement in social transformation is often built on a foundation of spiritual and religious commitments. Case studies of nonviolent social change agents including Rosa Parks, César Chávez, and Women in Black; the religious and spiritual underpinnings of their commitments. Theory and principles of nonviolence. Films and readings. A service learning component includes placements in organizations engaged in social transformation.
4 units, Win (McLennan, Karlin-Neumann, Sanders)

URBANST 163A. Social Innovation and the Social Entrepreneur—Invited lecture series. Perspectives and endeavors of thought leaders and entrepreneurs who address social needs in the U.S. and internationally through private for-profit and nonprofit organizations, nongovernmental organizations, or public institutions. Investigation of topics covered in greater detail in URBANST 163A,B. Recommended: concurrent enrollment in URBANST 163L for students developing U.S. and international social entrepreneurship initiatives.
1 unit, Aut (Staff)

URBANST 163B. Business Concepts and Skills for the Social Sector—Core concepts in organizational mission, strategy, marketing, finance, decision making, and organizational behavior for U.S. and international organizations. Focus is on adaptation of these concepts in the social sector. The limits of using business-based methods to serve social objectives. Conceptual articles and case studies. Enrollment limited to 30. Pre- or corequisite: ECON 1. Corequisite: URBANST 163L.
4 units, Win (Staff)

URBANST 163C. Introduction to Social Entrepreneurship—The search for innovative responses to social needs, the role of private initiatives, for-profit and not-for-profit, and the challenges associated with these initiatives in the U.S. and internationally. Theoretical issues: defining the social good and assessing the role of market forces, philanthropy, and government. Practical issues: developing an organizational mission, recognizing specific opportunities for social improvement, forming an enterprise that responds to those opportunities, developing organizational and funding strategies, evaluating performance, managing the enterprise, and creating sustained positive impact and social value. Readings: business school cases, and theoretical and practical articles. Enrollment limited to 30. Prerequisites: ECON 1 and URBANST 163B or equivalent. Corequisite: URBANST 163L. GER:3b
4 units, Aut (Edwards)

URBANST 163H. The Social Science of Entrepreneurship—(Enroll in SOC 161/261.)
5 units, Spr (Thornton)

URBANST 163L. Social Entrepreneurship Collaboratory—Interdisciplinary student teams create and develop U.S. and international social entrepreneurship initiatives. Proposed initiatives may be new entities, or innovative projects, partnerships, and/or strategies impacting existing organizations and social issues in the U.S. and internationally. Focus is on each team’s research and on planning documents to further project development. Project development varies with the quarter and the skill set of each team, but should include: issue and needs identification; market research; design and development of an innovative and feasible solution; and drafting of planning documents. In advanced cases, solicitation of funding and implementation of a pilot project. Enrollment limited to 30. Prerequisite: URBANST 163A, B, or C, or consent of instructor.
1-5 units, Win, Spr (Edwards)

URBANST 163M. Advanced Social Entrepreneurship Collaboratory—For Urban Studies majors. Continuation of 163L in which students continue to develop projects. Prerequisite: 163L.
1-5 units, Aut, Win, Spr (Staff)

URBANST 165. Social Innovation—(Enroll in PUBLPOL 180.)
4 units, Spr (Phills)

URBANST 166. Mayors, Machines, and Masses: The History of Urban Politics in America—(Same as HISTORY 266A.) Who rules cities: powerful individuals, political parties, grass-roots activists, or voters? How has this changed? The evolution of urban politics in the U.S. from the 19th-century advent of the political machine to the present. How social transformations and mass movements have affected urban governance. Possible topics include: bosses and reformers, ethnic and racial coalitions, the role of state and federal governments, neighborhood activism, and urban-suburban relations.
5 units (Kahan) not given 2004-05
URBANST 170. Introduction to Urban Design—Urban design theory and contemporary practice. Critical issues in urban development and conservation. Neighborhood livability, central city revitalization, historic preservation, and regional growth are examined through comparative case studies from N. America and abroad. Projects focus on neighborhood, downtown, and regional issues in San Francisco and the Bay Area. Two Saturday field workshops in San Francisco.
  5 units, Win (Gast)

URBANST 183. Land Use Control—Methods of land use control related to the pattern and scale of development and the protection of land and water resources. Emphasis is on the relationship between the desired land use goal and geographical landscape, physical externalities, land use law, and regulatory agencies. Topics include the historical roots of modern land use controls; urban reforms of the 19th century; private ownership of land; zoning; local, state, and federal land use regulation; and land trusts preservation. Smart growth, environmental impact consideration, private property rights, and special purpose agencies are related to current issues.
  4 units, Spr (Hall)

URBANST 189. Managing Local Governments—In-the-trenches approach. Issues in leading and managing local governments in an era of accelerating and discontinuous change. Focus is on practical strategies related to financing, public services impacted by increasing demand and revenue constraints, the politics of urban planning, private-public partnerships, sector market and entrepreneurial problem solving, promoting a learning and risk-taking organizational culture, and developing careers in local government. Enrollment limited to 25; preference to Urban Studies majors.
  3-4 units, Win (Benest)

URBANST 190. Urban Professions Seminar—Workshop. Contemporary practice of urban design and planning, community development, urban education, public service law, and related fields. Topics depend partly on student interests. Bay Area professionals lecture and respond to questions concerning their day-to-day work, impressions of their field, and the academic background recommended for their work. At least one session focuses on graduate schools and degrees relevant to these fields.
  1 unit, Win (Kahan)

URBANST 194. Internship in Urban Studies—For Urban Studies majors only. Students organize an internship in an office of a government agency, a community organization, or a private firm directly relevant to the major. Readings supplement the internship. Required paper summarizing the internship experience and related readings.
  2-4 units, Aut, Win, Spr (Staff)

URBANST 195. Special Projects in Urban Studies
  1-5 units, Aut, Win, Spr (Staff)

URBANST 197. Directed Reading
  1-5 units, Aut, Win, Spr (Staff)

URBANST 198. Senior Honors Research in Public Service—Limited to seniors approved by their departments for honors thesis, and admitted to the year-round Public Service Scholars Program sponsored by the Haas Center for Public Service. What standards in addition to those expected by the academy apply to research conducted as a form of public and community service? How can communities benefit from research? Theory and practice of research as a form of public service. Readings in research theory and methods of participatory action research; presentations on research as service; workshops on each participant’s thesis work-in-progress; public presentation of completed research; and thesis evaluation by a community-based reader. Corequisite: 199.
  1-3 units, Aut, Win, Spr (Schmidt-Posner, Staff)

URBANST 199. Senior Honors Thesis
  1-15 units, Aut, Win, Spr (Staff)

URBANST 200. Preparation for Honors Thesis—(Same as SOC 202.) For juniors in Urban Studies or Sociology thinking about writing a senior honors thesis; Urban Studies seniors writing the honors thesis; and sophomores who plan to be off-campus Winter Quarter of their junior year and are interested in writing an honors thesis. Juniors register for 4 or 5 units to write a research prospectus and grant proposal seeking research funding. Urban Studies seniors writing an honors thesis register for 1 unit to make presentations of their work. Prerequisites: GPA that qualifies for honors; sophomores require consent of instructor; prerequisite for WIM: junior or sophomore registering for 3 or more units. WIM 1-5 units, Win (Tuma, Kahan)

URBANST 254. Utopia and Reality in Modern Urban Planning—(Same as ARTHIST 254.) Primarily for Urban Studies majors. Utopian urbanist thinkers such as Ebenezer Howard, Le Corbusier, and Frank Lloyd Wright who established the conceptual groundwork of contemporary urban planning practice. Research paper. GER:3a,WIM 5 units, Spr (Stout, Turner)

OVERSEAS STUDIES

Courses approved for the Urban Studies major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING

URBANST 157V. Beijing: The City and its Significance in History and Tradition—(Same as CHINGEN 157B.) 3 units, Aut (Dien)

URBANST 158V. Beijing: The Emperor’s City: Imperial Conceptions of Urban Space—(Same as HISTORY 291V.) 5 units, Spr (Kahn)

BERLIN

URBANST 143U. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity—(Same as ARTHIST 110Y, HISTORY 229V, STS 119V.) 4 units, Spr (Neckenig)

FLORENCE

URBANST 183U. Materials and Machines for Architecture: The Renaissance from Brunelleschi to Michelangelo 4 units, Aut (Lamberini)
STANFORD IN WASHINGTON

Director: Adrienne Jamieson

Stanford in Washington provides highly-qualified undergraduates with an opportunity to work and study in the nation’s capital. In addition to providing students with an understanding of public policymaking, the program offers an opportunity to take advantage of the city’s unique cultural resources.

Central in the student’s educational experience is an internship. Students serve as interns at such institutions and agencies as the Senate, the House of Representatives, the Office of Management and Budget, the White House, the National Institutes of Health, the Smithsonian Institution, CNN, the departments of State, Justice, Education, and Health and Human Services.

In addition to the internship, students must also complete an academic course of study consisting of small tutorials taught by policy experts (5 units), and weekly policy seminars taught by Stanford faculty members (5 units). Frequently, speakers from the Washington policy community join students and faculty for discussions. Students usually write a major paper related to their internship for 3-5 units of credit. Course and seminar topics vary according to student and faculty interest.

Stanford in Washington offers “stretch quarters” in the Autumn and Spring (mid-September to mid-December, and late March to the end of June) and a regular quarter in Winter, which focuses on environmental and health policy. The program is designed for students in their junior year or the first quarter of their senior year. Applications must be completed two quarters in advance. For Autumn Quarter, apply early Winter Quarter of the previous year. For Winter Quarter, apply early Spring Quarter of previous year. For Spring Quarter, apply early Autumn Quarter. Students interested in the program may obtain a brochure at the Haas Center for Public Service, or call for information, (650) 725-2870.

PROGRAM IN WRITING AND RHETORIC

Faculty Director: Andrea A. Lunsford
Associate Director: Marvin Diogenes
Writing in the Major Director: Claude Reichard
Stanford Writing Center Director: Clyde Moneyhun
Stanford Writing Center Assistant Directors: Wendy Goldberg, John Tinker
Community Writing Project Coordinator: Carolyn Ross

Department Offices: Building 460, Room 223, Margaret Jacks Hall
Mail Code: 2085
Department Phone: (650) 723-2631
Email: pwrcourses@stanford.edu
Web Site: http://pwr.stanford.edu

Courses given in the Program in Writing and Rhetoric have the subject code PWR. For a complete list of subject codes, see Appendix.

GOALS OF THE PROGRAM IN WRITING AND RHETORIC

The Program in Writing and Rhetoric (PWR) designs and teaches courses that meet the Writing and Rhetoric requirement for undergraduates at Stanford as well as intermediate and advanced writing and rhetoric classes. For more information on the requirement, see the “Courses” section below and the “Writing and Rhetoric Requirement” section of this bulletin.

PWR courses engage students in rhetorical and contextual analysis of texts and substantive research-based argument. Students in PWR courses learn and practice time-tested rhetorical principles to gain increasing control over the intellectual and stylistic elements of their writing; they learn to analyze the ideas and persuasive strategies of others and to apply those insights to their own writing.

Toward these ends, PWR 1 focuses on elements of academic argument: understanding a writer’s stance; developing a supportable argumentative thesis; discovering, developing, and deploying cogent proofs; making appropriate organizational and stylistic choices; and understanding the expectations of audiences. The course emphasizes research-based writing, including the effective use of print and non-print sources, primary and secondary sources, and data based on fieldwork. Students enrolled in PWR 1 carry out significant research and use it as the basis for a polished and persuasive research-based argument.

PWR 2 further develops students’ skills in writing and oral presentation, emphasizing the ongoing development of content, organization, and style. The course addresses the dynamic interdependence of writing and speaking, as well as the importance of visual and multimedia elements in effective presentation of research. Students enrolled in PWR 2 have opportunities for practice and revision of written assignments and oral presentations as well as opportunities to present the results of scholarly inquiry, with an emphasis on how to work purposefully and well with a variety of presentation media.

As a general rule, students complete a minimum of four major assignments in both PWR 1 and 2. Written assignments vary from 5 to 15 pages in length, and students work intensively on revising each piece of writing. Oral presentations may involve collaborative work as well as multimedia elements. All assignments involve analyzing a range of texts as well as identifying, evaluating, and using multiple sources in support of academic and research-based arguments. In-class discussions on the nature of intellectual property and plagiarism, how to read with an increasingly critical eye, and how to identify, evaluate, integrate, and cite sources provide some of the most important academic learning experiences of students’ first years of work at Stanford.

Writing and Rhetoric classes enroll no more than 15 students, and all classes are conducted as seminars in which participation is crucial. In-class work often includes close reading of and responding to the writing of peers; these workshops are augmented by a minimum of three individual or small group conferences with the PWR instructor during the quarter.

THE STANFORD WRITING CENTER

The Stanford Writing Center, located in Room 020 of Margaret Jacks Hall (Building 460), supports student writing in the full range of academic and extracurricular contexts. The center emphasizes support for students writing for PWR, Introduction to the Humanities, and Stanford Introductory Seminars, while also serving all Stanford undergraduates through one-to-one and group tutorials, workshops, and seminars. Other events sponsored or hosted by the center include regular Writers’ Nights featuring fiction and poetry readings, the “How I Write” series of dialogues with Stanford faculty, and spoken word performances. For further details on the center, visit the center’s web site at http://swc.stanford.edu.

THE STANFORD STUDY OF WRITING

In 2001, PWR began a major research project, the Stanford Study of Writing. The focus of the project is the development of undergraduate writing and the teaching of writing. In 2004-05, the students in the study continue to submit all of the writing done for their courses, as well as important out-of-class writing. All students participating in the study receive an electronic portfolio including all their writing when they graduate in 2005.
PWR PEDAGOGY PROGRAM

PWR offers ENGLISH 397A, a pedagogy seminar for all graduate students (TAs) from English, Modern Thought and Literature, and Comparative Literature who teach PWR courses as part of their graduate studies. Taught in the Autumn Quarter, the pedagogy seminar focuses on syllabus design, developing writing assignments, and responding to student writing. The history of rhetoric and writing supplies a theoretical foundation as well as practical lessons for how to teach writing and research most effectively. In the Winter and Spring, graduate students continue their pedagogical development through a series of workshops and seminars focused on specific issues in the teaching of writing. Elements of the pedagogy program include class visits; group evaluation of writing assignments; workshops and lectures; a handbook on teaching; a library of teaching materials; a program web site with links to other writing program sites; and individual work with mentors and peers.

TRAINING FOR PEER WRITING CONSULTANTS

PWR teaches a course on the tutoring of writing (PWR 195) for undergraduates selected to serve as peer writing consultants in the Stanford Writing Center and across the campus.

COURSES

The Writing and Rhetoric requirement approved by the Faculty Senate in May 2001 includes courses at three levels. The first-level course, taken in the first year, can be satisfied by courses in PWR or Structured Liberal Education; the curriculum emphasizes analysis and research-based argument. The second-level course, to be completed by the end of the sophomore year, is a writing and oral/multimedia presentation course taught by the Program in Writing and Rhetoric and by other programs and departments; completion of Structured Liberal Education also satisfies the second-level requirement. The third-level course is a Writing in the Major (WIM) course taught in each major. WIM courses provide students with systematic opportunities to develop skills for writing in their chosen fields. A list of certified WIM courses may be found in the table of “Undergraduate Major Unit Requirements” in the “Undergraduate Degrees and Programs” section of this bulletin. WIM course descriptions may be found under individual department and program sections.

The new sequence of required courses provides a coordinated approach responsive to how students mature as writers, researchers, and presenters during their undergraduate years. At each level, students are given opportunities to develop greater sophistication in conducting inquiry and producing scholarly work in progressively more specific disciplinary contexts.

Before the term in which students enroll in the first two levels of the requirement, they review course descriptions on the program web site at http://pwr.stanford.edu. After reviewing the offerings, students submit a list of top choices, and the PWR office assigns students to courses based on these preferences.

THE WRITING AND RHETORIC 2 REQUIREMENT

As noted above, the second-level course requirement may be satisfied through completion of courses offered through PWR or by other programs and departments. Before the quarter in which students are assigned to enroll in the second-level course, they will be able to review all available courses that meet the requirement on the program web site at http://pwr.stanford.edu. In addition to PWR 2, some Stanford Introductory Seminars offered in the Winter and Spring quarters satisfy the second-level Writing and Rhetoric requirement (WR 2); these courses were not available at the time this Bulletin went to press. These courses require an additional application form. Please see the Stanford Introductory Seminars web site at http://introsems.stanford.edu/, and their Winter and Spring supplements for more information.

COMMUNITY WRITING PROJECT (CWP)

Students may elect to enroll in a section of PWR 1 or 2 which has the designation “CWP” on the PWR web site. Such students write at least one project during the term (a grant proposal, pamphlet, news article, profile, or web site) for a local community service agency. The Community Writing Project coordinator provides an orientation for each CWP section, including a description of participating agencies. Community Writing Project assignments are then made in consultation with the instructor and the CWP coordinator.

PWR 1. Writing and Rhetoric 1—Fulfills first level of the writing requirement. Rhetorical and contextual analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Also for students admitted to Stanford prior to Autumn 2003-04 who scored 4 or 5 on the English AP Exam or 6 or 7 on the International Baccalaureate Higher Level Exam.

4 units, Aut, Win, Spr (Staff)

PWR 2. Writing and Rhetoric 2—Further work in developing skills in argument and research-based writing, with emphasis on oral communication and multimedia presentations. Individual conferences with instructor, and collaborative projects. Prerequisite: PWR 1.

4 units, Aut, Win, Spr (Staff)

PWR 4. Directed Writing—For students who have completed the first two levels of the writing requirement and desire further work on developing their writing emphasizing style, genre, and writing for a range of audiences and in varied disciplinary contexts. Workshops and individual conferences.

3-4 units, Win, Spr (Staff)

PWR 5. Independent Writing—For students who have completed the first two levels of the writing requirement and wish to work on a specialized writing project with the guidance of a PWR instructor.

1-5 units, Aut, Win, Spr (Staff)

PWR 6. Writing Workshop

1 unit, Aut (Staff)

PWR 191. Advanced Writing—Open to undergraduates and graduate students. Tutorials, workshops, discussions. Various nonfiction genres. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

3 units, Spr (Diogenes)

PWR 192. Projects in Research, Writing, and Rhetoric—Advanced work on research projects, early drafts of theses, expository excursions, manifests, scripts, first-hand accounts, investigative reports, proposals, comic disputations, and other textual, rhetorical, and imaginative explorations. Shared work, discussions, and examination of methods, rhetorics, and styles in all disciplines. Prerequisite: consent of instructor.

1-5 units, Aut (Obenzinger)

PWR 193. Writing the Honors Thesis—For students from all majors in the process of writing an honors thesis. Review of key elements of thesis process, including literature reviews, style, and documentation. Group and individual workshops.

1-5 units, Win, Spr (Obenzinger)

PWR 195. Peer Writing Tutor Training Course—For students selected to serve as peer writing tutors in the Stanford Writing Center and/or at other campus sites. Readings on and reflection about writing processes, the dynamics of writing and tutoring situations, tutoring techniques, learning styles, diversity, and ethics. Observation of tutoring sessions, written responses to readings, and other written work.

3 units, Spr (Moneyhun)

Dean: Larry D. Kramer

Vice Dean: Mark G. Kelman

Associate Dean for Curriculum: G. Marcus Cole

Associate Dean for Research and Academics: Michael Klausner

Senior Associate Dean and Chief Financial Officer: Frank Brucato

Associate Deans: Faye Deal, Catherine Glaze, Catherine Nardone, Susan Robinson

Associate Professor: Michele Landis Dauber

Assistant Professors: Mariano-Florentino (Tino) Cuellar, Amalia D. Kessler, Jenny S. Martinez

Associate Professors (Teaching): Michelle Alexander (on leave Autumn), William S. Koski, Jayashri Srikantiah, Allen Weiner

Senior Lecturers: David W. Mills, Alan Morrison, Maude H. Pevere

Courtesy Professor: Daniel P. Kessler

Visiting Professors: Christopher R. Leslie, Lawrence C. Marshall, R. Anthony Reese, Norman W. Spaulding, Eugene Volokh, Eric W. Wright, Nancy A. Wright

Legal Research and Writing Instructors: Eric Fink, Grace Hum, Suzanne Kim, Shana LaZerow, Beth McLellan, Jeanne Merino

School Office: Stanford Law School, Office of the Registrar, Law School Building 559, Nathan Abbot Way, Stanford, CA 94305-8610

Phone: (650) 723-0994

Web Site: http://lawreg.stanford.edu

Courses given in Law have the subject code LAW. For a complete list of subject codes, see Appendix.

The School of Law was established as a department of the University in 1893. Its purpose is to provide a thorough legal education for students who are fitted by their maturity and their previous academic training to pursue professional study under university methods of instruction. The curriculum leading to the first professional degree in law (J.D.) constitutes an adequate preparation for the practice of law in any English-speaking jurisdiction. Graduate work leading to the degrees of Master of Laws, Master of the Science of Law, and Doctor of the Science of Law are also offered. For the full curriculum, see the Stanford University School of Law web site at http://lawreg.stanford.edu. The school is on a two-term academic calendar: Autumn term classes begin on September 7, 2004 and the term ends on December 15, 2004; Spring term classes begin on January 18, 2005, and the term ends on May 2, 2005.

COURSES

GRADUATE

The following courses are open to qualified graduate students in other departments of the University with the consent of the instructor:

LAW 277. The Endangered Species Act and Federalism—The objectives of the act; how well it has worked since enactment by Congress in 1973; and opportunities for improving its effectiveness. The role of states and local governments; what states are doing to protect biodiversity; how federal and state agencies interact under the act; and how states might increase their involvement. The relevance of federalism in environmental policy. Stanford hosts a major policy conference on the Endangered Species Act and federalism in early 2005; papers produced in this seminar provided to conference participants to serve as background.

2 term units, Aut semester (Thompson)

LAW 604. Environmental Workshop—Academics, practitioners, and policy makers discuss their current research or work in the environmental and natural resources field. Students collaborate to lead in-class discussions. Short reflection/discussion papers required.

2 term units, Spr semester (Caldwell)

LAW 307. Gender, Law, and Public Policy—(Same as FEMST 307.) Topics: equal protection standards, employment, reproductive rights, sexual harassment, rape, domestic violence, pornography, sexual orientation, feminist legal theory, and the family. Prerequisite: second- or third-year law student; others by consent of instructor.

3 term units, Spr semester (Rhode)
LAW 329. Intellectual Property as a Strategic Asset—Open to business students. How intellectual property, including patents, trademarks, copyrights, and trade secrets, creates value. Why intellectual property based companies are among the most profitable, and why firms such as Ford are shedding physical assets to concentrate their patent portfolios and acquire brand names. Research project explores how a student-chosen company manages intellectual property as an asset and how it manages the law’s impact on the asset.  
2 term units, Aut (Goldstein)

LAW 356. Public Policy Towards Disconnected Youth—Focus is on chronically unemployed school dropouts, youth in the juvenile justice system, and adolescents in the foster care system. Changes in law, policy, social service systems, and education needed to help these youth; the current legal and policy structure for responding to their needs and behavior; and strengths and weaknesses of current approaches. Emphasis is on legislative rather than judicial perspective. Goal is to develop recommendations for policy makers, advocates, and service providers. Student teams work on projects with local government or nonprofit agencies; teams present recommendations during Spring semester. Full-year course. Mandatory first class attendance.  
4 units, Aut (Goldstein)

LAW 369. Professional Ethics—Focus is on the legal profession; also related fields such as business, engineering, education, and environmental regulation. Topics include candor, confidentiality, conflicts of interest, client relationship, competence, regulatory structures, social responsibility, and public service.  
3 term units, Aut semester (Rhode)

LAW 538. Sociology of Law—Same content as SOC 136/236. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; law in action versus law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement.  
3 units, Aut (Dauber)

LAW 611. Interdisciplinary Seminar on Conflict Resolution—(Same as MS&E 459, PSYCH 283.) Problems of conflict resolution and negotiation from an interdisciplinary perspective. Presentations by faculty and scholars from other universities.  
1 term unit, Spr semester (Hensler)

LAW 670. White Collar Crime—The law of economic and political crimes. Topics include bribery and gratuities, mail and wire fraud, tax fraud, extortion, securities fraud, racketeering, and money laundering. Quasi-criminal laws on forfeiture of assets. Statutes, jurisprudence underlying these crimes, and related issues of prosecutorial discretion and attorney ethics.  
3 term units, Aut semester (Mills)

NONPROFESSIONAL

The following course is open to undergraduates and graduate students in other departments, and may be counted toward the B.A. degree, but not toward professional degrees in law.  

LAW 106. Introduction to American Law—(Same as AMSTUD 179, POLISCI 122.) For undergraduates. The structure of the American legal system, including the courts; American legal culture; the legal profession and its social role, the scope and reach of the legal system, the background and impact of legal regulation, the relationship between the American legal system and American society in general. GER:3b  
5 units, Aut (Friedman)

SCHOOL OF MEDICINE

Dean: Philip Pizzo  
Senior Associate Dean for Research and Training: John C. Boothroyd  
Senior Associate Dean for Research and Training: Harry B. Greenberg  
Senior Associate Dean for Medical Education: Julie Parsonnet

The School of Medicine offers courses of study leading to the M.S., Ph.D., and M.D. degrees.

UNDERGRADUATE PROGRAMS

At the undergraduate level, a number of the school’s courses are open to any registered Stanford student who has fulfilled the prerequisites, subject to the usual limits of course enrollment and faculty approval. In the classroom, the school offers courses targeted to undergraduates as well as graduate-level courses where advanced undergraduates with a strong background in the life sciences are welcome. Among these offerings are many Stanford Introductory Seminars for freshmen and sophomores; interested students are encouraged to peruse the complete list of these offerings in the “Stanford Introductory Seminars” section of this bulletin or at http://www.stanford.edu/group/introsem/

GRADUATE PROGRAMS

M.S. AND Ph.D. PROGRAMS

Crossdisciplinary training is a primary feature of the programs offered at the Stanford School of Medicine. Home programs enable doctoral students the opportunity to carry out dissertation research and training with the School of Medicine basic science faculty, and the Biological Sciences and Biophysics faculty in the School of Humanities and Sciences. Detailed information on M.S. and Ph.D. programs, curriculum, and research can be found at http://med.stanford.edu/education/. Applications for all graduate programs may be obtained from Graduate Admissions, Office of the University Registrar, Old Union Building, 520 Lasuen Mall, Stanford University, Stanford, CA 94305-3005, or at http://gradadmissions.stanford.edu/.

M.D. PROGRAMS

The School of Medicine seeks to attract creative students who are passionate about scholarship and wish to improve the health of the world’s people through research, innovation, and leadership. Stanford’s new curriculum provides a state-of-the-art education in biomedical and clinical sciences along with in-depth study and independent research through scholarly concentrations. The new curriculum features interdisciplinary learning, with streamlined content and melding of basic science and clinical instruction across the curriculum. Blocks of unscheduled time allow for individual or group study, participation in elective courses, research, and reflection. Alternative pathways through the curriculum include an option of a fifth or sixth year of study as well as opportunities for earning joint degrees.

Broad clinical science education occurs throughout the curriculum with exposure to patient care and the practice of medicine beginning on the first day of medical school. Students may begin clinical clerkships as early as May of the second year. All medical students complete formal clinical experiences in medicine, surgery, pediatrics, obstetrics-gynecology, family medicine, psychiatry, neurology, and critical care.

Scholarly concentrations offer opportunities for in-depth study in subject areas including bioengineering, biomedical ethics and medical humanities, biomedical informatics, clinical research, community health and public service, health services and policy research, immunology, molecular basis of medicine, women’s health, and other areas that are independently designed. Students may pursue a scholarly concentration through the Original Research Track or the Scholars Track. Students in the Original Research Track pursue in-depth study in the area of concentration as well as a four quarter, independent research project, concluding with completion and write-up of the project. Original research is not
required in the Scholars Track. Students also have the opportunity to conduct a Traveling Scholars project overseas. Following completion of 13 quarters of academic work, additional quarters may be taken at a decreased tuition rate. Completion of the M.D. degree must be achieved within six years, unless a petition is granted to extend this time frame.

Students with strong interests in medical research as a career are urged to investigate opportunities available under the auspices of the Medical Scientist Training Program (MSTP). This program provides a limited number of students the opportunity to pursue an individualized program of research and course work leading to both the M.D. and Ph.D. degrees. The estimated time for completion of the program is seven years. Students interested in participating in the MSTP are asked to provide supplemental information relevant to their research background and are considered for entry into the MSTP at the time of their application to the School of Medicine. Stanford also participates in a joint Master of Public Health program with the University of California, Berkeley, which requires an additional year to complete.

Stanford recognizes the diversity of the United States and California populations and is committed to representing this diversity in the medical student class. Provided an applicant to the school has completed the basic courses in physics, chemistry, and biology, the choice of an undergraduate major may reflect other interests, including the arts and humanities. Course work in biochemistry and the behavioral sciences is strongly recommended because of its importance in understanding medicine. Extracurricular activities and breadth of interests and experiences play an important role in the selection of students from among those applicants having superior records.

For further details on the M.D. degree, including admission requirements, see http://med.stanford.edu/. For application materials write to the Committee on Admissions, Stanford University School of Medicine, 251 Campus Drive, MSOB X3C01, Stanford, CA 94305-5404.

**BIOCHEMISTRY**

*Chair:* Suzanne R. Pfeffer  
*Suzanne R. Pfeffer, James A. Spudich*  
*Associate Professor:* Pehr A. B. Harbury  
*Assistant Professors:* Aaron F. Straith, Julie A. Theriot  
*Courtesy Professors:* Chaitan S. Khosla, Sharon Long  
*Department Offices:* Beckman Center, B400  
*Mail Code:* 94305-5307  
*Phone:* (650) 723-6161  
*Web Site:* http://biochem.stanford.edu/

Courses given in Biochemistry have the subject code BIOC. For a complete list of subject codes, see Appendix.

Biochemistry is a department within the School of Medicine, with offices and labs located in the Beckman Center for Molecular and Genetic Medicine at the Stanford Medical Center. Courses offered by the department may be taken by undergraduate, graduate, and medical school students.

Advanced courses are offered in more specialized areas and they emphasize the most recent developments in biochemistry, cell biology, and molecular biology. These courses include the physical and chemical principles of biochemistry, enzyme reaction mechanisms, membrane trafficking and biochemistry, molecular motors and the cytoskeleton, mechanisms and regulation of nucleic acid replication and recombination, the biochemistry of bacterial and animal viruses, the molecular basis of morphogenesis, the molecular and cell biology of yeast, and the structure and function of both eukaryotic and prokaryotic chromosomes.

Opportunities exist for directed reading and research in biochemistry and molecular biology, utilizing the most advanced research facilities, including those for light and electron microscopy, chromatography and electrophoresis, protein and nucleic acid purification, rapid kinetic analysis, synthesis and analysis, single molecule analyses using laser light traps, microarray generation and analysis and computer graphic workstation facilities for protein and nucleic acid structural analysis. Ongoing research utilizes a variety of organisms, from bacteria to animal cells.

**GRADUATE PROGRAM**

**DOCTOR OF PHILOSOPHY**

Requirements for the M.S. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin. The department does not offer undergraduate degrees.

The Department of Biochemistry offers a Ph.D. program which begins in the Autumn Quarter of each year. The program of study is designed to prepare students for productive careers in biochemistry; its emphasis is training in research, and each student works closely with members of the faculty. In addition to the requirement for a Ph.D. dissertation based on original research, students are required to complete six advanced courses in biochemistry and related areas. Selection of these courses is tailored to fit the background and interests of each student. A second requirement involves the submission of three research proposals, which are presented by the student to a small committee of departmental faculty members who are also responsible for monitoring the progress of student curricular and research programs. All Ph.D. students are expected to participate actively in the department’s seminar program, and students are encouraged to attend and to present papers at regional and national meetings in cellular biochemistry and molecular biology. Teaching experience is an integral part of the Ph.D. curriculum and is required for the degree.

The Department of Biochemistry offers an M.S. degree only to students already enrolled in the Ph.D. program. Students should contact the Graduate Studies adviser for more details.

Those applying for graduate study should have at least a baccalaureate degree and should have completed work in cell and developmental biology, biochemistry and molecular biology, and genetics. Also required are: at least one year of university physics; differential and integral calculus; and analytical, organic, inorganic, and physical chemistry. The department is especially interested in those applicants who have research experience in biology or chemistry. Students must submit an application, including transcripts and letters of recommendation, by December 15.

Beginning September 1, applications are available and can be requested by mail from Graduate Admissions, Registrar’s Office, Old Union, 520 Lasuen Mall, Stanford University, Stanford CA 94304-3005, by phone (650) 723-4291, or email at gradadmissions@stanford.edu. Applications may also be submitted electronically at http://gradadmissions.stanford.edu and http://www.med.stanford.edu/school/biosciences/. Applicants are notified by April 1 of decisions on their applications. Stanford University requires scores from the Graduate Record Examination (GRE) (verbal, quantitative, and analytical), and applicants must submit scores from the GRE Subject Test in either biochemistry, biology, or chemistry. Applicants should take the October GRE exam.

All applicants are urged to compete for non-Stanford fellowships or scholarships, and U.S. citizens should complete an application for a National Science Foundation Predoctoral Traineeship. Students are provided with financial support to cover normal living expenses; Stanford tuition costs are paid.

All applicants for admission to the department are considered without regard to race, color, creed, religion, sex, age, national origin, or marital status.

Postdoctoral research training is available to graduates who hold a Ph.D. or an M.D. degree. Qualified individuals may write to individual faculty members for further information.

At present, the primary research interests of the department are the structure and function of proteins and nucleic acids, the biochemistry and control of development processes, molecular motors and the cytoskeleton, the trafficking of proteins between membrane-bound organelles, the control and regulation of gene expression, bioinformatics/protein structure design, and the application of microarrays to problems in human health and disease.
COURSES

BIOC 118Q. Genomics, Bioinformatics, and Medicine—Stanford Introductory Seminar. Preference to sophomores. The kind of knowledge gained from sequencing the human genome and the implications of such knowledge for medicine and biomedical research. Novel diagnostic methods and treatment of diseases, including gene therapy and drug design. The ethical implications of genetic information. The use of genome and disease databases to determine the function of genes involved in disease. See http://biochem118.stanford.edu/. Recommended: BIOSCI 42 or HUMBIO 2A. GER:2b
3 units, Spr (Brutlag)

BIOC 199. Undergraduate Research—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

BIOC 202. Metabolic Biochemistry: Structure, Metabolism, and Energetics—Structure and function of biological molecules, enzyme kinetics and mechanisms, bioenergetics, pathways of intermediary metabolism and their control, and membrane structure and function. Course offered via online lectures and problem sets, with weekly small-group review sessions.
1-3 units, Aut, Sum (Pfeffer, Theriot, Harbury)

BIOC 205. Molecular Foundations of Medicine—Topics include: DNA structure, replication, repair, and recombination; chromosome structure and function; gene expression including mechanisms for regulating transcription and translation; and methods for manipulating DNA, RNA, and proteins. Patient presentations illustrate how molecular biology affects the practice of medicine.
3 units, Aut (Chu, Brown, Krasnow)

BIOC 210. Advanced Topics in Membrane Trafficking—The structure, function, and biosynthesis of cellular membranes and organelles. Current literature. Prerequisites: 200, 203, or equivalents, and consent of instructor.
3 units (Pfeffer) not given 2004-05

BIOC 214. Physical and Chemical Principles of Enzyme Function—Enzymatic mechanisms, with emphasis on the fundamental behavior of biochemical systems and the properties that emerge due to the complex nature of these systems. Student presentations on specific enzymes based on classic and current literature, developed in consultation with the instructor. Prerequisites: BIOC/ SBIO 241 and a course in organic chemistry.
3-5 units (Herschlag) not given 2004-05

BIOC 215. Frontiers in Biological Research—(Same as DBIO 215, GENE 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker’s primary research literature. Students meet with the speaker after the seminar to discuss their research and future directions, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.
1 unit, Aut, Win, Spr (Harbury, Kingsley, Baker)

BIOC 217. Advanced Tutorial in Special Topics—Readings and tutorial in membrane biochemistry, enzyme mechanisms, chromosome structure, biochemical genetics, bacterial and animal viruses, and nucleic acid enzymology. Conducted by advanced graduate students and post-doctoral fellows.
1-3 units, Aut, Win, Spr, Sum, by arrangement (Staff)

BIOC 218. Computational Molecular Biology—Online course; see http://biochem218.stanford.edu. For molecular biologists and computer scientists. Major issues, existing methods, and future directions concerning biological sequences and structure. Topics: accessing molecular databases, pattern search, classification of sequence and structure, alignment of sequences, rapid similarity searching, phylogenies, automated pattern learning, representing protein structure, gene expression profiling, clustering expressed genes, and discovering transcription factor binding sites. Lecture/lab. Final project. Enrollment limited to 40. Prerequisite: BIOSCI 52 or equivalent, or consent of instructor.
3 units (Brutlag) not given 2004-05

BIOC 220. Chemistry of Biological Processes—(Same as MPHA 220.) The principles of organic and physical chemistry as applied to biomolecules. Goal is a working knowledge of chemical principles that underlie biological processes, and chemical tools used to study and manipulate biological systems. Prerequisites: organic chemistry and biochemistry, or consent of instructor.
4 units, Aut (Wandless, Herschlag, Chen, Bogoy)

BIOC 221. The Teaching of Biochemistry—Required for teaching assistants in 203, 204, 217, or 218. Practical experience in teaching on a one-to-one basis, and problem set design and analysis. Familiarization with current lecture and text materials; evaluations of class papers and examinations. Prerequisite: enrollment in the Biochemistry Ph.D. program or consent of instructor.
3 units, Aut, Win, Spr, Sum (Staff)

BIOC 230. Molecular Interventions in Human Disease—For M.D. students who intend to declare a concentration in molecular basis of medicine, M.S.T.P. students, and Ph.D. students interested in medicine. Advanced medical biochemistry focusing on cases where molecular-level research has led to new medical treatments or changes in the understanding of important diseases. The underlying molecular basis of diseases and the reasons for success and failure in molecular approaches to treatment. Student-led discussions on primary medical and scientific literature.
2-3 units, Aut (Theriot, Harbury)

BIOC 241. Biological Macromolecules—(Enroll in SBIO 241.)
3-5 units, Aut (Puglisi, Block, Herschlag, Kirkegaard, McKay, Pande, Garcia)

BIOC 242. Methods in Molecular Biophysics—(Enroll in SBIO 242.)
3 units, Win (Weis, Puglisi) alternate years, not given 2005-06

BIOC 257. Currents in Biochemistry—Limited to graduate students and postdoctoral fellows in Biochemistry. Seminars by Biochemistry faculty on their ongoing research. Background, current advances and retreats, general significance, and tactical and strategic research directions. Written reviews required.
1-2 units (Kornberg, Lehman) not given 2004-05

BIOC 299. Directed Reading—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum, by arrangement (Staff)

BIOC 399. Research and Special Advanced Work—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum, by arrangement (Staff)

BIOC 450. Introduction to Biotechnology—(Same as CHEMENG 450.) Faculty from the schools of Medicine, Humanities and Sciences, and Engineering, and industrial speakers review the interrelated elements of modern biotechnology. Topics: development of recombinant protein pharmaceuticals, bacterial fermentation and scale-up, mammalian cell culture and scale-up, transgenic animals, transgenic protein production in plants, isolation and purification of protein pharmaceuticals, formulation and delivery of pharmaceutical proteins, environmental biotechnology, metabolic engineering, industrial enzymes, diagnostic devices, transcriptomics and proteomics, drug delivery systems. Prerequisite: graduate student or upper-division undergraduate in sciences or engineering.
3 units, Spr (Staff)

1 unit, Aut, Win, Spr (Robertson)
CENTER FOR BIOMEDICAL ETHICS

Co-Directors: David C. Magnus, Thomas A. Raffin
Associate Director: Mildred K. Cho
Assistant Director: Anne J. Footer
Participating Faculty and Staff: Clarence H. Braddock, LaVera M. Crawley, Margaret Eaton, Maren Grainger-Monsen, Henry Greely, Judy Illes, Agnieszka Jaworska, Barbara A. Koenig, Sandra S. Lee, Jose R. Maldonado, Audrey Shafer, Sara L. Tobin
Center Offices: 701 Welch Road, Building A, Suite 1105, Palo Alto, CA 94304
Mail Code: 94304-5748
Phone: (650) 723-5760
Web Site: http://scbe.stanford.edu/

The Stanford University Center for Biomedical Ethics (SCBE) is dedicated to interdisciplinary research and education in biomedical ethics, and provides clinical and research ethics consultation. SCBE serves as a scholarly resource on emerging ethical issues raised by medicine and biomedical research.

SCBE offers a scholarly concentration in Biomedical Ethics and Medical Humanities to medical students. This program allows medical students to study in depth the ethical and humanistic dimensions of research and practice. Additional information on requirements for the scholarly concentration, and a comprehensive list of other related courses is available at http://scbe.stanford.edu/education/bemh.html.

COURSES

For further information, see the Stanford University School of Medicine Catalog.

MEDICINE

MED 211. Creative Writing—For writers of all levels. Uses of creative writing including understanding the experience of medical training.
2 units, Win (Shafer)

INDE 212. The Human Condition: Medicine, Arts, and Humanities—
The interdisciplinary field of medical humanities: the use of the arts and humanities to examine medicine in personal, social, and cultural contexts. Topics include the doctor/patient relationship, the patient perspective, the meaning of doctoring, and the meaning of illness. Sources include visual and performance arts, film, and literary genres such as poetry, fiction, and scholarly writing. Non-M.D. students may enroll with consent of instructor.
2 units, Spr (Zaroff, Shafer)

MED 250A. Medical Ethics—Required core course for Scholarly Concentration in Biomedical Ethics and Medical Humanities. The field of bioethics including theoretical approaches to bioethical problems. Contemporary controversies and clinical cases. Issues include: genetics and stem cell research; rationing; ethical issues in care at the end of life; organ transplantation issues. Values that arise in different situations and clinical encounters. This course is the required core course for the Scholarly Concentration in Biomedical Ethics and Medical Humanities.
2 units, Win (Magnus)

MED 250B Medical Ethics II—Topic varies by year. The integration of ethical theory with applications of theory or conceptual issues in medicine, health care, and the life and social sciences. Possible topics include: death and dying; genetics and ethics, concepts of health and disease; the ethics of international research; and ethical implications of new reproductive technology.
2 units, Spr (Magnus)

MED 255. The Responsible Conduct of Research—A forum for scientists to familiarize themselves with institutional policies/practices and professional standards that define scientific integrity. Overview of ethics in research, authorship, patents, and human interest at the academic-commercial interface, and small group sessions for more extended discourse between students and faculty. Completion fulfills NIH/AD-AMHA requirement for instruction in the ethical conduct of research. Required course for incoming students.
1 unit, Win (Footer)

INTERDEPARTMENTAL OFFERINGS

BUSINESS

GSBGEN 522. Ethical Issues in the Biotech Industry
2 units, Win (Eaton)

CULTURAL AND SOCIAL ANTHROPOLOGY

CASA 82A. Race and Medicine
5 units (Lee) not given 2004-05

CASA 130A. Bioethics and Anthropology
5 units, Spr (Koenig)

ETHICS IN SOCIETY

ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice
5 units, Spr (Koenig)

HEALTH RESEARCH AND POLICY

HRP 209. Medicine and the Law
2 units, Win (Eaton)

HRP 210. Health Law and Policy—(Same as LAW 313)
3 units, Aut semester (Greely)

PHILOSOPHY

PHIL 78. Medical Ethics
4 units, Spr (Collier)

BIOMEDICAL INFORMATICS PROGRAM

Committee: Russ B. Altman (Chair and Program Director); Mark A. Musen (Co-Director); Betty Cheng, Amar K. Das, Lawrence M. Fagan (Associate Directors); Douglas L. Brutlag, Parvati Dev, Alan M. Garber, Teri E. Klein, Henry Lowe

Participating Faculty and Staff by Department:

Anesthesiology: David M. Gaba (Professor)
Biochemistry: Douglas L. Brutlag (Professor)
Bioengineering: Scott L. Delp (Associate Professor)
Biostatistics: Richard A. Olshen (Professor)
Business: Alain C. Enthoven (Professor, emeritus), Alan M. Garber (Professor, by courtesy)
Chemistry: Vijay Pande (Assistant Professor)
Civil and Environmental Engineering: Raymond E. Levitt (Professor)
Computer Science: Serafim Batzoglou (Assistant Professor), Leo Guibas (Professor), Daphne Koller (Associate Professor), Jean-Claude Latombe (Professor), Gior G. Wiederhold (Professor, Research, emeritus), Tur Y soin (Professor)
Electrical Engineering: Albert Macovski (Professor, emeritus)
Genetics: Russ B. Altman (Associate Professor), Mike Cherry (Associate Professor, Research), Stanley N. Cohen (Professor), Stuart Kim (Associate Professor), Teri E. Klein (Senior Research Scientist), Richard M. Myers (Professor)
Health Research and Policy: Byron W. Brown, Jr. (Professor, emeritus), Mark A. Hlatky (Professor), Richard A. Olshen (Professor), Robert Tibshirani (Professor)
Management Science and Engineering: Ronald A. Howard (Professor), Ross D. Shachter (Associate Professor)

Mathematics: Samuel Karlin (Professor, emeritus)

Medicine: Terrance Blaschke (Professor), Robert W. Carlson (Professor), Amar K. Das (Assistant Professor), Parvati Dev (Senior Research Scientist), Lawrence M. Fagan (Senior Research Scientist), Alan M. Garber (Professor), Mary Goldstein (Associate Professor), Michael Higgins (Consulting Associate Professor), Peter D. Karp (Consulting Assistant Professor), John Koza (Consulting Professor), Henry Lowe (Associate Professor, Research; Senior Associate Dean for Information Resources and Technology), Mark A. Musen (Professor), Douglas K. Owens (Associate Professor), Glenn Rennels (Consulting Assistant Professor), P.J. Utz (Associate Professor), Michael Walker (Consulting Assistant Professor)

Neurosurgery: John R. Adler (Professor), Ramin Shahidi (Assistant Professor, Research)

Obstetrics and Gynecology: W. LeRoy Heinrichs (Professor, emeritus)

Pathology: Arend Sidow (Assistant Professor)

Psychiatry and Behavioral Sciences: Amar K. Das (Associate Professor)

Radiation Oncology: Arthur L. Boyer (Professor), Lei Xing (Assistant Professor, Research)

Radiology: Gary H. Glover (Professor), Sandy A. Napel (Professor), Norbert J. Pec (Professor), Geoffrey Rubin (Associate Professor)

Statistics: Trevor J. Hastie (Professor), Susan Holmes (Professor), Art Owen (Professor)

Structural Biology: Michael Levitt (Professor)

Surgery: Thomas Ruggmeier (Professor), Charles Taylor (Assistant Professor, Research)

Program Offices: MSOB 215
Mail Code: 94305-5479
Phone: (650) 723-6979
Web Site: http://www.smi.stanford.edu/academics/

Courses given in Biomedical Informatics Program have the subject code BIOMEDIN. For a complete list of subject codes, see Appendix.

This interdisciplinary program was created in response to a recognized need for well-trained researchers and academic leaders in the expanding field of biomedical informatics. The Biomedical Informatics Program was formerly called Medical Informatics Sciences (1982-2000).

The program in Biomedical Informatics emphasizes research to develop novel computational methods that can advance biomedicine. Students receive training in the investigation of new approaches to conceptual modeling and to development of new algorithms that address challenging problems in the biological sciences and clinical medicine. Students with a primary interest in developing new informatics methods and knowledge are best suited for this program. Students with a primary interest in the biological or medical application of existing informatics techniques may be better suited for training in the application areas themselves.

GRADUATE PROGRAMS

The Biomedical Informatics Program is interdepartmental and offers instruction and research opportunities leading to M.S. and Ph.D. degrees in Biomedical Informatics. All students are required to complete the core curriculum requirements outlined below, and also to elect additional courses to complement both their technical interests and their goals in applying informatics methods to clinical settings, biology, or imaging. Students who fail to maintain a 3.0 grade point average (GPA) in all five categories of the core curriculum are expected to pass a comprehensive exam in that area before the graduate degree is granted. In addition, all degree candidates must pass an oral examination that tests the student’s ability to integrate the various components of the curriculum and to relate them to the overall field of biomedical informatics.

The core curriculum is common to all degrees offered by the program but is adapted or augmented depending on the interests and prior experience of the student. Deviations from the core curriculum outlined below must be justified in writing and approved by the student’s Biomedical Informatics academic adviser and the chair of the Biomedical Informatics Committee. It should be noted, however, that the program is intended to provide flexibility and to complement other opportunities in applied medical research that exist at Stanford. Although most students are expected to comply with the basic program of study outlined here, special arrangements can be made for those with unusual needs or those simultaneously enrolled in other degree programs within the University. Similarly, students with prior relevant training will have the curriculum adjusted to eliminate requirements that were met as part of their prior training.

CORE CURRICULUM

All students are expected to participate regularly in the Biomedical Informatics Student Seminar (201) and Colloquia (200), regardless of whether they register for credit in those courses. In addition, all students are expected to fulfill requirements in the following five categories:

1. Core Biomedical Informatics (15 units): students are expected to understand current applications of computers in biology and medicine and to develop a broad appreciation for research in the management of biomedical information. Required courses are the three quarter sequence Introduction to BIOMEDIN 210, 211, and 212, all of which should be taken during the first year in the program. Students must also take an additional 3 units of Biomedical Informatics course work (which may include crosslisted courses from other departments, but not including BIOMEDIN 200, 201, 299, 302, 303, or 305), selected in consultation with the academic adviser. BIOMEDIN 212 is required.

2. Computer Science (9 units): the student is expected to acquire a knowledge of the use of computers, computer organization, programming, and symbolic systems. It is assumed that students will have had matriculation prior computing experience at least equivalent to a course introducing the fundamentals of data structures and algorithms such as CS 103A, B, 103X, 106A, B, 106X, or other courses approved by the academic adviser or executive committee. All students are required to take a minimum of 9 units of courses in the Department of Computer Science. If similar courses have not been taken previously, these units must include CS 121, 161, and a course that requires significant programming and knowledge of machine architectures (for example, EE 182, CS 110, or the CS 193 series). For those who have taken such courses previously, replacement units may be taken from any other course in CS selected by the student and approved by the academic adviser. A course in databases is especially recommended. With the exception of CS 110, all other courses applied to the degree requirements must be numbered 137 or higher.

3. Probability, Statistics, and Decision Science (9 units): students are required to take at least three courses that span the following five topics: basic probability theory, Bayesian statistics, decision analysis, machine learning, and experimental-design techniques. Prior courses in statistics at least equivalent to STATS 60 and calculus equivalent to MATH 42 are prerequisites. A prior course in linear algebra equivalent to MATH 103 or 113 is recommended. For the probability requirements, students may, for example, take MS&E 120, STATS 116, or MS&E 221. For the statistics requirements, students should take STATS 141, if they have not had an equivalent class prior to entry to the program. Otherwise, sequences (taken after STATS 116) may include STATS 200 followed by a course in stochastic modeling, machine learning or data mining, such as STATS 202, 215, or 315A, B, or CS 228 or 229. Options for decision analysis include MSE 152 or 252, or cost effectiveness analysis (BIOMEDIN 432). Specific courses should be chosen in consultation with the student’s academic adviser. Also recommended is a course in the psychology of human problem solving.

4. Biomedical Domain Knowledge (9 units): students are expected to acquire an understanding of pertinent life sciences and how to analyze a domain of application interest. Prior courses in biology at least equivalent to BIOSCI 41 and 42 are prerequisites. All students must have completed a course in basic biochemistry, molecular biology, or genetics. Other areas of basic biology may be an acceptable alternative. Exposure to laboratory methods in biology is encouraged. All students without formal health care training must take BIOMEDIN 207.
5. **Social and Ethical Issues** (6 units): candidates are expected to be familiar with key issues regarding ethics, public policy, financing, organizational behavior, management, and pertinent legal topics. Students may select at least 6 units from suitable courses that include, for example, BIOMEDIN 250, 256, and 432; CS 201; HRP 390, 391, and 392, or any other advanced course in policy and social issues proposed by the student and approved by the Biomedical Informatics academic adviser.

The core curriculum generally entails a minimum of 46 units of course work, but can require substantially more or less depending upon the courses selected and the previous training of the student. The varying backgrounds of students are well recognized and no one is required to take courses in an area in which he or she has already been adequately trained; under such circumstances, students are permitted to skip courses or substitute more advanced work. Students design appropriate programs for their interests with the assistance and approval of their Biomedical Informatics academic adviser. At least 27 units of formal course work are expected.

**PROGRAM REQUIREMENTS FOR THE ACADEMIC M.S., PROFESSIONAL M.S., AND COTERMINAL DEGREES**

Students enrolled in any of the M.S. degrees must complete the program requirements in order to graduate. Programs of at least 54 units that meet the following guidelines are normally approved:

1. Completion of the core curriculum.
2. A minimum of 6 additional units of courses in Computer Science numbered 135 or higher, courses in Management Science and Engineering or Statistics numbered 200 or higher, PSYCH 256 or 267, or relevant courses in other departments approved by the student’s academic adviser.
3. Electives: additional courses to bring the total to 54 or more units.
4. Teaching: all students are expected to act as Teaching Assistants (TAs) for at least one course during their first two years of training. This will generally be in one of the informatics short courses, although another course approved by the program faculty may occasionally be substituted.

The University requirements for the M.S. degree are described in the “Graduate Degrees” section of this bulletin.

**MASTER OF SCIENCE (ACADEMIC)**

This degree is designed for individuals who wish to undertake in-depth study of biomedical informatics. Normally, a student spends two years in the program and implements and documents a substantial project during the second year. The first year involves acquiring the fundamental concepts and tools through course work and research project involvement. All first- and second-year students are expected to devote 50 percent or more of their time participating in research projects. Research rotations are not required, but can be done with approval of the academic adviser or training program director. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics. This degree requires a written research paper to be approved by two faculty members.

**MASTER OF SCIENCE (PROFESSIONAL)**

This new degree is primarily designed for the working professional who already has advanced training in one discipline and wishes to acquire interdisciplinary skills. This program is offered part-time and courses are available online. The professional M.S. is offered in conjunction with Stanford Center of Professional Development (SCPD), which establishes the rates of tuition and fees. SCPD is based on the honors cooperative model (HCP), which assumes that the student is working in a corporate setting and is enrolled in the M.S. on a part-time basis. The student has up to five years to complete the program. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

**MASTER OF SCIENCE (COTERMINAL)**

The coterminal degree program allows undergraduates to study for a master’s degree while completing their bachelor’s degree(s) in the same or a different department. Please refer to the “Coterminal Bachelor’s and Master’s Degrees” section under “Undergraduate Degrees and Programs” in this bulletin for additional information.

The coterminal Master of Science program follows the same program requirements as the Master of Science (Professional), except for the requirement to be employed in a corporate setting. The coterminal degree is only available to current Stanford undergraduates. Coterminal students are enrolled full-time and courses are taken on campus. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

**DOCTOR OF PHILOSOPHY**

The University’s basic requirements for the doctorate (residence, dissertation, examination, and so on) are discussed in the “Graduate Degrees” section of this bulletin.

Individuals wishing to prepare themselves for careers as independent researchers in biomedical informatics, with applications experience in bioinformatics, clinical informatics, or imaging informatics, should apply for admission to the doctoral program. The following are additional requirements imposed by the Biomedical Informatics Interdisciplinary Committee:

1. A student should plan and successfully complete a coherent program of study that includes the core curriculum, oral examination, and additional requirements for the master’s program. In addition, doctoral candidates are expected to take at least two more advanced courses (see categories under item 2 of the master’s program requirements). In the first year, two or three research rotations are strongly encouraged. The master’s requirements, including the oral examination, should be completed by the end of the second year in the program (six quarters of study, excluding summers). Doctoral students are generally advanced to Ph.D. candidacy after completing the oral examination. A student’s academic adviser has primary responsibility for the adequacy of the program, which is regularly reviewed by the Graduate Study Committee of the Biomedical Informatics program.
2. To remain in the Ph.D. program, each student must attain a grade point average (GPA) as outlined above, and must pass a comprehensive exam covering introductory level graduate material in any curriculum category in which he or she fails to attain a GPA of 3.0. The student must fulfill these requirements and apply for admission to candidacy for the Ph.D. by the end of six quarters of study (excluding summers). In addition, reasonable progress in the student’s research activities is expected of all doctoral candidates.
3. During the third year of training, generally in the Winter Quarter, each doctoral student is required to give a preproposal seminar that describes evolving research plans and allows program faculty to assure that the student is making good progress toward the definition of a doctoral dissertation topic. By the end of nine quarters (excluding summers), each student must orally present a thesis proposal to a dissertation committee that generally includes at least one member of the Graduate Study Committee of the Biomedical Informatics program. The committee determines whether the student’s general knowledge of the field, and the details of the planned thesis, are sufficient to justify proceeding with the dissertation.
4. As part of the training for the Ph.D., each student is required to be a teaching assistant for two courses approved by BMI; one should be completed in the first two years of study.
5. The most important requirement for the Ph.D. degree is the dissertation. Prior to the oral dissertation proposal and defense, each student must secure the agreement of a member of the program faculty to act as dissertation adviser. The principal adviser need not be an active member of the Biomedical Informatics program, but all committee members should include at least one participating BMI faculty member.
6. No oral examination is required upon completion of the dissertation. The oral defense of the dissertation proposal satisfies the University oral examination requirement.

7. The student is expected to demonstrate an ability to present scholarly material orally and present his or her research in a lecture at a formal seminar.

8. The student is expected to demonstrate an ability to present scholarly material in concise written form. Each student is required to write a paper suitable for publication, usually discussing his or her doctoral research project. This paper must be approved by the student’s academic adviser as suitable for submission to a refereed journal before the doctoral degree is conferred.

9. The dissertation must be accepted by a reading committee composed of the principal dissertation adviser, a member of the program faculty, and a third faculty member chosen from anywhere within the University.

COURSES

BIOMEDIN 156/256. Economics of Health and Medical Care—(Same as ECON 156/256.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisites: ECON 50 and 102A or equivalent statistics, or consent of instructor. Recommended: ECON 51.

5 units, Aut (Bhattacharya)

BIOMEDIN 200. Biomedical Informatics Colloquium—Series of colloquia offered by program faculty, students, and occasional guest lecturers. Credit available only to students in a Biomedical Informatics degree program. May be taken no more than three times for credit.

1 unit, Aut, Win, Spr (Musen)

BIOMEDIN 201. Biomedical Informatics Student Seminar—Participants report on recent articles from the Biomedical Informatics literature or their research projects. Goal is to teach presentation skills. Credit available only to students in an Biomedical Informatics degree program. May be repeated three times for credit.

1 unit, Aut, Win, Spr (Musen)

BIOMEDIN 210. Introduction to Biomedical Informatics: Fundamental Methods—(Same as CS 270.) Issues in the modeling, design, and implementation of computational systems for use in biomedicine. Topics: basic knowledge representation, controlled terminologies in medicine and biological science, fundamental algorithms, information dissemination and retrieval, knowledge acquisition, and ontologies. Emphasis is on the principles of modeling data and knowledge in biomedicine and on translation of resulting models into useful automated systems. Recommended: understanding of the basic principles of object-oriented systems at the level of CS 107.

3 units, Aut (Musen)

BIOMEDIN 211. Introduction to Biomedical Systems—(Same as CS 271.) Focus is on information systems and decision-support technology. System requirements, data, standards, algorithms, and implementation issues. Prerequisite: 210.

1-3 units, Win (Das)

BIOMEDIN 212. Biomedical Informatics Project Course—(Same as CS 272.) Hands-on software building. Students conceive, design, specify, implement, evaluate, and report on a software project in the domain of biomedicine. Focus is on pragmatics of creating written proposals, providing status reports, and preparing final reports. Introductory-level aspects of software engineering such as version control, UML, and testing. Prerequisites: 210 or 214, or consent of instructor; CS 106.

3 units, Aut (Altman, Cheng, Klein)

BIOMEDIN 214. Representations and Algorithms for Computational Molecular Biology—(Same as BIOE 214, CS 274.) Topics: algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, computing with networks of genes, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of data sources, knowledge representation and controlled terminologies for molecular biology, graphical display of biological data, and genetic algorithms and programming applied to biological problems. Prerequisites: programming skills and matrix algebra.

4 units, Spr (Altman)

1 unit, Spr (Altman)

BIOMEDIN 228. Influence Diagrams and Probabilistics Networks—(Enroll in MS&E 355.)

3 units (Shachter) not given 2004-05

BIOMEDIN 230. Knowledge Acquisition for Expert Systems—(Same as CS 525.) For graduate students. Experimental approaches to the construction of expert-system knowledge bases. Topics: interviewing techniques, formal and informal approaches to modeling expert knowledge, and automated tools that facilitate knowledge acquisition. Enrollment limited to 20. Prerequisite: one course in artificial intelligence.

2 units, Spr (Musen)

BIOMEDIN 231. Computational Molecular Biology—(Enroll in BIOE 214, 218.)

3 units (Bruhl et al.) not given 2004-05

3 units, Win (Hastie)

BIOMEDIN 234. Biomedical Genomics—How genomics is influencing medical research and health-care delivery, illuminating the genomic discoveries being translated into diagnostic and therapeutic medical applications. Themes: the relevance of human genome project and functional genomics to inherited and acquired diseases, and the role of public databases and computational methods for solving problems in biology. Human genetic variation, SNPs, comparative genomics, computer models of biological processes, microbial genomics, pharmacogenomics, structure-based drug design, gene therapy. Case studies demonstrate the use of information technologies for converting molecular biological data into knowledge that can improve patient care and accelerate the discovery of new therapeutics.

3 units, Win (Shafer)

BIOMEDIN 239. Computer-Based Medical Education—Directed reading and research for graduate students in web-based hypermedia and simulation techniques in education. Possible topics: replacement of a lecture or a lab session, distance learning, student models, and clinical case simulations.

1-6 units, Aut, Win, Spr, Sum (Dev)

BIOMEDIN 240. Causal Models in Biomedical Informatics—Computational formalisms for encoding causal models in biological and biomedical domains from recent work on modeling genetic networks; also models that arise in medical applications. Readings include papers
that describe causal models within a specific representational framework. Associated methods for reasoning over knowledge structures in that paradigm and for inducing such models from data. Goal is to understand how to represent, reason about, and discover biological knowledge in each framework, along with the strengths and weaknesses of that formalism.

3 units (Langlely) not given 2004-05

BIOMEDIN 251. Outcomes Analysis—(Same as HRP 252.) Introduction to methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.

3 units, Spr (Bhattacharya)

BIOMEDIN 262. Computational Genomics—(Same as CS 262.) Applications of computer science to genomics, and concepts in genomics from a computer science point of view. Topics: dynamic programming, genomic annotation of repeats, genes, and regulatory sequences, out-of-frame translation, and RNA structure. Prerequisites: 161 or familiarity with basic algorithms, and familiarity with probabilistic context-free grammars. Applications of these tools to sequence analysis: comparative genomics, DNA sequencing and assembly, genomic annotation of repeats, genes, and regulatory sequences, microarrays and gene expression, phylogeny and molecular evolution, and RNA structure. Prerequisites: 161 or familiarity with basic algorithmic concepts. Recommended: basic knowledge of genetics.

3 units, Win (Batzoglou)

BIOMEDIN 278. Probabilistic Models in Artificial Intelligence—(Enroll in CS 228.)

3 units, Aut (Koller)

BIOMEDIN 299. Directed Reading and Research
1-18 units, Aut, Win, Spr, Sum (Staff)

BIOMEDIN 301. Special Topics in Biomedical Informatics
1-6 units, Aut, Win, Spr, Sum (Staff)

BIOMEDIN 303. Statistics for Research—Emphasis is on when and how to use the methods rather than on proofs. How to describe data and detect unusual values, compare treatment effects, interpret p-values, detect and quantify trends, detect and measure association and correlation, determine the sample size and power for an experiment, and choose statistical tests and software. Topics include descriptive statistics (mean, median, standard deviation, standard error), probability, paired and unpaired t-tests, analysis of variance, correlation, regression, chi-square, discriminant analysis, and power and sample size. Statistical analysis software including Excel and Statistica.

1 unit, Spr (Walker)

BIOMEDIN 328. Computational Structural Biology—(Enroll in SBIO 228, BIOPHYS 228.)

3 units, Aut, Win (Levit)

BIOMEDIN 329. Topics in Artificial Intelligence—(Enroll in CS 329.)

3 units, by arrangement (Staff)

BIOMEDIN 345. Genome Database Seminar—(Same as CS 545G.) Principles and methodologies for databases that encode molecular biology information including DNA sequences, protein sequence and structure, gene expression, and metabolic and other functional genomics data. Representation and integration of data sources, and presentation for biomedical and pharmaceutical researchers. Issues: data structures and ontologies, cross-referencing, quality control and error detection, search processes, suitability of DBMSs, data provenance, and privacy protection for patient-derived information. Presentations by experts from commercial and research organizations. May be combined with a 395 project.

1 unit (Wiederhold) not given 2004-05

3-4 units, Spr (Hanrahan)

2-3 units, Aut (Hollabers)

BIOMEDIN 374. Algorithms in Biology—(Same as CS 374.) Algorithms and computational models applied to molecular biology and genetics. Topics vary annually. Possible topics include biological sequence comparison, annotation of genes and other functional elements, molecular evolution, genome rearrangements, microarrays and gene regulation, protein folding and classification, molecular docking, RNA secondary structure, DNA computing, and self-assembly. May be repeated for credit. Prerequisites: 161, 262 or 274, or BIOCHEM 218, or equivalents.

2-3 units, Aut (Batzoglou)

BIOMEDIN 390A,B,C. Curricular Practical Training—Provides educational opportunities in biomedical informatics research. Qualified biomedical informatics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and must complete a research report outlining their work activity, problems investigated, key results, and any follow-up on projects they expect to perform. BIOMEDIN 390A, B, and C may each be taken only once.

1 unit, Aut, Win, Spr, Sum (Musen)

BIOMEDIN 432. Analysis of Costs, Risks, and Benefits of Health Care—(Same as MGTECON 332, HRP 392.) For graduate students. The principal evaluative techniques for health care, including utility assessment, cost-effectiveness analysis, cost-benefit analysis, and decision analysis. Emphasis is on the practical application of these techniques. Group project presented at end of quarter. Guest lectures by experts from the medical school, pharmaceutical industry, health care plans, and government.

4 units, Aut (Garber)

1 unit, Aut, Win, Spr (Robertson)

CANCER BIOLOGY PROGRAM

Program Director: Joseph Lipsick (Pathology and Genetics)
Committee on Cancer Biology: Steven Artandi (Medicine), Laura Attardi (Radiation Oncology, Genetics), Jeffrey Axelrod (Pathology), Dean Felsher (Medicine, Pathology), Joseph Lipsick (Pathology, Genetics), Anthony Oro (Dermatology), Timothy Stearns (Biological Sciences, Genetics)

Program Offices: Alway Building, 300 Pasteur Drive, Room M105
Mail Code: 94305-5121
Phone: (650) 723-6198
Email: Gina.Rocca@stanford.edu
Web Site: http://www.stanford.edu/group/cancerbio/
Courses given in Cancer Biology have the subject code CBIO. For a complete list of subject codes, see Appendix.

Established in 1978, the Cancer Biology Program at Stanford University includes an interdisciplinary program leading to the Ph.D. degree. During the past 25 years, understanding of cancer has increased dramatically with the discovery of oncogenes, tumor suppressor genes, pathways of DNA damage and repair, cell cycle regulation, angiogenesis and responses to hypoxia, and recent glimpses into the molecular basis of metastasis. In addition, methods of parallel analysis including gene expression arrays, protein arrays, and tissue arrays have begun to refine and redefine the taxonomy of cancer diagnosis. This explosion of basic and clinical science has, in turn, resulted in the first successful cancer chemotherapies and immunotherapies based on knowledge of specific molecular targets. Stanford presents a unique environment to pursue interdisciplinary cancer research because the School of Medicine, the School of Humanities and Sciences, and the School of Engineering are located on a single campus, all within walking distance of one another.

The goal of the Cancer Biology Ph.D. program is to provide students with education and training that enables them to make significant contributions to this remarkable field. Course work during the first year is designed to provide a broad understanding of the molecular, genetic, cell biological, and pathobiological aspects of cancer. Students also learn about the current state of the epidemiology, clinical diagnosis, treatment, and prevention of human cancers. Equally important during the first year is a series of three rotations in research laboratories chosen by each student. By the beginning of the second year, each student chooses a research adviser and begins work on the dissertation project. A qualifying examination must be completed by the end of the second year. An annual Cancer Biology conference at Asilomar on the Pacific Ocean provides students with an opportunity to present their research to one another and to faculty. The expected time to degree is four to five years.

Students are not limited to a single department in choosing their research adviser. The Cancer Biology Ph.D. program currently has approximately 50 graduate students located in various basic science and clinical departments throughout the School of Medicine and the School of Humanities and Sciences.

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described under the “Graduate Degrees” section of this bulletin.

A small number of well-qualified applicants are admitted to the program each year. Applicants should have completed an undergraduate major in the biological sciences; applicants with undergraduate majors in physics, chemistry, or mathematics may be admitted if they complete background training in biology during the first two years of study. During the first year, each student is required to take a minimum of three, one quarter laboratory rotations. Students must choose a dissertation adviser prior to the end of Summer Quarter, first year, but not before the end of Spring Quarter, first year.

The requirements for the Ph.D. degree are as follows:

1. Training in biology equivalent to that of an undergraduate biology major at Stanford.
2. Completion of the following courses:
   a) CBIO 241. Molecular, Cellular, and Genetic Basis of Cancer
   b) GENE 203. Advanced Genetics
   c) MCP 221. Cell Biology of Physiological Processes
   d) MPHA 210. Signal Transduction Pathways and Networks
   f) MED 255. Responsible Conduct in Research; with permission, may be audited.
3. At least 6 units of additional cancer biology-related, graduate-level courses. Course work taken is determined in consultation with the student’s adviser and/or the Program Director.
4. Presentation of research results at the annual Cancer Biology Conference on at least three occasions, at least one being an oral presentation.
5. Successful completion of a qualifying examination in Cancer Biology is required for admission to Ph.D. candidacy. The exam consists of an NIH-style written grant proposal not to exceed ten pages (excluding references), and an oral examination. The examining committee consists of three faculty members from the Cancer Biology Program and does not include the student’s dissertation adviser. The composition of this committee is chosen by the student and dissertation adviser and must be submitted to and approved by the program director prior to the end of Autumn Quarter, second year. The qualifying examination must be taken prior to the end of Spring Quarter, second year. If necessary, one retake is permitted prior to the end of Summer Quarter, second year. After the qualifying examination has been successfully completed, the student is required to form a dissertation reading committee that includes the student’s adviser and three other members of the Academic Council with appropriate expertise. Each student is required to arrange annual meetings (more frequently, if necessary) of the dissertation reading committee, at which time oral presentations of progress during the past year and a plan of study for the coming year are presented and discussed. Completion of each annual committee meeting must be communicated in writing to the Program Director by the adviser by the end of Spring Quarter each year.
6. The major accomplishment of each successful Ph.D. student is the presentation of a written dissertation resulting from independent investigation that contributes to knowledge in the area of cancer biology. An oral examination is also required for the Ph.D. degree. In the Cancer Biology Program, a public seminar (one hour) is presented by the Ph.D. candidate, followed by a closed-door oral examination. The oral examination committee consists of at least four examiners (the members of the doctoral dissertation reading committee) and a chair. The oral examination chair may not have a full or joint appointment in the adviser’s or student’s home department. However, a courtesy appointment does not affect eligibility. The oral examination chair may be from the same department as any other member(s) of the examination committee. All members of the oral examination committee are normally members of the Academic Council, as the oral examination chair must be. With the prior approval of the program director or school dean, one of the examiners may be a person who is not a member of the Academic Council if that individual contributes expertise not otherwise available. Official responsibility for selecting the oral examination chair rests with the program. Cancer Biology delegates this to the student and dissertation adviser.

COURSES

CBIO 241. Molecular, Cellular, and Genetic Basis of Cancer—Core course required for all first-year Cancer Biology graduate students. Focus is on key experiments and classic primary research papers in cancer biology. Letter grade required. Undergraduates require consent of course director.
   5 units, Aut (Lipsick)

CBIO 280. Cancer Biology Journal Club—Focus is on recent papers in the literature presented by graduate students. When possible, discussion of these papers relates to and precedes cancer-related seminars at Stanford. Attendance at the relevant seminar required. Required for and limited to all first- and second-year graduate students in the Cancer Biology Program.
   1 unit, Aut, Win, Spr (Lipsick)

CBIO 299. Research—Cancer Biology Ph.D. students must register as soon as they begin dissertation-related research work.
   1-18 units, Aut, Win, Spr, Sum (Staff)
COMPARATIVE MEDICINE

Chair: Linda C. Cork
Professor: Linda C. Cork
Associate Professor: Donna Bouley, Sherril Green, Shaul Hestrin, Glen Otto, Ravi Tolwani
Assistant Professors: Catherine Beckwith, Paul Buckmaster, Corinna Darian-Smith, Manuel Garcia

Department Offices: Edwards Building, Room R321
Mail Code: 94305-5342
Phone: (650) 498-5080
Web Site: http://compmed.stanford.edu/

Courses given in Comparative Medicine have the subject code COMPMED. For a complete list of subject codes, see Appendix.

The Department of Comparative Medicine is a clinical department and does not offer degrees, but its faculty offer courses and participate in teaching in other departments at the undergraduate and graduate level. Faculty members, most of whom are specialists in some veterinary medical specialty, also accept students to participate in ongoing research projects within the department and assist students with special research projects.

The discipline of Comparative Medicine utilizes the differences and similarities among species to understand basic biologic and disease mechanisms. Comparative Medicine incorporates the use of spontaneous or induced disease models as one of several approaches to research. The research interests of faculty members are in neuroscience, infectious diseases, neuropathology, molecular genetics and anesthesiology.

COURSES

Course and lab instruction in the Department of Comparative Medicine conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

COMPMED 81Q. Comparative Anatomy and Physiology of Mammals—Stanford Introductory Seminar. Preference to sophomores. Comparative approach to common mammals, laboratory, and domestic species. The unique adaptations of each species in terms of its morphological, anatomical, and behavioral characteristics. How these species interact with humans and the historical relationships between humans and these animal species.

3 units, Win (Bouley)

COMPMED 83Q. Horse Medicine—Stanford Introductory Seminar. Preference to sophomores. Overview of the most common equine diseases, ranging from colic to lameness. Equine anatomy and physiology relevant to selected topics in equine medicine. Equine infectious diseases, respiratory disorders, care of the newborn foal, a what’s-your-diagnosis problem series, and emergency first aid strategies.

1 unit, Spr (Green)

COMPMED 85N. Animal Models in Biomedical Research—Stanford Introductory Seminar. Preference to freshmen. How and why animals are used in biomedical science and how animal models have advanced biomedical research. Documenting the humane care and treatment of laboratory animals in research and the science of animal modeling for the purpose of studying human disease. Animal models provide an important tool to study mechanisms of disease and develop new therapies. Examples of animal models in medical disciplines. Genetic engineering and other techniques used to develop animal models, and innovative approaches to develop therapies for disease including gene therapy approach.

3 units, Aut (Green, Tolwani)

COMPMED 107/207. Comparative Neuroanatomy—The functional organization of the vertebrate nervous system. Focus is on animals used in neuroscience research. Advantages and limitations of species chosen for neurobiological and biomedical research. Introduction to neuroanatomical methods and possible mechanisms of brain evolution. Primarily for graduate students; undergraduates by consent of instructor. Prerequisite: course in anatomy or physiology.

2-4 units, Spr (Buckmaster, Darian-Smith)

COMPMED 108/208. Animals Advancing Biomedical Technology—Open to graduate students and undergraduates in all degree programs. Students enrolled in computer science and engineering programs or who are affiliated with the BioX program are especially welcome. Lectures by faculty members in Comparative Medicine and invited speakers from the biomedical industry. Goal is to introduce the role of animals in biomedical research. Possible topics include: comparative anatomy and physiology of species used in biotechnology and medical device research; selecting an animal model for a research project; the genetically engineered mouse; and preclinical, animal testing of medical devices intended for use in humans. No background in animal biology required.

2 units (Cork) not given 2004-05

1 unit, Aut, Win, Spr (Robertson)

UNDERGRADUATE INDIVIDUAL WORK

COMPMED 198. Directed Reading—May be taken as a prelude to research and may also involve participation in a lab or research group seminar and/or library research.

1-3 units, Aut, Win, Spr, Sum (Staff)

COMPMED 199. Undergraduate Research—Individual research by arrangement with department faculty.

1-3 units, by arrangement (Staff)

FOR GRADUATE STUDENTS

COMPMED 299. Directed Reading—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

COMPMED 399. Research—Opportunities in comparative medicine and pathology, immuno-histochemistry, electron microscopy, molecular genetics, quantitative morphometry, neuroanatomy and neuropathology of the hippocampus, pathogenesis of intestinal infections, immunopathology, biology of laboratory rodents, anesthesiology of laboratory animals, gene therapy of animal models of neurodegenerative diseases, and development and characterization of transgenic animal models. Enrollment limited to 6. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

DEVELOPMENTAL BIOLOGY

Emeriti: (Professors) David A. Clayton, David S. Hogness, A. Dale Kaiser
Chair: Margaret Fuller
Associate Chair: Lucy Shapiro
Professors: Ben Barres, Gerald Crabtree, Margaret Fuller, Stuart Kim, David Kingsley, Roeland Nusse, Matthew Scott, Lucy Shapiro, James Spudich, Irving Weissman
Associate Professors: William Talbot, Anne Villeneuve
Assistant Professor: Seung Kim
Associate Professor (Teaching): Ellen Porzig
Associate Professor (Research): Harley McAdams

Courses given in Development Biology have the subject code DBIO. For a complete list of subject codes, see Appendix.
A fundamental problem in biology is how the complex set of multicellular structures that characterize the adult animal is generated from the fertilized egg. Advances at the molecular level, particularly with respect to the genetic control of development, have been explosive. These advances represent the beginning of a major movement in the biological sciences toward the understanding of the molecular mechanisms underlying developmental decisions and the resulting morphogenetic processes. This new thrust in developmental biology derives from the extraordinary methodological advances of the past decade in molecular genetics, immunology, and biochemistry. However, it also derives from groundwork laid by the classical developmental studies, the rapid advances in cell biology and animal virology, and from models borrowed from prokaryotic systems. Increasingly, the work is directly related to human diseases, including oncogene function and inherited genetic disease.

The Department of Developmental Biology includes a critical mass of scientists who are leading the thrust in developmental biology and who can train new leaders in the attack on the fundamental problems of development. Department labs work on a wide variety of organisms from microbes to worms, flies, and mice. The dramatic evolutionary conservation of genes that regulate development makes the comparative approach of the research particularly effective. Scientists in the department labs have a very high level of interaction and collaboration. The discipline of developmental biology draws on biochemistry, cell biology, genetics, and molecular biology.

The department is located in the Beckman Center for Molecular and Genetic Medicine within the Stanford University Medical Center.

GRADUATE PROGRAM

MASTER OF SCIENCE

Students in the Ph.D. program in Developmental Biology may apply for an M.S. degree, assuming completion of their course requirements and preparation of a written proposal. The master’s degree awarded by the Department of Developmental Biology does not include the possibility of minors for graduate students enrolled in other departments or programs.

Students are required to take, and satisfactorily complete, at least three lecture courses offered by the department, including 210, Developmental Biology. In addition, students are required to take three courses outside the department. Students are also expected to attend Developmental Biology seminars and journal clubs. In addition, the candidate must complete a research paper proposing a specific experimental approach and background in an area of science relative to developmental biology.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The graduate program in Developmental Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program in which individuals are candidates for both the M.D. and Ph.D. degrees.

Students are required to take, and satisfactorily complete, at least six courses, including Developmental Biology (210); Advanced Genetics (203); Frontiers in Biological Sciences (215); and an advanced molecular biology, biochemistry, or biophysics course. Students are also expected to attend Developmental Biology seminars and journal clubs.

Successful completion of a qualifying examination is required for admission to Ph.D. candidacy. The examination consists of two parts. One proposal is on a subject different from the dissertation research and the other proposal is on the planned subject of the thesis. The final requirements of the program include the presentation of a Ph.D. dissertation as the result of independent investigation and constituting a contribution to knowledge in the area of developmental biology. The student must then successfully pass the University oral examination which is taken only after the student has substantially completed his or her research. The examination is preceded by a public seminar in which the research is presented by the candidate. The oral examination is conducted by a dissertation reading committee.

COURSES

Course and lab instruction in the Department of Developmental Biology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/ph/8-2.html.

3-4 units, Win (Porzig)

DBIO 156. Human Developmental Biology and Medicine—(Same as HUMBIO 156.) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene and grand multiple pregnancies; prematurity, in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.
3-4 units (Porzig) not given 2004-05

DBIO 198. Research
1-18 units, by arrangement (Staff)

DBIO 199. Undergraduate Research
1-18 units, Aut, Win, Spr, Sam (Staff)

DBIO 201. Development and Disease Mechanisms—Mechanisms that direct human development from conception to birth. Conserved molecular and cellular pathways regulate tissue and organ development; errors in these pathways result in congenital anomalies and human diseases. Topics: molecules regulating development, cell induction, developmental gene regulation, cell migration, programmed cell death, pattern formation, stem cells, cell lineage, and development of major organ systems. Emphasis is on links between development and clinically significant topics including infertility, assisted reproductive technologies, contraception, prenatal diagnosis, multiparity, teratogenesis, inherited birth defects, fetal therapy, adolescence, cancer, and aging. Interested undergraduates must contact Ellen Porzig (eporzig@stanford.edu).
4 units, Aut (Scott, Crabtree, Porzig, Kingsley, Kim)

DBIO 202. Infertility: Mechanisms of Disease and Clinical Frontiers—(Same as OBGYN 202.) Primary literature in basic and clinical science, and demonstrations of assisted reproductive technologies (ART). Techniques include in vitro fertilization including micromanipulation procedures such as intracytoplasmic sperm injection and the culture of blastocysts, using mouse gametes, and pre-embryos. Students observe procedures in the ART clinic. Recommended DBIO 201 or consent of instructors.
3-4 units, Win (Porzig, Behr)

DBIO 203. Advanced Genetics—(Same as BIOSCI 203, GENE 203.) For graduate students in biological sciences; may be appropriate for graduate students in other programs. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. Emphasis is on use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Faculty-led discussions sections with critical evaluation of papers. Students with minimal prior experience in genetics should prepare themselves by working out problems in college level textbooks.
4 units, Aut (Stearns, Kim, Sidow, Barsh)

DBIO 210. Developmental Biology—Current areas of research in developmental biology. How organismic complexity is generated during embryonic and post-embryonic development. The roles of genetic networks, induction events, cell lineage, maternal inheritance, cell-cell communication, and hormonal control in developmental processes in well-studied organisms such as vertebrates, insects, and nematodes. Team-taught. Students meet with faculty to discuss current papers from the literature. Prerequisite: graduate standing, consent of instructor.
Recommended: familiarity with basic techniques and experimental rationales of molecular biology, biochemistry, and genetics.

5 units, Spr (Talbot, Nusse, Crabtree, Fuller, Kim, Kingsley, Scott)

DBIO 215. Frontiers in Biological Research—(Same as BIOC 215, GENE 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker’s primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.

1 unit, Aut, Win, Spr (Harbury, Kingsley, Baker)

DBIO 232. Readings in the History of Molecular Biology—Prerequisite: graduate standing.

2 units (Kaiser) not given 2004-05

DBIO 237. Introduction to Biotechnology—(Enroll in CHEMENG 450, BIOC 450.)

3 units, Spr (Staff)

DBIO 299. Directed Reading—Prerequisite: consent of instructor. See faculty list for section numbers.

1-18 units, Aut, Win, Spr, Sum (Staff)

DBIO 399. Research—Investigations sponsored by faculty members. Prerequisite: consent of instructor. See faculty list for section numbers.

1-18 units, Aut, Win, Spr, Sum (Staff)

DBIO 459. Frontiers in Interdisciplinary Biosciences—(Crosslisted in departments in the schools of H&S, Engineering, and Medicine; student register through their affiliated departments; otherwise register for CHEMENG 459) See CHEMENG 459 or http://biox.stanford.edu/courses/459_announce.html.

1 unit, Aut, Win, Spr (Robertson)

Epidemiology Program

Director: Victor Henderson (Professor of Health Research and Policy)
Steering Committee: J. Martin Brown (Professor of Radiation Oncology), Stephen Fortmann (Professor of Medicine), Helena Kraemer (Professor of Psychiatry, Medicine), Lorene Nelson (Associate Professor of Health Research and Policy, Division of Epidemiology), Neil Risch (Professor of Genetics), Alice S. Whittemore (Professor of Health Research and Policy, Division of Epidemiology)

Cancer Biology: J. Martin Brown (Professor)
Genetics: Neil Risch (Professor), Richard Myers (Professor)
Gynecology and Obstetrics: Emmet Lamb (Professor, emeritus), Mary L. Polan (Professor)
Health Research and Policy: Rodney Beard (Professor, emeritus), Byron W. Brown, Jr. (Professor, emeritus), Kristin Cobb (Instructor), John Farquhar (Professor, emeritus), Gary Friedman (Consulting Professor), Trevor Hastie (Professor), Victor Henderson (Professor), Mark Hlatky (Professor), Jennifer Kelsey (Professor, emeritus), Abby King (Professor), Philip Lavori (Professor), Yvonne Maldonado (Associate Professor), Lorene Nelson (Associate Professor, Richard Olshen (Professor), Ralph Paffenbarger, Jr. (Professor, emeritus), Julie Parsonnet (Professor), Rita Popat (Instructor), Robert Tibshirani (Professor), Dee West (Professor), Alice Whittemore (Professor), Marilyn Winkleby (Associate Professor, Research)
Medicine: John Farquhar (Professor, emeritus), Stephen Fortmann (Professor), James Fries (Professor), Alan Garber (Professor), William Haskell (Professor, Research), Halstead Holman (Professor), Helen Hubert (Senior Research Scientist), Abby King (Professor), Helena Kraemer (Professor), Gordon Matheson (Professor), Julie Parsonnet (Associate Professor), Gary Schoolnik (Professor)

Small (Associate Professor), Marcia Stefanick (Associate Professor, Research), Lucy Tompkins (Professor), Marilyn Winkleby (Associate Professor, Research)

Microbiology and Immunology: Ann Arvin (Professor), Charles Prober (Professor), Gary Schoolnik (Professor), Lucy Tompkins (Professor)
Neurobiology: Denis Baylor (Professor)
Neurology and Neurological Sciences: Leslie Dorfman (Professor)
Orthopedic Surgery: Gordon Matheson (Professor)
Pediatrics: Ann Arvin (Professor), Laura Bachrach (Professor), Yvonne Maldonado (Associate Professor), Charles Prober (Professor)
Stanford Prevention Research Center: John Farquhar (Professor, emeritus), Stephen Fortmann (Professor), William Haskell (Professor, Research), Abby King (Professor), Helena Kraemer (Professor, Research), Marcia Stefanick (Associate Professor, Research), Marilyn Winkleby (Associate Professor, Research)

Mail Code: 94305-5405
Phone: (650) 723-5456
Email: epiprogram@med.stanford.edu
Web Site: http://www.stanford.edu/dept/HRP/epidemiology/

Graduate Programs

The Epidemiology Program offers interdisciplinary instruction and research opportunities leading to the M.S. and Ph.D. degrees in Epidemiology. The program has strengths in the following areas of epidemiology: cancer; cardiovascular, infectious, and neurological diseases; clinical epidemiology; genetics; some aspects of epidemiologic methods; and environmental and occupational epidemiology.

Master of Science

The M.S. program is designed to provide training in epidemiologic methods to professionals in a variety of related fields and to serve as an introduction to those with bachelor’s degrees who are considering careers in epidemiology. Applicants to the M.S. program should have previous course work in biology and statistics or mathematics.

To receive the degree, students are expected to obtain a thorough grounding in epidemiologic methods and applied biostatistics and to demonstrate research skills through the completion of a master’s thesis. A total of 45 units of course work, including a 12-credit master’s thesis, must be successfully completed. Required courses are HRP 225, Design and Conduct of Clinical and Epidemiologic Studies, HRP 226, Advanced Epidemiologic and Clinical Research Methods, HRP 238, Seminar/Journal Club in Epidemiology, HRP 259, Introduction to Probability and Statistics for Epidemiology, HRP 261, Intermediate Biostatistics, and HRP 262, Regression, Prediction, Survival Analysis, and a master’s thesis of 12 units or more. In addition, M.S. students are required to select two other courses in Epidemiology. The master’s thesis must be read and approved by two faculty members.

The curriculum in clinical research methods was established to enhance the training of clinical investigators. This program is aimed primarily at physicians who have completed residency, are entering clinical fellowships, and plan to engage in patient-oriented clinical research. It may also be suitable for physicians at other points in their careers. Requirements of the program are similar to those of the M.S. degree described above, with the addition of HRP 251, Design and Conduct of Clinical Trials, and MED 255, Responsible Conduct of Research.

Doctor of Philosophy

The Ph.D. program in Epidemiology is designed to prepare individuals for careers in research and teaching in epidemiology. It is recommended that applicants have previous course work in biology and statistics or mathematics. Normally, successful applicants will have a master’s degree in a relevant field or at least two years of relevant research experience.

Candidates for the Ph.D. degree must complete 135 units of graduate course work and research. Course requirements include all those listed for master’s students (unless taken previously), HRP 224, Statistical Issues in Epidemiology, and GEN 344A, Genetic Epidemiology. A
student must select a specialty area (for example, cardiovascular diseases, cancer, clinical epidemiology, genetics, infectious diseases, neurobiological diseases). Additional courses are required in each specialty area. Requirements for the specific specialty areas may be obtained from the office of the program coordinator.

Successful completion of three written qualifying examinations is required for admission to Ph.D. candidacy. The qualifying examinations cover: (1) epidemiologic methods, (2) biostatistics, and (3) a specialty area (for example, epidemiology and pathobiology of cancer, or cardiovascular diseases). Requirements also include the presentation of a Ph.D. dissertation as the result of independent investigation and constituting a contribution to knowledge in epidemiology. The candidate must then successfully pass the University oral examination, which is taken only after the student has substantially completed his or her research. The examination is conducted by a committee and is preceded by a public seminar in which the research is presented by the candidate.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T213D, Stanford, California 94305-5405.

Note: applications for the Ph.D. program are not being accepted at this time.

COURSES

The course listings of individual departments participating in the Program in Epidemiology should be consulted for complete descriptions.

GENETICS

Emeritus: (Professor) L. L. Cavalli-Sforza, Leonard A. Herzenberg
Chair: Richard M. Myers
Associate Professors: Russ B. Altman, Michele P. Calos, Tim Stearns, Anne M. Villeneuve, Douglas E. Vollrath
Assistant Professors: Laura Attardi, Julie C. Baker, Anne Brunet, James M. Ford, Julien Sage, Joanna L. Mountain, Arend Sidow, Man-Wah Tan
Professor (Research): Leonore A. Herzenberg
Associate Professor (Research): J. Michael Cherry
Assistant Professor (Research): Gavin Sherlock, Zijie Sun
Courtesy Professor: Hank T. Greely
Consulting Professor: David Cox
Mail Code: 94305-5120
Phone: (650) 723-3335
Email: genetics-info@genome.stanford.edu
Web Site: http://genome-www.stanford.edu/genetics/

Courses given in Genetics have the subject code GENE. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAMS

University requirements for the Ph.D. degree are described in the “Graduate Degrees” section of this bulletin.

The Ph.D. program in the Department of Genetics offers graduate students the opportunity to pursue a discipline that encompasses not just a set of tools but a coherent and fruitful way of thinking about biology and medicine. All major areas of genetics are represented in the department, including human genetics (molecular identification of Mendelian traits and the pathophysiology of genetic disease, gene therapy, genetic epidemiology, analysis of complex traits, genetic anthropology, and human evolution), and application of model organisms such as bacteria, yeast, flies, worms, zebrafish, or mice to basic questions in biomedical research. The department is especially strong in genomic and bioinformatics approaches to genome biology and evolution, and includes several genome-scale databases such as the *Saccharomyces* Genome Database (SGD), the Stanford Microarray Database (SMD), and the Pharmacogenetics and Pharmacogenomics Knowledge Base (PharmGKB), as well as the Stanford Human Genome Center.

Exposure to the broad intellectual scope that characterizes and integrates the department is provided by laboratory rotations, dissertation research, a series of advanced courses in genetics and other areas of biomedical science, seminar series, journal clubs, and an annual three-day retreat that includes faculty members, students, postdoctoral fellows, and staff scientists. A strong emphasis is placed on interactions and collaborations among students, postdoctoral students, and faculty members within the department and throughout the campus.

Located in the School of Medicine, the department includes approximately 100 graduate students and postdoctoral fellows, 50 staff members, and 30 faculty. In addition to interactions within the department, graduate students have contact with a much larger number of students, fellows, and faculty programs throughout the School of Medicine and the University.

During their first year, graduate students in the department take advanced graduate courses and sample several areas of research by doing rotations in three or four of the department’s laboratories. At the end of the first three quarters, students may select a laboratory in which to do their dissertation research. While the dissertation research is generally performed in one laboratory, collaborative projects with more than one faculty member are encouraged. In addition to interacting with their faculty preceptor, graduate students receive input regularly from other faculty members who serve as advisers on their dissertation committee. Study for the Ph.D. generally requires between four and five years of graduate work, most of which is focused on dissertation research.

Students are generally enrolled in the program to receive the Ph.D. degree, although a limited number of M.D. candidates can combine research training in genetics with their medical studies. Ph.D. candidates who have passed the qualifying exam in the second year can opt to receive the M.S. degree.

There are opportunities for graduate students to teach in undergraduate- and professional-school courses. In addition, students are encouraged to participate in educational outreach activities coordinated by the department, which include opportunities to interact with secondary school students and teachers, lay groups, and local science museums.

Students who have recently received a bachelor’s, master’s, M.D., or Ph.D. degree in related fields may apply for graduate study in the Department of Genetics. Prospective students must have a background in general biology, mathematics, physics and chemistry. Decisions for admission are based on comparison of the relative merits of all the candidates’ academic abilities and potential for research. Interviews take place in late February or early March and successful applicants are offered admission by early spring. Students who wish to pursue a combined M.D./Ph.D. degree are considered for admission into the graduate program in the Department of Genetics after they have been admitted to the M.D. program in the School of Medicine. All applicants are considered equally regardless of race, color, creed, religion, national origin, sexual preference, age, or gender.

Students begin graduate studies in the Autumn Quarter. Prospective students are encouraged to start the application process early to ensure that they are able to submit a complete application by the previous December 15. All students accepted into the Ph.D. program in the Department of Genetics are provided with full tuition and a stipend to cover the cost of living. Two training grants from the National Institutes of Health provide major support for the graduate training program in the department. Other student support is provided by departmental funds and from research grants, both federal and private, of the faculty. In addition, a number of graduate students are funded by fellowships, including those from the National Science Foundation. Prospective students are encouraged to apply for a fellowship by requesting an application from the National Science Foundation, http://www.nsf.gov. The application is due on November 1 of each year.
COURSES

For further information on the availability of courses, consult the quarterly Time Schedule, or inquire at the departmental office. Additional courses in or related to genetics are included in the listings of the departments of Biological Sciences, Biochemistry, Developmental Biology, Microbiology and Immunology, Neuroscience, Biomedical Informatics, and Structural Biology.

GENE 104Q. Legal and Social Issues in the Biosciences—Stanford Introductory Seminar. Preference to sophomores. Focus is on human genetics; also assisted reproduction and neuroscience. Topics include forensic use of DNA, genetic testing, genetic discrimination, eugenics, cloning, pre-implantation genetic diagnosis, neuroscientific methods of lie detection, and genetic or neuroscience enhancement. Student presentations on research paper conclusions.
   3 units, Spr (Greely)

GENE 106Q. The Heart of the Matter—Stanford Introductory Seminar. Preference to sophomores. The molecular and biochemical basis of life. Emphasis is on the methods and scientific logic that lead to advances in knowledge. The human heart and circulatory system is the unifying theme for topics such as the constituents and activities of cells, tissues, and organs; the chemicals and proteins that carry on life processes; the biotechnology revolution; the role of genes in human disease and normal functions; and the Human Genome Project. How scientific knowledge is built up through research; how biology initiates advances in medicine; and how science, engineering, and economics interact in biotechnology. Student presentations, demonstrations, and field trips. GER:2a
   3 units, Win (Myers, Simoni)

   3 units, Win (Altman)

GENE 199. Undergraduate Individual Research—Prerequisite: consent of instructor.
   1-18 units, by arrangement (Staff)

GENE 202. Human Genetics—The theoretical and experimental basis for the genetics of human health and disease. Lectures and clinical case discussions in molecular, chromosomal, biochemical, developmental, cancer, and medical genetics, emphasizing the latter. Prerequisites: knowledge of biochemistry and basic genetics.
   4 units, Aut (Ford, Myers)

GENE 203. Advanced Genetics—(Same as BIOSCI 203, DBIO 203.) For graduate students in biological sciences; may be appropriate for graduate students in other programs. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. Emphasis on use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Faculty-led discussions sections with critical evaluation of papers. Students with minimal prior experience in genetics should prepare themselves by working out problems in college level textbooks.
   4 units, Aut (Stearns, Kim, Sidow, Barsh)

GENE 211. Genomics—Focus is on developing a knowledge base of facts about genome evolution, organization, and function; technical, computational, and experimental approaches; hands-on experience with a small but representative number of computational tools used in genome science; and a beginning working knowledge of PERL.
   3 units, Win (Cherry, Myers, Sidow, Sherlock)

GENE 215. Frontiers in Biological Research—(Same as BIOC 215, DBIO 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker’s primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.
   1 unit, Aut, Win, Spr (Harbury, Kingsley, Baker)

GENE 222. Method and Logic in Experimental Genetics—For graduate students only. How experimental strategies are applied to biological questions irrespective of discipline boundaries. Examples include purifying activities from complex mixtures, localizing molecules in space and time, discovering macromolecular interactions, inferences from sequence similarity, using structure to elucidate function, and applying genomics to biological problems. Weekly discussion of two representative papers selected by faculty and a student presentation of a third paper which illustrate primary literature, basic principles of biochemistry and cell and molecular biology, and the historical context of important scientific advances.
   3 units, Win (Baker, Vollrath)

GENE 235. C. elegans Genetics—Genetic approaches to C. elegans, practice in designing experiments and demonstrations of its growth and anatomy. Probable topics include: growth and genetics, genome map and sequence, mutant screens that start with a desired phenotype, reverse genetics and RNAi screens, genetic duplications, uses of non-null phenotype non-null alleles, genetic interactions and pathway analysis, and embryogenesis and cell lineage. Focus of action, mosaic analysis, and interface with embryological and evolutionary approaches.
   2 units (Fire) not given 2004-05

GENE 255. The Responsible Conduct of Research—A forum for scientists to familiarize themselves with institutional policies/practices and professional standards that define scientific integrity. Overview of ethics in research, authorship, patents, and human interest at the academic-commercial interface, and small group sessions for more extended discourse between students and faculty. Completion fulfills NIH/AD-AMHA requirement for instruction in the ethical conduct of research. Required course for incoming students.
   1 unit, Win (Staff)

GENE 260. Supervised Study—Genetics graduate student lab research from first quarter to filing of candidacy. Prerequisite: consent of instructor.
   1-18 units, Aut, Win, Spr, Sum (Staff)

GENE 262. Advanced Microbial Genetics and Genomics—(Same as BIOSCI 162/262.) Genetic tools for studying the cell biology and behavior of bacteria. Case studies on genetic approaches in combination with biochemistry, microscopy, and genomics to study mechanisms of gene expression, signal transduction, cell cycle regulation, development, and pathogenesis.
   4 units, Spr (Tan, Burkholder)

GENE 299. Directed Reading—Prerequisite: consent of instructor. See faculty list for section numbers.
   1-18 units, Aut, Win, Spr, Sum (Staff)

GENE 399. Research—Prerequisite: consent of instructor.
   1-18 units, Aut, Win, Spr, Sum (Staff)
HEALTH RESEARCH AND POLICY

Emeriti: (Professors) Rodney Beard, Byron W. Brown, Jr., John Farquhar, Victor R. Fuchs, Jennifer L. Kelsey, Lincoln E. Moses, Ralph S. Paffenbarger, Jr.
Co-Chairs: Robert Tibshirani, Alice Whittemore
Professors: Bradley Efron, Trevor Hastie, Victor Henderson, Mark Hlatky, Iain M. Johnstone, Abby C. King, Richard A. Olshen, Robert Tibshirani, Alice S. Whittemore, Wing Wong
Associate Professors: Laurence Baker, Lorene M. Nelson, Julie Parsonnet
Assistant Professor: M. Kate Bundorf
Professors (Research): Dan Bloch, Philip W. Lavori
Assistant Professor (Research): Laura Lazzeroni
Courtesy Professors: Stephen P. Fortmann, Alan M. Garber, Neil Risch
Courtesy Associate Professors: Mary Goldstein, Alex Macario, Yvonne Maldonado, Mark McClellan (on leave), Douglas Owens, David R. Rogosa, Marilyn Winkleby
Courtesy Assistant Professors: Michael K. Gould, Paul Heidenreich
Senior Lecturer: Irene Corso
Consulting Associate Professors: Dan Bloch, Philip W. Lavori
Consulting Professors: Gary Friedman, Elizabeth Holly, Joseph Selby, Dee West
Consulting Associate Professors: Paul Barnett, Sally Glaser, Esther John
Consulting Assistant Professor: Todd Wagner
Visiting Associate Professor: Marion Lee
Mail Code: 94305-5405
Phone: (650) 723-5082
Email: hrp@med.stanford.edu
Web Site: http://www.stanford.edu/dept/HRP/

Courses given in Health Research and Policy have the subject code HRP. For a complete list of subject codes, see Appendix.

The Department of Health Research and Policy has three divisions:
1. Biostatistics deals with scientific methodology in the medical sciences, emphasizing the use of statistical techniques.
2. Epidemiology provides training and experience in the application of epidemiologic methods to the study of disease etiology and control. It is also concerned with problems of health and disease in human populations in all parts of the world and with efforts toward improving levels of health.
3. Health Services Research is concerned with many aspects of health policy analysis in the public and private sectors.

The department, and each division, offers courses in its areas of specialization. These are described fully in the Stanford University School of Medicine Catalog.

GRADUATE PROGRAMS

The Program in Epidemiology and the Program in Health Services Research are housed in the Department of Health Research and Policy. These programs are described separately within the School of Medicine listings of this bulletin. Students with an interest in pursuing advanced degrees with an emphasis on biostatistics can do so through programs offered by the Department of Statistics. Division of Biostatistics faculty participate in these programs.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T213D, Stanford, California 94305-5405.

COURSES

HPR89Q. Introduction to Crosscultural Issues in Medicine—Stanford Introductory Seminar. Preference to sophomores. Crosscultural issues that impact health care delivery such as ethnicity, immigration, language barriers, and service expectations. Fosters an understanding of culturally unique and non-English speaking populations, developing interpersonal and communication skills with diverse ethnic groups.
3 units, Win (Corso)

HPR 120. International Epidemiology of Infectious Diseases—Two-week intensive course at the National School of Public Health (NSPH) in Cuernavaca, Mexico. Topics include impact of geography and socioeconomic status on infectious disease epidemiology, global aspects of human, bacterial, and ecologic factors of disease prevalence and incidence, public health measures employed to intervene in infection transmission, disease modeling and molecular techniques in infectious disease investigations, and the role of infectious agents in chronic diseases.
Students observe a clinical field trial. Room and board provided. Enrollment limited to 8.
Prerequisites: undergraduate standing, consent of instructor. Recommended: proficiency in Spanish.
2-4 units (Maldonado) not given 2004-05

HPR 199. Undergraduate Research—Student investigations sponsored by faculty members. Prerequisite: consent of the instructor.
1-18 units, Aut (Win, Spr, Sum (Staff)

HPR 206. Statistical Methods in Meta-Analysis—(Enroll in STATS 211, EDUC 493B.)
1-3 units, Win (Okin)

HPR 207. Issues and Methods of Health Services and Policy Research—Primarily for students in the Health Services and Policy Research scholarly track. Topics include health care systems and institutions, health insurance, regulation, cost effectiveness analysis, and medical decision making.
2 units, Aut (L. Baker, K. McDonald)

HPR 209. Medicine and the Law—Topics: medical malpractice, patient consent and confidentiality rights, human subject research, withdrawing life support and physician-assisted suicide, futile medical care, legal requirements in psychiatry, physician discipline, medical staff law, and HMO litigation.
2 units, Win (Eaton)

HPR 210. Health Law I—(Same as LAW 313.) Open to all law or medical students, and to qualified undergraduates by consent of instructor. Introduction to the American health care system and its legal and policy problems. Topics: the special characteristics of medical care as compared with other goods and services, the difficulties of assuring quality care, the complex patchwork of the financing system, and the ethical problems the system raises. Course begins September 9.
5 units, Aut semester (Greely)

HPR 212. Crosscultural Medicine—Interviewing and behavioral skills needed to facilitate culturally relevant health care across all population groups. Explicit and implicit cultural influences operating in formal and informal medical contexts.
3 units, Spr (Corso)

HPR 214. Scientific Writing—Step-by-step through the process of writing and publishing a scientific manuscript. How to write effectively, concisely, and clearly. Preparation of an actual scientific manuscript. Students are encouraged to bring a manuscript on which they are currently working to develop and polish throughout the course.
2-3 units, Win (Cobb)
HRP 223. Data Management and Statistical Programming—The skills required for management and analysis of biomedical data. Topics include importing and exporting data from multiple database systems, visualizing and cleaning data, data management for multicenter projects, and data security. Introduction to applied statistical programming relevant to epidemiologic and clinical research. No previous programming experience required.
2-3 units, Aut (Balise)

HRP 224. Statistical Issues in Epidemiology—Advanced problems in the design and analysis of epidemiological studies, motivated by published investigations. Possible topics: issues in matching controls to cases in case-control studies, methods for analyzing data from cohort studies, and methods for the design and analysis of family and genetic studies. Prerequisites: 203, 225, 226, or equivalents.
3 units (Whittemore) not given 2004-05

HRP 225. Design and Conduct of Clinical and Epidemiologic Studies—Intermediate-level. The skills to design, carry out, and interpret epidemiologic studies particularly of chronic diseases. Topics: epidemiologic concepts, sources of data, cohort studies, case-control studies, cross-sectional studies, sampling, estimating sample size, questionnaire design, and the effects of measurement error. Prerequisite: 202 or equivalent, or consent of instructor.
3-4 units, Aut (Popat, Friedman)

HRP 226. Advanced Epidemiologic and Clinical Research Methods—The principles of measurement, measures of effect, confounding, effect modification, and strategies for minimizing bias in epidemiologic studies. Prerequisite: 225 or consent of instructor.
3-4 units, Aut (Nelson)

HRP 228. Molecular Epidemiology—Molecular and biochemical biomarkers for measuring exposure, host susceptibility, and endpoint (disease) as applied to epidemiologic studies of infectious diseases, cancer, and other chronic diseases. Topics: DNA fingerprinting to determine transmission pathways; biochemical markers of environment exposures; study design and methodological consideration; ethical and legal issues. Prerequisite: 202 or 225, or consent of instructor.
3 units (Staff) not given 2004-05

HRP 230. Cancer Epidemiology—Descriptive epidemiology and sources of incidence/mortality data; the biological basis of carcinogenesis and its implications for epidemiologic research; methodological issues relevant to cancer research; causal inference; major environmental risk factors; genetic susceptibility; cancer control; examples of current research; and critique of the literature. Prerequisite: 202 or 225, or consent of instructor.
3 units (Staff) not given 2004-05

HRP 231. Epidemiology of Infectious Diseases—The principles of the transmission of the infectious agents (viruses, bacteria, rickettsiae, mycoplasma, fungi, and protozoan and helminth parasites). The role of vectors, reservoirs, and environmental factors. Pathogen and host characteristics that determine the spectrum of infection and disease. Endemicity, outbreaks, and epemics of selected infectious diseases. Principles of control and surveillance.
3 units, Spr (Parsonnet, Maldonado) alternate years, not given 2005-06

HRP 234. Foundations of Pharmacoepidemiology—Historical development of pharmacoepidemiology, the drug development process and pharmacoepidemiology role in it, pharmcovigilance/drug safety systems, epidemiology in outcomes research, the role of pharmacoepidemiology in risk management, and classic examples of pharmacoepidemiologic investigations.
2-3 units, Spr (Lilienfeld)

HRP 236. Clinical Research Seminar—Weekly forum for ongoing patient-oriented research projects and recent journal articles by students, faculty, staff, and guests. Methodological and practical issues relevant to clinical epidemiologic research are also discussed.
1 unit, Aut, Win, Spr (Friedman)

HRP 238. Journal Club in Epidemiology—Ongoing research presented by faculty, staff, students, and guests. Recent journal articles.
1 unit, Aut, Win, Spr (Staff)

HRP 248. Promoting Health Over the Life Course: Multidisciplinary Perspectives—(Enroll in HUMBIO 148.)
3 units, Aut (Alles, Stefanick)

HRP 250C. Statistical Analysis in Educational Research: Multivariate Analysis—(Enroll in EDUC 250C.)
2-4 units, Win (Olkin)

HRP 251. Design and Conduct of Clinical Trials—The rationale for phases 1-3 clinical trials, the recruitment of subjects, techniques for randomization, data collection and endpoints, interim monitoring, and reporting of results. Emphasis is on the theoretical underpinnings of clinical research and the practical aspects of conducting clinical trials.
3 units, Spr (Hlatky)

HRP 252. Outcomes Analysis—(Same as BIOMEDIN 251.) Introduction to methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.
3 units, Spr (Bhattacharya)

HRP 256. Economics of Health and Medical Care—(Enroll in ECON 156/256, BIOMEDIN 156/256.)
5 units, Aut (Bhattacharya)

HRP 259. Introduction to Probability and Statistics for Epidemiology—Topics: random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals. Correlation, regression, analysis of variance, and nonparametric tests. Introduction to least squares and maximum likelihood estimation. Emphasis is on medical applications.
4-5 units, Aut (Cobb)

HRP 260A,B,C. Workshop in Biostatistics—(Same as STATS 260A,B,C.) Applications of statistical techniques to current problems in medical science. Enrollment for more than 2 units of credit involves extra reading or consulting and requires consent of the instructor.

HRP 260A: 1-3 units, Aut (Lazzeroni, Olshen, Bloch, Efron, Hastie, Lavori, Tibshirani, Wong)

HRP 260B: 3 units, Win (Lazzeroni, Olshen, Bloch, Efron, Hastie, Lavori, Tibshirani, Wong)

HRP 260C: 1-5 units, Spr (Lazzeroni, Olshen, Bloch, Efron, Hastie, Lavori, Tibshirani, Wong)

3 units, Win (Hastie)

3 units, Spr (Cobb)
HRP 280,281,282. Spanish for Medical Students—(Same as SPAN-LANG 121M,122M,123M.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, 280: Aut, 281: Win, 282: Spr (Corso)

HRP 283. Health Services Research Core Seminar—Presentation of research in progress and tutorials in the field of health services research.

1 unit, Aut, Win, Spr (Baker, Bundorf, Garber, Hlatky, Owens)

HRP 290. Advanced Spanish Conversation—Oral language skills covering pediatric, gynecological, and other specialty exams; patient health education and counseling; and diseases such as diabetes, asthma, and TB. Prerequisite: Spanish proficiency or consent of instructor.

3 units, Aut, Win, Spr (Corso)

HRP 299. Directed Reading—Aspects of preventive medicine, public health, social aspects of disease and health, economics of medical care, occupational or environmental medicine, epidemiology, international health, or related fields. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr (Staff)

HRP 351. Health Care Innovators—The workings of the major institutions such as hospitals, health insurance companies, HMOs, Medicare and Medicaid, federal regulators, and the medical establishment. National health expenditures and alternative models for healthcare financing and delivery. Trends in treatment innovations provided by biopharmaceuticals, medical devices, and surgical procedures; delivery innovations facilitated by information systems and new processes. Policy and business challenges raised by these innovations and the health care ecosystems they promote.

4 units, Win, (Zenios)

HRP 391. Political Economy of Health Care in the United States—Economic tools and institutional and legal background to understand how markets for health care products and services work. Moral hazard and adverse selection. Institutional organization of the health care sector. Hospital and physician services markets, integrated delivery systems, managed care, and pharmaceutical and medical device industries. Public policy issues in health care, medical ethics, regulation of managed care, patients’ bill of rights, regulation of pharmaceuticals, Medicare reform, universal health insurance, and coverage of the uninsured. International perspectives; how other countries’ health care systems evolved, and what the U.S. can learn from their experiences.

4 units, Spr (Kessler, Bundorf)

HRP 392. Analysis of Costs, Risks, and Benefits of Health Care—(Same as MGTECON 332, BIOMEDIN 432.) For graduate students. The principal evaluative techniques for health care including utility assessment, and cost-effectiveness, cost-benefit, and decision analysis. Emphasis is on the practical application of these techniques. Group project presented at end of quarter. Guest lectures by experts from the medical school, pharmaceutical industry, health care plans, and government.

4 units, Aut (Garber)

HRP 399. Research—Graduate students investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)
5. An additional set of approved elective courses to complete the program total of at least 45 units.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T213D, Stanford, California 94305-5405.

COURSES

The course listings of individual departments participating in the Health Services Research Program should be consulted for complete descriptions.

IMMUNOLOGY PROGRAM

Chair, Executive Committee for the Immunology Program: Lawrence Steinman (Professor of Neurology and Neurological Sciences)
Director for Immunology Program: Eugene Butcher (Professor of Pathology)
Director for Clinical Immunology Program: C. Garrison Fathman (Medicine/Immunology and Rheumatology)

Participating Departments and Faculty:

Biological Sciences: Patricia P. Jones (Professor)
Cardiothoracic Surgery: Carol Clayberger (Associate Professor, Research; and Pediatrics)
Chemistry: Harden M. McConnell (Professor, emeritus)*
Genetics: Leonard A. Herzenberg (Professor, emeritus), Lenore A. Herzenberg (Professor, Research), Man-wah Tan (Assistant Professor)
Medicine/Bone Marrow Transplantation Program: Robert Negrin (Professor), Judith Shizuru (Assistant Professor)
Medicine/Endocrinology: Ajay Chawla (Assistant Professor)
Medicine/Hematology: Peter Lee (Assistant Professor)
Medicine/Immunology and Rheumatology: C. Garrison Fathman (Professor), Jane R. Barnes (Professor), William Robinson (Assistant Professor), Samuel Strober (Professor), Paul J. Utz (Assistant Professor)
Medicine/Oncology: Gilbert Chu (Associate Professor, and Biochemistry), Dean Felscher (Assistant Professor), Ronald Levy (Professor, Shoshana Levy (Professor, Research)
Microbiology and Immunology: Yueh-Hsiu Chien (Professor), Mark M. Davis (Professor), K. Christopher Garcia (Assistant Professor, and Structural Biology), Hugh McDevitt (Professor), Garry P. Nolan (Professor, Microbiology and Immunology), Hugh O. McDevitt (Professor), David Schneider (Assistant Professor)
Molecular and Cellular Physiology: Richard S. Lewis (Associate Professor)
Molecular Pharmacology: Phyllis Gardner (Professor, and Medical/ Clinical Pharmacology, and Cardiovascular Medicine)
Neurology and Neurological Sciences: Lawrence Steinman (Professor, and Pediatrics)
Pathology: Eugene C. Butcher (Professor), Michael Cleary (Professor), Gerald R. Crabtree (Professor, and Developmental Biology), Edgar G. Engleman (Professor, and Medicine/Immunology and Rheumatology), Joseph S. Lipsick (Professor), Sara Michie (Associate Professor), Raymond A. Sobel (Associate Professor), Irving L. Weissman (Professor, and Developmental Biology)
Pediatrics: Ann Arvin (Professor, and Microbiology and Immunology), Christopher Contag (Assistant Professor, Research), Alan M. Krensky (Professor), Carol Claytoner (Professor, Research), David B. Lewis (Associate Professor), Elizabeth Mellins (Associate Professor)
Structural Biology: Peter Parham (Professor, and Microbiology and Immunology)
Surgery: Sheri Krams (Associate Professor, Research), Olivia Martinez (Associate Professor, Research)

* Recalled to active duty

Courses given in Immunology have the subject code IMMUNOL. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAMS

MASTER OF SCIENCE

Students in the Ph.D. program in Immunology may apply for an M.S. degree in Immunology, assuming completion of appropriate requirements. Students must complete:

1. Three full-tuition quarters of residency as a graduate student at Stanford
2. At least 45 units of academic work, all of which must be in courses at or above the 100 level, 36 units of which must be at or above the 200 level
3. 2-3 quarters of graduate research (IMMUNOL 300), consisting of rotations in the labs of 2-3 faculty members
4. Course work in Immunology as follows: coursework in basic immunology (BIOSCI 230, MI 200 or equivalent, advanced Immunology such as IMMUNOL 201, 202, and 203). In addition, the student may take two of four possible courses: GENE 203, Advanced Genetics, MPHA 210, Signal Transduction Pathways and Networks, SBIO 241, Biological Macromolecules, or DBIO 210, Developmental Biology. Other required core courses are: MI 215, Principles of Biological Technologies, MCP 221, Cell Biology of Physiological Processes.
5. Graduate-level biochemistry and molecular biology (BIOC 200, 201, or equivalents)
6. Course work in IMMUNOL 311, Seminar in Immunology, and IMMUNOL 311A, Seminar Discussion in Immunology
7. Participation in the Immunology journal club (IMMUNOL 305), and attendance at the weekly Immunology seminar and at the annual Stanford Immunology Scientific Conference
8. The qualifying examination in Immunology, the written exam (Part I) and the thesis proposal (Part II), and a oral presentation on the research of one rotation, before candidacy

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The interdepartmental Immunology Program offers instruction and research opportunities leading to a Ph.D. in Immunology. The goal of the program is to develop young investigators who have a solid foundation in immunology as well as related sciences and who can carry out innovative research. The program features a flexible selection of courses and seminars to enrich the students’ backgrounds, combined with extensive research training in the laboratories of the participating immunology faculty.

Students applying to the program typically have an undergraduate major in biological sciences, but majors in other areas are acceptable if the applicants have had sufficient course work in biology and chemistry. Formal application should be made by December 15. Applications are evaluated by the Immunology Predoctoral Committee based on scores on the GRE exams (including the subject test in either biology, biochemistry, or chemistry), which should be taken by the October test date; grades; evidence of prior research experience; letters of recommendation, including letters from research sponsor(s); and commitment to a career in biomedical research. Interested Stanford medical students are welcome to apply to the program; they should contact the program director.

Students admitted to the program are offered financial support covering tuition, a living stipend, insurance coverage, and an allowance for books/travel. Applicants are urged to apply for independent fellowships such as from the National Science Foundation. Fellowship applications are due in November of the year prior to matriculation in the graduate program, but Immunology graduate students may continue to apply for...
outside fellowships after matriculation. Because of the small number of department-funded slots, students who have been awarded an outside fellowship will have an improved chance of acceptance into the program.

On matriculation, each student is assisted in selecting courses and lab rotations in the first year and in choosing a lab for the dissertation research. Once a dissertation adviser has been selected, a dissertation committee including at least two Immunology faculty, and including the dissertation adviser, is constituted to guide the student during the dissertation research. The student must meet with the dissertation committee at least once a year.

Candidates for Ph.D. degrees at Stanford must satisfactorily complete a three-year program of study that includes 72 units of graduate course work and research and nine full-tuition quarters of residency. At least 3 units must be taken with each of four different Stanford faculty members.

The requirements for the Ph.D. degree in Immunology include the following:
1. Training in biology and cognate disciplines equivalent to that provided by the undergraduate Biology major at Stanford.
2. Completion of the following courses (or their equivalents from undergraduate work):
   a) Basic Immunology (BIOSCI 230 or MI 200)
   b) Advanced Immunology (IMMUNOL 201, 202, 203)
   c) Biochemistry and Molecular Biology (BIOC 200)
   d) Cell Biology of Physiological Processes (MCP 221)
   e) Statistics (BIOSCI 141)
   f) Principles of biological technologies (MI 215)
   g) two of four possible courses: GENE 203, Advanced Genetics; MPHA 210, Signal Transduction Pathways and Networks; SBIO 241, Biological Macromolecules; or DBIO 210, Developmental Biology. Other required core courses are: MI 215, Principles of Biological Technologies; MCP 221, Cell Biology of Physiological Processes.
   h) Responsible Conduct in Science (MED 255)
   i) Immunology Journal Club (IMMUNOL 305)
3. First-year students are required to take both the IMMUNOL 311, Seminar in Immunology and the companion course, IMMUNOL 311A, Seminar Discussion in Immunology, and participate in IMMUNOL 305, Immunology Journal Club. Students in their second year and above must participate in the IMMUNOL 311, Seminar in Immunology and may opt to take the companion course, IMMUNOL 311A. Students who have not yet achieved TGR status must register for 1 unit. Students attend the weekly Immunology Seminar Series (4-5 p.m., Tuesdays). Students read the papers of and have dinner with visiting seminar speakers two or three times each quarter, and meet with a faculty member to discuss the material.
4. Elective courses as agreed upon by the student, adviser, and advisory committee. Electives may be chosen from graduate courses and seminars in any of the biomedical science departments and programs.
5. Completion in the first year of two-three one quarter rotations. Two weeks after taking the written portion of the qualifying examination process in mid-July, students shall present their lab rotation research projects to the Predoctoral Committee.
6. Teaching assistantship in two immunology courses. A teaching assistantship requirement may be fulfilled by proposing a graduate student-initiated course IMMUNOL 315, Topics in Immunology. Before fulfilling their teaching assistantships, Immunology graduate students are required to undertake a teaching assistantship workshop offered at the beginning of every quarter by the Center for Teaching and Learning.
7. For admission to candidacy, completion of two requirements by the end of the Autumn Quarter of the second year: a rotation presentation on one of three lab rotations, and a comprehensive written examination in immunology and related biomedical sciences must be completed satisfactorily by the middle of Summer Quarter of the first year. Finally, students must prepare and defend a research proposal on their dissertation research by December 23, the end of Autumn Quarter of their second year. Administration and evaluation of these requirements is the responsibility of the student’s dissertation committee.
8. Participation (through regular attendance and oral presentation) in the student-run immunology journal clubs for at least the first two years (IMMUNOL 305). Students are also expected to attend the graduate students’ journal club, the Tuesday evening immunology seminars, and the annual Stanford Immunology Scientific Conference.
9. Passing of the University oral examination on the dissertation research, which is to be taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the candidate presents his/her research.
10. Completion of a Ph.D. dissertation, resulting from independent investigation and constituting a contribution to knowledge in the area of immunology.

**COURSES**

Course and lab instruction in the Immunology Program conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

**IMMUNOL 201. Advanced Immunology I**—(Same as MI 211.) For graduate students and advanced undergraduates. Topics: genetics and structure/function relationships of antibodies, T-cell receptors, MHC antigens; accessory molecules; lymphocyte differentiation and activation; cellular regulation of immune responses; autoimmunity and other problems in clinical immunology. Prerequisites: biochemistry, basic immunology course; consent of instructor for undergraduates. 3 units, Win (Chien, Staff)

**IMMUNOL 202. Advanced Immunology II**—(Same as MI 212.) Readings of immunological literature and specific areas of immunology. Classic problems and emerging areas are covered based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201/MI 211. 3 units, Spr (Garcia, Staff)

**IMMUNOL 203. Advanced Immunology III**—(Same as MI 213.) Historical survey of the most important experiments and papers in immunology. Student presentations and faculty participation; faculty describe their experimental process and scientific papers. Prerequisite: IMMUNOL 201/MI 211 or IMMUNOL 202/MI 212. 3 units, Sum (Crabtree, Staff)

**IMMUNOL 205. Immunology for Medical Students**—(Same as MI 205.) Medical students register for IMMUNOL 205; undergraduates and graduate students may enroll with consent of instructor. Basic concepts of adaptive and innate immunology and the role of the immune system in a variety of human diseases. Emphasis is on application of the fundamental concepts of human immunology. Case presentations of diseases including autoimmune diseases, infectious disease, transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Problem sets based on case reports, lectures, and publications from current clinical literature. Lab in inflammation. 4 units, Win (Lewis)

**IMMUNOL 215. Principles of Biological Technologies**—(Same as MI 215.) Required of first-year graduate students in Microbiology and Immunology. The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry, organic chemistry, and physics. 2 units, Spr (Kirkegaard)

**IMMUNOL 230. Introduction to Medicine**—For graduate students in biological sciences, bioengineering, and biomedical informatics. Information and approaches used by physicians to understand human disease by focusing on two multisystem disorders: type I and type II diabetes mellitus. Lectures by medical school and outside faculty, and field trips to clinics, the clinical laboratory, clinical research center, and a relevant biotech company. Students carry out quarter-long, long projects. 3-4 units, Spr (Mellins, Parnes)
IMMUNOL 230A. Independent Study in Medical Sciences—for doctoral students who have taken 230. Completion of team projects begun in 230.
1-3 units (Staff)

IMMUNOL 290. Teaching in Immunology—Practical experience in teaching by serving as a teaching assistant in an immunology course.
1-10 units, Aut, Win, Spr, Sum (Staff)

IMMUNOL 299. Directed Reading in Immunology
1-15 units, by arrangement (Staff)

IMMUNOL 300. Research—for Ph.D., M.D./Ph.D. students, and medical students whose scholarly concentrations are in immunology.
1-15 units, by arrangement (Staff)

IMMUNOL 305. Immunology Journal Club—Graduate students present and discuss recent papers in the literature. Required of first to fourth-year graduate students.
1 unit, Aut, Win, Spr (Staff)

IMMUNOL 311. Seminar in Immunology—Enrollment limited to Ph.D., M.D./Ph.D. students, and medical students whose scholarly concentrations are in immunology. Current research topics.
1 unit, Aut, Win, Spr (Fathman, Steinman)

IMMUNOL 311A. Immunology Seminar Discussion—Limited to Ph.D., M.D./Ph.D. students, and medical students whose scholarly concentrations are in immunology; required of first-year students. Students discuss papers of speakers in 311, and meet with the speakers.
1 unit, Aut, Win, Spr (Fathman, Steinman)

IMMUNOL 315. Special Topics in Immunology—Graduate student-initiated seminar in journal club style. Previous topics include evolutionary immunology and the principles of vaccine development, cytokines, tumor immunology, and neuroimmunology.
3 units, Aut, Win, Spr, Sum (Staff)

IMMUNOL 317. Frontiers in Immunology—Seminar class in journal club style. Focus is on one topic in immunology per quarter. Readings range from historical development to current research and questions.
1-3 units, Aut, Win, Spr, Sum (Staff)

MICROBIOLOGY AND IMMUNOLOGY

Emeriti: (Professors) Sidney Raffel, Leon T. Rosenberg, Bruce A. D. Stocker; (Professor, Research) Esther M. Lederberg
Chair: Mark M. Davis
Associate Professors: Peter Jackson, Garry Nolan, David Relman
Assistant Professors: Kenan Christopher Garcia, David Schneider, Upinder Singh, Julie Theriot
Associate Professor (Teaching): Robert D. Siegel
Career Assistant Professor: Christopher Contag (Pediatrics)
Department Offices: D300 Fairchild Building, 299 Campus Drive
Mail Code: 94305-5124
Phone: (650) 725-8541
Email: micro_immuno@lists.stanford.edu
Web Site: http://cmgm.stanford.edu/micro/

Courses given in Microbiology and Immunology have the subject code MI. For a complete list of subject codes, see Appendix.

The Department of Microbiology and Immunology offers a complete program of training leading to the Ph.D. degree, as well as research training, courses, and seminars for medical students and postdoctoral fellows. Research interests focus on two broad areas, host/parasite interactions, and the function of the immune system. Individual laboratories investigate mechanisms of pathogenesis and the physiology of viruses, bacteria, and protozoan parasites, as well as the lymphocyte function in antigen recognition, immune response, and autoimmunity.

GRADUATE PROGRAMS

MASTER OF SCIENCE

A regular M.S. program is not offered, although this degree is awarded under special circumstances. Candidates for master’s degrees are expected to have completed the preliminary requirements for the B.S. degree, or the equivalent. In addition, the candidate is expected to complete 45 quarter units of work related to microbiology; at least 25 of these units should concern research devoted to a thesis. The thesis must be approved by at least two members of the department faculty.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

Application, Admission, and Financial Aid—Prospective Ph.D. candidates should have completed a bachelor’s degree in a discipline of biology or chemistry, including coursework in biochemistry, chemistry, genetics, immunology, microbiology, and molecular biology. The deadline for receipt of applications with all supporting materials is December 15.

Applicants must file a report of scores on the general subject tests and on an advanced test (normally in cellular and molecular biology, chemistry, or biochemistry) of the Graduate Record Examination (GRE). It is strongly recommended that the GRE be taken before October so that scores are available when applications are evaluated.

In the absence of independent fellowship support, entering doctoral students are fully supported with a stipend and tuition award. Highly qualified applicants may be honored by a nomination for a Stanford fellowship. Successful applicants have been competitive for predoctoral fellowships such as those from the National Science Foundation.

Program for Graduate Study—The Ph.D. degree requires course work and independent research demonstrating an individual’s creative, scholastic, and intellectual abilities. On entering the department, students meet an advisory faculty member and together they design a timetable for completion of the degree requirements. Typically, this consists of first identifying gaps in the student’s undergraduate education and determining courses that should be taken. Then, a tentative plan is made for two to four lab rotations (one rotation per quarter). During the first year of graduate study in the department, each student also takes six or seven upper-level (200-series) courses. Three of these courses, Principles of Biological Techniques, Medical Microbiology, and Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites, are specific requirements of this department. Three courses, Advanced Genetics, Molecular Biology, and Cell Biology, are part of the core curriculum that is required of many graduate students in Stanford Biosciences.

In Spring Quarter of the second year, each student defends orally a formal research proposal on a topic outside the intended thesis project. The outline of this proposal is due to the Graduate Program Steering Committee by March 1st. Based on successful performance on this proposal, the student is admitted to candidacy. In the Autumn Quarter of the second year, a research proposal based on the student’s own thesis topic is defended by his or her thesis committee. Teaching experience and training are also part of the graduate curriculum. All graduate students are required to act as teaching assistants for two quarters. In addition, first- and second-year graduate students are required to participate in a bi-weekly journal club.
COURSES

MI 103. Parasites/Pestilence: Infectious Public Health Challenges—(Same as HUMBIO 103.) Parasitic and other diseases with public health impact. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context to understand public health policy approaches to halting disease transmission. Focus is on World Health Organization Tropical Disease Research targeted disease entities including: river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, and intestinal helminthes. Guest lecturers and experts in disease control and. Original proposal to solve a current disease.

3 units, Spr (Staff)

MI 115A. Humans and Viruses—(Same as HUMBIO 115A.) Overview of human virology. Topics illustrate concepts in biology and the social sciences, focusing on emerging infections, viral classification, transmission and prevention, vaccination and treatment, eradication of disease, viral pathogenesis, mechanisms of virally-induced cancer, and viral evolution. Topics: molecular biology of genetic shift and drift in influenza virus, cellular tropism of HIV, developmental biology of virally-induced birth defects, clinical aspects of infantile diarrhea, social aspects of the common cold, policy issues of blood antibody tests, factors in pathogenesis and transmission of prions, SARS. Prerequisites: Human Biology core or consent of instructor.

6 units (Siegel) alternate years, given 2005-06

MI 115B. The Vaccine Revolution—(Same as HUMBIO 115B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries especially in the area of vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize it into a literature review on a topic. Emphasis is on the development of critical reading, analysis, experimental design, and interpretation of data. Students give four oral presentations and lead discussions based on their scientific journal reading. Enrollment limited to 10. Prerequisite: 115A.

5 units, Win (Siegel) alternate years, not given 2005-06

MI 127N. Infectious Disease: Fact and Fiction—Stanford Introductory Seminar. Preference to freshmen. Modern science has developed methods of fighting infectious diseases and their human toll including public sanitation, vaccination, and antibiotics, but infections such as HIV, ebola, and dengue, and bioterrorism, remain a threat. Civilizations have historically dealt with these topics through the arts. The science behind infectious diseases and their treatments, and its portrayal in the movies. Old and new horror and science fiction films including Invasion of the Body Snatchers, Outbreak, The Andromeda Strain, Blade, Alien, and X-Files episodes. Readings include Scientific American and other primary scientific journals. Students critique a film from the perspective of a scientist.

3 units, Aut (Schneider)

MI 185. Topics in Microbiology—Topics include diversity, molecular regulation, growth, bioenergetics, and unique metabolic processes. Student papers for presentation on current topics such as antibiotic resistance and molecular approaches to bioremediation. Prerequisites: CHEM 31, 33, 35. Recommended: BIOSCI 31.

3 units, Spr (Matin, Staff)

MI 198A,B,C,D,E,F. Directed Reading: Microbiology—Fields of research open to students are decided in consultation with sponsoring faculty member.

1-15 units, Aut, Win, Spr, Sum (Staff)

MI 199. Undergraduate Research—Individual study or research by arrangement with a faculty member. Possible fields: microbial molecular biology and physiology, microbial pathogenicity, immunology, virology, and molecular parasitology. Prerequisites: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

MI 203. Biological Stress Response—Current literature. Possible topics: the nature and molecular regulation of the stress response; biochemistry and structural biology molecular chaperones; the role of stress proteins in the pathogenic process; psychoneuroendocrinology; multidrug resistance. Limited enrollment. Prerequisites: Biological Sciences core; upper-division course in molecular biology/genetics or biochemistry.

3 units (Matin, Staff) alternate years, given 2005-06

MI 204. Innate Immunology—Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora immunity. How microbes induce and defeat innate immune reactions with examples from vertebrates, invertebrates, and plants.

3 units, Spr (Schneider)

MI 205. Immunology for Medical Students—(Same as IMMUNOL 205) Medical students register for IMMUNOL 205; undergraduates and graduate students may enroll with consent of instructor. Basic concepts of adaptive and innate immunology and the role of the immune system in a variety of human diseases. Emphasis is on application of the fundamental concepts of human immunology. Case presentations of diseases including autoimmune diseases, infectious disease, transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Problem sets based on case reports, lectures, and publications from current clinical literature. Lab in inflammation.

4 units, Win (Lewis)

3 units, Spr (Mocarski, Staff) alternate years, not given 2005-06

MI 209. Medical Microbiology—For graduate and advanced undergraduate students. Required of first-year graduate students in Microbiology and Immunology. Introduction to the concepts of microbiological pathogenesis with emphasis on the mechanisms employed by pathogenic microorganisms in establishing infection in the host, and the responses of the host to infection. Prerequisite: understanding of biochemistry and molecular biology.

1-3 units, Spr (Falkow)

MI 210. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites—For graduate, medical, and advanced undergraduate students. Required for first-year graduate students in Microbiology and Immunology. The molecular mechanisms by which microorganisms invade animal and human hosts, express their genomes, interact with macromolecular pathways in the infected host, and induce disease. Problem sets and recent literature pertaining to microbial pathogenesis.

5 units, Win (Sarnow, Staff)

MI 211. Advanced Immunology I—(Same as IMMUNOL 201.) For graduate students and advanced undergraduates. Topics: genetics and structure/function relationships of antibodies, T-cell receptors, MHC antigens; accessory molecules; lymphocyte differentiation and activation; cellular regulation of immune responses; autoimmunity and other problems in clinical immunology. Prerequisites: biochemistry, basic immunology course; consent of instructor for undergraduates.

3 units, Win (Chien, Staff)

MI 212. Advanced Immunology II—(Same as IMMUNOL 202.) Readings of immunological literature and specific areas of immunology. Classic problems and emerging areas are covered based on primary literature. Student and faculty presentations. Prerequisite: 211.

3 units, Spr (Garcia, Staff)
MOLECULAR AND CELLULAR PHYSIOLOGY

Chair: Richard S. Lewis
Associate Professor: V. Daniel Madison
Assistant Professors: Miriam Goodman, Merritt Maduke
Courtesy Associate Professor: Anson W. Lowe
Courtesy Assistant Professors: John Huguenard, Richard J. Reimer
Department Offices: Beckman Center, B100
Mail Code: 94305-5345
Phone: (650) 725-7554
Email: schantae@stanford.edu
Web Site: http://mcp.stanford.edu

Courses given in Molecular and Cellular Physiology have the subject code MCP. For a complete list of subject codes, see Appendix.

The Department of Molecular and Cellular Physiology is located in the Beckman Center for Molecular and Genetic Medicine.

A central goal of physiology in the post-genomic era is to understand how thousands of encoded proteins serve to bring about the highly coordinated behavior of cells and tissues. Research in the department approaches this goal at many levels of organization, ranging from single molecules and individual cells to multicellular systems and the whole organism. The faculty share common interests in the molecular mechanisms of cell signaling and behavior, with a special focus on structure/function analysis of ion channels and G-protein coupled receptors, and their roles at the cellular, organ, and whole-organism levels; the molecular basis of sensory transduction, synaptic transmission, plasticity and memory; the role of ion channels and calcium in controlling gene expression in neural and immune cells; and the regulation of vesicle trafficking and targeting, cell polarity, and cell-cell interactions in the nervous system and in epithelia. Research programs employ a wide range of approaches, including molecular and cell biology, biochemistry, genetics, biophysics, x-ray crystallography and solution NMR, electrophysiology, and in vitro and in vivo imaging with confocal and multi-photon microscopy.

GRADUATE PROGRAMS

The department offers required and elective courses for students in the School of Medicine and is also open to other qualified students with the consent of the instructor. Training of medical, graduate, and postdoctoral students is available. The program offers a course of study leading to the Ph.D. degree. No B.S. is offered, and an M.S. is offered only in the unusual circumstance where a student completes the course work, rotation, and the written section of the qualifying exam, but is unable to complete the requirements for the Ph.D.

DOCTOR OF PHILOSOPHY

Students with undergraduate or master’s degrees who have completed a year each of college chemistry (including lectures in organic and physical chemistry), physics, calculus, and biology are considered for admission to graduate study. Applicants submit a report of scores from the Graduate Record Examination (verbal, quantitative, analytical, and an advanced subject test in one of the sciences) as part of the application.

Students who do not speak English as their native language must submit scores from TOEFL unless waived by Graduate Admissions, the Registrar’s Office.

Study toward the Ph.D. is expected to occupy five years, including summers. A minimum of six quarter-long courses are required. These include four graduate-level courses (200-300 series) and a choice of two out of these three courses: MCP 221, MCP 255, and MCP 256. Students are also required to take the Molecular and Cellular Physiology seminar/Research In Progress series. Each student presents a talk on research in progress to the department at least every other year, starting their second year. Acceptable grades for all course work must be a minimum of ‘B-’ and at least two grades equal to ‘A-’ or above are necessary (but not sufficient) for continuation in the program.

Qualifying Examination—At the end of the second year in residence as a graduate student, each Ph.D. candidate presents a written thesis proposal to be defended at an oral comprehensive examination. The examination may be taken only after all course work has been completed by the required standard. Students undertake individual research studies as early as possible after consultation with their preceptor. Upon passing this exam, the student is advanced to candidacy for the Ph.D.

Dissertation and University Oral Examination—The results of independent, original work by the students are presented in a dissertation. The oral examination is largely a defense of the dissertation.

Advisers and Advisory Committees—A graduate advisory committee, currently Professors Lewis and Aldrich, advises students during the period before the formation of their qualifying committees.

Financial Aid—Students may be funded by their advisers’ research grants, by training grants, by department funds, or by extramural funds. Students are encouraged to obtain funding from outside sources (e.g., NIH and NSF).
MCP 100Q. The Hippocampus as a Window to the Mind—Stanford Introductory Seminar. Preference to sophomores.

3 units, Spr (Madison)

MCP 199. Undergraduate Research—Fields of research open to students decided in consultation with sponsoring faculty member.

1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 200-204. Physiology—Offered jointly with the Department of Medicine. Lectures, small group instruction, clinical presentations, and lab demonstrations of normal and disordered human cardiovascular physiology, normal and disordered function in the endocrine, respiratory, renal, fluid and electrolyte, and acid-base systems. Prerequisite: understanding of general biochemistry.

5 units, Spr (Kobilka)

MCP 201. Endocrine Physiology

1-4 units, Win (Hoffman)

MCP 202. Gastrointestinal Physiology

1-3 units (Lowe)

MCP 203. Renal Physiology

1-3 units (Meyer)

MCP 204. Respiratory Physiology

1-2 units (Raffin)

MCP 213. Special Topics in Molecular and Cellular Physiology—Seminar. Introductory and advanced physiological topics agreed on by an individual instructor and interested students. Prerequisite: consent of instructor.

1-18 units (Staff)

MCP 215. Synaptic Transmission—Primarily for graduate students with an interest in synaptic function; interested medical students and advanced undergraduates may enroll. The anatomical, physiological, and biochemical basis of synaptic function in the peripheral and central nervous system. Relevant research papers.

5 units, Aut (Smith, Madison)

MCP 216. Genetic Analysis of Behavior—(Same as NBIO 216.) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.

4 units (Clandinin, Goodman) alternate years, given 2005-06

MCP 218. Transmembrane Signal Transduction—The molecular mechanisms of signal transduction for a variety of structurally and functionally different plasma membrane receptors. Topics: the structure of receptors and the interaction of the receptor protein with the lipid bilayer; ligand binding and ligand mediated changes in receptor structure; and cytosolic, cytoskeletal, and membrane proteins that interact with receptors. Recent research developments and the value of experimental approaches for the study of receptors.

2 units, Win (Kobilka)

MCP 221A,C,E,F,G,H. Cell Biology of Physiological Processes Discussion—Required course taken with 221, taught by medical school faculty, to expand on the topics covered in 221. Students register for only one section. Prerequisites: Biological Sciences core, BIOCHEM 201.

2-5 units, Win (Kopito, Frydman, Nelson)

MCP 222. Imaging: Biological Light Microscopy—(Same as BIOSCI 152.) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biological Sciences core. GER:2a

3 units, Spr (Smith)

MCP 232. Advanced Imaging Lab in Biophysics—(Same as BIOSCI 132/232, BIOPHYS 232.) Laboratory and lectures. Microscopy, emphasizing hands-on experience with a range of apparatus and techniques. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Advanced topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, optical trapping, and fiberoptic methods. Limited enrollment. Recommended: basic physics, Biological Sciences core or equivalent, or consent of instructor. GER:2a

4 units, Spr (S. Block, Schnitzer, S. Smith, Stearns)

MCP 255. Molecular Physiology of Membranes—Recommended for all MCP graduate students; open to graduate and medical students; advanced undergraduates with consent of instructor. Structure and mechanisms of the molecules underlying transmembrane processes. Topics include structure of membrane proteins, energetics of membranes, transmembrane signaling (receptors and channels), transport (transporters and pumps), single molecule methods and theory, and membrane complexes. Lectures introduce concepts; student activities and small group discussion emphasize application of concepts to research the literature. Recommended: BIOC/SBIO 214 or equivalent.

4 units, Win (Maduke, Aldrich)

MCP 256. Molecular Physiology of Cells—Recommended for all MCP graduate students; open to graduate and medical students; advanced undergraduates with consent of instructor. Dynamic aspects of cell function, including cellular energetics, gas exchange, solute transport, absorption and secretion in epithelia, ionic and electrical signaling in nerve and muscle, and sensory physiology. Emphasis is on the cellular function of ion channels and transporters, joining experimental and analytical approaches. Lectures, in-class readings, discussions, student presentations, and the use of mathematical models of cell function. Recommended: MCP 255; basic cell and molecular biology.

4 units, Spr (Lewis, Goodman)

MCP 299. Directed Reading—Prerequisite: consent of instructor. See faculty list for section numbers.

1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 399. Advanced Research—Investigation sponsored by individual faculty members undertaken by interested, qualified medical or graduate students. Research fields include endocrinology, neuroendocrinology, and topics in molecular and cellular physiology.

1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 459. Frontiers in Interdisciplinary Biosciences—(Crosslisted in departments in the schools of H&S, Engineering, and Medicine; student register through their affiliated departments; otherwise register for CHEMENG 459) See CHEMENG 459 or http://biox.stanford.edu/courses/459_announce.html.

1 unit, Aut, Win, Spr (Robertson)
Molecular Pharmacology

Emeriti: (Professors) Robert H. Dreisbach, Avram Goldstein, Dora B. Goldstein, Tag E. Mansour, James P. Whitlock

Chair: Daria Mochly-Rosen

Professors: James E. Ferrell, Jr., Oleg Jardetzky, Daria Mochly-Rosen, Richard A. Roth

Associate Professor: Tobias Meyer

Assistant Professors: James K. Chen, Karlene A. Cimprich, Ricardo Dolmetsch, Thomas J. Wandless

Consulting Professors: Gordon Ringold, Alejandro Zaffaroni

Web Site: http://molepharm.stanford.edu

Courses given in Molecular Pharmacology have the subject code MPHA. For a complete list of subject codes, see Appendix.

Graduate Programs

Master of Science

Students in the Ph.D. program may apply for an M.S. degree, after having satisfactorily completed the course and laboratory requirements of the first two years. The degree also requires a written thesis based on literature or laboratory research. Postdoctoral research training is available to graduates having the Ph.D. or M.D. degree.

Doctor of Philosophy

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The Department of Molecular Pharmacology offers interdisciplinary training to prepare students for independent careers in biomedical science. Research and training in the department focuses on the mechanisms by which hormones, drugs, and toxic compounds alter cell function, and on the development of new therapeutic technologies. At the heart of these issues lies the analysis of cell signaling and gene expression.

The program leading to the Ph.D. degree includes formal and informal study in pharmacology, genetics, biochemistry, and molecular cell biology. First-year students spend one quarter in each of three different laboratories, working closely with other graduate students, a professor, and postdoctoral fellows on various research projects. During the fourth quarter, the student chooses a faculty mentor with whom to undertake thesis research, based on available positions and the student’s interest. During or before the eighth quarter of study, students must pass a qualifying exam which consists of an oral exam on general knowledge and a defense of a research proposal. Course requirements are fulfilled during the first two years of study; the later years of the four- to six-year program are devoted to full-time dissertation research. Close tutorial contact between students and faculty is stressed throughout the program.

Research opportunities also exist for medical students and undergraduates. The limited size of the labs in the department allows for close tutorial contact between students, postdoctoral fellows, and faculty.

The department participates in the four quarter Health and Human Disease sequence which provides medical students with a comprehensive study in pharmacology, genetics, biochemistry, and molecular cell biology. The limited size of the labs in our department allows for close tutorial contact between students, postdoctoral fellows, and faculty.

The field of pharmacology is within the domain of the Health and Human Disease sequence which provides medical students with a comprehensive, systems-based education in physiology, pathology, microbiology, and pharmacology.

Courses

Course and lab instruction in the Department of Molecular Pharmacology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/phb/8-2.html.

MPHA 199. Undergraduate Research

1-18 units, Aut, Win, Spr, Sum (Staff)

MPHA 201. Pharmacology I—For graduate students; medical students should consult with course director before enrolling. Topics: receptors; pharmacokinetics; and autonomous, CNS, and cardiovascular pharmacology. Mechanisms of drug action in humans. Prerequisite: undergraduate organic chemistry.

5 units, Aut (Ferrell)

5 units, Win (Ferrell)

Advanced

Open to all University students; instructor’s consent required prior to registration. Students should consult with the instructor about the adequacy of their preparation.

MPHA 210. Signal Transduction Pathways and Networks—The molecular mechanisms through which cells receive and respond to external signals. Emphasis is on principles of cell signaling, the systems-level properties of signal transduction modules, and experimental strategies through which cell signaling pathways are being studied. Prerequisite: working knowledge of biochemistry and genetics.

4 units, Win (Ferrell, Meyer)

MPHA 220. Chemistry of Biological Processes—(Same as BIOC 220.) Principles of organic and physical chemistry applied to biomolecules. Chemical principles that underlie biological processes, and chemical tools used to study and manipulate biological systems. Prerequisites: organic chemistry and biochemistry, or consent of instructor.

4 units, Aut (Wandless, Herschlag, Chen, Bogyo)

MPHA 240. Drug Discovery—The scientific principles and technologies involved in making the transition from a basic biological observation to the creation of a new drug, with emphasis on molecular and genetic issues. Prerequisite: knowledge of biochemistry, chemistry, or bioengineering.

4 units, Spr (Mochly-Rosen, Cimprich) alternate years, not given 2005-06

MPHA 250. Fundamentals of Drug-Receptor Interactions and Drug Design—The principles of biological structure determination, scope, and limits of the methods and of the structural information derived from them. Enrollment limited to 15.

3 units (Jardetzky) not given 2004-05

MPHA 260. Quantitative Chemical Biology—Principles governing chemical and biological processes and recent advances at the interface of chemistry and biology. Topics include protein and small molecule engineering, chemical genetics, combinatorial chemistry, and in vitro evolution. Prerequisites: undergraduate organic chemistry, and biochemistry or cell biology.

4 units (Cimprich, Wandless, Jackson) not given 2004-05

MPHA 270. Research Seminar—Current research in pharmacology. Seminars are reviewed and discussed in a separate conference with a member of the faculty.

1-2 units, Aut, Win, Spr (Staff)

MPHA 280. Tutorial Program—Guided readings in the literature of any area of pharmacology. Review paper may be required. Primarily for students in pharmacology. See faculty list for section numbers.

1-18 units, Aut, Win, Spr, Sum (Staff)

MPHA 299. Directed Reading—See faculty list for section numbers.

1-18 units, Aut, Win, Spr, Sum (Staff)

MPHA 399. Research—Investigations sponsored by individual faculty members. See faculty list for section numbers.

1-18 units, Aut, Win, Spr, Sum (Staff)

MPHA 450. Introduction to Biotechnology—(Enroll in CHEMENG 450, BIOC 450.)

3 units, Spr (Staff)

MPHA 459. Frontiers in Interdisciplinary Biosciences—(Crosslisted in departments in the schools of H&S, Engineering, and Medicine; student register through their affiliated departments; otherwise register for CHEMENG 459) See CHEMENG 459 or http://biox.stanford.edu/courses/459_announce.html.

1 unit, Aut, Win, Spr (Robertson)
NEUROBIOLOGY

Chair: Eric I. Knudsen
Professors: Ben Barres, Eric I. Knudsen, Uel J. McMahan, William T. Newsome
Assistant Professors: Stephen Baccus, Thomas Clandinin, Tiriin Moore, Jennifer Raymond
Department Offices: Fairchild Building, Second Floor
Mail Code: 94305-5125

Courses given in Neurobiology have the subject code NBIO. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAM

Graduate students in the Department of Neurobiology obtain the Ph.D. degree through the interdepartmental Neurosciences Ph.D. program. Accepted students receive funding for tuition and a living stipend. Applicants should familiarize themselves with the research interests of the faculty and, if possible, indicate their preference on the application form which is submitted directly to the Neurosciences Program.

Medical students also are encouraged to enroll in the Ph.D. program. The requirements of the Ph.D. program are fitted to the interests and time schedules of the student. Postdoctoral training is available to graduates holding Ph.D. or M.D. degrees, and further information is obtained directly from the faculty member concerned.

Research interests of the department include: mechanisms of visual transduction and information transmission in vertebrate retina; structure, function, and development of auditory and visual systems; integrative mechanisms and regeneration in the central and peripheral nervous system; mechanisms of ion channel function; and neuronal growth and differentiation.

COURSES

Course and lab instruction in the Department of Neurobiology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

The department offers a one quarter course (NBIO 200) on the structure and function of the nervous system, which is open to medical and graduate students and advanced undergraduates. Advanced courses are open to students who have completed the basic course.

NBIO 199. Directed Reading (Undergraduate)—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr (Baccus, Barres, Clandinin, Knudsen, McMahan, Moore, Newsome, Raymond, Stryer)

NBIO 204. Computational Neuroimaging—(Same as PSYCH 204A.)

Advanced seminar. For students working with functional magnetic resonance imaging (fMRI). Review of current understanding of the physiological basis of the signal measured using fMRI. Possibilities for experiment design and interpretation of the signal with respect to other physiological and behavioral measurements. Emphasis is on experimental design, software tools, and pulse sequences for fMRI experiments.

1-3 units, Aut (Wandell, Grill-Spector)
alternate years, not given 2005-06

NBIO 206. The Nervous System—Introduction to the structure and function of the nervous system, including neuroanatomy, neurophysiology, and systems neurobiology. Topics include the properties of neurons and the mechanisms and organization underlying higher functions. Framework for general work in neurology, neuropathology, clinical medicine, and for more advanced work in neurobiology. Lecture and lab components must be taken together.

8 units, Win (Barres, Knudsen, Newsome, Raymond, Clandinin, Moore, Baccus)

NBIO 216. Genetic Analysis of Behavior—(Same as MCP 216.)

Advanced seminar. Findings and implications of behavioral genetics and developmental genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.

4 units (Clandinin, Goodman) alternate years, given 2005-06

NBIO 218. Neural Basis of Behavior—Advanced seminar. The principles of information processing in the vertebrate central nervous system, and the relationship of functional properties of neural systems with behavior. Emphasis is on the visual and auditory systems. Original papers, directed discussions, and student presentations. Prerequisite: 200 or consent of instructor.

4 units, Spr (Knudsen, Raymond) alternate years, not given 2005-06

2-4 units (Newsome) alternate years, given 2005-06

NBIO 221. Frontiers in Translational Medicine—Pathways for combining science and medicine during graduate and postdoctoral training and in one’s career. Practical aspects of translational medicine. Guest lecturers include physician-scientists who have advanced the frontiers of translational medicine. Speakers last year included Rob Malenka, Judy Swain, Bob Fisher, Jeff Bird, Ching Wang, Lubert Stryer, Jamie Topper, Ben Barres, and Gary Steinberg.

1 unit, Spr (Barres)

NBIO 240. High Level Vision—(Enroll in PSYCH 250.)

1-3 units, Aut (Grill-Spector)

NBIO 254. Molecular and Cellular Neurobiology—(Same as BIOSCI 154/254.)

For advanced undergraduates and graduate students. Focus is on cellular and molecular mechanisms in the organization and functions of the nervous system. Topics: wiring of the neuronal network, synapse structure and synaptic transmission, signal transduction in the nervous system, sensory systems, molecular basis of behavior including learning and memory, molecular pathogenesis of neurological diseases. Prerequisite for undergraduates: Biological Sciences core or equivalent, or consent of instructors. GER:2a

4 units, Aut (Luo, Shen, Clandinin)

NBIO 299. Directed Reading—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Baccus, Barres, Clandinin, Knudsen, Moore, McMahan, Newsome, Raymond, Stryer)

NBIO 300. Professional Development and Integrity in Neuroscience—Required of Neurosciences Ph.D. students every quarter. Develops professional skills in critical assessment and oral presentation of findings from current neuroscience literature in the visual presentation of quantitative data and writing research grants. The role of animals in laboratory research, the use of animals, and the ethical responsibility of scientists and reviewers. The role of animals in laboratory research, the ethical responsibility of scientists and reviewers. The role of animals in laboratory research, the ethical responsibility of scientists and reviewers.

1-2 units, Aut, Win, Spr (Raymond)

NBIO 399. Individual Research—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Baccus, Barres, Clandinin, Knudsen, Moore, McMahan, Newsome, Raymond, Stryer)

NBIO 450. Introduction to Biotechnology—(Enroll in CHEMENG 450, BIOC 450.)

3 units, Spr (Kao)

1 unit, Aut, Win,Spr (Robertson)
NEUROSCIENCES PROGRAM

Director: William T. Newsome (Professor of Neurobiology)

Participating Faculty:
Anesthesia: Rona Giffard (Associate Professor), Joan E. Kendig (Professor), M. Bruce MacIver (Assistant Professor, Research), Sean Mackey (Assistant Professor), David Yeomans (Associate Professor)
Applied Physics: Mark Schnitzer (Assistant Professor)
Biological Sciences: Bruce Baker (Professor), Russell D. Fernald (Professor), William F. Gilly (Professor), H. Craig Heller (Professor), Ron Kopito (Professor), Liqun Luo (Assistant Professor), Susan McConnell (Professor), Robert M. Saposky (Professor), Mark Schnitzer (Assistant Professor), Kang Shen (Assistant Professor), Stuart Thompson (Professor)
Comparative Medicine: Paul S. Buckmaster (Assistant Professor), Linda C. Cork (Professor), Corinna Darian-Smith (Assistant Professor), Shaul Hestrin (Associate Professor)
Developmental Biology: Matthew P. Scott (Professor)
Electrical Engineering: Krishna Shenoy (Assistant Professor)
Genetics: Anne Brunet (Assistant Professor), David R. Cox (Professor)
Molecular and Cellular Physiology: Richard Aldrich (Professor), Miriam B. Goodman (Assistant Professor), Brian Kohilka (Professor), Richard S. Lewis (Associate Professor), V. Daniel Madison (Associate Professor), Merritt C. Maduke (Assistant Professor), Stephen Smith (Professor), Richard Tsien (Professor)
Neurobiology: Stephen Baccus (Assistant Professor), Ben Barres (Associate Professor), Tom Clandinin (Assistant Professor), Eric I. Knudsen (Professor), U. J. McMahen (Professor), Tirin Moore (Assistant Professor), William T. Newsome (Professor), Jennifer Raymond (Assistant Professor)
Neurology and Neurological Sciences: Robert S. Fisher (Professor), Ting-Ting Huang (Assistant Professor), John A. Huguenard (Associate Professor), William C. Mobley (Professor), David A. Prince (Professor), Thomas A. Rando (Assistant Professor), Richard Reimer (Assistant Professor), Terence Sanger (Assistant Professor), Lawrence Steinman (Professor), Tony Wyss-Coray (Assistant Professor), Yanmin Yang (Assistant Professor)
Neurosurgery: Pak H. Chan (Professor), Theo Palmer (Assistant Professor), Gary K. Steinberg (Professor)
Pathology: Bingwei Lu (Assistant Professor), Raymond Sobel (Associate Professor)
Psychiatry and Behavioral Sciences: William C. Dement (Professor), Craig Garner (Professor), Terrence A. Ketter (Associate Professor), Robert C. Malenka (Professor), Vinod Menon (Assistant Professor, Research), Emmanuel Mignot (Professor), Allan L. Reiss (Professor), Edith Sullivan (Professor, Research)
Psychology: John Gabrieli (Associate Professor), Ian Gotlib (Professor), Kalanit Grill-Spector (Assistant Professor), Brian Knutson (Assistant Professor), Anthony Wagner (Assistant Professor), Brian Wandell (Professor), Jeffrey J. Wine (Professor)
Radiology: John Desmond (Assistant Professor)

Program Offices: Alway Bldg., M-103D
Mail Code: 94305-5121
Phone: (650) 723-9855
Web Site: http://sbri.stanford.edu/phd/index.html

Courses given in the Neurosciences Program have the subject code NEPR. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAM
DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The interdepartmental Neurosciences Program offers instruction and research opportunities leading to a Ph.D. in Neurosciences. The requirements for a Ph.D. degree follow those of the University and in addition are tailored to fit the background and interests of the student. Accepted students receive an award covering tuition, a basic health plan, and a living stipend. Qualified applicants should, where possible, apply for the predoctoral fellowships in open competition, especially those from the National Science Foundation. December 16 is the deadline for receipt in the Neurosciences Program office of applications with all supporting material.

Applicants should familiarize themselves with the research interests of the faculty and indicate their preferences clearly on the application form.

Since students enter with differing backgrounds and the labs in which they may elect to work cover several different disciplines, the specific program for each student is developed individually with an advisory committee. All students are required to complete the basic introduction to neurobiology (NBIO 206 or equivalent). Students must also take five advanced courses, four of which must be distributed among four of the following core areas: systems and behavioral neuroscience, molecular and cellular neuroscience, developmental neuroscience, clinical neuroscience, and computational neuroscience. The fifth advanced course is chosen by the student in an area related to the student’s research interest, and may be selected from outside the Neurosciences core with prior approval from the Program Director and the student’s adviser.

Students usually rotate through several labs during their first year, although they may choose to begin thesis research on entry. After the first rotation, students may rotate both within and outside the Neurosciences Program. Required course work should be completed by the end of the second year. Passing of a comprehensive oral preliminary examination given by the student’s advisory committee is required for admission to Ph.D. candidacy. This examination is usually taken by the end of the second year. The student is required to present a Ph.D. dissertation, which is the result of independent investigation contributing to knowledge in an area of neuroscience, and to defend his or her dissertation in a University oral examination, which includes a public seminar.

Medical students may participate in this program provided they meet the prerequisites and satisfy all the requirements of the graduate program as listed above. The timing of the program may be adjusted to fit their special circumstances.

COURSES

Course and lab instruction in the Neurosciences Program conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

NEPR 300. Professional Development and Integrity in Neuroscience—(Enroll in NBIO 300.)
1-2 units, Aut, Win, Spr (Raymond)

NEPR 399. Research—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

OBSTETRICS AND GYNECOLOGY

Chair: Mary Lake Polan

Courses given in Gynecology have the subject code OBGY. For a complete list of subject codes, see Appendix.

The Department of Obstetrics and Gynecology does not offer degrees; however, qualified medical, graduate, or undergraduate students with an interest in basic research in reproductive biology may apply to arrange individual projects under the supervision of the faculty. The focus for the Division of Reproductive Biology is the study of the molecular and cellular biology of male and female reproductive organs.
The Department of Pathology offers a sequence of basic courses in general and special pathology, including neuropathology, which is open to medical students only. Interested and qualified graduate students may petition the course director to audit the lecture portion of these courses. In addition, there are a number of advanced courses in selected aspects of pathology. The department does not offer advanced degrees in pathology, but qualified graduate students who are admitted to the Biophysics Program, the Cancer Biology Program, or other interdepartmental programs may elect to pursue their thesis requirements in the research laboratories of the Department of Pathology. The discipline of pathology has traditionally served as a bridge between the preclinical and clinical sciences and is concerned with the application of advances in the basic biological sciences, both to the diagnosis of disease in man and to the elucidation of the mechanisms of normal molecular, cellular, and organ structure and function that manifest themselves in clinical disease. Accordingly, the department’s research interests encompass a broad range that extends from fundamental molecular biology to clinical-pathological correlations, with a primary emphasis on experimental oncology.

At present, investigation in the department includes basic studies in different areas utilizing molecular biological, biochemical, and genetic cell biological techniques: DNA replication in yeast and cultured eukaryotic cells, cell cycle control in animal cells and yeast, identification and pathogenetic role of chromosomal aberrations in human malignancies and mechanisms of activation of oncogenes in human and animal cells, lymphocyte and neutrophil-interactions with endothelial cells, cell type specification and signal transduction pathways leading to specific gene expression or modulation of cytoskeletal behavior; cytoskeletal architectural, cell-matrix interaction, developmental biology of hematopoietic stem cells and thymus, regulation of the immune system, and mechanisms of immune and other responses in the central nervous system. In addition, a variety of studies focus on the development of novel diagnostic and immunotherapeutic treatment modalities and techniques for solid tumors, lymphomas, HIV, and genetic diseases. Research training in all of these areas is available for qualified medical and graduate students by individual arrangement with the appropriate faculty member. A summary of the research interests of the department faculty is available on request.

COURSES

Course and lab instruction in the Department of Pathology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

1 unit, Spr (Michie)

3 units, Spr (Regula)

PATH 199. Undergraduate Research
1-18 units, Aut, Win, Spr (Staff)

PATH 205. Immunology for Medical Students—(Same as IMMUN 205, MI 205; first-year medical students register for MI 205.) The basic concepts of adaptive and innate immunology and the role of the immune system in a variety of diseases, utilizing case presentations of diseases including autoimmune diseases, infectious disease, transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Weekly problem sets based on case reports and publications drawn from current clinical literature. Emphasis is on application of the fundamental concepts of human immunology.
4 units, Win (Lewis)

PATH 211. Advanced Immunology I—Enroll in IMMUN 201, MI 211.
3 units, Win (Chien, Staff)

PATH 213. Gross Autopsy Pathology Laboratory (Medical Students only)—Examine/discuss unfixed dissected organs from current autopsies and correlate morphologic findings with the clinical history. Students view postmortem examinations and may participate (in a small group) in one postmortem examination with the assistance of residents and staff, and present the case to the class. Class scheduling is flexible. Additional unit for participation in a postmortem examination. Pre-requisite: 230B or 230C.
2-3 units, Aut, Win (D. Regula, Staff)

PATH 215. Molecular Mechanisms of Disease—Provides graduate students in the basic sciences with an exposure to current research topics in human disease. Each week, one scientist from academia or industry presents a seminar on the pathogenesis of a particular disease, with an emphasis on molecular approaches, followed by a discussion. A review article and one or two research papers from the current literature are assigned prior to each meeting.
1 unit, Win (Lipsick, Staff)

PATH 220. Immunology for Medical Students—(Same as IMMUN 200, MI 200; medical students enroll in MI 200.) The basic concepts of immunology and the role of the immune system in a variety of diseases, utilizing case presentations of diseases including autoimmune diseases, infectious disease, transplantation, immunodeficiency diseases, hypersensitivity reactions, and allergic diseases. Weekly problem sets based on case reports and publications drawn from the clinical literature. Emphasis is on application of the fundamental concepts of immunology.
4 units, Win (Lewis, Staff)
PATH 299. Directed Reading—Prerequisite: consent of faculty member. 1-18 units, Aut, Win, Spr, Sum (Staff)

PATH 399. Research—Department faculty are involved in active research programs at the Stanford Medical Center. Students interested in research at the molecular, cellular, and clinical-pathologic levels are encouraged to seek out faculty advisers. The department is equipped for modern research and maintains an active postdoctoral research training program. Prerequisite: consent of instructor. 1-18 units, Aut, Win, Spr, Sum (Staff)

RADIATION ONCOLOGY

Emeriti: Malcolm A. Bagshaw, Peter Fessenden, George M. Hahn, Clarence J. Karzmark, Kendric Smith
Chair: Richard T. Hoppe
Professors: Arthur Boyer, J. Martin Brown, Sarah S. Donaldson, Amato J. Giaccia, Don R. Goffinet, Steven L. Hancock, Richard T. Hoppe, Daniel S. Kapp, Steven A. Liebel
Associate Professors: Susan J. Knox, Quynh-Thu Le, Gary Luxton, Melanie C. Smit, Lei Xing
Assistant Professors: Laura Attardi, Nicholas Denko, Iris C. Gibbs, Edward Graves, Christopher R. King, Albert C. Koong, Todd Pawlicki
Consulting Professor: Robert M. Sutherland

Courses given in Radiation Oncology have the subject code RADO. For a complete list of subject codes, see Appendix.

Radiation Oncology is a discipline focused around the use of radiation for both cancer therapy and research. The fundamental and applied research within the department reflects this spectrum in radiation therapy and clinical oncology, and in radiation and tumor biology.

The department does not offer degrees; however, its faculty teach a variety of courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Graduate students in the Biophysics Program and in the Cancer Biology Program may perform their thesis research in the department. Undergraduate students may also arrange individual research projects under the supervision of the faculty.

At the present time, the major areas of basic research investigation in the department include: DNA repair in mammalian cells after ionizing irradiation; studies of the mechanism of tumor hypoxia in animal tumors; development of new anti-cancer drugs to exploit tumor hypoxia; cytogenetic and molecular methods of predicting the sensitivity of individual tumors to cancer therapy; radiolabeled monoclonal antibodies for cancer detection and treatment; studies of oxygen levels in human tumors using polarographic electrodes—clinical trials of a new hypoxic cytotoxic agent (tirapazamine); studies of the late effects of cancer therapy; and techniques of conformal and intensity modulated radiation therapy.

COURSES

Course and lab instruction in the Department of Radiation Oncology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

The following are open to undergraduates and graduate students.

RADO 101. Readings in Radiation Biology 1-18 units, Aut, Win, Spr (Staff)
RADO 199. Undergraduate Research 1-18 units, by arrangement (Staff)
RADO 299. Directed Reading—Prerequisite: consent of instructor. See faculty list for section numbers. 1-18 units, Aut, Win, Spr, Sum (Staff)
RADO 399. Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor. 1-18 units, Aut, Win, Spr, Sum (Staff)

RADIOTHERAPY

Chair: Gary M. Glazer
Associate Professors: Patrick D. Barnes, Christopher F. Beaulieu, Robyn L. Birdwell, Francis Blankenberg, Michael D. Dake, Debra M. Ikeda, Stephen Kee, Ann Leung, Michael Marks, Michael F. Moseley, Eric W. Olcott, Mahmoud Razavi, Geoffrey D. Rubin, George M. Segall, Daniel M. Spielman, Daniel Y. Sze
Assistant Professor (Research): Kim Butts
Assistant Professors: Sandip Biswal, Frandics P. Chan, Lawrence Chow, Bruce Daniel, Terry Dessler, Huy M. Do, Dominik Fleischmann, Joan K. Frisoli, Garry E. Gold, Kathryn J. Stevens
Assistant Professors (Research): Mark Bednarski, John Desmond, Rebecca Fahrig, Sylvia Plevritis
Consulting Assistant Professor: Jarrett Rosenberg
Web Site: http://www-radiology.stanford.edu/

Courses given in Radiology have the subject code RAD. For a complete list of subject codes, see Appendix.

The Department of Radiology does not offer degrees; however, its faculty teach a variety of courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Undergraduate students may also arrange individual research projects under the supervision of the department’s faculty. This discipline focuses on the use of radiation, ultrasound, and magnetic resonance as diagnostic, therapeutic, and research tools. The fundamental and applied research within the department reflects this broad spectrum as it relates to anatomy, pathology, physiology, and interventionional procedures. Original research and development of new clinical applications in medical imaging is supported within the Radiological Sciences Laboratory.

Courses open to undergraduates and graduate students are listed below.

COURSES

RAD 101. Readings in Radiology Research 1-18 units, Aut, Win, Spr (Staff)
RAD 199. Undergraduate Research 1-18 units (Staff)
RAD 208. Experimental Nuclear Medicine—Computer applications in medicine, particularly in the use of radioisotopes as tracers. Recommended: some knowledge of physiology and calculus. 2 units, Win, Spr (Goris)
RAD 210. Clinical Nuclear Medicine—The application of nuclear medicine procedures to clinical cases. Prerequisite: consent of instructor. 2 units, Win (Goris, Staff)
RAD 220. Introduction to Imaging and Image-based Human Anatomy—Emphasis is on contrast mechanisms and the relative strengths of each imaging modality. Laboratory component shows imaging and anatomy in real time. Recommended: basic biology, physics, and math. 3 units, Win (Gold, Butts)
RAD 221. Introduction to Radiologic Anatomy—Basic human anatomy through imaging examinations including radiography, computed tomography, ultrasound, and magnetic resonance imaging. How to recognize normal anatomy on imaging studies, spatial relationships, and three-dimensional thinking. Case studies of pathology. 2 units (Gold, Staff)
**RAD 226. In Vivo Magnetic Resonance Spectroscopy and Imaging** —
Collections of identical independent nuclear spins are described by the classical vector model of magnetic resonance imaging (MRI); however, interactions among spins, as occur in many in vivo processes, require a more complete description. Physics and engineering principles of these in vivo magnetic resonance phenomena with emphasis on current research questions and clinical applications. Topics: quantum mechanical description of magnetic resonance, density matrix theory, product operator formalism, relaxation theory and contrast mechanisms, spectroscopic imaging, spectral editing, and multinuclear studies. Prerequisites: EE 369B or familiarity with magnetic resonance, working knowledge of linear algebra.

3 units, Win (Spielman)

**RAD 299. Directed Reading** —Prerequisite: consent of instructor. Search for instructor name on Axess.
1-18 units, Aut, Win, Spr, Sum (Staff)

**STRUCTURAL BIOLOGY**

*Chair:* Michael Levitt (on leave)
*Associate Chair:* Joseph D. Puglisi

*Professors:* Roger D. Kornberg, Michael Levitt (on leave), David B. McKay, Uel J. McMahan, Peter Parham, William I. Weis

*Associate Professor:* Joseph D. Puglisi

*Professor (Teaching):* Patricia Cross

*Associate Professor (Research):* Yahi Lorch

*Assistant Professor:* Kenan C. Garcia

*Department Offices:* Fairchild Building, D100
*Mail Code:* 94305-5126
*Phone:* (650) 723-7576
*Email:* structuralbio@med.stanford.edu
*Web Site:* http://www.med.stanford.edu/school/structuralbio

Courses given in Structural Biology have the subject code S BIO. For a complete list of subject codes, see Appendix.

The department offers course work and opportunities for research in structural biology. Courses fall into two categories: (1) a series of one quarter courses that treat topics of current interest in structural biology and biophysics at an advanced level; and (2) INDE 216, Cells to Tissues, a course for medical students that includes lectures on structure-function relationships of mammalian cells and tissues and a lab on medical histology.

The emphasis of research in the department is on understanding fundamental cellular processes in terms of the structure and function of biological macromolecules and their assemblies. Techniques used include standard methods of biochemistry, cell culture, single-molecule fluorescence spectroscopy, genetic engineering, and three dimensional structure determination by x-ray diffraction, nuclear magnetic resonance spectroscopy and electron microscopy, coupled with the development of computational methods.

**GRADUATE PROGRAMS**

**DOCTOR OF PHILOSOPHY**

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The graduate program in Structural Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program in which individuals are candidates for both the Ph.D. and M.D. degrees.

The graduate program is intended to prepare students for careers as independent investigators in cell and molecular biology. The principal requirement of a Ph.D. degree is the completion of research constituting an original and significant contribution to the advancement of knowledge. The requirements and recommendations for the Ph.D. degree include:

1. Training in physics or chemistry equivalent to that of an undergraduate physics or chemistry major at Stanford.
2. Completion of the following background courses or their equivalents at other institutions:
   a) CHEM 131, 171, 173, and 175
   b) BIOC 200, 201
3. Completion of the following courses or their equivalents:
   a) SBIO 241 and 242
   b) At least four additional graduate level courses in physical or biological science
c) M ED 255
4. Opportunities for teaching are available during the first nine quarters at the discretion of the advising committee.
5. The student must prepare a dissertation proposal defining the research to be undertaken including methods of procedure. This proposal should be submitted by Winter Quarter of the third year, and it must be approved by a committee of at least three members including the principal research adviser and at least one member from the Department of Structural Biology. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.
6. The student must present a Ph.D. dissertation as the result of independent investigation and expressing a contribution to knowledge in the field of structural biology.
7. The student must pass the University oral examination, taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the research is presented by the candidate.

Applicants to the program should have a bachelor’s degree and should have completed at least a year of course work in biology, mathematics, organic chemistry, physical chemistry, and physics. Application forms must be received by the department before December 15 for notification by April 15. Application to the National Science Foundation for fellowship support is also encouraged. Remission of fees and a personal stipend are available to graduate students in the department. Prospective applicants should contact the Department of Structural Biology for further information.

Current topics of research in the department lie in the areas of gene expression; theoretical, crystallographic, and genetic analysis of protein structure; and cell-cell interaction. See http://www.med.stanford.edu/school/structuralbio/ for further information.

**COURSES**

Course and lab instruction in the Department of Structural Biology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/typ/8-2.html.

**SBIO 199. Undergraduate Research**

1-18 units, Aut, Win, Spr, Sum (Staff)

**SBIO 201. Advanced Immunology I**—(Enroll in MI 211, IMMUNOL 201.)

3 units, Win (Chien, Staff)

**SBIO 228. Computational Structural Biology**—(Same as BIOPHYS 228.) Online class. Interatomic forces and interactions such as electrostatics and hydrophobicity, and protein structure in terms of amino acid properties, local chain conformation, secondary structure, domains, and families of folds. How protein motion can be simulated. Bioinformatics introduced in terms of methods that compare protein via their amino acid sequences and their three-dimensional structures. Structure prediction via simple comparative modeling. How remote homologues can be detected and modeled. Predicting the structure of a protein from knowledge of its amino acid sequence.

3 units, Aut, Win (LeVitt)
SBIO 229. The Eukaryote Chromosome—The principles of chromosome structure and function including the structure, dynamics, and topological forms of DNA; units and hierarchies of DNA coiling in chromosomes; centromeres, telomeres, and basis of chromosome maintenance and sorting in mitosis; mechanism of gene activation with particular regard to enhancer, promoter, and terminator sequences; basis of sequence-specific protein-DNA interaction; and organization and assembly of the cell nucleus. Prerequisite: basic biochemistry and cell biology.
   3 units, Spr (Kornberg)

SBIO 241. Biological Macromolecules—Introduction to the physical and chemical basis of macromolecular function. The forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies. Prerequisite: BIOC 200 or equivalent.
   3-5 units, Aut (Puglisi, Block, Herschlag, Kirkegaard, McKay, Pande, Garcia)

SBIO 242. Methods in Molecular Biophysics—The potential utility of physical approaches to research, and how to evaluate literature that incorporates these methods. Experimental methods in molecular biophysics from theoretical and practical standpoints. Emphasis is on x-ray diffraction and nuclear magnetic resonance spectroscopy. Additional topics include fluorescence spectroscopy, circular dichroism, calorimetry, and separation methods.
   3 units, Win (Weis, Puglisi) alternate years, not given 2005-06

SBIO 299. Directed Reading—Prerequisite: consent of instructor. See faculty list for section numbers.
   1-18 units, Aut, Win, Spr, Sum (Staff)

SBIO 399. Individual Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor. See faculty list for section numbers.
   1-18 units, Aut, Win, Spr, Sum (Staff)

SBIO 450. Introduction to Biotechnology—(Enroll in CHEMENG 450, BIOC 450.)
   3 units, Spr (Staff)

SBIO 451. Protein Design and Engineering—Emphasis is on recent papers. Topics include: computational strategies for protein design; selection methods; applications of designed proteins in biotechnology, material sciences, and medicine; and prospects for a synthetic biology. Practical problems of design are related to issues of protein folding, structure, function, energetics, and evolution. Prerequisite: introductory biochemistry.
   2 units, Aut (Pabo, Weis)

SBIO 459. Frontiers in Interdisciplinary Biosciences—(Crosslisted in departments in the schools of H&S, Engineering, and Medicine; student register through their affiliated departments; otherwise register for CHEMENG 459) See CHEMENG 459 or http://biox.stanford.edu/courses/459_announce.html.
   1 unit, Aut, Win, Spr (Robertson)

SURGERY

The following courses are open to undergraduates. For graduate and Medical School course offerings, see the Stanford University bulletin School of Medicine.

Courses given in Surgery have the subject code SURG. For a complete list of subject codes, see Appendix.

COURSES

SURG 67Q. Medical Experience in Foreign Lands—Stanford Introductory Seminar.
   3 units, Win (Chase, Wang)

SURG 68Q. Current Concepts in Transplantation—Stanford Introductory Seminar. Preference to freshmen. Will tissues and organs be grown in a laboratory for transplantation to humans? The biological aspects of cell and organ transplantation, including many of the issues that arise in the media. The diseases for which transplantation is a treatment, the state of the art in human transplantation, transplantation of animal tissue into humans (xenotransplantation), development of new tissue and organs in the laboratory (tissue engineering and cloning), and the development of drugs and biological strategies to promote long-term survival of the tissue or organ (tolerance). Team-taught; sources include popular and scientific literature and presentations. Research opportunities available.
   3 units, Spr (Krams, Martinez)

SURG 101. Regional Study of Human Structure—Lectures in regional anatomy, dissection of the human body. The anatomy of the area through the dissection process. Enrollment limited to 32.
   5 units, Win (Dolph, Gosling)

SURG 199. Undergraduate Research
   1-18 units, by arrangement (Staff)
STANFORD
INTRODUCTORY
SEMINARS

Participating Faculty: Over 200 faculty from more than 60 departments take part in the Introductory Seminars programs. See the faculty listings internal to each department’s listing in this bulletin for pertinent information.

SIS Offices: 4th Floor, Sweet Hall, 590 Escondido Mall
Mail Code: 94305-3091
Phone: (650) 723-4338
Email: fsp@vpu.stanford.edu
Web Site: http://introsem.sanford.edu/

Stanford Introductory Seminars provide opportunities for first- and second-year students to work closely with faculty in an intimate and focused setting. These courses aim to intensify the intellectual experience of the freshman and sophomore years by allowing students to work with faculty members in a small-group setting; introducing students to the variety and richness of academic topics, methods, and issues which lie at the core of particular disciplines; and fostering a spirit of mentorship between faculty and students. See “Freshman and Sophomore Programs” in the Undergraduate Education section of this bulletin for more information.

COURSES

SOPHOMORE COLLEGE

Sophomore College offers sophomores the opportunity to study intensively in small groups with Stanford faculty for several weeks before the beginning of Autumn Quarter. It is a chance for students to immerse themselves in a subject and collaborate with peers, upper-class sophomore college assistants, and faculty in constructing a community of scholars. Students are also encouraged to explore the full range of Stanford’s academic resources in workshops and individually. At its best, Sophomore College is characterized by an atmosphere of intense academic exploration. Each Sophomore College course enrolls 12 to 14 students, who live together in a Stanford residence and receive 2 units of academic credit for the work done in the course. Eligible students have been enrolled for no more than three academic quarters, have completed at least 36 units of academic work by the end of Spring Quarter, and are in good academic standing. Students must also have an on-campus housing assignment for the ensuing academic year. Transfer students are not eligible. Tuition, room, board, books, and class-required travel are covered by Sophomore College. Each student pays a $400 fee toward the cost of board; this fee is included in the Autumn Quarter University bill. Students are also responsible for travel to campus, phone, one-time fee for network activation, and other personal expenses.

Courses for September 2005 are announced in March, and applications are due in April. For more information or to apply, see the Sophomore College course catalogue, published each March, or see the web site at http://soco.stanford.edu/. September 2004 courses are listed here.

ANTHROPOLOGICAL SCIENCES

SOPHCOLL 11SC. Conservation and Development Dilemmas in the Amazon—(Enroll in ANTHSCI 11SC.) The human dimensions of conservation efforts in the Amazon Basin. The human ecology of Amazonia through the peoples and cultures, and the ecosystems in which they live. The prospects for achieving the goals of biodiversity conservation and local community development. Amazonia as a microcosm of the challenges facing conservation and development efforts in the Third World.
2 units (Durham)

BIOLOGICAL SCIENCES

SOPHCOLL 10SC. Natural History, Marine Biology, and Research—(Enroll in BIOSCI 10SC.) Introduction to the biology of Monterey Bay and the coastal mountains and redwood forests of Big Sur. Literary, artistic, and political history. Topics: conservation, sanctuary, and stewardship of the oceans and coastal lands. Meetings with conservationists, authors, environmentalists, politicians, land-use planners, lawyers, scientists, and educators.
2 units (Thompson)

SOPHCOLL 11SC. The Ecology of Invasions—(Enroll in BIOSCI 11SC.) Introduction to invasion ecology including the animal and plant species which are transforming ecosystems around the world. Ongoing research project in the Jasper Ridge Biological Preserve to investigate why the Argentine ant, once established, eliminates most native ant species, and why a few native species are able to resist.
2 units (Gordon)

CIVIL AND ENVIRONMENTAL ENGINEERING

SOPHCOLL 10SC. Green Buildings—(Enroll in CEE 10SC.) What makes a building green and why is the study of such buildings an important, emerging field? Greenness has to do with efficient use of energy, water, and construction materials to provide healhful and enjoyable spaces in which to live and work. Focus is on energy efficiency and architectural features that enable a building to provide a significant fraction of its own heating, cooling, and electrical needs.
2 units (Masters)

COMPUTER SCIENCE

SOPHCOLL 10SC. The Intellectual Excitement of Computer Science—(Enroll in CS 10SC.) Intellectual tradition of computer science. Topics include analysis of algorithms, computability, cryptography, hardware design, and artificial intelligence.
2 units (Roberts)

ECONOMICS

SOPHCOLL 13SC. Economic Policies of the Presidential Candidates—(Enroll in ECON 13SC.) Performance of the economy over the past 20 years emphasizing the last 4 years. Macroeconomic data; performance of financial markets; and job creation and overseas outsourcing. The economic outlook and budget documents of the Congressional Budget Office and the Office of Management and Budget. Spending categories such as Social Security, Medicare, and defense; U.S. tax policies.
2 units (Shoven)

EDUCATION

SOPHCOLL 10SC. Racial and Ethnic Identity: Increasing Self-Understanding—(Enroll in EDUC 10SC.) Race as a sociopolitical construct and ethnicity as a psychological construct. Literature in psychology, anthropology, and linguistics that reveals how racial identity is construed differently depending upon social group identification.
2 units (LaFromboise)

ELECTRICAL ENGINEERING

SOPHCOLL 10SC. Mathematics of the Information Age—(Enroll in EE 10SC.) The world may be made of earth, wind, fire, and water, but it runs on information. The mathematics of the Information Age including CD players, cellular phones, imaging, and the Internet. Behind-the-scenes look at how mathematics is used to shape and direct modern life and work.
2 units (Osgood)

ENGLISH

SOPHCOLL 13SC. Learning Theater: From Audience to Critic at the Oregon Shakespeare Festival—(Enroll in ENGLISH 13SC.) Ten days and six plays at the Oregon Shakespeare Festival in Ashland, Oregon. The details of the plays, their interpretation, production, and acting, and their value as entertainment and challenge.
2 units (Rebholz, Paulson)
ETHICS IN SOCIETY
SOPHCOLL 10SC. The Meaning of Life: Moral and Spiritual Inquiry through Literature—(Enroll in ETHICSOC 10SC.) Short novels and plays as the basis for reflection on ethical values and the purpose of life. Why is the human race here? How does one find meaningful work? What can death teach about life? What is the meaning of success? What is the nature of true love? How can one find balance between work and personal life? How free are people to seek their own destinies? What obligations does one have to others? 2 units (McLennan)

GERMAN STUDIES
GERMAN LITERATURE
SOPHCOLL 10SC. Resistance Writings in Nazi Germany—(Enroll in GERLIT 10SC.) Writings from Dietrich Bonhoeffer and university students in Munich read as historical documents, reflections of German thought, statements of conscience, attempts to maintain normal relationships with others in the face of great risk, and poetic works and guides for an ethical life. 2 units (Bernhardt)

SOPHCOLL 11SC. Scaling The Magic Mountain: Modernism and Its Discontents—(Enroll in GERLIT 11SC.) Thomas Mann’s The Magic Mountain as a masterpiece of modernism that examines multiple aspects of modern culture. Themes include: medicine, disease, and culture; psychoanalysis and sexuality; myth and modernism in literature; individual development and education; the modern philosophy of time; enlightenment and romanticism in European intellectual history; the influence of Nietzsche; progress, revolution, and terror; the origins of war; and other issues depending on student interest. German not required. 2 units (Berman)

LINGUISTICS
SOPHCOLL 11SC. Understanding Language—(Enroll in LINGUIST 11SC.) What would it take to program a computer to be fluent in a natural language? Building a language-understanding system would require formalizing pronunciation, vocabulary, and grammar, as well as coherence and appropriateness, sufficiently for coding. The structural properties of language and syntax, and the development of natural-language technologies. 2 units (Wasow)

SOPHCOLL 12SC. Language in the U.S.—(Enroll in LINGUIST 12SC.) Varieties of English including regional, social, and ethnic variations such as Appalachian and African American vernacular English. Other languages, including Spanish, Native American languages, Asian American voices, and American Sign Language. The sociolinguistic situation including language attitudes and prejudices, rap and hip-hop, doctor-patient communication, and the English only and Ebonics controversies. 2 units (Rickford)

MUSIC
SOPHCOLL 10SC. Sound, Digital Sound, and Massive Sound Media—(Enroll in MUSIC 10SC.) Principles of sound production, hearing, and digital audio. Given the use of audio streaming and compression, and our reliance on loudspeakers for the consumption of sound, are all aspects of sound being preserved? Team assignments in sound analysis, music recording, and instrument as well as an individual topic for a web-based report. 2 units (Chafe)

PHILOSOPHY
SOPHCOLL 11SC. Human Rights in Theory and Practice—(Enroll in PHIL 11SC.) The nature and value of human rights through philosophical and legal texts, political manifestos, and writings by political scientists, journalists, and activists. The philosophical issues that surround human rights, including challenges from relativism, Asian values, and political realism. General human rights trends. 2 units (Satz)

PHYSICS
SOPHCOLL 10SC. The Elementary Particles and Their Fundamental Interactions—(Enroll in PHYSICS 10SC.) Particle physicists explore nature at its most fundamental level by studying the basic constituents of matter and how they interact. How experiments are executed in particle physics, the current state of understanding of the elementary particles and their interactions, and the most significant questions addressed by current experiments. 2 units (Burchat)

POLITICAL SCIENCE
SOPHCOLL 10SC. American Foreign Policy in the Twenty-First Century—(Enroll in POLISCI 10SC.) The substance of U.S. foreign policy, and the political considerations that influence the making and conduct of American diplomacy. Topics include the prospects for conflict and cooperation among the great powers, regional security, peacekeeping and peacemaking, international terrorism, weapons of mass destruction, the global economy, and the domestic politics of U.S. foreign policy. 2 units (Blacker)

SOPHCOLL 12SC. Race, Ethnicity, and the Future of California—(Enroll in POLISCI 12SC.) California is now the most racially and ethnically diverse state in the nation. The challenges facing Californians in light of population trends. How has public policy responded? Focus on population growth, education, immigration, political participation, and economic growth. Preparation of a policy proposal to the California governor. 2 units (Fraga)

SOPHCOLL 13SC. Globalization and America’s Economic Future—(Enroll in POLISCI 13SC.) Globalization as a double-edged sword that has resulted in unprecedented levels of prosperity, freedom, economic and political choice, and also great vulnerabilities, whether to market forces or individual terrorists. The origins, historical trajectory, and political nature of globalization from the U.S. perspective. Focus is on trade and investment issues. Introduction to international political economy. 2 units (Goldstein)

SOCIOLGY
SOPHCOLL 10SC. Bargaining, Power, and Social Influence—(Enroll in SOC 10SC.) How both simple and complex negotiations unfold under varying circumstances, and how conflict can be avoided. Effective negotiating strategies. Sample negotiations to understand how they can be more effective. Presentation of case study. 2 units (Cook)

FRESHMAN SEMINARS AND SOPHOMORE SEMINARS AND DIALOGUES
Freshman and Sophomore Seminars and Dialogues are offered in many disciplines throughout the academic year. Freshman preference seminars are given for 3-4 units to a maximum of 16 students, and generally meet twice weekly. Although preference for enrollment is given to freshmen, sophomores and first-year transfer students may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars and dialogues, similarly, give preference to sophomores and first-year transfer students, but freshmen may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars are given for 3-5 units to a maximum of 14 students, while sophomore preference dialogues take the form of a directed reading, and are given for 1-2 units to a maximum of 5 students.

All seminars require a brief application. See the Time Schedule, the Stanford Introductory Seminars annual course catalogue published each September, or the Introductory Seminars web site at http://introsems.stanford.edu/ for more information. Due dates for applications for the 2004-05 courses are: Autumn Quarter, 11:59 p.m., September 24 for both freshman preference and sophomore preference courses; Winter Quarter,
noon, December 3 for both freshman preference and sophomore preference courses; Spring Quarter, noon, March 11 for both freshman preference and sophomore preference courses.

For course descriptions, see individual course listings in the teaching department section of this bulletin. F = preference to freshmen; S = preference to sophomores; Dial = dialogue; Sem = Seminar.

**AERONAUTICS AND ASTRONAUTICS**

AA 113N. Structures, or Why Things Don’t (or Do) Fall Down—(F,Sem) GER:2b
3 units, Win (Springer)

AA 115N. The Global Positioning System: Where on Earth are We, and What Time is it?—(F,Sem) GER:2b
3 units, Aut (Enge)

**AMERICAN STUDIES**

AMSTUD 68N. Mark Twain and American Culture—(F,Sem) GER:3a
3 units, Aut (Fishkin)

AMSTUD 114Q. Visions of the 1960s—(S,Sem) GER:3a,4b
5 units, Aut (Gillam)

**ANESTHESIA**

ANES 75Q. Literature and Medical Interventions—(S,Dial)
1 unit, Aut (Shafer, Barr)

ANES 113Q. Disease-Oriented Approach to Human Physiology—(S,Sem)
3 units, Spr (Rosenthal)

**APPLIED PHYSICS**

APPHYS 79Q. Energy Choices for the 21st Century—(S,Sem)
3 units, Aut (Fox, Geballe)

**ART HISTORY**

ARTHIST 10N. Sailing to Byzantium: The Art of the Court in Constantinople—(F,Sem)
4 units, Win (Pentcheva)

**ASIAN LANGUAGES**

JAPANGEN 72N. Nature and the Japanese Condition—(F,Sem)
4 units, Win (Carter)

**BIOCHEMISTRY**

BIOC 118Q. Genomics, Bioinformatics, and Medicine—(S,Sem) GER:2b
3 units, Spr (Brustlag)

**BIOENGINEERING**

BIOE 70Q. Medical Device Innovation—(S,Sem)
3 units, Spr (Doshi, Mandato)

**BIOLOGICAL SCIENCES**

BIOSCI 13N. Environmental Problems and Solutions—(F,Sem) GER:2a
3 units, Spr (Ehrlich)

BIOSCI 14N. Plants and Civilization—(F,Sem) GER:2a
3 units, Spr (Mooney)

BIOSCI 15N. Environmental Literacy—(F,Sem) GER:2a
3 units, Win (Schneider)

BIOSCI 17N. Light, Pigments, and Organisms—(F,Sem) GER:2a
4 units, Win (Elrad, Grossman, Bhaya, Zare)

BIOSCI 18N. Plant Genetic Engineering—(F,Sem) GER:2a
3 units, Win (C. Somerville, S. Somerville)

BIOSCI 21N. Evolutionary Basis of Animal Sexual Behaviors—(F,Sem) GER:2a
3 units, Aut (Baker)

BIOSCI 22N. Infection, Immunity, and the Public’s Health—(S,Sem) GER:2a
3 units, Spr (Jones)

BIOSCI 25Q. The Molecular Basis of Genetic Disease—(S,Sem) GER:2a
3 units, Spr (Kopito)

BIOSCI 26N. Maintenance of the Genome—(F,Sem) GER:2a
3 units, Spr (Hananawal)

BIOSCI 31Q. Ants: Behavior, Ecology, and Evolution—(S,Sem) GER:2a
3 units, Aut (Gordon)

BIOSCI 36N. Physiology of Human Performance—(F,Sem) GER:2a
3 units, Aut (Heller, Grahn)

ACADEMIC PROGRAMS AND CENTERS, AND INDEPENDENT RESEARCH LABORATORIES, CENTERS, AND INSTITUTES

Vice Provost and Dean of Research and Graduate Policy and Dean of the Independent Laboratories, Centers, and Institutes: Arthur Bien- enstock
Associate Dean of Research: Ann M. Arvin
Associate Dean of Graduate Policy: M. Godfrey Mungal

Independent Research Laboratories, Centers, and Institutes perform multidisciplinary research that extends beyond the scope of any one of the University’s organized schools.

The following laboratories, centers, and institutes report to the Vice Provost and Dean of Research and Graduate Policy:

- Stanford Institute for Economic Policy Research
- Geballe Laboratory for Advanced Materials
- Edward L. Ginzelton Laboratory
- Global Climate and Energy Program
- W. W. Hansen Experimental Physics Laboratory
- Stanford Humanities Center
- Stanford Institute for the Environment
- Stanford Center for Innovations in Learning
- Stanford Institute for International Studies
- Kavli Institute for Particle Astrophysics and Cosmology
- Center for the Study of Language and Information
- Stanford Program for Bioengineering, Biomedicine, and Biosciences (BioX)
- Stanford Institute for the Quantitative Study of Society
- W. W. Hansen Experimental Physics Laboratory
- Edward L. Ginzelton Laboratory
- Global Climate and Energy Program
- W. W. Hansen Experimental Physics Laboratory
- Stanford Humanities Center
- Stanford Institute for the Environment
- Stanford Center for Innovations in Learning
- Stanford Institute for International Studies
- Kavli Institute for Particle Astrophysics and Cosmology
- Center for the Study of Language and Information
- Stanford Program for Bioengineering, Biomedicine, and Biosciences (BioX)
- Stanford Institute for the Quantitative Study of Society

The Hoover Institution on War, Revolution and Peace and the Stanford Linear Accelerator Center (SLAC) report to the President and Provost. SLAC is independently operated under a contract with the Department of Energy.

Following is a description of the activities of these organizations and other academic programs and centers, including research activities, and where applicable, courses offered.

STANFORD CENTER FOR CHICANO RESEARCH

Faculty Executive Committee: Albert Camarillo (History, Comparative Studies in Race and Ethnicity), James O. Leckie (Engineering), Yvonne Maldonado (Pediatrics)

The Stanford Center for Chicano Research (SCCR) is an affiliated research unit of the Center for Comparative Studies in Race and Ethnicity (CSRE) and one of the founding member institutions of the Inter-University Program for Latino Research (IUPLR). The objective of the SCCR is to facilitate basic and policy-oriented research on the nation’s second largest ethnic minority group, Mexican Americans. As part of the IUPLR consortium, the SCCR also serves as one of the sites to support research projects involving faculty and graduate students and is currently supported through various grants from government agencies.

The participating faculty of SCCR include professors from several departments in the School of Humanities and Sciences, as well as faculty from Business, Education, Engineering, Law, and Medicine. The SCCR was founded in 1980 and remains the only research center of its kind at a major private university.

STANFORD INSTITUTE FOR ECONOMIC POLICY RESEARCH

Director: John B. Shoven
Deputy Director: Gregory Rosston
Institute Office: 579 Serra Mall
Phone: (650) 725-1874
Web Site: http://siepr.stanford.edu

The primary mission of the Stanford Institute for Economic Policy Research (SIEPR) is to encourage and support research on economic policy issues in areas such as economic growth, technology policies, environmental and telecommunication regulation, tax reform, international trade, and monetary policy. SIEPR pursues four interrelated goals in support of this mission: (1) facilitating graduate student and faculty research on economic policy issues; (2) building a community of scholars conducting policy research; (3) disseminating research findings broadly; and (4) linking academics at Stanford with decision makers in business and government.

SIEPR is a University-wide research institute, involving economists from the schools of Business, Engineering, Law, Humanities and Sciences, as well as the Hoover Institution and the Institute for International Studies. Affiliated faculty and students maintain appointments in their home departments while working on SIEPR projects. In addition, scholars visiting from other institutions may apply for affiliation with SIEPR.

Much of the research at SIEPR takes place in its three research centers and six programs. The Stanford Center for International Development (SCID; Roger G. Noll, Director) fosters research on the economic problems of developing economies and economies in transition, as well as analyzing the political aspects of economic policy reform and historical episodes of reform. For more information about this center call (650) 725-8730. The Center on Employment and Economic Growth (CEEG; Tim Bresnahan, Director) is focusing on the relationship between long-term economic growth, the economic success of individuals and families in their jobs and careers, and the role played by higher education and how it can supply workers and technology in the work force. The program on regulation is part of this center. The Center for Public and Private Finance (CPPF; John B. Shoven and Michael J. Boskin, co-Directors) encompasses work on macroeconomics and monetary policy, tax and budget policy, and finance.

Separate research programs within SIEPR and their directors are the California Policy Program (Thomas McCurdy); the Energy, Natural Resources, and the Environment Program (James L. Sweeney); the Knowledge Networks and Institutions for Innovation Program (Paul A. David); the Program on the Japanese Economy (Masahiko Aoki); and the Program on Market Design (Susan Athey and Paul Milgrom).
RESEARCH LABORATORIES, CENTERS, AND INSTITUTES

GEBALLE LABORATORY FOR ADVANCED MATERIALS

Director: Malcolm R. Beasley  
Web Site: http://www-lam.stanford.edu

The Geballe Laboratory for Advanced Materials (GLAM) is an Independent Laboratory that reports to the Dean of Research. The Laboratory supports the research activities of a number of faculty members from the departments of Applied Physics, Electrical Engineering, Chemistry, Materials Science and Engineering, Mechanical Engineering, and Physics. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for a broad spectrum of scientific research areas including high temperature superconducting materials and devices, mesoscopic devices, magnetic recording and存储 media materials, electronic materials, opto-electronic materials, nanoscale materials and phenomena, nanoprobe devices, highly correlated electronic systems, computational materials science, condensed matter theory and physics, polymeric and biological materials, crystal growth, and thin film synthesis of complex oxides.

GLAM also provides advanced materials characterization and synthesis facilities for its members as well as for the Stanford materials research community at large. They include a focused ion beam (FIB), scanning electron microscopy (SEM), scanning probe microscopy (SPM), transmission electron microscopy (TEM), X-ray diffraction analysis (XRD), and X-ray photoelectron spectroscopy (XPS) for characterization and thin film deposition capabilities for synthesis of materials. These facilities are managed by professional staffs who also conduct research and development of new tools and techniques in areas related to advanced materials synthesis and characterization.

The Geballe Laboratory for Advanced Materials is housed in the Moore Materials Research Building and McCullough Building complex.

EDWARD L. GINZTON LABORATORY

Director: David A. B. Miller  
Web Site: http://www.stanford.edu/group/ginzton/

The Ginzton Laboratory houses the research activities of a number of faculty members from the departments of Applied Physics, Electrical Engineering, and Mechanical Engineering. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for scientific research in the fields of photonic science and engineering, quantum science and engineering, and nanoscience and engineering, including fiber optics, laser physics and applications, mesoscopic devices, microelectromechanical and microacoustic devices and systems, optoelectronic devices and systems, photonics, nanophotonics and photonic crystals, scanning optical microscopy, quantum cryptography and computing, tunneling and force microscopy, and ultrafast and nonlinear optics.

W. W. HANSEN EXPERIMENTAL PHYSICS LABORATORY (HEPL)

Director: Robert L. Byer  
Web Site: http://hepl.stanford.edu/

HEPL is an independent laboratory celebrating over 50 years of fundamental science and engineering research. HEPL faculty and students are engaged in research in accelerator physics, astrophysics, dark matter in the universe, free electron lasers, fundamental tests of relativity in space, gamma ray observations, gravitational wave detection, quantum condensed matter, and space based solar physics studies. Many of the programs involve satellite-based studies in fundamental physics and engineering.

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian  
Web Site: http://www-hoover.stanford.edu/

The Hoover Institution, founded in 1919 by Stanford alumnus Herbert Hoover, is a public policy research center devoted to the advanced study of politics, economics, and political economy, both domestic and foreign, as well as international affairs. Hoover fellows are the foundation of the research program. This varied and distinguished community of scholars strives to conceive and disseminate ideas defining a free society within the framework of three programs:

American Institutions and Economic Performance focusing on interrelationships of U.S. political and legal institutions and economic activity, often referred to as political economy.

Democracy and Free Markets focusing on political economy in countries around the world.

International Rivalries and Global Cooperation focusing on interrelationships among countries, examining issues of foreign policy, security, and trade.

By collecting knowledge, generating ideas, and disseminating both, the Institution seeks to secure and safeguard peace, improve the human condition, and limit government intrusion into the lives of individuals, all of which are consistent with three prominent values: peace, personal freedom, and the safeguards of the American system.

STANFORD HUMANITIES CENTER

Director: John Bender  
Associate Director: Elizabeth S. Wahl

External Faculty Fellows: Margaret Lavinia Anderson (History, University of California, Berkeley), Sandra Barnes (Anthropology, University of Pennsylvania), Charles Griswold (Philosophy, Boston University), Jonathan Holloway (African American Studies, History, Yale University), Christopher Morris (History, University of Texas at Arlington), Harsha Ram (Slavic Languages and Literatures, University of California, Berkeley), Greg Shaya (History, College of Wooster), Peter Vargyas (Ancient History, University of Pécs, Hungary)

Internal Faculty Fellows: Margaret Cohen (French and Italian), John Felstiner (English), Charlotte Fonrobert (Religious Studies), Estelle Freedman (History), Hester Gelber (Religious Studies), Akhil Gupta (Anthropology), James Sheehan (History)

Geballe Dissertation Graduate Student Fellows: Lela Graybill (Art and Art History), Barnabas Malnay (Political Science), Christine McBride (English), Teresa Nava-Vaughn (History), Brad Pasanek (English), Mary Rose (Linguistics), Brett Whalen (History), Erica Yao (Art and Art History)

Web Site: http://shc.stanford.edu/

The Stanford Humanities Center promotes research and education in the humanities at Stanford and nationwide. In particular, it stresses work of an interdisciplinary nature, accomplished through the following programs: one-year residential fellowships for Stanford faculty, faculty...
members from other institutions, and Stanford graduate and undergraduate students; public presentations (such as lectures, conferences, and publications); and a research workshop program sponsored by the Mellon Foundation that brings faculty and graduate students together regularly to advance ongoing research on topics of interdisciplinary interest.

Fellows are selected on the basis of an open competition. They pursue their own research and participate in a weekly seminar at the center throughout the year. Faculty fellows also contribute to the intellectual life of the Stanford community through activities such as giving departmental courses, participating in ongoing research workshops, or organizing conferences. Courses given by fellows in 2004-05 follow.

**COURSES**

**CLASSICS**

CLASSHIS 290. Social and Economic History of the Ancient Near East  
4-5 units, Spr (Vargyas)

**HISTORY**

HISTORY 274D/374D. An American Place: The Lower Mississippi Valley since 1500  
5 units, Win (Morris)

**INTRODUCTION TO THE HUMANITIES**

IHum 37B. Literature into Life: Alternative Worlds  
5 units, Spr (Felstiner)

IHum 60. Sex: Its Cultures and Pleasures  
5 units, Aut ( fonrobert, Gumbrecht)

**RELIGIOUS STUDIES**

RELIGST 3N. Murder in the Cathedral  
3 units, Aut (Gelber)

**Stanford Center for Innovations in Learning**

**Center for the Interdisciplinary Study of Science and Technology**

*Co-Directors:* Michael Friedman, Robert McGinn  
*Executive Committee:* Michael Friedman, Timothy Lenoir (on leave), Robert McGinn, Eric Roberts

Phone: (650) 725-0119; 725-0714  
Web Site: http://cisst.stanford.edu

The Center for the Interdisciplinary Study of Science and Technology (CISST) brings together faculty, undergraduate and graduate programs, and research initiatives concerned with understanding science and technology in an interdisciplinary context. It is concerned equally with the historical, philosophical, and cultural study of science, technology, and medicine, and with critical analysis of issues raised by scientific and technological innovations in contemporary society. CISST houses two major programs: HPST (History and Philosophy of Science and Technology) and STS (Science, Technology, and Society); see their respective sections in this bulletin for their programs. CISST also sponsors visiting scholars, postdoctoral researchers, workshops, and speakers, providing a bridge between the humanities and social sciences, and the sciences and engineering.

At the undergraduate level, CSST houses STS, an undergraduate major that grants both a B.A. and a B.S. degree. The STS is designed to foster understanding of issues raised by the nature, consequences, and social shaping of technology and science in the contemporary world. To this end, the STS curriculum combines interdisciplinary, humanistic, and social scientific studies of science and technology in society with attainment of either technical literacy or fundamental understanding in some area of engineering or science. CISST also offers an honors program in STS that is open only to STS majors but also to students in other majors who wish to pursue a senior honors project that addresses a question arising from the relations among science, technology and society. Prospective majors or honors students should consult the STS section in this bulletin.

At the graduate level, CISST houses an interdisciplinary graduate program, the Program in History and Philosophy of Science and Technology (HPST), jointly administered by the History and Philosophy departments; it involves faculty and students in these and other departments in the humanities. Prospective students interested in applying to the graduate program should consult the HPST description in the catalogue as well as the admissions requirements of the appropriate department in which they wish to apply for a M.A. or a Ph.D.
STANFORD INSTITUTE FOR INTERNATIONAL STUDIES (SIIS)

Director: Coit Blacker
Deputy Director: Stephen Krasner
Web Site: http://iis.stanford.edu

The Stanford Institute for International Studies promotes individual and collaborative research on contemporary, policy-relevant issues that are international and intercollegiate in character. Working in partnership with the seven schools at Stanford (Business, Earth Sciences, Education, Engineering, Humanities and Sciences, Law, and Medicine) and with the Hoover Institution, SIIS fosters excellence in research and teaching across disciplinary, school, and national boundaries. The priority areas of research are in the fields of international and regional peace and security; economic development and political change in East and Southeast Asia; the global environment challenge; and the delivery of health care in a comparative perspective.

Opportunities for undergraduate research include the Goldman International Honors Program in Environmental Science, Technology, and Policy, and the CISAC Interschool Honors Program in International Security. The institute manages 10 undergraduate and graduate fellowship programs.

The constituent centers and programs within SIIS include the Asia-Pacific Research Center, the Center on Democracy, Development and the Rule of Law, the Center for Environmental Science and Policy, the Center for Health Policy, the Center for International Security and Cooperation, the European Forum, and the Stanford Japan Center—Research.

In the areas of public service and outreach, SIIS administers the Stanford Program on International and Cross-Cultural Education (SPICE), which develops internationally-oriented curricula for use by public school teachers.

The SIIS central office is located at 100 Encina Hall, telephone (650) 723-4581. For more information about particular SIIS programs, contact the program directly (area code 650):
Asia/Pacific Research Center (A/PARC), 723-9741, Andrew Walder, Director
Center on Democracy, Development and the Rule of Law, 724-7197, Stephen Krasner, Director
Center for Environmental Science and Policy (CESP), 725-2606, Walter P. Falcon, Stephen Schneider, Co-Directors
Center for Health Policy (CHP), 723-1020, Alan M. Garber, M.D., Director
Center for International Security and Cooperation (CISAC), 723-9625, Scott Sagan, Christopher Chyba, Co-Directors
European Forum, 723-4716, Norman Naimark, Amir Eshel, Co-Convenors
Inter-University Center for Japanese Language Studies, 725-1490
Stanford Program on International and Cross-Cultural Education (SPICE), 723-1116
Stanford Japan Center—Research (Japan), 011 752-7073, extension 40

UNDERGRADUATE PROGRAMS

INTERSCHOOL HONORS PROGRAM IN ENVIRONMENTAL SCIENCE, TECHNOLOGY, AND POLICY

The Center for Environmental Science and Policy (CESP) coordinates a University-wide interschool honors program in environmental science, technology, and policy. Undergraduates planning to participate in the honors program are required to pursue studies in environmental sciences, technology, and policy, with a concentration in a single discipline. After completion of the prerequisite units, students join small group honors seminars to work with specific faculty members in the environmental field on an honors thesis that incorporates both scientific principles and the policy aspects of selected environmental issues.

Courses in environmental studies appear under the course listings of the schools of Earth Sciences, Engineering, and Humanities and Sciences. Information about and applications to this program may be obtained from CESP, E401 Encina Hall East; telephone (650) 723-5697.

COURSES

IIS 195. Interschool Honors Program in Environmental Science, Technology, and Policy—Students from the schools of Humanities and Sciences, Engineering, and Earth Sciences analyze important problems in a year-long small group seminar. Combines research methods, oral presentations, preparation of an honors thesis by each student, and where relevant, field study.

1-9 units, Aut, Win, Spr (Naylor, Falcon, Daily, Schneider)

INTERSCHOOL HONORS PROGRAM IN INTERNATIONAL SECURITY

The Center for International Security and Cooperation (CISAC) coordinates a University-wide interschool honors program in international security. Students selected for the honors program fulfill individual department course requirements, attend a year-long seminar on international security research, and produce an honors thesis with policy implications. In order to qualify for the program, students must demonstrate sufficient depth and breadth of international security course work. Ideally, applicants to the program should have taken POLISCI 114S, International Security in a Changing World, MS&E 193, Technology and National Security, POLISCI 110B, Strategy, War, and Politics, and at least one related course such as ECON 150/PUBLPOL 104, Economic Policy Analysis, STS 110/MS&E 197/PUBLPOL 103B, Ethics and Public Policy, SOC 160, Formal Organizations, PUBLPOL 102/SOC 166, Organizations and Public Policy, and POLISCI 114T, Major Issues in International Conflict Management.

Information about and applications to this program may be obtained from the Center for International Security and Cooperation, E201 Encina Hall East, telephone (650) 723-0126.

COURSES

IIS 199. Interschool Honors Program in International Security—Students from different schools meet in a year-long seminar to discuss, analyze, and conduct research on international security. Combines research methods, policy evaluation, oral presentation, and preparation of an honors thesis by each student.

9-15 units, Aut, Win, Spr (Sagan, Stedman, Eden)
CENTER FOR THE STUDY OF LANGUAGE AND INFORMATION (CSLI)

Director: Byron Reeves
Executive Director: Keith Devlin
Center Offices: Cordura Hall
Mail Code: 94305-4115
Web Site: http://www-csli.stanford.edu/

CSLI supports research at the intersection of the social and computing sciences. It is an interdisciplinary endeavor, bringing researchers together from academic and industry in the fields of artificial intelligence, computer science, engineering, linguistics, logic, education, philosophy, and psychology. CSLI’s researchers are united by a common interest in communication and information processing that ties together people and interactive technology.

The technologies of interest at CSLI are at the cutting edge of the information revolution. They include natural language processing, voice user interfaces, ubiquitous computing, collaborative work environments, handheld devices, information appliances, automatic language translation, conversational interfaces, machine learning, intelligent agents, electronic customer relationship management, and distance learning applications.

A primary goal of CSLI is to have a substantial and long-term intellectual impact on the academic and business communities involved with interactive technology. Our industry research partners and sponsors have a broad and facilitated access to ideas, faculty, students, and laboratories. Partners can share in the intellectual property of CSLI, and in the governance committees of the Center that establish research directions and funding priorities. CSLI accelerates knowledge transfer to products and services by involving executives and researchers in Stanford classrooms. CSLI partners can meet Stanford students studying in over 20 different degree programs across campus.

Course work related to the research at CSLI can be found in the “Program in Symbolic Systems” section of this bulletin.

STANFORD INSTITUTE FOR THE QUANTITATIVE STUDY OF SOCIETY (SIQSS)

Director: Norman H. Nie
Center Offices: 417 Galvez Mall, Encina Hall West, first floor
Web Site: http://www.stanford.edu/group/siqss

Founded in 1998, the Stanford Institute for the Quantitative Study of Society (SIQSS) is a multidisciplinary research institute affiliated with Stanford University’s Office of Research and Graduate Policy. The Institute is devoted to producing and sponsoring high-quality empirical social science research about the nature of society and social change.

The central mission of SIQSS is to provide social knowledge for the larger society and to develop the empirical social sciences as a primary tool for understanding social reality. SIQSS seeks to fulfill this mission by undertaking large-scale, socially relevant, theoretically important, and methodologically sound social research. Examples of projects under way include unintended consequences of information and technology in society; education and its social outcomes; conducting the 2000 census under adversity; and an online scholarly journal, IT & Society at http://www.stanford.edu/group/siqss/itandsociety/

Scholars participating in SIQSS research programs and activities are drawn from diverse disciplines throughout Stanford University and from other academic institutions. SIQSS currently supports quantitative research through the following: Long-Term Institute-Initiated Research Programs, Stanford Faculty Research Grants and Student Research Assistantships, Stanford Faculty Fellows, Interdisciplinary Seminars, and the American Empirical Series.

INSTITUTE FOR RESEARCH ON WOMEN AND GENDER

Director: Londa Schiebinger
Web Site: http://www.stanford.edu/group/IRWG/

During the last decade, research on women and gender has had a profound influence on the social and medical sciences, and the humanities. Since its founding, the Institute for Research on Women and Gender’s primary mission is to support scholarship on subjects related to women and gender and to organize educational programs that communicate these findings to a broader public.

Stanford faculty, staff, graduate students, and members of the community work together to stimulate a more informed analysis of issues concerning gender.

Institute projects span a wide range of disciplines, but rest on certain shared premises: that gender is a vital category of analysis for contemporary scholarship and policymaking and that the experiences of women as individuals and as a group can best be understood within their historical, social, and cultural contexts. The institute sponsors interdisciplinary research seminars and conferences that examine gender issues in areas such as aging, art, education, employment, family structures, gender segregation in the workplace and educational institutions, health care, history, law, literature, and psychology. Many scholarly publications have resulted from these activities.

SOCIAL SCIENCE HISTORY INSTITUTE (SSHI)

Web Site: http://www.stanford.edu/group/sshi/

The goal of Social Science History Institute is to re-engineer the manner in which students in social science departments learn about historical institutions and data, and the manner in which students in history and related disciplines are trained in social science methods. Historians and social scientists share many of the same substantive interests (the development of economies, political systems, and social structures, for example), but they approach them with different and complementary methods and bodies of evidence. There is, however, a great deal of potential for historians and social scientists to draw on the strengths of each other’s methods to improve their own work and to foster increased interaction among the various disciplines that employ history as a laboratory to operationalize social science theories. The Social Science History Institute seeks to realize this potential by transplanting state of the art research methods from classics, economics, history, political science, and sociology across the boundaries of each discipline. Toward this end, SHSI offers, conferences, and research support for faculty and graduate students.
The Stanford Linear Accelerator Center is devoted to experimental and theoretical research in elementary particle physics and astrophysics, to the development of theory and new techniques in particle accelerators, to research and development in particle detectors, and to the use of the SPEAR electron storage ring as a source of intense vacuum ultraviolet and x-ray beams for research in biology, chemistry, material science, environmental science, medical science, and physics. The center is on 425 acres of Stanford property west of the main campus and is operated under a contract with the Department of Energy. In a new initiative, Stanford University’s Kavli Particle Astrophysics and Cosmology Institute is located on the SLAC campus.

SLAC is operated by Stanford as a national facility so that qualified scientists from universities and research centers throughout the country and world, as well as those at Stanford, may participate in the research programs at the center. Stanford graduate students may carry out research for the Ph.D. degree with members of the SLAC faculty. Graduate students from other universities also participate in the research programs of visiting groups.

Research assistantships are available for qualified students by arrangement with individual faculty members. There are also opportunities for summer employment in the research groups at the center. Students interested in research in the area of high energy physics, particle astrophysics, and accelerators should contact Professor Rafe H. Schindler, the high energy physics graduate student adviser. Research opportunities for students interested in the SPEAR X-ray science program are discussed below under SSRL.

SSRL, a division of the Stanford Linear Accelerator Center, is a National User Facility which provides synchrotron radiation, a name given to x-rays or light produced by electrons circulating in a storage ring at nearly the speed of light. These extremely bright x-rays can be used to investigate forms of matter ranging from objects of atomic and molecular size to man-made materials with unusual properties. The obtained information and knowledge is of great value to society, with impact in areas such as the environment, future technologies, health, and national security. Many of its 19 faculty hold joint appointments with campus departments.

SSRL has research programs in materials sciences as well as accelerator physics and development of advanced sources of synchrotron radiation, especially ultra short pulse, x-ray free electron lasers. The lab is interdisciplinary with graduate students actively pursuing degrees from Stanford campus departments that include Applied Physics, Chemical Engineering, Chemistry, Earth Sciences, Electrical Engineering, Materials Science and Engineering, Physics, and Structural Biology.

Students interested in working at the facility should contact a member of the SSRL faculty, one of the assistant directors, or other members of the Stanford faculty who use SSRL in their research programs.
ing Technology Center, and the central offices of Residential Computing and Academic Computing.

During regular academic sessions, both libraries are open Monday through Thursday from 8 a.m. to 12 midnight, Friday from 8 a.m. to 6 p.m., Saturday from 9 a.m. to 9 p.m. (Meyer is open 1 p.m. to 9 p.m. on Saturday), and Sunday from 12 noon to 12 midnight. Library hours information, including hours for holidays, intersessions, and other libraries on campus, is available on the web at http://www-sul.stanford.edu/libraries_collections/hours_locations.html.

These libraries can seat more than 2,000 readers at one time in a variety of seating arrangements: carrels, lounge areas, tables, computer workstations, individual studies, and group study rooms. Readers can connect their laptops to the campus network in many library locations.

Major service units housed throughout Green Library include: the Information Center; the Humanities and Area Studies Reading Room; the Social Science and Government Documents Reading Room; Foreign Language and Area Collections; Access Services; Current Periodicals, Newspapers, Media and Microtexts; and the Interlibrary Services Office. Green Library also houses reserves for most graduate and undergraduate courses in the humanities and social sciences, the Department of Special Collections, and the University Archives.

Throughout Green and Meyer, there are photocopy machines, telephones, and computers providing access to the online library catalog and the wealth of electronic resources available to the Stanford community.

**BRANCH LIBRARIES**

Humanities and Social Sciences Branch Libraries include the Art and Architecture Library, Cubberley Education Library, Music Library, and Archive of Recorded Sound.

**LIBRARIES—COORDINATES**

**J. Hugh Jackson Library, Graduate School of Business**

Director: Kathy Long

Lane Medical Library

Director: Debra Ketchell

Crown Law Library

Director: Lance E. Dickson

Stanford Linear Accelerator Center Library

Head Librarian: Patricia Kreitz

**HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE**

Director: John Raisian

Associate Director: Elena Danielson

Web Site: http://www-hoover.stanford.edu/hila/

Since its founding by Herbert Hoover in 1919 as a special collection dealing with the causes and consequences of World War I, the Hoover Institution has become an international center for documentation, research, and publication on political, economic, social, and educational change in the 20th and 21st centuries.

The Hoover Library and Archives include one of the largest private archives in the world and have outstanding area collections on Africa, East Asia, Eastern Europe, Russia and the former Soviet Union, Latin America, the Middle East, North America, and Western Europe. Holdings include government documents, files of newspapers and serials, manuscripts, memoirs, diaries, and personal papers of men and women who have played significant roles in the events of these centuries, the publications of societies and of resistance and underground movements, and the publications and records of national and international bodies, both official and unofficial, as well as books and pamphlets, many of them rare and irreplaceable. The materials are open to all Stanford students, faculty, and staff, to scholars from outside the University, and to the public at large.

**INFORMATION TECHNOLOGY SYSTEMS AND SERVICES (ITSS)**

Web Site: http://itss.stanford.edu

ITSS provides University leadership in the area of information technology. ITSS services can be divided into four categories:

- Computing and communication infrastructure capable of supporting the instructional, learning, research, and business activities of the University. This infrastructure includes campus-wide data, voice, and video communication facilities, and the distributed computing environment. These services tend to be less visible to end-users, but are the foundation upon which information technology services are delivered.

- Academic computing services to support instruction, research and learning activities. These include the Sweet Hall computing cluster, graphics lab, and servers that support instructional computing.

- Business and administrative computing facilities to support administrative information systems. These include core business systems, such as student information, fund raising, general ledger, accounts payables, and payroll.

- Services and technical support for departmental networks and computing environments. These services include departmental consulting, training and support for office and departmental support staff, and technical support to manage departmental computing environments.

Daily operations at Stanford rely upon the hundreds of applications and miles of wiring for data and phone services that ITSS maintains and supports. It is expected that phones will ring, computers interconnect, and systems function. ITSS directs its energies toward ensuring that the infrastructure and applications portfolio meet current needs and to ensure that future needs will be met as well; improvements are made to wiring, more storage is added to servers, applications are changed to meet new requirements, out of date services are removed and new ones replace them. Running, maintaining, and continually improving these services, and doing it cost effectively, is the core business of Information Technology Systems and Services.

For more details about ITSS and its services, see http://itss.stanford.edu. For more information about the variety of information technology resources available at Stanford, see http://compcomm.stanford.edu. For assistance with technology services at Stanford, contact the Stanford IT Help Desk by phoning (650) 725-HELP (4357) or submit a request through http://helpsu.stanford.edu.
THE CONTINUING STUDIES PROGRAM

Dean and Associate Provost: Charles Junkerman
Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 725-2650; Fax: (650) 725-4248
Email: continuingstudies@stanford.edu
Web Site: http://continuingstudies.stanford.edu

The Continuing Studies Program provides adults from Stanford and the surrounding communities the opportunity to take classes on a part-time basis for intellectual enrichment, both personal and professional. Courses and events are offered in all four academic quarters, with over 350 courses planned for the 2004-05 academic year.

The faculty are primarily drawn from the ranks of the University’s distinguished professoriate. The program presents a wide variety of courses, with a central concentration in the liberal arts, including literature, history, art and architecture, and music.

Tuition discounts are available to University employees, Stanford students and faculty, Stanford Alumni Association members, educators, and those over age 65.

For a course catalogue, contact the Continuing Studies Program by mail, phone, or email as above.

The Continuing Studies Program also administers the Master of Liberal Arts Program and Summer Session.

MASTER OF LIBERAL ARTS PROGRAM

Associate Dean and Director: Linda Paulson
Participating Faculty: David Abernethy (Political Science), Clifford Barnett (Anthropology), Russell Berman (Comparative Literature and German), Marc Bertrand (French, emeritus), Eavan Boland (English), John Bra... (more text below)

Course Descriptions:

PROGRAM DESCRIPTION
The Master of Liberal Arts (MLA) program aims to provide a flexible, interdisciplinary program for returning adult students who seek a broad education in the liberal arts. The underlying premise of the MLA program is that knowledge gained through an interdisciplinary course of study leads to intellectual independence and satisfaction not always found in discipline-based programs of study. The goals of the MLA program are to develop advanced critical thinking, to foster intellectual range and flexibility, and to cultivate an individual’s ability to find the connections among different areas of human thought: art, history, literature, music, philosophy, political science, science, and theology.

The program is designed with part-time students in mind: seminars meet in the evening, and students complete the degree in 4-5 years. All master’s seminars are taught by members of the Stanford faculty. Class size is limited to 20 students.

DEGREE REQUIREMENTS
Candidates for the MLA degree must complete a minimum of 30 units of course work. These units must include a three quarter foundation course (equal to 12 units total), one core introductory seminar for entering students, at least seven 4-unit MLA seminars, and a 4-unit master’s thesis. The remaining 2 units of required courses may be fulfilled by additional MLA seminars, relevant Continuing Studies Program course offerings, or by a summer session at Oxford. Students must also fulfill distribution requirements by taking at least 2 units of credit in each of the following areas: humanities; social science or social policy; and science, engineering, or medicine.

FOUNDATION COURSE
During the Autumn, Winter, and Spring following admission to the program, there is a three quarter foundation course required of all students. The purpose of this course is to lay the groundwork for the interdisciplinary, intercultural studies the student will undertake. The foundation course will introduce students to the broad framework of history, literature, philosophy, political science, and art.

CORE SEMINAR
During the first quarter of the second year, new students take the core introductory seminar, The Plague: An Introduction to Interdisciplinary Graduate Study. This seminar aims to prepare students for interdisciplinary graduate work at Stanford. Students concentrate on writing a critical graduate paper, conducting library research, presenting the results of their research, and productively participating in a collaborative seminar.

MLA SEMINARS
Students are required to take at least seven MLA seminars of four units each. Each year, at least nine seminars are offered in the MLA program. Each MLA course requires a substantial seminar paper. Students are encouraged to use these papers as a way to investigate new fields of interest, as well as a way to develop different perspectives on issues in which they have an ongoing interest.

MASTER’S THESIS
The MLA program culminates in the master’s thesis. Students approaching the end of the program write a thesis, approximately 75-100 pages in length, that evolves out of work they have pursued during their MLA studies. The thesis is undertaken with the prior approval of the MLA program, and under the supervision of a Stanford faculty member. During the process of writing the thesis, students are members of a work-in-progress group, which meets regularly to provide peer critiques, motivation, and advice. Each student presents the penultimate draft of the thesis to a colloquium of MLA faculty and students, in preparation for revising and submitting the final draft to the adviser and to the MLA program. Additional information can be obtained from the Master of Liberal Arts program, 482 Galvez Mall, Stanford, CA 94305-6079; phone (650) 725-0061; email mlaprogram@stanford.edu, fax (650) 725-4248, web site http://mla.stanford.edu.

COURSES

An additional Spring Quarter offering was not yet available at the time this bulletin went to press.

101A. Foundations I—Required for first-year MLA students.
   4 units, Aut (Steidle)

101B. Foundations II—Required for first-year MLA students.
   4 units, Win (Steidle)
101C. Foundations III—Required for first-year MLA students.
4 units, Spr (Berman)

102. The Plague: An Introduction to Interdisciplinary Graduate Study
4 units, Aut (Paulson)

212. Radical Theater: Greek Tragedy Then and Now
4 units, Aut (Rehm)

213. From Enlightenment to Modernism
4 units, Aut (Berman)

4 units, Win (Bertrand)

215. European Literary Modernism
4 units, Win (Terdiman)

216. Unity and Diversity in the American Republic
4 units, Win (Fraga)

217. Democratic Wonder from Emerson to Cage
4 units, Spr (Junkerman)

218. Philosophies of Technology
4 units, Spr (Gumbrecht)

220. Shakespeare in Performance VII
4 units, Sum (Friedlander)

221. American Film
4 units, Sum (Fields)

SUMMER SESSION

Associate Dean: Patricia Brandt
Director of Admission and Student Services: Teresa Nishikawa
Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 723-3109; Fax: (650) 725-6080
Email: summersession@stanford.edu
Web Site: http://summer.stanford.edu

Students attending Stanford Summer Session are enrolled in either a regular degree program, the Summer Visitor Program, or Summer College for High School Students.

The regular degree program is for students who are candidates for a Stanford degree and who are continuing their academic work in Summer Quarter. Degree-seeking Stanford students should indicate on Axess during Spring Quarter that they intend to register for Summer Quarter. Separate application is not required.

The Summer Visitor Program is for students who are not presently candidates for a Stanford degree. It is open to students who are currently enrolled in or have graduated from another college or university. Qualified high school students who have completed at least their sophomore year may be admitted to the Summer College.

Students in Summer Session in general enjoy the privileges of students in the regular degree program except that work completed cannot be applied toward a Stanford degree or credential until the student has been admitted to regular standing. Admission as a summer visitor does not imply later admission to matriculated status. However, should the visitor matriculate at a later date through normal admission procedures, the summer work may, in most cases, be applied toward the requirements for a Stanford degree or credential.

For more information, contact Summer Session by email, mail, phone, or fax using the listings above. Information is updated annually in February and may also be found online at http://summer.stanford.edu.

UNDERGRADUATE EDUCATION

Vice Provost for Undergraduate Education: John Bravman
Web Site: http://www.stanford.edu/dept/undergrad/ovp

As the chief academic officer for undergraduate education, the Vice Provost initiates policies and programs, assesses and manages continuing programs, oversees curricular innovation, and coordinates the undergraduate activities of the three Schools (Humanities and Sciences, Earth Sciences, and Engineering) which offer undergraduate majors and minors. The Center for Teaching and Learning, Freshman and Sophomore Programs, the Freshman Dean’s Office, Undergraduate Advising, and Undergraduate Research Programs report to the Vice Provost of Undergraduate Education.

CENTER FOR TEACHING AND LEARNING

Associate Vice Provost for Undergraduate Education and Director: Michele Marincovich
Senior Associate Director (Science and Engineering): Robyn Wright Dunbar
Associate Director (Humanities): Mariatte Denman
Associate Director (Social Sciences and Technology): Marcelo Clerici-Arias
Academic Technology Specialist: Jeremy Sabol
Assistant Director for Academic Success: Adina Glickman
Administrators: Cristen Osborne, Linda Salser
Oral Communication Program Director: Doree Allen
Lecturers: John Bilderbeck, Thomas Freeland, Jennifer Hennings, James Milojkovic, Joyce Moser, Anne Pasley, James Wagstaffe, Randall A. Williams

Web Site: http://ctl.stanford.edu

The Center for Teaching and Learning is a university-wide resource on effective teaching and public speaking for faculty, lecturers, and teaching assistants and on both effective learning and public speaking for undergraduates and graduate students.

SERVICES TO UNDERGRADUATE AND GRADUATE STUDENTS

CTL provides a wide range of resources for students who want to enhance their study approaches and clarify their learning strategies. Through courses, individual counseling, and workshops, CTL helps students build skills that are the foundation for continuous improvement and lifelong learning.

Free tutoring is available to undergraduates in several introductory subjects. See http://ctl.stanford.edu/Tutoring for details on where and when tutors can be found. Students interested in and qualified for tutoring can apply to be tutors and, if accepted, can take CTL’s course on tutoring; the application process takes place in February.

SERVICES TO FACULTY, LECTURERS, AND TEACHING ASSISTANTS

CTL provides the Stanford community with services and resources on effective teaching. Our goals are: to identify and involve successful teachers who are willing to share their talents with others; to provide those
who are seeking to improve their teaching with the means to do so; to acquaint the Stanford community with important innovations and new technologies for teaching; to prepare new teachers for their responsibilities; to contribute to the professional development of teaching assistants; to expand awareness of the role of teaching at research universities; and to increase the rewards for superior teaching.

CTL also has responsibility for helping teaching assistants (TAs) with their preparation for and effectiveness in teaching, and for helping departments with designing effective TA training programs. Programs include: videotaping, microteaching, and consultation; small group evaluation; workshops and lectures; a handbook on teaching and a library of teaching materials; quarterly teaching orientations; an informative quarterly newsletter; and work with individuals, groups, and departments on their specific needs. For further details, see CTL’s teaching handbook or the CTL brochure, both available by calling (650) 723-1326, or see http://ctl.stanford.edu.

For questions or requests, email TeachingCenter@stanford.edu.

ORAL COMMUNICATION PROGRAM

The Oral Communication Program at CTL provides opportunities for undergraduates and graduate students to develop or improve their oral communication skills. Courses and workshops offer a comprehensive approach to speech communication, including training in the fundamental principles of public speaking and the effective delivery of oral presentations. The goal is to enhance students’ general facility and confidence in oral expression. The program also provides innovative, discipline-based instruction to help students refine their personal speaking styles in small groups and classroom settings. Those interested in individualized instruction or independent study are invited to visit the program’s Speaking Center in Sweet Hall, where trained student tutors, multimedia, and instructional resource materials are available on an ongoing basis. For further details, call (650) 725-4149 or 723-1326 or consult our web site at http://ctl.stanford.edu.

COURSES

All courses listed with CTL promote acquisition of strong public speaking skills and/or teaching excellence.

CTL 56. Building a Successful Academic Career—For freshmen in expanded advising programs. Techniques for honing academic skills for college, and applying those skills to better define intellectual identity in academic pursuits.

1 unit, Aut, Win (Williams)

CTL 60/160. Investigating Stanford’s Treasures—Private tours of some of Stanford’s greatest resources led by Stanford experts; students interview the experts and introduce them to the class at the site. One hour of class discussion a week. Treasures may include Jasper Ridge Biological Reserve, Memorial Church, Special Collections, and the Martin Luther King, Jr., Papers Project.

1-2 units, Aut (Moser)

CTL 115/215. Voice Workshop—An innovative workshop focusing on breath, voice production, expansion of vocal range and stamina, and clarity of articulation. Geared toward public speaking generally: presentations, lectures, job talks, etc. Can be taken in conjunction with CTL 117.

1-2 units, Aut, Win, Spr (Freeland)

CTL 116A. The Language of Film Noir: From Bogart to Pulp Fiction—The quintessential American film genre which combined femmes fatales, anti-heroes, lost dreams, violence, and a distinct style of expression. Film viewings, student oral presentations, and analyses of films.

1-2 units (Moser) alternate years, given 2005-06

CTL 116B. Screwballs and the Language of Laughter: American Comic Film from Chaplin to Present—A sampling of American comic masterpieces including silent movies, 30s screwball films, and works by Billy Wilder, Woody Allen, and contemporary film makers. Film viewings, student oral presentations, and analyses of films.

1-2 units, Win (Moser)

CTL 117/217. The Art of Effective Speaking—Introduction to the principles and practice of effective oral communication. Through formal and informal speaking activities, students develop skills in framing and articulating ideas through speech. Strategies are presented for speaking extemporaneously, preparing and delivering multimedia presentations, formulating persuasive arguments, refining critical clarity of thought, and enhancing general facility and confidence in oral self-expression.

3 units, Aut, Win (Freeland, Allen)

CTL 118. Public Speaking—A practical approach to the art of public speaking. Emphasis is on developing skills in various speech types: exposition, argumentation, and persuasion. Students sharpen their skills with the aid of textbooks, videotapes, texts of famous speeches and participation in a final program of talks. Students also evaluate presentations by others.

3 units, Sum (Wagstaffe)

CTL 119. Oral Communication Tutor (Consultant) Teaching Practicum—Seminar for students with a strong background in public speaking who wish to train as public speaking tutors for CTL’s Oral Communication Program. Readings, exercises, and supervised teaching refine speaking skills. Preparation to serve as a peer tutor in a variety of academic disciplines. Prerequisite: consent of instructor.

3 units, Spr (Allen, Bilderbeck)

CTL 120. Peer Tutor Training—Goal is to help students become effective peer tutors for course material already mastered by articulating aims; developing practical tutoring skills including strategies for drop-in sessions; observing experienced tutors; discussing reading assignments; role playing; and reflecting on experiences as a peer tutor intern. Prerequisite: consent of instructor.

1 unit, Aut, Spr (Glickman)

CTL 125. From the Page to the Stage: The Performance of Literature—The oral interpretation of literature as performance art and mode of literary analysis. Focus is on contemporary and local expression including topics such as the Spoken Word Collective at Stanford, the ensemble performance of short works of fiction by San Francisco’s Word for Word Performing Arts Company, and the storytelling art of Awele Makeba which combines theater, oral history, and music. No previous performance experience necessary.

3 units, Spr (Allen)

CTL 177. Performance of Power: Oratory and Authority from the Ancient World to the Postmodern—Speech as action as essential to leadership. Theories and examples of oratory, from Aristotle to Margaret Thatcher, assessing each as a model of voice-activated authority. The impact of mass media technologies as they transform the public space of oratory.

2-3 units, Spr (Freeland)

CTL 199/299. Independent Study—Special study under lecturer direction, usually leading to a written report or an oral presentation. Register with lecturer’s permission using the section number associated with the instructor.

1-3 units, Aut, Win, Spr, Sum (Staff)

CTL 201. Science Course Design—(Same as GES 201.) For students interested in an academic career and who anticipate designing science courses at the undergraduate or graduate level. Goal is to apply research on science learning to the design of effective course materials. Topics include syllabus design, course content and format decisions, assessment planning and grading, and strategies for teaching improvement.

2-3 units, Aut (Wright-Dunbar)

CTL 219. Oral Communication for Graduate Students—Graduate student speaking activities such as teaching (delivering lectures, guiding discussion, and facilitating small groups), professional presentations and conference papers, and preparing for orals and defenses. In-class projects, discussion, and individual evaluation assist students in developing effective techniques for improving oral communication skills.

1-3 units, Sum (Allen)
FRESHMAN AND SOPHOMORE PROGRAMS

Assistant Vice Provost and Program Director: Sharon Palmer
Associate Director and Academic Technology Specialist: Dena Slothower
Assistant to the Dean of Freshman-Sophomore and Potter Colleges: Jenise Christensen
Academic Technology Specialist: Carlos Seligo
Oral Communication Lecturer: Joyce Moser
Administrators: Gari Gene, Mona Kitasoe, Jasmine Lu, Gary Matsumura

Department Offices: Sweet Hall, 4th floor
Phone: (650) 723-4338
Web Site: http://fsp.stanford.edu/

Freshman and Sophomore Programs (FSP), a division of the office of the Vice Provost for Undergraduate Education, sponsors and supports Freshman-Sophomore and Potter Colleges, as well as Stanford Introductory Seminars, including Freshman Seminars, Sophomore Seminars and Dialogues, and Sophomore College. FSP also coordinates initiatives that encourage faculty and students to build on relationships formed in introductory seminars by forming on-going mentoring and research partnerships based on their shared intellectual interests. FSP is located on the fourth floor of Sweet Hall. For detailed information, see http://fsp.stanford.edu/ or call (650) 723-4338.

FRESHMAN-SOPHOMORE COLLEGE AND POTTER COLLEGE

The Freshman-Sophomore College at Sterling Quad is a residence for approximately 180 freshmen and sophomores interested in broad intellectual exploration of the liberal arts and sciences. Potter College is designed to create an interdisciplinary community of upper-class students engaged in intellectual exploration with a focus on research, writing, public speaking, and honors.

STANFORD INTRODUCTORY SEMINARS

Stanford Introductory Seminars (SIS) provide opportunities for first- and second-year students to work closely with faculty in an intimate and focused setting. These courses aim to intensify the intellectual experience of the freshman and sophomore years by allowing students to work with faculty members in a small group setting; introducing students to the variety and richness of academic topics, methods, and issues which lie at the core of particular disciplines; and fostering a spirit of mentorship between faculty and students. Over 200 faculty from more than 60 departments take part in the introductory seminars programs. The courses are given department credit and most count towards an eventual major.

Some faculty who have taught Freshman Seminars or Sophomore Seminars are engaged in intellectual exploration with a focus on research, writing, public speaking, and honors.

FRESHMAN SEMINARS AND SOPHOMORE SEMINARS AND DIALOGUES

Freshman Seminars and Sophomore Seminars and Dialogues are offered in many disciplines throughout the academic year. Freshman preference seminars are typically given for 3–4 units to a maximum of 16 students, and generally meet twice weekly. Although preference for enrollment is given to freshmen, sophomores and first-year transfer students may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars and dialogues give preference to sophomores and first-year transfer students, but freshmen may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars are given for 3–5 units to a maximum of 14 students, while sophomore preference dialogues take the form of a directed reading, and are given for 1–2 units to a maximum of 5 students. All seminars require a brief application. For a list of introductory seminars offered in 2004-05, see the “Stanford Introductory Seminars” section of this bulletin. See the SIS annual course catalogue, published each September, or web site, http://introsems.stanford.edu/, for an application or more information.

SOPHOMORE COLLEGE

Sophomore College offers sophomores the opportunity to study intensively in small groups with Stanford faculty for several weeks before the beginning of Autumn Quarter. Students immerse themselves in a subject and collaborate with peers, upper-class sophomore assistants, and faculty in constructing a community of scholars. They are also encouraged to explore the full range of Stanford’s academic resources in workshops and individually. At its best, Sophomore College is characterized by an atmosphere of intense academic exploration. Each Sophomore College course enrolls twelve to fourteen students, who live together in a Stanford residence and receive two units of academic credit. Eligible students will have been enrolled for no more than three academic quarters; be sophomores in the Autumn Quarter during which the college is offered; be in good academic standing; and have completed at least 36 units of academic work by the end of the Spring Quarter preceding the college. Students must also have an on-campus housing assignment for the ensuing academic year. Transfer students are not eligible. Admitted students who are found to have academic standing problems after the completion of Spring Quarter may have their admission revoked. Tuition, room, the remainder of board costs, and class-required travel are covered by Sophomore College. Each student pays a $400 fee toward the cost of board; this fee is included in the Autumn Quarter University bill. Students are also responsible for travel to campus, phone, network activation one-time fee, and other personal expenses. Courses are announced in March, and applications are due in April. For a list of Sophomore College Seminars offered, please see the SIS section in this Bulletin. For more information or to apply, see the Sophomore College web site at http://soco.stanford.edu/.

DEAN OF FRESHMEN AND TRANSFER STUDENTS

Assistant Vice Provost and Dean of Freshman and Transfer Students: Julie Lythcott-Haims
Web Site: http://frosh.stanford.edu/

The Freshman Dean’s Office, a division of VPUE, is the primary resource for helping new undergraduates make the transition to Stanford. Programs under its umbrella include Approaching Stanford, New Student Orientation, Freshman Advising, Expanded Advising Programs, and Frosh Council. Offices are located on the first floor of Sweet Hall and in 123 Meyer Library; phone (650) 72-FROSH (3-7674) and (650) 725-1533, or email frosh@stanford.edu. New students and their parents are encouraged to visit.
UNDERGRADUATE ADVISING

Interim Director: Carol Porter
Program Offices: Sweet Hall, 1st floor
Phone: (650) 723-2426
Web Site: http://uac.stanford.edu/

The Undergraduate Advising Programs coordinate the advising program for students who have not declared a major field of concentration. Freshmen are assigned to academic advisers according to their residence and their preliminary academic interest. Many freshmen receive enhanced academic support through participation in Expanded Advising Programs (EAP). Most sophomores who are undecided about their majors continue to work with their advisers from the first year. Some sophomores participate in the Sophomore Mentoring Program (SMP), which matches faculty mentors with students who have shared intellectual interests through a freshman seminar or sophomore college class. By the end of the sophomore year, undergraduates must declare a major. In junior and senior years, students are advised by faculty from the major department or program.

The Undergraduate Advising Programs (UAP) partners with faculty, staff, and students (peer advisors and mentors) to address students’ intellectual and developmental goals. The center staff includes professional advisers who meet with students individually to set academic goals and to devise strategies for achieving those goals. The staff also coordinates a comprehensive array of academic advising programs and services designed to support and supplement the undergraduate curriculum.

The UAP staff of professional advisers provides advising to all students, freshmen through seniors. These UAP advisers offer students help when the academic adviser is unavailable or when additional advice is needed. Other UAP services include: assistance with curriculum planning; help with choosing a major; information on designing an individually designed major (IDM); academic and personal counseling related to academic performance; advice regarding plans to attend graduate or professional school; peer tutoring for subject areas; and learning skills classes. Reference guides to graduate and professional schools are available.

UNDERGRADUATE RESEARCH PROGRAMS

Director: Susie Brubaker-Cole
Associate Director for Honors Writing Programs: Hilton Obenzinger
Associate Directors for Student Services: Renee Courey, Brian Thomas
Program Office: Sweet Hall, fourth floor
Web Site: http://urp.stanford.edu/

Undergraduate Research Programs (URP), a division of the office of the Vice Provost for Undergraduate Education (VPUE), seeks to foster and expand undergraduate participation in the creation of new knowledge at Stanford. URP sponsors and supports a broad range of programs that encourage undergraduates to work closely and individually with faculty on research, advanced scholarship, and creative projects. Programs are designed to serve students who are new to research, as well as those with considerable research experience who are able to take on advanced, independent projects. URP actively maintains the university’s commitment to diversity, and the range of research projects and topics reflects the broad diversity of Stanford’s faculty and student populations.

STUDENT GRANT PROGRAMS

URP offers research grants to currently registered Stanford undergraduates. Grants support faculty-mentored research projects, and are typically used to pay for the research supplies, travel, and room and board associated with such projects. For the 2004-2005 academic year, students have access to five grant programs:

Small Grants provide up to $1500 for student-conceived projects that explore a topic of interest or contribute to the development of the student’s intellectual interests. Applications are considered each quarter, and are due October 21, 2004, January 27, 2005, and April 21, 2005. Large Grants support major projects with up to $5000. Funded projects typically culminate in an honors thesis or some other substantial final product that demonstrates a focused and intellectually rigorous perspective on the topic of interest. Applications are due April 4, 2005. ChappellLougee Scholarships are available to sophomores pursuing projects in the humanities and social sciences, and provide up to $5000. Funded students commit to a research advising program that prepares them to undertake a capstone project or honors thesis in the future. Applications are due December 6, 2004. Angel Grants provide up to $3000 to students producing a finished public creative work such as an art exhibit, stage production, or concert. There is no deadline; applications are accepted on a revolving basis. Conference Travel Grants support students who have been invited to present their work at a professional or scholarly conference. Grants of up to $1500 fund travel expenses to and from the conference and normal conference registration. Students demonstrating financial need may also include conference-associated food and lodging in their budget. These applications are also accepted on a revolving basis.

The application for any student grant consists of (1) a student-authored project proposal, including a line-item budget, and (2) a letter of support written by a member of the Academic Council. URP may also consult student transcripts as well as outside faculty reviewers. Proposals are judged on significance, feasibility, and evidence of student preparedness. Large Grant and Chappell Lougee Scholarship recipients may include a stipend within their budget if they are dedicating a substantial amount of time to their project over the Summer Quarter. These students may also request additional funding to help meet the Financial Aid Office’s expected student contribution.

URP also provides considerable advising support for students considering a research grant. URP staff members offer proposal writing and project design consultation as well as advice on administrative policies. Students can view sample proposals at the URP office. For more information on student grant programs, see the URP web site at http://urp.stanford.edu/.

DEPARTMENTAL AND FACULTY-SPONSORED RESEARCH OPPORTUNITIES

DEPARTMENTAL AND RESEARCH CENTER PROGRAMS

Departments, interdisciplinary programs, and Stanford research centers may apply through the URP office for VPUE Departmental Grants for Undergraduate Research to support programs that provide undergraduates with close mentorship and training in scholarship and research. Typically, departments pair students with a faculty member or faculty-led research group according to their mutual scholarly interests. Students conduct substantive, directed research on a particular aspect of the faculty’s research project, either part-time (during the school year) or full-time (during the summer), and they meet frequently with their faculty mentors to discuss progress and future directions for the project. The official request for proposals may be found on the faculty resources section of the URP web pages. Students should check with URP staff to determine which departments and centers currently sponsor research programs.

FACULTY GRANTS FOR UNDERGRADUATE INDEPENDENT STUDY AND RESEARCH

Individual faculty members may also apply through the URP office for VPUE Faculty Grants for Undergraduate Research. Faculty Grants provide funding for undergraduates to work closely with faculty on a
directed research project. Typical student research activities include conducting literature reviews, developing and conducting research surveys, collecting and analyzing data, aiding in the development of course materials, and conducting laboratory experiments. Faculty determine student participation in this program, so students should contact departments and faculty for more information. Faculty may obtain the official request for proposals on the faculty resources section of the URP web site.

**ONLINE RESOURCE FILES**

Stanford students can obtain free access to two databases through the web, available at http://urp.stanford.edu, designed to facilitate undergraduate and faculty research collaborations. Odyssey lists openings for student research assistants on faculty projects. The Iliad Faculty Interests file contains information about the research interests of individual Stanford faculty across the University. Faculty members with ongoing research programs are encouraged to identify a piece of their project appropriate to undergraduate competencies and to list it through Odyssey.

**SUMMER RESEARCH COLLEGE**

Summer Research College (SRC) is an eight- or ten-week residential program managed by URP for students engaged in faculty-mentored research endeavors on campus over the summer. SRC aims to foster close intellectual and social contact among students and faculty in an interdisciplinary residential community. During the day, students work with their faculty advisers or research groups campus-wide. In the evenings and on weekends, they have opportunities to share in research discussions, dinners with faculty guests, social and cultural activities, and other informal gatherings with fellow researchers.

SRC is not a source of funding for student research; it is a residential program intended to enrich undergraduates’ summer research experience. Residents of SRC obtain funding through URP and non-URP funding programs. For more information about SRC, including registration procedures and college policies, see the URP web site at http://urp.stanford.edu.

**HONORS PROGRAMS**

Qualified undergraduates are encouraged to participate in honors programs offered by departments and interdisciplinary programs. These capstone programs, usually completed in the senior year, provide opportunities for students to engage in advanced research, analysis, and articulation with faculty guidance. Honors programs may require in-depth research or field work with an extended written thesis, laboratory work accompanied by a report, or a creative project. Some honors programs require a public oral and visual presentation of the project’s results. Each department and interdisciplinary program develops its own requirements for entry into its program and criteria for honors projects. Some honors programs require students to be majors, while other programs are available to any undergraduate with relevant preparation. Students are urged to check with each department and program to determine eligibility and other requirements. The URP sponsors the Golden and Firestone Honors Awards in recognition of the most exceptional student honors theses.

**HONORS WRITING PROGRAMS**

In addition to thesis writing support organized by departments and programs, URP offers writing consultation in the form of workshops during seminars, as well as consultation with graduate student assistants and faculty providing writing support for different honors programs. Students writing honors theses can also obtain individual editorial consultation at the URP office. Editorial support is also offered for other advanced writing needs, such as revision of a paper for publication in a professional journal, and personal statements and essays for master’s and doctoral programs, and for national fellowship competitions (see Fellowships and Graduate School Applications Services below).

**HONORS COLLEGE**

The Honors College brings students writing honors theses to campus in September before the start of the regular school year for a program of nearly three weeks. Honors College participants begin the senior year with a serious commitment to independent scholarship in an atmosphere of shared intellectual purpose. The college sponsors interdisciplinary forums, such as writing workshops and methodology panels, as well as residential activities, such as cultural and social outings, and a celebratory concluding event to which students invite their research advisors. Students participating in Honors College receive a research stipend, room and board, and special access to computers. For students with demonstrated financial need, summer-time earnings replacement funds are also available.

**FELLOWSHIPS AND GRADUATE SCHOOL APPLICATIONS SERVICES**

URP staff provide practical advice to Stanford undergraduates and recent graduates on how to prepare and apply for master’s and doctoral programs. Along with the Overseas Resource Center, URP staff help students to compete for merit scholarships and post-baccalaureate fellowships. The URP offers workshops and individual consultations on choosing a graduate school and fellowship program, writing personal statements, soliciting letters of recommendation, and speaking in interviews. The URP office also administers campus nomination competitions for the Goldwater, Udall, Beinecke, Center for the Study of the Presidency, Jack Kent Cooke, Carnegie, and Truman scholarships. The Overseas Resource Center specializes in preparing students for undergraduate international study and post-baccalaureate fellowship competitions by providing individual consultations and workshops on personal statements, project design, and interview strategies.
STUDENT AFFAIRS

Vice Provost for Student Affairs: Gene I. Awakuni
Web Site: http://www.stanford.edu/dept/vpsa/

Student Affairs supports the academic mission of the University by fostering a climate conducive to living and learning in a diverse community. The division encompases programs and services for undergraduates and graduate students which include the Office of Residential Education, the Office of the University Registrar, the Vaden Health Center, and the Dean of Students Office. The Vice Provost for Student Affairs reports directly to the Provost and is responsible for providing leadership, policy direction, administrative support for budget, personnel, facilities, and development, as well as oversight of the efficiency and effectiveness of each of the division’s units. The Vice Provost interacts with the President, the Provost, the University Cabinet, faculty, schools, department representatives, students, and parents. The Vice Provost also serves as an ex officio member of the Senate of the Academic Council.

DEAN OF STUDENTS

Associate Vice Provost for Student Affairs and Dean of Students: Greg Boardman
Web Site: http://www.stanford.edu/dept/vpsa/

The Office of the Dean of Students seeks to ensure that the University is sensitive and responsive to the needs of students. The office is responsible for several administrative offices and community centers including: the Asian American Activities Center; Bechtel International Center; Black Community Services Center; Career Development Center, El Centro Chicano; Judicial Affairs; Lesbian, Gay, Bisexual, and Transgender Community Resource Center; Native American Cultural Center/American Indian Program Office; Office of Multicultural Education; Tresidder Memorial Union; the Office of Student Activities, including Greek Affairs; and the Women’s Community Center. The office also provides consultation and coordination with approximately 600 student organizations, student media, activities, publications, and the Associated Students of Stanford University. The office is located in Tresidder Memorial Union, telephone (650) 723-2733. Students are welcome to visit the Dean of Students to discuss ideas, personal issues, or general concerns about student life.

INTERNATIONAL CENTER

Web Site: http://www.stanford.edu/dept/icenter/

The Bechtel International Center (I-Center) is a meeting place for students and senior research scholars at Stanford from throughout the world and for internationally oriented U.S. students, faculty, and short-term visitors on the campus. Through a variety of social, cultural, and educational programs, I-Center facilities are utilized to acquaint students and scholars with the life of the University and the community, and to bring them together in activities of mutual interest.

The I-Center emphasizes the international dimensions of the University through its advising services, through the cultural contributions to campus life by the various nationalities represented, and by bringing to the attention of U.S. students the many overseas opportunities available for study abroad, scholarships for research and study abroad, and short-term work abroad.

I-Center services include advisers, working closely with the University’s academic departments, include advising foreign students and scholars on matters such as immigration, referrals to counselors in personal matters relating to academic performance, psychological and cultural adjustment, promoting cultural exchanges, and advising spouses and families about opportunities and resources in the community.

The Overseas Resources Center, within the I-Center, provides the following services: advising on scholarships for study and research overseas, information on non-Stanford study abroad and passport photos, international student ID cards, and youth hostel membership cards.

JUDICIAL AFFAIRS AND STUDENT CONDUCT

In March 1996, President Gerhard Casper convened the Committee of 15 and requested a review of the student judicial system at the University under the then-existing Legislative and Judicial Charter of 1966. During the following year, the Committee of 15 conducted an extensive review of the existing charter and process and drafted a new charter to take its place. The Student Judicial Charter of 1997 was approved by the Associated Students of Stanford University, the Senate of the Academic Council, and the President of the University during Spring Quarter 1996-97 and Autumn Quarter 1997-98, replacing the earlier charter and becoming effective in January 1998. Cases of alleged violations of the University’s Honor Code, Fundamental Standard, and other student conduct policies now proceed through an established student judicial process based upon the Student Judicial Charter of 1997, which can be found in its entirety at the University’s Office of Judicial Affairs web site at http://judicialaffairs.stanford.edu. The web site also contains the policies, rules, and interpretations, as well as the University’s Student Conduct Penalty Code, applicable to those students found responsible for violating the Honor Code, the Fundamental Standard, or other University policy or rule.

When a violation of the Fundamental Standard, Honor Code, or other University policy or rule governing student conduct is alleged, or whenever a member of the University community believes such a violation has occurred, he or she should contact the Office of Judicial Affairs, at Tresidder Memorial Union, 2nd floor, phone (650) 725-2485, fax (650) 736-0247, or email judicial.affairs@stanford.edu.

The primary codes of conduct for students are the Fundamental Standard and Honor Code.

THE FUNDAMENTAL STANDARD

Students at Stanford are expected to know, understand, and abide by the Fundamental Standard, which is the University’s basic statement on behavioral expectations articulated in 1896 by Stanford’s first President, David Starr Jordan, as follows:

“Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University.”

Actions that have been found to be in violation of the Fundamental Standard include:

- Physical Assault
- Property Damage
- Forgery
- Theft
- Sexual harassment or other sexual misconduct
- Misrepresentation in seeking financial aid, University housing, University meals, or other University benefits
- Driving on campus while under the influence of alcohol
- Misuse of computer equipment or email
- Sending threatening or obscene messages

There is no standard penalty which applies to violations of the Fundamental Standard. Penalties range from a formal warning to expulsion. Each case is fact specific; considerations include the nature and seriousness of the offense, the motivation underlying the offense, and precedent in similar cases.

THE HONOR CODE

The Honor Code is the University’s statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the Academic Council of the University Faculty at the request of the student body and with the approval of the President. The Honor Code reads:

THE HONOR CODE

The Honor Code is the University’s statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the Academic Council of the University Faculty at the request of the student body and with the approval of the President. The Honor Code reads:
“A. The Honor Code is an undertaking of the students, individually and collectively:

1) that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;

2) that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.

“B. The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking usual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.

“C. While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work.”

Examples of conduct that have been found to be in violation of the Honor Code include:

- Copying from another’s examination paper or allowing another to copy from one’s own paper
- Unpermitted collaboration
- Plagiarism
- Revising and resubmitting a quiz or exam for regrading without the instructor’s knowledge and consent
- Representing as one’s own work the work of another
- Giving or receiving aid on an academic assignment under circumstances in which a reasonable person should have known that such aid was not permitted.

In recent years, most student disciplinary cases have involved Honor Code violations; of those, the most frequent arise when a student submits another’s work as his or her own, or gives or receives unpermitted aid. The standard penalty for a first offense is a quarter suspension from the University and 40 hours of community service. In addition, many faculty members issue a “No Pass” for the course in which the violation occurred. The standard penalty for multiple violations (for example, cheating more than once in the same course) is a three-quarter suspension and 60 hours of community service.

**STUDENT DISABILITY RESOURCE CENTER (SDRC)**

**Center Office:** 563 Salvatierra Walk  
**Mail Code:** 94305-8540  
**Phone:** (650) 723-1066 (voice); 723-1067 (TDD)  
**Web Site:** http://www.stanford.edu/group/SDRC/

The Student Disability Resource Center (SDRC), open weekdays from 9 a.m. to noon, and 1 to 5 p.m., is the central administrative office that coordinates a number of services and resources for undergraduate and graduate students with documented disabilities. The students who use the SDRC’s services have a variety of disabilities, including mobility impairments, learning disabilities, chronic illness, psychological disabilities, and sensory disabilities. The mission of the SDRC is to provide students with disabilities equal access to all facets of university life: education, housing, recreation, and extracurricular activities. To initiate services, a student contacts the SDRC directly and meets with a Program Coordinator to determine what services and accommodations will support the student’s disability-related needs. Students who are eligible for services will be asked to submit professional documentation of their disabilities to the SDRC. Services include, but are not limited to, notetaking, braille, scanning to e-text, oral or sign language interpretation, stenocaptioning, books on tape, extended time on examinations, and a distraction free room for taking examinations. During the academic year, the SDRC runs a golf cart service called DisGo Cart for use by students who use wheelchairs or who have temporary or permanent mobility impairments.

The Assistive Learning Technology Center, located on the second floor of Meyer Library, is maintained by the Office of Accessible Education. The ALTeC provides a wide variety of hardware and software devices, ergonomic furniture, and expert technical advice intended to provide individuals with disabilities independent access to information technology. Each of workstations provides a combination of scanners, refreshable Braille displays, CCTVs, expanded keyboards, Braille embossers, alternative input devices, voice recognition software, screen-readers, text-readers, screen-magnification, eye/head tracking, Braille translation, word prediction, and/or on-screen keyboards. Macintosh screen-reading software (OUTSPOKEN) and screen magnification (in-Large) are also available in the Tresidder and Meyer computer clusters for Macintosh users with print impairments. Students, staff, and faculty are all welcome to use any of the ALTeC’s services, if verified by the SDRC or the ADA/Section 504 Compliance Officer. ALTeC staff is also available to assess the access barriers potentially presented by various disabilities and to recommend compensatory and access strategies. For details, screenings, or demonstrations, please contact the SDRC.

**TRESIDDER MEMORIAL UNION**

Tresidder Memorial Union (TMU) is a center of community activity on the Stanford campus. It houses a variety of food services; meeting rooms for special occasions; a ticket office, a campus information center; branch offices and ATMs for the Stanford Federal Credit Union, and Wells Fargo; ATMs for Bank of America; a fitness center; and a hair styling shop. Tresidder Express carries groceries, magazines, and sundries. A full range of food services is provided at TMU.

TMU is also the home of the Associated Students of Stanford University (ASSU), the Office of the Vice Provost for Student Affairs, the Dean of Students Office, and the Office of Student Activities.

**VOLUNTARY STUDENT ORGANIZATIONS**

At its March 1963 meeting, the Board of Trustees adopted the following policy:

“Students are encouraged to study, discuss, debate, and become knowledgeable about contemporary affairs. Expressing opinions or taking positions with respect to these matters is up to the individual students or to volunteer groups of students so constituted that they are authorized to speak for their members. This is not a function of student government at Stanford.

“All students are required to become members of the Associated Students of Stanford University, which represents them with respect to student affairs on the Stanford campus. The student government, under this policy, is not authorized to speak for students on other matters.

“Under such regulations as may be established from time to time by the President of the University, students may form voluntary organizations constituted to speak for their members with respect to matters outside the scope of student government, provided such organizations clearly identify themselves and, in any public statements, make it clear that they do not represent or speak for the University or the Associated Students.

“Any questions concerning the interpretation and application of this policy shall be resolved by the President of the University.”

Voluntary student organizations are those organizations: (1) in which membership is not mandatory and is nondiscriminatory, (2) in which membership is both open and limited to current Stanford students registered in a degree-granting program, (3) in which students make all organizational decisions, and (4) whose purposes and procedures are consistent with the goals and standards of the University. In order to use University facilities, the Stanford name, or to receive ASSU funding, all voluntary student organizations must register with the University through the Office of Student Activities on the second floor of Tresidder Memorial Union.

As a condition of registration, each voluntary student organization must file and have approved each of the following:

1. A statement of purpose and organizational constitution.
2. A statement about membership eligibility.
3. Clear procedures for officer elections.
4. Identification of the authorized representative of the group, who must be a currently registered student, and at least five active members in the organization who are currently registered students.
Each voluntary student organization must renew its registration with the University annually, early in Autumn Quarter, by submitting new registration materials.

If a voluntary student organization that is registered with the University seeks to use University facilities for meetings open to more than its own members and to specifically invited guests, such meetings shall be subject to the regulations of the Committee on Public Events. All organization events held in University facilities must receive event approval from the Office of Student Activities and Stanford Events.

A voluntary student religious organization may hold open meetings in University facilities only with the approval of the Office of the Dean of the Chapel.

A registered voluntary student organization may advocate publicly a position on a public issue, provided the organization clearly identifies itself, and provided such an organization in any public statement makes clear it does not represent or speak for the University or for the Associated Students.

No student group may use University space or facilities or receive other University support for purposes of supporting candidates for public office. Groups may use public places such as White Plaza for tables, speeches, and similar activities; may have intermittent use of on-campus meeting rooms; and may request to reserve auditoriums and similar space for public events including speeches by political candidates as long as all University guidelines are followed.

**CAREER DEVELOPMENT CENTER**

Center Office: 563 Salvatierra Walk  
Web Site: http://cardinalcareers.stanford.edu

- **Counseling Services**—Monday to Friday, 9 a.m. to 12 noon, 1 p.m. to 5 p.m.; (650) 723-1789.
- **Employment Services**—Monday to Friday, 8:15 a.m. to 4:30 p.m.; (650) 723-9014.
- **Reference File Services**—Monday to Friday, 9 a.m. to 12 noon, 1 p.m. to 3 p.m.; (650) 723-1548.

The Career Development Center (CDC) offers a wide range of services from counseling, workshops, and presentations to on-campus recruiting, job/internship databases, reference file services, library resources, and alumni networking, to help students make informed decisions and to plan for life after Stanford.

Services are open to undergraduates and graduate students, and all students are encouraged to visit in person or via the web. Programs and services are free to students; limited services are available to alumni and student spouses and domestic partners.

The following suggestions may assist in approaching and using the CDC to best benefit:

- Visit early in a Stanford career.
- Gather general career information through the career resource center, internship database, handouts, and alumni network.
- Inquire about individual counseling for all stages of career planning and development.
- Participate in workshops to clarify career goals. Workshops provide valuable learning experiences through the interaction and support of other participants.
- Use the Cardinal Recruiting Program as a convenient way to interview with employers; or use the Reference File Service to ease the management of applications for graduate school or employment.

**HAAS CENTER FOR PUBLIC SERVICE**

The Haas Center for Public Service connects academic study with community and public service to strengthen communities and develop effective public leaders. To accomplish these objectives, the center collaborates with associated units at Stanford to implement programs in five areas of work.

Through the center’s fellowship programs, undergraduates perform summer internships in community organizations and government agencies, locally, nationally and internationally. Postgraduate fellowships allow graduating seniors to work with a mentor in a nonprofit or public agency for a year. With support from the center, Stanford faculty members have created dozens of service-learning courses that involve Stanford students providing direct service to local schools, nonprofit organizations and government agencies. The center’s Public Service Scholars Program supports seniors writing honors theses that combine academic research with public service. Faculty also support students engaged in public service research under their supervision using funds administered by the center. Faculty from Stanford’s School of Education collaborate with the center to provide curriculum guidance and training for tutors and mentors at nearby schools. Another community program trains students to bring results of scientific research to neighboring schools. The federally-supported Community Service Work-Study program, administered in conjunction with the financial aid office, allows students to satisfy work-study obligations year-round by working in community organizations and public agencies. Center staff provide leadership development through training, advising, and resources to Stanford in Government, Alternative Spring Break, and other student groups engaged in service. A year-long leadership program brings students together with community and public leaders to enhance the students’ own skills.

The Haas Center also houses associated programs, including: Stanford in Washington (a unit of the School of Humanities and Sciences); the Institute for Diversity in the Arts (a program of the Committee on Black Performing Arts and the Drama department); and Volunteers in Asia (VIA), a nonprofit cultural and educational exchange program.

Students interested in public service fellowships, service-learning courses, community-based research, public and community service internships for youth and education, or service organization leadership development should visit the Haas Center, see http://haas.stanford.edu, or call (650) 723-0992.

**VADEN HEALTH CENTER**

Center Office: 866 Campus Drive  
Web Site: http://vaden.stanford.edu

The Allene G. Vaden Health Center strictly protects the confidentiality of information obtained in medical care and counseling.

**MEDICAL SERVICES**

Medical Services (650-498-2336, ext. 1) is the first stop for diagnosis and treatment of illness, injury, and ongoing conditions, as well as preventive counseling and education. Services (without charge) include:

- Medical appointments in general medicine and sports medicine.
- Medical advice for routine concerns throughout the day. When Medical Services is closed, advice for urgent conditions is available from our on-call physician.
- Referral to specialists, primarily at Stanford Hospital and Clinics and Menlo Medical Clinic.
- Additional services (fees may apply): allergy injections, immunizations, physical exams for employment and scholarships, HIV testing, laboratory, X-rays, pediatric immunizations (academic year only), drug screening (academic year only).
- Pharmacy (650-498-2336, ext. 3), physical therapy (650-723-3195) and travel services (650-498-2336, ext. 1) are available on site.
COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)

CAPS (650-723-3785) helps students who experience a wide variety of personal, academic, and relationship concerns. Services (without charge) include:

• Evaluation and brief counseling, including personal, couples and group therapy. Students requesting or requiring longer, ongoing therapy incur fees.
• Workshops and groups that focus on students’ social, personal, and academic effectiveness.
• Crisis counseling for urgent situations 24 hours a day.
• Specially trained staff to meet the needs of student survivors of sexual assault (Campus Sexual Assault Response and Recovery Team, 650-725-9955).
• Consultation and outreach to faculty, staff, and student organizations.

HEALTH PROMOTION SERVICES

Health Promotion Services (650-723-0821) educates and supports students to help them make informed, healthy decisions about their lifestyle and behavior. Services include:

• Individual preventive counseling and resource referral concerning nutrition, weight management, eating and body image, alcohol, tobacco and other drug use, sexual assault and harassment, relationships, intimacy and gender issues, and sexual health.
• Health education speakers, programs, events, and workshops at student residences, community centers, student organizations, and for new students (such as Real World: Stanford).
• Academic courses and internships.
• Student groups and volunteer opportunities including Peer Health Educators and anonymous HIV testing and counseling.

HEALTH INSURANCE

All registered students are required to have health insurance. Call (650) 723-2135 for more information. Cardinal Care, a University-sponsored plan for students, fulfills this requirement. Insured by The Chickering Group, an Aetna Company (medical), and ValueOptions (mental health), Cardinal Care features comprehensive, worldwide coverage, services by referral at Stanford University Medical Center, and lowest costs when one initiates care at Vaden Health Center. Health insurance for spouses, domestic partners and children is available. Options for voluntary dental insurance are offered.

OTHER SERVICES AND PROGRAMS

BOOKSTORE

Web Site: http://www.stanfordbookstore.com

Organized in 1897, Stanford Bookstore, (650) 320-1217, located at 519 Lasuen Mall, provides a diverse selection of books, course materials, and supplies to the students, faculty, staff, and community in and surrounding Stanford. The bookstore carries over 130,000 titles, including a wide selection of books written by Stanford authors, making it one of the largest bookstores in the nation. The bookstore also carries a complete selection of Stanford logo apparel, gifts and souvenirs, periodicals, and a cafe that provides an enhanced shopping experience. The Computer Store, in the main branch, sells academically priced computer hardware and software. Other services include shipping of purchases, gift certificates, book buyback, fax service, postage stamp sales, an ATM machine, and Enterprise Rent-A-Car hotline. There are five branches in addition to the Stanford Bookstore that also serve the community: the Stanford Professional Bookstore Palo Alto, (650) 614-0280, which carries medical and technical books, supplies, stationery, medical instruments, best-sellers, and clothing; The Track House Sports Shop, (650) 327-8870, at the corner of Campus Drive and Galvez Street; Tresidder Express convenience store in Tresidder Union; the Stanford Shop, (650) 614-0295, at the Stanford Shopping Center; and the Bookshop, (650) 725-2775, at the Cantor Center for the Arts.

STANFORD CONFERENCE SERVICES

A conference is defined as any student or adult group that convenes for part of a day (including a luncheon), overnight, or for several days, outside the regular or summer academic sessions for registered students.

To make arrangements for holding a new conference from June 18 through Labor Day, contact Jeff Marson, sales/marketing coordinator for Conference Services, (650) 725-1427, jmanson@stanford.edu. For conferences occurring immediately after Labor Day through June 17, contact Non-Academic Facilities Scheduling in the Office of the University Registrar, (650) 723-6755, or email reg-events@stanford.edu. Policies concerning conferences are the responsibility of the offices of the President and the Provost.

External organizations interested in meeting at Stanford must obtain sponsorship from a University department. Conferences initiated by University departments or external organizations must demonstrate consistency with the University’s academic mission. The sponsoring department submits its proposal to the Director of Conferences for review in terms of available facilities and for the approval of the President’s Office.

On-campus residential housing and dining services are normally available from the Sunday following Commencement through Labor Day. Assistance with arrangements for tables, chairs, audiovisual aids, signage, and other equipment may be made through Conference Services. For more information, see http://conference.stanford.edu. During the academic year, housing arrangements for University-sponsored visitors can be made through the SLAC Guest House; see http://slacguesthouse.stanford.edu.
Ombuds

Stanford University Ombuds: David Rasch
Ombuds Office: Building 310, Room 104, Main Quad
Phone: (650) 723-3682
Email: rasch@stanford.edu
Web Site: http://vaden.stanford.edu

School of Medicine Ombuds: Martha McKee
Email: martha.mckee@stanford.edu

The charge to the Ombuds office at Stanford is: “The Ombudsman’s task is to protect the interests and rights of members of the Stanford community from injustices or abuses of discretion, from gross inefficiency, from unnecessary delay and complication in the administration of University rules and regulations, and from inconsistency, unfairness, unresponsiveness, and prejudice in the individual’s experience with University activities. The Ombudsman’s office exists to receive, examine, and channel the complaints and grievances of members of the Stanford community, and to secure expeditious and impartial redress.”

Any troublesome matter in the University community may be discussed in confidence with the University Ombuds. Services of the office are available to students, staff, and faculty.

Although possessing no decision making authority, the Ombuds has wide powers of inquiry. The Ombuds refers matters to the proper person or office expeditiously and, where appropriate, assists in negotiations or provides access to mediation. (For the role of the office of the Ombuds in cases of sexual harassment, see the “Non-Academic Regulations” section of this bulletin.)

Police Services

Department Office: Corner of Campus Drive and Serra Street
Phone: (650) 723-9633
Web Site: http://police.stanford.edu

The Stanford Department of Public Safety is a full service police department that operates 24 hours a day, 7 days a week. For police, fire, or ambulance response, dial 9-1-1, or 9-9-1-1 from a University phone. Emergency assistance can also be obtained by using one of the nearly 100 Blue Emergency Phone Towers strategically placed around campus.

The department is comprised of the following divisions:

The Field Services Division consists of sworn and non-sworn officers who patrol the campus and respond to calls for service. Sworn officers receive their police powers through the Santa Clara County Sheriff’s Office. Sworn officers have the legal authority to stop vehicles, make arrests, and enforce all laws. Non-sworn officers assist the sworn officers with security patrols, evidence collection, crime prevention presentations, and other assigned tasks.

Community Service Division: Community Service Officers (CSOs) enforce the parking rules and regulations on campus, and provide traffic control at special events, construction zones, and accident scenes. CSOs also provide building security during emergency or critical incidents.

The Support Services Division provides logistical, technical, and accounting support to the department. Special events are handled through this division as well. Special Events Personnel (SEP’s) provide security at campus events including athletic events, concerts, student-sponsored events, and dignitary visits. SEPs are available for hire by groups needing security at their University events. Contact the special events office at (650) 723-4924, or email event_security@stanford.edu, for more information.

The Administrative Support Division supports the department through training, recruiting, payroll, human resources, and other business functions.

For additional safety information or to view the yearly crime statistics, see the Stanford Safety and Security Almanac, available free from Public Safety, or see http://police.stanford.edu.

The Office for Religious Life

Phone: (650) 723-1762
Web Site: http://religiouslife.stanford.edu

The Office for Religious Life in Memorial Church nurtures spiritual, religious, and ethical life for the Stanford University community and beyond. Multifaith exploration and dialogue, central in Stanford’s history from its founding, is a vital part of both its ethos and education.

The Deans for Religious Life oversee and provide support for Stanford Associated Religions (S.A.R.), some thirty religious organizations invited to offer their spiritual services to the campus. The Deans are committed to welcoming students of all genders and sexual orientations, all religious and non-religious traditions, and all cultural backgrounds. They strive to ensure that students, faculty and staff find lively, thoughtful and supportive contexts on Stanford’s campus, in which to pursue their spiritual journeys.

Stanford Alumni Association

Web Site: http://www.stanfordalumni.org

Established in 1892 by members of Stanford’s first graduating class, the Stanford Alumni Association oversees alumni activities and services, including reunions/homecoming, campus conferences, regional and class programming and events, Stanford Magazine, a web site, enrichment education, faculty-led travel, and alumni networking, mentoring, and volunteering.

SAA’s Student Programs group works with undergraduate and graduate students, providing programming to foster class identity and lifelong connections to Stanford and the Stanford community. Programs include Sophomore Academic Dinners (to help students who are selecting majors), Junior Alumni Night (to connect students with alumni in various professions), Care Packages for students during Dead Weeks, Senior Send-Off (to help students connect to Stanford alumni in the communities they will move to upon graduation), Senior Dinner on the Quad (to celebrate the completion of their Stanford undergraduate days as a class), Class Day Luncheon (featuring a final lecture by a favorite professor), the Night Before Party (one last bash for soon-to-be-graduates and their families), and the Cardinal Class Core Induction Ceremony (for seniors who agree to play ongoing leadership roles in keeping their class connected). In addition, SAA sponsors Happy Hours and Open Houses for graduate students and advises the Senior Class Officers.

For further information, call (800) 786-2586 or (650) 723-2021, or see http://www.stanfordalumni.org.

Stanford Events

Stanford Events supports the mission and goals of Stanford University through open engagement of the campus community and the worldwide public. The department has three divisions: Public Events, Stanford Lively Arts, and the Stanford Ticket Office.

Public Events oversees, advises, and produces University events and ceremonies as designated by the President’s office such as: Commencement, Baccalaureate, the University President’s inaugurations, New Student Orientation Convocation, Community Day/Founders’ Celebration, and other high-profile university events. This division also serves in an advisory capacity to the schools, departments, and student groups on campus, and oversees University policy and procedure regarding campus events. The Public Events office has final approval authority of Stanford facility and open space use for non-academic public events on campus. Information about University event planning, policies, procedures, and University facilities can be found at http://stanfordevents.stanford.edu, or (650) 723-2551.
Lloyd W. Dinkelspiel Awards, the University’s presenting program, annually brings to campus a full season of music, dance, and theater by world-famous artists and exceptional newcomers. It furthers research and creativity through world premieres, unique collaborations, and commissions. In addition to on-stage performances, Lively Arts extends and supplements the academic life of the University through master classes, extended residencies, workshops, lectures, and demonstrations, and group discussions. Internationally acclaimed artists perform serious work with Stanford students in classrooms as well as in residence halls. Discounts on performances are available for faculty, staff, and students. For tickets and more information, see http://livelyarts.stanford.edu, or call (650) 725-ARTS (2787).

Stanford Ticket Office provides ticketing services for the arts and entertainment events of Stanford University. Tickets for Stanford Lively Arts, Stanford music and drama departments, Stanford Jazz Workshop/Festival, and the ASSU Concert Network are among the event tickets that are available through this office. For more information, see http://tickets.stanford.edu, or call (650) 725-ARTS (2787).

AWARDS AND HONORS

FACULTY AND STAFF AWARDS

KENNETH M. CUTHBERTSON AWARD

The Kenneth M. Cuthbertson Award was established in 1981 for recognition of exceptional service to Stanford University. It was established by members of the faculty who wish to remain anonymous. All members of the Stanford community are eligible for the award; the sole criterion is the quality of the contribution that the recipients have made to the University. The award provides a way of honoring members of the staff and faculty for their efforts on behalf of the University.

Ordinarily, one award is made each year. The award was first presented in 1981 to the person for whom it is named. Kenneth M. Cuthbertson was one of the early architects of Stanford’s long-term financial planning and fundraising program. His service to Stanford has set an enduring standard for those who will come after him. The award is made annually at the University Commencement Ceremony.

LOYD W. DINKELSPIEL AWARDS

The Lloyd W. Dinkelspiel Awards recognize distinctive and exceptional contributions to undergraduate education at Stanford University. The two principal awards are made to the faculty or staff members adjudged to have made the most distinctive contribution to the development and enrichment of undergraduate education in its broadest sense. Two awards are also made to graduating seniors who combine academic achievement with effective contributions to undergraduate student life. Preference is given to service in the School of Humanities and Sciences and the area of liberal education. The awards are made from an endowment fund established in memory of Lloyd W. Dinkelspiel, a Stanford alumnus and trustee. The awards are made annually at the University Commencement Ceremony.

WALTER J. GORES AWARDS

The Walter J. Gores Faculty Achievement Awards for excellence in teaching were established by bequest of Walter J. Gores, Stanford Alumnus of the Class of 1917 and a professor at the University of Michigan for 30 years. Teaching is understood in its broadest sense and includes, in particular, lecturing, leading discussions, tutoring, and advising at the undergraduate or professional levels. Any member of the teaching staff of the University is eligible for an award, including all faculty of professorial rank, instructors, lecturers, teaching fellows, and teaching and course assistants. Ordinarily, awards are made to a senior faculty member (associate or full professor) or senior lecturer; a junior faculty member or member of the teaching staff; and a teaching assistant (graduate or undergraduate student). The awards are made annually at the University Commencement Ceremony.

ALLAN COX MEDAL FOR FACULTY EXCELLENCE FOSTERING UNDERGRADUATE RESEARCH

The Allan Cox Medal for Faculty Excellence Fostering Undergraduate Research is awarded annually to a faculty member who has established a record of excellence directing undergraduate research over a number of years. It may also go to a faculty member who has done an especially outstanding job with just one or two undergraduates who demonstrated superior work. The medal was established in memory of the former professor of Geophysics and Dean of the School of Earth Sciences, a strong supporter of faculty-student research collaboration.

HERBERT HOOVER MEDAL FOR DISTINGUISHED SERVICE

David Starr Jordan’s firm belief that every academic degree should represent work actually done in or under the direction of the institution granting it has meant that, since its founding, Stanford has awarded no honorary degrees. As a means of recognizing extraordinary individuals who deserve special acknowledgment, the Stanford Alumni Association in 1962 voted to establish the Herbert Hoover Medal for Distinguished Service. The name pays tribute to the former President’s example of service to his University, to his country, and to the cause of world humanitarianism. Indeed, Mr. Hoover was the first award recipient. The gold medal is presented following selection by an anonymous committee appointed by the Chair of the Board of Directors of the Alumni Association. There have been 11 honorees.

STUDENT AWARDS

BOOTHE PRIZE FOR EXCELLENCE IN WRITING

Awarded during the freshman year, the Boothe Prize recognizes excellence in writing. Students are selected for this honor on the basis of essays written for courses fulfilling the Introduction to the Humanities or Writing and Rhetoric requirements. The prize is named for Mr. and Mrs. D. Power Boothe, Jr., whose gifts to the University reflect their interest in the humanities.

PRESIDENT’S AWARD FOR ACADEMIC EXCELLENCE IN THE FRESHMAN YEAR

The President’s Award honors students who have exceptionally distinguished academic records that exemplify a strong program of study in the freshman year. Students eligible for the award normally have completed Writing and Rhetoric and Introduction to the Humanities requirements during their first year at Stanford.

DEANS’ AWARD FOR ACADEMIC ACHIEVEMENT

The Deans of Earth Sciences, Engineering, and Humanities and Sciences recognize from five to ten undergraduate students each year for their academic endeavors. Honorees are cited for noteworthy accomplishments which represent more than a high grade point average or success in course work. Faculty nominate students who have exceptional tangible achievements in classes or independent research, national academic competitions, a presentation or publication for a regional or national audience, or exceptional performance in the creative arts.

FIRESTONE MEDAL FOR EXCELLENCE IN RESEARCH

The Firestone Medal is awarded to seniors in recognition of excellence in undergraduate research. Departments in the School of Humanities and Sciences nominate students who have completed outstanding honors projects in the social, physical, and natural sciences.
ROBERT M. GOLDEN MEDAL FOR EXCELLENCE IN THE HUMANITIES AND CREATIVE ARTS

The Golden Medal recognizes outstanding achievement in the humanities and the creative arts. Seniors receive these medals upon nomination by their major department.

HOEGER PRIZE FOR EXCELLENCE IN UNDERGRADUATE WRITING

The Hoefer Prize recognizes students and faculty for their work in courses that meet the University Writing Requirement for writing in the major. Prizes are awarded in each of the five areas of the undergraduate curriculum: humanities, social sciences, natural sciences, engineering, and earth sciences.

FREDERICK EMMONS TERRAN ENGINEERING SCHOLASTIC AWARD

The School of Engineering annually presents the Terman Award to seniors for outstanding academic achievement. The awardees share their award with a high school teacher of their nomination.

PHI BETA KAPPA

Phi Beta Kappa is a nationwide society honoring students for the excellence and breadth of their undergraduate scholarly accomplishments. Membership in the Stanford Chapter (Beta of California) is open to undergraduates of all majors. To be elected to Phi Beta Kappa at Stanford, a student must achieve academic distinction in the major as well as in courses across a broad range of fields.

Approximately a tenth of the members of a graduating class are elected to Phi Beta Kappa. Of this number, about one fifth are chosen in their junior year, the remainder in their senior year.

The chapter’s election guidelines define breadth of study as excellence beyond the major field. To be considered for election, a student must have taken at least three courses of three units or more at Stanford for a letter grade in each of the following three major domains of knowledge: Humanities; Science, Engineering, and Math; and Social Sciences, by the time elections are held early in the Spring Quarter. To be considered for election, students who transfer in their junior year must have taken at least two courses at Stanford in two of the major domains and at least one course in the third domain, and must have completed a minimum of 75 units of academic work at Stanford by the end of Winter Quarter.

Although there is no direct correlation between Stanford University General Education Requirements (GER) and Phi Beta Kappa breadth requirements, examples of courses that satisfy the Phi Beta Kappa breadth criterion include those listed in the Stanford Bulletin as satisfying undergraduate GERs in Areas 2 to 4. Courses taken for GER Area 1 are not considered sufficient to satisfy the PBK breadth criterion.

A grade of ‘+’ or ‘CR’ is not considered a sign of distinction. Minimally satisfying the breadth criterion is not considered a sign of distinction; successful candidates will have satisfied some component of the breadth requirement outside the major.

The academic records of eligible students are automatically reviewed, so no special action is required for students wishing to be considered for membership. Anonymity in the election process is ensured by removal of the students’ names from their academic records before consideration. Students who desire that their records not be made available for consideration by the Stanford chapter of Phi Beta Kappa should inform the Registrar, Old Union, Stanford, CA 94305-3005.

EXCHANGE PROGRAMS AND CROSS-ENROLLMENT AGREEMENTS

Stanford has exchange programs and cross-enrollment agreements with a number of other colleges and universities. The purpose of these programs and agreements is to offer Stanford students courses and training that are not available in the Stanford curriculum.

EXCHANGE PROGRAMS UNDERGRADUATE

Stanford has exchange programs with four colleges and universities that allow students to exchange schools for a quarter/semester or for a year, depending on the school. These programs are best suited to students in their junior year, when the major area of study has been determined. Stanford students register for zero units at Stanford during the quarter(s) in which they are attending another college or university and pay the regular Stanford tuition. Courses taken at the other institution are treated as transfer credit back to Stanford. Students should contact the External Credit Evaluation section of the Office of the University Registrar to determine whether the courses taken through an exchange program may qualify for credit toward a Stanford degree. Only the number of units accepted in transfer, not the course titles or the grades received, are recorded on the Stanford transcript.

Exchange programs are currently available at three historically black institutions: Howard University in Washington D.C.; and Morehouse College and Spelman College in Atlanta, Georgia. The exchange program at Dartmouth College in Hanover, New Hampshire, focuses on Native American Studies. Further information is available at the Undergraduate Advising Center.

GRADUATE

The Exchange Scholar Program is open to doctoral students in the fields of humanities, social sciences, and sciences who have completed one full year of study at one of the participating institutions. These students may apply to study at Stanford for a maximum of one academic year to take advantage of particular educational opportunities not available on the home campus. The participating institutions are Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, University of Pennsylvania, and Yale University. Further information on the program may be obtained from the Degree Progress Office, Old Union, or from the graduate dean’s office at participating institutions. Some institutions may place restrictions on specific departments.

Stanford also has separate exchange programs with the University of California, Berkeley, and the University of California, San Francisco. Further information may be obtained at the Office of the University Registrar.

CROSS-ENROLLMENT AGREEMENTS FOR ROTC

Stanford has cross-enrollment agreements for the Reserve Officers’ Training Corps (ROTC) with the Navy and Marine Corps ROTC program at the University of California at Berkeley, the Army ROTC program at Santa Clara University, and the Air Force ROTC program at San Jose State University. The purpose of these agreements is to allow Stanford students to engage in military training while working on their degrees from Stanford. Courses taken in ROTC programs are offered by and through UC Berkeley, Santa Clara, and San Jose State. The courses do not qualify to be used towards the 12 unit requirement for full-time registration status or satisfactory academic progress requirements for Stan-
COURSES

AIR FORCE ROTC

The following are offered by San Jose State University:

AS 001A,B. The Foundation of the United States Air Force—Freshman year. Introduces students to the Air Force and AFROTC. Characteristics, missions, and organization of the Air Force; officerhood and professionalism, career opportunities, military customs and courtesies, and communications skills.

AS 002A,B. The Evolution of the United States Air and Space Power—Sophomore year. Air and space power through historical study and analysis. The capabilities, function, and doctrinal employment of aerospace forces. Emphasis is on oral and written communication skills. Required leadership lab.

AS 131A,B. Air Force Leadership Studies—Junior year. Leadership management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills. Application level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion. Required leadership lab. Prerequisites: AS 001A,B, AS 002A,B, or as determined by department chair.

AS 141A. National Security Affairs—Senior year. The national security process, international and regional relations, advanced leadership ethics, and Air Force doctrine with focus on the military as a profession, officerhood, military justice, civilian control of the military, and current issues affecting military professionalism. Required leadership lab. Pre- or corequisites: AS 131A,B, or as determined by department chair.

AS 141B. Preparation for Active Duty—Senior year. The role of the Air Force officer in contemporary society emphasizing skills to facilitate a smooth transition from civilian to military life. Required leadership lab. Pre- or corequisites: AS 131A,B, or as determined by department chair.

Leadership Laboratory—Complements courses above. Freshman and sophomore years: Air Force customs and courtesies, drill and ceremonies, and military commands. Junior and senior year: advanced leadership experiences involving planning and controlling military activities of the cadet corps, preparation and presentation of briefings, and other oral and written communications.

ARMY ROTC

FRESHMAN YEAR

MILS 11. Basic Leadership I: Introduction to Leading Organizations—Taught on Stanford campus. The Army’s theory of leadership through the primary field manual on leadership plus supplementary readings as assigned. Basic soldier skills. The Army’s physical fitness program. One 60-minute class per week; three 3-hour leadership labs required. One weekend field exercise away from the University.

MILS 12. Basic Leadership II: Leadership Theory—Taught on Stanford Campus. Review Army leadership theory from MILS 11 and survey other leadership theories. Comparative leadership theory. The Army’s formal ethical decision making process. Effective communication techniques. One 60-minute class per week. Three 3-hour leadership labs required. One weekend military formal dinner.

MILS 13. History of Military Leadership—Taught on Stanford campus. How leadership is a central factor in preparing for and winning battles. How leaders succeed or fail. Leadership principles to train, prepare for, and conduct military operations. One 60-minute class per week. Three 3-hour leadership labs required. One weekend field training exercise away from the University.

SOPHOMORE YEAR

MILS 21. Basic Leadership III: Leadership in Practice—Taught on Stanford campus. Army leadership theory. Case studies of leadership. How personal leadership is critical to the success or failure of an organization. Ethical organizational climate. One 60-minute class per week. Five 3-hour labs per quarter. One weekend field training exercise away from the University.

MILS 22. Battle Analysis—Taught on Stanford campus. Analysis of military battles to understand the reasons for success or failure of both leaders and units in the battles. The principles of war, the role played by formal tactics in battle, the role of weapons systems and their improvements, and the role of leaders. Battles may include examples from the classical period, the American Civil War, WW II, and a modern American battle. One 60-minute class per week. Five 3-hour labs per quarter. One formal military dinner during an evening.

MILS 23. Troop Leading Procedures—Taught on Stanford campus. Plans and orders that enable small units to complete assigned tasks. Formal military decision making process. Planning techniques used to develop orders. Briefing plans and decisions. Review of basic soldier skills. One 60-minute class per week. Five 3-hour labs per quarter. One field training exercise away from the university.

JUNIOR YEAR

MILS 131. Leading Small Organizations I—Taught at Santa Clara University. Troop leading procedures and military decision making process in small unit planning and preparation. Advanced planning techniques and writing formal orders. Emphasis is on developing advanced skills needed for Army ROTC National Advanced Leadership Camp. Three 60-minute classes or two 90-minute classes per week. Five 3-hour labs per quarter. One field training exercise away from the university. Prerequisites: MILS 11, 12, 13, 21, 22, and 23, or consent of department chair.

MILS 132. Leading Small Organizations II—Taught at Santa Clara University. How small organization leaders exercise control of their organizations. Emphasis is on planning strategies, problem solving, practical exercises, and preparation for the Army ROTC National Advanced Leadership Camp. Army risk assessment and risk management doctrine. Three 60-minute classes or two 90-minute classes per week.
MILS 133. Leading Small Organizations III—Taught at Santa Clara University. Small unit tactical proficiency. Troop leading procedures and the military decision making process in the preparation of Patrol OPORD’s. How to call for, adjust, and integrate indirect fires into a scheme of maneuver. Conditions and procedures utilized at advance camp to prepare cadets to render optimal performance in the camp environment. Three 60-minute classes or two 90-minute classes per week. Five 3-hour labs per quarter. One field training exercise away from the University. Prerequisite: MILS 132, or consent of department chair.

SENIOR YEAR

MILS 141. Leadership Capstone I: Staff Management—Taught at Santa Clara University. First course in the Capstone to the Army ROTC program. Management of a small Army organization, the Army ROTC cadet battalion, through regular formal meetings and briefings. Assignment to an actual staff or leadership position within the battalion organization. Depending on the position assigned, students are responsible for management areas including budget, logistics, personnel, public affairs, training, and organization operations. Students must show proficiency in understanding Army leadership principles and methods as well as planning and procedures for leading small organizations. One 3-hour seminar per week. Five 3-hour labs per quarter. One weekend field training exercise away from the University. Prerequisite: MILS 133, or consent of department chair.

MILS 142. Leadership Capstone II: Military Ethics—Taught at Santa Clara University. Second course in the Capstone to the Army ROTC program. Management of the Army ROTC cadet battalion. New position assignments. Introduction to just war theory. One 3-hour seminar per week. Five 3-hour labs per quarter. One evening formal military dinner. Prerequisite: MILS 141.

MILS 143. Leadership Capstone III: Transition to Lieutenant—Taught at Santa Clara University. Final course in the Capstone to the Army ROTC program. The moral employment of forces and weaponry. Goal is to ensure a smooth transition into the Army as a second lieutenant. One 3-hour seminar per week. Five 3-hour labs per quarter. One weekend field training exercise away from the University. Prerequisite: MILS 142.

NAVAL ROTC

The Department of Naval Science at UC Berkeley offers programs of instruction for men and women leading to active duty reserve commissions in the U.S. Navy or U.S. Marine Corps. Navy option students enrolled in one of the four-year programs normally complete the following courses during the first two years.

NS 1. Introduction to Naval Science—Freshman year.
NS 2. Sea Power and Maritime Affairs—Freshman year.
NS 3. Leadership and Management—Sophomore year.
NS 10. Ship Systems—Sophomore year.

Navy option students enrolled in either the four- or two-year program normally complete the following courses during their junior and senior years.

NS 12A. Navigation and Naval Operations I—Junior year.
NS 12B. Navigation and Naval Operations II—Junior year.
NS 401. Naval Ship Systems—Senior year.
NS 412. Leadership and Ethics—Senior year.

In addition to the above courses, Navy option ROTC students are required to participate in weekly professional development laboratories (drill) at UC Berkeley and complete a number of other courses at Stanford including one year of calculus, physics, and English, and one quarter of computer science, and military history or national security policy.

In lieu of NS401, NS10, NS12A and NS12B, Marine option students participate in Marine Seminars and complete MA154, History of Littoral Warfare, and MA20, Evolution of Warfare, or a designated equivalent course. Marine option students also participate in the weekly professional development laboratories.
Nonacademic Regulations

STATEMENT OF NONDISCRIMINATORY POLICY

Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. It prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, or national and ethnic origin or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs. The following person has been designated to handle inquiries regarding this policy: the Vice Provost for Campus Relations, Office of Campus Relations, Building 310, Main Quad, Stanford University, Stanford, CA 94305-2100; (650) 723-3484 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

AMERICANS WITH DISABILITIES ACT/REHABILITATION ACT GRIEVANCE PROCEDURE

For information concerning policies and procedures for students with disabilities, see http://www.stanford.edu/dept/ocr/access/student.html, or the ADA Section 504 Compliance Officer, Diversity and Access Office, Building 310, Main Quad, Mail Code 2100, (650) 723-0755 (Voice), (650) 723-1216 (TTY), (650) 723-1791 (Fax); or the ADA Section 504 Compliance Officer, Diversity and Access Office, Building 310, Main Quad, Stanford University, Stanford, CA 94305-2100; (650) 723-3484 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

POLICY

The following is quoted from the policy:

I. Policy

Stanford University, in compliance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973 (Section 504), does not discriminate on the basis of disability in administration of its education-related programs and activities, and has an institutional commitment to provide equal educational opportunities for disabled students who are otherwise qualified.

Students who believe they have been subjected to discrimination on the basis of disability, or have been denied access to services or accommodations required by law, have the right to use this grievance procedure.

II. Applicability

The grievance procedure set forth below is applicable to undergraduate and graduate students of the University. In general, it is designed to address disputes concerning the following:

A. Disagreements regarding a requested service, accommodation, or modification of a University practice or requirement;
B. Inaccessibility of a program or activity;
C. Harassment or discrimination on the basis of disability;
D. Violation of privacy in the context of disability.

For disputes regarding certain specific academic accommodations or modification of academic requirements (such as reduction in the number of academic course units taken quarterly or yearly, requests for substitution of courses, or issues relating to academic standing), the alternate procedure set forth in Section V (C) of the Stanford University Policy and Procedure for Student Requests for Services and Accommodations should be followed. For questions regarding which procedure is applicable, contact the Compliance Officer at the Diversity and Access Office.

These two sets of procedures supplant the Statement on Student Academic Grievance Procedures (set forth in the Stanford Bulletin) for disability-related grievances.

III. Compliance Officers

Stanford University’s Compliance Officers are responsible for administering this grievance procedure as well as ensuring compliance with applicable laws. Rosa González is the designated Compliance Officer Diversity and Access Office, located in Building 310 in the Main Quad, (650) 723-0755 (Voice), (650) 723-1216 (TTY), (650) 723-1791 (Fax).

Additional Compliance Officers may be designated from time to time by the Provost from those faculty and staff members knowledgeable concerning disability issues and the legal mandates of state and federal disability statutes.

IV. Informal Resolution—Second Review

A. Prior to initiating the formal complaint procedure set forth below, and as a prerequisite to it, the student shall contact the Compliance Officer at the Diversity and Access Office for assistance in resolving the matter informally within seven calendar days of the determination communicated by the DRC (if there was such a determination).

If the Compliance Officer is not successful in quickly achieving a satisfactory resolution (that is, generally within seven calendar days), the Compliance Officer will take the steps described in subparagraph ‘B’ below.

B. Second Review Panel: in accordance with the dispute resolution procedures outlined in Section VII of the Stanford University Policy and Procedure for Student Requests for Services and Accommodations, the Compliance Officer will convene an ad-hoc second review panel to review the issue(s) raised. The panel will consist of the following (or their designees): the Compliance Officer reviewing the request, the Director of the DRC, the Dean of Students, and (depending upon the issues) such other academic or administrative personnel as may be appropriate. This panel will review the request, investigate, and attempt to resolve the issues within seven calendar days of the request for or initiation of a second review. No formal report need be issued by the panel, but the panel will document the outcome of its review in a letter to the student. If the student is not satisfied with the panel’s disposition of the matter, the student may file a formal complaint in accordance with the procedure described below.

V. Formal Complaint

If the procedure set forth above for informal resolution does not yield a successful resolution, then the student may file a formal complaint in the following manner:

A. When to File Complaint: complaints shall be filed within ten calendar days of the end of the informal resolution process described above.

B. What to File: a complaint must be in writing and include the following:
   1. The grievant’s name, address, email address, and phone number
   2. A full description of the problem
   3. A statement of the remedy requested
   4. A copy of the letter from the Second Review Panel setting forth the outcome of the informal grievance procedure described above

C. Where to File Complaint: the complaint shall be filed with the Compliance Officer at the Diversity and Access Office, Building 310, Main Quad, Mail Code 2100; (650) 723-1791 (Fax).

D. Notice of Receipt: upon receipt of the complaint, the Compliance Officer reviews the complaint for timeliness and appropriateness for this grievance procedure, and provides the grievant with written notice acknowledging its receipt.

E. Investigation: the Compliance Officer or his or her designee (hereafter collectively referred to as the “grievance officer”) shall promptly initiate an investigation. In undertaking the investigation, the grievance officer may interview, consult with and/or request a written response to the issues raised in the grievance from any individual the grievance officer believes to have relevant information, including faculty, staff, and students.

F. Representation: the grievant and the party against whom the grievance is directed shall have the right to have a representative. The party shall indicate whether he or she is to be assisted by a representative and, if so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.

G. Findings and Notification: upon completion of the investigation, the grievance officer will prepare and transmit to the student, and to the
party against whom the grievance is directed, a final report containing a summary of the investigation, written findings, and a proposed disposition. This transmission will be expected within 45 calendar days of the filing of the formal complaint. The deadline may be extended by the Compliance Office for good cause. The final report shall also be provided, where appropriate, to any University officer whose authority will be needed to carry out the proposed disposition or to determine whether any personnel action is appropriate.

H. Final Disposition: the disposition proposed by the grievance officer shall be put into effect promptly. The grievant or any party against whom the grievance or the proposed disposition is directed may appeal. The appeal to the Provost (as set forth below) will not suspend the implementation of the disposition proposed by the grievance officer, except in those circumstances where the Provost decides that good cause exists making the suspension of implementation appropriate.

VI. Urgent Matters
Whenever the application of any of the time deadlines or procedures set forth in this grievance procedure creates a problem due to the nature of the complaint, the urgency of the matter, or the proximity of the upcoming event, the Compliance Officer will, at the request of the grievant, determine whether an appropriate expedited procedure can be fashioned.

VII. Remedies
Possible remedies under this grievance procedure include corrective steps, actions to reverse the effects of discrimination or to end harassment, and measures to provide a reasonable accommodation or proper ongoing treatment. As stated above, a copy of the grievance officer’s report may, where appropriate, be sent to University officer(s) to determine whether any personnel action should be pursued.

VIII. Appeal
Within ten calendar days of the issuance of the final report, the grievant or the party against whom the grievance is directed may appeal to the Provost the grievance officer’s determination. An appeal is taken by filing a written request for review with the Compliance Officer at the Diversity and Access Office, Building 310, Room 112, Mail Code 2100; (650) 723-1791 (Fax).

The written request for review must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

The Compliance Officer shall forward the appeal to the Provost, and also provide copies to the other party or parties. The review by the Provost or his or her designee normally shall be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision or, conversely, were improper or extraneous criteria brought to bear on the decision?
2. Were there any procedural irregularities that substantially affected the outcome?
3. Given the proper facts, criteria, and procedure, was the decision a reasonable one?

A copy of the Provost’s written decision will be expected within 30 calendar days of the filing of the appeal and shall be sent to the parties, the Compliance Officer and, if appropriate, to the University officer whose authority will be needed to carry out the disposition. The deadline may be extended by the Provost for good cause. The decision of the Provost on the appeal is final.
in his or her capacity as a student. This is not a grievance procedure to address the concerns of student groups. Similarly and as a general proposition, dissatisfaction with a departmental, school or University policy or practice of broad or general application is not grounds for a grievance under this procedure; the Vice Provost for Campus Relations may, in his or her discretion, entertain an appeal in exceptional circumstances, such as where (for example) the policy or practice is alleged to be contrary to law.

e. The Vice Provost for Campus Relations, who is also responsible for ensuring the University’s compliance with applicable anti-discrimination laws including Title IX of the Education Amendments of 1972, is responsible for administering this Student Non-Academic Grievance Procedure.

1. The Vice Provost may be contacted at: Vice Provost for Campus Relations, Bldg. 310, Main Quad, Stanford, CA 94305-2100; phone: (650) 723-3484 (voice); (650) 723-1215 (TTY); (650) 723-1791 (fax); http://www.stanford.edu/dept/ocr/.

2. The Vice Provost in his or her sole discretion can decide whether to refer a grievance brought under this procedure to another grievance process. In cases involving allegations of sexual harassment in particular, the Vice Provost may wish to consult with the Director of the Sexual Harassment Policy Office as to the most appropriate way to proceed; see Section 5.d below. In cases involving student employment, the Vice Provost may wish to consult with the University’s Department of Human Resources.

2. Informal Resolution
   a. As a general proposition (and although particular circumstances may warrant an exception), the student should first discuss the problem and seek a solution with the individual(s) most directly involved.
   b. If no resolution results (or if circumstances make discussion inappropriate with the person most directly involved), the student should then consult with the individual at the next (higher) administrative level in the department, school, residence or University administrative unit. Serious efforts should be made to resolve the issue locally at an informal level without resort to a formal grievance; such efforts may continue even after the formal process is underway.

3. Formal Grievance
   a. If informal means of resolution prove inadequate, the student should set forth in writing the substance of the complaint, the grounds for it and the evidence on which it is based, and the efforts taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.
   b. The grievance document should be submitted to the Vice Provost. A grievance should be filed in a timely fashion, i.e., normally within thirty days of the end of the academic quarter in which the action that is the subject of the grievance occurred. A delay in filing a grievance may be grounds for rejection of that grievance.
   c. The Vice Provost shall promptly initiate a review, which should normally be completed within sixty days. The Vice Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Vice Provost directs. The Vice Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
   d. In undertaking this review, either the Vice Provost, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.
   e. The Vice Provost (or his or her designee) shall issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any). Conduct merits discipline shall be brought to the attention of the appropriate disciplinary process.

4. Appeal
   a. If the student is dissatisfied with the disposition by the Vice Provost (or his or her designee), he or she may appeal to the Provost (Office of the Provost, Building 10, Stanford, CA 94305-2061; phone (650) 725-4074; fax (650) 725-1347. The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Vice Provost (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.
   b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost’s direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
   c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within thirty days. That decision is final.

5. General Provisions
   a. Time Guidelines—The time frames set forth herein are guidelines. They may be extended by the Vice Provost or Provost, as applicable, in his or her discretion for good cause.
   b. Advisers—A student initiating or participating in a grievance under this procedure may be accompanied by an adviser in any discussion with the Vice Provost, the Provost or their designees, or a grievance or grievance appeal officer under this procedure; any adviser must be a current Stanford faculty, staff member or student.
   c. Ombuds—Students should be aware that the University Ombuds (http://www.stanford.edu/dept/ocr/ombuds/) and the School of Medicine’s Ombuds (http://www.med.stanford.edu/ombuds/) are available to discuss and advise on any matters of University concern and frequently help expedite resolution of such matters. Although they have no decision making authority, the Ombuds’ Offices have wide powers of inquiry.
   d. Sexual Harassment—For further information and resources concerning sexual harassment, students should refer to the web page of the Sexual Harassment Policy Office at http://harass.stanford.edu.
   e. No retaliation—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.

OWNERSHIP AND USE OF STANFORD NAME AND TRADEMARKS

Stanford registered marks, as well as other names, seals, logos, and other symbols and marks that are representative of Stanford, may be used solely with permission of Stanford University. Items offered for sale to the public bearing Stanford’s names and marks must be licensed. For complete text of the currently applicable policy, including the University officers authorized to grant permission to use the Stanford name and marks, see Administrative Guide Memo 15.5, Ownership and Use of Stanford Name and Trademarks at http://adminguide.stanford.edu/15.5.pdf.

COPYRIGHT

Copyright laws protect original works of authorship and give the owners of copyrights the exclusive right to do and to authorize others to do certain things in regard to a copyrighted work, including: make copies, distribute the work, display or perform the work publicly, and create derivative works. Copyright laws apply to nearly all forms of captured content, including traditional works like books, photographs, music, drama and sculpture. The laws also adapt to changes in technologies, and include in their scope modern forms of works like motion pictures, electronic media, software, multimedia works and some databases. Registration is not required to obtain a copyright, so if in doubt, assume a copyright applies.
NONACADEMIC REGULATIONS

UNLESS AN EXCEPTION TO THE COPYRIGHT OWNER'S EXCLUSIVE RIGHTS APPLIES, YOU MUST OBTAIN PERMISSION FROM THE COPYRIGHT OWNER TO COPY, DISTRIBUTE, DISPLAY OR PERFORM A COPYRIGHTED WORK IN ANY MEDIUM FOR ANY PURPOSE. BE ESPECIALLY MINDFUL OF COPYRIGHT PRINCIPLES WHEN USING THE INTERNET. JUST BECAUSE A WORK IS POSTED ON THE INTERNET DOES NOT MEAN THAT THE OWNER OF THE COPYRIGHT HAS GIVEN YOU PERMISSION TO USE IT. AND, YOU SHOULD NOT BE POSTING MATERIAL ONTO THE INTERNET WITHOUT COPYRIGHT CLEARANCE.

STANFORD HAS LICENSES WITH MANY PUBLISHERS, WHICH LICENSES PERMIT COPYING OF MATERIALS IN ACCORDANCE WITH THE EDUCATIONAL, RESEARCH OR ADMINISTRATIVE FUNCTIONS OF THE UNIVERSITY. IN ADDITION, THERE ARE FOUR MAJOR EXCEPTIONS TO THE COPYRIGHT OWNER'S EXCLUSIVE RIGHTS, WHICH PERMIT COPYING WITHOUT PERMISSION UNDER LIMITED CIRCUMSTANCES. THESE ARE: THE FAIR USE EXCEPTION, THE LIBRARY EXCEPTION, THE FACE-TO-FACE TEACHING EXCEPTION, AND THE DISTANCE-LEARNING EXCEPTION. FOR A MORE DETAILED EXPLANATION OF THESE EXCEPTIONS, THE COPYRIGHT LAWS AND STANFORD'S COPYRIGHT POLICIES, PLEASE REVIEW THE PROVOST'S COPYRIGHT REMINDER, HTTP://WWW.STANFORD.EDU/DEPT/UCOMM/PROVOST/COPYRIGHT REMINDER.HTML. IT IS EACH PERSON'S RESPONSIBILITY TO BE AWARE OF AND ABIDE BY COPYRIGHT LAW; VIOLATION MAY RESULT IN CIVIL OR CRIMINAL LIABILITY, AND CONSTITUTES GROUNDS FOR UNIVERSITY DISCIPLINE, UP TO AND INCLUDING DISCHARGE, DISMISSAL AND EXPULSION.

PEER-TO-PEER FILE SHARING

THE USE OF FILE-SHARING NETWORKS AND SOFTWARE TO DOWNLOAD AND SHARE COPYRIGHTED WORKS LIKE SOFTWARE, MUSIC, MOVIES, TELEVISION PROGRAMS, AND BOOKS CAN VIOLATE COPYRIGHT LAWS. BOTH THE PERSON WHO MAKES AN ILLEGAL COPY OF A COPYRIGHTED WORK AVAILABLE AND THE PERSON WHO RECEIVES OR DOWNLOADS AN ILLEGAL COPY HAVE VIOLATED THE LAW AND STANFORD POLICIES. UNDER THE DIGITAL MILLENNIUM COPYRIGHT ACT (DMCA), COPYRIGHT OWNERS ARE ENTITLED TO NOTIFY INTERNET SERVICE PROVIDERS, SUCH AS STANFORD, THAT IP ADDRESSES LINKED TO THE STANFORD NETWORK ARE SHARING COPIES OF MUSIC AND VIDEOS WITHOUT AUTHORIZATION. THE LAW REQUIRES THE UNIVERSITY TO RESPOND TO SUCH COMPLAINTS BY ELIMINATING ACCESS TO THE INFRINGING MATERIALS, AND MAY FURTHER REQUIRE STANFORD TO IDENTIFY STUDENTS, FACULTY, STAFF, OR OTHERS WHO HAVE VIOLATED COPYRIGHT LAWS. THE UNIVERSITY WILL TERMINATE ACCESS AND WILL PROVIDE INFORMATION AS REQUIRED BY LAW. FURTHERMORE, THE UNIVERSITY ALSO WILL SUSPEND OR TERMINATE COMPUTER ACCESS TO THE STANFORD NETWORK, INCLUDING TERMINATION OF THE SUNET ID, TO MEMBERS OF THE COMMUNITY WHO CONTINUE TO VIOLATE COPYRIGHT LAWS. FINALLY, THE UNIVERSITY WILL TAKE ACTION THROUGH THE STUDENT, EMPLOYEE, OR FACULTY DISCIPLINARY PROCESSES IF NECESSARY. FOR MORE INFORMATION ABOUT FILE-SHARING, PLEASE REFER TO RESIDENTIAL COMPUTING'S ONLINE RESOURCE, FILE-SHARING AND COPYRIGHT LAW AT HTTP://RESCOMP.STANFORD.EDU/INFO/DMCA/.

DOMESTIC PARTNERS

IN OCTOBER 1990, STANFORD UNIVERSITY ADOPTED A DOMESTIC PARTNERS POLICY. THIS POLICY, WHICH IMPLEMENTS THE UNIVERSITY'S NONDISCRIMINATION POLICY, MAKES SERVICES THAT HAVE HISTORICALLY BEEN AVAILABLE TO MARRIED STUDENTS AVAILABLE ON AN EQUAL BASIS TO STUDENTS WITH SAME-SEX OR OPPOSITE-SEX DOMESTIC PARTNERS. THESE SERVICES INCLUDE ACCESS TO STUDENT HOUSING, A COURTESY CARD THAT PROVIDES ACCESS TO UNIVERSITY FACILITIES, AND THE ABILITY TO PURCHASE MEDICAL CARE AT VALENCE HEALTH SERVICE. A DOMESTIC PARTNERSHIP IS DEFINED AS AN ESTABLISHED LONG-TERM PARTNERSHIP WITH AN EXCLUSIVE MUTUAL COMMITMENT IN WHICH THE PARTNERS SHARE THE NECESSITIES OF LIFE AND ONGOING RESPONSIBILITY FOR THEIR COMMON WELFARE.

SEXUAL HARASSMENT AND CONSENSUAL SEXUAL OR ROMANTIC RELATIONSHIPS

FOR THE COMPLETE TEXT OF THE CURRENTLY APPLICABLE VERSION OF THIS POLICY, SEE ADMINISTRATIVE GUIDE MEMO 23.2, SEXUAL HARASSMENT, HTTP://ADMINGUIDE.STANFORD.EDU/23_2.PDF. IT IS ALSO AVAILABLE FROM THE SEXUAL HARASSMENT POLICY OFFICE HOMEPAGE, HTTP://HARASS.STANFORD.EDU/.

SUMMARY

STANFORD UNIVERSITY STRIVES TO PROVIDE A PLACE OF WORK AND STUDY FREE OF SEXUAL HARASSMENT, INTIMIDATION OR EXPLOITATION. WHERE SEXUAL HARASSMENT IS FOUND TO HAVE OCCURRED, THE UNIVERSITY WILL ACT TO STOP THE HARASSMENT, PREVENT ITS RECURRENCE, AND DISCIPLINE AND/OR TAKE OTHER APPROPRIATE ACTION AGAINST THOSE RESPONSIBLE.

POLICY

THE FOLLOWING IS QUOTED FROM THE POLICY:

1. IN GENERAL
   a. APPLICABILITY AND SANCTIONS FOR POLICY VIOLATIONS—THIS POLICY APPLIES TO ALL STUDENTS, FACULTY AND STAFF OF STANFORD UNIVERSITY, AS WELL AS TO OTHERS WHO PARTICIPATE IN STANFORD PROGRAMS AND ACTIVITIES. ITS APPLICATION INCLUDES STANFORD PROGRAMS AND ACTIVITIES BOTH ON AND OFF-CAMPUS, INCLUDING OVERSEAS PROGRAMS. INDIVIDUALS WHO VIOLATE THIS POLICY ARE SUBJECT TO DISCIPLINE UP TO AND INCLUDING DISCHARGE, EXPULSION, AND/OR OTHER APPROPRIATE SANCTION OR ACTION.
   b. RESPECT FOR EACH OTHER—STANFORD UNIVERSITY STRIVES TO PROVIDE A PLACE OF WORK AND STUDY FREE OF SEXUAL HARASSMENT, INTIMIDATION OR EXPLOITATION. IT IS EXPECTED THAT STUDENTS, FACULTY, STAFF AND OTHER INDIVIDUALS COVERED BY THIS POLICY WILL TREAT ONE ANOTHER WITH RESPECT.
   c. PROMPT ATTENTION—REPORTS OF SEXUAL HARASSMENT ARE TAKEN SERIOUSLY AND WILL BE DEALT WITH PROMPTLY. THE SPECIFIC ACTION TAKEN IN ANY PARTICULAR CASE DEPENDS ON THE NATURE AND GRAVITY OF THE CONDUCT REPORTED, AND MAY INCLUDE INTERVENTION, MEDIATION, INVESTIGATION AND THE INITIATION OF DISCIPLINARY PROCESSES AS DISCUSSED MORE FULLY BELOW. WHERE SEXUAL HARASSMENT IS FOUND TO HAVE OCCURRED, THE UNIVERSITY WILL ACT TO STOP THE HARASSMENT, PREVENT ITS RECURRENCE, AND DISCIPLINE AND/OR TAKE OTHER APPROPRIATE ACTION AGAINST THOSE RESPONSIBLE.
   d. CONFIDENTIALITY—THE UNIVERSITY RECOGNIZES THAT CONFIDENTIALITY IS IMPORTANT. SEXUAL HARASSMENT ADVISERS AND OTHERS RESPONSIBLE TO IMPLEMENT THIS POLICY WILL RESPECT THE CONFIDENTIALITY AND PRIVACY OF INDIVIDUALS REPORTING OR ACCUSED OF SEXUAL HARASSMENT TO THE EXTENT REASONABLY POSSIBLE. EXAMPLES OF SITUATIONS WHERE CONFIDENTIALITY CANNOT BE MAINTAINED INCLUDE CIRCUMSTANCES WHEN THE UNIVERSITY IS REQUIRED BY LAW TO DISCLOSE INFORMATION (SUCH AS IN RESPONSE TO LEGAL PROCESS) AND WHEN DISCLOSURE IS REQUIRED BY THE UNIVERSITY’S OUTWEIGHING INTEREST IN PROTECTING THE RIGHTS OF OTHERS.
   e. PROTECTION AGAINST RETALIATION—RETALIATION AND/OR REPRISALS AGAINST AN INDIVIDUAL WHO IN GOOD FAITH REPORTS OR PROVIDES INFORMATION IN AN INVESTIGATION ABOUT BEHAVIOR THAT MAY VIOLATE THIS POLICY AGAINST THE LAW AND WILL NOT BE TOLERATED. INTENTIONALLY MAKING A FALSE REPORT OR PROVIDING FALSE INFORMATION, HOWEVER, IS GROUNDS FOR DISCIPLINE.
   f. RELATIONSHIP TO FREEDOM OF EXPRESSION—STANFORD UNIVERSITY IS COMMITTED TO THE PRINCIPLES OF FREE INQUIRY AND FREE EXPRESSION. VIGOROUS DISCUSSION AND DEBATE ARE FUNDAMENTAL TO THE UNIVERSITY, AND THIS POLICY IS NOT INTENDED TO STIFLE TEACHING METHODS OR FREEDOM OF EXPRESSION GENERALLY, NOR WILL IT BE PERMITTED TO DO SO. SEXUAL HARASSMENT, HOWEVER, IS NEITHER LEGALLY PROTECTED EXPRESSION NOR THE PROPER EXERCISE OF ACADEMIC FREEDOM; IT COMPROMISES THE INTEGRITY OF THE UNIVERSITY, ITS TRADITION OF INTELLECTUAL FREEDOM AND THE TRUST PLACED IN ITS MEMBERS.

2. WHAT IS SEXUAL HARASSMENT?

UNWELCOME SEXUAL ADVANCES, REQUESTS FOR SEXUAL FAVORS, AND OTHER VISUAL, VERBAL OR PHYSICAL CONDUCT OF A SEXUAL NATURE CONSTITUTE SEXUAL HARASSMENT WHEN:
   a. IT IS IMPLICITLY OR EXPLICITLY SUGGESTED THAT SUBMISSION TO OR REJECTION OF THE CONDUCT WILL BE A FACTOR IN ACADEMIC OR EMPLOYMENT DECISIONS OR EVALUATIONS, OR PERMISSION TO PARTICIPATE IN A UNIVERSITY ACTIVITY; OR
   b. THE CONDUCT HAS THE PURPOSE OR EFFECT OF UNREASONABLY INTERFERING WITH AN INDIVIDUAL’S ACADEMIC OR WORK PERFORMANCE OR CREATING AN INTIMIDATING OR HOSTILE ACADEMIC, WORK OR STUDENT LIVING ENVIRONMENT.

DETERMINING WHAT CONSTITUTES SEXUAL HARASSMENT DEPENDS UPON THE SPECIFIC FACTS AND THE CONTEXT IN WHICH THE CONDUCT OCCURS.
Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example,

- It may be conduct toward an individual of the opposite sex or the same sex.
- It may occur between peers or between individuals in a hierarchical relationship.
- It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.
- It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

3. What To Do About Sexual Harassment

Individuals seeking further information are directed to the following resources:

- The Sexual Harassment Policy Office (Main Quad, Bldg. 310, Room 104; (650) 723-1583 or 327-8259; email: harass@stanford.edu for information, consultation, advice, or to lodge a complaint. Note that anonymous inquiries can be made to the SHPO by phone during business hours.
- Any designated Sexual Harassment Adviser or resource person listed in 3.a or 5.a.

The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

a. Consultation—Consultation about sexual harassment is available from the Sexual Harassment Policy Office, Sexual Harassment Advisers (including residence deans), human resources officers, employee relations specialists, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons and others. A current list of Sexual Harassment Advisers is available from the Sexual Harassment Policy Office and at [http://harass.stanford.edu/index.html#Advisers](http://harass.stanford.edu/index.html#Advisers). Consultation is available for anyone who wants to discuss issues related to sexual harassment, whether or not “harassment” actually has occurred, and whether the person seeking information is a complainant, a person who believes his or her own actions may be the subject of criticism (even if unwarranted), or a third party.

Often there is a desire that a consultation be confidential or “off the record.” This can usually be achieved when individuals discuss concerns about sexual harassment without identifying the other persons involved, and sometimes even without identifying themselves. Confidential consultations about sexual harassment also may be available from persons who, by law, have special professional status, such as:
- Counselors at Counseling and Psychological Services (CAPS), [http://caps.stanford.edu](http://caps.stanford.edu)/
- Counselors at the Help Center, [http://www.stanford.edu/dept/helpcenter](http://www.stanford.edu/dept/helpcenter)/
- Chaplains at Memorial Church
- The University Ombudsperson, [http://www.stanford.edu/dept/oct/ombudsperson](http://www.stanford.edu/dept/oct/ombudsperson)/
- The Medical Center Ombudsperson, [http://www.med.stanford.edu/ombuds](http://www.med.stanford.edu/ombuds)/

In these latter cases, the level of confidentiality depends on what legal protections are held by the specific persons receiving the information and should be addressed with them before specific facts are disclosed. For more information see [http://harass.stanford.edu/Shisissues.html#CONRESOURCES](http://harass.stanford.edu/Shisissues.html#CONRESOURCES).

For further information on confidentiality, see Section 1(d) above.

b. Direct Communication—An individual may act on concerns about sexual harassment directly, by addressing the other party in person or writing a letter describing the unwelcome behavior and its effect and stating that the behavior must stop. A Sexual Harassment Adviser can help the individual plan what to say or write, and likewise can counsel persons who receive such communications. Reprisals against an individual who in good faith initiates such a communication violate this policy.

c. Third Party Intervention—Depending on the circumstances, third party intervention in the workplace, student residence or academic setting may be attempted. Third party intervenors may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University.

When third party intervention is used, typically the third party (or third parties) will meet privately with each of the persons involved, try to clarify their perceptions and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases.

Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assignments, substitution of one class for another, or other relief, where appropriate.

d. Formal Grievance, Appeal, and Disciplinary Processes—Grievance, appeal, or disciplinary processes may be pursued as applicable.

1. Grievances and Appeals—The applicable procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the individual’s submission of a written statement, a process of fact-finding or investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

If the identified University fact-finder or grievance officer has a conflict of interest, an alternate will be arranged, and the Director of the Sexual Harassment Policy Office or the Director of Employee and Labor Relations can help assure that this occurs.

In most cases, grievances and appeals must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance or appeal, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance or appeal.

A list of the established grievance and appeal procedures is located at [http://hrweb.stanford.edu/elr/policies/list_grievance_procedures.html](http://hrweb.stanford.edu/elr/policies/list_grievance_procedures.html). Copies may also be obtained from the Sexual Harassment Policy Office, [http://www.stanford.edu/group/SexHarass](http://www.stanford.edu/group/SexHarass/).

Copies of the following may be obtained from Employee and Labor Relations, 651 Serra Street:
- “Solving Workplace Problems at Stanford: Understanding the Staff Dispute Resolution Policy” (also at [http://hrweb.stanford.edu/forms/staffresolution.pdf](http://hrweb.stanford.edu/forms/staffresolution.pdf).)
- “Solving Workplace Problems at Stanford: Information for Academic Staff – Librarians and Academic Staff – Research Associates”
- “The Dispute Resolution Process (A User’s Guide)”

2. Disciplinary Procedures—In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement
4. Procedural Matters
   a. Investigations—If significant facts are contested, an investigation may be undertaken. The investigation will be conducted in a way that respects, to the extent possible, the privacy of all of the persons involved. In appropriate cases, professional investigators may be asked to assist in the investigation. The results of the investigation may be used in the third party intervention process or in a grievance or disciplinary action.
   b. Recordkeeping—The Sexual Harassment Policy Office will track reports of sexual harassment for statistical purposes and report at least annually to the University President concerning their number, nature and disposition.

The Sexual Harassment Policy Office may keep confidential records of reports of sexual harassment and the actions taken in response to those reports, and use them for purposes such as to identify individuals or departments likely to benefit from training so that training priorities can be established. No identifying information will be retained in cases where the individual accused was not informed that there was a complaint.

c. Indemnification and Costs—The question sometimes arises as to whether the University will defend and indemnify a Stanford employee accused of sexual harassment. California law provides, in part, “An employer shall indemnify its employee for all that the employee necessarily expends or loses in direct consequence of the discharge of his [or her] duties as such ….” The issue of indemnification depends on the facts and circumstances of each situation. Individuals who violate this policy, however, should be aware that they and/or their schools, institutes, or other units may be required to pay or contribute to any judgments, costs and expenses incurred as a result of behavior that is wrongful and/or contrary to the discharge of the employee’s duties. In general, see Administrative Guide Memo 15.7 (http://adminguide.stanford.edu/15.7.pdf).

5. Resources for Dealing with Sexual Harassment
   a. Advice—Persons who have concerns about sexual harassment should contact the Sexual Harassment Policy Office, any Sexual Harassment Adviser at http://harass.stanford.edu/index.html#Advisers or one of the other individuals listed below. Reports should be made as soon as possible: the earlier the report, the easier it is to investigate and take appropriate remedial action. When reports are long delayed, the University will try to act to the extent it is reasonable to do so, but it may be impossible to achieve a satisfactory result after much time has passed.

   Likewise, anyone who receives a report or a grievance involving sexual harassment should promptly consult with the Sexual Harassment Policy Office or with a Sexual Harassment Adviser.

   There are a number of individuals specially trained and charged with specific responsibilities in the area of sexual harassment. In brief, they are:
   • Sexual Harassment Advisers (http://harass.stanford.edu/index.html#Advisers) serve as resources to individuals who wish to discuss issues of sexual harassment, whether because they have been harassed or because they want information about the University’s policy and procedures. There is usually at least one Adviser assigned to each of the schools at the University and to each large work unit; most of the residence deans also have been appointed as Sexual Harassment Advisers. Advisers are also authorized to receive complaints.

   • The Director of the Sexual Harassment Policy Office is responsible for the implementation of this policy. The Director’s Office also provides advice and consultation to individuals when requested; receives complaints and coordinates their handling; supervises the other Advisers; encourages and assists prevention education for students, faculty and staff; keeps records showing the disposition of complaints; and generally coordinates matters arising under this policy. Because education and awareness are the best ways to prevent sexual harassment, developing awareness, education and training programs and publishing informational material are among the most important functions of the Sexual Harassment Policy Office (http://harass.stanford.edu).

   • As stated above, individuals with concerns about sexual harassment may also discuss their concerns informally with psychological counselors (for example through CAPS or the HELP Center), chaplains (through the Memorial Chapel), or University or Medical School ombudspersons. For more information, see http://harass.stanford.edu/Shissues.html#CONRESOURCES.

   b. External Reporting—Sexual harassment is prohibited by state and federal law. In addition to the internal resources described above, individuals may pursue complaints directly with the government agencies that deal with unlawful harassment and discrimination claims, e.g., the U.S. Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights (OCR) of the U.S. Department of Education, and the State of California Department of Fair Employment and Housing (DFEH). These agencies are listed in the Government section of the telephone book. A violation of this policy may exist even where the conduct in question does not violate the law.

6. Consensual Sexual or Romantic Relationships
   a. In General—There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions, and parties in such a relationship assume those risks. In the University context, such positions include (but are not limited to) teacher and student, supervisor and employee, senior faculty and junior faculty, mentor and trainee, adviser and advisee, teaching assistant and student, coach and athlete, and the individuals who supervise the day-to-day student living environment and student residents. Because of the potential for conflict of interest, exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

   Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint by third parties when that relationship gives undue access or advantage, restricts opportunities, or creates a perception of these problems. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to a romantic involvement, this past consent does not remove the risk of exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

   Where such a relationship exists, the person in the position of greater authority or power will bear the primary burden of accountability, and must ensure that he or she—and this is particularly important for teachers—does not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify his or her supervisor, department chair or dean, so that such chair, dean or supervisor can exercise his or her responsibility to evaluate the adequacy of the alternative supervisory or evaluative arrangements to be put in place. Staff members may notify their local human resources officers. To reiterate, the responsibility for recusal and
Students Affairs. Department chair, and students should contact the Vice Provost and Dean for more information on resources available to members of the Stanford Community:

RESOURCES

The following is a summary of resources concerning sexual harassment available to members of the Stanford Community:

A brochure containing the policy, a list of current sexual harassment advisers, confidential resources, and other helpful information is available online at http://harass.stanford.edu, and in printed form from the Sexual Harassment Policy Office at (650) 723-1583, Building 310, Main Quad, Room 104, MC: 2100. Copies of the University policy on sexual assault, which complements this sexual harassment policy, as well as all other documents mentioned in this section, are also available at the Sexual Harassment Policy Office.

All faculty, staff, and students who have questions regarding this policy and its enforcement can consult with a Sexual Harassment Adviser or be directed to the local Personnel Officer or Regional Human Resources Manager. Faculty members should contact their dean or department chair, and students should contact the Vice Provost and Dean of Student Affairs.

Sexual Harassment Policy Office—telephone: (650) 723-1583; email: Harass@stanford.edu.
Director: Laraine Zappert (Clinical Professor, Psychiatry and Behavioral Sciences)
Assistant Director: Nanette Andrews

SEXUAL ASSAULT

SUMMARY

The following summarizes the policy on Sexual Assault and provides information on resources available to members of the Stanford community.

Background—Stanford University’s policy and procedures on sexual harassment are published in Administrative Guide Memo 23.2 and are republished annually in the Stanford Bulletin and elsewhere. The University’s Policy on Sexual Assault supplements them, describing Stanford University’s policy and procedures specifically concerning sexual assault. That policy has been enacted by Stanford University in accordance with California State Law, Assembly Bill 3098, Postsecondary Education: Student Safety, July, 1990.

Definition—For the purposes of the policy, “sexual assault” includes, but is not limited to, rape, forced sodomy, forced oral copulation, rape by a foreign object, sexual battery, or threat of sexual assault.

Policy—Sexual assault by force or coercion, including deliberate coercion through the use of drugs or alcohol, is absolutely unacceptable at Stanford University. Any member of the Stanford community who commits sexual assault at or on the grounds of the University, or at any of the University’s off-campus facilities or activities, or at the facilities or activities of any affiliated student organization, will face maximal institutional sanctions, in addition to any prosecutions external authorities may undertake. Stanford University is committed to providing information on services, resources, and treatment available to victims of sexual assault.

Notification—With the consent of the victim, charges of sexual assault received by University offices or personnel shall be communicated promptly to the Department of Public Safety, 711 Serra Street, telephone 9-911 for emergency response or (650) 723-9633 during normal business hours, or, in the case of a student, to the sexual assault response team at Counseling and Psychological Services (CAPS) at Vaden Health Service, 866 Campus Drive, telephone 723-3785.

Legal Reporting Requirements—Health care professionals are expected to fulfill legally mandated reporting requirements.

Emergency Services Available to Victims—Victims of sexual assault are urged to seek immediate attention from emergency police, medical, and counseling services. On the Stanford campus and in the immediate vicinity, the following provide 24-hour response and will arrange for police assistance, medical assistance, emotional support services, and advocacy and support.

“911” Emergency Network: dial 9-911 from University phones or 911 from outside phones
Santa Clara Valley Medical Center, 751 South Bascom Avenue, San Jose, telephone (408) 885-5000
Mid-Peninsula Rape Crisis Center, 4161 Alma Street, Palo Alto, telephone (650) 493-RAPE (7273)
Sexual Assault Response Team (CSART), for students, at the Vaden Health Service, telephone (650) 723-3785
Stanford University Hospital, 300 Pasteur Drive, Stanford, telephone (650) 723-5111

Non-Emergency Resources—Additional resources for students are available at Vaden Health Service at (650) 723-3785, including short-term counseling, referral to long-term therapy, follow-up pregnancy testing, and testing and treatment for sexually transmitted diseases. Additional services for faculty and staff are available at the University’s HELP Center, Galvez House (723-4577), including general counseling, information, support, and referral. The University ombudsperson (723-3682) is available to all in the Stanford community for general counseling, advice, and advocacy.

Ongoing Case Management Procedures—Both informal procedures and formal grievance procedures for case management of sexual assault charges are given in the University’s policy on Sexual Harassment appearing as Administrative Guide Memo 23.2 and published annually in the Stanford Bulletin. Victims are to be kept informed by those responsible for those procedures of the status of any disciplinary proceedings and the results of any disciplinary action or appeal, providing that the victim agrees in advance, in writing, to treat this information as confidential. The offices of the Dean of Students are available to help student victims deal with academic difficulties that may arise because of the victimization and its impact.

Information Requests and Confidentiality—The University offices responding to charges of sexual assault have established protocols for protecting confidentiality and for handling inquiries from the press, concerned students, and parents.

Information about Options—The University offices responding to charges of sexual assault will inform victims, at a minimum, of the options of: criminal prosecution, civil prosecution, the disciplinary process, the appropriate grievance procedure, the availability of mediation, alternative housing assignments, and academic assistance alternatives.
POLITICAL ACTIVITIES

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 15.1, Political Activities, available at http://adminguide.stanford.edu/15_1.pdf.

SUMMARY

The following summarizes the policy on Political Activities:

Stanford University, as a charitable entity, is subject to federal, state, and local laws and regulations regarding political activities: campaign activities, lobbying, and the giving of gifts to public officials.

While all members of the University community are naturally free to express their political opinions and engage in political activities to whatever extent they wish, it is very important that they do so only in their individual capacities and avoid even the appearance that they are speaking or acting for the University in political matters.

In the limited circumstances where individuals must speak or act on behalf of the University in the political arena, they must do so in accordance with the provisions of this Guide Memo.

POLICY

The following is quoted from the policy:

1. Summary of Legal Requirements and Restrictions
   a. Campaign Activities: contributions of money, goods, or services to candidates for political office and in support of or opposition to ballot measure campaigns are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of disclosure rules. Because of the University’s tax-exempt status, the University is legally prohibited from endorsing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.
   b. Lobbying: lobbying can generally be described as any attempt to influence the action of any legislative body (for example, Congress, state legislatures, county boards, city councils, and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels but can differ widely in scope, depending on the jurisdiction. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and officers in the executive branch (for example, lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually some threshold of time or money spent on lobbying that triggers registration and reporting requirements. Regardless of thresholds, however, no University employee—other than the following individuals, on matters under their jurisdiction—may lobby on behalf of the University without specific authorization:

   President
   Provost
   Deans of the Seven Schools
   Vice Provost and Dean of Research
   Vice President for Business Affairs and Chief Financial Officer
   Vice President for Faculty and Staff Services
   Director of the Stanford Linear Accelerator Center
   Director of the Hoover Institution
   General Counsel
   Director of Government and Community Relations

   The Vice Provost and Dean of Research may grant permission to faculty members to lobby on behalf of the University for specific purposes. The Director of Government and Community Relations may grant permission to staff members to lobby on behalf of the University for specific purposes. All lobbying on behalf of the University should be coordinated with the Director of Government and Community Relations.

   c. Giving of Gifts to Public Officials and Staff: almost all jurisdictions have strict rules on the extent to which gifts and honoraria may be given to public officials (both elected and non-elected officials and, often, staff). In some cases gifts and honoraria are prohibited; in others they are limited; and in most cases they are subject to detailed disclosure. In addition, in some jurisdictions such as California, gifts to both state and local public officials can result in a public official’s disqualification from participation in any governmental action affecting the interests of the donor. Meals, travel, and entertainment are the most common types of gifts, but gift rules can also apply in cases where public officials attend a reception or receive tickets to sporting or other events.

   As a non-profit organization, the University generally does not give gifts to public officials and, in those limited cases where it does give such gifts, it must do so in accordance with all applicable laws and regulations. Therefore, any University employee who, on behalf of the University, wishes to make a gift to a public official must receive prior approval from the Director of Government and Community Relations before making such a gift.

   d. Reporting of Political Activities: the University must report most of its political activities above certain thresholds. Therefore, any University employee engaging in such activities on behalf of the University should carefully review the remainder of this Guide Memo and should discuss the relevant activities in advance with the Director of Government and Community Relations.

2. Prohibited and Restricted Political Activities
   a. In General:

   1. No person may, on behalf of the University, engage in any political activity in support of or opposition to any candidate for elective public office (including giving or receiving funds or endorsements), nor shall any University resources be used for such purpose.
   2. No person may, on behalf of the University, lobby (or use University resources to lobby) any federal, state, or local legislative or administrative official or staff member unless specifically authorized to do so. Any lobbying activity, even when authorized, must be conducted in compliance with this Guide Memo, other applicable University policies, and applicable law.
   3. No person may, on behalf of the University, give a gift (or use any University resources to give a gift) to any federal, state, or local official or staff member, except in compliance with this Guide Memo, other applicable University policies, and applicable law.
   4. No person supporting candidates for public office or engaging in other political activities may use University space or facilities or receive University support, except in the limited ways described in section 3A, below.
   5. No person may use for lobbying activities federally-funded contract or grant money received by the University.

   Even the foregoing activities that are only restricted, rather than prohibited, may be subject to limitations imposed by law. Therefore, any person engaging in the activity, or contemplating doing so, should consult with the Director of Government and Community Relations.

   b. Guidelines for Avoiding Prohibited Partisan Political Activities: the following guidelines should assist in preventing the involvement or apparent involvement of the University in political activities in support of or opposition to any candidate for elective public office, that is, partisan political activities. Except in the limited circumstances set forth in section 3b., below:

   1. Use of Name and Seal: neither the name nor seal of the University or of any of its schools, departments, or institutions should be used on letters or other materials intended for partisan political purposes.
2. Use of Address and Telephones: no University office should be used as a return mailing address for partisan political mailings, and telephone service that is paid by the University, likewise, should not be used for partisan political purposes. (Obviously, a student’s dormitory room and telephone service that are personal to the student may be used for these purposes.)

3. Use of Title: the University title of a faculty or staff member or other person should be used only for identification and should be accompanied by a statement that the person is speaking as an individual and not as a representative of the University.

4. Use of Services and Equipment: University services, such as Interdepartmental Mail; equipment, such as duplicating machines, computers, and telephones; and supplies should not be used for partisan political purposes.

5. Use of Personnel: no University employee may, as part of his or her job, be requested to perform tasks in any way related to partisan political purposes.

3. Permissible Activities

a. In General: as noted above, the federal, state, and local laws which limit the partisan political activities that can take place in University facilities and with University support in no way inhibit the expression of personal political views by any individual in the University community. Nor do they forbid faculty, students, or staff from joining with others in support of candidates for office or in furtherance of political causes. There is no restriction on discussion of political issues or teaching of political techniques. Academic endeavors which address public policy issues are in no way affected.

Because the University encourages freedom of expression, political activities which do not reasonably imply University involvement or identification may be undertaken so long as regular University procedures are followed for use of facilities. Examples of permissible activities are:

1. Use of areas, such as White Plaza, for tables, speeches, and similar activities.

2. Use of auditoriums for speeches by political candidates, but subject to rules of the Internal Revenue Service, the Federal Election Commission, and the California Fair Political Practices Commission, and other applicable laws. Arrangements must be made with University Events and Services. (See also Guide Memo 82.1, Public Events, for more information.)

To reiterate, because tax and political compliance laws impose restrictions, and even prohibitions, on certain political activities and on the use of buildings and equipment at a non-profit institution such as the University, any such activities must be in compliance with these legal requirements. Individuals taking political positions for themselves or groups with which they are associated, but not as representatives of the University, should clearly indicate, by words and actions, that their positions are not those of the University and are not being taken in an official capacity on behalf of the University.

b. Limited University Political Activities: limited activities relating to specific federal, state, or local legislation or ballot initiatives are permissible where (1) the subject matter is directly related to core interests of the University’s activities; (2) the President has determined that the University should take a position; and (3) the individuals who speak or write on the University’s behalf are specifically authorized to do so.

4. Responsibility for Interpretation: the Director of Government and Community Relations, in consultation with the General Counsel, is the administrative officer responsible for interpretation and application of the above guidelines. Questions on whether planned student activities are consistent with the University’s obligations should be directed to the Dean of Students, who will consult with the Director of Government and Community Relations and/or the General Counsel. All other questions on whether planned activities are consistent with the University’s obligations should be addressed directly to the Director of Government and Community Relations or the General Counsel.

CAMPUS DISRUPTIONS

The University’s policy on campus disruption applies to students, faculty, and staff. It is published in its complete form on the Judicial Affairs Office web site at http://www.stanford.edu/dept/vpsa/judicial-affairs/index.html.

POLICY

The following is quoted from the policy:

Because the rights of free speech and peaceable assembly are fundamental to the democratic process, Stanford firmly supports the rights of all members of the University community to express their views or to protest against actions and opinions with which they disagree.

All members of the University also share a concurrent obligation to maintain on the campus an atmosphere conducive to scholarly pursuits, to preserve the dignity and seriousness of University ceremonies and public exercises, and to respect the rights of all individuals.

The following regulations are intended to reconcile these objectives.

It is a violation of University policy for a member of the faculty, staff, or student body to:

1. prevent or disrupt the effective carrying out of a University function or approved activity, such as lectures, meetings, interviews, ceremonies, the conduct of University business in a University office, and public events.

2. obstruct the legitimate movement of any person about the campus or in any University building or facility.

Members of the faculty, staff, and student body have an obligation to leave a University building or facility when asked to do so in the furtherance of the above regulations by a member of the University community acting in an official role and identifying himself or herself as such; members of the faculty, staff, or student body also have an obligation to identify themselves when requested to do so by such a member of the University community who has reasonable grounds to believe that the person(s) has violated section (1) or (2) of this policy and who has so informed the person(s).

APPLICATION

The following are examples to illustrate the policy:

The policy has been applied to the following actions: refusal to leave a building which has been declared closed; obstructing the passage into or out of buildings by sitting in front of doorways; preventing University employees from entering their workplace; preventing members of a class from hearing a lecture or taking an examination, or preventing the instructor from giving a lecture, by means of shouts, interruptions, or chants; preventing others from hearing a scheduled speaker by means of shouts, interruptions, or chants; refusing to leave a closed meeting when unauthorized to attend; and intruding upon or refusing to leave a private interview.

It should be understood that while the above are examples of extraordinary disruptive behavior, the application of the policy also takes situational factors into consideration. Thus, for example, conduct appropriate at a political rally might constitute a violation of the Policy on Campus Disruption if it occurred within a classroom.

There is no “ordinary” penalty which attaches to violations of the Policy on Campus Disruption. Each case is fact-specific; considerations would include: the gravity of the offense, and prior similar misconduct. As a general rule, the more serious the offense, the less it matters that the violation had otherwise not done wrong.
USE OF THE MAIN QUADRANGLE AND MEMORIAL COURT

POLICY
The following is quoted from the policy:

The Main Quadrangle and Memorial Court are part of Stanford University’s academic preserve due to their locations at the heart of the campus. To protect and enhance their historic status, University policy limits activities primarily to established or traditional ceremonies and events. Unscheduled events or activities are prohibited.

Requests for waivers to this policy must be submitted in writing to the Director of Public Events. Exceptions may be granted only in extraordinary cases.

RESOURCES
The following is a summary of resources available:
For instructions on use of the Main Quadrangle/Memorial Court, contact the Director of University Public Events at (650) 723-2551, http://stanfordevents.stanford.edu/. Note that other venues on campus (such as White Plaza) are made available for events other than scheduled “established or traditional ceremonies and events” including those that may involve amplified sound. For further information on the use of such other venues, contact the Office of Student Activities at (650) 723-2733, http://www.stanford.edu/dept/OSA/.

NOISE AND AMPLIFIED SOUND

POLICY
The following is quoted from the policy:

Stanford is not only an academic institution but a residential community as well. It is the responsibility of all faculty, students, and staff to moderate noise especially during an event or activity held on campus. Supporting the mission of the University and respecting those who are studying, researching, or otherwise carrying out academic-related activities is a Stanford priority. The campus must require a conducive atmosphere to ensure these endeavors are accomplished and supported. Disturbing noise in or around a residence or other campus buildings which infringe on the rights of other residents or members of the University community is considered a violation of this policy. As part of the event planning process, the event sponsor must obtain all appropriate approvals regarding the use of amplified sound during an event or activity.

RESOURCES
Information regarding whether and how the use of amplified sound is permitted is available from the following sources, which must be consulted for prior approval:

b. Registrar’s Scheduling Office: phone (650) 723-6755, or see http://registrar.stanford.edu/event/
c. The Stanford Events Office: phone (650) 723-2551, or see http://stanfordevents.stanford.edu/

PROHIBITION OF THE POSSESSION OF DANGEROUS WEAPONS ON CAMPUS

The University’s policy prohibiting weapons on campus is published in its complete form on the Judicial Affairs Office web site http://stanford.edu/dept/vpsa/judicialaffairs/index.html.

POLICY
The following is quoted from the policy:

Except for authorized academic purposes, the knowing possession by any student on any Stanford campus of the following is prohibited: firearms, explosives, or any instrument or weapon of the kind commonly known as blackjack, slingshot, billy club, sandclub, sandbag, or metal knuckles.

Notwithstanding the paragraph above, a student who is a resident of a Stanford campus may store a weapon on such campus if both of the following conditions are met:
1. The student has complied with all state and federal regulations regarding the use and possession of said weapon, or, in the case of a foreign campus, with the laws of the country in which the campus is located.
2. The student stores such weapons with the Stanford Department of Public Safety (SDPS) or, in the case of a foreign campus, in a facility provided by the director of such campus.

Students may remove their weapons from storage only in accordance with regulations established by the SDPS or by the director of the foreign campus at which the weapon is stored. A student who is a resident of a Stanford campus may bring any of the above weapons on campus for purposes of storage only if the student has previously notified the SDPS of the intention to do so, but in no event more than six hours after arrival on the campus. When the student removes the weapon from storage, it must be taken off campus as soon as is practicable, but in no event more than one hour after such removal.

The term “Stanford campus” shall include all the lands and facilities of Leland Stanford Junior University, whether owned or leased, and whether located in the United States or abroad.

CONTROLLED SUBSTANCES AND ALCOHOL

SUMMARY
The following material summarizes the policy on Controlled Substances and Alcohol.

Student conduct is guided by the Fundamental Standard. Implicit in the Standard is the understanding that students are responsible for making their own decisions and accepting the consequences of those decisions.

In order to make informed decisions about alcohol and other drug use, students should educate themselves about the health and safety risks associated with their use, as well as about state and local laws on possessing, serving, and consuming alcohol. It is widely recognized that the misuse and abuse of drugs (“controlled substances”) and the abuse of alcohol are major contributors to serious health problems, as well as to social and civic concerns. Among the health risks associated with the use of illicit drugs and the abuse of alcohol are various deleterious physical and mental consequences including dependency, severe disability, even death. Information concerning the known effects of alcohol and specific drugs is available from the Alcohol and Other Drug Abuse Prevention Program at Vaden Student Health Service.

The goal of this University’s policy is to reduce the abuse and illegal use of alcohol and other drugs, and the human and material costs associated with it. The University, as an educational institution, approaches student conduct issues from a perspective that places emphasis on individual responsibility and development. Education about and prevention of alcohol and other drug-related problems will continue to be the primary emphasis and goal. However, the University expects students, as individuals and as members of groups, to conduct themselves in accordance with this and all other University policies governing student conduct.

* Controlled substances are those defined in 21 U.S.C. 812; they include, but are not limited to, such substances as marijuana, heroin, cocaine, and amphetamines.

POLICY
The following is quoted from the policy:

It is the policy of the University to maintain a drug-free workplace and campus. The unlawful manufacture, distribution, dispensation, possession, and/or use of controlled substances or the unlawful possession, use, or distribution of alcohol is prohibited on the Stanford campus, in
CRIMINAL LIABILITY

Stanford University is not a sanctuary from the enforcement of state and local laws. Students and others on campus who violate the law may be and have been arrested and prosecuted. Primary responsibility for law enforcement, including that related to alcohol, rests with law enforcement agencies, primarily the Stanford University Department of Public Safety. Uniformed officers who patrol the campus and respond to calls are deputized by the Sheriff of Santa Clara County and are fully empowered and authorized to stop vehicles, make arrests, and enforce all laws. Laws are subject to change; consequently, the following information is illustrative but must not be relied on as a complete and current citing of relevant laws. More information is available at the Stanford Department of Public Safety, 711 Serra Street.

Generally, it is a criminal offense:

1. To provide any alcoholic beverage to a person under 21.
2. To provide any alcoholic beverage to an obviously intoxicated person.
3. For any person under age 21 to purchase alcohol.
4. To be under the influence of alcohol or another drug in a public place and unable to exercise care for one’s own safety or that of others.
5. For persons under 21 to possess alcohol in any public place or any place open to the public (for example, public places in student residences).
6. To operate a motor vehicle while under the influence of alcohol or any other drug. Presumed to be driving under the influence (DUI) with a blood alcohol level (BAL) of 0.08% or higher.
7. To ride a bicycle while under the influence of alcohol, drugs, or both.
8. To have an open container of alcohol in a motor vehicle; and, for persons under 21 to drive a vehicle carrying alcohol or to possess alcohol while in a motor vehicle.
9. To have in one’s possession, or to use, false evidence of age and identity to purchase alcohol.
10. To possess an open container of alcohol in a public place or any place open to the public. Applies in Palo Alto jurisdiction.
11. To be in possession of an unregistered keg. All kegs sold must be registered at the time of purchase. Identification tags must be placed on all kegs in order to allow kegs to be traced if the contents are used in violation of the law.

WHERE TO GET HELP

In the event of a life threatening emergencies call 9-911 from on-campus and 911 from off-campus.

Campus Resources—(Area Code 650) Counseling and Psychological Services, 24 hours (723-3785); The Alcohol and Other Drug Abuse Prevention Program (723-3429); Stanford Alcohol and Drug Treatment Program (723-6682); Vaden Health Service’s Medical Advice Line, 24 hours (723-4841); The Bridge, 24-hour Peer Counseling (723-3392).

The Alcohol and Other Drug Abuse Prevention Program at Vaden Health Service: provides information and referral, educational trainings and workshops, and non-clinical consultations for groups and individuals. The program utilizes a harm reduction approach to prevent problems associated with the use of alcohol, tobacco, and other drugs (723-3429).

The Office of Student Activities at Tresidder Memorial Union: provides workshops and training, publications, and party planning consultations. Web site: http://www-lerland.stanford.edu/dept/OSA/party/ (723-2733).

Community Resources—Alcoholics Anonymous (650) 592-2364, Alanon (650) 873-2356 or (408) 379-1051.

HAZING POLICY

Hazing, as defined by California Education Code sections 32050 and 32051, is not permitted at Stanford University. No individual, recognized student organization, club, team, or any other Stanford-affiliated student group shall plan, engage in, or condone hazing activities, on or off the Stanford campus.
DEFINITION OF HAZING

Education Code section 32050 states: “... ‘hazing’ includes any method of initiation or preinitiation into a student organization or any Pastime or amusement engaged in with respect to such an organization which causes, or is likely to cause, bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm, to any student or other person attending any ... college, university, or other education institution in this state; but the term ‘hazing’ does not include customary athletic events or other similar contests or competitions.”

Education Code section 32051 states: “No student, or other person in attendance at any ... private ... educational institution, shall conspire to engage in hazing, participate in hazing, or commit any act that causes or is likely to cause bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm to any fellow student or person attending the institution. The violation of this section is a misdemeanor, punishable by a fine of not less than one hundred dollars ($100), nor more than five thousand dollars ($5,000), or imprisonment in the county jail for not more than one year, or both.”

CONSEQUENCES OF A VIOLATION

Stanford University expects its students to conduct themselves in socially responsible and respectful ways. Thus, participation in hazing, either as an individual or as part of any student group, may result in disciplinary action up to and including expulsion, permanent loss of organizational recognition, or loss of eligibility to remain a member of any club, team, or other Stanford-affiliated student group. Consent, implied or expressed, is not a defense to any complaint or charge alleging a hazing violation.

One or more of the following may take institutional disciplinary action: the Organizational Conduct Board; Judicial Affairs; or another University office, such as the Vice Provost for Student Affairs. Institutional action may proceed whether or not a police investigation is undertaken or a criminal charge for hazing is filed by the District Attorney’s Office.

APPLICATIONS

Stanford’s hazing policy is not intended to prohibit student recruitment or new (or continuing) member activities that are positive and educational in nature, designed to instill a group ethos or unity. Its intent is to deter those behaviors that cause or are likely to cause harm to another student.

Some examples of hazing activities or events may be found online at http://osa.stanford.edu/publications/ (See sections on hazing in the 2004-05 Student Organization Handbook (http://osa.stanford.edu/publications/soh/) or the Greek Guide (http://osa.stanford.edu/greek/). Questions should be directed to the Office of Student Activities, (650) 723-2733.

SMOKE-FREE ENVIRONMENT

Applicability—This policy applies to all academic and administrative units of Stanford University, including SLAC, and all campus student housing. This policy does not supersede more restrictive policies which may be in force in compliance with federal, state, or local laws or ordinances.

POLICY

The following is quoted from the policy:

1. Policy

It is the policy of Stanford University that the smoking of tobacco products in enclosed buildings and facilities and during indoor or outdoor events (and the selling of tobacco products) on the campus is prohibited.

2. Guidelines

a. Smoking-Prohibited Areas—Specifically, smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in

covered walkways, in University vehicles, during indoor and outdoor athletic events, and during other University sponsored or designated indoor or outdoor events.

b. “Smoking Prohibited” signs will be posted.

c. No commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus without the University’s permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violaters of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.

UNIVERSITY STATEMENT ON PRIVACY

Stanford University has an interest in ensuring that the privacy of its students, faculty, and staff is respected, and that no activities interfere with education, research, or residential life.

The University is private property; however, some areas of the campus typically are open to visitors. These areas include White Plaza, public eating areas (such as those at Tresidder Union), outdoor touring areas, and locations to which the public has been invited by advertised notice (such as for public educational, cultural, or athletic events). Even in these locations, visitors must not interfere with the privacy of students, faculty, and staff, or with educational, research, and residential activities. The University may revoke at any time permission to be present in these, or any other areas. Visitors should not be in academic or residential areas unless they have been invited for appropriate business or social purposes by the responsible faculty member, student, or staff member.

No commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus without the University’s permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violaters of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.
COMPUTER AND NETWORK USAGE

POLICY

The following is quoted from the policy:

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources. This policy provides guidelines for the appropriate and inappropriate use of information technologies.

SUMMARY

The following summarizes the policy on Computer and Network Usage:

In particular, the policy provides that users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain unauthorized access, and respect the rights of other computer users.

This policy covers appropriate use of computers, networks, and information contained therein. As to political, personal and commercial use, the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state, and local laws regarding sources of income, political activities, use of property, and similar matters. It also is a contractor with government and other entities, and thus must assure proper use of property under its control and allocation of overhead and similar costs. For these reasons, University information resources must not be used for partisan political activities where prohibited by federal, state, or other applicable laws, and may be used for other political activities only when in compliance with federal, state, and other laws, and in compliance with applicable University policies. Similarly, information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner. In addition, University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations, and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are reminded that the .edu domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the .edu domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

The University’s Information Security Officer is authorized in certain limited circumstances to inspect or monitor private data (including email), such as when there is a reasonable cause to suspect improper use of computer or network resources.

For further information on the topic of peer-to-peer file sharing, see the section above on Copyright.

CHAT ROOMS AND OTHER FORUMS USING STANFORD DOMAINS OR COMPUTER SERVICES

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 66, Chat Rooms and Other Forums Using Stanford Domains or Computer Services, available at http://adminguide.stanford.edu/66.pdf.

POLICY

The following is quoted from the policy:

1. Definition

From time to time, University departments, faculty, students and others may host electronic communication forums, such as chat rooms, newsgroups, bulletin boards, or web sites, whereby various parties may contribute their thoughts on various subjects and where such communication is made available for others to read and comment upon. For purposes of this policy, these sites are collectively referred to as forums.

2. Establishment of Forums

   a. Connection with University Activities—Forums that either use the Stanford.edu, Stanford.org, or other Stanford domains, or use University computing facilities, should be established only in connection with legitimate activities of the University.

   b. University Role—Unless specifically sponsored by an academic administrative unit of the University, the University’s role in connection with these forums will be solely as a passive Internet service provider.

   c. Terms of Use—In all cases, as a condition to establishing a forum, forum homepages (where they exist) and each individual forum page should contain a header that states: Subject to Terms of Use and all pages should include a link to the page maintained by the University entitled “Terms of Use.” The URL is http://www.stanford.edu/home/atoz/terms.html.

3. Operation of Forums

   All forums shall be operated in compliance with the Terms of Use, as modified from time to time, and the University’s various policies regarding computer facilities and services.
