ACCREDITATION

Stanford University is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; (510) 748-9001. In addition, certain programs of the University have specialized accreditation. For information, contact the Office of the University Registrar.

NONDISCRIMINATION POLICY

Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, it prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, gender identity, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs. The following person has been designated to handle inquiries regarding this policy: the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email).

ADDITIONAL INFORMATION

Additional information on Stanford University can be obtained through Stanford’s web site at http://stanford.edu.

Every effort is made to ensure that the course information, applicable policies, and other materials contained in this bulletin are accurate and current. The University reserves the right to make changes at any time without prior notice. The Bulletin in the form as it exists online is therefore the governing document, and contains the then currently applicable policies and information.

The Stanford Bulletin is an online publication of the Office of the University Registrar, 630 Serra Street, Suite 120, Stanford University, Stanford, California 94305-6032

Students with questions or issues should contact the Student Services Center or file a help ticket with Stanford’s HelpSU system. Alumni, staff, or the general public may also file a help ticket to request the Registrar’s Office assistance or to ask for information.

The Bulletin is available online at http://bulletin.stanford.edu. Courses of instruction and scheduled classes are available at http://explorecourses.stanford.edu. A non-official pdf of the Bulletin is available for download at the Bulletin web site; this pdf is produced once in August and is not updated to reflect corrections or changes made during the academic year.

Telephone number for all University departments: Area code: (650) 723-2300
ACADEMIC CALENDAR 2009-10

This calendar is also available at the University Registrar’s web site: http://registrar.stanford.edu/academic_calendar.

AUTUMN QUARTER

August
1 (Sat) Axess opens for course enrollment
27 (Thu) M.D. students, first day of instruction

September
11 (Fri, 5:00 p.m.) Course enrollment deadline to receive stipend or refund check on first day of term
15 (Tue) New undergraduates arrive; Convocation
21 (Mon) First day of quarter; instruction begins; last day to file Leave of Absence; last day to receive full refund for Autumn Quarter
21 (Mon, 5:00 p.m.) Preliminary Study List deadline. Students must be "at status"; i.e., students must have a study list with sufficient units to meet requirements for their status, whether full-time, 8-9-10 units (graduate students only), or approved Special Registration Status.
21 (Mon, 5:00 p.m.) Deadline to submit Leave of Absence for full refund. A full refund schedule is available here.
24 (Thu) Conferral of degrees, Summer Quarter
28 (Mon) Yom Kippur (classes held: some students will be observing Yom Kippur and are not expected to attend classes; some faculty will not be holding classes).

October
9 (Fri, 5:00 p.m.) Final Study List deadline. Last day to add or drop a class; last day to adjust units on a variable-unit course. Students may withdraw from a course until the Course Withdrawal deadline and a "W" notation will appear on the transcript.

November
9 (Mon, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund. A full refund schedule is available here
13 (Fri, 5:00 p.m.) Change of grading basis deadline; course withdrawal deadline; application deadline for Autumn Quarter degree conferral
23-27 (Mon-Fri) Thanksgiving recess (holiday, no classes)
30-Dec 6 (Mon-Sun) End quarter period

December
4 (Fri) Last day of classes (unless class meets on Sat.); last opportunity to arrange incomplete in a course, at last class; (noon) University thesis, D.M.A. final project, or Ph.D. dissertation, last day to submit; (5:00 p.m.) late application deadline for Autumn Quarter degree conferral ($50 fee).
7-11 (Mon-Fri) End quarter examinations
15 (Tue) Grades due at 11:59 p.m.

WINTER QUARTER

October
25 (Sun) Axess opens for course enrollment

December
11 (Fri) Course enrollment deadline to receive stipend or refund check on first day of term

January
4 (Mon) First day of quarter, instruction begins; (5:00 p.m.) Preliminary Study List deadline -- Students must be "at status"; i.e., students must have a study list with sufficient units to meet requirements for their status, whether full-time, 8-9-10 units (graduate students only), or approved Special Registration Status; (5:00 p.m.) Deadline to submit Leave of Absence for full refund.
7 (Thu) Conferral of degrees, Autumn Quarter
18 (Mon) Martin Luther King, Jr., Day (holiday, no classes)
22 (Fri, 5:00 p.m.) Final Study List deadline Final day to add or drop a class; last day to adjust units on a variable-unit course. Students may withdraw from a course until the Course Withdrawal deadline and a "W" notation will appear on the transcript.

February
15 (Mon) Presidents’ Day (holiday, no classes; Law and GSB do hold classes).
18 (Thu, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund.
26 (Fri, 5:00 p.m.) Change of grading basis deadline; course withdrawal deadline; application deadline for Winter Quarter degree conferral.

March
8-14 (Mon-Sun) End quarter period
12 (Fri) Last day of classes (unless class meets on Sat.); last opportunity to arrange Incomplete in a course, at last class; (noon) University thesis, D.M.A. final project, Ph.D. dissertation, last day to submit; (5:00 p.m.) late application deadline for Winter Quarter degree conferral ($50 fee).
15-19 (Mon-Fri) End-Quarter examinations
23 (Tue) Grades due at 11:59 p.m.
## SPRING QUARTER

February
7 (Sun) Axess opens for course enrollment

March
19 (Fri) Course enrollment deadline to receive stipend or refund check on first day of term
29 (Mon) First day of quarter; instruction begins; (5:00 p.m.) Preliminary Study List deadline -- Students must be "at status"; i.e., students must have a study list with sufficient units to meet requirements for their status, whether full-time, 8-9-10 units (graduate students only), or approved Special Registration Status; deadline to submit Leave of Absence for full refund. A full refund schedule is available here

April
1 (Thu) Conferral of degrees, Winter Quarter.
9 (Fri, 5:00 p.m.) Application deadline for Spring Quarter degree conferral.
16 (Fri, 5:00 p.m.) Final Study List deadline -- Last day to add or drop a class; last day to adjust units on a variable-unit course. Students may withdraw from a course until the Course Withdrawal deadline and a "W" notation will appear on the transcript.

May
12 (Wed, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund.
21 (Fri, 5:00 p.m.) Change of grading basis deadline; course withdrawal deadline.
28-June 3 (Thu-Wed) End-Quarter Period.
31 (Mon) Memorial Day (holiday, no classes)

June
2 (Wed) Last day of classes; last opportunity to arrange incomplete in a course, at last class; (noon) University thesis, D.M.A. final project, or Ph.D. dissertation, last day to submit; (5:00 p.m.) late application deadline for Spring Quarter degree conferral ($50 fee).
3 (Thu) Day before finals, no classes.
4-9 (Fri-Wed) End-Quarter examinations
10 (Thu) Grades for graduating students due at noon
12 (Sat) Senior Class Day; Baccalaureate Saturday
13 (Sun) Commencement
15 (Tue) Grades for non-graduating students due 11:59 p.m.

## SUMMER QUARTER

April
11 (Sun) Axess opens for course enrollment

June
11 (Fri) Course enrollment deadline to receive stipend or refund check on first day of term.
21 (Mon) First day of quarter; instruction begins; (5:00 p.m.) Preliminary Study List deadline; deadline to submit Leave of Absence for full refund.

July
2 (Fri, 5:00 p.m.) Final Study List deadline -- Final day to add or drop a class; last day to adjust units on a variable-unit course. Students may withdraw from a course until the Course Withdrawal deadline and a "W" notation will appear on the transcript.
5 (Mon) Independence Day observed (holiday, no classes)
23 (Fri, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund.
30 (Fri, 5:00 p.m.) Change of grading basis deadline; course withdrawal deadline; application deadline for Summer Quarter degree conferral.

August
7-12 (Sat-Thu) End-Quarter Period.
12 (Thu) Last day of classes; last opportunity to arrange Incomplete in a course, at last class; (noon) University thesis, D.M.A. final project, or Ph.D. dissertation, last day to submit; (5:00 p.m.) late application deadline for Summer Quarter degree conferral ($50 fee).
13-14 (Fri-Sat) End-Quarter examinations
17 (Tue) Grades due at 11:59 p.m.

## ACADEMIC CALENDAR 2010-11

First day of classes and last day of finals
Autumn 2010-11: September 20 and December 10
Winter 2010-11: January 3 and March 18
Spring 2010-11: March 28 and June 8 (Commencement June 12)
Summer 2010-11: June 20 and August 13

WELCOME TO
STANFORD

A BRIEF HISTORY OF STANFORD

On October 1, 1891, more than 400 enthusiastic young men and women were on hand for opening day ceremonies at Leland Stanford Junior University. They came from all over: many from California, some who followed professors hired from other colleges and universities, and some simply seeking adventure in the West. They came to seize a special opportunity, to be part of the pioneer class in a brand new university. They stayed to help turn an ambitious dream into a thriving reality. As a pioneer faculty member recalled, “Hope was in every heart, and the presiding spirit of freedom prompted us to dare greatly.”

For Leland and Jane Stanford on that day, the University was the realization of a dream and a fitting tribute to the memory of their only son, who died of typhoid fever weeks before his 16th birthday, at an age when many young men and women were planning their college education.

From the beginning, it was clear that Stanford would be different. It was coeducational at a time when single-sex colleges were the norm. It was non-sectarian when most private colleges were still affiliated with a church. And it offered a broad, flexible program of study while most schools insisted on a rigid curriculum of the norm. It was non-sectarian when most private colleges were still affiliated with a church. And it offered a broad, flexible program of study while most schools insisted on a rigid curriculum of classical studies. Though there were many difficulties during the first months (housing was inadequate, microscopes and books were late in arriving from the East), the first year foretold greatness. As Jane Stanford wrote in the summer of 1892, “Even our fondest hopes have been realized.”

What manner of people were this man and this woman who had the intelligence, the means, the faith, and the daring to plan a major university in Pacific soil, far from the nation’s center of culture?

LELAND AND JANE STANFORD

Although he was trained as a lawyer, Leland Stanford came to California in 1852 to join his five brothers in their mercantile business in the gold fields; Jane Stanford followed in 1855. They established large-scale operations in Sacramento, where Mr. Stanford became a leading figure in California business and politics. One of the “Big Four” who built the western link of the first transcontinental railroad, he was elected Governor of California and later United States Senator. One of the founders of the Republican Party in California, he was an ardent follower of Abraham Lincoln and is credited with keeping California in the Union during the Civil War.

THE CASE FOR A LIBERAL EDUCATION

Despite the enormous success they achieved in their lives, Governor and Mrs. Stanford had come from families of modest means and rose to prominence and wealth through a life of hard work. So it was natural that their first thoughts were to establish an institution where young men and women could “grapple successfully with the practicalities of life.” As their thoughts matured, however, these ideas of “practical education” enlarged to the concept of producing cultured and useful citizens who were well prepared for professional success. In a statement of the case for liberal education that was remarkable for its time, Leland Stanford wrote, “I attach great importance to general literature for the enlargement of the mind and for giving business capacity. I think I have noticed that technically educated boys do not make the most successful businessmen. The imagination needs to be cultivated and developed to assure success in life. A man will never construct anything he cannot conceive.”

STANFORD LANDS AND ARCHITECTURE

The campus occupies what was once Leland Stanford’s Palo Alto Stock Farm and the favorite residence of the Stanford family. The Stanfords purchased an existing estate in 1876 and later acquired much of the land in the local watershed for their stock farm, orchards, and vineyards.

The name of the farm came from the tree El Palo Alto, a coast redwood (Sequoia sempervirens), that still stands near the northwest corner of the property on the edge of San Francisquito Creek. Many years ago, one of the winter floods that periodically rushed down the arroyo tore off one of its twin trunks, but half of the venerable old tree lives on, a gaunt and time-scarred monument. Named in 1769 by Spanish explorers, El Palo Alto has been the University’s symbol and the centerpiece of its official seal.

The Stanfords gave their farm to the University in the Founding Grant of 1885. They personally financed the entire cost of the construction and operation of the University until 1903, when surviving founder Jane Stanford, who performed heroically in keeping the University functioning during difficult times following Leland Sr.’s death in 1893, turned over control to the Board of Trustees. The founding gift has been estimated at $25 million, not including the land and buildings.

The general concept for the University grounds and buildings was conceived by Frederick Law Olmsted, designer of Central Park in New York. A brilliant young Boston architect, Charles Allerton Coolidge, further developed the concept in the style of his late mentor, Henry Hobson Richardson. The style, called Richardsonian Romanesque, is a blend of Romanesque and Mission Revival architecture. It is characterized by rectilinear sandstone buildings joined by covered arcades formed of successive half-circle arches, the latter supported by short columns with decorated capitals.

More than one hundred years later, the University still enjoys 8,180 acres (almost 13 square miles) of grassy fields, eucalyptus groves, and rolling hills that were the Stanfords’ generous legacy, as well as the Quadrangle of “long corridors with their stately pillars” at the center of campus. It is still true, as the philosopher William James said, during his stint as a visiting professor, that the climate is “so friendly . . . that every morning wakes one fresh for new amounts of work.”

CURRENT PERSPECTIVES

In other ways, the University has changed tremendously on its way to recognition as one of the world’s great universities. At the hub of a vital and diverse Bay Area, Stanford is an hour’s drive south of San Francisco and just a few miles north of the Silicon Valley, an area dotted with computer and high technology firms largely spawned by the University’s faculty and graduates. On campus, students and faculty enjoy new libraries, modern laboratories, sports facilities, and comfortable residences. Contemporary sculpture, as well as pieces from the Iris and B. Gerald Cantor Center for Visual Arts at Stanford University’s extensive collection of sculpture by Auguste Rodin, can be found throughout the campus, providing unexpected pleasures at many turns.

The Iris and B. Gerald Cantor Center for Visual Arts at Stanford University opened in January 1999. The center includes the historic Leland Stanford Junior Museum building, the Rodin
Sculpture Garden and a new wing with spacious galleries, auditorium, cafe, and bookshop. At the Stanford Medical Center, world-renowned for its research, teaching, and patient care, scientists and physicians are searching for answers to fundamental questions about health and disease. Ninety miles down the coast, at Stanford’s Hopkins Marine Station on the Monterey Bay, scientists are working to better understand the mechanisms of evolution, human development, and ecological systems.

The University is organized into seven schools: Earth Sciences, Education, Engineering, the Graduate School of Business, Humanities and Sciences, Law, and Medicine. In addition, there are more than 30 interdisciplinary centers, programs, and research laboratories including: the Hoover Institution on War, Revolution and Peace; the Freeman Spogli Institute for International Studies; the Woods Institute for the Environment; the SLAC National Accelerator Laboratory; and the Stanford Program for Bioengineering, Biomedicine, and Biosciences (Bio-X), where faculty from many fields bring different perspectives to bear on issues and problems. Stanford’s Bing Overseas Studies Program offers undergraduates in all fields remarkable opportunities for study abroad, with campuses in Australia, Beijing, Berlin, Florence, Kyoto, Madrid, Moscow, Oxford, Paris, and Santiago.

By any measure, Stanford’s faculty, which numbers approximately 1,800, is one of the most distinguished in the world. It includes 16 living Nobel laureates, 4 Pulitzer Prize winners, 20 National Medal of Science winners, 136 members of the National Academy of Sciences, 244 members of the American Academy of Arts and Sciences, 83 members of the National Academy of Engineering, and 27 members of the National Academy of Education. Yet beyond their array of honors, what truly distinguishes Stanford faculty is their commitment to sharing knowledge with their students. The great majority of professors teach undergraduates both in introductory lecture classes and in small freshman, sophomore, and advanced seminars.

Enrollment in Autumn Quarter 2008 totaled 15,140, of whom 6,812 were undergraduates and 8,328 were graduate students. Like the faculty, the Stanford student body is distinguished. Approximately 18 people apply to Stanford for every student who enters the freshman class. 89 Stanford students have been named Rhodes Scholars and 76 have been named Marshall Scholars. The six-year graduation rate for freshmen who entered Stanford University full-time in 2002 was 94 percent. Stanford awarded 4,612 degrees in 2008-09, of which 1,680 were baccalaureate and 2,932 were advanced degrees.

Stanford students also shine in an array of activities outside the classroom, from student government to music, theater, and journalism. Through the Haas Center for Public Service, students participate in dozens of community service activities, such as tutoring programs for children in nearby East Palo Alto, the Hunger Project, and the Arbor Free Clinic.

In the athletic arena, Stanford students have enjoyed tremendous success as well. Stanford fields teams in 35 Division I varsity sports. Of Stanford’s 95 NCAA team titles, 78 have been captured since 1980, placing Stanford at the top among the nation’s most title-winning schools during that time. In 2007-08, Stanford won two national championships in men’s gymnastics and women’s rowing, and won the Directors’ Cup, emblematic of the top overall athletic program in the country, for the 15th consecutive year. In 1999-2000, Stanford became the first school in Pac-10 history to win conference championships in football, men’s basketball, and baseball in the same year. Athletic success has reached beyond The Farm, as well, with 48 Stanford athletes and coaches taking part in the 2008 Olympics in Beijing. Intramural and club sports are also popular; over 1,900 students take part in the club sports program, while participation in the intramural program has reached 9,000 with many active in more than one sport.

Stanford graduates can be found in an extraordinary variety of places: in space (Sally Ride, ’73, Ph.D. ’78, was the first American woman in space); on the news (Ted Koppel, M.A. ’62, created the successful program Nightline); Broadway (David Henry Hwang, ’79, received a Tony Award for his celebrated work, M. Butterfly); in San Francisco live theater (Carey Perloff, ’80, artistic director of the American Conservatory Theater); at the helm of major corporations (Scott McNealy, ’80, founded Sun Microsystems, and Chih- yuan (Jerry) Yang, ’94, and David Filo, ’90, founded Yahoo); and on the U.S. Supreme Court (two Stanford graduates, Anthony Kennedy, ’58, and Stephen Breyer, ’59, currently sit on the high court; Sandra Day O’Connor, ’50, J.D. ’52, recently retired from the high court, and William Rehnquist, ’48, J.D.’52, served until his death in 2005).

LOOKING AHEAD

In her address to the Board of Trustees in July 1904, Jane Stanford said, “Let us not be afraid to outgrow old thoughts and ways, and dare to think on new lines as to the future of the work under our care.” Her thoughts echo in the words of Stanford President John Hennessy, who said in his message in the 2002 Annual Report, “Our bold entrepreneurial spirit has its roots in the founders and our location in the pioneering West. In 1904, Jane Stanford defined the challenge for the young University ... Each generation at Stanford has taken this to heart and boldly launched new efforts, from the classroom to the laboratory ... We will continue to innovate and invest in the future ... The pioneering spirit that led the founders and early leaders to ‘dare to think on new lines’ continues to guide us.”
THE BOARD OF TRUSTEES

Powers and Duties—The Board of Trustees is custodian of the endowment and all properties of the University. The Board administers the invested funds, sets the annual budget, and determines policies for the operation and control of the University. The powers and duties of the Board of Trustees derive from the Founding Grant, amendments, legislation, and court decrees. In addition, the Board operates under its own bylaws and a series of resolutions on major policy.

Membership—Board membership is set at 35, including the President of the University who serves ex officio and with vote. Trustees serve a five-year term and are eligible for appointment to one additional five-year term. At the conclusion of that term, a Trustee is not eligible for reelection until after a lapse of one year.

Eight of the Trustees are elected or appointed in accordance with the Rules Governing the Election or Appointment of Alumni Nominated Trustees. They serve a five-year term.

Officers of the Board—The officers of the board are a chair, one or more vice chairs, a secretary, and an associate secretary. Officers are elected to one-year terms at the annual meeting in June, with the exception of the chair, who serves a two-year term. Their terms of office begin July 1.

Committees—Standing committees of the Board are Academic Policy, Planning, and Management; Alumni and External Affairs; Audit and Compliance; Development; Finance; Land and Buildings; the Medical Center; and Trusteeship. Special committees include Athletics, Compensation, Investment Responsibility, and Litigation.

Meetings—The Board generally meets five times each year.

MEMBERS OF THE BOARD OF TRUSTEES

William M. Barnum, Jr., General Partner, Brentwood Associates, Los Angeles, CA
Robert M. Bass, President, Keystone Group LP, Fort Worth, TX
William R. Brody, President, Salk Institute for Biological Studies, La Jolla, CA
Mariann Byerwalter, Chairman, JDN Corporate Advisory, LLC, Daly City, CA
James E. Canales, President and CEO, The James Irvine Foundation, San Francisco, CA
James G. Coulter, Founding Partner, TPG Capital, LP, San Francisco, CA
Mary B. Cranston, Firm Senior Partner, Pillsbury Winthrop Shaw Pittman, LLP, San Francisco, CA
Lauren B. Dachs, President, S.D. Bechtel, Jr. Foundation, San Francisco, CA
Steven A. Denning, Chairman, General Atlantic LLC, Greenwich, CT
Bruce W. Dunlevie, General Partner, Benchmark Capital, Menlo Park, CA
Ying-Ying Goh, M.D., Pasadena, CA
John A. Gunn, Chief Executive Officer, Dodge and Cox, San Francisco, CA
Christine U. Hazy, Co-Founder and Managing Director, Sketch Foundation, Los Angeles, CA
John L. Hennessy, President, Stanford University, Stanford, CA
Pete Higgins, Partner, Second Avenue Partners, Seattle, WA
Leslie P. Hume, San Francisco, CA (Chair)
Ann H. Lamont, Managing Partner, Oak Investment Partners, Westport, CT
Goodwin Liu, Professor of Law and Associate Dean, University of California, Berkeley, Berkeley, CA
Susan R. McCaw, President, COM Investments, Kirkland, WA
Hamid R. Moghadam, Chairman and Chief Executive Officer, AMB Property Corporation, San Francisco, CA
Wendy Munger, South Pasadena, CA
Miriam Rivera, Partner, Ulu Ventures, Palo Alto, CA
Richard A. Sapp, Rancho Santa Fe, CA
Philip G. Satre, Chairman of the Board, Retired, Harrah’s Entertainment, Inc., Reno, NV
John H. Scully, Managing Director, SPO Partners & Co., Mill Valley, CA
Isaac Stein, President, Waverley Associates, Atherton, CA
Thomas F. Steyer, Senior Managing Member, Farallon Capital Management, LLC, San Francisco, CA
Ross H. Walker, Partner, Real Estate Development & Acquisitions, Wolff Urban Development, Los Angeles, CA
Vaughn C. Williams, Partner, Skadden Arps Slate Meagher & Flom, New York, NY
Jerry Yang, Chief Yahoo and Co-Founder, Yahoo! Inc., Sunnyvale, CA

EXECUTIVE OFFICERS

STANFORD ADMINISTRATION

John Hennessy, President
John Etchemendy, Provost
David Demarest, Vice President for Public Affairs
Randall S. Livingston, Vice President for Business Affairs and Chief Financial Officer
William J. Madia, Vice President, SLAC National Accelerator Laboratory
Robert Reidy, Vice President for Land, Buildings and Real Estate
Martin Shell, Vice President for Development
Howard Wolf, Vice President for Alumni Affairs and President, Stanford Alumni Association
Debra Zumwalt, Vice President and General Counsel

CABINET

Ann Arvin, Vice Provost and Dean of Research
John Bravman, Vice Provost for Undergraduate Education
Persis Drell, Director, SLAC National Accelerator Laboratory
Patricia Gumport, Vice Provost for Undergraduate Education
Garth Saloner, Dean, Graduate School of Business
Larry Kramer, Dean, School of Law
Pamela Matson, Dean, School of Humanities and Sciences
Philip Pizzo, Dean, School of Medicine
James Plummer, Dean, School of Engineering
John Raisian, Director, Hoover Institution on War, Revolution and Peace
Richard Saller, Dean, School of Humanities and Sciences
Deborah Stipek, Dean, School of Education
THE PRESIDENT

The Founding Grant prescribes that the Board of Trustees shall appoint the President of the University and that the Board shall give to the President the following powers:

- To prescribe the duties of the professors and teachers.
- To prescribe and enforce the course of study and the mode and manner of teaching.
- Such other powers as will enable the President to control the educational part of the University to such an extent that the President may justly be held responsible for the course of study therein and for the good conduct and capacity of the professors and teachers.

The President is also responsible for the management of financial and business affairs of the University, including operation of the physical plant.

The President is responsible for the safety of the campus and may take reasonable steps to protect the University including, but not limited to, barring people from campus who disrupt the normal business operations of the University or who present a threat to the safety of the University community. In extraordinary circumstances, the President may permanently discontinue students who present a threat to the health and safety of the University community.

The President appoints the following, subject to confirmation by the Board: Provost, Vice President for Business Affairs and Chief Financial Officer, Chief Executive Officer of Stanford Management Company, Vice President for Alumni Affairs and President of Stanford Alumni Association, Vice President for Development, Vice President for Public Affairs, Vice President and General Counsel, Vice President for the SLAC National Accelerator Laboratory, and Vice President for Land, Buildings, and Real Estate.

For additional information, see the Office of the President website.

COMMITTEES AND PANELS APPOINTED BY THE PRESIDENT

University Committees are appointed by and are primarily responsible to the President. Such committees deal with matters on which the responsibility for recommendation or action is clearly diffused among different constituencies of the University. In accordance with the Report on the Committee Structure of the University, Academic Council members are appointed to University Committees on nomination of the Senate Committee on Committees and student members on nomination of the Associated Students of Stanford University (ASSU) Committee on Nominations. The President takes the initiative in the appointment of staff members to such committees. Although immediately responsible to the President, University Committees may be called upon to report to the Senate of the Academic Council or the ASSU. Charges to such committees are set by the President on recommendation of the Committee on Committees and others. There are five University Committees, as follows:

Advisory Panel on Investment Responsibility and Licensing (AP-IRL)
Committee on Athletics, Physical Education, and Recreation (C-APER)
Committee on Environmental Health and Safety (C-EH&S)
Committee on Faculty Staff Human Resources (C-FSHR)
Panel on Outdoor Art (P-OA)

Additionally there are eleven standing administrative panels which are appointed by the Vice Provost and Dean of Research, and which report through him/her to the President:

Administrative Panel on Biosafety
Administrative Panel on Human Subjects in Medical Research-01
Administrative Panel on Human Subjects in Medical Research-03
Administrative Panel on Human Subjects in Medical Research-04
Administrative Panel on Human Subjects in Medical Research-05
Administrative Panel on Human Subjects in Medical Research-06
Administrative Panel on Human Subjects in Medical Research-07
Administrative Panel on Human Subjects in Medical Research-08
Administrative Panel on Human Subjects in Non-Medical Research-02
Administrative Panel on Laboratory Animal Care
Administrative Panel on Radiological Safety

THE PROVOST

The Provost, as the chief academic and budget officer, administers the academic program (instruction and research in schools and other academic units) and University services in support of the academic program (including budgeting and planning, land and buildings, libraries and information resources, and student affairs). In the absence or inability of the President to act, the Provost becomes the Acting President of the University. The Provost shares with the President conduct of the University’s relations with other educational institutions, groups, and associations.

Schools of the University—The program of instruction in the University is organized into seven schools: Graduate School of Business, School of Earth Sciences, School of Education, School of Engineering, School of Humanities and Sciences, School of Law, School of Medicine.

The deans of the schools report to the Provost.

THE ACADEMIC COUNCIL

According to the Articles of Organization of the Faculty, originally adopted by the Board of Trustees in 1904 and revised in 1977, the powers and authority of the faculty are vested in the Academic Council consisting of: (1) the President of the University; (2) tenure-line faculty: Assistant, Associate, and Full Professor; (3) nontenure-line faculty: Associate and Full Professor followed by the parenthetical notation (Teaching), (Performance), (Applied Research), or (Clinical); (4) nontenure-line research faculty: Assistant Professor (Research), Associate Professor (Research), Professor (Research); (5) Senior Fellows in specified policy centers and institutes; and (6) certain specified officers of academic administration.

In the Spring of 1968, the Academic Council approved the charter for a Senate to be composed of 55 representatives elected by the Hare System of Proportional Representation and, as ex officio nonvoting members, deans of the academic schools and certain major officers of academic administration.

In the allocation of representation, each school constitutes a major constituency. The Senate may create from time to time other major constituencies as conditions warrant. Approximately one-half of the representatives are allocated to constituencies on the basis of the number of students in those constituencies and the remainder on the basis of the number of members of the Academic Council from each constituency.

COMMITTEES OF THE ACADEMIC COUNCIL

Committees of the Academic Council are created by and responsible to the Senate of the Academic Council and are appointed by the Committee on Committees of the Senate. Such committees deal with academic policy matters on which the primary responsi-
bility for action and decision lies with the Academic Council or, by
delegation, the Senate. Pursuant to the Senate’s acceptance on
September 25, 1969 of the Report from the Committee on Commit-
tees on the Committee Structure of the University and subsequent
Senate action, the Senate has established seven standing Commit-
tees of the Academic Council, as follows:

Committee on Academic Computing and Information Systems (C-
ACIS)
Committee on Graduate Studies (C-GS)
Committee on Libraries (C-Lib)
Committee on Research (C-Res)
Committee on Review of Undergraduate Majors (C-RUM)
Committee on Undergraduate Admissions and Financial Aid (C-
UAFA)
Committee on Undergraduate Standards and Policy (C-USP)

The Senate has also created a Planning and Policy Board of the
Senate to consider long-range strategic issues of concern to the
faculty. Information regarding charges to these committees is
available from the Office of the Academic Secretary to the Univer-
sity.

ASSOCIATED STUDENTS OF
STANFORD UNIVERSITY (ASSU)

Web Site: http://assu.stanford.edu

All registered students are members of the ASSU. They are go-
vernied by the ASSU Constitution and Bylaws, which was last
revised and approved by student vote in April 2007.

Executive—The President and Vice President serve as the chief
executives and representatives for the Association. The Financial
Manager acts as business manager of the ASSU, CEO of Stanford
Student Enterprises (SSE), and controller of the Students’ Organi-
izations Fund in which ASSU and student organization funds are
deposited.

Legislative—There are two legislative bodies, an Undergra-
duate Senate and a Graduate Student Council, that work together
to determine the Association’s budgetary, financial, investment, busi-
ness, and operating policies. In addition, each entity provides fund-
ning for student organizations, participates in recommending stu-
dent appointments to University Committees and advocates on
behalf of its constituents. Each body has 15 elected representatives
and an elected chair. Both meet regularly to conduct Association
business and discuss and act on issues pertinent to student life at
Stanford.

ADMISSION AND
FINANCIAL AID

UNDERGRADUATE ADMISSION

Stanford’s undergraduate community is drawn from throughout
the United States and the world. It includes students whose abili-
ties, intellectual interests, and personal qualities allow them to
benefit from and contribute to the University’s wide range of
teaching and research programs in the humanities, natural sciences,
social sciences, and engineering. The University admits students
who derive pleasure from learning for its own sake; who exhibit
energy, creativity, and curiosity; and who have distinguished
themselves in and out of the classroom.

Stanford welcomes a diverse community that cuts across many
dimensions. The University does not use quotas of any kind in its
admission process: it does not favor particular schools or types of
schools, nor any geographic region, nor does it have any racial,
religious, ethnic, or gender-related quotas. The University believes
that a student body that is both highly qualified and diverse in
terms of culture, socioeconomic status, race, ethnicity, gender,
work and life experiences, skills, and interests is essential to the
educational process. Applications are encouraged from those who
would take the initiative and responsibility for their own education
and who would provide additional dimensions to the University
and its programs.

In order to preserve the residential character of the University
and to maintain a favorable student-faculty ratio, Stanford has a
limited undergraduate enrollment. The anticipated size of the
freshman class is approximately 1,600-1,700 students. Approxi-
mately 20-40 transfer students, entering either the sophomore or
junior class, are also typically admitted for Autumn enrollment if
space allows. Each year, the University receives many more appli-
cations from qualified students than there are places available.

Stanford is committed to meeting the University-computed fi-
ancial need of each admitted student, and admission decisions are
made without regard to the applicant’s financial status, except in
the case of international students who are neither U.S. citizens nor
permanent residents.

Application procedures, requirements, and deadlines vary from
year to year. See the Undergraduate Admission web site at
http://admission.stanford.edu for the most recent information and
to begin an application online; or call the Office of Undergraduate
Admission at (650) 723-2091.

NONMATRICULATED STUDY
(UNDERGRADUATE)

Permission to enroll at Stanford as a nonmatriculated student
during Autumn, Winter, and Spring quarters is not routinely ap-
proved except under extenuating circumstances. Nonmatriculated
students authorized to enroll at Stanford University are not admit-
ted to any Stanford degree program and are permitted to register
for a specific period, usually one, two, or three quarters. Financial
assistance from Stanford University is not available. Permission to
enroll as a nonmatriculated student does not imply subsequent
admission as a matriculated student. Students interested in nonma-
triculated status during the Autumn, Winter, and Spring quarters
should contact the Office of the University Registrar, not the Of-
fice of Undergraduate Admission.

High School Nonmatriculated Students—Local high school stu-
dents are eligible to be considered to attend Stanford as nonmatric-
MATRICULATED STUDY (GRADUATE STUDENTS)

Applicants from colleges and universities of recognized standing who hold a U.S. bachelor’s degree or its equivalent are eligible to be considered for admission for graduate study. Details regarding degrees offered in specific departments are given in the Guide to Graduate Admission or at http://gradadmissions.stanford.edu. The number of applicants who can be admitted for work in a particular field of study at any time is limited by the facilities and programs of the school or department and by the number of matriculated students who continue their work in that field.

As with its undergraduate program, Stanford believes that a graduate student body that is both highly qualified and diverse in terms of culture, socioeconomic status, race, ethnicity, gender, work and life experience, skills, and interests is essential to the graduate educational process. It particularly welcomes applications from African Americans, Latinos, and Native Americans, as well as from others whose backgrounds and experiences would add additional dimensions to the University’s educational programs.

The Coterminal Degree Program—This program permits matriculated Stanford undergraduates to study for bachelor’s and master’s degrees simultaneously in the same or different departments. Application policies and procedures are established by each master’s department. Applicants must have earned a minimum of 120 units toward graduation (UTG) as shown on the undergraduate unofficial transcript. This includes allowable Advanced Placement (AP) and transfer credit. Applicants must submit their application no later than the quarter prior to the expected completion of their undergraduate degree. This is normally the Winter Quarter prior to Spring Quarter graduation. Students who decide to apply for admission to master’s programs after these deadlines are not eligible for the coterminal program and must apply through the regular graduate admission process.

APPLICATION PROCESS

Specific information regarding test requirements, other application procedures and requirements, and closing dates for filing applications and supporting credentials for admission and financial aid are listed on the Graduate Admissions web site at http://gradadmissions.stanford.edu and in the Guide to Graduate Admission.

Graduate fellowship funds and assistantships are generally committed in March for the entire period comprising Autumn, Winter, and Spring quarters of the next academic year. Awards are seldom made to students who enter the University in Winter, Spring, and Summer quarters; such applicants must meet the same financial aid application requirements as those entering in Autumn Quarter.

Applications are to be submitted electronically for graduate programs in the schools of Business, Earth Sciences, Education, Engineering, Humanities and Sciences, and the Biosciences (non-M.D. programs in Medicine). Application instructions may be found at http://gradadmissions.stanford.edu.

The Guide to Graduate Admission may be obtained from Graduate Admissions, Office of the University Registrar, 630 Serra Street, Suite 120, Stanford University, Stanford, California 94305-6032; the Guide outlines application policies except for the programs listed following this paragraph. Applicants who are unable to apply online may send a written request for a paper admissions packet from Graduate Admissions, Office of the University Registrar, 630 Serra Street, Suite 120, Stanford University, Stanford, CA 94305-6032. The cost for this packet is $20. For admission to the following programs, apply directly at the address listed.

Law—Applicants for the JD degree should see the Law School Admissions web site at http://www.law.stanford.edu/program/degrees/jd/jd_application/. Applicants for LLM, JSM, JSD, and MLS degrees will find instructions at http://www.law.stanford.edu/program/degrees/advanced/applicatio n/. These applications are submitted to the Director of Admissions, School of Law, Stanford University, Stanford, CA 94305-8610. The Law School Admissions Test is required.

M.D. Program—Applicants should see the M.D. admissions web site at http://med.stanford.edu/md/admissions or, for additional information about the M.D. program, write to Stanford University School of Medicine, Office of M.D. Admissions, 251 Campus Drive, MSOB X3C01, Stanford, CA 94305-5404. The American Medical College Application Service (AMCAS) application is available at http://aamc.org. Applications and transcripts must be received by AMCAS by October 15. The Medical College Admissions Test is required.

Coterminal Master’s Program—Interested Stanford undergraduates should contact directly the department in which they wish to pursue a master’s degree and must adhere to the application deadlines described under “Coterminal Degree Program” in the “Matriculated Study” section of this bulletin.

NONMATRICULATED STUDY (GRADUATE STUDENTS)

Eligibility for consideration for nonmatriculated enrollment is restricted to two groups of applicants:

1. Stanford alumni who wish to return to Stanford to take courses that are prerequisites for Medical School admission, such as undergraduate Biology or Chemistry courses, are eligible to apply for nonmatriculated status. An application form, application fee, statement of purpose, and three letters of recommendation are required. The decision to admit or deny is made by the Director of Graduate Admissions on the basis of relevant factors, including a 3.0 GPA and positive letters of recommendation.

2. Individuals who hold a bachelor’s degree or equivalent and wish to take courses in a specific department that allows nondegree students are eligible to apply for nonmatriculated status. An application form, application fee, statement of purpose, original transcripts, and three letters of recommendation are required. The decision to admit or deny is made by the chair of the department in which they wish to take courses and conveyed in writing to the Graduate Admissions Office. Applicants are notified of the decision by the Graduate Admissions in the Office of the University Registrar.

Students who are granted nonmatriculated status are charged the 8-10 unit rate for each quarter in which they are enrolled, and may enroll for a maximum of one academic year. Nonmatriculated status is a privilege and not a right; the nonmatriculated status may be revoked at the University’s discretion (and after consideration...
of such factors as the University considers relevant in the particular case) at the end of any quarter of enrollment.

Nonmatriculated students are not permitted to enroll in certain courses, such as those in the following departments or programs: film and broadcasting courses in Art; all courses in Computer Science, Economics, Electrical Engineering, International Policy Studies, and the School of Medicine. Nonmatriculated students are expected to limit their enrollment to classes in the department in which they have been admitted. Nonmatriculated students receive academic credit for courses satisfactorily completed and may obtain an official transcript. They may use University facilities and services. In classes of limited enrollment, students in degree programs have priority. Nonmatriculated students may apply for housing but have a low priority for assignment. No fellowships, assistantships, or Stanford loans are available for nonmatriculated students. Nonmatriculated students are not eligible for a leave of absence.

Nonmatriculated students who later apply for admission to a degree program must meet the standard admission requirements and should not anticipate special priority because of work completed as a nonmatriculated student. Students who are admitted to a degree program may apply a maximum of 15 units of nonmatriculated study toward the residency requirement for a master’s degree and 30 units for the Engineer or Ph.D. degree, subject to the approval of the degree granting department. Application forms for nonmatriculated status during the regular academic year are available from Graduate Admissions, Office of the University Registrar, 630 Serra Street, Suite 120, Stanford, CA 94305-6032. Deadlines for applying are included with the forms and are generally required two months before the start of the quarter.

Applicants interested in nonmatriculated student status for the Summer Quarter only should contact the Summer Session Office, 482 Galvez Mall, Stanford, CA 94305-6079.

POSTDOCTORAL SCHOLARS

Postdoctoral scholars are trainees in residence at Stanford University pursuing advanced studies beyond the doctoral level in preparation for an independent career. Postdoctoral scholars are appointed for a limited period of time and may participate in Stanford research projects and/or may be supported by external awards or fellowships. In all cases, their appointment at Stanford is for the purpose of advanced studies and training under the sponsorship of a Stanford faculty member.

Postdoctoral appointments require initial full-time engagement in the designated research or study and are generally restricted to those who have earned a terminal degree such as Ph.D. or J.D. within the last three years or a medical degree such as M.D., M.B.B.S., or D.D.S. within the last six years. Requests for exceptions for individuals who are beyond these limits, or have not been actively engaged in research as their primary effort, must include a written statement from the sponsoring faculty member indicating what additional training outside the primary area of effort the individual plans to receive, and the reasons for which the exception is requested. Postdoctoral scholars are appointed at Stanford for fixed terms, typically one year but that may eventually total up to four years, and are subject to a strict five-year rule (that is, that the total postdoctoral appointment period is not to exceed a total of five years of postdoctoral research experience at all institutions combined). In cases of combined training, only the years of active research at the postdoctoral level are counted for salary and other purposes. Postdoctoral scholars who begin a second postdoctoral appointment in a new field may have training extended to a maximum total of up to six years. Postdoctoral scholars may request temporary reductions in effort and pay due to temporary family or other conditions.

All postdoctoral scholars appointed at Stanford must be supported by Stanford grants and contracts, training grants, departmental or school fellowship funds, or external fellowships, or by a combination of these sources. Scholars may not be self-supporting. In addition, all postdoctoral scholars are eligible for a benefits package including medical, dental, life, and disability insurance. Postdoctoral scholars are normally appointed for 100% time.

Postdoctoral scholars must be registered at Stanford during every academic quarter of their appointment. Registration entails payment of a quarterly postdoctoral fee by the academic department or school appointing the scholar.

Prospective postdoctoral scholars should write directly to the department in which they wish to study or check for postdoctoral openings at http://postdocs.stanford.edu/prospects/index.html. For more information, see http://postdocs.stanford.edu.

VISITING RESEARCHERS

In limited instances, it is to the benefit of Stanford faculty to permit persons who have not yet obtained a Ph.D. (or its foreign equivalent) or who are not recognized experts in their fields to engage in research on the Stanford campus using Stanford research facilities. Such instances include students at other universities who are engaged in graduate-level research in a field of interest to the faculty member, a person doing a laboratory rotation as part of a larger research study or grant, or employees of companies who are conducting research which requires specialized equipment available only at Stanford.

In these instances, they may be eligible to apply to register as nonmatriculated graduate students in the visiting researcher category for one year. Invited persons must be qualified to conduct research at a level comparable to that of other Stanford graduate students, and the research must be of benefit to Stanford as well as to the visitor. Application for Admission forms for visiting researchers are submitted to Graduate Admissions, Office of the University Registrar by the department issuing the invitation.

Visiting researchers pay the Permit for Services Only (PSO) rate and may waive the University’s student medical insurance plan only if they have comparable coverage with another carrier and submit proof of the comparable coverage prior to the term start date. They are not permitted to enroll in or audit any courses, but in quarters they are registered as visiting researchers they are eligible for the usual student benefits of nonmatriculated student status. However, in a few instances, visiting researchers may be invited to apply for nonmatriculated graduate non-degree student status. Once non-degree student status is granted, they must pay the regular tuition rate and will be eligible to enroll in courses. It is important to note, however, that permission to enroll in any specific class is not guaranteed in the non-degree approval process. Information on nonmatriculated non-degree student eligibility requirements and application forms can be obtained from Graduate Admissions, Office of the University Registrar.

Visiting researchers may apply for housing, but have a low priority for assignments. No Stanford fellowships, assistantships, or Stanford loans are available for visiting researchers. Stanford cannot certify visiting researchers for deferment of U.S. educational loans. Citizens of other countries who enter the United States to be visiting researchers at Stanford must have a DS-2019 Certificate (to apply for a J-1 visa) issued by the Bechtel International Center and must register each quarter, including Summer Quarter, to maintain their visa status.

HONORS COOPERATIVE PROGRAM

The Honors Cooperative Program (HCP) is a part-time graduate program offered by Stanford University. It allows working professionals, who may be eligible for tuition support through their employer, an opportunity to earn a graduate degree in any of the engineering programs, applied physics, statistics, or biomedical informatics, on a part-time basis.

Prospective HCP students apply to the department in which they would like to pursue a graduate degree through the normal graduate admissions process, and compete with all other applicants for admission to the program. Once admitted, HCP students arrange their part-time status and tuition payment options through the Stanford Center for Professional Development (SCPD).
Courses are delivered online and broadcast locally. HCP students are also welcome to attend classes on campus, and some on-campus attendance may be required depending on the degree track.

To participate, HCP students must have the support of their employer as a participating company of the Stanford Center for Professional Development. For more information, see http://scp.d.stanford.edu, or phone (650) 725-3000.

**Holds and Degree Rescission**

By applying for admission to Stanford University academic programs, applicants certify that the information they provide in their applications is their own work and, to the best of their knowledge, is complete and accurate. As also noted in the application materials, Stanford reserves the right to withdraw an offer of admission under certain circumstances, including: 1) if there is a significant drop in academic performance or a failure to graduate (in the applicant’s current program); 2) if there has been a misrepresentation in or a violation of any of the terms of the application process; or 3) if the University learns that an applicant has engaged in behavior prior to matriculation that indicates a serious lack of judgment or integrity. Indeed (and for example), Stanford may rescind an applicant’s admission at any time, including after attendance and after degree conferral, if it determines, for example, that an individual has been admitted to Stanford on the basis of having provided false information or has withheld requested information. The University further reserves the right to require applicants to provide additional information and/or authorization for the release of information about any such matter, and to place a hold on registration and/or the conferral of a degree during the investigation into any such matter.

Similarly, Stanford University awards degrees on the basis of successful completion of all program requirements in accordance with Stanford’s Honor Code requiring academic honesty and integrity. The University reserves the right to rescind any degree (even after conferral) if the program requirements have not been so completed, and to place a hold on issuing a degree during the investigation into any such matter.

Students with unmet financial (or other university) obligations resulting in the placement of a hold on their registration cannot receive a transcript, statement of completion, degree certificate, or diploma until the hold is released.

**Undergraduate Financial Aid**

The University has a comprehensive need-based financial aid program for its undergraduates who meet various conditions set by federal and state governments, the University, and other outside agencies. Students are admitted without consideration of their financial circumstances, except in the case of international students.

In awarding its own funds, the University assumes that students and their parents accept the first and primary responsibility for meeting educational costs. Stanford’s policy generally is to exclude undergraduates from being considered financially independent of their parents for University-administered scholarship aid unless a student is an orphan, a ward of the court, or at least 25 years of age. Spouses of married undergraduate students share in the responsibility to meet educational costs.

Stanford expects financial aid applicants to apply for and use resources from state, federal, and private funding sources, contribute from their earnings during nonenrollment periods (for example, summer), and use earnings from part-time employment during the academic year to meet educational expenses. If Stanford determines that an applicant and his or her family cannot meet these expenses, the University may offer financial aid funds to help meet these costs.

The amount of scholarship or grant funds offered to students is determined by the difference between the comprehensive cost of attendance (including tuition, fees, room, board and allowances for books, supplies, personal expenses, and travel) and the amount the student and parents can reasonably be expected to contribute toward educational costs based on family financial circumstances. Scholarships from outside sources may change the University’s financial aid award. When a student receives outside scholarships, these funds reduce or eliminate the student’s responsibility to contribute from job earnings. If the total in outside scholarships exceeds the student’s responsibility (approximately $4,500 in most cases), the University then reduces institutional scholarship, dollar for dollar, by any additional amount.

Students are considered for University scholarship eligibility during their first four years of undergraduate enrollment. The Financial Aid Office (FAO) considers applicants for University scholarship eligibility beyond the twelfth quarter only if enrollment is essential in order to complete the minimum requirements for the first baccalaureate degree or major. Students who enroll for a fifth year in pursuit of a coterminal program, a minor, a second major, a second degree, or the B.A.S. degree are not eligible for
University scholarship consideration but may apply for student loans and federal grants. Eligibility for federal student aid is limited to the equivalent of 15 quarters of full-time undergraduate enrollment, including course work taken at other colleges and universities.

For additional detailed information, refer to the FAO web site at http://financialaid.stanford.edu.

APPLICANT DOCUMENTS

U.S. citizens and U.S. permanent residents who wish to be considered for all available funding administered by Stanford should submit the following documents:

1. Free Application for Student Aid (FAFSA): file online at http://fafsa.ed.gov. Stanford’s school code is 001305. Freshman applicants who are California residents must file the FAFSA and submit a GPA Verification Form to the California Student Aid Commission (CSAC) by March 2, 2010, for Cal Grant consideration.

3. Copies of parents’ 2009 W-2 forms. Continuing students who submit copies directly to the FAO. New applicants should submit copies of parents’ 2009 federal tax returns and W-2 forms to the CSS IDOC service.

U.S. citizens and U.S. permanent residents who wish to apply only for federal aid consideration do not need to file the CSS PROFILE; they should file the FAFSA and submit tax documents directly to the FAO.

New International students should submit the CSS PROFILE application online at http://profileonline.collegeboard.com. The Certification of Finances form available from our web site should be submitted directly to the FAO. Canadians should also submit tax documents as listed above. Continuing international students will be asked to submit the International Student Financial Aid Application and Certification of Finances directly to the FAO.

Students whose application materials are filed after the priority filing deadlines or who have not secured all external need-based funds such as Pell and Cal Grants can expect higher amounts of student responsibility in their financial aid packages.

Applicants and their parents are required to submit accurate and complete information on all application documents. The University participates in the U.S. Department of Education’s Quality Assurance Program to evaluate the accuracy of aid application data. As part of this program, the FAO may request additional documentation to verify reported data. Students who fail to submit the requested documentation will have their financial aid funds withheld or canceled and their future registration placed on hold. Financial aid awards may change as a result of the verification process.

NOTIFICATION DATES

In December, the FAO notifies Restrictive Early Action applicants who apply by the November filing date of their estimated financial aid award. The FAO notifies freshman applicants who apply by the February 15 filing date in early April. Transfer applicants who apply by the March 15 filing date are normally notified of their financial aid award within five days of their notice of admission.

The FAO sends notification of award eligibility to continuing and returning applicants early June through August 1. Applicants who file after the priority filing date may not have a financial aid award or funds secured for disbursement by the Autumn Quarter payment due date.

Financing Options—The federal PLUS loan program is available to help parents who are U.S. Citizens or Permanent Residents cover all or part of the expected family contribution through a fixed-interest, long-term loan. PLUS loans are available to all parents who meet credit requirements regardless of their computed financial need. See the Financial Aid Office web site at http://financialaid.stanford.edu for details on the PLUS program. Parents should also contact their employers for information about what may be available to them as employees’ benefits to help meet college costs.

GRADUATE FINANCIAL AID

Graduate students at Stanford receive funding from a variety of sources. University fellowships, research assistantships, and teaching assistantships are offered primarily to doctoral students. In some cases, master’s students also may receive fellowships and assistantships. In addition, outside agencies provide fellowships to many graduate students at Stanford. Students without fellowships or assistantships, and those whose funding does not cover all of their costs, may need to use student loans, savings, other personal assets, a spouse’s earnings, or parental support to meet their educational expenses.

FELLOWSHIPS AND ASSISTANTSHIPS

Fellowships, research assistantships, and teaching assistantships are important parts of the educational program for graduate students at Stanford. Schools and/or departments determine eligibility for University fellowships and assistantships on the basis of academic merit, program, and the availability of funds. Some departments admit only those students to whom they can offer support or who have guaranteed funds from outside sources. Other departments may offer admission without being able to provide fellowship or assistantship funding.

Fellowship and assistantship funding is provided so that students may focus on their studies; concurrent employment is therefore limited. Students with full assistantships are limited to eight additional hours of employment per week. Students on full fellowships may be paid for up to eight additional hours per week, or may hold a supplemental assistantship appointment up to a maximum of 25% with no additional hourly employment. International students who have Stanford assistantships may not work more than 20 hours per week, including the time required for their assistantship appointments. In Summer Quarter, graduate students who are not required to enroll full-time may be allowed additional employment.

Application procedures and deadlines for admission and University funding are described in the Guide to Graduate Admission and at http://gradadmissions.stanford.edu. Fellowships and assistantships are normally awarded to incoming students between March 15 and April 15, in accordance with the Council of Graduate Schools resolution. Acceptance of University funding obliges the student to inform the department of any additional funds received in such cases, Stanford funding may be adjusted (see “Outside Fellowships” below). Recipients of all graduate fellowships and assistantships must enroll in courses for each quarter of their appointment. Students may make arrangements with Student Financial Services to have their assistance salary credited directly to the University bill through a payroll deduction plan.

OUTSIDE FELLOWSHIPS

Many graduate students hold fellowships won in national competition from outside agencies such as the National Science Foundation. Information on application procedures and terms of such fellowship programs may be obtained from the applicant’s current academic institution or the national office of the agency administering the program. A student who receives support from an out-
side source must notify his or her Stanford academic department immediately; Stanford funding may be adjusted.

**STUDENT LOANS (GRADUATE STUDENTS)**

Graduate students can apply for federal and private student loans through the University’s Financial Aid Office (FAO). Available programs include federal Stafford loans, federal Perkins loans, and federal graduate/professional PLUS loans. Information on these loan programs is available at http://financialaid.stanford.edu or by calling the FAO at (650) 723-3058. Students who are not U.S. citizens or U.S. permanent residents are not eligible for federal student loans.

Application—Students in the Schools of Business, Law, and Medicine (M.D. program) should consult their schools for loan application instructions. The following loan application requirements apply to graduate students in the Schools of Earth Sciences, Education, Engineering, Humanities and Sciences, and Medicine (Ph.D. only):

1. Free Application for Federal Student Aid (FAFSA); file online at http://fafsa.ed.gov. Stanford’s school code is 001305.

Students should complete the application process at least two months prior to the beginning of the quarter in which they need the funds. The FAO determines eligibility for student loans based on a review of FAFSA and application data, satisfactory academic progress, level of indebtedness, credit history, and availability of funds. Student loan eligibility may be affected by fellowship, assistantship, and other funding; total funding, including student loans, may not exceed the expense budget as determined by the FAO.

Emergency funds—Students may request a cash advance from Student Financial Services. Cash advances may not be used to pay University bills.

**COTERMINAL STUDENT FINANCIAL AID**

Coterminal students, who are concurrently pursuing bachelor’s and master’s degrees, may receive University fellowships and assistantships only after completing 180 units. Most private and federal graduate fellowships are awarded only to students who have received their bachelor’s degrees. Stanford undergraduate scholarships and grants are reserved for students in their first four years of undergraduate study.

**VETERANS’ EDUCATIONAL BENEFITS**

Liaison between the University, its students, and the various federal, state, and local agencies concerned with veterans’ educational benefits is provided by the Office of the University Registrar. All students eligible to receive veterans’ educational benefits while attending the University are urged to complete arrangements with the appropriate agency well in advance of enrollment. In addition, students must have their department approve their study lists as meeting graduation requirements before the Office of the University Registrar can certify the courses for Veterans Affairs.

To comply with federal regulations concerning credit for previous training (38 CFR 21.4253), Stanford University is required to evaluate all previous education and training completed elsewhere to determine what credit, if any, should be granted to students eligible to receive Veterans Affairs (VA) educational benefits. Stanford is required to complete an evaluation; credit is granted when appropriate. Credit is evaluated toward the degree program registered with Veterans Affairs as determined by the Office of the University Registrar in conjunction with the relevant academic department(s) or program(s). All relevant policies regarding transfer credit apply. In addition, this evaluation occurs again each time a student’s degree program is changed.

Subject to current federal and University guidelines, students eligible for receipt of VA educational benefits have their prior education and training evaluated up to the credit limits outlined in the "Residency Policy for Graduate Students" section of this bulletin. As an exception to that policy, students in master’s programs in the schools of Earth Sciences, Education, Engineering, Humanities and Sciences, Law, Medicine, and Graduate Business are allowed a maximum of 6 transfer (quarter) units.

Stanford University is required to certify only those courses that meet minimum graduation requirements. Courses not directly related to a student’s degree program or courses beyond those required for a specific degree program are not certified.
TUITION, FEES, AND HOUSING

Regular tuition for the 2009-10 academic year, payable Autumn, Winter, and Spring quarters, is as follows:

- All departments and schools (except those below) $12,460
- Graduate Division in Engineering $13,280
- Graduate School of Business, first year $17,107
- Graduate School of Business, second year $16,307
- School of Medicine (M.D. Program) $15,006
- School of Law (now on quarter system) $14,140
- J.D./M.B.A. Program $17,107

For complete tuition information, see the Registrar’s tuition web site at http://registrar.stanford.edu/students/finances.

Regular tuition rates and policies apply to the undergraduate Overseas Studies and Stanford in Washington programs. For Summer Quarter tuition rates and policies, see http://registrar.stanford.edu/students/finances/summer or the Summer Quarter Time Schedule.

A coterminally matriculated student is subject to graduate tuition assessment and adjustment policies once graduate standing is reached. Coterminal students should see the student policies and procedures for tuition assessment, as described under "Residency and Unit Requirements in Coterminal Programs" in the “Graduate Degrees” section of this bulletin.

Eligibility for registration at reduced tuition rates is described below. Tuition exceptions may also be made for illness, disability, pregnancy, new-parent relief, or other instances at the discretion of the University. No reduction in tuition charges is made after the first two weeks of the quarter.

All students are advised, before registering at less than the regular full-tuition rate, to consider the effects of that registration on their degree progress and on their eligibility for financial aid and awards, visas, deferment of student loans, and residency requirements.

The University reserves the right to change at any time, without prior notice, tuition, room fees, board fees, or other charges.

UNDERGRADUATE TUITION

During Autumn, Winter, and Spring quarters, undergraduates are expected to register at the regular full-tuition rate.

During Summer Quarter, Stanford undergraduates may register on a unit-basis (minimum 3 units). For Summer Quarter tuition rates and policies, see http://registrar.stanford.edu/students/finances/summer.htm or the Summer Quarter Time Schedule.

The following reduced-tuition categories can be requested by matriculated undergraduate students in the final stages of their degree program:

1. Permit to Attend for Services Only (PSO)—Undergraduates completing honors theses, clearing incompletes, or requiring a registration status, and who meet the PSO conditions listed in the "Special Registration Statuses (Undergraduate)" section of this Bulletin, may petition for PSO status one time only in their terminal quarter. The PSO rate is $3,765 per quarter in 2009-10.
2. 13th Quarter—Undergraduates who meet the 13th Quarter conditions listed in the "Special Registration Statuses (Undergraduate)" section of this Bulletin may petition one time only to register for a minimum of eight units. For per-unit tuition rates, see the Registrar’s web site at http://registrar.stanford.edu/students/finances.

3. Graduation Quarter—Undergraduates may petition to register for Graduation Quarter registration status in the quarter in which they are receiving a degree if they are not using any University resources, have completed all University requirements, and meet the Graduation Quarter conditions listed in the "Special Registration Statuses (Undergraduate)" section of this bulletin. The Graduation Quarter rate is $100 per quarter in 2009-10.

GRADUATE STUDENT TUITION

Matriculated graduate students are expected to enroll for at least eight units during the Autumn, Winter and Spring quarters. Schools and departments may set a higher minimum. During the Autumn, Winter, and Spring quarters, matriculated graduate students in most departments may register at the 8-, 9-, or 10-unit rate if their enrollment plans are accepted by their departments. Students in the schools of Law and Business, or the M.D. program in the School of Medicine, should consult appropriate school officers about tuition reduction eligibility.

Matriculated graduate students who have Stanford fellowships or assistantships that require less than full-tuition registration may register at the unit rate required by their award. Honors Cooperative students register at the unit rate.

During the Summer Quarter registration is not required by Stanford University and does not substitute for registration during the academic year. Students are required to be enrolled Summer Quarter if, during that quarter, they will meet any of the criteria listed in the "Enrollment Requirements" section of the "Graduate Degrees" section of this bulletin. Graduate students who do enroll Summer Quarter may reduce their enrollment to a minimum of one unit (charged on a per-unit basis, with a minimum tuition charge at the 1-3 unit rate) unless the terms of a fellowship or other financial support, or of their particular degree program, require a higher level of enrollment. TGR students who enroll in summer pay the TGR rate and must enroll in the required zero-unit course. Students in the schools of Law, Business, or the M.D. program should consult appropriate school officers regarding summer enrollment requirements. Students possessing an F1 or J1 student visa may be subject to additional course enrollment requirements in order to retain their student visas.

Tuition exceptions may also be available for students who are faculty spouses, regular Stanford employees, or full-time educators in the Bay Area.

Nonmatriculated graduate students pay the same tuition rates as matriculated students, but must register for at least 8 units. Visiting researchers pay the Permit for Services Only (PSO) rate; they may not enroll in or audit courses. Within certain restrictions, postdoctoral scholars may enroll in courses if the appropriate unit rate for tuition is paid.

The following reduced-tuition categories can be requested by matriculated graduate students in the final stages of their degree programs:

1. Terminal Graduate Registration (TGR)—Doctoral students, master’s students, and students pursuing Engineer degrees who have completed all degree requirements other than the University oral exam and dissertation (doctoral students) or a required project or thesis (Engineer or master’s students) and meet the conditions listed in the "TGR" section of this bulletin may request Terminal Graduate Registration tuition status.

Each quarter, TGR students must enroll in the 801 (for master’s and Engineer students) or 802 (for doctoral students) course in their department for zero units, in the appropriate section for their adviser. TGR students register at a special tuition rate: $2,760 per quarter in 2009-10. TGR students may enroll in up to 3 units of course work per quarter at this tuition rate. Within certain restrictions, TGR students may enroll in additional courses at the applicable unit rate. The additional courses cannot be applied toward degree requirements since all degree requirements must be complete in order to earn TGR status.
2. **Graduate Tuition Adjustment**—Graduate students who need fewer than 8 units to complete degree requirements or to qualify for TGR status, may register for one quarter on a unit basis (3 to 7 units) to cover the deficiency. This status may be used only once during a degree program. For per-unit tuition rates, see the Registrar’s tuition web site at http://registrar.stanford.edu/students/finances.

3. **Graduation Quarter**—Registration is required for the term in which a student submits a dissertation or has a degree conferred. Students who meet the conditions listed in the “Graduation Quarter” section of this bulletin are eligible to be assessed a special tuition rate of $100 per quarter in which they are receiving a degree.

### INTERNATIONAL STUDENTS

F-1 or J-1 visas are required by the U.S. Department of Homeland Security. International students must be registered as full-time students during the academic year. Summer Quarter registration is not required unless the I-20/DS-2019 notes the Summer Quarter as the start date. International graduate students comply with immigration regulations while enrolled for partial tuition if their Stanford fellowships or assistantships require part-time enrollment, if they are in TGR status, or if they are in the final quarter of a degree program. Nonmatriculated international students must register for at least 8 units.

### APPLICATION FEE

Contact the Undergraduate Admission Office for information about the undergraduate application fee and the Graduate Admission section of the Office of the University Registrar for the current graduate application fee. Application fees for the School of Law, the School of Medicine, and the Graduate School of Business vary by program. Fees are payable at the time of application and are not refundable.

### ASSU FEES

The Associated Students of Stanford University (ASSU) fees are established by student vote in Spring Quarter. Fees directly fund activities of student organizations and not operations of ASSU. The 2009-10 fees are:

- **Undergraduates**—$119 per quarter
- **Graduate Students**—$29 per quarter

Fees are assessed each term. All fees are refundable. Refunds can be requested during the first three weeks of each quarter on the ASSU web site at http://assu.stanford.edu. Those eligible are mailed refund checks by the eighth week of the quarter.

### DOCUMENT FEE

Stanford charges a one-time Document Fee to all students admitted to new degree or non-degree programs in 1993 or later. The fee is paid once only, regardless of the number of degrees a student may ultimately pursue. It covers the cost of a variety of University administrative services such as enrollment and degree certification, course drops and adds done in Axess before published deadlines, diplomas, official transcripts and their production, and credential files maintained by the Career Development Center.

### CAMPUS HEALTH SERVICE FEE

All students enrolled on the main Stanford campus are required to pay the Campus Health Service Fee. The Campus Health Service Fee covers most of the services provided by Vaden Health Center, including primary care medical visits, psychological evaluation and short-term therapy at Counseling and Psychological Services (CAPS), and health and wellness programs. The services provided by Vaden Health Center are not covered by Cardinal Care or a student’s private health insurance. More information and answers to questions about the fee can be found at http://vaden.stanford.edu/fees/index.

### HEALTH INSURANCE

The University requires all registered students to carry medical insurance to provide coverage for services not provided by Vaden Health Center. Students are enrolled in and charged for the Stanford student health insurance plan, Cardinal Care, unless they have completed waiver procedures by the waiver deadline. See http://vaden.stanford.edu/insurance/using_your_own.html#waive for details. Those who carry medical insurance through an alternate carrier are generally eligible for waiver of the Stanford student health insurance plan.

### SPECIAL FEES

- **New Student Orientation Fee**—A fee is charged to all entering undergraduates for the costs of orientation, including room and board, and for the cost of class dues to provide funds for later activities of the class.
- **School of Law Course Materials Fee**—A fee is charged each quarter to School of Law students for supplementary course materials.
- **Graduate School of Business M.B.A. Course Reader Fee**—A fee is charged each quarter to M.B.A. students in the Graduate School of Business to cover the cost of in-class handouts and copy rights.
- **Late Fees**—Charges are imposed for late submission of study lists. The amount is listed in the quarterly Time Schedule.
- **Laboratory Fee**—Students in chemistry laboratory courses are charged a nonrefundable fee.
- **Music Practice; Athletics, Physical Education, Recreation; and Dance Courses**—For which special fees are charged are indicated in the Time Schedule.
- **Dissertation Fee**—Each Ph.D. and D.M.A. candidate is charged a fee to cover the cost of microfilming and binding the dissertation and the cost of publishing the abstract.
- **International Scholar Service Fee**—A one-time fee for visa authorization documents is charged to international postdoctoral and visiting scholars.

### PAYMENTS

By accepting Stanford’s offer of admission and enrolling in classes, each student accepts responsibility for paying all debts to the university, including tuition and fees, for which he or she is liable.

All charges and credits from offices within the University are aggregated in a student’s individual account and presented on the University Bill. Student Financial Services sends the University Bill electronically to students monthly. Students may view their account online 24 hours a day, seven days a week, via Stanford ePay at http://axess.stanford.edu. Payments can be made online through Stanford ePay or the bill and a payment stub may be printed.
Term fees, such as tuition, fees, room, board, and health insurance, are due and must be received on the 15th of the month. Online payments via Stanford ePay can be made up to midnight PST on the 15th of the month. Mailed payments must be postmarked by 5:00 p.m. on the 15th of the month.

After the start of the term, adding units may result in additional tuition charges. Other fees, such as room damage repair charges, petition fees, late fees, lab fees, and other miscellaneous fees, are due after they are billed.

Fees may be paid: via Stanford ePay (preferred); by mail at 632 Serra Street, Room 150, Stanford, CA 94309-6036; in person at the Cashier’s Office, Maude Modular, 632 Serra Street, Room 150; or at the 24-hour secure drop box on the wall outside the staff entrance to Maude. The Cashier’s Office is open from 9:00 a.m. to 5:00 p.m., Monday through Friday, excluding University holidays. Payments received in the drop box after 5:00 p.m. are processed the following business day.

An individual’s registration as a Stanford student constitutes his or her agreement to make timely payment of all amounts due.

ACCOUNT FEES AND ACTIONS

Late Fees—The University must receive the full amount due on or before the due date indicated on the bill. If full payment is not received by the due date, a late fee of 1.0% of the amount past due may be assessed. Anticipated aid (aid that has been accepted but not disbursed and is shown on the student account) reduces the total amount due prior to late fees being applied.

Holds—Accounts that become past due more than 30 days are subject to financial holds. A financial hold blocks transcripts, diplomas, and enrollment eligibility.

Nonsufficient Funds—Checks or eCheck payments returned due to insufficient funds have already been submitted twice to the bank. A non-refundable $25.00 administrative fee is assessed. In addition, student accounts are subject to holds and late payment penalties may apply.

Delinquent Accounts—Delinquent accounts may be reported to one or more of the national credit reporting agencies. Severely delinquent accounts may be referred to a collection agency and/or placed in litigation in accordance with state and federal laws. Students with delinquent accounts may be held responsible for collection costs, attorney fees, and court costs.

FORMS OF PAYMENT

The preferred method of payment is electronic check (eCheck) using the online service, Stanford ePay. There is no fee associated with eCheck. In addition to Stanford ePay, Stanford accepts the following forms of payment: personal check, cashier’s check, money order, travelers checks in U.S. funds drawn on U.S. banks, cash, and wire transfer (recommended for foreign students, see http://fingate.stanford.edu/students/universbill/payment_methods.html#wire_transfer for wire transfer instructions). Stanford does not accept postdated checks.

PAYMENT PLAN

Effective August 20, 2009, Stanford will offer a Payment Plan allowing students to pay their tuition and other standard quarterly charges over a three-month period. A small setup fee of $25 will be charged when a student enrolls in the Payment Plan. Students will have the option of enrolling each quarter. Enrollment instructions will be available on or before August 20, 2009, on the Overview: University Bill Payment methods page of the Gateway to Financial Activities site, see http://fingate.stanford.edu/students/universbill/payment_methods.html#payment_plan.

MEAL PLANS

For latest information see http://dining.stanford.edu.

Stanford University’s Residential Education program promotes the philosophy that living and learning are integrated and that formal teaching, informal learning, and personal support in residences are integral to a Stanford education. Meals play a key role in this mission of community building, leading, and learning. Therefore, residents of specially designated University residence halls (Braniner, Crothers/Crothers Memorial, Florence Moore, Lakeside, Manzanita, Murray, Ricker, Stern, Toyon, Wilbur, and Yost) are required to participate in a Stanford Dining meal plan. Stanford Dining is committed to excellence by providing meal plans that offer significant value, the highest quality, and maximum flexibility of dining across campus.

Stanford Dining serves 19 meals each week: breakfast, lunch and dinner, Monday through Friday, and brunch and dinner on the weekends. There are three meal plans to choose from: 19 meals/week, 14 meals/week plus Meal Plan Dollars, and 10 meals/week plus Meal Plan Dollars.

Stanford Meal Plan Rates are available at the Stanford Dining web site.

REFUNDS

Students who withdraw from the University before the end of a term may be eligible to receive refunds of portions of their tuition.

ANNULLED REGISTRATION

Students who take a leave of absence or summer annulment from the University voluntarily before the first day of instruction may have their registrations annulled. Tuition is refunded in full. Such students are not included in University records as having registered for the term and new students do not secure any privileges for admission for any subsequent quarter as returning students. An annulment does not automatically cancel health coverage unless the annulment is granted before the first day of instruction. Financial aid recipients should be aware that a proportion of any refund is returned to the various sources of aid.

CANCELLATION OF REGISTRATION OR SUSPENSION FOR CAUSE

Students who have their registrations canceled or are suspended from the University for cause receive refunds on the same basis as those receiving leaves of absence unless otherwise specified in the disciplinary action taken. A student whose registration is canceled less than one week after the first day of instruction for an offense committed during a preceding quarter receives a full refund of tuition fees.

INSTITUTIONAL INTERRUPTION OF INSTRUCTION

It is the University’s intention to do everything reasonably possible to avoid taking the actions described in this paragraph. However, should the University determine that continuation of some or all academic and other campus activities is impracticable, or that their continuation involves a high degree of physical danger to persons or property, activities may be curtailed and students requested or required to leave the campus. In such an event, arrangements are made as soon as possible to offer students the opportunity to complete their courses, or substantially equivalent work, so that appropriate credit may be given. Alternatively, the University may determine that students receive refunds on the same basis as those receiving leaves of absence, or on some other appropriate basis.
LEAVES OF ABSENCE

A student in good standing who desires or is required to take a leave of absence from the University after the first day of instruction, but before the end of the first 60 percent of the quarter, may file a petition for a leave of absence and tuition refund with the Student Services Center. A leave of absence after the first 60 percent of the quarter is only granted for approved health and emergency reasons. For more information on leaves of absence, undergraduates should see the "Leaves of Absence and Reinstatement (Undergraduate)" section of this bulletin, and graduate students should see the "Leaves of Absence and Reinstatement (Graduate)" section of this bulletin.

TUITION REFUND SCHEDULE

Students who take an approved leave of absence or summer annulment are eligible for a tuition refund during the first 60 percent of the quarter. Refunds are calculated on a per diem basis (including weekends and University holidays) starting the first day of instruction of each quarter. Tuition is charged on a daily basis (including weekends and holidays) through the first 60 percent of the quarter. After the first 60 percent of the quarter, students are liable for the full amount of tuition that they were charged. Health insurance charges are not refundable after the first day of instruction.

Per Diem Tuition Charges for Students Who Take a Leave of Absence

</table>

Last Date for Tuition Refund:
- Nov. 9
- Feb. 18
- May 12
- July 24

For example: an undergraduate, who was charged the tuition rate of $12,010 for Autumn Quarter, becomes ill and informs the Student Services Center on the 10th day of the quarter that he or she wants to take a leave of absence. If the petition is approved, the student is charged for 10 days of tuition (10 days x $141.46 per day) or $1,414.60.

Separate schedules exist for students paying the medical, law, graduate business, or summer session rates. These schedules are available at the Student Services Center or at http://registrar.stanford.edu/students/finances.

Tuition refunds are calculated based on the date that the student last attended classes.

Students may not be entitled to any financial aid credits such as federal loans or University scholarships or grants that were previously placed on their accounts. The Financial Aid Office can confirm any amounts that may have been withdrawn from a student’s account as a result of not being enrolled.

The amount refundable based on the criteria outlined above, an overpayment of fees, or financial aid awards in excess of fees is presented on the University Bill in Stanford ePay or on Axess. Refunds are processed routinely throughout the term. Refunds may be requested via HelpSU (http://helpsu.stanford.edu, request category Student Services, request type University Bill/Student Account), in person at the Student Services Center (2nd floor of Tresidder Memorial Union, 459 Lagunita Drive) or by phone at (650) 723-7772 or (866) 993-7772 (toll-free). The Student Services Center is open Monday through Friday, 9 a.m. to 5 p.m., except University holidays.

Direct Deposit is Stanford University’s standard method for processing student refunds. Students are advised to maintain up-to-date direct deposit details in Axess. Students who have not established direct deposit receive a check mailed to the mailing address as recorded in Axess. Checks for those without a mailing address are sent to the permanent home address.

Tuition payments made to the University under certain specific tax benefit programs prohibit tuition refunds to the student or donor. For more information about these programs, contact the Student Services Center.

ROOM AND MEAL PLAN REFUNDS

Students assigned to a University residence are subject to the terms of the University Residence Agreement, and are required to live in University Housing for the full duration of their signed contract. The text of the University Residence Agreement is available at http://www.stanford.edu/dept/rde/shs/res_agree.htm.

Room refunds are made only when students move out of the residence system and graduate from or cease to be enrolled at the University. Eligibility for refunds is listed in the Residence Agreement and in the online termination form at http://onlinetoc.stanford.edu. Filing a termination of occupancy form and moving out of Student Housing does not necessarily entitle a student to a refund. Students in all-male fraternities or all-female sororities are billed directly by the fraternity or sorority, and refunds are arranged between the student and the fraternity or sorority.

A meal plan refund is based on the date when a student moves out of University residence and is approved under conditions as specified in the Residence Agreement. If a student uses the meal plan after that date, an additional daily charge incurs.

Any decision to refund prepaid room and meal plan charges or to waive liability for deferred charges is made at the sole discretion of the University. Students with questions about refunds should contact Housing Assignments for room refunds or the central office of Stanford Dining for residential meal plan refunds.

HOUSING

University housing is available to enrolled Stanford students. Student Housing, a division of Residential and Dining Enterprises, is responsible for managing, maintaining, and cleaning the physical plant of student residences; assigning students to housing; and operating the regional housing front desks. Information on University housing assignments, options, policies, application procedures, and deadlines may be obtained from Housing Assignments online at http://studenthousing.stanford.edu, by mail or in person at 630 Serra Street, Suite 110, Stanford University, Stanford, CA 94305-6034, by telephone at (650) 725-2810, or by email at housingsigns@lists.stanford.edu. Information regarding off-campus housing may be obtained from Community Housing at http://offcampus.stanford.edu, by mail or in person at 630 Serra Street, Suite 110, Stanford University, Stanford, CA 94305-6034, by telephone at (650) 723-3906, or by email at communityhousing@lists.stanford.edu. For other housing related information, email studenthousing@lists.stanford.edu or phone the main student housing office at (650) 725-1600.

The department of Residential Education (http://www.stanford.edu/dept/resed, 650-725-2800) and the Graduate Life Office (http://www.stanford.edu/group/glo, 650-723-1171) are responsible for planning educational programs, counseling, and crisis intervention by residence deans. In addition, Residential Education is responsible for administration of local undergraduate residence offices.

HOUSING RATES

Complete information on housing is available at http://housing.stanford.edu. Campus housing rates are generally below local area market rents.

All rates are per student and include utilities and coinless laundry. Room rates are charged quarterly on the University Bill. Information on payment options and procedures is discussed in housing assignment information from Housing Assignments and is available in complete detail from the Student Services Center, 2nd floor of Tresidder Memorial Union, 459 Lagunita Drive, Stanford University, Stanford, CA 94305-6036.

A quarterly house dues fee for students is generally determined by the local residence staff and/or residents of the house and may be included with room and board charges on their University Bill.

Students who live in housing are automatically assessed a telecommunication fee on their University Bill that covers in-room network connections and a land-line phone with basic telephone service.

**UNDERGRADUATE RESIDENCES**

Assignment to Undergraduate Residences—Approximately 95 percent of undergraduates live in University housing, not counting students studying abroad during the academic year. All freshmen and transfers are required to live in University residences for educational reasons and are automatically assigned housing following admission.

Residence assignments for continuing undergraduates are made on the basis of an annual lottery, called the Draw, and quarterly waiting lists. Undergraduates are guaranteed four years of University housing (two or three years for transfer students based on their entering class standing) if: 1) they are in compliance with the University housing agreement and University policies; 2) they apply by the appropriate Draw deadlines; and, 3) they are willing to live anywhere on campus. Undergraduate residences include traditional residence halls, language and culture residences, crosscultural theme houses, student-managed and cooperative houses, apartments, suites, fraternities, and sororities.

**COMMUNITY HOUSING**

Community Housing maintains computerized listings of private rooms, houses, and apartments in surrounding communities that are available to students who want to live off-campus. Students must make rental arrangements directly with landlords. Information on community housing may be obtained from Community Housing at [http://offcampus.stanford.edu](http://offcampus.stanford.edu), by mail or in person at 630 Serra Street, Suite 110, Stanford University, Stanford, CA 94305-6034, by telephone at (650) 723-3906, or by email at communityhousing@lists.stanford.edu. During early September, temporary accommodations are available in student residence halls at a modest charge for students seeking off-campus housing for Autumn Quarter. Contact Stanford Conference Services for more information at (650) 725-1429.

Single graduate students may request assignment to graduate apartments and residence halls, or to spaces in six undergraduate cooperative houses.

Couples without children may request assignment to either furnished or unfurnished one-bedroom apartments. Couple housing is available to students who are married and to students who have a same-sex or opposite-sex domestic partner. At Stanford University, a domestic partnership is defined as an established, long-term partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare.

One-, two-, and three-bedroom apartments (furnished and unfurnished) are provided for students with children, based on the number of dependents. Housing for students with children is available to married couples, domestic partners, and single parents who have dependent children living with them. Housing is not provided for extended families, including the parents and siblings of students, or live-in day care staff.

**GRADUATE RESIDENCES**

Assignment to Graduate Residences—Over 53 percent of matriculated graduate students live in Stanford student housing. Residence assignments are made on the basis of an annual lottery and quarterly waiting lists. New matriculated students are guaranteed University housing if: 1) they are in compliance with the University housing agreement and University policies; 2) they apply by the first round application deadline for the Autumn term; and, 3) they are willing to live anywhere on campus. Undergraduate residences include traditional residence halls, language and culture residences, crosscultural theme houses, student-managed and cooperative houses, apartments, suites, fraternities, and sororities.

After the first year, continuing matriculated graduate students are given priority for housing based on their academic degree program. Master’s students are given additional years of limited priority for housing. Limited priority years are not automatically cumulative, so students do not receive additional years of limited priority for subsequent degrees. If a student completes a master’s program and then moves to a doctoral program, they receive four additional limited priority years, which is the difference between the allocation for a master’s and a doctoral program. Students who live in residences that are open year-round and who remain in continuous occupancy in their rooms or apartments may renew their contracts annually if they meet certain eligibility requirements. Students who live in residences that are open only during the academic year, or who want to change residences, re-enter the lottery each year. Approximately 80% of continuing student applicants are assigned housing each year. Additional housing is under construction to better meet demand.
UNDERGRADUATE DEGREES AND PROGRAMS

DEGREE PROGRAMS

BACHELOR OF ARTS (B.A.), BACHELOR OF SCIENCE (B.S.)

Stanford University confers the degree of Bachelor of Arts (B.A.) or the degree of Bachelor of Science (B.S.) on those candidates who have been recommended by the Committee on Undergraduate Standards and Policy (C-USP), who have applied in advance for conferment of the degree, and who have fulfilled the following requirements:

1. A minimum of 180 units of allowable University work. (As described below, units above the allowable limits for activity courses and for courses taken on a satisfactory/no credit and credit/no credit basis cannot be counted towards the 180-unit minimum.)
2. The Writing, General Education, and Language Requirements (see below).
3. Curricular requirements of at least one major department or program and the recommendation of the department(s). (Descriptions of curricular and special degree requirements are included in each department’s section of this bulletin.)
4. Students admitted as freshmen Autumn 2001 and thereafter—A minimum of 135 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 135 units in resident work may petition for a waiver of the last quarter-in-residence requirement for up to 15 units.
5. Students admitted as freshmen prior to Autumn Quarter 2001 and students admitted as transfers—A minimum of 90 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 90 units in resident work may petition for a waiver of the last quarter-in-residence requirement.

Stanford confers the Bachelor of Science degree on candidates who fulfill these requirements in the School of Earth Sciences, in the School of Engineering, or in the departments of Applied Physics, Biology, Chemistry, Mathematics, or Physics in the School of Humanities and Sciences. The University also awards B.S. degrees to candidates in the Program in Science, Technology, and Society; in the Program in Mathematical and Computational Science; in the Program in Symbolic Systems; and, when appropriate, in the Program for Individually Designed Majors. Candidates who fulfill these requirements in other schools or departments receive the Bachelor of Arts degree.

Students who complete the requirements for two or more majors, which ordinarily would lead to the same degree (B.A. or B.S.), should review “The Major” section of this bulletin to ensure that they have an understanding of the requirements for multiple or secondary majors.

BACHELOR OF ARTS AND SCIENCE (B.A.S.)

The University confers the degree of Bachelor of Arts and Science (B.A.S.) on candidates who have completed, with no overlapping courses, the curricular requirements of two majors which ordinarily would lead to different bachelor’s degrees (that is, a Bachelor of Arts degree and a Bachelor of Science). These students must have applied in advance for graduation with the B.A.S. degree instead of the B.A. or B.S. degree, been recommended by the Committee on Undergraduate Standards and Policy (C-USP), and have fulfilled requirements 1, 2, and 4/5 above in addition to the requirements for multiple majors.

Students who cannot meet the requirements for both majors without overlapping courses are not eligible for the B.A.S., but may apply to have a secondary major recorded on their transcripts. (See “The Major” in the “Undergraduate Degrees and Programs” section of this bulletin.)

DUAL BACHELOR’S DEGREES (CONCURRENT B.A. AND B.S.)

A Stanford undergraduate may work concurrently toward both a B.A. and a B.S. degree. To qualify for both degrees, a student must complete:

1. A minimum of 225 units of University work. Units above the allowable limits for activity courses and for courses taken on a satisfactory/no credit and credit/no credit basis cannot be counted towards the 225 minimum.
2. The Writing, General Education, and Language requirements.
3. The curricular requirements of two majors (one of which leads to a Bachelor of Arts degree and the other to a Bachelor of Science degree).
4. Students admitted as freshmen Autumn Quarter 2001 and thereafter—A minimum of 180 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 180 units in resident work may petition for a waiver of the last quarter-in-residence requirement for up to 15 units.
5. Students admitted as freshmen prior to Autumn Quarter 2001 and students admitted as transfers—A minimum of 135 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 135 units in resident work may petition for a waiver of the last quarter-in-residence requirement.

A student interested in dual bachelor’s degrees should declare them in Axess no later than two quarters in advance of completing the program.

Students who do not meet the higher unit and residency requirements of the dual degree option may be eligible instead for the B.A.S. degree as described above.

SECOND BACHELOR’S DEGREE

Stanford does not award a second Bachelor of Arts degree to an individual who already holds a Bachelor of Arts, nor a Bachelor of Science degree to an individual who already holds a Bachelor of Science degree. However, the holder of a Bachelor of Arts degree from Stanford may apply to the C-USP Subcommittee on Academic Standing for admission to candidacy for a Bachelor of Science degree, and the holder of a Bachelor of Science degree from Stanford may apply for candidacy for a Bachelor of Arts degree. The C-USP Subcommittee on Academic Standing determines whether the application for a second degree may be approved and/or the conditions a student must meet in order to be allowed to earn a second degree. A recommendation of the major department for the second bachelor’s degree must accompany the application.

Generally, a holder of a B.A. or B.S. degree may not apply for the Bachelor of Arts and Sciences degree, although a student may submit a petition for exception. The Office of the Vice Provost for Undergraduate Education, Sweet Hall, reviews these petitions. A student approved for this program may register as an undergraduate and is subject to the current rules and regulations affecting undergraduates. Requirements for a second Stanford bachelor’s degree are the same as those described above for dual bachelor’s degrees.
COTERMINAL BACHELOR’S AND MASTER’S DEGREES

The coterminous degree program allows undergraduates to study for a master’s degree while completing their bachelor’s degree(s) in the same or a different department. Undergraduates with strong academic records may apply for admission to a coterminous master’s program upon completion of 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree. Full-time enrollment during Summer Quarters, as well as allowable undergraduate transfer credit, are also counted towards quarters of undergraduate study. Students who wish to apply for a master’s program after these deadlines must apply through the regular graduate admissions process.

To apply for admission to a coterminous master’s program, students must submit to the prospective graduate department the following: coterminous application, statement of purpose, preliminary program proposal, two letters of recommendation from Stanford professors, and a current Stanford transcript. Graduate Record Examination (GRE) scores or other requirements may be specified by the prospective department.

For coterminous students, the quarter following completion of 12 full-time undergraduate quarters is identified as the first graduate quarter for tuition assessment. Beginning with this quarter, coterminous students are subject to graduate student policies and procedures (including those described in the “Graduate Degrees” section of this bulletin) in addition to undergraduate minimum progress standards. These policies include continuous registration or leaves of absence for quarters not enrolled and minimal progress guidelines.

In the first graduate quarter, a coterminous student is assigned an adviser in the master’s department for assistance in planning a program of study to meet the requirements for the master’s degree. The plan is outlined on the Program Proposal for a Master’s Degree, which is approved by the master’s department by the end of the first graduate quarter. Authorizations for master’s programs expire three calendar years from the first graduate quarter. An extension requires review of academic performance by the department.

The specific University residency, unit requirement, and additional policies for a bachelor’s/master’s program are described under Coterminous Programs Residency Requirement in the “Graduate Degrees” section of this bulletin.

Conferral of each degree is applied for separately by the deadlines given in the Academic Calendar at http://registrar.stanford.edu/academic_calendar. The master’s degree must be conferred simultaneously with, or after, the bachelor’s degree.

DEGREE REQUIREMENTS

A LIBERAL EDUCATION

As do all major universities, Stanford provides the means for its undergraduates to acquire a liberal education, an education that broadens the student’s knowledge and awareness in each of the major areas of human knowledge, that significantly deepens understanding of one or two of these areas, and that prepares him or her for a lifetime of continual learning and application of knowledge to career and personal life.

The undergraduate curriculum at Stanford allows considerable flexibility. It permits each student to plan an individual program of study that takes into account personal educational goals consistent with particular interests, prior experience, and future aims. All programs of study should achieve some balance between depth of knowledge acquired in specialization and breadth of knowledge acquired through exploration. Guidance as to the limits within which that balance ought to be struck is provided by the University’s General Education Requirements and by the requirements set for major fields of study.

These educational goals are achieved through study in individual courses that bring together groups of students examining a topic or subject under the supervision of scholars. Courses are assigned credit units. To earn a bachelor’s degree, the student must complete at least 180 allowable units and, in so doing, also complete the Writing Requirement, the General Education Requirements, the Language Requirement, and the requirements of a major.

The purpose of the Writing Requirement is to promote effective communication by ensuring that every undergraduate can write clear and effective English prose. Words are the vehicles for thought, and clear thinking requires facility in writing and speech.

The Language Requirement ensures that every student gains a basic familiarity with a foreign language. Foreign language study extends the student’s range of knowledge and expression in significant ways, providing access to materials and cultures that otherwise would be out of reach.

The General Education Requirements provide guidance toward the attainment of breadth and stipulate that a significant share of a student’s work must lie outside an area of specialization. These requirements ensure that every student is exposed to different ideas and different ways of thinking. They enable the student to approach and to understand the important ways of knowing to assess their strengths and limitations, their uniqueness, and, no less important, what they have in common with others.

Depth, the intensive study of one subject or area, is provided through specialization in a major field. The major relates more specifically to a student’s personal goals and interests than do the general requirements outlined above. Stanford’s curriculum provides a wide range of standard majors through its discipline-oriented departments, a number of interdisciplinary majors in addition to department offerings, and the opportunity for students to design their own majors programs.

Elective courses, which are not taken to satisfy requirements, play a special role in tailoring the student’s program to individual needs. For most students, such courses form a large portion of the work offered for a degree. Within the limitations of requirements, students may freely choose any course for which previous studies have prepared them.

Following are more detailed descriptions of these various requirements and the rationales upon which they are based.

GENERAL EDUCATION REQUIREMENTS

PURPOSE

The General Education Requirements are an integral part of undergraduate education at Stanford. Their purpose is: 1) to introduce students to a broad range of fields and areas of study within the humanities, social sciences, natural sciences, applied sciences, and technology; and 2) to help students prepare to become responsible members of society. Whereas the concentration of courses in the major is expected to provide depth, the General Education Requirements have the complementary purpose of providing breadth to a student’s undergraduate program. The requirements are also intended to introduce students to the major social, historical, cultural, and intellectual forces that shape the contemporary world.

Fulfillment of the General Education Requirements in itself does not provide a student with an adequately broad education any more than acquiring the necessary number of units in the major qualifies the student as a specialist in the field. The major and the General Education Requirements are meant to serve as the nucleus around which the student is expected to build a coherent course of study by drawing on the options available among the required and elective courses.

Information regarding courses that have been certified to fulfill the General Education Requirements, and regarding a student’s status in meeting these requirements, is available at the Student Services Center. Course planning and advising questions related to the General Education Requirements should be directed to Undergraduate Advising and Research.
It is the responsibility of each student to ensure that he or she has fulfilled the requirements by checking in Axess. This should be done at least two quarters before graduation.

Students should be very careful to note which set of General Education Requirements apply to them. The date of matriculation at Stanford determines which requirements apply to an individual student.

During Autumn Quarter 2004-05, the Academic Senate approved modifications to undergraduate General Education Requirements that became effective Autumn Quarter 2005-06 for all matriculated undergraduates who entered Stanford in Autumn Quarter 2004-05 or later.

The purpose of these modifications was 1) to give students a fuller and more articulate understanding of the purposes of the requirements and of a liberal arts education that these requirements embody; 2) to make a place in the curriculum for ethical reasoning to help make students aware of how pervasive ethical reasoning and value judgments are throughout the curriculum, and 3) to provide some greater freedom of choice by reducing the GERs by one course.

**AREA REQUIREMENTS**

The following structure for General Education Requirements became effective with the 2005-06 entering freshman and transfer class:

- **Introduction to the Humanities**—one quarter introductory courses followed by two quarter thematic sequences.
- **Introduction to the Humanities** builds an intellectual foundation in the study of human thought, values, beliefs, creativity, and culture. Courses introduce students to methods of inquiry in the humanities: interdisciplinary methods in Autumn Quarter and discipline-based methods in Winter and Spring quarters.
- **Disciplinary Breadth**—requirement satisfied by completing five courses of which one course must be taken in each subject area.
- **Disciplinary Breadth** gives students educational breadth by providing experience in the areas of Engineering and Applied Sciences, Humanities, Mathematics, Natural Sciences, and the Social Sciences.
- **Education for Citizenship**—requirement satisfied by completing two courses in different subject areas; or completing two Disciplinary Breadth courses which also satisfy different Education for Citizenship subject areas.
- **Education for Citizenship** provides students with some of the skills and knowledge that are necessary for citizenship in contemporary national cultures and participation in the global cultures of the 21st century. Education for Citizenship is divided into four subcategories: Ethical Reasoning, the Global Community, American Cultures, and Gender Studies.

- **Ethical Reasoning**—Courses introduce students to the pervasiveness, complexity, and diversity of normative concepts and judgments in human lives, discuss ethical concerns that arise about normative practices, review ways in which people have engaged in ethical reflection, and consider ethical problems in light of diverse ethical perspectives.

- **The Global Community**—Courses address the problems of the emerging global situation. They may compare several societies in time and space or deal in depth with a single society, either contemporary or historical, outside the U.S. Challenges of note: economic globalization and technology transfer; migration and immigration; economic development, health; environmental exploitation and preservation; ethnic and cultural identity; and international forms of justice and mediation.

- **American Cultures**—Courses address topics pertaining to the history, significance, and consequences of racial, ethnic, or religious diversity in the culture and society of the U.S. Challenges of note: equity in education; employment and health; parity in legal and social forms of justice; preserving identity and freedom within and across communities.

**LANGUAGE REQUIREMENT**

To fulfill the Language Requirement, undergraduates who entered Stanford in Autumn 1996 and thereafter are required to complete one year of college-level study or the equivalent in a foreign language. Students may fulfill the requirement in any one of the following ways:

1. Complete three quarters of a first-year, 4-5 units language course at Stanford or the equivalent at another recognized post-secondary institution subject to current University transfer credit policies. Language courses at Stanford may be taken with the credit/no credit grading basis to fulfill the requirement.
2. Score 4 or 5 on the Language Advanced Placement (AP) test in one of the following languages: Chinese, French, German, Japanese, Latin, or Spanish. Advanced Placement (AP) tests in foreign literature do not fulfill the requirement.
3. Achieve a satisfactory score on the SAT II Subject Tests in the following languages taken prior to college matriculation:
   - Chinese: 630
   - Italian: 630
   - French: 640
   - Japanese: 620
German 630  Korean 630
Latin  630  Hebrew  540
Spanish  630

4. Take a diagnostic test in a particular language which either:
a. Places them out of the requirement, or
b. Diagnoses them as needing one, two, or three additional quarters of college-level study. In this case, the requirement can then be fulfilled either by passing the required number of quarters of college-level language study at Stanford or the equivalent elsewhere, or by retaking the diagnostic test at a later date and placing out of the requirement.

Written placements are offered online throughout the summer in Chinese, French, German, Italian, Japanese, Russian, Spanish, and Spanish for home background speakers.

For a full description of Language Center offerings, see the “Language Center” section of this bulletin under the school of Humanities and Sciences.

WRITING AND RHETORIC REQUIREMENT

All instructors at Stanford University expect students to express themselves effectively in writing and speech. The Writing and Rhetoric requirement helps students meet those high expectations.

All candidates for the bachelor’s degree, regardless of the date of matriculation, must satisfy the Writing and Rhetoric requirement. Transfer students are individually reviewed at the time of matriculation by the Office of the University Registrar’s Degree Progress section and, if necessary, the Program in Writing and Rhetoric (PWR) as to their status with regard to the requirement.

The current Writing and Rhetoric requirement, effective beginning 2003, includes courses at three levels. The first two levels are described in more detail below. Writing-intensive courses that fulfill the third level, the Writing in the Major (WIM) requirement, are designated under individual department listings.

All undergraduates must satisfy the first-level Writing and Rhetoric requirement (WR 1) in one of three ways:
1. PWR 1: a course emphasizing writing and research-based argument.
2. SLE: writing instruction in connection with the Structured Liberal Education program.
3. Transfer credit approved by the Office of the University Registrar’s Degree Progress section for this purpose.

All undergraduates must satisfy the second-level Writing and Rhetoric Requirement (WR 2) in one of four ways:
1. PWR 2, a course emphasizing writing, research, and oral presentation of research.
2. SLE: writing and oral presentation instruction in connection with the Structured Liberal Education program.
3. A course offered through a department or program certified as meeting the WR 2 requirement by the Writing and Rhetoric Governance Board. These courses are designated as Write-2.
4. Transfer credit approved by the Office of the University Registrar’s Degree Progress section for this purpose.

A complete listing of PWR 1 courses is available each quarter on the UAL web site at http://ual.stanford.edu/AP/univ_reg/PWR/Courses, and at the PWR office in Sweet Hall, Third Floor. Complete listings of PWR 2 and Write-2 courses are available to students on the UAL web site the quarter before they are scheduled to complete the WR 2 requirement.

For a full description of the Program in Writing and Rhetoric (PWR), see the “Writing and Rhetoric” section of this bulletin under the Vice Provost of Undergraduate Education.

Students who matriculated prior to Autumn 2003 should consult previous issues of the Stanford Bulletin or the PWR office to determine what requirements apply.

CREDIT

ADVANCED PLACEMENT

Stanford University allows up to 45 units of external credit toward graduation including work completed in high school as part of the College Entrance Examination Board (CEEB) Advanced Placement curriculum. The awarding of such credit is based on CEEB Advanced Placement test scores and is subject to University and department approval.

The faculty of a given department determine whether any credit toward the 180-unit requirement can be based on achievement in the CEEB Advanced Placement Program in their discipline. Stanford departments electing to accept the Advanced Placement (AP) credit are bound by these University policies:

1. Credit is usually granted for an AP score of 4 or 5. Usually, 10 quarter units are awarded (but occasionally fewer than 10). No more than 10 quarter units may be given for performance in a single examination.
2. Whether credit is to be given for an AP score of 3 is a matter for departmental discretion; up to 10 units may be awarded.
3. No credit may be authorized for an AP score lower than 3.

Performance on an AP exam can indicate the appropriate placement for continuing course work in that subject at Stanford. If students enroll in courses at Stanford for which they received equivalent AP credit, the duplicating AP credit will be removed. The chart below shows the current AP credit and placement policies.

A maximum of 45 quarter units of Advanced Placement (AP), transfer credit, and/or other external credit (such as International Baccalaureate) may be applied toward the undergraduate degree. More than 45 units of AP, transfer, and other external credit may appear on the Stanford University transcript; however, only 45 units can be applied to the minimum units required for the undergraduate degree. Stanford University policies on AP and other external credit are subject to review and change on an annual basis. Subjects not listed on this chart are not eligible for AP credit at Stanford University.

Further information is available from the Student Services Center or at http://registrar.stanford.edu/students/academics/adv_place.htm.

</table>
1 A score of 4 or 5 on this test fulfills the Language Requirement. A score of 5 is required to receive 10 units of credit.

Stanford University awards advanced placement credit for certain International Baccalaureate and international advanced placement subject examinations. The international test subjects must match the content of the College Entrance Examination Board (CEEB) Advanced Placement test subjects that receive advanced placement credit.

ACTIVITY COURSES

For undergraduates who entered Autumn 1996 and thereafter, a maximum of 8 units of credit earned in activity courses, regardless of the offering department or if accepted as transfer units, count towards the 180 (225 if dual degrees are being pursued) units required for the bachelor’s degree. All activity courses are offered on a satisfactory/credit basis.

COURSES TAKEN ON SATISFACTORY/NO CREDIT OR CREDIT/NO CREDIT BASIS

For undergraduates who entered Autumn 1996 and thereafter, a maximum of 36 units of credit (including activity courses) taken at Stanford or its overseas campuses for a "CR" or "S" grade may be applied towards the 180 (225 if dual degrees are being pursued) units required for the bachelor’s degree. For those who entered Stanford as transfer students in Autumn 1996 and thereafter, the maximum is 27 units.

Departments may also limit the number of satisfactory or credit courses accepted towards the requirements for a major. Satisfactory/credit courses applied toward a minor may be similarly limited. Courses not letter-graded are not accepted in fulfillment of the General Education Requirements applicable to undergraduate students who entered Stanford in Autumn 1996 and thereafter. Writing in the Major courses are usually offered letter grade only. In those instances where the course is offered for a letter grade or CR/NC, the course must be taken for a letter grade to fulfill the Writing in the Major requirement.

INTERNSHIP GUIDELINES

Undergraduate internships should not by themselves carry any credit. However, an individual student may arrange with a faculty member for a research or other academic project to be based on the internship. Arrangements between students and faculty regarding credit are expected to be made well in advance of the internship. Credit should be arranged within departmental rules for directed reading or independent study and should meet the usual departmental standards. No transfer credit is awarded for internships.

TRANSFER WORK

Academic credit for work done elsewhere may be allowed toward a Stanford bachelor’s degree under the following rules and conditions:

1. Credit may be granted for work completed at institutions in the U.S. only if the institutions are accredited.

2. Study in institutions outside the U.S., when validated by examination results, tutorial reports, or other official evidence of satisfactory work, may be credited toward a Stanford bachelor’s degree, subject to the approval of the credit evaluator and the appropriate departments.

3. Credit is officially allowed only after the student has been unconditionally admitted to Stanford.

4. Credit is allowed for work completed at institutions in the U.S. only on the basis of an official transcript received by the Registrar at Stanford directly from the institution where the credit was earned.

5. Credit from another institution may be transferred for courses which are substantially equivalent to those offered at Stanford University on the undergraduate level, subject to the approval of the credit evaluator. A maximum of 20 quarter units may represent courses which do not parallel specific courses at Stanford, again, subject to the approval of the credit evaluator as to quality and suitability.

6. The credit allowed at Stanford for one quarter’s work may not exceed the number of units that would have been permissible for one quarter if the work had been done at Stanford; for work done under a system other than the quarter system, the permissible maximum units are calculated at an appropriate ratio of equivalence.

7. Credit is allowed at Stanford for work graded ‘A’ , ‘B’, ‘C’, or ‘Pass’ (where ‘Pass’ is equivalent to a letter grade of ‘C’ or above), but not for work graded ‘D’ or below.

8. No more than 45 (90 for transfer students) quarter units of credit for work done elsewhere may be counted toward a bachelor’s degree at Stanford.

9. Credit earned in extension, correspondence, and online courses is transferable only if the university offering the courses allows that credit toward its own bachelor’s degree. Such credit is limited to a maximum of 45 quarter units for extension courses, a maximum of 15 quarter units for correspondence and online study, and a maximum of 45 quarter units for the combination of extension, correspondence, and online courses.

10. Credit earned in military training and service is not transferable to Stanford, unless offered by an accredited college or university in the U.S. and evaluated as above by the credit evaluator.

LAST UNITS OUT OF RESIDENCE

Students may petition to complete their final 15 units out of residence to complete their degree requirements. The final 15 units of transfer credit must meet the criteria in the undergraduate "Transfer Work" section of this bulletin. Students must submit the Request for Last Units Out of Residence Petition to request the status and to request pre-approval of the transfer work. A registration status is required to graduate; therefore, a Petition for Graduation Quarter should be submitted along with the Request for Last Units Out of Residence, and an application to graduate should be submitted through Axess.

CONCURRENT ENROLLMENT

Students may enroll concurrently at Stanford and at another college or university. The following policies apply to concurrent enrollment:

1. Students may not exceed 20 quarter units between both schools. This is the same unit maximum for undergraduates at Stanford. (One semester credit or hour generally equals 1.5 quarter units.)

2. Satisfactory academic progress is determined only by Stanford courses and units. Transfer work completed at other institutions is not considered in this calculation.

3. Students are expected to submit a Request for Transfer Credit Evaluation for pre-approval of transfer credit prior to enrolling in the transfer institution.
THE MAJOR

The primary purpose of the major is to encourage each student to explore a subject area in considerable depth. This in-depth study complements the breadth of study promoted by the General Education Requirements and, in many cases, by a student’s choice of electives. Work in depth permits practice in critical analysis and the solving of problems. Because of its depth, such study also provides a sense of how knowledge grows and is shaped by time and circumstances.

The structure of a major should be a coherent reflection of the logic of the discipline it represents. Ideally, the student should be introduced to the subject area through a course providing a general overview, and upper-division courses should build upon lower-division courses. The course of study should, if feasible, give the student the opportunity and responsibility of doing original, creative work in the major subject. Benefits of the major program are greatest when it includes a culminating and synthesizing experience such as a senior seminar, an undergraduate thesis, or a senior project.

REQUIREMENTS

Undergraduates must select a major by the end of their sophomore year. All undergraduate major programs listed in this bulletin, except for certain honors degree programs that require application and admission in advance, are open to all students. Students may use Axess to declare, drop, or exchange a major at any time. In some departments or programs, though, a late change could easily result in extending the period of undergraduate study. Students who have applied to graduate, or who wish to declare an individually designed major, and coterminal students must use printed forms to select or change a major. Students requiring assistance should contact the Undergraduate Advising Office. The structure of a major should be a coherent reflection of the logic of the discipline it represents. Ideally, the student should be introduced to the subject area through a course providing a general overview, and upper-division courses should build upon lower-division courses. The course of study should, if feasible, give the student the opportunity and responsibility of doing original, creative work in the major subject. Benefits of the major program are greatest when it includes a culminating and synthesizing experience such as a senior seminar, an undergraduate thesis, or a senior project.

MULTIPLE MAJORS

Although most students declare only one major, a student may formally declare more than one major within a single bachelor’s degree (B.A., B.S., or B.A.S.) program. The student may do that either at the time of initial major declaration or, as may be more advisable given the planning required to complete more than one major, by amending the original declaration. The structure of a major should be a coherent reflection of the logic of the discipline it represents. Ideally, the student should be introduced to the subject area through a course providing a general overview, and upper-division courses should build upon lower-division courses. The course of study should, if feasible, give the student the opportunity and responsibility of doing original, creative work in the major subject. Benefits of the major program are greatest when it includes a culminating and synthesizing experience such as a senior seminar, an undergraduate thesis, or a senior project.

DEGREES, HONORS, AND MINORS

CONFERRAL OF DEGREES

Upon recommendation to the Senate of the Academic Council by the faculty of the relevant departments or schools and the Committee on Undergraduate Standards and Policy, degrees are awarded four times each year, at the conclusion of Autumn, Winter, Spring, and Summer quarters. All diplomas, however, are prepared and distributed after degree conferral in accordance with the distribution dates listed on the Registrar’s Office web site at http://registrar.stanford.edu/students/records/diplomas.htm.

Students must apply for conferral of an undergraduate or graduate degree by filing an Application to Graduate by the deadline for each term. The deadlines are published in the Academic Calendar. A separate application must be filed for each degree program and for each conferral term. Applications are filed through Axess, the online service which allows students to update their administrative/academic records.

Requests for conferral are reviewed by the Office of the University Registrar and the student’s department, to verify completion of degree requirements. Registration is required in the conferral term. Students with unmet financial or other University obligations resulting in the placement of a hold on their registration cannot receive a transcript, statement of completion, degree certificate, or diploma until the hold is released.

Students are typically expected to apply to graduate during the term in which they expect to be awarded a degree. The University, however, reserves the right to confer a degree on a student who has completed all of the requirements for a degree even though the student has not applied to graduate; such an individual would then be subject to the University’s usual rules and restrictions regarding future enrollment or registration.

Students who wish to withdraw a request for conferral or make changes to the Application to Graduate should notify the Student Services Center in writing through the Withdrawal of Application to Graduate Form or other appropriate form. Students who withdraw their graduation applications or fail to meet degree requirements must reapply to graduate in a subsequent term.

Stanford University awards no honorary degrees.

UNDERGRADUATE MINOR

Students completing a bachelor’s degree may elect to complete one or more minors in addition to the major. Minors must be officially declared by students no later than the deadline for their application(s) to graduate, according to declaration procedures developed and monitored by the Registrar. Earlier deadlines for declaration of the minor may be set by the offering school or department. Satisfactory completion of declared minors is noted on the student’s transcript after degree conferral.

A minor is a coherent program of study defined by the department or degree program. It may be a limited version of a major concentration or a specialized subset of a field. A minor consists of no fewer than six courses of 3 or more units to a maximum of 36 units of letter-graded work, except where letter grades are not offered. Departments and degree programs establish the structure and requirements of each minor in accordance with the policy above and within specific guidelines developed by the deans of schools. Programs which do not offer undergraduate degrees may also make proposals to their cognizant deans to establish a minor. Requirements for each minor are described in the individual department or program listing in this bulletin.

Students may not overlap (double-count) courses for completing major and minor requirements, unless:
1. Overlapping courses constitute introductory skill requirements (for example, introductory math or a foreign language), or
2. Overlapping courses enable the student to meet school requirements (for example, for a major within the School of Engineering and a minor). Currently, only the School of Engineering has school requirements for its undergraduate majors.

Undergraduates use Axess to declare or drop a minor. Students with questions about declaring minors or double-counting courses towards combinations of majors and/or minors should consult with the departments or programs involved or the Student Services Center. For academic advising regarding minors, students should consult the Undergraduate Advising and Research Office (UAR).

BACCALAUREATE HONORS

With Distinction—In recognition of high scholastic attainment, the University, upon recommendation of a major department or program, awards the Bachelor’s Degree with Distinction. Distinction is awarded to 15% of the graduating class based on cumulative grade point averages. Distinction is calculated at the end of the Winter Quarter for each graduating class.

Students are also urged to consider the departmental honors programs that may give depth to their major study and to consider, as well, how the interdisciplinary honors programs might contribute to the quality of their undergraduate education.

Departmental Honors Programs—In recognition of successful completion of special advanced work, departments may recommend their students for honors in the major. Departmental honors programs demand independent creative work at an advanced level in addition to major requirements. If approved for departmental honors, the student should declare the Honors degree through Axess.

Interdisciplinary Honors Programs—In recognition of successful completion of honors program requirements, the following interdisciplinary programs can recommend students majoring in any field for honors in their program:

- Education
- Environmental Science, Technology, and Policy
- Ethics in Society
- Feminist Studies
- International Security Studies
- Humanities
- Latin American Studies
- Science, Technology, and Society

The interdisciplinary honors programs are designed to complement study in a department major. The requirements for these honors programs are described in the department sections of this bulletin. If approved for interdisciplinary honors, the student should submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program form to the Student Services Center.

Foreign Language Proficiency—The notation “proficiency in (language)” appears on the official transcripts of those students whose levels of achievement are found by procedures established by the Language Center to be roughly equivalent to knowledge an excellent student can be expected to demonstrate late in the third quarter of the third year of study in that language.

SPECIAL REGISTRATION STATUSES (UNDERGRADUATE)

The following reduced-tuition categories can be requested by undergraduates in the final stages of their degree program:

Permit to Attend for Services Only (PSO)—Undergraduates in their terminal quarter who are completing honors theses, clearing incomplete grades, or have completed all requirements and are requiring a registration status, may petition one time only for PSO...
status. PSO does not permit any course enrollment. Students should apply to graduate in their PSO quarter. The deadline for the completed PSO petition (http://registrar.stanford.edu/pdf/PSO.pdf) is the Preliminary Study List deadline of the applicable quarter.

13th Quarter—Undergraduates who have completed at least twelve full-time quarters may petition to register for 13th Quarter registration status at a reduced tuition rate for their final quarter, but must register for at least eight units. Undergraduate dual degree students must complete at least fifteen full-time quarters before petitioning for reduced tuition in their final quarter.

Graduation Quarter—Undergraduates may petition one time only for Graduation Quarter in their terminal quarter only if 1) filing a Request for Last Units Out of Residence (http://registrar.stanford.edu/pdf/last_units_out_of_residence.pdf) in order to complete up to 15 final units at another institution; or 2) returning from a discontinued status and filing a Request to Return and Register in Undergraduate Study (http://ual.stanford.edu/pdf/returning_return_register.pdf) in order to confer their degree. Undergraduates may be eligible for Graduation Quarter status in these two situations only if the student has completed all graduation requirements and will not be using University resources. The deadline for the completed Graduation Quarter petition (http://registrar.stanford.edu/pdf/grad_qtr.pdf) is the Preliminary Study List deadline of the applicable quarter.

GRADUATE DEGREES

GENERAL REQUIREMENTS

For each Stanford advanced degree, there is an approved course of study which meets University and department requirements. The University’s general requirements, applicable to all graduate degrees at Stanford, are described below. University requirements pertaining to only a subset of advanced degrees are described in the “Degree-Specific Requirements” section. See the “Graduate Programs” section of each department’s listing for specific department degree requirements. Additional information on professional school programs is available in the bulletins of the Graduate School of Business, the School of Law, and the School of Medicine.

ENROLLMENT REQUIREMENTS

Graduate students must enroll in courses for all terms of each academic year (Autumn, Winter, and Spring quarters) from the admission term until conferment of the degree. The only exception to this requirement occurs when the student is granted an official leave of absence. Failure to enroll in courses for a term during the academic year without taking a leave of absence results in denial of further enrollment privileges unless and until reinstatement to the degree program is granted and the reinstatement fee paid. Registration in Summer Quarter is not required and does not substitute for registration during the academic year. Students possessing an F-1 or J-1 student visa may be subject to additional course enrollment requirements in order to retain their student visas.

In addition to the above requirement for continuous registration during the academic year, graduate students are required by the University to be registered:

1. In each term during which any official department or University requirement is fulfilled, including qualifying exams or the University oral exam. The period between the last day of final exams of one term and the day prior to the first day of the following term is considered an extension of the earlier term.

2. In any term in which a University dissertation/thesis is submitted or at the end of which a graduate degree is conferred.

3. Normally, in any term in which the student receives financial support from the University.

4. In any term for which the student needs to use University facilities.

5. For international students, in any term of the academic year (summer may be excluded) for which they have non-immigrant status (i.e., a J-1 or F-1 visa).

Individual students may also find themselves subject to the registration requirements of other agencies (for example, external funding sources such as federal financial aid). Course work and research are expected to be done on campus unless the department gives prior approval for study in absentia.

LEAVES OF ABSENCE AND REINSTATEMENT (GRADUATE)

Graduate students who do not meet the requirement for continuous registration during the academic year must obtain an approved leave of absence, in advance, for the term(s) they will not be registered. The leave of absence must be reviewed for approval by the chair or director of graduate studies of the student’s major department and, if the student is in the United States on a foreign student visa, by the Bechtel International Center. The granting of a leave of absence is at the discretion of the department and subject to review by the Office of the University Registrar. The University may condition its approval of a petition for leave of absence on the student’s meeting such requirements as the University deems appropriate in the individual case for the student to be eligible to
return (such as, in the case of a leave for medical reasons, proof of treatment or an interview with a provider at Vaden or CAPS).

New graduate students and approved coterminal students may not take a leave of absence during their first quarter. Coterminal students are required to register their first graduate quarter. However, new Stanford students may request a deferment from the department.

Leaves of absence are granted for a maximum of one calendar year, or four quarters. Leaves requested for a longer period are approved only in exceptional circumstances (for example, mandatory military service). An extension of leave, for a maximum of one year or four quarters, is approved only in unusual circumstances. Extension requests must be made before the expiration of the original leave of absence. Leaves of absence for graduate students may not exceed a cumulative total of two years (eight quarters including summer quarters).

Students on leave of absence are not registered at Stanford and, therefore, do not have the rights and privileges of registered students. They cannot fulfill any official department or University requirements during the leave period.

Students on leave may complete course work for which an ‘Incomplete’ grade was awarded in a prior term and are expected to comply with the maximum one-year time limit for resolving incompletes; a leave of absence does not stop the clock on the time limit for resolving incompletes.

When a student is granted a leave of absence after the beginning of the term, courses in which the student was enrolled after the drop deadline appear on the student’s transcript and show the symbol ‘W’ (Withdraw).

Students who fail to be either enrolled by the study list deadline or approved for a leave of absence by the start of a term are required to apply for reinstatement through the Graduate Admissions office before they can return to the same degree program. The decision to approve or deny reinstatement is made by the student’s department or program. Departments are not obliged to approve reinstatements of students. Reinstatement decisions are made at the discretion of the department or the program and may be based on the applicant’s academic status when last enrolled, activities while away from campus, the length of the absence, the perceived potential for successful completion of the program, and the ability of the department to support the student both academically and financially, as well as any other factors or considerations regarded as relevant by the department or program.

Reinstatement information is available from the Graduate Admissions office. A fee is required. Reinstatement applications must be submitted prior to the first day of the term for which re-enrollment is requested if the student is registering for courses.

CHILDBIRTH ACCOMMODATION POLICY

Women graduate students, including students in professional schools, anticipating or experiencing a birth are eligible for an academic accommodation period of up to two consecutive academic quarters (in total) before and after the birth, during which the student may postpone course assignments, examinations, and other academic requirements. During this period, they are eligible for full-time enrollment and retain access to Stanford facilities, Cardinal Care, and Stanford housing. Such students are granted an automatic one quarter extension of University and departmental requirements and academic milestones, with the possibility of up to three quarters by petition under unusual circumstances. Women graduate students supported by fellowships, teaching assistantships, and/or research assistantships are excused from regular TA or RA duties for a period of six weeks during which they continue to receive support. Students do not receive a stipend or salary if none was received previously, but are eligible for the academic accommodation period and the one quarter extension of academic milestones. For more information and a complete statement of the policy, see http://stanford.edu/group/gap/5-9.

RESIDENCY POLICY FOR GRADUATE STUDENTS

Each type of graduate degree offered at Stanford (for example, Master of Science, Doctor of Philosophy) has a residency requirement based on the number of academic units required for the degree. These residency requirements and the maximum allowable transfer units for each degree type are listed below.

The unit requirements for degrees can represent solely course work required for the degree or a combination of course work, research, and a thesis or dissertation. Academic departments and schools offering degrees may establish unit requirements that are higher than the minimum University residency requirement, but they may not have a residency requirement that is lower than the University standard. In addition to the University’s residency requirement based on a minimum number of units for each degree, the School of Medicine and the Graduate School of Business may establish residency requirements based on the number of quarters of full-time registration in which students are enrolled to earn a degree. However, in no case may a student earn fewer units than the University minimum for each degree. All residency requirements are published in the Stanford Bulletin. Students should consult the Stanford Bulletin or their academic department to determine if their degree program has residency requirements that exceed the minimum.

Students eligible for Veterans Affairs educational benefits should refer to "Veterans’ Educational Benefits" in the “Admissions and Financial Aid” section of this bulletin.

It is Stanford University’s general policy that units are applicable toward only one degree. Units may not normally be duplicated or double-counted toward the residency requirement for more than one degree. Exceptions to this general policy for specified combinations of degree types, known as Joint Degree Programs, may be approved by agreement of the Faculty Senate and the deans of the schools affected, with review by the Committee on Graduate Studies. See the “Joint Degree Programs” section of this bulletin for additional information.

Only completed course units are counted toward the residency requirement. Courses with missing, incomplete, in progress, or failing grades do not count toward the residency requirement. Courses from which a student has formally withdrawn do not count toward the residency requirement.

Terminal Graduate Registration (TGR) is available to graduate students who have met all of the conditions listed in the "TGR" section of this bulletin.

This policy is effective for students who enter graduate programs beginning in the Autumn Quarter of the 2001-02 academic year. For information about the residency policy in effect for students who entered prior to Autumn Quarter 2001, see the Stanford Bulletin 2000-01.

1. The University has authorized the granting of the M.A.T., Ed.S. and Ed.D degrees, but they are not being offered.
2. Up to 45 units completed at Stanford toward a M.A. or M.S. degree or accepted as transfer credit in an Engineering discipline may be used toward the 90 unit residency requirement for the Engineer degree. At least 45 units of work at Stanford are
necessary to complete the 90 residency units for the Engineer degree.
3. Enrollment in the M.P.P. program is limited to candidates who have earlier been accepted to another Stanford graduate degree program.
4. Students eligible for Veterans Affairs educational benefits should refer to the Veterans Benefits section of “Admissions and Financial Aid” in this bulletin.
5. Up to 45 units completed at Stanford toward a M.A. or M.S. degree or accepted as transfer credit may be used toward the 135 unit residency requirement for the Ph.D. or D.M.A. degree. At least 90 units of work at Stanford are necessary to complete the 135 residency units for the Ph.D. or D.M.A. degree. *Continuing students must take the equivalent of 86 semester units. The Law School has calculated individualized quarter unit conversions for each student. Entering students must complete all first-year required courses plus 82 quarter units of elective work. **MLS students must complete three required first-year courses in the Autumn term, plus an additional 24 units.

**COTERMINAL PROGRAMS RESIDENCY REQUIREMENT**

The University minimum requirements for the coterminal bachelor’s/master’s program are 180 units for the bachelor’s degree plus 45 (or higher departmental requirement, as determined by each graduate department) unduplicated units for the master’s degree. The requirements for the coterminal program with dual undergraduate degrees are 225 units for the two bachelor’s degrees, and 45 units for the master’s degree. For the 45-unit University minimum for the master’s degree, all courses must be at or above the 100 level and 50 percent must be courses designated primarily for graduate students (typically at least at the 200 level). Department requirements may be higher. Units for a given course may not be counted to meet the requirements of more than one degree, that is, no units may be double-counted. No courses taken more than two quarters prior to admission to the coterminal master’s program may be used to meet the 45-unit University minimum requirement for the master’s degree.

_Tuition Rate for Graduate Engineering_—The tuition rate for graduate Engineering is higher than for undergraduate programs. Students enrolled in a coterminal program in the School of Engineering begin to pay the higher graduate Engineering tuition rate after 12 full-tuition undergraduate quarters.

Coterminal students in the School of Engineering, with two undergraduate degrees, are assessed the graduate Engineering tuition rate in the quarter after they have been enrolled for 15 full-tuition quarters.

Engineering coterminal students would also start paying the graduate Engineering tuition rate if any undergraduate degree is conferred or if they are granted any graduate aid. Once charged under the graduate Engineering tuition schedule, the tuition will not revert thereafter to the undergraduate rate.

For additional information on the coterminal bachelor’s/master’s program, see Coterminal Bachelor’s and Master’s Degrees in the “Undergraduate Degrees and Programs” section of this bulletin.

**GRADUATE RESIDENCY TRANSFER CREDIT**

After at least one quarter of enrollment, students pursuing an Engineer, D.M.A., or Ph.D. may apply for transfer credit for graduate work done at another institution. Engineer candidates who also earned their master’s at Stanford are not eligible for transfer residency credit, nor are any master’s degree students.

Students enrolled at Stanford who are going to study elsewhere during their degree program should obtain prior approval of any transfer credit sought before their departure. (One semester unit or hour usually equals 1.5 quarter units.)

The following criteria are used by the department in determining whether, in its discretion, it awards transfer credit for graduate-level work done at another institution:

1. Courses should have comparable Stanford counterparts that are approved by the student’s department. A maximum of 12 units of courses with no Stanford counterparts and/or research units may be granted transfer credit.
2. The student must have been enrolled at the other institution in a student category which yields graduate credit. The maximum amount of credit given for extension and nonmatriculated (non-degree) courses is 12 units. No transfer credit is given for correspondence work.
3. Courses must have been taken after the conferral of the bachelor’s degree. The only exception is for work taken through programs structured like the Stanford coterminal bachelor’s/master’s program.
4. Courses must have been completed with a grade point average (GPA) of 3.0 (B) or better. Pass grades are accepted only for courses for which letter grades were not an option and for which the standard of passing is ‘B’ quality work.
5. Courses must have been taken at a regionally accredited institution in the U.S. or at an officially recognized institution in a foreign country. Courses taken at foreign universities must be at the level of study comparable to a U.S. graduate program.

The Application for Graduate Residency Credit is reviewed by the department and the Office of the University Registrar.

**JOINT DEGREE PROGRAMS**

A Joint Degree Program (JDP) is a specified combination of degree programs or degree types in which a student is enrolled in two graduate degree programs concurrently. JDPs are developed and proposed by the relevant academic units with agreement of the deans of the schools affected.

An approved JDP includes a set of agreements between the participating programs and schools about matters such as admissions, advising, curricula, and tuition. In a JDP, a specified number of units may be double-counted toward the minimum University residency requirements for both degrees, reducing the total number of residency units required to complete both degrees. Application deadlines for each program or degree apply. Students must be admitted to the JDP no later than the study list deadline of the term prior to the term of expected degree conferral. In a JDP, both degrees are conferred concurrently since the units required for each degree are linked to the completion of both degrees. The sole exception is the J.D. degree which may be awarded prior to the second degree.

The following Joint Degree Programs, permitting students to complete requirements for two degrees with a reduced number of total residency units, are offered:

- **Juris Doctor with a Master of Arts** in Economics, Education, History, Public Policy, or the Division of International Comparative and Area Studies: African Studies, East Asian Studies, International Policy Studies, Latin American Studies, and Russian, East European and Eurasian Studies (J.D./M.A.)
- **Juris Doctor with a Master of Science** in Bioengineering, Electrical Engineering, Computer Science, Health Research and Policy, Interdisciplinary Program in Environment & Resources, or Management Science and Engineering (J.D./M.S.)
- **Juris Doctor with a Master in Public Policy** (J.D./M.P.P)
- **Juris Doctor with a Doctor of Philosophy** in Bioengineering, Economics, History, Interdisciplinary Program in Environment and Resources, Management Science and Engineering, Philosophy, Political Science, Psychology, or Sociology (J.D./Ph.D.)
- **Juris Doctor with a Master of Business Administration** (J.D./M.B.A.)
- **Master of Business Administration with a Master of Arts** in Education (M.B.A./M.A.)
- **Master of Business Administration with a Master of Science** in Interdisciplinary Program in Environment and Resources (M.B.A./M.S.)
• Master of Business Administration with a Master of Public Policy (M.B.A./M.P.P.)
• Master of Arts in International Policy Studies with a Master in Public Policy (M.A./M.P.P.)
• Master of Science in Management Science and Engineering with a Master in Public Policy (M.S./M.P.P.)
• Doctor of Philosophy in Economics, Education, Psychology, or Sociology with a Master in Public Policy (Ph.D./M.P.P.)

Specific requirements for the joint degree programs are available from the participating departments and schools and at http://registrar.stanford.edu/students/academics/jdp.htm.

Creation of additional Joint Degree Programs that are combinations of J.D./M.A., J.D./M.S., and Ph.D./M.P.P. degrees have been authorized by the Faculty Senate. New JDPs from among these combinations may double-count up to 45 units towards residency requirements. JDPs from these combinations are proposed by the coordinating programs and schools. Once approvals from the chairs of the programs and deans of the relevant schools are obtained, approval on behalf of the Committee on Graduate Studies is granted by the Office of the Vice Provost for Graduate Education, and final approval is granted by the Office of the University Registrar. JDPs combining other degree types or programs may be proposed, but require review by the Faculty Senate Committee on Graduate Studies and must be approved by the Faculty Senate.

GRADUATE UNITS REQUIREMENTS

The University’s expectation is that the units counted towards all graduate degrees are primarily in graduate courses. All units must be in courses at or above the 100 level and at least 50 percent of those must be courses designated primarily for graduate students (typically at least the 200 level). Units earned in courses below the 100 level may not be counted towards the minimum unit requirement for the master’s degree. Department specifications for the level of course work accepted for a particular master’s degree program may be higher than the University’s specifications.

MINIMUM PROGRESS REQUIREMENTS FOR GRADUATE STUDENTS

The academic requirements for graduate students include completion of University, department, and program requirements, such as admission to candidacy, successful completion of qualifying exams, and so on in a timely and satisfactory manner. Graduate students must also meet the following standards of minimum progress as indicated by units and grades. (These standards apply to all advanced degree programs except the School of Business Ph.D., and the M.B.A., J.D., L.L.M., J.S.M., J.S.D., M.D., and M.L.A., which follow guidelines issued by the respective schools and are described in their respective school bulletins.)

Graduate students enrolled for 11 or more units must pass at least 8 units per term by the end of each term. Those registered for fewer than 11 units must pass at least 6 units per term by the end of each term, unless other requirements are specified in a particular case or for a particular program.

In addition, graduate students must maintain a 3.0 (B) grade point average overall in courses applicable to the degree.

Department requirements for minimum progress that set a higher standard for units to be completed, or a higher or lower standard for grade point average to be maintained, take precedence over the University policy; any such different standards must be published in the Stanford Bulletin.

Students identified as not meeting the requirements for minimum progress and timely and satisfactory completion of requirements are reviewed by their departments to determine whether the problem lies with administrative matters such as reporting of grades or with academic performance. Students have the opportunity to explain any special circumstances. Approval for continuation in the degree program is contingent on agreement by the student and department to a suitable plan to maintain appropriate progress in subsequent quarters. Dismissal of graduate students is addressed in separate guidelines.

Graduate students who have been granted Terminal Graduate Registration (TGR) status must enroll each term in the TGR course (801 for master’s and Engineer programs or 802 for doctoral programs) in their department in the section appropriate for the adviser. An ‘N’ grade signifying satisfactory progress must be received each quarter to maintain registration privileges. An ‘N’ grade indicates unsatisfactory progress. The first ‘N’ grade constitutes a warning. A second consecutive ‘N’ grade normally causes the department to deny the student further registration until a written plan for completion of degree requirements has been approved by the department. Subsequent ‘N’ grades are grounds for dismissal from the program.

GUIDELINES FOR DISMISSAL OF GRADUATE STUDENTS FOR ACADEMIC REASONS

Admission to graduate programs at Stanford is highly selective. It is anticipated that every admitted student will be able to fulfill the requirements for the advanced degree. This document provides guidelines to be used in the unusual circumstance that a department must consider dismissal of a graduate student for academic reasons. These guidelines apply to all advanced degree programs except those in the schools of Law and Business and the M.D. program in the School of Medicine, which follow guidelines issued by the respective schools.

The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the University, department, and program requirements for the degree, and fulfillment of minimum progress requirements. The guidelines that follow specify procedures for dismissal of graduate students who are not meeting these conditions. In such cases, a departmental committee (hereafter “the committee”), whether the department’s committee of the faculty or other committee authorized to act on the department’s behalf such as the departmental graduate studies committee, will:

1. Where possible and as early as possible, warn the student, in writing, of the situation and deficiency. A detailed explanation of the reason for the warning should be provided.
2. Consider extenuating circumstances communicated by the student.
3. Decide the question of dismissal by majority vote of the committee (with at least three faculty members participating in the committee’s deliberation), and communicate the decision to the student in writing.
4. Place a summary of department discussions, votes, and decisions in the student’s file.
5. Provide students the opportunity to examine their department files, if requested.
6. Provide students with information on their rights to appeal under the Student Academic Grievance Procedures. (These are included in the Stanford Bulletin.)

Careful records of department decisions safeguard the rights of both students and faculty.

ADDITIONAL SPECIFICS FOR DEGREES WITH CANDIDACY

Before Candidacy—The committee may vote to dismiss a student who is not making minimum progress or completing requirements in a timely and satisfactory way before review for admission to candidacy. Before considering dismissal, the committee should communicate with the student (which may include a meeting with the student) concerning his or her academic performance and how to correct deficiencies, where such deficiencies are deemed correctable.

In a review for admission to candidacy, if the committee votes not to recommend the student for admission to candidacy, the vote results in the dismissal of the student from the program. The department chair, or Director of Graduate Studies, or the student’s adviser shall communicate the department’s decision to the student.
in writing and orally. The student may submit a written request for reconsideration. The committee shall respond in writing to the request for reconsideration; it may decline to reconsider its decision.

_During Candidacy_—When a student admitted to candidacy is not making minimum progress or not completing University, department, or program requirements in a timely and satisfactory manner, the student’s adviser, the Director of Graduate Studies, or department chair, and other relevant faculty should meet with the student. A written summary of these discussions shall be sent to the student and the adviser and added to the student’s department file. The summary should specify the student’s academic deficiencies, the steps necessary to correct them (if deemed correctable), and the period of time that is allowed for their correction (normally one academic quarter). At the end of the warning period, the committee should review the student’s progress and notify the student of its proposed actions. If the student has corrected the deficiencies, he or she should be notified in writing that the warning has been lifted.

If the deficiencies are not deemed correctable by the committee (for example, the failure of a required course or examination, or a pattern of unsatisfactory performance) or if, at the end of the warning period, the student has not in the view of the committee corrected the deficiencies, the committee may initiate proceedings for dismissal. The student shall be notified, in writing, that the case of dismissal will be considered at an impending committee meeting. The student has the right to be invited to attend a portion of the scheduled meeting to present his or her own case; a student may also make this case to the committee in writing.

After full discussion at the committee meeting, the committee, without the student present, shall review the case and vote on the issue of dismissal. The student shall be sent a written summary of the discussion, including the committee’s decision and the reasons for it. The student may submit a written request for reconsideration. The committee’s response to the request for reconsideration shall be made in writing; it may decline to reconsider its decision.

**TERMINAL GRADUATE REGISTRATION (TGR)**

Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the University oral exam and dissertation, completed 135 units or 10.5 quarters of residency (if under the old residency policy), and submitted a Doctoral Dissertation Reading Committee form may request Terminal Graduate Registration status to complete their dissertations. Students pursuing Engineer degrees may apply for TGR status after admission to candidacy, completion of all required courses, and completion of 90 units or six quarters of residency (if under the old residency policy). Students enrolled in master’s programs with a required project or thesis may apply for TGR status upon completion of all required courses and completion of 45 units.

The TGR Final Registration status may also be granted for one quarter only to a graduate student who is returning after reinstatement, working on incompleted in his or her final quarter, or registering for one final term after all requirements are completed when Graduation Quarter is not applicable. TGR requirements above apply. Doctoral students under the term-based residency policy need nine quarters of residency to qualify for TGR Final Registration Status.

Each quarter, TGR students must enroll in the 801 (for master’s and Engineer students) or 802 (for doctoral students) course in their department for zero units, in the appropriate section for their adviser. TGR students register at a special tuition rate: $2,760 per quarter in 2009-10. TGR students may enroll in up to 3 units of course work per quarter at this tuition rate. Within certain restrictions, TGR students may enroll in additional courses at the applicable unit rate. The additional courses cannot be applied toward degree requirements since all degree requirements must be completed in order to earn TGR status. See the “Minimum Progress Requirements for Graduate Students” of this bulletin for information about satisfactory progress requirements for TGR students.

**GRADUATE TUITION ADJUSTMENT**

Graduate students who need only a 3 to 7 remaining units to complete degree requirements or to qualify for TGR status, may register for one quarter on a unit basis (3 to 7 units) to cover the deficiency. This status may be used only once during a degree program.

**GRADUATION QUARTER**

Registration is required for the term in which a student submits a dissertation or has a degree conferred. Students who meet all the following conditions are eligible to be assessed a special tuition rate for the quarter in which they are receiving a degree:

1. All course work, degree requirements, oral exams, and residency requirements for all graduate degree programs, including joint degree programs, have been completed.
2. A graduate or professional student must have been enrolled or have been on an approved leave of absence in the term immediately preceding the term chosen as the graduation quarter.
3. The student has formally applied to graduate.
4. The student has only to submit the dissertation, project, or master’s thesis by the deadline for submission in the term designated as the graduation quarter.
5. The student has filed all necessary forms regarding graduation quarter before the first day of the term chosen as graduation quarter.

Students on graduation quarter are registered at Stanford and, therefore, have the rights and privileges of registered students. Only one graduation quarter may be requested. There is a tuition rate of $100 for the graduation quarter.

**CONFERRAL OF DEGREES**

Upon recommendation to the Senate of the Academic Council by the faculty of the relevant departments or schools and the Committee on Graduate Studies, degrees are awarded four times each year, at the conclusion of Autumn, Winter, Spring, and Summer terms. All diplomas, however, are prepared and distributed after degree conferral in accordance to the distribution dates listed on the Registrar’s Office web site at http://registrar.stanford.edu/students/records/diplomas.htm.

Students must apply for conferral of a graduate degree by filing an Application to Graduate by the deadline for each term. The deadlines are published in the Academic Calendar. A separate application must be filed for each degree program and for each conferral term. Applications are filed through Axess, the online service which allows students to update their administrative/academic records.

Requests for conferral are reviewed by the Office of the University Registrar and the student’s department to verify completion of degree requirements. Students must be registered in the term of degree conferral. Students with unmet financial obligations resulting in the placement of a hold on their registration cannot receive a transcript, statement of completion, degree certificate, or diploma until the hold is released by the Office of Student Financial Services.

Students are typically expected to apply to graduate during the term in which they expect to be awarded a degree. The University, however, reserves the right to confer a degree on a student who has completed all of the requirements for a degree even though the student has not applied to graduate; such an individual would then be subject to the University’s usual rules and restrictions regarding future enrollment or registration.

Students who wish to withdraw a request for conferral or make changes to the Application to Graduate should notify the Student Services Center in writing through the Withdrawal of Application to Graduate form or other appropriate form. Students who with-
draw their graduation applications or fail to meet degree requirements must reapply to graduate in a subsequent term.

Stanford University awards no honorary degrees.

CHANGES OF DEGREE PROGRAMS

Graduate students are admitted to Stanford for a specific degree program. Students who have attended Stanford for at least one term and who are currently enrolled may submit a Graduate Program Authorization Petition to make one of the following changes: (1) change to a new degree program in the same department; (2) change to a new degree program in a different department; (3) add a new degree program in the same or a different department to be pursued with the existing program. Categorical students must have the bachelor's degree conferred before adding a second advanced degree program. Summer term enrollment is optional for students beginning a new degree program in the Autumn term provided that they have been enrolled the prior Spring term.

It is important that the attempt to add or change degree programs be made while enrolled. Otherwise, a new Application for Graduate Admission must be submitted and an application fee paid. The Graduate Program Authorization Petition is submitted electronically through Axess to the department in which admission is requested. If applying for a higher degree program, students may also be required to submit other application materials such as GRE Subject Test scores, a statement of purpose, or new letters of recommendation. Decisions on the petitions are made by the programs or departments to which they are directed, and are at the discretion of those programs or departments.

International students changing departments or degree programs must also obtain the approval of the Foreign Student Adviser at the Bechtel International Center. If the requested change lengthens their stay, they also are required to submit verification of sufficient funding to complete the new degree program.

Students who wish to terminate study in a graduate program should submit a properly endorsed Request to Permanently Withdraw from Degree Program form to the Student Services Center. To return to graduate study thereafter, the student is required to apply for reinstatement (if returning to the same degree program) or admission (if applying to a different program). Both applications require payment of a fee.

DEGREE-SPECIFIC REQUIREMENTS

MASTER OF ARTS AND MASTER OF SCIENCE

In addition to completing the general requirements for advanced degrees and the specified program requirements, candidates for the degree of Master of Arts (M.A.) or Master of Science (M.S.) must outline an acceptable program of study on the Master's Degree Program Proposal and complete their degrees within the time limit for completion of the master's degree.

MASTER’S PROGRAM PROPOSAL

Students pursuing an M.A., M.F.A., M.S., or M.P.P. degree are required to submit an acceptable program proposal to their department during the first quarter of enrollment. Categorical students must submit the proposal during the first quarter after admission to the coterminal program. The program proposal establishes a student’s individual program of study to meet University and department degree requirements. Students must amend the proposal formally if their plans for meeting degree requirements change.

In reviewing the program proposal or any subsequent amendment to it, the department confirms that the course of study proposed by the student fulfills all department course requirements (for example, requirements specifying total number of units, course levels, particular courses, sequences, or substitutes). The department confirms that all other department requirements (for example, required projects, foreign language proficiency, or qualifying exams) are listed on the form and that all general University requirements (minimum units, residency, and so on) for the master’s degree will be met through the proposed program of study.

TIME LIMIT FOR COMPLETION OF THE MASTER’S DEGREE

All requirements for a master’s degree must be completed within three years after the student’s first term of enrollment in the master’s program (five years for Honors Cooperative students). Students pursuing a coterminal master’s degree must complete their requirements within three years of their first quarter of graduate standing.

The time limit is not automatically extended by a student’s leave of absence. All requests for extension, whether prompted by a leave or some other circumstance, must be filed by the student before the conclusion of the program’s time limit. Departments are not obliged to grant an extension. The maximum extension is one additional year. Extensions require review of academic progress and any other factors regarded as relevant by the department, and approval by the department; such approval is at the department’s discretion.

MASTER IN PUBLIC POLICY

The degree of Master in Public Policy (M.P.P.) is a two-year program leading to a professional degree. Enrollment in the M.P.P. program is limited to candidates who have earlier been accepted to another Stanford graduate degree program. In addition to completing the general requirements for advanced degrees and the program requirements specified in the "Public Policy" section of this bulletin, candidates for the degree of Master of Public Policy (M.P.P.) must outline an acceptable program of study on the Master’s Degree Program Proposal and complete their degrees within the time limit for completion of the master’s degree.

MASTER OF BUSINESS ADMINISTRATION

The degree of Master of Business Administration (M.B.A.) is conferred on candidates who have satisfied the requirements established by the faculty of the Graduate School of Business and the general requirements for advanced degrees. Full particulars concerning the school requirements are found in the Graduate School of Business M.B.A. Handbook. The M.B.A. must be completed within the time limit for completion of the master’s degree.

MASTER OF FINE ARTS

In addition to completing the general requirements for advanced degrees and the program requirements specified in the "Art and Art History" section of this bulletin, candidates for the degree of Master of Fine Arts (M.F.A.) must outline an acceptable program of study on the Master’s Degree Program Proposal and complete their degrees within the time limit for completion of the master’s degree.

MASTER OF LIBERAL ARTS

The Master of Liberal Arts (M.L.A.) program is a part-time interdisciplinary master’s program in the liberal arts for returning adult students. In addition to completing the general requirements for advanced degrees, candidates for the degree of Master of Liberal Arts (M.L.A.) must complete their degrees within five years, an exception to the rule specified above.

ENGINEER

In addition to completing the general requirements for advanced degrees and the requirements specified by their department, candidates for the degree of Engineer must be admitted to candidacy and must complete a thesis per the specifications below.
CANDIDACY

The Application for Candidacy for Degree of Engineer is an agreement between the student and the department on a specific program of study to fulfill degree requirements. Students must apply for candidacy by the end of the second quarter of the program. Honors Cooperative students must apply by the end of the fourth quarter of the program. Candidacy is valid for five calendar years.

THESIS

A University thesis is required for the Engineer degree. Standards for professional presentation of the thesis have been established by the Committee on Graduate Studies and are detailed in Directions for Preparing Theses for Engineer Degrees, available from the Office of the University Registrar online at http://registrar.stanford.edu/shared/publications.htm#GradStud.

The deadline for submission of theses for degree conferral in each term is specified by the University academic calendar. Three copies of the thesis, bearing the approval of the adviser under whose supervision it was prepared, must be submitted to the Office of the University Registrar before the quarterly deadline listed on the University academic calendar. A fee is charged for binding copies of the thesis.

Students must be registered or on graduation quarter in the term in which they submit the thesis; see “Graduation Quarter” section of this bulletin for additional information. The period between the last day of final exams of one term and the first day of the subsequent term is considered an extension of the earlier term. Students submitting a thesis during this period would meet the registration requirement but would be eligible for degree conferral only in the subsequent term.

MASTER OF LEGAL STUDIES

Admission to study for the Master of Legal Studies degree (M.L.S.), a nonprofessional degree, is granted to students who hold the Doctor of Philosophy (Ph.D.) or other nonlaw doctoral degree, or who have been admitted to a nonlaw doctoral program and have completed a program of study amounting to 45 quarter units or 30 term units of work toward the doctorate, and who meet an admission standard equivalent to that required of candidates for the Doctor of Jurisprudence degree.

The M.L.S. degree is conferred upon candidates who, in not fewer than two academic terms in residence and in not more than two consecutive academic years, successfully complete at least three first-year courses in the first Autumn term plus an additional 24 units of Law School work, including at least one course or seminar requiring a research paper. All work shall conform to the rules and regulations of the University and the School of Law.

MASTER OF LAWS

The degree of Master of Laws (L.L.M.) is conferred upon candidates who have completed one academic year (35 quarter units) in residence in accordance with the rules of the University and the School of Law. The degree is designed for foreign graduate students trained in law and is available only to students with a law degree earned outside the United States. The L.L.M. program offers students a choice of two areas of specialization: Corporate Governance and Practice, or Law, Science, and Technology.

MASTER OF THE SCIENCE OF LAW

The degree of Master of the Science of Law (J.S.M.) is conferred upon candidates who have completed one academic year (35 quarter units) with distinction in accordance with the rules of the University and the School of Law.

The degree is primarily designed for those qualified students who hold a J.D. or its equivalent and who are at the Stanford School of Law for independent reasons (for example, as teaching fellows) and who wish to combine work toward the degree with their primary academic activities. Specially qualified lawyers, public officials, academics, and other professionals who have worked outside the United States may apply for the degree through the Stanford Program in International Legal Studies (SPILS). Full particulars concerning requirements may be found at http://www.law.stanford.edu/program/degrees/advanced.

DOCTOR OF JURISPRUDENCE

The degree of Doctor of Jurisprudence (J.D.) is conferred upon candidates who satisfactorily complete courses in law totaling the number of units required under the current Faculty Regulations of the School of Law over not less than three academic years and who otherwise have satisfied the requirements of the University and the School of Law.

DOCTOR OF THE SCIENCE OF LAW

The degree of the Doctor of the Science of Law (J.S.D.) is conferred upon candidates who hold a J.D. or its equivalent, who complete one academic year in residence, and who, as a result of independent legal research, present a dissertation that is, in the opinion of the faculty of the School of Law, a contribution to knowledge. Such work and dissertation must conform to the rules of the School of Law and the University for the dissertation and the University Oral Examination, as described in the “Doctor of Philosophy” section.

Candidacy is limited to students of exceptional distinction and promise. Full particulars concerning requirements may be found at http://www.law.stanford.edu/program/degrees/advanced.

DOCTOR OF MUSICAL ARTS

The degree of Doctor of Musical Arts (D.M.A.) is conferred upon candidates who have satisfied the general requirements for advanced degrees, the program requirements specified in the “Music” section of this bulletin, and the candidacy requirement as described in the “Doctor of Philosophy” section.

DOCTOR OF MEDICINE

Candidates for the degree of Doctor of Medicine (M.D.) must satisfactorily complete the required curriculum in medicine. The requirements for the M.D. degree are detailed online at http://med.stanford.edu/md.

DOCTOR OF PHILOSOPHY

The degree of Doctor of Philosophy (Ph.D.) is conferred upon candidates who have demonstrated to the satisfaction of their department or school substantial scholarship, high attainment in a particular field of knowledge, and the ability to do independent investigation and present the results of such research. They must satisfy the general requirements for advanced degrees, the program requirements specified by their departments, and the doctoral requirements described below. The option for a Ph.D. minor is also described below, though it is not a Ph.D. requirement.

CANDIDACY

Admission to a doctoral degree program is preliminary to, and distinct from, admission to candidacy. Admission to candidacy for the doctoral degree is a judgment by the faculty of the student’s potential to successfully complete the requirements of the degree program. Students are expected to complete department qualifying procedures and apply for candidacy by the end of their second year in the Ph.D. program. Honors Cooperative students must apply by the end of their fourth year.

The Application for Candidacy specifies a departmentally approved program of study to fulfill degree requirements, including required course work, language requirements, teaching requirements, dissertation (final project and public lecture-demonstration for D.M.A.), and University oral examination (for Ph.D.). At least 3 units of work must be taken with each of four Stanford faculty members.
If the Ph.D. student is pursuing a minor, approval by the department awarding the minor is also required on the Application for Candidacy.

**TIME LIMIT FOR COMPLETION OF A DEGREE WITH CANDIDACY**

All requirements for the degree must be completed before candidacy expires. Candidacy is valid for five years unless terminated by the department (for example, for unsatisfactory progress). The time limit is not automatically extended by a student’s leave of absence. All requests for extension, whether prompted by a leave or some other circumstance, must be filed by the student before the conclusion of the program’s time limit. Departments are not obligated to grant an extension. Students may receive a maximum of one additional year of candidacy per extension. Extensions require review by the department of a dissertation progress report, a timetable for completion of the dissertation, any other factors regarded as relevant by the department, and approval by the department; such approval is at the department’s discretion.

**TEACHING AND RESEARCH REQUIREMENTS**

A number of departments require their students to teach (serving as a teaching assistant) or assist a faculty member in research (serving as a research assistant) for one or more quarters as part of their doctoral programs. Detailed information is included in the department sections of this bulletin.

**FOREIGN LANGUAGE REQUIREMENT**

Some departments require a reading knowledge of one or more foreign languages as indicated in department sections of this bulletin. Fulfillment of language requirements must be endorsed by the chair of the major department.

**UNIVERSITY ORAL EXAMINATION**

Passing a University oral examination is a requirement of the Ph.D. and J.S.D. degrees. The purpose of the examination is to test the candidate’s command of the field of study and to confirm fitness for scholarly pursuits. Departments determine when, after admission to candidacy, the oral examination is taken and whether the exam will be a test of knowledge of the field, a review of a dissertation proposal, or a defense of the dissertation. The chairperson of a Stanford oral examination is appointed for this examination only, to represent the interests of the University for a fair and rigorous process.

Students must be registered in the term in which the University oral examination is taken. The period between the last day of final exams of one term and the day prior to the first day of the following term is considered an extension of the earlier term. Candidacy must also be valid.

The University Oral Examination Committee consists of at least five Stanford faculty members: four examiners and the committee chair from another department. All members are normally on the Stanford Academic Council, and the chair must be a member. Emeritus faculty are also eligible to serve as examiners or chair of the committee. (A petition for appointment of an examining committee member who is not on the Academic Council may be approved by the chair of the department if that person contributes an area of expertise that is not readily available from the faculty.) The chair of the examining committee may not have a full or joint appointment in the adviser’s or student’s department, but may have a courtesy appointment in the department. The chair can be from the same department as any other member(s) of the examination committee and can be from the student’s minor department provided that the student’s adviser does not have a full or joint appointment in the minor department.

For Interdisciplinary Degree Programs (IDPs), the chair of the examining committee may not have a full or joint appointment in the primary adviser’s major department and must have independence from the student and adviser.

The University Oral Examination form must be submitted to the department graduate studies administrator at least two weeks prior to the proposed examination date. The examination is conducted according to the major department’s adopted practice, but it should not exceed three hours in length, and it must include a period of private questioning by the examining committee.

Responsibility for monitoring appointment of the oral examination chair rests with the candidate’s major department. Although the department cannot require the candidate to approach faculty members to serve as chair, many departments invite students and their advisers to participate in the process of selecting and contacting potential chairs.

The candidate passes the examination if the examining committee casts four favorable votes out of five or six, five favorable votes out of seven, or six favorable votes out of eight. Five members present and voting constitute a quorum. If the committee votes to fail a student, the committee chair sends within five days a written evaluation of the candidate’s performance to the major department and the student. Within 30 days and after review of the examining committee’s evaluation and recommendation, the chair of the student’s major department must send the student a written statement indicating the final action of the department.

**DISSERTATION**

An approved doctoral dissertation is required for the Ph.D. and J.S.D. degrees. The doctoral dissertation must be an original contribution to scholarship or scientific knowledge and must exemplify the highest standards of the discipline. If it is judged to meet this standard, the dissertation is approved for the school or department by the doctoral dissertation reading committee. Each member of the reading committee signs the signature page of the dissertation to certify that the work is of acceptable scope and quality. One reading committee member reads the dissertation in its final form and certifies on the Certificate of Final Reading that department and University specifications have been met.

Dissertations must be in English. Approval for writing the dissertation in another language is normally granted only in cases where the other language or literature in that language is also the subject of the discipline. Such approval is routinely granted for dissertations in the Division of Literatures, Cultures, and Languages, in accordance with the policy of the individual department. Dissertations written in another language must include an extended summary in English.

Directions for preparation of the dissertation are available from the Office of the University Registrar or at http://registrar.stanford.edu/shared/publications.htm#GradStud. The signed dissertation copies and accompanying documents must be submitted to the Office of the University Registrar on or before the quarterly deadline indicated in the University’s academic calendar. A fee is charged for the microfilming and binding of the dissertation copies.

Students must either be registered or on graduation quarter in the term they submit the dissertation; see “Graduation Quarter” in the “Graduate Degrees” section of this Bulletin for additional information. At the time the dissertation is submitted, an Application to Graduate must be on file, all department requirements must be complete, and candidacy must be valid through the term of degree conferral.

**DOCTORAL DISSERTATION READING COMMITTEE**

The doctoral dissertation reading committee consists of the principal dissertation adviser and two other readers. At least one member must be from the student’s major department. Normally, all members are on the Stanford Academic Council. The student’s department chair may, in some cases, approve the appointment of a reader who is not on the Academic Council, if that person is particularly well qualified to consult on the dissertation topic and holds a Ph.D. or equivalent foreign degree. Former Stanford Academic Council members, emeritus professors, and non-Academic
Council members may thus on occasion serve on a reading committee. If they are to serve as the principal dissertation adviser, however, the appointment of a co-adviser who is currently on the Academic Council is required. A non-Academic Council member (including emeritus professors and former Academic Council members) may replace only one of three required members of dissertation reading committees.

The reading committee, as proposed by the student and agreed to by the prospective members, is endorsed by the chair of the major department on the Doctoral Dissertation Reading Committee form. This form must be submitted before approval of Terminal Graduate Registration (TGR) status or before scheduling a University oral examination that is a defense of the dissertation. The reading committee may be appointed earlier, according to the department timetable for doctoral programs. All subsequent changes to the reading committee must be approved by the chair of the major department. The reading committee must conform to University regulations at the time of degree conferral. Exceptions allowing two non-Academic Council members on the dissertation reading committee when a member of the committee becomes emeritus may be granted by the department chair through the Petition for Doctoral Committee Members.

**PH.D. MINOR**

Students pursuing a Ph.D. may pursue a minor in another department or program to complement their Ph.D. program. This option is not available to students pursuing other graduate degrees. Ph.D. candidates cannot pursue a minor in their own major department or program. In rare cases, a Ph.D. student may complete the requirements for more than one minor. In that case, 20 unduplicated units must be completed for each minor.

Only departments that offer a Ph.D. may offer a minor, and those departments are not required to do so. The minor should represent a program of graduate quality and depth, including core requirements and electives or examinations. The department offering the minor establishes the core and examination requirements. Elective courses are planned by the students in conjunction with their minor and Ph.D. departments.

The minimum University requirement for a Ph.D. minor is 20 units of course work at the graduate level (courses numbered 200 and above). If a minor department chooses to require those pursuing the minor to pass the Ph.D. qualifying or field examinations, the 20-unit minimum can be reduced. All of the course work for a minor must be done at Stanford.

Units taken for the minor can be counted as part of the overall requirement for the Ph.D. of 135 units of graduate course work done at Stanford. Courses used for a minor may not be used also to meet the requirements for a master’s degree.

A Ph.D. minor form outlining a program of study must be approved by the major and minor departments. This form is submitted at the time of admission to candidacy and specifies whether representation from the minor department on the University oral examination committee is required.

**TEACHING CREDENTIALS**

Stanford University is accredited by the California Commission on Teacher Credentialing and the National Council for Accreditation of Teacher Education and is authorized to recommend candidates for credentials. The University offers a complete training program for both Single (Secondary) and Multiple Subject (Elementary) teaching credentials. Upon completion of a Stanford approved program, the credentials allow teachers to serve in California public schools.

Current Stanford undergraduates wishing to complete the requirements for a teaching credential should apply to the coterminous program at the School of Education. All other applicants should apply directly to the Stanford Teacher Education Program (STEP) at the School of Education.

Occasionally, a student’s research may diverge from the area of competence of the adviser, or irreconcilable differences may occur between the student and the faculty adviser. In such cases, the student or the faculty adviser may request a change in assignment.

If the department decides to grant the request, every reasonable effort must be made to appoint a new adviser, usually from the student’s reading committee. This may also require that a new member be added to the reading committee before the draft dissertation is evaluated, to keep the reconstituted committee in compliance with the University requirements for its composition.
ACADEMIC POLICIES AND STATEMENTS

COMPLIANCE WITH UNIVERSITY POLICIES

Registration as a student constitutes a commitment by the student to abide by University policies, rules, and regulations, including those concerning registration, academic performance, student conduct, health and safety, use of the libraries and computing resources, operation of vehicles on campus, University facilities, and the payment of fees and assessments. Some of these are set forth in this bulletin while others are available in relevant University offices.

Students should take responsibility for informing themselves of applicable University policies, rules, and regulations. A collection is available on the Stanford University policy web site at http://www.stanford.edu/about/administration/policy. Many are also set forth in the Research Policy Handbook and the Graduate Academic Policies and Procedures Handbook (the GAP handbook).

The University reserves the right to withhold registration privileges or to cancel the registration of any student who is not in compliance with its policies, rules, or regulations; or for reasons pertaining to academic performance, health and wellness, or behavior conduct.

NOTIFICATION

For many University communications, email to a student’s Stanford email account is the official form of notification to the student, and emails sent by University officials to such email addresses will be presumed to have been received and read by the student. Emails and forms delivered through a SUNet account by a student to the University may likewise constitute a formal communication, with the use of this password-protected account constituting the student’s electronic signature.

REGISTRATION AND RECORDS

REGISTRATION AND STUDY LISTS

The preliminary study list deadline is the first day of classes of each quarter during the academic year. As early as possible, but no later than this deadline, students (including those with TGR status) must submit to the Office of the University Registrar via Axess, a study list to enroll officially in classes for the quarter. Students are expected to be enrolled “at status” by the preliminary study list deadline; meaning that students must be enrolled in sufficient units to meet requirements for their status, whether full-time, or on approved special registration status. Students who enroll in more units than their anticipated tuition charge covers will be charged the additional tuition. They may not enroll in courses for zero units unless those courses, like TGR, are defined as zero-unit courses. Undergraduates are subject to academic load limits described in the “Amount of Work” section of this bulletin. Students will be charged a $200 late study list fee for submitting their study lists after the quarterly deadline.

The University reserves the right to withhold registration from, and to cancel the advance registration or registration of, any student having unmet obligations to the University.

STUDY LIST CHANGES

Students may add courses or units to their study lists through the end of the third week of classes. (Individual faculty may choose to close their classes to new enrollments at an earlier date.) Courses or units may be added only if the revised program remains within the normal load limits.

Courses or units may be dropped by students through the end of the third week of classes, without any record of the course remaining on the student’s transcript. No drops are permitted after this point.

A student may withdraw from a course after the final study list deadline through the end of the eighth week of each quarter. In this case, a grade notation of ‘W’ (withdraw) is automatically recorded on the student’s transcript for that course. Students who do not officially withdraw from a class by the end of the eighth week are assigned the appropriate grade or notation by the instructor to reflect the work completed.

Through the end of the eighth week of classes, students may choose the grading option of their choice in courses where an option is offered.

If the instructor allows a student to take an ‘I’ (incomplete) in the course, the student must make the appropriate arrangements for that with the instructor by the last day of classes.

The deadlines described above follow the same pattern each quarter but, due to the varying lengths of Stanford’s quarters, they may not always fall in exactly the week specified. Students should consult the University’s academic calendar for the deadline dates each term. Other deadlines may apply in Law, Graduate School of Business, Medicine, and Summer Session.

REPEATED COURSES

Students may not enroll in courses for credit for which they received either Advanced Placement or transfer credit.

Some Stanford courses may be repeated for credit; they are specially noted in this bulletin. Most courses may not be repeated for credit. Under the general University grading system, when a course which may not be repeated for credit is retaken by a student, the following special rules apply:

1. A student may retake any course on his or her transcript, regardless of grade earned, and have the original grade, for completed courses only, replaced by the notation ‘RP’ (repeated course). When retaking a course, the student must enroll in it for the same number of units originally taken. When the grade for the second enrollment in the course has been reported, the units and grade point for the second course count in the cumulative grade point average in place of the grade and units for the first enrollment in the course. Because the notation ‘RP’ can only replace grades for completed courses, the notation ‘W’ cannot be replaced by the notation ‘RP’ in any case.

2. A student may not retake the same course for a third time unless he or she received a ‘NC’ (no credit) or ‘NP’ (not passed) when it was taken and completed the second time. A student must file a petition for approval to take the course for a third time with the Office of the Vice Provost for Undergraduate Education. When a student completes a course for the third time, grades and units for both the second and third completions count in the cumulative grade point average. The notation ‘W’ is not counted toward the three-retake maximum.

AMOUNT OF WORK

The usual amount of work for undergraduate students is 15 units per quarter; 180 units (225 for dual degree students) are required for graduation. Registration for fewer than 12 units is rarely permitted and may cause the undergraduate to be ineligible for certification as a full-time student. The maximum is 20 units (21 if the program includes a 1-unit activity course). The maximum may be exceeded by seniors only once for compelling reasons. A past superior academic performance is not considered to be sufficient justification for exceeding the maximum. Petitions for programs of fewer than 12 or more than 20 units must be submitted to the Office of the Vice Provost for Undergraduate Education, Sweet Hall, first floor. For additional information regarding satisfactory academic progress, refer to the “Academic Standing” section of this bulletin.
Matriculated graduate students are expected to enroll for at least eight units during the academic year; schools and departments may set a higher minimum. Petitions for programs of fewer than 8 must be signed by the student’s department and submitted for consideration to the Office of the University Registrar. Graduate students are normally expected to enroll in no more than 24 units; registration for more than 24 units must be approved by the department. Under certain circumstances, graduate students may register on a part-time basis. See the “Tuition, Fees, and Housing” section of this bulletin.

UNIT OF CREDIT

Every unit for which credit is given is understood to represent approximately three hours of actual work per week for the average student. Thus, in lecture or discussion work, for 1 unit of credit, one hour per week may be allotted to the lecture or discussion and two hours for preparation or subsequent reading and study. Where the time is wholly occupied with studio, field, or laboratory work, or in the classroom work of conversation classes, three full hours per week through one quarter are expected of the student for each unit of credit; but, where such work is supplemented by systematic outside reading or experiment under the direction of the instructor, a reduction may be made in the actual studio, field, laboratory, or classroom time as seems just to the department.

AUDITING

No person shall attend any class unless he or she is a fully registered student enrolled in the course or meets the criteria for auditors. Auditors are not permitted in courses that involve direct participation such as language or laboratory science courses, fieldwork, art courses with studio work, or other types of individualized instruction. Auditors are expected to be observers rather than active participants in the courses they attend, unless the instructors request attendance on a different basis. Stanford does not confer credit for auditing, nor is a permanent record kept of courses audited. Students who have been suspended are not permitted to audit.

In all cases of auditing, the instructor’s prior consent and the Office of the University Registrar’s prior approval are required. Further information is available from the Office of the University Registrar.

RELIGIOUS HOLIDAYS

Students planning not to attend class or take an exam because of a religious observance are expected to convey this information to instructors in advance. The Office for Religious Life makes available to faculty, staff, and students a list of significant religious observances at the beginning of each academic year. For further information, contact the Deans for Religious Life at (650) 723-1762 or see http://religiouslife.stanford.edu.

LEAVES OF ABSENCE AND REINSTATEMENT (UNDERGRADUATE)

Undergraduates are admitted to Stanford University with the expectation that they will complete their degree programs in a reasonable amount of time, usually within four years. Students have the option of taking a leave of absence for up to one year upon filing a petition to do so with the Office of the University Registrar and receiving approval. The leave may be extended for up to one additional year provided the student files (before the end of the initial one-year leave) a petition for the leave extension with the Office of the University Registrar and receives approval. The University may condition its approval of a petition for leave of absence on the student’s meeting such requirements as the University deems appropriate in the individual case for the student to be eligible to return (such as, in the case of a leave for medical reasons, proof of treatment or an interview with a provider at Vaden or CAPS). Leaves of absence for undergraduates may not exceed a cumulative total of two years (eight quarters including Summer Quarters). Undergraduates who take an approved leave of absence while in good standing may enroll in the University for the subsequent quarter with the privileges of a returning student.

Students who wish to withdraw from the current quarter, or from a quarter for which they have registered in advance and do not wish to attend, must file a leave of absence petition with the Office of the University Registrar. Information on tuition refunds is available in the “Refunds” section of this bulletin.

When a student is granted a leave of absence after the beginning of the term, courses in which the student was enrolled after the drop deadline appear on the student’s transcript and show the symbol “W” (withdrew). For additional information regarding satisfactory academic progress, refer to the “Academic Standing” section of this bulletin.

Students who have exceeded their eight quarters of approved leave, or who fail to submit a Leave of Absence petition by the published deadline and otherwise do not submit a Study List, must apply for reinstatement. The University is not obliged to approve reinstatements of students. Applications for reinstatement are reviewed by the Vice Provost for Undergraduate Education and are subject to the approval of the Faculty Senate Committee on Undergraduate Standards and Policy or its designees. The Committee or its designees may determine whether the application for reinstatement will be approved or not, and/or the conditions a student must meet in order to be reinstated. Reinstatement decisions may be based on the applicant’s status when last enrolled, activities while away from campus, the length of the absence, the perceived potential for successful completion of the program, as well as any other factors or considerations regarded as relevant to the Vice Provost for Undergraduate Education or the Committee.

Applications for reinstatement must be submitted to the Office of the Vice Provost for Undergraduate Education six to eight weeks prior to the start of the term in which the student seeks to enroll in classes. Petition information and instructions may be obtained by contacting the Office of the Vice Provost for Undergraduate Education, Sweet Hall, first floor.

Leaves of absence for and reinstatements of graduate students are addressed in the “Graduate Degrees” section of this bulletin.

RECORDS

TRANSCRIPTS

Transcripts of Stanford records are issued by the Office of the University Registrar upon the student’s request when submitted in writing or via the online Axess system. There is no charge for official transcripts. The courses taken in one quarter do not appear on any student’s transcript until after the final study list deadline. The University reserves the right to withhold transcripts or records of students with unmet obligations to the University.

CERTIFICATION OF ENROLLMENT OR DEGREES

The Office of the University Registrar can provide oral or written confirmation of registration, enrollment, or degree status. The printed certification can be used whenever enrollment or degree verification is required for car insurance, loan deferments, medical coverage, scholarship purposes, and so on. Using Axess, students are able to print an official certification at no charge. Certification of full- or part-time enrollment cannot be provided until after the study list is filed.

Degrees are conferred quarterly, but diplomas are issued in accordance with the distribution dates listed on the Registrar’s Office web site at http://registrar.stanford.edu/students/records/diplomas. After conferral, the degree awarded to a student can be verified by contacting the Office of the University Registrar for an official transcript, a certification form, or the National Student Clearinghouse. Requests for transcripts must be made by the student in writing or through Axess.

Full-time enrollment for undergraduates is considered to be enrollment in a minimum of 12 units of course work per quarter at Stanford. Work necessary to complete units from previous quarters...
does not count toward the 12 units necessary for full-time status in the current quarter. Enrollment in 8 to 11 units is considered half-time enrollment. Enrollment in 1 to 7 units is considered less-than-half-time, or part-time enrollment. During Summer Quarter, all graduate students who hold appointments as research or teaching assistants are considered to be enrolled on at least a half-time basis.

All undergraduates validly registered at Stanford are considered to be in good standing for the purposes of enrollment certification.

Stanford uses the following definitions (in units) to certify the enrollment status of graduate and professional students each quarter:

<table>
<thead>
<tr>
<th>Graduate</th>
<th>Business</th>
<th>Law</th>
<th>Medicine</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full time: 8 or more</td>
<td>6-10</td>
<td>6-8</td>
<td>6-8</td>
</tr>
<tr>
<td>Half time: 6 or 7</td>
<td>5 or fewer</td>
<td>5 or fewer</td>
<td>5 or fewer</td>
</tr>
</tbody>
</table>

TGR students enrolled in a course numbered 801 or 802 are certified as full time.

As a general proposition, only information classified by the University as directory information (see the "Directory Information" section of this bulletin) can be confirmed to inquirers other than the student.

PRIVACY OF STUDENTS RECORDS
NOTIFICATION OF RIGHTS UNDER FERPA

The Family Educational Rights and Privacy Act of 1974 (FERPA) affords students certain rights with respect to their education records. They are:

1. The right to inspect and review the student’s education records within 45 days of the date the University receives a request for access. The student should submit to the Registrar, Dean, chair of the department, or other appropriate University official, a written request that identifies the record(s) the student wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA. A student may ask the University to amend the record that he or she believes is inaccurate or misleading. The student should write the University official responsible for the record (with a copy to the University Registrar), clearly identify the part of the records he or she wants changed, and specify why it should be changed. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. FERPA contains various exceptions to the general rule that the University should not disclose education records without seeking the prior written consent of the student. The following circumstances are representative of those in which education records (and information drawn from education records) may be disclosed without the student’s prior written consent:
   a. Upon request, the University may release Directory Information (see next heading).
   b. School officials who have a legitimate educational interest in a student’s education record may be permitted to review it. A school official is: a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student or volunteer serving on an official committee (or representing a recognized student group), such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her responsibility to Stanford or to the student.
   c. The University discloses education records without consent to officials of another school, in which a student seeks or intends to enroll, upon request of officials at that other school.
   d. The University may choose to disclose education records (and information drawn from education records) to either supporting parent(s) or guardian(s) where the student is claimed as a dependent under the Internal Revenue Code.
   e. The University may inform parents including either parent(s) or guardian(s) when disclosure of the information is necessary to protect the health or safety of the student or other persons.
   f. For students under the age of 21, the University may notify either parent(s) or guardian(s) of a violation of any law or policy relating to the use of alcohol or controlled substances. The University must provide records in response to lawfully issued subpoenas, or as otherwise compelled by legal process.
   g. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-4605.

FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT (FERPA) AND TAX DEPENDENT STATUS

Students are encouraged to maintain an ongoing, open dialogue with parents throughout their careers at Stanford about academic progress and personal development. Most student difficulties are resolved at Stanford without involving parents. The University does recognize, however, that there are some exceptional situations where parental involvement may be appropriate to assist a student through a difficult circumstance. Under those circumstances, Stanford may (but is not required to) choose to disclose information to parents if permitted by law.

Under the Family Educational Rights and Privacy Act (FERPA), Stanford is permitted to disclose information drawn from education records to parents if one or more parent claims the student as a dependent for federal tax purposes. Some laws, especially those relating to medical and mental health care, prohibit the disclosure of information without the student’s consent, even where the student is a tax dependent.

DIRECTORY INFORMATION

The University regards the following items of information as “directory information,” that is, information that the University may make available to any person upon specific request (and without student consent):

- Name
- Date of birth
- Place of birth
- Directory addresses and telephone numbers
- Email addresses
• SUNet ID (as opposed to Stanford Student ID Number)
• Mailing addresses
• Campus office address (for graduate students)
• Secondary or permanent mailing addresses
• Residence assignment and room or apartment number
• Specific quarters or semesters of registration at Stanford
• Stanford degree(s) awarded and date(s)
• Major(s), minor(s), and field(s)
• University degree honors
• Student theses and dissertations
• Participation in officially recognized sports or activities
• Weight and height of members of athletic teams
• Institution attended immediately prior to Stanford
• ID card photographs for University course and student residence use

For more information, see Stanford’s FERPA web page at http://registrar.stanford.edu/students/pers_info/student_record_privacy.htm.

Students may prohibit the release of any of the items listed above (except name and SUNet ID) by designating which items should not be released on the Privacy function of Axess. Students may prohibit the release of their SUNet ID and/or name (and consequently all other information) after an appointment with the Office of the University Registrar to discuss the ramifications of this action.

Students, faculty, and others with questions regarding student records should contact the Office of the University Registrar.

CONSENT TO USE OF PHOTOGRAPHIC IMAGES

Registration as a student and attendance at or participation in classes and other campus and University activities constitutes an agreement by the student to the University’s use and distribution (both now and in the future) of the student’s image or voice in photographs, video or audio capture, or electronic reproductions of such classes and other campus and University activities.

If any student in a class where such photographing or recording is to take place does not wish to have his or her image or voice so used, the student should raise the matter in advance with the instructor.

STANFORD UNIVERSITY ID NUMBER

The Stanford University ID Number is assigned to each student’s academic record for unique identification. It is printed on the Stanford University ID card and on documents distributed by the Office of the University Registrar and other administrative offices. It is a violation of University policy to use another’s Stanford University ID Number to misrepresent yourself in any way; such use can result in loss of student privileges or other disciplinary action.

SUNET ID

The SUNet ID provides access to the Stanford University Network (SUNet) and its services, and identifies authorized users of these services. Each member of the Stanford electronic community creates a unique SUNet ID and SUNet ID password for him/herself. SUNet IDs provide:

• Axess services
• Email service
• Storage space within Stanford’s distributed file system
• Usenet newsgroups
• World wide web services, including serving of personal web pages on the Leland system and access to Stanford Web Resources

The SUNet ID together with SUNet ID password may serve in place of a signature on electronic forms. The SUNet ID password must remain confidential. It is a violation of University policy to use another’s SUNet ID or SUNet ID password to misrepresent yourself in any way; such use can result in loss of student privileges or other disciplinary action.

IDENTIFICATION CARDS

ID cards are available to registered students, faculty, and regular staff. Students obtain their ID cards at the Student Services Center, Tresidder Union, 459 Lagunita Drive, 2nd Floor (650) 498-CARD. Faculty and staff obtain ID cards at George Forstythe Hall, 275 Panama Street, Room 190 (650-498-CARD).

The ID card serves as an identification card, an electronic key, and a debit card, allowing cardholders to use services for which they have privileges, to enter certain facilities, and to make purchases.

Married students or students with a domestic partner (same or opposite sex) may obtain a courtesy identification card for their spouse/partner through the Stanford Card ID Office at Forstythe Hall. The spouse/partner card enables use of some campus services during terms for which the student is registered.

Similar courtesy cards are also available to the spouses and same-sex partners of faculty and regular staff.

ID cards bear a photograph of the cardholder. This photograph is maintained in an online database and, as stated above in Directory Information, is available for classroom and student residence use upon specific request and without student consent unless the student has designated that the photograph not be released. Photographs can be designated as private using the Privacy function of Axess.

For more information, see http://campuscard.stanford.edu.

EXAMINATIONS

MIDTERMS

Classes that give midterm examinations outside of regular class hours must: (1) announce the date and time during the first week of the academic quarter, and (2) provide reasonable alternative times to those students for whom these announced times are not convenient. According to Honor Code interpretations and applications, different examinations may be given at these alternative times.

END-QUARTER POLICY STATEMENT

The End-Quarter Period is a time of reduced social and extracurricular activity preceding final examinations. Its purpose is to permit students to concentrate on academic work and to prepare for final examinations.

In Autumn, Winter, and Spring quarters, End-Quarter starts seven full days (to begin at 12:01 a.m.) prior to the first day of final exams. In Spring Quarter, final examinations begin on Friday; no classes are held on Thursday, the day before. In Summer Quarter, this consists of the weekend and the four class days preceding the final examinations, which take place on Friday and Saturday of the eighth week. (See the Time Schedule for dates.)

During the End-Quarter Period, classes are regularly scheduled and assignments made; this regular class time is used by instructors in whatever way seems best suited to the completion and summation of course material. Instructors should neither make extraordinary assignments nor announce additional course meetings in order to “catch up” in course presentations that have fallen behind. They are free, however, and even encouraged to conduct optional review sessions and to suggest other activities that might seem appropriate for students preparing for final examinations.

No graded homework assignments, mandatory quizzes, or examinations should be given during the End-Quarter Period except:

1. In classes where graded homework assignments or quizzes are routine parts of the instruction process.
2. In classes with laboratories where the final examination will not test the laboratory component. In such a case, the laboratory session(s) during the End-Quarter Period may be used to examine students on that aspect of the course.

Major papers or projects about which the student has had reasonable notice may be called due in the End-Quarter Period.
Take-home final examinations, given in place of the officially scheduled in-class examination, may be distributed in the End-Quarter Period. Although the instructor may ask students to return take-home examinations early in the final examination period, the instructor may not call them due until the end of the regularly scheduled examination time for that course. Such a policy respects the principle that students’ final examinations are to be scheduled over a period of several days.

End-quarter examinations may not be held during this period. This policy preserves the instruction time for courses and protects the students’ opportunities for extensive review and synthesis of their courses.

During the End-Quarter Period, no musical, dramatic, or athletic events involving compulsory student participation may be scheduled, unless approved as exceptions by the Committee on Undergraduate Standards and Policy (C-USP), nor may routine committee meetings be scheduled (such as those of the ASSU, the Senate of the Academic Council, or the committees of the President of the University) when such meetings normally would involve student participation.

Note—Students who believe that there are faculty who are violating End-Quarter policy should contact the Office of the University Registrar.

END-QUARTER EXAMINATIONS

Examinations are part of the process of education at the same time that they are a means to measure the student’s performance in course work. Their structure, content, frequency, and length are to be determined in accordance with the nature of the course and the material presented in it, subject only to the limitations contained herein.

Great flexibility is available regarding the types of examinations that an instructor may choose to employ. Examinations, including final examinations, may be, for example, in-class essay examinations, take-home essay examinations, objective examinations, oral examinations, or appropriate substitutes such as papers or projects. Instructors may use any type of examination, paper, or project, or any combination thereof, guided only by the appropriateness of the types of examinations, papers, or projects for the material upon which the student is being examined.

When the final examination is an in-class examination, the following regulations apply:

1. A three-hour period is reserved during examination week for the final examination in each course of more than 2 units. This examination period must be available for students, but not necessarily in its entirety, if an in-class examination is given. In courses with extraordinary meeting times, such that ambiguity might exist as regards the period reserved for the final examination, the schedule should be clarified and students informed no later than the end of the second week of the quarter.

2. Examinations in 1- or 2-unit courses must be completed by the end of the last class meeting before the End-Quarter Period, except in Summer Quarter when examinations must be completed during the last regularly scheduled class session.

When the final examination or its appropriate substitute is not an in-class examination (for example, when an instructor chooses to employ a take-home examination, paper, or project in lieu of an in-class examination), the following regulations apply:

1. The schedule and format of the final examination or its appropriate substitute shall be made known not later than the end of the second week of the quarter and, if changed subsequently, may be only an option of the plan originally announced by the instructor.

2. Although the instructor may ask students to return take-home examinations early in the final examination period, the instructor may not call them due until the end of the regularly scheduled examination time for that course.

In submitting official Study Lists, students commit to all course requirements, including the examination procedures chosen and announced by the course instructor. In choosing courses, students should take cognizance of the official schedule of final examinations announced on the Registrar’s web site at http://registrar.stanford.edu/students/courses/exams.htm. Students anticipating conflicts in final examination schedules should seek to resolve these with the instructors involved before the Preliminary Study List deadline at the beginning of the quarter. If accommodation cannot be made at that time, the student should revise his or her Study List before the Final Study List deadline at the end of the third week of the quarter in order to be able to meet the required final examination.

If unforeseen circumstances prevent the student from sitting for the regularly scheduled examination, instructors should make alternative arrangements on an individual basis. Such unforeseen circumstances include illness, personal emergency, or the student’s required participation in special events (for example, athletic championships) approved as exceptions by the Committee on Undergraduate Standards and Policy (C-USP). Inquiries regarding these circumstances may be directed to the Office of the Vice Provost for Undergraduate Education, Sweet Hall.

STATEMENT CONCERNING EARLY EXAMINATIONS

Students are reminded that taking final examinations earlier than the scheduled time is a privilege, not a right. They should request this privilege only in the event of extraordinary circumstances.

Since the final examination schedule is published quarterly in the Time Schedule at the time of course selection and enrollment, students are expected to make their academic plans in light of known personal circumstances that may make certain examination times difficult for them.

In general, faculty members are discouraged from giving final examinations earlier than the published and announced times. If faculty nevertheless decide to administer early examinations, either the questions should be completely different from those on the regularly scheduled examination or the early examination should be administered in a highly controlled setting. An example of such a setting would be a campus seminar room where the examination questions would be collected along with students’ work and students would be reminded of their Honor Code obligations not to share information about the examination contents. Giving students easy opportunities to abuse the integrity of an examination is unfair to honest students and inconsistent with the spirit of the Honor Code.

Academic fields differ in the degree to which early examination requests present dilemmas for faculty. If, for example, an examination format consists of a small number of essay questions, where students would be greatly advantaged by knowing the question topics, faculty should be especially reluctant to allow early examinations unless they are willing to offer totally different examinations or a different kind of academic task, for example, a final paper in lieu of an examination.

GRADING SYSTEMS

GENERAL UNIVERSITY GRADING SYSTEMS

The general University grading system is applicable to all of Stanford University except the Graduate School of Business, the School of Law, and M.D. students in the School of Medicine. Note that the GPA (grade point average) and rank in class are not computed under the general University grading system. Stanford does use an internal-only GPA which is based on units completed up to the time of conferral of the first bachelor’s degree. This information is used for internal purposes only (including academic standing) and is not displayed on the official transcript which is sent outside the University. Most courses are graded according to the general University grading system. However, courses offered
ACADEMIC POLICIES AND STATEMENTS

DEFINITION AND EXPLANATION OF GRADING SYSTEMS

The following reflects changes adopted by the Faculty Senate on June 2, 1994 and effective Autumn Quarter 1995-96. All grades/notations for courses taken in 1995-96 or later are to be visible on student transcripts. Effective Summer Quarter 2008-09, the notation * was changed to NGR (No Grade Reported).

A (+,-) Excellent  Good  Satisfactory  Minimal pass  Plus (+) and minus (-) may be used as modifiers with the above letter grades
NP Not Passed  NGR No grade reported (effective beginning Autumn Quarter 1995-96; all grades/notations for courses taken in 1995-96 or later are visible on student transcripts. Effective Summer Quarter 2008-09, the notation * was changed to NGR (No Grade Reported).  L The ‘L’ is given when the instructor needs additional time to complete grading (in a class taken in 1994-95 or later, an ‘L’ symbol appears when no grade has been reported to the Registrar for courses taken prior to 2001-02. The ‘*’ symbol remains on the transcript until a grade has been reported (effective through Spring 2008-09).)  RP The notation ‘RP’ (meaning Repeated Course) replaces the ‘R’ notation in courses taken before 1994-95 satisfaction of course work when an ‘I’ has been given is expected within a year from the date of the course’s final examination, but an alternate time limit may be set by the instructor. Students may petition that these courses with an ‘I’ grade be removed from their records.

A student receives unit credit for work appropriate if additional work is expected to be submitted by the student. A student receives unit credit for work graded ‘L.’

The ‘N’ indicates satisfactory progress in a course that has not yet reached completion. Continuation courses need not continue at the same number of units, but the grade for all quarters of such a course must be the same. The ‘N-’ grade indicates unsatisfactory progress in a continuing course. The first ‘N-’ grade constitutes a warning. The adviser, department chair, and student should discuss the deficiencies and agree on the steps necessary to correct them. A second consecutive ‘N-’ will normally cause the department to deny the student further registration until a written plan for the completion of the degree requirements has been submitted by the student and accepted by the department. Subsequent ‘N-’ grades are grounds for dismissal from the program.

The ‘I’ is restricted to cases in which the student has satisfactorily completed a substantial part of the course work. No credit will be given until the course is completed and a passing grade received. When a final grade is received, all references to the initial ‘I’ is removed. In courses taken before 1994-95, satisfactory completion of the course work when an ‘I’ has been given is expected within a year from the date of the course’s final examination, but an alternate time limit may be set by the instructor. Students may petition that these courses with an ‘I’ grade be removed from their records.

In a course taken in 1994-95 or later, ‘I’ grades must be changed to a permanent notation or grade within a maximum of one year. If an incomplete grade is not cleared at the end of one year, it is changed automatically by the Office of the University Registrar to an ‘NP’ (not passed) or ‘NC’ (no credit) as appropriate for the grading method of the course. Students must request an incomplete grade by the last class meeting. Faculty may determine whether to grant the request or not. Faculty are free to determine the conditions under which the incomplete is made up, including setting a deadline of less than one year. The notation ‘RP’ (meaning Repeated Course) replaces the original grade recorded for a course when a student retakes a course. (See the “Repeated Courses” section of this bulletin, above.)

The notation ‘W’ (meaning Withdraw) is recorded when a student withdraws from a course.

The ‘**’ symbol appears when no grade has been reported to the Registrar for courses taken prior to 2001-02. The ‘*’ symbol remains on the transcript until a grade has been reported (effective through Spring 2008-09). The notation ‘NGR’ appears when no grade has been reported to the Registrar. The ‘NGR’ notation remains on the transcript until a grade has been reported. (Effective beginning Autumn Quarter 2009-10.)

REPORTING OF GRADES

All grades should be reported within 96 hours after the time and day reserved for the final examination, and in no case later than noon of the fourth day (including weekends) after the last day of the final examination period.

In the case of degree candidates in Spring Quarter, final grades should be reported by noon of the day following the end of the final examination period.

REVISION OF END-QUARTER GRADES

When duly filed with the Office of the University Registrar, end-quarter grades are final and not subject to change by reason of a revision of judgment on the instructor’s part; nor are grades to be revised on the basis of a second trial (for example, a new examination or additional work undertaken or completed after the end of.
the quarter). Changes may be made at any time to correct an actual error in computation or transcription, or where some part of the student’s work has been unintentionally overlooked; that is, if the new grade is the one that would have been entered on the original report had there been no mistake in computing and had all the pertinent data been before the instructor, the change is a proper one.

If a student questions an end-quarter grade based on the grading of part of a specific piece of work (for example, part of a test) on the basis of one of the allowable factors mentioned in the preceding paragraph (for example, an error in computation or transcription, or work unintentionally overlooked, but not matters of judgment as mentioned below), the instructor may review the entire piece of work in question (for example, the entire test) for the purpose of determining whether the end-quarter grade was a proper one. In general, changing an end-quarter grade is permitted on the basis of the allowable factors already mentioned whether an error is discovered by the student or the instructor; however, changing a grade is not permitted by reason of revision of judgment on the part of the instructor.

In the event that a student disputes an end-quarter grade, the established grievance procedure should be followed (see the “Statement on Student Academic Grievance Procedures” section of this bulletin).

GRADUATE SCHOOL OF BUSINESS GRADES

Effective September 2000, all courses offered by the Graduate School of Business are graded according to the following five-level scheme:

- **H** Honors. Work that is of truly superior quality.
- **HP** High Pass. A passing performance, and one that falls approximately in the upper quarter of passing grades.
- **P** Pass. A passing performance that falls in the center of the distribution of all passing grades.
- **LP** Low Pass. A passing performance that falls approximately in the lower quarter of passing grades.
- **U** Unsatisfactory. A failing performance. Work that does not satisfy the basic requirements of the course and is deficient in significant ways.
- **NGR** The notation ‘NGR’ appears when no grade has been reported to the Registrar. The ‘NGR’ notation remains on the transcript until a grade has been reported (effective Autumn Quarter 2009-10).

Students in some GSB courses may elect to take the course on a pass/fail basis, where any passing grade (H, HP, P, or LP) is converted to Pass, and U is converted to Fail. Students wishing to take a GSB course on a pass/fail basis should consult the GSB Registrar for rules and procedures. Prior to 2009-10, an asterisk (*) notation was placed when no grade was reported.

SCHOOL OF LAW GRADES

Effective Autumn Quarter 2009-10, units earned in the School of Law are quarter units. Units earned in the School of Law prior to 2009-10 were semester units. The following grading system became effective in Autumn Semester 2008-09. J.D. students who graduated in 2009 remained on the prior grading system but all other students shifted to the new grading system. For more information, see http://law.stanford.edu/experience/studentlife/SLS_Student_Handbook.pdf.

- **H** Honors (exceptional work, significantly superior to the average performance at the school)
- **P** Pass (representing successful mastery of the course material)
- **R** Restricted credit (representing work that is unsatisfactory)
- **F** Fail (representing work that does not show minimally adequate mastery of the material)
- **MP** Mandatory Pass (representing P or better work)
- **N** Continuing Course

**Note:** In the case of a withdrawal (W), grades of Incomplete (*), No Grade Reported (NGR), and ‘Incomplete’ (I) are assigned.

Students are required to register at the end of their first academic year as students in the M.D. program. For more information, see http://med.stanford.edu/md/curriculum/assessment-grading.html.

ACADEMIC STANDING

Undergraduates matriculating in Autumn 1999 and thereafter are required to adhere to the academic standards described below. The standards include maintaining a minimum 2.0 cumulative GPA.
GPA and a quantitative unit requirement for good academic standing. In addition, a minimum 2.0 cumulative GPA is required for conferred or a baccalaureate degree.

Undergraduates matriculating prior to Autumn 1999 are required to adhere to the academic standards described below but are exempt from the minimum 2.0 cumulative GPA requirement for academic standing purposes. However, departments can elect to require a minimum GPA for course work applicable to the major and the minor. Refer to departmental literature for specific requirements.

Undergraduates normally are expected to plan their academic programs so that they can complete 180 units in four years (twelve quarters), including the requirements for a major and the General Education, Writing, and Language Requirements. Satisfactory academic progress is, on average, 45 units per academic year for four years leading to at least 180 units, a cumulative grade point average of at least 2.0, and a baccalaureate degree.

While undergraduates are expected to register for a minimum of 12 units, they are required to complete at least 9 units each quarter (by the end of the final exam period) and at least 36 units in their most recent three quarters of Stanford enrollment (by the end of the third final exam period). In addition, students are expected to maintain a cumulative grade point average of at least 2.0. Transfer work completed at other institutions is not considered in this calculation.

A student earning fewer than 9 units per quarter or fewer than 36 units in three quarters, or earning less than a 2.0 cumulative grade point average, is placed on probation. Additionally, a student may be placed directly on provisional registration or suspended without first being placed on probation if the student has had a prior probation status. Students on probation or provisional registration status (see definitions below) are required to complete a minimum of 12 units of new course work per quarter (by the end of the final quarter examination period for each quarter) for each quarter for three consecutive quarters, and achieve and maintain a cumulative grade point average of at least 2.0 to attain good academic standing. (A Stanford Summer Session quarter counts toward the three consecutive quarter requirement if 11 or more units are completed). The C-USP Subcommittee on Academic Standing may stipulate otherwise by acting upon a petition for fewer units.

Full-time enrollment is considered to be enrollment in a minimum of 12 units of course work per quarter at Stanford. Under extenuating circumstances, students may petition to the C-USP Subcommittee on Academic Standing to take fewer units. Work necessary to complete units from previous quarters does not count toward the 12 units necessary for full-time enrollment in the current quarter. All students registering for fewer than 12 units should consider the effects of that registration on their degree progress, visas, deferments of student loans, residency requirements, and their eligibility for financial aid and awards.

All undergraduates validly registered at Stanford are considered to be in good standing for the purposes of enrollment certification and athletic participation.

Units are granted for courses completed with grades ‘A,’ ‘B,’ ‘C,’ ‘D,’ ‘Satisfactory’ (‘CR’ or ‘S’), and ‘L.’ Courses graded ‘N’ are counted provisionally as units completed, provided the student enrolls in the continuing segment of that course the following quarter. When the course is completed, the student receives the units for which he or she enrolled. No units are granted for a course in which the student receives an ‘I’ or an ‘*’ (NGR replaces the ‘*’ effective Autumn Quarter 2009-10) until the course is completed satisfactorily and the final grade reported. No units are granted for a course in which the student receives a ‘W’. (See the “Grading Systems” section of this bulletin).

Students who receive all ‘W’s as the result of a Leave of Absence are subject to Academic Standing policies.

Students on probation or provisional registration require approval in advance from Undergraduate Academic Life (UAL), Residential Education, and the Overseas Studies Program office in order to participate in Stanford’s Overseas Studies Program or Stanford in Washington.

Academic performance of a student participating in coterminal program, and whose undergraduate degrees has not yet been conferred, is reviewed on a case-by-case basis in conjunction with the graduate department or program in which the student is enrolled.

PROBATION

A student who fails to complete at least 36 units of work in his or her most recent three quarters of enrollment at the University (by the end of the third final exam period), or who fails to complete by the end of the final examination period at least 9 quarter units of work in his or her most recent quarter of enrollment at the University, or who has a cumulative grade point average of less than 2.0, shall be placed on probation (warning status).

A student shall be removed from probation after three consecutive subsequent quarters of enrollment at the University if, in each quarter, he or she completes a minimum of 12 units of new course work by the end of the final examination period and achieves and maintains a cumulative grade point average of at least 2.0. A student may also be removed from probation at the discretion of the C-USP Subcommittee on Academic Standing as a result of a review of individual records.

PROVISIONAL REGISTRATION

A student who, while on probation, fails in any quarter of registration to complete a minimum of 12 units of new course work by the end of the final examination period or fails to achieve and maintain a cumulative grade point average of at least 2.0, shall be placed on provisional registration status. In addition, and on occasion, a student may also be placed directly on provisional registration without first being placed on probation if the student has had a prior probation status.

A student shall be removed from provisional registration after three consecutive subsequent quarters of enrollment at the University if, in each quarter, he or she completes a minimum of 12 units of new course work by the end of the final examination period and achieves and maintains a cumulative grade point average of at least 2.0. A student may also be removed from provisional registration at the discretion of the C-USP Subcommittee on Academic Standing as a result of a review of individual records.

SUSPENSION

A student who, while on provisional registration, fails to complete a minimum of 12 units of new course work by the end of the final examination period, or who fails to achieve and maintain a cumulative grade point average of at least 2.0, shall be suspended.

In addition, and on occasion, a student may also be suspended directly from probation; or may be suspended without first being placed on probation or provisional registration if the student has had a prior probation status.

While suspended for the first time are suspended for one year, students suspended a subsequent time may be suspended for up to three years.

Students suspended for one year are not eligible to enroll for four quarters (including Summer Quarter) following the quarter in which the suspension was issued. Students suspended for up to three years are not eligible to enroll for up to twelve quarters (including Summer Quarter) following the quarter in which the suspension was issued.

Appeal of Suspension—Students who have been suspended, and who believe they have a compelling reason to appeal their suspension, without a break in enrollment, are required to submit a Petition to Appeal Academic Suspension. Otherwise, students are expected to complete their academic suspension in full.

RETURNING FROM SUSPENSION

Students are required to submit a properly endorsed application for reinstatement to request reenrollment after the suspension period has been completed. Instructions including deadlines for requesting provisional registration should be obtained from the Of-
office of the Vice Provost for Undergraduate Education, Sweet Hall. The C-USP Subcommittee on Academic Standing, or those designated by the subcommittee, acts upon all requests concerning academic standing, including requests for reinstatement after academic suspension. The subcommittee or its designees may determine whether the application for reinstatement will be approved or not, and/or the conditions a student must meet in order to be reinstated. Reinstatement decisions may be based on activities while away from campus, the perceived potential for successful completion of the program, as well as any other factors or considerations regarded as relevant to the Vice Provost for Undergraduate Education or the subcommittee.

Questions concerning academic standing or the petitioning process should be directed to the Office of the Vice Provost for Undergraduate Education, Sweet Hall.

Students returning from suspension should also contact appropriate campus offices, such as Housing and Financial Aid, regarding their deadlines and procedures.

NOTIFICATION (ACADEMIC STANDING)

Written notification that a student is on probation, provisional registration, or suspension is sent to the student and to the student’s academic adviser as soon as possible after the close of the quarter. Students also receive written notification of the outcome of their application for reinstatement. Current student status, such as whether a student is enrolled or not, is considered Directory Information for FERPA purposes at Stanford, and Stanford may provide either parent(s) or guardian(s) written notification of a change in student status. Provided that a student consents, or the student is a dependent for income tax purposes, Stanford may also provide either parent(s) or guardian(s) written notification that the student is on probation, provisional registration, suspension, leave of absence, or voluntary withdrawal.

STATEMENT ON STUDENT ACADEMIC GRIEVANCE PROCEDURES

The following policy was effective beginning in the 1999-2000 academic year and is subject to periodic review.

1. Coverage
   a. Any Stanford undergraduate or graduate student who believes that he or she has been subjected to an improper decision on an academic matter is entitled to file a grievance to obtain an independent review of the allegedly improper decision, followed by corrective action if appropriate. A grievance is a complaint in writing made to an administrative officer of the University concerning an academic decision, made by a person or group of persons acting in an official University capacity, that directly and adversely affects the student as an individual in his or her academic capacity.
   b. Grievance procedures apply only in those cases involving a perceived academic impropriety arising from a decision taken by: (1) an individual instructor or researcher; (2) a school, department, or program; (3) a committee charged to administer academic policies of a particular school, department, or program; (4) the University Registrar, the Vice Provost for Undergraduate Education, the C-USP Subcommittee on Academic Standing, or a Senate committee or subcommittee, the procedures set forth herein for grievances and appeals shall be modified as stated in Section 3 below. A grievance must be filed in a timely fashion, that is, normally within 30 days of the end of the academic quarter in which the adverse decision occurred or should reasonably have been discovered. A delay in filing a grievance may, taking all circumstances into account, constitute grounds for rejection of the grievance.

   c. The Response to the Grievance:
      1. The relevant dean shall consider the grievance. The dean may attempt to resolve the matter informally or make whatever disposition of the grievance that he or she deems appropriate. The dean may, in appropriate cases, remand the grievance to a lower administrative level (including to the level at which the grievance arose) for further consideration.
      2. The dean may also refer the grievance, or any issue therein, to any person (the “grievance officer”) who shall consider the matter and report to the dean as the latter directs. The dean shall inform the grievant (and the party against whose decision the grievance has been filed) in writing of any referral of the matter and shall specify the matters referred, the directions to the person or persons to whom the referral is made (including the time frame within which the person is to report back to the dean), and the name of that person.
3. In undertaking the review, the dean or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information considered relevant, including faculty, staff, and students.

4. Should attempts to resolve the matter informally not be successful, the dean shall decide the grievance, and shall notify the grievant (and the party against whose decision the grievance has been filed) in writing of the disposition made of the grievance and the grounds for the disposition at the earliest practicable date after his or her receipt of the grievance.

5. Normally, no more than 60 days should elapse between the filing of a grievance and the disposition by the dean. If, because of absence of key persons from the campus or other circumstances or exigencies (including those due to breaks in the academic calendar), the dean decides that disposition on that schedule is not possible, he or she shall inform the grievant (and the party against whose decision the grievance has been filed) of that in writing, giving the grounds therefore and an estimate of when a disposition can be expected.

d. The Filing of an Appeal:
   1. If the grievant is dissatisfied with the disposition of the grievance at the decanal level, either on substantive or on procedural grounds, he or she may appeal in writing to the Provost.
   2. The appeal must specify the particular substantive or procedural bases of the appeal (that is, the appeal must be made on grounds other than general dissatisfaction with the disposition) and must be directed only to issues raised in the grievance as filed or to procedural errors in the grievance process itself, and not to new issues. The appeal shall contain the following:
      a. A copy of the original grievance and any other documents submitted by the grievant in connection therewith.
      b. A copy of the determination made by the dean on that grievance.
      c. A statement of why the reasons for the determination of the dean are not satisfactory to the grievant. This statement should specifically address the matters set forth in the Standards for Review in Section 4 below.
   3. The grievant shall file his or her appeal at the earliest practicable date after the grievant’s receipt of the determination by the dean. Normally, no more than 30 days should elapse between the transmittal of theProvost’s disposition and the written statement of the appeal. A delay in filing an appeal may, taking all circumstances into account, constitute grounds for rejection of the appeal.

e. The Response to the Appeal:
   1. The Provost may attempt to resolve the matter informally, or refer the appeal, or any issue thereof, to any person (the “grievance appeal officer”) who shall consider the matter and report to the Provost as the latter directs. The Provost may also, in appropriate cases, remand the matter to a lower administrative level (including to the level at which the grievance arose) for further consideration.
   2. The Provost shall inform the grievant (and the party against whose decision the grievance has been filed) in writing of any referral of the matter and shall specify the matters referred, the directions to the person to whom the referral is made (including the time frame within which the person is to report back to the Provost), and the name of that person.
   3. Should attempts be made to resolve the matter informally not be successful, the Provost shall decide the appeal, and shall notify the grievant (and the party against whose decision the grievance has been filed) in writing of the disposition made of the grievance and the grounds for the disposition at the earliest practicable date after his or her receipt of the appeal. The decision of the Provost shall be final, unless the grievant requests a further appeal to the President pursuant to Section 2f below, and the President agrees to entertain this further appeal.

4. Normally no more than 45 days should elapse between the filing of the appeal and the disposition by the Provost. If, because of absence of key persons from the campus or other circumstances or exigencies (including those due to breaks in the academic calendar), the Provost judges that disposition on that schedule is not possible, he or she shall inform the grievant (and the party against whose decision the grievance has been filed) of the fact in writing, giving the grounds therefore and an estimate of when a disposition can be expected.

f. The Request to the President: if the student is dissatisfied with the disposition of the appeal by the Provost, he or she may write to the President of the University giving reasons why he or she believes the grievance result to be wrong (following the general format set forth in Section 2d.2 above). No more than 30 days should elapse between the transmittal of the Provost’s disposition and the written statement to the President urging further appeal. In any case, the President may agree or decline to entertain this further appeal. If the President declines to entertain the further appeal, the decision of the Provost shall be final. If the President decides to entertain the further appeal, he or she shall follow the general procedures set forth in Section 2e above, and the decision of the President shall be final.

3. Grievances Concerning Decisions of the University Registrar, the Vice Provost for Undergraduate Education, or of a Senate Committee or Subcommittee
   a. For a grievance concerning a decision of the University Registrar, the Vice Provost for Undergraduate Education, the C-USP Subcommittee on Academic Standing, or of a Senate committee or subcommittee, the grievant shall file his or her grievance with the Provost, rather than with the dean, and the Provost shall handle that grievance in accordance with the procedures set forth in Section 2e above.
   b. There shall be no appeal of the Provost’s disposition of that grievance, except as may be available under Section 2f above.

4. Standards for Review and Procedural Matters
   a. The review of grievances or appeals shall usually be limited to the following considerations:
      1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
      2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
   b. The time frames set forth herein are guidelines. They may be extended by the relevant administrative officer in his or her discretion for good cause.
   c. Questions concerning the filing and appeal of grievances should be directed to the Office of the Provost.
UNDERGRADUATE EDUCATION

Vice Provost for Undergraduate Education: John Bravman
Senior Associate Vice Provost for Undergraduate Education: Harry Elam
Web Site: http://ual.stanford.edu

The Vice Provost for Undergraduate Education (VPUE) is responsible for building partnerships with faculty, departments, programs, and schools to promote and sustain excellence in undergraduate education at Stanford. It has a special focus on the academic programs in the first and second year that engage students in critical thinking and scholarly inquiry and that lay the foundations for their subsequent fields of concentration and future achievements. Other VPUE programs support upper class students in research, the arts, overseas study, and writing. VPUE works to ensure equity and accessibility for all students and to promote the core values of a liberal arts education. It seeks to help students create individually meaningful and coherent educational programs by guiding them in their choice of courses, programs of study, and extracurricular academic opportunities. VPUE fosters productive interactions between faculty and students and excellence in teaching through the provision of resources to departments and faculty for research with undergraduates, curriculum and pedagogical development, opportunities for mentoring, and small group seminars.

VPUE programs for first- and second-year students include New Student Orientation/Approaching Stanford, Introduction to the Humanities, Program in Writing and Rhetoric, Introductory Seminars, and Sophomore College. Programs for more advanced students include the Bing Overseas Study Program, Writing in the Major, Arts Intensive Program, and Honors College. Undergraduate Advising and Research, the Center for Teaching and Learning, Diversity Outreach, and the Hume Writing Center serve undergraduates throughout their time at Stanford. The Office of the VPUE works closely with the Office of the Vice Provost for Student Affairs and the Admissions Office. The Vice Provost for Undergraduate Education reports to the Provost.

Policies governing undergraduate education are formulated by Faculty Senate committees and voted into legislation by the Faculty Senate. The Committee on Undergraduate Standards and Policies (C-USP) addresses such topics as general education requirements, grading, awards, advising, and teaching evaluation. The Committee to Review Undergraduate Majors (C-RUM) oversees the initiation and review of undergraduate degree programs. Committee members include the Vice Provost for Undergraduate Education or his delegated staff (ex-officio) and representatives from the faculty at large, administration (such as the Office of the University Registrar), and students. The Associated Students of Stanford University (ASSU) nominations committee selects student members. The VPUE also maintains, by rule of the Faculty Senate, the Introduction to the Humanities Governance Board and the Writing and Rhetoric Governance Board to oversee these university degree requirements. Finally, the Undergraduate Advisory Council (UGAC) was established by the Provost in 1996 to serve as the main faculty advisory body for the Vice Provost for Undergraduate Education.

STANFORD INTRODUCTORY STUDIES

Faculty Director: Harry Elam
Program Directors: Marvin Diogenes, Ellen Woods

Offices: Sweet Hall
Phone: (650) 723-2631
Email: stanfordintrostudies@stanford.edu
Web Site: http://sis.stanford.edu

Stanford Introductory Studies is a new division of VPUE created through the merger of Freshman and Sophomore Programs, the Introduction to the Humanities Program, and the Program in Writing and Rhetoric. It offers courses for first-year students (IHUM, PWR 1, Freshman Seminars, and the residential-academic program SLE), sophomores (PWR 2, Sophomore Seminars and Dialogues), upper-division students (Writing in the Major), September Studies programs (Sophomore College, Arts Intensive, Bing Honors College), and writing support for all students through the Hume Writing Center.

INTRODUCTION TO THE HUMANITIES PROGRAM

Director: Russell A. Berman
Associate Director: Ellen Woods
Affiliated Faculty: Lanier Anderson (Philosophy), Carl Bielefeldt (Religious Studies), Chris Bobonich (Philosophy), Scott Bukatman (Art and Art History), David Como (History), Dan Edelstein (French and Italian), Harry Elam (Drama), Michele Elam (English), Shelley Fisher Fishkin (English), Charlotte Forbost (Religious Studies), Zephyr Frank (History), Michael Friedman (Philosophy), Marisa Galvez (French and Italian), Robert Harrison (French and Italian), Linda Hess (Religious Studies), Nadeem Hussain (Philosophy), Christian Kaesser (Classics), William Koski (Law), Joshua Landy (French and Italian), Helen Longino (Philosophy), Henry Lowood (University Libraries, Science and Technology), Marsh H. McCall, Jr. (Classics), Ian Morris (Classics), David Palumbo-Liu (Comparative Literature), Barbara Pitkin (Religious Studies), Alice Raynor (Drama), Rob Reich (Political Science), John Rick (Archaeology and Anthropology), Janice Ross (Drama), Helen Stacy (Law), Jennifer Summit (English), Kenneth Taylor (Philosophy), Blakey Vermeule (English), Barbara Voss (Archaeology and Anthropology), Ban Wang (Asian Languages), Bryan Wolf (Art and Art History), Tobias Wolff (English), Lee Yearley (Religious Studies), Yiqun Zhou (Asian Languages)

Mail code: 3068
Phone: (650) 723-0944
Email: ihumprogram@stanford.edu
Web Site: http://ual.stanford.edu/ihum

Courses offered by the Introduction to the Humanities Program have the subject code IHUM and are listed in the "Introduction to the Humanities Courses" section of this bulletin.

Introduction to the Humanities offers courses that satisfy a
three-quarter General Education Requirement (GER) for first-year students. The purpose of the Introduction to the Humanities (IHUM) requirement is to build an intellectual foundation in the study of human thought, values, beliefs, creativity, and culture. Introduction to the Humanities courses enhance skills in analysis, reasoning, argumentation, and oral and written expression, thus helping to prepare students for more advanced work in the humanities, and for work in other areas.

The IHUM requirement may be satisfied in two ways:

1. *Introduction to the Humanities courses*—a one quarter, inter-disciplinary course followed by a two quarter course sequence.

2. The *Program in Structured Liberal Education*—a three quarter, residence-based learning experience, which satisfies the IHUM requirement, both of the University Writing and Rhetoric requirements, and the General Education Requirement in the Humanities. For information on the program, see the “Structured Liberal Education” section of this bulletin.

**INTRODUCTORY SEMINARS**

**Participating Faculty:** Over 200 faculty from more than 60 departments take part in Introductory Seminars programs. See faculty listings in each department’s section of this bulletin for pertinent information.

**Offices:** Sweet Hall, Third Floor
Mail Code: 3069
Phone: (650) 723-2631
Email: introsems@stanford.edu
Web Site: http://introsems.stanford.edu

Introductory Seminars provide opportunities for first- and second-year students to work closely with faculty in an intimate and focused setting. These courses aim to intensify the intellectual experience of the freshman and sophomore years by allowing students to work with faculty members in a small group setting; introducing students to the variety and richness of academic topics, methods, and issues which lie at the core of particular disciplines; and fostering a spirit of mentorship between faculty and students. Over 200 faculty from more than 60 departments take part in the introductory seminars programs. The courses are given department credit and most count towards an eventual major in the field. Most also fulfill General Education Requirements (GERs).

Some faculty who have taught Freshman Seminars volunteer to continue working with their students through a formal advising relationship during the students’ sophomore year.

Freshman Seminars and Sophomore Seminars and Dialogues are offered in many disciplines throughout the academic year. Freshman preference seminars are typically given for 3-4 units to a maximum of 16 students, and generally meet twice weekly. Although preference for enrollment is given to freshmen, sophomores and first-year transfer students may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars and dialogues give preference to sophomores and first-year transfer students, but freshmen may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars are given for 3-5 units to a maximum of 14 students, while sophomore preference dialogues take the form of a directed reading, and are given for 1-2 units to a maximum of 5 students.

For a list of introductory seminars offered in 2009-10, see the Stanford Introductory Seminar Courses section of this bulletin. For an application or more information, see the SIS annual course catalogue, published each August, or http://vcsas.stanford.edu.

All seminars require a brief application. See the Time Schedule, the Stanford Introductory Seminars Course Catalogue published each August, or http://vcsas.stanford.edu. Due dates for 2009-10 applications for both freshman and sophomore preference courses are: Autumn Quarter, noon, Friday, September 4; Winter Quarter, noon, Monday, November 30; Spring Quarter, noon, Friday, March 5.

**PROGRAM IN WRITING AND RHETORIC**

**Faculty Director:** Andrea A. Lunsford

**Acting Writing in the Major Director:** Marvin Diogenes

**Hume Writing Center Director:** Clyde Moneyhun

**Hume Writing Center Associate Director for Honors and Advanced Writing:** Hilton Obenzinger

**Teaching Affiliates:** Regina Arnold (Autumn), Michael Reid (Autumn, Winter, Spring), Anton Vander Zee (Autumn), Mark Vegg (Winter, Spring), Ema Vyroubalova (Autumn, Winter, Spring)

**Offices:** Sweet Hall, Third Floor
Mail Code: 3069
Phone: (650) 723-2631
Email: pwrcourses@stanford.edu
Web Site: http://ual.stanford.edu/AP/univ req/PWR/Req

Courses offered by the Program in Writing and Rhetoric are listed under the subject code PWR on the Stanford Bulletin’s ExploreCourses web site.

The Program in Writing and Rhetoric (PWR) designs and teaches courses that meet the Writing and Rhetoric requirement for undergraduates at Stanford as well as intermediate and advanced writing and rhetoric classes. For more information on the requirement, see the “Writing and Rhetoric Requirement” section of this bulletin.

PWR courses engage students in rhetorical and contextual analysis of texts and substantive research-based argument. Students in PWR courses learn and practice time-tested rhetorical principles to gain increasing control over the intellectual and stylistic elements of their writing; they learn to analyze the ideas and persuasive strategies of others and to apply those insights to their own writing.

Toward these ends, PWR 1 focuses on elements of academic argument: understanding a writer’s stance; developing a supportable argumentative thesis; discovering, developing, and deploying cogent proofs; making appropriate organizational and stylistic choices; and understanding the expectations of audiences. The course emphasizes research-based writing, including the effective use of print and non-print sources, primary and secondary sources, and data based on fieldwork. Students enrolled in PWR 1 carry out significant research and use it as the basis for a polished and persuasive research-based argument.

PWR 2 further develops students’ skills in writing and oral presentation, emphasizing the ongoing development of content, organization, and style. The course addresses the dynamic interdependence of writing and speaking, as well as the importance of visual and multimedia elements in the effective presentation of research. Students enrolled in PWR 2 have opportunities to draft and revise written assignments and oral presentations as well as opportunities to present the results of scholarly inquiry, with an emphasis on how to work purposefully and well with a variety of presentation media.

As a general rule, students complete a minimum of three major assignments in both PWR 1 and 2. Written assignments vary from 5 to 15 pages in length, and students work intensively on revising each piece of writing. Oral presentations may involve collaborative work as well as multimedia elements. All assignments involve analyzing a range of texts as well as identifying, evaluating, and using multiple sources in support of academic and research-based arguments. In-class work focuses on how to read with an increa-
Writing and Rhetoric classes enroll no more than 15 students, and all classes are conducted as seminars in which participation is crucial. In-class activities include close reading of and responding to the writing of peers; these workshops are augmented by a minimum of three individual or small group conferences with the PWR instructor during the quarter.

COURSES
The Writing and Rhetoric requirement includes courses at three levels.
1. The first-level course, taken in the first year, can be satisfied by courses in PWR or Structured Liberal Education; the curriculum emphasizes analysis and research-based argument.
2. The second-level course, to be completed by the end of the sophomore year, is a writing and oral/multimedia presentation course taught by the Program in Writing and Rhetoric and by other programs and departments; completion of Structured Liberal Education also satisfies the second-level requirement.
3. The third-level course is a Writing in the Major (WIM) course taught in each major, providing students with systematic opportunities to develop skills for writing in their chosen fields. A list of certified WIM courses may be found in the table of “Undergraduate Major Unit Requirements” in the “Undergraduate Degrees and Programs” section of this bulletin. WIM course descriptions may be found under individual department and program sections.

The sequence of required courses provides a coordinated approach responsive to how students mature as writers, researchers, and presenters during their undergraduate years. At each level, students develop greater sophistication in conducting inquiry and producing scholarly work in progressively more specific disciplinary contexts.

Before the term in which students enroll in the first two levels of the requirement, they review course descriptions on the web site at http://ual.stanford.edu/AP/univ_req/PWR/Courses. After reviewing the offerings, students submit a list of top choices, and the PWR office assigns students to courses based on these preferences.

WRITING AND RHETORIC 2 REQUIREMENT
The Writing and Rhetoric 2 requirement may be satisfied through completion of courses offered through PWR or by other programs and departments. Before the quarter in which students are assigned to enroll in the second-level course, they will be able to review all available courses that meet the requirement on the web site at http://ual.stanford.edu/AP/univ_req/PWR/Courses. In addition to PWR 2, designated Center for the Teaching of Learning (CTL) courses and Stanford Introductory Studies Seminars (SIS) satisfy the second-level Writing and Rhetoric requirement (Write-2). SIS courses require an additional application form; see http://ual.stanford.edu/OO/intro_seminars/IntroSemsCurrent and the SIS Winter and Spring supplements for more information.

HUME WRITING CENTER
The Hume Writing Center, located in Room 20 of Margaret Jacks Hall (Building 460), supports student writing in the full range of academic and extracurricular contexts. The center emphasizes support for students writing for PWR, Introduction to the Humanities, and Stanford Introductory Seminars, while also serving all Stanford undergraduates through one-to-one and group tutorials, workshops, and seminars. Other events sponsored or hosted by the center include regular Writers’ Nights featuring fiction and poetry readings, the “How I Write” series of dialogues with Stanford faculty, and spoken word performances. For further details on the center, see http://ual.stanford.edu/ARS/help_writing/WritingProject.

PWR PEDAGOGY PROGRAM
PWR offers ENGLISH 397A, a pedagogy seminar for all graduate students (TAs) from English, Modern Thought and Literature, and Comparative Literature who teach PWR courses as part of their graduate studies. Taught in the Autumn Quarter, the pedagogy seminar focuses on syllabus design, developing writing assignments, and responding to student writing. The history of rhetoric and writing supplies a theoretical foundation as well as practical lessons for how to teach writing and research most effectively. In the Winter and Spring, graduate students continue their pedagogical development through a series of workshops and seminars focused on specific issues in the teaching of writing. Elements of the pedagogy program include class visits; group evaluation of writing assignments; workshops and lectures; a handbook on teaching; a library of teaching materials; a program web site with links to other writing program sites; and individual work with mentors and peers.

PEER WRITING CONSULTANTS
The Program in Writing and Rhetoric offers PWR 195, a course on the tutoring of writing for undergraduates chosen to serve as peer writing consultants in the Hume Writing Center and across the campus.

COMMUNITY WRITING PROJECT (CWP)
Students may elect to enroll in a section of PWR 1 or 2 designated as “CWP” on the PWR web site. Students in CWP sections complete at least one project during the term (a grant proposal, pamphlet, news article, profile, or web site) for a local community service agency. The program provides an orientation for each CWP section, including a description of participating agencies. Community Writing Project assignments are then made in consultation with the instructor, the agencies, and the program.

STRUCTURED LIBERAL EDUCATION
Director: Carolyn Lougee Chappell (History)
Coordinator: Greg Watkins
Lecturers: Yoon Sook Cha, Nicole Lopez, Jacob Mackey, Jeremy Sabol, Greg Watkins
Offices: Sweet Hall, Second Floor, and Florence Moore Hall
Mail Code: 94305-8581
Phone: (650) 725-0102
Email: sle-program@stanford.edu
Web Site: http://sle.stanford.edu

The Program in Structured Liberal Education (SLE) is a year-long residence-based great works course that satisfies several requirements at once: IHUM, Writing and Rhetoric (both PWR1 and PWR2), and the Disciplinary Breadth GER in Humanities. The curriculum includes works of philosophy, literature, art, and music from the ancient world to the present. The program is interdisciplinary in approach; it emphasizes intellectual rigor and individualized contact between faculty and students.

SLE has two fundamental purposes: to develop a student’s ability to ask effective questions of texts, teachers, the culture, and themselves; and to develop intellectual skills in critical reading, expository writing, logical reasoning, and group discussion. SLE encourages students to live a life of ideas in an atmosphere that stresses critical thinking and a tolerance for ambiguity. Neither the instructors nor the curriculum provides ready-made answers to the questions being dealt with; rather, SLE encourages a sense of intellectual challenge, student initiative, and originality.

The residence hall is the setting for lectures and small group discussions. SLE enhances the classroom experience with other educational activities, including a weekly film series, writing tutorials, occasional special events and field trips, and a student-produced play each quarter.

Freshmen interested in enrolling in SLE should indicate this preference for their IHUM assignment. SLE is designed as a three-quarter sequence, and students are expected to make a commitment for the entire year (9 units autumn and winter, 10 units spring).
FRESHMAN-SOPHOMORE COLLEGE
Location: 236 Santa Teresa, Stanford, CA 94305
Web Site: http://frosoco.stanford.edu

The Freshman-Sophomore College (FroSoCo) at Sterling Quad is a residence for approximately 180 freshmen and sophomores interested in broad intellectual exploration of the liberal arts and sciences. The college integrates intellectual, academic, and social activities with residential life. Entering freshmen have the option of living for two years in FroSoCo.

SEPTEMBER STUDIES AT STANFORD

September Studies at Stanford are characterized by intense engagement. These residential programs allow students to return to campus three weeks prior to the beginning of autumn quarter to work with faculty on a focused area of study or artistic practice. The programs are designed to facilitate mentoring relationships between faculty and students. Sophomore College participants have completed their first year and are rising sophomores; Arts Intensive is for sophomores or juniors; Sophomore College is characterized by an atmosphere of intense academic exploration. Each Sophomore College course enrolls twelve to fourteen students, who live together in a Stanford dorm and receive two units of academic credit. Eligible students will have completed at least six academic quarters at Stanford and be in good academic standing. Students must also have an on-campus housing assignment for the ensuing academic year and intend to enroll in the Autumn Quarter. Admitted students who are found to have academic standing problems after the completion of Spring Quarter may have their admission revoked. The Sophomore College program fee covers tuition, room, board, books, and class-required travel arranged by the program. The total fee is $1400, but course supplies are provided by the program. Enrollment is by application and takes place in Spring for the upcoming September program. For more information or to apply see the Arts Intensive web site at http://artsintensive.stanford.edu.

BING HONORS COLLEGE

Bing Honors College brings students who are writing honors theses to campus in September before the start of the regular school year for a program of intensive scholarship and writing guided by faculty from participating departments and programs. By concentrating solely on the thesis for nearly three weeks, the college participants begin the senior year with a commitment to independent scholarship in an atmosphere of shared intellectual purpose. The college sponsors cross-disciplinary forums, such as writing workshops and methodology panels, as well as residential activities, and a celebratory concluding event to which students invite their research advisers. Students participating in the college receive room and board, and access to computers.

ARTS INTENSIVE

Office: Sweet Hall, Second Floor
Mail code: 3068
Phone: (650) 723-4338
Email: artsintensive@stanford.edu
Web Site: http://soco.stanford.edu

The Arts Intensive (AI) Program enrolls small groups of Stanford students in arts courses that encourage a dynamic immersion into the process of art making. The program takes place over three weeks in September before the start of the fall academic year. The program aims to engage students, regardless of the level of experience, in the practice of a particular artistic discipline. In 2009, Acting, Design Thinking, Filmmaking, Sound Recording and Set Design are offered. Courses are taught by Stanford arts faculty and a visiting artist; students live together in a Stanford residence during the program and receive two units of academic credit. Eligible students will have completed at least six academic quarters at Stanford and be in good academic standing.

Students pay a $600 fee toward the cost of room and board which is charged to the Autumn Quarter university bill. Books and course supplies are provided by the program. Enrollment is by application and takes place in Spring for the upcoming September program. For more information or to apply see the Arts Intensive web site at http://artsintensive.stanford.edu.

BING OVERSEAS STUDIES PROGRAM

Program Director: Norman Naimark
Stanford Program in Australia
Director, Centre for Marine Studies, University of Queensland:
Ove Hoegh-Guldberg
Faculty-in-Residence: Kevin Arrigo
Program Faculty: Bill Casey, Sophie Dove, Norm Duke, John Hall, Ron Johnstone, Ian Lilly, Selina Ward
Stanford Program in Beijing
Director: Xiaohong Shen
Faculty-in-Residence: Liqun Luo, Xueguang Zhou
Program Faculty: Dong Chen, Li Chen, Bobai Li, Kun Li, Zhizhou Wang, Yan Wang, Lian Zhou, Yun Zhou, Xiaoya Zhu
Stanford Program in Berlin
Director: Karen Kramer
Faculty-in-Residence: Eric Roberts, Lauren Rusk, Myra Strober, Carl Weber
Program Faculty: Maria Biege, Ulrich Brückner, Dubravka Friesel, Martin Jander, Wolf-D. Junghans, Ingo Klein, Sylvia Kloetzler, Matthias Pabsch, Christian Saehrendt, Jari Splettstoesser, Sylke Tempel, Jeffrey Trevino, Jochen Wohlfel
Stanford Program in Cape Town
Director: Timothy Stanton
Faculty-in-Residence: Grant Parker, H. Brent Soltz
Program Faculty: Mohamed Adhikari, Azeem Badroodien, Aslam Fataar, Janice McMillan, Nicoli Nattrass, Xolani Ngazimbi, Sophie Oldfield, John Parkinson, Jeremy Seekings, Mary Simons, Nolubabalo Tyam
Stanford Program in Florence
Director: Ermelinda Campani
Faculty-in-Residence: Alessandro Barchiesi, Giovanna Ceserani, Anne Kiremidjian, Fiorenza Micheli
Program Faculty: Khaled Fouad Allam, Pompeo Della Posta, Paolo Galluzzi, Giuseppe Mammarella, Leonardo Morlino, Fiorenza Quercioli, Filippo Rossi, Timothy Verdon
Stanford Center for Technology and Innovation (SCTI)—Kyoto
Director: Andrew Horvat
Faculty-in-Residence: Miyako Inoue
Program Faculty: Peter Duus, Toshihiko Hayashi, Catherine Ludvik

Stanford Program in Madrid
Director: Santiago Tejerina-Canal
Faculty-in-Residence: Deborah Gordon, Maria-Paz Haro, John Kunz

Program Faculty: Francisco Javier Bobillo de la Peña, Maria Teresa Cambor Portilla, Julia Doménech, Sylvia Hilton, Sheila Klaiber, Miguel Larrañaga Zulueta, Pablo de Lora del Toro, Antonio Muñoz, Laura Murcia

Stanford Program in Moscow
Director: Alexander Abashkin
Faculty-in-Residence: Nancy Tuma

Program Faculty: Tatiana Boldyrevae, Maxim Bratersky, Galina Filatova, Edward Ivanian, Sergey Kortunov, Liza Kurganova, Vladimir Mau, Sergei Medvedev, Vadim Novikov

Stanford Program in Oxford
Director: GeoffreyTyack
Faculty-in-Residence: Larry Friedlander, Rona Giffard, John Wilinsky

Stanford Program in Paris
Director: Estelle Halevi
Faculty-in-Residence: Cécile Alduy, Eve Clark, Julie Parsonnet

Program Faculty: Ken Berman, Colette Deremble, Jean Paul Demeuble, Jean-Marie Fessler, Sonia Gourevitch, Patrick Guedon, Choukri Hmed, Tiphanie Karsenti, Jacques Le Cacheux, Benoit Leguet, Florence Mercier, Marie-Madeleine Mervant-Roux, Elizabeth Molkou, Anne Muxel, Christian de Perthuis, Martial Poirson, Pauline Reychnam, Marie-Christine Ricci, Françoise Rullier, Sylvie Strudel, Fabrice Virgili

Stanford Program in Santiago
Director: Iván Jaksic
Faculty-in-Residence: Thomas Finger, Zephyr Frank, Robert Siegel
Program Faculty: Mabel Abad, César Albornoz, Andrés Bobbert, Ignacio Briones, Marcela Bustamante, Germán Correa, Claudio Fuentes, Sergio Micco, Sergio Missana, Oscar Muñoz, Alvaro Palma, Hernan Pons, Bernardo Subercaseaux

Program Offices: Floor, Sweet Hall, 590 Escondido Mall
Mail Code: 94305-3089
Phone: (650) 723-3558
Email: bospstudy@lists.stanford.edu
Web Site: http://bosp.stanford.edu

Courses offered by the Overseas Studies Program are listed on the Stanford Bulletin’s ExploreCourses web site under subject codes beginning with OSP: Overseas Studies Australia [OSPAUSTL], Beijing [OSPEBU], Berlin [OSPER], Florence [OSPFLO], General [OSPGEN], Kyoto [OSPKYOTO], Madrid [OSPMANDR], Moscow [OSPMOSC], Oxford [OSPOXFRD], Paris [OSPPARIS], and Santiago [OSPSANT]

The Bing Overseas Studies Program (BOSP) provides opportunities for Stanford students to broaden their undergraduate education through study in another country and immersion in its culture. Regular programs in Australia, Beijing, Berlin, Cape Town, Florence, Kyoto, Madrid, Moscow, Oxford, Paris, and Santiago offer courses in social and natural sciences, humanities, and engineering with full Stanford credit. Many courses also count toward major requirements and/or fulfill General Education Requirements. Students may enroll for one or more quarters at most locations. Academic or paid internships are available at the Berlin, Florence, Kyoto-SCTI, Madrid, Moscow, and Paris programs. Research opportunities are available in various formats at different centers. Minimum academic and language prerequisites are specific to each program. See http://bosp.stanford.edu for information on these requirements.

While studying overseas through BOSP, students remain registered at Stanford and pay regular tuition, along with the overseas fee, which is based on Stanford room and board rates. Regular financial aid applies, and may be increased to cover additional costs. At most centers, students live in a homestay or with local students.

Overseas Studies also offers a limited number of special programs. In addition to programs offered for enrolled Stanford students, the University is a member of two consortia: the Consortium for Advanced Studies in Barcelona and the Kyoto Consortium for Japanese Studies.

The Office of Undergraduate Advising and Research (UAR) helps students realize the full intellectual richness of undergraduate life at Stanford. UAR advisers work directly with students in one-on-one interactions to help them develop their scholarly interests before and after they declare a major, overcome obstacles to their academic success, immerse themselves in their chosen fields, engage with faculty, take advantage of academic opportunities and resources outside their major departments, and, for some students, to prepare for post-baccalaureate study.

The UAR staff includes professional advisers in Sweet Hall, academic directors (ADs) in Florence Moore, Freshman-Sophomore College, Lagunita, Roble, Stern, Toyon, and Wilbur residence halls, Grove-Lasuen, and the Athletic Academic Resource Center. Freshmen are assigned to academic advisers (faculty and academic staff) according to their preliminary academic interest and residence. The academic directors associated with the residences and athletics and UAR advisers complement the role of the assigned advisers with a comprehensive understanding of the curriculum; they advise students broadly on their courses of study and long term goals. Some freshmen receive enhanced academic support through participation in Expanded Advising Programs (EAP).

UAR services include:
- assistance with curriculum planning, including overseas studies
- consultation on choosing a major
- advice on integrating research into an undergraduate program of study
- support for students considering and applying for merit-based scholarships and national fellowships
- practical advice on how to prepare for and apply to graduate and professional schools
- academic and personal advising related to academic performance
- guidance on policies and procedures concerning academic standing
- assistance with interpretation and application of academic rules and regulations
- use of the resource library and membership on email lists
- referrals to campus tutoring resources and counseling offices

UNDERGRADUATE ADVISING AND RESEARCH

Director: Julie Lythcott-Haims
Program Office: Sweet Hall, first floor
Phone: (650) 723-2426
Fax: (650) 725-1436
Web Site: http://ual.stanford.edu
Email: vpue-advising@stanford.edu, vpue-research@stanford.edu

Stanford Bulletin, 2009-10 | 55
SCHOLARSHIPS AND FELLOWSHIPS, AND POST-BACCALAUREATE STUDIES

Along with the Overseas Resource Center (http://stanford.edu/dept/oc), UAR staff help students to compete for merit scholarships and post-baccalaureate fellowships. UAR also administers campus nomination competitions for the Goldwater, Udall, Beinecke, Center for the Study of the Presidency, Jack Kent Cooke, Carnegie, Loebl, and Truman scholarships, as well as the Goldman Sachs Global Leaders Program. Binders containing applications of previous winners are available in the offices of academic directors and on the first floor of Sweet Hall.

UAR offers workshops and individual consultations on choosing a graduate or professional school, such as in law or the health professions, writing personal statements, soliciting letters of recommendation, and preparing for interviews.

UNDERGRADUATE RESEARCH

UAR sponsors and supports programs that encourage undergraduates to work individually with faculty on research, advanced scholarship, and creative projects. Programs are designed to serve students new to research and those with considerable research experience who are able to take on advanced, independent projects. See http://undergradresearch.stanford.edu for more information.

STUDENT GRANT PROGRAMS

UAR offers research grants to registered Stanford undergraduates. Grants support faculty-mentored research projects, and are typically used to pay for research/creative supplies, travel, and room and board (Major Grant and Chappell Lougee Scholarship recipients may include a stipend within their budget if they are working full-time on their project over the Summer Quarter). For the 2009-2010 academic year, students have access to the following grant programs:

- Small Grants provide for student projects that explore a topic of interest or contribute to the development of future intellectual pursuits. They are often used for smaller projects, preliminary research, and follow-up expenses associated with larger projects.
- Major Grants support larger projects that normally span several quarters. Funded projects typically culminate in an honors thesis or some other substantial capstone product that demonstrates a focused and intellectually rigorous perspective on the topic of interest. Major grant proposals are subject to a review process that includes input from faculty in the relevant departments.
- Angel Grants assist students in producing a finished public creative work such as an art exhibit, film, stage production, or concert.
- Conference Travel Grants support students who have been invited to present their research at a professional or scholarly conference. The grants fund travel expenses to and from the conference, and normal conference registration. Students demonstrating financial need may also include conference-associated food and lodging in their budget. Normally, Conference Travel Grants are intended to match funds made available by the faculty mentor or some other source.

For current deadlines and program details, see http://studentgrants.stanford.edu. The application for any student grant consists of (1) a student-authored project proposal, including a line-item budget, and (2) a letter of support written by a qualified member of the Stanford faculty. UAR may also consult student transcripts as well as outside faculty reviewers. Proposals are judged on intellectual significance, rigor and feasibility of project design, and evidence of student preparedness. The program is competitive, and not all good proposals can be funded.

UAR provides advising support for students considering a research grant, including proposal writing and project design consultation and advice on administrative policies. Students can view sample proposals at the UAR office. For more information, see http://studentgrants.stanford.edu.

DEPARTMENTAL AND FACULTY SPONSORED RESEARCH OPPORTUNITIES

Departments, interdisciplinary programs, and Stanford research centers may apply through the UAR office for VPUE Departmental Grants for Undergraduate Research to support programs that provide undergraduates with mentorship and training in scholarship and research. Typically, departments pair students with a faculty member or faculty-led research group according to their mutual scholarly interests. Students conduct substantive, directed research on a particular aspect of the faculty member’s research project, and they meet frequently with their faculty mentors to discuss progress and future directions for the project. For an official request for proposal form, see http://vpuedepartmentalgrants.stanford.edu. Students should check with UAR staff to determine which departments and centers currently sponsor research programs.

Individual faculty members may also apply through the UAR office for VPUE Faculty Grants for Undergraduate Research. Faculty Grants provide funding for undergraduates to work closely with faculty on a directed research project. Typical student research activities include conducting literature reviews, developing and conducting research surveys, collecting and analyzing data, aiding in the development of course materials, and conducting laboratory experiments. Faculty determine student participation in this program, so students should contact departments and faculty for more information. For an official request for proposal form, see http://vpefacultygrants.stanford.edu.

CENTER FOR TEACHING AND LEARNING

Associate Vice Provost for Undergraduate Education and Director: Michele Marincovich
Senior Associate Director (Science and Engineering): Robyn Wright Dunbar
Associate Director (Humanities): Mariette Dernman
Associate Director (Social Sciences and Technology): Marcelo Clerici-Arias
Associate Director for Academic Support: Adina Glickman
Tutoring and Academic Skills Specialist: Amy Chambers
Oral Communication Program Director and Senior Lecturer: Doree Allen
Oral Communication Specialist and Tutor Manager: Lindsey Paul
Lecturers: Thomas Freeland, Marianne Neuworth, James Wags taffe

Department Offices: Sweet Hall, 4th floor
Speaking Center: Meyer Library 123
Mail Code: 94305-3087
Center Phone: (650) 723-1326
Email: TeachingCenter@stanford.edu
Web Site: http://ctl.stanford.edu

The Center for Teaching and Learning is a University-wide resource on effective teaching and public speaking for faculty, lecturers, and teaching assistants and on effective learning and public speaking for undergraduates and graduate students. All courses listed with CTL promote acquisition of public speaking skills,
enhanced learning skills, and/or teaching excellence. Courses offered by the Center for Teaching and Learning are listed under the subject code CTL on the Stanford Bulletin’s ExploreCourses website.

CTL SERVICES TO UNDERGRADUATES AND GRADUATE STUDENTS

CTL provides resources for students who want to enhance their study approaches and clarify their learning strategies. Through courses, individual counseling, and workshops, CTL helps students build skills that are the foundation for continuous improvement and lifelong learning. Students benefit from developing and applying individually-crafted strategies that build on their existing strengths. Time management, note-taking, reading comprehension and retention, and procrastination are common topics for discussion.

Free tutoring is available to undergraduates in many subjects; see http://tutoring.stanford.edu for details on where and when tutors can be found. Students qualified to do tutoring may apply to be tutors and, if accepted, are expected to take CTL’s course on tutoring; the application process takes place in February.

CTL SERVICES TO FACULTY, LECTURERS, AND TEACHING ASSISTANTS

CTL provides the Stanford community with services and resources on effective teaching. Our goals are: to identify and involve successful faculty, lecturers, and TAs who are willing to share their talents with others; to provide those who are seeking to improve their teaching with the means to do so; to acquaint the Stanford community with important innovations and new technologies for teaching; to prepare new faculty and TAs for their responsibilities; to contribute to the professional development of teaching assistants; to expand awareness of the role of teaching at research universities; and to increase the rewards for superior teaching. CTL is also responsible for helping departments with designing effective TA training programs.

Resources available to faculty, lecturers, and TAs include: videotaping, microteaching, and consultation; small group and other forms of mid-quarter evaluation; workshops and lectures; a handbook on teaching and a library of teaching materials; quarterly teaching orientations; and work with individuals, groups, and departments on their specific needs. For further details, see CTL’s teaching handbook or the CTL brochure, both available by calling (650) 723-1326, or see http://ctl.stanford.edu.

For questions or requests, email TeachingCenter@stanford.edu.

ORAL COMMUNICATION PROGRAM

The Oral Communication Program at CTL provides opportunities for undergraduates and graduate students to develop or improve their oral communication skills. Courses and workshops offer a comprehensive approach to speech communication, including training in the fundamental principles of public speaking and the effective delivery of oral presentations. The goal is to enhance students’ general facility and confidence in oral expression. The program also provides innovative, discipline-based instruction to help students refine their personal speaking styles in small groups and classroom settings. Those interested in individualized instruction or independent study are invited to make an appointment to use the program’s Speaking Center in Meyer Library, room 123, where trained student tutors, multimedia, and instructional resource materials are available on an ongoing basis. To schedule an appointment, see http://speakingleeprogram.stanford.edu. For further details, call (650) 725-4149 or 723-1326 or see http://ctl.stanford.edu/oralcomm.

GRADUATE EDUCATION

Vice Provost for Graduate Education: Patricia J. Gumport
Associate Vice Provosts for Graduate Education: John Boothroyd, Chris M. Golde, Sheri D. Sheppard
Assistant Dean for Research and Graduate Policy: Ann George
Director of Fellowships and Programs: Pat Cook
Associate Director, Programs and Administration: Rebecca Jantzen
Web site: http://vpge.stanford.edu
Office: Building 310
Mail code: 94305-2102
Phone: (650) 736-0775

The Vice Provost for Graduate Education (VPGE) plays a leadership role in initiating and managing policies and programs that enhance the quality of graduate education for master’s, doctoral, and professional students across Stanford’s seven schools. VPGE fosters academic innovation and supports the schools and programs that have primary responsibility for organizing and delivering graduate education. In addition to providing University-wide graduate policy direction, the VPGE office has three primary areas of program activity: administering University-wide graduate fellowship programs; advancing graduate student diversity; and promoting cross-school educational opportunities (interdisciplinary learning, leadership and professional development). The Vice Provost for Graduate Education reports to the Provost.

GRADUATE POLICY

The Faculty Senate Committee on Graduate Studies (C-GS) formulates policy concerning the substance and process of graduate education as well as the evaluation and recording of graduate achievement, and reviews the implementation of such policy. The committee also monitors the academic quality and effectiveness of the University’s graduate interdisciplinary and joint degree granting programs. Committee members include the Vice Provost for Graduate Education or her delegated staff (ex officio) and representatives from the faculty at large, administration such as the Office of the University Registrar, and students. The Graduate Student Council and the Nominations Committee of the Associated Students of Stanford University (ASSU) choose student members.

VPGE recommends, promulgates, and interprets University policies related to graduate education. VPGE oversees administrative and financial systems related to graduate student support, including policies related to requirements for research and teaching assistantships, and minimum compensation levels for those positions. For other policies related to graduate admissions and degree requirements, see relevant sections of this bulletin.

RESEARCH POLICIES FOR GRADUATE STUDENTS

Graduate education and research are interrelated enterprises. Many Stanford graduate students are conducting research under the guidance and sponsorship of Stanford faculty members. The Dean of Research has primary responsibility for oversight of the research enterprise. Several policies in that arena are particularly relevant to graduate students. These include:

Academic Authorship—Guidelines related to academic authorship, such as the allocation of responsibility and credit for scholarly publications. For complete text of the guidelines, see Research Policy Handbook memo 2.8, On Academic Authorship, at http://rph.stanford.edu/2-8.

Intellectual Property—Policies on copyrights and patents resulting from University work. Graduate students and postdoctoral
fellows, as well as all faculty, staff, and visitors engaged in research, must sign the Stanford University Patent and Copyright Agreement. For complete text of the currently applicable versions of these policies, see Research Policy Handbook chapter 5, Intellectual Property, at http://rph.stanford.edu/Chpt5.

Openness in Research—Policy on openness in research, such as the principle of freedom of access by all interested persons to the underlying data, processes, and final results of research. Stanford University does not accept funding for research projects that require secrecy. For complete text of the currently applicable version of this policy, see Research Policy Handbook memo 2.6, Openness in Research, at http://rph.stanford.edu/2-6.

Relationships between Students and Outside Organizations—Summary of policies on the establishment of relationships between students and outside entities, such as private companies or nonprofit organizations, as part of or outside the student’s academic program at Stanford. This covers open versus proprietary nature of the work, ownership of intellectual property, and possible conflicts of commitment and interest. For complete text of the currently applicable versions of these policies, see Research Policy Handbook memo 2.11, Relationships Between Students (Including Postdoctoral Scholars) and Outside Entities, at http://rph.stanford.edu/2-11.

Research Compliance—Seven administrative panels review and approve research projects to safeguard the rights and welfare of all human research subjects, ensure the humane care and use of laboratory animals, and protect the safety of personnel and the general public in the areas of biosafety and radiological safety. For more information, contact the Research Compliance Office, http://researchcompliance.stanford.edu.

Research Misconduct—Policy on allegations, investigations, and reporting of research misconduct. Each member of the University community has a responsibility to foster an environment which promotes intellectual honesty and integrity, and which does not tolerate misconduct in any aspect of research or scholarly endeavor. For complete text of the currently applicable version of this policy, see Research Policy Handbook memo 2.5, Research Misconduct: Policy on Allegations, Investigations and Reporting, at http://rph.stanford.edu/2-5.

COMPETITIVE GRADUATE FELLOWSHIP PROGRAMS

Several University-wide graduate fellowship programs are administered by the VPGE, including the Stanford Graduate Fellowships Program in Science and Engineering (SGF) and the Stanford Interdisciplinary Graduate Fellowship (SIGF) program. VPGE also administers several smaller University-wide fellowships programs to new and continuing doctoral students that require nomination by faculty or deans.

STANFORD GRADUATE FELLOWSHIPS PROGRAM IN SCIENCE AND ENGINEERING (SGF)

Web site: http://sgf.stanford.edu

SGF competitively awards approximately 100 two- and three-year fellowships providing tuition support and stipend to outstanding students pursuing a doctoral degree in the sciences and engineering. SGF fellows can explore labs in a variety of fields. Nominations for SGF fellowships are submitted by science and engineering departments and programs.

STANFORD INTERDISCIPLINARY GRADUATE FELLOWSHIPS (SIGF)

Web site: http://sigf.stanford.edu

Beginning in 2008-09, the new SIGF program awards fellowships on a competitive basis to doctoral students engaged in interdisciplinary research. The fellowships enable Stanford doctoral students to pursue questions that cross traditional disciplinary boundaries. Nominations for SIGF fellowships are submitted by faculty.

GRADUATE STUDENT DIVERSITY

VPGE works to diversify the graduate student population by supporting recruitment and retention programs in collaboration with faculty and staff in each of the schools. VPGE funds recruiting activities to expand the pool of qualified applicants, such as visits to campus and travel grants. VPGE offers resources to groups within and across schools for activities that enhance the quality of students’ educational experiences and improve retention. VPGE also works collaboratively to develop programs that cultivate interest in academic careers and diversify the pipeline for future faculty. The DARE Doctoral Fellowship Program, administered by VPGE, awards two-year fellowships on a competitive basis to Stanford doctoral students in their final two years who want to investigate and prepare for academic careers and whose participation can help to diversify the professoriate.

CROSS-SCHOOL LEARNING OPPORTUNITIES

VPGE provides seed funding to initiatives that foster cross-school interactions for graduate students. The Stanford Graduate Summer Institute (SGSI) offers noncredit interdisciplinary short courses exclusively for Stanford graduate students and postdoctoral scholars. VPGE also seeks to facilitate enrollment in courses outside of students’ home departments and schools.

Leadership, pedagogy, communication, and entrepreneurship are topics of interest to graduate students across the University. VPGE collaborates with other departments, such as the Center for Teaching and Learning, the Graduate Life Office, and the Writing Center to raise the visibility and expand the breadth of these offerings.

STANFORD GRADUATE SUMMER INSTITUTE (SGSI)

Web site: http://sgsi.stanford.edu

SGSI courses introduce graduate students to multidisciplinary and interdisciplinary thinking. Students from across the University have the opportunity to meet others outside their fields, create networks, and foster crossdisciplinary collaborations. Most SGSI courses are small and taught in an intensive workshop format at the end of Summer Quarter. Courses are non-credit bearing and free of tuition or fees.

Dean: Robert Joss (through August 31, 2009)

Dean Garth Saloner (effective September 1, 2009)

Senior Associate Deans: Glenn R. Carroll, Peter M. DeMarzo, Susna Khan, Daniel N. Rudolph

Associate Deans: Gale H. Bitter, Sharon J. Hoffman, Sharon Marine, Claudia J. Morgan, Karen A. Wilson

Assistant Deans: Derrick Bolton, Andrew Chan, Robert Urstein, Randy Yee

Professor (Teaching): James A. Phillips, Jr.

Acting Assistant Professors: Margreth V. Bjarnadottir, Anamaria Pieschacon

Senior Lecturers: Jeffrey H. Moore, JD Schramm

Consulting Professors: Anthony B. Bryk, H. Irving Grousbeck, Mark A. Wolfson

* Recalled to active duty.

The mission of the Graduate School of Business is to create ideas that deepen and advance the understanding of management and, with these ideas, develop innovative, principled, and insightful leaders.

The two-year Master of Business Administration (M.B.A.) degree program is for students who aspire to contribute to society through leadership in business, government, and the nonprofit sector. The general management curriculum rests on a foundation of social science principles and management functions layered with interdisciplinary themes of leadership, entrepreneurship, global management, and social responsibility. The M.B.A. curriculum stresses breadth rather than depth, but includes options for certificates in Global Management and Public Management. A number of joint degree programs allow the M.B.A. to be combined with degrees in the Schools of Education, Law, and Medicine, as well as interdisciplinary degrees in Public Policy and Environmental Studies. The primary criteria for admission are demonstrated leadership potential, intellectual vitality, and diversity among students. No specific undergraduate major or courses are required for admission, but experience with analytic and quantitative concepts is important. Some students enter directly following undergraduate study, but most obtain one or more years of work experience.

The Stanford Sloan Program is an intensive, one-year course of study for middle management executives leading to the degree of Master of Science in Management. Participants must have demonstrated superior achievement and are normally sponsored by their company.

Those interested in college teaching and research are served by the Doctor of Philosophy program.

For detailed information on programs, curriculum, and faculty, see the School’s web site at http://gsb.stanford.edu.
SCHOOL OF EARTH SCIENCES

Dean: Pamela A. Matson
Associate Dean for Academic Affairs: Stephan A. Graham
Assistant Dean for Student Services and Diversity: Roni Holleton

The School of Earth Sciences includes the departments of Geological and Environmental Sciences, Geophysics, Energy Resources Engineering (formerly Petroleum Engineering), and Environmental Earth System Science; and three interdisciplinary programs: the Earth Systems undergraduate program, the Emmett Interdisciplinary Graduate Program in Environment and Resources (E-IPER), and the graduate-level Earth, Energy, and Environmental Sciences Graduate Program (EEES). The Earth Systems Program and E-IPER offer study of biophysical and social dimensions of environment and resources, while EEES is intended for students working across departments and disciplines within the School of Earth Sciences.

The aims of the school are (1) to prepare students for careers in the fields of biogeochemistry, climate science, energy resource engineering, environmental science, geology, geochemistry, geomechanics, geophysics, geostatistics, hydrogeology, land science, oceanography, petroleum engineering, and petroleum geology; (2) to conduct research in the Earth sciences; and (3) to provide opportunities for Stanford undergraduates to learn about the planet’s history, to understand the energy and resource base that supports humanity, to appreciate the geological and geophysical hazards that affect human societies, and to understand the challenges and solutions related to the environment and sustainability.

To accomplish these objectives, the school offers a variety of programs adaptable to the needs of the individual student: four-year undergraduate programs leading to the degree of Bachelor of Science (B.S.); five-year programs leading to the coterminal Bachelor of Science and Master of Science (M.S.); and graduate programs offering the degrees of Master of Science, Engineer, and Doctor of Philosophy as described below. Details of individual degree programs are found in the section for each department or program.

Courses offered by the School of Earth Sciences are listed under the subject code EARTHSCI on the Stanford Bulletin’s ExploreCourses web site.

UNDERGRADUATE PROGRAMS IN EARTH SCIENCES

Any undergraduate admitted to the University may declare a major in one of the Earth Science departments or programs by contacting the appropriate department or program office.

Requirements for the B.S. degree are listed in each department or program section. Departmental academic advisers work with students to define a career or academic goal and assure that the student’s curricular choices are appropriate to the pursuit of that goal. Advisers can help devise a sensible and enjoyable course of study that meets degree requirements and provides the student with opportunities to experience advanced courses, seminars, and research projects. To maximize such opportunities, students are encouraged to complete basic science and mathematics courses in high school or during their freshman year.

Each department offers an honors program involving research during the senior year. Each department also offers an academic minor for those undergraduates majoring in compatible fields. The Earth Systems Program also offers an honors program in Environmental Science, Technology, and Policy through the Woods Institute for the Environment.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES IN EARTH SCIENCES

The Stanford coterminal degree plan enables an undergraduate to embark on an integrated program of study leading to the master’s degree before requirements for the bachelor’s degree have been completed. This may result in more expeditious progress towards the advanced degree than would otherwise be possible, making the program especially important to Earth scientists because the master’s degree provides an excellent basis for entry into the profession. The coterminal program permits students to apply for admission to a master’s program after earning 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree.

Under the plan, the student may meet the degree requirements in the more advantageous of the following two ways: by first completing the 180 units required for the B.S. degree and then completing the three quarters required for the M.S. degree; or by completing a total of 15 quarters during which the requirements for the two degrees are completed concurrently. In either case, the student has the option of receiving the B.S. degree upon meeting all the B.S. requirements or of receiving both degrees at the end of the coterminal program. Students earn degrees in the same department or program, in two different departments, or even in different schools; for example, a B.S. in Physics and an M.S. in Geological and Environmental Sciences. Students are encouraged to discuss the coterminal program with their advisers during their junior year. Additional information is available in the individual department offices.

GRADUATE PROGRAMS IN EARTH SCIENCES

Admission to the Graduate Program—A student who wishes to enroll for graduate work in the school must be qualified for graduate standing in the University and also must be accepted by one of the school’s four departments or one of the two interdisciplinary Ph.D. programs. One requirement for admission is submission of scores on the verbal and quantitative sections of the Graduate Record Exam. Admission to one department of the school does not guarantee admission to other departments.

Faculty Adviser—Upon entering a graduate program, the student should report to the head of the department or program who arranges with a member of the faculty to act as the student’s adviser. Alternatively, in several of the departments, advisers are established through student-faculty discussions prior to admission. The student, in consultation with the adviser(s), then arranges a course of study for the first quarter and ultimately develops a complete plan of study for the degree sought.

Financial Aid—Detailed information on scholarships, fellowships, and research grants is available from the school’s individual departments and programs. Applications should be filed by the various dates listed in the application packet for awards that become effective in Autumn Quarter of the following academic year.
EARTH, ENERGY, AND ENVIRONMENTAL SCIENCES GRADUATE PROGRAM (EEES)

Director: Kevin R. Arrigo
Associate Director: Deana Fabbro-Johnston
Academic Oversight Committee: Kevin Arrigo (Environmental Earth System Science), Biondo Biondi (Geophysics), Jef Caers (Energy Resources Engineering), Louis Durlofsky (Energy Resources Engineering), Scott Fendorf (Environmental Earth System Science)

Program Offices: Mitchell Building, Room 365
Mail Code: 2215
Web Site: http://pangea.stanford.edu/EEES

Courses offered by the Earth, Energy, and Environmental Sciences Program are listed under the subject code EEES on the Stanford Bulletin’s Explore Courses web site.

The goal of Earth, Energy, and Environmental Sciences (EEES) is to complement the disciplinary Earth Science and Engineering programs offered within the departments of the School of Earth Sciences and to train graduate students to integrate knowledge from these disciplines through tools and methods needed to evaluate the linkages among physical, chemical, and biological systems of the Earth, and understand the dynamics or evolution of these integrated systems and the resources they provide.

Students in EEES must make significant headway in, and combine insights from, more than one scientific discipline. For example, a student whose goal is to understand the structure of the Earth’s interior using computational methods might design a study plan that includes high-level mathematics, numerical modeling, and geophysical imaging techniques. A student interested in water management might integrate water flow analysis and modeling, geophysical imaging, geostatistics, and satellite remote sensing of changes in agricultural intensity and land use. A student interested in marine carbon cycling might use knowledge and tools from numerical modeling, marine biogeochemistry and geochemistry, oceanography, and satellite imaging. The key to the program is the student’s academic flexibility and ability to exploit an increasingly interdisciplinary faculty, particularly in the School of Earth Sciences, but also in the greater Stanford community.

GRADUATE PROGRAMS IN EARTH, ENERGY, AND ENVIRONMENTAL SCIENCES

To ensure that students are appropriately placed in this program, a statement of purpose submitted with the application for admission must reflect the student’s reasoning for pursuit of a professional career or for doctoral studies.

Students in the M.S. degree program must fulfill the following requirements:

1. Complete a 45-unit program of study, of which a minimum of 30 units must be course work, with the remainder consisting of no more than 15 research units.
2. Course work units must be divided among two or more scientific and/or engineering disciplines and can include the three core courses required for the Ph.D. degree.
3. The program of study must be approved by the research adviser and the academic oversight committee.
4. All students are required to complete a M.S. thesis, approved by the student’s thesis committee.

DOCTOR OF PHILOSOPHY IN EARTH, ENERGY, AND ENVIRONMENTAL SCIENCES

In addition to the University’s basic requirements for the doctorate, the Interdepartmental Program in Earth, Energy, and Environmental Sciences has the following requirements:

1. Prior to the formation of a thesis committee, the student works with research advisers and the academic oversight committee to design a course of study with depth in at least two areas of specialization and preparation in analytical methods and skills. Ph.D. students must take the three core courses: EEES 300, Earth Sciences Seminar; EEES 301, Earth Dynamics; and EEES 302, Challenges and Best Practices in Crossdisciplinary Research and Teaching. The research advisers and academic oversight committee have primary responsibility for the adequacy of the course of study.
2. Students must complete a minimum of 13 courses, including the three core courses and five courses from each of the two areas of specialization. At least half of the ten non-core classes must be at a 200 level or higher, and all must be taken for a letter grade. Students obtaining their M.S. from within the program can apply all master’s units toward Ph.D. requirements. Students with an M.S. degree or other specialized training from outside EEES may be able to waive some of the non-core course requirements, depending on the nature of the prior courses or training. The number and distribution of courses to be taken by these students is determined with input from the research advisers and academic oversight committee.
3. During Spring Quarter of each year, students must undergo an annual review by their thesis committee to allow the committee to monitor the progress of the student and make recommendations, where necessary.
4. Prior to taking the oral qualifying examination at or before the end of the sixth academic quarter, the student must have completed 24 units of letter-graded course work, developed a written crossdisciplinary dissertation proposal suitable for submission to a funding organization, and selected a thesis committee.
5. To be admitted to candidacy for the Ph.D. degree, the student must pass an oral qualifying examination. At least two of the minimum four-member examining committee must be faculty within the School of Earth Sciences. During the exam, students present and defend their proposed thesis research work; the exam generally takes the form of a 20-30 minute presentation by the student, followed by 1-2 hours of questioning.
6. The research advisers and two other faculty members comprise the dissertation reading committee. Upon completion of the thesis, the student must pass a University Oral Examination in defense of the dissertation.

In addition to the three core courses, students can select other courses from departments of the School of Earth Sciences and other University departments as appropriate. All courses must be approved by the student’s thesis committee or by the academic oversight committee. Additional information may be found in the Graduate Student Handbook at http://www.stanford.edu/dept/DoS/GSH.
EARTH SYSTEMS

Director: Robert B. Dunbar
Associate Director, Academics: Julie Kennedy, Senior Lecturer
Associate Director, Administration: Deana Fabbro-Johnston
Committee of the Whole: Nicole Ardoin (School of Education), Kevin Arrigo (Environmental Earth System Science; Earth, Energy and Environmental Sciences), Gregory Asner (Department of Global Ecology, Carnegie Institution), Barbara Block (Bioloogy, Hopkins Marine Station), Carol Boggs (Bioloogy), Alexandre Boucher (Environmental Earth System Science), Margaret Caldwell (Law), Page Chamberlain (Environmental Earth System Science), Gretchen Daily (Bioloogy), Jenna Davis (Civil and Environmental Engineering), Mark Denny (Bioloogy, Hopkins Marine Station), Rodolfo Dirzo (Bioloogy), Robert B. Dunbar (Earth Systems; Environmental Earth System Science), William Durham (Anthropology), Gary Ernst (Geological and Environmental Sciences, emeritus), Walter Falcon (Freeman Spogli Institute for International Studies), Scott Fendorf (Environnental Earth System Science), Christopher Field (Department of Global Ecology, Carnegie Institution), Christopher Francis (Environmental Earth System Science), David Freyberg (Civil and Environmental Engineering), Margaret Gerritsen (Energy Resources Engineering), Deborah Gordon (Bioloogy), Steven Gorelick (Environmental Earth System Science), Lawrence Gould (Economics), Elizabeth Hadly (Bioloogy), George Hilley (Geological and Environmental Sciences), David Kennedy (History), Donald Kennedy (Bioloogy, Freeman Spogli Institute for International Studies, emeritus), Julie Kennedy (Earth Systems; Environmental Earth System Science), Rosemary Knight (Geophysics), Jeffrey Koseff (Civil and Environmental Engineering), Anthony Kovscek (Energy Resources Engineering), Gilbert Masters (Civil and Environmental Engineering), Pamela Matson (Dean, School of Earth Sciences; Freeman Spogli Institute for International Studies), Stephen Monismith (Civil and Environmental Engineering), Harold Mooney (Bioloogy), Rosamond Naylor (Environmental Earth System Science), Freeman Spogli Institute for International Studies), Stephen Pailumbi (Bioloogy, Hopkins Marine Station), Jonathan Payne (Geological and Environmental Sciences), Stephen H. Schneider (Bioloogy; Freeman Spogli Institute for International Studies), Gary Schoolnik (Medicine), James Sweeney (Management Science and Engineering), Paul Switzer (Environmental Earth System Science; Statistics), Leif Thomas (Environmental Earth System Science), Barton Thompson (Law), Peter Vitousek (Bioloogy; Interdisciplinary Program in Environment and Resources), Virginia Walbot (Bioloogy), Mark Zoback (Geophysics)

Program Office: Yang and Yamazaki Environmnet and Energy (Y2E2) Building, Room 131
Mail Code: 94305-4215
Phone: (650) 725-7427
Email: deana@stanford.edu or emburns@stanford.edu
Website: http://pangea.stanford.edu/ESYS

Courses offered by the Earth Systems Program are listed under the subject code EARTHSYS on the Stanford Bulletin’s Explore Courses web site.

MISSION OF THE UNDERGRADUATE PROGRAM IN EARTH SYSTEMS

The Earth Systems Program is an interdisciplinary environmental science major. Students learn about and independently investigate complex environmental problems caused by human activities in interaction with natural changes in the Earth system. Earth Systems majors become skilled in those areas of science, economics, and policy needed to tackle the globe’s most pressing environmental problems, becoming part of a generation of scientists, professionals, and citizens who approach and solve problems in a new way: a systematic, interdisciplinary way.

For students to be effective contributors to solutions for such problems, their training and understanding must be both broad and deep. To this end, Earth Systems students take courses in the fundamentals of biology, calculus, chemistry, geology, and physics, as well as economics, policy, and statistics. After completing breadth training, they concentrate on advanced work in one of five focus areas: biology, energy, environmental economics and policy, land management, or oceanography. Tracks are designed to support focus and rigor but include flexibility for specialization. Examples of specialized focus have included but are not limited to environmental and human health, sustainable agriculture, energy economics, sustainable development, business and the environment, and marine policy. Along with formal course requirements, Earth Systems students complete a 9-unit (270-hour) internship. The internship provides a hands-on academic experience working on a supervised field, laboratory, government, or private sector project.

The following is an outline of the sequential topics covered and skills developed in this major.

1. Fundamentals: The Earth Systems Program includes courses that describe the natural workings of the physical and biological components of the Earth as well as courses that describe the human activities that lead to change in the Earth system. Training in fundamentals includes introductory course work in geology, biology, chemistry, physics, and economics. Depending on the Earth Systems track chosen, training may also include introduction to the study of energy systems, microbiology, oceans, or soils.

2. System Interactions: Focus in these courses is on the fundamental interactions among the physical, biological, and human components of the Earth system. The dynamics of the interplay between natural variation and human-imposed influences must be understood to achieve effective solutions to environmental problems. Earth Systems courses that introduce students to the dynamic and multiple interactions that characterize global change problems include EARTHSYS 10, Introduction to Earth Systems, EARTHSYS 111, Biology and Global Change, and EARTHSYS 112, Human Society and Global Change. Competence in understanding system-level interactions is critical to development as an Earth Systems thinker, so additional classes that meet this objective are excellent choices as electives.

3. Skills Development: Students take skills courses that help them to recognize, quantify, describe, and help solve complex problems that face society.

Field and laboratory methods can help students to recognize the scope and nature of environmental change. For example, training in satellite remote sensing and geographic information systems allows students to monitor and analyze large-scale spatial patterns of change. This training is either required or recommended for all tracks. EARTHSYS 189, Field Studies in Earth Systems, is also recommended.

Quantification of environmental problems requires training in single and multivariable calculus, linear algebra, and statistics. Training in statistics is specific to the area of focus: geostatistics, biostatistics, econometrics.

Success in building workable solutions to environmental problems is linked to the ability to effectively communicate ideas, data, and results. Writing intensive courses (WIM) help students to communicate complex concepts to expert and non-expert audiences. All Stanford students must complete one WIM course in their major. The Earth Systems WIM course is EARTHSYS 260. Other Earth Systems courses also focus on effective written and oral communication and are recommended.

Effective solutions to environmental problems take into consideration natural processes as well as human needs. Earth Systems emphasizes the importance of interdisciplinary analysis and implementation of workable solutions through the required 9-unit internship, EARTHSYS 260, and knowledge synthesis in EARTHSYS 210, Senior Seminar.
A comprehensive list of environmental courses, as well as advice on those that focus on problem solving, is available in the program office. The Earth Systems Program provides an advising network that includes faculty, staff, and student peer advisers.

**BACHELOR OF SCIENCE IN EARTH SYSTEMS**

The B.S. in Earth Systems (EARTHSYS) requires the completion of at least 105 units that can be divided into three levels of courses. The student must complete a series of courses comprising a broad base of specialized study which includes the Earth Systems core, as well as track-specific requirements and electives. Finally, the student must carry out a senior-level research or internship project and participate in the senior seminar, as well as the writing requirement in the major requirement.

**REQUIRED FOUNDATION AND BREADTH COURSES**

**Biology** (any one course below):  
*BIO 41. Genetics, Biochemistry, and Molecular Biology* 5  
*BIO 43. Plant Biology, Evolution, and Ecology* 5  
*BIO 101. Ecology* 3  
*or HUMBIO 2A,B. Genetics, Evolution and Ecology; Culture Evolution, and Society* 10

**Chemistry:**  
*CHEM 31A. Chemical Principles I* 4  
*CHEM 31B. Chemical Principles II* 4  
*or CHEM 31X. Chemical Principles* 4

**Economics:**  
*ECON 1A. Elementary Microeconomics* 5

**Geological and Environmental Sciences:**  
*GES 1A, B, or C. Fundamentals of Geology* 4-5

**Mathematics:**  
*MATH 19. Calculus* 3  
*MATH 20. Calculus* 3  
*MATH 21. Calculus* 4  
*or MATH 41. Calculus* 5  
*MATH 42. Calculus* 5  
*MATH 51. Linear Equations and Differential Calculus of Several Variables* 5

**Probability and Statistics** (any one course below):  
*BIOHOPK 174H. Experimental Design and Probability* 3  
*BIO 141. Biostatistics (Same as STATS 141)* 4  
*ECON 102A. Introduction to Statistical Methods for Social Scientists* 5  
*EESS 160. Statistical Methods for Earth and Environmental Sciences* 4  
*EESS 161. Geostatistics* 4  
*STATS 110. Statistical Methods in Engineering and Physical Sciences* 4  
*STATS 116. Theory of Probability* 3-5  
*STATS 160. Introduction to Statistical Methods* 5

**Physics:**  
*PHYSICS 41. Mechanics* 4

More extensive work in mathematics and physics may be expected for those planning graduate study. Graduate study in ecology and evolutionary biology and in economics requires familiarity with differential equations, linear algebra, and stochastic processes. Graduate study in geology, oceanography, and geophysics may require more physics and chemistry. Students should consult their adviser for recommendations beyond the requirements specified above.

ANTHRO 162. Indigenous Peoples and Environmental Problems
ANTHRO 165. Parks and Peoples: The Benefits and Costs of Protected Area Conservation
ANTHRO 166A. Indigenous Forest Management
EARTHSYS 165. Promoting Behavior Change
EARTHSYS 180. Fundamentals of Sustainable Agriculture
HUMANO 114. Environmental Change and Emerging Infectious Diseases
HUMANO 118. Theory of Ecological and Environmental Anthropology

ENERGY SCIENCE AND TECHNOLOGY
ADDITIONAL FOUNDATION AND BREADTH COURSES:
PHYSICS 43. Electricity and Magnetism
PHYSICS 45. Light and Heat

Energy Resources and Technology:
CEE 176A. Energy Efficient Buildings
CEE 176B. Electric Power: Renewables and Efficiency
EARTHSYS 101. Energy and the Environment
Energy Processes or EARTHSYS 103. Energy Resources

Energy Fundamentals:
ENGR 30. Engineering Thermodynamics

Energy Policy (Choose one):
EARTHSYS 147. Controlling Climate Change in the 21st Century
MSE 243. Energy and Environmental Policy Analysis
MSE 294. Climate Policy Analysis
MSE 295. Energy Policy Analysis

LAND SYSTEMS
ADDITIONAL FOUNDATION AND BREADTH COURSES:
EARTHSYS 144. Fundamentals of GIS
PHYSICS 45. Light and Heat
Choose six courses, with at least one from each grouping:

Land:
BIO 125. Ecosystems of California
BIO 144. Conservation Biology
EARTHSYS 180. Fundamentals of Sustainable Agriculture
EARTHSYS 189. Field Studies in Earth Systems
ECON 106. World Food Economy
EESS 155. Science of Soils
HISTORY 254. Popular Culture and American Nature

Water:
CEE 101B. Mechanics of Fluids
CEE 166A. Watersheds and Wetlands
CEE 166B. Floods and Droughts, Dams and Aqueducts
CEE 171. Environmental Planning Methods
CEE 265D. Water and Sanitation in Developing Countries
EARTHSYS 104. The Water Course
GES 130. Soil Physics and Hydrology

Urban:
CEE 115. Goals and Methods of Sustainable Building Projects
CEE 124. Sustainable Development Studio
CEE 176A. Energy Efficient Buildings
URBANST 110. Introduction to Urban Studies
URBANST 113. Introduction to Urban Design
URBANST 163. Land Use Control
URBANST 165. Sustainable Urban and Regional Transportation Planning

OCEANS
ADDITIONAL FOUNDATION AND BREADTH COURSES:
GES 8. The Oceans: An Introduction to the Marine Environment
PHYSICS 45. Light and Heat

Physics of the Sea:
CEE 164. Introduction to Physical Oceanography

Biological Oceanography (choose one):
BIOHOPK 163H. Oceanic Biology
EESS 143. Marine Biogeochemistry

Remote Sensing of the Ocean (choose one):
EESS 141. Remote Sensing of the Ocean
EARTHSYS 144. Fundamentals of Geographic Information Science (GIS)

Additional Requirement (choose one):
One quarter Stanford@SEA (EARTHSYS 323)
One quarter abroad at the Stanford in Australia Program
One quarter at the Hopkins Marine Station

UPPER-DIVISION ELECTIVES
Two to three additional courses at the 100-level or above are required. Electives allow students to personalize their curriculum by pursuing higher-level courses offered in their focus area, or by incorporating new academic perspectives. Each must be a minimum of three units and approved by an advisor. The following courses are suggested but not exhaustive or required.

ANTHROSPHERE TRACK
CEE 171. Environmental Planning Methods
CEE 266A. Watersheds and Wetlands
CEE 266B. Floods and Droughts, Dams and Aqueducts
CEE 266C. Water Resources and Water Hazards Field Trips
ECON 158. Antitrust and Regulation
ECON 165. International Economics
MS&E 241. Economic Analysis
PUBLPOL 103B. Ethics and Public Policy
GSBGEN 339. Environmental Entrepreneurship

BIOSPHERE TRACK

SUMMARY OF COURSE REQUIREMENTS AND UNITS
Earth Systems Introduction and Core
Required allied courses

STANFORD BULLETIN, 2009-10
The honors program in Earth Systems provides students with an opportunity to pursue individual research within a specific area or between areas of Earth Systems, through a year-long mentored research project with an Earth Systems-affiliated faculty member that culminates in a written thesis.

To be admitted to the honors program, applicants must maintain a minimum GPA of 3.3 in Earth Systems course work. Potential honors students should complete the EARTHSYS 111 and EARTHSYS 112 sequence by the end of the junior year. Qualified students apply in Spring Quarter of the junior year, or the fourth quarter before graduation, by submitting a detailed research proposal and a brief statement of support from a faculty research advisor. Students who elect to do an honors thesis should begin planning no later than Winter Quarter of the junior year.

A maximum of 9 units is awarded for thesis research through EARTHSYS 199. Those 9 units may not substitute for any other required parts of the Earth Systems curriculum. All theses are evaluated for acceptance by the thesis faculty adviser and one additional member of the Earth Systems Committee of the Whole.

Honors students are encouraged to present their research through the School of Earth Sciences Annual Research Review, which highlights undergraduate and graduate research in the school during the annual visit of the School of Earth Sciences external Advisory Board. Faculty advisers are encouraged to sponsor presentation of student research results at professional society meetings.

Students interested in a group-oriented, interdisciplinary honors experience should investigate the Goldman Interschool Honors Program in Environmental Science, Technology, and Policy, a program of the School of Earth Sciences. More information on Goldman may be obtained by phoning (650) 725-2606.

COTERMINAL B.S. AND M.S. DEGREES IN EARTH SYSTEMS

The Stanford coterminal degree enables an undergraduate to embark on an integrated program of study leading to the master’s degree before requirements for the bachelor’s degree have been completed. Undergraduates with a minimum 3.4 Stanford GPA may apply to work simultaneously toward B.S. and M.S. degrees. The M.S. degree in Earth Systems provides the student with enhanced tools to evaluate the primary literature of the discipline most closely associated with the student’s track and allows an increased specialization through additional course work that may include 9 units of thesis research. Integration of earth systems concepts is furthered by participation in the Master’s Seminar.

To apply, complete and return to the Earth Systems office an application that includes: a statement of purpose and a resume; a Stanford transcript; two letters of recommendation, one of which must be from the master’s adviser; and a list of courses that fulfill degree requirements signed by the Associate Director, Academics, and the master’s adviser. Applications must be submitted by the quarter preceding the anticipated quarter of graduation. A $50 application fee is assessed by the Registrar’s Office for coterminal applications. Students may either (1) complete 180 units required for the B.S. degree and then complete the three quarters required for the M.S. degree, or (2) complete a total of 15 quarters during which the requirements of the degrees are fulfilled concurrently. The student has the option of receiving the B.S. degree after completing that degree’s requirements or receiving two degrees concurrently at the end of the master’s program.

These requirements must be fulfilled to receive an M.S. degree:
1. All requirements for the B.S. degree.
2. Further course work (and/or thesis research), all of which should be at the 100-level or above, including 22 units at the 200-level or above, leading to further focus within the student’s track.
3. Participation in the Master’s Seminar.
The program consists of a minimum of 45 units of course work and/or thesis research, at least 22 of which must be at the 200-level or above. The student must devise a program of study that shows a level of specialization appropriate to the master’s level, as determined in consultation with the adviser. The program should demonstrate further specialization and focus within the student’s undergraduate track. Students applying from an undergraduate major other than Earth Systems or students applying for a coterminal M.S. in Environmental Earth System Science should meet with Julie Kennedy or Deana Fabbro-Johnston for clarification.

With the adviser’s approval, 9 units may be in the form of research. This may culminate in the preparation of a master’s thesis; however, a thesis is not required for the degree. Master’s students must take part in the Autumn Quarter Master’s Seminar, EARTH SYS 290, and have additional responsibilities appropriate to the master’s level (thesis presentation, modeling problems, and so on).

A more detailed description of the coterminal master’s degree program may be obtained from the program office. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

OVERSEAS STUDIES COURSES IN EARTH SYSTEMS

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

**Phone:** (650) 723-6117  
**Email:** nelsondn@stanford.edu  
**Web Site:** http://e-iper.stanford.edu

Courses offered by the Emmett Interdisciplinary Program in Environment and Resources are listed under the subject code E-IPER on the Stanford Bulletin’s ExploreCourses web site.

The Emmett Interdisciplinary Program in Environment and Resources (E-IPER) is designed to create interdisciplinary scholars and leaders to address the world’s most challenging environmental and sustainability issues. E-IPER students combine academic disciplines, including natural and earth sciences, engineering, economics, humanities, social sciences, law, health, policy, and business, to yield new insights and novel solutions to urgent global problems, such as energy use, climate change, food security, freshwater availability, depletion of ocean resources, land degradation, and biodiversity loss.

E-IPER offers a Ph.D. in Environment and Resources and, for students currently enrolled in Stanford’s Graduate School of Business, Stanford Law School, and School of Medicine, a joint degree consisting of an M.S. in Environment and Resources in combination with their professional degree. Both E-IPER’s Ph.D. and M.S. degrees are interdisciplinary, giving students exposure to environmental and sustainability issues and insight into new knowledge, technologies, and policies to help solve these problems. Within the guidelines of their respective degrees, E-IPER students select classes offered in all seven schools of the University.

Through their original research and their work in policy and industry, E-IPER students address issues such as the science and policy of global climate change, regional food security, the mapping and valuation of ecosystem services, the development of new energy technologies, the effects of agricultural intensification and other land use changes, and conservation finance. For additional information about E-IPER students, see http://e-iper.stanford.edu/students.

E-IPER’s affiliated faculty members come from all seven Stanford schools. Collectively, they represent an extraordinary diversity of environment and sustainability interests and breadth of research and policy approaches. More information about individual faculty can be found at http://e-iper.stanford.edu/Faculty. More details about Stanford’s interdisciplinary environmental research and policy work generally can be found on the Woods Institute for the Environment’s web site, http://woods.stanford.edu.

**GRADUATE PROGRAMS IN ENVIRONMENT AND RESOURCES**

The University’s basic requirements for the M.S. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin. The E-IPER Ph.D. and M.S. degrees are guided by comprehensive requirements created with faculty and student input and approved by E-IPER’s executive committee. To access the current
Ph.D. and M.S. degree requirement documents, see http://e-iper.stanford.edu/requirements.

MASTER OF SCIENCE IN ENVIRONMENT AND RESOURCES

Students may not apply directly for the M.S in Environment and Resources degree. The M.S. is an option exclusively for students currently enrolled in the joint degree programs with the M.B.A. in the Graduate School of Business or the J.D. with the Stanford Law School; concurrently pursuing the M.D. in the School of Medicine; or for E-IPER Ph.D. students who do not continue the Ph.D.

JOINT MASTER’S DEGREE

Students enrolled in a professional degree program in Stanford’s Graduate School of Business or the Stanford Law School are eligible to apply for admission to the joint M.S. in Environment and Resources degree program (JDP). Enrollment in the JDP allows students to pursue an M.S. degree concurrently with their professional degree and to count a defined number of units toward both degrees, resulting in the award of joint M.B.A. and M.S. in Environment and Resources degrees or joint J.D. and M.S. in Environment and Resources degrees. The joint M.B.A./M.S. degree program requires a total of 129 quarter units to be completed over approximately eight academic quarters (compared to 100 units for the M.B.A. and 45 units for the M.S. if pursued as separate degrees). The joint J.D./M.S. degree program requires a total of 130.5 quarter units and may be completed in three years. For additional information, see http://e-iper.stanford.edu/requirements.

In addition to requirements for the professional degree, specific requirements for the JDP include:

1. Completion of two required core courses: IPER 338, Environmental Science for Managers and Policy Makers (same as OIT 338 and LAW 608; if offered IPER/OIT 339 and LAW 619 also fulfill this requirement), and IPER 290, Capstone Project in Environment and Resources.
2. Completion of a minimum of four additional courses from one selected Joint M.S. Course Track: Energy; Climate and Atmosphere; Cleantech; Land Use and Agriculture; Oceans and Estuaries; Freshwater; Human and Environmental Health; and Sustainable Built Environment. Approved courses in each track as of July 2009 are below. Updated lists are available at http://e-iper.stanford.edu/jointmstracks.
3. Completion of at least four additional graded elective courses at the 100-level or higher, while maintaining a ‘B’ average, which may be taken from one or more course tracks or elsewhere in the University.
4. Among the courses fulfilling requirements 2 and 3 above, completion of at least four courses in the 200-level or above, among those fulfilling requirements 2 and 3 above, excluding individual study courses. Individual study courses (directed reading and independent research units) may count for a maximum of 4 units for joint M.S. students (i.e. IPER 398 or IPER 399).
5. Completion and presentation of a capstone project that integrates the students professional and MS degrees, as part of the IPER 290 course listed in requirement 1. above. Restrictions on course work that may fulfill the Dual M.S. degree include:

   1. A maximum of 5 units from courses that are identified as primarily consisting of guest lectures, such as the Energy Seminar, Business and Environmental Issues, or the Environmental Law Workshop may be counted toward the Joint M.S. degree.
   2. A maximum of 12 units from courses related to the environmental and resource fields from the student’s professional school may be applied toward the M.S. A list of approved courses from the GSB, School of Law, and School of Medicine can be found at http://e-iper.stanford.edu/jointmstracks.
   3. A maximum of 4 units from courses related to the environmental and resource fields from the student’s professional school may be applied toward the M.S. A list of approved courses from the GSB, School of Law, and School of Medicine can be found at http://e-iper.stanford.edu/jointmstracks.

The student’s program of study is subject to the approval of the student’s advising team, consisting of a faculty member from the applicable professional school and one E-IPER faculty member. The two degrees are conferred when the requirements for both the E-IPER M.S. and the professional degree programs have been met. For application information, see http://e-iper.stanford.edu/requirements.

DUAL MASTER’S DEGREE

Only students in the School of Medicine may apply to pursue the M.S. in Environment and Resources degree by meeting the University’s minimum requirements for the M.D. and completing an additional 45 units for the M.S. in Environment and Resources. Completion of the M.S. is anticipated to require at least three quarters in addition to the quarters required for the M.D. For additional information, see http://e-iper.stanford.edu/requirements.

In addition to requirements for the M.D., specific requirements for the Dual M.S. include:

1. Completion of two required core courses: IPER 338, Environmental Science for Managers and Policy Makers (same as OIT 338 and LAW 608; if offered IPER/OIT 339 and LAW 619 also fulfill this requirement), and IPER 290, Capstone Project in Environment and Resources.
2. Completion of a minimum of four additional courses from one selected Joint M.S. Course Track: Energy; Climate and Atmosphere; Cleantech; Land Use and Agriculture; Oceans and Estuaries; Freshwater; Human and Environmental Health; and Sustainable Built Environment. Approved courses in each track as of July 2009 are below. Updated lists are available at http://e-iper.stanford.edu/jointmstracks.
3. Completion of at least four additional graded elective courses at the 100-level or higher, while maintaining a ‘B’ average, which may be taken from one or more course tracks or elsewhere in the University.
4. Among the courses fulfilling requirements 2 and 3 above, completion of at least four courses in the 200-level or above, among those fulfilling requirements 2 and 3 above, excluding individual study courses. Individual study courses (directed reading and independent research units) may count for a maximum of 4 units for Joint M.S. students (i.e. IPER 398 or IPER 399).
5. Completion and presentation of a capstone project that integrates the students professional and MS degrees, as part of the IPER 290 course listed in requirement 1. above. Restrictions on course work that may fulfill the Dual M.S. degree include:

   1. A maximum of 5 units from courses that are identified as primarily consisting of guest lectures, such as the Energy Seminar, Business and Environmental Issues, or the Environmental Law Workshop may be counted toward the Joint M.S. degree.
   2. A maximum of 12 units from courses related to the environmental and resource fields from the student’s professional school may be applied toward the M.S. A list of approved courses from the GSB, School of Law, and School of Medicine can be found at http://e-iper.stanford.edu/jointmstracks.

Additional courses in this category are listed at http://e-iper.stanford.edu/jointmstracks.

JOINT M.S. AND DUAL M.S. COURSE TRACKS

Students should consult the Stanford Bulletin’s Explore Courses web site to determine the course schedule, location, eligibility, and prerequisites. Course Tracks and other recommended courses will be updated at http://e-iper.stanford.edu/jointmstracks.

MASTER OF SCIENCE

In exceptional circumstances, E-IPER offers a Master of Science degree for students in E-IPER’s Ph.D. program who opt to complete their training with a M.S. degree or who do not advance to candidacy for the Ph.D. Admission directly to the M.S. program is not allowed.

Requirements for the M.S. include:

1. Completion of a minimum of 45 units at or above the 100-level, of which the majority of units should be at or above the 200-level.
2. Completion of the E-IPER Ph.D. core curriculum, comprising EPER 310, Environmental Forum Seminar; EPER 315, Environmental Research Design Seminar; EPER 320, Designing Environmental Research; and EPER 330, Research Approaches to Environmental Problem Solving.
3. Additional courses may be selected from approved course lists in E-IPER’s four focal areas (culture and institutions; economics and policy analysis; engineering and technology; and natural sciences) or from other courses approved by the student’s lead advisors.
4. Students may take no more than 6 of the required 45 units credit/no credit and must maintain at least a ‘B’ average in all courses taken for the M.S. degree.
5. Directed research and independent study may count for a maximum of 8 units of the 45 unit M.S.

MINDS, prior to which students must formally identify their two lead faculty advisers and the E-IPER faculty director.

Fulfillment of the breadth requirement must be certified by the student’s two lead faculty advisers and the E-IPER faculty director.

Fulfillment of the breadth requirement in all four focal areas (culture and institutions; economics and policy analysis; engineering and technology; and natural sciences) through a sequence of courses, independent study, and/or demonstration of proficiency through prior course work or experience. Specific requirements and approved courses that satisfy breadth in each of the four focal areas as of July 2009 are listed below and in the current Ph.D. requirements document. Updated course lists are available at http://e-iper.stanford.edu/breadthcourses.

Successful completion of the oral qualifying exam and completion of the requirements for candidacy, including at least 25 graded graduate course units (200 level and above) with at least a ‘B’ average, by the end of Winter Quarter of the third year. The oral qualifying exam committee should include the student’s two lead advisers and 2-3 other faculty with expertise in the student’s research area. The majority of the oral qualifying exam committee should be members of the Academic Council; the chair of the committee must be an Academic Council member and may not be one of the student’s two lead advisers. In exceptional cases, the committee may include a member-at-large who is not a Stanford faculty member as a fourth or fifth member.

Submission of a candidacy plan by end of Spring Quarter of the second year, for review at the Second Year Meeting of the Minds and subject to the approval of E-IPER’s faculty director. The candidacy plan should document how the student has fulfilled the program requirements to date and include a summary of research ideas and a list of faculty who might serve as qualifying exam committee members.

Successful completion of the oral qualifying exam and completion of the requirements for candidacy, including at least 25 graded graduate course units (200 level and above) with at least a ‘B’ average, by the end of Winter Quarter of the third year. The oral qualifying exam committee should include the student’s two lead advisers and 2-3 other faculty with expertise in the student’s research area. The majority of the oral qualifying exam committee should be members of the Academic Council; the chair of the committee must be an Academic Council member and may not be one of the student’s two lead advisers. In exceptional cases, the committee may include a member-at-large who is not a Stanford faculty member as a fourth or fifth member.

Submission of a written dissertation, approved by the student’s dissertation reading committee consisting of the student’s lead advisers and at least one other member, and passage of the University oral examination in defense of the dissertation following the guidelines outlined in the “Graduate Degrees” section of this bulletin. The University oral examination committee comprises the student’s two lead advisers, at least two additional members, and a chair who is outside of the departments of the lead advisers, all of whom are normally Academic
Council members. Appointment of a non-Academic Council member must be justified and approved by the faculty director. In addition to the requirements listed above, all Ph.D. students must:

1. Serve as a teaching assistant for at least one quarter in a course with a discussion section or with an opportunity to lecture in at least two class sessions, in any department or program, including IPER 320 or IPER 330. Students should fulfill the teaching requirement by the end of the third year unless they obtain a firm commitment from a faculty member to TA a future course.

2. On an ongoing basis, submit grant proposals for external funding, defined as fellowship and/or research funds provided by a government agency, a private foundation, or a University entity other than E-IPER or the School of Earth Sciences.

3. Participate each year in a Spring Quarter annual review in which the student and lead advisers submit progress reports to the E-IPER executive committee.

The following courses may be taken to satisfy the breadth requirement in E-IPER’s four focal areas. Updated lists are available at http://e-iper.stanford.edu/breadthcourses. Students should consult the Stanford Bulletin’s Explore Courses web site to determine the course schedule, location, eligibility, and prerequisites.

**CULTURE AND INSTITUTIONS BREADTH COURSES**

At least two courses are required. Students may choose a course not listed below provided it meets the criteria for this breadth area’s subject knowledge. Students are advised to seek approval from their lead advisers in advance and are required to obtain their advisers’ signatures on the breadth certification form as verification that they have met this requirement.

**ANTHRO 247. Nature, Culture, Heritage**

**ANTHRO 262. Indigenous Peoples and Environmental Problems**

**CEE 275A. Law and Science of California Coastal Policy**

**CEE 277C. Environmental Governance**

**EARTHSYS 224. Environmental Justice: Local, National, and International Dimensions**

**ECON 228. Institutions and Organizations in Historical Perspective**

**EDUC 332X. Theory and Practice of Environmental Education**

**HISTORY 281A. Environmental History of the Americas**

**HISTORY 276. Modern Brazil**

**LAW 280. Toxic Harms**

**LAW 281. Natural Resources Law and Policy**

**LAW 285. International Trade Regulation**

**LAW 338. Land Use**

**LAW 437. Water Law and Policy**

**LAW 455. Energy Law and Policy**

**LAW 603. Environmental Law and Policy**

**LAW 604. Environmental Law Workshop**

**LAW 605. International Environmental Law and Policy**

**LAW 667. Marine Resources**

**MS&E 252. Decision Analysis I**

**POLISCI 351A. Foundations of Political Economy**

**POLISCI 362. New Economics of Organizations**

**POLISCI 364. Theories of Political Institutions**

**POLISCI 424. Introduction to Political Psychology**

**POLISCI 435. Topics in the Philosophy of Social Science**

**POLISCI 436. Rational Choice**

**POLISCI 440A. Theories in Comparative Politics**

**POLISCI 440B. Comparative Political Economy**

**POLISCI 440C. Methods in Comparative Politics**

**POLISCI 442. Qualitative and Field Methods**

**PSYCH 223. Social Norms**

**PUBLPOL 102. Organizations and Public Policy**

**PUBLPOL 166. Organizational Theory and Design**

**PUBLPOL 194. Technology Policy**

**PUBLPOL 202. Organizations and Public Policy**

**SOC 116. Understanding Social Change in China: A Global Perspective**

**SOC 260. Formal Organizations**

**SOC 314. Economic Sociology**

**SOC 318. Social Movement and Collective Action**

**SOC 320. Foundations of Social Psychology**

**SOC 360. Foundations of Organizational Sociology**

**SOC 362. Organization and Environment**

**SOC 363. Social and Political Processes in Organizations**

**SOC 363A. Seminar on Organizational Theory**

**SOC 363B. Seminar on Organizational Theory: Institutional Analysis**

**SOC 364. Social Psychology of Organizations**

**SOC 366. Organization Studies: Theories and Analysis**

**SOC 377. Comparing Institutional Forms: Public, Private, and Nonprofit**

**ECONOMICS AND POLICY ANALYSIS BREADTH COURSES**

One of the alternative course sequences listed below, culminating in IPER 243 (same as MS&E 243), satisfies the minimum breadth requirement:

**ECON 50 and 51. Economic Analysis I and II; and MS&E/IPER 243**

**ECON 50. Economic Analysis I and ECON 155. Environmental Economics and Policy; and MS&E/IPER 243**

**ECON 202 or ECON 202N and ECON 203 or ECON 203N. Core Economics; and MS&E/IPER 243**

**ECON 106. World Food Economy; and MS&E/IPER 243**

**MS&E 241. Economic Analysis; and MS&E/IPER 243**

**MS&E 248. Economics of Natural Resources; and MS&E/IPER 243**

**PUBLPOL 201A. Microeconomics; and MS&E/IPER 243**

**Possible substitutes for IPER 243:**

**ECON 250. Environmental Economics**

**ECON 251. Natural Resources and Energy**

**PUBLPOL 201B. Cost-Benefit Analysis and Evaluation**

**The same alternative prerequisites listed above apply to PUBLPOL 201B, ECON 250, and ECON 251. PUBLPOL 201B focuses less on environmental issues than IPER 243. Ph.D. students choosing economics and policy analysis as one of their fields of inquiry are encouraged to take ECON 202 or ECON 202N and ECON 203 or ECON 203N, in addition to IPER 243, ECON 250, and/or ECON 251.**

**ENGINEERING AND TECHNOLOGY BREADTH COURSES**

At least one course is required; this list represents examples of appropriate courses only. Students may choose a course not listed below provided it meets the criteria for this breadth area’s subject knowledge. Students are advised to seek approval from their lead advisers in advance and are required to obtain their advisers’ signatures on the breadth certification form as verification that they have met this requirement.

**CEE 101B. Mechanics of Fluids**

**CEE 161A. Rivers, Streams, and Canals**

**CEE 172. Air Quality Management**

**CEE 176A. Energy Efficient Buildings**

**CEE 176B. Electric Power: Renewables and Efficiency**

**CEE 177. Aquatic Chemistry and Biology**

**CEE 207A. Computation in Civil and Environmental Engineering**

**CEE 207B. Computations in Civil and Environmental Engineering**

**CEE 215. Goals and Methods of Sustainable Building Projects**

**CEE 260A. Physical Hydrogeology**

**CEE 262B. Transport and Mixing in Surface Water Flows**

**CEE 263A. Air Pollution Modeling**

**CEE 264A. Rivers, Streams, and Canals**

**CEE 266A. Watersheds and Wetlands**

**CEE 266B. Floods and Droughts, Dams and Aqueducts**

**CEE 270. Movement and Fate of Organic Contaminants in Surface Waters and Groundwater**

**CEE 275A. Law and Science of California Coastal Policy**

**EE 293A. Fundamentals of Energy Processes**

**EE 293B. Fundamentals of Energy Processes**
**ENERGY RESOURCES ENGINEERING**

**Emeritus: (Professors)** Khalid Aziz (recalled to active duty), John W. Harbaugh, Sullivan S. Marsden, Jr.
**Chair:** Louis J. Durlaufsky

The mission of the Energy Resources Engineering undergraduate major is to provide students with the engineering skills and foundational knowledge needed to flourish as technical leaders within the energy industry. Such skills and knowledge include resource assessment, choices among energy alternatives, and carbon management, as well as the basic scientific background and technical skills common to all engineers. The curriculum is designed to prepare students for immediate participation in many aspects of the energy industry and graduate school.

**UNDERGRADUATE MISSION STATEMENT**

The mission of the Energy Resources Engineering undergraduate major is to provide students with the engineering skills and foundational knowledge needed to flourish as technical leaders within the energy industry. Such skills and knowledge include resource assessment, choices among energy alternatives, and carbon management, as well as the basic scientific background and technical skills common to all engineers. The curriculum is designed to prepare students for immediate participation in many aspects of the energy industry and graduate school.
BACHELOR OF SCIENCE IN ENERGY RESOURCES ENGINEERING

The four-year program leading to the B.S. degree provides a foundation for careers in many facets of the energy industry. The curriculum includes basic science and engineering courses that provide sufficient depth for a wide spectrum of careers in the energy and environmental fields.

One of the goals of the program is to provide experience integrating the skills developed in individual courses to address a significant design problem. In ENERGY 199, taken in the senior year, student teams identify and propose technical solutions for a real energy-resource related problem of current interest.

PROGRAM

The requirements for the B.S. degree in Energy Resources Engineering are similar, but not identical, to those described in the "School of Engineering" section of this bulletin. Students must satisfy the University general education, writing, and language requirements. The normal Energy Resources Engineering undergraduate program automatically satisfies the University General Education Requirements (GERs) in the Disciplinary Breadth areas of Natural Sciences, Engineering and Applied Sciences, and Mathematics. Engineering fundamentals courses and Energy Resources Engineering depth and elective courses must be taken for a letter grade.

The Energy Resources Engineering undergraduate curriculum is designed to prepare students for participation in the energy industry or for graduate studies, while providing requisite skills to evolve as the energy landscape shifts over the next half century. The program provides a background in mathematics, basic sciences, and engineering fundamentals such as multiphase fluid flow in the subsurface. In addition, the curriculum is structured with flexibility that allows students to explore energy topics of particular individual interest.

In brief, the unit and subject requirements are:

Subject | Minimum Units
--- | ---
Energy Resources Core | 16
Energy Resources Depth | 18
Mathematics | 25
Engineering Fundamentals and Depth | 24
Science | 30
Technology in Society | 3-5
University Requirements: IHUM, GERs, Writing, Language | 60-67

Total | 176-185

The following courses constitute the normal program leading to a B.S. in Energy Resources Engineering. The program may be modified to meet a particular student’s needs and interests with the adviser’s prior approval.

REQUIRED CORE IN ENERGY RESOURCES ENGINEERING

The following courses constitute the core program in Energy Resources Engineering:

ENERGY 101. Energy Resources and the Environment | 3
ENERGY 120. Fundamentals of Petroleum Engineering | 3
ENERGY 161. Statistical Methods for the Earth and Environmental Sciences | 3-4
ENERGY 199. Senior Project and Seminar in Energy Resources (WIM) | 4

Total | 16-17

Mathematics:
- MATH 41. Single Variable Calculus
- and MATH 42. Single Variable Calculus
- or MATH 19. Calculus
- and MATH 20. Calculus
- and MATH 21. Calculus
- MATH 51. Linear Algebra and Differential Calculus of Several Variables
- or CME 100. Vector Calculus for Engineers
- MATH 52. Integral Calculus of Several Variables
- or CME 104. Linear Algebra and Partial Differential Equations for Engineers
- MATH 53. Ordinary Differential Equations with Linear Algebra
- or CME 102. Ordinary Differential Equations for Engineers
- CHEM 31A. Chemical Principles
- CHEM 31B. Chemical Principles II
- or CHEM 31X may be substituted for CHEM 31A,B
- CHEM 33. Structure and Reactivity
- GEQ 1. Fundamentals of Geology
- PHYSICS 41. Mechanics
- PHYSICS 43. Electricity and Magnetism
- PHYSICS 45. Light and Heat
- PHYSICS 46. Light and Heat Laboratory

Engineering Fundamentals:
- CS 106A. Programming Methodology
- CS 106B. Programming Abstractions
- or CS 106X may be substituted for CS 106A,B
- ENGR 30. Engineering Thermodynamics
- ENGR 60. Engineering Economy
- ME 70. Introductory Fluids Engineering
- Technology in Society, 1 course

EARTH AND ENERGY DEPTH CONCENTRATION

Choose courses from the list below for a total of at least 18 units. At least one course must be completed in each category. Courses must be planned in consultation with the student’s academic adviser. Appropriate substitutions are allowed with the consent of the adviser.

Fluid Flow and the Subsurface
- ENERGY 121. Fundamentals of Multiphase Flow | 3
- ENERGY 130. Well Log Analysis | 3
- ENERGY 160. Groundwater Pollution and Oil Spills | 3
- ENERGY 175. Well Test Analysis | 3
- ENERGY 180. Production Engineering | 3
- ENGR 62. Introduction to Optimization | 4

3D Modeling of Subsurface Structures
- ENERGY 141. Practice of 3D Subsurface Modeling | 3
- ENERGY 146. Reservoir Characterization | 3
- GEOPHYS 112. Exploring the Geosciences with Matlab | 3
- GEOPHYS 182. Reflection Seismology | 3
- GES 151. Sedimentary Geology | 3

Earth and Energy Systems
- ENERGY 102. Renewable Energy Resources | 3
- ENERGY 153. Carbon Capture and Sequestration | 3
- ENERGY 169. Geothermal Reservoir Engineering | 3
- ENERGY 301. The Energy Seminar | 1
- CEE 64. Air Pollution | 3
- CEE 70. Environmental Science and Technology | 3
- CEE 173B. The Coming Energy Revolution | 3
- CEE 176B. Electric Power | 3
- GEOPHYS 104. The Water Course | 3

HONORS PROGRAM

The program in Energy Resources Engineering leading to the Bachelor of Science with Honors (BSH) provides an opportunity for independent study and research on a topic of special interest and culminates in a written report and oral presentation. The Honors Program is open to all students with a grade point average (GPA) of at least 3.5 in all courses required for the ERE major and minimum of 3.0 in all University course work. Qualified students intending to pursue honors must submit an Honors Program Application to the Undergraduate Program Director no later than the eighth week of their ninth quarter, but students are encouraged to apply to the program during Winter Quarter of their junior year. The application includes a short form, an unofficial transcript, and a 2-3 page research proposal prepared by the student and endorsed by a faculty member who will serve as the research advisor.

Upon approval, students enroll in the Honors Program via Axess. Students must enroll in a total of 9 units of ENERGY 193; these units may be spread out over the course of the senior year, and may include previous enrollment units for the same research project. Research undertaken for the Honors Program cannot be
used as a substitute for regularly required courses. A formal written report must be submitted to the student’s research advisor no later than the fourth week of the student’s final quarter, and the report must be read, approved, and signed by the student’s faculty advisor and a second member of the faculty. Each Honors candidate must make an oral presentation of his or her research results.

MINOR IN ENERGY RESOURCES ENGINEERING

The minor in Energy Resources Engineering requires the following three courses plus three additional electives. Courses must be planned in consultation with an ERE adviser. Appropriate substitutions are allowed with the consent of the adviser.

Required courses:
- ENERGY 101, Energy Resources and the Environment 3
- ENERGY 120, Fundamentals of Petroleum Engineering 3
- ENERGY 161, Statistics for Earth, Energy, and Environmental Sciences 3-4

Elective courses (at least 3 courses from the list below):
- ENERGY 102, Renewable Energy Resources 3
- ENERGY 104, Technology in the Greenhouse 3
- ENERGY 121, Fundamentals of Multiphase Flow 3
- ENERGY 125, Modeling and Simulation 3
- ENERGY 130, Well Log Analysis 3
- ENERGY 141, Practice of Geostatistics and Seismic Data Integration 3
- ENERGY 146, Reservoir Characterization 3
- ENERGY 153, Carbon Capture and Sequestration 3
- ENERGY 169, Geothermal Reservoir Engineering 3
- ENERGY 175, Well Test Analysis 3
- ENERGY 180, Production Engineering 3
- GEOPHYS 182, Reflection Seismology 3
- GES 151, Sedimentary Geology 3

COTERMINAL B.S. AND M.S. PROGRAM IN ENERGY RESOURCES ENGINEERING

The coterminal B.S./M.S. program offers an opportunity for Stanford University students to pursue a graduate experience while completing the B.S. degree in any relevant major. Energy Resources Engineering graduate students generally come from backgrounds such as chemical, civil, or mechanical engineering; geology or other earth sciences; or physics or chemistry. Students should have a background at least through MATH 53 and CS 106 before beginning graduate work in this program.

The two types of M.S. degrees, the course work only degree and the research degree, as well as the courses required to meet degree requirements, are described below in the M.S. section. Both degrees require 45 units and may take from one to two years to complete depending on circumstances unique to each student.

Requirements to enter the program are: two letters of recommendation from faculty members or job supervisors, a statement of purpose, scores from the GRE general test, and a copy of Stanford University transcripts. While the department does not require any specific GPA or GRE score, potential applicants are expected to compete favorably with graduate student applicants.

A Petroleum Engineering or Energy Resources Engineering master’s degree can be used as a terminal degree for obtaining a professional job in the petroleum or energy industries, or in any related industry where analyzing flow in porous media or computer simulation skills are required. It can also be a stepping stone to a Ph.D. degree, which usually leads to a professional research job or an academic position.

Students should apply to the program any time after they have completed 105 undergraduate units, and in time to take ENERGY 120, the basic introductory course in Autumn Quarter of the year they wish to begin the program. Contact the Department of Energy Resources Engineering to obtain additional information. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.html#Coterm.

GRADUATE PROGRAMS IN ENERGY RESOURCES ENGINEERING

The Energy Resources Engineering department offers two distinct degree programs at both the M.S. and Ph.D. levels. One program leads to the degrees of M.S. or Ph.D. in Petroleum Engineering, and the other leads to the degrees of M.S. or Ph.D. in Energy Resources Engineering. The Engineer degree, which is offered in either Petroleum Engineering or Energy Resources Engineering, is an extended form of the M.S. degree with additional course work and research.

The University’s basic requirements for M.S., Engineer, and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

The following are minimum requirements for a student in the Department of Energy Resources Engineering to remain in good academic standing regarding course work:
1. no more than one incomplete grade at any time
2. a cumulative grade point average (GPA) of 3.0
3. a grade point average (GPA) of 2.7 each quarter
4. a minimum of 15 units completed within each two quarter period (excluding Summer Quarter).

Students funded by research grants or fellowships from the department are expected to spend at least half of their time (a minimum of 20 hours per week) on research. Continued funding is contingent upon satisfactory research effort and progress as determined by the student’s adviser. After Autumn Quarter of the first year, students receive a letter from the department chair concerning their research performance. If problems are identified and they persist through the second quarter, a warning letter is sent. Problems persisting into a third quarter may lead to loss of departmental support including tuition and stipend. Similar procedures are applied in subsequent years.

A balanced master’s degree program including engineering course work and research requires a minimum of one maximum-tuition academic year beyond the baccalaureate to meet the University residence requirements. Most full-time students spend at least one additional summer to complete the research requirement. An alternative master’s degree program based only on course work is available, also requiring at least one full tuition academic year to meet University residence requirements.

M.S. students who anticipate continuing in the Ph.D. program should follow the research option. M.S. students receiving financial aid normally require two academic years to complete the degree. Such students must take the research option.

The degree of Engineer requires a comprehensive maximum-tuition, two-year program of graduate study. This degree permits more extensive course work than the master’s degree, with an emphasis on professional practice. All Engineer degree students receiving financial aid are limited to a 10-unit course load per quarter and need at least ten quarters of work to complete the degree.

The Ph.D. degree is awarded primarily on the basis of completion of significant, original research. Extensive course work and a minimum of 90 units of graduate work beyond the master’s degree are required. Doctoral candidates planning theoretical work are encouraged to gain experimental research experience in the M.S. program. Ph.D. students receiving financial assistance are limited
to 10 units per quarter and often require more than three years to complete the Ph.D.

In special cases, the M.S., Engineer, and Ph.D. degrees may be awarded with field designations for students who follow programs of study in the particular fields of (1) geostatistics, (2) geothermal, or (3) environment. For example, students may be awarded the degree Master of Science in Energy Resources Engineering (Geothermal).

**MASTER OF SCIENCE IN PETROLEUM ENGINEERING**

The objective is to prepare the student for professional work in the energy industry through completion of fundamental courses in the major field and in related sciences as well as independent research.

Students entering the graduate program are expected to have an undergraduate-level engineering or physical science background. Competence in computer programming in a high-level language (CS 106X or the equivalent) and knowledge of engineering and geological fundamentals (ENERGY 120, 130, and GES 151) are prerequisites for taking most graduate courses.

The candidate must fulfill the following requirements:

1. Register as a graduate student for at least 45 units.
2. Submit a program proposal for the Master’s degree approved by the adviser during the first quarter of enrollment.
3. Complete 45 units with a grade point average (GPA) of at least 3.0. This requirement is satisfied by taking the core sequence, selecting one of the seven elective sequences, an appropriate number of additional courses from the list of technical electives, and completing 6 units of master’s level research. Students electing the course work only M.S. degree are strongly encouraged to select an additional elective sequence in place of the research requirement. Students interested in continuing for a Ph.D. are expected to choose the research option and enroll in 6 units of ENERGY 361. All courses must be taken for a letter grade.
4. Students entering without an undergraduate degree in Petroleum Engineering must make up deficiencies in previous training. Not more than 10 units of such work may be counted as part of the minimum total of 45 units toward the M.S. degree. Research subjects include certain groundwater hydrology and environmental problems, energy industry management, flow of non-Newtonian fluids, geothermal energy, natural gas engineering, oil and gas recovery, pipeline transportation, production optimization, reservoir characterization and modeling, carbon sequestration, reservoir engineering, reservoir simulation, and transient well test analysis.

**RECOMMENDED COURSES AND SEQUENCES**

The following list is recommended for most students. With the prior special consent of the student’s adviser, courses listed under technical electives may be substituted based on interest or background.

**MASTER OF SCIENCE IN ENERGY RESOURCES ENGINEERING**

The objective of the M.S. degree in Energy Resources Engineering is to prepare the student either for a professional career or for doctoral studies.

Students in the M.S. degree program must fulfill the following:

1. Complete a 45-unit program of study. The degree has two options:
   a. a course work degree, requiring 45 units of course work
   b. a research degree, of which a minimum of 39 units must be course work, with the remainder consisting of no more than 6 research units.
2. Course work units must be divided among two or more scientific and/or engineering disciplines and can include the core courses required for the Ph.D. degree.
3. All courses must be taken for a letter grade.
4. The program of study must be approved by the academic adviser and the department graduate program committee.
5. Students taking the research-option degree are required to complete an M.S. thesis, approved by the student’s thesis committee.

**RECOMMENDED COURSES AND SEQUENCES**

The following list is recommended for most students. With the prior consent of the student’s adviser, courses listed under technical electives may be substituted based on interest or background.

**ENGINEER IN PETROLEUM ENGINEERING OR ENERGY RESOURCES ENGINEERING**

The objective is to broaden training through additional work in engineering and the related sciences and by additional specialization.

Basic requirements include completion of 90 units of course work including 15 units of research (ENERGY 362), and including all course requirements of the department’s master’s degree (39 units, excluding research). If the candidate has received credit for research in the M.S. degree, this credit ordinarily would be transferable to the Engineer degree, in which case a total of 9 additional research units would be required. No more than 10 of the 90 re-
Ph.D. degrees have the following requirements:

1. Students must complete a minimum of 36 course units and 54 research units (a total of 90 units) beyond the M.S. degree. At least half of the classes must be at a 200 level or higher and all must be taken for a letter grade. Students with an M.S. degree or other specialized training from outside ERE are generally expected to include ENERGY 221, 223, and 240, or their equivalents. The number and distribution of courses to be taken is determined with input from the research advisers and department graduate program committee.

2. The student must complete 24 units of letter-graded course work, develop a written Ph.D. research proposal, and choose a dissertation committee.

3. The research adviser(s) and two other faculty members comprise the dissertation reading committee. Upon completion of the dissertation, the student must pass a University oral examination in defense of the dissertation.

4. Complete 135 units of graduate work.

5. Act as a teaching assistant at least once, and enroll in ENERGY 359.

36 units of course work is a minimum; in some cases the research adviser may specify additional requirements to strengthen the student’s expertise in particular areas. The 36 units of course work does not include required teaching experience (ENERGY 359) nor required research seminars. Courses must be taken for a letter grade, and a grade point average (GPA) of at least 3.25 must be maintained.

The dissertation must be submitted in its final form within five calendar years from the date of admission to candidacy. Candidates who fail to meet this deadline must submit an Application for Extension of Candidacy for approval by the department chair if they wish to continue in the program.

Ph.D. students entering the department are required to hold an M.S. degree in a relevant science or engineering discipline. Students wishing to follow the Ph.D. program in Petroleum Engineering must hold an M.S. degree (or equivalent) in Petroleum Engineering. Students following the Ph.D. program in Energy Resources Engineering must hold an M.S. degree (or equivalent), although it need not be in Energy Resources Engineering.

**PH.D. DEGREE QUALIFICATION**

The procedure for the Ph.D. qualification differs depending upon whether the student entered the department as an M.S. or Ph.D. student. In either case, previous written and oral exams have been replaced by a written Ph.D. proposal followed by a proposal defense.

For students who complete an M.S. in the Energy Resources Engineering Department at Stanford—In the second year of the M.S. degree program, the student formally applies to the Ph.D. program. The student is considered for admission to the Ph.D. program along with external applicants. The admission decision is based upon course work and research progress. During or before the third quarter as a Ph.D. student, generally corresponding to Spring Quarter in the third year at Stanford, the student must present a Ph.D. proposal to a committee of three faculty members. This entails a written document, including material such as a literature review or proposed work, and an oral presentation. Following the presentation, the student is questioned on the research topic and general field of study. The student can pass, pass with qualifications requiring more classes or teaching assistantships, or fail. A student who substantially changes topics between the M.S. and Ph.D. may petition for an extra quarter before presenting the Ph.D. proposal.

For students who enter directly into the Ph.D. program after receiving an M.S. from another university—After the second quarter at Stanford, a faculty committee evaluates the student’s progress. If a student is found to be deficient in course work and/or research, a written warning is issued. After the third quarter, the faculty committee decides whether or not funding should be continued for the student. Students denied funding after the third quarter are advised against proceeding with the Ph.D. proposal, though the student may choose to proceed under personal funding. Before the end of their fourth quarter at Stanford (not counting Summer Quarter), continuing Ph.D. students must present a Ph.D. proposal as described above.

**COURSE WORK**

The 36 units of course work may include graduate courses in Energy Resources Engineering (numbered 200 and above) and courses chosen from the following list. Other courses may be substituted with prior approval of the adviser. In general, non-technical courses are not approved.

Students who enter directly into the Ph.D. program after receiving an M.S. degree from another university are expected to show expertise in the core courses required for Stanford’s M.S. degree in Energy Resources Engineering, either by including those courses in their Ph.D. degree or by showing that they have taken equivalent courses during their M.S. degree.

Mail Code: 94305-4215
Web Site: http://pangea.stanford.edu/eess

Courses offered by the Department of Environmental Earth System Science are listed under the subject code EESS on the Stanford Bulletin’s ExploreCourses web site.

Environmental Earth System Science studies the planet’s oceans, lands, and atmosphere as an integrated system, with an emphasis on changes occurring during the current period of overwhelming human influence, the Anthropocene. Faculty and students within the department use the principles of biology, chemistry, and physics to study problems involving processes occurring at the Earth’s surface, such as climate change and global nutrient cycles, providing a foundation for problem solving related to environmental sustainability and global environmental change.

GRADUATE PROGRAMS IN ENVIRONMENTAL EARTH SYSTEM SCIENCE

The University’s basic requirements for the M.S. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

MASTER OF SCIENCE IN ENVIRONMENTAL EARTH SYSTEM SCIENCE

The purpose of the master’s program is to continue a student’s training in one of the earth science disciplines and to prepare students for a professional career or doctoral studies. The department’s graduate coordinator, in coordination with the departmental faculty, appoints an academic adviser during registration with appropriate consideration of the student’s background, interests, and professional goals. In consultation with the adviser, the student plans a program of course work for the first year. The student should select a thesis adviser within the first year of residence and submit to the thesis adviser a proposal for thesis research as soon as possible. The academic adviser supervises completion of the department requirements for the M.S. program as outlined below until the research proposal has been accepted; responsibility then passes to the thesis adviser. The student may change either thesis or academic advisers by mutual agreement and after approval of the graduate coordinator.

The University’s requirements for M.S. degrees are outlined in the “Graduate Degrees” section of this bulletin. Additional department requirements include the following:

1. EESS 300, Earth Sciences Seminar.
2. A minimum of 45 units of course work at the 100 level or above.
3. Half of the courses used to satisfy the 45-unit requirement must be intended primarily for graduate students, usually at the 200 level or above.
4. No more than 15 units of thesis research may be used to satisfy the 45-unit requirement.
5. Some students may be required to make up background deficiencies in addition to these basic requirements.
6. By the end of Winter Quarter of the first year in residence, a student must complete at least three courses taught by a minimum of two different department faculty members.

Each student must have a research adviser who is a faculty member in the department and is within the student’s thesis topic area or specialized area of study. The faculty adviser is charged with designing the curriculum in consultation with the student specific to the research topic. Each student must complete a thesis describing his or her research. Thesis research should begin during the first year of study at Stanford and should be completed before the end of the second year of residence. Early during the thesis research period, and after consultation with the student, the thesis adviser appoints a second reader for the thesis who must be approved by the graduate coordinator; the thesis adviser is the first reader. The two readers jointly determine whether the thesis is acceptable for the M.S. degree in the department.

DOCTOR OF PHILOSOPHY IN ENVIRONMENTAL EARTH SYSTEM SCIENCE

The objectives of the doctoral program are to enable students to develop the skills needed to conduct original investigations in environmental and earth system sciences, to interpret the results, and to present the data and conclusions in a publishable manner. Graduates should develop strong communication skills and leadership skills with the ability to teach and communicate effectively with the public.

The University’s requirements for the Ph.D. degree are outlined in the “Graduate Degrees” section of this bulletin. A summary of additional department requirements follows:

1. Students must complete the required courses in their individual program or in their specialized area of study with a grade point
average (GPA) of 3.0 (B) or higher, or demonstrate that they have completed the equivalents elsewhere.

2. Students must complete a minimum of four letter grade courses of at least 3 units each from four different faculty members on the Academic Council in the University.

3. Students must complete EESS 300, Earth Sciences Seminar, in their first quarter at Stanford.

4. By the end of Winter Quarter of their first year in residence, students must complete at least three courses taught by a minimum of two different departmental faculty members.

5. Each student must qualify for candidacy for the Ph.D. by the end of the sixth quarter in residence, excluding summers. Department procedures require selection of a faculty thesis adviser, preparation of a written research proposal, approval of this proposal by the thesis adviser, selection of a committee for the Ph.D. qualifying examination, and approval of the membership by the graduate coordinator and chair of the department. The research examination consists of three parts: oral presentation of a research proposal; examination on the research proposal; and examination on subject matter relevant to the proposed research. The exam should take place prior to May 1 so that its outcome is known at the time of the annual spring evaluation of graduate students.

Upon qualifying for Ph.D. candidacy, the student and thesis adviser, who must be a department faculty member, choose a research committee that includes a minimum of two faculty members in the University in addition to the adviser. Annually, in the month of March or April, the candidate must organize a meeting of the full research committee to present a progress report covering the past year and provide expected goals for the coming year.

Under the supervision of the research advisory committee, the candidate must prepare a doctoral dissertation that is a contribution to knowledge and is the result of independent research; curriculum must also be developed with the supervision of the committee, which should be designed to provide a rigorous foundation for the research area. The format of the dissertation must meet University guidelines. The student is urged to prepare dissertation chapters that, in scientific content and format, are readily publishable.

The doctoral dissertation is defended in the University oral examination. The department appoints the research adviser and two other members of the research committee to be readers of the draft dissertation. The readers are charged to read the draft and to certify in writing to the department that it is adequate to serve as a basis for the University oral examination. Upon obtaining this written certification, the student is permitted to schedule the University oral examination.

GEOLOGICAL AND ENVIRONMENTAL SCIENCES

Chair: Stephan A. Graham
Associate Chair: Donald R. Lowe
Professors: Dennis K. Bird, Gordon E. Brown, Jr., Stephan A. Graham, Andre G. Journel,** Keith Loague, Donald R. Lowe, Gail A. Mahood, Elizabeth L. Miller, David D. Pollard, Jonathan F. Stebbins
Assistant Professors: George Hilley, Katherine Maher, Wendy Mao, Jonathan Payne
Professors (Research): Atilla Aydin, Martin J. Grove, J. Michael Moldovan
Consulting Associate Professor: Robyn Wright-Dunbar
Visiting Professors: Stefan Amorsson, Gary Byerly, Diane Sward, Terry Seward, Sanjay Srinivasan, Manfred Strecker, Steve Wang

* Recalled to active duty
** Joint appointment with Energy Resources Engineering

Courses offered by the Department of Geological and Environmental Sciences are listed under the subject code GES on the Stanford Bulletin’s ExploreCourses web site.

The geological and environmental sciences are naturally interdisciplinary, and include: the study of earth materials, earth processes, and how they changed over Earth’s 4.56 billion year history. More specifically, courses and research within the department address: the chemical and physical makeup and properties of minerals, rocks, soils, sediments, and water; the formation and evolution of Earth and other planets; the processes that deform Earth’s crust and shape Earth’s surface; the stratigraphic, paleobiological, and geochemical records of Earth history including changes in climate, oceans, and atmosphere; present-day, historical, and long-term feedbacks between the geosphere and biosphere, and the origin and occurrence of our natural resources.

The department’s research is critical to the study of natural hazards (earthquakes, volcanic eruptions, landslides, and floods), environmental and geological engineering, surface and groundwater management, the assessment, exploration, and extraction of energy, mineral and water resources, ecology and conservation biology, remediation of contaminated water and soil, geological mapping and land use planning, and human health and the environment.

A broad range of instrumentation for elemental and radiogenic/stable isotope analysis is available, including ion microprobe, electron microprobe, thermal and gas source mass spectrometry, inductively coupled plasma mass spectrometry and nuclear magnetic resonance. The Center for Materials Research and facilities at the SLAC National Accelerator Laboratory, Stanford Synchrotron Radiation Laboratory (SSRL), and the U.S. Geological Survey in nearby Menlo Park are also available for the department’s research. Branner Library, devoted exclusively to the Earth Sciences, represents one of the department’s most important resources. The department maintains rock preparation (crushing, cutting, polishing), mineral separation, and microscopy facilities.

BACHELOR OF SCIENCE IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

The purpose of the undergraduate program in Geological and Environmental Sciences is to provide students with (1) a broad background in the fundamentals of the Earth sciences and (2) the quantitative, analytical, and communications skills necessary to conduct research and think critically about questions involving the Earth. The major provides excellent preparation for graduate school and careers in geological and environmental consulting, land use and planning, law, teaching, and other professions in which an understanding of the Earth and a background in science are important.

The major consists of five interrelated components:

Earth Sciences Fundamentals—Students must complete a set of core courses that introduce the properties of Earth materials, the processes that change the Earth, and the timescales over which those processes act. These courses provide a broad foundational knowledge that can lead to specialization in many different disciplines of the geological and environmental sciences.
Quantitative and Analytical Skills—Students must complete adequate course work in mathematics, chemistry, and physics or biology. In addition, they learn analytical techniques specific to the Earth sciences through the laboratory component of courses.

Advanced Course Work and Research—Students gain breadth and depth in upper-level electives and are encouraged to apply these skills and knowledge to problems in the Earth sciences through directed research.

Field Research Skills—Most GES courses include field trips and/or field-based projects. In addition, students must complete at least six weeks of field research through departmental offerings or through a faculty-directed field research project that involves learning and application of field techniques, field mapping, and the preparation of a written report.

Communication Skills—To fulfill the Writing in the Major requirement, students take a writing-intensive senior seminar (GES 150), in which they give both oral and written presentations that address current research in the earth sciences.

The major requires at least 77 units; letter grades are required in all courses if available. Students interested in the GES major should consult with the Undergraduate Program Coordinator for information about options within the curriculum.

### COURSE SEQUENCE (77-101 UNITS TOTAL)

#### CORE REQUIREMENT

Students are required to take all of the following (28-30 units):

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>GES 1A,B.C. Introduction to Geology</td>
<td>4-5</td>
</tr>
<tr>
<td>GES 4. Evolution and Extinction: Introduction to Historical Geology</td>
<td>4</td>
</tr>
<tr>
<td>GES 90. Introduction to Geochemistry</td>
<td>3-4</td>
</tr>
<tr>
<td>GES 102. Earth Materials</td>
<td>5</td>
</tr>
<tr>
<td>GES 103. Rocks in Thin Section</td>
<td>3</td>
</tr>
<tr>
<td>GES 105. Introduction to Field Methods</td>
<td>3</td>
</tr>
<tr>
<td>GES 150. Senior Seminar: Issues in the Earth Sciences (WIM)</td>
<td>3</td>
</tr>
<tr>
<td>GES 190, other field course, or field research (4 weeks, see below for more information)</td>
<td>6</td>
</tr>
</tbody>
</table>

#### BREADTH IN THE DISCIPLINE REQUIREMENT

To gain understanding of the breadth of subject areas within the geological and environmental sciences, students are required to take one course from each of the following six groups (19-25 units). Courses with * are offered every other year:

##### ENVIRONMENTAL GEOLOGY AND SURFACE PROCESSES

The chemical and physical properties of the solid, aqueous, and gaseous phases comprising Earth’s surface environment, their natural compositional variations and biogeochemical interactions, and the processes that affect their distribution and stability.

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>EESS 155. Science of Soils</td>

<tr>
<td>GES 131. Hydrologically-Driven Landscape Evolution</td>
<td>3</td>
</tr>
<tr>
<td>GES 170. Environmental Geochemistry</td>
<td>4</td>
</tr>
</tbody>
</table>

##### STRUCTURAL GEOLOGY AND TECTONICS

The nature, description, and modeling of deformation of earth materials in response to tectonic forces. Processes of plate tectonics, mountain building, and sedimentary basin formation. The origin and evolution of geologic structures including folds, faults, fabrics, and fractures.

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>GES 110. Structural Geology and Tectonics</td>
<td>5</td>
</tr>
<tr>
<td>GES 111a. Fundamentals of Structural Geology</td>
<td>3</td>
</tr>
<tr>
<td>GEOPHYS 150. General Geophysics and Physics of the Earth</td>
<td>3</td>
</tr>
</tbody>
</table>

##### EARTH MATERIALS AND GEOCHEMISTRY

The materials that comprise the Earth and how they can be used to deduce geological processes over time. The fundamental chemical and geologic processes responsible for the abundance and distribution of elements and their isotopes.

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>GES 163. Introduction to Isotope Geochemistry</td>
<td>3</td>
</tr>
<tr>
<td>*GES 180. Igneous Processes</td>
<td>4</td>
</tr>
<tr>
<td>*GES 185. Volcanology</td>
<td>3-4</td>
</tr>
<tr>
<td>GES 107. Journey to the Center of the Earth</td>
<td>3</td>
</tr>
</tbody>
</table>

### DEPTH IN THE DISCIPLINE REQUIREMENT (10 UNITS)

To allow students to go into greater depth in the major, students must complete at least 10 units of electives drawn primarily from the list above and other upper-level courses in GES (including graduate-level courses). Additional courses in Geophysics, EESS, and ERE may be counted towards the elective units if they allow a student to pursue a topic in depth; these options should be discussed with an adviser. A maximum of 3 elective units may be fulfilled by GES 192, 197, 198, or advanced seminars. Honors research (GES 199) may fulfill up to 4 elective units.

#### REQUIRED SUPPORTING MATHEMATICS (5-15 UNITS) (MAY ALSO BE FULFILLED BY ADVANCED PLACEMENT CREDIT)

Choose one of the following equivalent series:

- **MATH**
  - MATH 19. Calculus | 3
  - MATH 20. Calculus | 3
  - MATH 21. Calculus | 4
  - or
  - MATH 41. Calculus | 5
  - MATH 42. Calculus | 5

Choose at least one of the following (the entire series is recommended for students who plan to pursue graduate studies in the sciences or engineering):

- **MATH**
  - MATH 51. Multivariate Mathematics | 5
  - MATH 52. Multivariate Mathematics | 5
  - MATH 53. Multivariate Mathematics | 5

#### REQUIRED SUPPORTING COGNATE SCIENCES (15-21 UNITS)

Advanced placement credit may be accepted for these courses as determined by the relevant departments.

**Chemistry:**

- CHEM 31A,B. Chemical Principles I/II | 8
  - or
  - CHEM 31X. Chemical Principles | 4
- CHEM 135. Physical Chemical Principles | 3
  - or
  - CHEM 171. Physical Chemistry | 3
  - or
  - GES 171. Geochemical Thermodynamics | 3

In addition to chemistry, students may choose between introductory sequences in biology and physics. This choice should be made after discussion with an adviser and based on a student’s interests.

**Physics (choose one of the following series):**

- PHYSICS 22. Mechanics and Heat Lab | 1
PHYSICS 23. Electricity and Optics 3
PHYSICS 24. Electricity and Optics Lab 1
or
PHYSICS 41 (formerly 53). Mechanics 4
PHYSICS 45 (formerly 51). Light and Heat 4
PHYSICS 46 (formerly 52). Light and Heat Lab 1
or
PHYSICS 41 (formerly 53). Mechanics 4
PHYSICS 43 (formerly 55). Electricity and Magnetism 3
PHYSICS 44 (formerly 56). Electricity and Magnetism Lab 1
or
Biology:
BIO 41. Genetics, Biochemistry, and Molecular Biology 5
BIO 42. Cell Biology and Animal Physiology 5
or BIO 43. Plant Biology, Evolution, and Ecology 5
or BIO 101. Ecology 3

FIELD RESEARCH
Beyond GES 105, majors must complete four weeks of field research, preferably through departmental offerings (GES 190). With approval, up to two weeks may be fulfilled by GES 112, Geophys 190, BIOHOPK 182H, or other mentored field research projects that involve learning and application of field techniques and the preparation of a written report.

COGNATE COURSES
Many courses offered within the School of Earth Sciences, as well as courses in other schools with a significant earth sciences component, may be used in satisfaction of optional requirements for the Geological and Environmental Sciences degree. Undergraduates should discuss the options available to them with the undergraduate program coordinator; graduate students should discuss options with their advisers. The following courses outside the School of Earth Sciences are particularly applicable:

BIOHOPK 182H. Stanford at Sea
BIO 121. Biogeography
BIO 136. Evolutionary Paleobiology
CEE 63. Weather and Storms
CEE 64. Air Pollution: From Urban Smog to Global Change
CEE 101A. Mechanics of Materials
CEE 101B. Mechanics of Fluids
CEE 101C. Geotechnical Engineering
CEE 161A. Rivers, Streams, and Canals
CEE 164. Introduction to Physical Oceanography
CEE 166A. Watersheds and Wetlands
CEE 173A. Energy Resources

HONORS PROGRAM
The honors program provides an opportunity for year-long independent study and research on a topic of special interest, culminating in a written thesis. Students select research topics in consultation with the faculty adviser of their choosing. Research undertaken for the honors program may be of a theoretical, field, or experimental nature, or a combination of these approaches. The honors program is open to students with a GPA of at least 3.5 in GES courses and 3.0 in all University course work. Modest financial support is available from several sources to help defray laboratory and field expenses incurred in conjunction with honors research. Interested students must submit an application, including a research proposal, to the department by the end of their junior year.

Upon approval of the research proposal and entrance to the program, a course credit for the honors research project and thesis preparation is assigned by the student’s faculty adviser within the framework of GES 199: the student must complete a total of 9 units over the course of the senior year. Up to 4 units of GES 199 may be counted towards the elective requirement, but cannot be used as a substitute for regularly required courses.

Both a written and oral presentation of research results are required. The thesis must be read, approved, and signed by the student’s faculty adviser and a second member of the faculty. In addition, honors students must participate in the GES Honors Symposium in which they present their research to the broader community. Honors students in GES are also eligible for the Firestone med-al, awarded by Undergraduate Advising and Research for exceptional theses.

ENGINEERING GEOLOGY AND HYDROGEOLOGY UNDERGRADUATE SPECIALIZED CURRICULUM

The Engineering Geology and Hydrogeology curriculum is intended for undergraduates interested in the application of geological and engineering data and principles to the study of rock, soil, and water to recognize and interpret geological and environmental factors affecting engineering structures and groundwater resources. Students learn to characterize and assess the risks associated with natural geological hazards, such as landslides and earthquakes, and with groundwater flow and contamination. The curriculum prepares students for graduate programs and professional careers in engineering, environmental geology, geology, geotechnical engineering, and hydrogeology. Students interested in this curriculum should contact a faculty adviser: Professor Loague, Pollard, or Hilley.

GES majors who elect the Engineering Geology and Hydrogeology curriculum are expected to complete a core course sequence and a set of courses in supporting sciences and mathematics. The core courses come from Earth Sciences and Engineering. Any substitutions for core courses must be approved by the faculty adviser and through a formal petition to the undergraduate program director. In addition, four elective courses, consistent with the core curriculum and required of all majors, are to be selected with the advice and consent of the adviser. Typically, electives are selected from the list below. Letter grades are required if available.

MINOR IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

The minor in GES consists of a small set of required courses plus 12 elective units. A wide variety of courses may be used to satisfy these elective requirements.

REQUIRED COURSES:
- GES 1A,B,C. Introduction to Geology 4-5
- GES 4. Evolution and Extinction: Introduction to Historical Geology 4
- GES 102. Earth Materials 5

ELECTIVES (12 UNITS)
Students must take a minimum of 12 additional units drawn primarily from the "Breadth in the Discipline" list in the GES major; a majority of units must be from classes within the GES department. Up to 3 units of Stanford Introductory Seminars in GES may be counted.

GOC TERMINAL B.S. AND M.S. DEGREES IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

The coterminal B.S./M.S. program offers students the opportunity to pursue graduate research and an M.S. degree concurrently with or subsequent to their B.S. studies. The M.S. degree can serve as an entrance to a professional degree in subdisciplines within the earth sciences such as engineering geology and environmental geology, or to graduate course work and research as an intermediate step in pursuit of the Ph.D. Regardless of professional goals, coterminal B.S./M.S. students are treated as members of the graduate community and are expected to meet all of the standards set for regular M.S. students. Applicants must have earned no fewer than 120 units toward graduation, and must submit their application no later than the quarter prior to the expected completion of their undergraduate degree, normally the Winter Quarter prior to Spring Quarter graduation. The application includes a statement of purpose, a current Stanford transcript, official Graduate Record Examination (GRE) scores, letters of recommendation from two members of the Stanford faculty (at least one of whom must be in the GES department), and a list of courses in which they intend to enroll to fulfill the M.S. degree requirements. Specific research interests should be noted in the statement of purpose and discussed with a member of the GES faculty prior to submission of the application. Coterminal students must complete a thesis describing research results. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

No more than 15 units of thesis research may be used to satisfy the 45-unit requirement. Further information about this program may be obtained from the GES Office.

GRADUATE PROGRAMS IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

Graduate Studies in the Department of Geological and Environmental Sciences (GES) involve academic course work and independent research. Students are prepared for careers as professional scientists in research, education, or the application of the earth sciences to mineral, energy, and water resources. Programs lead to the M.S., Engineer, and Ph.D. degrees. Course programs in the areas of faculty interest are tailored to the student's needs and interests with the aid of his or her research adviser. Students are encouraged to include in their program courses offered in other departments in the School of Earth Sciences as well as in other departments in the University. Diplomas designate degrees in Geological and Environmental Sciences and may also indicate the following specialized fields of study: Geostatistics and Hydrogeology.

Admission—For admission to graduate work in the department, the applicant must have taken the Aptitude Test (verbal, quantitative, and analytical writing assessment) of the Graduate Record Examination. In keeping with University policy, applicants whose first language is not English must submit TOEFL (Test of English as a Foreign Language) scores from a test taken within the last 18 months. Individuals who have completed a B.S. or two-year M.S. program in the U.S. or other English-speaking country are not required to submit TOEFL scores. Previously admitted students who wish to change their degree objective from M.S. to Ph.D. must petition the GES Admissions Committee.

MASTER OF SCIENCE IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

Objectives—The purpose of the master's program in Geological and Environmental Sciences is to continue a student's training in one of a broad range of earth science disciplines and to prepare students for either a professional career or doctoral studies.

Procedures—The graduate coordinator of the department appoints an academic adviser during registration with appropriate consideration of the student's background, interests, and professional goals. In consultation with the adviser, the student plans a program of course work for the first year. The student should select a thesis adviser within the first year of residence and submit to the thesis adviser a proposal for thesis research as soon as possible. The academic adviser supervises completion of the department requirements for the M.S. program (as outlined below) until the research proposal has been accepted; responsibility then passes to the thesis adviser. The student may change either thesis or academic advisers by mutual agreement and after approval of the graduate coordinator.

Requirements—The University’s requirements for M.S. degrees are outlined in the “Graduate Degrees” section of this bulletin. Practical training (GES 385) may be required by some programs, with adviser approval, depending on the background of the student. Additional department requirements include the following:

1. A minimum of 45 units of course work at the 100 level or above.
   a. Half of the courses used to satisfy the 45-unit requirement must be intended as being primarily for graduate students, usually at the 200 level or above.
   b. No more than 15 units of thesis research may be used to satisfy the 45-unit requirement.
   c. Some students may be required to make up background deficiencies in addition to these basic requirements.
2. By the end of Winter Quarter of their first year in residence, students must complete at least three courses taught by a minimum of two different GES faculty members.
3. Each student must have a research adviser who is a faculty member in the department and is within the student’s thesis topic area or specialized area of study.
4. Each student must complete a thesis describing his or her research. Thesis research should begin during the first year of study at Stanford and should be completed before the end of the second year of residence.
5. Early during the thesis research period, and after consultation with the student, the thesis adviser appoints a second reader for the thesis, who must be approved by the graduate coordinator; the thesis adviser is the first reader. The two readers jointly determine whether the thesis is acceptable for the M.S. degree in the department.

**ENGINEER DEGREE IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES**

The Engineer degree is offered as an option for students in applied disciplines who wish to obtain a graduate education extending beyond that of an M.S., yet do not have the desire to conduct the Ph.D. research required to obtain the Ph.D. A minimum of six quarters of graduate study is required. The candidate must complete 90 units of course work, no more than 10 of which may be applied to overcoming deficiencies in undergraduate training. The student must prepare a substantial thesis that meets the approval of the thesis adviser and the graduate coordinator.

**DOCTOR OF PHILOSOPHY IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES**

**Objectives**—The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship, high attainment in a particular field of knowledge, and the ability to conduct independent research. To this end, the objectives of the doctoral program are to enable students to develop the skills needed to conduct original investigations in a particular discipline or set of disciplines in the earth sciences, to interpret the results, and to present the data and conclusions in a publishable manner.

**Requirements**—The University’s requirements for the Ph.D. degree are outlined in the “Graduate Degrees” section of this bulletin. Prerequisites to obtain the Ph.D. may be required by some programs, with adviser approval, depending on the background of the student. A summary of additional department requirements is presented below:

1. Ph.D. students must complete the required courses in their individual program or in their specialized area of study with a grade point average (GPA) of 3.0 (B) or higher, or demonstrate that they have completed the equivalents elsewhere. Ph.D. students must complete a minimum of four letter-grade courses of at least 3 units each from four different faculty members on the Academic Council in the University. By the end of Winter Quarter of their first year in residence, students must complete at least three courses taught by a minimum of two different GES faculty members.
2. Each student must qualify for candidacy for the Ph.D. by the end of the sixth quarter in residence, excluding summers. Department procedures require selection of a faculty thesis adviser, preparation of a written research proposal, approval of this proposal by the thesis adviser, selection of a committee for the Ph.D. qualifying examination, and approval of the membership by the graduate coordinator and chair of the department. The research examination consists of three parts: oral presentation of the research proposal, examination on the research proposal, and examination on subject matter relevant to the proposed research. The exam should be scheduled prior to May 1, so that the outcome of the exam is known at the time of the annual spring evaluation of graduate students.
3. Upon qualifying for Ph.D. candidacy, the student and thesis adviser, who must be a department faculty member, choose a research committee that includes a minimum of two faculty members in the University in addition to the adviser. Annually, in the month of March or April, the candidate must organize a meeting of the research committee to present a brief progress report covering the past year.
4. Under the supervision of the research advisory committee, the candidate must prepare a doctoral dissertation that is a contribution to knowledge and is the result of independent research. The format of the dissertation must meet University guidelines. The student is strongly urged to prepare dissertation chapters that, in scientific content and format, are readily publishable.
5. The doctoral dissertation is defended in the University oral examination. The research adviser and two other members of the research committee are determined to be readers of the draft dissertation. The readers are charged to read the draft and to certify in writing to the department that it is adequate to serve as a basis for the University oral examination. Upon obtaining this written certification, the student is permitted to schedule the University oral examination.

**PH.D. MINOR IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES**

Candidates for the Ph.D. degree in other departments who wish to obtain a minor in Geological and Environmental Sciences must complete, with a GPA of 3.0 (B) or better, 20 units in the geosciences in lecture courses intended for graduate students. The selection of courses must be approved by the student’s GES adviser and the department chair.

**GEOPHYSICS**

**Emeriti:** Jon Claerbout, Antony Fraser-Smith,* Robert Kovach, Amos Nur, George A. Thompson
**Chair:** Greg Beroza
**Associate Chair:** Biondo Biondi
**Professors:** Greg Beroza, Jerry M. Harris, Simon Klemperer, Rosamond J. Knight, Marcia McNutt,† Joan Roughgarden,** Paul Segall, Norman H. Sleep, Howard Zebker,* Mark D. Zoback
**Associate Professor:** Biondo Biondi
**Assistant Professors:** Eric Dunham, Jesse Lawrence
**Professor (Research):** Gerald M. Mavko
**Consulting Professors:** James Berryman, Jonathan Glen, Antoine Guittion
**Consulting Associate Professor:** Stewart Levin
**Visiting Professors:** Yo Fukushima, Pratik Dutta
**Senior Research Scientists:** Robert Clapp, Jack Dvorkin, Tiziana Vanorio
**Research Associates:** Nigel Crook, Youli Quan
† Joint appointment with Electrical Engineering
‡ Joint appointment with Monterey Bay Aquarium Research Institute
**Joint appointment with Biological Sciences**
**Department Offices:** Mitchell Building, Room 365
**Mail Code:** 94305-2215
**Phone:** (650) 724-3293
**Email:** tilich@stanford.edu
**Web Site:** http://pangea.stanford.edu/GP

Courses offered by the Department of Geophysics are listed under the subject code GEOPHYS on the Stanford Bulletin’s ExploreCourses web site.

Geophysics is the branch of Earth science concerned with exploring and analyzing active processes of Earth through physical measurement. The undergraduate and graduate programs are designed to provide a background of fundamentals in science, and courses to coordinate these fundamentals with the principles of geophysics. The program leading to the Bachelor of Science (B.S.) in Geophysics permits many electives and a high degree of flexibility for each student. Graduate programs provide specialized
training for professional work in resource exploration, research, and education, and lead to the degrees of Master of Science and Doctor of Philosophy.

The Department of Geophysics is housed in the Ruth Wattis Mitchell Earth Sciences Building. It has numerous research facilities, among which are a state-of-the-art broadband seismic recording station, high pressure and temperature rock properties and rock deformation laboratories, various instruments for field measurements including seismic recorders, nine dual frequency GPS receivers, and field equipment for measuring in-situ stress at great depth. Current research activities include biogeochemical cycling; crustal deformation; earthquake seismology and earthquake mechanics; reflection, refraction, and tomographic seismology; rock mechanics, rock physics; seismic studies of the continental lithosphere; remote sensing; environmental geophysics; and synthetic aperture radar studies.

**MISSION OF THE UNDERGRADUATE PROGRAM IN GEOPHYSICS**

The mission of the undergraduate program in Geophysics is to expose students to a broad spectrum of geophysical sciences, including environmental geophysics, seismology, and tectonics. Students in the major obtain a foundation in the essentials of mathematics, physics, and geology, and build upon that foundation with advanced course work in Geophysics to develop the in-depth knowledge needed to pursue advanced graduate study and professional careers in government or the private sector.

**BACHELOR OF SCIENCE IN GEOPHYSICS**

The following courses are required for the B.S. degree in Geophysics. A written report on original research or an honors thesis is also required through participation in two or three quarters of GEOPHYS 185, Research Seminar Series, typically during the senior year. The departmental program proposal form can be downloaded at [http://geo.stanford.edu/GP/undergraduate/major.html](http://geo.stanford.edu/GP/undergraduate/major.html). Seniors in Geophysics who expect to do graduate work should take the Graduate Record Examination (GRE) early in their final undergraduate year.

**CURRICULUM**

**PREREQUISITE COURSES**

Students must complete course sequences in supporting mathematics and cognate sciences.

- MATH 19,20,21. Calculus or MATH 41,42. Calculus and MATH 53. Ordinary Differential Equations
- PHYCS 41 and 110. Mechanics and Intermediate Mechanics
- EE 141. Engineering Electromagnetics
- or PHYSICS 120. Intermediate Electricity and Magnetism
- CHEM 31A,B. Chemical Principles 1 and 2, or CHEM 31X, Chemical Principles (accelerated)

**FUNDAMENTAL GEOPHYSICS**

Students must take each of the following:

- GES 1. Fundamentals of Geology
- GEOPHYS 150. General Geophysics
- or GEOPHYS 190. Introduction to Geophysical Field Methods
- GEOPHYS 201. Frontiers of Geophysical Research at Stanford

**ADDITIONAL ELECTIVES**

1. Three approved upper-level (100 or higher) Geophysics lecture courses, typically chosen from the following:
   - GEOPHYS 107. Journey to the Center of the Earth
   - GEOPHYS 140. The Earth from Space: Introduction to Remote Sensing
   - GEOPHYS 150. General Geophysics and Physics of the Earth
   - GEOPHYS 160. Waves
   - GEOPHYS 170. Global Tectonics
   - GEOPHYS 180. Geophysical Inverse Problems
   - GEOPHYS 190. Introduction to Geophysical Field Methods
   - GEOPHYS 222. Reflection Seismology
   - GEOPHYS 262. Rock Physics

2. 6 units of GEOPHYS 185. Research Seminar Series (includes WIM requirement)

3. Three additional approved upper-level (100 or higher) Earth Sciences lecture courses, typically chosen from the above GEOPHYS electives or from the following:
   - GES 102. Earth Materials
   - GES 110. Structural Geology and Tectonics
   - GES 111A. Fundamentals of Structural Geology
   - EESS 160. Statistical Methods for Earth and Environmental Sciences
   - ENERGY 120. Fundamentals of Petroleum Engineering

**RECOMMENDED ELECTIVE**

Students are recommended to take a programming class, but may not substitute it for any of the required or elective classes above.

- CS 106A. Programming Methodology

**HONORS PROGRAM**

The department offers a program leading to the B.S. degree in Geophysics with honors. The guidelines are:

1. Select a research project, either theoretical, field, or experimental, that has the approval of an adviser.
2. Submit a proposal to the department, which decides on its suitability as an honors project. Necessary forms are in the department office.
3. Course credit for the project is assigned by the adviser within the framework of GEOPHYS 205.
4. The decision whether a given independent study project does or does not merit an award of honors is made jointly by the department and the student’s adviser. This decision is based on the quality of both the honors work and the student’s other work in Earth sciences.
5. The work done on the honors program cannot be used as a substitute for regularly required courses.

**MINOR IN GEOPHYSICS**

The Geophysics minor provides students with a general knowledge of geophysics in addition to a background in the related fields of physics, mathematics, and geology. The minor consists of three required classes (8 units), two electives (6 units) and prerequisites in mathematics and physics. The departmental program proposal form can be downloaded from [http://geo.stanford.edu/GP/undergraduate/major.html](http://geo.stanford.edu/GP/undergraduate/major.html).

**CURRICULUM**

1. GES 1. Fundamentals of Geology
2. GEOPHYS 150. General Geophysics
   - or GEOPHYS 190. Introduction to Geophysical Field Methods
3. GEOPHYS 201. Frontiers of Geophysical Research at Stanford
4. Two additional approved upper-level (100 or higher) Geophysics lectures courses, typically chosen from GEOPHYS 107, 140, 150, 160, 170, 180, 190, 222, 262.
5. MATH 19,20,21 or 41. Calculus
6. PHYSICS 41. Mechanics

**GRADUATE PROGRAMS IN GEOPHYSICS**

University requirements for the M.S. and Ph.D. are described in the “Graduate Degrees” section of this bulletin. Lecture course units applied to graduate degree program requirements must be taken for a letter grade if the course is offered for a letter grade.

*Transfer Credit—An incoming student with a relevant Master of Science degree may apply for a departmental waiver of up to 12 units of the 30 lecture units required for the Ph.D. degree (see the “Doctor of Philosophy in Geophysics” section of this bulletin), for certain courses as approved by the Departmental Graduate Faculty.*
COTERMINAL B.S./M.S. PROGRAM IN GEOPHYSICS

The department offers a coterminal program. Interested individuals should check with a member of the department faculty for details. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MASTER OF SCIENCE IN GEOPHYSICS

Objectives—To enhance the student’s training for professional work in geophysics through the completion of fundamental courses, both in the major fields and in related sciences, and to begin independent work and specialization.

Requirements for the Degree—The candidate must complete 45 units from the following groups of courses:

1. Complete 15 units of Geophysics lecture courses with at least 9 units numbered 200 or higher.
2. Complete six units numbered 100 or higher and three units of 200-level, non-Geophysics lecture courses in earth sciences.
3. Complete one to four electives selected from courses numbered 100 or higher from mathematics, chemistry, engineering, physics, relevant biology, computer science, ecology, hydrology, or earth science. At least one course must be numbered 200 or higher.
4. At least 9, but not more than 18, of the 45 units must be independent work on a research problem resulting in a written report accepted and archived by the candidate’s faculty adviser. Normally, this research is undertaken as part of the candidate’s participation in multiple quarters of research seminar (GEOPHYS 385 series). A summer internship is encouraged as a venue for research, but no academic credit is given.
5. Submit a program proposal for approval by a faculty adviser in the first quarter of enrollment.
6. Each candidate must present and defend the results of his or her research at a public oral presentation attended by at least two faculty members; and turn in a thesis/report to adviser.
7. Students are required to attend department seminars.

DOCTOR OF PHILOSOPHY IN GEOPHYSICS

Objectives—The Ph.D. degree is conferred upon evidence of high attainment in Geophysics and ability to conduct an independent investigation and present the results of such research.

Requirements for the Degree—A minimum of 135 units of graduate study at Stanford must be satisfactorily completed. Required courses must be taken for a letter grade, if offered. Students are required to attend the department seminars, and to complete sufficient units of independent work on a research problem to meet the 135-unit University requirement. 12 units must be met by participation in the GEOPHYS 385 series, or equivalent series in other departments with approval of the adviser and graduate coordinator. Students are encouraged to participate in the GEOPHYS 385 series from more than one faculty member or group and relevant equivalent series in other departments. Students with a Master’s degree may waive up to 12 units for approved courses.

ENGR 102W/202W, Technical Writing, is recommended but not required. The student’s record must indicate outstanding scholarship, and deficiencies in previous training must be removed. Experience as a teaching assistant (quarter-time for at least two academic quarters) is required for the Ph.D. degree. For more information, see the Geophysics Administrative Guide, section 1.4.1.

The student must pass the departmental oral examination by the end of the sixth academic quarter (third academic quarter for students with an M.S. degree); prepare under faculty supervision a dissertation that is a contribution to knowledge and the result of independent work expressed in satisfactory form; and pass the University oral examination.

The Ph.D. dissertation must be submitted in its final form within five calendar years from the date of admission to candidacy. Upon formal acceptance into a research group, the student and faculty adviser form a supervising committee consisting of at least three members who are responsible for overseeing satisfactory progress toward the Ph.D. degree. At least two committee members must be Geophysics faculty members. The committee conducts the department oral examination, and meets thereafter annually with the student to review degree progress. The Geophysics faculty monitors progress of all students who have not yet passed their department oral examination by carrying out an annual performance appraisal at a closed faculty meeting.

Course requirements—
1. Geophysics*—12 units, lecture courses numbered 200 and above, from 4 different Geophysics faculty with different research specializations
2. Additional Geophysics—3 units, lecture courses numbered 150 and above
3. School of Earth Sciences (non-Geophysics)—3 units, lecture courses numbered 100 or above
4. Mathematics (numbered 100 or above), Science, and Engineering (non-School of Earth Sciences)—6 units, lecture courses numbered 200 or above
5. Any of the above categories—6 units, lecture courses numbered 200 or above
6. Total: 30 units

* These units marked cannot be waived.

Ph.D. Department Examination Requirement—
1. One research proposal (10-20 pages) with a completed component that outlines a plan of research for 2-3 years
2. Second scientific proposal or paper (4-10 pages) with a professor in another area
3. An oral presentation with the student’s advising committee on both the research proposal (~30-40 min) and the second proposal/paper (~10 min), with questions by the committee constituting the qualifying exam

The purpose of the second research project is to add breadth to Ph.D. study, and give the student the ability and confidence to teach or advise work in multiple areas. Both research projects must be in Geophysics or related disciplines. The two projects should be clearly distinct: neither the same methodology applied to two different datasets, nor two distinct methodologies applied to the same fundamental problem. The second project should clearly stand alone as a separate piece of work. The two projects must be supervised by different faculty in separate research groups, except in rare cases, as approved by the departmental graduate faculty adviser. The quality of each research project should be consistent with publication of a short journal article (typically achieved by additional work beyond the qualifying exam); although occasionally an extensive term paper deserving of presentation to the second project research group may be approved. The expected level of work on the second project should be about one academic quarter of full time effort.
SCHOOL OF EDUCATION

Dean: Deborah J. Stipek
Associate Dean for Faculty Affairs: Edward Haertel
Associate Dean for Student Affairs: Eamonn Callan
Senior Associate Dean for Administration: Stephen Olson
Associate Dean for External Relations: Rebecca T. Smith
Assistant Dean for Academic Services: to be announced
Assistant Dean for Information Technology and CTO: Paul Kim

Associate Professors: Anthony L. Antonio, Brigid J. Barron, Eric Bettinger, Prudence Carter, Teresa C. LaFromboise, Daniel McFarland, Debra Meyerson, Sean Reardon, David Rogosa, Mitchell Stevens

Assistant Professors: Jennifer Adams, Nicole M. Ardoim, Maren Songmy Aukerman, Paulo Blikstein, Bryan Brown, Leah Gordon, Ira Lit, Aki Murata, Jelena Obradović, Christine Min Wo-tipka

Professors (Teaching): Shelley Goldman, Rachel Lotan
Associate Professor (Teaching): Susan O’Hara
Professor (Research): David Plank

Curiosity Associate Professors: Robert Reich, Caroline Winterer

Curiosity Assistant Professor: Shashank Joshi

Senior Lecturers: Denise Pope, Ann Porteus

Consulting Professor: Michael Kamik

Consulting Associate Professors: Suki Hoagland, Thomas Keating

School Offices: School of Education, room 101
Mail Code: 94305-3096
Phone: (650) 723-2109
Email: info@suse.stanford.edu

The School of Education is organized into three program area committees: Curriculum Studies and Teacher Education (C&TE); Psychological Studies in Education (PSE); and Social Sciences, Policy, and Educational Practice (SSPEP).

In addition, several cross-area programs are sponsored by faculty from more than one area. These programs include the doctoral Learning Sciences and Technology Design Program (LSTD); two master’s level programs: the Stanford Teacher Education Program (STEP) and the Learning, Design, and Technology Program (LDT); and the undergraduate honors program.

The School of Education offers an eight-week summer session for admitted students only. The School offers no correspondence or extension courses, and in accordance with University policy, no part-time enrollment is allowed. Work in an approved internship or as a research assistant is accommodated within the full-time program of study.

UNDERGRADUATE PROGRAMS IN EDUCATION

The School of Education offers an eight-week summer session for admitted students only. The School offers no correspondence or extension courses, and in accordance with University policy, no part-time enrollment is allowed. Work in an approved internship or as a research assistant is accommodated within the full-time program of study.

The School of Education offers an eight-week summer session for admitted students only. The School offers no correspondence or extension courses, and in accordance with University policy, no part-time enrollment is allowed. Work in an approved internship or as a research assistant is accommodated within the full-time program of study.
MINOR IN EDUCATION

The Stanford University School of Education awards an undergraduate minor in the field of Education. The minor is structured to provide a substantial introduction to education through a broad-based and focused study of educational research, theory and practice. The goals of the minor are to allow undergraduates to develop an understanding of the core issues facing educators and policymakers, to make connections to their major programs of study, and to provide rigorous preparation for graduate studies in education.

Students interested in pursuing an undergraduate minor in Education begin by contacting the minor director (Jennifer Lynn Wolf, jlwolf@stanford.edu), who is responsible for advising all candidates and approving each student’s minor plan of study. Applications for the minor are due no later than the second quarter of the junior year.

The Education Minor requires three core courses to ensure coverage of the disciplines of the field, while allowing flexibility for students wanting to pursue specific interests within Education. In order to graduate with a minor in Education, students must complete the minor program of study as described here, for a total of not less than 20 units and not more than 30 units, with a minimum of six courses.

Course Requirements & Distribution

1. All minor students are required to take the minor core course: EDUC 101, Undergraduate Teaching Practicum, which addresses foundational issues in Education and requires field observations in school sites. This course is research-writing intensive.

2. All students are required to take two of the following foundational courses: EDUC 103B. Socio-cultural Theory and Practices: Race, Ethnicity, and Linguistic Diversity in Classrooms
   EDUC 110. Sociology of Education: The Social Organization of Schools
   EDUC 179. Urban Youth and Their Institutions: Research and Practice
   EDUC 201. History of Education in the United States
   EDUC 203. The Anthropology of Education
   EDUC 204. Introduction to Philosophy of Education

3. Each student identifies a subfield of study in which to take at least three elective courses. Established subfields of study within the School of Education include Teaching and Learning; Educational Policy; Educational Technology. Suitable elective courses include those listed here:

Subfield 1: Teaching and Learning
EDUC 111. The Young Adult Novel: A Literature for & About Adolescents
EDUC 116X. Service Learning as an Approach to Teaching
EDUC 137. Social Justice in Education
EDUC 144X. Elementary Child Development
EDUC 149. Theory & Issues in the Study of Bilingualism
EDUC 165. History of Higher Education in the U.S.
EDUC 171. Early Childhood Education Practicum
EDUC 197. Education, Gender and Development
EDUC 208. Curriculum Construction
EDUC 218. Topics in Learning and Cognition
EDUC 223. Good Schools: Research, Policy & Practice
EDUC 256. Psychological & Educational Resilience Among Children & Youth

Subfield 2: Education Research and Policy
EDUC 104X. The Conduct of Research in Communities
EDUC 107. The Politics of International Cooperation in Education
EDUC 119X. Writing about Education
EDUC 122X. Collaborations for International Environmental Education
EDUC 123X. Contexts that Promote Youth Development
EDUC 113X. Gender & Sexuality in the Schools
EDUC 177. Education of Immigrant Students: Psychological Perspectives
EDUC 223. Good Schools: Research, Policy & Practice
GRADUATE PROGRAMS IN EDUCATION

The School of Education offers Master of Arts and Doctor of Philosophy degrees in several programs described below. University and School of Education requirements must be met for each degree. The University requirements are detailed in the “Graduate Degrees” section of this bulletin. Students are urged to read this section carefully, noting residency, tuition, and registration requirements. A student who wishes to enroll for graduate work in the School of Education must be admitted to graduate standing by one of the school’s area committees and with the approval of the Associate Dean of Student Affairs.

Complete information about admissions procedures and requirements is available at http://gradadmissions.stanford.edu, or at http://ed.stanford.edu/suse. All applicants, except coterminal applicants, must submit scores from the Graduate Record Examination General Test (verbal, quantitative, and analytical or analytical writing areas); TOEFL scores are also required from those whose first language is not English. Applicants to the Stanford Teacher Education Program are also required to submit specific test scores or acceptable equivalents as required by the California Commission on Teacher Credentialing; see the section on STEP below. Test information is available at http://ed.stanford.edu/suse/admissions/admissions-application-requirements.html#test-scores.

Other Divisions of the University—Teachers, administrators, and researchers are expected to have substantial knowledge of a variety of academic fields outside the areas encompassed by professional education. Graduate students in the School of Education are, therefore, urged to consider the courses offered in other schools of the University in planning their programs.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM IN EDUCATION

The School of Education admits a small number of students from undergraduate departments within the University into a coterminal bachelor’s and master’s program. For information about the coterminal option through the Stanford Teacher Education Program (STEP), see the details under STEP below. Students in this program receive the bachelor’s degree in their undergraduate major and the master’s degree in Education. Approval of the student’s undergraduate department and admission to the School of Education M.A. program are required. Undergraduates may apply when they have completed at least 120 units, and must submit their application no later than the quarter prior to the expected completion of their undergraduate degree. The number of units required for the M.A. degree depends on the program requirements within the School of Education; the minimum is 45 units.

Applicants may obtain coterminal degree application materials from the School of Education’s Admissions Office in Cubberley, Room 140. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MASTER OF ARTS IN EDUCATION

The M.A. degree is conferred by the University upon recommendation of the faculty of the School of Education. The minimum unit requirement is 45 quarter units earned at Stanford as a graduate student. Students must maintain a grade point average (GPA) of 3.0 or better in courses applicable to the degree, and a minimum of 27 units must be taken in the School of Education. Students typically enroll in 15 to 18 units per quarter. They must enroll in at least 11 units of work each quarter unless their program makes special provision for a lower quarterly minimum. Master’s students should obtain detailed program requirements from the Assistant Director of Academic Services, located in academic services in the School of Education. Most programs require a final project, scholarly paper, or monograph. Additional detailed information regarding program content, entrance, and degree requirements is available at http://ed.stanford.edu. Upon admission, each student is assigned a faculty adviser from the appropriate area committee to begin early planning of a coherent program.

Master of Arts degrees are offered for the following specializations:
- Curriculum and Teacher Education. Students may specialize in English, literacy, mathematics, science, or history. (The program in CTE is not a credentialing program; see STEP below.)
- International Comparative Education
- International Educational Administration and Policy Analysis
- Joint Degree Program with Graduate School of Business (M.B.A./M.A.)
- Joint Degree Program with Law School (J.D./M.A.)
- Learning, Design, and Technology
- Policy, Organization, and Leadership Studies

In addition, an M.A. degree with a teaching credential is offered in the Stanford Teacher Education Program.

STANFORD TEACHER EDUCATION PROGRAM (STEP)

STEP is a twelve-month, full-time program leading to a Master of Arts and a preliminary California teaching credential. STEP offers two Master of Arts programs to prepare college graduates for careers as teachers in single- or multiple-subject classrooms. STEP-Secondary prepares humanities and sciences students to become teachers of English, languages (French, German, Japanese, Spanish), mathematics, science (biology, chemistry, earth science, physics), and history/social science. STEP-Elementary prepares students to be teachers in California multiple-subject classrooms. STEP seeks to prepare and support teachers to work with diverse learners to achieve high intellectual, academic, and social standards by creating equitable and successful schools and classrooms.

The 12-month STEP year begins in June with a Summer Quarter of intensive academic preparation and placement in a local summer school. During the academic year, students continue their course work and begin a year-long field placement under the guidance of expert teachers in local schools. The master’s degree and teaching credential require a minimum of 45 quarter units, taken during four quarters of continuous residency.

Stanford undergraduates who enroll in STEP through the coterminal program must have their B.A. conferred prior to commencing the four quarters of the STEP program. Students complete their undergraduate degree prior to beginning in the STEP year, which concludes in a master’s degree and a recommendation for a California teaching credential.
Applicants to the secondary program are required to pass the California Basic Educational Skills Test (CBEST) and must demonstrate subject matter competence in one of two ways: (1) by passing the California Subject Examination for Teachers (CSET) in their content area; or (2) by completing a California state-approved subject matter preparation program. Applicants to the elementary program are required to pass the California Basic Educational Skills Test (CBEST), the California Multiple Subject Examination for Teachers (CSET), and the Reading Instruction Competence Assessment Test (RICA) after admission to the program.

Further information regarding admission requirements, coursework, and credential requirements is available at http://ed.stanford.edu and in the School of Education Guide to Graduate Studies.

DOCTORAL DEGREES IN EDUCATION

The School of Education offers the Doctor of Philosophy (Ph.D.) degree in all program area committees. The degree is conferred by the University upon recommendation by the faculty of the School of Education and the University Committee on Graduate Studies. The Ph.D. requires a minimum of 135 units of coursework and research completed at Stanford beyond the baccalaureate degree. Students may transfer up to 45 units of graduate coursework. Students must consult with the doctoral programs officer if they intend to transfer prior coursework. Students must maintain a grade point average (GPA) of 3.0 (B) or better in courses applicable to the degree.

Students should note that admission to the doctoral program does not constitute admission to candidacy for the degree. Students must apply for candidacy by the end of their second year of study and should obtain information about procedures and requirements during their first year from the School’s doctoral programs office in Cubberley 135.

The Ph.D. degree is designed for students who are preparing for research work in public school systems, branches of government, or specialized institutions; teaching roles in education in colleges or universities, and research connected with such teaching; or other careers in educational scholarship and research.

Ph.D. students must complete a minor in another discipline taught outside the school, or hold an acceptable master’s degree outside the field of education, or complete an approved individually designed distributed minor that combines relevant advanced work taken in several disciplines outside the school.

Upon admission, the admitting area committee assigns an initial adviser from its faculty who works with the student to establish an appropriate and individualized course of study, a relevant minor, and project research plans. Other faculty members may also be consulted in this process. Details about administrative and academic requirements for each area committee and the School of Education, along with the expected time frame to complete program milestones, are given in the publication School of Education Doctoral Degree Handbook, available for download at http://ed.stanford.edu/suse/programs-degrees; click on the publication link.

The following doctoral specializations, with their sponsoring area and concentration, are offered:
- Administration and Policy Analysis (SSPEP)
- Anthropology of Education (SSPEP)
- Child and Adolescent Development (PSE)
- Economics of Education (SSPEP)
- Educational Linguistics (SSPEP)
- Educational Psychology (PSE)
- English Education/Literacy Studies (C&TE)
- General Curriculum Studies (C&TE)
- Higher Education (SSPEP)
- History of Education (SSPEP)
- International Comparative Education (SSPEP)
- Learning Sciences and Technology Design (CTE, PSE, SSPEP)
- Mathematics Education (C&TE)
- Organization Studies (SSPEP)
- Philosophy of Education (SSPEP)
- Science Education (C&TE)
- Interdisciplinary Studies (SSPEP)
- History/Social Science Education (C&TE)
- Sociology of Education (SSPEP)
- Teacher Education (C&TE)

PH.D. MINOR IN EDUCATION

Candidates for the Ph.D. degree in other departments or schools of the University may elect to minor in Education. Requirements include a minimum of 20 quarter units of graduate course work in Education and a field of concentration. Students choosing to minor in Education should meet with the Associate Dean for Student Affairs to determine a suitable course of study early in their program.
SCHOOL OF ENGINEERING

Dean: James D. Plummer
Senior Associate Deans: Hilary Beech (Administration), Laura L. Breyfogle (External Relations), Anthony J. DiPaolo (Stanford Center for Professional Development), Curtis W. Frank (Faculty and Academic Affairs), Brad Osgood (Student Affairs)
Associate Deans: Noé P. Lozano (Diversity Programs), Annalies Ransome (Faculty and Academic Affairs)
Assistant Dean: Sally Gressens (Graduate Student Affairs)

Faculty Teaching General Engineering Courses
Professors: Brian Cantwell, John Eaton, Roger Howe, Thomas Lee, Larry Leifer, Drew Nelson, Brad Osgood, Stephen M. Rock, Matthew Scott, Sheri Sheppard, Robert Sinclair, Stuart Thompson, Simon Wong
Associate Professors: Samuel S. Chiu, J. Christian Gerdes, Sanjay Lall, Paul McIntyre, Heinz Pitsch, Olav Solgaard, Benjamin Van Roy
Assistant Professors: Eric Darve, Sarah Heilshorn, Gianluca Iacca-rino, Adrian Lew, Nicolas A. Melosh, Beth Pruitt, Christina Smolke, Clifford L. Wang, Thomas A. Weber, Xiaolin Zheng
Professors (Teaching): Thomas H. Byers, Robert E. McGinn, Eric Roberts
Associate Professor (Teaching): Mehran Sahami
Senior Lecturer: Claude Reichard
Lecturers: David Baggeroer, Steven Blank, Jerry Cain, Scott Doorley, David Evans, Midge Eisele, Lisa Y. Hwang, David Jaffe, Mary McDevitt, Lauren Rusk, Evelin Sullivan
Consulting Professors: Thomas Kosnik, Paul Mitiguy
Consulting Associate Professors: William Behrman, Robyn Wright Dunbar
Consulting Assistant Professors: Brendan Boyle, Stuart Brown, Vadim Khayms
Mail Code: 94305-4027
Phone: (650) 723-5984
Web Site: http://soe.stanford.edu

Courses offered by the School of Engineering are listed under the subject code ENGR on the Stanford Bulletin’s ExploreCourses web site.

The School of Engineering offers undergraduate programs leading to the degree of Bachelor of Science (B.S.), programs leading to both B.S. and Master of Science (M.S.) degrees, other programs leading to a B.S. with a Bachelor of Arts (B.A.) in a field of the humanities or social sciences, dual-degree programs with certain other colleges, and graduate curricula leading to the degrees of M.S., Engineer, and Ph.D.

The school has nine academic departments: Aeronautics and Astronautics, Bioengineering, Chemical Engineering, Civil and Environmental Engineering, Computer Science, Electrical Engineering, Management Science and Engineering, Materials Science and Engineering, and Mechanical Engineering. These departments and one interdisciplinary program, the Institute for Computational and Engineering, and Mechanical Engineering. In ABET-accredited programs, students must meet specific requirements for engineering science, engineering design, mathematics, and science course work. Students are urged to consult the School of Engineering Handbook for Undergraduate Engineering Programs and their adviser.

Accreditation—The Accreditation Board for Engineering and Technology (ABET) accredits college engineering programs nationwide using criteria and standards developed and accepted by U.S. engineering communities. At Stanford, the following undergraduate programs are accredited: Chemical Engineering, Civil Engineering, Electrical Engineering, Environmental Engineering, and Mechanical Engineering. In ABET-accredited programs, students must meet specific requirements for engineering science, engineering design, mathematics, and science course work. Students are urged to consult the School of Engineering Handbook for Undergraduate Engineering Programs and their adviser.

Accreditation is important in certain areas of the engineering profession; students wishing more information about accreditation should consult their department office or the office of the Senior Associate Dean for Student Affairs in Terman 201.

Policy on Satisfactory/No Credit Grading and Minimum Grade Point Average—All courses taken to satisfy major requirements (including the requirements for mathematics, science, engineering
fundamentals, Technology in Society, and engineering depth) for all engineering students (including both department and School of Engineering majors) must be taken for a letter grade if the instructor offers that option.

For departmental majors, the minimum combined GPA (grade point average) for all courses taken in fulfillment of the Engineering Fundamentals requirement and the Engineering Depth requirement is 2.0. For School of Engineering majors, the minimum GPA on all engineering courses taken in fulfillment of the major requirements is 2.0.

**ADMISSION**

Any students admitted to the University may declare an engineering major if they elect to do so; no additional courses or examinations are required for admission to the School of Engineering.

**RECOMMENDED PREPARATION**

**FRESHMEN**

Students who plan to enter Stanford as freshmen and intend to major in engineering should take the highest level of mathematics offered in high school. (See the “Mathematics” section of this bulletin for information on advanced placement in mathematics.) High school courses in physics and chemistry are strongly recommended, but not required. Additional elective course work in the humanities and social sciences is also recommended.

**TRANSFER STUDENTS**

Students who do the early part of their college work elsewhere and then transfer to Stanford to complete their engineering programs should follow an engineering or pre-engineering program at the first school, selecting insofar as possible courses applicable to the requirements of the School of Engineering, that is, courses comparable to those described under “Undergraduate Programs.” In addition, students should work toward completing the equivalent of Stanford’s foreign language requirement and as many of the University’s General Education Requirements (GERs) as possible before transferring. Some transfer students may require more than four years (in total) to obtain the B.S. degree. However, Stanford affords great flexibility in planning and scheduling individual programs, which makes it possible for transfer students, who have wide variations in preparation, to plan full programs for each quarter and to progress toward graduation without undue delay.

Transfer credit is given for courses taken elsewhere whenever the courses are equivalent or substantially similar to Stanford courses in scope and rigor. The policy of the School of Engineering is to study each transfer student’s preparation and make a reasonable evaluation of the courses taken prior to transfer by means of a petition process. Inquiries may be addressed to the Office of Student Affairs in 201 Terman. For more information, see the transfer credit section of the Handbook for Undergraduate Engineering Programs at http://ughb.stanford.edu.

**DEGREE PROGRAM OPTIONS**

For more information about the requirements for the following options, see the “Undergraduate Degrees and Programs” section of this bulletin. Five years are usually required for a dual or coterminus program or for a combination of these two multiple degree programs. For further information, inquire with the School of Engineering’s student affairs office, Terman 201, or with department contacts listed in the Handbook for Undergraduate Engineering Programs, available at http://ughb.stanford.edu.

**BACHELOR OF SCIENCE IN THE SCHOOL OF ENGINEERING**

Departments within the School of Engineering offer programs leading to the B.S. degree in the following fields: Chemical Engineering, Civil Engineering, Computer Science, Electrical Engineering, Environmental Engineering, Management Science and Engineering, Materials Science and Engineering, and Mechanical Engineering. The School of Engineering itself offers interdisciplinary programs leading to the B.S. degree in Engineering with specializations in Aeronautics and Astronautics, Architectural Design, Atmosphere/Energy, Bioengineering, Biomechanical Engineering, Biomedical Computation, Computer Systems Engineering, Engineering Physics, and Product Design. In addition, students may elect a B.S. in an Individually Designed Major in Engineering.

The departments of Chemical Engineering, Civil and Environmental Engineering, Computer Science, Electrical Engineering, and Mechanical Engineering offer qualified majors opportunities to do independent study and research at an advanced level with a faculty mentor in order to receive a Bachelor of Science with honors.

**Petroleum Engineering**—Petroleum Engineering is offered by the Department of Energy Resource Engineering in the School of Earth Sciences. Consult the “Energy Resources Engineering” section of this bulletin for requirements. School of Engineering majors who anticipate summer jobs or career positions associated with the oil industry should consider enrolling in ENGR 120, Fundamentals of Petroleum Engineering.

**Programs in Manufacturing**—Programs in manufacturing are available at the undergraduate, master’s, and doctorate levels. The undergraduate programs of the departments of Civil and Environmental Engineering, Management Science and Engineering, and Mechanical Engineering provide general preparation for any student interested in manufacturing. More specific interests can be accommodated through Individually Designed Majors in Engineering (IDMENs).

**BASIC REQUIREMENTS**

**Basic Requirement 1 (Mathematics)—**Engineering students need a solid foundation in the calculus of continuous functions including differential equations, an introduction to discrete mathematics, and an understanding of statistics and probability theory. The minimum preparation should normally include calculus to the level of MATH 53. Knowledge of ordinary differential equations and matrices is important in many areas of engineering, and students are encouraged to select additional courses in these topics. To meet ABET accreditation criteria, a student’s program must include the study of differential equations.

Courses that satisfy the math requirement are listed at http://ughb.stanford.edu in the Handbook for Undergraduate Engineering Programs.

**Basic Requirement 2 (Science)—**A strong background in the basic concepts and principles of natural science in such fields as biology, chemistry, geology, and physics is essential for engineering. Most students include the study of physics and chemistry in their programs.

Courses that satisfy the science requirement are listed at http://ughb.stanford.edu in the Handbook for Undergraduate Engineering Programs.

**Basic Requirement 3 (Engineering Fundamentals)—**The Engineering Fundamentals requirement is satisfied by a nucleus of technically rigorous introductory courses chosen from the various engineering disciplines. It is intended to serve several purposes. First, it provides students with a breadth of knowledge concerning the major fields of endeavor within engineering. Second, it allows the incoming engineering student an opportunity to explore a number of courses before embarking on a specific academic major. Third, the individual classes each offer a reasonably deep insight into a contemporary technological subject for the interested non-engineer.

The requirement is met by taking three courses from the following list, at least one of which must be chosen by the student rather than by the department:

- ENGR 10. Introduction to Engineering Analysis
- ENGR 15. Dynamics
- ENGR 20. Introduction to Chemical Engineering (Same as CHEMENG 20)
- ENGR 25. Biotechnology (Same as CHEMENG 25)
ENGR 30. Engineering Thermodynamics
ENGR 40. Introductory Electronics 1
ENGR 50/50M. Introduction to Materials Science, Nanotechnology Emphasis/Biomaterials Emphasis
ENGR 60. Engineering Economics
ENGR 62. Introduction to Optimization (Same as MS&E 111)
ENGR 70A/CS 106A. Programming Methodology
ENGR 70B or X/CS 106B or X. Programming Abstractions (or Accelerated)
ENGR 80. Introduction to Bioengineering (Same as BIOE 80)

1 ENGR 40 and 50 may be taken on video at some of Stanford’s Overseas Centers.

Basic Requirement 4 (Technology in Society)—It is important for the student to obtain a broad understanding of engineering as a social activity. To foster this aspect of intellectual and professional development, all engineering majors must take one course devoted to exploring issues arising from the interplay of engineering, technology, and society. Courses that fulfill this requirement are listed online at http://ughb.stanford.edu in the Handbook for Undergraduate Engineering Programs.

Basic Requirement 5 (Science and Design)—In order to satisfy ABET (Accreditation Board for Engineering and Technology) requirements, a student majoring in Chemical, Civil, Chemical, Electrical, Environmental, or Mechanical Engineering must complete one and a half years of engineering topics, consisting of a minimum of 68 units of Engineering Science and Engineering Design appropriate to the student’s field of study. In most cases, students meet this requirement by completing the major program core and elective requirements in Fundamentals and Depth. For example, ENGR 40 is a 5-unit course; 3 of these 5 units are assigned to Engineering Science and the remaining 2 units are assigned to Engineering Design. A student may need to take additional courses in Depth in order to fulfill the minimum requirement. The science and design units assigned to each major’s depth courses are listed online at http://ughb.stanford.edu in the Handbook for Undergraduate Engineering Programs.

SCHOOL OF ENGINEERING MAJORS

The School of Engineering offers two types of B.S. degrees: Bachelor of Science in Engineering and Bachelor of Science for Individually Designed Majors in Engineering (IDMEn). There are nine Engineering B.S. subplans that have been proposed by cognizant faculty groups and pre-approved by the Undergraduate Council: Aeronautics and Astronautics; Architectural Design; Atmosphere/Energy; Bioengineering; Biomedical Engineering; Biomedical Computation; Computer Systems Engineering; Engineering Physics; and Product Design. The B.S. for an Individually Designed Major in Engineering has also been approved by the council.

AERONAUTICS AND ASTRONAUTICS (AA)

Mathematics (24 units):
MA 111 or CME 102/ENGR 155A

5

MATH electives 1

Science (18 units):

PHYSICS 41. Mechanics 4
PHYSICS 43. Electricity and Magnetism 4
One additional Physics course 3
Science electives 2 9

Technology in Society 3 (one course required)

3-5

Engineering Fundamentals 4 three courses minimum, including: ENGR 30. Engineering Thermodynamics 3
ENGR 70A. Programming Methodology 3
Engineering Depth (39 units):

AA 100. Introduction to Aeronautics and Astronautics (WIM) 3
AA 190. Directed Research in Aeronautics and Astronautics 3
ENGR 15. Dynamics 3
CEE 10A. Mechanics of Materials 4
ME 80. Strength of Materials 4
ME 161. Dynamic Systems 4

ME 70. Introductory Fluids Engineering 4
ME 131A. Heat Transfer 4
Depth Area I 5
Depth Area II 6
Engineering Elective(s) 3 3

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

ARCHITECTURAL DESIGN (AD)

Mathematics and Science (36 units minimum):

MATH 19, 20, and 21, or 41 and 42 (required) 10

One course in Statistics (required) 3-5

PHYSICS 21 or 41. Mechanics (required) 3-4

Recommended:

EARTHYS 101, 102; CEE 64, 70, 101D; CME 100; PHYSICS 23 or 43; or from School of Engineering approved list 2

Technology in Society (one course required; see Basic Requirement 4) 3-5

Engineering Fundamentals (three courses minimum; see Basic Requirement 3):

ENGR 60. Engineering Economy 3
Fundamentals Elective 3-5

Engineering Depth:

CEE 31 or 31Q. Accessing Architecture Through Drawing 4

CEE 100. Managing Sustainable Building Projects (WIM) 4

CEE 101A. Mechanics of Materials 4

CEE 110. Building Information Modeling 4

CEE 130. Architectural Design: 3D Modeling, Methodology, and Process 4

CEE 136. Green Architecture 4

CEE 137B. Intermediate Architecture Studio (or one of the 137 series) 5

CEE 156. Building Systems 4

ARTHIST 3. Introduction to the History of Architecture 5

Engineering Depth Electives (with at least 3 units from SoE courses): the number of units of Depth Electives must be such that courses in Engineering Fundamentals and Engineering Depth total at least 60 units. 2

ATMOSPHERE/ENERGY (A/E)

Mathematics (23 units minimum, including at least one course from each group):

Group A:

MATH 53. Ordinary Differential Equations with Linear Algebra 5

CME 102. Ordinary Differential Equations for Engineers 5

Group B:

CME 106. Introduction to Probability and Statistics for Engineers 4

STATS 60. Introduction to Statistical Methods: Pre-Calculus 5

STATS 110. Statistical Methods in Engineering and the Physical Sciences 4-5

GES 160. Statistical Methods for Earth and Environmental Sciences 3-4

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 School of Engineering approved list of math and science courses available in the Handbook for Undergraduate Engineering Programs at http://ughb.stanford.edu

2 Engineering depth electives: At least one of the following courses: CEE 111, 112, 124, 131, 131A, 132 or 138A; and others from CEE 80N, 101B, 101C, 122A,B, 134B, 135A, 139, 154, 172A, 176A, 180, 181, 182, 183; ENGR 50, 103, 131; ME 101, 110A, 115, 120, 222; ARTSTUDIO 60, 70, 140, 145, 148, 151, 271; ARTHIST 141, 142, 143A, 188A; FILMPROD 114, DRAMA 137; URBANST 110, 113, 163, 171.

3 Mathematics (23 units minimum, including at least one course from each group):

Group A:

MATH 53. Ordinary Differential Equations with Linear Algebra 5

CME 102. Ordinary Differential Equations for Engineers 5

Group B:

CME 106. Introduction to Probability and Statistics for Engineers 4

STATS 60. Introduction to Statistical Methods: Pre-Calculus 5

STATS 110. Statistical Methods in Engineering and the Physical Sciences 4-5

GES 160. Statistical Methods for Earth and Environmental Sciences 3-4
Science (22 units minimum, including all of the following):

PHYSICS 41. Mechanics

PHYSICS 43. Electricity and Magnetism

CHEM 31B. Chemical Principles II

CHEM 41A. Biology Core

PHYSICS 41X. Mechanics, Electricity and Magnetism

PHYSICS 44X. Synthetic Biology Laboratory

CHEMENG 35N. Renewable Energy for a Sustainable World

ME 112. Mechanical Engineering Design

ME 131A. Heat Transfer

ME 131B. Fluid Mechanics

ME 140. Advanced Thermal Systems

ME 161. Dynamic Systems

ME 203. Manufacturing and Design

ME 210. Introduction to Mechatronics

ME 220. Introduction to Sensors

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs. The WIM course for this major will be offered in 2010-11.

1 Mathematics courses must include MATH 53 or CME 102 and STAT 116 or MATH 106.

2 Science must include both Chemistry and Physics with two quarters of course work in each, two courses of BIO core, and CHEM 31A and B or X, or ENGR 31. CHEM 31A and B are considered one course even though given over two quarters.

BIOMECHANICAL ENGINEERING (BME)

Mathematics (21 units minimum; see Basic Requirement 1)

Science (22 units minimum)\)

CHEM 31X or A,B, (required) 4-8

BIO 44X. Biology Labs (WIM) 4

Bio or Human Biology A/B core courses 10

Additional units from School of Engineering approved list

Technology in Society (one course required; see Basic Requirement 4)

Engineering Topics (Engineering Science and Design): Engineering Fundamentals (minimum three courses; see Basic Requirement 3):

ENGR 25. Biotechnology 3

Fundamentals Elective 3-5

Engineering Depth:

ENGR 15. Dynamics 3

ENGR 30. Engineering Thermodynamics 3

ME 70. Introductory Fluids Engineering 4

ME 80. Strength of Materials and Lab 4

ME 398 or BIOE 393. Seminar 1

Options to complete the ME depth sequence (3 courses, minimum 9 units):

ENGR 105. Feedback Control Design 3

ME 101. Visual Thinking 3

ME 112. Mechanical Engineering Design 4

ME 113. Mechanical Engineering Design 4

ME 131A. Heat Transfer 3-4

ME 131B. Fluid Mechanics 4

ME 140. Advanced Thermal Systems 5

ME 161. Dynamic Systems 4

ME 203. Manufacturing and Design 3-4

ME 210. Introduction to Mechatronics 4

ME 220. Introduction to Sensors 3-4

Options to complete the BME depth sequence (3 courses, minimum 9 units):

ME 281. Biomechanics of Movement 3

ME 284A. Cardiovascular Bioengineering 3

ME 284B. Cardiovascular Bioengineering 3

ME 280. Skeleton Development and Evolution 3
ME 239. Mechanics of the Cell

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 Science must include both Chemistry and Physics with one year of course work in at least one, two courses of HUMBIO core or BIO core, and CHEM 31A and B or X, or ENGR 31. CHEM 31A and B are considered one course even though given over two quarters.

**BIOMEDICAL COMPUTATION (BMC)**

Mathematics (21 unit minimum; see Basic Requirement 1)
- MATH 41. Calculus 3
- MATH 42. Calculus 3
- STAT 116. Theory of Probability 1
- CS 103. Mathematical Foundations of Computing 3

Science (17 units minimum; see Basic Requirement 2)
- PHYSICS 41. Mechanics 4
- CHEM 31X or A/B. Chemical Principles 4
- CHEM 33. Structure and Reactivity 4
- BIO 41. Evolution, Genetics, Biochemistry 5
- MATH 41, 42, 51. Calculus 15
- ORGANS/Organisms Concentration:
  - One additional Engineering Fundamental 4
  - Biology (three courses):
    - BIO 112. Human Physiology 4
    - BIO 188. Biochemistry I or BIO/EE/RAD 220. Introduction to Imaging 3
  - Organs Elective 6
  - Simulation Electives (two courses) 6
  - Informatics Electives (two courses) 6
  - Simulation, Informatics, or Organs Elective (one course) 5
  - Simulation Concentration:
    - Mathematics:
      - MATH 51 or CME 100. Advanced Calculus I 5
      - MATH 52 or CME 102/ENGR 155A. Advanced Calculus II 5
      - MATH 53 or CME 104/ENGR 155B. Advanced Calculus III 5
    - Science:
      - PHYSICS 43 or 45 4
      - Engineering Fundamental:
        - ENGR 30. Engineering Thermodynamics 3
      - Simulation Core:
        - Two courses from ENGR 14, ENGR 15; ME 80 6
      - Simulation Elective (two courses) 6
      - Cellular Elective (one course) 5
      - Organs Elective (one course) 5

Technology in Society (one course required; see Basic Requirement 4)
- CS 109, MS&E 120, MS&E 220, EE 178, and ENGR 199W are acceptable substitutes for STAT 116.
- Research projects require pre-approval of BMC Coordinators.
- Research units taken as CS 191W or in conjunction with ENGR 199W fulfill the Writing in the Major (WIM) requirement. CS 272, which does not have to be taken in conjunction with research, also fulfills the WIM requirement.
- One 3-5 unit course required. See Fundamentals list in Handbook for Undergraduate Engineering Programs.
- The list of electives is continually updated to include all applicable courses. For the current list of electives, see http://bmc.stanford.edu.
- A course may only be counted towards one elective or core requirement; it may not be double-counted.
- A total of 40 Engineering units must be taken. The core classes only provide 27 Engineering units, so the remaining units must be taken from within the electives.

**COMPUTER SYSTEMS ENGINEERING (CSE)**

Mathematics (25 units minimum):
- MATH 41, 42, 51. Calculus 15
- MATH 52 or 53. Multivariable Math 5
- CS 109. Introduction to Probability for Computer Scientists 5
- Science (12 units):
  - PHYSICS 41, 42, 43. Electricity and Magnetism 4
  - PHYSICS 45. Light and Heat 4
- Technology in Society (one course required; see Basic Requirement 4)
- Engineering Fundamentals (13 units minimum; see Basic Requirement 3):
  - ENGR 40. Introductory Electronics 5
  - ENGR 70B or 70X. Programming Abstractions or Accelerated (same as CS 106 B or X) 5
- Fundamentals Elective (may not be ENGR 70A, B, or X) 3-5
- Writing in the Major (one course):
  - CS 181, 191W, 194, 210B, 294W 3-4
- Computer Systems Engineering Core (32 units minimum):
  - CS 108. Object-Oriented Systems Design 5
  - EE 101A. Circuits I 4
  - EE 101B. Circuits II 4
  - EE 102A. Signals and Systems I 4
  - EE 102B. Signals and Systems II 4
- Computer Systems Engineering Depth (19-27 units; choose one of the following specializations):
  - Computer Systems Engineering Specialization 3-5
or CS 143, Compilers
EE 109. Digital Systems Design Lab 4
EE 271. VLSI Systems 3
Plus three to four of the following:
CS 140 or 143 (if not counted above) 4
CS 144. Introduction to Computer Networking 4
CS 149. Parallel Programming 4
CS 240E. Embedded Wireless Systems 4
CS 244. Advanced Topics in Networking 4
CS 244E. Low-Power Wireless Networking 3
EE 273. Digital Systems Engineering 4
EE 282. Computer Systems Architecture 3
Robotics and Mechatronics Specialization
CS 205A. Math for Robotics, Vision, Graphics 3
CS 223A. Introduction to Robotics 3
ME 210. Introduction to Mechatronics 4
CS 223B. Robot Programming Lab 4
EE 277. Experimental Haptics 3
ENGR 205. Introduction to Control Design 3
ENGR 206. Control System Design 4
ENGR 207A. Linear Control Systems I 4
ENGR 207B. Linear Control Systems II 3
Networking Specialization
CS 140. Operating Systems 4
CS 144. Introduction to Computer Networking 4
Plus four to five of the following:
CS 240. Advanced Topics in Operating Systems 3
CS 240E. Low Power Wireless Systems Software 4
CS 240X. Advanced Operating Systems II 3
CS 244. Advanced Topics in Networking 4
CS 244B. Distributed Systems 3
CS 244E. Low-Power Wireless Networking 3
CS 249A. Object-Oriented Programming 3
CS 249B. Advanced Object-Oriented Programming 3
EE 179. Introduction to Communications 3
EE 276. Introduction to Wireless Personal Communications 3

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 Students who complete STATS 116, MSEE 120, or CME 106 in Winter 2008-09 or later may count that course as satisfying the CS109 requirement. These same courses taken in Spring 2008-09 or later cannot be used to satisfy the CS109 requirement.

2 Students who have taken either CS 103X or CS 103A, B are considered to have satisfied the CS 103 requirement. Students taking CS 103A,B may complete the lower number of elective courses in a given specialization (see footnote 6).

3 The name of CS 107 has changed. The previous CS 107 course entitled Programming Paradigms also fulfills this requirement.

4 Independent study projects (CS 191 or 191W) require faculty sponsorship and must be approved in advance by the adviser, faculty sponsor, and the CSE project adviser (R. Plummer or P. Young). A signed approval form and brief description of the proposed project should be filed the quarter before work on the project is begun. Further details can be found in the Handbook for Undergraduate Engineering Programs at http://ughb.stanford.edu.

5 Students pursuing the Robotics and Mechatronics or Networking specializations must take EE 102A and B.

6 Students who take CS 103A,B may complete the lower number of elective courses in a given specialization (i.e., one less elective than students taking CS 103X or CS 103).

### ENGINEERING PHYSICS (EPHYS)

Mathematics (21 units minimum):
- **MATH 51 and 52. Multivariable Calculus** 5
- **or CME 100 and 104. Vector Calculus, Linear Algebra, PDE** 10
- **MATH 53 or CME 102. Ordinary Differential Equations** 5
- **MATH 131. Partial Differential Equations** 3

One advanced math elective such as EE 261, PHYSICS 112, or CME 106 (recommended). Also qualify are EE 263, any Math or Statistics course numbered 100 or above, and any CME course numbered 200 or above, except CME 206.

Science:
- **PHYSICS 41. Mechanics** 4
- **PHYSICS 43 and 44. Electricity and Magnetism and Lab** 5
- **PHYSICS 45 and 46. Light and Heat and Lab** 5
- **PHYSICS 70. Foundations of Modern Physics** 4
- **PHYSICS 61. Mechanics and Special Relativity** 4
- **PHYSICS 63 and 64. Electricity, Magnetism, and Waves and Lab** 5
- **PHYSICS 65 and 67. Thermodynamics and Modern Physics and Lab** 6

Technology in Society (one course required; see Basic Requirement 4)

Engineering Fundamentals
(three courses minimum; CS 106X or B recommended) 9-14

Engineering Physics Depth (core):

Intermediate Mechanics:
- **ENGR 15. Dynamics** 3
- **or PHYSICS 110. Intermediate Mechanics** 4

Intermediate Electricity and Magnetism:
- **EE 141 and 242. Engineering Electromagnetics and Electromagnetic Waves**
- **or PHYSICS 120 and 121. Intermediate Electricity and Magnetism** 8

Numerical Methods:
- **APP PHYS 215. Numerical Methods for Scientists and Engineers**
- **or CME 108. Introduction to Scientific Computing** 3-4
- **or CME 206/M. Intro to Numerical Methods for Engineering**
- **or PHYSICS 113. Computational Physics** 4

Electronics Lab:
- **ENGR 40. Introductory Electronics** 5
- **or EE 101. Circuits II** 3
- **or EE 122A. Analog Circuits Laboratory** 3
- **or PHYSICS 105. Analog Electronics**
- **or APP PHYS 207. Laboratory Electronics** 3

Writing Lab (WIM):
- **EE 108A and ENGR 102E. Digital Systems I** 4-5
- **or ME 203 and ENGR 102M. Manufacturing and Design** 4-5
- **or MATSCI 161. Nanocharacterization Laboratory** 4
- **or MATSCI 164. Electronic and Photonic Materials and Devices Laboratory** 4
- **or PHYSICS 107. Experimental Techniques and Data Analysis**

Quantum Mechanics:
- **EE 222 and 223. Applied Quantum Mechanics** 6
- **or PHYSICS 130 and 131. Quantum Mechanics** 8

Thermodynamics and Statistical Mechanics:
- **PHYSICS 170 and 171. Thermodynamics, Kinetic Theory, and Statistical Mechanics**
- **or ME 346A. Introduction to Statistical Mechanics** 3

Design Course (choose one of the following):
- **CS 108. Object-Oriented Systems Design** 3-4
- **EE 133. Analog Communications Design Laboratory**
- **ME 203. Manufacturing and Design** 3-4
- **ME 210 or EE 118. Introduction to Mechatronics**
- **PHYSICS 108. Project Laboratory** 3

Three courses from one specialty area:

Solid State Physics:
- **APP PHYS 272. Solid State Physics I**
- **APP PHYS 273. Solid State Physics II**
- **EE 116. Semiconductor Device Physics**
- **EE 216. Principles and Models of Semiconductor Devices**
- **MAT SCI 199. Electronic and Optical Properties of Solids**
- **PHYSICS 172. Solid State Physics**

Photons:
- **EE 216. Principles and Models of Semiconductor Devices**
- **EE 231. Introduction to Lasers**
- **EE 232. Laser Dynamics**
- **EE 234. Photonics Laboratory**
- **EE 243. Semiconductor Optoelectronic Devices**
- **EE 268. Introduction to Modern Optics**
- **MAT SCI 199. Electronic and Optical Properties of Solids**
- **ME 80. Strength of Materials**
- **ME 112. Mechanical Engineering Design**
- **ME 210 or EE 118. Introduction to Mechatronics**
- **Energy Systems:**
- **ME 131A. Heat Transfer**
- **ME 131B. Fluid Mechanics: Compressible Flow and Turbo-machinery**
- **ME 140. Advanced Thermal Systems** 5
Renewable Energy
- EE 293A. Fundamentals of Energy Processes 3
- EE 293B. Fundamentals of Energy Processes 3
- MATSCI 156. Solar Cells, Fuel Cells and Batteries 4
- MATSCI 302. Solar Cells 3
- MATSCI 316. Nanoscale Science, Engineering, and Technology 3
- ME 260. Fuel Cell Science Technology 3

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

**PRODUCT DESIGN (PD)**

Mathematics (20 units minimum):
- Recommended: one course in Statistics
- Science (22 units minimum):
  - 15 units must be from School of Engineering approved list
  - One year of PHYSICS 40 series (required)
Behavioral Science (8 units minimum):
- PSYCH 1. Introduction to Psychology (required) 5
- PSYCH elective from courses numbered 20-952 3-5

Mathematics and Science (maximum combined total of 45 units)

**PRODUCT DESIGN ENGINEERING DEPTH (48 UNITS MINIMUM):**

MEN proposal itself may not exceed 107 units. The student’s curricular plan must include 48 units of coursework pertinent to their IDMEN major, but the IDMEN proposal must be approved by the IDMEN Subcommittee. A request by a student to make changes in his or her previously approved major must be endorsed by the advisers and reviewed by the IDMEN subcommittee. The proposal indicates the goal of the major is to prepare the student for graduate work outside of engineering, a more general engineering program may be appropriate. A four-year study plan, showing courses to be taken each quarter, should also be included in the student’s IDMEN proposal.

The proposal must be signed by two faculty members who certify that they endorse the major as described in the proposal and that they agree to serve as the student’s permanent advisers. Of the faculty members, one must be from the School of Engineering, act as the student’s primary adviser. The proposal must be accompanied by a statement from that person giving an appraisal of the academic value and viability of the proposed major.

Students proposing IDMENs must have at least four quarters of undergraduate work remaining at Stanford after the quarter in which their proposals are first submitted. Any changes in a previously approved major must be endorsed by the advisers and re-approved by the IDMEN subcommittee. A request by a student to make changes in his or her approved curriculum must be made sufficiently far in advance so that, should the request be denied, adequate time remains to complete the original, approved curriculum.

Proposals are reviewed and acted upon once a quarter. Forms may be obtained from the Handbook for Undergraduate Engineering Programs at http://ughb.stanford.edu. Completed proposals should be submitted to Darlene Lazar in the Office of Student Affairs, Terman 201. An IDMEN cannot be a student’s secondary major.

**DEPARTMENTAL MAJORS IN THE SCHOOL OF ENGINEERING**

Curricula for majors offered by the departments of Chemical Engineering, Civil and Environmental Engineering, Computer Science, Electrical Engineering, Management Science and Engineering, Materials Science and Engineering, and Mechanical Engineering have the following components: 36-45 units of mathematics and science (see Basic Requirements 1 and 2 at the end of this section); engineering fundamentals (three course minimum, at least one of which must be unspecified by the department, see Basic Requirement 3); Technology in Society (TIS) (one course minimum, see Basic Requirement 4); engineering depth (courses such that the total number of units for Engineering Fundamentals and Engineering Depth is between 60 and 72). ABET accredited majors must meet a minimum number of Engineering Science and Engineering Design units; (see Basic Requirement 5). Curricular requirements for departmental majors are being revised at the time of publication. Consult the 2009-10 Handbook for Undergraduate Engineering Programs at http://ughb.stanford.edu for the most up-to-date listing of curricular requirements.

**Experimentation**—Departmental major programs, other than Computer Science and Management Science and Engineering, must include 8 units of experimentation. Lab courses taken in the sciences, as well as experimental work taken in courses within the School of Engineering, can be used in fulfillment of this requirement.
ment. By careful planning, the experimentation requirement should not necessitate additional course work beyond that required to meet the other components of an engineering major. A list of courses and their experimentation content (in units) can be found online at http://ughb.stanford.edu in the Handbook for Undergraduate Engineering Programs.

**CHEMICAL ENGINEERING (CHE)**

Mathematics:
- MATH 41, 42. Calculus
- CME 100. Vector Calculus for Engineers
  *or* MATH 51 and 52. Calculus
- CME 102. Ordinary Differential Equations for Engineers
  *or* MATH 53. Ordinary Differential Equations
- CME 104. Linear Algebra and Partial Differential Equations for Engineers
  *or* CME 106. Intro to Probability and Statistics for Engineers

Science:
- CHEM 31X. Chemical Principles
  *or* CHEM 31A,B. Chemical Principles II,II
- CHEM 33. Structure and Reactivity
- CHEM 35. Organic Monofunctional Compounds
- CHEM 36. Chemical Separations

Physics:
- PHYSICS 41. Mechanics
- PHYSICS 43. Electricity and Magnetism

Technology in Society (one course required; see Basic Requirement 4)
- ENGR 20/CHEMENG 20. Introduction to Chemical Engineering
- ENGR 25/CHEMENG 25. Biotechnology

Fundamentals Elective (3-5 units)
- Chemical Engineering Depth (minimum 68 Engineering Science and Design units; see Basic Requirement 5):
  - CHEMENG 100. The Chemical Engineering Profession
  - CHEMENG 101. Chemical Process Modeling, Dynamics, and Control
  - CHEMENG 110. Equilibrium Thermodynamics
  - CHEMENG 120A. Fluid Mechanics
  - CHEMENG 120B. Energy and Mass Transport
  - CHEMENG 130. Separation Process
  - CHEMENG 150. Biochemical Engineering
  - CHEMENG 170. Kinetics and Reactor Design
  - CHEMENG 180. Chemical Engineering Plant Design
  - CHEMENG 185A. Chemical Engineering Laboratory A (WIM)
  - CHEMENG 185B. Chemical Engineering Laboratory B
  - CHEMENG 181. Biochemistry I
  - CHEM 130. Qualitative Organic Analysis
  - CHEM 131. Organic Monofunctional Compounds
  - CHEM 171. Physical Chemistry: Chemical Thermodynamics
  - CHEM 173. Physical Chemistry: Quantum Chemistry
  - CHEM 175. Physical Chemistry

Two courses required*:
- CHEMENG 140. Micro and Nanoscale Fabrication
- CHEMENG 160. Polymer Science and Engineering
- CHEMENG 174. Environmental Microbiology
- CHEMENG 183. Biochemistry II

*Any two acceptable except combining 174 and 183

Unit count is higher if program includes one or more of the following: MATH 20 series, MATH 50 series (in lieu of the CME math courses), or CHEM 31A,B (in lieu of CHEM 31X). The above requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs. Handbooks are available at http://ughb.stanford.edu or from the department or school.

**CIVIL ENGINEERING (CE)**

Mathematics and Science (45 units minimum; see Basic Requirements 1 and 2):
- Technology in Society (one course; see Basic Requirement 4) 3-5

Engineering Fundamentals (three courses minimum; see Basic Requirement 3):
- ENGR 60. Engineering Economy
  - Fundamentals Elective

Engineering Depth (minimum of 68 Engineering Science and Design units; see Basic Requirement 5):
- CEE 70. Environmental Science and Technology
- CEE 100. Managing Sustainable Building Projects (WIM)
- CEE 101A. Mechanics of Materials
- CEE 101B. Mechanics of Fluids
- CEE 101C. Geotechnical Engineering
  - Specially courses in either Environmental and Water Studies or Structures and Construction
  - Environmental and Water Studies
    - or Structures and Construction
    - Other School of Engineering Electives

**COMPUTER SCIENCE (CS)**

Mathematics (26 units minimum):
- CS 103. Mathematical Foundations of Computing
- CS 109. Introduction to Probability for Computer Scientists
- MATH 41, 42. Calculus
- Plus two electives

Science (11 unit minimum):
- PHYSICS 41. Mechanics
- PHYSICS 43. Electricity and Magnetism
- Science Elective

Technology in Society (one course; see Basic Requirement 4)
- ENGR 20, CHEMENG 20. Introduction to Chemical Engineering
- ENGR 25, CHEMENG 25. Biotechnology

Fundamentals Elective (may not be 70A, B, or X)
- Writing in the Major (one course):
  - CS 181, 191W, 194, 210B, 294W

Computer Science Core (15 units): 3-5
- CS 107. Computer Organization and Systems
- CS 110. Principles of Computer Systems
- CS 161. Data Structures and Algorithms
- Computer Science Depth (choose one of the following tracks; 25 units minimum):
  - Artificial Intelligence Track—
    - CS 221. Artificial Intelligence: Principles and Techniques
    - Choose two of: CS 223A, 223B, 224M, 224N, 226, 227, 228, 229
    - One additional course from the list above or the following:
    - Track Electives: at least three additional courses from the lists above, the general CS electives list*, or the following:
      - CS 273, 278, EE 364A, 364B, ECON 286; MS&E 222, 352, 355; PHIL 152; PSYCH 202, 204A, 204B; STATS 200, 202, 205
  - Biocomputation Track—the Mathematics, Science, and Engineering Fundamentals requirements are non-standard for this track. See Handbook for Undergraduate Engineering Programs for details.
    - One of: CS 121, 221, 223B, 228, 229
    - One of: CS 262, 270, 273A, 274, 275, 278, 279

*Any two acceptable except combining 174 and 183

Unit count is higher if program includes one or more of the following: MATH 20 series, MATH 50 series (in lieu of the CME math courses), or CHEM 31A,B (in lieu of CHEM 31X). The above requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs. Handbooks are available at http://ughb.stanford.edu or from the department or school.
One additional course from the lists above or the following:
CS 124, 145, 147, 148 or 248
One course from either the general CS electives list or the list of Biomedical Computation (BMC) Informatics electives (see http://bmc.stanford.edu and select Information from the elective options)
One course from the BMC Informatics elective list
One course from either the BMC Informatics, Cellular/Molecular, or Organs/Organisms electives lists
One course from either the BMC Cellular/Molecular or Organs/Organisms electives lists

Graphics Track—
CS 248

One of:
CS 205A; CME 104, 108; MATH 52, 113
Two of:
CS 164, 178, 205B, 223B, 268, 348A, 348B, 448
Track Electives: at least three additional courses from the lists above, the general CS electives list, or the following:
ARTSTUDI 60, 70, 179; CS 48N, 326A; CME 302, 306, 324; EE 262, 264, 278, 368; ME 101; PSYCH 30, 221; STS 144

Human-Computer Interaction Track—
CS 147, 248
One of:
CS 148, 376, 377, 378
One of:
CS 108, 124, 140, 142, 221, 229, 249A
One of:
PSYCH 55, 252; MS&E 184; ME 101
Track Electives: at least two additional courses from the lists above, the general CS electives list, or the following:
ARTSTUDI 60, COMM 269; CME 340; CS 477 (with consent of undergraduate adviser), 448B (with consent of undergraduate adviser), LINGUIST 180; ME 115, 216A; PSYCH 205, 221

Information Track—
CS 124, 145
Two courses, from different areas:
Information-based AI applications: CS 224N, 224S, 229
Database and Information Systems: CS 140, 240D, 245, 345, 346, 347
Information Systems in Biology: CS 262, 270, 274
Information Systems on the Web: CS 276, 346B
At least three additional courses from the above areas or the general CS electives list

Systems Track—
CS 140
One of:
CS 143 or EE 108B
Two additional courses from the list above or the following:
CS 144, 145, 155, 240, 240C, 240D, 242, 243, 244, 245; EE 271, 282
Track Electives: at least three additional courses selected from the list above, the general CS electives list, or the following:

Theory Track—
CS 154
One of:
CS 164, 255, 258, 261, 260, 361A, 361B, 365
Two additional courses from the list above or the following:
CS 143, 155, 156, 157 or PHIL 151, 205A, 228, 242, 256, 259, 262, 354, 355, 357, 358, 359 (with consent of undergraduate adviser), 364A, 364B, 369 (with consent of undergraduate adviser), 374; MS&E 310
Track Electives: at least three additional courses from the list above, the general CS electives list, or the following:
CME 302, 305; PHIL 152

Unspecialized Track—
CS 154
One of:
CS 140, 143
One of:
CS 145, 148 or 248, 262
At least two courses from the general CS electives list

Individually Designed Track—
Students may propose an individually designed track. Proposals should include a minimum of seven courses, at least four of which must be CS courses numbered 100 or above. See

Handbook for Undergraduate Engineering Programs for further information.

Capstone Project (3 units minimum)
CS 191, 191W, 194, 210B, 294, 294W

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1. Students who have taken either CS 103X or CS 103AB are considered to have satisfied the CS103 requirement. Students who took CS103X are required to complete one additional unit in their track or elective courses (i.e., 26 total units for track and elective courses).
2. Students who completed STAT S116, MS&E 120, or CME 106 in Winter Quarter 2008-09 or earlier may count that course as satisfying the CS 109 requirement. These same courses taken in Spring Quarter 2008-09 or later cannot be used to satisfy the CS 109 requirement.
3. MATH 19, 20, and 21 may be taken instead of MATH 41 and 42 as long as at least 26 MATH units are taken.
4. The math electives list consists of:
MATH 51, 103, 104, 108, 109, 110, 113; CS 156, 157, 205A; PHIL 151; CME 100, 102, 104. Completion of MATH 52 and 53 counts as one math elective. Restrictions: MATH 51 and 103, or MATH 103 and 113, or CS 157 and PHIL 151, may not be used in combination to satisfy the math electives requirement. Students who have taken both MATH 51 and 52 may not count MATH 100 as an elective. Courses counted as math electives cannot also count as CS electives, and vice versa.
5. The science elective may be any course of 3 or more units from the School of Engineering lists plus PSYCH 30 or 55; AP Chemistry and Physics also may be used to meet this requirement. Either of the PHYSICS sequences 61/63 or 21/23 may be substituted for 41/43 as long as at least 11 science units are taken.
6. The name of CS 107 has changed. The previous CS 107 course entitled Programming Paradigms also fulfills this requirement.
7. Students who completed CS 108 and either CS 140 or CS 143 by Winter Quarter 2008-09 or earlier, may choose to count CS 108 as satisfying the CS 110 requirement. In such a case, CS 108 may not also be counted as an elective and the student is required to complete one additional unit in their track or elective courses (i.e., 26 total units for track and elective courses).
8. Students who took CS 161 for 4 units are required to complete one additional unit in their track or elective courses (i.e., 26 total units for track and elective courses).
9. Students must satisfy the requirements for any one track. Track requirements plus electives should include a minimum of seven courses and total at least 25 units.
11. CS 205A is recommended in this list for the Graphics track. Students taking CME 104 are also required to take its prerequisite, CME 102.

12. Independent study projects (CS 191 or 191W) require faculty sponsorship and must be approved by the adviser, faculty sponsor, and the CS senior project advisor (R. Plummer or P. Young). A signed approval form, along with a brief description of the proposed project, should be filled out the quarter before work on the project is begun. Further details can be found in the Handbook for Undergraduate Engineering Programs.

ELECTRICAL ENGINEERING (EE)

Mathematics:
MATH 41, 42
MATH 51 and 52, or CME 100/ENGR 154 and CME 104/ENGR 155B
MATH 53 or CME 102/ENGR 155A
EE 178, STAT S116, MATH 151, or CME 106/ENGR 155C

Science:
PHYSICS (41, 43) or (61, 63)
Math or Science electives:
Technology in Society (one course; see Basic Requirement 4)
Technical Writing: ENGR 102E (WIM corequisite for EE 108A)
EE 100. The Electrical Engineering Profession

Engineering Fundamentals: (three courses minimum; see Basic Requirement 3)
CS 106B or CS 106X
At least two additional courses, at least one of which is not in EE or CS
Engineering Depth (minimum 68 Engineering Science and Design units; see Basic Requirement 5):
Circuits: EE 101A, B
Signals Processing and Linear Systems: EE 102A, B
Digital Systems: EE 108A (Laboratory, WIM), 108B
Physics of Electrical Engineering: EE 41 or EE 141
Specialty courses
One course in Design
Electrical Engineering electives

STANFORD BULLETIN, 2009-10 | 97
These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 A minimum of 12 science units must be taken. A minimum of 45 math and science units combined must be taken.

2 Three courses from one of the specialty areas shown below (consultation with an adviser in the selection of these courses is especially important):

- Computer Hardware: EE 109, 271, 273, 282; CS 107
- Computer Software: CS 107, 108, 140, 143, 145, 148, 194, (CS 144 or EE 284)
- Controls: ENGR 105, 205, 206, 207A, 207B, 209A, 209B; EE 263
- Circuits and Devices: EE 114, 116, 122, 133, 212, 214, 216, 271

- Fields and Waves: EE 134, 141, 144, 242, 246, 247, 252, 256
- Communications and Signal Processing: EE 124, 133, 168, 179, 261 263, (264 or 265), 276, 278, 279

3 The design course may be part of the specialty sequence. The following courses satisfy this requirement: EE 109, 133, 144, 168, 256, 262, 265; CS 194, ENGR 206.

4 May include up to two additional Engineering Fundamentals. May include up to 10 units of EE 191. May include any CS 193 course.

**ENVIRONMENTAL ENGINEERING (ENV)**

Mathematics and Science (see Basic Requirement 1 and 2) 45 units

Techology in Society (one course; see Basic Requirement 4) 3-5

Engineering Fundamentals (three courses minimum; see Basic Requirement 3):

- ENGR 30: Engineering Thermodynamics
- ENGR 60: Engineering Economy
- Fundamentals Elective

Engineering Depth (minimum of 68 Engineering Science and Design units; see Basic Requirement 5):

- CEE 64: Air Pollution: From Urban Smog to Global Change
- CEE 70: Environmental Science and Technology
- CEE 100: Managing Sustainable Building Projects (WIM)
- CEE 101B: Mechanics of Fluids
- CEE 101D: Computations in CEE
- CEE 160: Mechanics of Fluids Laboratory
- CEE 161A: Rivers, Streams, and Canals
- CEE 166A: Watersheds and Wetlands
- CEE 166B: Floods and Droughts, Dams, and Aqueducts
- CEE 171: Environmental Planning Methods
- CEE 172: Air Quality Management
- CEE 177: Aquatic Chemistry and Biology
- CEE 179A: Water Chemistry Laboratory
- CEE 190: Capstone design experience: CEE 169, 171B, or 179C
- CEE Breadth Electives

Other School of Engineering Electives 0-4

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 Math must include CME 102 (or Math 53) and a Statistics course. Science must include PHYSICS 41; one of ENGR 31, CHEM 31A or CHEM 31X; CHEM 33; GES 1; and one other physics or chemistry class for at least 3 units.

2 Should choose a class that specifically includes an ethics component, such as STS 101, 110 or 115; COMM 169; CS 181; or MS&E 181.

**MANAGEMENT SCIENCE AND ENGINEERING (MS&E)**

Mathematics (32 units minimum; see Basic Requirement 1):

- MATH 41: Calculus
- MATH 42: Calculus
- MATH 51: Linear Algebra and Differential Calculus of Several Variables
- MATH 53: Ordinary Differential Equations with Linear Algebra
- MATH 120: Probabilistic Analysis
- MATH 121: Introduction to Stochastic Modeling
- STATS 110 or 200: Statistical Methods/Inference

Science (11 units minimum; see Basic Requirement 2):

- One of the following three sequences:
  - CHEM 31B or X, and 33
  - PHYSICS 21, 22, 23, and 24
  - PHYSICS 41 and 43
  - Science Elective

Technology in Society (one course; see Basic Requirement 4) 3-5

Engineering Fundamentals (three courses minimum; see Basic Require-

- CS 106A: Programming Methodology
- ENGR 25: Biotechnology
- or ENGR 40: Introduction to Electronics
- or ENGR 80: Introduction to Bioengineering
- Fundamentals Elective

Engineering Depth (core):

- CS 106B or CS 106X: Programming Abstractions
- or CS 103: Math Foundations of Computing
- or CME 108: Intro to Scientific Computing
- or ENGR 60: Engineering Economy
- or MS&E 108: Senior Project
- or MS&E 111: Introduction to Optimization
- or MS&E 130 or 134: Information
- or MS&E 142 or 260: Investment Science or Production
- or MS&E 180: Organizations: Theory and Management

Engineering Depth (concentration: choose one of the following five concentrations): 24-30

- Financial and Decision Engineering Concentration:
  - ECON 50: Economic Analysis I
  - ECON 51: Economic Analysis II
  - MS&E 140: Industrial Accounting
  - MS&E 152: Introduction to Decision Analysis (WIM)
  - MS&E 245G or 247S: Finance

- Two of the following courses:
  - ENGR 145: Technology Entrepreneurship
  - FINANCE 323: International Financial Management
  - MS&E 107: Interactive Management Science
  - MS&E 223: Simulation
  - MS&E 250A: Engineering Risk Analysis
  - MS&E 260: Production/Operating Systems

- Operations Research Concentration:
  - MATH 113: Linear Algebra and Matrix Theory
  - MATH 115: Functions of a Real Variable
  - MS&E 112: Network and Integer Optimization
  - MS&E 142 or 260: Investment Science or Production
  - MS&E 152: Introduction to Decision Analysis (WIM)
  - MS&E 241: Economic Analysis
  - MS&E 251: Stochastic Decision Models
  - STATS 202: Data Analysis

- Organization, Technology, and Entrepreneurship Concentration:
  - At least one of the following courses:
    - ECON 50: Economic Analysis I
    - PSYCH 70: Introduction to Social Psychology
    - SOC 114: Economic Sociology
  - At least two of the following courses:
    - ENGR 145: Technology Entrepreneurship
    - MS&E 175: Innovation, Creativity, and Change
    - MS&E 181: Issues in Technology and Work
  - At least four of the following courses (may also include omitted courses from above: ENGR 145, MS&E 175, or MS&E 181):
    - Organizations and Technology:
      - CS 147: Intro Human Computer Interaction
      - MS&E 134: Organizations and Info Systems
      - MS&E 184: Technology and Work
      - MS&E 185: Global Work
      - MS&E 189: Social Networks
      - MS&E 269: Quality Control and Management
      - Entrepreneurship and Innovation:
      - MS&E 140: Industrial Accounting
      - MS&E 179: Entrepreneurship and Strategy
      - MS&E 266: Management of New Product Development
    - Policy and Strategy Concentration:
      - ECON 50: Economic Analysis I
      - ECON 51: Economic Analysis II
      - MS&E 190: Policy and Strategy Analysis
  - At least four of the following courses, including at least one course in policy and at least one course in strategy:
    - Policy:
      - MS&E 193: Technology and National Security
      - MS&E 197: Ethics and Public Policy (WIM)
      - MS&E 243: Energy and Environmental Policy Analysis

98 | STANFORD BULLETIN, 2009-10
These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 Math and Science must total a minimum of 45 units. Electives must come from the School of Engineering approved list, or PHYSICS 21, 22, 23, 24, 25, 26; PSYCH 55, 70. AP credit for Chemistry, Mathematics, and Physics may be used.

2 Technology in Society course must be one of the following MS&E approved courses: COMM 120, 169, CS 201, MS&E 181, 193 (WIM), STS 101/ENGR 130, STS 110/MS&E 197 (WIM), STS 115/ENGR 131, STS 160, 163, 170, 279.

3 Students may petition to place out of CS 106A.

4 Students may not count ENGR 60 or 62 for engineering fundamentals as those courses count toward engineering depth (core) and cannot be double counted.

5 Students may not count 134 for both core and the Organization, Technology, and Entrepreneurship concentration.

6 Students may not count 142 or 260 for both core and concentration. Students doing the Financial and Decision Engineering concentration must take both 142 and 260, and students doing the Production and Operations Management concentration must take 260.

7 Engineering fundamentals, engineering depth (core), and engineering depth (concentration) must total a minimum of 60 units.

8 Courses used to satisfy the Math, Science, Technology in Society, or Engineering Fundamental requirement may not also be used to satisfy an engineering depth requirement.

**MATERIALS SCIENCE AND ENGINEERING (MATSCI)**

Mathematics (20 units minimum; see Basic Requirement 1):

- **MATH 51** and **52, or CME 100/ENGR 155A and CME 104/ENGR 155B**

Science (20 units minimum; see Basic Requirement 2):

- **MATH 53** or **CME 102/ENGR 155A**

- **Science Fundamentals requirement.**

- **Physics** (required)

- **Chemistry** (required)

- **Statistics** requirement.

Engineering Fundamentals (three courses minimum; see Basic Requirement 3):

- **ENGR 50. Intro to Materials Science, Nanotechnology**

- **or ENGR 50M. Intro to Materials Science, Biomaterials**

- At least two additional courses

- **Materials Science and Engineering Depth:**

- **Materials Science Fundamentals**

- **MATSCI 153. Nanostructure and Characterization**

- **MATSCI 154. Solid State Thermodynamics**

- **MATSCI 155. Nanomaterials Synthesis**

- **MATSCI 157. Quantum Mechanics of Nanoscale Materials**

- And two additional courses

- **Engineering Depth:** Choose four of the following lab courses:

- **MATSCI 160. Nanomaterials Laboratory**

- **MATSCI 161. Nanocharacterization Laboratory (WIM)**

- **MATSCI 162. X-Ray Diffraction Laboratory**

- **MATSCI 163. Mechanical Behavior Laboratory**

- **MATSCI 164. Electronic & Photonic Materials & Devices Lab (WIM)**

Focus Area Options

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 If both ENGR 50 and ENGR 50M are taken, one may be used for the Materials Science Fundamentals requirement.

2 Materials Science Fundamentals; 24 units (6 courses): MATSCI 153, 154, 155, and 157 are required, and choose 2 courses from ENGR 50 or 50M (alternatively, MATSCI 70N, MATSCI 151, 152, 156, 190, 192, 193, 194, 195, 196, 197, 198, 199. The MATSCI 150 series is designed specifically for undergraduates, while the 190 series represents more advanced courses.

3 Focus Area Options: 10 units from one of the following areas:

- Bioengineering: BIOR 220, 222A, 222B, 281, 284A, 284B; MATSCI 380, 381; ME 80

- Chemical Engineering: CHEM 171; CHEMENG 130, 140, 150, 160

- Chemistry: CHEM 151, 173, 171, 175

- Energy Technology: EE 293A, 293B; MATSCI 302, ME 260

- Mechanical Behavior and Design: AA 240A, 240B, 256; MATSCI 198, 353, 358; ME 80 or CEE 101A, ME 203, 294

- Physics: PHYSICS 70, 110, 120, 121, 130, 131, 134, 170, 171, 172.

Self-Defined Option: petition for a self-defined cohesive program, minimum of 10 units.

**MECHANICAL ENGINEERING (ME)**

Mathematics (24 units minimum; see Basic Requirement 1) must include: CME 102/ENGR 155A. Ordinary Differential Equations for Engineers or MATH 53. Ordinary Differential Equations with Linear Algebra and CME 106/ENGR 155C. Introduction to Probability and Statistics for Engineers or STATS 110. Statistical Methods in Engineering or STATS 116. Theory of Probability Science (21 units minimum; see Basic Requirement 2): CHEM 31X or ENGR 31 (recommended) Technology in Society (one course from approved ME list; see Basic Requirement 4)

Engineering Fundamentals: (three courses minimum; see Basic Requirement 3)

- ENGR 40. Introductory Electronics (required)

- ENGR 70A (same as CS 106A). Programming Methodology (required)

Fundamentals Elective

Engineering Depth (minimum of 68 Engineering Science and Design ABET units; see Basic Requirement 5):

- ENGR 15. Dynamics

- ENGR 30. Engineering Thermodynamics

- ENGR 102M. Technical Writing (WIM corequisite for ME 203)

- ME 70. Introductory Fluids Engineering

- ME 80. Strength of Materials

- ME 101. Visual Thinking

- ME 103D. Engineering Drawing

- ME 112. Mechanical Engineering Design

- ME 113. Mechanical Engineering Design

- ME 131A. Heat Transfer

- ME 131B. Fluid Mechanics

- ME 140. Advanced Thermal Systems

- ME 161. Dynamic Systems

- ME 203. Manufacturing and Design (WIM; must be taken concurrently with ENGR 102M)

Options to complete the ME depth sequence: Any two courses from those described in the ME Graduate Student Handbook as MS depth or breadth may be taken to complete the undergraduate major.

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 Math and science must total 45 units. Math; 24 units required and must include a course in differential equations (CME 102/ENGR 155A or MATH 53) and Statistics (CME 106/ENGR 155C or STATS 110 or 116—STATS 60/160 do not fulfill statistics requirement.). Science: 21 units minimum and requires courses in Physics or Chemistry, with at least a full year in one or the other. CHEM 31A/B is considered one course. CHEM 31X or ENGR 31 are recommended.

2 ME majors must choose their TIS course from the following list: ME 190 (recommended; offered every other year), STS 101, 110, or CS 201.

3 ME Fundamental elective may not be a course counted for other requirements.
MINOR IN THE SCHOOL OF ENGINEERING

An undergraduate minor in some Engineering programs may be pursued by interested students; see the Handbook for Undergraduate Engineering Programs, or consult with a department's undergraduate program representative or the Office of Student Affairs, Terman Engineering Center, room 201. General requirements and policies for a minor in the School of Engineering are: (1) a set of courses totaling not less than 20 and not more than 36 units, with a minimum of six courses of at least 3 units each; (2) the set of courses should be sufficiently coherent as to present a body of knowledge within a discipline or subdiscipline; (3) prerequisite mathematics, statistics, or science courses, such as those normally used to satisfy the school’s requirements for a department major, may not be used to satisfy the requirements of the minor; conversely, engineering courses that serve as prerequisites for subsequent courses must be included in the unit total of the minor program; (4) departmentally based minor programs are structured at the discretion of the sponsoring department, subject only to requirements 1, 2, and 3 above. Interdisciplinary minor programs may be submitted to the Undergraduate Council for approval and sponsorship. A general Engineering minor is not offered.

AERONAUTICS AND ASTRONAUTICS (AA)

The Aero/Astro minor introduces undergraduates to the key elements of modern aerospace systems. Within the minor, students may focus on aircraft, spacecraft, or disciplines relevant to both. The course requirements for the minor are described in detail below. Courses cannot be double-counted within a major and a minor, or within multiple minors; if necessary, the Aero/Astro adviser can help select substitute courses to fulfill the AA minor core.

The following core courses fulfill the minor requirements:

- AA 100. Introduction to Aeronautics and Astronautics 3
- ENGR 14. Statics 3
- ENGR 15. Dynamics 3
- ENGR 30. Thermodynamics 3
- ME 70. Introductory Fluids 4
- ME 131A. Heat Transfer 4
- Two courses from one of the upper-division elective areas below (min. 6 units)

plus one course from a second area below (min. 3 units):

- Aerospace Systems Synthesis/Design: AA 236A,B. Spacecraft Design 8
- ENGR 241A,B. Aircraft Design 6
- Dynamics and Controls: AA 242A. Classical Dynamics 3
- AA 271A. Dynamics and Control of Spacecraft/Aircraft 3
- AA 279. Space Mechanics 3
- ENGR 105. Feedback Control Design 3
- ENGR 205. Introduction to Control Design Techniques 3

Fluids:
- AA 200. Applied Aerodynamics 3
- AA 210A. Fundamentals of Compressible Flow 3
- AA 214A. Numerical Methods in Fluid Mechanics 3
- or AA 283. Aircraft Propulsion 3

Structures:
- AA 240A. Analysis of Structures 3
- AA 240B. Analysis of Structure II 3
- AA 256. Mechanics of Composites 3

1 ENGR 14, 15, or 30 are waived as minor requirements if already taken as part of the major.

CHEMICAL ENGINEERING (CHE)

The following core courses fulfill the minor requirements:

- ENGR 20/CHEMENG 20. Introduction to Chemical Engineering 3
- CHEMENG 100. Chemical Process Modeling, Dynamics, and Control 3
- CHEMENG 110. Equilibrium Thermodynamics 3
- CHEMENG 120A. Fluid Mechanics 3
- CHEMENG 120B. Energy and Mass Transport 3
- CHEMENG 140. Micro and Nanoscale Fabrication 3
- or CHEMENG 160. Polymer Science and Engineering 3
- or CHEMENG 181. Biochemistry 3
- CHEMENG 170. Kinetics and Reactor Design 3
- CHEMENG 180. Chemical Engineering Plant Design 3
- CHEMENG 185A. Chemical Engineering Lab A 4
- CHEM 171. Physical Chemistry 3

CIVIL ENGINEERING (CE)

The Civil Engineering minor is intended to give students an in-depth introduction to one or more areas of civil engineering. Departmental expertise and undergraduate course offerings are available in the areas of Construction Engineering and Management, Structural Engineering, and Architectural Design. The minimum prerequisite for a Civil Engineering minor focusing on construction engineering and management or structural engineering is MATH 42 (or 21); however, many courses of interest require PHYSICS 41 and/or MATH 51 as prerequisites. The minimum prerequisite for a Civil Engineering minor focusing on architectural design is MATH 41 (or 19) and a course in Statistics. Students should recognize that a minor in Civil Engineering is not an ABET-accredited degree program.

Since civil engineering is a broad field and undergraduates with varying backgrounds may be interested in obtaining a civil engineering minor, no single set of course requirements is appropriate for all students. Instead, interested students are encouraged to propose their own set of courses within the guidelines listed below; this list must be officially approved by the Civil Engineering (CE) undergraduate minor adviser. Additional information on preparing a minor program, including example programs focusing on each of the areas of expertise listed above, is available at http://cee.stanford.edu/prospective/ug/minorCE.html. While each example program focuses on a different area of expertise within the department, other combinations of courses are also possible. General guidelines are:

1. A Civil Engineering minor must contain at least 24 units of course work not taken for the major, and must consist of at least six classes of at least 3 units each.
2. The list of courses must represent a coherent body of knowledge in a focused area, and should include classes that build upon one another.

Professor Anne Kiremidjian (kiremidjian@stanford.edu) is the CE undergraduate minor adviser in Structural Engineering and Construction Engineering and Management. John Barton (jibarton@stanford.edu), Program Director for Architectural Design, is the undergraduate minor adviser in Architectural Design. Students must consult one of these advisers in developing their minor program, and obtain approval of the finalized study list from them.

COMPUTER SCIENCE (CS)

The following core courses fulfill the minor requirements. Pre-requisites include the standard mathematics sequence through MATH 51.

- Introductory Programming (AP Credit may be used to fulfill this requirement):
  - CS 101A. Programming Methodology 3
  - or CS 106A. Programming Methodology and CS 106B (or X). Programming Abstractions (Accelerated) 5

Core:
- CS 109. Introduction to Probability for Computer Scientists 5

Electives (choose two courses from different areas):

- Artificial Intelligence—
  - CS 121. Introduction to Artificial Intelligence 3
  - CS 221. AI: Principles and Techniques 4

- Human-Computer Interaction—
  - CS 147. Introduction to Human-Computer Interaction Design Software—
    - CS 108. Object-Oriented Systems Design 4
    - CS 110. Principles of Computer Systems 5

- Systems—
  - CS 140. Operating Systems 4
  - CS 143. Compilers 4
  - CS 144. Networking 4
  - CS 145. Databases 4
ELECTRICAL ENGINEERING (EE)

Courses from any of the following three options, along with four graded EE courses of level 100 or higher (13-21 units), fulfill the minor requirements:

Option I:
- ENGR 40. Introductory Electronics 5
- EE 101A. Circuits I 4
- EE 101B. Circuits II 4
- Four graded EE courses numbered 100 or higher

Option II:
- ENGR 40. Introductory Electronics 5
- EE 102A. Signal Processing and Linear Systems I 4
- EE 102B. Signal Processing and Linear Systems II 4
- Four graded EE courses numbered 100 or higher

Option III:
- ENGR 40. Introductory Electronics 5
- EE 108A. Digital Systems I 4
- EE 108B. Digital Systems II 4
- Four graded EE courses numbered 100 or higher

ENVIRONMENTAL ENGINEERING (ENV)

The Environmental Engineering minor is intended to give students a broad introduction to one or more areas of Environmental Engineering. Departmental expertise and undergraduate course offerings are available in the areas of environmental engineering and science, environmental fluid mechanics and hydrology, and atmosphere/energy. The minimum prerequisite for an Environmental Engineering minor is MATH 42 (or 21); however, many courses of interest require PHYSICS 41 and/or MATH 51 as prerequisites. Students should recognize that a minor in Environmental Engineering is not an ABET-accredited degree program.

Since undergraduates having widely varying backgrounds may be interested in obtaining an environmental engineering minor, no single set of course requirements is appropriate for all students. Instead, interested students are encouraged to propose their own set of courses within the guidelines listed below; this list must be officially approved by the Civil and Environmental Engineering (CEE) undergraduate minor adviser. Additional information on preparing a minor program, including example programs focusing on each of the areas of expertise listed above, is available at http://cee.stanford.edu/prospective/ug/minorEnvE.html. While each example program focuses on a different area of expertise within the department, other combinations of courses are also possible.

General guidelines are:
- An Environmental Engineering minor must contain at least 24 units of course work not taken for the major, and must consist of at least six classes of at least 3 units each.
- The list of courses must represent a coherent body of knowledge in a focused area, and should include classes that build upon one another.

Professor Lynn Hildemann (hildemann@stanford.edu) is the CEE undergraduate minor adviser in Environmental Engineering. Students must consult with Professor Hildemann in developing their minor program, and obtain approval of the finalized study list from her.

MANAGEMENT SCIENCE AND ENGINEERING (MS&E)

The following courses fulfill the minor requirements:

Background requirement:
- MATH 51. Calculus

Minor requirements:
- ENGR 60. Engineering Economy (prerequisite: MATH 41) 3
- MS&E 111. Introduction to Optimization 4
- MS&E 120. Probabilistic Analysis (prerequisite: MATH 51) 5
- MS&E 121. Introduction to Stochastic Modeling 4
- MS&E 130 or 134. Information 3-4
- MS&E 142 or 260. Investment Science or Production 3-4
- MS&E 180. Organizations: Theory and Management 4
- Elective (any 100- or 200-level MS&E course) 3-4

MATERIALS SCIENCE AND ENGINEERING (MATSCI)

A minor in Materials Science and Engineering allows interested students to explore the role of materials in modern technology and to gain an understanding of the fundamental processes that govern materials behavior.

The following courses fulfill the minor requirements:

- Engineering Fundamentals (choose one of the following):
  - ENGR 50. Introduction to Materials Science, Nanotechnology Emphasis 4
  - ENGR 50M. Introduction to Materials Science, Biomaterials Emphasis 4
- Materials ScienceFundamentals and Engineering Depth (choose 6 of the following):
  - MATSCI 151. Microstructure and Mechanical Properties 4
  - MATSCI 152. Electronic Materials Engineering 4
  - MATSCI 153. Nanostructure and Characterization 4
  - MATSCI 154. Solid State Thermodynamics 4
  - MATSCI 155. Nanomaterials Synthesis 4
  - MATSCI 156. Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution 4
  - MATSCI 157. Quantum Mechanics of Nanoscale Materials 4
  - MATSCI 160. Nanomaterials Laboratory 4
  - MATSCI 161. Nanocharacterization Laboratory 4
  - MATSCI 162. X-Ray Diffraction Laboratory 4
  - MATSCI 163. Mechanical Behavior Laboratory 4
  - MATSCI 164. Electronic and Photonic Materials and Devices Laboratory 4
  - MATSCI 190. Organic and Biological Materials 4
  - MATSCI 192. Materials Chemistry 4
  - MATSCI 193. Atomic Arrangements in Solids 4
  - MATSCI 194. Thermodynamics and Phase Equilibria 4
  - MATSCI 195. Waves and Diffraction in Solids 4
  - MATSCI 196. Imperfections in Crystalline Solids 4
  - MATSCI 197. Rate Processes in Materials 4
  - MATSCI 198. Mechanical Properties of Materials 4
  - MATSCI 199. Electronic and Optical Properties of Solids 4

MECHANICAL ENGINEERING (ME)

The following courses fulfill the minor requirements:

General Minor—This minor aims to expose students to the breadth of ME in terms of topics and analytic and design activities.
- Prerequisites: MATH 41, 42, and PHYSICS 41.
- ENGR 15. Dynamics 3
- ENGR 30. Thermodynamics 3
- ME 70. Introductory Fluids Engineering 4
- ME 101. Visual Thinking 3
- Plus two of the following:
  - ME 80. Strength of Materials 4
  - ME 131A. Heat Transfer 4
  - ME 161. Dynamic Systems 4
  - ME 203. Manufacturing and Design 4

Thermosciences Minor Prerequisites—MATH 41, 42, 43, and PHYSICS 41.
- ENGR 30. Thermodynamics 3
ME 70. Introductory Fluids Engineering 4
ME 131A. Heat Transfer 4
ME 131B. Fluid Mechanics 4
ME 140. Advanced Thermal Systems 5

_Mechanical Design_—This minor aims to expose students to design activities supported by analysis. Prerequisites: MATH 41, 42, and PHYSICS 41.

ENGR 15. Dynamics 3
ME 80. Strength of Materials 4
ME 101. Visual Thinking 3
ME 112. Mechanical Engineering Design 4
ME 203. Manufacturing and Design 4

Plus one of the following:
ME 113. Engineering Design 4
ME 210. Introduction to Mechatronics 4
ME 220. Introduction to Sensors 4

**BACHELOR OF ARTS AND SCIENCE (B.A.S.) IN THE SCHOOL OF ENGINEERING**

This degree is available to students who complete both the requirements for a B.S. degree in engineering and the requirements for a major or program ordinarily leading to the B.A. degree. For more information, see the “Undergraduate Degrees” section of this bulletin.

**DUAL AND COTERMINAL DEGREE PROGRAMS IN THE SCHOOL OF ENGINEERING**

A Stanford undergraduate may work simultaneously toward two bachelor’s degrees or toward a bachelor’s and a master’s degree, that is, B.A. and M.S., B.A. and M.A., B.S. and M.S., or B.S. and M.A. The degrees may be granted simultaneously or at the conclusion of different quarters. Usually five years are needed for a combined program.

_Dual B.A. and B.S. Degree Program_—To qualify for both degrees, a student must (1) complete the stated University and department requirements for each degree, (2) complete 15 full-time quarters, or 3 full-time quarters after completing 180 units, and (3) complete a total of 225 units (180 units for the first bachelor’s degree plus 45 units for the second bachelor’s degree).

_Coterminal Bachelor’s and Master’s Degree Program_—A Stanford undergraduate may be admitted to graduate study for the purpose of working simultaneously toward a bachelor’s degree and a master’s degree, in the same or different disciplines. To qualify for both degrees, a student must (1) complete, in addition to the 180 units required for the bachelor’s degree, the number of units required by the graduate department for the master’s degree which in no event is fewer than the University minimum of 45 units, (2) complete the requirements for the bachelor’s degree (department, school, and University) and apply for conferral of the degree at the appropriate time, and (3) complete the department and University requirements for the master’s degree and apply for conferral of the degree at the appropriate time. A student may complete the bachelor’s degree before completing the master’s degree, or both degrees may be completed in the same quarter.

Admission to the coterminal program requires admission to graduate status by the pertinent department. Admission criteria vary from department to department.

_Procedure for Applying for Admission to Coterminal Degree Programs_—A Stanford undergraduate may apply to the pertinent graduate department using the University coterminal application form after completing 120 bachelor’s degree units. Application deadlines vary by department, but in all cases the student must apply early enough to allow a departmental decision at least one quarter in advance of the anticipated date of conferral of the bachelor’s degree.

Students should refer to the University Registrar’s Office or its web site for details about when courses begin to count toward the master’s degree requirements and when graduate tuition is assessed; this may affect the decision about when to apply for admission to graduate status.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm/#coterm.

**GRADUATE PROGRAMS IN THE SCHOOL OF ENGINEERING**

**ADMISSION**

Application for admission with graduate standing in the school should be made to the graduate admissions committee in the appropriate department or program. While most graduate students have undergraduate preparation in an engineering curriculum, it is feasible to enter from other programs, including chemistry, geology, mathematics, or physics.

For further information and application instructions, see the department sections in this bulletin or http://gradadmissions.stanford.edu. Stanford undergraduates may also apply as coterminal students; details can be found under “Degree Program Options” in the “Undergraduate Programs in the School of Engineering” section of this bulletin.

_Fellowships and Assistantships_—Departments and divisions of the School of Engineering award graduate fellowships, research assistantships, and teaching assistantships each year.

_Registration_—New graduate students should follow procedures for registration as listed in the University’s quarterly _Time Schedule_. Adviser assignments can be obtained from department offices.

**THE HONORS COOPERATIVE PROGRAM**

Industrial firms, government laboratories, and other organizations may participate in the Honors Cooperative Program (HCP), a program that permits qualified engineers, scientists, and technology professionals admitted to Stanford graduate degree programs to register for Stanford courses and obtain the degree on a part-time basis. In many areas of concentration, the master’s degree can be obtained entirely online.

Through this program, many graduate courses offered by the School of Engineering on campus are made available through the Stanford Center for Professional Development (SCPD). SCPD delivers more than 250 courses a year on television and online. For HCP employees who are not part of a graduate degree program at Stanford, courses and certificates are also available through a non-degree option (NDO) and a non-credit professional education program. Non-credit short courses may be customized to meet a company’s needs. For a full description of educational services provided by SCPD: see http://scpd.stanford.edu; call (650) 725-3000; fax (650) 725-2868; write Durand Building, Room 300, Stanford, CA 94305-4036; or email scpd-registration@stanford.edu.

**CURRICULA IN THE SCHOOL OF ENGINEERING**

For further details about the following programs, see the department sections in this bulletin.

Related aspects of particular areas of graduate study are commonly covered in the offerings of several departments and divisions. Graduate students are encouraged, with the approval of their department advisers, to choose courses in departments other than their own to achieve a broader appreciation of their field of study. For example, most departments in the school offer courses concerned with nanoscience, and a student interested in an aspect of nanotechnology can often gain appreciable benefit from the related courses given by departments other than her or his own.
Departments and programs of the school offer graduate curricula as follows:

Aeronautics and Astronautics
Bioengineering
Chemical Engineering
Civil and Environmental Engineering
Computational and Mathematical Engineering
Computer Science
Electrical Engineering
Engineering Management Science and Engineering
Materials Science and Engineering
Mechanical Engineering

AERONAUTICS AND ASTRONAUTICS
Aeroelasticity
Aircraft Design, Performance, and Control
Applied Aerodynamics
Computational Aero-Acoustics
Computational Fluid Dynamics
Control of Robots, including Space and Deep-Underwater Robots
Conventional and Composite Structures/Materials
Direct and Large Eddy Simulation of Turbulence
High-Lift Aerodynamics
Hybrid Propulsion
Hypersonic and Supersonic Flow
Multidisciplinary Design Optimization
Navigation Systems (especially GPNetworked and Hybrid Control
Optimal Control, Estimation, System Identification
Spacecraft Design and Satellite Engineering
Turbulent Flow and Combustion

BIOENGINEERING
Biomedical Computation
Biomedical Devices
Biomedical Imaging
Cell and Molecular Engineering
Regenerative Medicine

CHEMICAL ENGINEERING
Applied Statistical Mechanics
Biocatalysis
Biochemical Engineering
Bioengineering
Biophysics
Computational Materials Science
Colloid Science
Dynamics of Complex Fluids
Energy Conversion
Functional Genomics
Hydrodynamic Stability
Kinetics and Catalysis
Microrheology
Molecular Assemblies
Nanoscience and Technology
Newtonian and Non-Newtonian Fluid Mechanics
Polymer Physics
Protein Biotechnology
Renewable Fuels
Semiconductor Processing
Soft Materials Science
Solar Utilization
Surface and Interface Science
Transport Mechanics

CIVIL AND ENVIRONMENTAL ENGINEERING
Atmosphere/Energy
Construction Engineering and Management
Design/Construction Integration

Environmental Engineering and Science
Environmental Fluid Mechanics and Hydrology
Environmental and Water Studies
Geomechanics
Structural Engineering
Sustainable Design and Construction

COMPUTATIONAL AND MATHEMATICAL ENGINEERING
Applied and Computational Mathematics
Computational Fluid Dynamics
Computational Geometry and Topology
Discrete Mathematics and Algorithms
Numerical Analysis
Optimization
Partial Differential Equations
Stochastic Processes

COMPUTER SCIENCE
See http://forum.stanford.edu/research/areas.php for a comprehensive list.
Algorithmic Game Theory
Analysis of Algorithms
Artificial Intelligence
Automated Deduction
Autonomous Agents
Biomedical Computation
Compilers
Complexity Theory
Computational Biology
Computational Geometry
Computational Logic
Computational Physics
Computer Architecture
Computer Graphics
Computer Logic
Computer Security
Computer Vision
Cryptography
Database Systems
Design Automation
Digital Libraries
Distributed and Parallel Computation
Electronic Commerce
Formal Verification
Haptic Display of Virtual Environments
Human-Computer Interaction
Image Processing
Knowledge-Based and Expert Systems
Knowledge Representation and Logic
Machine Learning
Mathematical Theory of Computation
Multi-Agent Systems
Natural Language and Speech Processing
Networks, Internet Infrastructure, and Distributed Systems
Operating Systems
Parallel Computing
Programming Systems/Languages
Reasoning Under Uncertainty
Robotics
Robust System Design
Scientific Computing and Numerical Analysis
Sensor Networks
Ubiquitous and Pervasive Computing

ELECTRICAL ENGINEERING
Computer Hardware
Computer Software Systems
Control and Systems Engineering
Communication Systems
Dynamic Systems and Optimization  
Electronic Circuits  
Electronic Devices, Sensors, and Technology  
Fields, Waves, and Radioscience  
Image Systems  
Lasers, Optoelectronics, and Quantum Electronics  
Network Systems  
Signal Processing  
Solid State Materials and Devices  
VLSI Design

- Turbulence

**MASTER OF SCIENCE IN THE SCHOOL OF ENGINEERING**

The M.S. degree is conferred on graduate students in engineering according to the University regulations stated in the “Graduate Degrees” section of this bulletin, and is described in the various department listings. A minimum of 45 units is usually required in M.S. programs in the School of Engineering. The presentation of a thesis is not a school requirement. Further information is found in departmental listings.

**MASTER OF SCIENCE IN ENGINEERING**

The M.S. in Engineering is available to students who wish to follow an interdisciplinary program of study that does not conform to a normal graduate program in a department.

There are three school requirements for the M.S. degree in Engineering: (1) the student’s program must be a coherent one with a well-defined objective and must be approved by a department within the school; (2) the student’s program must include at least 21 unit of courses within the School of Engineering with numbers 200 or above in which the student receives letter grades; and (3) the program must include a total of at least 45 units. Each student’s program is administered by the particular department in which it is lodged and must meet the standard of quality of that department. Transfer into this program is possible from any program within the school by application to the appropriate department.

**ENGINEER IN THE SCHOOL OF ENGINEERING**

The degree of Engineer is intended for students who want additional graduate training beyond that offered in an M.S. program. The program of study must satisfy the student’s department and must include at least 90 units beyond the B.S. degree. The presentation of a thesis is required. The University regulations for the Engineer degree are stated in the “Graduate Degrees” section of this bulletin, and further information is available in the individual departmental sections of this bulletin.

**DOCTOR OF PHILOSOPHY IN THE SCHOOL OF ENGINEERING**

Programs leading to the Ph.D. degree are offered in each of the departments of the school. University regulations for the Ph.D. are given in the “Graduate Degrees” section of this bulletin. Further information is found in departmental listings.

**OVERSEAS STUDIES COURSES IN ENGINEERING**

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AERONAUTICS AND ASTRONAUTICS

Chair: Charbel Farhat
Professors: Brian J. Cantwell, Fu-Kuo Chang, Per Enge, Charbel Farhat, Antony Jameson, Ilan Kroo, Sanjiva Lele, Robert W. MacCormack, Stephen Rock, George S. Springer, Claire Tomlin
Associate Professors: Juan Alonso, Sanjay Lall
Courtesy Professors: C. W. Francis Everitt, J. Christian Gerdes, Ronald K. Hanson, Lambertus Hesselink
Consulting Assistant Professor: Steven Murray

* Recalled to active duty.

Courses offered by the Department of Aeronautics and Astronautics are listed under the subject code AA on the Stanford Bulletin’s ExploreCourses web site.

The Department of Aeronautics and Astronautics prepares students for professional positions in industry, government, and academia by offering a comprehensive program of graduate teaching and research. In this broad program, students have the opportunity to learn and integrate multiple engineering disciplines. The program emphasizes structural, aerodynamic, guidance and control, and propulsion problems of aircraft and spacecraft. Courses in the teaching program lead to the degrees of Master of Science, Engineer, and Doctor of Philosophy. Undergraduates and doctoral students in other departments may also elect a minor in Aeronautics and Astronautics.

Requirements for all degrees include courses on basic topics in Aeronautics and Astronautics, as well as in mathematics, and related fields in engineering and the sciences.

INSTRUCTION AND RESEARCH

AERONAUTICS AND ASTRONAUTICS FACILITIES

The work of the department is centered in the William F. Durand Building for Space Engineering and Science. This 120,000 square foot building houses advanced research and teaching facilities and concentrates in one complex the Department of Aeronautics and Astronautics as well as some of the activities of the Mechanical Engineering Department.

The Durand Building also houses faculty and staff offices and several conference rooms. Attached to the building is a modern classroom building equipped for televising lectures; it contains a lecture auditorium.

Through the department’s close relations with nearby NASA-Ames Research Center, students and faculty have access to one of the best and most extensive collections of experimental aeronautical research facilities in the world, as well as the latest generation of supercomputers.

GENERAL INFORMATION

Further information about the facilities and programs of the department is available at http://aa.stanford.edu, or from the department’s student services office.

The department has a student branch of the American Institute of Aeronautics and Astronautics, which sponsors programs and speakers covering aerospace topics and social events. It also conducts visits to nearby research, government, and industrial facilities, and sponsors a Young Astronauts Program in the local schools.

Admission—To be eligible to apply for admission to the department, a student must have a bachelor’s degree in engineering, physical science, mathematics, or an acceptable equivalent. Stu-
Students who have not yet received a master’s degree in a closely allied discipline will be admitted to the master’s program; eligibility for the Ph.D. program is considered after the master’s year (see “Doctor of Philosophy” below). Applications for admission with financial aid (fellowships or assistantships) or without financial aid must be received and completed by December 4 for the next Autumn Quarter.

Information about admission to the Honors Cooperative Program is included in the “School of Engineering” section of this bulletin. The department may consider HCP applications for Winter or Spring quarters as well as for Autumn Quarter; prospective applicants should contact the department’s student services office.

Further information and application forms for all graduate degree programs may be obtained from Graduate Admissions, the Registrar’s Office, http://gradadmissions.stanford.edu.

**Waivers and Transfer Credits**—Students may receive departmental waivers of required courses for the M.S. degree in Aeronautics and Astronautics by virtue of substantially equivalent and satisfactorily performed course work at other institutions. A waiver petition (signed by the course instructor and adviser) should be submitted to the student services office indicating (1) the Stanford University course number and title, and (2) the institution, number(s), and title(s) of the course(s) wherein substantially equivalent material was treated. If a waiver is granted, the student must take an additional technical elective, chosen in consultation with their adviser, from graduate courses in Aeronautics and Astronautics. The total 45-unit requirement for the master’s degree is not reduced by course waivers.

A similar procedure should be followed for transfer credits. The number of transfer credits allowed for each degree (Engineer and Ph.D.) is delineated in the “Graduate Degrees” section of this bulletin; transfer credit is not accepted for the M.S. degree. Transfer credit is allowed only for courses taken as a graduate student, after receiving a bachelor’s degree, in which equivalence to Stanford courses is established and for which a grade of ‘B’ or better has been awarded. Transfer credits, if approved, reduce the total number of Stanford units required for a degree.

**Fellowships and Assistantships**—Fellowships and course or research assistantships are available to qualified graduate students. Fellowships sponsored by Gift Funds, Stanford University, and Industrial Affiliates of Stanford University in Aeronautics and Astronautics provide grants to several first-year students for the nine-month academic year to cover tuition and living expenses. Stanford Graduate Fellowships, sponsored by the University, provide grants for three full years of study and research; each year, the fellow receives a monthly salary and an 8-10 unit tuition grant per quarter. Research assistants are determined by each hiring department. A standard, 20 hours/week course or research assistantship provides a semi-monthly salary and an 8-10 unit tuition grant per quarter. Research assistants may be given the opportunity of additional summer employment. They may use their work as the basis for a dissertation or Engineer’s thesis.

**BACHELOR OF SCIENCE IN AERONAUTICS AND ASTRONAUTICS**

The Aeronautics and Astronautics Program provides students with a thorough grounding in the fundamental principles and techniques important in the conception, design, and implementation of aerospace systems. Courses in the major include engineering fundamentals, mathematics and the sciences, as well as in-depth courses in aeronautics and astronautics, dynamics, mechanics of materials, fluid dynamics, and heat transfer. Students learn to apply fundamental engineering principles to experiments and aerospace system design problems. The major prepares students for further graduate work in this field, for careers in aircraft and spacecraft engineering, and for work that involves knowledge of fluid dynamics, structures, or controls-related technologies.

Although primarily a graduate-level department, Aeronautics and Astronautics offers both an undergraduate minor and an interdisciplinary program in Aeronautics and Astronautics (AA) leading to the B.S. degree in Engineering. For detailed information, see the “School of Engineering” section of this bulletin and the Handbook for Undergraduate Engineering Programs, available from the Office of the Dean of Engineering or at http://ugsb.stanford.edu.

Undergraduates interested in aerospace are encouraged to combine a minor or a terminal M.S. in Aeronautics and Astronautics with a major in a related discipline (such as Mechanical or Electrical Engineering). Students considering these options are encouraged to contact the department’s student services office.

**GRADUATE PROGRAMS IN AERONAUTICS AND ASTRONAUTICS**

**Admission**—To be eligible to apply for admission to the department, a student must have a bachelor’s degree in engineering, physical science, mathematics, or an acceptable equivalent. Students who have not yet received a master’s degree in a closely allied discipline will be admitted to the master’s program; eligibility for the Ph.D. program is considered after the master’s year (see “Doctor of Philosophy” below). Applications for admission with financial aid (fellowships or assistantships) or without financial aid must be received and completed by December 4 for the next Autumn Quarter.

Information about admission to the Honors Cooperative Program is included in the “School of Engineering” section of this bulletin. The department may consider HCP applications for Winter or Spring quarters as well as for Autumn Quarter; prospective applicants should contact the department’s student services office.

Further information and application forms for all graduate degree programs may be obtained from Graduate Admissions, the Registrar’s Office, http://gradadmissions.stanford.edu.

**Waivers and Transfer Credits**—Students may receive departmental waivers of required courses for the M.S. degree in Aeronautics and Astronautics by virtue of substantially equivalent and satisfactorily performed course work at other institutions. A waiver petition (signed by the course instructor and adviser) should be submitted to the student services office indicating (1) the Stanford University course number and title, and (2) the institution, number(s), and title(s) of the course(s) wherein substantially equivalent material was treated. If a waiver is granted, the student must take an additional technical elective, chosen in consultation with their adviser, from graduate courses in Aeronautics and Astronautics. The total 45-unit requirement for the master’s degree is not reduced by course waivers.

A similar procedure should be followed for transfer credits. The number of transfer credits allowed for each degree (Engineer and Ph.D.) is delineated in the “Graduate Degrees” section of this bulletin; transfer credit is not accepted for the M.S. degree. Transfer credit is allowed only for courses taken as a graduate student, after receiving a bachelor’s degree, in which equivalence to Stanford courses is established and for which a grade of ‘B’ or better has been awarded. Transfer credits, if approved, reduce the total number of Stanford units required for a degree.

A similar procedure should be followed for transfer credits. The number of transfer credits allowed for each degree (Engineer and Ph.D.) is delineated in the “Graduate Degrees” section of this bulletin; transfer credit is not accepted for the M.S. degree. Transfer credit is allowed only for courses taken as a graduate student, after receiving a bachelor’s degree, in which equivalence to Stanford courses is established and for which a grade of ‘B’ or better has been awarded. Transfer credits, if approved, reduce the total number of Stanford units required for a degree.

**Fellowships and Assistantships**—Fellowships and course or research assistantships are available to qualified graduate students. Fellowships sponsored by Gift Funds, Stanford University, and Industrial Affiliates of Stanford University in Aeronautics and Astronautics provide grants to several first-year students for the nine-month academic year to cover tuition and living expenses. Stanford Graduate Fellowships, sponsored by the University, provide grants for three full years of study and research; each year, the fellow receives a monthly salary and an 8-10 unit tuition grant per quarter. Research assistants are determined by each hiring department. A standard, 20 hours/week course or research assistantship provides a semi-monthly salary and an 8-10 unit tuition grant per quarter. Research assistants may be given the opportunity of additional summer employment. They may use their work as the basis for a dissertation or Engineer’s thesis.

**STEAM FACILITIES**

The Aeronautics and Astronautics Program provides students with a thorough grounding in the fundamental principles and techniques important in the conception, design, and implementation of aerospace systems. Courses in the major include engineering fundamentals, mathematics and the sciences, as well as in-depth courses in aeronautics and astronautics, dynamics, mechanics of materials, fluid dynamics, and heat transfer. Students learn to apply fundamental engineering principles to experiments and aerospace system design problems. The major prepares students for further graduate work in this field, for careers in aircraft and spacecraft engineering, and for work that involves knowledge of fluid dynamics, structures, or controls-related technologies.

Although primarily a graduate-level department, Aeronautics and Astronautics offers both an undergraduate minor and an interdisciplinary program in Aeronautics and Astronautics (AA) leading to the B.S. degree in Engineering. For detailed information, see the “School of Engineering” section of this bulletin and the Handbook for Undergraduate Engineering Programs, available from the Office of the Dean of Engineering or at http://ugsb.stanford.edu.

Undergraduates interested in aerospace are encouraged to combine a minor or a terminal M.S. in Aeronautics and Astronautics with a major in a related discipline (such as Mechanical or Electrical Engineering). Students considering these options are encouraged to contact the department’s student services office.
have excelled in their master’s-level course work at Stanford are eligible for course assistantships in the department; those who have demonstrated research capability are eligible for research assistantships from individual faculty members. Students may also hold assistantships in other departments if the work is related to their academic progress; the criteria for selecting course or research assistants are determined by each hiring department. A standard, 20 hours/week course or research assistantship provides a semi-monthly salary and an 8-10 unit tuition grant per quarter. Research assistants may be given the opportunity of additional summer employment. They may use their work as the basis for a dissertation or Engineer’s thesis.

**COTERMINAL DEGREES PROGRAM IN AERONAUTICS AND ASTRONAUTICS**

This special program allows Stanford undergraduates an opportunity to work simultaneously toward a B.S. in another field and an M.S. in Aeronautics and Astronautics. General requirements for this program and admissions procedures are described in the “School of Engineering” section of this bulletin. Admission is granted or denied through the departmental faculty Admissions and Awards Committee. A coterminal student must meet the course and scholarship requirements detailed for the M.S. below.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.html#Coterm.

**MASTER OF SCIENCE IN AERONAUTICS AND ASTRONAUTICS**

The University’s basic requirements for the master’s degree are outlined in the “Graduate Degrees” section of this bulletin. Students with an aeronautical engineering background should be able to qualify for the master’s degree in three quarters of work at Stanford. Students with a bachelor’s degree in Physical Science, Mathematics, or other areas of Engineering may find it necessary to take certain prerequisite courses, which would lengthen the time required to obtain the master’s degree. The following are departmental requirements.

**Grade Point Averages—**A minimum grade point average (GPA) of 2.75 is required to fulfill the department’s M.S. degree requirements. A minimum GPA of 3.4 is required for eligibility to attempt the Ph.D. qualifying examination. It is incumbent upon both M.S. and potential Ph.D. candidates to request letter grades in all courses except those that do not offer a letter grade option and those that fall into the categories of colloquia and seminars (for example, AA 297 and ENGR 298). Insufficient grade points on which to base the GPA may delay expected degree conferral or result in refusal of permission to take the qualifying examinations. Candidates with GPAs of 3.0 through 3.4 may request the permission of the candidacy committee to attempt the qualifying examinations.

The master’s program (45 units) in Aeronautics and Astronautics (AA) is designed to provide a solid grounding in the basic disciplines. All candidates for this degree are expected to meet the basic course requirements in experimentation in aeronautics and astronautics, fluid mechanics, guidance and control, propulsion, and structural mechanics (category A below), in addition to work in applied mathematics (category B) and technical electives (category C).

**A. Basic Courses—**Candidates choose eight courses as follows:

1. One course in each basic area of Aeronautics and Astronautics:
   a. Experimentation: 241X, 236A, 257, 284B, or 290; or ENGR 205, 206, or 207A
   b. Fluids: one of 200 or 210A
   c. Guidance and Control: ENGR 105
   d. Propulsion: 283
   e. Structures: 240A
   f. Structures: 240B or 256
   g. Guidance and Control: 242A, 271A, or 279
   h. Aero/Astro elective: AA course numbered 200 and above, excluding seminars and independent research

   Candidates who believe they have satisfied a basic course requirement in previous study may request a waiver of one or more courses (see “Waivers and Transfer Credits” in the “Graduate Programs in Aeronautics and Astronautics” section of this bulletin).

2. Three courses, one each from the areas below:
   a. Fluids: 200 (if 210A was taken or waived in item 1); or 210A (if 200 was taken or waived in item 1)
   b. Structures: 240B or 256
   c. Guidance and Control: 242A, 271A, or 279
   d. Aero/Astro elective: AA course numbered 200 and above, excluding seminars and independent research

   Candidates who believe they have satisfied a basic course requirement in previous study may request a waiver of one or more courses (see “Waivers and Transfer Credits” in the “Graduate Programs in Aeronautics and Astronautics” section of this bulletin).

   B. Mathematics Courses—During graduate study, each candidate is expected to develop a competence in the applied mathematics pertinent to his or her major field. This requirement can be met by matriculating in a minimum of 6 units in either (1) applied mathematics (for example, complex variables, linear algebra, partial differential equations, probability), or (2) technical electives that strongly emphasize applied mathematics. A list of courses approved for the mathematics requirement is available in the departmental student services office. (Calculus, ordinary differential equations, and vector analysis are fundamental mathematics prerequisites, and do not satisfy the master’s mathematics requirement.) Students planning to continue to the Ph.D. should note that 25 percent of the major-field Ph.D. qualifying examination is devoted to pertinent mathematics.

   C. Technical Electives—Candidates, in consultation with their advisors, select at least four courses (totaling at least 12 units) in their major field from among the graduate-level courses offered by the departments of the School of Engineering and related science departments. This requirement increases by one course, taken in either the major or peripheral fields, for each basic course that is waived. Normally, one course (3 units) in this category may be directed research. Courses taken in satisfaction of the other master’s requirements (categories A, B, and D) may not also be counted as technical electives.

   D. Other Electives—It is recommended that all candidates enroll in at least one humanities or social science course. Language classes qualify in this category, but practicing courses in, for example, art, music, and physical education do not qualify.

   When planning their programs, candidates should check course descriptions carefully to ensure that all prerequisites have been satisfied. A course that is taken to satisfy a prerequisite for courses in category A (basic courses) or B (mathematics) cannot be counted as a technical elective, but can count toward the M.S. degree in category D (other electives).

**MASTER OF SCIENCE IN ENGINEERING (AA)**

Students whose career objectives require a more interdepartmental or narrowly focused program than is possible in the M.S. program in Aeronautics and Astronautics (AA) may pursue a program for an M.S. degree in Engineering (45 units). This program is described in the “Graduate Programs in the School of Engineering” section of this bulletin.

Sponsorship by the Department of Aeronautics and Astronautics in this more general program requires that the student file a proposal before completing 18 units of the proposed graduate program. The proposal must be accompanied by a statement explaining the objectives of the program and how the program is coherent, contains depth, and fulfills a well-defined career objective. The proposed program must include at least 12 units of graduate-level work in the department and meet rigorous standards of technical breadth and depth comparable to the regular AA Master of Science program. The grade and unit requirements are the same as for the M.S. degree in Aeronautics and Astronautics.

**ENGINEER IN AERONAUTICS AND ASTRONAUTICS**

The degree of Engineer represents an additional year (or more) of study beyond the M.S. degree and includes a research thesis. The program is designed for students who wish to do professional engineering work upon graduation and who want to engage in more specialized study than is afforded by the master’s degree.

**STANFORD BULLETIN, 2009-10 | 107**
SCHOOL OF ENGINEERING

The University’s basic requirements for the degree of Engineer are outlined in the “Graduate Degrees” section of this bulletin. The following are department requirements.

The candidate’s prior study program should have fulfilled the department’s requirements for the master’s degree or a substantial equivalent. Beyond the master’s degree, a total of 45 units of work is required, including a thesis and a minimum of 30 units of courses chosen as follows:

1. 24 units of approved technical electives, of which 9 are in mathematics or applied mathematics. (A list of courses approved for the mathematics requirement is available in the departmental student services office.) The remaining 15 units are chosen in consultation with the adviser, and represent a coherent field of study related to the thesis topic. Suggested fields include: (a) acoustics, (b) aerospace structures, (c) aerospace systems synthesis and design, (d) analytical and experimental methods in solid and fluid mechanics, (e) computational fluid dynamics, and (f) guidance and control.
2. 6 units of free electives.
3. The remaining 15 units may be thesis, research, technical courses, or free electives.

Candidates for the degree of Engineer are expected to have a minimum grade point average (GPA) of 3.0 for work in courses beyond those required for the master’s degree. All courses except seminars and directed research should be taken for a letter grade.

DOCTOR OF PHILOSOPHY IN AERONAUTICS AND ASTRONAUTICS

The University’s basic requirements for the Ph.D. degree are outlined in the “Graduate Degrees” section of this bulletin. Department requirements are stated below.

Qualifications for candidacy for the doctoral degree are contingent on:
1. Having fulfilled department requirements for the master’s degree or its substantial equivalent.
2. Maintaining a high scholastic record for graduate course work.
3. Completing 3 units of a directed research problem (AA 290 or an approved alternative).
4. In the first year of doctoral study, passing an oral Ph.D. qualifying examination given by the department during Autumn and Spring quarters.

Detailed information about the deadlines, nature, and scope of the Ph.D. qualifying examination can be obtained from the department. Research on the doctoral dissertation may not be formally started before passing this examination.

Beyond the master’s degree, a total of 90 additional units of work is required, including a minimum of 36 units of approved formal course work (excluding research, directed study, and seminars). The courses should consist primarily of graduate courses in engineering and related sciences, and should form a strong and coherent doctoral program. At least 12 units must be from graduate-level courses in mathematics or applied mathematics (a list of approved courses is available from the departmental student services office). University requirements for continuous registration apply to doctoral students for the duration of the degree.

Dissertation Reading Committee—Each Ph.D. candidate is required to establish a reading committee for the doctoral dissertation within six months after passing the department’s Ph.D. Qualifying exams. Thereafter, the student should consult frequently with all members of the committee about the direction and progress of the dissertation research.

A dissertation reading committee consists of the principal dissertation adviser and at least two other readers. Reading committee members in Aeronautics and Astronautics often include faculty from another department. It is expected that at least two members of the AA faculty be on each reading committee. If the principal research adviser is not within the AA department, then the student’s AA academic adviser should be one of those members. The initial committee, and any subsequent changes, must be officially approved by the department Chair.

University Oral and Dissertation—The Ph.D. candidate is required to take the University oral examination after the dissertation is substantially completed (with the dissertation draft in writing), but before final approval. The examination consists of a public presentation of dissertation research, followed by substantive private questioning on the dissertation and related fields by the University oral committee (four selected faculty members, plus a chair from another department). Once the oral has been passed, the student finalizes the dissertation for reading committee review and final approval. Forms for the University oral scheduling and a one-page dissertation abstract should be submitted to the department student services office at least three weeks prior to the date of the oral for departmental review and approval.

PH.D. MINOR IN AERONAUTICS AND ASTRONAUTICS

A student who wishes to obtain a Ph.D. minor in Aeronautics and Astronautics should consult the department office for designation of a minor adviser. A minor in Aeronautics and Astronautics may be obtained by completing 20 units of graduate-level courses in the Department of Aeronautics and Astronautics, following a program (and performance) approved by the department’s candidacy chair.

The student’s Ph.D. reading committee and University oral committee must each include at least one faculty member from Aeronautics and Astronautics.

BIOENGINEERING

Chair: Russ B. Altman
Co-Chair: Stephen R. Quake
Associate Professors: Kwabena Boahen, Karl Deisseroth, Charles Taylor
Assistant Professors: Zev David Bryant, Jennifer R. Cochran, Markus Wilard Covert, Andrew Endy, Kerwyn C. Huang, Christina D. Smolke, Fan Yang
Courtesy Professors: Sanjiv Sam Gambhir, Michael T. Longaker, Stefanos Zenios
Courteous Associate Professors: Jeffrey A. Feinstein, Garry E. Gold, Kim Butts Pauly
Affiliated Faculty: Atul J. Butte, Rebecca Fahrig, Stuart B. Goodman, Sarah Heilshorn, Ellen Kuhl, Marc E. Levenston, Craig Levin, Mark Musen, David S. Patik, Sylvia K. Plavertis, Mark J. Schnitzer, Krishna V. Shenoy, Daniel Mark Spielman
Student Services: Clark Center, Room S-166
Mail Code: 94305-5444
Student Services Phone: (650) 736-2254
Web Site: http://bioengineering.stanford.edu

Courses offered by the Department of Bioengineering are listed under the subject code BIOE on the Stanford Bulletin’s Explore Courses web site.

The mission of the Department of Bioengineering is to create a fusion of engineering and the life sciences that promotes scientific discovery and the invention of new technologies and therapies through research and education. The department encompasses both the use of biology as a new engineering paradigm and the application of engineering principles to medical problems and biological systems. The discipline embraces biology as a new science base for engineering.

Bioengineering is jointly supported by the School of Engineering and the School of Medicine. The facilities and personnel of the Department of Bioengineering are housed in the James H. Clark Center, the William F. Durand Building for Space Engineering and

The departmental headquarters is located in the James H. Clark Center for Biomedical Engineering and Sciences, along with approximately 600 faculty, staff, and students from more than 40 University departments. The Clark Center is also home to Stanford’s Bio-X program, a collaboration of the Schools of Engineering, Medicine, Humanities and Sciences, and Earth Sciences.

Courses in the teaching program lead to the degrees of Master of Science and Doctor of Philosophy. The department collaborates in research and teaching programs with faculty members in Chemical Engineering, Mechanical Engineering, Electrical Engineering, and departments in the School of Medicine. Quantitative biology is the core science base of the department. The research and educational thrusts are in biomedical computation, biomedical imaging, biomedical devices, regenerative medicine, and cell/molecular engineering. The clinical dimension of the department includes cardiovascular medicine, neuroscience, orthopedics, cancer care, neurology, and environment.

UNDERGRADUATE PROGRAMS IN BIOENGINEERING

Although primarily a graduate-level department, pre-approved B.S. majors in Bioengineering, Biomechanical Engineering and Biomedical Computation can be arranged through the School of Engineering. For detailed information, see the "School of Engineering" section of this bulletin and the Handbook for Undergraduate Engineering Programs at http://ughb.stanford.edu and available from the Office of the Dean of Engineering.

GRADUATE PROGRAMS IN BIOENGINEERING

The University’s requirements for the M.S. and Ph.D. degrees are outlined in the “Graduate Degrees” section of this bulletin.

Admission—Students are expected to enter with a series of core competencies in mathematics, biology, chemistry, physics, computing, and engineering. Students entering the program are assessed by the examination of their undergraduate transcripts and research experiences. Specifically, we require that students have completed mathematics through multivariable calculus and differential equations, completed a series of undergraduate biology courses (equivalent to BIO 41,42,43 series) and completed physics, chemistry, and computer sciences courses required of all undergraduate majors in engineering.

Qualified applicants are encouraged to apply for predoctoral national competitive fellowships, especially those from the National Science Foundation. Applicants to the Ph.D. program should consult with their financial aid officers for information and applications.

The deadline for receiving applications is December 1, 2009.

Further information and application forms for all graduate degree programs may be obtained from Graduate Admissions, the Registrar’s Office, http://gradadmissions.stanford.edu.

COTERMINAL B.S./M.S. PROGRAM IN BIOENGINEERING

This option is available to outstanding Stanford undergraduates who wish to work simultaneously toward a B.S. in another field and an M.S. in Bioengineering. The degrees may be granted simultaneously or at the conclusion of different quarters, though the bachelor’s degree cannot be awarded after the master’s degree has been granted. As Bioengineering does not currently offer an undergraduate program, the B.S. degree must be from another department. The University minimum requirements for the coterminous bachelor’s/master’s program are 180 units for the bachelor’s degree plus 45 unduplicated units for the master’s degree. Students may apply for the coterminous B.S. and M.S. program after 120 units are completed and they must be accepted into our program one quarter before receiving the B.S. degree. Students should apply directly to the Bioengineering Student Service Office by December 1, 2009. We require students interested in our coterminous degree to take the Graduate Record Examination (GRE); applications may be obtained at http://www.gre.org. New coterminous applications and procedures are now available on the Office of the University Registrar web site. Access the new application form, instructions, and supporting documents online at http://bioengineering.stanford.edu/education/coterm.html; University regulations and forms concerning coterminous degree programs are available at http:// registrar.stanford.edu/shared/publications.html#/coterm.

The application must provide evidence of potential for strong academic performance as a graduate student. The application is evaluated and acted upon by the graduate admissions committee of the department. Students are expected to enter with a series of core competencies in mathematics, biology, chemistry, physics, computing, and engineering. Typically, a GPA of at least 3.5 in engineering, science, and math is expected.

MASTER OF SCIENCE IN BIOENGINEERING

The Master of Science in Bioengineering requires 45 units of course work. The curriculum consists of core bioengineering courses, technical electives, seminars and unrestricted electives. Core courses focus on quantitative biology and biological systems analysis. Approved technical electives are chosen by the student in consultation with his/her graduate adviser, and can be selected from graduate course offerings in mathematics, statistics, engineering, physical sciences, life sciences, and medicine. Seminars highlight emerging research in bioengineering and provide training in research ethics. Unrestricted electives can be freely chosen by the student in association with his/her adviser.

The department’s requirements for the M.S. in Bioengineering are:

1. Core Bioengineering courses (9 units); the following courses are required:
   - BIOE 300A. Molecular and Cellular Bioengineering
   - BIOE 300B. Physiology and Tissue Engineering
   - BIOE 301A. Molecular and Cellular Bioengineering Lab
   - BIOE 301B. Clinical Needs and Technology
   These courses, together with the approved technical electives, should form a cohesive course of study that provides depth and breadth.

2. Approved Technical Electives (27 units): these units must be selected from graduate courses in mathematics, statistics, engineering, physical sciences, life science, and medicine. They should be chosen in concert with the bioengineering courses to provide a cohesive degree program in a bioengineering focus area. Students are required to take at least one course in some area of device or instrumentation. Up to 9 units of directed study and research may be used as approved electives.

3. Seminars (3 units): the seminar units should be fulfilled through BIOE 390, Introduction to Bioengineering Research, BIOE 393, Biotechnology Departmental Research Colloquium, or BIOE 459, Frontiers in Interdisciplinary Biosciences. Other relevant seminar units may also be used with the approval of the faculty adviser. One of the seminar units must be MED 255, The Responsible Conduct of Research.

4. Unrestricted Electives (6 units).

Students are assigned an initial faculty adviser to assist them in designing a plan of study that creates a cohesive degree program with a concentration in a particular bioengineering focus area. These focus areas include, but are not limited to: Biomedical Computation, Regenerative Medicine/Tissue Engineering, Molecular and Cell Bioengineering, Biomedical Imaging, and Biomedical Devices.

To ensure that an appropriate program is pursued by all M.S. candidates, students who first matriculate at Stanford at the graduate level (a) submit an adviser-approved Program Proposal for a Master’s Degree form to the student services office during the first
month of the first quarter of enrollment and (b) obtain approval from the M.S. adviser and the Chair of Graduate Studies for any subsequent program change or changes. It is expected that the requirements for the M.S. in Bioengineering can be completed within approximately one year. There is no thesis requirement for the M.S.

Due to the interdisciplinary nature of Bioengineering; a number of courses are offered directly through the Bioengineering Department, but many are available through other departments. See respective department listings for course descriptions.

**COGNATE COURSES**

BIOC 218. Computational Molecular Biology (Same as BIOME-DIN 231)

BIOMEDIN 210. Modeling Biomedical Systems: Ontology, Terminology, Problem Solving (Same as CS 270)

BIOMEDIN 217. Translational Bioinformatics (Same as CS 275)

CHEMENG 450. Advances in Biotechnology

EE 369A,B. Medical Imaging Systems I,II

EE 369C. Medical Image Reconstruction

ME 280. Skeletal Development and Evolution

ME 287. Soft Tissue Mechanics

ME 381. Orthopaedic Bioengineering

ME 382A,B. Medical Device Design

RAD 226. In Vivo Magnetic Resonance Spectroscopy and Imaging

**DOCTOR OF PHILOSOPHY IN BIOENGINEERING**

A student studying for the Ph.D. degree must complete a master’s degree (45 units) comparable to that of the Stanford M.S. degree in Bioengineering. Up to 45 units of master’s degree residency units may be counted towards the degree. The Ph.D. degree is awarded after the completion of a minimum of 135 units of graduate work as well as satisfactory completion of any additional University requirements. Students admitted to the Ph.D. program with an M.S. degree must complete at least 90 units of work at Stanford. The maximum number of transfer units is 45.

On the basis of the research interests expressed in their application, students are assigned an initial faculty adviser who assists them in choosing courses and identifying research opportunities. The department does not require formal lab rotations, but students are encouraged to explore research activities in two or three labs during their first academic year.

Prior to being formally admitted to candidacy for the Ph.D. degree, the student must demonstrate knowledge of bioengineering fundamentals and a potential for research by passing a qualifying oral examination.

Typically, the exam is taken shortly after the student earns a master’s degree. The student is expected to have a nominal Stanford GPA of 3.25 to be eligible for the exam. Once the student’s faculty sponsor has agreed that the exam is to take place, the student must submit an application folder containing items including a curriculum vitae, research project abstract, and preliminary dissertation proposal to the student services office. Information about the exam may be obtained from the student services office.

In addition to the course requirements of the M.S. degree, doctoral candidates must complete a minimum of 15 additional units of approved formal course work (excluding research, directed study, and seminars).

**Dissertation Reading Committee**—Each Ph.D. candidate is required to establish a reading committee for the doctoral dissertation within six months after passing the department’s Ph.D. qualifying exams. Thereafter, the student should consult frequently with all members of the committee about the direction and progress of the dissertation research.

A dissertation reading committee consists of the principal dissertation adviser and at least two other readers. Reading committees in Bioengineering may include faculty from another department. It is expected that at least one member of the Bioengineering faculty be on each reading committee. The initial committee, and any subsequent changes, must be officially approved by the department Chair.

**University Oral and Dissertation**—The Ph.D. candidate is required to take the University oral examination after the dissertation is substantially completed (with the dissertation draft in writing), but before final approval. The examination consists of a public presentation of dissertation research, followed by substantive private questioning on the dissertation and related fields by the University oral committee (four selected faculty members, plus a chair from another department). Once the oral has been passed, the student finalizes the dissertation for reading committee review and final approval. Forms for the University oral scheduling and a one-page dissertation abstract should be submitted to the department student services office at least three weeks prior to the date of the oral for departmental review and approval.

**PH.D. MINOR IN BIOENGINEERING**

Doctoral students pursuing a Ph.D. degree in a major other than Bioengineering may apply for the Ph.D. minor in Bioengineering. A minor is not a requirement for any degree, but is available when agreed upon by the student and the major and minor department.

Application forms, including the University’s general requirements, can be found at http://registrar.stanford.edu/shared/forms.htm.

A student desiring a Ph.D. minor in Bioengineering must have a minor program advisor who is a regular Bioengineering faculty member. This advisor must be a member of the student’s reading committee for the doctoral dissertation, and the entire reading committee must meet at least one year prior to the date of the student’s dissertation defense.

The Ph.D. minor program must include at least 20 units of course work in Stanford Bioengineering or Bioengineering cognate courses at or above the 200 level. Of these 20 units, no more than 10 can be in cognate courses. All courses listed to fulfill the 20-unit requirement must be taken for a letter grade and the GPA must be at least 3.25. Courses used for a minor may not be used to also meet the requirements for a master’s degree.

**M.D./PH.D. DUAL DEGREE PROGRAM**

Students interested in a career oriented towards bioengineering and medicine can pursue the combined M.D./Ph.D. degree program. Stanford has two ways to do an M.D./Ph.D. U.S. citizens and permanent residents can apply to the Medical Scientist Training Program and can be accepted with funding from both M.D. and Ph.D. programs for stipend and tuition. They can then select a bioengineering laboratory for their Ph.D. Students not admitted to the Medical Scientist Training Program must apply to be admitted separately to the M.D. program and the Ph.D. program of their choice.

The Ph.D. is administered by the Department of Bioengineering. To be formally admitted as a Ph.D. degree candidate in this combined degree program, the student must apply through normal departmental channels and must have earned or have plans to earn an M.S. in bioengineering or another engineering discipline at Stanford or another university. The M.S. requires 45 units of course work which consists of core bioengineering courses, technical electives, seminars, and 6 unrestricted units. Students must also pass the Department of Bioengineering Ph.D. qualifying examination.

For students fulfilling the full M.D. requirements who earned their master’s level engineering degree at Stanford, the Department of Bioengineering waives the normal departmental requirement of 15 units applied towards the Ph.D. degree beyond the master’s degree level through formal course work. Consistent with the University Ph.D. requirements, the department accepts 15 units comprised of courses, research, or seminars approved by the student’s academic adviser and the department chair. Students not completing their M.S. engineering degree at Stanford are required to take 15 units of formal course work in engineering-related areas as determined by their academic adviser.
JOINT DEGREE PROGRAMS IN BIOENGINEERING AND THE SCHOOL OF LAW

The School of Law and the Department of Bioengineering offer joint programs leading to either a J.D. degree combined with an M.S. degree in Bioengineering or to a J.D. degree combined with a Ph.D. in Bioengineering.

The J.D./M.S. and J.D./Ph.D. degree programs are designed for students who wish to prepare themselves intensively for careers in areas relating to both law and bioengineering. Students interested in either joint degree program must apply and gain entrance separately to the School of Law and the Department of Bioengineering and, as an additional step, must secure permission from both academic units to pursue degrees in those units as part of a joint degree program. Interest in either joint degree program should be noted on the student’s admission applications and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or the Bioengineering Department may apply for admission to the other program and for joint degree status in both academic units after commencing study in either program.

Joint degree students may elect to begin their course of study in either the School of Law or the Department of Bioengineering. Faculty advisers from each academic unit will participate in the planning and supervising of the student’s joint program. Students must be enrolled full time in the Law School for the first year of law school, and, at some point during the joint program, may be required to devote one or more quarters largely or exclusively to studies in the Bioengineering program regardless of whether enrollment at that time is in the Law School or in the Department of Bioengineering. At all other times, enrollment may be in the graduate school or the Law School, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the M.S. or Ph.D. degrees as specified in the Stanford Bulletin or elsewhere.

The Law School shall approve courses from the Bioengineering Department that may count toward the J.D. degree, and the Bioengineering Department shall approve courses from the Law School that may count toward the M.S. or Ph.D. degree in Bioengineering. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student’s program. The lists may differ depending on whether the student is pursuing an M.S. or a Ph.D. in Bioengineering.

In the case of a J.D./M.S. program, no more than 45 units of approved courses may be counted toward both degrees. In the case of a J.D./Ph.D. program, no more than 54 units of approved courses may be counted toward both degrees. In either case, no more than 36 units of courses that originate outside the Law School may count toward the law degree. To the extent that courses under this joint degree program originate outside of the Law School but count toward the law degree, the law school credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis, but not below zero. The maximum number of law school credits that may be counted toward the M.S. or Ph.D. in Bioengineering is the greater of: (i) 15 units; or (ii) the maximum number of units from courses outside of the department that M.S. or Ph.D. candidates in Bioengineering are permitted to count toward the applicable degree under general departmental guidelines or in the case of a particular student’s individual program. Tuition and financial aid arrangements will normally be through the school in which the student is then enrolled.
SCHOOL OF ENGINEERING

UNDERGRADUATE PROGRAMS IN CHEMICAL ENGINEERING

The University’s basic requirements for the bachelor’s degree and coterminal bachelor’s and master’s degrees are discussed in the “Undergraduate Degrees” section of this bulletin.

BACHELOR OF SCIENCE IN CHEMICAL ENGINEERING

Chemical engineers design and implement the processes and technology needed to produce, to transform, and to transport energy and materials. This activity begins with experimentation in the laboratory and is followed by implementation of the technology to full scale production. The mission of the Chemical Engineering Program is to develop students’ understanding of the core scientific, mathematical, and engineering principles that serve as the foundation underlying these technological processes. The program’s core mission is reflected in its curriculum, which is built on the foundations of chemistry, physics, and biology. Course work includes the study of applied mathematics, material and energy balances, thermodynamics, fluid mechanics, energy and mass transfer, separations technologies, chemical reaction kinetics and reactor design, and process design. The program provides students with excellent preparation for careers in the corporate sector or in government, as well as for future graduate study.

The Chemical Engineering B.S. program requires basic courses in biology, chemistry, engineering, mathematics, and physics. The depth sequence of courses required for the major in chemical engineering provides training in applied chemical kinetics, biochemical engineering, electronic materials, engineering thermodynamics, plant design, polymers, process analysis and control, separation processes, and transport phenomena. Undergraduates who wish to major in Chemical Engineering (CHEMENG) should consult the curriculum outlined in the “School of Engineering” section of this bulletin. Courses taken to fulfill the requirements for the major (courses in mathematics; science; technology and society; engineering fundamentals; and engineering depth) must be taken for a letter grade if this option is offered.

There are several sample 4-year sequences of courses leading to a B.S. in Chemical Engineering. While each sequence starts at a different level, based on the student’s prior preparation, all complete the major at the same level. Sample programs are available from the department’s student services and faculty advisers for undergraduates, the Office of Student Affairs in the School of Engineering, and in the Handbook for Undergraduate Engineering Programs, available at http://ughb.stanford.edu. It is recommended that students discuss their prospective programs with chemical engineering faculty advisers, especially if transferring from another major, e.g. biology, chemistry, physics, or another engineering major. With advance planning, students can usually arrange to attend one of the overseas campuses.

For information about the requirements for a minor in Chemical Engineering, see the “School of Engineering” section of this bulletin.

HONORS PROGRAM

The Department of Chemical Engineering offers a program leading to the degree of Bachelor of Science in Chemical Engineering with Honors. Qualified undergraduate majors conduct independent study and research at an advanced level with faculty mentors, graduate students, and fellow undergraduates. This three-quarter sequential program involves research study in an area proxed to and approved by a Department of Chemical Engineering faculty adviser; concurrent participation each quarter in the CHEMENG 191H seminar; completion of a faculty-approved thesis; and participation in the Chemical Engineering Honors Symposium held annually during Spring Quarter. The last requirement may also be fulfilled through an alternative, public, oral presentation with the approval of the department chair. Work should begin at least four quarters prior to graduation.

Admission to the honors program is by application. Declared Chemical Engineering majors with a cumulative grade point average (GPA) of 3.5 or higher are encouraged to apply. Students should submit their applications by Winter Quarter of their junior year; applications must be submitted no later than the end of the first week of Autumn Quarter of the senior year. An application includes a research proposal, approved by both a research thesis adviser and a faculty reader. The faculty adviser or, alternatively, a faculty sponsor, must be a member of the Department of Chemical Engineering. Students should start their research in their junior year and are encouraged to consider incorporating research opportunities such as those sponsored by Undergraduate Advising and Research (see http://urp.stanford.edu/StudentGrants) into their honors research proposal. See departmental student services staff in Keck 189 for more information about the application process, a proposal template, and other assistance.

In order to receive departmental honors, students admitted to the honors program should:

1. Maintain an overall grade point average (GPA) of at least 3.5 as calculated on the unofficial transcript.
2. Complete at least three quarters of research with a minimum of 9 units of CHEMENG 190H for a letter grade. All quarters must focus on the same topic. The same faculty adviser and faculty reader should be maintained throughout if feasible.
3. Enroll in CHEMENG 191H, Undergraduate Honors Seminar, concurrently with each quarter of CHEMENG 190H.
4. Participate with a poster and oral presentation of thesis work at the Chemical Engineering Honors Poster Session held during Spring Quarter or, at the faculty’s discretion, at a comparable public event.
5. Submit final drafts of a thesis simultaneously to the adviser and reader and, if appropriate, to the Chemical Engineering faculty sponsor, no later than April 16th, or the end of the second week of the first month of the quarter in which the degree is to be conferred.
6. Complete all work and thesis revisions and obtain indicated faculty approvals on the Certificate of Final Reading of Thesis forms by the end of the first week of May, or the second month of the graduation quarter.
7. Submit five (5) final copies of the honors thesis, as approved by the appropriate faculty. Include in each, an original, completed faculty signature sheet immediately following the title page. The deadline is May 10, 2010, or the Monday at the beginning of the second week of the second month of the graduation quarter.
8. Submit one copy of the honors thesis in electronic format to student services by May 10, 2010, or at the same time as the final copies of the thesis.

GRADUATE PROGRAMS IN CHEMICAL ENGINEERING

The University’s requirements, including residency requirements, for the M.S., Engineer, and Ph.D. degrees are summarized in the “Graduate Degrees” section of this bulletin.

Current research and teaching activities cover a number of advanced topics in chemical engineering, including applied statistical mechanics, bio catalysis, biochemical engineering, biotechnology, biophysics, computational materials science, colloid science, dynamics of complex fluids, energy conversion, functional genomics, hydrodynamic stability, kinetics and catalysis, micro rheology, molecular assemblies, nanoscience and technology, Newtonian and non-Newtonian fluid mechanics, polymer physics, protein biotech-
ology, protein biotechnology, renewable fuels, semiconductor processing, soft materials science, solar utilization, surface and interface science, and transport mechanics.

**Fellowships and Assistantships**—Qualified applicants are encouraged to apply for predoctoral competitive fellowships, for example, those from the National Science Foundation. Applicants to the Ph.D. program should consult with their financial aid officers for information and applications. Matriculated Ph.D. students are primarily supported by fellowship awards and assistantship appointments. Assistantships are paid positions for graduate students that, in addition to a salary, provide the benefit of a tuition allocation. Individual faculty members appoint students to research assistantships; the department chair appoints doctoral students to teaching assistantships. Contact departmental student services for additional information. All students are encouraged to apply for external, competitive fellowships and may obtain information about various awarding agencies from faculty advisers and student services. In the absence of other awards, incoming Ph.D. students normally are awarded departmental fellowships.

**Cognate Courses for Advanced Degrees in Chemical Engineering**

In addition to core CHEMENG graduate courses in the 300 series and elective CHEMENG graduate courses in the 200 and 400 series, students pursuing advanced degrees in chemical engineering often consider including elective courses offered by other departments. The following list is a partial list of the more frequently chosen courses and is subdivided into five focus areas.

**Broadly Applicable—**

APPPHYS 207. Laboratory Electronics (3 units)
CHEM 221. Advanced Organic Chemistry (3 units)
CHEM 271. Advanced Physical Chemistry (Quantum Mechanics) (3 units)
CHEM 273. Advanced Physical Chemistry (Angular Momentum, etc.) (3 units)
EE 261. The Fourier Transform and its Applications (3 units)
EE 268. Introduction to Modern Optics (3 units)
MS&E 234. Organizations and Information Systems (4 units)
STATS 200. Statistical Inference (3 units)

**Biochemistry and Biotechnology focus, e.g. with CHEMENG 281, 283, 454, 456—**

BIO 203. Advanced Genetics (human)
BIO 217. Neuronal Biophysics (4 units)
BIOC 133. Genetics of Prokaryotes (3 units; needs approval of chair)
BIOE 331. Protein Engineering (3 units)
BIOPHYS/SBIO 228. Computational Structural Biology (3 units)
BIOPHYS/SBIO 241. Biologic Macromolecules (3-5 units)
CBIO 241. Molecular, Cellular, and Genetics Basis of Cancer (3 units)
CEE 274. Environmental Microbiology I & II (3 units each)
MCP 256. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology (4 units)
MPHA 210. Signal Transduction Pathways and Networks (4 units)
MPHA 240. Drug Discovery (4 units)
MPHA 260. Quantitative Chemical Biology (4 units)
SBIO 228. Computational Structural Biology (3 units)
SBIO 241. Biological Macromolecules (3-5 units)

**Fluid Mechanics, Applied Mathematics, and Numerical Analysis focus, e.g. with CHEMENG 462—**

AA 218. Introduction to Symmetry Analysis (3 units)
CME 200. Linear Algebra with Application to Engineering Computations (3 units)
CME 204. Partial Differential Equations in Engineering (3 units)
CME 206. Introduction to Numerical Methods for Engineering (3 units)
CME 212. Introduction to Large-Scale Computing in Engineering (3 units)

**CME 332. Computational Methods for Scientific Reasoning and Discovery (3 units)**

**CME 340. Computational Methods in Data Mining (3 units)**

**ME 338A. Continuum Mechanics (3 units)**

**ME 351. Fluid Mechanics (3 units)**

**ME 457. Fluid Flow in Microdevices (3 units)**

**Materials Science focus, e.g. with CHEMENG 260, 442, 460, 461, 464, 466—**

**MATSCI 210. Organic and Biomaterials (3 units)**

**MATSCI 251. Microstructure and Mechanical Properties (3 units)**

**MATSCI 316. Nanoscale Science, Engineering, and Technology (3 units)**

**MATSCI 343. Organic Semiconductors for Electronics and Photonics (3 units)**

**MATSCI 380. Molecular Biomaterials (3 units)**

**Microelectronics focus, e.g. with CHEMENG 240—**

**AA 218. Introduction to Symmetry Analysis (3 units)**

**CME 200. Linear Algebra with Application to Engineering Computation (3 units)**

**CME 204. Partial Differential Equations in Engineering (3 units)**

**CME 206. Introduction to Numerical Methods for Engineering (3 units)**

**CME 212. Introduction to Large-Scale Computing in Engineering (3 units)**

**CME 332. Computational Methods for Scientific Reasoning and Discovery (3 units)**

**CME 340. Computational Methods in Data Mining (3 units)**

**ME 338A. Continuum Mechanics (3 units)**

**ME 351. Fluid Mechanics (3 units)**

**ME 457. Fluid Flow in Microdevices (3 units)**

**MATSCI 210. Organic and Biomaterials (3 units)**

**MATSCI 251. Microstructure and Mechanical Properties (3 units)**

**MATSCI 316. Nanoscale Science, Engineering, and Technology (3 units)**

**MATSCI 343. Organic Semiconductors for Electronics and Photonics (3 units)**

**MATSCI 380. Molecular Biomaterials (3 units)**

**COTERMINAL BACHELOR’S AND MASTER’S DEGREES**

Undergraduates with strong academic records may apply to study for a master’s degree while completing their bachelor’s degree(s). Interested students should discuss their educational goals with their faculty advisers before applying and should talk with departmental student services about the departmental requirements and deadlines for applications.

Further University-wide information is in the “Undergraduate Degrees” section of this bulletin. For the University’s coterminal degree program rules and application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

**MASTER OF SCIENCE IN CHEMICAL ENGINEERING**

A range of M.S. programs comprising appropriate course work is available to accommodate students wishing to obtain further academic preparation after receiving a B.S. degree and before pursuing a professional chemical engineering career. This degree is a terminal M.S. degree. It is not a prerequisite for nor does it lead directly into the department’s Ph.D. program. For conferral of an M.S. degree, a formal thesis is not required, but the following departmental requirements must be met.

**Unit and Course Requirements**—For students terminating their graduate work with the M.S. degree in Chemical Engineering, a graduate-level, thematic program consisting of a minimum of 45 completed units of academic work is required, including (1) four Chemical Engineering lecture courses selected from the 300 series—not including 320 in 09-10; (2) 3 units of 699 Colloquia; (3) an additional 30 units, selected from graduate-level science or engineering lecture courses in any department and, by petition to the Chair of the Department of Chemical Engineering, from upper-division undergraduate lecture courses in science and engineering. Alternatively, up to 6 units of research may be used in lieu of up to 6 units of the additional 30 lecture units to partially satisfy the 45 unit minimum requirement. Another option is an up-to-six-unit
combination of research units and 1, 2, or 3 units of 459 or other similar 1- or 2-unit graduate seminar courses, with faculty developed curricula, used in lieu of up to 6 units of the required additional 30 lecture units. Credit toward the M.S. degree is not given for Chemical Engineering special topics courses numbered in the 500 series nor for similar courses in other departments.

To ensure that an appropriate Chemical Engineering graduate program is pursued by all M.S. candidates, students who first matriculate at Stanford at the graduate level must (a) submit during the first quarter, no later than the eighth week, a M.S. adviser-approved Program Proposal for a Master’s Degree form to departmental student services, for review by the department chair, and (b) obtain approval from the M.S. adviser and the department chair for any subsequent program change or changes. Stanford undergraduates admitted to the coterminous master’s program must (a) submit an adviser-approved Program Proposal for a Master’s Degree (a graduate degree progress form) either during their first quarter of graduate standing or upon the completion of 15 units of graduate work (whichever occurs first), and (b) document with student services their M.S. adviser’s review and approval of their graduate program when they have accrued 30 units toward the degree in Chemical Engineering. Each M.S. candidate must obtain approvals for the final M.S. program no later than the eighth week of the quarter preceding the quarter of degree conferral, in order to permit amendment of the final quarter’s study list if the faculty deem this necessary. Students with questions should contact student services.

Minimum Grade Requirement—Any course used to satisfy the 45-unit minimum for the M.S. degree must be taken for a letter grade, if offered. An overall grade point average (GPA) of 3.0 must be maintained for these courses.

Research Experience—Students in the M.S. program wishing to obtain research experience should work with the M.S. adviser on the choice of research adviser as early as feasible and in advance of the anticipated quarter(s) of research. Once arrangements are mutually agreed upon, including the number of units, students enroll in the appropriate section of CHEMENG 600. A written report describing the results of the research undertaken must be submitted to and approved by the research adviser. CHEMENG 600 may not be taken in lieu of any of the required four 300-level lecture courses.

ENGINEER IN CHEMICAL ENGINEERING

The degree of Engineer is awarded after completion of a minimum of 90 units of graduate work beyond the B.S. degree and satisfactory completion of all University requirements plus the following departmental requirements. This degree is not a prerequisite for the Ph.D. program.

Unit and Course Requirements—A minimum of 90 total units (including research) within which 45 units of lecture course work is required for the Engineer degree, including (1) 300, 310, 340, 345, 355, (2) 320 may not be substituted in 09-10 for one of the five just listed, and (3) 3 units of 699. The remaining lecture courses, to total at least 45 completed units, may be chosen from the basic sciences and engineering according to the guidelines given in the Master of Science section and with the consent of the graduate curriculum committee chair and the department chair. In fulfilling the required 45-unit requirement for lecture course units, an aggregate of 6 units maximum of the required 45-unit minimum of course work may include such courses as 459 and 699, but not 500 level seminar courses or research units. Students seeking the Engineer degree may petition to add a M.S. program and apply for the M.S. degree once the requirements for that degree have been fulfilled (see General Requirements in the “Graduate Degrees” section of this bulletin and Chemical Engineering’s “Master of Science” section).

Minimum Grade Requirement—Any course intended to satisfy the degree requirements must be taken for a letter grade, if offered. An overall grade point average (GPA) of 3.0 must be maintained for these courses.

Reading Committee Requirement—All candidates are required to have an initial meeting with their reading committees, consisting of two members of the Chemical Engineering faculty, by the end of their seventh quarter. Following this initial meeting, additional committee meetings must occur no less than once a year until all the requirements for the degree are satisfied. Students are encouraged to hold meetings on a more frequent basis to help focus and guide the thesis project. It is each student’s responsibility to schedule meetings and to assist in the keeping of accurate degree progress records by informing student services when meetings have occurred.

Thesis Requirement—The thesis must represent a substantial piece of research equivalent to nine months of full-time effort and must be approved by the student’s reading committee.

Qualification for the Ph.D. Program by Students Ready to Receive the Degree of Engineer—After completing the requirements for the Engineer degree, a student may request to be examined on the research work completed for that degree, for the purpose of qualifying for the Ph.D. degree. If the request is granted, the student’s thesis must be approved by the reading committee and available in its final form for inspection by the entire faculty at least two weeks prior to the scheduled date of said examination.

DOCTOR OF PHILOSOPHY IN CHEMICAL ENGINEERING

The Ph.D. degree is awarded after the completion of a minimum of 135 units of graduate work as well as satisfactory completion of any additional University requirements and the following departmental requirements. Completion of a M.S. degree is not a prerequisite for beginning, pursuing, or completing doctoral work.

Unit and Course Requirements—A minimum of 135 completed units, including a minimum of 45 units of lecture course work, is required for the Ph.D. degree. The following courses are required: 300, 310, 340, 345, and 355; plus two courses in the 440, 450, or 460 series. These are to be taken at Stanford, and any petition to substitute another graduate-level course for any of these core courses must be approved by the department chair. The remaining lecture courses may be chosen from graduate-level science and engineering lecture courses in any department and, by petition to the department chair, from upper-division undergraduate lecture courses in the sciences and engineering. Three units of 699 must be completed and may be included in the required 45 units of lecture courses. Additionally, 1, 2, or 3 units of seminar courses with faculty developed curricula, e.g. 459, may be substituted for up to 3 units of the unspecified lecture courses, but not for any of the specified CHEMENG courses above. All proposals for Ph.D. course work must be approved by the student’s adviser and the department chair or his designee. Students admitted to Ph.D. candidacy should enroll each quarter in the 500 series, 600, and 699 as appropriate and as study list unit limits permit. Predoctoral students may petition for a M.S. degree program to be added to their university record. When the petition is approved, students may apply in Axess for M.S. degree conferral once the requirements for that degree have been fulfilled (see the “Master of Science in Chemical Engineering” section in this bulletin). The M.S. degree must be awarded within the University’s candidacy period for completion of a master’s degree.

Minimum Grade Requirement—Any course intended to satisfy the Ph.D. degree requirements must be taken for a letter grade, if offered. An overall grade point average (GPA) of 3.0 must be maintained for these courses.

Qualifying Examination—To be advanced to candidacy for the Ph.D. degree, the student must pass both parts of the qualifying examination. The first part is held at the beginning of Spring Quarter, or the third quarter of study, and the first-year student is asked to make an oral presentation to the faculty of a critical review of a published paper. This preliminary examination, in addition to performance in courses and during research rotations, is the basis for determining whether or not a first-year student may be allowed to
choose a research adviser and to begin doctoral research work immediately. Failure in this first part of the qualifying examination normally leads to termination of a student’s study towards the Ph.D. degree; however, the student may continue to work toward an M.S. degree (see the “Master of Science in Chemical Engineering” section of this bulletin). It also precludes any financial aid beyond that already awarded. Students who pass the preliminary examination take the second part of the qualifying examination at the beginning of their second year, or the fifth quarter. This second examination before the faculty is an oral presentation and defense of their current research work. Students who pass both parts of the qualifying examination must promptly submit to departmental student services Application for Candidacy for Doctoral Degree forms approved by their research advisers and at the same time establish and meet with their doctoral dissertation reading committees.

Reading Committee Requirement—All Ph.D. candidates are required to assemble reading committees and to have an initial meeting with the full committee by the end of their seventh quarter. Reading committee meetings are not examinations; they are intended to be discussion sessions to help focus and guide the dissertation project. Following the initial committee meeting, additional meetings must take place no less than once per year until all the requirements for the Ph.D. degree are satisfied. The department encourages students to take advantage of the benefits of more frequent meetings with their full reading committee. It is the student’s responsibility to schedule committee meetings and to assist in the maintenance of degree progress records by reporting the meeting dates to the student services manager.

Teaching Requirement—Teaching experience is considered an essential component of doctoral training. All Ph.D. candidates, regardless of the source of their financial support, are required to assist in the teaching of a minimum of two chemical engineering courses.

Dissertation and Oral Defense Requirements—A dissertation based on a successful investigation of a fundamental problem in chemical engineering is required. Within approximately five calendar years after enrolling in the Ph.D. program, students are expected to have fulfilled all the requirements for this degree, including the completion of dissertations approved by their research advisers. Upon adviser approval, copies of the final draft of a dissertation must be distributed to each reading committee member. No sooner than three weeks after this distribution, students may schedule their oral examinations. This examination is a dissertation defense, based on the candidate’s dissertation research, and is in the form of a public seminar followed by a private examination by the faculty members on the student’s oral examination committee. Satisfactory performance in the oral examination and acceptance of an approved dissertation by Graduate Degree Progress, Office of the University Registrar, leads to Ph.D. degree conferment.

PH.D. MINOR IN CHEMICAL ENGINEERING

A Ph.D. minor is a program outside a student’s Ph.D. department. The University’s general requirements for the Ph.D. minor are specified in the “Graduate Degrees” section of this bulletin. An application for a Ph.D. minor must be approved by both the major and minor departments.

A student desiring a Ph.D. minor in Chemical Engineering must have a minor program adviser who is a regular Chemical Engineering faculty member. At a minimum, this adviser must be a member of the student’s reading committee for the doctoral dissertation, and the entire reading committee must meet at least once and at least one year prior to the scheduling of the student’s oral examination. The department strongly prefers that regular meetings of the full reading committee start in the second year of graduate study or when the student is admitted to Ph.D. candidacy. In addition, the chemical engineering faculty member who is the minor adviser must be a member of the student’s University oral examination committee.

The Ph.D. minor program must include at least 20 units of graduate-level lecture courses (numbered at the 200 level or above), but may not include in the 20-unit minimum any 1-2 unit courses in Chemical Engineering. The list of courses for the minor must be taken for a letter grade, and a GPA of at least 3.0 earned for these courses.
preparation of students for careers in professional practice. Civil and environmental engineers work to sustain the natural environment while creating and maintaining the built environment. Civil and environmental engineers are essential to providing the necessities of human life, including water, air, shelter, the infrastructure, energy, and food, increasingly in more efficient and renewable ways.

The department focus is on the theme of engineering for sustainability, including three focus areas: the built environment, environmental and water studies, and atmosphere and energy. The built environment includes creating processes, techniques, materials, and monitoring technologies for planning, design, construction and operation of environmentally sensitive, economically efficient, performance-based built systems, and managing associated risks from natural and man-made hazards. Built environment research and teaching is conducted primarily within the programs of Construction Engineering and Management, Design-Construction Integration, and Structural Engineering and Geomechanics and Sustainable Design Construction. The water environment includes creating plans, policies, science-based assessment models and engineered systems to manage water in ways that protect human health, promote human welfare, and provide freshwater and coastal ecosystem services. Water environment research and teaching is conducted primarily within the programs of Environmental Engineering and Sciences and Environmental Fluid Mechanics and Hydrology. Atmosphere and Energy includes studying fundamental energy and atmospheric engineering and science, assessing energy-use effects on atmospheric processes and air quality, and analyzing and designing energy-efficient generation and use systems with minimal environmental impact.

UNDERGRADUATE PROGRAMS IN CIVIL AND ENVIRONMENTAL ENGINEERING

The undergraduate Civil Engineering major provides a pre-professional program balancing the fundamentals common to many special fields of civil engineering with a field of study in Environmental and Water Studies or Structures and Construction. The undergraduate Environmental Engineering major offers a more focused program in Environmental and Water Studies. Laboratory facilities are available to students in building energy, construction, environmental engineering and science, experimental stress analysis, fluid mechanics, structural and earthquake engineering, and advanced sensing technologies. The department hosts the School of Engineering pre-approved majors in Architectural Design and Atmosphere/Energy; see requirements in the “School of Engineering” section of this bulletin.

At least one year of graduate study is recommended for professional practice. Students who contemplate advanced study at Stanford should discuss their plans with their advisers in the junior year. The coterminal B.S.-M.S. program should be considered by students who want an integrated five-year program; applications are considered once a year near the beginning of Winter Quarter.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MINOR IN CIVIL ENGINEERING OR ENVIRONMENTAL ENGINEERING

The department offers minor programs in Civil Engineering and in Environmental Engineering. Departmental expertise and undergraduate course offerings are available in the areas of architectural design, construction engineering, construction management, structural/geotechnical engineering, environmental engineering and science, environmental fluid mechanics and hydrology, and atmosphere/energy. The courses required for the minors typically have prerequisites. Minors are not ABET-accredited programs. Further details on minors are provided in the “School of Engineering” section of this Bulletin.

BACHELOR OF SCIENCE IN CIVIL AND ENVIRONMENTAL ENGINEERING

The B.S. in Civil Engineering and the B.S. in Environmental Engineering are ABET accredited programs, which place high priority on integrating research with engineering education. Four major objectives structure both degree programs:

1. To provide an understanding of engineering principles and the analytical, problem solving, design, and communication skills to continue succeeding and learning in diverse careers.
2. To prepare for successful engineering practice with a longer term perspective that takes into account new tools such as advanced information technology and biotechnology, and increasingly complex professional and societal expectations.
3. To prepare for possible graduate study in engineering or other professional fields.
4. To develop the awareness, background, and skills necessary to become responsible citizens and leaders in service to society.

Students who major in Civil Engineering or in Environmental Engineering must complete the appropriate requirements for the B.S. degree listed under Undergraduate Programs in the “School of Engineering” section of this bulletin. Each student has elective units, which may be used in any way the student desires, including additional studies in Civil and Environmental Engineering or any other school or department in the university. Because the undergraduate engineering curriculum provides breadth of study, students who intend to enter professional practice in civil or environmental engineering should plan to obtain their professional education at the graduate level.

A number of undergraduate programs at Stanford may be of interest to students seeking to specialize in environmental studies. In addition to the two majors offered in the department, students should examine related programs such as Earth Systems, Geological and Environmental Sciences, Urban Studies, and Human Biology.

HONORS PROGRAM

This program leads to a B.S. with honors for undergraduates majoring in Civil Engineering or in Environmental Engineering. It is designed to encourage qualified students to undertake a more intensive study of civil and environmental engineering than is required of the normal majors through a substantial, independent research project.

The program involves an in-depth research study in an area proposed to and agreed to by a Department of Civil and Environmental Engineering faculty adviser and completion of a thesis of high quality. A written proposal for the research to be undertaken must be submitted and approved by the faculty advisor in the fourth quarter prior to graduation. At the time of application, the student must have an overall grade point average (GPA) of at least 3.3 for course work at Stanford; this GPA must be maintained to graduation. The thesis is supervised by a CEE faculty adviser and must involve input from the School of Engineering writing program by means of ENGR 202S or its equivalent. The written thesis must be approved by the thesis adviser. Students are encouraged to present their results in a seminar for faculty and students. Up to 10 units of CEE 199H, Undergraduate Honors Research in Civil and Environmental Engineering, may be taken to support the research and writing (not to duplicate ENGR 202S). These units are beyond the normal Civil Engineering or Environmental Engineering major program requirements.

GRADUATE PROGRAMS IN CIVIL AND ENVIRONMENTAL ENGINEERING

The Department of Civil and Environmental Engineering (CEE), in collaboration with other departments, offers eight graduate degrees structured in three degree programs described below. The Atmosphere/Energy Program offers degrees with that designation. The Built Environment Program offers degrees with five designations: Construction Engineering and Management, Design/Construction Integration, Geomechanics, and Structural Engi-
neering and Sustainable Design Construction. The Environmental and Water Studies Program offers degrees with two designations: Environmental Engineering and Science, and Environmental Fluid Mechanics and Hydrology. The final portion of this section describes University and departmental requirements for graduate degrees.

Research work and instruction under the three programs are carried out in these facilities: Building Energy Laboratory; Environmental Engineering and Science Laboratory; Environmental Fluid Mechanics Laboratory (EFML); Geotechnical Engineering Laboratory; Structural Engineering Laboratory; and water quality control research and teaching laboratories. The John A. Blume Earthquake Engineering Center conducts research on earthquake engineering including advanced sensing and control, innovative materials, and risk hazard assessment. Research and advanced global teamwork education is conducted in the Project Based Learning (PBL) Laboratory. In collaboration with the Department of Computer Science, the Center for Integrated Facility Engineering (CIFE) employs advanced CAD, artificial intelligence, communications concepts, and information management to integrate participants in the facility development process and to support design and construction automation. The Collaboratory for Research on Global Projects (CRGP) is a multi-school, multi-university research program aimed at improving the performance of global engineering and construction projects, with a special focus on sustainable infrastructure in developing countries.

University Requirements—The University requirements governing the M.S., Engineer, and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

Admission—Applications require online submission of the application form and statement of purpose, followed by three letters of recommendation, results of the General Section of the Graduate Record Examination, and transcripts of courses taken at colleges and universities. See http://gradadmissions.stanford.edu. Policies for each of the department’s programs are available by referring to http://cee.stanford.edu.

Successful applicants are advised as to the degree and program for which they are admitted. If students wish to shift from one CEE program to another after being accepted, an application for the intradepartmental change must be filed within the department; they will then be advised whether the change is possible. If, after enrollment at Stanford, students wish to continue toward a degree beyond the one for which they were originally admitted, a written application must be made to the Department of Civil and Environmental Engineering.

Financial Assistance—The department maintains a continuing program of financial aid for graduate students. Applications for financial aid and assistantships should be filed by December 15, 2009; it is important that Graduate Record Examination scores be available at that time. Applicants not requesting financial assistance have until February 2, 2010 for the online submission.

Teaching assistantships carry a salary for as much as one-half time work to assist with course offerings during the academic year. Up to half-time research assistantships also are available. Engineer and Ph.D. candidates may be able to use research results as a basis for the thesis or dissertation. Assistantships and other basic support may be supplemented by fellowship and scholarship awards or loans. Continued support is generally provided for further study toward the Engineer or Ph.D. degree based on the student’s performance, the availability of research funds, and requisite staffing of current projects.

HONORS COOPERATIVE PROGRAM
Some of the department’s graduate students participate in the Honors Cooperative Program (HCP), which makes it possible for academically qualified engineers and scientists in industry to be part-time graduate students in Civil and Environmental Engineering while continuing professional employment. Prospective HCP students follow the same admissions process and must meet the same admissions requirements as full-time graduate students. For more information regarding the Honors Cooperative Program, see the “School of Engineering” section of this bulletin.

PROGRAMS OF STUDY IN CIVIL AND ENVIRONMENTAL ENGINEERING

ATMOSPHERE/ENERGY
Energy and Atmosphere are linked in two primary ways. First, fossil-fuel derived energy use contributes to air pollution and climate change. Second, atmospheric winds and solar radiation are major sources of renewable energy. Because atmospheric problems can be mitigated best by increasing the efficiency with which energy is used, optimizing the use of natural energy resources, and understanding the effects of energy technologies on the atmosphere, the areas of Energy and Atmosphere are naturally coupled together.

Students in this program receive a transcript designation of Atmosphere/Energy. Courses include those in energy resources, indoor and outdoor air pollution, energy efficient buildings, climate change, renewable energy, weather and storm systems, energy technologies in developing countries, energy systems, and air quality management.

Current research in the program includes projects on wind energy distribution and statistics, indoor exposure to air pollutants, the effects of a hydrogen economy on atmospheric pollution and climate, measurements of particulate matter and vehicle exhaust, hydrogen and other fuel generation by bacteria, numerical modeling of the effects of vehicles and power plants on climate, numerical weather prediction, improving the energy efficiency of buildings, improving the links between wind farms and the transmission grid, and studying the effects of aerosol particles on UV radiation and climate, among others.

Within the department, the program links to studies of water quality, environmental biotechnology, environmental fluid mechanics, sustainable construction, green buildings, and risk management. Outside the department, it links to Earth Systems, Management Science and Engineering, Mechanical Engineering, Energy Resources Engineering, Urban Studies, Aeronautics and Astronautics, and Biology, among others. In addition, the program has natural connections with the Woods Institute for the Environment, the Interdisciplinary Graduate Program in Environment and Resources (IPER), and the Global Climate and Energy Program (GCEP).

SUSTAINABLE BUILT ENVIRONMENT
The Sustainable Built Environment group in the department includes faculty from structural engineering and geomechanics, construction engineering and management, and design-construction integration. Our focus is on educating practitioners and researchers who can play a variety of roles in planning, designing, building and operating more sustainable buildings and infrastructure. The Structural Engineering and Geomechanics (SEG) program educates designers who want to progress beyond traditional life safety code-based design, to develop and disseminate "performance-based" structural and geotechnical engineering methods and tools that maximize the life-cycle economic value of facilities. The Construction Engineering and Management (CEM) program prepares students for careers with progressive construction firms worldwide, interested in building more sustainable buildings and infrastructure using advanced modeling and visualization methods and tools that we call "Virtual Design and Construction". The Design-Construction Integration (DCI) program combines courses from CEM and SEG, along with additional DCI courses, to educate professionals for design construction firms that provide integrated design-build project delivery, construction management and pre-construction services. Our program in Sustainable Design and Construction (SDC) expands the breadth of the DCI program with courses in sustainable, multi-stakeholder design methods and tools that incorporate lifecycle cost analysis, green architectural design, lighting and energy analysis, to educate students from a variety of undergraduate backgrounds interested in promoting more sustaina-
ble development of buildings and infrastructure. Each of these programs offers MS, Engineer and Ph.D degrees. Admissions to these programs are handled separately; prospective students should indicate their preference on their application.

CONSTRUCTION ENGINEERING AND MANAGEMENT

The Construction Engineering and Management (CEM) program prepares technically qualified students for responsible engineering and management roles in all phases of the development of major constructed facilities. It emphasizes management techniques useful in organizing, planning, and controlling the activities of diverse specialists working within the unique project environment of the construction industry, and it covers construction engineering aspects of heavy, industrial and building construction. The CEM concentration offers courses in: building systems, construction administration, construction law, project finance, accounting, real estate development, structural design, HVAC design and construction, equipment and methods, estimating, international construction, labor relations, managing human resources, planning and control techniques, productivity improvement, and project and company organizations. Additional related course work is available from other programs within the department, from other engineering departments, and from other schools in the University such as Earth Sciences and the Graduate School of Business. The CEM program allows students substantial flexibility to tailor their program of study for careers with general contractors, specialty contractors, real estate or infrastructure developers or facility owners and operators.

DESIGN-CONSTRUCTION INTEGRATION

The Design-Construction Integration (DCI) program prepares students for multidisciplinary collaborative teamwork in an integrated design and construction process. The program extends a student’s design or construction background with core courses in each of these areas and develops the background needed to understand the concerns and expertise of the many project stakeholders. It includes a comprehensive project-based learning experience. The field of study in Design-Construction Integration is open to applicants with backgrounds in engineering and science. Applicants should also have a background in the planning, design, or construction of facilities by virtue of work experience and/or their undergraduate education. Knowledge in subjects from the traditional areas of civil engineering is necessary for students to receive the degree and to satisfy prerequisite requirements for some of the required graduate courses. Students with an undergraduate degree in civil engineering, and who expect to pursue careers with design or construction firms that emphasize design-build, EPC, or turnkey projects should consider DCI.

STRUCTURAL ENGINEERING AND GEOMECHANICS

The Structural Engineering and Geomechanics (SEG) program encompasses teaching and research programs in structural design and analysis, structural materials, earthquake engineering and structural dynamics, advanced sensing and structural health monitoring, risk and reliability analysis, computational science and engineering, and geotechnical engineering including geomechanics. The SEG program prepares students for industrial or academic careers. Students can balance engineering fundamentals with modern computational and experimental methods to customize programs to launch careers as consultants on large and small projects, designers, and engineering analysts.

Structural design and analysis focuses on the conceptual design of structural systems and on computational methods for predicting the static and dynamic, linear and nonlinear responses of structures. Structural materials research and teaching focuses on the design and analysis of high-performance materials and materials targeting a reduced environmental impact.

Earthquake engineering and structural dynamics addresses earthquake phenomena, ground shaking, and the behavior, analysis, and design of structures under seismic and other dynamic forces. The John A. Blume Earthquake Engineering Center conducts advanced analytical and experimental research in earthquake engineering and houses static and dynamic testing equipment including two shaking tables. Reliability and risk analysis focuses on advanced methods for structural safety evaluation and design, including methods for loss estimation from damage and failures of structures and lifeline systems. Computational science and engineering emphasizes the application of modern computing methods to structural engineering and geomechanics and encompasses numerical, structural, and geotechnical analysis, including finite element analysis and boundary element methods. The geomechanics program focuses on the application of the principles of applied mechanics to problems involving geologic materials and includes theoretical soil and rock mechanics, computational methods, and analysis and design of foundations and earth structures.

SUSTAINABLE DESIGN AND CONSTRUCTION

The Sustainable Design and Construction (SDC) program prepares students for careers in planning, designing, building and operating sustainable buildings and infrastructure to maximize their life-cycle economic value, their net contribution to environmental functions and services, and their social equity. The program offers courses in project finance; sustainable multidisciplinary; multi-stakeholder planning and design processes; green architecture; performance-based structural design; building energy systems; and sustainable construction processes and materials. Classes on strategy, economics and organization design for new businesses, and corporate or governmental initiatives focusing on enhancing the sustainability of buildings and infrastructure round out the program. This degree program is being launched in 2008-2009 and is intended for students with undergraduate degrees in architecture, engineering, science, construction management, economics or business who wish to pursue careers that enhance the sustainability of the built environment. Potential employers include architectural or engineering design firms, sustainability consultants, construction firms focusing on green buildings, green-tech start-ups and green-tech venture funds.

ENVIRONMENTAL AND WATER STUDIES

Environmental and water studies include environmental engineering and science, environmental fluid mechanics, environmental planning, and hydrology. Course offerings permit intensive study in a single area or interrelated study between areas. Programs are flexible to foster interaction among students and encourage the development of individual programs. The Stanford laboratories for water quality control and environmental fluid mechanics are well equipped for advanced research and instruction.

Courses from other programs and departments complement these course offerings. Examples include Computer Science (numerical methods), Geological and Environmental Sciences (geostatistics, hydrogeology), Mechanical Engineering (applied math, experimental methods, fluid mechanics, heat transfer), Energy Resources Engineering (reservoir engineering, well-test analysis), and Statistics (probability and statistics). The major areas of specialization in the two programs, environmental engineering and science, and environmental fluid mechanics and hydrology, are described below. Admissions to these programs are handled separately; prospective students should indicate their preference on their application.

ENVIRONMENTAL ENGINEERING AND SCIENCE

The Environmental Engineering and Science (EES) program emphasizes the chemical and biological processes involved in water quality engineering, pollution treatment, remediation, and environmental protection. Course offerings include: the biological, chemical, and engineering aspects of water supply; the movement and fate of pollutants in surface and ground waters, soil, and the atmosphere; hazardous substance control; molecular environmental biotechnology; and water and air pollution. Companion courses in the Environmental Fluid Mechanics and Hydrology Program (EFMH) include environmental planning and impact assessment,
and environmental fluid mechanics, hydrology, and transport modeling.

ENVIRONMENTAL FLUID MECHANICS AND HYDROLOGY

The Environmental Fluid Mechanics and Hydrology (EFMH) program focuses on understanding the physical processes controlling the movement of mass, energy, and momentum in the water environment and the atmosphere. The program also considers environmental and institutional issues involved in planning water resources development projects. Environmental fluid mechanics courses address: experimental methods; fluid transport and mixing processes; the fluid mechanics of stratified flows; natural flows in coastal waters, estuaries, lakes, and open channels; and turbulence and its modeling. Hydrology courses consider flow and transport in porous media, stochastic methods in both surface and subsurface hydrology, and watershed hydrology and modeling. Atmosphere courses deal with climate, weather, storms and air pollution and their modeling. Planning courses emphasize environmental policy implementation and sustainable water resources development. The research of this group is focused in the Environmental Fluid Mechanics Laboratory, which includes the P. A. McCuen Environmental Computer Center.

MASTERS OF SCIENCE IN CIVIL AND ENVIRONMENTAL ENGINEERING

The following programs are available leading to the M.S. degree in Civil and Environmental Engineering: Atmosphere/Energy, Construction Engineering and Management, Design/Construction Integration, Environmental Engineering and Science, Environmental Fluid Mechanics and Hydrology, Geomechanics, and Structural Engineering and Sustainable Design Construction.

Students admitted to graduate study with a B.S. in Civil Engineering, or equivalent, from an accredited curriculum can satisfy the requirements for the M.S. degree in Civil and Environmental Engineering by completing a minimum of 45 units beyond the B.S. All 45 units must be taken at Stanford. A minimum 2.75 grade point average (GPA) is required for candidates to be recommended for the M.S. degree. No thesis is required.

The program of study must be approved by the faculty of the department and should include at least 45 units of courses in engineering, mathematics, science, and related fields unless it can be shown that other work is pertinent to the student’s objectives. Additional program area requirements are available from the department’s student services office (Y2E2 room 316).

Candidates for the M.S. in Civil and Environmental Engineering who do not have a B.S. in Civil Engineering may, in addition to the above, be required to complete those undergraduate courses deemed important to their graduate programs. In such cases, more than three quarters is often required to obtain the degree.

ENGINEER IN CIVIL AND ENVIRONMENTAL ENGINEERING

A student with an M.S. in Civil Engineering may satisfy the requirements of the degree in Civil and Environmental Engineering by completing 45 unduplicated course work and research units for a total of 90 units. Engineer candidates must submit an acceptable thesis (12 to 15 units) and maintain a minimum GPA of 3.0. The program of study must be approved by a faculty member in the department.

This degree is recommended for those desiring additional graduate education, especially those planning a career in professional practice. The thesis normally should be started in the first quarter of graduate study after the M.S. degree. Programs are offered in the fields of specialization mentioned for the M.S. degree. The Engineer thesis topic, for students who will continue study toward a CEE Ph.D., must be significantly different from their doctoral research.

DOCTOR OF PHILOSOPHY IN CIVIL AND ENVIRONMENTAL ENGINEERING

The Ph.D. is offered under the general regulations of the University as set forth in the “Graduate Degrees” section of this bulletin. This degree is recommended for those who expect to engage in a professional career in research, teaching, or technical work of an advanced nature. The Ph.D. program requires a total of 135 units of graduate study, at least 90 units of which must be at Stanford. Up to 45 units of graduate study can be represented by the M.S. program described above. Students must maintain a minimum GPA of 3.0 in post-M.S. course work. All candidates for the Ph.D. degree are required to complete CEE 200 in conjunction with a one-quarter teaching assistantship/course assistantship to gain training and instructional experience. Further information on Ph.D. requirements and regulations is found in the department handbook.

The program of study is arranged by the prospective candidate at the beginning of the second year with the advice of a faculty committee whose members are nearest in the field of interest to that of the student. The chair of the committee serves as the student’s interim adviser until such time as a member of the faculty has agreed to direct the dissertation research. Insofar as possible, the program of study is adapted to the interests and needs of the student within the framework of the requirements of the department and the University.

By the end of the second year of graduate study (or by the end of the first year for students who enroll at Stanford with an M.S.), the student is expected to pass the department’s General Qualifying Examination (GQE) to be admitted to candidacy for the doctoral degree. The purpose of the GQE is to ensure that the student is adequately prepared to undertake doctoral research and has a well planned research topic. The exam may take the form of (1) a written and/or oral general examination of the candidate’s major field, (2) a presentation and defense of the candidate’s doctoral research dissertation proposal, or (3) a combination research proposal and general examination. The GQE is administered by an advisory committee consisting of at least three Stanford faculty members, including a chair who is a faculty member in Civil and Environmental Engineering. All members are normally on the Stanford Academic Council. A petition for appointment of one advisory committee member who is not on the Academic Council may be made if the proposed person contributes an area of expertise that is not readily available from the faculty. Such petitions are subject to approval by the department chair. When the primary research adviser is not a member of the CEE Academic Council faculty, the committee must consist of four examiners, with two members from the CEE department.

PH.D. MINOR IN CIVIL AND ENVIRONMENTAL ENGINEERING

A Ph.D. minor is a program outside a major department. Requirements for a minor are established by the minor department. Acceptance of the minor as part of the total Ph.D. program is determined by the major department. Application for the Ph.D. minor must be approved by both the major and the minor department, and the minor department must be represented at the University oral examination.

A student desiring a Ph.D. minor in Civil and Environmental Engineering (CEE) must have a minor program adviser who is a regular CEE faculty member in the program of the designated subfield. This adviser must be a member of the student’s University oral examination committee and the reading committee for the doctoral dissertation.

The program must include at least 20 units of graduate-level course work (courses numbered 200 or above, excluding special studies and thesis) in CEE completed at Stanford University. The list of courses must form a coherent program and must be approved by the minor program adviser and the CEE chair. A minimum GPA of 3.0 must be achieved in these courses.
OVERSEAS STUDIES COURSES IN CIVIL AND ENVIRONMENTAL ENGINEERING

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://exploreCourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

INSTITUTE FOR COMPUTATIONAL AND MATHEMATICAL ENGINEERING

Emeritus: (Professor) Joe Keller (Mathematics, Mechanical Engineering)
Director: Peter Glynn (Management Science and Engineering)
Director of Student Affairs: Walter Murray (Management Science and Engineering)

Professors: Stephen Boyd (Electrical Engineering), Emanuel Candes (Mathematics, Statistics), Gunnar Carlsson (Mathematics), Peris Diazonis (Mathematics, Statistics), David Donoho (Statistics), Charbel Farhat (Aeronautics and Astronautics, Mechanical Engineering), Peter Glynn (Management Science and Engineering), Leonid Oniski (Computer Science), Pat Hanrahan (Computer Science, Electrical Engineering), Jerry Harris (Geophysics), Peter Kitandis (Civil and Environmental Engineering), Tze Leung Lai (Statistics), Sanjiva Lele (Mechanical Engineering, Aeronautics and Astronautics), Parviz Moin (Mechanical Engineering), Brad Osgood (Electrical Engineering), George Papanicolaou (Mathematics), Peter Pinsky (Mechanical Engineering), Eric Shaqfeh (Chemical Engineering, Mechanical Engineering), Andras Vasy (Mathematics), Lawrence Wein (Graduate School of Business), Wing Wong (Statistics), Yinyu Ye (Management Science and Engineering)

Associate Professors: Juan Alonso (Aeronautics and Astronautics), Ronald Fedkiw (Computer Science), Margot Gerritsen (Energy Resources Engineering), Ashish Goel (Management Science and Engineering), Heinz Pitsch (Mechanical Engineering), Charles Taylor (Bioengineering, Surgery), Benjamin Van Roy (Management Science and Engineering, Electrical Engineering)

Assistant Professors: Eric Darve (Mechanical Engineering), Oliver Fringer (Civil and Environmental Engineering), Gianluca Iacarino (Mechanical Engineering), Ramesh Johari (Management Science and Engineering), Adrian Lew (Mechanical Engineering), Amin Saberi (Management Science and Engineering), Andrew Spakowitz (Chemical Engineering)

Professors (Research): Antony Jameson (Aeronautics and Astronautics), Walter Murray (Management Science and Engineering), Arogysavami Paulraj (Electrical Engineering), Michael A. Saunders (Management Science and Engineering)

Senior Lecturer: Vadim Khayms
Consulting Assistant Professor: Sepandar Kamvar

Web Site: http://icme.stanford.edu
Mail Code: 94305-4042
Phone: (650) 736-9038

Courses offered by the Institute for Computational and Mathematical Engineering (iCME) is to develop sophisticated algorithmic and mathematical tools that impact many applied disciplines. iCME leverages Stanford’s strengths in engineering applications and the physical, biological, and information sciences to guide the development of modern methods for research and education in computational mathematics.

iCME’s teaching mission is to provide courses for graduate students and undergraduates from all departments in the mathematical sciences focusing on theoretical work and its role in the solution of real problems, integrating numerical computation to facilitate application of mathematical techniques and theories. The institute identifies research areas that benefit from a multidisciplinary approach in which computational mathematics plays a key role such as discrete mathematics, including computational probability and combinatorial optimization, optimization, stochastics, and numerical solution of partial differential equations. Research applications include the physical sciences, business, medicine, and information science.

A strength of iCME is its multidisciplinary intellectual environment, with interaction among students and faculty with diverse backgrounds and expertise. iCME offers service courses for undergraduates and graduate students to fulfill departmental requirements, core courses for M.S. and Ph.D. students in Scientific Computing and Computational Mathematics, and specialized electives in various application areas.

GRADUATE PROGRAMS IN COMPUTATIONAL AND MATHEMATICAL ENGINEERING

University regulations governing the M.S. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

MASTER OF SCIENCE IN COMPUTATIONAL AND MATHEMATICAL ENGINEERING

The M.S. degree in Computational and Mathematical Engineering is intended as a terminal professional degree and does not lead to the Ph.D. program. Students interested in the doctoral program should apply directly to the Ph.D. program. Master’s students who have maintained a minimum grade point average (GPA) of 3.5 are eligible to take the Ph.D. qualifying exam; those who pass this examination and secure a research adviser may continue into the Ph.D. program upon acceptance by the institute.

The master’s program consists of 45 units of course work taken at Stanford. No thesis is required; however, students may become involved in research projects during the master’s program, particularly to explore an interest in continuing to the doctoral program. Although there is no specific background requirement, significant exposure to mathematics and engineering course work is necessary for successful completion of the program.

Applications to the M.S. program and all required supporting documents must be received by January 12, 2010. See http://icme.stanford.edu/admissions for up-to-date information including departmental deadlines. See

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

REQUIREMENTS

A candidate is required to complete a program of 45 units of courses numbered 200 or above. Courses below 200 level will require special approval from the program office. At least 36 of these must be graded units, passed with a grade point average (GPA) of 3.0 (B) or better. Master’s students interested in continuing to the doctoral program must maintain a 3.5 or better grade point average in the program.

Requirement 1—The following courses may be needed as prerequisites for other courses in the program: MATH 41, 42, 51, 52, 53, 103, 113; CME 100, 102, 104, 108, 200, 204, 302; CS 106A, 106X, 108, 205, 229; ENGR 62; STATS 116 or 202.

Requirement 2—Students must demonstrate foundational knowledge in the field by completing the following core courses:

   CME 302. Numerical Linear Algebra
   CME 303. Partial Differential Equations of Applied Mathematics
   CME 304. Numerical Optimization
   CME 305. Discrete Mathematics and Algorithms
   CME 306. Numerical Solution of Partial Differential Equations
   CME 308. Stochastic Methods in Engineering

Courses in this area must be taken for letter grades. Deviations from the core curriculum must be justified in writing and approved by the student’s iCME adviser and the chair of the iCME curriculum committee. Courses that are waived may not be counted towards the master’s degree.

Requirement 3—12 units of general electives to demonstrate breadth of knowledge in technical area. The elective course list represents automatically accepted electives within the program. However, electives are not limited to the list below, and the list is expanded on a continuing basis. The elective part of the iCME program is meant to be broad and inclusive of relevant courses of comparable rigor to iCME courses. Courses outside this list can be accepted as electives subject to approval by the student’s iCME adviser.

1. Aeronautics and Astronautics:
   AA 214A. Numerical Methods in Fluid Mechanics
   AA 214B. Numerical Computation of Compressible Flow
   AA 214C. Numerical Computation of Viscous Flow
   AA 218. Introduction to Symmetry Analysis

2. Computational and Mathematical Engineering:
   CME 208. Mathematical Programming and Combinatorial Optimization
   CME 212. Introduction to Large Scale Computing in Engineering
   CME 215 A,B. Advanced Computational Fluid Dynamics
   CME 324. Advanced Methods in Matrix Computation
   CME 340. Large-Scale Data Mining
   CME 342. Parallel Methods in Numerical Analysis
   CME 380. Constructing Scientific Simulation Codes

3. Computer Science:
   CS 164. Computing with Physical Objects: Algorithms for Shape and Motion
   CS 221. Artificial Intelligence: Principles and Techniques
   CS 228. Probabilistic Models in Artificial Intelligence
   CS 229. Machine Learning
   CS 255. Introduction to Cryptography
   CS 261. Optimization and Algorithmic Paradigms
   CS 268. Geometric Algorithms
   CS 315A. Parallel Computer Architecture and Programming
   CS 340. Level Set Methods
   CS 348A. Computer Graphics: Geometric Modeling
   CS 364A. Algorithmic Game Theory

4. Electrical Engineering:
   EE 222. Applied Quantum Mechanics I
   EE 223. Applied Quantum Mechanics II
   EE 256. Numerical Electromagnetics
   EE 262. Two-Dimensional Imaging
   EE 278. Introduction to Statistical Signal Processing
   EE 292E. Analysis and Control of Markov Chains
   EE 363. Linear Dynamic Systems
   EE 364. Convex Optimization
   EE 376A. Information Theory

5. Management Science and Engineering:
   MS&E 220. Probabilistic Analysis
   MS&E 221. Stochastic Modeling
   MS&E 223. Simulation
   MS&E 238. Network Structures and Analysis
   MS&E 251. Stochastic Decision Models
   MS&E 310. Linear Programming
   MS&E 313. Vector Space Optimization
   MS&E 316. Pricing Algorithms and the Internet
   MS&E 321. Stochastic Systems
   MS&E 322. Stochastic Calculus and Control
   MS&E 323. Stochastic Simulation

6. Mathematics:
   MATH 136. Stochastic Processes
   MATH 171. Fundamental Concepts of Real Analysis
   MATH 221. Mathematical Methods of Imaging
   MATH 227. Partial Differential Equations and Diffusion Processes
   MATH 236. Introduction to Stochastic Differential Equations
   MATH 237. Stochastic Equations and Random Media
   MATH 238. Mathematical Finance

7. Mechanical Engineering:
   ME 335A,B,C. Finite Element Analysis
   ME 346B. Introduction to Molecular Simulations
   ME 408. Spectral Methods in Computational Physics
   ME 412. Engineering Functional Analysis and Finite Elements
   ME 469A,B. Computational Methods in Fluid Mechanics
   ME 484. Computational Methods in Cardiovascular Bioengineering

8. Statistics:
   STATS 208. Introduction to the Bootstrap
   STATS 217. Introduction to Stochastic Processes
   STATS 219. Stochastic Processes
   STATS 227. Statistical Computing
   STATS 237. Time Series Modeling and Forecasting
   STATS 250. Mathematical Finance
   STATS 305. Introduction to Statistical Modeling
   STATS 310A,B,C. Theory of Probability
   STATS 324. Classical Multivariate and Random Matrix Theory
   STATS 345. Computational Molecular Biology
   STATS 362. Monte Carlo Sampling
   STATS 366. Computational Biology

9. Other:
   CEE 281. Finite Element Structural Analysis
   CEE 362G. Stochastic Inverse Modeling and Data Assimilation Methods
   ENGR 209A. Analysis and Control of Nonlinear Systems

Requirement 4—9 units of focused graduate application electives, approved by the iCME graduate adviser, in the areas of engineering, mathematics, physical, biological, information, and other quantitative sciences. These courses should be foundational depth courses relevant to the student’s professional development and research interests.

Requirement 5—3 units of an iCME graduate seminar or other approved seminar.
DOCTOR OF PHILOSOPHY IN COMPUTATIONAL AND MATHEMATICAL ENGINEERING

Applications to the Ph.D. program and all required supporting documents must be received by December 12, 2009. See http://icme.stanford.edu/admissions for up-to-date information. Prospective graduate students should see http://gradadmissions.stanford.edu for information and application materials. Applicants should take the Graduate Record Examination by October of the year the application is submitted.

Admission to the Ph.D. program does not imply that the student is a candidate for the Ph.D. degree. Advancement to candidacy requires superior academic achievement and passing the qualifying examination.

Requirements—
1. Complete a minimum of 135 units of residency at Stanford, including:
   a. 45 units from the master’s program
   b. 27 units of focused electives in an area planned with the student’s Ph.D. adviser; 12 of these units should come from iCME specialized electives with significant computational content such as the CME 320-380 series; the focused and specialized elective component of the iCME program is meant to be broad and inclusive of relevant courses of comparable rigor to iCME courses. The elective course list following represents automatically accepted electives within the program. However, electives are not limited to the list below, and the list is expanded on a continuing basis; courses outside the list can be accepted as electives subject to approval by the student’s iCME adviser.
   c. 60 units of thesis research
   d. 3 units of free elective
2. Maintain a grade point average (GPA) of 3.5
3. Pass the qualifying examination administered by iCME
4. Complete an approved program of original research
5. Complete a written dissertation based on research
6. Pass the oral examination that is a defense of the dissertation research.

Specialized Elective List—See requirement 1b above.

CME 362G. Stochastic Inverse Modeling and Data Assimilation Methods
CS 348A. Computer Graphics: Geometric Modeling
EE 363. Linear Dynamical Systems
EE 364A,B. Convex Optimization I,II
EE 368. Digital Image Processing
MATH 205A. Real Analysis
MATH 215A. Complex Analysis, Geometry and Topology
MATH 217A. Differential Geometry
MATH 221. Mathematical Methods of Imaging
MATH 227. Partial Differential Equations and Diffusion Processes
MATH 236. Introduction to Stochastic Differential Equations
MATH 237. Stochastic Equations and Random Media
MATH 238. Mathematical Finance
ME 335A-B-C. Finite Element Analysis
ME 346B. Introduction to Molecular Simulations
ME 351A-B. Fluid Mechanics
ME 361. Turbulence
ME 408. Spectral Methods in Computational Physics
ME 412. Engineering Functional Analysis and Finite Elements
ME 469A-B. Computational Methods in Fluid Mechanics
MS&E 319. Approximation Algorithms
MS&E 336. Topics in Game Theory with Engineering Applications
STATS 305. Introduction to Statistical Modeling
STATS 306A. Methods for Applied Statistics
STATS 306B. Methods of Applied Statistics
STATS 318. Modern Markov Chains
STATS 366. Computational Biology

Note: All courses listed under “Requirement 3” under the “Master of Science in Computational and Mathematical Engineering” section can be used for fulfilling the general elective requirement.

FINANCIAL ASSISTANCE

The department awards a limited number of fellowships, course assistantships, and research assistantships to incoming graduate students. Applying for such assistance is part of submitting the application for admission to the program. Students are appointed for half-time assistantships which provides a tuition scholarship at the 8, 9, 10 unit rate during the academic year and a monthly stipend. Half-time appointments generally require 20 hours of work per week. Most course assistantships and research assistantships are awarded to students in the doctoral program in iCME. If the number of Ph.D. students is not sufficient to staff all course and research assistantship positions available, these positions may be open to master’s students. However, master’s students are not guaranteed financial assistance.

PH.D. MINOR IN COMPUTATIONAL AND MATHEMATICAL ENGINEERING

For a minor in Computational and Mathematical Engineering (CME), a doctoral candidate must complete 20 units of approved graduate level courses. These should include three iCME core courses and three iCME graduate electives at the 300 level or above. A maximum of two units can be taken as iCME seminar units. All courses, except the seminar courses, must be taken for a letter grade and passed with a grade of ‘B’ or better. Minor programs must receive approval from the iCME curriculum chair prior to completing any of the iCME graduate electives. Minor programs should be developed in close discussion between the student and the student’s primary Ph.D. adviser. Courses taken in fulfillment of the minor cannot be used for the student’s Ph.D. degree.

COMPUTER SCIENCE

Chair: Jennifer Widom
Associate Chair for Education: Mehran Sahami
Professors: Alex Aiken, Dan Boneh, David Cheriton, William J. Dally, David Dill, Hector Garcia-Molina, Leonidas J. Guibas, Patrick Hanrahan, John Hennessy, Mark A. Horowitz, Oussama Khatib, Daphne Koller, Monica Lam, Jean-Claude Latombe, Marc Levoy, Zohar Manna, Teresa Mend, John Mitchell, Kunle Olukotun, Yoav Shoham, Sebastian Thrun, Jennifer Widom, Terry Winograd
Associate Professors: Serafin Batzoglou, Dawson Engler, Ronald P. Fedkiw, Michael Genesereth, Christoforos Kozyrakis, Christopher Manning, David Mazieres, Nick McKeown, Andrew Ng, Sergey A. Plotkin, Balaji Prabhakar, Mendel Rosenblum
Assistant Professors: Gill Bejerano, Jeffrey Heer, Sachin Katti, Scott Klemmer, Vladlen Koltun, Jure Leskovec, Philip Levis, Fei-Fei Li, Tim Roughgarden
Professors (Research): John Ousterhout, John K. Salisbury
Professor (Teaching): Eric S. Roberts
Associate Professor (Teaching): Mehran Sahami

Courtesay Professors: Russ Altman, Martin Fischer, Bernd Girod, Michael Levitt, Clifford J. Nass, Roy Pea, Fouad A. Tobagi

Judith Professor: Ashish Goel, Dan Jurafsky, Vijay Pai, Benjamin Van Roy

Consulting Professors: Paulo Blikstein, Atul Butte, Ramesh Johari, Ge Wang

Lecturers: Gerald Cain, Nicholas J. Parlante, Robert Plummer, Patrick Young, Julie Zelenski

Consulting Professors: Gary Bradski, Kathleen Fisher, Prabhakar Raghavan

Consulting Associate Professor: Federico Barbari, Pei Cao

*Adjunct
Consulting Assistant Professors: Kurt Akeley
Visiting Professor: Martin Abadi
* Recalled to active duty.

Mail Code: 94305-9025
Phone: (650) 723-2273
Web Site: http://www.cs.stanford.edu

Courses offered by the Department of Computer Science are listed under the subject code CS on the Stanford Bulletin’s ExploreCourses web site.

The Department of Computer Science (CS) operates and supports computing facilities for departmental education, research, and administration needs. All CS students have access to the departmental student machine for general use (mail, news, etc.), as well as computer labs with public workstations located in the Gates Building. In addition, most students have access to systems located in their research areas.

Each research group in Computer Science has systems specific to its research needs. These systems include workstations (PCs, Macs), multi-CPU computer clusters, and local mail and file servers. Servers and workstations running Linux or various versions of Windows are commonplace. Support for course work and instruction is provided on systems available through Information Technology Services (ITS) and the School of Engineering (SoE).

COMPUTER SCIENCES COURSE CATALOG NUMBERING SYSTEM

The first digit of a CS course number indicates its general level of sophistication:

001-099 Service courses for nontechnical majors
100-199 Other service courses, basic undergraduate
200-299 Advanced undergraduate/beginning graduate
300-399 Advanced graduate
400-499 Experimental
500-599 Graduate seminars

The tens digit indicates the area of Computer Science it addresses:

00 Introductory, miscellaneous
10 Hardware Systems
20 Artificial Intelligence
30 Numerical Analysis
40 Software Systems
50-59 Mathematical Foundations of Computing
60-69 Analysis of Algorithms
70-79 Computational Biology and Interdisciplinary Topics
80-89 Software Engineering
90-99 Independent Study and Practicum

UNDERGRADUATE PROGRAMS IN COMPUTER SCIENCE

The mission of Stanford’s undergraduate program in Computer Science is to provide a foundation of mathematics, science, and engineering knowledge. Building on Stanford’s core ideals of liberal education, the program combines fundamentals with practical experience in problem solving, programming, communication, and collaboration, allowing each student to realize his or her individual potential.

Graduates of the program are prepared to pursue graduate study at the highest academic level, or advance into leadership positions in industry. The program creates an atmosphere that promotes innovative thinking, values mutual respect and diversity, supports scholarship and research, instills ethical behavior, and cultivates lifelong learning.

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

The department offers both a major and a minor in Computer Science. The requirements for these programs are outlined in the “School of Engineering” section of this bulletin and described in more detail in the Handbook for Undergraduate Engineering Programs published by the School of Engineering. The Computer Science major offers a number of tracks (programs of study) from which students can choose, allowing them to focus their program on the areas of most interest. These tracks also reflect the broad diversity of areas in computing disciplines. The department has an honors program, which is described in the following section.

In addition to Computer Science itself, Stanford offers several interdisciplinary degrees with a substantial computer science component. The Computer Systems Engineering major (also in Engineering) allows the study of areas requiring a knowledge of both computer hardware and software, bridging the gap between traditional CS and Electrical Engineering majors. The Symbolic Systems major (in the School of Humanities and Sciences) offers an opportunity to explore computer science and its relation to linguistics, philosophy, and psychology. Finally, the Mathematical and Computational Sciences major (also Humanities and Sciences) allows students to explore computer science along with more mathematics, statistics, and operations research.

HONORS PROGRAM

The Department of Computer Science (CS) offers an honors program for undergraduates whose academic records and personal initiative indicate that they have the necessary skills to undertake high-quality research in computer science. Admission to the program is by application only. To apply for the honors program, students must be majoring in Computer Science, have a grade point average (GPA) of at least 3.6 in courses that count toward the major, and achieve senior standing (135 or more units) by the end of the academic year in which they apply. COTerminal master’s students are eligible to apply as long as they have not already received their undergraduate degree. Beyond these requirements, students who apply for the honors program must also find a Computer Science faculty member who agrees to serve as the thesis adviser for the project. Thesis advisers must be members of Stanford’s Academic Council.

Students who meet the eligibility requirements and wish to be considered for the honors program must submit a written application to the CS undergraduate program office by May 1 of the year preceding the honors work. The application must include a letter describing the research project, a letter of endorsement from the faculty sponsor, and a transcript of courses taken at Stanford. Each year, a faculty review committee selects the successful candidates for honors from the pool of qualified applicants.

In order to receive departmental honors, students admitted to the honors program must, in addition to satisfying the standard requirements for the undergraduate degree, do the following:

1. Complete at least 9 units of CS 191 or 191W under the direction of their project sponsor.
2. Attend a weekly honors seminar Winter and Spring quarters.
3. Complete an honors thesis deemed acceptable by the thesis adviser and at least one additional faculty member.
4. Present the thesis at a public colloquium sponsored by the department.
5. Maintain the 3.6 GPA required for admission to the honors program.

GUIDE TO CHOOSING INTRODUCTORY COURSES

Students arriving at Stanford have widely differing backgrounds and goals, but most find that the ability to use computers effectively is beneficial to their education. The department offers many introductory courses to meet the needs of these students.

For students whose principal interest is an exposure to the fundamental ideas behind computer science and programming, CS 105 is the most appropriate course. It is intended for students in nontechnical disciplines who expect to make some use of computers, but who do not expect to go on to more advanced courses. CS 105 meets the General Education Disciplinary Breadth Requirement in Engineering and Applied Sciences and includes an introduction to programming and the use of modern Internet-based technologies. Students interested in learning to use the computer should consider CS 1C, Introduction to Computing at Stanford.
Students who intend to pursue a serious course of study in computer science may enter the program at a variety of levels, depending on their background. Students with little prior experience or those who wish to take more time to study the fundamentals of programming should take 106A followed by 106B. Students in 106A need not have prior programming experience. Students with significant prior exposure to programming or those who want an intensive introduction to the field should take 106X or may start directly in 106B. CS106A uses Java as its programming language; CS106B and X use C++. No prior knowledge of these languages is assumed, and the prior programming experience required for 103B or X may be in any language. In all cases, students are encouraged to discuss their background with the instructors responsible for these courses.

After the introductory sequence, Computer Science majors and those who need a significant background in computer science for related majors in engineering should take 103, 107 and 110. CS 103 offers an introduction to the mathematical and theoretical foundations of computer science. CS 107 exposes students to a variety of programming concepts that illustrate critical strategies used in systems development; 110 builds on this material, focusing on the development of larger-scale software making use of systems and networking abstractions.

In summary:
- For exposure: 1C
- For nontechnical use: 105
- For scientific use: 106A
- For a technical introduction: 106A
- For significant use: 106A,B or 106X, plus 103, 107, and 110

GRADUATE PROGRAMS IN COMPUTER SCIENCE

The University’s basic requirements for the M.S. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

MASTER OF SCIENCE IN COMPUTER SCIENCE

In general, the M.S. degree in Computer Science is intended as a terminal professional degree and does not lead to the Ph.D. degree. Most students planning to obtain the Ph.D. degree should apply directly for admission to the Ph.D. program. Some students, however, may wish to complete the master’s program before deciding whether to pursue the Ph.D. To give such students a greater opportunity to become familiar with research, the department has instituted a program leading to a master’s degree with distinction in research. This program is described in more detail in a subsequent section.

Applications for admission to the M.S. program, and all of the required supporting documents, must be received by December 8, 2009. Exceptions are made for applicants who are already students at Stanford and are applying to the coterminal program. Information on these deadlines is available from the department.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

REQUIREMENTS

A candidate is required to complete a program of 45 units. At least 36 of these must be graded units, passed with a grade point average (GPA) of 3.0 (B) or better. The 45 units may include no more than 21 units of courses from those listed below in Requirements 1 and 2. Thus, students needing to take more than seven of the courses listed in Requirements 1 and 2 actually complete more than 45 units of course work in this program. Only well-prepared students may expect to finish the program in one year; most complete the program in six quarters. Students hoping to complete the program with 45 units should already have a substantial background in computer science, including course work or experience equivalent to all of Requirement 1 and some of the courses in Requirement 2.

Requirement 1—The following courses may be needed as prerequisites for other courses in the program: CS 103, or 103A, B, or X, 106A, B, or X, 107, 108, 110; MATH 51.

Requirement 2—Students must demonstrate breadth of knowledge in the field by completing the following courses:

1. Area A: Mathematical and Theoretical Foundations
   a. Required:
      1. Statistics (CS 109 or STATS 116 or MS&E 220 or CME 106)
      2. Algorithms (CS 161)
      3. Automata (CS 154)
   b. Choose one of:
      1. Numerical Analysis (CME 108 or 302)
      2. Logic (CS 156, 157, 258, or PHIL 251)
      3. Mathematical Methods (CS 205A)

2. Area B: Computer Systems
   a. Required: Architecture (EE 108B or 282)
   b. Choose two of:
      1. Operating Systems (CS 140)
      2. Compilers (CS 143 or 243)
      3. Introduction to Computer Networks (CS 144 or EE 284)

3. Area C: AI and Applications
   a. Choose two of the following, with at least one 200-level course:
      1. AI (CS 121 or 221)
      2. Databases (CS 145 or 245)
      3. Graphics (CS 148 or 248)

Individual specializations may narrow the set of choices in specific areas of the breadth requirement; see the individual specialization sheets at http://cs.stanford.edu/degrees/mscs/programsheets for details. Breadth courses are waived only if evidence is provided that similar or more advanced courses have been taken, either at Stanford or another institution. Courses that are waived rather than taken may not be counted toward the M.S. degree. Breadth courses may be taken on a satisfactory/no credit basis provided that a minimum of 36 graded units is presented within the 45-unit program.

Requirement 3—At least 1 but no more than 3 units of 500-level seminars must be taken.

Requirement 4—A program of 21 units in an area of specialization must be completed. All courses in this area must be taken for letter grades. Ten approved programs are listed below. Students may propose to the M.S. program committee other coherent programs that meet their goals and satisfy the basic requirements.

1. Artificial Intelligence
   a. at least four of: CS 223A, 223B, 224M, 224N, 224S, 224U, 226, 227, 228, 229
   b. a total of 21 units from category (a) and the following: CS 124, 205A, 222, 225A, 225B, 227B, 228T, 262, 270, 273A, 274, 275, 276, 277, 278, 279, 294A, 321, 322, 323, 327A, 328, 329, 374, 377,* 379,* ECON 286; EE 263, 363, 364A, 364B, 376A; ENGR 205, 209A; MS&E 251, 252, 339, 351, 352, 353; PSYCH 202, 205; STATS 202, 315A, 315B

2. Biocomputation
   a. at least four of: CS 262, 270, 272, 273A, 274, 278, 279
   b. a total of 21 units from category (a) and the following: CS 228, 229, 245, 261, 268, 275, 277, 345, 346, 365, 374; BIO- OC 218; BIOMEDIN 234; GENENG 203, 211; SBIO 228

3. Computer and Network Security
   a. CS 155, 244, 255
   b. at least three of: CS 142, 240, 241, 244B, 244C, 259, 261, 340, 344, 365
   c. at least one additional course chosen from (b) and the following: CS 240E, 244E, 245, 295, 344B, 345, 347, 355, 371A; EE 384A, 384B, 384C, 384M, 384S

4. Database Systems
   a. CS 245
   b. at least two of: CS 345, 346, 347
c. at least four additional courses from category (b) and the following: CS 240, 242, 243, 244, 244B, 244C, 249A, 249B, 255, 262, 270, 271, 272, 275, 276, 315A, 321, 344, 346B, 374

5. Human-Computer Interaction
   a. CS 147, 247
   b. at least one of: ME 313, 377; MS&E 27*, 28* (where 27* and 28* are any of the MS&E courses beginning with those digits that are offered in 2009/10); Psych 205, 252
   c. at least one of: CS124, 142, 148, 294H, 376, 377 (may be repeated for credit), 378, 448
   d. a total of 21 units from categories (a), (b), (c), and the following: CS 221, 223B, 229, 242, 248, 249A, 249B, 276, 379L; COMM 268, 269, 272; ENGR 231; ME 206A, 206B, 312, 314, 377; EDUC 124; MUSIC 205A; SYMB-SYS 145

   a. CME 302, 306; CS 205A
   b. at least two of: CME 326; CS 205B; MS&E 121; MATH 131, 132, 220; STATS 200
   c. at least two of: CS 223A, 327A, 339; AA 214A, 214B; CME 324, 342

7. Real-World Computing
   a. at least two of: CS 223A, 223B, 248
   c. a total of 21 units from the above and from the following: CS 225A, 225B, 228, 229, 247, 270, 271, 272, 273A, 274, 294A, 327A, 328, 448; CME 324

8. Software Theory
   a. CS 242, 243
   b. CS 241 or 258 or 259
   c. at least one of: CS 244, 245, 295, 343, 345
   d. at least one course from the following: CS 255, 261, 268, 355, 361A, 361B, 365
   e. at least two additional courses from (b), (c), and CS 346

9. Systems
   a. CS 240, 242
   b. at least three of: CS 243, 244, 245, 248, 348B; EE 271
   c. at least two additional courses chosen from (b) and the following: CS 194, 240C, 240D, 240E, 240X, 244B, 244C, 244E, 249A, 249B, 255, 259, 262, 270, 271, 272, 276, 294S, 295, 315A, 315B, 340, 343, 344, 348B, 344E, 345, 346, 347, 348A, 349, 374, 448; EE 384A, 384B, 384C, 384S, 384X, 384Y

10. Theoretical Computer Science
    a. CS 241 or 258 or 259, 261 (361A, 361B, or 365 may be substituted for 261)
    b. at least five additional courses chosen from CS 228, 241, 255, 258, 259, 262, 268, 345, 355, 357, 358, 359,* 361A, 361B, 364A, 364B, 365, 369,* 374; MS&E 310

* With consent of faculty adviser.

Requirement 5—Additional elective units must be technical courses (numbered 100 or above) related to the degree program.

1. Research Experience: The program must include significant research experience at the level of a half-time commitment over the course of three academic quarters. In any given quarter, the half-time research commitment may be satisfied by a 50 percent appointment to a departmentally supported research assistantship, 6 units of independent study (CS 393, 395, or 399), or a prorated combination of the two (such as a 25 percent research assistantship supplemented by 3 units of independent study). This research must be carried out under the direction of the primary or secondary adviser.

2. Supervised Writing and Research: In addition to the research experience outlined in the previous requirement, students must enroll in at least 3 units of independent research (CS 393, 395, or 399) under the direction of their primary or secondary adviser. These units should be closely related to the research described in the first requirement, but focused more directly on the preparation of the research report described in the next section. Note that the writing and research units described in parts (1) and (2) must be taken in addition to the 21 units required for the specialization, although they do count toward the 45 units required for the degree.

3. Research Report: Students must complete a significant report describing their research and its conclusions. The research report represents work that is publishable in a journal or at a high-quality conference, although it is presumably longer and more expansive in scope than a typical conference paper. A copy of the research report must be submitted to the Student Services office in the department three weeks before the beginning of the examination period in the student’s final quarter. Both the primary and secondary adviser must approve the research report before the distinction-in-research designation can be conferred.

**JOINT M.S. AND LAW DEGREE**

Law students interested in pursuing an M.S. in Computer Science must apply for admission to the Computer Science Department either (i) concurrently with applying to the Law School; or (ii) after being admitted to the Law School, but no later than the earlier of: (a) the end of the second year of law school; or (b) the Computer Science Department’s admission deadline for the year following that second year of law school. In addition to being admitted separately to the Law School and the Computer Science Department, students must secure permission from both academic units to pursue degrees in those units as part of a joint degree program. J.D./M.S. students may elect to begin their course of study in either the Law School or the Computer Science Department. Faculty advisors from each academic unit will participate in the planning and supervising of the student’s joint program. Students must be enrolled full time in the Law School for the first year of law school. Otherwise, enrollment may be in the graduate school or the Law School and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the M.S. degrees as specified in the Stanford Bulletin or elsewhere.

The Law School approves courses from the Computer Science Department that may count toward the J.D. degree, and the Computer Science Department shall approve courses from the Law School that may count toward the M.S. degree in Computer Science. In either case, approval may consist of a list applicable to all join degree students or may be tailored to each individual student program. No more than 45 units of approved courses may be counted toward both degrees. No more than 36 units of courses that originate outside the Law School may count toward the law degree. To the extent that courses under this joint degree program originate outside of the Law School but count toward the law degree, the Law School credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis, but not below zero. The maximum number of Law School credits that may be counted toward the M.S. in Computer Science is the greater of: (i) 12 units; or (ii) the maximum number of units from courses outside of the department that M.S. candidates in Comput-
er Science are permitted to count toward the M.S. in the case of a particular student’s individual program. Tuition and financial aid arrangements will normally be through the school in which the student is then enrolled.

**DOCTOR OF PHILOSOPHY IN COMPUTER SCIENCE**

Applications to the Ph.D. program and all supporting documents must be submitted and received online by December 8, 2009. See [http://cs.stanford.edu/wiki/admissions for complete information](http://cs.stanford.edu/wiki/admissions). Changes or updates to the admission process are posted in September and October, 2009. The following are general department requirements; contact the Computer Science Ph.D. administrator for details.

1. A student should plan and complete a coherent program of study covering the basic areas of computer science and related disciplines. The student’s advisor has primary responsibility for the adequacy of the program, which is subject to review by the Ph.D. program committee.

2. Each student, to remain in the Ph.D. program, must satisfy the breadth requirement covering introductory-level graduate material in major areas of computer science. A student who fulfills six of thirteen exams in the breadth requirement may apply for candidacy prior to the second year in the program. The student must completely satisfy the breadth requirement by the end of nine quarters (excluding Summer Quarters), and must pass a qualifying exam in the general area of the expected dissertation.

3. As part of the training for the Ph.D., the student is required to complete at least 4 units (a unit is 10 hours per week for one quarter) as a course assistant or instructor for courses in Computer Science numbered 100 or above.

4. The most important requirement is the dissertation. After passing the required qualifying examination, each student must secure the agreement of a member of the department faculty to act as the dissertation adviser. In some cases, the dissertation adviser may be in another department.

5. The student must pass a University oral examination in the form of a defense of the dissertation, typically held after all or a substantial portion of dissertation research has been completed.

6. The student is expected to demonstrate the ability to present scholarly material orally, both in the dissertation defense and by a lecture in a department seminar.

7. The dissertation must be accepted by a reading committee composed of the principal dissertation adviser, a second member from within the department, and a third member chosen from within the University. The principal adviser and at least one of the other committee members must be Academic Council members.

**PH.D. MINOR IN COMPUTER SCIENCE**

For a minor in Computer Science, a candidate must complete 20 unduplicated units of computer science course work numbered 200 or above. At least three of the courses must be master’s core courses to provide breadth and one course numbered 300 or above to provide depth. One of the courses taken must include a significant programming project to demonstrate programming efficiency. Courses must be taken for a letter grade and passed with a grade of ‘B’ or better. Applications for a minor in Computer Science are submitted at the same time as admission to candidacy.

**TEACHING AND RESEARCH ASSISTANT-SHIPS IN COMPUTER SCIENCE**

Graduate student assistantships are available. Half-time assistants receive a tuition scholarship for 8, 9, or 10 units per quarter during the academic year, and in addition receive a monthly stipend.

Duties for half-time assistants during the academic year involve approximately 20 hours of work per week. Course assistants (CAs) help an instructor teach a course by conducting discussion sections, consulting with students, and grading examinations. Research assistants (RAs) help faculty and senior staff members with research in computer science. Most course and research assistantships are held by Ph.D. students. If there is an insufficient number of Ph.D. students to staff teaching and research assistantships, then these positions are open to master’s students. However, master’s students should not plan on being appointed to an assistantship.

Students with fellowships may have the opportunity to supplement their stipends by serving as graduate student assistants.

**OVERSEAS STUDIES COURSES IN COMPUTER SCIENCE**

For course descriptions and additional offerings, see the listings in the [Stanford Bulletin’s ExploreCourses web site](http://explorecourses.stanford.edu) or the Bing Overseas Studies web site ([http://bosp.stanford.edu](http://bosp.stanford.edu)). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

**SPRING QUARTER**

**BERLIN**

OSPBER 45. Computers, Ethics, and Public Policy. 3-4 units, Eric Roberts, WIM, GER:EC:EthicReas

**ELECTRICAL ENGINEERING**

Chair: Mark Horowitz
Vice Chair: Simon Wong
Associate Chair (Admissions): Howard Zebker
Assistant Chair : TBD

Assistant Professors: Sachin Katti, Philip Levis, Subhasish Mitra, Andrea Montanari, Ada Poon, Boris Murmann, Peter Peumans, Tsachy Weissman

Acting Assistant Professor: Laurent Giovangrandi, Jaeha Kim

Curtesy Professors: Stacey Bent, John Brayman, David Cheriton, Amir Dembo, David L. Dill, Per Enge, Gary Glover, Peter...
Electrical Engineering courses are typically numbered according to the year in which the courses are normally taken.

- **010-099** first or second year
- **100-199** second through fourth year
- **200-299** mezzanine courses for advanced undergraduates or graduates
- **300-399** first or second year
- **400-499** second or third graduate year
- **500-599** special summer courses

The Department of Electrical Engineering (EE) offers courses in the following areas:
- Communication Systems
- Computer Hardware
- Computer Software Systems
- Control and System Engineering
- Dynamic Systems and Optimization
- Electronic Circuits
- Electronic Devices, Sensors, and Technology
- Fields, Waves, and Radioscience
- Image Systems
- Lasers, Optoelectronics, and Quantum Electronics
- Network Systems
- Signal Processing
- Solid State Materials and Devices

The mission of the undergraduate program of the Department of Electrical Engineering is to augment the liberal education expected of all Stanford undergraduates and impart a basic understanding of electrical engineering built on a foundation of physical science, mathematics, computing, and technology. Graduates of the undergraduate program are expected to possess knowledge of the fundamentals of electrical engineering and at least one specialty area. The graduates are expected to have the basic experimental, design, and communication skills to be prepared for continued study at the graduate level or for entry-level positions that require a basic knowledge of electrical engineering, science, and technology.

The educational objectives of the program are:
1. Technical knowledge: provide a basic knowledge of electrical engineering principles along with the required supporting knowledge of computing, engineering fundamentals, mathematics, and science. The program must include depth in at least one specialty area, currently including computer hardware, computer software, controls, circuits, fields and waves, communication and signal processing, and semiconductor and photonic devices.
2. Laboratory and design skills: develop the basic skills needed to perform and design experimental projects. Develop the ability to formulate problems and projects and to plan a process for solution, taking advantage of diverse technical knowledge and skills.
3. Communications skills: develop the ability to organize and present information and to write and speak effective English.
4. Preparation for further study: provide sufficient breadth and depth for successful subsequent graduate study, postgraduate study, or lifelong learning programs.
5. Preparation for the profession: provide an appreciation for the broad spectrum of issues arising in professional practice, including economics, ethics, leadership, professional organizations, safety, service, and teamwork.

To major in Electrical Engineering (EE), undergraduates should follow the depth sequence given in the discussion of undergraduate programs in the “School of Engineering” section of this bulletin. Students are required to have a program planning sheet approved by their adviser and the department prior to the end of the quarter in which they declare their major and at least one year prior to graduation. Program sheets for the general EE requirement and for each of the EE specialty sequences may be found at http://ughb.stanford.edu. Majors must receive at least a 2.0 grade point average (GPA) in courses taken for the EE depth requirement; all classes must be taken for a letter grade.

For information about an EE minor, see the “School of Engineering” section of this bulletin.

**HONORS PROGRAM**

The Department of Electrical Engineering offers a program leading to a Bachelor of Science in Electrical Engineering with honors. This program offers a unique opportunity for qualified undergraduate majors to conduct independent study and research at an advanced level with a faculty mentor, graduate students, and fellow undergraduates.

A student must maintain a grade point average (GPA) of at least 3.5 in Electrical Engineering to be eligible to apply. Application forms are available from the department. Students are required to declare honors on Axess.

In order to receive departmental honors, students admitted to the honors program must:
1. maintain a grade point average (GPA) of at least 3.5 in EE courses.
2. complete at least 10 units of EE 191 for a letter grade with their project adviser.
3. submit two final copies of the honors thesis approved by the adviser and second reader.
4. attend poster and oral presentation in the Electrical Engineering Honors Symposium held at the end of Spring Quarter or present in another suitable forum approved by the faculty advisor.

GRADUATE PROGRAMS IN ELECTRICAL ENGINEERING

University regulations governing the M.S., Engineer, and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

The profession of electrical engineering demands a strong foundation in physical science and mathematics, a broad knowledge of engineering techniques, and an understanding of the relationship between technology and man. Curricula at Stanford are planned to offer the breadth of education and depth of training necessary for leadership in the profession. To engage in this profession with competence, four years of undergraduate study and at least one year of postgraduate study are recommended. For those who plan to work in highly technical development or fundamental research, additional graduate study is desirable.

A one- to two-year program of graduate study in Electrical Engineering may lead to the degree of Master of Science. The program is typically completed in five academic quarters. A two- to three-year program, offering a wider selection of engineering course work, more opportunity for study in the related fields of engineering, mathematics, and physics, and in particular, more independent work and individual guidance, may lead to the degree of Engineer.

The degree of Doctor of Philosophy is offered under the general regulations of the University. The doctoral program, requiring a minimum of 135 units of graduate study, should be considered by those with the ability and desire to make a life work of research or teaching.

MASTER OF SCIENCE IN ELECTRICAL ENGINEERING

Students with undergraduate degrees in physics, mathematics, or related sciences, as well as in various branches of engineering, are invited to apply for admission. They should typically be able to complete the master’s degree in five academic quarters; note that many courses are not taught during the summer. Students with undergraduate degrees in other fields may also be admitted for graduate study; see below.

The master’s degree program may provide advanced preparation for professional practice or for teaching at the junior college level, or it may serve as the first step in graduate work leading to the degree of Engineer or Ph.D. The faculty does not prescribe specific courses to be taken. Each student, with the help of a program advisor, prepares an individual program and submits it to the faculty for approval. The master’s program proposal must be submitted to the department office during the first quarter of graduate study; modifications may be made until one quarter prior to degree conferral. Detailed requirements and instructions are in the Handbook for Graduate Students in Electrical Engineering at Stanford University (http://ee.stanford.edu/gradhandbook). Programs of at least 45 units that meet the following guidelines are normally approved. Cognate (extradepartmental) courses of the appropriate level are considered as Electrical Engineering courses.

1. A sequence of three or more letter-graded electrical engineering courses numbered above 200, to provide depth in one area. The student must maintain an average 3.0 grade point average (GPA) or better in both the depth area and overall.

2. At least one letter-graded EE course numbered above 200 in each of three distinct course areas outside of the area selected under item 1 to provide breadth. Two courses are not considered to be in distinct areas if they can be found under a common depth area.

3. Enough additional units of EE courses so that items 1 through 3 total at least 21 units of letter-graded EE courses numbered above 200, including at least 9 units of such courses numbered in the 300s or 400s. Some 600- or 700-level summer courses may also be considered for inclusion in the M.S. program. Special studies units may not be used.

4. Additional course work to bring the total to 45 or more quarter units, including:
   a. at least 56 letter-graded units
   b. at least 36 units at or above the 100 level
   c. at least 30 units in technical areas such as engineering, mathematics, and science; thesis and special studies units cannot be included.

5. Either (a) one formal EE seminar course for credit, or (b) attend a minimum of eight informal or formal EE research seminars, and submit with the final M.S. program a list of the seminars with a paragraph describing the content and the signature of the M.S. adviser. This requirement is to ensure that students sample the many available research seminars.

Students working toward the Master of Science degree in Electrical Engineering may also be admitted for graduate study. Such students may have graduated in any field and may hold either the B.S. or B.A. degree. Each student, with the help of an adviser, prepares a program of study to meet particular needs and submits it to the faculty for approval. A student with adequate preparation in mathematics through calculus and college physics including electricity can usually complete the M.S. degree requirements within two academic years. A student with some additional preparation in electrical engineering may be able to complete the M.S. requirements in only one academic year.

Graduate study in EE demands that students be adequately prepared in circuits, digital systems, fields, lab work, mathematics, and physics. Skill in using modern computing facilities is essential for electrical engineers, and an increasing number of courses routinely require it. This skill should be acquired early in the program, either by taking one of the regular computer science courses or one of the special short courses given by the Computation Center, or by self-study.

It is the student’s responsibility, in consultation with an adviser, to determine whether the prerequisites for advanced courses have been met. Prerequisite courses ordinarily taken by undergraduates may be included as part of the graduate program of study. However, if the number of these is large, the proposed program may contain more than the typical 45 units, and the time required to meet the degree requirements may be increased.

Students working toward the Master of Science degree in Electrical Engineering who are considering a Ph.D. or Engineer degree program in Electrical Engineering at Stanford must request the addition of a new degree program by submitting a Graduate Program Authorization Petition for approval by the department. The petition must be submitted and approved at least one quarter prior to M.S. degree completion. Once the M.S. degree in EE has been conferred, a student may not register for additional course work without this approval. Permission to study beyond the M.S. degree is normally granted to students who were originally admitted to the Ph.D. program if the student:

1. has passed the Ph.D. qualifying examination within the past year, or
2. has a written commitment from a regular member of the EE faculty to serve as an Engineer or Ph.D. dissertation adviser, and has a satisfactory academic record to date.

Students originally admitted only for the M.S. degree and not to the Ph.D. program may petition the EE graduate admissions committee during Autumn Quarter of their second year to Stanford for a change of status to the Ph.D. program with permission to take the Ph.D. qualifying exam in January. Requirements for the petition
include a grade point average of 3.5 on Stanford courses and a written statement of support from an EE faculty member with whom the student has conducted preliminary research through directed reading (EE 390 or 391) or as part of a 300-level project course. Decisions are based on performance and the strength of the support letter. If admitted to the Ph.D. program, permission to study beyond the M.S. degree is normally granted under the same conditions as those described above for students originally admitted to the Ph.D. program. Students not admitted to the Ph.D. program are normally granted permission to continue past the M.S. degree only if there is a written commitment from a regular member of the EE faculty to serve as an Engineer dissertation supervisor. The student should file for candidacy for the Engineer degree within one quarter of receiving the M.S.

ENGINEER IN ELECTRICAL ENGINEERING

The degree of Engineer requires a minimum of 90 units of residency. Units completed at Stanford towards a master’s degree in an Engineering discipline may be used towards the 90-unit residency requirement for the Engineer degree. A student who received an M.S. degree elsewhere and transferred 45 units towards the 90-unit requirement for an Engineer’s degree. A student would need to fill out the Application for Graduate Residency Credit form to be filed with the Degree Progress Office in the Registrar’s Office.

Work toward the degree of Engineer in Electrical Engineering normally includes the requirements for work toward the master’s degree in Electrical Engineering, including qualifications for admission.

An additional year allows time for a broader program, or a more concentrated program, or whatever arrangement may seem suitable to the candidate, the adviser, and the department. Advanced study at other universities, or in other departments at Stanford, may be allowed within the foregoing consideration. The equivalent of approximately one quarter is devoted to independent study and thesis work with faculty guidance. The thesis is often of the nature of a professional report on the solution of a design problem. The degree of Engineer differs from the Ph.D. in that it prepares for professional engineering work rather than theoretical research. The candidate may select courses that are suitable for either the degree of Engineer or the Ph.D. degree and decide later which program to pursue.

The best procedure for the applicant to follow is: (1) if now working toward the Stanford M.S. degree in Electrical Engineering, request permission to continue graduate studies beyond the master’s degree, using the Graduate Program Authorization Petition form obtained from the Department of Electrical Engineering office, or (2) if not planning to receive the Stanford M.S. degree in Electrical Engineering, apply for admission to the Department of Electrical Engineering as a candidate for the degree of Engineer.

During the first quarter of work beyond the M.S. degree, formal application for admission to candidacy for the degree of Engineer is made on a form that can be obtained from the department office. The program of study is prepared by the student with the help of the thesis adviser and submitted to the academic associate for approval. The form should contain a list of all graduate courses completed at Stanford and elsewhere and all courses yet to be completed. For the most recent information, see http://ee.stanford.edu/gradhandbook/engineer.html.

DOCTOR OF PHILOSOPHY IN ELECTRICAL ENGINEERING

Admission to a graduate program does not imply that the student is a candidate for the Ph.D. degree. Advancement to candidacy requires superior academic achievement, satisfactory performance on a qualifying examination, and sponsorship by two faculty members. Enrollment in EE 391, Special Studies, is recommended as a means for getting acquainted with a faculty member who might be willing to serve as a supervisor. Students admitted to the Ph.D. program should submit an application to take the department qualifying examination (given each Winter Quarter). Upon completion of the qualifying examination and after securing agreement by two faculty members to serve as dissertation advisers, the student should file an Application for Doctoral Candidacy. Students are expected to apply for candidacy prior to the end of their second year in the Ph.D. program. The Ph.D. in Electrical Engineering is a specialized degree, and is built on a broad base of physics, mathematics, and engineering skills. The course program is expected to reflect competency in Electrical Engineering and specialized study in other areas relevant to the student’s research focus. Normally the majority of units are drawn from EE department or cognate courses, with typically 9 units from related advanced physics, mathematics, engineering, or computer science courses, depending on the area of research. Only after receiving department approval of the Application for Candidacy, does the student become a candidate for the Ph.D. degree.

Requirements may be summarized as follows. The student must complete: (1) a minimum of 135 units of residence with graduate standing at Stanford; (2) one or more qualifying examinations given by the faculty of the Department of Electrical Engineering; (3) an approved course of study in Electrical Engineering; (4) an approved program of research and a written dissertation, based on research, which must be a contribution to knowledge; (5) an oral examination that is a defense of dissertation research and is taken near the completion of the doctoral program.

FINANCIAL ASSISTANCE

The department awards a limited number of fellowships, teaching and course assistantships, and research assistantships to incoming graduate students. Applying for financial assistance is part of the admission application.

THE HONORS COOPERATIVE PROGRAM

Many of the department’s graduate students are supported by the Honors Cooperative Program (HCP), which makes it possible for academically qualified engineers and scientists in nearby companies to be part-time graduate students in Electrical Engineering while continuing nearly full-time professional employment. Prospective HCP students follow the same admission process and must meet the same admission requirements as full-time graduate students. For more information regarding the Honors Cooperative Program, see the “School of Engineering” section of this bulletin.

PH.D. MINOR IN ELECTRICAL ENGINEERING

For a minor in Electrical Engineering (EE), the student must fulfill the M.S. depth requirement, complete a total of at least 20 units of course work at the 200-plus level in electrical engineering (of which 15 units must be graded), and be approved by the department’s Ph.D. Degree Committee. A grade point average (GPA) of at least 3.35 on these courses is required.

AREAS OF RESEARCH IN ELECTRICAL ENGINEERING

Candidates for advanced degrees participate in the research activities of the department as paid research assistants or as students of individual faculty members. At any one time, certain areas of research have more openings than others. A new applicant should express a second choice of research interest in the event that there are no vacancies in the primary area of interest. At present, faculty members and students are actively engaged in research in the following areas:

- Biomedical Devices and Bioimaging
- Energy: solar cells, smart grid, load control
- Environmental and Remote Sensing: sensor nets, radar systems, space
- Graphics, HCI, Computer Vision, Photography
- Web Applications, Data Management, Security/Privacy
- Systems Software: OS, compilers, languages
• Systems Hardware: architecture, VLSI, embedded systems
• Network Systems and Science: next generation Internet, wireless networks
• Communication Systems: wireless, optical, wireline
• Information Theory and Coding: image and data compression, denoising
• Control, Learning, and Optimization
• Integrated Circuit Design: MEMS, sensors, analog, RF
• Quantum Science and Engineering
• Photonic and Electronic Devices
• Fields and Waves

For additional information, see the Department of Electrical Engineering’s Research page at http://ee.stanford.edu/research.php.

OVERSEAS STUDIES COURSES IN ELECTRICAL ENGINEERING

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://exploreCourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

SPRING QUARTER

KYOTO

OSPKYOTO 33. Digital Systems II. 4 units, Kozyrakis, GER:DB:EngrAppSci

MANAGEMENT SCIENCE AND ENGINEERING

Chair: M. Elisabeth Paté-Cornell
Associate Professors: Samuel S. Chiu, Ashish Goel, Pamela J. Hinds, Riitta Katila, Ross D. Shachter, Edison T. S. Tse, Benjamin Van Roy
Assistant Professors: Charles E. Eesley, Feryal Erhun, Kay Giesecke, Ramesh Johari, James A. Primes, Amin Saberi, Thomas A. Weber
Professors (Research): Siegfried S. Hecker, Walter Murray, Michael A. Saunders, John P. Weyant
Professors (Teaching): Thomas H. Byers, Robert E. McGinn
Courtesy Professors: Anat Admati, Stephen P. Boyd, Walter Powell, Tim Roughgarden
Affiliated Faculty: Seenu Srinivasan
Lecturers: Steve Blank, Andrei Z. Broder, Gregory Hamm, Hill Huntington, Vanja Josifovski, Phil Lin, Mary Morrison, Donna Novitsky, Lena Ramfelt, Tina Seelig, Rosanne Siino, Lynda Kate Smith, Andreas Weigend
Consulting Professors: Gerd Infanger, Thomas Kosnik, James E. Matheson, D. Warner North, Burke Robinson, Sam L. Savage, Behnam Tabrizi
Consulting Associate Professors: Adam B. Borison, Peter Haas, Gregory L. Hamm, Samuel Holtzman, Hervé Kieffel, Michael Lyons, Audrey MacLean, Dariusz Rafinejad, Adam Seiver, Victor Stanton
Consulting Assistant Professors: Blake E. Johnson, Jan Pietzsch

Visiting Professor: Olivier de La Grandville
Visiting Associate Professors: Charles Feinstein, Yee-Tien Fu
Visiting Assistant Professors: Arik Lifschitz, Peter Woehrmann
Director of the Industrial Affiliates Program: Yinyu Ye

Department Offices: Terman Engineering Center, 380 Panama Mall
Mail Code: 94305-4026
Web Site: http://stanford.edu/dept/MSandE

Courses offered by the Department of Management Science and Engineering are listed under the subject code MS&E on the Stanford Bulletin’s ExploreCourses web site.

In December 1999, the Board of Trustees authorized the creation of the Department of Management Science and Engineering from the Department of Industrial Engineering and Engineering Management and the Department of Engineering-Economic Systems and Operations Research. Its main objective is to be the leader at the interface of engineering, business, and public policy. The department’s mission is, through education and research, to advance the design, management, operation, and interaction of technological, economic, and social systems. The department’s engineering research strength is integrated with its educational program at the undergraduate, master’s, and doctoral levels: graduates of the program are trained as engineers and future leaders in technology, policy, and industry. Research and teaching activities are complemented by an outreach program that encourages the transfer of ideas to the environment of Silicon Valley and beyond.

Management Science and Engineering (MS&E) provides programs of education and research by integrating three basic strengths: (1) depth in conceptual and analytical foundations; (2) comprehensive coverage of functional areas of application; and (3) interaction with other Stanford departments, Silicon Valley industry, and organizations throughout the world. The analytical and conceptual foundations include decision and risk analysis, dynamic systems, economics, optimization, organizational science, and stochastic systems. The functional areas of application include entrepreneurship, finance, information, marketing, organizational behavior, policy, production, and strategy. Close associations with other engineering departments and with industry enrich the programs by providing opportunities to apply MS&E methods to important problems and by motivating new theoretical developments from practical experience. MS&E’s programs also provide a basis for contributing to other areas such as biotechnology, defense policy, environmental policy, information systems, and telecommunications.

CAREERS IN MS&E

MS&E helps students prepare for professional careers in business, government, industry, non-profit institutions, and universities. Graduates have pursued careers in consulting, enterprise management, financial analysis, government policy analysis, industrial research, line management, product development, project management, strategic planning, and university teaching and research. Some have founded companies specializing in financial services, high technology products, management and systems consulting, or software. Other graduates have helped establish new analytical capabilities in existing firms or government agencies.

Many graduates have become leaders in technology-based businesses, which have an increasing need for well-educated, analytically oriented people who understand both business and technology. The Department of MS&E is attractive to people with engineering, mathematical science, and physical science backgrounds as it complements their technical abilities with the conceptual frameworks needed to analyze problems of investment, management, marketing, operations, production, and strategic planning in a technical environment.
BACHELOR OF SCIENCE IN MANAGEMENT SCIENCE AND ENGINEERING

The program leading to the B.S. degree in Management Science and Engineering (MS&E) is stated earlier under the “School of Engineering” section of this bulletin, and more information is contained in the School of Engineering’s Handbook for Undergraduate Engineering Programs. Students are encouraged to plan their academic programs as early as possible, ideally in the freshman or sophomore year. Students should not wait until they are declaring a major to consult with the department’s student services staff. This is particularly important for students who would like to study overseas or pursue another major or minor.

The undergraduate curriculum in Management Science and Engineering provides students training in the fundamentals of engineering systems analysis to prepare them to plan, design, and implement complex economic and technological management systems where a scientific or engineering background is necessary or desirable. Graduates are prepared for work in a variety of career paths, including facilities and process management, investment banking, management consulting, or graduate study in industrial engineering, operations research, economics, public policy, medicine, law, or business.

The educational objectives of the undergraduate degree program are:

- Principles and Skills: provide students with a basic understanding of management science and engineering principles, including analytical problem solving and communications skills.
- Preparation for Practice: prepare students for practice in a field that sees rapid changes in tools, problems, and opportunities.
- Preparation for Continued Growth: prepare students for graduate study and self-development over an entire career, and
- Preparation for Service: develop in students the awareness, background, and skills necessary to become responsible citizens, employees, and leaders.

In particular, the department wants to help students develop:

1. an ability to apply knowledge of math, science, and engineering
2. an ability to design and conduct experiments
3. an ability to design a system or components to meet desired needs
4. an ability to identify, formulate, and solve engineering problems
5. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice
6. an ability to function on multidisciplinary teams
7. an ability to communicate effectively
8. a recognition of the need for and an ability to engage in lifelong learning
9. background necessary for admission to top professional graduate engineering or business programs
10. an understanding of professional and ethical responsibility
11. the broad education necessary to understand the impact of engineering solutions in a global and societal context
12. a knowledge of contemporary issues pertinent to the field of management science and engineering.

The program builds on the foundational courses for engineering, including calculus, engineering fundamentals, and physics or chemistry.

The department core, taken for all concentrations, includes basic courses and prerequisites offered early in the academic year. Autumn Quarter because courses are arranged sequentially with basic courses and prerequisites offered early in the academic year.

Applications for admission as graduate students in MS&E must submit the results of the verbal, quantitative, and analytical parts of the Graduate Record Examination. The deadline for application to the master’s program is January 6.

For information about an MS&E minor, see the “School of Engineering” section of this bulletin.

MS&E also participates with the departments of Computer Science, Mathematics, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the “Mathematical and Computational Science” section of this bulletin.

GRADUATE PROGRAMS IN MANAGEMENT SCIENCE AND ENGINEERING

MS&E, in collaboration with other departments of the University, offers programs leading to the degrees of Master of Science and Doctor of Philosophy. The department also offers a coterminal B.S./M.S. degree, and a dual master’s degree in cooperation with each of the other departments in the School of Engineering.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

Applicants for admission as graduate students in MS&E must submit the results of the verbal, quantitative, and analytical parts of the Graduate Record Examination. The deadline for application to the doctoral program is December 9, and the deadline for application to the master’s program is January 6.

Except in unusual circumstances, admission is limited to the Autumn Quarter because courses are arranged sequentially with basic courses and prerequisites offered early in the academic year.

Assistantships and Fellowships—A limited number of fellowships and assistantships are awarded each year. Applicants admitted to the doctoral program, who have indicated on their application that they would like to be considered for financial aid, are automatically considered for these assistantships and fellowships.

Information about loan programs and need-based aid for U.S. citizens and permanent residents can be obtained from the Financial Aid Office.

PROFESSIONAL EDUCATION

The Stanford Center for Professional Development (SCPD) provides opportunities for employees of some local and remote companies to take courses at Stanford.

The Honors Cooperative Program (HCP) provides opportunities for employees of SCPD Member companies to earn an M.S. degree, over a longer period, by taking one or two courses per academic quarter. Some courses are only offered on campus; HCP students may attend those courses at Stanford to meet the degree requirements. It is possible to complete this program as a remote HCP student although the remote offerings are limited. Students must apply for a degree program through the standard application process, and must meet the standard application deadlines.
The non-degree option (NDO) allows employees of some local companies to take courses for credit from their company sites before being admitted to a degree program. Students apply to take NDO courses each quarter through the Stanford Center for Professional Development. Up to 18 units taken as an NDO student may be applied toward a degree program. For additional information about the NDO application process and deadlines, see http://scpd.stanford.edu, or contact SCPD at (650) 725-3000.

The department offers a certificate program within the framework of the NDO program. A certificate can be obtained by completing three MS&E core courses, plus one MS&E elective course for a total of four courses. For further information, see http://scpd.stanford.edu/scpd/programs/certs/managementSci.htm.

**MASTER OF SCIENCE IN MANAGEMENT SCIENCE AND ENGINEERING**

The M.S. degree programs require a minimum of 45 units beyond the equivalent of a B.S. degree at Stanford. All programs represent substantial progress in the major field beyond the bachelor’s degree.

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The M.S. program in Management Science and Engineering (MS&E) prepares individuals for a lifelong career addressing critical technical and managerial needs in private and public decision making. Department requirements for the M.S. degree provide breadth across some of the areas of the department, and flexibility for meeting individual objectives of depth in a particular area of concentration. The master’s degree may be a terminal degree program with a professional focus, or a preparation for a more advanced graduate program. The M.S. degree can normally be earned in one academic year (three academic quarters) of full-time work, although students may choose to continue their education by taking additional MS&E courses beyond that year. Background requirements, taken in addition to degree requirements, must be met by students who have had insufficient course work in mathematical sciences, computer science, engineering and/or natural sciences.

Students must take a minimum of 45 course units as follows:

1. At least five core courses
2. At least three other courses in an area of concentration of their choice
3. A course in probability, unless a college-level course in probability has already been passed
4. A project course requirement
5. The remaining units in elective courses.

**Background Requirements**—Students must have had or must take the following (or equivalent) courses before the M.S. degree is conferred: MATH 41, 42, 51, Calculus, 15 units; CS 106A, Programming Methodology, 5 units, and an additional 15 units of engineering, mathematical sciences, or natural sciences. These courses do not count toward the 45 units of the M.S. degree. Courses taken to meet MS&E background requirements may be at either the undergraduate or graduate level, and may be taken as credit/no credit. These additional background requirements would typically be met by students who have a bachelor’s degree in engineering, or mathematical or natural sciences.

**Core (Depth) Courses**—M.S. students must take at least five courses out of the following eleven options:

- **MS&E 201. Dynamic Systems or MS&E 251. Stochastic Decision Models**
- **MS&E 211. Linear and Nonlinear Optimization**
- **MS&E 220. Probabilistic Analysis**
- **MS&E 221. Stochastic Modeling or MS&E 223. Simulation**
- **MS&E 240. Accounting or MS&E 242. Investment Science**
- **MS&E 241. Economic Analysis**
- **MS&E 242. Decision Analysis or MS&E 250A. Risk Analysis**
- **MS&E 261. Production Systems**
- **MS&E 270. Strategy in Technology-Based Companies**
- **MS&E 271. Global Entrepreneurial Marketing**
- **MS&E 280. Organizational Behavior**

Students may not waive core courses. They may, however, petition to substitute an approved, more advanced MS&E course in the same area. Courses used to satisfy the core requirement must be taken for a letter grade, must be taken for a minimum of three units each, and may not also be used to satisfy the concentration requirement.

**Courses in an Area of Concentration (Breadth)**—Students must complete a departmentally approved set of three or more letter-graded courses taken for a minimum of three units each, in an area of concentration of one of the following types:

1. An area of concentration in the MS&E department
2. An area of concentration in one of the seven other departments of the School of Engineering
3. In exceptional cases, a coherent area of concentration designed by the student. Petitions for student-designed concentrations must list the three proposed courses (taken for three units or more and at the 200-level or above) and include a brief justification. The petition must be submitted to student services no later than the fifth week of the quarter prior to graduation.

**Project Course Requirement**—Students must take either a designated project course or two designated integrated project courses. The project course(s) must be taken for letter grade, must be taken for a minimum of three units, and may also be used to satisfy the core or concentration requirement.

Additional requirements are:

1. At least 45 units must be in courses numbered 100 and above
2. At least 27 units must be in courses numbered 200 and above in MS&E, taken for a letter grade and a minimum of two units each, and at least 36 letter-graded units must be in MS&E or closely related fields. Closely related fields include any department in the School of Engineering, mathematics, statistics, economics, sociology, psychology, or business.
3. The degree program must be completed with a grade point average (GPA) of 3.0 or higher.
4. A maximum of three units of language courses (numbered 100 and above)
5. A maximum of three units of 1-unit courses such as seminars, colloquia, workshops, in any department, and a maximum of one unit of MS&E 208A, B, or C, Curricular Practical Training.
6. A maximum of 18 non-degree option (NDO) units through the Stanford Center for Professional Development (SCPD)
7. Courses in athletics may not be applied toward the degree.

See the student services office or department web site for complete listing of project, integrated project, and approved concentrations.

**ENERGY AND ENVIRONMENT TRACK**

The Energy and Environment M.S. track is designed for students interested in energy and environmental issues from the perspectives of public policy, nongovernmental organizations, or corporations. This track includes: core courses that provide the conceptual background in economics, decisions, strategy, investment, and organizational behavior; courses in energy resources, natural resource economics, and energy/environmental policy analysis; and an individually designed concentration emphasizing policy, strategy, and/or technology. Seminars provide insights into current corporate strategy, public policy, and research community developments. Energy/environmental project courses give practice in applying methodologies and concepts. Students can complete the program in one year or may extend the program up to two years, taking additional courses for greater depth and breadth. For additional information, see http://www.stanford.edu/dept/MSandE/academics/energyenvironment.html.

**DUAL MASTER’S DEGREE PROGRAM**

The dual degree program enables a small group of graduate students to obtain two master’s degrees simultaneously. Students
complete the course requirements for each department. A total of 90 units is required to complete the dual master’s degree.

Admission—For the dual degree, admission to two departments is required, but is coordinated by designated members of both admissions committees who make recommendations to the committees of their respective departments. Students may apply to only one department initially. After the first quarter at Stanford, students may apply to be admitted to the second department.

Advising—Every student in the dual degree program has one adviser in each department.

**JOINT MS&E AND LAW DEGREES**

The School of Law and the Department of Management Science and Engineering offer joint degree programs leading to a J.D. degree and an M.S. degree in MS&E, or to a J.D. and Ph.D. in MS&E. These programs are designed for students who wish to prepare themselves for careers in areas relating to both law and to the decision making, policy making, and problem solving knowledge and skills developed in the MS&E program. Students interested in either joint degree program must apply and gain admission separately to the School of Law and the Department of Management Science and Engineering and, as an additional step, must secure consent from both academic units to pursue degrees in those units as part of a joint degree program. Interest in either joint degree program should be noted on the student’s admission applications and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or MS&E may apply for admission to the other program and for joint degree status in both academic units after commencing study in either program.

Joint degree students may elect to begin their course of study in either the School of Law or MS&E. Students are assigned to a joint program committee composed of at least one faculty member from Law and one from MS&E. This committee plans the student’s program jointly with the student. Students must be enrolled full time in the Law School for the first year of law studies, and it is recommended that students devote exclusively one Autumn Quarter to the MS&E M.S. program to initiate their MS&E work. After that time, enrollment may be in MS&E or Law, and students may choose courses from either program regardless of where enrolled. A candidate in the Joint J.D./Ph.D. program should spend a substantial amount of full time residency in MS&E. Students must satisfy the requirements for both the J.D. and the M.S. or Ph.D. degrees as specified in this bulletin or by the School of Law. The Law School may approve courses from MS&E or courses in the student’s MS&E program from outside of the Department of Management Science and Engineering that may count toward the J.D. degree, and MS&E may approve courses from the Law School that may count toward the M.S. or Ph.D. degree in MS&E. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student’s program. The lists may differ depending on whether the student is pursuing an M.S. or a Ph.D. in MS&E.

In the case of a J.D./M.S. program, no more than 45 units of approved courses may be counted toward both degrees. In the case of a J.D./Ph.D. program, no more than 54 units of approved courses may be counted toward both degrees. In either case, no more than 36 units of courses that originate outside the Law School may count toward the law degree. To the extent that courses under this joint degree program originate outside the Law School but count toward the law degree, the law credits permitted under Section 17(1) of the Law School Regulations are reduced on a unit-per-unit basis, but not below zero. The maximum number of law school credits that may be counted toward the M.S. in MS&E is the greater of: (a) 18 units in the case of the M.S., or (b) the maximum number of hours from courses outside the department that an M.S. candidate in MS&E is permitted to count toward the applicable degree under general departmental guidelines or under departmental rules that apply in the case of a particular student.

Tuition and financial aid arrangements are normally through the school in which the student is then enrolled.

**DOCTOR OF PHILOSOPHY IN MANAGEMENT SCIENCE AND ENGINEERING**

University requirements for the Ph.D. degree are described in the “Graduate Degrees” section of this bulletin.

The Ph.D. degree in MS&E is intended for students primarily interested in a career of research and teaching, or high-level technical work in universities, industry, or government. The program requires three years of full-time graduate study, at least two years of which must be at Stanford. Typically, however, students take about four to five years after entering the program to complete all Ph.D. requirements. The Ph.D. is generally organized around the requirement that the students acquire a breadth across some of the eight areas of the department, and depth in one of them. These fields of study are:

- Decision analysis and risk analysis
- Economics and finance
- Information science and technology
- Organization, technology, and entrepreneurship
- Policy and strategy
- Probability and stochastic systems
- Production and operations management
- Systems modeling and optimization

Each student admitted to the Ph.D. program must satisfy a breadth requirement and pass a qualification procedure. The purpose of the qualification procedure is to assess the student’s command of the field and to evaluate his or her potential to complete a high-quality dissertation in a timely manner. The student must complete specified course work in one of the eight areas of the department, or the Systems Program which is a combination of several areas. The qualification decision is based on the student’s grade point average (GPA), on the one or two preliminary papers prepared by the student, and on the student’s performance in an area examination. Considering this evidence, the department faculty votes on advancing the student to candidacy in the department at large. The Ph.D. requires a minimum of 135 units, at least 54 of which must be in courses of 3 units or more. At least 48 course units in courses of 3 units or more must be taken for a letter grade. Finally, the student must pass a University oral examination and complete a Ph.D. dissertation. During the course of the Ph.D. program, students who do not have a master’s degree are strongly encouraged to complete one, either in MS&E or in another Stanford department.

**Breadth Requirement**

1. The breadth requirement is to be satisfied by a choice of four courses spanning four out of the above mentioned eight areas of the department. The list of courses satisfying the breadth requirement is available from the MS&E student services office.
2. The Ph.D. candidacy form must contain four courses that satisfy the breadth requirement.
3. Courses chosen to satisfy the breadth requirement must be taken for letter grades.
4. At least one of the four courses chosen to satisfy the breadth requirement must be at the 300 level.

**Qualification Procedure Requirements**—The qualification procedure is based both on breadth across the department’s disciplines and depth in an area of the student’s choice. The qualification process must be completed by the end of the month of May of the student’s second year of graduate study in the department. The performance of all doctoral students is reviewed every year at a department faculty meeting at the end of May or beginning of June. Ph.D. qualification decisions are made at that time and individual feedback is provided.

The Ph.D. qualification requirements comprise these elements:

1. **Grade Point Average**: A student must maintain a GPA of at least 3.4 in the four courses chosen to satisfy the breadth requirements, and a GPA of at least 3.4 in the set of all courses...
taken by the student within the department. In both cases, the GPA is computed on the basis of the nominal number of units for which each course is offered.

2. Paper(s): A student may choose between two options, either to be completed before the Spring Quarter of the student’s second year. The first option involves one paper supervised by a primary faculty adviser and a faculty consultant. This paper should be written in two quarters.

The second option involves two shorter sequential tutorials, with two different faculty advisers. Each tutorial should be completed in one quarter. In both options, the student chooses the essay advisor(s)/consultant with the faculty members’ consent.

A student may register for up to 3 units per tutorial and up to 6 units for a paper. These paper or tutorial units do not count towards the 54 course units required for the Ph.D., and letter grades are not given.

3. Area Qualification: In addition, during the second year, a student must pass an examination in one of the eight areas of the MS&E department or the Systems Program, a combination of several areas, which is of the student’s choice. This examination is written, oral, or both, at the discretion of the area faculty administering the exam.

4. Area Course Requirement: Students must complete the depth requirements of one of the eight fields of study of the MS&E department or the Systems Program which is a combination of several areas. Courses used to satisfy depth requirements must be taken for a letter grade. The Ph.D. requirements for the eight areas of the MS&E department are available from the MS&E student services office.

PH.D. MINOR IN MANAGEMENT SCIENCE AND ENGINEERING

Students pursuing a Ph.D. in another department who wish to receive a Ph.D. minor in Management Science and Engineering should consult the MS&E student services office. A minor in MS&E may be obtained by completing 20 units of approved graduate-level MS&E courses, of which at least 6 units must be at the 300-level. Courses approved for the minor must form a coherent program, and must include one course from at least three of the ten MS&E M.S. core options. The program must include a minimum of 16 letter-graded units, and a minimum grade point average of 3.3 must be achieved in these courses.

MATERIALS SCIENCE AND ENGINEERING

Chair: Robert Sinclair
Associate Chair: Reinhold H. Dauskardt

Associate Professors: Mark L. Brongersma, Michael D. McGhee, Paul C. McIntyre

Assistant Professors: Yi Cui, Sarah C. Heishon, Aaron M. Lindenber, Nicholas A. Melosh, Alberto Salleo

Courtesy Professors: Stacey F. Bent, Curtis W. Frank, James S. Harris, Yoshio Nishi, James D. Plummer, Krishna Saraswat, Jonathan F. Stefins, Joachim Stohr

Consulting Associate Professor: Ian R. Fisher

Consulting Assistant Professor: Harindran Manoharan

Lecturers: Ann Marshall, Arturas Vailionis

Consulting Assistant Professor: Seung Min Han

Consulting Professor: Charles A. Evans, Turgut Gur, Michael A. Kelly, Alan Sellinger, Baylor Triplett, Robert M. White, Wendelin J. Wright

* Recalled to active duty.

Department Offices: 496 Lomita Mall, Durand Building
Mail Code: 94305-4034
Phone: (650) 723-2534
Email: matscengr@stanford.edu

Web Site: http://mse.stanford.edu

Courses offered by the Department of Materials Science and Engineering are listed under the subject code MATSCI on the Stanford Bulletin’s ExploreCourses web site.

The Department of Materials Science and Engineering is concerned with the relation between the structure and properties of materials, factors that control the internal structure of solids, and processes for altering their structure and properties, particularly at the nanoscale. The undergraduate program, described under the “School of Engineering” section of this bulletin, provides training for the materials engineer and also preparatory training for graduate work in materials science. Capable students are encouraged to take at least one year of graduate study to extend their course work towards a collinear degree. Coterminal degree programs are encouraged both for undergraduate majors in Materials Science and Engineering and for undergraduate majors in related disciplines. Graduate programs lead to the degrees of Master of Science, Engineer, and Doctor of Philosophy.

FACILITIES

The department is based in the William F. Durand Building, with extensive facilities in the Jack A. McCullough building and the Gordon and Betty Moore Materials Research Building. These buildings house offices for the chair and most of the faculty, for the administrative and technical staff, and for most graduate students, along with lecture and seminar rooms. Facilities for teaching and research are also available, including equipment for electrical measurements; mechanical testing of bulk and thin film materials; fracture and fatigue of advanced materials; metallography; optical, scanning, transmission electron microscopy, and atomic force microscopy; UHV sputter deposition; vacuum annealing treatments; wet chemistry; and x-ray diffraction. The McCullough/Moore Complex is also the home for the Center for Magnetic Nanotechnology, with corresponding facilities for magnetic measurements, and the Stanford Nanofabrication Characterization Laboratory, the Stanford Nanofabrication Characterization Laboratory (SNL). The Rapid Prototyping Laboratory (RPL), housing material deposition and removal stations, is a joint facility with Mechanical Engineering, and is housed in Building 530. The department maintains a microcomputer cluster for its students, which is linked to the internet.

Depending on the needs of their programs, students and faculty also conduct research in a number of other departments and independent laboratories. Chief among these are the Stanford Nanofabrication Facility (SNF), the Geiball Laboratory for Advanced Materials (GLAM), and the Stanford Synchrotron Radiation Laboratory (SSRL). The Stanford Nanofabrication Facility (SNF) is a laboratory joining government and industrially funded research on microelectronic materials, devices, and systems. It houses a 10,000 square foot, class 100 clean room for Si and GaAs integrated circuit fabrication; a large number of electronic test, materials analysis, and computer facilities; and office space for faculty, staff, and students. In addition, the Center for Integrated Systems (CIS) provides startup research funds and maintains a Fellow-Mentor program with industry.

For information on GLAM and SSRL, see the “Geiball Laboratory for Advanced Materials” and “Stanford Synchrotron Radiation Laboratory” sections of this bulletin.
BACHELOR OF SCIENCE IN MATERIALS SCIENCE AND ENGINEERING

MISSION STATEMENT

The mission of the Materials Science and Engineering Program is to provide students with a strong foundation in materials science and engineering. The program’s curriculum places special emphasis on the fundamental scientific and engineering principles which underlie the knowledge and implementation of materials structure, processing, properties, and performance of all classes of materials used in engineering systems. Courses in the program develop students’ knowledge of modern materials science and engineering and teach them to apply this knowledge analytically to create effective and novel solutions to practical problems. The program prepares students for careers in industry or for further study in graduate school.

The undergraduate program provides training in solid state fundamentals and materials engineering. Students desiring to specialize in this field during their undergraduate period may do so by following the curriculum outlined in the “School of Engineering” section of this bulletin as well as the School of Engineering Undergraduate Handbook. The University’s basic requirements for the bachelor’s degree are discussed in the “Undergraduate Degrees and Programs” section of this bulletin. Electives are available so that students with broad interests can combine materials science and engineering with work in another science or engineering department.

For information about the minor, see the “School of Engineering” section of this bulletin.

GRADUATE PROGRAMS IN MATERIALS SCIENCE ENGINEERING

Graduate students can specialize in any of the areas of materials science and engineering.

COTERMINAL B.S./M.S. PROGRAM IN MATERIALS SCIENCE ENGINEERING

Stanford undergraduates who wish to continue their studies for the Master of Science degree in the coterminal program may apply for admission after they have earned 120 units toward graduation (UTG) as shown on the undergraduate unofficial transcript; applicants must submit their application no later than the quarter prior to the quarter of the expected completion of their undergraduate degree. The application must give evidence that the student possesses the potential for strong academic performance at the graduate level. Scores from the Graduate Record Exam (GRE) General Test must be reported before action can be taken on the application.

Materials science is a highly integrated and interdisciplinary subject, and so applications from students of any engineering or science undergraduate major are encouraged. Information forms pertaining to the coterminal program may be obtained from the department’s student services office in Durand 115.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.html#Coterm.

MASTER OF SCIENCE IN MATERIALS SCIENCE ENGINEERING

The University’s basic requirements for the M.S. degree are discussed in the “Graduate Degrees” section of this bulletin. The following are specific departmental requirements.

The Department of Materials Science and Engineering requires a minimum of 45 units for a master’s degree to be taken in residence at Stanford. Master’s Program Proposal forms should be filled out, signed by the student’s academic adviser, and submitted to the department’s student services manager by the end of the student’s first quarter of study. Final changes to the master’s program must be submitted no later than one academic quarter prior to the quarter of expected degree conferral. Stanford Materials Science undergraduates who are pursuing or who plan to pursue a coterminal M.S. degree may have more flexibility in their programs and should consult with their academic advisers regarding appropriate core course and elective choices.

Degree requirements are as follows:

1. A minimum of 30 units of Materials Science course work, including core and lab courses specified below, taken for a letter grade. Research units, one-unit seminars, and courses in other departments (i.e., where students cannot enroll in a class with a MATSCI subject code) cannot be counted for this requirement.

2. Three core courses: 203; 204; 207.

3. Lab courses: MATSCI 171, 172, 173. Note: students who have had equivalent lab courses at other universities, equivalent practical experience, a materials related degree or background, or passed the Ph.D. qualifying exam, are expected to file a petition with the department’s student services manager to have this requirement waived and to substitute other appropriate technical courses for the lab units.

4. 15 units of approved course electives that result in a technically coherent program. Of the 15 units of elective courses:
   a. 12 of the 15 units must be taken for a letter grade (except for those submitting an M.S. report).
   b. a maximum of three units may be seminars.
   c. if writing a master’s research report, a minimum of six and a maximum of 15 units of Materials Science research units (MATSCI 200) may be counted. M.S. research units may only be counted if writing an M.S. research report. See student services manager for approval.
   d. a maximum of three units may be undergraduate units (offered at Stanford University).
   e. a maximum of five units may be used for a foreign language course (not including any remedial English courses or courses in the student’s native language if other than English).
   f. the combination of seminar, undergraduate, and language units may not exceed six units total.
   g. the combination of research, seminar, and language units may not exceed 15 units total.
   h. activity units may not be counted toward a graduate degree.

5. A minimum grade point average (GPA) of 2.75 for degree course work taken at Stanford. All proposed degree programs are subject to approval by the department’s student services manager and the Academic Degree Committee, which has responsibility for assuring that each proposal is a technically coherent program.

MASTER’S RESEARCH REPORT

Students wishing to take this option must include 6-15 Materials Science research units on their program proposal and the name of the faculty member supervising the research. Students using 15 units of research toward the degree must participate in a more complex and demanding research project than those using fewer units.

The report must be approved by two faculty members. One faculty member is the student’s research adviser. The other faculty member must be approved by the department’s student services manager. Three copies of the report (one copy for each approving faculty member and one for the department file), in final form and signed by the two faculty members, must be submitted to the department’s student services manager one week before final examinations of the final quarter of the program. The report is not an official University thesis but rather is intended to demonstrate to department faculty an ability to conduct and report directed research. Refer to the Materials Science and Engineering Student Handbook for further clarification concerning this report.

In cases where students decide to pursue research after the initial program submission deadline, they should submit a revised M.S. Program Proposal at least two quarters before the degree is granted. The total combined units of Materials Science research
units, seminars, language courses, and undergraduate courses cannot exceed 15. If a master’s research report is not to be submitted, units of MATSCI 200 cannot be applied to the department’s requirement of 45 units for the master’s degree.

HONORS COOPERATIVE PROGRAM

Some of the department’s graduate students participate in the Honors Cooperative Program (HCP), which makes it possible for academically qualified engineers and scientists in industry to be part-time graduate students in Materials Science while continuing professional employment. Prospective HCP students follow the same admissions process and must meet the same admissions requirements as full-time graduate students. For information regarding the Honors Cooperative Program, see the “School of Engineering” section of this bulletin.

PETITION PROCESS FOR TRANSFER FROM M.S. TO PH.D. DEGREE PROGRAM

Students admitted to the graduate program are admitted specifically into either the M.S. or the Ph.D. program. A student admitted to the M.S. program should not assume admission to the Ph.D. program. Admission to the Ph.D. program is required for the student to be eligible to work towards the Ph.D. degree.

A student in the M.S. program may petition to be admitted to the Ph.D. program by filing an M.S. to Ph.D. Transfer Petition. This petition must be accompanied by a one-page statement of purpose stating the reasons why the student wishes to transfer to the Ph.D. program, an updated transcript, and two letters of recommendation from members of the Stanford faculty, including one from the student’s prospective adviser and at least one from a Materials Science faculty member belonging to the Academic Council. The M.S. to Ph.D. Transfer Petition is due to the department’s services manager by the end of the second week of Spring Quarter during the student’s first year in the M.S. program. Only students enrolled in the 200 series core course sequence are eligible to petition, and a grade point average (GPA) of 3.5 or better in the core courses is required.

Transferring to the Ph.D. program is a competitive process and only fully qualified M.S. students are admitted. Faculty consider the student’s original application to the graduate program as well as the material provided with the transfer petition.

ENGINEER IN MATERIALS SCIENCE ENGINEERING

The University’s basic requirements for the degree of Engineer are outlined in the “Graduate Degrees” section of this bulletin.

A student wishing to enter the Engineer program must have completed the requirements of the M.S. in Materials Science and Engineering, and must file a petition requesting admission to the program, stating the type of research to be done and the proposed supervising professor. Once approved, the Application for Candidacy must be submitted to the department’s student services manager by the end of the second quarter in the Engineer program. Final changes in the Application for Candidacy form must be submitted no later than one academic quarter prior to degree conferral.

The 90-unit program must include 9 units of graduate courses in Materials Science with a MATSCI subject code (exclusive of research units, seminars, colloquia, and MATSCI 400, Participation in Teaching) beyond the requirements for the M.S. degree, and additional research or other units to meet the 90-unit University minimum requirement. A grade point average (GPA) of 3.0 must be maintained for all degree course work taken at Stanford.

Completion of an acceptable thesis is required. The Engineer thesis must be approved by two Academic Council faculty members, one of whom must be a member of the department, and submitted in triplicate.

DOCTOR OF PHILOSOPHY IN MATERIALS SCIENCE ENGINEERING

The University’s basic requirements for the Ph.D. degree are outlined in the “Graduate Degrees” section of this bulletin. Degree requirements for the department are as follows:

1. Students must submit a Ph.D. program plan consisting of at least 135 units, which contains a minimum of 48 core, approved technical and seminar units.† For these 48 units:
   a. 30 units Materials Science and Engineering required core courses (MATSCI 201**), 202, 203, 204, 205, 206, 207, 208, 209, 210) must be taken, with at least six core courses (including MATSCI 203, 204, 207) during the first year.
   b. 15 elective graduate technical units directly relevant to Materials Science and Engineering must be taken (units not to include MATSCI 300, Ph.D. Research, MATSCI 400, Participation in Materials Science Teaching, or MATSCI 299, Practical Training).

2. The remaining 87 units are to be at least 75 units of MATSCI 300, Ph.D. research, and up to 12 units of other courses (may include MATSCI 400, Participation in Materials Science Teaching, and a maximum 3 units of MATSCI 299, Practical Training).

3. Students must consult with their Academic Adviser on program planning. The program planning sheet must be submitted with the approval of the student’s Dissertation Adviser on joining that research group, and no later than the end of spring quarter of the first year. For students with a non-MATSCI Dissertation Adviser, the MATSCI Academic Adviser must also approve the list of proposed courses. Any proposed deviations from the requirements can only be considered by petition.

4. Ph.D. students are required to obtain an M.S. degree in Materials Science normally by the end of their second year. A Graduate Program Authorization Petition and a M.S. Program Proposal must be submitted prior to taking the qualifying examination. Courses taken for the 48 core and technical units of Ph.D. work may count towards the M.S. degree requirements.

5. Departmental oral qualifying examination must be passed by the end of the first year. A grade point average (GPA) of 3.5 from the six core classes taken is required for admission to the Ph.D. qualifying exam. Students who have passed the Ph.D. Qualifying exam are required to complete the Application for Candidacy for the Ph.D. degree by the end of the quarter in which they pass the exam. Final changes in the Application for Candidacy form must be submitted no later than one academic quarter prior to degree conferral.

6. Maintain a GPA of 3.0 in all degree courses taken at Stanford.

7. Students must present the results of the dissertation at the University Ph.D. oral examination.

8. Current students subject to either this set of requirements or a prior set must obtain the approval of their adviser before filing a revised program sheet, and should as far as possible adhere to the intent of the new requirements.

9. Students may reference the list of Advanced Specialty Courses and Cognate Courses provided below as guidance for their selection of technical units. As noted above, Academic Adviser approval is required.

* At least 90 units must be taken in residence at Stanford. Students entering with an M.S. degree in Materials Science from another university may request to transfer up to 45 units of equivalent work toward the total of 135 required units.

† Students may, if they have sufficient background, petition out of some of the required core courses. Petition requires consent from their academic adviser, and consent from the instructor of the core course. That instructor provides an oral or written examination that the petitioning student must pass.

** To be offered 2010-11.
MECHANICAL ENGINEERING

Chair: Friedrich B. Prinz
Vice Chair: Kenneth E. Goodson
Group Chairs: Mark R. Cutkosky (Design), Scott L. Delp (Biomechanical Engineering), Parviz Moin (Flow Physics and Computational Engineering), Peter M. Pinsky (Mechanics and Computation), Juan G. Santiago (Thermosciences)
Associate Professors: Christopher F. Edwards, J. Christian Gerdes, Mark E. Levenston, Reginald E. Mitchell, Heinz G. Pitsch, Juan G. Santiago
Assistant Professors: Wei Cai, Eric F. Darve, Gianluca Iaccarino, Ellen Kuhl, Adrian J. Lew, Beth L. Pruitt, Xiaolin Zheng
Professor (Research): Kenneth J. Waldron
Professor (Teaching): David W. Beach
Associate Professor (Teaching): Shilajeeet S. Banerjee
Courtesy Professors: Ralph S. Greco, J. Kenneth Salisbury, R. Lane Smith, George S. Springer, Robert T. Street, Paul Yock
Courtesy Associate Professor: Charles A. Taylor
Senior Lecturers: Vadim Khayms, J. Craig Milroy
Consulting Associate Professors: Mehdi Asheghi, Julian Gorodsky, Gary D. Lichtenstein, William Moggridge, Carol B. Muller, R. Matthew Ohline, Sunil Puria, Paul Saffo, Marc F. Theeuwsen
Consulting Assistant Professors: Michael Barry, Brendan J. Boyle, Dennis J. Boyle, William R. Burnett, Dev Patnaik
* Recalled to active duty.

Student Services: Building 530, Room 125
Mail Code: 94305-3030
Student Services Phone: (650) 725-7695
Web Site: http://me.stanford.edu

Courses offered by the Department of Mechanical Engineering are listed under the subject code ME on the Stanford Bulletin’s ExploreCourses web site.

MECHANICAL ENGINEERING COURSE CATALOG NUMBERING SYSTEM

The department uses the following course numbering system:

- 010-099 Freshman and Sophomore
- 100-199 Junior and Senior
- 200-299 Advanced Undergraduate and Beginning Graduate
- 300-399 Graduate
- 400-499 Advanced Graduate
- 500 Ph.D. Thesis

The programs in the Department of Mechanical Engineering (ME) emphasize a mix of applied mechanics, biomechanical engineering, computer simulations, design, and energy science and technology. Since mechanical engineering is a broad discipline, the undergraduate program can be a springboard for graduate study in business, law, medicine, political science, and other professions
where understanding technology is important. Both undergraduate and graduate programs provide technical background for work in biomechanical engineering, environmental pollution control, ocean engineering, transportation, and other multidisciplinary problems that concern society. In all programs, emphasis is placed on developing systematic procedures for analysis, communication of work and ideas, practical and aesthetic aspects in design, and responsible use of technology.

The department has five groups: Biomechanical Engineering; Design; Flow Physics and Computation; Mechanics and Computation; and Thermosciences. Each maintains its own labs, shops, and offices.

The Biomechanical Engineering (BME) Group has teaching and research activities which focus primarily on musculoskeletal biomechanics, neuromuscular biomechanics, cardiovascular biomechanics, and rehabilitation engineering. Research in other areas including hearing, ocean, plant, and vision biomechanics exists in collaboration with associated faculty in biology, engineering, and medicine. The group has strong research interactions with the Mechanics and Computation and the Design groups, and the departments of Neurology, Radiology, and Surgery in the School of Medicine.

The Design Group emphasizes creative development for creative work. It is concerned with computer-aided design, creativity, design aesthetics, design for manufacturability, design research, experimental stress analysis, fatigue and fracture mechanics, finite element analysis, human factors, kinematics, manufacturing systems, microcomputers in design, microelectromechanics systems (MEMS), robotics, and vehicle dynamics. The group offers undergraduate and graduate programs in Product Design (jointly with the Department of Art and Art History) and is centrally involved in the Institute of Design; for further information, see http://dschool.stanford.edu.

The Flow Physics and Computation Group (FPC) is developing new theories, models, and computational tools for accurate engineering analysis and control of complex flows (including acoustics, chemical reactions, interactions with electromagnetic waves, plasmas, and other phenomena) of interest in aerodynamics, electronics cooling, environmental engineering, materials processing, planetary entry, propulsion and power systems, and other areas. FPC research emphasizes modeling and analysis of physical phenomena in engineering systems. Students and research staff are developing new methods and tools for generation, access, display, interpretation and post-processing of large databases resulting from numerical simulations of physical systems. Research in FPC ranges from advanced simulation of complex turbulent flows to active flow control. Faculty teach graduate and undergraduate courses in acoustics, aerodynamics, computational fluid mechanics, computational mathematics, fluid mechanics, combustion, and thermodynamics and propulsion.

The Mechanics and Computational Group covers biomechanics, continuum mechanics, dynamics, experimental and computational mechanics, finite element analysis, fluid dynamics, fracture mechanics, micromechanics, nanotechnology, and simulation based design. Qualified students can work as research project assistants, engaging in thesis research in association with the faculty director and fellow students. Projects include analysis, synthesis, and control of systems; biomechanics; flow dynamics of liquids and gases; fracture and micro-mechanics, vibrations, and nonlinear dynamics; and original theoretical, computational, and experimental investigations in the strength and deformability of elastic and inelastic elements of machines and structures.

The Thermosciences Group conducts experimental and analytical research on both fundamental and applied topics in the general area of thermal and fluid systems. Research strengths include high Reynolds number flows, microfluidics, combustion and reacting flows, multiphase flow and combustion, plasma sciences, gas physics and chemistry, laser diagnostics, microscale heat transfer, convective heat transfer, and energy systems. Research motivation comes from applications including air-breathing and space propulsion, bioanalytical systems, pollution control, electronics fabrication and cooling, stationary and mobile energy systems, biomedical systems, and materials processing. Emphasis is on fundamental experiments leading towards advances in modeling, optimization, and control of complex systems.

Mission Statement—The goal of Stanford’s undergraduate program in Mechanical Engineering is to provide each student with a balance of intellectual, practical, and professional experiences, and a foundation of knowledge, and self-discovery to prepare the graduate to address societal needs. The program prepares each student for entry-level work as a mechanical engineer, graduate study in engineering, or graduate study in another field where a broad engineering background provides a foundation. With grounding in the principles and practice of mechanical engineering, graduates are ready to engage in learning about and employing new concepts, technologies, and methodologies.

Facilities

The department groups maintain modern laboratories that support undergraduate and graduate instruction and graduate research work.

The Structures and Composites Laboratory, a joint activity with the Department of Aeronautics and Astronautics, studies structures made of fiber-reinforced composite materials. Equipment for fabricating structural elements includes autoclave, filament winder, and presses. X-ray, ultrasound, and an electron microscope are available for nondestructive testing. The lab also has environmental chambers, a high-speed impactor, and mechanical testers. Lab projects include designing composite structures, developing novel manufacturing processes, and evaluating environmental effects on composites.

Experimental facilities are available through the interdepartmental Structures and Solid Mechanics Research Laboratory, which includes an electrohydraulic materials testing system, a vehicle crash simulator, and a shake table for earthquake engineering and related studies, together with highly sophisticated auxiliary instrumentation. Facilities to study the micromechanics of fracture areas are available in the Micromechanics/Fracture Laboratory, and include a computer-controlled materials testing system, a long distance microscope, an atomic force microscope, and other instrumentation. Additional facilities for evaluation of materials are available through the Center for Materials Research, Center for Integrated Circuits, and the Ginzton Laboratory. Laboratories for biological experimentation are accessible through the School of Medicine. Individual accommodation is available for the work of each research student.

Major experimental and computational laboratories engaged in bioengineering work are located in the Biomechanical Engineering Group. Other Biomechanical Engineering Group activities and resources are associated with the Rehabilitation Research and Development Center of the Veterans Administration Palo Alto Health Care System. This major national research center has computational and prototyping facilities. In addition, the Rehabilitation Research and Development Center houses the Electrophysiology Laboratory, Experimental Mechanics Laboratory, Human Motor Control Laboratory, Rehabilitation Device Design Laboratory, and Skeletal Biomechanics Laboratory. These facilities support graduate course work as well as Ph.D. student research activities.

Computational and experimental work is also conducted in various facilities throughout the School of Engineering and the School of Medicine, particularly the Advanced Biomaterials Testing Laboratory of the Department of Materials Science and Engineering, the Orthopaedic Research Laboratory in the Department of Functional Restoration, and the Vascular Research Laboratory in the Department of Surgery. In collaboration with the School of Medicine, facilities throughout the Stanford Medical Center and the Veterans Administration Palo Alto Health Care System conduct biological and clinical work.

The Design Group has facilities for lab work in experimental mechanics and experimental stress analysis. Additional facilities, including MTS electrohydraulic materials test systems, are availa-
ble in the Solid Mechanics Research Laboratory. Design Group students also have access to Center for Integrated Systems (CIS) and Ginzton Lab microfabrication facilities.

The group also maintains the Product Realization Laboratory (PRL), a teaching facility offering students integrated experiences in market definition, product design, and prototype manufacturing. The PRL provides coaching, design manufacturing tools, and networking opportunities to students interested in product development. The ME 310 Design Project Laboratory has facilities for CAD, assembly, and testing of original designs by master’s students in the engineering design program. A Smart Product Design Laboratory supports microprocessor application projects. The Center for Design Research (CDR) has an excellent facility for concurrent engineering research, supply chain management activities at the Department of Management Science and Engineering. The Rapid Prototyping Laboratory consists of seven processing stations including cleaning, CNC milling, grit blasting, laser deposition, low temperature deposition, plasma deposition, and shot peening. Students gain experience by using ACIS and Pro Engineer on Hewlett Packard workstations for process software development. The Design Group also has a Product Design Loft in which students in the Joint Program in Design develop graduate thesis projects.

The Fluid Mechanics and Computation Group has a 32 processor Origin 2000, 48-node and 85-node Linux cluster with high performance interconnects and an array of powerful workstations for graphics and data analysis. Several software packages are available, including all the major commercial CFD codes. FPS is strongly allied with the Center for Turbulence Research (CTR), a research consortium between Stanford and NASA, and the Center for Integrated Turbulence Simulations (CITS), which is supported by the Department of Energy (DOE) under its Accelerated Strategic Computing Initiative (ASCI). The Center for Turbulence Research has direct access to major national computing facilities located at the nearby NASA-Ames Research Center, including massively parallel super computers. The Center for Integrated Turbulence Simulations has access to DOE’s vast supercomputer resources. The intellectual atmosphere of the Fluid Physics and Computation Group is greatly enhanced by the interactions among CTR’s and CITS’s postdoctoral researchers and distinguished visiting scientists.

The Mechanics and Computation Group has a Computational Mechanics Laboratory that provides an integrated computational environment for research and research-related education in computational mechanics and scientific computing. The laboratory houses Silicon Graphics, Sun, and HP workstations and servers, including an 8-processor SGI Origin2000 and a 16-processor networked cluster of Intel machines with parallel and distributed computing solutions of computationally intensive problems. Software is available on the laboratory machines, including commercial packages for engineering analysis, parametric geometry and meshing, and computational mathematics. The laboratory supports basic research in computational mechanics as well as the development of related applications such as simulation-based design technology.

The Thermosciences Group has four major laboratory facilities. The Heat Transfer and Turbulence Mechanics Laboratory concentrates on fundamental research aimed at understanding and improved prediction of turbulent flows and high performance energy conversion systems. The laboratory includes two general-purpose wind tunnels, a pressurized high Reynolds number tunnel, two supersonic cascade flow facilities, three specialized boundary layer wind tunnels, and several other flow facilities. Extensive diagnostic equipment is available, including multiple particle-image velocimetry and laser-Doppler anemometry systems.

The High Temperature Gas Dynamics Laboratory includes research on sensors, plasma sciences, cool and biomass combustion and gas pollutant formation, and reactive and non-reactive gas dynamics. Research facilities include diagnostic devices for combustion gases, a spray combustion facility, laboratory combustors including a coal combustion facility and supersonic combustion facilities, several advanced laser systems, a variety of plasma facilities, a pulsed detonation facility, and four shock tubes and tunnels. The Thermosciences Group and the Design Group share the Microfluidic and Thermal and Mechanical Characterization laboratory (MTMC). MTMC is dedicated to the measurement of thermal and mechanical properties in thin-film systems, including microfabricated sensors and actuators and integrated circuits, and features a nanosecond scanning laser thermometry facility, a laser interferometer, a near-field optical microscope, and an atomic force microscope. The activities at MTMC are closely linked to those at the Heat Transfer Teaching Laboratory (HTTL), where undergraduate and master’s students use high-resolution probe stations to study thermal phenomena in integrated circuits and thermally-actuated microvalves. HTTL also provides macroscopic experiments in convection and radiative exchange.

The Energy Systems Laboratory is a teaching and research facility dedicated to the study of energy conversion systems. The lab includes three dynamometers for engine testing, a computer-controlled variable engine valve controller, a fuel-cell experimental station, a small rocket testing facility, and a small jet engine thrust stand.

The Guidance and Control Laboratory, a joint activity with the Department of Aeronautics and Astronautics and the Department of Mechanical Engineering, specializes in construction of electro-mechanical systems and instrumentation, particularly where high precision is a factor. Work ranges from robotics for manufacturing to feedback control of fuel injection systems for automotive emission control. The faculty and staff work in close cooperation with both the Design and Thermosciences Groups on device development projects of mutual interest.

Many computation facilities are available to department students. Three of the department’s labs are equipped with superminicomputers. Numerous smaller minicomputers and microcomputers are used in the research and teaching laboratories.

Library facilities at Stanford beyond the general library include Engineering, Mathematics, and Physics department libraries.

**BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING**

Undergraduates seeking to major in Mechanical Engineering should see the curriculum outlined in the “School of Engineering” section of this bulletin. The University’s basic requirements for the bachelor’s degree are discussed in the “Undergraduate Degrees” section of this bulletin. Courses taken for the departmental major (mathematics; science; science, technology, and society; engineering fundamentals; and engineering depth) must be taken for a letter grade if the instructor offers the option.

A Product Design program offered by the Design Group leads to the B.S. in Engineering (Product Design). An individually designed major in Biomedical Engineering offered by the Biomedical Engineering Group leads to the B.S. in Engineering (Biomedical Engineering); this may be appropriate for students preparing for medical school or graduate bioengineering studies.

**Grade Requirements**—To be recommended by the department for a B.S. in Mechanical Engineering, a student must achieve the minimum grade point average (GPA) set by the School of Engineering (2.0 in engineering fundamentals and mechanical engineering depth).

For information about an ME minor, see the “School of Engineering” section of this Bulletin.
HONORS PROGRAM

The Department of Mechanical Engineering offers a program leading to a B.S. in Mechanical Engineering with honors. This program offers a unique opportunity for qualified undergraduate engineering majors to conduct independent study and research at an advanced level with a faculty mentor.

Mechanical Engineering majors who have a grade point average (GPA) of 3.5 or higher in the major may apply for the honors program. Students who meet the eligibility requirement and wish to be considered for the honors program must submit a written application to the Mechanical Engineering student services office no later than the second week of Autumn Quarter in the senior year. The application to enter the program can be obtained from the ME student services office, and must contain a one-page statement describing the research topic and include an unofficial Stanford transcript. In addition, the application must be approved by a Mechanical Engineering faculty member who agrees to serve as the thesis adviser for the project. Thesis advisers must be members of Stanford’s Academic Council.

In order to receive departmental honors, students admitted to the program must:
1. maintain the 3.5 GPA required for admission to the honors program
2. under the direction of the thesis adviser, complete at least 9 units of ME 191H, Honors Thesis, during the senior year
3. submit a completed thesis draft to the adviser by April 25. Further revisions and final endorsement by the adviser are to be finished by May 15, when two bound copies are to be submitted to the Mechanical Engineering student services office.
4. present the thesis at the Mechanical Engineering Poster Session held in mid-April.

GRADUATE PROGRAMS IN MECHANICAL ENGINEERING

ADMISSION AND FINANCIAL ASSISTANCE

To be eligible for admission to the department, a student must have a B.S. degree in engineering, physics, or a comparable science program. To apply for the Ph.D. degree, applicants must have already completed an M.S. degree. Applications for Ph.D. and HCP (Honors Co-op) programs are accepted throughout the year. M.S. applications for fellowship aid must be received by the first Tuesday in December. The department annually awards, on a competitive basis, a limited number of fellowships, teaching assistantships, and research assistantships to incoming graduate students. Research assistantships are used primarily for post-master’s degree students and are awarded by individual faculty research supervisors, not by the department.

Mechanical engineering is a varied profession, ranging from primarily aesthetic aspects of design to highly technical scientific research. Disciplinary areas of interest to mechanical engineers include biomechanics, energy conversion, fluid mechanics, materials, nuclear reactor engineering, propulsion, rigid and elastic body mechanics, systems engineering, scientific computing, and thermodynamics, to name a few. No mechanical engineer is expected to have a mastery of the entire spectrum.

A master’s degree program leading to the M.S. is offered in Mechanical Engineering, and a master’s degree program leading to the M.S. is offered in Engineering with a choice of the following fields of study: Biomechanical Engineering, Product Design, and an individually designed major. Fields of study are declared on Axess.

POST-MASTER’S DEGREE PROGRAMS

The department offers two post-master’s degrees: Engineer and Doctor of Philosophy. Post-master’s research generally requires some evidence that a student has research potential before a faculty member agrees to supervision and a research assistantship appointment. It is most efficient to carry out preliminary research during the M.S. degree program, if interested in a post-master’s degree.

COTERMINAL B.S./M.S. PROGRAM IN MECHANICAL ENGINEERING

Stanford undergraduates who wish to continue their studies for the Master of Science degree in the coterminal program must have earned a minimum of 120 units towards graduation. This includes allowable Advanced Placement (AP) and transfer credit. Applicants must submit their application no later than the quarter prior to the expected completion of their undergraduate degree. This is normally Winter Quarter (the deadline is February 2) prior to Spring Quarter graduation. The application must provide evidence of potential for strong academic performance as a graduate student. The M.E. department graduate admissions committee makes decisions on each application. Typically, a GPA of at least 3.5 in engineering, science, and math is expected. Applicants must have completed two of ME 80, 112, 113, 131A, and 131B, and must take the Graduate Record Examination (GRE) before action is taken on the application. Coterminal information, applications deadlines, and forms can be obtained from the ME student services office.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MASTER OF SCIENCE IN MECHANICAL ENGINEERING

The basic University requirements for the M.S. degree are discussed in the “Graduate Degrees” section of this bulletin. The master’s program consists of 45 units of course work taken at Stanford. No thesis is required, although many students become involved in research projects during the master’s program, particularly to explore their interests in working towards a Ph.D. degree. Students whose undergraduate backgrounds are entirely devoid of some of the major subject disciplines of engineering (for example, applied mechanics, applied thermodynamics, fluid mechanics, ordinary differential equations) may need to take some undergraduate courses to fill obvious gaps and prepare themselves to take graduate courses in these areas. Such students may require more than three quarters to fulfill the master’s degree requirements, as the makeup courses may only be used as unrestricted electives (see item 4 below) in the M.S. degree program. However, it is not the policy to require fulfillment of mechanical engineering B.S. degree requirements to obtain an M.S. degree.

MECHANICAL ENGINEERING

The master’s degree program requires 45 units of course work taken as a graduate student at Stanford. No thesis is required. However, students who want some research experience during the master’s program may participate in research through ME 391 and 392.

Requirements are subject to change and students are encouraged to refer to the most recent Mechanical Engineering Graduate Student Handbook provided by the student services office and
located at http://me.stanford.edu. The department’s requirements for the M.S. in Mechanical Engineering are as follows:

1. **Mathematical Fundamentals:** two mathematics courses for a total of at least 6 units from the following list are required: ME 300A, 300B, 300C; CME 302; MATH 106, 109; CS 205A or B; EE 261, 263; STATS 110, 141; ENGR 155C. Other MATH and CME courses with catalog numbers of 200 and above also fulfill the mathematics requirement. Mathematics courses must be taken for a letter grade.

2. **Depth in Mechanical Engineering:** a set of graduate-level courses in Mechanical Engineering to provide depth in one area. The faculty have approved these sets as providing depth in specific areas as well as a significant component of applications of the material in the context of engineering synthesis. These sets are outlined in the Mechanical Engineering Graduate Student Handbook. Depth courses must be taken for a letter grade.

3. **Breadth in Mechanical Engineering:** two additional graduate level courses (outside the depth) from the depth/breadth charts listed in the Mechanical Engineering Graduate Handbook. Breadth courses must be taken for a letter grade.

4. **Sufficient Mechanical Engineering Course Work:** students must take a minimum of 24 units of course work in mechanical engineering topics. For the purposes of determining mechanical engineering topics, any course on approved lists for the mathematics, depth, and breadth requirements counts towards these units. In addition, any graduate-level course with an ME course number is considered a mechanical engineering topic.

5. **Approved Electives** (to bring the total number of units to at least 39): electives must be approved by an adviser. Graduate engineering, mathematics, and science courses are normally approved. Approved electives must be taken for a letter grade. No more than 6 of the 39 units may come from ME 391/392 (or other independent study/research courses), and no more than 3 may come from seminars. Students planning a Ph.D. should discuss with their advisers the option of taking 391 or 392 during the master’s program. ME 391/392 (and other independent study courses) may only be taken on a credit/no credit basis.

6. **Unrestricted electives** (to bring the total number of units submitted for the M.S. degree to 45): students are encouraged to take these units outside engineering, mathematics, or the sciences. Students should consult their advisers on course loads and on ways to use the unrestricted electives to make a manageable program. Unrestricted electives may be taken CR/NC.

7. **Within the courses satisfying the requirements above, there must be at least one graduate-level course with a laboratory component. Courses which satisfy this requirement are:** ENGR 206, 341; ME203, 210, 220, 218A,B,C,D, 310A,B,C, 317A,B, 318, 323, 324, 348, 354, 367, 382A,B, 385. ME 391/392 (or other independent study courses) may satisfy this requirement if 3 units are taken for work involving laboratory experiments. Candidates for the M.S. in Mechanical Engineering are expected to have the approval of the faculty; they must maintain a minimum grade point average (GPA) of 2.75 in the 45 units presented for fulfillment of degree requirements (exclusive of independent study courses). All courses used to fulfill mathematics, depth, breadth, approved electives, and lab studies must be taken for a letter grade (excluding seminars, independent study, and courses for which a letter grade is not an option for any student).

   Students falling below a GPA of 2.5 at the end of 20 units may be disqualified from further registration. Students failing to meet the complete degree requirements at the end of 60 units of graduate registration are disqualified from further registration. Courses used to fulfill deficiencies arising from inadequate undergraduate preparation for mechanical engineering graduate work may not be applied to the 45 units required for completion of the MS degree.

---

**ENGINEERING**

As described in the “School of Engineering” section of this bulletin, each department in the school may sponsor students in a more general degree, the M.S. in Engineering. Sponsorship by the Department of Mechanical Engineering (ME) requires (1) filing a petition for admission to the program by no later than the day before instruction begins, and (2) that the center of gravity of the proposed program lies in ME. No more than 18 units used for the proposed program may have been previously completed. The program must include at least 9 units of graduate-level work in the department other than ME 300A,B,C, seminars, and independent study. The petition must be accompanied by a statement explaining the program objectives and how it is coherent, contains depth, and fulfills a well-defined career objective. The grade requirements are the same as for the M.S. in Mechanical Engineering.

**COGNATE COURSES**

ANTHRO 332. Transformative Design
CS 223A. Introduction to Robotics
CS 327A. Advanced Robotics
ENGR 207B. Linear Control Systems II
ENGR 209A. Analysis and Control of Nonlinear Systems
ENGR 231. Transformative Design
ENGR 240. Introduction to Micro and Nano Electromechanical Systems (M/NEMS)
ENGR 341. Micro/Nano Systems Design and Fabrication Laboratory

**MASTER OF SCIENCE IN ENGINEERING, BIOMECHANICAL ENGINEERING**

The Master of Science in Engineering: Biomechanical Engineering (MSE:BME) promotes the integration of engineering mechanics and design with the life sciences. Applicants are expected to have an additional exposure to biology and/or bioengineering in their undergraduate studies. Students planning for subsequent medical school studies are advised to contact Stanford’s Premedical Advising Office in Sweet Hall.

Students wishing to pursue this program must complete the Graduate Program Authorization form and get approval from the Student Services Office. This form serves to officially add the field to the student’s record. This form may be filled out electronically on Axess, http://axess.stanford.edu.

Degree Requirements:

1. **Mathematical competence (min 6 units) in two of the following areas:** partial differential equations, linear algebra, complex variables, or numerical analysis, as demonstrated by completion of two appropriate courses from the following list: ME300A,B,C; MATH106, 109, 113, 131M/P, 132; STATS110, or ENGR155C; CME108, 302. Students who have completed comparable graduate-level courses as an undergraduate, and who can demonstrate their competence to the satisfaction of the instructors of the Stanford courses, may be waived via petition from this requirement by their advisor and the Student Services Office. The approved equivalent courses should be placed in the "approved electives" category of the program proposal.

2. **Graduate Level Engineering Courses (minimum 21 units), consisting of:**
   a. Biomechanical engineering restricted electives (9 units) to be selected from: ME 280, 281, 284A, 287, 337, 339, 381, 382A,B, or 385
   b. Specialty in engineering (9-12 units): A set of three or four graduate level courses in engineering mechanics, materials, controls, or design (excluding bioengineering courses) selected to provide depth in one area. Such sets are approved by the Mechanical Engineering Faculty. Comparable specialty sets composed of graduate engineering courses out-
sid the Mechanical Engineering Department can be used with the approval of the student’s advisor. Examples can be obtained from the Biomechanical Engineering Group Office (Durand 223).

c. Graduate engineering electives (to bring the total number of
graduate level engineering units to at least 21). These
electives must contribute to a cohesive degree program, and
be approved by the student’s advisor. No units may come from
bioengineering courses, mathematics courses, or seminars.

3. Life science approved electives (minimum 6 units): Undergra-
duate or graduate biological/medical science/chemistry courses
which contribute to a cohesive program.

5. General approved electives (to bring the total number of units
to 39): These courses must be approved by the student’s ad-
viser. Graduate level engineering, math, physical science courses
and upper division undergraduate or graduate life science
courses are normally approved.

6. Unrestricted electives (to bring the total number of units to
45): Students without undergraduate biology are encouraged to
use some of these unrestricted units to strengthen their biology
background. Students should consult their advisor for recom-
mendations on course loads and on ways to use the unre-
limited electives to create a manageable program.

All courses except unrestricted electives must be taken for a letter
grade unless letter grades are not an option.

**MASTER OF SCIENCE IN ENGINEERING,
PRODUCT DESIGN**

The Joint Program in Design focuses on the synthesis of tech-
nology with human needs and values to create innovative products, services, and experience designs. This program is offered jointly by the departments of Mechanical Engineering and Art and Art History. It provides a design education that integrates technical, human, aesthetic, and business concerns. Students entering the program from the engineering side earn a Master of Science in Engineering degree with a concentration in Product Design, and those from the art side a Master of Fine Arts. Students complete the core product design courses in their first year of graduate study at Stanford before undertaking the master’s project in their second year.

**DEGREE REQUIREMENTS**

Students must complete the following courses. Students making unsatisfactory degree progress by the end of the first year may not advance to the thesis year per the faculty’s discretion. A minimum cumulative GPA of 2.75 is required for degree conferred.

<table>

</tr>
</thead>
<tbody>
<tr>
<td>60-62</td>
</tr>
</tbody>
</table>

Note: All required and approved electives must be taken for a letter grade unless prior approval is granted to take a class CR/NCR.

* ME 316A,B,C and ARTSTUDI 360A,B,C are taken concurrently for three quar-
ters during the second year.

** Students may choose classes (at the 200 level or higher) from any of the schools at the University to fulfill their elective requirement. However, electives that are not already pre-approved must be approved by the student’s advisor via petition prior to enrollment. Electives should be chosen to fulfill career objectives; stu-
dents may focus their energy in engineering, entrepreneurship and business, psy-
chology, or other areas relevant to design. Taking a coherent sequence of elec-
tives focused on a subject area is recommended. For example, the patent, negotia-
tion, and licensing classes (ME 207, 208, 265) constitute a sequence most relevant to potential inventors. The classes in the Graduate School of Business (STRAMGT S353, 356/366) and MS&E 273 constitute a coherent sequence in entrepreneurship and new venture formation. Students interested in social entre-
preneurship should apply to the d.school course ME 206A,B, Extreme Affordability.

Pre-approved electives list: The following courses are pre-
approved for fulfilling the 18-unit elective requirement for the
master’s degree in Engineering/Product Design. Electives taken
that are not on this list must be approved via petition prior to
enrollment. These must be taken for a letter grade unless prior
approval is obtained.

**ENGINEER IN MECHANICAL ENGINEERING**

The basic University requirements for the degree of Engineer
are discussed in the “Graduate Degrees” section of this bulletin.

This degree requires an additional year of study beyond the
M.S. degree and includes a research thesis. The program is de-
signed for students who wish to do professional engineering work
upon graduation and who want to engage in more specialized study
than is afforded by the master’s degree alone.

Admission standards are substantially the same as indicated
under the master’s degree. However, since thesis supervision is
required and the availability of thesis supervisors is limited, admis-
sion is not granted until the student has personally engaged a facul-
ty member to supervise a research project. This most often in-
volves a paid research assistantship awarded by individual faculty
members (usually from the funds of sponsored research projects
under their direction). Thus, individual arrangement between stu-
dent and faculty is necessary. Students studying for the M.S. de-
gree at Stanford who wish to continue to the Engineer degree ordi-
narily make such arrangements during the M.S. degree program.

For students holding master’s degrees from other universities they are in-
vited to apply and may be admitted providing they are sufficiently
well qualified and have made thesis supervision and financial aid
arrangements.

Department requirements for the degree include a thesis; up to
18 units of credit are allowed for thesis work (ME 400). In addition
to the thesis, 27 units of approved advanced course work in mathe-
ematics, science, and engineering are expected beyond the re-
quirements for the M.S. degree; the choice of courses is subject to approval of the adviser. Students who have not fulfilled the Stanford M.S. degree requirements are required to do so, with allowance for approximate equivalence of courses taken elsewhere; up to 45 units may be transferable. A total of 90 units is required for degree conferal.

Candidates for the degree must have faculty approval and have a minimum grade point average (GPA) of 3.0 for all courses (exclusive of thesis credit and other independent study courses) taken beyond those required for the master’s degree.

**DOCTOR OF PHILOSOPHY IN MECHANICAL ENGINEERING**

The basic University requirements for the Ph.D. degree are discussed in the “Graduate Degrees” section of this bulletin. The Ph.D. degree is intended primarily for students who desire a career in research, advanced development, or teaching; for this type of work, a broad background in mathematics and the engineering sciences, together with intensive study and research experience in a specialized area, are the necessary requisites.

Ph.D. students must have a master’s degree from another institution, or must fulfill the requirements for the Stanford M.S. degree in Mechanical Engineering or another discipline.

In special situations dictated by compelling academic reasons, Academic Council members who are not members of the department’s faculty may serve as the principal dissertation adviser when approved by the department. In such cases, a member of the department faculty must serve as program adviser and as a member of the reading committee, and agree to accept responsibility that department procedures are followed and standards maintained.

Admission involves much the same consideration described under the Engineer degree. Since thesis supervision is required, admission is not granted until the student has personally engaged a member of the faculty to supervise a research project. Once a student has obtained a research supervisor, this supervisor becomes thereafter the student’s academic adviser. Research supervisors may require that the student pass the departmental qualifying examination before starting research and before receiving a paid research assistantship. Note that research assistantships are awarded by faculty research supervisors and not by the department.

Prior to being formally admitted to candidacy for the Ph.D. degree, the student must demonstrate knowledge of engineering fundamentals by passing a qualifying examination. The academic level and subject matter of the examination correspond approximately to the M.S. program described above. Typically, the exam is taken shortly after the student completes the M.S. degree requirements. The student is required to have a minimum graduate Stanford GPA of 3.5 to be eligible for the exam (grades from independent study courses are not included in the GPA calculation). Once the student’s faculty sponsor has agreed that the exam should be scheduled, the student must submit an application folder containing several items including a curriculum vitae, research project abstract, and preliminary dissertation proposal. Information, examination dates, and deadlines may be obtained from the department’s student services office.

Ph.D. candidates must complete a minimum of 27 units (taken for a letter grade) of approved formal course work (excluding research, directed study, and seminars) in advanced study beyond the M.S. degree. The courses should consist primarily of graduate courses in engineering and sciences, although the candidate’s adviser may approve a limited number of upper-level undergraduate courses and courses outside of engineering and sciences, as long as such courses contribute to a strong and coherent program. In addition to this 27-unit requirement, all Ph.D. candidates must participate each quarter in one of the following (or equivalent) seminars: ME 389, 390, 393, 394, 395, 396 397; AA 297; ENGR 298, 311A/B. The department has a breadth requirement for the Ph.D. degree. This may be satisfied either by a formal minor in another department (generally 27 units) or by at least 9 units of course work (outside of the primary research topic) that is approved by the principal dissertation adviser.

The Ph.D. thesis normally represents at least one full year of research work and must be a substantial contribution to the field. Students may register for course credit for thesis work (ME 500) to help fulfill University academic unit requirements, but there is no minimum limit on registered dissertation units, as long as students are registered in at least 8 units per quarter prior to TGR. Candidates should note that only completed course units are counted toward the requirement, so ungraded courses or courses with an “N” grade must be cleared before going TGR. Questions should be directed to the department student services office.

The final University oral examination (dissertation defense) is conducted by a committee consisting of a chair from another department and four faculty members of the department or departments with related interests. Usually, the committee includes the candidate’s adviser, reading committee members, plus two more faculty. The examination consists of two parts. The first is open to the public and is scheduled as a seminar talk, usually for one of the regular meetings of a seminar series. The second is conducted in private and covers subjects closely related to the dissertation topic.

**PH.D. MINOR IN MECHANICAL ENGINEERING**

Students who wish a Ph.D. minor in ME should consult with the ME student services office. A minor in ME may be obtained by completing 20 units of approved graduate-level ME courses. Courses approved for the minor must form a coherent program and must be chosen from those satisfying requirement 2 for the M.S. in Mechanical Engineering. Please see the Graduate Handbook produced by the Mechanical Engineering Student Services Office for more information.
SCHOOL OF HUMANITIES AND SCIENCES

Dean: Richard P. Saller
Senior Associate Deans: Martin M. Fejer, Ian H. Gotlib, Stephen Hinton
Senior Associate Dean for Finance and Administration: Adam R. Daniel
Associate Dean for Faculty Affairs: Tina Kass
Associate Dean for Graduate and Undergraduate Studies: D. E. Lorraine Sterritt
Assistant Dean and Data and Technology Manager for Graduate and Undergraduate Studies and Diversity Programs: Ayodele Thomas
Graduate Diversity Recruitment Specialist: Joseph L. Brown
Department Chairs: Russell Berman (Comparative Literature and German Studies), Carl Bielefeldt (Religious Studies), Patricia Burchat (Physics), Karen Cook (Sociology), James Fearon (Political Science), James Ferguson (Anthropology), Paula Findlen (History), James Fishkin (Communication), Gregory Freidin (Slavic Languages and Literatures), Lawrence Gould (Economics), Roland Greene (Division of Literatures, Cultures, and Languages; and Iberian and Latin American Cultures), Robert Harrison (French and Italian), Aharon Kapitulnik (Applied Physics), Helen Longino (Philosophy), Rafe Mazzeo (Mathematics), James McClelland (Psychology), Stephen Palumbi (Hopkins Marine Station), Peggy Phelan (Drama), Stephen Sano (Music), Walter Scheidel (Classics), Robert Simoni (Biology), Jennifer Summit (English), Chaofen Sun (East Asian Languages and Cultures), Richard Vinograd (Art and Art History), Tom Wasow (Linguistics), Wing Wong (Statistics), Richard Zare (Chemistry)
Lecturer: Ayodele Thomas

The School of Humanities and Sciences, with over 40 departments and interdepartmental degree programs, is the primary locus for the liberal arts education offered by Stanford University. Through exposure to the humanities and arts, undergraduates study the ethical, aesthetic, and intellectual dimensions of the human experience, past and present, and are thereby prepared to make thoughtful and imaginative contributions to the culture of the future. Through the study of social, political, and economic events, they acquire theories and techniques for the analysis of specific societal issues, as well as general cross-cultural perspectives on the human condition. And through exposure to the methods and discoveries of mathematics and the sciences, they become well-informed participants and leaders in today’s increasingly technological societies.

The research environment within the school offers both undergraduate and graduate students the intellectual adventure of working on their own research projects side by side with the school’s distinguished faculty. While a few of the school’s graduate programs offer professional degrees such as the Master of Fine Arts, most are academic and research programs leading to the Ph.D. Doctoral programs emphasize original scholarly work by the graduate students, often at the frontiers of knowledge, and normally require the students to participate in the supervised teaching of undergraduates. Indeed, in the school, as in the University more broadly, graduate students are of central importance in developing a community of scholars.

The fact that so many different disciplines lie within the same organization is one reason why the school has had great success in promoting interdisciplinary teaching and research programs. Whether engaged in studies as wide ranging as ethics, policy, and technological issues, or by applying contemporary social and philosophical theories to classical literature, the school’s undergraduates, graduate students, and faculty are challenging the barriers among scholarly disciplines. The school continues to strive for a balance between teaching and research, the academy and society.

ORGANIZATION

The School of Humanities and Sciences includes the departments of Anthropology, Applied Physics, Art and Art History, Biology (and the Hopkins Marine Station), Chemistry, Classics, Communication, Comparative Literature, Drama, East Asian Languages and Cultures, Economics, English, French and Italian, German Studies, History, Iberian and Latin American Cultures, Linguistics, Mathematics, Music, Philosophy, Physics, Political Science, Psychology, Religious Studies, Slavic Languages and Literatures, Sociology, and Statistics.

The school also includes 21 interdepartmental degree programs: African and African American Studies; African Studies; American Studies; Archaeology; Biophysics; Comparative Studies in Race and Ethnicity; East Asian Studies; Feminist Studies; Financial Mathematics; Human Biology; Interdisciplinary Studies in Humanities; International Policy Studies; International Relations; Latin American Studies; Mathematical and Computational Science; Modern Thought and Literature; Public Policy; Russian, East European and Eurasian Studies; Science, Technology, and Society; Symbolic Systems; and Urban Studies.

In addition, the school sponsors programs that do not currently grant degrees: Astronomy; Black Performing Arts; Buddhist Studies; Creative Writing; Ethics in Society; History and Philosophy of Science; the Institute for Gender Research; the Institute for Social Science Research; Islamic Studies; Jewish Studies; Medieval Studies; and the Social Science History Institute.

Faculty and academic staff of the School of Humanities are listed under their respective departments or programs.

DEGREES OFFERED

Candidates for the degree of Bachelor of Arts, Bachelor of Science, Bachelor of Arts and Sciences, Master of Arts, Master of Fine Arts, Master of Science, Doctor of Musical Arts, or Doctor of Philosophy should consult the department or program in which they intend to specialize.
AFRICAN AND AFRICAN AMERICAN STUDIES

Acting Director: Michele Elam
Associate Director: Cheryl Brown
Advisory Committee: James Campbell (History), Clayborne Carson (History), Linda Darling-Hammond (Education), Harry Elam (Drama), Shelley Fisher Fishkin (English), Allyson Hobbs (History), Morris Graves (Associate Dean of Students), Arnold Rampersad (English), Elaine C. Ray (Director, Stanford University News Service), John R. Rickford (Linguistics), Joel Samoff (African Studies)

Affiliated Faculty: David Abernethy (Political Science, emeritus), R. Lanier Anderson (Psychology), Armeta Ball (Education), Richard Banks (Law), Lucas Barker (Political Science, emeritus), Don Barr (Sociology), Shasad Bashir (Religious Studies), Carl Bielefeldt (Religious Studies), Rashida Braggs (IHUM), Bryan Brown (Education), Albert Camarillo (Politics), James Campbell (History), Clayborne Carson (History), Prudence Carter (Education), Wanda Corn (Art and Art History, emerita), Linda Darling-Hammond (Education), David Degusta (Anthropology), Sally Dickson (Law), Sandra Drake (English, emerita), Jennifer Eberhardt (Psychology), Paulla Ebron (Anthropology), Harry Elam (Drama), James Ferguson (Anthropology), Shelley Fisher Fishkin (English), Charlotte Fonrobert (Religious Studies), George Fredrickson (History, emeritus), James Gibbs Jr. (Political Science, emeritus), William B. Gould (Law, emeritus), Sean Hamretta (History), Aleta Hayes (Drama), Allyson Hobbs (History), Terry Karl (Political Science), Anthony Kramer (Drama), Teresa LaFromboise (Education), Brian Lowery (Graduate School of Business), Lisa Malkki (Anthropology), Hazel Markus (Psychology), Barbara Martinez-Ruiz (Art and Art History), Monica McDermott (Sociology), Robert Moses (Drama), Paula Moya (English), Elisabeth Mudimbe-Boyé (French and Comparative Literature), Susan Olzak (Sociology), David Palumbo-Liu (Comparative Literature), Patricia Powell (African and American Studies), Jack Rakove (History), Arnold Rampersad (English), John R. Rickford (Linguistics), Richard Roberts (History), Sonia Roche (Sociology), Michael Rosenfeld (Sociology), Ramón Saldívar (English), Joel Samoff (African Studies), Paul Sniderman (Political Science), Ewart Thomas (Psychology), Jeremy Weinstein (Political Science)

Courses offered by the Program in African and African American Studies are listed under the subject code AFRICAAM on the Stanford Bulletin’s ExploreCourses web site.

UNDERGRADUATE PROGRAMS IN AFRICAN AND AFRICAN AMERICAN STUDIES

The Program in African and African American Studies (AAAS), established in 1968, was the first ethnic studies program developed at Stanford University and the first African and African American Studies program at a private institution in the U.S. The AAAS Program provides an interdisciplinary introduction to the study of peoples of African descent as a central component of American culture, offering a course of study that promotes research across disciplinary and departmental boundaries as well as providing research training and community service learning opportunities for undergraduates. It has developed an extensive and dedicated network of Stanford scholars who work in race studies specific to AAAS and in concert with the Center for Comparative Studies in Race and Ethnicity.

AAAS encourages an interdisciplinary program of study drawn from anthropology, art, art history, economics, languages, linguistics, literature, music, philosophy, political science, psychology, religion, and sociology, among others. The Program emphasizes rigorous and creative scholarship and research, and fosters close academic advising with a faculty advisor, the AAAS Associate Director, and the Director.

Note: AAAS is an Interdisciplinary Program (IDP) affiliated with the Center for Comparative Studies in Race & Ethnicity (CCSRE) and offers a major independent of it. (CCSRE offers four other majors in Asian American, Chicano/a, Comparative, and Native American Studies).

BACHELOR OF ARTS IN AFRICAN AND AFRICAN AMERICAN STUDIES

MAJOR

Majors must complete a total of 60 units, which include the following:

1. AFRICAAM 105. Introduction to African and African American Studies, or ENGLISH 143. Introduction to African American Literature

2. One 5 unit course on Africa, approved by the AAAS Director and Associate Director

3. AFRICAAM 200X. Honors Thesis and Senior Thesis Seminar

At least 10 of these units must be core courses, which are defined as courses that are primarily focused on Africa, African American Studies, the Caribbean, or the African Diaspora.

Students also work closely with a faculty adviser, the AAAS associate director, and the AAAS director in developing a coherent thematic emphasis within their major that reflects their scholarly interests in the field.

THEMATIC EMPHASIS

AAAS majors select a thematic emphasis, devoting at least 25 units in their major program of study towards the emphasis. Selecting an emphasis allows students to customize their curriculum and to synthesize course work taken across various departments and programs into a coherent focus. Emphases offered include:

Africa; African America; Diaspora; Identities, Diversity, and Aesthetics (IDA); Gender; Class; Theory; Historical Period.

All emphases (those listed as well as proposed alternatives) must be approved by the director and a course plan developed and approved by the director, associate director, and faculty adviser within the first year of declaring the major.

HONORS PROGRAM

AAAS offers a special program leading to Honors in African and African American Studies. Students accepted to this program will complete an honors thesis on an approved topic, on which work will normally begin in the junior year and be completed by mid-May of the senior year. The honors thesis is intended to enable students to synthesize skills to produce a document or project demonstrating a measure of competence in their specialty.

The Honors program begins with extensive advising from the faculty adviser and a petition for Honors, approved no later than the Spring Quarter of the junior year. Students must enroll in AFRICAAM 200X, Honors Thesis and Senior Thesis Seminar during Autumn of the senior year and may take up to an additional 10 units of honors work to be distributed as best fits the student’s program. Senior Research units are taken in addition to the required courses for the major. In May of the senior year, Honors students share their research findings in a public presentation to which faculty and students are invited.

MINOR IN AFRICAN AND AFRICAN AMERICAN STUDIES

Students who minor in AAAS complete a minimum of 30 units from the list of AAAS courses. These courses must include:

1. AFRICASAAM 105. Introduction to African and African American Studies
2. one course from the social sciences list
3. one course from the humanities list

See the "Bachelor of Arts in African and African American Studies" section of this bulletin to view the humanities and social sciences lists.

Students should seek to develop a coherent theme in their course selections in consultation with the program director or associate director. An appointment should be made to discuss the rationale for the minor theme before submitting the declaration forms.

OVERSEAS STUDIES COURSES IN AFRICAN AND AFRICAN AMERICAN STUDIES

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

OSPCPTWN 36. The Archaeology of Southern African Hunter Gatherers. 5 units, John Parkinson
OSPCPTWN 40. Education in the Post-Apartheid City. 4 units, Aslam Fataar
Courses in African Studies are offered by departments and programs throughout the University. Each year the center sponsors a seminar to demonstrate to advanced undergraduates and graduate students how topics of current interest in African Studies are approached from different disciplinary perspectives.

Course offerings in African languages are also coordinated by the Center for African Studies. Along with regular courses in several levels of Arabic, Swahili, Xhosa, and Zulu, the center arranges with the African and Middle Eastern Languages and Literatures Program in the Stanford Language Center to offer instruction in other African languages; in recent years, it has offered courses in Amharic, Bambara, Chichewa, Ewe, Fulani, Hausa, Igbo, Shona, Twi, Wolof, and Yoruba.

The Center for African Studies offers a master of arts degree for graduate students. Undergraduates and graduate students not pursuing the master’s degree can specialize in African Studies under the arrangements listed below.

**UNDERGRADUATE PROGRAMS IN AFRICAN STUDIES**

Undergraduates may choose an African Studies focus from:

1. A major in a traditionally defined academic department such as Anthropology, History, or Political Science. These departments afford ample opportunity to enroll in courses outside the major, leaving the student free to pursue the interdisciplinary study of Africa.

2. Interdepartmental majors, such as African and African American Studies or International Relations, which offer coordinated and comprehensive interdisciplinary course sequences, permitting a concentration in African Studies.

3. An individually designed major. Under the supervision of a faculty adviser and two other faculty members, the student can plan a program of study focused on Africa that draws courses from any department or school in the University. If approved by the dean’s advisory committee on individually designed majors, the program becomes the curriculum for the B.A. degree.

**CERTIFICATE IN AFRICAN STUDIES**

Students may apply for a certificate in African Studies. Requirements for the certificate are the same as for the minor; however, students may double-count courses applied toward their major or graduate studies. The principal difference between the minor and the certificate is that the certificate does not appear on the transcript. For more information and an application, contact the center.

**MINOR IN AFRICAN STUDIES**

The Center for African Studies awards a minor in African Studies. Students majoring in any field qualify for this minor by meeting the following requirements:

1. A minimum of 25 units of Africa-related courses. Students may not double-count courses for completing major and minor requirements.

2. At least one quarter’s exposure to a sub-Saharan African language. The Center for African Studies and the Special Languages Program may arrange instruction in any of several languages spoken in West, East, Central, and Southern Africa.

3. One introductory course that deals with more than one region of Africa.

4. A minimum 25-page research paper, with a focus on Africa. This paper may be an extension of a previous paper written for an African Studies course.

5. A designated focus of study, either disciplinary or regional, through a three-course concentration.

Upon completion of requirements, final certification of the minor is made by the Center for African Studies and appears on the student’s transcript.
GRADUATE STUDY IN AFRICAN STUDIES

For those who wish to specialize in Africa at the graduate level, African Studies can be designated a field of concentration within the master’s and doctoral programs of some academic departments. Students in such departments as Anthropology, History, Political Science, and Sociology, and in the School of Education, may declare African Studies as the area of specialization for their master’s and Ph.D. thesis work. Some other departments, programs, and institutes, such as the International Comparative Education Program also permit students to specialize in African Studies. Stanford graduate students who are U.S. citizens or permanent residents may request an academic year application for a Foreign Language and Area Studies (FLAS) Fellowship. Students need not be enrolled at Stanford to apply for the summer fellowship. The deadline for both is January 8. For more information or an application, contact the Center.

FINANCIAL AID

The Center for African Studies offers a limited number of Foreign Language and Area Studies fellowships to U.S. citizens and permanent residents who undertake full-time study of an African language as part of their graduate training.

COTERMINAL BACHELOR’S AND MASTER OF ARTS IN AFRICAN STUDIES

The one-year master’s program in African Studies is designed for students who have experience working, living, or studying in Africa, and little prior course work on the region.

Undergraduates at Stanford may apply for admission to the coterminal master’s program in African Studies. Coterminal degree applications will only be accepted from students in their fourth year, meaning that the program must be completed in the fifth year. An exception can only be made for students who completed an honors thesis in their third year. For University coterminal degree program rules and application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm. Requirements for the master’s degree are summarized below.

The annual deadline for all applications, including coterminal and master’s, is January 8. All applicants must submit an online application, including a 500-word statement of purpose, resume, 15-20 page double-spaced academic writing sample, three letters of recommendation, official transcripts, and Graduate Record Examination scores. TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction. To apply online and for information on graduate admissions, see http://gradadmissions.stanford.edu.

DEGREE REQUIREMENTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin. A description of the M.A. program is also available from the Center or at http://ica.stanford.edu/af/ma.

The program requires completion of a minimum of 45 graduate units. Upon entering, each student is assigned a faculty adviser who works with the student to develop a customized program of study.

To receive the M.A. degree in African Studies, students must complete:

1. Core Courses (15 units): students must complete the core African Studies M.A. course, AFRICAST 301, Dynamics of Change in Africa, in Autumn Quarter. Students elect two additional graduate courses taught by African Studies academic council members and drawn from a list of approved courses. Students must also complete AFRICAST 302, Research Workshop, in Spring Quarter, in which they present and discuss their research and research interests.

2. Cognate Courses (10 units): a minimum of 10 units of graduate-level credit in two cognate courses from the following thematic clusters not chosen as the student’s concentration field: culture and society; health, well-being, and the environment; and political economy and security.

3. Concentration Field (12-15 units): students choose one area of specialization (culture and society; health, well-being, and the environment; or political economy and security), and a group of three related elective courses for graduate credit from the cognate course listings or elsewhere in the Stanford curriculum in consultation with the student’s adviser and with the approval of the CAS director. With approval, introductory courses may be substituted in fields such as advanced undergraduate biology for those interested in epidemic diseases or public health. The academic adviser, in agreement with faculty in the chosen field, guarantees that each set of courses forms part of a coherent program.

4. Language Requirement: students take one year of training in an African language, usually at least 3 units per quarter, resulting in intermediate-level proficiency as measured by the American Council on the Teaching of Foreign Languages (ACTFL) or comparable language acquisition standards. Students who have advanced proficiency in an African language must fulfill this requirement by taking another European language spoken in Africa, such as French or Portuguese, by taking another African language to the intermediate-level, or by taking a year-long sequence in Arabic. Students with competency in one or more African languages and one or more other languages widely spoken in Africa, may substitute a program of methodological training including, for example, a sequence of courses in statistics or GIS survey techniques.

5. Seminar Requirement: students enroll each quarter in AFRICAST 300, Contemporary Issues in African Studies, 1 unit, in which guest scholars present lectures on African themes and topics.

6. Thesis Option: students may elect to write a master’s thesis; they may register for up to 10 units of thesis research under the guidance of an Academic Council member. Thesis units may be counted toward the electives within the concentration field unit requirements.

7. Grade Requirements: courses to be counted toward the degree, except for AFRICAST 300, must be taken for a letter grade and receive a grade of ‘B’ or higher.

In addition to AFRICAST courses, the following courses offered in other departments may be used to fulfill optional requirements. To meet requirements for the master’s degree, students must take courses at the graduate level which are typically at least at the 200 level.

AFRICAAM 101. African American Lecture Series: Race and Faith

Courses offered by American Studies Program are listed under the subject code AMSTUD on the Stanford Bulletin’s ExploreCourses web site.

MISSION OF THE PROGRAM IN AMERICAN STUDIES

American Studies is an interdisciplinary undergraduate major that seeks to convey a broad understanding of American culture and society. Building on a foundation of courses in history and institutions, literature and the arts, and race and ethnicity, students bring a range of disciplines to bear on their efforts to analyze and interpret America’s past and present, forging fresh and creative syntheses along the way. Beyond the core requirements of the major, students may define and pursue their own interests from fields such as history, literature, art, communication, theater, African American studies, Chicana/o studies, law, sociology, education, Native American studies, music, and film. The program is designed to prepare students majoring in American Studies for further study in graduate or professional schools as well as careers in government, business, or other specialized fields.

BACHELOR OF ARTS IN AMERICAN STUDIES

The core requirements illustrate how different disciplines approach the study and interpretation of American life and include three courses in each of two main areas: history and institutions; and literature, art, and culture. The required gateway seminar, AMSTUD 160, Perspectives on American Identity, explores the tensions between commonality and difference from a variety of disciplinary perspectives.

Beyond the core requirements of the major, American Studies expects students to define and pursue their own interests in interpreting important dimensions of American life. Accordingly, each student designs a thematic concentration of at least five courses drawn from fields such as history, literature, art, communication, theater, political science, African American studies, feminist studies, economics, anthropology, religious studies, Chicana/o studies, law, sociology, education, Native American studies, music, and film. At least one of the five courses in a student’s thematic concentration should be a small group seminar or a colloquium. With program approval, students may conclude the major with a capstone honors research project during their senior year.

Whether defined broadly or narrowly, the thematic focus or concentration should examine its subject from the vantage of multiple disciplines. Examples of concentrations include: race and the law in America; gender in American culture and society; technology in American life and thought; health policy in America; art and culture in 19th-century America; education in America; nature and the environment in American culture; politics and the media; religion in American life; borders and boundaries in American culture; the artist in American society; and civil rights in America.

Completion of the major thus normally requires 13 courses (totalling at least 60 units), all of which must be taken for a letter grade.

The course requirements for the American Studies major are:

1. History and Institutions—American Studies majors are required to complete three foundation courses in American History and Institutions. Specific requirements are:
   - HISTORY 150A. Colonial and Revolutionary America
   - HISTORY 150B. 19th-Century America
   - The third course may be chosen from one of the following: AMSTUD 179, Introduction to American Law

   ECON 116. American Economic History
   HISTORY 150C. The United States in the 20th Century (not given 2009-10)
Sample thematic concentrations and courses that allow a student to plan a thematic concentration and capstone seminar—by the end of registration period, Autumn quarter of the junior year. Students may choose courses for their thematic concentration from the following list.

AFRICAAM 105. Introduction to African and African American Studies

FEMST 101. Introduction to Feminist Studies
FEMST 188N. Imagining Women: Writers in Print and in Person
FILMSTUD 101. Masculinity and Violence in American Cinema
HISTORY 54N. African-American Women’s Lives
HISTORY 64C/164C. African-American History, 1865-1965
HISTORY 150C. The United States in the Twentieth Century
HISTORY 164D. History of North American Wests
HISTORY 165. Mexican American History Through Film
HISTORY 251. Creating the American Republic
HISTORY 252. Decision-Making in International Crises—The A-Bomb, the Korean War, and the Cuban Missile Crisis
HISTORY 254. Popular Culture and American Nature
HISTORY 255D. Racial Identity in American Imagination
HISTORY 256. U.S.-China Relations: From the Opium War to Tiananmen
HISTORY 258. The History of Sexuality in the United States
HISTORY 259A/B. Poverty and Homelessness
HISTORY 260. California’s Minority-Majority Cities
HISTORY 261. Race, Gender, and Class in Jim Crow America

2. Literature, Art, and Culture—Majors must take three gateway courses that, together, cover the broad range of the American experience. Specific requirements are:

a. at least one course focusing on the period before the Civil War, normally AMSTUD 150, American Literature and Culture to 1855
b. two additional courses, including at least one from Art or Drama. Choices include but are not limited to:

AMSTUD 123G. Mark Twain: A Fresh Look at an Icon and Iconoclast 100 Years After His Death
AMSTUD 138C. Huckleberry Finn and American Culture (not given 2009-10)
ARTHIST 132. American Art and Culture, 1528-1860
ARTHIST 176. Feminism and Contemporary Art
ARTHIST 178. Ethnicity and Dissent in United States Art and Literature (not given 2009-10)
ARTHIST 259. The Fifties: Abstract Expressionism to Beat Culture
DRAMA 110. Identity, Diversity and Aesthetics: The Institute for Diversity in the Arts
DRAMA 163. Performance and America (not given 2009-10)
DRAMA 165M. Musical Theater
ENGLISH 121. Masterpieces of American Literature
ENGLISH 143. Introduction to African American Literature
ENGLISH 146C. Hemingway, Hurston, Faulkner, and Fitzgerald
ENGLISH 172E. Literature of the Americas

3. Comparative Race and Ethnicity—Majors are required to take one course in Comparative Studies of Race and Ethnicity that focuses on comparative studies rather than a single racial or ethnic group (5 units). Courses that satisfy this requirement include:

AMSTUD 114N. Visions of the 1960s
AMSTUD 214. The American 1960s: Thought, Protest, and Culture
CASAS 88. Theories of Race and Ethnicity (not given 2009-10)
COMPLIT 146. Asian American Culture and Community
COMPLIT 241. Comparative Fictions of Ethnicity (not given 2009-10)
CSRE 196C. Introduction to Comparative Studies in Race and Ethnicity
SOC 139/239. American Indians in Contemporary Society
SOC 148. Racial Identity (not given 2009-10)
SOC 149. The Urban Underclass
If a CSRE course is appropriate for a student’s thematic focus, the course may be used to satisfy both this requirement and, in part, the unit requirement for the focus.

4. Gateway Seminar—Majors are required to take AMSTUD 160, Perspectives on American Identity (5 units), which is the Writing in the Major (WIM) course for American Studies.

Thematic Concentration and Capstone Seminar—Students must design a thematic concentration of at least 5 courses. The courses, taken together, must give the student in-depth knowledge and understanding of a coherent topic in American cultures, history, and institutions. With the help of faculty advisers, students are required to design their own thematic concentrations, preferably by the end of registration period, Autumn quarter of the junior year. Sample thematic concentrations and courses that allow a student to explore them are available in the American Studies Office in Building 460.
To graduate with honors, American Studies majors must complete at least 28 units of course work in the program. Because students may not count courses for both a major and a minor, the specific courses that are used for an American Studies minor depend on the courses that are used to satisfy the major requirement.

A student must take the following:

1. at least 2 courses from category 1 (History and Institutions)
2. at least 2 courses from category 2 (Literature, Art, and Culture)
3. at least 1 course from category 3 (CSRE)
4. AMSTUD 160. Perspectives on American Identity

Courses used to satisfy these requirements must be taken for a letter grade.

ANTHROPOLOGY

Emeriti: (Professors) Clifford R. Barnett, Harumi Befu, George A. Collier, Jane F. Collier, Carol Delaney, Charles O. Frake, James L. Gibbs, Jr., Renato I. Rosaldo, George D. Spindler, Robert B. Teeter

Chair: James Ferguson

Professors: Lisa Curran, William H. Durham, James Ferguson, Ian Hodder (on leave), Richard G. Klein, Tanya Luhrmann, Lynn Meskell (on leave), Sylvia J. Yanagakisoko

Associate Professors: Rebecca Bliege Bird, Paulla Ebron, James A. Fox, Miyako Inoue, Matthew Kohrman, Liisa Malkki, John W. Rick, Barbara Voss

Assistant Professors: Melissa J. Brown, David DeGusta, Sarah Loehllam Jain, James Holland Jones, Ian G. Robertson (on leave), Michael V. Wiley

Assistant Professor (Research): Douglas W. Bird

Visiting Associate Professor: Ewa Domanska

Lecturers: Camila Briault, Kathleen Coll, Claudia Engel, Matthew Jobin, Alma Kunanbaeva, Carolyn Nakamura, Merritt Ruhlen, Dan Salkeld, James Truncer

Consulting Associate Professor: Joanna Mountain

Affiliated Faculty: Carol Boggs, J. Gordon Brotherston, Susan Cashion, Jean-Pierre Dupuy, Marcus W. Feldman, John A. Gosling, Robert Sapolsky, Jeffrey T. Schnapp, Bernardo Subercaseaux

Post Doctoral Fellows: Carter Hunt, Cheryl Makarewicz

Teaching Affiliates: Serena Love, Tiffany Romain, Angel Roque, Bryn Williams

Department Offices: 450 Serra Mall, Main Quadrangle, Building 50

Mail Code: 94305-2034
Courses offered by the Department of Anthropology are listed under the subject code ANTHRO on the Stanford Bulletin’s ExploreCourses web site.

**MISSION OF THE DEPARTMENT OF ANTHROPOLOGY**

The courses offered by the Department of Anthropology are designed to: (1) provide undergraduates with instruction in anthropology; (2) provide undergraduate majors in anthropology with a program of work leading to the bachelor’s degree; and (3) prepare graduate candidates for advanced degrees in anthropology. Anthropology is devoted to the study of human beings and human societies as they exist across time and space. It is distinct from other social sciences in that it gives central attention to the full time span of human history, and to the full range of human societies and cultures, including those located in historically marginalized parts of the world. It is therefore especially attuned to questions of social, cultural, and biological diversity, to issues of power, identity, and inequality, and to understanding the dynamic processes of social, historical, ecological, and biological change over time. Education in anthropology provides excellent preparation for living in a multicultural and globally-interconnected world, and helps to equip students for careers in fields including law, medicine, business, public service, research, ecological sustainability and resource management. Students may pursue degrees in anthropology at the bachelor’s, master’s, and doctoral levels.

The Department of Anthropology offers a wide range of approaches to the various topics and area studies within anthropology including: archaeology, ecology, environmental anthropology, evolution, linguistics, medical anthropology, political economy, science and technology studies, and sociocultural anthropology. Methodologies for the study of micro- and macro-social processes are taught through the use of qualitative and quantitative approaches. The department provides students with excellent training in theory and methods to enable them to pursue graduate study in any of the above mentioned subfields of anthropology.

**UNDERGRADUATE PROGRAMS IN ANTHROPOLOGY**

Beginning in academic year 2007-2008, the departments of Anthropological Sciences and Cultural and Social Anthropology merged to form the department of Anthropology. Students who declared a major in Anthropological Sciences or in Cultural and Social Anthropology prior to the academic year 2007-2008 should consult the Stanford Bulletin 2006-07 for degree requirements. Such students may continue in their degree program under those requirements, or they may petition for the Bachelor of Arts in Anthropology.

In addition to gaining an excellent foundation for graduate research and study, students majoring in Anthropology can pursue careers in government, international business, international development agencies, international education, law, mass media, non-profit organizations, and public policy.

**BACHELOR OF ARTS IN ANTHROPOLOGY**

Undergraduate training in the department of Anthropology is designed for students who seek the bachelor of arts (B.A.) degree only. Students may declare a major in Anthropology and earn the B.A. degree by following the requirements below. The department also offers a minor in Anthropology. The B.A. degree program usually requires at least five quarters of enrollment. Students interested in majoring in Anthropology are encouraged to declare by the beginning of their junior year and to work closely with an adviser to develop a coherent program of study. For more complete information about the major see the department web site at http://anthropology.stanford.edu.

To declare a major in Anthropology, contact the department’s student peer adviser(s) or the undergraduate student program coordinator to prepare the checklist for the major and the major planning form. These forms are available at http://anthropology.stanford.edu. Apply in Axess for the B.A. in Anthropology, submit the required forms to the undergraduate student program coordinator requesting a faculty adviser assignment, and meet with the assigned faculty adviser to receive approval of the checklist and major planning form. Students must apply in Axess for the B.A. Major in Anthropology by the time junior status is achieved (85 units).

**DEGREE REQUIREMENTS**

The B.A. degree in Anthropology may be earned by fulfilling the following requirements:

1. A faculty adviser appointed in the department of Anthropology. Quarterly meetings with the faculty adviser are required.
2. A program of 65 units, passed with an overall minimum grade of ‘C’ or higher:
   a. of the 65 units, 15 units may be approved from related areas of study, overseas studies, and/or transfer units.
   b. of the 65 units, at least 15 units must be in courses with the ANTHRO subject code numbered 100 or above.
   c. no more than 10 units of directed reading-style course work may be counted towards the major. These units may only be included among the 15 related units permitted for the major.
   d. no more than 10 units may be taken for a satisfactory/no credit grade: 5 units in ANTHRO courses, and 5 in related or transfer units.
3. A grade of ‘B-’ or higher in an ANTHRO Writing in the Major (WIM) course. This should be taken within a year of declaring the major or before the end of the junior year.
4. A grade of ‘B-’ or higher in an ANTHRO theory course. This should be taken within a year of declaring the major or before the end of the junior year.
5. A self-designed course of study, approved by the faculty adviser, chosen from an Anthropology emphasis listed below:
   a. Archaeology and Heritage
   b. Culture and Society
   c. Ecology, Environment and Evolution
   d. Medical Anthropology
6. A grade of ‘B-’ or higher in an ANTHRO methods course. This should be taken within a year of declaring the major or before the end of the junior year.
7. A grade of ‘C’ or higher in a minimum of four ANTHRO essential courses listed at the 100 level or higher and taught by Anthropology faculty.
8. Competence in a foreign language beyond the first-year level. Such competence is usually demonstrated by completing a 5 unit course at the second-year level with a grade of ‘B-’ or better. The requirement may be met by special examination administered through the Language Center, or demonstration of superior placement scores. Note: Students whose programs require non-English language study as part of a geographical or linguistics focus may ask their faculty adviser to approve up to 5 units from language courses toward the degree if such courses are at the second-year level and above, or are in a second non-English language.
9. At least five quarters of enrollment in the major. Each candidate for the B.A. in Anthropology should declare a major by the first quarter of the third year of study.

Advising is an important component of the Anthropology major. Students are encouraged to work closely with their major adviser throughout their pursuit of the degree. Advising milestones for the major include the following:

1. In the quarter in which the major is declared, students must meet with their assigned adviser, create a rigorous course of study based on topical breadth, and obtain adviser approval of an Anthropology emphasis as a course of study.
2. Each quarter, students are required to meet with their adviser before the Final Study List deadline. Any revisions to the initial checklist must be approved by the faculty adviser.

3. An updated major checklist and planning form must be submitted to the undergraduate student program coordinator before the student graduates.

**Required Courses**—

1. **Writing in the Major courses:**
   a. The Anthropology theory courses listed below as required for the corresponding Anthropology emphasis fulfill the Writing in the Major requirement for the B.A. in Anthropology.

2. **Theory courses:** Enroll in one of the following according to the student’s chosen emphasis:
   a. Archaeology and Heritage: ANTHRO 90A. History of Archaeological Thought
   b. Culture and Society/Medical Anthropology: ANTHRO 90B. Theory in Cultural and Social Anthropology
   c. Ecology, Environment, and Evolution: ANTHRO 90C. Theory of Ecological and Environmental Anthropology

3. **Methods courses:** Enroll in one of the following according to the student’s chosen emphasis:
   a. Archaeology and Heritage: ANTHRO 91A. Archaeological Methods
   b. Culture and Society/Medical Anthropology: ANTHRO 91B. Evidence and Methods in Cultural and Social Anthropology

4. **Essential courses:** Choose from the following according to the student’s chosen emphasis:
   a. For the Archaeology and Heritage emphasis, most essential courses are numbered ANTHRO 100 through ANTHRO 113.
   b. For the Culture and Society emphasis, most essential courses are numbered ANTHRO 120 through ANTHRO 150.
   c. For the Ecology, Environment, and Evolution emphasis, most essential courses are numbered ANTHRO 160 through ANTHRO 178.
   d. For the Medical Anthropology emphasis, most essential courses are numbered ANTHRO 179 through ANTHRO 185.

**Note:** These courses may fulfill the essential course requirements for more than one emphasis. See department web site at http://anthropology.stanford.edu for details.

5. **Research courses:** Courses listed below are recommended for students writing a research paper in the major:
   - ANTHRO 92, Undergraduate Research Proposal Writing Workshop
   - ANTHRO 93, Prefield Research Seminar
   - ANTHRO 94, Postfield Research Seminar
   - ANTHRO 95A, Research in Anthropology

6. **Senior courses:** ANTHRO 95B. Senior Paper.

**SENIOR PAPER AND HONORS PROGRAM**

The senior paper program in Anthropology provides majors the opportunity to conduct original research under the guidance of an Anthropology faculty member. All Anthropology majors are encouraged to write a senior paper. Interested Anthropology majors of junior standing may apply to the senior paper program by submitting a senior paper application form, including a research topic/title of the proposed honors project, a two page abstract/proposal, a transcript, and a letter of reference from their faculty advisor to the undergraduate student program coordinator. The theory and methods course appropriate to the student’s chosen emphasis of study.

ANTHRO 95B, Senior Paper is required in the final quarter of the student’s B.A. degree program. Senior papers with a letter grade of ‘A-’ or higher may be awarded departmental honors. Students may enroll for a minimum of 5 units and up to a maximum of 10 units.

**RESEARCH OPPORTUNITIES IN ANTHROPOLOGY**

Students majoring in Anthropology are encouraged to develop field research projects under the supervision of a department faculty member. The department offers research grants to support individually-designed and other summer field research in Anthropology. The department research grants may be used to support field research as a supplement to other field research grants such as the UAR research grants.

See http://anthropology.stanford.edu for information about the department’s summer research opportunities, including the following: Beagle II Award, Franz Boas and Pritzker summer scholars programs, the Georgia Sea Islands Cultural Heritage Preservation Project, and Michelle Z. Rosaldo Summer Field Research Grant program.

**Note:** Required courses for the Franz Boas and Pritzker summer scholars programs and the Michelle Z. Rosaldo grant program include ANTHRO 93, Prefield Research Seminar, or ANTHRO 93B, Prefield Research Seminar for Non-majors, and ANTHRO 94, Postfield Research Seminar.

For more information about research opportunities and deadlines, please see http://anthropology.stanford.edu

**MINOR IN ANTHROPOLOGY**

To declare a minor in Anthropology, contact the department’s student peer adviser(s) or the undergraduate student program coor-
ordinator to prepare the minor checklist and the minor planning form. These forms are available at http://anthropology.stanford.edu. Apply in Axess for the B.A. Minor in Anthropology; submit the required forms to the undergraduate student program coordinator; request a faculty adviser assignment; and meet with the assigned faculty adviser for approval of the checklist and minor planning form. Students must apply in Axess for the B.A. Minor in Anthropology by the last day of the quarter at least two quarters before degree conferral.

Requirements for the minor in Anthropology include the following:
1. A faculty adviser appointed in the Department of Anthropology.
2. A program of 30 units, with a minimum grade of ‘C’ or higher:
   a. Of the 30 units, 10 units may be approved from related areas of study, overseas studies, and transfer units.
   b. Of the 30 units, a minimum of 15 units must be ANTHRO courses numbered 100 or above.
   c. No more than 5 units of directed reading-style course work may be counted toward the minor and may only be included among the 10 related units permitted for the minor.
   d. No more than 5 units may be taken for a satisfactory/no credit grade.
3. A self-designed course of study chosen from an Anthropology emphasis listed below and approved by the faculty adviser:
   a. Archaeology and Heritage
   b. Culture and Society
   c. Ecology, Environment and Evolution
   d. Medical Anthropology
4. A grade of ‘C’ or higher in two ANTHRO essential courses listed at the 100 level or higher and taught by Anthropology faculty.
5. At least two quarters of enrollment in the minor. Each candidate for the B.A. Minor in Anthropology should declare by the last day of the quarter at least two quarters before the quarter of degree conferral.

Advising milestones for the minor include the following:
1. In the quarter in which the minor is declared, the student must meet with his or her assigned adviser, create a rigorous course of study based on topical breadth, and obtain adviser approval for the checklist.
2. Any revisions to the initial checklist must be approved by the faculty adviser.
3. An updated minor checklist and planning form must be submitted to the undergraduate student program coordinator before the student graduates.

GRADUATE PROGRAMS IN ANTHROPOLOGY

Graduate training in Anthropology at Stanford is designed for students who seek the Doctoral (Ph.D.) degree, and for students who seek the Masters of Arts (M.A.) degree, only. Entering graduate students need not have majored in Anthropology as undergraduates, although most must have backgrounds in behavioral, biological, social, or physical sciences.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES IN ANTHROPOLOGY

The University requirements for the coterminal M.A. are described in the "Undergraduate Degrees" section of this bulletin. The University minimum requirements for the coterminal bachelor’s/master’s program are 180 units for the bachelor’s degree plus 45 (or higher departmental requirement, as determined by each graduate department) unduplicated units for the master’s degree. The requirements for the coterminal program with dual undergraduate degrees are 225 units for the two bachelor’s degrees, and 45 units for the master’s degree. For the 45-unit University minimum for the master’s degree, all courses must be at or above the 100 level and 50 percent must be courses designated primarily for graduate students (typically at least at the 200 level). Department requirements may be higher. Units for a given course may not be counted to meet the requirements of more than one degree, that is, no units may be double-counted. No courses taken more than two quarters prior to admission to the coterminal master’s program may be used to meet the 45-unit University minimum requirement for the master’s degree.

Graduate enrollment at Stanford University for three consecutive quarters of full tuition for at least 45 units is required of all candidates for the coterminal master’s degree. M.A. students in Anthropology must take a minimum of 45 units of Anthropology course work beyond the undergraduate degree with an overall grade point average of 3.0 or higher. 45 units constitute the University minimum for the M.A. degree, and courses must be at or above the 100 level.

The M.A. program usually requires more than one year of study. However, full-time students entering the program with appropriate background should complete the M.A. degree program within three consecutive calendar quarters after the student’s first quarter of master’s-level enrollment. The University allows no transfer units into the master’s program. To provide a meaningful master’s program within one year, advance planning of course work with an adviser is required. Requirements for the coterminal master’s program must be completed within three years.

For further information about the department’s coterminal master’s degree program requirements, see http://anthropology.stanford.edu.

ADMISSION TO THE COTERMINAL MASTER’S DEGREE PROGRAM

The deadline for graduate applications to the coterminal M.A. degree program in Anthropology is March 2, 2010. Successful applicants for the M.A. program may enter only in the following Autumn Quarter. Coterminal master’s degree applicants are not required to submit their Graduate Record Examination scores. Prospective applicants should see http://anthropology.stanford.edu for further information about the department’s requirements to the coterminal master’s program.

Degree Options—Students may pursue three different tracks in the Anthropology M.A. degree program. The tracks are 1) Archaeology, 2) Culture and Society, or 3) Ecology and Environment. The tracks are not declarable in Axess.

MASTER OF ARTS IN ANTHROPOLOGY

University requirements for the terminal M.A. are described in the "Graduate Degrees" section of this bulletin. The Department of Anthropology offers the terminal master’s degree to the following:
1. Stanford graduate students, taking advanced degrees in other departments or schools at Stanford, who are admitted to the terminal M.A. program in Anthropology.
2. Anthropology Ph.D. students at Stanford University who fulfill the terminal M.A. requirements on the way to the Ph.D. degree.
3. Graduate applicants who apply from outside the University for admission to the terminal M.A. program in Anthropology. These applicants whose ultimate goal is the Ph.D. degree should apply directly to the Ph.D. program. Students accepted for the terminal M.A. degree program cannot transfer to the Ph.D. program; they must reapply on the same basis as other Ph.D. applicants and in competition with the Ph.D. applicants. Ph.D. students who decide to take the M.A. on the way to the Ph.D. are governed by separate requirements described in the department’s handbook for the Ph.D. Program.

Graduate enrollment at Stanford University for three consecutive quarters of full tuition for at least 45 units is required of all candidates for the terminal master’s degree. M.A. students in Anthropology must take a minimum of 45 units of Anthropology course work beyond the undergraduate degree with an overall grade point average of 3.0 or higher. 45 units constitute the University minimum for the M.A. degree, and courses must be at or above the 100 level.
The M.A. program usually requires more than one year of study. However, full-time students entering the program with appropriate background should complete the M.A. degree program within three consecutive calendar quarters after the student's first quarter of master's-level enrollment. The University allows no transfer units into the master’s program. To provide a meaningful master’s program within one year, advance planning of course work with an adviser is required. Requirements for the terminal master’s program must be completed within three years.

For further information about the department’s master’s degree program requirements, see http://anthropology.stanford.edu.

ADMISSION TO THE MASTER’S DEGREE PROGRAM

The deadline for graduate applications to the M.A. degree program in Anthropology is March 2, 2010. Successful applicants to the M.A. program may enter only in the following Autumn Quarter. Master’s degree applicants must file a report of their Graduate Record Examination score electronically. Prospective applicants should see http://anthropology.stanford.edu for further information about the department’s requirements to the terminal master’s program.

No financial support is available to students enrolled for the M.A. degree.

Degree Options—Students may pursue three different tracks in the Anthropology M.A. degree program. The tracks are 1) Archaeology, 2) Culture and Society, or 3) Ecology and Environment. The tracks are not declarable in Axess.

DEGREE REQUIREMENTS

Requirements for the coterminal and terminal master’s degree program include the following:

1. A faculty adviser appointed in the Department of Anthropology.
2. A program of 45 units, taken at the 100 level or higher with a minimum grade of ‘B’ or higher:
   a. of the 45 units, no more than 15 units may be approved from related areas of study or overseas studies.
   b. of the 45 units, no more than 10 units of directed reading-style course work may be counted towards the degree.
   c. of the 45 units, no more than 5 units may be taken for a satisfactory/no credit grade.
3. A grade of ‘B’ or higher in an ANTHRO theory course from the chosen track.
4. A grade of ‘B’ or higher in an ANTHRO methods course from the chosen track.
5. A grade of ‘B’ or higher in four ANTHRO review courses from the chosen track that are listed at the 200 level or higher and taught by Anthropology faculty.
6. Choose a self-designed course of study from the Anthropology tracks listed below:
   a. Archaeology
   b. Culture and Society
   c. Ecology and Environment
7. Submit a Graduate Research Proposal approved by the faculty adviser by the end of the first quarter of the master’s degree program.
8. Submit a Master’s Degree Program Proposal form approved by the faculty adviser by the end of the first quarter of the master’s degree program.
9. Present the master’s research project at the department’s master’s (honors) presentation event in Spring Quarter.
10. Submit the master’s thesis reviewed by two faculty members. For the Culture and Society track the thesis can be a field research or library research paper. For the Archaeology and the Ecology and Environment tracks, the thesis can also be a laboratory research paper.

Required Courses—

1. Archaeology Track—Four departmental review courses which must include ANTHRO 303, Introduction to Archaeology Theory and one additional theory course. Students must also take ANTHRO 307, Archaeology Methods and Research Design.
2. Culture and Society Track—Four departmental review courses which must include ANTHRO 301, History of Anthropological Theory, and ANTHRO 300, Reading Theory through Ethnography. Students must also take ANTHRO 306, Anthropological Research Methods.
3. Ecology and Environment Track—Four departmental review courses which must include ANTHRO 302, History and Theory in Evolution and Ecology (or comparable, approved 200 level course), plus ANTHRO 305, Research Methods in Ecological Anthropology (or comparable, approved 200 level course).

Recommended Courses—For all tracks, attendance at the departmental colloquium each quarter is recommended for all master’s students. Students can enroll in ANTHRO 444, Anthropology Colloquium. For the Ecology and Environment track, students may also take ANTHRO 312G, Problems in Ecology, Evolution and Environment, for one quarter, in place of attendance at one quarter of the departmental colloquium.

DOCTOR OF PHILOSOPHY IN ANTHROPOLOGY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin. The deadline for graduate application to the Ph.D. degree program is December 15, 2009. Prospective applicants should see http://anthropology.stanford.edu for information about application for graduate admission. Successful applicants for the Ph.D. program may enter only in Autumn Quarter. It is department policy not to defer graduate admission. Applicants must file a report of their Graduate Record Examination score electronically, submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level, and provide a statement of purpose. In addition to a clear statement of research interests in the statement of purpose, it is especially important for applicants to provide a detailed description of the area of specialization as well as the topical interests for dissertation research. Applicants should also submit three letters of reference and recent, original transcripts.

The Ph.D. program allows the student to develop a flexible program reflecting special research interests, under the supervision of a faculty committee chosen by the student. Students are encouraged to plan for completion of all work for the Ph.D. in five years. Ph.D. students in Anthropology must complete a minimum of 135 quarter units with a minimum grade point average (GPA) of 3.0 (B). The maximum allowable number of transfer units is 45.

Degree Options—Students may pursue three different tracks in the Anthropology M.A. degree program. The tracks are 1) Archaeology, 2) Culture and Society, or 3) Ecology and Environment. The tracks are not declarable in Axess.

DEGREE REQUIREMENTS

For students who matriculate beginning 2009-10, the requirements for the Doctoral degree program include the following:

1. For the first year in the degree program, students must submit a plan of study, signed by their faculty adviser, prior to the Autumn Quarter course enrollment deadline. At this time students confirm their chosen track from Archaeology, Culture and Society, or Ecology and Environment.
2. Within the first two years, pass with a grade of ‘B+’ or higher six graduate level ANTHRO subject code review courses appropriate to the student’s chosen track.
3. In the first year of the program:
   a. pass with a grade of ‘B+’ or higher the theory course(s) appropriate for the chosen track—Archaeology track only: ANTHRO 303, Introduction to Archaeological Theory; Culture and Society track only: ANTHRO 300, Reading Theory Through Ethnography, and ANTHRO 301, History of Anthropological Theory; Ecology and Environment track only: ANTHRO 306, Anthropological Research Methods.
4. In the second year,
   a. as required by the chosen track—pass with a grade of ‘B+’ or higher: ANTHRO 308, Proposal Writing Seminar (offered Spring Quarter).
   b. complete at least 40 units of course work in the second year for a total of at least 85 units of course work by the end of the second year.
   c. pass with grade of ‘B+’ or better remaining ANTHRO subject code review courses to complete the six course requirement.
   d. in the second year pass the second of two required methods courses: ANTHRO 304, Data Analysis for Quantitative Research, and/or ANTHRO 305, Research Methods in Ecological Anthropology or comparable, approved courses at the ANTHRO 200 level. This is required for the Ecology and Environment track only.
   e. at the beginning of Autumn Quarter in the second year, attend the teaching assistantship training workshop.
   f. serve as a teaching assistant for at least one quarter in the second year.
   g. by the first day of finals week in Winter Quarter of the second year, recruit a total of four committee members for the qualifying written examinations for topic (two committee members made up of an adviser and a reader) and for area (two committee members made up of an adviser and a reader). At least three of the four readers must be from within the Anthropology Department.
   h. by the first day of finals week in Spring Quarter of the second year, confirm the qualifying written examination schedule, (the written exam to be completed by the first day of finals week in the Winter Quarter of the third year and the oral examination to be completed no later than the beginning of the fourth week of Spring Quarter in the third year).

5. For those whose native language is English, pass, by the end of Spring Quarter of the second year, an examination in a language other than English (see Ph.D. Handbook for details). For those whose native language is not English, demonstrate satisfactory command of English, as evidenced by successful completion of the first two years of graduate study.

6. Upon completion of the above requirements, and upon recommendation of the Anthropology faculty, petition the University for candidacy by the end of Spring Quarter of the second year.

7. Upon completion of the above requirements, and upon recommendation of the Anthropology faculty, request the Master’s degree on the way to the Ph.D. degree program by the end of Spring Quarter of the second year.

8. In the third year, complete the following:
   a. by the end of finals week in Autumn Quarter in the third year, submit three dissertation research grant proposals, the grant application, and the approved non-medical human subjects protocol, to the faculty adviser.
   b. by November 15th of Autumn Quarter provide a statement to the Graduate Committee declaring the proposed date planned for the oral examination and submit a declaration of the oral examination committee, inclusive of the external committee chair, the committee adviser, and the three committee members, to the student service officer by the first day of finals week in the Autumn Quarter of the third year.
   c. complete the qualifying projects for topic and area (two separate exams to be scheduled approximately one week apart) by the first day of finals week in Winter Quarter, in the third year.
   d. by the beginning of the fourth week in Spring Quarter, schedule and pass the University oral. During this exam, file the dissertation reading committee form and confirm the committee’s required revisions for the dissertation proposal to begin fieldwork and dissertation research.
   e. confirm approval for the revised dissertation proposal; confirm approval of non-medical human subjects protocol status; and obtain approval if necessary before leaving for dissertation fieldwork.

9. In the fifth year, complete the following requirements:
   a. during the fifth year and after returning from fieldwork, complete one or more teaching assistant quarters in the department.
   b. during two of three quarters (Autumn, Winter, Spring) in the fifth year, students attend a minimum of four of five class meetings of ANTHRO 400, Dissertation Writers Seminar (required of Culture and Society track, recommended for students in both the Archaeology and the Ecology and Environment tracks). Each quarter, chapter drafts of the dissertation must be handed in to the dissertation reading committee for review. (All students must be in residence to receive their fifth year funding.)
   c. after submission of the penultimate draft of the dissertation and before the quarter preceding the quarter in which the dissertation will be submitted for Ph.D. degree, students may schedule and deliver an oral presentation of the dissertation in the department.

The department endeavors to provide needed financial support (through fellowships, teaching and research assistantships, and tuition grants) to all students admitted to the Ph.D. program who maintain satisfactory degree progress. Applicants for the Ph.D. program must file a request for financial aid when applying to the program if they wish to be considered for support.

First-year students who have not obtained a higher degree previous to entering the Ph.D. degree program and who have not obtained extramural funding previous to entering the Ph.D. degree program are required to submit one extramural funding application. Second-year students are required to perform one teaching assistantship quarter. Second-year students who have not secured funding for the second year summer for pre-dissertation field research are advised to make at least two pre-dissertation field research funding applications for summer support. In order to be eligible for department funding for summer field research, (usually taken in either the first or second year and again in the third year of the Ph.D. degree program) first- through third-year students must
submit the department’s application establishing eligibility for summer funding. Third-year students who have not secured field research funding are required to make at least three extramural funding applications to support dissertation research by the end of Autumn Quarter of the third year. If receiving department funding, fourth-year students must submit a department application for funding as a pre-doctoral research affiliate before leaving for fieldwork. Fifth-year students are required to perform at least one quarter of teaching assistantship. Depending upon department need, fifth-year students may be asked to provide a second quarter of teaching assistantship. Fifth-year students who have not secured extramural funding for the sixth year are required to make at least two dissertation write-up funding applications to secure extramural or intramural funding for dissertation write-up in order to be eligible for a department teaching affiliate.

**REQUIRED COURSES**

1. **Anthropology Track**—Required courses include the following:
   - ANTHRO 310G. Introduction to Graduate Studies in Anthropology
   - ANTHRO 311G. Introduction to Culture and Society Studies in Anthropology (recommended)
   - ANTHRO 303. Introduction to Archaeological Theory
   - ANTHRO 307. Archaeological Methods and Research Design
   - ANTHRO 308. Proposal Writing Seminar (recommended)
   - ANTHRO 444. Anthropology Colloquium

2. **Culture and Society Track**—Required courses include the following:
   - ANTHRO 310G. Introduction to Graduate Studies in Anthropology
   - ANTHRO 311G. Introduction to Culture and Society Studies in Anthropology
   - ANTHRO 301. History of Anthropological Theory
   - ANTHRO 306. Anthropological Research Methods
   - ANTHRO 308. Proposal Writing Seminar
   - ANTHRO 444. Anthropology Colloquium

3. **Ecology and Environment Track**—Required courses include the following:
   - ANTHRO 310G. Introduction to Graduate Studies in Anthropology
   - ANTHRO 302. History and Theory in Evolution and Ecology
   - ANTHRO 304. Data Analysis in the Anthropological Sciences
   - ANTHRO 305. Research Methods in Ecological Anthropology
   - ANTHRO 444. Anthropology Colloquium

**PH.D. MINOR IN ANTHROPOLOGY**

Prospective Ph.D. minors in Anthropology should request an application from the student service officer.

The requirements for a Ph.D. minor in Anthropology include the following:

1. Complete 30 units of ANTHRO subject code courses at the 300 level with a grade of 3.0 (‘B’) or higher. Course work for a minor cannot also be used to meet requirements for a master’s degree.
2. Enlist a faculty member within the Department of Anthropology who will provide written consent to serve as the adviser for the minor and serve on the student’s oral examination and dissertation committees (see http://anthropology.stanford.edu for a listing of faculty and office hours).
3. In conjunction with the program adviser, determine a coherent course of study related to the Ph.D. program.
4. Pass with a grade of ‘B+’ or higher ANTHRO 301, History of Anthropological Theory, two additional ANTHRO theory courses, and one ANTHRO course in a geographical or theoretical area.

**OVERSEAS STUDIES COURSES IN ANTHROPOLOGY**

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

**AUTUMN QUARTER**

**SANTIAGO**

OSPSANTG 104X. Modernization and Culture in Latin America. 5 units, Bernardo Subercaseaux, GER:DB:SocSci, EC:GlobalCom

**SPRING QUARTER**

**CAPE TOWN**

OSPCPTWN 36. The Archaeology of Southern African Hunter Gatherers. 5 units, John Parkington

**KYOTO**

OSPKYOTO 47. Introduction to Japanese Anthropology. 5 units, Miyako Inoue

OSPKYOTO 48. City and Sounds in Kyoto. 5 units, Miyako Inoue

**APPLIED PHYSICS**

Emeritus: (Professors) Steven Chu, Alexander L. Fetter, Theodore H. Geballe, Walter A. Harrison, Peter A. Sturrock; (Professors, Research) Calvin F. Quate, Helmut Wiedemann, Herman Winick; (Courtesy) Gordon S. Kino

Chair: Aharon Kapitulnik

Associate Professors: Ian R. Fisher, Kathryn A. Moler, David A. Reis

Assistant Professor: Mark J. Schnitzer

Professor (Research): Michel J-F. Digonnet

Courtesy Professors: Bruce M. Clemens, James S. Harris, Lambertus Hesselink, David A. B. Miller, W. E. Moerner, Douglas D. Osheroff, Stephen R. Quake, Shoucheng Zhang

Consulting Professors: Thomas M. Baer, Raymond G. Beausoleil, Richard G. Brewer, John D. Fox, Martin Greven (Autumn Quarter), Bernardo A. Huberman, John R. Kirtley, Richard M. Martin, Stuart S. P. Parkin, Daniel Rugar

Department Office: Applied Physics 101

Mail Code: 94305-4090

Phone: (650) 723-4027

Web Site: http://appliedphysics.stanford.edu

Courses offered by the Department of Applied Physics are listed under the subject code APPPHYS on the Stanford Bulletin’s ExploreCourses web site. The Department of Applied Physics offers qualified students with backgrounds in physics or engineering the opportunity to do graduate course work and research in the physics relevant to technical applications and natural phenomena. These areas include accelerator physics, biophysics, condensed matter physics, nanostructured materials, optoelectronics, photonics, quantum optics, space science and astrophysics, synchrotron radiation and applications. Student research is supervised by the faculty members listed above and also by various members of other departments such as Biology, Chemistry, Electrical Engineering, Materials Science and Engineering, Physics, the SLAC National Accelerator Laboratory.
and faculty of the Medical School who are engaged in related research fields. Research activities are carried out in laboratories including the Geballe Laboratory for Advanced Materials, the Edward L. Ginzton Laboratory, the Hansen Experimental Physics Laboratory, the SLAC National Accelerator Laboratory, the Center for Probing the Nanoscale, and the Stanford Institute for Materials and Energy Science.

The number of graduate students admitted to Applied Physics is limited. Applications should be received by January 5, 2010. Graduate students normally enter the department only in Autumn Quarter.

**GRADUATE PROGRAMS IN APPLIED PHYSICS**

Admission requirements for graduate work in Applied Physics include a bachelor’s degree in Physics or an equivalent engineering degree. Students entering the program from an engineering curriculum should expect to spend at least an additional quarter of study acquiring the background to meet the requirements for advanced degrees in Applied Physics.

**MASTER OF SCIENCE IN APPLIED PHYSICS**

The University’s basic requirements for the master’s degree are discussed in the “Graduate Degrees” section of this bulletin. The minimum requirements for the degree are 45 units, of which at least 39 units must be graduate-level courses in applied physics, engineering, mathematics, and physics. The required program consists of the following:

1. Courses in Physics and Mathematics to overcome deficiencies, if any, in undergraduate preparation.
2. Basic graduate courses (letter grades required):
   a. Advanced Mechanics—one quarter, 3 units: PHYSICS 210, or approved substitute 211
   b. Electrodynamics—two quarters, 6 units: PHYSICS 220, 221
   c. Quantum Mechanics—two quarters, 6 units: PHYSICS 230, 231, or approved substitutes 232, 330, 331, 332, 370
3. 30 units of additional advanced courses in science and/or engineering. 15 of the 30 units may be any combination of advanced courses, Directed Study, and 1-unit seminar courses, to complete the requirement of 45 units. Examples of suitable courses include BIO 217; EE 222, 223, 231, 232, 248, 268, 346; PHYSICS 372, 373. At least 15 of these 30 units must be taken for a letter grade.
4. A final overall grade point average (GPA) of 3.0 (B) is required for courses used to fulfill degree requirements.

There are no department or University examinations, and a thesis is not required. If a student is admitted to the M.S. program only, but later wishes to change to the Ph.D. program, the student must apply to the department’s admissions committee.

**DOCTOR OF PHILOSOPHY IN APPLIED PHYSICS**

The University’s basic requirements for the Ph.D. including residency, dissertation, and examinations are discussed in the “Graduate Degrees” section of this bulletin. The program leading to a Ph.D. in Applied Physics consists of course work, research, qualifying for Ph.D. candidacy, a research progress report, a University oral examination, and a dissertation as follows:

1. Course Work:
   a. Courses in Physics and Mathematics to overcome deficiencies, if any, in undergraduate preparation.
   b. Basic graduate courses* (letter grades required):
      1. Advanced Mechanics—one quarter: PHYSICS 210, or approved substitute 211
      2. Statistical Physics—one quarter: PHYSICS 212
      3. Electrodynamics—two quarters: PHYSICS 220, 221
      4. Quantum Mechanics—two quarters: PHYSICS 230, 231, or approved substitutes 232, 330, 331, 332, 370
      5. Laboratory—one quarter: APPPHYS 207, 208, 232, 304, 305; EE 234, 410; MATSCI 171, 172, 175; PHYSICS 301
      6. Laboratory—one quarter: APPPHYS 207, 208, 232, 304, 305; EE 234, 410; MATSCI 171, 172, 175; PHYSICS 301

2. Research: may be conducted in a science/engineering field under the supervision of a member of the Applied Physics faculty or appropriate faculty from other departments.
3. Ph.D. Candidacy: satisfactory progress in academic and research work, together with passing the Ph.D. candidacy qualifying examination, qualifies the student to apply for Ph.D. candidacy, and must be completed before the third year of graduate registration. The examination consists of a seminar on a suitable subject delivered by the student before the faculty academic adviser (or an approved substitute) and two other members of the faculty selected by the department.
4. Research Progress Report: normally before the end of the Winter Quarter of the fourth year of enrollment in graduate study at Stanford, the student arranges to give an oral research progress report of approximately 45 minutes, of which a minimum of 15 minutes should be devoted to questions from the Ph.D. reading committee.
5. University Ph.D. Oral Examination: consists of a public seminar in defense of the dissertation, followed by private questioning of the candidate by the University examining committee.
6. Dissertation: must be approved and signed by the Ph.D. reading committee.

* Requirements for item ‘1b’ may be totally or partly satisfied with equivalent courses taken elsewhere, pending the approval of the graduate study committee.

**ARCHAEOLOGY**

Director: Jennifer Trimble (Classics)
Assistant Director: Lisa Newble (Archaeology)
Professors: Ian Hodder (Anthropology, on leave), Richard Klein (Anthropology), Mark Lewis (History, Asian Languages), Mike Moldowan ( Geological and Environmental Sciences), Gail Mahood (Geological and Environmental Sciences), Lynn Meskell (Anthropology, on leave), Ian Morris (Classics, History), Amos Nur (Geophysics), Michael Shanks (Classics), Peter Vitousek ( Biology)
Associate Professors: Jody Maxmin (Art and Art History, Classics), John Rick (Anthropology)
Assistant Professors: Doug Bird (Anthropology), Rebecca Bird (Anthropology), Giovanna Ceserani (Classics), David DeGusta (Anthropology), Ian Robertson (Anthropology, on leave), Barbara Voss (Anthropology), Michael Wilcox (Anthropology)
Lecturers: Carrie Nakamura Aldrich, Camilla Briault, Nigel Crook, Cheryl Makarewicz, James Truncer
Associated Staff: Neil Brodie (Director, Cultural Heritage Resource), Laura Jones (Campus Archaeologist), Lisa Newble (Collections Manager), Tom Seligman (Cantor Arts Center)
Fellow: Bill Rathje (on leave)

Program Offices: Building 500
Mail Code: 94305-2170

STANFORD BULLETIN, 2009-10 | 159
Human beings and their ancestors have roamed the earth for at least five million years, but only invented writing five thousand years ago. And for most of the period since its invention, writing only tells us about small elite groups. Archaeology is the only discipline that gives direct access to the experiences of all members of all cultures, everywhere in the world. Stanford’s Archaeology Program is unique in providing students with an interdisciplinary approach to the material remains of past societies, drawing in equal parts on the humanities, social sciences, and natural sciences.

The program has three goals:

1. To provide a broad and rigorous introduction to the analysis of the material culture of past societies, drawing on the questions and methods of the humanities, social sciences, and natural sciences.

2. To help each student achieve a high level of understanding through concentrated study of a particular research area.

3. To provide a broad and rigorous introduction to the material culture of past societies, drawing on the questions and methods of the humanities, social sciences, and natural sciences.

The program has three goals:

1. To provide a broad and rigorous introduction to the analysis of the material culture of past societies, drawing on the questions and methods of the humanities, social sciences, and natural sciences.

2. To help each student achieve a high level of understanding through concentrated study of a particular research area.

3. To provide a broad and rigorous introduction to the material culture of past societies, drawing on the questions and methods of the humanities, social sciences, and natural sciences.

BACHELOR OF ARTS IN ARCHAEOLOGY

The B.A. in Archaeology requires a minimum of 65 units in the major, divided among five components:

1. Core Program (20 units), consisting of:
   a. Gateway: ARCHLGY 1, Introduction to Prehistoric Archaeology (5 units)
   b. Intermediate: ARCHLGY 102, Archaeological Methods and Research Design (5 units)
   c. Intermediate: ARCHLGY 103, History of Archaeological Thought (5 units; Writing in the Major)
   d. Capstone: ARCHLGY 107A, Archaeology as a Profession (5 units)

ARCHLGY 1 is recommended as a first course, and many upper-level courses in Archaeology require this course as a prerequisite. Students should normally take the capstone course in their final year of course work in the major.

2. Analytical Methods and Computing (at least 3-5 units): quantitative skills and computing ability are indispensable to archaeologists. It is recommended that students take ANTHRO 98B, General Methods in Archaeology. Other courses that may satisfy this requirement are PSYCH 10/STATS 60, ECON 102A, and EESS 161.

3. Archaeological Skills (at least 10 units): archaeological skills include archaeological formation processes, botanical analysis, cartography, ceramic analysis, dating methods, faunal analysis, geographic information systems, geology, geophysics, genetics, osteology, remote sensing, soil chemistry, and statistics. Students are required to take at least 5 units from section A, Formation Processes, and at least 5 units from section B, Archaeological Methods. With the approval of the instructor and Archaeology director, undergraduates may fulfill part of this requirement from graduate-level courses (i.e., courses with numbers of 200 or higher).

4. Theory (at least 10 units): topics include archaeological, art-historical, sociocultural, historical, and material culture theory. With the approval of the instructor, undergraduates may fulfill part of this requirement from graduate-level courses (i.e., courses with numbers of 200 or higher). Note: the following list is a combination of historical and current offerings; contact the Archaeology administrator for course planning beyond this year and check the web site.

ANTHRO 135H. Race, Gender and Class at Stanford
ANTHRO 90B. Theory of Social and Cultural Anthropology
CLASS ART 113. Ten Things: An Archaeology of Design
ARCHLGY 114. The Archaeology of Ritual and Religion
ANTHRO 134. Object Lessons
ARCHLGY 215. Colonialism: From Prehistory to the Present
ANTHRO 111. Archaeology of Sex, Sexuality and Gender
ANTHRO 121. Language and Prehistory

5. Area of Concentration (at least 20 units): in consultation with their faculty advisers, students choose an area of concentration in archaeological research. Concentrations can be defined in terms of time and space such as small-scale societies or the archaeology of complex societies, or in terms of research problems such as new world archaeology or Mediterranean archaeology. An area of concentration should provide both breadth and depth in a specific research area. Courses should be chosen from the list below. Courses other than those on this list can be used to fulfill this requirement with the prior approval of the student’s faculty adviser and the program director. With the approval of the instructor, undergraduates may fulfill part of this requirement from graduate-level courses, typically courses numbered 200 or higher. However, each course may only count toward one component of the program. Students are encouraged to design their own area of concentration, with the prior approval of the student’s faculty adviser and the program director.

Note: this list combines historical and current offerings and is subject to change. Contact the Archaeology student services specialist for course planning beyond this year at (650) 721-1361.

Small Scale Societies:
ANTHRO 6. Human Origins
ANTHRO 16. Native Americans in the 21st Century
ANTHRO 22. Archaeology of North America

Archaeology of Complex Societies:
CLASSART 210Q. Eight Great Archaeological Sites in Europe
CLASSART 101. Archaic Greek Art (ARTHIST 101)
ARTHIST 203. Greek Art In and Out of Context
ANTHRO 100C. Chavin de Huantar Research Seminar
CLASSGEN 123. Urban Sustainability: Long Term Archaeological Perspectives
CLASSHIST 135A. Ancient War
ARCHLGY 116. The Origins of Food Production and Village Life
ANTHRO 106. Incas and Their Ancestors
CLASSART 142. Pompeii
ARTHIST 204A. Appropriations of Greek Art
ARCHLGY 113. Introduction to Ancient Egyptian Archaeology
CLASSART 112. Ancient Urbanism

Mediterranean Archaeology:

Program Phone: (650) 723-5731
Web Site: http://archaeology.stanford.edu

Courses offered by the Archaeology Program are listed under the subject code ARCHLGY on the Stanford Bulletin’s Explore-Courses web site.

Section A: Formation Processes

Section B: Archaeological Methods

ANTHRO 175. Human Osteology
ANTHRO 175B. Advanced Human Osteology
ANTHRO 115. Archaeological Geophysics
ANTHRO 91A. Archaeological Methods and Research Design
ARCHLGY 105A. Global Heritage and Cultural Property
ARCHLGY 106. Museums and Collections
CLASSART 114. Ceramics: Art and Science

4. Theory (at least 10 units): topics include archaeological, art-historical, sociocultural, historical, and material culture theory. With the approval of the instructor, undergraduates may fulfill part of this requirement from graduate-level courses (i.e., courses with numbers of 200 or higher). Note: the following list is a combination of historical and current offerings; contact the Archaeology administrator for course planning beyond this year and check the web site.

ANTHRO 135H. Race, Gender and Class at Stanford
ANTHRO 90B. Theory of Social and Cultural Anthropology
CLASS ART 113. Ten Things: An Archaeology of Design
ARCHLGY 114. The Archaeology of Ritual and Religion
ANTHRO 134. Object Lessons
ARCHLGY 215. Colonialism: From Prehistory to the Present
ANTHRO 111. Archaeology of Sex, Sexuality and Gender
ANTHRO 121. Language and Prehistory

5. Area of Concentration (at least 20 units): in consultation with their faculty advisers, students choose an area of concentration in archaeological research. Concentrations can be defined in terms of time and space such as small-scale societies or the archaeology of complex societies, or in terms of research problems such as new world archaeology or Mediterranean archaeology. An area of concentration should provide both breadth and depth in a specific research area. Courses should be chosen from the list below. Courses other than those on this list can be used to fulfill this requirement with the prior approval of the student’s faculty adviser and the program director. With the approval of the instructor, undergraduates may fulfill part of this requirement from graduate-level courses, typically courses numbered 200 or higher. However, each course may only count toward one component of the program. Students are encouraged to design their own area of concentration, with the prior approval of the student’s faculty adviser and the program director.

Note: this list combines historical and current offerings and is subject to change. Contact the Archaeology student services specialist for course planning beyond this year at (650) 721-1361.

Small Scale Societies:
ANTHRO 6. Human Origins
ANTHRO 16. Native Americans in the 21st Century
ANTHRO 22. Archaeology of North America

Archaeology of Complex Societies:
CLASSART 210Q. Eight Great Archaeological Sites in Europe
CLASSART 101. Archaic Greek Art (ARTHIST 101)
ARTHIST 203. Greek Art In and Out of Context
ANTHRO 100C. Chavin de Huantar Research Seminar
CLASSGEN 123. Urban Sustainability: Long Term Archaeological Perspectives
CLASSHIST 135A. Ancient War
ARCHLGY 116. The Origins of Food Production and Village Life
ANTHRO 106. Incas and Their Ancestors
CLASSART 142. Pompeii
ARTHIST 204A. Appropriations of Greek Art
ARCHLGY 113. Introduction to Ancient Egyptian Archaeology
CLASSART 112. Ancient Urbanism

Mediterranean Archaeology:
ART 203. Greek Art In and Out of Context 5
ARCHLGY 116. The Origins of Food Production and Village Life 5
CLASSART 42. Pompeii 5
ARTHIST 204A. Appropriations of Greek Art 5
CLASSART 101. Archaic Greek Art 5

New World Archaeology:
ANTHRO 200C. Chavin de Huantar Research Seminar 5
ANTHRO 106. Incas and Their Ancestors 5
ANTHRO 22. Archaeology of North America 5

Archaeological Fieldwork—Students may meet this requirement in two ways:

a. Taking part in a month-long field project directed by a Stanford faculty member, and taking a directed reading during the returning academic year for credit. In 2008-09, field projects were underway in Peru, New Mexico, England, and Turkey.

b. Completing a field school offered by another institution. Such field schools must be approved in advance by the student's undergraduate adviser and by the director of the Archaeology Center.

Collateral Language Requirement—All Archaeology majors must demonstrate competence in a foreign language beyond the first-year level. Students can meet this requirement by completing a course beyond the first-year level with a grade of 'B' or better, and are encouraged to choose a language that has relevance to their archaeological region or topic of interest. Students may petition to take an introductory-level course in a second language to fulfill this requirement by demonstrating the connection between the language(s) and their research interest(s).

To declare a major in Archaeology, students should contact the student services specialist at (650) 721-1361, who provides an application form, answers initial questions, and helps the student select a faculty adviser and area of concentration. All majors must complete 65 units, which must form a coherent program of study and be approved by the student's faculty adviser and the program director.

Students who plan to pursue graduate work in Archaeology should be aware of the admission requirements of the particular departments to which they intend to apply. These vary greatly. Early planning is advisable to guarantee completion of major and graduate school requirements.

HONORS PROGRAM

The honors program in Archaeology gives qualified majors the chance to work closely with faculty on an individual research project culminating in an honors thesis. Students may begin honors research from a number of starting points, including topics introduced in the core or upper-division courses, independent interests, research on artifacts in Stanford's collections, or fieldwork experiences.

Interested Archaeology majors of junior standing may apply for admission by submitting an honors application form, including a 4-5 page statement of the project, a transcript, and a letter of recommendation from the faculty member supervising the honors thesis to the student services specialist, no later than the end of the fourth week of the Spring Quarter. Archaeology majors are eligible to apply for honors candidacy. The thesis is due in early May of the senior year and is read by the candidates advisor and a second reader appointed by the undergraduate committee.

COGNATE COURSES

The following is a partial list of cognate courses for Archaeology. Please refer to our program web site for updated lists throughout the year. You can also check with respective department listings for course descriptions and General Education Requirements (GER) information. You can also meet with our Student Adviser about degree requirements and the applicability of these courses to a major or minor program.

ANTHRO 1. Introduction to Cultural and Social Anthropology 5
ANTHRO 3. Introduction to Prehistoric Archaeology 5
ANTHRO 6. Human Origins (Same as BIO 106, HUMBIO 6.) 5
ANTHRO 7. Introduction to Forensic Anthropology 5
ANTHRO 15. Sex and Gender 5
ANTHRO 21N. Anthropology of Globalization 5
ANTHRO 22. Archaeology of North America 5
ANTHRO 22N. Ethnographies of North America 5
ANTHRO 90A. History of Archaeological Thought 5
ANTHRO 90C. Introduction to Theory in Ecological and Environmental Anthropology 5
ANTHRO 100A. India's Forgotten Empire: The Rise and Fall of Indus Civilization 5
ANTHRO 100C. Chavin de Huantar Research Seminar 5
ANTHRO 101A. Archaeology as a Profession 5
ANTHRO 102A. Ancient Civilizations 5
ANTHRO 106. Incas and Their Ancestors 5
ANTHRO 112. Ethnoarchaeology 5
ANTHRO 121. Language and Prehistory 5
ANTHRO 124. Maya Mythology and the Popol Vuh 5
ANTHRO 130B. Introduction to GIS in Anthropology 5
ANTHRO 134. Object Lessons 5
ANTHRO 135H. CSRE House Seminar: Race, Gender, and Class at Stanford 5
ANTHRO 171. The Biology and Evolution of Language 5
ANTHRO 175. Human Osteology 5
ANTHRO 175B. Advanced Human Osteology 5
ANTHRO 264. Eco Group 5
ANTHRO 310G. Introduction to Graduate Studies in Anthropology 5
ANTHRO 326. Indigenous and Post Colonial Archaeology 5
ANTHRO 361. Human Behavioral Ecology 5
ANTHRO 374. Archaeology of Colonialisms/Postcolonialsims 5
ANTHRO 380. Practice and Performance: Bourdieu, Butler, Giddens, de Certeau 5
ARTHIST 203. Greek Art In and Out of Context (Same as CLASSART 101) 5
ARTHIST 203. Greek Art In and Out of Context (Same as CLASSART 101) 5
ARTHIST 204A. Appropriations of Greek Art (Same as CLASSART 110) 5
CLASSART 21Q. Eight Great Archaeological Sites in Europe 5
CLASSART 42. Pompeii 5
CLASSART 112. Ancient Urbanism 5
CLASSART 113. Ten Things: Science, Technology, and Design (Same as STS 112) 5
CLASSART 114. Ceramics: Art and Science 5
CLASSART 123. Urban Sustainability: Long-Term Archaeological Perspectives 5
CLASSART 212. Eight Great Archaeological Sites in Europe 5
CLASSART 42. Pompeii 5
CLASSART 112. Ancient Urbanism 5
CLASSART 113. Ten Things: Science, Technology, and Design (Same as STS 112) 5
CLASSART 114. Ceramics: Art and Science 5
CLASSART 123. Urban Sustainability: Long-Term Archaeological Perspectives 5
ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists 5
ECON 102B. Introduction to Statistical Methods (Postcalculus) for Social Scientists 5
ECON 102C. Introduction to Statistical Methods (Postcalculus) for Social Scientists 5
EESS 160. Statistical Methods for Earth and Environmental Sciences: General Introduction 5
EESS 164. Fundamentals of Geographic Information Science (GIS) (Same as EARTHYSYS 144) 5
EE 140. The Earth From Space: Introduction to Remote Sensing (Same as GEOPHYS 140) 5
EE 140. The Earth From Space: Introduction to Remote Sensing (Same as GEOPHYS 140) 5
GEOPHYS 190. Introduction to Geophysical Field Methods 5
GES 1. Dynamic Earth: Fundamentals of Earth Science 5
GES 49N. Field Trip to Death Valley and Owens Valley 5
GES 102. Earth Materials 5
GES 102. Earth Materials 5
HUMBIO 180. Human Osteology 5
HUMBIO 180. Human Osteology 5
STATS 60. Introduction to Statistical Methods: Precalculus (Same as PSYCH 10) 5
URBANST 115. Urban Sustainability: Long-Term Archaeological Perspectives 5

MINOR IN ARCHAEOLOGY

A minor in Archaeology provides an introduction to the study of the material cultures of past societies. It can complement many
majors, including but not limited to Anthropology, Applied Physics, Art and Art History, Classics, Earth Systems, Geological and Environmental Sciences, History, and Religious Studies.

To minor in Archaeology, the student must complete at least 27 units of relevant course work, including:

1. Core Program (10 units), consisting of:
   a. Gateway: ARCHLGY 1. Introduction to Prehistoric Archaeology (5 units)
   b. Capstone: ARCHLGY 103. History of Archaeological Thought (5 units; Writing in the Major)

ARLCHLGY 1 is recommended as a first course, and many of the upper-level courses in archaeology require this course as a prerequisite. Students should normally take the capstone course in their final year of course work in the minor.

2. Archaeological Skills (2-5 units): archaeological skills include dating methods, faunal analysis, botanical analysis, ceramic analysis, geology, geophysics, soil chemistry, remote sensing, osteology, genetics, statistics, cartography, and geographic information systems. The course(s) must be selected from either section in the list above.

3. Theory (5 units): topics include archaeological, art historical, sociocultural, historical, and material culture theory. The course(s) must be selected from the list given above.

4. Area of Concentration (10 units): in consultation with their faculty advisers, students choose an area of concentration in archaeological research. Concentrations can be defined in terms of time and space such as small-scale societies or the archaeology of complex societies, or in terms of research problems such as new world archaeology or Mediterranean archaeology. An area of concentration should provide both breadth and depth in a specific research area. Courses must be selected from the list above. Students are encouraged to design their own area of concentration, with the prior approval of both the student’s faculty adviser and the program director.

Students must complete the declaration process (both the planning form submission and Axess registration) by the last day of the quarter, two quarters prior to degree conferral (for example, by the last day of Autumn Quarter if Spring graduation is intended).

OVERSEAS STUDIES COURSES IN ARCHAEOLOGY

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

AUSTRALIA

OSPAUSTL 40. Australian Studies. 3 units, Bill Casey, Ian Lilley, GER:DB:SoSci, EC:GlobalCom

WINTER QUARTER

CAPETOWN

OSPCPTWN 65. Western Cape Sites of Memory. 3-5 units, Grant Parker, GER:EC:GlobalCom

SPRING QUARTER

CAPETOWN

OSPCPTWN 36. The Archaeology of Southern African Hunter Gatherers. 5 units, John Parkington

ART AND ART HISTORY

Emeriti: (Professors) Keith Boyle, Kristina Branch, Wanda M. Corn, Elliot Eisner, Lorenz Eitner, David Hannah, Suzanne Lewis, Frank Lobdell, Dwight C. Miller, Nathan Oliveira, Richard Randell, Michael Sullivan, Paul V. Turner

Chair: Richard Vinograd

Area Director for Art History: Richard Vinograd

Area Director for Film and Media Studies: Pavle Levi

Area Director for Art Practice and Director of Undergraduate Studies for Art Practice: Joel Leivick

Director of Undergraduate Studies for Art History: Jody Maxmin

Director of Undergraduate Studies for Film and Media Studies: Scott Bukatman

Director of Graduate Studies in Art History: Pamela M. Lee

Director of Graduate Studies in Art Practice: Gail Wight

Director of Graduate Studies in Documentary Film: Jan Krawitz

Professors: Enrique Chagoya (Painting/Drawing/Printmaking), Paul DeMarinis (Electronic Media; on leave), Matthew S. Kahn (Design), Jan Krawitz (Documentary Film), Pamela M. Lee (Contemporary Art), Michael Marrinan (18th- and 19th-century European Art; on leave Spring 2010), Kristine Samuelson (Documentary Film; on leave), Melinda Takeuchi (Japanese Art), Richard Vinograd (Chinese Art), Bryan Wolf (American Art)

Associate Professors: Scott Bukatman (Film Studies), Jody Maxmin (Ancient Art; on leave Winter 2010), Gail Wight (Electronic Media)

Assistant Professors: Terry Berlier (Sculuture), Morten Steen Hansen (Renaissance Art), Pavle Levi (Film Studies), Jean Ma (Film Studies), Barbaro Martinez-Ruiz (African Art), Jamie Meltzer (Documentary Film), Bissara Pentcheva (Medieval Art)

Professor (Teaching): Joel Leivick (Photography)

Lecturers: Kevin Bean (Drawing/Painting), Robert Dawson (Photography), John Edmark (Design), Brendan Fay (History of Photography), Lukas Felzmann (Photography), Julie Russo (Media Studies), Adam Tobin (Screenwriting)

Affiliated Professor: John H. Merryman (Law, emeritus)

Department Offices: Room 101, Cummings Art Building
Mail Code: 94305-2018
Phone: (650) 723-3404
Web Site: http://art.stanford.edu

Courses offered by the Department of Art & Film History are listed on the Stanford Bulletin’s ExploreCourses web site under the subject codes ARTHIST (Art History), ARTSTUD (Art Practice), FILMSTUD (Film Studies), and FILMPROD (Film Practice).

ART HISTORY AND FILM STUDIES COURSE CATALOG NUMBERING SYSTEM

The first digit of the ARTHIST and FILMSTUD course number indicates its general level of sophistication.

001-099 Introductory

100-199 Undergraduate level lectures

200-299 Undergraduate seminars/individual work

300-399 Graduate level lectures

400-599 Graduate seminars/individual work

The course numbers below indicate the area of Art History and Film Studies addressed.

Art History

001-099 Introductory

100-104 Ancient

105-109 Medieval

110-119 Renaissance

120-139 Early Modern

140-159 Modern

160-179 Contemporary

180-189 Asia

190-195 Africa and the Americas
BACHELOR OF ARTS IN ART HISTORY

SUGGESTED PREPARATION FOR THE MAJOR

Students considering a major in art history should take ARTHIST 1, Introduction to the Visual Arts, during their freshman or sophomore year.

FIELDS OF STUDY OR DEGREE OPTIONS

Students who wish to major in Art History declare the Art History major on Axess. Concentrations within the major are approved by the faculty adviser and are not declared on Axess. Sample concentrations include:

1. Topical concentrations: art and gender; art, politics, race, and ethnicity; art, science, and technology; urban studies
2. Genre concentrations: architecture; painting; sculpture; film studies; prints and media; decorative arts and material culture
3. Historical and national concentrations: ancient and medieval; Renaissance and early modern; modern and contemporary; American; African; Asian; the Americas
4. Interdisciplinary concentrations: art and literature; art and history; art and religion; art and economics; art and medicine (with adviser consent a maximum of two concentration courses may be taken outside the department).

DEGREE REQUIREMENTS

All undergraduate majors complete a minimum of 61 units (14 courses of 4-5 units each). Students are required to complete two foundation courses (including ARTHIST 1), five Art History distribution courses, five concentration courses, one studio course, and the junior seminar. Courses must be taken for a letter grade. To declare the major, students must meet with the undergraduate coordinator. At that time the student selects a faculty adviser. Majors are required to attend an orientation session presented by the professional staff of the Art and Architecture Library, which introduces the tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the major declaration.

Required Courses—

1. Foundation Courses (10 units):
   a. ARTHIST 1. Introduction to the Visual Arts
   b. One other course from ARTHIST 2, ARTHIST 3, FILMSTUD 4

2. Distribution Courses (20 units): In order for students to acquire a broad overview of different historical periods and different geographic regions, majors must take five Art History lecture courses from the following five categories: ancient and medieval; Renaissance and early modern; modern and contemporary, and the U.S.; Asia, Africa, and the Americas; film studies.
   b. Renaissance and early modern: ARTHIST 111, 114, 116, 117, 118, 120, 121, 122, 124, 126, 132, 133
   d. Asia, Africa, and the Americas: ARTHIST 182, 184, 185, 185B, 187, 188A, 190, 194
   e. Film studies: FILMSTUD 100A, 100B, 100C, 101, 102, 111, 112, 112A, 115, 116, 120B, 130, 131, 132, 134A, 141, 150, 152

3. Area of Concentration (22 units): The department encourages students to pursue their interests by designing an area of concentration tailored to their own intellectual concerns. This area of concentration provides the student with an in-depth understanding of a coherent topic in Art History. It must consist of five Art History courses: two must be seminars or colloquia; four of the five courses must be in a single field or concentration constructed by the student in consultation with their faculty adviser. Students must submit an area of concentration form, signed by their faculty adviser, during Winter Quarter of their junior year.
4. Capstone Seminar (5 units): ARTHIST 296, Junior Seminar: Methods and Historiography of Art History. This course is designed to introduce majors to methods and theories underlying the practice of Art History. The seminar is offered annually, typically during Autumn Quarter.

5. Studio Course (4 units): Majors are required to complete at least one introductory Studio Art course.

**HONORS PROGRAM**

The purpose of the honors thesis is to extend and deepen work done in an Art History class; the topic should have focus and clear parameters. Typically an honors thesis is not an exploration of a new area that the student has never studied before. The minimum requirement for admission to the honors program is an overall GPA of 3.7, and at least 3.7 in Art History courses. Students must complete at least five Art History courses at Stanford by the end of their junior year; four must be completed by the end of winter quarter. Students interested in the honors program should consult their potential adviser by the beginning of junior year. Thesis advisers must be in residence during fall quarter senior year, and it is highly recommended that they are in residence during the rest of senior year. Students wishing to write an honors thesis must announce their intention by submitting an intent form signed by their thesis adviser (who need not be the student’s academic adviser) by February 1 of their junior year.

Candidates for the honors program must submit to the Art History faculty a five-page thesis proposal, including bibliography and illustrations, and one completed paper that demonstrates the student’s ability to conceptualize and write about issues. The complete proposal must be submitted to the department’s undergraduate coordinator no later than the third week of Spring Quarter of the candidate’s junior year so it can be read, discussed, and voted upon at the faculty’s regular meeting in early May. A candidate is accepted into the honors program by a simple majority.

Once admitted to the honors program, students work with their thesis advisers to define the scope of study, establish a research and writing timetable, and enlist one other faculty member to serve on the thesis reading committee. The summer between junior and senior years is usually devoted to refining the topic and preparing any off-campus research. Students may apply for UAR research grants to help finance trips or expenses related to preparing the research for their honors thesis.

During their senior year, students must register for 10 units of ARTHIST 297, Honors Thesis Writing, 5 units of which may count towards the student’s concentration in Art History. Students are required to register for two to five units each quarter during their senior year, for a total of ten units. To aid the process of research and writing, students preparing an honors thesis are paired with a graduate student mentor. Students must contact the graduate student mentor in their junior year as soon as they begin to think about writing an honors thesis. Through regular meetings, mentors guide students through the proposal process and the research and writing year.

Students and thesis advisers should plan their work so that a complete final manuscript is in the hands of each member of the student’s reading committee by the beginning of the seventh week of the student’s final quarter at Stanford (one year from proposal to final manuscript). The thesis adviser assigns a letter grade; both faculty readers must approve the thesis for honors before the student is qualified to graduate with honors.

**Required Courses—** ARTHIST 297. Honors Thesis Writing

**MINOR IN ART HISTORY**

A student declaring a minor in Art History must complete 25 units of course work in one of the following four tracks: Open, Modern, Asian, or Architecture. Upon declaring the minor, students are assigned an adviser with whom they plan their course of study and electives. A proposed course of study must be approved by the adviser and placed in the student’s departmental file. Only one class may be taken for credit outside of the Stanford campus; this includes courses taken in the Overseas Studies Program. Majors are required to attend an orientation session presented by the professional staff of the Art and Architecture Library, which introduces the tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the minor declaration.

**Requirements—** A student with a minor in Art History must complete six Art History courses for a total of 25 units.

1. **Open Track**—ARTHIST 1 plus five Art History lecture courses, colloquia, or seminars in any field.
2. **Modern Track**—ARTHIST 1 plus five Art History lecture courses, colloquia, or seminars in any aspect of 19th- to 20th-century art.
3. **Asian Track**—ARTHIST 2 plus five Art History lecture courses, colloquia, or seminars in Asian Art (ARTHIST 1 may be one of the five courses).
4. **Architecture Track**—ARTHIST 3 plus five Art History lecture courses, colloquia, or seminars in architectural history (ARTHIST 1 may be one of the five courses).

**GRADUATE PROGRAMS IN ART HISTORY**

The doctoral program in Art History at Stanford is relatively small, and affords the graduate student the opportunity to work intensively with individual members of the faculty. The Doctor of Philosophy degree is taken in a particular field, supported by a background in the general history of art. Doctoral candidates also undertake collateral studies in other graduate departments or in one of the University’s interdisciplinary programs.

**MASTER OF ARTS IN ART HISTORY**

University requirements for the M.A. are described in the "Graduate Degrees" section of this bulletin.

**ADMISSION**

The department offers M.A. and Ph.D. degrees, although the M.A. is only granted as a step toward fulfilling requirements for the Ph.D. The department does not admit students who wish to work only toward the M.A. degree. Please see the Ph.D. section for admissions information.

**DEGREE REQUIREMENTS**

1. **Units**—completing a total of at least 45 units of graduate work at Stanford in the history of art in courses at the 200 level and above, including a seminar in art historiography/visual theory.
2. **Languages**—reading knowledge of two foreign languages, preferably German and French or Italian. Students in Chinese and Japanese art are ordinarily expected to demonstrate reading competence in modern and classical Chinese or Japanese, depending on the student’s area of focus. Final determination is made in consultation with the student’s primary adviser.
3. **Papers**—submission for consideration by the faculty two papers from among those written during the year.
4. **Area Coverage**—demonstration to the faculty, by course work and/or examination, that the student has adequate knowledge of the major areas of the history of art.

**DOCTOR OF PHILOSOPHY IN ART HISTORY**

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. An expanded explanation of department requirements is given in the Art History Graduate Student Handbook.

**ADMISSION**

In addition to University requirements, the department requires a research paper of approximately 15-20 pages demonstrating the student’s capacity to pursue independent investigation of an art historical problem as part of the application. All applicants must
have been awarded a B.A., B.F.A., or B.S. from an accredited university.

DEGREE REQUIREMENTS
To be eligible for the doctoral degree, the student must complete a minimum of three years of full-time graduate work in Art History, at least two years of which must be in residence at Stanford. Doctoral students must complete a minimum of 135 units. Of these 135, the student must complete at least 100 units of graduate course work at the 200 level or above, including all required courses, with a minimum of 62 units in Art History lecture courses and seminars.

1. Collateral Studies—The student is required to take at least three courses in supporting fields of study (such as anthropology, classics, history, literature, or philosophy), determined in consultation with the department advisers. These courses are intended to strengthen the student’s interdisciplinary study of art history.

2. Graduate Student Teaching—As a required part of their training, graduate students in Art History, regardless of their source of funding, must participate in the department’s teaching program. At least one, one-quarter assignment in ARTHIST 1, 2, 3, or FILMSTUD courses (with current registration in ARTHIST 610, Seminar in Teaching Praxis for ARTHIST 1 only). Students receiving financial aid are required to serve as a teaching assistant for a minimum of four quarters. Further opportunities for teaching may be available.

3. Admission to Candidacy—A graduate student’s progress is formally reviewed at the end of Spring Quarter of the second year. The applicant for candidacy must put together a candidacy file showing that he/she has completed the requirements governing the M.A. program in the History of Art (see above), and at least an additional 18-24 units by the end of Winter Quarter of the second year. The graduate student does not become a formal candidate for the Ph.D. degree until he/she has fully satisfied these requirements and has been accepted as a candidate by the department.

4. Area Core Examination (ACE)—All graduate students conceptualize an area core and bibliography in consultation with their primary adviser and two other Stanford faculty members, one of whom is drawn from a field other than Art History, or, if in Art History, has expertise outside of the student’s main area of interdisciplinary concentration. Students are required to pass an area core examination, in either written or oral form, at some time in the third year of study. To prepare for the exam, students may enroll in up to three, 5-unit reading courses (ARTHIST 620, no more than one per quarter).

5. Dissertation and Oral Defense Requirements—
   a. Reading Committee—After passing the Area Core Examination (ACE), each student is responsible for the formation of a dissertation reading committee consisting of a principal adviser and three readers. Normally, at least two of the three readers are drawn from the department and one may come from outside the department.
   b. Dissertation Proposal—By the beginning of the fourth year, students should have defined a dissertation subject and written a proposal in consultation with their principal adviser. To prepare the proposal, students may take one 5-unit independent study course (ARTHIST 640) and apply for a funded Summer Quarter to research and write the proposal. The proposal is submitted to the Art History faculty at the beginning of the fourth year for comments. The student then meets with the adviser to discuss the proposal and faculty comments no later than 30 days after the submission of the proposal, at which time necessary revisions are determined.
   c. Dissertation—A member of the Art History faculty acts as the student’s dissertation adviser and as chair of the reading committee. The final draft of the dissertation must be in all the readers’ hands at least four weeks before the date of the oral defense. The dissertation must be completed within five years from the date of the student’s admission to candidacy for the Ph.D. degree. A candidate taking more than five years must apply for an extension of candidacy.
   d. Oral Defense Examinations—Each student arranges an oral examination with the four members of the reading committee and a chair chosen from outside the department. The oral examination consists mainly of a defense of the dissertation but may range, at the committee’s discretion, over a wider field. The student is required to discuss research methods and findings at some length and to answer all questions and criticisms put by members of the examining committee. At the end of the defense, the committee votes to pass or fail the student on the defense. The committee also makes recommendations for changes in the dissertation manuscript before it is submitted to the University as the final requirement for the granting of the Ph.D. degree in the History of Art. After incorporating the changes, the manuscript is given a final review and approval by the student’s principal adviser.

PH.D. MINOR IN ART HISTORY
For a minor in Art History, a candidate is required to complete 24 units of graduate-level Art History courses (200 level or above) in consultation with a department adviser.

ART PRACTICE (STUDIO)

UNDERGRADUATE PROGRAMS IN ART PRACTICE (STUDIO)
The Art Practice program offers production-based courses founded on the concepts, skills and cultural viewpoints that characterize contemporary art practice. The goal is to educate students, both majors and minors, in the craft, culture, and theory of current fine art practices to prepare them for successful careers as artists. The art practice program is designed to develop in-depth skills in more than one area of the visual arts. It emphasizes the expressive potential of an integration of media, often via a cross-disciplinary, interactive path. Through collaboration and connections with scientists, engineers, and humanities scholars, the program addresses a breadth of topical and artistic concerns central to a vital undergraduate education.

BACHELOR OF ARTS IN ART PRACTICE (STUDIO)

DEGREE REQUIREMENTS
All undergraduate majors complete a minimum of 65 units including six lower level courses, six upper level courses, and four art history courses. All courses must be taken for a letter grade. University units earned by placement tests or advanced placement work in secondary school are not counted within the 65 units. The studio requirements are divided into lower level (introductory) and upper level (advanced) course work. At the lower level, students focus on a range of subject matter from historical motifs (fig ure, still life, landscape) to contemporary ideas in art. Upper level courses are designed to stretch the student’s understanding of materials, techniques, site, and social relevance. Experimental and challenging in nature, these courses cross area boundaries. Independent study supervised by a member of the permanent faculty is also available to the advanced student.

Students are encouraged to move through the requirements for the major in the sequence outlines. Students are exposed to a range of practices early in their development in order to have a good basis of comparison if they choose to focus on a particular medium. This sequence of courses also broadens the students’ skills and enables them to combine materials and methods. In all courses, students are expected to pass mid-term and final reviews and critiques of their work.

To declare the major, students must meet with the undergraduate coordinator. At that time the student selects a faculty adviser. Art Practice majors are required to meet with both their adviser
and the undergraduate coordinator during the first two weeks of each quarter to have course work approved and make certain they are meeting degree requirements. Majors are required to attend an orientation session presented by the professional staff of the Art and Architecture Library, which introduces the tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the major declaration.

Required Courses—
1. Six lower level courses (24 units):
2. Six upper level courses (24 units):
   b. ARTSTUDI 249. Advanced Undergraduate Seminar. Emphasis is on investigation of visual concepts interpreted by a single medium, by cross-practices, or by collaboration among students working in a variety of materials. This seminar gives the student an opportunity to be exposed to the work of other majors in a critique-based forum directed by a visiting artist or critic.
3. Four Art History courses (17 units): ARTHIST 1 and three other art history courses. At least one course must be in the modern art series, ARTHIST 140-159. Students may substitute one Art History course with a Film Studies course.

Transfer Credit Evaluation—Upon declaring an Art Practice major, a student transferring from another school must have his or her work evaluated by a Department of Art and Art History adviser. A maximum of 13 transfer units are applied toward the 65 total units required for the major. A student wishing to have more than 13 units applied toward the major must submit a petition to the undergraduate coordinator during the first two weeks of each quarter to have course work approved and make certain they are meeting degree requirements.

MINOR IN ART PRACTICE (STUDIO)
A student declaring a minor in Art Practice must complete 36 units of Art Practice and Art History course work. All minors are required to attend an orientation session presented by the professional staff of the Art and Architecture Library, which introduces the tools of research and reference available on campus or through the Internet. Minors are required to meet with both their adviser and undergraduate coordinator before planning an overseas campus program.

OVERSEAS STUDY OR STUDY ABROAD
A minimum of 51 of the 65 units required for the Art Practice major and a minimum of 32 of the 36 units required for the Art Practice minor must be taken at the Stanford campus. A student must meet with his or her adviser and undergraduate coordinator before planning an overseas campus program.

GRADUATE PROGRAM IN ART PRACTICE (STUDIO)
The program provides a demanding course of study designed to challenge advanced students. Participants are chosen for the program on the basis of work that indicates high artistic individuality, achievement, and promise. Candidates should embody the intellectual curiosity and broad interests appropriate to, and best served by, work and study within the University context.

MASTER OF FINE ARTS IN ART PRACTICE (STUDIO)
University requirements for the M.F.A. are described in the "Graduate Degrees" section of this bulletin.

THE GRADUATE PROGRAM IN PAINTING, SCULPTURE, NEW GENRES, AND PHOTOGRAPHY

ADMISSION
The applicant must have a B.A., B.F.A., or B.S. from an accredited school. It is expected that the applicant will have a strong background in art practice, either an undergraduate degree or at least three years of independent studio practice. Applications and portfolios for the Art Practice program must be received by January 12, 2010. Students accepted to the program are admitted for the beginning of the following Autumn Quarter. No applicants for mid-year entrance are considered.

Portfolio Specifications: We prefer that your portfolio be in the form of CD-ROM or DVD, or other electronic media. If absolutely necessary, you may submit twenty slides preloaded into a standard Kodak Carousel. We do not view original works at this stage of the process. Please see the department website at http://art.stanford.edu for specific portfolio requirements.

FIELDS OF STUDY OR DEGREE OPTIONS
Fields of study for the M.F.A. degree are offered in Painting, Sculpture, New Genres, or Photography.

DEGREE REQUIREMENTS
1. Residency: Completing a minimum of two years (six quarters) of graduate work in residence at Stanford.
2. Units: Completing 48 units of study. Students must discuss their programs of study with the department’s student services administrator to ensure that the most favorable registration arrangement is made.
3. Seminar Requirement: Six quarters (36 units) of the Master’s Project, which includes two weekly seminars (the Object Seminar and the Concept Seminar) and Studio Practice, which is an individual tutorial with a selected member of the faculty. In addition, three courses of academic electives (12 units) are required in the first year. These courses can be chosen from a large variety of disciplines in consultation with the Director of Graduate Studies.
4. Faculty Reviews: The student is expected to pass three faculty reviews: (1) at the end of the first quarter (anyone judged to be making inadequate progress is placed on probation and requires an additional review at the end of the second quarter), (2) at the end of the third quarter, and (3) at the time of the M.F.A. exhibition. The purpose of these reviews is to evaluate development and to assess the progress of the student.
5. Thesis: During the fifth quarter in the program, students must write a thesis addressing the development of their work.
over the two-year period at Stanford. Participation in the M.F.A. exhibition at the end of the year is required.

6. **Graduate Student Teaching:** Regardless of their source of funding, students are required to assist with the department’s teaching program for a minimum of eight hours per week over the period of six quarters; the particulars of this assignment are at the department’s convenience.

The studio faculty reserves the right to make use of graduate paintings, sculptures, and photographs in exhibitions serving the interests of the graduate program.

Graduate students must remain in residence at Stanford for the duration of the program.

**MASTER OF FINE ARTS IN DESIGN**

University requirements for the M.F.A. are described in the "Graduate Degrees" section of this bulletin.

**THE GRADUATE PROGRAM IN DESIGN**

Working jointly, the departments of Art & Art History and Mechanical Engineering offer graduate degrees in product and visual design. A large physical environment, the Design Yard, provides professional caliber studio space and well-equipped shops. Flexible programs may include graduate courses in fields such as engineering design, biotechnology, marketing, microcomputers, or the studio and art history curriculum. The program centers on a master’s project and may also include work in advanced art and design. The program is structured to balance independent concentration with the use of the University and community, and interaction with the students and faculty of the graduate Design program. Cross disciplinary interaction is encouraged by a four-person graduate Design faculty.

**ADMISSION**

1. The applicant must have a B.A., B.F.A., or B.S. from an accredited school. It is expected that the applicant will have a strong background in studio art, either an undergraduate degree or at least three years of independent studio practice.

2. Applications and portfolios for the design program must be received by January 12, 2010. Students accepted to the program are admitted for the beginning of the following Autumn Quarter. No applicants for mid-year entrance are considered.

3. **Portfolio Specifications:**
   a. A portfolio or book containing 12-24 photographs, originals, or printouts of creative work, appropriately labeled and identified.
   b. A DVD showing works in action. Total run time should not exceed five minutes, and the disc should be playable in any standard DVD player. CD-ROMs are not accepted.

**FIELDS OF STUDY OR DEGREE OPTIONS**

Fields of study for the M.F.A. degree are offered in Product or Visual Design.

**DEGREE REQUIREMENTS**

All undergraduate majors complete a minimum of 65 units (16 courses of 3-5 units each), or 15 courses plus an honors thesis. All courses for the major must be taken for a letter grade. To declare the major, students must meet with the undergraduate coordinator. At that time the student selects a faculty adviser. Majors are required to attend an orientation session presented by the professional staff of the Art and Architecture Library, which introduces the tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the major declaration.

**Required Courses**—

1. ARTHIST 1. Introduction to the Visual Arts (preferred) or an Art History elective
2. FILMSTUD 4. Introduction to Film Study
3. FILMSTUD 6. Introduction to Digital Media
4. FILMSTUD 100A, B, C. History of World Cinema I, II, III
5. FILMSTUD 101. Fundamentals of Cinematic Analysis
6. FILMSTUD 102. Theories of the Moving Image
7. FILMPROD 114. Introduction to Film and Video Production
8. Concentration: Five courses, four of which must be in a single field or area of study: Film History; Film and Culture; Film, Media, and Technology; Writing, Criticism, and Practice; and Aesthetics and Performance.
9. Capstone Experience: FILMSTUD 290. Senior Seminar: Movies and Methods, offered once a year. The Senior Seminar represents the culminating intellectual experience for Film Studies majors choosing not to write an honors thesis. Honors thesis writers may also take the senior seminar. Seniors who may not be in residence in the quarter that the senior seminar is offered may enroll in their junior year. Movies and Methods provides majors with an opportunity to synthesize their previous work in Film Studies and work in an advanced setting with a faculty member.

**HONORS PROGRAM**

Students who want to write an honors thesis should consult with a potential adviser by the beginning of junior year. The adviser must be a faculty member in residence during the student’s se-
MINOR IN FILM AND MEDIA STUDIES

A minor in Film Studies requires four core courses and three elective courses for a total of seven courses. Courses must focus on film and use the method of film study to be used towards completion of the minor; courses that use film to illustrate a cultural topic are not eligible. Film Production and Studio Art courses may not be used towards the requirements.

Upon declaring the minor, students are assigned an adviser with whom they plan their course of study and electives. A proposed course of study must be approved by the adviser and placed in the student’s departmental file. Only one class may be taken for credit outside the Stanford campus, including Stanford Overseas Studies programs. Minors are required to attend an orientation session presented by the professional staff of the Art Library, which introduces the many tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the minor declaration.

Requirements—The minor in Film Studies requires seven courses for a minimum of 29 units.

Required Courses for the Minor—
FILMSTUD 4. Introduction to Film Study
FILMSTUD 102. Theories of the Moving Image
One course from FILMSTUD 100A, B, C. History of World Cinema I, II, III

One course in a national cinema or an additional course in film history

Optional Courses for the Minor—Three elective courses. Electives can be chosen from courses in other departments and must be approved for the Film Studies minor by the Film Studies coordinator and core faculty for their stress on methods of film analysis. These may include courses in national cinemas, film genres, experimental and documentary film, or film theory.

GRADUATE PROGRAMS IN DOCUMENTARY FILM AND VIDEO

The Master of Fine Arts program in documentary production provides a historical, theoretical, and critical framework within which students master the conceptual and practical skills for producing nonfiction film and video. The M.F.A. is a terminal degree program with a two-year, full-time curriculum representing a synthesis of film praxis and film and media history, theory, and criticism. Courses provide an intellectual and theoretical framework within which students’ creative work is developed. Students proceed through the program as a cohort. The program does not permit leaves of absence.

The M.F.A. degree is designed to prepare graduate students for professional careers in film, video, and digital media. Graduates are qualified to teach at the university level. The philosophy of the program is predicated on a paradigm of independent media that values artistic expression, social awareness, and an articulated perspective. Students become conversant with the documentary tradition as well as with alternative media and new directions in documentary. Training in documentary production is combined with the development of research skills in film criticism and analysis. Electives in film studies, art history, and studio art provide an intellectual and theoretical framework within which creative work is realized. The parallel focus on production and studies prepares students for an academic position that may require teaching both film studies and production.

MASTER OF FINE ARTS IN DOCUMENTARY FILM AND VIDEO

University requirements for the M.F.A. are described in the "Graduate Degrees" section of this bulletin.

ADMISSION

The program requires residency for two consecutive years. The admissions committee seeks applicants who have some work experience beyond their undergraduate years and can articulate why they want to learn documentary film and video production. The committee looks for evidence of the likelihood of success in a rigorous academic program that emphasizes creative work. The conceptual and technical skills required for documentary work are sufficiently different from fictional narrative to make the Stanford program inappropriate for students interested in narrative filmmaking. Each year, eight students are admitted to the program. Applications and portfolios must be received by January 12, 2010. Students accepted to the program are admitted for the beginning of the following Autumn quarter. No applicants for mid-year entrance are considered and no deferrals are permitted.

Portfolio—The department requires a DVD (NTSC only) copy of film or video work for which the applicant has had creative control. The sample work must be well labeled and accompanied by a brief synopsis, running time of the clips, the circumstances of production, and the applicant’s role. Total running time for the work sample should not exceed 15 minutes and may consist of more than one project. Work on which the applicant had only a production assistant role is not appropriate for submission. Student work, however, is appropriate for consideration. Applicants who have had only minimal film or video production experience should submit an example of their best creative work in any medium.
FIELDS OF STUDY OR DEGREE OPTIONS
Fields of study for the M.F.A. degree are offered in Documental Film.

DEGREE REQUIREMENTS
1. Residency—Completing two years (six quarters) of graduate work in residence at Stanford.
2. Units—A minimum of 80 units is required for the M.F.A. degree. In the production core, students are required to conceptualize and visualize their ideas in a series of writing and producing courses that focus on documentary story structure. These courses are taken in tandem with project-based production courses that provide training in the technical and conceptual aspects of cinematography, sound recording, and editing. Discussion of form and content is a signature component of the writing and production courses. The production core is complemented by a series of required film studies courses in documentary plus elective courses in the history, aesthetics, ideology, and theory of all genres of moving image media. Core film production courses are offered S/NC only. All other courses must be taken for a letter grade.
3. M.F.A. Thesis Project—In the second year of the program, each student produces a 20-minute film or video documentary that constitutes the thesis project. In FILMPROD 405, students choose a topic, research and develop their project, and write a proposal for submission. A project may not begin production until the final proposal has been approved. Most of the production and post-production occurs in FILMPROD 406A, 406B in Winter and Spring Quarters.

Required Courses—
1. Core Production courses (eight courses, 32 units): Core courses must be taken in sequence.
   - FILMPROD 400. Film/Video Writing and Directing
   - FILMPROD 401. Nonfiction Film Production
   - FILMPROD 402. Digital Video
   - FILMPROD 403. Advanced Documentary Directing
   - FILMPROD 404. Advanced Film and Video Production
   - FILMPROD 405. Producing Practicum
   - FILMPROD 406A, B. Documentary MFA Thesis Seminar I and II
2. Core Film Studies courses (six courses, 25 units)
   - FILMSTUD 302. Theories of the Moving Image
   - FILMSTUD 315. Documentary Issues and Traditions
   - FILMSTUD 316. International Documentary
   - FILMSTUD 410A, B. Documentary Perspectives I and II
3. Electives (seven courses, 28 units): To be chosen in consultation with the student’s adviser
   a. Art History—one course, 4 units
   b. Studio Art and/or Communications—two courses, 8 units
   c. Film Studies—three courses, 12 units
   d. Choice Elective—one course, 4 units

OVERSEAS STUDIES COURSES IN ART AND ART HISTORY
For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

BERLIN
OSPBER 60. Cityscape as History: Architecture and Urban Design in Berlin. 5 units, Matthias Pabst, GER:DB:Hum

FLORENCE
OSPFLOR 34. The Woman in Florentine Art. 4 units, Timothy Verdon, GER:DB:Hum, EC:Gender

OSPFLOR 41. The Contemporary Art Scene in Tuscany: Theory and Practice. 3-5 units, Filippo Rossi
OSPFLOR 55. Academy of Fine Arts: Studio Art. 1-3 units, Ermelinda Campani
OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization. 4 units, Timothy Verdon, GER:DB:Hum
OSPFLOR 134F. Modernist Italian Cinema. 5 units, Ermelinda Campani, GER:DB:Hum

MADRID
OSPMADR 46. Drawing with Four Spanish Masters: Goya, Velázquez, Picasso and Dalí. 3 units, Susan Sartarelli

OXFORD
OSPOXFRD 15. British Architecture and the Renaissance: 1500-1850. 4-5 units, Geoffrey Tyack, GER:DB:Hum

PARIS
OSPSPARIS 42. EAP: Drawing with Live Model. 2 units, Staff
OSPSPARIS 43. EAP: Painting and Use of Color. 2 units, Staff
OSPSPARIS 44. EAP: Graphic Art. 2 units, Staff
OSPSPARIS 47. Women in French Cinema. 4 units, Cecile Alduy, GER:DB:Hum, EC:Gender
OSPSPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France. 4 units, Colette Deremble, Jean Paul Deremble, GER:DB:Hum

WINTRER QUARTER

BERLIN

FLORENCE
OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition. 4 units, Filippo Rossi, Timothy Verdon, GER:DB:Hum
OSPFLOR 49. The Cinema Goes to War: Fascism and World War II As Represented in Italian and European Cinema. 5 units, Ermelinda Campani, GER:DB:Hum
OSPFLOR 55. Academy of Fine Arts: Studio Art. 1-5 units, Ermelinda Campani
OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence. 4 units, Timothy Verdon, GER:DB:Hum

MADRID
OSPMA 45. Women in Art: Case Study in the Madrid Museums. 4 units, Julia Domènech López, GER:DB:Hum, EC:Gender

PARIS
OSPSPARIS 42. EAP: Drawing with Live Model. 2 units, Staff
OSPSPARIS 43. EAP: Painting and Use of Color. 2 units, Staff
OSPSPARIS 44. EAP: Graphic Art. 2 units, Staff
OSPSPARIS 120X. French Painting in the 19th Century: Between Tradition and Revolution. 4 units, Estelle Halevi, GER:DB:Hum

SPRING QUARTER

FLORENCE
OSPFLOR 54. High Renaissance and Maniera. 5 units, Timothy Verdon, GER:DB:Hum
OSPFLOR 55. Academy of Fine Arts: Studio Art. 1-5 units, Ermelinda Campani
OSPFLOR 58. Space as History: Urban Change and Social Vision. Florence 1059-2008. 4 units, Filippo Rossi, Timothy Verdon, GER:DB:Hum
Students desiring guidance in developing an astronomy-oriented course should contact the chair of the Astronomy Program Committee. The following courses are suitable for undergraduates and are recommended to students considering advanced study in astronomy or astrophysics: PHYSICS 100, Introduction to Observational and Laboratory Astronomy; PHYSICS 160, Introduction to Stellar and Galactic Astrophysics; PHYSICS 161, Introduction to Extragalactic Astrophysics and Cosmology; GES 222, Planetary Systems: Dynamics and Origins. Students planning study in astronomy beyond the B.S. are urged to take PHYSICS 260 and 262, Introduction to Astrophysics and to Gravitation, and to consider an undergraduate thesis (PHYSICS 169) or honors thesis in an astrophysics-related area. The above-mentioned courses are required for physics majors who choose the curriculum with a concentration in astrophysics (see the “Physics” section of this bulletin). The student observatory, located in the hills to the west of the campus and equipped with a 24-inch and other small reflecting telescopes, is used for instruction of the observation-oriented courses.

MINOR IN ASTRONOMY

The minor program in Astronomy is described in the “Physics” section of this bulletin. The non-technical minor, intended for students whose major does not require the PHYSICS 40 series, requires 10 units of Physics courses (PHYSICS 21, 23, 25/26) and 9-10 units of Astronomy courses (3-4 units of PHYSICS 50 or 100, and 6 units of PHYSICS 15, 16, 17). The technical minor for other students consists of 14 units of PHYSICS 70, 100, 160, 161, and EE 106, in addition to the 40 or 60 series.

To be accepted to the minor program, students need to obtain an adviser selected from the faculty in the Astronomy Course Program. The minor declaration deadline is three quarters before graduation (that is, beginning Autumn Quarter if the student is graduating at the end of Spring Quarter). All courses for the minor must be taken at Stanford University, and a letter grade of "C-" or better must be received for all units applied toward the minor.

GRADUATE PROGRAMS IN ASTRONOMY

Graduate programs in astronomy and astrophysics are required to take PHYSICS 360, Physics of Astrophysics, and at least one of the following: PHYSICS 361, Stellar and Galactic Astrophysics; 362, Extragalactic Astrophysics and Cosmology; or 363, Solar and Solar-Terrestrial Physics. Students lacking a background in astrophysics, gravitation, and plasma physics should take PHYSICS 260 and 262, Introduction to Astrophysics and to Gravitation, and PHYSICS 312, Basic Plasma Physics. Students with special interests in gravitation should take PHYSICS 364, Advanced Gravitation.

Students interested in research programs in space physics involving spacecraft studies of the planets, their satellites, and their near-space environments should see the “Center for Space Science and Astrophysics” section of this bulletin at http://kipac.stanford.edu.

Students planning to conduct research in astronomy and astrophysics are required to take PHYSICS 360, Physics of Astrophysics, and at least one of the following: PHYSICS 361, Stellar and Galactic Astrophysics; 362, Extragalactic Astrophysics and Cosmology; or 363, Solar and Solar-Terrestrial Physics. Students lacking a background in astrophysics, gravitation, and plasma physics should take PHYSICS 260 and 262, Introduction to Astrophysics and to Gravitation, and PHYSICS 312, Basic Plasma Physics. Students with special interests in gravitation should take PHYSICS 364, Advanced Gravitation.

Students interested in research programs in space physics involving spacecraft studies of the planets, their satellites, and their near-space environments should see the “Center for Space Science and Astrophysics” section of this bulletin.
ASTRONOMY COGNATE COURSES

ELEMENTARY LECTURES
The following courses provide a descriptive knowledge of astronomical objects and astrophysics of the universe. PHYSICS 15, 16, and 17 are for students not majoring in the sciences and are taught in different quarters by different instructors, and may be taken individually or in any order.

PHYSICS 15. The Nature of the Universe
PHYSICS 16. Cosmic Horizons
PHYSICS 17. Black Holes

OBSERVATORY
The following courses are intended to familiarize students with observational methods and analysis of astronomical data. PHYSICS 100 involves more advanced observations and is intended for students with a college-level background in physics.

PHYSICS 50. Astronomy Laboratory and Observational Astronomy
PHYSICS 100. Introduction to Observational and Laboratory Astronomy

ADVANCED UNDERGRADUATE
The following courses are for students with a more advanced knowledge of basic physics and mathematics, and form the core courses for a concentration in astrophysics for Physics majors.

EE 106. Planetary Exploration
PHYSICS 160. Introduction to Stellar and Galactic Astrophysics
PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology
PHYSICS 169A, B, C. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem

GRADUATE

GES 222. Planetary Systems: Dynamics and Origins
PHYSICS 260. Introduction to Astrophysics and Cosmology
PHYSICS 262. Introduction to Gravitation
PHYSICS 301. Observational and Laboratory Astronomy (not given 2009-2010)
PHYSICS 312. Basic Plasma Physics (not given 2009-10)
PHYSICS 360. Physics of Astrophysics (not given 2009-10)
PHYSICS 361. Stellar and Galactic Astrophysics (not given 2009-10)
PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology (not given 2009-10)
PHYSICS 363. Solar and Solar-Terrestrial Physics (not given 2009-2010)
PHYSICS 364. Advanced Gravitation (not given 2009-10)
PHYSICS 463. Special Topics in Astrophysics: Theoretical Cosmology (not given 2009-10)

ATHLETICS, PHYSICAL EDUCATION, AND RECREATION

Emeriti: (Professor) Wesley K. Ruff; (Associate Director) Robert C. Young; (Assistant Director) Shirley Schoof; (Athletic Director) Ted Leland

Athletic Director: Bob Bowlsby
Deputy Athletic Director: Ray Purpur
Senior Associate Athletic Director, Intercollegiate Services/Senior Woman Administrator: Beth Goode
Senior Associate Athletic Director, External Relations: Chris Hutchins
Senior Associate Athletic Director, Intercollegiate Sports: Earl Koberlein
Senior Associate Athletic Director, Program Services: Darrin Nelson
Senior Associate Athletic Director, Development: Jeff Shilling
Senior Associate Athletic Director, Physical Education, Recreation, and Wellness: Eric Stein
Associate Director of Development for Major Gifts: Scott Alexander
Associate Director of Development for Major Gifts: Darcie Bransford
Senior Assistant Athletic Director, Media Relations: Jim Young
Assistant Athletic Director, Compliance Services: Megan Boone
Assistant Athletic Director, Marketing: Marie Vasquez
Assistant Athletic Director, Human Resources: Ron Coverson

Athletic Director, Capital Planning: David Schinski

Sport Directors: Al Acosta (Lightweight Crew, women), Craig Amerkhanian (Crew, men), Amy Bakker (Lacrosse), Jason Borrelli (Wrestling), Johnny Dawkins (Basketball, men), Jason Dunn (Cross Country), John Dunn (Volleyball, women), Yasmin Faroq (Crew, women), Edrick Floréal (Track and Field, women), Lele Forood (Tennis, women), Thom Gielmi (Gymnastics, men), Jim Harbaugh (Football), Lesley Irvine (Field Hockey), Skip Kenney (Swimming, men), John Kosty (Volleyball, men), Mark Marquess (Baseball), Lea Maurer (Swimming, women), Lisa Milgram (Fencing), Caroline O’Connor (Golf, women), Heather Olson (Synchronized Swimming), George Pogosov (Fencing), Paul Ratcliffe (Soccer, women), Conrad Ray (Golf, men), John Rittman (Softball), Richard Schavone (Diving), Brett Simon (Soccer, men), Kristen Smyth (Gymnastics, women), Mark Talbott (Squash, women), John Tanner (Water Polo, women), John Vandemoer (Sailing), Tara VanDerveer (Basketball, women), John Vargas (Water Polo, men), John Whittlinger (Tennis, men)

Sport Assistant Coaches: Lance Anderson (Football), Jon Barnea (Water Polo, men), Rob Becerra (Soccer, men), Frankie Brennan (Tennis, men), Andy Buh (Football), Jay Cooney (Soccer, women), Denise Corlitt (Volleyball, women), Ray Blake (Wrestling), Brandon Coupe (Tennis, men), Dick Davey (Basketball, men), Tim Drevno (Football), DJ Durkin (Football), Trisha Ford (Softball), Matt Gentry (Wrestling), Mandy Hart (Field Hockey), Vaclav Kacir (Crew, women), Bobbie Kelsey (Basketball, women), Ted Knapp (Swimming, men), Sara Lowe (Synchronized Swimming), Jason Mansfield (Volleyball, women), Salimah Mussani (Golf, women), Dave Nakama (Baseball), Andrew Ninow (Track and Field), Gregg Olson (Soccer, men), Susan Ortevin (Water Polo, women), Kate Paye (Basketball, women), J. D. Reive (Gymnastics, men), Greg Roman (Football), David Shaw (Football), Ken Shibuya (Volleyball, men), Jordan Steele Marotta (Field Hockey), Dean Stotz (Baseball), Katherine Sweet (Lightweight Crew, women), Chris Swirceck (Gymnastics, women), Willie Taggart (Football)

Department Offices: Arrillaga Family Sports Center
Mail Code: 94305-6150
Phone: (650) 723-4591
Web Site: http://suwellness.stanford.edu

Courses offered by the Department of Athletics, Physical Education, and Recreation are listed under the subject code ATHLETIC on the Stanford Bulletin’s ExploreCourses web site.
From the founding of the University, Stanford’s leaders have believed physical activity is valuable for its own sake and complementary to the educational purpose of the University. The mission of the Department of Athletics, Physical Education, and Recreation is to offer the widest possible range of quality programs for athletic participation and physical fitness at all levels of skill and interest. Within the limitations of its resources, the department provides a broad range of instructional, recreational, and intramural competitive programs for all who wish to participate. The intrinsic value to the participant is the primary criterion by which the worth of the programs should be judged.

The goals of the department’s programs are to promote understanding of the value and role of physical activity as an important dimension of the human condition, to develop the habit of participation, and to provide leadership opportunities in aquatics, sports, and other physical activities. To this end, the program encompasses a diversity of learning and participating opportunities from informal recreation through organized intramural competition, basic instructional classes, and theoretical study to, and including, intercollegiate athletic competition.

PROGRAMS IN ATHLETICS, PHYSICAL EDUCATION, AND RECREATION

No degrees are offered in Physical Education.

INTERCOLLEGIATE ATHLETICS

In keeping with American university tradition, Stanford offers a broad intercollegiate athletic program. The objectives are to provide the opportunity to compete at the highest possible level without jeopardizing the integrity of the individual or the institution; to adhere strictly to all University, association, and conference rules governing athletic participation; and to encourage effectively the achievement of academic goals by student athletes at the same rate as other University students. As a member of the National Collegiate Athletic Association (NCAA), Stanford fields both men’s and women’s varsity teams. Those for men are baseball, basketball, crew, cross country, fencing, football, golf, gymnastics, sailing, soccer, swimming and diving, tennis, track and field, volleyball, water polo, and wrestling. Those for women are basketball, crew, cross country, fencing, field hockey, golf, gymnastics, lacrosse, sailing, soccer, softball, squash, swimming and diving, synchronized swimming, tennis, track and field, volleyball, and water polo.

Both men’s and women’s teams are affiliated with the Pacific Ten Conference, one of the premier athletic conferences in the nation. Additional or alternative intercollegiate athletic competition is available for all teams.

CLUB SPORTS

The Stanford Club Sports program provides competition in sports not included in the intercollegiate varsity program and instruction in classes or activities not included in the Physical Education program. It also develops student leadership in organizing, administering, and funding activities. The club program is actively supervised by the Coordinator of Club Sports, but the emphasis is on student interest and leadership to initiate, organize, and conduct the respective clubs. Those students in clubs that meet the criteria for inclusion in the formal curriculum may apply for units of credit.

INTRAMURAL SPORTS (IM)

Students interested in participating in intramural sports should visit the intramural web site: http://www.stanford.edu/group/intramurals for more information. They may visit the IM Office in Ford/Burnham. The program includes formal competition in fifteen team and individual sports, using both league and single elimination tournament play structure. Individuals are encouraged to check the web site at the beginning of each quarter to obtain registration and league information. Registration occurs on the second Monday and Tuesday of each quarter, with mandatory captain meetings held that Thursday evening. Intramural leagues are offered in Autumn, Winter, Spring, and Summer quarters.

RECREATION

The department provides facility use for faculty, staff, and students (and, for some activities, their immediate families) to participate in aquatics, conditioning, and sports for general recreation. Specific recreation hours for all the facilities are posted throughout the year at the respective facilities and at http://suwellness.stanford.edu.

The golf course and driving range are available for faculty, staff, and student use on a fee basis; information is available from the Golf Pro Shop.

Recreational classes are offered in areas such as rock climbing, indoor cycling, and golf.

FACILITIES

Athletic facilities are located throughout the campus. On the west side of campus are the Golf Course, the Golf Driving Range, the Red Barn Stables, Roble Field and Pool, the Sand Hill Intramural Fields, and the West Campus Tennis Courts. Centrally located is the Tresidder Fitness Center. On the east side of campus are the Arrillaga Center for Sports and Recreation, the Arrillaga Family Racquetball Center, the Arrillaga Family Sports Center, Avery Aquatic Center, Burnham Pavilion, Cobb Track and Angell Field, the Ford Center for Sports and Recreation, the Manzanita Basketball Court and Field, Maples Pavilion, Taube South Tennis Courts, and Taube Tennis Stadium.

Off-campus facilities include the Morrison Boathouse, a sailing and rowing facility.

CURRICULUM AND SERVICES

The diverse instructional program strives to accommodate the sports interests of all undergraduate and graduate students. Only intercollegiate varsity men’s and women’s teams are limited to undergraduates. Skill groupings and limited class sizes enable the beginning student or the advanced performer to achieve success within the limits of individual motivation and potential. Skill level in, and knowledge about, a specific activity as well as available space are the only limitations to enrollment. Physically disabled students are encouraged to contact Eric Stein (elstein@stanford.edu) for enrollment advice.

Academic Credit—Activity classes carry 1 unit of credit for satisfactory completion of work. Although there is no limitation on the number of activity classes in which a student may enroll, no more than 8 units of these activity classes (and/or other University activity classes) may be applied toward undergraduate graduation requirements (see the “Undergraduate Degrees” section of this bulletin).

Auditing—No auditing is allowed in activity classes. Faculty and staff may take an activity class as space is available with instructor consent after student enrollment is completed.

Class Fees—Fees are charged for enrollment in all physical education activity classes and club sports. Class fees will be posted directly to the student’s university account.

Class Sign-ups—Students sign up for classes on Axess. For classes with limited enrollment, students must attend the first class meeting or contact the instructor to guarantee their space in class.

Deadline for Adding a Class—Students who have never appeared in a class may not enroll in that class after the fourth class meeting has passed. Students may add the class after the fourth meeting if they have been in regular attendance, but must add the class to their study list by the study list deadline, Friday of the third week of the quarter.

Equipment—Information on equipment and recommended class attire is available from the department or instructor.

Lockers—Lockers are available for rent to faculty/staff and students at the Arrillaga Family Sports Center, Ford Center and Roble Gym. The fee for faculty/staff is $20 per quarter or $50 per year. The fee for students is $15 per quarter or $35 per year.
BIOLOGY

Emeriti: (Professors) Bruce S. Baker,* Winslow R. Briggs, David Eipel, Donald Kennedy, Peter Ray, Robert Schimke, Norman K. Wessells, Dow O. Woodward, Charles Yanofsky,** (Professor, Researcher) R. Paul Levine**

Chair: Robert D. Simoni

Professor (Teaching): Carol L. Boggis

Associate Professors: Judith Fryedman, Elizabeth A. Hadly, Fiorenza Micheli, Dmitri Petrov, Kang Shen

Assistant Professors: Dominique Bergmann, William F. Burkholder, Hunter B. Fraser, Tadasu Fukami, Or Gozani, Ashby Morrisson, Mary Beth Mudgett, Mark J. Schnitzer, Jan M. Skotheim

Courtesy Associate Professors: Kathryn Barton, Alfred M. Spormann

Courtesy Assistant Professor: Zhiyong Wang

Lecturers: Waheeda Khalfan, Shyamala D. Malladi, Patricia Sea-well, James Watanabe

Consulting Professors: Cathy Laurie, Marc Tessier-Lavigne

Librarian: Michael Newman

* Recalled to research.

** Recalled to active duty.

Main Department Office and Phone: Gilbert Building, Room 109; (650) 723-2413

Student Services Office and Phone: Gilbert Building, Room 108; (650) 723-1826

Mail Code: 94305-5020

Web Site: http://biology.stanford.edu

Courses offered by the Department of Biology are listed under the subject code BIO on the Stanford Bulletin’s ExploreCourses web site.

ACADEMIC OVERVIEW

The department provides: (1) a major program leading to the B.S. degree; (2) a minor program; (3) a coterminial program leading to the M.S. degree; (4) a doctoral program leading to the Ph.D. degree; and (5) courses designed for the non-major. An undergraduate major in Biology serves as preparation for professional careers, including medicine, dentistry, veterinary sciences, teaching, consulting, research, and field studies. For undergraduate students, the department offers courses and research opportunities that can satisfy either a general or specific interest in the various fields of biology. For graduate-level students, the department offers resources and experience learning from and working with world-renowned faculty involved in research on ecology, neurobiology, population biology, plant and animal physiology, biochemistry, immunology, cell and developmental biology, genetics, and molecular biology.

UNDERGRADUATE MISSION STATEMENT

The undergraduate major in Biology can serve as a stepping-stone for a wide variety of career opportunities. For students planning to attend medical, dental, or veterinary school, or graduate school in biological and applied sciences, the biology major provides a strong foundation in the basic life sciences. This foundation of knowledge, plus laboratory experience, prepares students for research and technical positions in universities, government, and industry.

While a major in Biology provides an excellent background for these technical careers, it can also serve as a valuable and satisfying focus of a liberal arts education for those not planning careers in science-related fields. An understanding of basic biological principles is of increasing importance in today’s world. A knowledgeable and concerned citizenry is the best guarantee that these issues will be resolved most effectively. Finally, an understanding of the processes of life can heighten our perception and appreciation of the world around us, in terms of its beauty, variety, and uniqueness.

GRADUATE MISSION STATEMENT

The M.S. degree program offers general or specialized study to individuals seeking biologically oriented course work, and to under-graduate science majors wishing to increase or update their science background or obtain advanced research experience.

The training for a Ph.D. in Biology is focused on learning skills required for being a successful research scientist and teacher, including how to ask important questions and then devise and carry out experiments to answer these questions. Students work closely with an established adviser and meet regularly with a committee of faculty members to ensure that they understand the importance of diverse perspectives on experimental questions and approaches. Students learn how to evaluate critically pertinent original literature in order to stay abreast of scientific progress in their areas of interest. They also learn how to make professional presentations, write manuscripts for publication, and become effective teachers.

FACILITIES

The facilities and personnel of the Department of Biology are housed in the Gilbert Biological Sciences Building, Herrin Laboratories, Herrin Hall, the Jasper Ridge Biological Preserve, the James H. Clark Center, the Lorry I. Lokey Laboratory Building, the Carnegie Institution of Washington on the main campus, and at the Hopkins Marine Station in Pacific Grove on Monterey Bay.

Jasper Ridge Biological Preserve (JRBP) is located near Stanford University’s campus in the eastern foothills of the Santa Cruz Mountains. The preserve encompasses geologic, topographic, and biotic diversity within its 1,189 acres and provides a natural laboratory for researchers from around the world, educational experiences for students and docent-led visitors, and refuge for native plants and animals. See http://jrbi.cn.stanford.edu.

The Hopkins Marine Station, located 90 miles from the main University campus in Pacific Grove, was founded in 1892 as the first marine laboratory on the west coast of North America. For more information, including courses taught at Hopkins Marine Station with the subject code BIOHIPK, see the “Biology, Hopkins Marine Station” section of this bulletin, immediately following this section.

The department’s large collections of plants (Dudley Herbarium), fish, reptiles, and amphibians, as well as smaller collections of birds, mammals, and invertebrates, are housed at the California Academy of Sciences in San Francisco, where they, and extensive collections of the academy, are available to those interested in the systematics of these groups. Entomological collections, restricted to those being used in particular research projects, are housed in the Herrin Laboratories. No general collections are maintained except for teaching purposes.

The Falconer Biology Library in Herrin Hall (http://library.stanford.edu/depts/falconer) contains over 1,200 current subscriptions and an extensive collection of monographs and reference works. A specialized library is maintained at the Hopkins Marine Station.

BACHELOR OF SCIENCE IN BIOLOGY

The undergraduate major in Biology can serve as a stepping-stone for a wide variety of career opportunities. For students planning to attend medical, dental, or veterinary school, or graduate...
school in biological and applied sciences, the biology major provides a strong foundation in the basic life sciences. This foundation of knowledge, plus laboratory experience, also prepares students well for research and technical positions in universities, government, and industry.

While a major in Biology provides an excellent background for these technical careers, it can also serve as a valuable and satisfying focus of a liberal arts education for those not planning careers in science-related fields. An understanding of basic biological principles is of increasing importance in today’s world. A knowledgeable and concerned citizenry is the best guarantee that these issues will be resolved most effectively. Finally, an understanding of the processes of life can heighten our perception and appreciation of the world around us, in terms of its beauty, variety, and uniqueness.

ADVISING

Members of the Biology faculty are available for advising on such academic matters as choice of courses, research, suggested readings, and career plans. The student services office maintains a current list of faculty advisers, advising schedules, and research interests.

The student services office staff and BioBridge, the department’s peer advising group, are prepared to answer questions on administrative matters, such as requirements for the major, approved out-of-department electives, transfer course evaluations, and petition procedures. This office also distributes the department’s Bachelor of Science Handbook, which delineates policies and requirements, as well as other department forms and informational handouts.

Each undergraduate interested in the Biology major is required to select a department faculty adviser as part of the major declaration process. Students who plan to attend medical or graduate school, enroll in the honors or coterminal programs, take courses at Hopkins Marine Station, or attend one of the overseas campuses may find these resources particularly helpful.

REQUIREMENTS

Candidates for the general Biology B.S. degree must complete:

Core Courses—must be taken for a letter grade, including Writing in the Major courses:

<table>
<thead>
<tr>
<th>Subject and Catalog Number</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 41</td>
<td>5</td>
</tr>
<tr>
<td>BIO 42</td>
<td>5</td>
</tr>
<tr>
<td>BIO or BIOHOPK 43</td>
<td>5</td>
</tr>
<tr>
<td>BIO 44X</td>
<td>4</td>
</tr>
<tr>
<td>BIO or BIOHOPK 44Y*</td>
<td>4</td>
</tr>
</tbody>
</table>

* BIO 44Y not required if completing honors program. Failure to complete honors program results in student being required to complete BIO 44Y.

Required Foundational Breadth Courses—two courses may be taken credit/no credit:

<table>
<thead>
<tr>
<th>Subject and Catalog Number</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 31A, or 31X</td>
<td>8 or 4</td>

<td>5</td>
</tr>
</tbody>
</table>

* May be substituted with MATH 100 or beyond if student is interested in the fields of ecology and evolutionary biology.

** If taken to fulfill the foundational breadth requirement, these courses do not count toward the 24 elective unit requirement.

Electives—24 units required, distributed as follows:

- Biology (BIO) or Hopkins Marine Station (BIOHOPK) courses numbered 100 or above.
- No more than 6 units from any combination of individual instruction courses (BIO 198, 198X, 199, 199X, 290, 290X, 291, 300, 300X, BIOHOPK 175H, 198H, 199H, 290H, or 300H) may be applied toward the total number of elective units. No more than 6 units applied toward the elective unit requirement may be taken CR/NC.
- One course from at least three of the four central menu areas (listed below). The purpose of the central menu is to expose students to a wide range of topics studied within the field of biology and is intended to give students a breadth of knowledge. Please note—this requirement is only for the general major. Students pursuing a specialized field of study should consult the specific degree requirements listed in the “Fields of Study” section below.

Central Menu Areas:

1. Molecular (Area 1)
   - BIO 104. Advanced Molecular Biology
   - BIO 113. Fundamentals of Molecular Evolution
   - BIO 118. Genetic Analysis of Biological Processes
   - BIO 133. Genetics of Prokaryotes
   - BIO 160A. Developmental Biology I
   - BIO 160B. Developmental Biology II
   - BIO 188. Biochemistry I
   - BIO 189. Biochemistry II
   - BIO 230. Molecular and Cellular Immunology
   - CBIO 101. Cancer Biology
   - CEE 274A. Environmental Microbiology I

2. Cell/Developmental (Area 2)
   - BIO 118. Genetic Analysis of Biological Processes
   - BIO 129A. Cellular Dynamics I: Cell Motility and Adhesion
   - BIO 129B. Cellular Dynamics II: Building a Cell
   - BIO 133. Genetics of Prokaryotes
   - BIO 137. Plant Genetics
   - BIO 154. Molecular and Cellular Neurobiology
   - BIO 158. Developmental Neurobiology
   - BIO 160A. Developmental Biology I
   - BIO 160B. Developmental Biology II
   - BIO 171. Principles of Cell Cycle Control
   - BIO 230. Molecular and Cellular Immunology
   - CBIO 101. Cancer Biology
   - CEE 274A. Environmental Microbiology I

3. Organismal (Area 3)
   - BIO 112. Human Physiology
   - BIO 153. Cellular Neuroscience
   - BIO 154. Molecular and Cellular Neurobiology
   - BIO 158. Developmental Neurobiology
   - BIO 163. Neural Systems and Behavior
   - BIO 213. Biology of Viruses
   - BIOHOPK 161H. Invertebrate Zoology
   - BIOHOPK 162H. Comparative Animal Physiology
   - BIOHOPK 167H. Nerve, Muscle, and Synapse
   - BIOHOPK 169H. Neurobiology and Behavior
   - BIOHOPK 171H. Ecological and Evolutionary Physiology
   - MI 185. Topics in Microbiology

4. Ecology and Evolution (Area 4)
   - BIO 101. Ecology
   - BIO 113. Fundamentals of Molecular Evolution
   - BIO 121. Biogeography
   - BIO 136. Evolutionary Paleobiology
   - BIO 143. Evolution
   - BIO 144. Conservation Biology
   - BIO 145. Behavioral Ecology
   - BIO 185. Evolution of Reproductive Social Behavior
   - BIOHOPK 163H. Oceanic Biology
   - BIOHOPK 172H. Marine Ecology
   - CEE 274A. Environmental Microbiology I

1. May be used to satisfy either area I or area II requirement.
2. May be used to satisfy either area II or area III requirement.
3. May be used to satisfy either area I or area IV requirement.
4. May be used to satisfy either area III or area IV requirement.
5. May be used to satisfy area I, area II, or area IV requirement.

Students intending to pursue research careers in biology, especially in ecology, population genetics, or theoretical biology, should be aware that MATH 19, 20, 21, or MATH 41, 42 are minimum mathematics requirements for the B.S. degree in Biology. Substantial additional training in mathematics, including differential equations, linear algebra, and probability theory, is often highly advisable. Students should consult the Biology faculty to discuss individual needs.

Additionally, even though only two or three quarters of physics are required, students should be aware that many graduate and professional schools (for example, Medicine) require a year of general physics with lab. Biology majors are therefore advised to take the year-long physics sequence PHYSICS 21, 22, 23, 24, 25, 26 if they plan to attend graduate or medical school.

For students considering study at Hopkins Marine Station or an overseas program, the department recommends fulfilling as many University General Education Requirements as possible in the first two years at Stanford.

HOPKINS MARINE STATION

For more information on the Hopkins Marine Station, see the “Hopkins Marine Station” section of this bulletin. Students can go to Hopkins as early as Spring Quarter in the sophomore year, and can also go in the junior and/or senior year to take elective courses. Full descriptions of Hopkins Marine courses may be viewed on the Stanford Bulletin’s Explore Courses web site. The following Hopkins Marine Station courses may be used toward the Biology degree requirements:

Core—
BIOHOPK 43. Plant Biology, Evolution, and Ecology (equivalent to BIO 43)
BIOHOPK 44Y. Core Experimental Laboratory (equivalent to BIO 44Y)
BIOHOPK 175H. Problems in Marine Ecology and Ecophysiology (can be used in place of BIO 44Y)*
* 4 units count toward the BIO 44Y requirement, with the remaining units counting as research/teaching under the upper-division elective requirement.

Electives—
BIOHOPK 161H. Invertebrate Zoology (central menu area 3)
BIOHOPK 162H. Comparative Animal Physiology (central menu area 3)
BIOHOPK 163H. Oceanic Biology (central menu area 4)
BIOHOPK 164H. Marine Botany
BIOHOPK 166H. Molecular Ecology
BIOHOPK 167H. Nerve, Muscle, and Synapse (central menu area 3)
BIOHOPK 168H. Molecular Ecology Data Analysis
BIOHOPK 170H. Topics in Marine Biology
BIOHOPK 171H. Ecological and Evolutionary Physiology (central menu area 3)
BIOHOPK 172H. Marine Ecology (central menu area 4)
BIOHOPK 173H. Marine Conservation Biology
BIOHOPK 174H. Experimental Design and Probability
BIOHOPK 178H. Polar Biology
BIOHOPK 182H. Stanford at Sea (6 units maximum)
BIOHOPK 184H. Holistic Biology: Monterey Bay and the Sea of Cortez (6 units maximum)
BIOHOPK 185H. Ecology and Conservation of Kelp Forest Ecology
BIOHOPK 187H. Sensory Ecology
BIOHOPK 188H. Experimental Sensory Ecology
BIOHOPK 274. Hopkins Microbiology Course (6 units maximum)
BIOHOPK 277H. Biomechanics, Ecological Physiology, and Genetics of Intertidal Communities
BIOHOPK 310H. Intertidal Natural History

Research and/or Teaching (maximum 6 units combined)—
BIOHOPK 175H. Problems in Marine Ecology and Ecophysiology

BIOHOPK 198H. Directed Instruction or Teaching
BIOHOPK 199H. Undergraduate Research
BIOHOPK 290H. Teaching of Biological Science
BIOHOPK 300H. Research

See Biology degree requirements above for further information. Many of the Hopkins Marine Station courses may be used to fulfill department major requirements.

TYPICAL SCHEDULE FOR A FOUR-YEAR PROGRAM

FIRST YEAR

<table>
<thead>
<tr>
<th>Subject and Catalog Number</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 31X*, 33, 35, 36</td>
<td>A  W  S</td>
</tr>
<tr>
<td>MATH 19, 20, 21. Calculus and Analytic Geometry</td>
<td>3  3  4</td>

<td>4</td>
</tr>
<tr>
<td>BIOHOPK 175H*</td>
<td>10</td>
</tr>
</tbody>
</table>

* These courses can also be used to count toward the elective requirement.

FIELDS OF STUDY

In addition to the undergraduate major program described above, the department offers these six fields of study for students wishing to concentrate their studies in particular areas of biology:
1. Biochemistry and Biophysics
2. Ecology and Evolution
3. Marine Biology
4. Microbes and Immunity
5. Molecular and Cellular Biology
6. Neurobiology

These fields of study are declared on Axess; they appear on the transcript but not on the diploma. Candidates for the B.S. degree in Biology with a field of study are required to complete the departmental honors program as well as the set of requirements outlined below. Students in a field of study must have their checklist signed by their adviser and submitted to the student services office by the end of junior year.

BIOCHEMISTRY AND BIOPHYSICS

Core Courses (must be taken for a letter grade):

<table>
<thead>
<tr>
<th>Subject and Catalog Number</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 41</td>
<td>5</td>
</tr>
<tr>
<td>BIO 42</td>
<td>5</td>

<tr>
<td>BIO or BIOHOPK 43</td>
<td>5</td>
</tr>
<tr>
<td>Writing in the Major (one of the following):</td>
<td></td>
</tr>
<tr>
<td>BIO 44X</td>
<td></td>
</tr>
<tr>
<td>BIO or BIOHOPK 44Y</td>
<td></td>
</tr>
<tr>
<td>BIO 145*</td>
<td>4</td>
</tr>
<tr>
<td>BIOHOPK 175H*</td>
<td>10</td>
</tr>
</tbody>
</table>

Required Foundational Breadth Courses (two courses may be
Electives—7 units required. Electives must be 100-level or above and chosen from the offerings in the Department of Biology, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and research are allowed. Only one course can be taken credit/no credit.

Research Requirement—Admission to the departmental honors program; 10 units of BIO 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIO or BIOHOPK are permitted.

ECOLOGY AND EVOLUTION

Core Courses (must be taken for a letter grade):

<table>
<thead>
<tr>
<th>Subject and Catalog Number</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 113/244</td>
<td>4</td>
</tr>

MATH 19, 20, 21 or 41, 42 10
BIO 141* or BIOHOPK 174H* 4-5 or 3

* These courses can also be used to count toward the elective requirement.

Required Foundational Breadth Courses (two courses may be taken credit/no credit):

CHEM 31A, B or 31X 8 or 4
CHEM 33, 35, 36, 130, 131 18
PHYSICS 21, 22, 23, 24 or 41, 43, 45 8 or 12
MATH 19, 20, 21 or 41, 42 10
BIO 141* or BIOHOPK 174H* 4-5 or 3

* These courses can also be used to count toward the elective requirement.
MINOR IN BIOLOGY

Students interested in the minor in Biology must declare the minor and submit their course plan online via Axess no later than two quarters prior to the student’s intended quarter of degree conferral. The Biology minor requires a minimum of six courses meeting the following criteria:
1. All courses must be taken for a letter grade.
2. All courses must be worth 3 or more units.
3. All courses, other than the Biology Core (41, 42, 43), must be at or above the 100-level. Stanford Introductory Seminars may not be used to fulfill the minor requirements.
4. Courses used to fulfill the minor may not be used to fulfill any other department degree requirements (minor or major).
5. At least one course from the Biology Core (41, 42 or 43) must be taken.
6. The Biology Core Laboratory (BIO 44X and BIO 44Y) does not count towards the minor.
7. Courses must be chosen from the offerings of the Department of Biology or the Hopkins Marine Station, or from the list of approved out-of-department electives (available in the student services office or downloadable at http://biology.stanford.edu/student_resources/out_of_dept_electives.pdf).
8. Elective credit for research (BIO 199 or BIOHOPK 199H) is limited to a maximum of 3 units. BIO 199X is not allowable.

MASTER OF SCIENCE IN BIOLOGY

For information on the University’s basic requirements for the M.S. degree, see the “Graduate Degrees” section of this bulletin. The M.S. degree program offers general or specialized study to individuals seeking biologically oriented course work, and to undergraduate science majors wishing to increase or update their science background or obtain advanced research experience. Students who have majored in related fields are eligible to apply, but course work equivalent to the preparation of a Stanford B.S. in science is recommended. This includes course work in biology, chemistry, physics, and mathematics. The M.S. program does not have an M.S. with thesis option.

ADMISSIONS

The department only accepts M.S. program applications from matriculated Stanford students:
1. Undergraduates wishing to pursue a coterminal MS degree
2. Non-Biology graduate students wishing to apply for the MS degree
3. Current Biology PhD students wishing to leave the PhD program with an MS degree

Coterminal applicants, upon earning a minimum of 120 units toward graduation (UTG) must apply in early October to start the program in Winter Quarter, or in mid-January to start the program in Spring, Autumn, or the following Winter Quarter. The application includes:
2. Statement of Purpose - should explain why the student wishes to enter the program and what the student plans to accomplish while in the program. The statement should also supply information about the student’s science capabilities if his or her undergraduate academic record does not accurately reflect them. For example, if the GPA is slightly under 3.0, the student should explain any changes that may indicate improvement in course work.
3. Unofficial Stanford transcript
4. Two letters of recommendation, preferably from Biology faculty members in this department (if two such letters are not available, letters from faculty familiar with the student’s ability to succeed in a graduate science curriculum are acceptable)

All other interested students should contact the Student Services Office in Gilbert 108. Application fees for all applicants will be applied directly to students’ accounts.

GENERAL REQUIREMENTS

The M.S. program consists of Department of Biology and/or Hopkins Marine Station course work, approved out-of-department electives, and foundational breadth courses totaling at least 45 units at or above the 100-level, distributed as follows:
1. A minimum of 23 of the 45 units must be courses designated primarily for graduate students (200-level or higher).
2. A minimum of 36 units must be chosen from the offerings in the Department of Biology (BIO), Hopkins Marine Station (BIOHOPK), the list of approved out-of-department electives, foundational breadth courses, and/or research and teaching.
   a. A maximum of 18 of the 36 units may be a combination of Biology research, directed reading, and/or teaching (BIO 198, 198X, 290, 290X, 291, 300, 300X; BIOHOPK 175H, 176H, 198H, 290H, or 300H).
   b. A maximum of 9 units may be foundational breadth courses in chemistry, mathematics, statistics, computer science, and/or physics beyond the level required for the undergraduate degree in Biology and at least at the 100-level.
3. [THIS SHOULD BE ITEM 3.] The remaining 9 units may be other Stanford course work relevant to a student’s professional development. Students are required to petition for courses that fall into this category using the General Petition form, available in the student services office or downloadable at http://biology.stanford.edu/student_resources/general_petition.pdf.

Each candidate designs a coherent program of study in consultation with her or his department adviser. Although there are no specific courses required, program proposals must adhere to department parameters.

A program proposal, signed by the student’s adviser and approved by the chair of the M.S. committee, must be filed by the third week of the first quarter of enrollment. Students may take only 6 units CR/NC and must receive a grade of ‘B-’ or better in all courses taken for the degree.

DOCTOR OF PHILOSOPHY IN BIOLOGY

For information on the University’s basic requirements for the Ph.D. degree, see the “Graduate Degrees” section of this bulletin. The training for a Ph.D. in Biology is focused on learning skills required for being a successful research scientist and teacher, including how to ask important questions and then devise and carry out experiments to answer these questions. Students work closely with an established adviser and meet regularly with a committee of faculty members to ensure that they understand the importance of diverse perspectives on experimental questions and approaches. Students learn how to evaluate critically pertinent original literature in order to stay abreast of scientific progress in their areas of interest. They also learn how to make professional presentations, write manuscripts for publication, and become effective teachers.
ADMISSIONS

Preparation for Graduate Study—Students seeking entrance to graduate study in Biology ordinarily should have the equivalent of an undergraduate major in Biology at Stanford. However, students from other disciplines, particularly the physical sciences, are also encouraged to apply. Such students are advised at the time of initial registration on how they should complete background training during the first year of graduate study. In addition to the usual basic undergraduate courses in biology, it is recommended that preparation for graduate work include courses in chemistry through organic chemistry, general physics, and mathematics through calculus.

Application, Admission, and Financial Aid—Prospective graduate students should apply online at http://gradadmissions.stanford.edu. The department’s program is divided into three separate areas of concentration: ecology/evolution/population studies; integrative/organismal; and molecular/cellular/developmental/genetic/plant. Included in these concentrations is the option to conduct research at Hopkins Marine Station. These concentrations are recorded in the department; they do not appear on official university records.

Applicants are required to take the Graduate Record Examination (GRE) general test. The GRE subject test is not required. Applicants should plan on taking the GRE at least one month prior to the application deadline to ensure that official scores are available when applications are evaluated.

Admission to the Ph.D. program is competitive, and in recent years it has been possible to offer admission to only 10 percent of the applicants.

Qualified applicants should apply for nationally competitive predoctoral fellowships, especially those offered by the National Science Foundation.

Admitted students are typically offered financial support in the form of Stanford Graduate Fellowships, research assistantships, NIH traineeships, or Biology fellowships.

GENERAL REQUIREMENTS

The following requirements must be completed by all students:

1. Course work is planned in consultation with an advising committee based on a student’s concentration. In addition, students must take a course on the ethical conduct of research: BIO 312 for ecology/evolution/population studies; MED 255 for integrative/organismal and molecular/cellular/developmental/genetic/plant.

2. Teaching experience and training are part of the graduate curriculum. Each student assists in teaching one course in the department’s core lecture (41, 42, or 43) or lab (44X, 44Y) series, and a second course that can be either a core course or other Biology or Hopkins Marine Station course. These quarters of teaching are required for ecology, evolution, and population studies students.

3. Graduate seminars devoted to current literature and research in particular fields of biology are an important means of attaining professional perspective and competence. Seminars are presented under individual course listings or are announced by the various research groups. Topics of current biological interest are presented by speakers from Stanford and other institutions. During the first year of study, graduate students are required to attend seminars and make one formal seminar presentation which must be evaluated by a minimum of two faculty members.

4. By June 1, each first-year student is expected to have selected a lab in which to perform dissertation research and to have been accepted by the faculty member in charge. Students and faculty must wait until April 1 to discuss the choice of a dissertation lab.

5. During the second year, students are required to write a dissertation proposal which is evaluated by a committee of three faculty (the dissertation advising committee) in an oral presentation. Advancement to candidacy depends on satisfactory completion of the dissertation proposal.

6. Third and fourth year: each student must meet with the advising committee by May 15.

7. Advanced students are required to meet with their committee at least twice a year by November 15 and May 15.

8. Residency requirement: a minimum of 135 units of graduate registration is required of each candidate.

9. The doctoral dissertation must be presented to an oral examination committee comprised of at least five faculty members. In addition, the final dissertation must be approved by the student’s reading committee, comprised of at least three faculty members, and by a graduate degree progress officer in the Registrar’s Office. Upon completion of this final requirement, a student is eligible for conferral of the degree.

TRACK SPECIFIC REQUIREMENTS

In addition to the general requirements listed above, students must also complete requirements within their concentration.

Molecular, Cellular, Developmental, Genetic, and Plant—

1. First year:
   a. advising committee: each entering student meets with the first-year advising committee within the first two weeks of autumn quarter and again no later than May 15. The committee reviews the student’s previous academic work and current goals and advises the student on a program of Stanford courses, some of which may be required and others recommended. Completion of the core curriculum (below) is required of all students.
   b. core curriculum:* students are required to take the following courses for a letter grade:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 203</td>
<td>Advanced Genetics</td>
</tr>
<tr>
<td>BIO 214</td>
<td>Advanced Cell Biology</td>
</tr>
<tr>
<td>BIO 301</td>
<td>Frontiers in Biology: satisfies first-year talk requirement; must be taken Autumn and Winter Quarters</td>
</tr>
</tbody>
</table>

One of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO/SBIO 241</td>
<td>Biological Macromolecules</td>
</tr>
<tr>
<td>BIO 201</td>
<td>Advanced Molecular Biology</td>
</tr>
<tr>
<td>CSB 210</td>
<td>Signal Transduction Pathways and Networks</td>
</tr>
<tr>
<td>MCP 256</td>
<td>How Cells Work: Energetics, Compartments, and Coupling in Cell Biology</td>
</tr>
</tbody>
</table>

Three additional courses in the student’s area of interest, or as advised by committee. These courses must be offered for at least three units and must be taken for a letter grade.

   a. lab rotations:* first-year students are required to complete rotations in three different laboratories. The first rotation must be in a lab in the Department of Biology.

   * Written petitions for exemptions to core curriculum and lab rotation requirements are considered by the advising committee and the chair of the graduate studies committee. Approval is contingent upon special circumstances and is not routinely granted.

2. Second year: Each student must pass a two-part qualifying exam.
   a. dissertation proposal: during Winter and Spring Quarters of the second year, the student must prepare a dissertation proposal that outlines the student’s projected dissertation research, including an expert assessment of the current literature. An oral examination is held after submission of the proposal to the dissertation advising committee. The student’s adviser is a silent member of the examination committee; the other members of the dissertation advising committee can provide feedback. Advancement to candidacy is contingent upon completion of the dissertation proposal and oral exam. The written proposal is due by March 31, and the oral defense must take place no later than May 1. Failure to complete these requirements on schedule results in formal warnings and eventual dismissal from the program.

3. Third year and beyond:
   a. dissertation and dissertation defense: a completed draft of the dissertation must be turned in to the student’s oral examination committee at least one month before the oral exam is scheduled to take place. See University guidelines
for the composition of this committee in the “Graduate Degrees” section of this bulletin.

Integrative/Organismal—

1. First year:
   a. advising committee: each entering student meets with the first-year advising committee within the first two weeks of Autumn Quarter and again no later than May 15. The committee reviews the student’s previous academic work and current goals and advises the student on a program of Stanford courses, some of which may be required and others recommended.
   b. core curriculum: Students are required to take BIO 306, Current Topics in Integrative and Organismal Biology. Students specializing in integrative biology may also be asked to take appropriate graduate-level courses as advised by committee.
   c. first-year paper: students must submit a paper that is evaluated by the advising committee by May 1. This paper should be a step toward the development of a dissertation proposal and may consist of an analysis of new data or a literature review and synthesis. The first-year paper must be evaluated by a minimum of two faculty members.

2. Second year: Each student must pass a two-part qualifying exam.
   a. dissertation proposal: during Spring Quarter of the second year, the student must prepare a dissertation proposal that outlines the student’s projected dissertation research, including an expert assessment of the current literature. An oral examination is held after submission of the proposal to the dissertation advising committee comprised of three faculty members. Advancement to candidacy depends on completion of the dissertation proposal and oral exam. The written proposal is due by May 15, and the oral defense must take place no later than June 15. Failure to complete these requirements on schedule will result in formal warnings and eventual dismissal from the program.

3. Third year and beyond:
   a. dissertation and dissertation defense: a completed draft of the dissertation must be turned in to the student’s oral examination committee at least one month before the oral exam is scheduled to take place. See University guidelines for the composition of this committee in the “Graduate Degrees” section of this bulletin.

OVERSEAS STUDIES COURSES IN BIOLOGY

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

AUSTRALIA
OSPASTL 10. Coral Reef Ecosystems. 3 units (2 allowable for the Biology major), Kevin Arrigo, Sophie Dove, Selina Ward, GER:DB:EngrAppSci

BEIJING

SPRING QUARTER

FLORENCE
OSPFLO 64. The Future of Mediterranean Marine Ecosystem: Human Impacts and Conservation Strategies. 3 units, Fiorenza Micheli, GER:DB: NatSci
OSPFLO 65. Historical Ecology of the Mediterranean Sea. 2 units, Fiorenza Micheli

MADRID
**SUMMER PROGRAM AT HOPKINS MARINE STATION**

The Hopkins Marine Station located 90 miles from the main University campus in Pacific Grove, was founded in 1892 as the first marine laboratory on the west coast of North America. The modern laboratory facilities on the 11-acre campus on Cabrillo Point house ten faculty, all members of the Department of Biology. The Miller Library has a collection of literature in marine science. The Hopkins faculty offers undergraduate and graduate courses in biology which focus on the marine realm and involve topics including oceanography, environmental and comparative physiology, molecular evolution, biomechanics, cellular biology, conservation biology, and neurobiology and behavior. Most courses have laboratory sections that exploit the potential of working with readily available marine plants and animals. Small class sizes encourage close student-faculty interactions. Undergraduates have opportunities to carry out research projects with Hopkins faculty during the academic year or summer months. Courses are offered in Winter, Spring, and Summer quarters.

Courses at Hopkins Marine Station can satisfy many requirements, from the Natural Sciences GER to major and minor requirements in departments housed in the Schools of Engineering, Humanities and Sciences, and Earth Sciences. Students are encouraged to check with their department’s student services office to see which courses at Hopkins may be used to fulfill major or minor requirements.

**SUMMER PROGRAM AT HOPKINS MARINE STATION**

The summer program is open to advanced undergraduate, graduate students, and postdoctoral students, and to teachers whose biological backgrounds, teaching, or research activities can benefit from a summer’s study of marine life. Applications, deadlines, and further information are available at http://hopkins.stanford.edu.
third year, and it must be approved by a committee of at least three members, including the principal research adviser and at least one member from the Biophysics Program. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.

6. The student must present a Ph.D. dissertation as the result of independent investigation that expresses a contribution to knowledge in the field of biophysics.

7. The student must pass the University oral exam, taken only after the student has substantially completed the dissertation research. The examination is preceded by a public seminar in which the research is presented by the candidate.

**CHEMISTRY**

Emeriti: (Professors) John I. Brauman, James P. Collman, Carl Djerassi, Harden M. McConnell, John Ross, Eugene E. van Tamelen

Chair: Richard N. Zare

Vice Chair: Wray H. Huestis

Associate Professors: Christopher E. D. Chidsey, Justin Du Bois, Vijay S. Pande, T. Daniel P. Stack

Assistant Professors: Lynette Cegelski, Biaxiao Cui, Matthew Kanan

Courtesy Professors: Stacey F. Bent, Curtis W. Frank, Daniel Herschlag

Courtesy Associate Professors: Karlene A. Cimprich, Thomas J. Wandless

Courtesy Assistant Professor: James K. Chen

Lecturers: John A. Flygare, Hillary Hua, Samir Safi, Jennifer Schwartz

Director of Undergraduate Laboratories: Hillary Hua

* The curriculum leading to the B.S. degree in Chemical Engineering is described in the “School of Engineering” section of this bulletin.

**Department Offices:** 121 S. G. Mudd

Mail Code: 94305-5080

Phone: (650) 723-2501

Web Site: http://stanford.edu/dept/chemistry

Courses offered by the Department of Chemistry are listed under the subject code CHEM on the *Stanford Bulletin’s* Explore Courses web site.

Chemistry is central to many scientific disciplines and plays an important role in the emerging areas of biotechnology, catalysis, health, and materials science. Developing new photon probes of biological molecules, modeling of protein folding and reactivity, manipulation of carbon nanotubes, development of new oxidation and polymerization catalysts, and synthesis of organic molecules for probing ion-channels are all research areas that are pursued actively in the Chemistry Department. The overarching theme of these pursuits is a focus at the atomic and molecular levels, whether this concerns probing the electronic structure and reactivity of molecules as small as dihydrogen or synthesizing large polymer assemblies. The ability to synthesize new molecules and materials and to modify existing biological structures allows the exploration of properties of well-defined systems. The Chemistry Department has a long-standing tradition of encouraging undergraduate majors to become involved in research during the academic year and through the 10-week Bing Summer Research Program.

**UNDERGRADUATE PROGRAMS IN CHEMISTRY**

**CHEMISTRY PREMEDICAL RECOMMENDATIONS**

The department recommends that pre-med students take the following courses for a letter grade: 31A,B or 31X, 33, 35, 36, 130, 131, 135, 171, and 181. Historically, these courses have fulfilled the chemistry requirements at most medical schools. For information on medical school advising and resources, download the Undergraduate Advising and Research publication at http://ual.stanford.edu/pdf/uar_medschool.pdf.

**BACHELOR OF SCIENCE IN CHEMISTRY**

*Entrance Preparation—* Entrance credit in the preparatory subjects of chemistry, physics, and especially mathematics provides flexibility in creating a four-year schedule for students intending to major in Chemistry.

**Requirements—**

*Chemistry option:* University Writing and General Education Requirements; CHEM 31A and B or 31X, 33, 35, 36, 130, 131, 134, 136, 151, 153, 171, 173, 174, 175, 176; MATH 41, 42, 51, 53, or 100A, B, 104; PHYSICS 41, 44, 45, 46.

*Biological chemistry option:* University Writing and General Education Requirements; CHEM 31A and B or 31X, 33, 35, 36, 130, 131, 134, 136, 151, 171, 173, 176, 181, 183, 184, 185; BIO 41, 42; MATH 41, 42, 51, 53, or CME 100, 102, 104; PHYSICS 41, 43; an approved, elective, graduate-level class related to the student’s biochemical interests.

In addition, CS 106A and B are recommended for students planning graduate study. All degree courses must be taken for a letter grade. For further information on the undergraduate program, see http://www.stanford.edu/dept/chemistry/academic/under.

**TYPICAL SCHEDULE FOR A FOUR-YEAR PROGRAM:**

**CHEMISTRY OPTION**

**FIRST YEAR**

Subject and Catalog Number | Qtr. and Units
--- | ---
CHEM 31X. Chemical Principles | A
CHEM 33. Structure and Reactivity | W
CHEM 35. Organic Monofunctional Compounds | S
CHEM 36. Organic Chemistry Laboratory I | A
MATH 41,42,51. Calculus, Linear Equations | W S

**SECOND YEAR**

CHEM 130. Organic Chemistry Laboratory II | A
CHEM 131. Organic Polymolecular Compounds | W
CHEM 134. Analytical Chemistry Laboratory | S
CHEM 136. Synthesis Laboratory | A
MATH 53. Differential Equations | W
PHYSICS 41,43,44. Mechanics, Electricity and Magnetism | S

**THIRD AND FOURTH YEARS**

CHEM 151,153. Inorganic Chemistry | A
CHEM 171,173,175. Physical Chemistry | A
CHEM 174,176. Physical Chemistry Laboratory | A
PHYSICS 45,46. Light and Heat | S

* Elective courses must be used to complete the University Writing, General Education, and Language Requirements. They may also be used to broaden one’s background in science and non-science areas and to provide an opportunity for advanced study in Chemistry. Courses offered by other departments that may be of interest to Chemistry majors include BIO 41, 42, 43; CHEMENG 20, 120A,B, 130; CS 106A,B; ECON 1; ENGR 50; MATH 52, 106, 109, 113, 131; MATSCI 50; PHYSICS 110; STATS 60, 110, 116.

**American Chemical Society Certification**

Students who wish to be certified as having met the minimum requirements of the American Chemical Society for professional training must complete, in addition to the above requirements, CHEM 181 and 183, and 6 units of CHEM 190.
HONORS PROGRAM
A B.S. degree in Chemistry with honors is available to those students interested in chemical research. Admission to the honors program requires a scientific grade point average (GPA) of 3.3 and an overall GPA of 3.0 in all University courses. Beyond the standard B.S. course requirements for each track, 9 units of CHEM 190 research credit, and 9 units of course work need to be completed during the junior and senior academic years. A thesis, approved by a Chemistry research adviser, must be completed during the senior year. Theses must be completed by May 31 to be considered for the Firestone or Golden Award. The use of a single course for multiple requirements for honors, major, minor, or coterminus requirements is not allowed. Students who wish to be admitted to the honors program should register in the department student services office in the Mudd Chemistry Building in Spring Quarter of the junior year.

CHEM 190 research units towards honors may be completed, once accepted into the program, in any laboratory within Chemistry or with courtesy faculty in Chemistry. Other chemical research can be approved through a formal petitioning of the undergraduate studies committee. At least 3 units of CHEM 190 must be completed during the senior year. Participation in a summer research program in an academic setting between junior and senior years may be used in lieu of 3 units of CHEM 190. For each quarter, a progress report reflecting the units undertaken is required. This report must be signed by the Chemistry faculty adviser and filed in the department student services office in Mudd Chemistry before the last day of finals in the quarter during which the research is performed.

The 9 units of course work must be completed from courses approved by the undergraduate studies committee and taken for a letter grade. At least six of these units need to be taken from the following CHEM courses: 153, 174, 175, 181, 183, 185, 221, 223, 225, 235, 251, 253, 255, 271, 273, 275, 297. Courses from Mathematics (MATH 114 or higher), Physics (PHYSICS 100 or higher), Engineering, and Structural Biology or Biochemistry in the School of Medicine can be used to fulfill this requirement.

CHEMISTRY TEACHING CREDENTIALS
The requirements for certification to teach chemistry in the secondary schools of California may be ascertained by consulting the section on credentials under the “School of Education” section of this bulletin and the Credential Administrator of the School of Education.

MINOR IN CHEMISTRY
Courses required for a minor are CHEM 33, 35, 36, 130, 131, 134, 151, 171. MATH 51 is a pre-requisite for CHEM 171. PHYSICS 21, 23, 25, or 28, 29, or 41, 43, 45 are recommended. No substitutions. All courses must be taken for a letter grade.

GRADUATE PROGRAMS IN CHEMISTRY
The University’s basic requirements for the M.S. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

CHEMISTRY GENERAL REQUIREMENTS
Placement Examinations—Each new graduate student must take placement examinations upon entrance. These consist of three written examinations of two hours each in the fields of inorganic, organic, and physical chemistry, and cover such material as ordinarily is given in a rigorous one-year undergraduate course in each of these subjects. Students majoring in biophysical chemistry or chemical physics must take examinations in biophysical or chemical physics, physical chemistry, and organic or inorganic chemistry. All placement examinations are given the week before instruction begins in Autumn Quarter, and must be taken at that time. Each new graduate student meets with a member of the graduate study committee to define a program of courses based on results of the placement examinations.

Candidates for advanced degrees must have a minimum grade point average (GPA) of 3.0 for all Chemistry lecture courses as well as for all courses taken during graduate study. Required courses must be taken for a letter grade. Most course work ends in the second year of studies, and students will then focus on full-time dissertation research. All prospective Ph.D. candidates, regardless of the source of financial support, are required to gain teaching experience as an integral part of graduate training. During the period in which a dissertation is being read by members of the faculty, candidates must be available for personal consultation until the dissertation has received final department approval.

CHEMISTRY FELLOWSHIPS AND SCHOLARSHIPS
In addition to school fellowships and scholarships open to properly qualified students, there are several department fellowships in chemistry. Undergraduate scholarships are administered through the Financial Aid Office. Teaching assistantships and research assistantships are open to graduate students. Graduate fellowships, scholarships, and teaching assistantships are administered through the Department of Chemistry.

MASTER OF SCIENCE IN CHEMISTRY
The Master of Science is available only to current Ph.D. students or as part of a coterminal program. Applicants for the M.S. degree in Chemistry are required to complete, in addition to the requirements for the bachelor’s degree, a minimum of 45 units of work and a M.S. thesis. Of the 45 units, approximately two-thirds must be in the department and must include at least 12 units of graduate level lecture courses exclusive of the thesis. Of the 12 units, at least 6 units must be from CHEM 221, 223, 225, 235, 251, 253, 255, 271, 273, 275, 276, 277, 280, 285, or 297.

PH.D. MINOR IN CHEMISTRY
Candidates for the Ph.D. degree in other departments who wish to obtain a minor in chemistry must complete, with a GPA of 3.0 or higher, 20 graduate-level units in Chemistry including four lecture courses of at least 3 units each.

DOCTOR OF PHILOSOPHY IN CHEMISTRY
Graduate students are eligible to become formal candidates for the Ph.D. degree after taking the department placement examinations, satisfactorily completing most of the formal lecture course requirements, and beginning satisfactory progress on a dissertation research project. They then file for admission to candidacy for the Ph.D. degree. This filing must be done before June of the second year of graduate registration.

After taking the departmental placement examinations, students select research advisers by first interviewing members of the Chemistry faculty about their research. Students then file an Application to Start Research form with the Department of Chemistry graduate study committee and begin research on their Ph.D. dissertation under the supervision of the adviser. All students in good standing are required to start research by the end of Winter Quarter of the first year of graduate registration.

There is no foreign language requirement for the Ph.D. degree. Candidates for the Ph.D. degree are required to participate continuously in the department colloquium (CHEM 300), and in the division seminar of the major subject. In addition, continuous enrollment in CHEM 301 is expected after the student has chosen a research supervisor. As part of graduate training, Ph.D. candidates are required to gain experience as teaching assistants.

Before candidates may request scheduling of the University oral examination, clearance must be obtained from the major professor and the chair of the department’s Graduate Study Committee. Conditions that must be fulfilled before clearance is granted vary with the different divisions of the department and may be ascertained by consulting the chair of the committee.

It is the policy of the department to encourage and support in every possible way the pursuit of research and other advanced work by qualified students. Information about faculty members with lists of their recent research publications is found in Chemi-
The study of Classics has traditionally centered on the literature and material culture of ancient Greece and Rome, including Greek and Latin language, literature, philosophy, history, art, and archaeology. At Stanford, Classics also explores connections with other ancient cultures and with the modern world, as well as specialized fields such as ancient economics, law, papyrology, and science. The department’s faculty approaches Classics from an interdisciplinary perspective that crosses geographical, temporal, and thematic territories. Studying ancient epic poetry can lead to new perspectives on modern politics; and Roman studies present cultural parallels just as Latin illuminates the history of English and the Romance languages. In short, Classics at Stanford is an interdisciplinary subject concerned not only with Greek and Roman civilization but also with the interaction of cultures and societies that influenced the ancient Mediterranean basin and continue to influence human society across the globe.

UNDERGRADUATE PROGRAMS IN CLASSICS

The department offers the following fields of study for degrees in Classics: Classical Studies; Ancient History; Greek; Latin; and Greek and Latin. The Classical Studies, Greek, and Latin fields of study may also be taken with a Philosophy and Literature focus. The Classics major can be completed in conjunction with a second major in the sciences or in other humanities departments. The department also offers minors in Classical Languages; History; Literature and Philosophy; and Classical Studies.

BACHELOR OF ARTS IN CLASSICS

Those interested in majoring in Classics are encouraged to declare the beginning of their junior year, but are urged to discuss their plans with the undergraduate director as early as possible. Students who choose the Greek and Latin field of study (option 8 below) should begin the curriculum as soon as possible because it is difficult to complete the language requirements without an early start; those with no previous knowledge of Latin or Greek should begin study in the freshman year or as early as possible in the sophomore year.

To declare the major, a student must fill out the Declaration of Major on Axess and meet with the undergraduate director in the Department of Classics. At that time, the undergraduate director assigns the student a department adviser. To build a mentoring relationship, students meet with their adviser at least once a quarter. The student should then schedule an orientation with the student services officer. Each student’s progress towards fulfillment of the major requirements is recorded in a file kept in the student services officer’s office. It is the student’s responsibility to work with the adviser to keep this file up to date.

A letter grade is required in all courses taken for the major. No course receiving a grade lower than ‘C’ is counted toward fulfillment of major requirements.

The B.A. degree may be earned by fulfilling the requirements for one of the following fields of study or fields of study with a focus:

1. Classical Studies: This field of study is declared on Axess. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. This major is recommended for students who wish to study classical civilizations in depth but do not wish to study the languages to the extent required by options 4, 5, 6, 7, and 8. It is not suitable for students who wish to do graduate work in Classics or to teach Latin or Greek in high school, as the language work is insufficient for these purposes. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:

   a. CLASSGEN 175 or CLASSGEN 176. Majors Seminar
   b. at least two courses in Latin or Greek at the 100 level or higher, or one course in one of the languages at the 100 level or higher, plus the series 1, 2, 3, or 51, 52 in the other language (or an equivalent approved by the department)
   c. at least five courses with the prefix CLASSART, CLASSGEN, or CLASSHIS (or IHUM 39A,B or IHUM 69A).

Courses listed in the department’s cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer.
for inclusion in the student’s academic file prior to the end of the term in which the course is taken.

2. Classical Studies with a Philosophy and Literature Focus: Students should declare the Classical Studies field of study on Axess; meet with the undergraduate director concerning the Philosophy and Literature focus; and discuss options for pursuing a period of study in the Mediterranean region. See http://philit.stanford.edu/programs.html. Courses counted for the degree must be taken for a letter grade. Students must complete at least 65 units of approved courses including:
   a. CLASSGEN 175 or CLASSGEN 176. Majors Seminar (WIM)
   b. at least five courses with the prefix CLASSART, CLASSGEN, or CLASSHIS (also IHIU 39A,B or IHIU 69A). Courses listed in the department’s cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student’s academic file prior to the end of the term in which the course is taken.
   c. two courses in Latin or Greek at the 100 level or higher, or one course in one of the languages at the 100 level or higher plus the series 1, 2, 3, or 51, 52 in the other language
   d. Writing in the Major (WIM) in the Philosophy department (PHIL 80)
   e. one course in each of the following areas:
      1. aesthetics, ethics, and social and political philosophy (PHIL 170 series)
      2. philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
      3. history of philosophy (above 100 level)
   f. PHIL 81. Philosophy and Literature
   g. two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.
   h. Philosophy and Literature capstone seminar. This year’s capstone seminars are COMPLIT 226, Narrative and Ethics; ILAC 240E, Jorge Luis Borges; and RELIGST 212, Chuang Tzu. One of these courses must be taken in the student’s senior year.

3. Ancient History: This field of study is declared on Axess. Courses chosen must be approved in advance and in writing by the undergraduate director. Approval should be submitted to the student services officer for the student’s academic file. With the written approval of the instructor and the undergraduate director, students may substitute graduate seminars in ancient history for some of these courses. Students are also encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses and must satisfy four requirements:
   a. CLASSGEN 175 or CLASSGEN 176, Majors Seminar (WIM)
   b. breadth requirement: majors must take at least two survey courses in ancient history
   c. depth requirement: majors must take at least 33 units of ancient history and civilization courses, drawn from courses with CLASSHIS, CLASSGEN and CLASSART prefixes. IHIU 39A,B, Inventing Classics or IHIU 69A, History of the World, may be counted toward this requirement. CLASSGRK and CLASSLAT courses may also count toward this requirement if approved by the undergraduate director.
   d. breadth requirement: majors must take at least 4 units in each of the following areas: archaeology and art; comparative ancient civilizations; and historical and social theory. IHIU 39A,B, Inventing Classics may be counted toward this requirement. The courses chosen must be approved in advance by the undergraduate director, and are normally chosen from the list of areas below, although courses listed in the department’s cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director. Written approval must be submitted to the student services officer for inclusion in the student’s academic file prior to the end of the term in which the course is taken.
      1. archaeology and art: for example, any CLASSART course; ANTHRO 1/201, 90B, 301
      2. comparative ancient civilizations: majors must take a course on the ancient world outside the Mediterranean and western Asia, such as ANTHRO 3, 97/297
      3. historical and social theory: for example, ANTHRO 1/201, 90B; SOC 1, 140, 142, 170

4. Greek: This field of study is declared on Axess. Beginning courses in Greek, if required, may be counted towards the total of 60 units. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:
   a. CLASSGEN 175 or CLASSGEN 176, Majors Seminar (WIM)
   b. a minimum of 31 units in Greek courses at the 100 level or higher. It is recommended that one of these courses be CLASSGRK 175A, although this course should not be taken until students have completed three years of Greek.
   c. at least three courses with the prefix CLASSART, CLASSGEN, or CLASSHIS (also IHIU 39A,B or IHIU 69A). Courses listed in the department’s cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student’s academic file prior to the end of the term in which the course is taken.
   d. the introductory Latin sequence CLASSLAT 1, 2, 3, or 51, 52, or one 100-level course in Latin (recommended)
   e. it is recommended that students take a course in ancient history

5. Greek with a Philosophy and Literature Focus: Students should declare the Greek field of study on Axess, and meet with the undergraduate director concerning the Philosophy and Literature focus, and to discuss options for pursuing a period of study in the Mediterranean region. See http://philit.stanford.edu/programs.html. Courses counted for the degree must be taken for a letter grade. Students must complete at least 65 units of approved courses including:
   a. CLASSGEN 175 or CLASSGEN 176, Majors Seminar (WIM)
   b. at least three courses with the prefix CLASSART, CLASSGEN, or CLASSHIS (also IHIU 39A,B or IHIU 69A). Courses listed in the department’s cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student’s academic file prior to the end of the term in which the course is taken.
   c. 31 units in Greek courses at the 100 level or higher
   d. Writing in the Major (WIM) in the Philosophy Department (PHIL 80)
   e. one course in each of the following areas:
      1. aesthetics, ethics, and social and political philosophy (PHIL 170 series)
      2. philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
      3. history of philosophy (above 100 level)
   f. PHIL 81. Philosophy and Literature
g. two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.

h. Philosophy and Literature capstone seminar. This year’s capstone seminars are COMPLIT 226, Narrative and Ethics; ILAC 240E, Jorge Luis Borges; and RELIGST 212, Chuang Tzu. One of these courses must be taken in the student’s senior year.

6. Latin: This field of study is declared on Axess. Beginning courses in Latin, if required, may be counted towards the total of 60 units. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:
   a. CLASSGEN 175 or CLASSGEN 176, Majors Seminar (WIM)
   b. a minimum of 31 units in Latin courses at the 100 level or higher. It is recommended that one of these courses be CLASSLAT 175A, although this course should not be taken until students have completed three years of Latin.
   c. at least three courses with the prefix CLASSART, CLASSGEN, or CLASSHIS. Courses listed in the department’s cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student’s academic file prior to the end of the term in which the course is taken.
   d. the introductory sequence CLASSGRK 1, 2, 3, or 51, 52, or one 100-level course in Greek (recommended)
   e. it is recommended that students take a course in ancient history.

7. Latin with a Philosophy and Literature Focus: Students should declare the Latin field of study on Axess, and meet with the undergraduate director concerning the Philosophy and Literature focus, and to discuss options for pursuing a period of study in the Mediterranean region. See http://philit.stanford.edu/programs.html. Courses counted for the degree must be taken for a letter grade. Students must complete at least 65 units of approved courses including:
   a. CLASSGEN 175 or CLASSGEN 176, Majors Seminar (WIM)
   b. at least three courses with the prefix CLASSART, CLASSGEN, or CLASSHIS (also IHUM 39 A,B or IHUM 69A). Courses listed in the department’s cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student’s academic file prior to the end of the term in which the course is taken.
   c. 31 units in Latin courses at the 100 level or higher
   d. Writing in the Major (WIM) in the Philosophy Department (PHIL 80)
   e. one course in each of the following areas:
      1. aesthetics, ethics, and social and political philosophy (PHIL 170 series)
      2. philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
      3. history of philosophy (above 100 level)
   f. PHIL 81. Philosophy and Literature
   g. two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.

8. Greek and Latin: This field of study is declared on Axess. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:
   a. CLASSGEN 175 or CLASSGEN 176, Majors Seminar (WIM)
   b. 30 units in Greek courses and the same number in Latin. It is recommended that students take either or both CLASSGRK or CLASSLAT 175A, although these courses should not be taken until students have completed three years of the respective language.
   c. It is recommended that students take a course in ancient history.

Note 1: University credit earned by placement tests or advanced placement work in secondary school is not counted towards any major program in the department; work done in other universities or colleges is subject to department evaluation.

HONORS PROGRAM

A minimum grade point average (GPA) of 3.6 in Classics courses is required for students to enroll in the honors program. To be considered for honors in Classics, the student must select a professor who can supervise his or her honors thesis. A preliminary proposal, approved by the supervisor, is due April 15 of the junior year, and a final version is due at the beginning of the senior year. The proposal must outline the project in detail, list relevant courses that have been taken, and name the supervisor. The department gives approval only if a suitable faculty supervisor is available and if it is satisfied that the student has a sufficient basis of knowledge derived from department course work in the general areas the thesis covers, such as art, Greek, Latin, history, literature, or philosophy. If the proposal is approved, the student may sign up for CLASSGEN 199, Undergraduate Thesis: Senior Research, during the senior year for a maximum of 6 units per term, up to an overall total of 10 units. Honors are awarded only if the essay receives a grade of ‘B+’ or higher from the supervisor and a second reader.

STUDY ABROAD

Funding—Undergraduates whose record in Classics indicates that they are qualified may apply for funding from the Department of Classics. Students must submit a proposal to the undergraduate director as part of the Undergraduate Summer Research Grant Application; see the undergraduate page at http://classics.stanford.edu for the application. The proposal should include an itemized list of expenses based on the fees charged by the program, including room, board, tuition, and other expenses. Limited funding is available each year; preference is shown to students with strong records.

Programs—

1. Rome: Classics majors are encouraged to apply for the Intercollegiate Center for Classical Studies in Rome, which is managed by Duke University for about 50 constituent colleges and universities (http://studyabroad.duke.edu/home/Programs/Semester/ICCS_Rome). It is open to Stanford majors in Classics, History, and Art History. All courses receive full credit at Stanford and may be applied to the respective major. Students interested in this program should consult the undergraduate director and the ICCS representative in the Department of Classics as early as possible in their career at Stanford to plan their course preparation and application. Competition is strong, and
MINOR IN CLASSICS

The undergraduate director meets with each student who opts for a minor to discuss curriculum choices and assigns the student an adviser in the relevant field. Students are required to work closely with their advisers to create a cohesive curriculum within each area. Courses offered in Greek and Latin above the 100 level may count toward the minor, provided the subject matter is suitable. Students who minor in Classics are required to take CLASSGEN 176, Majors Seminar, which is writing intensive. Students may choose among four minors in Classics:

1. **Classical Languages**: students are required to take a minimum of five courses in Greek or in Latin. Courses listed in the department’s cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student’s academic file prior to the end of the term in which the course is taken. In addition to the five required courses, students must take CLASSGEN 175 or CLASSGEN 176, Majors Seminar. Students wishing to combine Greek and Latin may only do so if courses for one of the two languages are all above the 100 level; for example, CLASSGRK 1, 10, plus CLASSLAT 103, 111, 175.

2. **History**: students are required to take a minimum of five courses in history, art history, and archaeology. Courses listed in the department’s cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student’s academic file prior to the end of the term in which the course is taken. In addition to the five required courses, students must take CLASSGEN 175 or CLASSGEN 176, Majors Seminar. Courses offered in Latin and Greek that focus on historical topics or authors may count toward the minor.

3. **Literature and Philosophy**: students are required to take a minimum of five courses in classical literature or philosophy, including classical science. Courses listed in the department’s cognate course list may be substituted for one or more of the courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student’s academic file prior to the end of the term in which the course is taken. In addition to the five required courses, students must take CLASSGEN 175 or CLASSGEN 176, Majors Seminar. Courses offered in Latin and Greek that focus on philosophical or literary topics or authors may count toward the minor.

4. **Classical Studies**: students are required to take a minimum of five courses in Classics (CLASSART, CLASSGEN, CLASSGRK, CLASSHIS, CLASSLAT) plus the majors seminar (CLASSGEN 175 or CLASSGEN 176).

MASTER OF ARTS IN CLASSICS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

I and II. Language and Literature, and Philosophy Fields of Study—Students who have completed an undergraduate major in Classics (Greek, Latin, or Greek and Latin fields of study) or equivalent may be accepted as candidates for the M.A. degree in Classics and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students with an undergraduate major in Classics (Ancient History or Classical Studies fields of study) or without an undergraduate major in Classics may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing at least 25 units of graduate courses and 20 additional units of work at the 100 level or higher.

2. Completion of one Greek course at the 100 level (if the undergraduate major field of study was Latin) or one Latin course at the 100 level (if the undergraduate major field of study was Greek). This requirement is waived for students with an undergraduate major in Classics (Greek and Latin field of study).

3. Passing an examination testing the candidate’s ability to translate into English from a selected list of Greek and/or Latin authors.

4. Completion of the 275A,B sequence in at least one language (Latin or Greek).

5. Writing a thesis, or passing of an examination on a particular author or topic, or having written work accepted by the graduate committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.

6. A reading examination in French or German; these examinations are administered every quarter.

7. Completion and approval of a Program Proposal for a Master’s Degree form before the end of the first quarter of enrollment.

Candidates for the Ph.D. degree may also, on the recommendation of the department, become candidates for the M.A. degree. In this case, requirement 5 above is waived provided that the student has completed some work beyond the course requirements listed under requirements 1 and 2 above.

III. Classical Archaeology—Students who have completed an undergraduate major in Classics with a Classical Archaeology field of study, or in a closely related field, may be accepted as candidates for the M.A. degree in Classics with a Classical Archaeology field of study, and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students without an undergraduate major in Classics with a Classical Archaeology field of study may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing at least 25 units of graduate courses and 20 additional units of work at the 100 level or higher.

2. Completion with a grade of ‘B’ or higher of at least 15 units of graduate-level courses in classical archaeology, not including CLASSART 302.

3. Passing an examination designed to test the candidate’s ability to translate into English from either ancient Greek or Latin.

4. Completion with a grade of ‘B’ or higher of CLASSART 302, Classical Archaeology: Experiences of the Discipline, or an equivalent course on the history of thought in classical arc-
5. Writing a thesis, or passing an exam on a particular topic, or having written work accepted by the graduate committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.

6. Passing a reading examination in French, German, or Italian. These examinations are administered every quarter.

7. Completion and approval of a Program Proposal for a Master’s Degree form before the end of the first quarter of enrollment. Candidates for the Ph.D. degree may also, on the recommendation of the department, become candidates for the M.A. degree. In their case, requirement 5 above is waived provided that the student has completed some work beyond the course requirements listed under requirements 1 and 2 above.

IV. Ancient History—Students who have completed an undergraduate major in Classics with a Classical Archaeology field of study, or in a closely related field may be accepted as candidates for the M.A. degree in Classics with an Ancient History field of study, and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students without an undergraduate major in Classics with a Classical Archaeology field of study may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing 30 units of graduate courses and 15 additional units of work at the 100 level or higher.
2. Satisfactory completion of 20 units of graduate-level courses in Classics and of 10 units of graduate-level courses in other programs.
3. Satisfactory completion of 15 additional units of courses in either ancient Greek or Latin.
4. Writing a thesis, or passing an exam on a particular topic, or having written work accepted by the Graduate Committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.

DOCTOR OF PHILOSOPHY IN CLASSICS

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin. There are four specializations within the Classics Ph.D. program: language and literature; classical archaeology; ancient history; and ancient philosophy.

1. Language and Literature—Candidates for the Ph.D. degree in Classics with specialization in language and literature must fulfill the following requirements:

   a. Greek and Latin survey sequence (CLASSGEN 207-208)
   b. Greek and Latin syntax sequence (CLASSGRK 275A,B and CLASSLAT 275A,B)
   c. semantics of grammar sequence (CLASSGEN 205A,B)
   d. twelve graduate seminars, nine of which must be Classics seminars, and one of the remaining three of which must be outside the department. The other two seminars may be in Classics, from other departments (with the graduate director’s approval), and/or directed readings. However, no more than two directed readings can be taken. Classics seminars are generally offered for 4-5 units. In some cases, instructors allow a student to complete a seminar for 4 units without requiring a written paper but with completion of all other requirements.

2. Examinations:

   a. Students must take Greek and Latin translation exams at the end of each survey sequence (the end of the first and second years). These exams are based on the Greek and Latin reading lists available on the Classics Department web site at: http://www.stanford.edu/dept/classics. Greek and Latin survey courses cover less than half of the material on which the translation exams test, and students need to prepare much of the work on their own. It is possible to take both exams in the same year if the student chooses. However, students are obligated to take the exam in the language which the survey has covered that year. The exam consists of a choice of six of eight passages, and students are allowed three hours. A grade of ‘B’- or higher, on every passage, is required to pass. If a student does not attain a ‘B’-, the exam must be retaken later in the summer before registering for the Autumn Quarter, in order to complete the program. In order to retake an exam during Summer Quarter, a student must be registered at Stanford at his or her own expense; the department does not cover tuition in these instances. The exam can only be retaken once.

   b. Students must pass modern language translation exams in both German and French, Italian or modern Greek may be substituted in place of French, with consent of the graduate director. Students arrange with the student services officer to take the exam. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.

   c. At the beginning of Autumn Quarter of the third year, students take general examinations in four of the following fields: Greek literature, Latin literature, ancient philosophy, Greek history, and Roman history. Students select the fields in consultation with the graduate director no later than June of the second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent); students need to confer with the professor overseeing the exam. General examinations must be taken by October of the third year.

   d. the University oral examination, which is a defense of the candidate’s dissertation

3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.

4. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second
and third years of study. Summer teaching does not satisfy this requirement.

5. A typical program for a graduate student in Classics is as follows. First year: CLASSLAT 275A,B (6 units), CLASSGRK 275A,B (6 units), CLASSGEN 205A,B, Semantics (3 units), either CLASSGEN 207A-C or 208A-C, Literature Survey (offered alternate years; 15 units), and three elective seminars (12-15 units). Second year: either CLASSGEN 207A-C or 208A-C, Literature Survey (offered alternate years; 15 units), five to nine elective seminars (20-45 units), and one to three teaching assistantships (9-27 units). Third year: three to eight elective seminars (12-40 units), one to three teaching assistantships (9-27 units). Fourth year: three quarters of predoctoral dissertation research assistantship (30 units).

II. Classical Archaeology—Candidates for the Ph.D. degree in Classics with a specialization in classical archaeology must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor’s degree at the end of the candidate’s fourth year.

   These must include:
   a. at least three graduate (200) level courses in Latin and/or Greek literature
   b. History of Classical Archaeology (CLASSART 201), to be taken as early as possible in the candidate’s Stanford career
   c. the interdepartmental graduate core sequence in archaeology. The Archaeology Center announces the courses which fulfill this requirement. The core sequence currently comprises a seminar in archaeology theory and a course on archaeological methods.
   d. at least one further course outside the Classics department
   e. at least five graduate seminars in classical archaeology
   f. at least three graduate seminars in ancient history
   g. Students may petition to count independent study courses in place of up to two required courses, but no more.
   h. Students who enter the program with only one ancient language at the level needed for graduate study are strongly encouraged to take additional course work to reach graduate (200 and above) level in another language.
   i. Students are urged to enroll in or audit other undergraduate courses that may fill gaps in their undergraduate training.
   j. All students are expected to take part in archaeological fieldwork in the classical world areas.
   k. At least three consecutive quarters of course work must be taken at Stanford.

2. Examinations:
   a. As soon as students arrive, they must take a diagnostic exam in either Greek or Latin. Depending on performance, students may be required to enroll in undergraduate language classes in that language to improve their skills to the level required for graduate work.
   b. reading examinations in two of the following languages: French, German, Italian, and modern Greek. Candidates may petition to substitute a different modern language for one of these, if their area of specialization requires it. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.
   c. a translation examination from Latin or Greek into English. This examination must be taken either at the end of the first year or at the end of the second year. A grade of ‘B-’ or higher on every passage is required to pass. If a student does not attain a ‘B-,’ the exam must be retaken later in the summer before registering for Autumn Quarter, in order to continue in the program. In order to retake an exam during Summer Quarter, a student must be registered at Stanford at his or her own expense; the department does not cover tuition in these instances. The exam can only be retaken once.
   d. general examinations in Greek archaeology and Roman archaeology, and two of the following fields: Greek literature, Latin literature, ancient philosophy, Greek history, Roman history. Candidates select the fields in consultation with the graduate director no later than the first week of Spring Quarter of the second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent). General examinations must be taken by October of the third year.
   e. the University oral examination, which is a defense of the candidate’s dissertation

3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.

4. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

III. Ancient History—Candidates for the Ph.D. degree in Classics with specialization in ancient history must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor’s degree at the end of the fourth year. This includes:
   a. in the Autumn Quarter of the first year, Approaches to History (HISTORY 304), offered in the History department
   b. two proseminars. These introduce students to primary sources of evidence for ancient history that require special training: papyrology, epigraphy, paleography, numismatics, and archaeology. The department should offer one each year, but students may also fulfill this requirement by doing a directed reading, or (with the approval of the ancient history track adviser) by taking a course at another university with which Stanford has an exchange agreement.
   c. three skills courses relevant to the individual student’s chosen research approach. For example, a student could take classes in economics, demography, legal history, or anthropology. The skills courses can also be used to learn other ancient or modern languages, either by course work or directed reading. Students need to consult with their advisers and the graduate director.
   d. 10 graduate seminars: These normally have course numbers in the 200s, 300s, or 400s. Most of these are taken in the department, but students may also take seminars outside the department or at another university with which Stanford has an exchange agreement. Approval from the ancient history adviser and the graduate director must be obtained prior to exercising this option. While only two of the ten seminars can be replaced by directed readings, up to three additional seminars may be taken outside the department. This leaves five ancient history seminars that must be chosen from those in the department. Other Clas-
p,ics graduate seminars may be substituted for these ancient history seminars, with approval of the ancient history track adviser.

e. The range and sequence of other courses to be taken depend on which of the following two options the student selects within the Ancient History track.

1. **Option 1:** Students focus more on one language. This requires students to take: the three quarter survey course in either Greek or Latin (CLASSGEN 207A,B,C or CLASSGEN 208 A,B,C); the fifteen-week syntax course in the same language (CLASSGRK 275A,B or CLASSLAT 275A,B); one quarter of the survey course sequence in the other language; and the two quarter Semantics of Grammar sequence (CLASSGEN 205A,B).

2. **Option 2:** Students emphasize broader linguistic skills. This requires students to take the three quarter survey sequence in both Greek and Latin (CLASSGEN 207A,B,C and 208A,B,C).

2. **Examinations:**
   
a. As soon as students arrive, they take diagnostic exams in two areas of ancient history. Choices are: Egyptian, Greek, and Roman history. The test is mainly on narrative history, especially important names, dates, and events. Depending on performance, students may be asked to sit in on the undergraduate history courses and take directed reading or a graduate survey if offered. Reading lists are available upon request.

b. Students must take the final offered at the end of each quarter of Greek or Latin survey (for Option 1 above) or both Greek and Latin surveys (for Option 2 above). Students must earn a 'B-' or higher on each final to pass.

c. Students must pass modern language translation exams in both German and French; Italian or modern Greek may be substituted in place of French with consent of the graduate director. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.

d. Students must pass general exams in two areas in history (Egyptian, Greek, or Roman) and two of the following fields: Greek literature, Latin literature, Greek archaeology, Roman archaeology, or ancient philosophy. Students select the fields in consultation with the graduate director no later than June of their second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent). General examinations must be taken by October of the third year. In preparing for the general examinations, candidates are expected to make full use of relevant secondary material in modern languages. They should therefore plan to satisfy the requirements in French and German as soon as possible, preferably before the translation examinations.

e. the University oral examination which is a defense of the candidate’s dissertation.

3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.

4. Candidates are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

**IV. Joint Program in Ancient Philosophy**—This specialization is jointly administered by the departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers or classicists.

Graduate students admitted by the Classics department receive their Ph.D. from the Classics department. This specialization includes training in ancient and modern philosophy. Each student in the program is advised by a committee consisting of one professor from each department.

Candidates for the Ph.D. degree in Classics with specialization in ancient philosophy must fulfill the following requirements:

1. **Complete 135 units of academic credit or equivalent in study beyond the bachelor’s degree at the end of the fourth year.** This includes:
   
a. all the requirements listed for the language and literature specialization in the graduate program in Classics (see “I” above).
   
b. three courses in the Philosophy department (including 100/200 and two courses at the 200 level or higher). These include:
      
      1. one course in logic which can be fulfilled at the 100 level or higher
      2. one course in aesthetics, ethics, or political philosophy
      3. one course in metaphysics, epistemology, philosophy of mind, or philosophy of science
   
c. at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Philosophy department
   
d. all courses taken in the Philosophy department count for seminar credit (i.e., as contributing to the 12 seminar requirement in the Language and Literature track in the Classics department).

2. **Examinations:** The requirements are the same as those listed in the language and literature specialization, except that one of the four areas of general examination must be taken in ancient philosophy.

3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.

4. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second
and third years of study. Summer teaching does not satisfy this requirement.

PH.D IN CLASSICS IN HUMANITIES

For a description of this program see the "Interdisciplinary Studies in Humanities" section of this bulletin.

CLASSICS AND A MINOR FIELD

The Ph.D. in Classics may be combined with a minor in another field, such as anthropology, history, humanities, or classical linguistics. Requirements for the minor field vary, but might be expected to involve about six graduate-level courses in the field and one written examination, plus a portion of the University oral exam (dissertation defense). Such a program is expected to take five years. The department encourages such programs for especially able and well prepared students. See the department Graduate Handbook for more information. The following timetable would be typical for a five-year program:

First Year: course work, almost entirely in Classics. One translation exam taken in June. One or both modern language exams taken.

Second Year: course work, both in Classics and the minor field. Second translation exam completed. French and German exams completed.

Third Year: course work, both in Classics and the minor field. General examinations in Classics.

Fourth Year: remaining course work, both in Classics and the minor field. General examination in the minor field. Preparation for dissertation.

Fifth Year: dissertation, University oral examination.

PH.D. MINOR IN CLASSICS

For a graduate minor, the department recommends at least 20 units in Latin or Greek at the 100 level or above, and at least one course at the graduate (200) level.

OVERSEAS STUDIES COURSES IN CLASSICS

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

FLORENCE

OSPFLOR 26. Greeks and Etruscans in the Archaeology of Ancient Italy. 3-5 units, Giovanna Ceserani, GER:DB:Hum

OSPFLOR 27. Ancients and Moderns in the Making of the Italian Nation. 3-5 units, Giovanna Ceserani, GER:DB:Hum

WINTER QUARTER

FLORENCE

OSPFLOR 81. Roman Literature: A Critical Introduction. 5 units, Alessandro Barchiesi

OSPFLOR 82. Classical Antiquity in Italy. 5 units, Alessandro Barchiesi, GER:DB:Hum

COMMUNICATION

Emeriti: (Professors) Henry S. Breitrose, Donald F. Roberts; (Professor, Teaching) Marion Lewenstein

Chair: James S. Fishkin

Director, Institute for Communication Research: James S. Fishkin

Director, John S. Knight Fellowships for Professional Journalists: James R. Betterger

Director, Media Studies: Byron Reeves

Director, Undergraduate Studies: Fred Turner

Deputy Director, John S. Knight Fellowships for Professional Journalists: Dawn E. Garcia

Acting Director, Journalism: Ann Grimes

Professors: James S. Fishkin, Theodore L. Glasser (on leave Spring), Shanto Iyengar, Jon Krosnick, Clifford Nass, Byron B. Reeves

Assistant Professors: Jeremy Bailenson (on leave), Fred Turner

Courtesu Professors: Jan Krawitz, Walter W. Powell, Kristine M. Samuelson

Visiting Lorvry I. Lokey Professorships in Professional Journalism: Ann Grimes, Glenn Frankel

Visiting Hearst Professional in Residence: Joel Brinkley

Lecturers: Thomas Hayden, Azi Lev-On, Gary Pomerantz, Howard Rheingold, James Wheaton

Department Offices: McClatchy Hall, Building 120, Room 110

Mail Code: 94305-2050

Phone: (650) 723-1941

Web Site: http://communication.stanford.edu

Courses offered by the Department of Communication are listed under the subject code COMM on the Stanford Bulletin’s ExploreCourses web site.

Stanford’s Department of Communication focuses on media in all its forms. We study the processes and effects of mass communication: the nature and social role of the various media, their structure, function, and ethics, and their impact on the political system and on society. In this context, we consider not only traditional mass media (newspapers, magazines, radio, television, film), but also information technology, online media, virtual reality and the Internet. Students are trained as social scientists who can study the media, and as potential practitioners in the use of the media (in journalism, mass communications and digital media). The department combines theory and practice and fosters individual research opportunities for its students, employing both quantitative and qualitative approaches.

The Department of Communication engages in research in communication and offers curricula leading to the B.A., M.A., and Ph.D. degrees. The M.A. degree prepares students for a career in journalism. The department also offers current Stanford University undergraduates a coterminal program with an M.A. emphasis in Media Studies. The Ph.D. degree leads to careers in university teaching and research-related specialties.

The Institute for Communication Research offers research experience primarily to advanced Ph.D. students.

The John S. Knight Fellowships Program brings outstanding journalists to the University to study and do research for an academic year. While here, they focus on issues, challenges and opportunities of journalism innovation, entrepreneurship and leadership. The John S. and James L. Knight Foundation sponsors twelve U.S. journalists. They are joined by eight International Fellows sponsored by the Lyle and Corrine Nelson International Fellowship Fund, the Knight Foundation, Yahoo! Inc., the Shinyoung Journalism Fund and others.

ADMISSION

Prospective Undergraduates—Applications are available online at http://admission.stanford.edu

Prospective Coterminal Students—Applications are available at http://registrar.stanford.edu/shared/publications.htm#Coterm.
BACHELOR OF ARTS IN COMMUNICATION

PREPARATION

Before declaring the major, students must have completed or be concurrently enrolled in one of the following:

COMM 1A or COMM 1B
COMM 106
COMM 108

Students interested in declaring the major should apply via Axess and meet with the student services administrator in Building 120, Room 110A, during scheduled office hours. Students are required to take at least 60 units (approximately 12 courses), not counting statistics, to complete the major.

PROGRAM OF STUDY

The undergraduate curriculum is intended for liberal arts students who wish to develop an understanding of communication in society, drawing on the perspective of the social sciences. Undergraduates majoring in Communication are expected to become acquainted with the fundamental concerns, theoretical approaches and methods of the field, and to acquire advanced knowledge in one or more of the sub-areas of communication: institutions, processes, and effects.

While the department does not attempt to provide comprehensive practical training at the undergraduate level, the curriculum provides a diverse range of internship opportunities including professional print journalism, some of which are funded by the department’s Rebele Internship Program.

The department is committed to providing students with analytical and critical skills for future success in graduate programs, professional schools, or immediate career entry.

The major is structured to provide several levels of study: a core curriculum, intended to expose students to a broad-based understanding of communication theory and research, and a number of intermediate-level options and electives. Majors also have the opportunity to do advanced research in the form of senior projects and honors theses.

All undergraduate majors are required to complete a set of core communication courses which include COMM 1A, Media Technologies, People, and Society (5 units) or COMM 1B, Media, Culture, and Society (5 units); COMM 106, Communication Research Methods (5 units); COMM 108, Media Processes and Effects (5 units), and COMM 120, Digital Media in Society (WIM, 5 units). Core courses are usually given only once each year.

The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 or PSYCH 10) prior to registration in COMM 106, Communication Research Methods, in preparation for courses in methodology and advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The statistics course does not count toward the 60 units to complete the Communication major.

In addition to the core courses and the statistics requirement, undergraduate majors select courses from the areas described below. Many of the courses require core courses as prerequisites. Majors select a total of four area courses, taking at least one from each area.

Area I: Communication Processes and Effects—Area I emphasizes the ways in which communication scholars conduct research in, and consider the issues of, human communication. These studies aim to provide expert guidance for social policy makers and media professionals and include the following courses: COMM 160, 162, 166, 168, 169, 172, 326.

Area II: Communication Systems/Institutions—Area II considers the roles and interaction of institutions such as broadcasting, journalism, constitutional law, and business within communication and mass communication contexts and includes the following courses: COMM 104, 116, 117, 120, 125, 131, 136, 140, 147, 182.

Options—The Communication curriculum is designed to provide a theoretical base that can be effectively applied to numerous environments. The potential options listed below are not required, but are examples of how to focus interests.

1. Communication Technologies—
   a. Department of Communication (COMM):
      COMM 120. Digital Media in Society
      COMM 166. Virtual People
      COMM 169. Computers and Interfaces: Psychology and Design
      COMM 172. Media Psychology
   b. Affiliated department offerings (elective credit toward the major):
      CS 105. Introduction to Computers
      CS 106A. Programming Methodology
      CS 147. Introduction to HCI
      CS 201. Computers, Ethics, and Social Responsibility
      STS 101. Science, Technology, & Contemporary Society

2. Communication and Public Affairs—
   a. Department of Communication (COMM)
      COMM 125. Perspectives on American Journalism
      COMM 136. Democracy and the Communication of Consent
      COMM 160. The Press and the Political Process
      COMM 162. Analysis of Political Campaigns
   b. Affiliated department offerings (elective credit toward the major):
      POLISCI 123. Politics and Public Policy
      PSYCH 75. Cultural Psychology
      PSYCH 167. Seminar on Aggression
      PSYCH 180. Social Psychology Perspectives on Stereotyping and Prejudice
      PUBLPOL 104. Economic Policy Analysis
      PUBLPOL 194. Technology Policy

3. Media Practices and Performance—
   a. Department of Communication (COMM)
      COMM 120. Digital Media in Society
      COMM 125. Perspectives on American Journalism
      COMM 131. Media Ethics and Responsibility
      COMM 160. The Press and the Political Process
   b. Affiliated department offerings (elective credit toward the major)
      AFRICAST 148. Media, Art & Social Changes in Africa
      The remainder of the 60 required units may be fulfilled with any elective Communication courses or cross listed courses in other departments.

To be recommended for the B.A. degree in Communication, the student must complete at least 60 units (approximately 12 courses) in the department. No more than 10 units of course work outside of the department, transfer credit, or Summer Session credit may be applied to meet department requirements. Communication majors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/N/C), and must maintain a grade point average (GPA) of 2.0 (C) in courses towards the major. Only courses with a grade of C- or above count towards the major.
HONORS PROGRAM

The honors program provides undergraduates the opportunity to undertake a significant program of research in an individual professor/student mentoring relationship. The aim is to guide students through the process of research, analysis, drafting, rethinking, and redrafting, which is essential to excellence in scholarship. Working one-on-one with a faculty adviser, seniors earn 15 Communication units, culminating in an honors thesis. In order to be eligible for the honors program, interested majors must have: (1) successfully completed both a research methods and statistics course, (2) selected an adviser, and (3) submitted an application to the department by the end of their junior year. An application may be picked up outside Room 110, Building 120.

Students are expected to make steady progress on their honors thesis throughout the year. Students who fail to submit a satisfactorily drafted Autumn Quarter will be dropped from the program. A final copy of the honors thesis must be read and approved by the adviser and submitted to the department by the eighth week of Spring Quarter (exact date to be arranged). It becomes part of a permanent record held by the department. Honors work may be used to fulfill communication elective credit but must be completed and a letter grade submitted prior to graduation. A student failing to fulfill all honors requirements may still receive independent study credit for work completed, which may be applied toward fulfilling major requirements.

The designation "with honors" is awarded by the Department of Communication to those graduating seniors who, in addition to having completed all requirements for the Communication major: 1. complete an honors thesis 2. maintain a distinguished GPA in all Communication course work 3. are recommended by the Communication faculty.

MINOR IN COMMUNICATION

PREPARATION

Before declaring the minor, students must have completed or be concurrently enrolled in one of the following: COMM 1A or COMM 1B COMM 106 COMM 108

Students interested in declaring the minor should do so no later than Spring Quarter of their junior year by applying via Axess and meeting with the student services administrator in Building 120, Room 110A, during scheduled office hours.

PROGRAM OF STUDY

The minor is structured to provide a foundation for advanced course work in communication through a broad-based understanding of communication theory and research. Students are required to take 35 units (approximately 7 courses), not counting statistics, to complete the minor. The curriculum consists of three introductory communication core courses that include COMM 1A (formerly COMM 1), Media Technologies, People, and Society (5 units), or COMM 1B, Media, Culture, and Society (5 units); COMM 106, Communication Research Methods (5 units); and COMM 108, Media Processes and Effects (5 units). The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 or PSYCH 10) prior to registration in COMM 106, Communication Research Methods, in preparation for courses in methodology and advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The statistics course does not count toward the 35 units to complete the Communication minor.

The remainder of the 35 required units may be fulfilled with any intermediate-level elective Communication courses or crosslisted courses in other departments. No more than 5 units of course work outside of the department, transfer credit, or Summer Session credit may be applied to meet department requirements.

Communication minors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/NC), and must maintain a grade point average (GPA) of 2.0 (C) in courses towards the minor. Only courses with a grade of C- or above count towards the minor. Some courses are not given every year. Refer to the Time Schedule for details. Core courses are usually offered only once annually:

Prerequisite—introductory statistics course (for example, PSYCH 10)

Core Courses—COMM 1A or 1B, 106, 108

Area I: Communication Processes and Effects—a minimum of one course from COMM 160, 162, 166, 168, 169, 172

Area II: Communication Systems/Institutions—a minimum of one course from COMM 104, 116, 117, 120, 125, 131, 136, 140, 147, 182

Elective courses—totaling 10 units.

GRADUATE PROGRAMS IN COMMUNICATION

THE INSTITUTE FOR COMMUNICATION RESEARCH

The Institute is an office of project research for the faculty of the Department of Communication and operates under grants to faculty from government, industry, and non-profit organizations. Research assistantships are often available to qualified Ph.D. students in Communication.

MEDIA STUDIES COTERMINAL MASTER’S PROGRAM

The Department of Communication offers current Stanford University undergraduates a coterminal program with an M.A. emphasis in Media Studies specializing in either social sciences or journalism. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

Admission—Applications for coterminal study must be submitted at least four quarters in advance of the expected master’s degree conferral date. Applicants must have earned a minimum of 120 units toward graduation (UTG) as shown on the undergraduate unofficial transcript. This includes allowable advanced placement (AP) and transfer credit. Applications must be submitted no later than November 18, 2009 for admission beginning in either Winter or Spring Quarter 2009-10 or Autumn Quarter 2010-11. Journalism track students may begin the program only in Spring Quarter of their senior year. Requirements include: Application for Admission to Coterminal Master’s Program form, preliminary program proposal, statement of purpose, three letters of recommendation from Stanford professors, a written statement from a Communication professor agreeing to act as a graduate adviser (social sciences track only) and a current unofficial Stanford transcript. GRE scores are not required. Coterminal applications are submitted directly to the department. Review procedures and the Graduate Admissions Committee determine criteria.

Requirements—The Media Studies coterminal master’s program provides a broad introduction to scholarly literature in mass communication and offers a social sciences or journalism track. This one-year program is designed for current Stanford University undergraduates. Journalism track students may begin the program only in Spring Quarter of their senior year during which time one elective course is taken towards the master’s program and any remaining requirements for the undergraduate degree are completed. In the following academic year journalism track students follow the same curriculum as students in the Graduate Program in Journalism (see Master of Arts-Journalism section), less one elective course. Social Science track students need to satisfy the following four basic requirements:

1. Required Units and GPA: students must complete a minimum of 45 units in Communication and related areas, including items 2 and 3 below. Courses must be taken for a letter grade if offered. Courses in related areas outside the department must
be approved by the student’s adviser. A minimum of 36 units must be in the Communication department. No more than two courses (not including the statistics prerequisite) may be below the 200 level. To remain in good academic standing students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.

2. **Core Requirements:** students must complete COMM 206, 208, and a statistics course. Typically, the statistics requirement is met with STATS 160. Other courses occasionally are approved as a substitute before the student is admitted to the program. The statistics course does not count toward the 45 units.

3. **Six Media Studies Courses:** students must complete a minimum of six additional Communication courses from the following list concerned with the study of media. Not all the listed courses are offered every year, and the list may be updated from one year to the next. In addition to the core requirements and a minimum of six courses listed below, students may choose additional courses from the list and any related course approved by the student’s adviser.

   - COMM 211. Media Technologies, People, and Society
   - COMM 216. Journalism Law
   - COMM 217. Digital Journalism
   - COMM 220. Digital Media in Society
   - COMM 222. Perspectives on American Journalism
   - COMM 231. Media Ethics and Responsibility
   - COMM 236. Democracy and the Communication of Consent
   - COMM 238. Democratic Theory
   - COMM 240. Digital Media Entrepreneurship
   - COMM 260. The Press and the Political Process
   - COMM 262. Analysis of Political Campaigns
   - COMM 266. Virtual People
   - COMM 268. Experimental Research in Advanced User Interfaces
   - COMM 269. Computers and Interfaces: Psychology and Design
   - COMM 272. Media Psychology
   - COMM 277. Specialized Writing and Reporting
   - COMM 326. Human Virtual Representation

1. **The Media Studies M.A. Project:** students following the social sciences track enroll in COMM 290 to complete a project over two consecutive quarters that must be pre-approved and supervised by the adviser. The completed M.A. project must be submitted to the adviser no later than the last day of classes of the second consecutive quarter.

   Additional courses are chosen in consultation with an academic adviser.

**MASTER OF ARTS IN COMMUNICATION**

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The department awards a terminal M.A. degree in Communication with a field of study in Journalism. Applicants for this program, and for doctoral work, are evaluated for admission on different criteria. Work to fulfill graduate degree requirements must be in courses numbered 100 or above.

Stanford students who are completing an M.A. degree and who desire entry into the Ph.D. program must file a Graduate Program Authorization Petition application that may be downloaded at [http://registrar.stanford.edu/shared/publications.htm#GradStud](http://registrar.stanford.edu/shared/publications.htm#GradStud). Such students are considered alongside all other doctoral applicants.

**JOURNALISM**

Stanford’s graduate program in Journalism focuses on the knowledge and skills required to report, analyze, and write authoritatively about public issues and digital media. The curriculum combines a sequence of specialized reporting and writing courses with seminars and courses devoted to deepening the students’ understanding of the roles and responsibilities of American news media in their coverage of public issues.

The program emphasizes preparation for the practice of journalism and a critical perspective from which to understand it. The program’s objective is twofold: (1) to graduate talented reporters and writers to foster public understanding of the significance and consequences of public issues and the debates they engender; and (2) to graduate thoughtful journalists to respond openly and eloquently when called on to explain and defend the methods of their reporting and the quality of their writing.

**CURRICULUM**

The curriculum includes several required courses, examples of which are shown below, and a master’s project:

- COMM 216. Journalism Law
- COMM 217. Digital Journalism
- COMM 225. Perspectives on American Journalism
- COMM 240. Digital Media Entrepreneurship
- COMM 273, 274. Public Issues Reporting I,II
- COMM 275. Multimedia Storytelling
- COMM 289. Journalism M.A. Project
- COMM 291. Graduate Journalism Seminar

Additionally, students are usually required to take two specialized writing courses, chosen from a list of six or seven, and two approved electives from among graduate-level courses in the Department of Communication, or from among courses on campus that deal substantively with issues of public importance. The M.A. degree in Communication (Journalism) requires a minimum of 46 units.

Except for the Graduate Journalism Seminar and the Journalism Project, all courses must be taken for a letter grade. To remain in good academic standing, students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.

**JOURNALISM PROJECT**

The Journalism master’s project, a requirement for graduation, is intended as an opportunity for students to showcase their talents as writers and reporters. It is also an opportunity to undertake an in-depth critique of an area of journalism in which the author has a special interest. Work on the project usually begins during Winter Quarter and continues through Spring Quarter. Completed master’s projects must be submitted to the project adviser no later than the last day of classes in the Spring Quarter. The project represents a major commitment of time, research, and writing. Although it is not a requirement that the project be published, it must be judged by a member of the faculty to be of a quality acceptable for publication. At a minimum, the project should demonstrate the rigor and discipline required of good scholarship and good journalism; it should offer ample evidence of students’ ability to gather, analyze, and synthesize information in a manner that goes beyond what ordinarily appears in daily news media.

**DOCTOR OF PHILOSOPHY IN COMMUNICATION**

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin. The minimum number of academic units required for the Ph.D. at Stanford is 135, up to 45 of which can be transferred either from a master’s degree at the University or from another accredited institution.

The department offers a Ph.D. in Communication Theory and Research. First-year students are required to complete introductory courses in communication theory and research, research methods, and statistics. These core courses, grounded in the social science literature, emphasize how people respond to media and how media institutions function. In addition, Ph.D. students must complete a minimum of three literature survey courses and related advanced seminars in Communication. Students also take significant course work outside the department in their area of interest. Each student builds a research specialty relating communication to current faculty interests in such areas as ethics, human-computer interactions, information processing, information technology, law, online communities, politics and voting, virtual reality, and youth and...
media. Regardless of the area of specialization, the Ph.D. program is designed primarily for students interested in university research and teaching or other research or analyst positions.

The Ph.D. program encompasses four years of graduate study (subsequent to completion of the B.A. degree) during which, in addition to fulfilling University residency requirements, Ph.D. candidates are required to:

1. Complete all departmental course requirements with grades of ‘B+’ or above. Currently these courses include COMM 206, 208, 311, 314, 317, and 318. Students are also required to take STATS 160 and two advanced methods courses.
2. Pass the general qualifying examinations by the end of the second academic year of study and pass a specialized area examination by the end of the third academic year of study.
3. Demonstrate proficiency in tools required in the area of research specialization. Identified with the advice of the faculty, such tools may include detailed theoretical knowledge, advanced statistical methods, a foreign language, computer programming, or other technical skills.
4. Complete at least two pre-dissertation research projects (the Major Project and the Complementary Project).
5. Teach or assist in teaching at least two courses, preferably two different courses, at least one of which is ideally a core undergraduate course (COMM 1A, 1B, 106, and 108).
6. Complete a dissertation proposal and proposal meeting approved by the dissertation committee.
7. Apply for candidacy by the end of the second year of graduate study.
8. Complete a dissertation satisfactory to a reading committee of three or more faculty members in the Department of Communication and one faculty member outside of the Department of Communication.
9. Pass the University oral examination, which is a defense of the dissertation.

Because the multifaceted nature of the department makes it possible for the Ph.D. student to specialize in areas that draw on different related disciplines, the plan of study is individualized and developed between the faculty adviser and the student. Ph.D. candidacy is valid for five years.

Other requirements and details of the requirements can be found in the document, Official Rules and Procedures for the Ph.D. in the Department of Communication, available from the student services administrator of the department.

PH.D. MINOR IN COMMUNICATION

Candidates for the Ph.D. degree in other departments who elect a minor in Communication are required to complete a minimum of 20 units of graduate courses in the Department of Communication, including a total of three theory or research methods courses, and are examined by a representative of the department. A department adviser in consultation with the individual student determines the particular communication theory and methods courses.

OVERSEAS STUDIES COURSES IN COMMUNICATION

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

Web Site: http://complit.stanford.edu

Courses offered by the Department of Comparative Literature are listed under the subject code COMPLIT on the Stanford Bulletin’s ExploreCourses web site. The Department of Comparative Literature offers courses in the history and theory of literature through comparative approaches. The department accepts candidates for the degrees of Bachelor of Arts and Doctor of Philosophy.

The field of Comparative Literature provides students the opportunity to study imaginative literature in all its forms. While other literary disciplines focus on works of literature as parts of specific national or linguistic traditions, Comparative Literature draws on literature from all contexts in order to examine the nature of literary phenomena from around the globe and from different historical moments, while exploring how literary writing interacts with other elements of culture and society. The field studies literary expression through examinations of genres such as novels, epics, drama, and poetry, and new aesthetic forms such as cinema and electronic media. Although Comparative Literature does not restrict its focus to single traditions or periods, it does investigate the complex interplay of the literary imagination and historical experience. Attention is also paid to questions of literary theory, aesthetic philosophy, and cultural interpretation.

Along with the traditional model of comparative literature that juxtaposes two or more national literary cultures, the department supports teaching and research that examine literary phenomena
with additional tools of inquiry such as literary theory, the relationship between literature and philosophy, and the enrichment of literary study with other disciplinary methodologies. Comparative Literature also encourages the study of aspects of literature that surpass national boundaries, such as transnational literary movements or the dissemination of particular genres. In each case, students emerge from the program with enhanced verbal and writing skills, a command of literary studies, the ability to read analytically and critically, and a more global knowledge of literature.

**UNDERGRADUATE PROGRAMS IN COMPARATIVE LITERATURE**

The department’s undergraduate programs are designed to enhance students’ appreciation of literature in all its diversity, particularly through introductory courses that include treatments of the primary literary genres. The course of study at intermediate and advanced levels is flexible in order to accommodate student interest in areas such as specific geographical regions, historical periods, and interdisciplinary connections between literature and other fields such as philosophy, music, the visual arts, and the social sciences. A Comparative Literature major prepares a student to become a better reader and interpreter of literature, through enhanced examination of texts and the development of a critical vocabulary to discuss them. Attention to verbal expression and interpretive argument serves students who plan to proceed into careers requiring strong language skills. In addition, the major in Comparative Literature provides preparation for students who intend to pursue an advanced degree as a gateway to an academic career.

The major in Comparative Literature requires students to enroll in a set of core courses offered by the department, to complete electives in the department, and to enroll in additional literature courses, or other courses approved by the adviser, offered by other departments. This flexibility to combine literature courses from several departments and to address literature from multiple traditions is the hallmark of the Comparative Literature major. Students may count courses which read literature in translation; however, students, and especially those planning to pursue graduate study in Comparative Literature, are encouraged to develop a command of non-native languages.

Declaring the Major—Students declare the major in Comparative Literature through Axess. Students should meet with the Director of Undergraduate Studies to discuss appropriate courses and options within the major, and to plan the course of study. Majors are also urged to attend department events such as public talks and conferences.

Advising—Students majoring in Comparative Literature should consult with the Director of Undergraduate Studies at least once a year. The director monitors progress to completion of the degree. Students are also encouraged to develop relationships with other faculty members who may act as mentors.

Overseas Campuses and Abroad Programs—The Department of Comparative Literature encourages time abroad, both for increased proficiency in language and the opportunity for advanced course work. Course work done at campuses other than Stanford is counted toward the major at the discretion of the Director of Undergraduate Studies and is contingent upon the Office of the University Registrar’s approval of transfer credit. To that end, students abroad are advised to save syllabi, notes, papers, and correspondence.

Honors College—The Department of Comparative Literature encourages honors students to enroll in the honors college scheduled during the weeks preceding the beginning of every academic year. Applications to the college are available from the department administrator. The honors college is coordinated by the Division of Literatures, Cultures, and Languages (DLCL).

**BACHELOR OF ARTS IN COMPARATIVE LITERATURE**

**REQUIREMENTS**

All majors in Comparative Literature (including honors) are required to complete the following courses:

1. **REQUIREMENTS**

   **Majors** must complete at least 40 units of electives. Three of these electives must be Comparative Literature courses. The remaining courses may be drawn from Comparative Literature offerings, from other literature departments, or from other fields of interdisciplinary relevance to the student’s interest. Up to 10 units of HUM or SLE courses may be counted towards the elective requirement. Electives are subject to adviser consultation and approval.

   Examples of possible Comparative Literature electives include:

   - COMPLIT 61Q. Culture and Conflict in Contemporary Europe
   - COMPLIT 125A. The Gothic Novel
   - COMPLIT 127A. Short Stories from the Arab World
   - COMPLIT 151. Theories of Poetic Life
   - COMPLIT 211. Albert Camus and Jean-Paul Sartre: French Existentialism in the Post-World War II Period
   - COMPLIT 223. Courtly Love in Classical Persian Poetry
   - COMPLIT 242A. China and the World: Aesthetics, Ethics and Literature
   - COMPLIT 246A. Literature and Film of Modern Iran
   - COMPLIT 248A. CSI Vienna: American Culture in Austria since 1980

   **Total unit load:** Students must complete course work for a total of at least 65 units.

**PHILOSOPHICAL AND LITERARY THOUGHT**

Undergraduates may major in Comparative Literature with a special track in interdisciplinary studies at the intersection of literature and philosophy. Students in this option take courses alongside students from other departments that also have specialized options associated with the program for the study of Philosophical and Literary Thought. Each student in this option is assigned an adviser in Comparative Literature, and student schedules and course of study must be approved in writing by the adviser, the Director of Undergraduate Studies of Comparative Literature, and the Director of Undergraduate Studies of the program. See http://philit.stanford.edu.

A total of 65 units must be completed for this option, including the following requirements:
1. Five courses using materials in the original language and making up an intellectually coherent program in the literature of a language other than the student’s native tongue. Bilingual students may satisfy this requirement in either of their original languages or in a third language. The coherence of this program must be approved in writing by the Director of Undergraduate Studies of Comparative Literature.

2. Philosophy and Literature Gateway Course (4 units): COMPLIT 181 (same as PHIL 81, CLASSGEN 81, ENGLISH 81, FRENGEN 181 and ITALGEN 181). This course should be taken as early as possible in the student’s career, normally in the sophomore year.

3. Philosophy Writing in the Major (5 units): PHIL 80. Prerequisite: completion of the philosophy class.

4. Aesthetics, Ethics, Political Philosophy (ca. 4 units): one course from the PHIL 170 series.

5. Language, Mind, Metaphysics, and Epistemology (ca. 4 units): one course from the PHIL 180 series.

6. History of Philosophy (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.

7. Related Courses (ca. 8 units): two upper division courses relevant to the study of philosophy and literature as identified by the committee in charge of the program. A list of approved courses is available from the undergraduate adviser of the program in philosophical and literary thought.

8. One course typically in translation, in a literature distant from that of the student’s concentration and offering an outside perspective on that literary tradition.

9. Capstone Seminar (ca. 4 units): in addition to COMPLIT 199, students take a capstone seminar of relevance to philosophy and literature approved by the undergraduate adviser of the program in philosophical and literary thought. The student’s choice of a capstone seminar must be approved in writing by the Director of Undergraduate Studies of Comparative Literature and by the Director of Undergraduate Studies of the program. For a list of current capstone courses, see http://philit.stanford.edu/programs/capstone.html.

10. Seminar Paper Requirement: students must write at least one seminar paper that is interdisciplinary in nature. This paper brings together material from courses taken in philosophy and literature, and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). Though it may draw on previous course work, the paper must be an original composition, 18-20 pages in length. It must be submitted to the Director of Undergraduate Studies and receive approval no later than the end of Winter Quarter in the fourth year of study.

   At least two of the courses counted toward requirements 1, 2, 7, 8, and 9 must be taught by Comparative Literature faculty. Transfer units may not normally be used to satisfy requirements 2, 3, 4, 5, 6 and 9. Units devoted to acquiring language proficiency are not counted toward the 65-unit requirement.

HONORS PROGRAM

The honors option offers motivated Comparative Literature majors the opportunity to write a senior honors paper. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Director of Undergraduate Studies and submit a thesis proposal (2-5 pages), an outline of planned course work for the senior year, and proof of a 3.5 GPA or higher within the student’s Comparative Literature course work to date. During this quarter, the student may enroll for 2 units of credit for independent research in COMPLIT 189B to prepare this statement and undertake initial planning for the honors paper. The proposal is reviewed by the honors committee, including the Director of Undergraduate Studies and the chair of the department.

The Director of Undergraduate Studies designates a faculty tutor appropriate to the topic and a second reader for approved honors papers.

Students in the honors program enroll in DLCL 189 (5 units) in Autumn Quarter of the senior year to refine the project description and begin research in preparation for composing the honors paper. During Winter Quarter of the senior year, the student enrolls in COMPLIT 189A (5 units), independent study with the faculty tutor, to draft the honors paper.

At the end of the quarter, the student submits a completed draft to the tutor. If approved, two copies are forwarded to the honors committee, which ultimately awards honors. If revisions are advised, the student has until the fifth week of Spring Quarter to submit the final paper. Students who did not enroll in a 189B course in the junior year may enroll in COMPLIT 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis adviser. 10-12 units of course work associated with the honors paper (DLCL 189 and COMPLIT 189A and 189B) may be counted toward the 65 units required for the major.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Typically, however, honors papers are 40-70 pages.

Honors Awards—The two readers of any honors thesis in Comparative Literature may elect to nominate the thesis in question for University-wide awards. In addition, the department honors committee evaluates on a competitive basis the honors theses completed in a given year and nominates one for University-wide awards competitions.

MINORS IN COMPARATIVE LITERATURE

The undergraduate minor in Comparative Literature represents an abbreviated version of the major. It is designed for students who are unable to pursue the major but who nonetheless seek an opportunity to gain a deeper understanding of literature. Plans for the minor should be discussed with the Director of Undergraduate Studies. The minimum number of units required for a minor at Stanford is 20. Requirements for the minor in Comparative Literature include:

   1. COMPLIT 101. What is Literature?
   2. One course from the genre core: COMPLIT 121, 122, or 123
   3. At least two other Comparative Literature courses.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs, the minor in Literature and the minor in Modern Languages. These minors draw on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about these minors and their requirements.

DOCTOR OF PHILOSOPHY IN COMPARATIVE LITERATURE

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The Ph.D. program is designed for students whose linguistic background, breadth of interest in literature, and curiosity about the problems of literary scholarship and theory (including the relation of literature to other disciplines) make this program more appropriate to their needs than the Ph.D. in one of the individual literatures. Students take courses in at least three literatures (one may be that of the native language), to be studied in the original. The program is designed to encourage familiarity with the major approaches to literary study prevailing today.

Before starting graduate work at Stanford, students should have completed an undergraduate program with a strong background in one literature and some work in a second literature studied in the original language. Since the program demands an advanced knowledge of two non-native languages and a reading knowledge of a third non-native language, students should at the time of application have an advanced enough knowledge of one of the three to
take graduate-level courses in that language when they enter the program. They should be making enough progress in the study of a second language to enable them to take graduate courses in that language not later than the beginning of the second year, and earlier if possible. Applicants are expected to take an intensive course in the third language before entrance.

Students are admitted under a fellowship plan which attempts to integrate financial support and completion of residence requirements with their training as prospective university teachers. Tenure as a fellow, assuming satisfactory academic progress, is for a maximum of four or five years. The minimum teaching requirement is the same regardless of financial support. (For specific teaching requirements, see below.) Five years of support are normally available for a combination of fellowships and teaching assistantships, to Ph.D. candidates admitted to the Comparative Literature Department who are making satisfactory progress toward the degree.

APPLICATION PROCEDURES

Competition for entrance into the program is keen. The program is kept small so that students have as much opportunity as possible to work closely with faculty throughout the period of study. Completed applications are due December 4. Because of the special nature of comparative literature studies, the statement of purpose included in the application for admission should contain the following information besides the general plan for graduate work called for on the application:

1. A detailed description of the applicant’s present degree of proficiency in each of the languages studied, indicating the languages in which the applicant is prepared to do graduate work at present and outlining plans to meet additional language requirements of the program.

2. A description of the applicant’s area of interest (for instance, theoretical problems, genres, periods) within literary study and the reasons for finding comparative literature more suitable to his or her needs than the study of a single literature. Applicants should also indicate what they think will be their primary field, including the literatures on which they intend to concentrate.

3. All applicants should arrange to have the results of the general section of the Graduate Record Examination sent to the Department of Comparative Literature.

4. Recommendations should, if possible, come from faculty in at least two of the literatures in which the student proposes to work.

5. Applicants must submit a copy of an undergraduate term paper which they consider representative of their best work.

DEGREE REQUIREMENTS

Residence—A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. The student must take 135 units of graduate work, in addition to the doctoral dissertation. At least three consecutive quarters of course work must be taken at Stanford.

Languages—Students must know three non-native languages, two of them sufficiently to qualify for graduate courses in these languages and the third sufficiently to demonstrate the ability to read a major author in this language. Only the third language may be certified by examination. The other two are certified by graduate-level course work specified below. Language preparation must be sufficient to support graduate-level course work in at least one language during the first year and in the second language during the second year. Students must demonstrate a reading knowledge of the third non-native language no later than the beginning of the third year.

Literatures made up of works written in the same language (such as Spanish and Latin American) are counted as one. One of the student’s three literatures usually is designated as the primary field, the other two as secondary fields, although some students may offer two literatures at the primary level (six or more graduate courses).

Teaching—Fellows, whatever their sources of financial support, are ordinarily required to undertake a total of five quarters of supervised apprenticeships and teaching at half time. Fellows must complete whatever pedagogy courses are required by the departments in which they teach. The department’s minimum teaching requirement is a total of three quarters.

Minimum Course Requirements—Students are advised that the range and depth of preparation necessary to support quality work on the dissertation, as well as demands in the present professional marketplace for coverage of both traditional and interdisciplinary areas of knowledge, render these requirements as bare minimums. The following are required:

1. COMPLIT 369
2. COMPLIT 396L
3. A sufficient number of courses (six or more) in the student’s primary field to assure knowledge of the basic works in one national literature from its beginnings until the present.

4. At least two additional complementary courses, with most of the reading in the original, in each of two different national literatures. Students whose primary field is a non-native language are required to take two courses in one additional literature not their own.

Minimum course requirements must be completed before the student is scheduled to take the University oral examination. These requirements are kept to a minimum so that students have sufficient opportunity to seek out new areas of interest. A course is an offering of 3-5 units. Independent study may take the place of up to two of the required courses, but no more; classroom work with faculty and other students is central to the program.

Examinations—Three examinations are required. The first two are one-hour exams, taken at the end of the first and second year of study. The first of these is on literary genre, designed to demonstrate the student’s knowledge of a substantial number of literary works in a single genre, ranged over several centuries and over at least three national literatures. This exam is also designed to demonstrate the student’s grasp of the theoretical problems involved in his or her choice of genre and in the matter of genre in general. The second of these examinations is on literary theory and criticism, designed to demonstrate the student’s knowledge of a particular problem in the history of literary theory and criticism, or the student’s ability to develop a particular theoretical position. In either case, this exam should demonstrate wide reading in theoretical and critical texts from a variety of periods. The third and last is the University oral examination.

1. First One-Hour Examination: The genre exam is administered toward the close of the Spring Quarter of the student’s first year. All first-year students take the exam during the same period, with an examination committee established by the department. Exam lists should be approved by the Director of Graduate Studies well in advance of the exam. Students are urged to focus on poetry, drama, or the novel or narrative, combining core recommendations from the department with selections from their individual areas of concentration. Any student who does not pass the exam in Spring Quarter will have the opportunity to retake the exam the following Autumn Quarter. Students who do not pass the exam a second time may merit department action or review.

2. Second One-Hour Examination: The theory exam is administered toward the close of the Spring Quarter of the student’s second year. All second-year students take the exam during the same period, with an examination committee established by the department. Exam lists should be approved by the Director of Graduate Studies well in advance of the exam. Any student who does not pass the exam may merit department action or review.

3. University Oral Examination: Students are urged to complete this exam by the end of their third year. The oral exam is individually scheduled, with a committee established by the student in consultation with the Director of Graduate Studies. The exam covers a literary period, to consist of in-depth knowledge
of a period of approximately a century in three or more literatures with primary emphasis on a single national literature or, in occasional cases, two national literatures. The reading list covers chiefly the major literary texts of this period but may also include some studies of intellectual backgrounds and modern critical discussions of the period. Students must demonstrate a grasp of how to discuss and define this period as well as the concept of periods in general. This examination is not to be on the dissertation topic, on a single genre, or on current criticism, but rather on a multiplicity of texts from the period. Students whose course work combines an ancient with a modern literature have the option of dividing the period sections into two wholly separate periods.

Qualifying Procedures—The department meets at the end of each year to review student progress. Performance on the first one-hour examination, together with class performance and general progress, are taken into consideration. Students are admitted to candidacy upon completion of the first one-hour examination and departmental review. As soon as the student has completed the qualifying procedures, the chair recommends the student for admission to candidacy for the Ph.D. At this time, the student is also recommended for the Master of Arts degree in Comparative Literature if 45 units of work at Stanford have been completed and the student has not already completed an M.A. before entering the program.

Colloquium—The colloquium normally takes place in the quarter following the University oral examination. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student lasting no more than five minutes, and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation adviser during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double spaced pages, in addition to which it should include a prospectus by the student lasting no more than five minutes, and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

It is the student’s responsibility to schedule the colloquium no later than the first half of the quarter after that quarter in which the student passed the University Oral Examination. The student should arrange the date and time in consultation with the department administrator and with the three examiners. The department administrator schedules an appropriate room for the colloquium.

Members of the dissertation reading committee are ordinarily drawn from the University oral examination committee.

PH.D. IN COMPARATIVE LITERATURE AND HUMANITIES

The department participates in the Graduate Program in Humanities leading to a Ph.D. degree in Comparative Literature and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities. Although the Graduate Program in Humanities is not currently accepting new students, it continues to provide advising for students already enrolled as well as courses, open to all students. The University remains committed to a broad-based undergraduate education in the humanities, and a successor program is under discussion by the faculty of the Division of Literatures, Cultures, and Languages. For further information, please consult Gregory Freidin, the director of the program; the list of courses and events may be found on the program web site: http://ish.stanford.edu/programs/graduate.

PH.D. MINOR IN COMPARATIVE LITERATURE

This minor is designed for students working toward the Ph.D. in the various foreign language departments. Students working toward the Ph.D. in English are directed to the program in English and Comparative Literature described among the Department of English offerings. Students must have:

1. A knowledge of at least two foreign languages, one of them sufficient to qualify for graduate-level courses in that language, the second sufficient to read a major author in the original language.

2. A minimum of six graduate courses, of which three must be in the department of the second literature and three in the Department of Comparative Literature, the latter to include a seminar in literary theory or criticism. At least two of the three courses in comparative literature should originate in a department other than the one in which the student is completing the degree. Except for students in the Asian languages, students must choose a second literature outside the department of their major literature.

COMPARATIVE STUDIES IN RACE AND ETHNICITY (CSRE)

Director: Jeanne Tsai
Associate Director: Tania Mitchell
Curriculum Committee: Cheryl Brown, Gordon Chang, Michele Elam, Charlotte Fonrobert, Teresa LaFroboise, Tania Mitchell, Gary Segura, Vered Shearz
Affiliated Faculty and Teaching Staff: David Abernethy (Political Science, emeritus), Anthony Antonio (Education), Rick Banks (Law), Lucius Barker (Political Science, emeritus), Donald Barr (Sociology), Karen Biestman (Native American Studies), Albert Camarillo (History), James T. Campbell (History), Martin Carnoy (Education), Clayborne Carson (History), Prudence Carter (Education), Gordon Chang (History), Karen Cook (Sociology), Michele Dauber (Law), Linda Darling-Hammond (Education), Carolyn Duffy (Comparative Studies in Race and Ethnicity), Jennifer Eberhardt (Psychology), Paula Ebron (Anthropology), Penny Eckert (Linguistics), Harry Elam (Drama), Michele Elam (English), James Ferguson (Anthropology), Shelley Fisher Fishkin (English), James Fishkin (Communication), Charlotte Fonrobert (Religious Studies), Estelle Freedman (History), Gabriel Garcia (Medicine), Leah Gordon (Education), David Grusky (Sociology), Sean Hanretta (History), Georgina Hernandez (Comparative Studies in Race and Ethnicity), Allyson Hobbs (History), Miyako Inoue (Anthropology), Shanto Iyengar (Communication), Tomás Jiménez (Sociology), Gavin Jones (English), Terry Karl (Political Science), Pamela Karlan (Law), Matthew Kohrman (Anthropology), Jan Krawitz (Art and Art History), Jon Kronick (Communication), Teresa LaFroboise (Education), David Laitin (Political Science), Liisa Malkki (Anthropology), Sandra Lee (Asian American Studies), Luis Leon (Chicana/o Studies), Hazel Markus (Psychology), Barbaro Martinez-Ruiz (Art and Art History), Douglas McAdam (Sociology), Monica McDermott (Sociology), Tania Mitchell (Comparative Studies in Race and Ethnicity, Education), James Monroya (Comparative Studies in Race and Ethnicity), Cherrie Moraga (Drama), Paula Moya (English), Elisabeth Mubimbe-Boyti (French and Italian), Thomas S. Mullaney (History), Stephen Murphy-Shigematsu (Asian American Studies), Sharon Nelson-Barber (Native American Studies), Hilton Obenzinger (Undergraduate Advising and Research), Susan Olzak (Sociology), Amado Padilla (Education), David Palumbo-Liu (Comparative Literature), Arnold Rampersad (English), Robert Reich (Poli-
SCHOOL OF HUMANITIES AND SCIENCES

The Interdepartmental Program in Comparative Studies in Race and Ethnicity (CSRE) provides students the opportunity to structure their course work in a single ethnic studies area. Four majors and minors (Asian American Studies, Chicana/o Studies, Comparative Studies, and Native American Studies) are offered as part of the CSRE curriculum. All courses taken for the major must be taken for a letter grade. The directors of the programs and of each major constitute the CSRE curriculum committee, the policy making body for the interdisciplinary program.

Students who declare any of the four majors participate in a common curriculum of the CSRE consisting of at least two introductory core courses and a senior seminar. Individually designed majors in Jewish Studies may also enroll in the CSRE core curriculum. African and American Studies majors take one CSRE core course and the senior seminar.

There are two types of introductory courses taught by senior CSRE-affiliated faculty: core courses that are interdisciplinary and compare across racial and ethnic groups; and foundational courses that focus on a specific racial or ethnic group. The core requirements illustrate how different disciplines approach the study and interpretation of race and ethnicity and provide a foundation for the student’s program of study.

MINORS

Students who wish to minor in the study areas must complete six courses (a minimum of 30 units) from the approved course list, two of which must be core courses. Proposals for the minor must be approved by the director of each study area.

DIRECTED READING AND RESEARCH

Directed reading and research allows students to focus on a special topic of interest. In organizing a reading research plan, the student consults with the director of the major and one or more faculty members specializing in the area or discipline.

Courses that fulfill directed reading and research requirements.

SPECIAL PROGRAMS

CSRE-related majors have several unique opportunities available to them. The program supports full-time paid summer research internships for those who apply to complete a self-designed research project in collaboration with a community agency. The CSRE Public Policy Institute is a two week, pre-Autumn Quarter seminar that provides exposure to critical public policy issues. The residence-based institute provides room and board and all seminar materials for participants, including a visit to Sacramento to meet with policy makers. The CSRE program also sponsors quarterly luncheons and community programs for all majors and minors.

MURRAY HOUSE

Murray House, 566 Governor’s Avenue, is an undergraduate Residence for the CSRE Academic Theme House devoted to developing an intellectual community amongst students interested in the study of race and ethnicity. Programs, including an in-house seminar, are developed with the guidance of CSRE faculty to increase the understanding of issues of race and ethnicity amongst its residents through social events and discussions. Students may apply for pre-assignment to Murray House to participate in the CSRE Theme House. Contact Residential Education for more information.
HONORS
Majors in each of the study areas who meet academic qualifications (a grade point average of at least 3.5 in CSRE-related courses) may apply for honors. Majors are expected to participate in an Autumn Quarter junior workshop in preparation for honors thesis research. Prizes for best undergraduate honors theses are awarded annually by the CSRE curriculum committee.

Courses that fulfill honors requirements:
CSRE 199. Pre-Honors Seminar (1-2 units)
CSRE 200X. CSRE Senior Seminar (WIM; 5 units)
CSRE 200Y. CSRE Senior Honors Research (1-10 units)
CSRE 200Z. CSRE Senior Honors Research (1-10 units)

AFRICAN AND AFRICAN AMERICAN STUDIES (AAAS)
Director: Michele Elam
Since 1997-98, AAAS has been a CSRE-related major. For major and minor descriptions and requirements, see the “African and African American Studies” section of this bulletin.

ASIAN AMERICAN STUDIES
Director: Gordon Chang
Asian American Studies (AAS) provides an interdisciplinary approach to understanding the historical and current experiences of persons of Asian ancestry in the United States. In using the term “Asian American,” the AAS faculty recognize that the term seeks to name a rapidly developing, complex, and heterogeneous population and that there is neither a single Asian American identity nor one community that comprises all Asian Americans. Asian Americans include those with ancestral ties to countries or regions in East Asia, South Asia, Southeast Asia, or the Philippines, among others.

AAS brings together courses that address the artistic, historical, humanistic, political, and social dimensions of Asian Americans and is an appropriate course of study for students interested in a variety of concerns related to Asian Americans, including: artistic and cultural contributions; current social significance; historical experiences; immigration, intellectual, and policy issues; relationships with other social groups; and the construction of the notion of Asian American as it addresses important theoretical and practical issues.

BACHELOR OF ARTS IN ASIAN AMERICAN STUDIES
1. Core Curriculum
Asian American majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course that focuses on a non-Asian ethnic group may be counted toward the 15-unit core requirement.

2. Foundational Course
Majors are required to take one foundational course in Asian American Studies. This may be either HISTORY 59, Introduction to Asian American History, or COMPLIT 148, Introduction to Asian American Studies.

3. Area Study
Majors must complete an additional 40 units of course work from an approved list. One course must have an international dimension, preferably a focus on Asia. Five other courses must have an Asian American focus and must be selected from social science and humanities departments. Majors must take two courses offering a comparative perspective on race and ethnicity.

A total of 60 units of course work is required for the major.

4. Language Study (optional)
Students may obtain credit for their study of a related Asian language towards their degree. If students take 15 or more units of an Asian language relevant to Asian American Studies, they may apply 5 of those units toward their Asian American Studies degree.

5. Senior Paper or Honors Thesis
All CSRE-related majors complete a culminating research paper under the supervision of a faculty adviser.

ASIAN AMERICAN STUDIES MINOR
A total of 30 units of approved course work is required for the minor. Two CSRE core courses and at least one foundational course are needed to fulfill the requirements for the minor. Proposals must be approved by the director.

Students in Asian American Studies may find the following courses useful in fulfilling course requirements in the major or minor.

Core Courses—
ANTHRO 88. Theories of Race and Ethnicity (5 units)
CSRE 196C/ENGLISH 172D/PSYCH 155. Introduction to Race and Ethnicity (5 units)
CSRE 200X. CSRE Senior Seminar (WIM; 5 units)
EDUC 245. Understanding Racial and Ethnic Identity Development (3-5 units)
HISTORY 64. Introduction to Race and Ethnicity in 20th Century America (5 units)
HISTORY 255D. Racial Identity in the American Imagination (4-5 units)
PSYCH 75. Introduction to Cultural Psychology (5 units)
SOC 147A/247A. Comparative Ethnic Conflict (5 units)
SOC 148. Racial Identity (5 units)

Thematic Courses—
ASIANAMST 146S/CSRE 146S/COMPLIT 146. Asian American Culture and Community (5 units)
ASIANAMST 173S/CSRE 173S. Transcultural and Multiethnic Lives: Contexts, Controversies, and Challenges (5 units)
ASIANAMST 161/CSRE 161. Asian American Immigration and Health (3-5 units)

Cognate Courses—
COMPLIT 41Q. Ethnicity and Literature (3-5 units)
EDUC 193F. Psychological Well-Being on Campus: Asian American Perspectives (1 unit)
ENGLISH 261B. Bright Lights, Global Cities: Reading Transnational Asia/Pacific Spatial Geographies (5 units)
ENGLISH 362S. Phantoms That Follow: Trauma and Disillusionment in Asian American Literature (5 units)
HISTORY 265. Writing Asian American History (5 units)

MUSIC 17Q. Perspectives in North American Taiko (4 units)

CHICANA/O STUDIES
Director: Gary Segura
Chicana/o Studies is an interdisciplinary major focusing on the Mexican-origin population of the U.S., the second largest ethnic group in the nation. Students who major or minor in Chicana/o Studies have an opportunity to select from courses in the humanities, social sciences, and courses offered by affiliated faculty in the School of Education. Established in 1997, the Chicana/o Studies program affords students an opportunity to explore the culture, society, economy, and politics of this important and growing segment of our national population.

BACHELOR OF ARTS IN CHICANA/O STUDIES
1. Core Curriculum
Chicana/o Studies majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course that focuses on a non-Mexican origin group may be counted toward the 15-unit core requirement.

2. Foundational Courses
Majors are required to take one foundational course in Chicana/o Studies. This may be either CHICANST 180E, Introduction to Chicana/o Studies or SOC 166, Mexicans, Mexican Americans, and Chicanos in American Society.

3. Thematic Concentration
Chicana/o Studies majors select a thematic concentration which allows students to customize their curriculum and to synthesize course work taken across various departments into a coherent focus. Majors complete an additional 40 units of courses relevant to the thematic concentration and approved by the adviser. A total of 60 units of course work are required for the major. 

All CSRE-related majors complete a culminating research paper under the supervision of a faculty adviser.

**CHICANA/O STUDIES MINOR**

Students who wish to minor in Chicana/o Studies must complete one core introductory course and one foundational course, either CHICANST 180E or SOC 166. Minors will also select a thematic concentration and choose four additional courses relevant to that theme to customize their curriculum. A total of 30 units of approved course work is required for each minor.

Students in Chicana/o Studies may find the following courses useful in fulfilling course requirements in the major or minor.

**Core Courses—**

ANTHRO 88. Theories of Race and Ethnicity (5 units)

CSRE 196C/ENGLISH 172D/PSYCH 155. Introduction to Race and Ethnicity (5 units)

CSRE 200X. CSRE Senior Seminar (WIM; 5 units)

EDUC 245. Understanding Racial and Ethnic Identity Development (3-5 units)

HISTORY 64. Introduction to Race and Ethnicity in 20th Century America (5 units)

HISTORY 255D. Racial Identity in the American Imagination (4-5 units)

PSYCH 75. Introduction to Cultural Psychology (5 units)

SOC 147A/247A. Comparative Ethnic Conflict (5 units)

SOC 148. Racial Identity (5 units)

**Foundational Courses—**

CHICANST 180E/CSRE 180E. Introduction to Chicana/o Studies (5 units)

SOC 166. Mexicans, Mexican Americans, and Chicanos in American Society (5 units)

**Thematic Courses—**

CHICANST 160N/CSRE 160N/DRAMA 17N. Salt of the Earth (3-5 units)

CHICANST 189W/CSRE 189W. Language and Minority Rights (3-5 units)

CHICANST 197/CSRE 197/NATIVEAM 197/DRAMA 355. The Rite to Remember: Performance and Chicana Indigenous Thought (3-5 units)

CHICANST 201B/CSRE 201B. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post-Civil Rights Era (5 units)

**Cognate Courses—**

EDUC 149. Theory and Issues in the Study of Bilingualism (3-5 units)

EDUC 177. Education of Immigrant Students: Psychological Perspectives (4 units)

EDUC 178X. Latino Families, Languages, and Schools (3-5 units)

EDUC 193B. Peer Counseling in the Chicano/Latino Community (1 unit)

ENGLISH 45/145. Another Way to be: Writing by Women of Color (3-5 units)

ENGLISH 64N. Growing Up in America (3 units)

HISTORY 165. Mexican American History through Film (4-5 units)

ILAC 117N. Film, Nation, Latindad (3-4 units)

ILAC 389E. Race, Gender and Sexuality in Cultural Representations (3-5 units)

ILAC 380. Latina/o Literature (3-5 units)

POLISCI 125S. Chicano/Latino Politics (5 units)

POLISCI 327. Minority Behavior and Representation (5 units)

SOC 164. Immigration and the Changing United States (5 units)

SPANLIT 193. The Cinema of Pedro Almodóvar (3-5 units)

**COMPARATIVE STUDIES IN RACE AND ETHNICITY**

**Director:** Jeanne Tsai

Comparative Studies in Race and Ethnicity, the largest of the majors/minors offered in the program, does not focus on a particular ethnic group. Rather, a student in consultation with the adviser designs a curriculum in relation to a thematic concentration that compares various ethnic groups or explores topics that cut across group experiences in the United States and elsewhere in the world. For example, students may compare groups within the U.S., or compare groups in the U.S. to ethnic groups elsewhere, or study the diaspora of a single group or the sovereignty of indigenous peoples within and across different national contexts. Students in this major are able to take advantage of courses in over 22 fields offered by the affiliated faculty of CSRE.

**BACHELOR OF ARTS IN COMPARATIVE STUDIES IN RACE AND ETHNICITY**

1. Core Curriculum

All CSRE-related majors enroll in the 15-unit CSRE core curriculum, which consists of two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course may be counted toward the 15-unit core requirement.

2. Thematic Concentration

Comparative Studies majors complete another 45 units of course work relevant to the thematic concentration they have chosen in consultation with the adviser.

3. Senior Paper or Honors Thesis

All CSRE-related majors complete a culminating research paper under the supervision of a faculty adviser.

**COMPARATIVE STUDIES MINOR**

Students who wish to minor in Comparative Studies must complete six courses (a minimum of 30 units) from the approved course list. Two core courses (or one core and one foundational course) are needed to fulfill the minor requirements.

Students in Comparative Studies may find the following courses useful in fulfilling course requirements in the major or minor.

**Core Courses—**

ANTHRO 88. Theories of Race and Ethnicity (5 units)

CSRE 196C/ENGLISH 172D/PSYCH 155. Introduction to Race and Ethnicity (5 units)

CSRE 200X. CSRE Senior Seminar (WIM; 5 units)

EDUC 245. Understanding Racial and Ethnic Identity Development (3-5 units)

HISTORY 64. Introduction to Race and Ethnicity in 20th Century America (5 units)

HISTORY 255D. Racial Identity in the American Imagination (4-5 units)

**Foundational Courses—**

CHICANST 180E/CSRE 180E. Introduction to Chicana/o Studies (5 units)

SOC 166. Mexicans, Mexican Americans, and Chicanos in American Society (5 units)

**Thematic Courses—**

CHICANST 160N/CSRE 160N/DRAMA 17N. Salt of the Earth: Docudrama in Latin America (3-5 units)

CHICANST 189W/CSRE 189W. Language and Minority Rights (3-5 units)

CHICANST 197/CSRE 197/NATIVEAM 197/DRAMA 355. The Rite to Remember: Performance and Chicana Indigenous Thought (3-5 units)

CHICANST 201B/CSRE 201B. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post-Civil Rights Era (5 units)

**Cognate Courses—**

EDUC 149. Theory and Issues in the Study of Bilingualism (3-5 units)

EDUC 177. Education of Immigrant Students: Psychological Perspectives (4 units)

EDUC 178X. Latino Families, Languages, and Schools (3-5 units)

EDUC 193B. Peer Counseling in the Chicano/Latino Community (1 unit)

ENGLISH 45/145. Another Way to be: Writing by Women of Color (3-5 units)

ENGLISH 64N. Growing Up in America (3 units)

HISTORY 165. Mexican American History through Film (4-5 units)

ILAC 117N. Film, Nation, Latindad (3-4 units)

ILAC 389E. Race, Gender and Sexuality in Cultural Representations (3-5 units)

ILAC 380. Latina/o Literature (3-5 units)

POLISCI 125S. Chicano/Latino Politics (5 units)

POLISCI 327. Minority Behavior and Representation (5 units)

SOC 164. Immigration and the Changing United States (5 units)

SPANLIT 193. The Cinema of Pedro Almodóvar (3-5 units)
Thematic Courses—
CSRE 183/AMSTUD 183. Border Crossings and American Identities (5 units)
CSRE 145A. Poetics and Politics of Caribbean Women’s Literature (5 units)
CSRE 146. Community Matters: Research and Service with Community Organizations (2 units)
CSRE 146S. Asian American Culture and Community (5 units)
CSRE 173S/ASANMST 173S. Transcultural and Multiethnic Lives: Contexts, Controversies and Challenges (5 units)
CSRE 160N/CHICANST 160N/DRAMA 17N. Salt of the Earth: Docudrama in Latino America (3-5 units)
CSRE 177/DRAMA 177. Writing for Performance: The Fundamentals (5 units)
CSRE 189W/CHICANST 189W. Language and Minority Rights (3-5 units)
CSRE 197/CHICANST 197/NATIVEAM 197/DRAMA 255. The Rite to Remember: Performance and Chicana Indigenous Thought (3-5 units)
CSRE 198. Internship for Public Service (1-5 units)

to ensure a well-rounded educational experience. The area of concentration and related course work should be selected in consultation with a faculty adviser in Native American Studies. All courses in Native American Studies must be approved by a faculty adviser. Majors complete an additional 40 units of course work that satisfy three categories in their area of study: Native American focus, comparative focus, and a methodology/research course.

A total of 60 units of course work are required for the major.

TAUBE CENTER FOR JEWISH STUDIES

Directors: Charlotte Fonrobert, Vered Shemtov

Jewish Studies is an affiliated program of CSRE. For program and course descriptions, see the “Jewish Studies” section of this bulletin.

NATIVE AMERICAN STUDIES

Director: Teresa LaFromboise

Native American Studies provides an intensive approach to understanding the historical and contemporary experiences of Native American people. Attention is paid not only to the special relationship between tribes and the federal government, but to issues across national boundaries, including tribal nations within Canada, and North, Central, and South America. In using the term “Native American,” the NAS faculty recognize the heterogeneous nature of this population. Native Americans include the Alaska Native population, which comprises Aleuts, Eskimo, and other Native American people residing in Alaska, as well as Native Hawaiian communities.

The purpose of the Native American Studies major and minor is to introduce students to approaches in the academic study of Native American people, history, and culture. Students who major in Native American Studies have the opportunity of doing advanced work in related fields, including literature, sociology, education, and law. In addition to specialized course work on Native American issues, students also are expected to concentrate in a traditional discipline such as anthropology, history, or psychology to ensure a well-rounded educational experience. The area of concentration and related course work should be selected in consultation with a faculty adviser in Native American Studies. All courses in the program promote the discussion of how academic knowledge about Native Americans relates to the historical and contemporary experiences of Native American people and communities.

BACHELOR OF ARTS IN NATIVE AMERICAN STUDIES

1. Core Curriculum

Native American Studies majors must take the 15-unit CSRE core curriculum, including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course that focuses on a non-Native American group may be counted toward the 15-unit core requirement.

2. Foundational Courses

Majors are required to take one foundational course in Native American Studies. This may be either SOC 138, American Indians in Comparative Historical Perspective; SOC 139, American Indians in Contemporary Society; or ANTHRO 16, Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America.

3. Area Study

Majors complete an additional 40 units of course work that satisfy three categories in their area of study: Native American focus, comparative focus, and a methodology/research course.

A total of 60 units of course work are required for the major.

4. Senior Paper or Honors Thesis

All CSRE-related majors complete a culminating research paper under the supervision of a faculty adviser.

NATIVE AMERICAN STUDIES MINOR

Students who wish to minor in Native American Studies must complete two core courses and four additional courses relevant to the area of concentration selected by the student in consultation with a faculty adviser. A total of 30 units of approved course work is required for the minor.

Students in Native American Studies may find the following courses useful in fulfilling course requirements in the major or minor.

Core Courses—

ANTHRO 88. Theories of Race and Ethnicity (5 units)
CSRE 196C/ENGLISH 172D/PSYCH 155. Introduction to Race and Ethnicity (5 units)
CSRE 200X. CSRE Senior Seminar (WIM; 5 units)
EDUC 245. Understanding Racial and Ethnic Identity Development (3-5 units)
HISTORY 64. Introduction to Race and Ethnicity in 20th Century America (5 units)
HISTORY 255D. Racial Identity in the American Imagination (4-5 units)
PSYCH 75. Introduction to Cultural Psychology (5 units)
SOC 147A/247A. Comparative Ethnic Conflict (5 units)
SOC 148. Racial Identity (5 units)

Foundational courses—

SOC 138. American Indians in Comparative Historical Perspective (5 units)
SOC 139. American Indians in Contemporary Society (5 units)

Thematic courses—

NATIVEAM 109A/CSRE 109A. Federal Indian Law (5 units)
NATIVEAM 109B/CSRE 109B. Indian Country Economic Development (5 units)
NATIVEAM 116/CSRE 116. Language, Culture, and Education in Native North America (5 units)
NATIVEAM 117S/CSRE 117S. History of California Indians (5 units)
NATIVEAM 123/CSRE 123. American Indians and the Cinema (5 units)
NATIVEAM 197/CHICANST 197/CSRE 197/DRAMA 355M. The Rite to Remember: Performance and Chicana Indigenous Thought (3-5 units)

Cognate Courses—

EDUC 193N. Peer Counseling in the Native American Community (1 unit)
MUSIC 37N. Ki ho’alu: The New Renaissance of a Hawaiian Musical Tradition (3 units)
SOC 45Q. Understanding Race and Ethnicity in American Society (5 units)

THEMATIC CONCENTRATION IN THE INSTITUTE FOR DIVERSITY IN THE ARTS (IDA)

Students in any major in the Comparative Studies in Race and Ethnicity undergraduate program can choose a concentration in the Institute for Diversity in the Arts. The concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in IDA should contact the CSRE undergraduate program office.
A minimum of 60 units is required for the thematic concentration in IDA. Students take two of the CSRE core courses (10 units), one of which must focus on the arts; in addition, CSRE 200X is required of students in the IDA concentration and is taken in Autumn Quarter of the senior year (5 units, WIM). As a capstone experience, majors must write an honors thesis or senior paper.

IDA concentration students must also complete a senior project. Possible senior projects include a stage production, CD, or arts workshop curriculum in a community setting. Students who elect to write an honors thesis may incorporate their project as the basis for their thesis.

In addition to the core curriculum, students complete 45 units drawing from new and existing courses in departments and programs such as Art and Art History, Music, Drama, and Comparative Literature, African and African American Studies; Asian American Studies; Chicano/a Studies; Comparative Studies; and Native American Studies. Thematic courses may focus on performance, visual aesthetics, writing for performance, critical studies in art and performance, and critical arts theory.

Students may find the following courses useful in fulfilling requirements in the Institute for Diversity in the Arts (IDA) thematic concentration:

ARTHIST 160A. Twentieth Century African American Art (4 units)

ARTHIST 256A. Critical Race Art History (5 units)

CHICANST/CSRE 160N/DRAMA 17N. Salt of the Earth: Docudrama in Latino América (3-5 units)

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts (5 units)

COMPLIT 142/ ENGLISH 172E. Literature of the Americas (5 units)

CSRE 179G/DRAMA 179G. Indigenous Identity in Diaspora People of Color Art Practice in North America (5 units)

CSRE 177/DRAMA 177. Writing for Performance: The Fundamentals (5 units)

CSRE 197/CHICANST 197/NATIVEAM 197/DRAMA 355. The Rite to Remember: Performance and Chicana Indigenous Thought (3-5 units)

CSRE 201B/CHICANST 201B. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post Civil Rights Era (5 units)

**THEMATIC CONCENTRATION IN PUBLIC SERVICE**

The Public Service thematic concentration is open to students in any major in the Comparative Studies in Race and Ethnicity Undergraduate Program. The concentration allows a student to develop an area of study focused on community development, public service, and social change. Studying how issues of race and ethnicity impact and are impacted by community and social problems, this concentration is designed to ensure that students interested in service and community have access to a structured curriculum that provides a solid grounding in the theory and practice of community and civic engagement — providing the skills and experiences that enable students to become leaders and actors in the sphere of public life.

Students who wish to pursue a thematic concentration in public service must organize their studies to include 15 units, including two approved CSRE core courses and the CSRE 200X, Senior Seminar taken Autumn Quarter of the senior year. Public Service concentration students should also prepare to complete 25 units (at least 5 courses) relevant to the theme of public service. Three of these courses must include a service learning component (i.e., require the student to participate in service in the local community as a central component to the course).

Students who select a thematic concentration in public service must complete an internship as part of their program of study. This internship can be completed during the academic year for credit or during the summer, but must be at least 300 hours.

Finally, students who pursue the concentration in public service should select a topic for their senior paper or honors thesis that reflects their interest in community work (i.e., service or organizing) or a community issue or concern that is addressed through public service.

This concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in this thematic concentration should contact the CSRE Undergraduate Program Office for details about its requirements.

Students may find the following courses useful in fulfilling requirements for the Public Service thematic concentration:

- ASNAMST 146S/CSRE 146S/COMPLIT 146. Asian American Culture and Community (5 units)
- CHICANST/CSRE 201B. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post Civil Rights Era (5 units)
- CSRE 146. Community Matters: Research and Service with Community Organizations (2 units)
- CSRE 198. Internship for Public Service (1-5 units)
- CSRE 203A. The Changing Face of America: Civil Rights and Education Strategies for the 21st Century (5 units)
- DANCE 197. Art and Community: Dance in Prisons (4 units)
- EDUC 116X. Service Learning as an Approach to Teaching (3 units)
- EDUC 270A. Learning to Lead in Public Service Organizations (3-5 units)
- HISTORY 260. California’s Majority Minority Cities (5 units)
- HISTORY 251A. Poverty and Homelessness in America (5 units)
- POLISCI 133. The Ethics and Politics of Public Service (5 units)
- POLISCI 137R. Justice at Home and Abroad: Civil Rights in the 21st Century (5 units)
- SOC 118. Social Movements and Collective Action (5 units)
- SOC 135. Poverty, Inequality, and Social Policy in the United States (5 units)
- SOC 141. Controversies about Inequality (5 units)
- URBANST 112. The Urban Underclass (5 units)

**THEMATIC CONCENTRATION IN AMERICAN DIVERSITY**

The American Diversity concentration is designed for students who wish to explore how the United States was and is constituted with relation to issues of race and ethnicity. The concentration investigates how American domestic and foreign policy, law, history, culture, and society are formed within conversations, debates, policies and studies regarding race and ethnicity. Issues of immigration, citizenship, empire and expansion, defense, diplomacy, human rights, public welfare, social justice and law, educational rights and other topics are explored from the angle of how racial and ethnic difference impacts debate and policy.

The concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in the American Diversity thematic concentration should contact the CSRE undergraduate program office.

The American Diversity concentration requires 15 units including two approved CSRE core courses and CSRE 200X, Senior Seminar (WIM), taken Autumn Quarter of the senior year. One foundational course may be counted toward the 15 unit core requirement. In addition to the core curriculum, students complete 45 units of course work relevant to the thematic concentration.

Students may find the following courses useful in fulfilling requirements in the American Diversity thematic concentration:

- CSRE 201B/CHICANST 201B. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post Civil Rights Era (5 units)
- CSRE 203A. Changing Face of America: Strategies for Civil Rights and Education in the 21st Century (5 units)
- EDUC 177. Education of Immigrant Students: Psychological Perspectives (4 units)
- EDUC 201. History of Education in the U.S. (5 units)
- POLISCI 141. Global Politics of Human Rights (5 units)
THEMATIC CONCENTRATION IN RACE AND THE AMERICAN CITY

The Race and the American City concentration is designed for students who wish to develop methodologies, data, and theoretical and conceptual materials concerning how urban life, infrastructure, and policies are influenced by race and ethnicity. As virtual laboratories of social interaction, cities embody negotiations around resources, residences, financial distressing, economic flow, health and educational resources, environmental policies, and city planning. A primary goal is for students to learn how they might contribute to the social and political discourse on race and ethnicity in the U.S. Participation in a public service internship and/or Stanford in Washington is encouraged.

The concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in the Race and the American City concentration should contact the CSRE undergraduate program office.

The Race and the American City concentration requires 15 units including two approved CSRE core courses and CSRE 200X, Senior Seminar (WIM), taken Autumn Quarter of the senior year. One single-group core course may be counted toward the 15 unit core requirement. In addition to the core requirements, students must take an additional 45 units of course work relevant to the thematic concentration which may include courses such as:

- HISTORY 260. California’s Minority-Majority Cities (5 units)
- SOC 148. The Urban Underclass (5 units)

The concentration is not declared on Axess; it does not appear on the transcript or diploma.

Students are encouraged to declare a major in their sophomore year. Prospective majors in the first two years of study at Stanford are encouraged to take part in casting opportunities in department productions or independent undergraduate performing arts groups. All introductory courses are required with no exceptions. A course may be listed in more than one area; however, each course must count towards requirements in areas 2, 3, and 4. All introductory courses are required with no exceptions.

1. Introductory Core Courses—14 units
   - DRAMA 30. How Theater is Designed (4 units)
   - DRAMA 34. Stage Management Techniques (2 units)
   - DRAMA 101H. How Theater Thinks (4 units)
   - DRAMA 101P. How Practice Practices (4 units)
2. Theatrical Literature/History—14 units
Any course between DRAMA 150-169. The following courses are offered in 2009-2010:

- DRAMA 150T. Racial Erotics
- DRAMA 151T. Great Books
- DRAMA 153T. Irish Drama
- DRAMA 160. Performance, Dance, and History: The Ballerina
- DRAMA 161R. Texts in History
- DRAMA 164S. Introduction to Queer Theory
- DRAMA 165M. Musical Theater
- DRAMA 166H. Historiography of Theater

3. Theatrical Performance Courses: Acting, Directing, and Playwriting—8 units

Any course with the subject code DANCE

Acting courses between DRAMA 20-29, 120-129, 210. The following courses are offered in 2009-10:

- DRAMA 20. Acting for Non-Majors
- DRAMA 24. Shared Experience and the Experimental Actor
- DRAMA 26. Performing Bodies
- DRAMA 120A, B. Fundamentals of Acting
- DRAMA 120V. Vocal Production and Audition
- DRAMA 121S. Acting Shakespeare
- DRAMA 122. Contemporary Vernacular Dance in New Musical Theater
- DRAMA 122P. Undergraduate Acting Project: Our Country’s Good

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts (IDA)

Playwriting and Dramaturgy courses between DRAMA 70-79. The department is not offering any courses in the 70 series in 2009-10.

Directing, Playwriting and Dramaturgy courses between DRAMA 170-179. The following courses are offered in 2009-10:

- DRAMA 170A. Concepts of Directing
- DRAMA 170B. Advanced Directing
- DRAMA 177. Writing for Performance
- DRAMA 178. Playwriting

4. Theatrical Production—12 units

- DRAMA 134. Stage Management Project (4 units)
- DRAMA 39. Theater Crew (3 units)
- Design, Stage Management, and Production courses between DRAMA 31-38, 131-133, 135-139. The following courses are offered in 2009-2010:
  - DRAMA 31. Introduction to Lighting and Production
  - DRAMA 32F. History of Costume and Fashion
  - DRAMA 131. Lighting Design
  - DRAMA 132. Costume Design
  - DRAMA 133. Stage Scenery Design
  - DRAMA 137. Hand Drafting for Designers

5. Senior Project—2 units

- DRAMA 200. Senior Project

Work for this project normally begins in Spring Quarter of the junior year and is completed by the end of the senior year. The student has the option of writing an essay associated with the project. Students receive credit for senior projects through DRAMA 200 or DRAMA 205. Students pursuing senior projects should consult with both the undergraduate adviser and a faculty adviser in the project’s specialty area early in the junior year. Students must petition for approval of senior projects through the department’s undergraduate adviser. Projects are typically approved by department faculty at the end of Spring Quarter of the junior year or the end of Autumn Quarter of the senior year. The proposal should include an outline of the courses the student has taken and grades received in the area requirements, and should describe the courses in which the student plans to enroll as part of the project. It should describe in detail the purpose and methods involved in the project; a bibliography, if appropriate; and a 1-2 page abstract of the associated essay if an essay is part of the project.

6. Electives—10 units

Any courses with the subject code DRAMA or DANCE.

HONORS PROGRAM

For a limited number of students, the department confers the degree of Bachelor of Arts with Departmental Honors in Drama. To be considered for departmental honors, students must meet the following requirements in addition to the other requirements of the Drama major:

1. Application involves a written submission (including transcript) establishing the student’s work-to-date in the department and outlining the area of research that the student wishes to pursue. No students are admitted to the honors program with a grade below ‘B-’ in any course that constitutes part of their Drama major.

2. Students must complete the Drama core requirements by the end of their junior year, earlier if possible. Only in exceptional circumstances can this requirement be waived. Transfer from another university, extended overseas study, or temporary withdrawal from the major due to illness might constitute extenuating circumstances.

3. Students must have completed half of the courses in their specialization by the end of their junior year.

4. Students must complete 4 units in the honors colloquia (described below), beginning Spring Quarter of their junior year and continuing the following three regular quarters. Each quarter’s colloquium is offered for 1 unit, S/NC. In extenuating circumstances (overseas study, for example), an honors program student may substitute other equivalent work for one quarter of the colloquium, with the approval of the honors adviser.

5. GPA in courses counting towards the major must be 3.5 by the time of graduation.

6. By the end of the seventh week of the quarter in which they plan to graduate, students in the honors program must submit an honors thesis (described below), to be read and evaluated by their thesis committee.

7. On the basis of a student’s work in the Drama core, in the area of specialization, on the senior project, in the honors colloquia, and on the honors thesis, the faculty determines and confers honors on graduating students who have successfully completed the honors program.

8. Failure to meet any of these requirements, or to make satisfactory progress on the honors thesis, leads to dismissal from the honors program.

Honors Colloquia and Thesis—The honors colloquia aim to engage honors program students in important issues in the field focusing on the students’ areas of specialization and research. The honors program adviser convenes the colloquia three times per quarter and sets the agenda for meetings and discussion. Students discuss their work in the department and present and discuss their research for their honors thesis. Students must enroll in DRAMA 202, Honors Thesis.

The honors thesis typically consists of a long essay (40-60 pages) presenting the student’s research on an important issue or subject, determined by the student. The honors program adviser, the senior project adviser, and another faculty member constitute the student’s honors thesis committee. They read and evaluate the thesis, and make recommendations to the faculty at large regarding its strengths and weaknesses. Additionally, students have the option of using their own senior project as a case study. In these situations, the honors thesis will critically analyze the strengths and weaknesses of the creative work. Generally, these essays tend to be shorter (about 20-25 pages) because the creative work constitutes one-half of the honors project.

Honors in Humanities—An honors program in Humanities is available for Drama majors who wish to supplement their major with related, guided studies. See the “Interdisciplinary Studies in Humanities” section of this bulletin for a description of the honors program. Students who enroll in this program may take HUMN-TIES 160 and two seminars from 190-198 in fulfillment of the
departmental elective requirement.

MINOR IN DRAMA

The requirements for the Minor in Drama are designed to integrate the critical and historical study of drama with the study and experience of performance. A total of 30 units are required to obtain a Minor in Drama. The minor provides aesthetic and critical opportunities for students to develop special aptitudes. Students are encouraged to declare a minor in their sophomore year.

MINOR REQUIREMENTS

Required Courses—30 units total for the minor
A course may be listed in more than one area; however, each course can only satisfy one minor requirement. There is no double credit for a course. Additionally, you can petition to the department Undergraduate Advisor to have additional courses offered by the department count towards requirements in areas 2 and 3. All introductory courses are required with no exceptions.

Introductory Core Courses—14 units
DRAMA 30. How Theater is Designed (4 units)
DRAMA 34. Stage Management Techniques (2 units)
DRAMA 101H. How Theater Thinks (4 units)
DRAMA 101P. How Practice Practices (4 units)

1. Theatrical Literature/History—3 units
Any course between DRAMA 150-169. The following courses are offered in 2009-2010:
Drama 150T. Racial Erotics
Drama 151T. Great Books
Drama 153T. Irish Drama
Drama 160. Performance, Dance, and History: The Ballerina
Drama 161R. Texts in History
Drama 164S. Introduction to Queer Theory
Drama 165M. Musical Theater

2. Theatrical Performance Courses: Acting, Directing, and Playwriting—3 units
Any course with the subject code DANCE
Acting courses between DRAMA 20-29, 120-129, 210. The following courses are offered in 2009-2010:
Drama 20. Acting for Non-Majors
Drama 24. Shared Experience and the Experimental Actor
Drama 26. Performing Bodies
Drama 120A. Fundamentals of Acting
Drama 120B. Fundamentals of Acting
Drama 120V. Vocal Production and Audition
Drama 121S. Acting Shakespeare
Drama 122. Contemporary Vernacular Dance in New Musical Theater
Drama 122P. Undergraduate Acting Project: Our Country’s Good
Drama 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts (IDA)
Playwriting and Dramaturgy courses between DRAMA 70-79. The department is not offering any courses in the 70 series in 2009-10.
Directing, Playwriting and Dramaturgy courses between Drama 170-179. The following courses are offered in 2009-10:
Drama 170A. Concepts of Directing
Drama 170B. Advanced Directing
Drama 177. Writing for Performance
Drama 178. Playwriting

3. Theatrical Production—4 units
DRAMA 39. Theater Crew (4 units)

4. Electives—6 units
Any courses in Drama or Dance

GRADUATE PROGRAMS IN DRAMA

The mission of the graduate program in Drama is to produce students who work on the leading edge of both scholarly and performance practice. The Ph.D. program in Drama emphasizes the combination of theory and practice. Graduate students complete a program with a study of critical theory and textual history and an understanding that such theory is informed by practical elements in directing, acting, writing, and design.

DOCTOR OF PHILOSOPHY IN DRAMA

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. All graduate study in the Department of Drama leads to the Ph.D. degree. The doctoral program in Drama aims to integrate practical theater work with the critical and historical study of dramatic literature and theory. Candidates are expected to function both as scholars and as theater directors. The curriculum offers a two-year practical concentration in directing along with the study of critical and performance theory, aesthetics, history, and literature. The goal of the program is to give students a thorough knowledge of the field that leads to original and significant scholarly work grounded in practice as well as an inventive directorial practice that is based on solid scholarly analysis.

Admission—Applicants for the Ph.D. program can visit our web site at http://drama.stanford.edu or write directly to the Department of Drama, Attention: Graduate Admissions, for information. Online graduate applications are available at http://gradadmissions.stanford.edu. In addition to the required statement of purpose, applicants must submit a statement detailing their practical theater experience, a sample of their written critical work, and a statement on directing. An invitation to interview may be extended by the end of January. Graduate students in the Department of Drama begin study in Autumn Quarter of each academic year; there are no mid-year admissions. Graduate students must be degree candidates.

The Department of Drama awards a number of fellowships to students in the Ph.D. program.

DEGREE REQUIREMENTS

1. Units and Course Requirements—
   a. A minimum of 135 units of graduate courses and seminars in support of the degree. These units are in addition to units for the doctoral dissertation.
   b. Core seminars: 300A, 300B, 301, 302 or 303, and 304.
   c. Three additional graduate seminars within the Department of Drama to be worked out with the adviser.
   d. Four workshops in directing: DRAMA 370, 372, 373, 374. In the first two years, students take: 370, Concepts of Directing; 372, Projects in Directing; and 373, Directing and Dramaturgy. In the second year, students take 374, Graduate Directors’ Performance Project, to stage a more fully developed production chosen in consultation with the faculty.

   The following department requirements are in addition to the University’s basic requirements for the doctorate.

2. Language Requirement
3. Three Examinations
   a. Comprehensive
   b. Qualifying
   c. Department Oral
4. Dissertation Prospectus
5. Defense of Dissertation
6. Assistantships: Research (RA) and Teaching (TA)
7. Language Requirement—The candidate must demonstrate reading knowledge of one foreign language in which there is a major body of dramatic literature. The language requirement must be met before the student can be advanced to candidacy. The language requirement may be fulfilled in any of the following ways:
   a. achievement of a sufficiently high score (70th percentile) on the foreign language examination prepared by the Educational Testing Service (ETS). Latin and Greek are not tested by ETS.
   b. a reading examination given each quarter by the various language departments, except for Latin and Greek.
c. pass with a grade of ‘B’ or higher courses in Literature/History numbered 100 or higher in a foreign language department at Stanford.

8. Examinations—Candidates must complete three examinations (comprehensive, qualifying, and department oral) by the end of the first three years of study at Stanford.
   a. 1st Year Comprehensive. The comprehensive examination is taken over the first weekend in December of the first year. The exam is based on texts given to the student by the department before the start of the first year. Students study these texts independently. For the exam, they should be able to identify and compare plays and playwrights from the list of texts in terms of dramatic genres, styles, and periods. The exam should address comparatively and analytically critical issues of texts and performance.
   b. 2nd Year Qualifying. The qualifying examination, which must be completed before advancement to candidacy at the end of the second year, consists of two 25-35-page essays. Each of these essays should demonstrate a broad knowledge of two different historical periods (pre-20th century), with emphasis on particular dramatic texts and/or performance practices. Essay topics should be designed and written in consultation with a faculty adviser. The reading list for each period should be approved by the end of the first quarter. These essays should not duplicate any written work from seminars. After approval by the adviser, the Graduate Studies Committee reads and evaluates these essays. For the first qualifying examination, candidates must choose from the following historical periods:
      Classical
      Medieval and Renaissance
      17th, 18th, or early 19th century
   c. 3rd Year Department Oral. The department oral examination requires three faculty members, at least two from the Department of Drama, who will most likely form the dissertation committee (the dissertation director and two other faculty members). The prospectus must be approved by the candidate’s adviser and by the departmental Graduate Studies Committee two quarters after taking the defense. The committee oral examination is a defense of the dissertation based on a full draft submitted to the Academic Affairs Committee. The proposal must be approved by the academic Affairs Committee at the end of each academic year. At the end of the third year, students are expected to have developed an approved dissertation prospectus valid for five years unless terminated by the department.

9. Dissertation Prospectus—The dissertation prospectus must be approved by the candidate’s adviser and by the departmental Graduate Studies Committee two quarters after taking the departmental oral. This should be done before candidacy expires.
   a. The prospectus should be approximately 15-20 pages and minimally cover three things:
      • the research question and context
      • the methodology for research
      • a lay-out of a complete chapter by chapter plan
   b. 1st Year Comprehensive. The comprehensive examination is taken over the first weekend in December of the first year. The exam is based on texts given to the student by the department before the start of the first year. Students study these texts independently. For the exam, they should be able to identify and compare plays and playwrights from the list of texts in terms of dramatic genres, styles, and periods. The exam should address comparatively and analytically critical issues of texts and performance.
   c. 2nd Year Qualifying. The qualifying examination, which must be completed before advancement to candidacy at the end of the second year, consists of two 25-35-page essays. Each of these essays should demonstrate a broad knowledge of two different historical periods (pre-20th century), with emphasis on particular dramatic texts and/or performance practices. Essay topics should be designed and written in consultation with a faculty adviser. The reading list for each period should be approved by the end of the first quarter. These essays should not duplicate any written work from seminars. After approval by the adviser, the Graduate Studies Committee reads and evaluates these essays. For the first qualifying examination, candidates must choose from the following historical periods:
      Classical
      Medieval and Renaissance
      17th, 18th, or early 19th century
   d. 3rd Year Department Oral. The department oral examination requires three faculty members, at least two from the Department of Drama, who will most likely form the dissertation committee (the dissertation director and two other faculty members). The prospectus must be approved by the candidate’s adviser and by the departmental Graduate Studies Committee two quarters after taking the defense. The committee oral examination is a defense of the dissertation based on a full draft submitted to the Academic Affairs Committee. The proposal must be approved by the academic Affairs Committee at the end of each academic year. At the end of the third year, students are expected to have developed an approved dissertation prospectus valid for five years unless terminated by the department.

10. University Oral Examination—The University oral examination is a defense of the dissertation based on a full draft submitted at least 75 days before the proposed degree conferral. The examining committee consists of four faculty members, at least two of whom must be from the Department of Drama, as well as one faculty chair from outside the department who does not share an appointment with the department of any of the examiners.

11. Assistantships
   a. Research Assistantship. Three quarters of research assistantship with faculty members are required. Generally, this requirement is fulfilled in the third year.
   b. Teaching Assistantship. Four quarters of supervised teaching at half time are a required component of the Ph.D. program. The requirement is normally met by teaching three courses during the fourth year and one course during the fifth year.

During non-teaching quarters in years four and five, students serve as research assistants.

12. Application for Candidacy—By the end of the second year of residence, the following requirements or appropriate equivalents must be completed:
   a. the core seminars: 300A, 300B, 301, 302 or 303, and 304
   b. the directing workshop series (DRAMA 370-374), including the successful production of at least one work in public performance
   c. a foreign language
   d. successful completion of the comprehensive and qualifying exams

Based on its evaluation of the student’s progress, the Graduate Studies Committee certifies the student’s qualifications for candidacy. Upon favorable action, the student files a formal application for candidacy, as prescribed by the University, by the end of Summer Quarter of the second year. By University policy, candidacy is valid for five years unless terminated by the department.

13. Dissertation—Normally, the Ph.D. program in Drama is completed in five years. The first two years should be devoted to full-time graduate study, and the third, fourth, and fifth years to research, teaching, and writing the dissertation. A candidate taking more than five years is required to reinstate candidacy by repassing the written examinations on dramatic literature.

14. Satisfactory Progress, Annual Review—The program and progress of each student must be evaluated by the Graduate Studies Committee at the end of each academic year. At the end of the first year, the Graduate Studies Committee evaluates the work of each student in classes, seminars, examinations, and performance. Production planning in the Spring of each year for the following season is contingent upon students making satisfactory progress. Continuation in the program depends upon the recommendation of this faculty group. At the end of the second year, the committee reviews the student’s work in consideration of advancement to candidacy. At the end of the third year, students are expected to have developed an approved dissertation prospectus. Funding is contingent upon satisfactory progress. Failure to make satisfactory progress may result in dismissal from the program. University policy states that all requirements including dissertation must be completed before candidacy expires.

INSTITUTE FOR DIVERSITY IN THE ARTS AND BLACK PERFORMING ARTS DIVISION

The Institute for Diversity in the Arts (IDA) is an interdisciplinary program in the humanities that involves students in the study of culture, identity and diversity through artistic expression. The Committee on Black Performing Arts (CBPA) and the Institute for Diversity in the Arts (IDA) merged in Autumn 2005. The mission of IDA/CBPA is to engage artists, students, and the local community collaboratively to create performance and visual art that examines the intersections among race, diversity, and social action through programming that includes artist residencies, classes, workshops, public performances, a lecture series, and symposia. The division produces annual student productions and is a resource for student organizations promoting artistic expression through the exploration of the impact of ethnic representation in the arts, literature, media, and pop culture. The programs prepare students for work in areas including the arts and community development. Students have gone on to graduate-level critical studies, M.F.A. programs, public service, government and politics, arts administration, and teaching. Students can pursue an IDA concentration through the Comparative Studies in Race and Ethnicity major; students can also emphasize Black performance through the African and American Studies major.
DANCE DIVISION

The Stanford Dance Division offers a range of broadly diverse approaches to dance as a performing art, cultural practice, political act and embodiment of ideology and beliefs. All of the dimensions through which one comes to experience dance, from studying a range of dance techniques, choreographing and performing, to viewing and critically and historically assessing dance, are represented in the course offerings of the Dance Division.

MINOR IN DRAMA WITH DANCE CONCENTRATION

A student declaring a minor in Drama with a Dance Concentration must complete 30 units of course work in Dance. Upon declaring the minor, a proposed course of study must be submitted by each student to the Dance Director, Janice Ross, and approved by her. This can be done at the time of declaration through http://axess.stanford.edu. All students must schedule a meeting with the Dance Director, Janice Ross, jross@stanford.edu, to be completed no later than one quarter following the declaration. For students wishing to minor in Drama with a Dance Concentration, the following core requirements must be met, and an individual program of study shaped in consultation with the minor adviser in Dance, Janice Ross. Please note that these classes change every year, and this is just a sampling of classes that fulfill the requirements. Others may be substituted with consent of the adviser. The Dance Concentration is not declared in Axess and does not appear on the student’s transcript.

Requirements—30 total units

1. Technique Classes: Studio Classes: Minimum of six studio dance classes (10 units)
   a. a concentration of at least three classes chosen from a specific dance form (e.g., World, Modern, Jazz, Hip-Hop, Ballet, Social), and the attainment of intermediate or advanced level (6 units)
   b. at least two classes in a style other than the concentration (4 units)

2. Dance Studies Classes: Minimum of two to three of the following (8 units)
   a. DANCE 151. The Cinderella Theory: Representation of the Family (3 units)
   b. DANCE 160. Performance: Dance and History: The Balletina (4 units)
   c. DANCE 171. Conversing Across Dance History: Ralph Lemon’s Traces (4 units)
   d. DANCE 191 or 290. Special Project (3-5 units)

3. Choreography/Repertoire/Performance Classes (4 units)
   a. DANCE 27. Faculty Choreography (2 units)
   b. DANCE 53. Laboratory of Creative Practice (2 units)
   c. DANCE 61. Pointe Variations (2 units)
   d. DANCE 100. Student Choreography (2 units)
   e. DANCE 105. Contemporary Afro Styles and Dance Making (2 units)
   f. DANCE 106. African Styles on Stage (2 units)
   g. DANCE 107. African-American Performance Strategies (2 units)
      a. DANCE 108. Portraiture and Performance (2 units)
      b. DANCE 117. The Body and The Camera (2 units)

4. Drama Core Courses: Minimum of 2 courses (8 units)
   a. DRAMA 30. How Theater is Designed (4 units)
   b. DRAMA 34. Stage Management Techniques (2 units)
   c. DRAMA 101H. How Theater Thinks (4 units)
   d. Drama 101P. How Practice Practices (4units)

OVERSEAS STUDIES COURSES IN DRAMA

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses website (http://explorecourses.stanford.edu) or the Bing Overseas Studies website (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

BERLIN

OSPBER 31. Exploring the Berlin Theater by Viewing and Evaluating Performance Work. 3 units, Carl Weber
OSPBER 32. The Stage in Dialogue with History: German Theater from the end of WWII to the end of the Cold War. 3-5 units, Carl Weber, GER:DB:Hum

SPRING QUARTER

BERLIN

OSPBER 101A. Contemporary Theater. 5 units, Karen Kramer, GER:DB:Hum

EAST ASIAN LANGUAGES AND CULTURES

Emeriti: (Professors) Albert E. Dien, David S. Nivison, Makoto Ueda; (Associate Professor) Susan Matsiosoff; (Senior Lecturer) Yin Chuang*
Chair: Chao Fen Sun
Directors of Graduate Studies: James Reichert (Japanese), Ban Wang (Chinese)
Directors of Undergraduate Studies: Melinda Takeuchi (Japanese), Yiqun Zhou (Chinese)
Professors: Steven D. Carter, Mark E. Lewis (East Asian Languages and Cultures and History), Chao Fen Sun, Melinda Takeuchi (East Asian Languages and Culture and Art History), Ban Wang (East Asian Languages and Cultures, Comparative Literature), John C. Y. Wang
Associate Professors: Yoshiko Matsumoto, James Reichert
Assistant Professors: Haiyan Lee, Indra Levy, Yiqun Zhou
Consulting Professor: Richard Dashler
Visiting Professor: Stuart Sargent
Postdoctoral Fellow: Paul Festa

Chinese-Japanese Area Studies Faculty:
Professors: Carl W. Bielefeldt (Religious Studies), Gordon Chang (History), Richard Dashler (Center for Integrated Systems), Paul Harrison (Religious Studies), Jean Oi (Political Science), David Palumbo-Liu (Comparative Literature), Gi-Wook Shin (Sociology), Richard Vinograd (Art and Art History), Andrew Walder (Sociology), Karen Wigen (History), Arthur P. Wolf (Anthropology), Lee H. Yearley (Religious Studies), Xueguang Zhou (Sociology)
Associate Professors: Jindong Cai (Music), Matthew Sommer (History), Miyako Inoue (Anthropology), Matthew Kohman (Anthropology)
Assistant Professors: Jennifer Adams (Education), Melissa Brown (Anthropology), Phillip Lipsy (Political Science), Jean Ma (Art and History), Yumi Moon (History), Thomas Mullaney (History), Jun Uchida (History)
* Recalled to active duty.

Department Office: Building 250, Room 106
Mail Code: 94305-2000
Phone: (650) 725-2742
Email: asianlanguages@stanford.edu
Web Site: http://asianlanguages.stanford.edu

Courses offered by the Department of East Asian Languages and Cultures are listed on the Stanford Bulletin’s Explore Courses website under the subject codes CHINGEN (Chinese General), CHINLIT (Chinese Literature), JAPANGEN (Japanese General), and JAPANLIT (Japanese Literature). Courses with the suffix -GEN do not require reading knowledge of an Asian language. Language courses are listed on the Stanford Bulletin’s Explore Courses website (http://explore.sites.stanford.edu) or the Bing Overseas Studies website (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.
Courses web site under CHINLANG (Chinese Language), JAPANLNG (Japanese Language), and KORLANG (Korean Language).

The Department of East Asian Languages and Cultures offers programs for students who wish to engage with the cultures of China, Japan, and Korea as articulated in language, linguistics, literature, film, cultural studies, and visual arts. Students emerge with a sophisticated understanding of culture as a dynamic process embodied in language and other representational media, especially the verbal and visual forms that are central to humanistic study. Department faculty represent a broad range of research interests and specialties, and visiting scholars and postdoctoral fellows from the Stanford Humanities Center, the Andrew W. Mellon Fellowship of Scholars in the Humanities, the Freeman Spogli Institute for International Studies, and the Center for East Asian Studies add to the intellectual vitality of the department.

East Asian Languages and Cultures offers a full range of courses at the undergraduate and graduate levels. Undergraduate courses concentrate on language, literature, and other cultural forms from the earliest times to the present, covering traditional and contemporary topics from Confucian conceptions of self and society to inflections of gender in the twentieth century. Emphasis in classes is on developing powers of critical thinking and expression that will serve students well no matter what their ultimate career goals. Graduate programs offer courses of study involving advanced language training, engagement with primary texts and other materials, literary history, and training in research methodologies and critical approaches.

East Asian language skills provide a foundation for advanced academic training and professional careers in fields such as business, diplomacy, education, and law. The department also offers opportunities for students who choose to double-major or minor in other academic disciplines, including anthropology, art history, economics, education, history, linguistics, philosophy, political science, religious studies, and sociology.

The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy in Chinese and Japanese, and Bachelor of Arts in East Asian Studies. It also offers undergraduate minors and the Ph.D. minor in Chinese or Japanese language and literature.

For information concerning other opportunities for study about Asian history, societies, and cultures, see the following departments and programs: Anthropology, Art and Art History, Business, Comparative Literature, East Asian Studies, Economics, History, Law, Linguistics, Philosophy, Political Science, Religious Studies, and Sociology. Courses in Chinese, Japanese, and Korean language instruction are listed in the “Language Center” section of this bulletin. Students interested in Asian languages not listed should contact the Special Language Program at the Language Center.

UNDERGRADUATE MISSION STATEMENTS FOR EAST ASIAN LANGUAGES AND CULTURES

CHINESE MAJOR

The mission of the Chinese program is to expose students to a variety of perspectives in Chinese language, culture, and history by providing them with training in writing and communication, literature, and civilization. Emphasis in classes is on developing powers of critical thinking and expression that will serve students well no matter what their ultimate career goals. The program prepares students for diverse professions and enterprises, including business, government service, and academia.

JAPANESE MAJOR

The mission of the Japanese program is to expose students to a variety of perspectives in Japanese language, culture, and history by providing them with training in writing and communication, literature, and civilization. Emphasis in classes is on developing

EAST ASIAN STUDIES MAJOR

The mission of the program in East Asian Studies is to enable students to obtain a comprehensive understanding of East Asia broadly conceived, which is the vast area stretching from Japan through Korea and China to the contiguous areas of the Central Asian land mass. Majors are expected to have a good mastery of an East Asian language, and focus on a particular sub-region or a substantive issue involving the region as a whole. Emphasis in classes is on developing powers of critical thinking and expression that will serve students well no matter what their ultimate career goals in business, government service, academia, or the professions.

OVERSEAS STUDIES

Courses approved for the Asian Languages major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, Sweet Hall.

STUDY ABROAD

Students interested in Japanese language, history, culture, and social organization are encouraged to apply to the Kyoto Center for Japanese Studies (KCJS), a two-semester academic program primarily for undergraduates wishing to do advanced work in the Japanese language and in Japanese studies. In Spring Quarter, the Stanford Center for Technology and Innovation (SCTI), also in Kyoto, focuses on Japanese organizations and the political economy of research, development, and production of high technology and advanced industries, followed by an optional two-to-three month internship in an agency, firm, or laboratory in Japan. For information about either program in Kyoto, students should contact the Bing Overseas Studies Program office in Sweet Hall.

Undergraduates interested in studying Chinese language, history, culture, and society are encouraged to apply to the Stanford Program in Beijing as well. This program is located at Peking University and is open Spring quarters.

Students interested in the graduate exchange program with the Department of Chinese at Peking University in Beijing should contact the chair of the department early in the academic year.

EAST ASIAN STUDIES THEME HOUSE

EAST House, located at Governor’s Corner, is an undergraduate residence that houses 60 students and offers them opportunities to expand their knowledge, understanding, and appreciation of East Asia. Assignment is made through the regular undergraduate housing draw.

SUMMER PROGRAM

A nine-week summer program of intensive instruction is offered in both Chinese and Japanese. The intensive courses provide the equivalent in instruction to regular academic-year courses. (See courses CHINLANG 5, 25, 105, and JAPANLNG 10, 20, 130, as described in the “Language Center” section of this bulletin.) For detailed information about these and other aspects of the summer program, inquire at the Language Center.
BACHELOR OF ARTS PROGRAMS IN EAST ASIAN LANGUAGES AND CULTURES

BACHELOR OF ARTS IN CHINESE OR JAPANESE

The B.A. degree is granted both in Chinese and in Japanese. The following courses and their prerequisites must be completed with a grade point average (GPA) of 2.0 or better:

1. Concentration in Chinese:
   a. CHINGEN 91 and JAPANGEN 92
   b. Chinese language requirement:
      1. first-year modern Chinese (one of the following series: CHINLANG 1, 2, 3, or CHINLANG 1B, 2B, 3B, or CHINLANG 5)
      2. second-year modern Chinese (one of the following series: CHINLANG 21, 22, 23, or CHINLANG 21B, 22B, 23B, or CHINLANG 25)
      3. beginning classical Chinese (CHINLIT 125, 126, 127)
   c. three CHINGEN or CHINLIT courses at the 100 level with one in each of the following areas: pre-modern China, modern China, and Chinese linguistics
   d. four other content courses dealing with China, primarily at the 100 level, as approved by the undergraduate adviser
   e. CHINGEN 133 is the required Writing in the Major (WIM) course
   f. CHINGEN 198, Senior Colloquium: completion of a capstone essay of approximately 7,500 words, written either in a directed reading course or for one of the courses above.

2. Concentration in Japanese:
   a. CHINLANG 91 and JAPANLNG 92
   b. Japanese language requirement:
      1. first-year modern Japanese (one of the following series: JAPANLNG 1, 2, 3, or JAPANLNG 7, 8, 9, or JAPANLNG 5)
      2. second-year modern Japanese (JAPANLNG 17, 18, 19, or JAPANLNG 20)
      3. third-year modern Japanese (JAPANLNG 117, 118, 119)
   c. three JAPANLNG or JAPANLIT courses at the 100 level with one in each of the following areas: pre-modern Japan, modern Japan, and Japanese linguistics
   d. four other content courses dealing with Japan primarily at the 100 level, as approved by the undergraduate adviser
   e. JAPANLNG 138 is the required Writing in the Major (WIM) course
   f. JAPANLNG 198, Senior Colloquium: completion of a capstone essay of approximately 7,500 words, written either in a directed reading course or for one of the courses above.

JAPANLNG 71N can be used to satisfy the Japanese linguistics requirement. JAPANLNG 51/251 is not counted toward the major. Students who complete third-year Japanese at KCSJ satisfy the language requirement but are required to take a placement test if they wish to enroll in JAPANLNG 211, 212, 213.

Students who want to concentrate in Chinese or Japanese linguistics can substitute the four other content courses primarily at the 100 level with LINGUIST 1 and three other linguistics courses at the 100 level, as approved by the undergraduate adviser in consultation with the student’s academic adviser.

These requirements are in addition to the University’s basic requirements for the bachelor’s degree. Letter grades are mandatory for required courses.

HONORS PROGRAM

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during Winter or Spring Quarter of the junior year. The proposal must include a thesis outline, a list of all relevant courses the student has taken or plans to take, a preliminary reading list including a work or works in Chinese or Japanese, and the name of a faculty member who has agreed to act as honors supervisor.

If the proposal is approved, research begins in Spring Quarter of the junior year, or by Autumn Quarter at the latest, when the student enrolls in CHINLIT 189A or JAPANLIT 189A for 2-5 units of credit for independent study. In Winter Quarter, students enroll for five units in independent study (CHINLIT 199 or JAPANLIT 199) with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than the end of the Winter Quarter in the senior year. Students enroll in CHINGEN 198 or JAPANLNG 198 in Spring Quarter of the senior year to polish and present their theses (instead of writing a capstone essay). Eight to eleven units of credit are granted for honors course work and the finished thesis.

BACHELOR OF ARTS IN EAST ASIAN STUDIES

 Majors in East Asian Studies begin or continue the mastery of Chinese, Japanese, or Korean. Within the humanities or social sciences, they may focus on a particular sub-region, for example, Japan; South China, Hong Kong, and Taiwan; or western China and Central Asia; or a substantive issue involving the region as a whole, such as environmental protection, public health, rural development, historiography, cultural expression, or religious beliefs. The major seeks to reduce the complexity of a region to intellectually manageable proportions and illuminate the interrelationships among the various facets of a society.

Potential majors must submit a Student Proposal for a Major in East Asian Studies form not later than the end of the first quarter of the junior year. Majors must complete at least 75 units of course work on China, Japan, and/or Korea in addition to a one unit Senior Colloquium. Courses to be credited toward major requirements must be completed with a grade of ‘C’ or better. Requirements are:

1. Language: proficiency in Chinese, Japanese, or Korean language at the second-year level or above, to be met either by course work or examination. Students who meet the requirement through examination are still expected to take an additional 15 units of language at a higher level, or literature courses taught in the language, or the first year in an additional Asian language. No more than 30 units of language courses are counted toward the major.

2. Gateway Courses: a minimum of three gateway courses, one in each area. The gateway courses are:
   a. Art, Literature and Religion
      ART 60. Asian Art and Culture
      CHINGEN 91. Traditional East Asian Civilization: China
      JAPANGEN 92. Traditional East Asian Civilization: Japan
      RELIGST 14. Introduction to Buddhism
      RELIGST 18. Introduction to Zen Buddhism
   b. History
      HISTORY 93. Late Imperial China
      HISTORY 94B. Japan in the Age of the Samurai
      HISTORY 95. Modern Korean History
      HISTORY 98. The History of Modern China
      HISTORY 256. U.-S.-China Relations: From the Opium War to Tiananmen
   c. Contemporary Social Sciences
      ANTHRO 148. Health, Politics and Culture of Modern China
      ANTHRO 150. Identity and Peoples of China
      HUMBIO 147. Population and Environment in China
      POLISCI 140L. China in World Politics
      POLISCI 148. Chinese Politics: The Transformation and the Era of Reform

SOC 117A. China Under Mao
3. **Substantive Concentration:** additional courses on East Asia, one of which must be a seminar above the 100 level. Majors are encouraged to distribute their coursework among at least three disciplines and two subregions in Asia. The subregions need not be traditionally defined. Examples include China, Japan, or Korea; or, in recognition of the new subregions which are emerging, South China and Taiwan, or Central Asia. At least four courses must have a thematic coherence built around a topic such as:
- East Asian religions and philosophies
- Culture and society of modern Japan
- Ethnic identities in East Asia
- Arts and literature in late imperial China
- Foreign policy in East Asia
- Social transformation of modern Korea
- China’s political economy

These courses are listed under East Asian Studies (EASTASN) in this bulletin, and under CHINGEN, CHINLIT, JAPANGEN, and JAPANLIT.

4. **Capstone Essay:** completion of a paper of approximately 7,500 words, written either in a directed reading course or for one of the courses in item 3 above, which should be built upon the student’s thematic interest. CHINGEN or JAPANGEN 198, Senior Colloquium (1 unit), is required of majors during Spring Quarter of their senior year to develop and present the capstone essay or honors paper.

5. At least one quarter overseas in the country of focus.

6. An East Asian Studies course that satisfies the University Writing in the Major requirement (WIM) should be completed before beginning the senior essay. This year, CHINGEN 133, JAPANGEN 138, and HISTORY 256 satisfy the WIM requirement.

7. The courses for the major must add up to at least 75 units, and all must be taken for a letter grade, in addition to the one unit Senior Colloquium, for a total of 76 units.

These requirements are in addition to the University’s basic requirements for the bachelor’s degree. Letter grades are mandatory for required courses.

**HONORS PROGRAM**

Majors with a grade point average (GPA) of 3.25 or better in all courses related to East Asia may apply for the honors program no later than the first quarter of the junior year. Application entails submitting an honors proposal to the student’s adviser for approval. Admission is granted by the EALC undergraduate committee, acting on the thesis supervisor’s recommendation.

Honors requirements are satisfactory completion of:
1. An honors thesis of high quality of approximately 10,000 words to be submitted in lieu of the senior capstone essay.
2. 5 to 10 units of directed individual study in connection with the thesis project.
3. One advanced level colloquium or seminar dealing with China, Japan, or Korea.

**MINORS IN EAST ASIAN LANGUAGES AND CULTURES**

**MINOR IN CHINESE OR JAPANESE**

The undergraduate minors in Chinese and Japanese have been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Chinese or Japanese language, as well as an introduction to the culture and civilization of East Asia. The minors consist of:

1. Completion of language study through the second-year level (that is, the one year sequence of CHINLANG 21, 22, 23 or 21B, 22B, 23B; or JAPANLNG 17, 18, 19) for students with no previous training in Chinese or Japanese. Students who already have first-year competence in Chinese or Japanese must complete the third-year course (CHINLANG 101, 102, 103 or 101B, 102B, 103B; or JAPANLNG 117, 118, 119). Students who already have a competence at the second-year level may fulfill the language component of the minor by taking three courses in the department using materials in either Chinese or Japanese. These courses may be language courses such as the third-year sequence mentioned above, the fourth-year language sequence, or they may be advanced literature and linguistics courses, depending on the capabilities and interests of the student.

2. The core courses, CHINGEN 91, Traditional East Asian Civilization: China, and JAPANGEN 92, Traditional East Asian Civilization: Japan.

3. Two courses selected from among the department’s other offerings in the literature, linguistics, and civilization of a given minor area (CHINGEN, CHINLIT, JAPANGEN, JAPANLIT). All courses for the minor must be taken for a letter grade and completed with a GPA of 2.0 or better.

**MINOR IN EAST ASIAN STUDIES**

The goal of the minor in East Asian Studies is to provide the student with a broad background in East Asian culture as a whole, while allowing the student to focus on a geographical or temporal aspect of East Asia. The minor may be designed from the following:

1. Three gateway courses, one in each area (see major for listing of gateway courses).
2. One undergraduate seminar above the 100 level and two other courses from among those listed as approved for East Asian Studies majors, including literature courses but excluding language courses. These courses are listed under East Asian Studies (EASTASN) in this bulletin, and under CHINGEN, CHINLIT, JAPANGEN, and JAPANLIT.

Applications for the minor should be submitted online through Axess and are due no later than the second quarter of the junior year.

**GRADUATE PROGRAMS IN EAST ASIAN LANGUAGES AND CULTURES**

**ADMISSION**

All students contemplating application for admission to graduate study must have a creditable undergraduate record. The applicant need not have majored in Chinese or Japanese as an undergraduate, but must have had the equivalent of at least three years of training in the language in which he or she intends to specialize, and must also demonstrate a command of English adequate for the pursuit of graduate study. Applicants should not wish merely to acquire or improve language skills, but to pursue study in one of the following fields: Chinese history (pre-modern), Chinese linguistics, Chinese literature, Chinese philosophy, Japanese cultural history, Japanese literature, Japanese linguistics, and Japanese visual culture.

**COTERMINAL B.A. AND M.A. PROGRAMS IN EAST ASIAN LANGUAGES AND CULTURES**

With department approval, students may be able to combine programs for the B.A. and M.A. degrees in Chinese or Japanese. Prospective applicants must consult with the graduate adviser. For details, see the “Graduate Degrees” section of this bulletin or http://registrar.stanford.edu/shared/publications.htm#Coterm.

For those interested in a coterminal program with an M.A. in East Asian Studies, please contact the Center for East Asian Studies for application procedures and deadlines, or visit the center’s web site at http://ceas.stanford.edu.

**MASTER OF ARTS PROGRAMS IN EAST ASIAN LANGUAGES AND CULTURES**

The M.A. is granted in Chinese and in Japanese. The normal length of study for the degree is two years.
REQUIREMENTS FOR THE M.A. IN CHINESE

The M.A. program in Chinese is designed for students with strong academic records and an interest in pursuing postgraduate research in Chinese literature, history (pre-modern), philosophy, or linguistics, but who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. (Note: Students who wish to pursue advanced language training in preparation for post-graduate research in other fields of Chinese studies are referred to the interdisciplinary M.A. program in the Center for East Asian Studies.)

The candidate must:
1. Demonstrate proficiency in both modern and classical Chinese through:
   a. completion with a letter grade of ‘B’ or higher of third-year Chinese through CHINLANG 103 and
   b. advanced classical Chinese through CHINLIT 223. (Note: qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations.)
2. Complete the following for a letter grade of ‘B’ or higher:
   a. four courses in Chinese literature or linguistics numbered between CHINLIT 230 and 292
   b. CHINLIT 201. Proseminar: Bibliographic and Research Methods in Chinese Studies
   c. two upper-division or graduate-level courses in fields such as Chinese anthropology, art history, history, philosophy, politics, and religion, as approved by the graduate adviser in consultation with the student’s individual adviser
   d. a master’s thesis; CHINLIT 299. Master’s Thesis or Translation.

REQUIREMENTS FOR THE M.A. IN JAPANESE

The M.A. program in Japanese is designed for students with strong academic records and an interest in pursuing postgraduate research in Japanese literature, cultural history, or linguistics, but who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. (Note: Students who wish to pursue advanced language training in preparation for post-graduate research in other fields of Japanese studies are referred to the interdisciplinary M.A. program in the Center for East Asian Studies.)

The candidate must:
1. Complete third-year Japanese (JAPANLANG 117, 118, 119) plus one of the following for a letter grade of ‘B’ or higher:
   a. fourth-year Japanese through JAPANLANG 213, or
   b. classical Japanese through JAPANLIT 246 and 247. (Note: qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations.)
2. Complete the following with a letter grade of ‘B’ or higher:
   a. four adviser-approved courses in Japanese literature, culture, or linguistics from among the offerings of the Department of East Asian Languages and Cultures, not including courses taken to fulfill the language requirement
   b. JAPANLIT 201. Proseminar: Introduction to Graduate Study in Japanese
   c. two upper-division or graduate-level courses in fields such as Japanese anthropology, art history, history, philosophy, politics, and religion, as approved by the graduate adviser in consultation with the student’s individual adviser
   d. a master’s thesis; JAPANLIT 299. Master’s Thesis or Translation.

DOCTOR OF PHILOSOPHY PROGRAMS IN EAST ASIAN LANGUAGES AND CULTURES

The Ph.D. degree is granted in Chinese and Japanese. Candidates for the degree are expected to acquire a thorough familiarity with Chinese or Japanese literature, an adequate command of relevant languages, and a comprehensive knowledge of East Asian history, social institutions, and thought. The University’s basic requirements for the Ph.D. are given in the “Graduate Degrees” section of this bulletin. Department requirements are set forth below.

ADMISSION TO CANDIDACY

Students admitted with a B.A. only are evaluated by the graduate faculty during the Autumn Quarter of their second year at Stanford. The evaluation is based on written work and at least a portion of the master’s thesis or translation. If the faculty have serious doubts about a student’s ability to work for the Ph.D., they convey this to the student. During the subsequent Spring Quarter, the faculty formally decides whether a student should be admitted to candidacy for the Ph.D. or be terminated. In the case of a student who already has an M.A. in Chinese or Japanese when admitted to the department, the evaluation takes place in the Spring Quarter of the student’s first year. If a student goes to the Inter-University Program for Chinese Language Studies (IUP) at Tsinghua University or the Inter-University Center (IUC) for Japanese Language Studies in Yokohama during the first two years of study, the department may consider an extension for admission to candidacy. The timing of the evaluation of a student admitted with an M.A. in East Asian Studies is decided on an individual basis.

Admission to candidacy does not mean that the student has fulfilled all requirements for the degree except the dissertation, but that the department faculty consider the student qualified to pursue a program of study leading to the Ph.D. and that, subject to continued satisfactory progress, the student’s status in this department is secure.

REQUIREMENTS FOR DOCTOR OF PHILOSOPHY IN CHINESE

The Ph.D. program in Chinese is designed to prepare students for a doctoral degree in Chinese literature, history (pre-modern), philosophy, or linguistics. Applicants must have a minimum of three years of Chinese language study at Stanford or the equivalent to be considered for admission. Students on the Ph.D. track will complete the M.A. as described above on the way to advancing to Ph.D. candidacy (see department guidelines for admission to candidacy above). The majority of required coursework for Ph.D. students demands the ability to read primary and secondary materials in Chinese. Advanced standing may be considered for students entering the Ph.D. program who have already completed an M.A. in Chinese literature or linguistics elsewhere only in cases when the level of prior course work and research is deemed equivalent to departmental requirements for the Ph.D. track. All courses must be taken for a letter grade.

A candidate must fulfill the following requirements:
1. Meet the department’s requirements for the M.A. in Chinese.
2. Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate’s specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student’s advis-
er(s), working knowledge of a third language may also be required.

3. Complete two relevant seminars at the 300 level. These seminars must be in different subjects.

4. Pass a set of four comprehensive written examinations, one of which tests the candidate’s methodological competence in the relevant discipline. The remaining three fields are chosen, with the approval of the graduate adviser in consultation with the student’s individual adviser, from the following: anthropology, art, Chinese literature (for candidates emphasizing Chinese linguistics), history, Japanese literature, linguistics (for candidates emphasizing Chinese literature), philosophy, and religion. With the adviser’s approval, a Ph.D. minor in a supporting field may be deemed equivalent to the completion of one of these four examinations.

5. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter, and taking DLCL 201, The Learning and Teaching of Second Languages.

6. Pass the University Oral Examination—General regulations governing the oral examination are found in the “Graduate Degrees” section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.

7. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Japanese.

**REQUIREMENTS FOR DOCTOR OF PHILOSOPHY IN JAPANESE**

The Ph.D. program in Japanese is designed to prepare students for a doctoral degree in Japanese literature, cultural history, or linguistics. Applicants must have a minimum of three years of Japanese language study at Stanford or the equivalent to be considered for admission. Students on the Ph.D. track will complete an M.A. thesis on the way to advancing to Ph.D. candidacy (see department guidelines for admission to candidacy above). The majority of required course work for Ph.D. students demands the ability to read primary and secondary materials in Japanese. Advanced standing may be considered for students entering the Ph.D. program who have already completed an M.A. in Japanese literature or linguistics elsewhere only in cases when the level of prior course work and research is deemed equivalent to departmental requirements for the Ph.D. track. All courses must be taken for a letter grade.

A candidate must fulfill the following requirements:

1. Demonstrate proficiency in both modern and classical Japanese language by completing the following courses, or by demonstrating an equivalent level of linguistic attainment by passing the appropriate certifying examinations.
   a. fourth-year Japanese through JAPANLIT 213
   b. classical Japanese through JAPANLIT 246 and 247

2. Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate’s specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of coursework, to be determined on a case-by-case basis. When deemed necessary by the student’s adviser(s), working knowledge of a third language may also be required.

Students concentrating in classical Japanese literature are normally expected to fulfill this requirement by completing:
   a. kanbun (JAPANLIT 248 and/or 249), and
   b. first-year classical Chinese (CHINLIT 205, 206, 207)

3. Complete four adviser-approved courses in Japanese literature and/or linguistics numbered between 260 and 298, and two relevant seminars at the 300 level. These seminars must be in different subjects.

4. Complete two upper-division or graduate-level courses in fields such as Japanese anthropology, art, history, philosophy, politics, and religion, as approved by the graduate adviser in consultation with the student’s primary adviser.

6. Pass a set of four comprehensive qualifying examinations. One tests the candidate’s breadth and depth in the primary field of research; one tests the candidate’s methodological competence in the relevant discipline. The remaining two examinations test the candidate’s competence in supporting fields, which are chosen in consultation with the student’s primary adviser in accordance with the student’s particular research goals. Supporting fields may include, but are not limited to, the following: anthropology, art, Chinese literature, comparative literature, history, Japanese literature (for candidates emphasizing Japanese linguistics), linguistics (for students emphasizing Japanese literature), philosophy, and religion. With the adviser’s approval, a Ph.D. minor in a supporting field may be deemed equivalent to the successful completion of one of these four qualifying examinations.

7. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter and taking DLCL 201, The Learning and Teaching of Second Languages.

8. Pass the University Oral Examination. General regulations governing the oral examination are found in the “Graduate Degrees” section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.

9. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Japanese.

**PH.D. MINOR IN EAST ASIAN LANGUAGES AND CULTURES**

A student taking a Ph.D. minor in Chinese or Japanese must complete at least 30 units of work within the department at the 200 and 300 level, chosen in consultation with a department adviser. The student must take either CHINLIT 201 or JAPANLIT 201 unless the department is satisfied that work done elsewhere has provided similar training. The student must also pass a written examination in the Chinese or Japanese language.

**EAST ASIAN STUDIES**

**Director:** Kären Wigen
**Affiliated Faculty and Staff:**
*Anthropology:* Harumi Befu (emeritus), Melissa Brown, Miyako Inoue, Matthew Kohrman  
*Art and Art History:* Jean Ma, Melinda Takeuchi, Richard Vino

*Asian Languages Lecturers:* Kazuko M. Busbin, Yin Chuang, Marina Chung, Robert Clark, Sik Lee Dennig, Michelle DiBello, Hye-sun Kim, Nina Lin, Hisayo O. Lipton, Momoyo Kubo Lowdermilk, Emiko Yasumoto Magnani, Kiyomi Nakamura, Hua Qian, Yu-hwa Liao Rozelle, Yoshiko Tomiyama, Huazhi Wang, Hong Zeng, Youping Zhang, Qi Zhu

Lewis, Susan Matsisoff (emeritus), Yoshiko Matsumoto, David S. Nivison (emeritus), James Reichert, Stuart Sargent, Chao Fen Sun, Melinda Takeuchi, Ban Wang, John C. Y. Wang, Yiqun Zhou  
*East Asian Studies* Directors: Karen Eggleston, Christopher Leighton (postdoctoral fellow), Scott Rozelle (on leave), Wei Wang (postdoctoral fellow)
Applicable courses from outside departments may be found in the majorly with China, Japan, and/or Korea. Literature courses are under the subject code EASTASN on the East Asian Languages and Cultures "section of this bulletin for ships in East Asia. Students should consult the "Department of Study Program also offers study abroad opportunities and internships in East Asia. Students should consult the "Department of Bachelor of Arts degree in East Asian Studies. The Bing Overseas LANG, JAPANLNG, and KORLANG. For courses in Classical Master of Arts in East Asian Studies section of the Stanford Bulle-fish in East Asia. Students should consult the "Department of School of Hu-metrics, and methodological courses within departments at Stanford are often have a substantial East Asian component and a list of current from a broad range of academic concerns covering nearly every discipline and historical period. CEAS belongs to the Division of International Comparative and Area Studies in the School of Hu-manities and Sciences.

Courses offered by the Center for East Asian Studies are listed under the subject code EASTASN on the Stanford Bulletin's Explore Courses web site.

The Center for East Asian Studies (CEAS) coordinates University instructional, research, and special activities related to China, Japan, and Korea. Faculty and students who share a common interest in the study of East Asia are brought together by the Center from a broad range of academic concerns covering nearly every discipline and historical period. CEAS belongs to the Division of International Comparative and Area Studies in the School of Humanities and Sciences.

Courses offered by the Center for East Asian Studies are listed under the subject code EASTASN on the Stanford Bulletin's Explore Courses web site.

The EASTASN courses listed in the course catalog deal primarily with China, Japan, and/or Korea. Literature courses are listed with the course codes of CHINGEN, CHINLIT, JAPAN-GEN, and JAPANLIT in the course catalog. Many other theoretical and methodological courses within departments at Stanford are taught by faculty who are East Asian specialists; these courses often have a substantial East Asian component and a list of current applicable courses from outside departments may be found in the Master of Arts in East Asian Studies section of the Stanford Bulle-tin and the online course catalog. For courses in Chinese, Japanese, and Korean language instruction use the subject codes CHIN-LANG, JAPANLNG, and KORLNG. For courses in Classical Chinese look for the subject code CHINLIT.

UNDERGRADUATE PROGRAMS IN EAST ASIAN STUDIES

Undergraduate students interested in East Asia can become involved by taking courses in the course codes listed above, joining the East Asian Studies Theme House, or earning a Minor or Bachelor of Arts degree in East Asian Studies. The Bing Overseas Study Program also offers study abroad opportunities and internships in East Asia. Students should consult the "Department of East Asian Languages and Cultures" section of this bulletin for more information. Undergraduates can also obtain a coterminous M.A. degree in East Asian Studies while concurrently working on their undergraduate major. For language study, CEAS provides undergraduate fellowships for language study in China, Japan, or Korea; students must simultaneously apply to a pre-approved language program abroad. Applications are due in February each year. Specific deadlines and application information can be found on the CEAS web site.

GRADUATE PROGRAMS IN EAST ASIAN STUDIES

MASTER'S PROGRAMS

The M.A. program in East Asian Studies is designed both for students who plan to complete a Ph.D. but who have not yet decided on the particular discipline in which they prefer to work, and for students who wish to gain a strong background in East Asian Studies in connection with a career in non-academic fields such as business, law, education, journalism, or government service. Students interested in pursuing professional careers are encouraged to plan for additional training through internships or graduate professional programs, in conjunction with obtaining an M.A. in East Asian Studies.

DOCTORAL PROGRAMS

Stanford does not offer a Ph.D. in East Asian Studies. Howev-er, there are more than 100 doctoral students with a specialization on China, Korea, or Japan within various departments and schools of the University. The departments that offer an East Asian concentration are: Anthropology, Art and Art History, Asian Languages, Comparative Literature, History, Linguistics, Political Science, Religious Studies, and Sociology. It is also possible to specialize in East Asian Studies in connection with a career in non-academic fields such as business, education, and Law. Inquiries should be directed to the individual department or school concerned.

POSTDOCTORAL PROGRAMS

The Center for East Asian Studies offers two postdoctoral fellowships in Chinese Studies each year. Postdoctoral fellowships in Japanese Studies are available from the Freeman-Spogli Institute of International Studies. The Walter H. Shorenstein Asia-Pacific Research Center has a postdoctoral program in contemporary Ko-rean Studies.

FINANCIAL AID

Students in graduate programs who plan to do work in Chinese, Japanese, or Korean language and area studies courses, may be eligible for Foreign Language and Area Studies (FLAS) fellowships and are encouraged to apply for them at the time of application to Stanford. Recipients of FLAS fellowships must be American citizens or permanent residents. For further information, see http://ceas.stanford.edu.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM IN EAST ASIAN STUDIES

The center admits a limited number of Stanford undergraduates to work for a coterminous M.A. degree in East Asian Studies. Ap-plications are accepted once a quarter throughout the regular aca-demic year, but no later than Winter Quarter of senior year. Applicants are expected to meet the same standards as those seeking admission to the M.A. program: they must submit a written statement of purpose; a Stanford transcript; three letters of recommenda-tion, at least two of which should be from members of the depart-ment of concentration; and scores from the General Test of the Graduate Record Exam. In addition, applicants must provide a list of courses they intend to take to fulfill degree requirements. The decision on admission rests with the M.A. admissions committee of the Center for East Asian Studies. Students must meet all require-ments for both B.A. and M.A. degrees. They must complete a total of 15 full-time quarters or the equivalent, or three full quar-ters after completing 180 units for a total of 225 units. Please see the CEAS web site at http://ceas.stanford.edu for full application instructions and deadlines. For University coterminous degree pro-
program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

**MASTER OF ARTS IN EAST ASIAN STUDIES**

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The master’s degree program allows a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. The director of the center assigns preliminary faculty advisers to all students. Members of the staff and faculty are available for academic and career planning. The M.A. program is normally completed in two academic years, but students can shorten this time by receiving credit for prior language work or by attending summer sessions. Students are urged to complete the degree requirements within one year if their background makes it possible.

Applicants must submit scores for the General Test of the Graduate Record Examination. Foreign applicants are also required to take the Test of English as a Foreign Language (TOEFL). Applications for admission and financial aid should be made online; see http://gradadmissions.stanford.edu.

The requirements for the M.A. in East Asian Studies are as follows:

**Language Requirement**—Students must complete the equivalent of Stanford’s first three years of language training in Chinese, Japanese, or Korean. Students entering the program without any language preparation should complete first- and second-year Chinese, Japanese, or Korean within the first year of residence at Stanford. This necessitates completing a summer language program. Language courses taken at Stanford must be for letter grades.

The language requirement may be satisfied in part or in full by placing into an appropriate Stanford language class through the language proficiency exam given by the Language Center. Students who fulfill this minimum three-year language requirement before completing other requirements are encouraged to continue language study, or take courses in which Chinese or Japanese are used, for as long as they are in the program. Language courses above the third-year level may be applied to the Area Studies requirement discussed below. Please note that the language used to meet the three year language proficiency requirement should match the student’s country of focus. Students in the M.A. program are also eligible to apply for the Inter-University language programs in Beijing and Yokohama. Work completed in one of these programs may be counted toward the M.A. degree’s language requirement.

**Area Studies Requirement**—Students must complete the 1-unit core course, EASTASN 330, and at least nine additional courses related to East Asia numbered 100 or above for a minimum total of 45 units. These nine courses must be 3 or more units, and taken for a letter grade. At least 23 units must be designated primarily for graduate students, typically at the 200–300 levels. As training in research methodologies and demonstrated research ability in a specific discipline are integral parts of the program, three of the nine courses must be taken within a single department, and at least one of these must be a seminar, colloquium, or advanced course which requires a research paper on East Asia. The six additional area studies courses may be taken in departments of the student’s choosing. Some theory-oriented or methodological courses may be used to meet part of these requirements provided they are demonstrably useful for understanding East Asian problems. Language courses numbered 100-199 do not count toward the courses required for the degree. Credit toward the area studies requirement is not given for courses taken before entering the M.A. program, however students may take courses for exchange credit at the University of California, Berkeley, with the approval of their adviser and the Office of the University Registrar.

**M.A. Thesis Requirement**—A master’s thesis, representing a substantial piece of original research, should be filed with the Center’s program office as part of the graduation requirements. With the adviser’s approval, the master’s thesis requirement may be satisfied by expanding a research paper written for an advanced course.

In addition to EASTASN courses, the following courses offered this year in other departments may be used to fulfill the area studies requirements. To meet requirements for the master’s degree, students must take courses at the 100 level or above, and at least 23 units at the 200 level or above. In general, M.A. students should register for classes with the higher course number (for example, graduate students should register for ANTHRO 282 and undergraduates should register for ANTHRO 82). Not all courses offered by other departments that have East Asia content may be listed here. If there is a course not listed here that has East Asia content, please check with the Center for East Asian Studies to verify whether or not it can be used to fulfill the degree requirements.

ANTHRO 82/282. Medical Anthropology
ANTHRO 147A. Folklore, Mythology, and Islam in Central Asia
ANTHRO 148/248. Health, Politics, and Culture of Modern China

JOINT AND DUAL DEGREE PROGRAMS IN EAST ASIAN STUDIES

EAST ASIAN STUDIES AND LAW

This joint degree program grants an M.A. degree in East Asian Studies and a Doctor of Jurisprudence (J.D.) degree. It is designed to train students interested in a career in teaching, research, or the practice of law related to East Asian legal affairs. Students must apply separately to the East Asian Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student’s background and level of training in Chinese, Japanese, or Korean. Up to 45 units of approved courses may be counted towards both degrees. For more information, see the "Joint Degree Programs" section of this bulletin. Students who have been accepted by both programs should consult with the departments to determine which courses can be double-counted.

EAST ASIAN STUDIES AND EDUCATION

This dual degree program grants an M.A. degree in East Asian Studies and a secondary school teaching credential in social studies. To be eligible for this program, students should apply to the M.A. program in East Asian Studies and then apply to the Stanford Teacher Education Program during the first year at Stanford. Completing the dual program requires at least two years, including one summer session when beginning the education component of the program.

EAST ASIAN STUDIES AND BUSINESS

This dual degree program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. Students must apply separately to the East Asian Studies M.A. program and the Graduate School of Business and be accepted by both. Completing this combined course of study requires approximately three academic years (perhaps including summer sessions), depending on the student’s background and level of training in Chinese, Japanese, or Korean language.

ECONOMICS

Honorary Emerita: (Professor) Anne O. Krueger

Chair: Lawrence Goloulder

Professors: Kyle Bagwell, B. Douglas Bernheim, Michael J. Boskin, Timothy F. Bresnahan, Lawrence Goloulder, Avner Greif, Robert E. Hall, Han Hong, Caroline Hoxby, Matthew O. Jackson, Peter Klenow, Mordecai Kurz, Jonathan Levin, Thomas E. MaCurdy, Paul R. Milgrom, John H. Pencavel, Monika Piazzesi, Joseph Romano, K. Martin Schneider, Ilya Segal, John B. Shoven, Robert Staiger, John B. Taylor, Frank Wolak, Gavin Wright

Associate Professors: Liran Einav, Muriel Niederle, Luigi Pistaferri

Assistant Professors: Ran Abramitzky, Manuel Amador, Nicholas A. Bloom, Giacomo DeGiorgi, Doireann Fitzgerald, Kyna Fong, Peter R. Hansen, Matthew Harding, Nir Jainovich, See- ma Jayachandran, Jakub Kastl, Fuhito Kojima, Aprajit Mahajan, Kalina Manova, Petra Moser, Michele Tertilt

Acting Assistant Professor: Anamarie Pieschacon

Senior Lecturer: Geoffrey Rothwell
Lecturers: Marcelo Clerici-Arias, Maria Fitzpatrick, Ward Hanson, Hamilton Helmer, Damon Jones, F. Victor Stanton, Faye Stein er, Mark Tendall

Instructor: Alexander Gould

Visiting Professors: Suzi Kerr, Nathan Nunn

Visiting Associate Professor: Yadira Gonzalez de Lara

Mail Code: 94305-6072

Phone: (650) 725-3266

Web Site: http://economics.stanford.edu

Courses offered by the Department of Economics are listed under the subject code ECON on the Stanford Bulletin’s Explore-Courses web site.

The department’s purpose is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in civil service, private enterprise, teaching, or research.

The undergraduate program provides an excellent background for those going on to graduate work in the professional schools (for example, business and law) and may also be structured to prepare students for a Ph.D. program in economics. The department’s curriculum is an integral part of Stanford’s programs in International Relations, Public Policy, and Urban Studies.

The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 20 to 25 students are admitted each year.

The faculty interests and research cover a wide spectrum of topics in most fields of economics, including behavioral economics, comparative institutional analysis, econometrics, economic development, economic history, experimental economics, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, environmental economics, and public finance.

BACHELOR OF ARTS IN ECONOMICS

The total number of units required for the major is 80. Students are encouraged to complete the core courses 1-6 below, as early as possible. Ideally, students should complete the core during the sophomore year, before taking upper division courses. Courses may not be taken before the prerequisites are completed. The required number of field courses is four. There is great flexibility in the choice of electives, including upper-division math and statistics.

Of the 80 units required for the major, at least 55 must be taken at Stanford in California. Students cannot declare Economics as their major or minor until they have completed ECON 50 with a grade of ‘B’ or better.

REQUIREMENTS FOR THE ECONOMICS MAJOR (80 UNITS)

1. ECON 1A (5 units): micro and elementary economics.
2. ECON 1B (5 units): macroeconomics. Prerequisite: ECON 1A.
3. ECON 102A (5 units): introduction to statistical methods. It is recommended that students satisfy this basic statistics requirement before proceeding with the rest of the program. Prerequisite: MATH 41 or equivalent.
4. ECON 50 (5 units, grade of ‘B’ or better): basic price theory. Prerequisite: ECON 1A and MATH 51 (letter grade required).
5. ECON 51 (5 units): intermediate microeconomics. Prerequisite: ECON 50.
6. ECON 52 (5 units): intermediate macroeconomics. Prerequisites: ECON 50 and 1B.
7. ECON 102B (5 units): econometrics. Prerequisites: ECON 50 and 102A. Material in ECON 102B is used in a number of field courses. Students are advised to design their program of study so that ECON 102B is not taken in their senior year but early in their program.

Field Courses (must be taken at Stanford in California; 20 units)—Four courses must be chosen from among ECON 111, 115, 118, 126, 137, 140,* 141, 145, 147, 149, 153, 157, 158, 160, 164, 165, 166, 168, 169, 179 (5 units each).

Writing in the Major Course (5 units)—This requirement is fulfilled by ECON 101. This course should be taken only after completing ECON 51 and 52, 102B, and at least two field courses.

Electives (20 units)—Choose from Economics courses numbered from 100 through 198, excluding 190 and 191. Up to 10 units may be satisfied by MATH 113, 114, 115, 136, 151, 171, 175; or STATS 200, 206, 207, 217, 218, 237. A maximum of 10 units of transfer credit or of ECON 139D, Directed Reading, may be taken under this section. Suitable transfer credit must be approved in writing by the Associate Director of Undergraduate Studies. Advanced undergraduate majors with strong quantitative preparation may enroll in graduate (200-level) courses with permission of the Director of Undergraduate Studies and the course instructor. Some courses offered by Overseas Studies may be counted towards this requirement. The department does not give credit for internships.

* Students may not count units from both ECON 135 and 140 towards their major as the courses are too similar in content.

OTHER REQUIREMENTS

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit, and 55 of the 80 units required for the major must be taken at Stanford in California.

Students scoring a 5 on both the advanced placement microeconomics and advanced placement macroeconomics exam may petition the Director of Undergraduate Studies to have the ECON 1A (but not 1B) course requirement waived. Students do not receive units credit for placing out of ECON 1A.

A grade point average (GPA) of 2.0 (C) or better must be received for all units applied toward the preceding requirements.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department’s Associate Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements (see the Information Book for Economics Majors). Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics major.

Course prerequisites are enforced. Students taking courses to satisfy prerequisites in another department or institution must petition for transfer credit approval in order to satisfy course prerequisites.

The time limit for satisfactory completion of a course is one year from the date an incomplete is given, although instructors may set a shorter time limit. Students are responsible for seeing that all grades of ‘incomplete’ are cleared within the time limit.

SAMPLE PROGRAMS

Sample listings of upper-division economics electives may be examined in the department’s Information Book for Economics Majors, available at http://www.econ.stanford.edu/academics/degrees-ugrad.html. Sample programs are provided for the following areas of emphasis: (1) liberal arts, (2) pre-business, (3) quantitative, (4) international, (5) politi-
cal economy and regulation, and (6) preparation for graduate school in economics.

HONORS PROGRAM
The honors program offers an opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with course and research work of exceptional quality. Honors students may participate in an Honors Research Symposium during Spring Quarter, with those nominated for prizes making oral presentations. The honors program requires:
1. Completing all requirements for the major.
2. Achieving a grade point average (GPA) of at least 3.5 for the 80 units required of the Economics major. See details in the Information Book for Economics Majors.
3. Complete ECON 102B and at least two lecture courses most relevant for the proposed topic of the honors thesis by the end of the junior year. (These can be included in the basic 80 units.)
4. Candidates must write an honors thesis in their senior year for at least one unit and up to 10 units of credit (ECON 199D). The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of 199D do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors. Students who take ECON 199D for 10 units may apply 5 of those units to meet the Writing in the Major (WIM) requirement. Such students complete the major with at least 85 units overall.
Juniors interested in the honors program should attend an informational meeting scheduled by the honors program director during the first week of each quarter. At this meeting, students receive information on organizing an honors project and are given details on honors programs. Prospective candidates for the honors program should submit an application to the director no later than the end of the first month of the third quarter before graduation (typically Autumn Quarter of the senior year). Also required, later in the same quarter, is a three-page thesis proposal that must be approved by the thesis adviser.

MINOR IN ECONOMICS
The minor in Economics has two main goals: to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors; and to allow students to build competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

COURSE WORK
1. ECON 1A (5 units): micro and elementary economics.
2. ECON 1B (5 units): macroeconomics. Prerequisite: ECON 1A.
3. ECON 50 (5 units, grade of ‘B’ or better): basic price theory. Prerequisites: ECON 1A and MATH 51 (letter grade required).
4. ECON 51 (5 units): intermediate microeconomics. Prerequisite: ECON 50.
5. ECON 52 (5 units): intermediate macroeconomics. Prerequisites: ECON 50 and 1B.
6. Two field courses (10 units; must be taken at Stanford in California) must be chosen from the following list: ECON 102A, 102B, 111, 115, 118, 126, 137, 140,* 141, 144, 145, 147, 149, 153, 157, 158, 160, 165, 166, 168, 179.
* Students may not count units from both ECON 135 and 140 towards their minor as the courses are too similar in content.

OTHER REQUIREMENTS
If the candidate’s major requires basic economics courses (items 1 through 5), then only half of the units from those courses apply toward the economics minor. To attain the overall 35 units required by the minor, the student must take additional economics courses numbered from 100 through 198.

At least 20 out of the 35 units for the minor must be taken at Stanford. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics minor.

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit. A grade point average (GPA) of 2.0 or better must be received for all units applied toward the minor.

Students must complete their declaration of the minor no later than the last day of the preceding quarter before their degree conferral.

GRADUATE PROGRAMS IN ECONOMICS
Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics.

GRADUATE FIELDS
A. ECONOMIC DEVELOPMENT
To receive credit for this field, students must complete two courses from 214, 216 and 217, and submit a paper from one of these courses. Students wishing to do research in the field are advised to take courses in international economics, such as 266, and in comparative institutional analysis.

B. ECONOMIC HISTORY/INSTITUTIONS
The requirement for the field is one research paper on a subject approved by one of the faculty teaching any of the following courses: 224, 225, 226, 227, 228, 229.

C. MONETARY THEORY AND ADVANCED MACROECONOMICS
Requirements for this field are completion of two courses from 233, 234, and 235.

D. PUBLIC FINANCE
To receive credit for the field, students must complete 241 and 242 by passing the final examinations, and submit an acceptable research paper on a topic approved by the instructor for either course. Students may take Public Finance as a field and still count 243 and/or 244 toward satisfying their distribution requirements.

E. ECONOMICS OF LABOR
To receive credit for this field, students must complete two courses from 246, 247, and 248.

F. ECONOMICS OF INDUSTRY
To receive credit for this field, students must complete 257 and 258 and submit one research paper, the subject of which has been approved in advance by one of the faculty teaching 257, 258, or 260.

G. INTERNATIONAL ECONOMICS
To receive credit for this field, students must complete 265 and 266. Taking one or more of 267, 268, or 269 is recommended. A research paper from any of these courses must also be submitted.

H. ECONOMETRICS
A student may satisfy the requirements for the econometrics field by completing the requirements of one of the subfields:
H-1: Theoretical Econometrics: To receive credit in the theoretical econometrics subfield, students must complete 273A and 273B.
H-2: Applied Econometrics—To receive credit in the applied econometrics subfield, students must complete 273A and either 274 or 275. Students must also complete a course or set of courses that is empirically oriented. The last requirement must be approved by the Director of Graduate Study in consultation with the instructor of 274 or 275.

I. MICROECONOMIC THEORY
To receive credit for this field, students must complete two courses from the following: 280, 281, 282, 283, 284, 286, 287, 289, 291.

J. ENVIRONMENTAL ECONOMICS
To receive credit for this field, students must complete 250 and 251. Students can petition to substitute another environmental/natural resource course (e.g., MS&E 248) for either of these.

OTHER PROGRAMS
Other programs leading to dual degrees may be arranged. For example, the Ph.D. in Economics combined with one or two years of study in the School of Law, leading to the nonprofessional Master of Legal Studies (M.L.S.) degree. A dual degree program does not permit counting any courses toward both the Economics and the Law degrees. For more information, see http://www.law.stanford.edu/program/degrees.

FELLOWSHIPS AND ASSISTANTSHIPS
The department awards a number of fellowships for graduate study. Many first-year and a few second- or third-year students are typically awarded full fellowships, including a stipend and tuition. All students whose records justify continuation in the program may be assured support for the second through fourth years in the form of employment as a teaching or research assistant. These half-time appointments provide a stipend and tuition allowance. Entering students are not normally eligible for research or teaching assistantships.

MASTER OF ARTS IN ECONOMICS
University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The department does not admit students who plan to terminate their graduate study with the M.A. degree. Students may, but need not, elect this degree in preparation for the Ph.D. degree. A master’s option is also available to Ph.D. candidates from other departments.

Admission—Prospective students must have completed the Stanford requirements for a B.A. in Economics or approximately equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected. Prospective applicants should submit their credentials together with a plan of study to the Director of Graduate Study for approval.

Requirements—A master’s program must satisfy these criteria:
1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor’s degree, of which at least 40 units must be in the Department of Economics. Students must complete ECON 202 and at least three other 200-level courses. They must receive a grade of ‘B-’ or better in ECON 202. Undergraduate courses must be numbered 105 or higher. No seminar courses numbered 300 or above can be counted.
2. Demonstrating competence in empirical methodology by receiving a grade of ‘B-‘ or better in both ECON 270 and 271, or by receiving a grade of ‘B-‘ or above in each of ECON 102A, B, and C.
3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 10 units of credit can be earned for a thesis toward the 45-unit degree requirement.
4. A grade point average (GPA) of 3.0 must be maintained for all master’s level work. All courses must be taken for a letter grade.

DOCTOR OF PHILOSOPHY IN ECONOMICS
University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

Admitted students must be adequately prepared in calculus, linear algebra, and statistics (see above). When deemed appropriate, a student may be required to complete the necessary background preparation at Stanford. All students take a common core curriculum at the outset and later branch out into the desired fields of specialization. Well-prepared students should anticipate spending, with some overlap, approximately two years in course work and another two years in seminars, independent study, and dissertation research. The goal is to complete the program in four years, although some types of research programs may require at least five years to complete. The department has a strong commitment to guiding students through the program expeditiously.

Questions and petitions concerning the program and the admissions process should be addressed to the Director of Graduate Study, who has responsibility for administering the graduate program.

Specific requirements are best discussed in two stages, the first consisting of requirements for admission to candidacy and the second involving further requirements for earning the degree.

Admission to Candidacy for Ph.D.—A student may apply for admission to candidacy when the following minimal requirements are met:
1. Successful results on comprehensive examinations in core economics (the examinations based on material from ECON 202, 203, 204; and 210, 211, 212), and econometrics (the examination based on material from ECON 270, 271, 272).
2. Completing the requirements in two additional fields of specialization from the list below or, if approved in advance by the Director of Graduate Study, in one such field together with a substantial amount of work toward a second field taught in a related department. Advanced fields include econometrics, economic development, economic history, industrial organization, international economics, labor economics, microeconomic theory, monetary theory and advanced macroeconomics, environmental economics and public finance.

Each field listed above can be satisfied by completing two courses, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. All courses (or comprehensive exams, when offered) must be passed with a grade of ‘B’ or better.

3. Completing a candidacy paper, normally written in conjunction with one of the special fields selected above. Satisfactory presentation of this paper or another research paper is required in Autumn Quarter of the third year, along with an additional presentation of an expanded research paper in Spring Quarter is also required for admission to candidacy.

It is expected that the student meet, and indeed exceed, the above standards by the end of the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the third year. Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After approval, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances.

Further Requirements for the Ph.D. Degree—
1. Distribution Requirement: Students must complete four other graduate-level courses meeting the following requirements:
   a. at least one course from the area of economic history, unless history is one of the two fields of specialization.
b. courses in at least two fields other than the two fields of specialization. Distribution courses cannot be crosslisted in these fields.

3. Seminar Participation: Each student is expected to participate in at least two all-year research seminars by the end of the fourth year of residence. Normally, participation in a seminar requires one or more oral presentations and the submission of a research paper (which, however, need not be completely separate from dissertation research).

4. Ph.D. Dissertation: The process involves selecting a topic, choosing an appropriate adviser, submitting a prospectus (signed by the adviser) outlining the proposed research, selecting a three-member reading committee (usually all from the Department of Economics, although exceptions can be made under certain circumstances), passing the University oral examination at which these three faculty (and two other members of the Academic Council) ask questions about the completed research, and submitting a final draft of the work signed by all members of the reading committee. The student is advised to initiate this process as early as possible.

PH.D. MINOR IN ECONOMICS

PH.D MINOR

To be recommended for the Ph.D. degree with Economics as a minor subject, a student must qualify in three fields of economics, at least one of which must be in the core economics sequence. The standard of achievement in these fields is the same for minor as for major candidates, including the department’s comprehensive examinations where appropriate.

JOINT DEGREE PROGRAM IN PH.D. IN ECONOMICS AND MASTER OF PUBLIC POLICY

The Ph.D./M.P.P. joint degree is designed for students who wish to prepare themselves for careers in areas relating to both policy and economics. Students interested in this degree first apply to the Economics Department, indicating an interest in the joint program. There is one admissions application and one fee. If the decision is made by the department to admit the applicant, the file is then forwarded to the M.P.P. program. An admission decision, based on the information in the Ph.D. application, is made promptly, and the department informs the student of the decision.

Students may also apply to the M.P.P. after having commenced study in the Economics Department at Stanford, by first receiving the consent of the Director of Graduate Studies in Economics and then applying to the Public Policy program.

Students must have a faculty adviser from the Economics Department to assist with the planning and supervising of the joint program. The adviser is usually chosen from among the department’s Public Policy-affiliated faculty.

Tuition and financial aid arrangements are made through the Economics Department.

Requirements for the M.P.P./Ph.D. in Economics: Core M.P.P. curriculum of 45 units: PUBLPOL 301B (4 units), 302A (2 units), 302B (4 units), 304A (4 units), 304B (4 units), 305A (4 units), 305B (4 units), 306 (4 units), 307 (4 units), 309 (10 units), 311 (1 unit)

JOINT DEGREE PROGRAMS IN ECONOMICS WITH THE SCHOOL OF LAW

J.D./M.A. AND J.D./PH.D.

The Department of Economics and the School of Law offer a joint program leading to either a J.D. degree combined with an M.A. degree in Economics, or to a J.D. degree combined with a Ph.D. in Economics.

The J.D./M.A. and J.D./Ph.D. degree programs are designed for students who wish to prepare themselves for careers in areas relating to both law and economics. Students interested in either joint degree program must apply and gain entrance separately to the School of Law and the Department of Economics and, as an additional step, must secure permission from both academic units to pursue degrees in those units as part of a joint degree program. Interest in either joint degree program should be noted on the student’s admission applications and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or the Economics department may apply for admission to the other program and for joint degree status in both academic units after commencing study in either program.

Joint degree students may elect to begin their course of study in either the School of Law or the Department of Economics. Faculty advisers from each academic unit participate in the planning and supervising of the student’s joint program. Students must be enrolled full time in the Law School for the first year of law school, and, at some point during the joint program, may be required to devote one or more quarters largely or exclusively to studies in the Economics program regardless of whether enrollment at that time is in the Law School or in the Department of Economics. At all other times, enrollment may be in the graduate school or the Law School, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the M.A. or Ph.D. degrees as specified in this bulletin or by the School of Law.

The Law School approves courses from the Economics Department that may count toward the J.D. degree, and the Economics department approves courses from the Law School that may count toward the M.A. or Ph.D. degree in Economics. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student’s program. The list may differ depending on whether the student is pursuing an M.A. or a Ph.D. in Economics.

In the case of a J.D./M.A. program, no more than 45 quarter hours of approved courses may be counted toward both degrees. In the case of a J.D./Ph.D. program, no more than 54 quarter hours of approved courses may be counted toward both degrees. In either case, no more than 36 quarter hours of courses that originate outside the Law School may count toward the Law degree. To the extent that courses under this joint degree program originate outside the Law School but count toward the Law degree, the Law School credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis, but not below zero. The maximum number of Law School credits that may be counted toward the M.A. or the Ph.D. in Economics is the greater of: (a) 5 quarter hours in the case of the M.A. and 10 quarter hours in the case of the Ph.D.; or (b) the maximum number of hours from courses outside of the department that M.A. or Ph.D. candidates in Economics are permitted to count toward the applicable degree under general departmental guidelines or in the case of a particular student’s individual program.

Tuition and financial aid arrangements are normally made through the school in which the student is then enrolled. For more information, see http://www.law.stanford.edu/program/degrees.
OVERSEAS STUDIES COURSES IN ECONOMICS

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

Phone: (650) 723-2635

Web Site: http://english.stanford.edu

Courses offered by the Department of English are listed under the subject code ENGLISH on the Stanford Bulletin’s ExploreCourses web site.

MISSION OF THE DEPARTMENT OF ENGLISH

We live in a world saturated with the written word. The English Department studies the culture of the word in its most sophisticated form, literature, with a focus on literary traditions in English across a range of media. Our courses emphasize interpretive thinking and creative writing, examining the dynamics of literary and cultural history, the structures of literary form and genre, and the practice of reading, writing, and critical analysis. The undergraduate English major provides an excellent background for many professional fields, including law, education, writing, publishing, medicine, and technology. The graduate program features rigorous training in the research and analysis of British, American and Anglophone literary histories and texts, preparing students to produce scholarship of originality and importance, and to teach literature at the highest levels.
BACHELOR OF ARTS IN ENGLISH

In the undergraduate program, students explore the traditions of literature in English. Courses emphasize interpretive thinking and creative writing, examining the dynamics of literary and cultural history, the structures of literary form and genre, and the practice of reading, writing, and critical analysis.

GRADUATE PROGRAM IN ENGLISH

The graduate program features rigorous training in the research and analysis of British, American and Anglophone literary histories and texts, preparing students to produce scholarship of originality and importance, and to teach literature at advanced levels.

OTHER PROGRAMS IN ENGLISH

Ph.D. in English and Humanities—The Department of English participates in the Graduate Program in Humanities leading to a Ph.D. in English and Humanities. The Graduate Program in Humanities is not accepting new students; it will provide courses and advising for students already enrolled. The University remains committed to broad-based graduate education in the humanities; the courses, colloquium and symposium will continue to be offered, and a successor program is under discussion by the faculty of the Division of Literature, Cultures, and Languages.

Ph.D. in Modern Thought and Literature—Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half to interdisciplinary studies. Interested students should see the "Modern Thought and Literature" section of this bulletin and consult the chair of the program.

Creative Writing Fellowships—The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are not degree-granting fellowships. Information is available in the Creative Writing office, (650) 725-1208.

ENGLISH COURSE CATALOG

NUMBERING SYSTEM

Undergraduate courses satisfying the pre-1750 requirement
100-119
Undergraduate courses satisfying the 1750-1900 requirement

90-99, 190-199, 290-299, 390-399

BACHELOR OF ARTS IN ENGLISH

The English major is designed to provide students with both an understanding of the development of literatures in English and an appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

SUGGESTED PREPARATION FOR THE MAJOR

Prospective English majors are advised to consider IHum 34A,B, A Life of Contemplation or Action: Debates in Western Literature and Philosophy, to satisfy their IHum-2,3 requirements.

Suggested or Recommended Courses—
IHum 34A,B, A Life of Contemplation or Action: Debates in Western Literature and Philosophy

ENGLISH 20/120. Masterpieces of English Literature II: From the Enlightenment to the Modern Period
ENGLISH 21/121. Masterpieces of American Literature
ENGLISH 47/147. Masterpieces of Contemporary Literature

FIELDS OF STUDY OR DEGREE OPTIONS

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several major programs of study. Each of these has different objectives and requirements; students should consider carefully which program of study corresponds most closely to their personal and intellectual objectives. The department offers the following fields of study for degrees in English: Literature; Literature with Creative Writing emphasis; Literature with Interdisciplinary emphasis; Literature and Foreign Language Literature; Literature and Philosophy.

DEGREE REQUIREMENTS

Those interested in majoring in English are encouraged to declare by the beginning of their junior year, but are urged to discuss their plans with the undergraduate student services specialist as early as possible, and to take recommended preparatory courses for the major in their freshman and sophomore years. To declare the major, a student must fill out the Declaration of Major in Axess; choose a faculty adviser; and submit a completed program proposal form approved by the adviser. It is recommended that a student meet with the adviser at least once per quarter to discuss progress towards degree completion.

With the exception of ENGLISH 160, Poetry and Poetics, which must be taken for a letter grade, any two of the requisite courses may be taken on a satisfactory/no credit basis at the discretion of the instructor. Students may apply as many as four literature courses taken at approved universities towards the English major. Approval of such courses towards the major is at the discretion of the Director of Undergraduate Studies. Requests for transfer credit, including course syllabi and official transcript, should be submitted to the undergraduate student services coordinator, and to the Office of the University Registrar’s external credit evaluation section.

The total number of units required to graduate for each degree option is specified in the relevant section following. All courses should be taken for 5 units. Irrespective of field of study or degree option, all English majors must complete the following requirements:

Required Courses (35 units)—
1. ENGLISH 160. Poetry and Poetics (WIM, 5 units)
2. Two courses in British Literature before 1750 (10 units)
3. Two courses in British Literature 1750-1900 or American Literature before 1900, or one of each (10 units)
4. One course in Shakespeare (5 units)
5. One course in critical methods (5 units)

Rules that apply to all English majors irrespective of field of study or degree option—
1. At least one course must be in American Literature
2. At least one course must be in British Literature after 1750
3. At least one course must be a major’s seminar
4. Courses can only be counted once, i.e. can only satisfy one requirement

I. Literature—This field of study is declared in Axess. This program provides for the interests of students who wish to understand the range and historical development of British and American literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis. In addition to degree requirements required of all majors and listed above, students must complete at least 25 additional units of approved courses including:
1. Three elective courses, chosen from among those offered by the Department of English, from one of the following concentrations:
   a. a specific genre: drama, film, lyric poetry, or prose fiction
   b. a specific historical period: literature before 1750, literature between 1750 and 1900, or literature after 1900
   c. one of the following areas of interest: gender and sexuality; language and rhetoric; literary theory; race and ethnicity; or single authors
   d. an alternative, well-defined area of interest with the approval of their adviser and the Director of Undergraduate Studies
2. Two additional elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. In place of one of these two elective courses, students may choose one upper-division course in a foreign literature read in the original language.

**II. Literature with Creative Writing Emphasis**—This field of study is declared in Axess. This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or prose. In addition to degree requirements required of all majors and listed above, students must complete at least 30 additional units of approved courses including:

1. One course in 20th-century literature
2. One beginning prose course: ENGLISH 90. Fiction Writing or ENGLISH 91. Creative Nonfiction
3. One beginning poetry course: ENGLISH 92. Reading and Writing Poetry
4. Three courses with an emphasis in either Prose or Poetry: Prose writers must take ENGLISH 146. Development of the Short Story, and two intermediate or advanced prose classes: ENGLISH 190, 190F, 190G, 190P, 190R, 190V, 191, 191B, or 290. Poetry writers must take two intermediate or advanced poetry classes: ENGLISH 192, 192P, 192V, 198L, or 292, and one other literature course in poetry to be approved by a professor in the Creative Writing program.

**III. Literature with Interdisciplinary Emphasis**—This field of study is declared in Axess. This program is intended for students who wish to combine the study of one broadly defined literary topic, period, genre, theme or problem with an interdisciplinary program of courses relevant to that inquiry. In addition to degree requirements required of all majors and listed above, students must complete at least 35 additional units of approved courses including:

1. Three elective literature courses chosen from among those offered by the Department of English. Students must select two of these courses in relation to their interdisciplinary focus.
2. Four courses related to the area of inquiry. These courses may be chosen from disciplines such as anthropology, the arts (including the practice of one of the arts), classics, comparative literature, European or other literature, feminist studies, history, modern thought and literature, political science, and African American studies. These courses should form a coherent program and must be relevant to the focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by the interdisciplinary program director. In addition, students in this program must write at least one interdisciplinary paper. This may be a senior honors essay (ENGLISH 197), a senior independent essay (ENGLISH 199), an individual research paper (ENGLISH 194 or 198), or a paper integrating the material in two courses the student is taking in two different disciplines.

**IV. Literature and Foreign Language Literature**—This major provides a focus in British and American literature with additional work in French literature; German literature; Italian literature; Spanish or Spanish American literature. These are interdepartmental majors declared in Axess. In addition to degree requirements required of all majors and listed above, students must complete at least 30 additional units of approved courses including:

1. Two elective courses chosen from among those offered by the Department of English, one of which may be a creative writing course.
2. A coherent program of four courses in the foreign language literature, read in the original language, approved by the Director of Undergraduate Studies in English and by the relevant foreign language department.

**V. Literature and Philosophy**—Students should declare the English Literature major in Axess, and meet with the undergraduate director concerning the Literature and Philosophy focus. This track is for students who wish to explore interdisciplinary studies at the intersection of literature and philosophy while acquiring knowledge of the English language literary tradition as a whole. In addition to degree requirements required of all majors and listed above, students must complete at least 35-45 additional units of approved courses (at least eight 5-unit courses of the total units required must be within the English department) including:

1. PHIL 80. Mind, Matter, and Meaning (Writing in the Major); Prerequisite: introductory philosophy course.
2. Gateway course: ENGLISH 81. Philosophy and Literature. This course should be taken as early as possible in the student’s career, normally in the sophomore year.
3. Aesthetics, Ethics, Political Philosophy: one course from PHIL 170 series.
4. Language, Mind, Metaphysics, and Epistemology: one course from PHIL 180 series.
5. History of Philosophy: two courses in the history of Philosophy, numbered above PHIL 100.
6. Two upper division courses of special relevance to the study of Philosophy and Literature. A list of approved courses is available from the Director of Undergraduate Studies in English.
7. Capstone seminar of relevance to the study of Philosophy and Literature.

**HONORS PROGRAM**

Students wishing to undertake a formal program of advanced literary criticism and scholarship, including the honors seminar and independent research, are invited to apply for the honors program in the Winter Quarter of the junior year. Any outstanding student is encouraged to engage in an honors thesis project.

Admission is selective. Provisional admission is announced in March. Permission to continue in the program is contingent upon submission, by May 15 of the junior year, of a Senior Honors Essay proposal with a bibliography. Honors students are encouraged to complete the following English major requirements before the start of their senior year: critical methods and Poetry and Poetics (ENGLISH 160).

In September before the senior year, students are encouraged to participate in the Bing Honors College. In the Autumn Quarter of the senior year, students take a 3 unit honors seminar on critical approaches to literature. The senior-year seminar is designed to introduce students to the analysis and production of advanced literary scholarship. In addition, in Autumn Quarter of the senior year, honors students take a 2 unit essay workshop focused on the process of researching and writing the essay. Students who are studying at Oxford or at other institutions may be exempted from these requirements on request and with the approval of the director of the honors program.

In Winter and Spring quarters of the senior year, honors students complete the senior honors essay for 10 units under supervision of a faculty adviser.

The deadline for submitting the honors essay is May 15. Essays that receive a grade of ‘A-’ or above are awarded honors.

Students in the honors program complete the requirements of the major and the following:

**Required Courses**—

ENGLISH 196A. Honors Seminar, 3 units
ENGLISH 196B. Honors Essay Workshop, 2 units
ENGLISH 197. Senior Honors Essay, 10 units
MINOR IN ENGLISH OR IN CREATIVE WRITING

Both the Department of English and the Creative Writing program offer a distinct minor.

MINOR IN ENGLISH LITERATURE

The minor in English Literature offers some flexibility for those students who want to pursue specific interests within British and American literature, while still requiring certain courses that ensure coverage of a variety of periods, genres, and methods of studying literature.

Requirements—In order to graduate with a minor in English, students must complete the following program of seven 5-unit courses, at least one of which must be a seminar, for a total of 35 units:

Required Courses for the Minor—

1. ENGLISH 160. Poetry and Poetics
2. One course from each of the following historical periods:
   a. British literature to 1750
   b. British literature from 1750 to 1900 or American literature before 1900
   c. 20th-century British or American literature
3. One course in Shakespeare
4. Two elective courses, only one of which may be a course in Creative Writing.

MINOR IN CREATIVE WRITING

The minor in Creative Writing offers a structured environment in which students interested in writing prose or poetry develop their skills while receiving an introduction to literary forms. Students choose a concentration in either prose or poetry.

Requirements—In order to graduate with a minor in Creative Writing, students must complete the following program of six 5-unit courses for a total of 30 units. All courses must be taken for a letter grade.

Required Courses for the Minor—

1. ENGLISH 94. Introduction to Creative Writing: Form and Structure
2. ENGLISH 146. The Development of the Short Story (prose writers), or ENGLISH 160. Poetry and Poetics (poetry writers)
3. Four writing workshops, three in the chosen concentration, one outside
   a. Prose writers must first take one beginning prose class
       ENGLISH 90, Fiction Writing, or ENGLISH 91, Creative Nonfiction, then two intermediate or advanced prose classes:
       ENGLISH 190, 190F, G, P, R, V, 191, 191L, or 290. Prose writers must also take ENGLISH 92, Poetry Writing.
   b. Poetry writers must first take ENGLISH 92, Poetry Writing, then two intermediate or advanced poetry classes
       ENGLISH 192, 192P, V, 198L, or 292. Poetry writers must also take one beginning prose class,
       ENGLISH 90, Fiction Writing, or ENGLISH 91, Creative Nonfiction.

MASTER OF ARTS IN ENGLISH

University requirements for the M.A. are described in the "Graduate Degrees" section of this bulletin.

ADMISSION

Students with a bachelor’s degree in English or a closely related field may apply to pursue graduate work toward an advanced degree in English at Stanford. Applicants for admission to graduate study must take the General Test of the Graduate Record Examination and the Subject Test in Literature. International students whose first language is not English are also required to take the TOEFL examination, with certain exceptions: see http://gradadmissions.stanford.edu. The M.A. program is a terminal, one-year program without financial aid.

M.A. candidates must complete with a 3.0 (B) grade point average (GPA) at least nine courses (a minimum of 45 units), at least two of which must be 300-level courses. Ordinarily, graduate students enroll in courses numbered 200 and above. They may take no more than two courses numbered 101–199 without the consent of the Director of Graduate Studies, and no more than two courses outside the department. The master’s student may take no more than 10 units of directed reading and research (ENGLISH 398). No creative writing courses may be used to fulfill the requirements. M.A. candidates must also demonstrate a reading knowledge of one foreign language. (For ways of fulfilling this requirement, see the section below on language requirements for the Ph.D.) Interested students should consult their faculty adviser or the graduate program adviser for further details.

DEGREE REQUIREMENTS

Required Courses—

1. Two courses in literature before 1800
2. Two courses in literature after 1800

Optional Courses—Five elective courses; these courses should represent a mixture of survey and specialized courses chosen to guarantee familiarity with a majority of the works on the reading list for doctoral candidates. Candidates who can demonstrate unusually strong preparation in the history of English literature may undertake a 40 to 60 page master’s thesis. Each student is responsible for finding an adviser, who must approve the proposed topic before the end of Winter Quarter prior to anticipated graduation. Candidates register for up to 10 units of ENGLISH 399 with the faculty member who supervises the thesis work. The thesis is read and graded by the adviser and one other member of the English faculty.

Candidates who write a master’s thesis may petition to be excused from up to 10 units of the electives described above. The additional 35 units normally consist of the four required courses and three elective courses. These courses are chosen by the student and approved by the adviser and the Director of Graduate Studies.
COTERMINAL BACHELOR’S AND MASTER’S DEGREES IN ENGLISH LITERATURE

Students in the major who are interested in further postgraduate work in English may apply for Stanford’s coterminal master’s program. Candidates for a coterminal master’s degree must fulfill all requirements for the M.A. in English (including the language requirement), as well as general and major requirements for the B.A. in English. A minimum GPA of 3.7 in the major is required of those applying for the coterminal master’s degree. Students must also take the GRE exam in the year in which they apply. No courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the M.A. No courses taken more than two quarters prior to admission to the coterminal master’s program may be used to meet the 45-unit University minimum requirement for the master’s degree. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

COTERMINAL PROGRAM WITH SCHOOL OF EDUCATION

Students interested in becoming middle school and high school teachers of English may apply for admission to the coterminal teaching program (CTP) of the Stanford Teacher Education Program (STEP) in the School of Education. CTP students complete a special curriculum in English language, composition, and literature that combines a full English major with supplemental course work in subjects commonly taught in California public schools and a core program of foundational courses in educational theory and practice. They are then admitted to STEP for a fifth year of pedagogical study and practice teaching. Students who complete the curriculum requirements are able to enter STEP without the necessity of taking either the GRE or the usual subject matter assessment tests. At the end of five years, CTP students receive a B.A. in English, an M.A. in Education, and a California Secondary Teaching Credential. Students normally apply to the coterminal teaching program at the end of their sophomore year or at the beginning of their junior year. For complete program details and for information on how to apply, consult the Director of Undergraduate Studies in English or the CTP coordinator in the School of Education.

DOCTOR OF PHILOSOPHY IN ENGLISH

ADMISSION

Students with a bachelor’s degree in English or a closely related field may apply to pursue graduate work toward an advanced degree in English at Stanford. Applicants for admission to graduate work must take the General Test of the Graduate Record Examination and the Subject Test in Literature. International students whose first language is not English are also required to take the TOEFL examination (with certain exceptions: see http://gradadmissions.stanford.edu).

DEGREE REQUIREMENTS

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

Tracks—Doctoral students may follow one of two tracks: English and American Literature or English and Comparative Literature.

Requirements—The following department requirements, dealing with such matters as residence, dissertation, and examinations, are in addition to the University’s basic requirements for the doctorate. Students should consult the most recent edition of The Ph.D. Handbook; copies are available in the English graduate studies office.

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor’s degree. Candidates are required to complete at least 135 units of graduate work in addition to the doctoral dissertation. At least three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.

A student may count no more than 65 units of non-graded courses toward the 135 course units required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded units (normally fourteen courses) of the 135 required total units (396L, 397A, 398, and 399 do not count toward the 70 graded units). No more than 10 units (normally two courses) may come from 100-level courses.

This program is designed to be completed in five years. Five quarters of supervised teaching, two as a teaching assistant in a literature course, one as a teaching apprentice, and two as the instructor of a Program in Writing and Rhetoric (PWR) course, are a requirement of the Ph.D. program.

In the first quarter of their first year, students take a 2-unit seminar in pedagogy as preparation for their initial teaching assistantship. In the first quarter of their second year, students take a pedagogy seminar and an apprentice teaching program. The seminar and apprentice teaching constitute a 50-percent teaching appointment. Apprentice teachers attend the classes and conferences of a senior mentor/instructor for two to three weeks. While teaching during the second and third quarters of the second year, students continue to participate in a series of PWR pedagogy workshops and visit one another’s classrooms.

1. English and American Literature—Students are expected to do course work across the full range of English and American literature. Students would be required to fulfill the following requirements. Note: fulfillment of requirements 1, 2, and 3 must be through Stanford courses; students will not be excused from these three requirements or granted credit for course work done elsewhere.

1. ENGLISH 396, Introduction to Graduate Study for Ph.D. Students (5 units), a course that introduces students to the methods of literary study, and ENGLISH 396L, Pedagogy Seminar 1, for first year students (2 units).

2. Graduate-level (at least 200-level) course work in English literature before 1700, and English and American literature after 1700 (at least 5 units of each).

3. Graduate-level (at least 200-level) course work in some aspect of literary theory such as courses in literary theory itself, narrative theory, poetics, rhetoric, cultural studies, gender studies (at least 5 units).

4. Students concentrating in British literature are expected to take at least one course (5 units) in American literature; students concentrating in American literature are expected to take at least one course (5 units) in British literature.

5. Of all courses taken, a minimum of six courses for a letter grade must be graduate colloquia and seminars, of which at least three must be graduate seminars. The colloquia and seminars should be from different genres and periods, as approved by the adviser.

6. Completion, in Autumn Quarter of the second year, of a pedagogy seminar which includes the apprentice teaching program described above, and a series of pedagogy workshops during Winter and Spring Quarters. There are no units associated with this work.

7. The remaining units of graded, graduate-level courses and seminars should be distributed according to the adviser’s judgment and the candidate’s needs. A student may receive graduate credit for no more than two 100-level courses in the Department of English.

8. Consent of the adviser if courses taken outside the Department of English are to count toward the requirement of 70 graded units of course work.

9. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the graduate studies committee in consideration of the student’s overall record for the first year’s work in conjunction with performance on the examination. Note: A student coming to the
doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The Director of Graduate Studies considers the petition in conjunction with the student’s overall performance.

5. **University Oral Examinations**—A University oral examination covering the field of concentration (as defined by the student and the student’s adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study.

11. **Dissertation**—As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work. After the dissertation topic has been approved, the candidate should file a formal reading committee form as prescribed by the University. The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.

12. **Committee**—The doctoral dissertation reading committee consists of the principal dissertation adviser and two other readers. At least one member must be from the student’s major department. Normally, all members are on the Stanford Academic Council.

**II. English and Comparative Literature**—The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of England and of at least one foreign country, for one period. Approximately half of the student’s course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.

This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should consult a Department of English adviser, but faculty from Comparative Literature are available to advise graduate students in the field of specialization in languages other than English.

The requirements are as follows:

1. Knowledge of the basic structure of the English language and of Chaucer. This requirement may be met by examination, or by taking 10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature including Chaucer. No particular courses are required of all students.

2. A 5-unit course, ENGLISH 396, Introduction to Graduate Study, and a 2-unit course, ENGLISH 396L, Seminar in Pedagogy I.

3. Completion, in Autumn Quarter of the second year, of a pedagogy seminar, which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during winter and spring quarter. There are no units associated with this work.

4. A knowledge of one foreign language sufficient to take graduate-level literature courses in a foreign-language department and an advanced reading knowledge of a second language.

5. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign literature read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this requirement may be satisfied through courses in reading and research. A student may receive graduate credit for no more than two 100-level courses in the Department of English.

6. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism. These colloquia and seminars should be in different genres and periods as approved by the adviser.

7. An oral qualifying examination: see item 9 under requirements of the Ph.D. program in English Literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350, but instead include on their reading list a selection of works from a foreign literature read in the original language.

8. **University Oral Examinations**—A University oral examination covering the field of concentration (as defined by the student and the student’s adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study.

9. **Dissertation**—As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work. After the dissertation topic has been approved, the candidate should file a formal reading committee form as prescribed by the University. The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.

10. **Committee**—The doctoral dissertation reading committee consists of the principal dissertation adviser and two other readers. At least one member must be from the student’s major department. Normally, all members are on the Stanford Academic Council.

**LANGUAGE REQUIREMENTS**

Candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages. Candidates in the earlier periods must offer Latin and one of the following languages: French, German, Greek, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must offer either French, German, or Latin as one language and may choose the second language from the following: Greek, Latin, French, German, Italian, Spanish, Russian, or another language relevant to the student’s field of study. In all cases, the choice of languages offered must have the approval of the candidate’s adviser. Any substitution of another language must be approved by the Director of Graduate Studies.

The graduate studies committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before the qualifying examination), and the other by the end of the third year.
Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:

1. A reading examination given each quarter by the various language departments, except for Latin and Greek.
2. For Latin and Greek, an examination given by one of the Department of English faculty.
3. Passage with a grade of ‘B’ or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford. As an alternative for Latin, French, Italian, German, and Spanish, passage of CLASSLAT 51 and 52, FRENLANG 50, ITALLANG 50, GERLANG 52, and SPANLANG 50, respectively, with a grade of ‘B’ or higher.

**OVERSEAS STUDIES COURSES IN ENGLISH**

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

**AUTUMN QUARTER**

**OXFORD**

OSPOXFORD 17. The Novel of Sensation: Gothic, Detective, Prohibition and Transgression in Victorian Fiction. 5 units, Emma Plaskitt, GER:DB:Hum

OSPOXFORD 163X. Shakespeare: Critical Commentary. 5 units, Richard Rowley, GER:DB:Hum

**PARIS**

OSPPARIS 31. American Writers in 20th Century Paris. 5 units, Cecile Alduy, GER:DB:Hum

**WINTER QUARTER**

**OXFORD**

OSPOXFORD 57. The Rise of the Woman Writer, 1660-1860. 4-5 units, Emma Plaskitt, GER:DB:Hum

**ETHICS IN SOCIETY PROGRAM**

**Director:** Rob Reich  
**Program Coordinator:** Andrea Kuduk  
**Affiliated Faculty:** Kenneth Arrow (Economics, emeritus), Donald Barr (School of Medicine), Barton Bernstein (History), Michael Bratman (Philosophy), Eamonn Callan (Education), Albert Carrillo (History), Joshua Cohen (Philosophy, Political Science, Law), John Ferejohn (Political Science), Barbara Fried (Law), Leah Gordon (Education), Nadeem Hussain (Philosophy), Allyson Hobbs (History), David Kennedy (History), Aishwary Kumar (History), Scotty McLennan (Dean of Religious Life), Benoit Monin (Psychology), Josiah Ober (Classics, Political Science), Eric Roberts (Computer Science), Debra Satz (Philosophy), Tamar Schapiro (Philosophy), Mitchell Stevens (Education), David K. Stevenson (Pediatrics), Brent Sockness (Religious Studies), Allen Wood (Philosophy), Sylvia Yanagisako (Anthropology), Lee Yee (Religious Studies)

**Program Offices:** Galvez Modular, Room 117  
**Mail Code:** 3099  
**Phone:** (650) 726-2629  
**Email:** akuduk@stanford.edu  
**Web Site:** http://ethicsinsociety.stanford.edu

Courses offered by the Program in Ethics in Society are listed under the subject code ETHICSOC on the Stanford Bulletin’s ExploreCourses web site.

The Program in Ethics in Society is designed to foster scholarship, teaching, and moral reflection on fundamental issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as business, international relations, law, medicine, politics, science and public service.

Students interested in pursuing studies that bring moral and political theory to bear on issues in public life should consult the director. There are many course offerings at Stanford that address moral and political questions. Not all of these courses are cross listed with the Program in Ethics in Society. Students should consult the director to determine whether such courses may be applied towards an Ethics in Society honors program or minor.

**GRADUATE OFFERINGS**

The program’s main provisions for graduate students are seminars on topics in applied ethics.

**HONORS IN ETHICS IN SOCIETY**

The honors program in Ethics in Society is open to majors in every field and must be taken in addition to a department major. Students should apply for entry at the end of Spring Quarter of the sophomore year or no later than the beginning of Autumn Quarter of the junior year. Applicants should have a cumulative grade point average (GPA) of 3.3 (B+) or higher. They should also maintain this minimum average in the courses taken to satisfy the requirements. Required courses must be taken for a letter grade.

**Requirements—**

1. Required courses (at least one of a or b must be taken at the 100 level):
   b. ETHICSOC 30. Introduction to Political Philosophy; or ETHICSOC 171. Justice. Normally taken by the end of the sophomore year.

2. Two 4- or 5-unit undergraduate courses, listed below, on a subject approved by the honors adviser, designed to encourage students to explore those issues in Ethics in Society that are of particular interest to them. Courses of relevance to the Program in Ethics in Society are offered by affiliated faculty members and by other departments. Students may also take a course with the honors thesis in mind. To promote a broad interdisciplinary approach, this elective should normally be outside the Department of Philosophy. Students are not restricted to choosing from the courses listed below.

3. ETHICSOC 190. Honors Seminar.

4. ETHICSOC 200A,B. Honors Thesis. On a subject approved by the honors adviser, with the work spread over two quarters. To receive honors in Ethics in Society, students must receive a grade of ‘B+’ on their thesis.

A typical student takes ETHICSOC 20 or 170 and 30 or 171 by the end of the sophomore year. Upon admission to the honors program as a junior, he or she takes ETHICSOC 190 in Winter Quarter and requirement 2 (the optional subjects) at any time during the junior year, or possibly Autumn Quarter of the senior year. The honors thesis is normally written during Autumn and Winter quarters of the senior year. Exceptions to this must be approved by the faculty director. Courses taken to fulfill the Ethics in Society honors requirement may be double-counted for Philosophy and other majors; Ethics in Society minors may not double count courses.

The following courses may be used to fulfill requirement 2. The faculty director may approve additional courses by petition.

ANTHRO 90A. History of Archaeological Thought (same as ARCHLGY 103)

ANTHRO 90B. Theory of Cultural and Social Anthropology

ANTHRO 139/239. Ethnography of Africa

ANTHRO 179. Cultures of Disease: Cancer
MINOR IN ETHICS IN SOCIETY

The Ethics in Society minor is open to students in any department who wish to explore moral issues in personal and public life. The minor also includes the possibility of pursuing classes around the theme of citizenship.

Students must declare the minor in Axess no later than the last day of Autumn Quarter of their senior year, although they are strongly advised to declare sooner. The student should discuss the minor with an adviser and prepare a draft proposal that includes a list of courses planned to fulfill the requirements and the name of the faculty adviser.

A minor in Ethics in Society requires six courses for a minimum of 25 and a maximum of 30 units. Required courses must be taken for a letter grade.

Requirements—

1. Two Ethics in Society courses:
   a. ETHICSOC 20, Introduction to Moral Theory; or ETHICSOC 170, Ethical Theory
   b. ETHICSOC 30, Introduction to Political Philosophy; or ETHICSOC 171, Justice

2. Three courses at the 100 level or above that address some dimension of moral or political theory or practice.*

3. One course at the 200 level or above that addresses a moral or political problem, in either theory or practice.*

See the course list in the "Honors in Ethics and Society" section of this bulletin for courses that fulfill requirements 2 and 3. The program director can approve additional courses.

The 100-level and 200-level courses should be focused around a central theme such as biomedical ethics, ethics and economics, ethics and politics, or environmental ethics. The courses at the 100 and 200 level are normally taken after completion of ETHICSOC 20 or 170 and 30 or 171.

Subject to the approval of the Director of the Ethics in Society Program, a course covering similar subject matter in another department or program may be substituted for ETHICSOC 20/170 or 30/171. No course credited to the Ethics in Society minor may be double-counted toward major requirements.

CITIZENSHIP OPTION

The citizenship option for the minor introduces students to the theory, history, and practice of citizenship in democracies. When a student declares the minor in EIS in Axess, no notation is made of the citizenship option, and this notation does not appear on the diploma. All students taking the citizenship option must take ETHICSOC 198, Community Engagement Internship. In addition to the courses listed in (1) above, students must take a total of three additional classes from two of the following categories. Students may petition to have other relevant courses counted towards the minor.

1. Citizenship and Government Action
   a. ETHICSOC 133, Ethics and Politics of Public Service
   b. POLISCI 142T, Social Protection Around the World
   c. PUBLPOL 101, Politics and Public Policy
   d. PUBLPOL 164, Comparative Public Policy

2. Citizenship and Entrepreneurship
   a. ETHICSOC 108, Ethics and the Professions
   b. ME 206A, Entrepreneurial Design to Extreme Affordability
   c. PUBLPOL 180, Social Innovation
   d. PUBLPOL 195, Business and Public Policy
   e. URBANST 131, Social Innovation and the Social Entrepreneur

3. Citizenship and Education
   a. EDUC 167, Educating for Equity and Democracy
   b. EDUC 179B, Youth Empowerment and Civic Engagement
   c. EDUC 220C, Education and Society
   d. EDUC 247, Moral Education
   e. EDUC 304, The Philosophical and Educational Thought of John Dewey

4. Global Citizenship and Nongovernmental Organizations
Feminist Studies provides students with the background and skills to investigate the significance of gender and sexuality in all arenas of human life. The program prepares majors for graduate study in humanities and social sciences, and for professional schools.

Each Feminist Studies student builds an individual program of study around a self-defined thematic focus, integrating courses from multiple departments. The Program offers an undergraduate major and minor, and an interdisciplinary honors program that is open to students in all majors. The program encourages work in the arts and supports creative honors theses.

Feminist Studies awards the annual Michelle Z. Rosaldo Prizes and Francisco Lopez Prizes for the best undergraduate scholarship on women, feminism, gender, or sexuality. The Rosaldo Prizes are awarded for the best essay and honors thesis or master’s paper in the social sciences, and the Lopez Prizes for the best essay and honors thesis or master’s paper in the humanities. See http://stanford.edu/dept/femstudies/opportunities for details.

Courses offered by the Program in Feminist Studies are listed under the subject code FEMST on the Stanford Bulletin’s ExploreCourses web site.

Undergraduate Programs in Feminist Studies

Curriculum guidelines and forms for the major, minor, and honors are available at the Feminist Studies office or at http://feminist.stanford.edu. Students interested in Feminist Studies should consult the program mentor.

Bachelor of Arts in Feminist Studies

The major in Feminist Studies requires 63 units and may be taken as a single major, as one of multiple majors, or as a secondary major. If taken as one of multiple majors, none of the 63 units counted toward the major in Feminist Studies may overlap with units counted toward the major in another department or program. If taken as a secondary major, up to 30 of the units counted toward the Feminist Studies major may also be counted as fulfilling the major requirements in another department or program if that department or program consents. A maximum of 10 of the 63 units for the major may be taken on a credit/no credit or satisfactory/no credit basis; a maximum of 10 may be taken as independent study or directed reading. FEMST core courses must be taken for a letter grade.

The major should be declared before the beginning of the junior year. Students declare the major by developing a proposal with the help of the program mentor and a faculty adviser from the list of resource faculty. The proposal describes the student’s thematic focus and outlines a course of study. The proposal must be approved by the student’s adviser and the Program Director.

Curriculum

The major in Feminist Studies includes a total of at least 12 courses at the 100 level or above for 63 units. The courses are divided among the core, the focus, and electives to reach the total course requirement.

The Core

1. FEMST 101. Introduction to Feminist Studies. This course must be taken before 103.
2. Designated feminist theory course. The Feminist Studies web site lists courses that fulfill the theory requirement this year.
3. FEMST 103. Feminist Theories and Methods
4. FEMST 104A,B. Practicum
5. One Feminist Studies or cognate course in the social sciences. (e.g. Anthropology, Communication, Education, History, Human Biology, Law, Medicine, Political Science, Psychology, and Sociology).
6. One Feminist Studies or cognate course in the humanities (e.g. English, Linguistics, Philosophy, Religious Studies, the arts, and languages).
THE FOCUS
Every student designs a thematic focus consisting of at least five courses in addition to the core. These foci are not declared on Axess; they do not appear on the transcript or diploma.
1. At least three of the focus courses should be Feminist Studies or cognate courses.
2. At least one course should be a major survey, methodology, or theory course offered by a department or interdepartmental program as an initiation into the practice of study in the field.
3. At least one course within the thematic focus should address multicultural issues.
4. The focus should be designed in consultation with the student’s advisers. The following are examples, and students are encouraged to develop new ones:
   - Chicana Feminisms
   - Cross Cultural Perspectives on Gender
   - Feminist Perspectives on Science and Technologies
   - Gender and Education
   - Gender, Race and Nation/Transnational Feminisms
   - Gender Justice and Human Rights
   - Masculinities
   - Queer/LGBT Studies
   - Race, Class and Gender
   - Women, Creativity, and the Arts
   - Gender, Health and Medicine
   - Gender, Spirituality and Religion

WRITING IN THE MAJOR (WIM)
Majors in Feminist Studies may satisfy the Writing in the Major (WIM) requirement by taking FEMST 153, Women and the Creative Imagination, or discuss alternate WIM courses with the Program Mentor. Honors students satisfy the WIM requirement through their honors work.

PRACTICUM
The practicum (FEMST 104 A, B) brings together theory and practical experience. The practicum should involve field research, community service, or other relevant experience such as a public service internship. Students plan their practicum during Winter Quarter of the junior year in FEMST 104A, Junior Seminar and Practicum (1 unit). The practicum is normally done over the summer between junior and senior year, and may be taken for additional units. It is followed by FEMST 104B, Senior Seminar and Practicum (2 units), in Autumn Quarter of the senior year.

ELECTIVES
Students are encouraged to take electives that provide intellectual breadth and contribute to the 63-unit requirement.

HONORS CERTIFICATION

FEMINIST STUDIES MAJORS/MINORS
Admission—The honors program offers an opportunity to do independent research for a senior thesis. It is open to students with a grade point average (GPA) of 3.3 or better in course work in Feminist Studies. Students must begin the application process for honors certification by meeting with the program mentor by May 1 of their junior year, but are encouraged to apply earlier. Students plan their practicum during Winter Quarter of the junior year in FEMST 104A, Junior Seminar and Practicum (1 unit). The practicum is normally done over the summer between junior and senior year, and may be taken for additional units. It is followed by FEMST 104B, Senior Seminar and Practicum (2 units), in Autumn Quarter of the senior year.

Requirements—
1. In addition to the normal requirements for the major, students must enroll in FEMST 105 for 10-15 units towards the preparation of the honors thesis.
2. Throughout the senior year, students work with faculty advisers and the honors mentor. The final thesis must be submitted by May 30 and be of acceptable quality to the student’s faculty adviser. Creative projects must include a section of critical analysis. For more information, see http://feminist.stanford.edu.

MAJORS IN OTHER DEPARTMENTS
Honors certification in Feminist Studies for majors in other departments or programs, as distinguished from honors for students pursuing a major in Feminist Studies, is intended to complement study in any major.
Admission—Honors certification is open to students majoring in any field with a GPA of 3.3 or better.
As a prerequisite, students must complete the following courses with a grade of (B+) or better:
1. FEMST 101 and a designated feminist theory course
2. Or three Feminist Studies courses related to the topic of their proposed honors research.
Students must begin the application process for honors by meeting with the program mentor by May 1st of their junior year, but are encouraged to begin earlier. During the application process, students outline a plan for course work and design an honors project in consultation with their proposed thesis adviser and the program mentor. The final proposal describing the project and the number of units to be awarded must be submitted to the director of the program for final approval. See the Feminist Studies web site for more details.

Requirements—
1. Students enroll in FEMST 105 for 10-15 units towards the preparation of the honors thesis.
2. Throughout the senior year, students work with faculty advisers and the honors mentor. The final thesis must be submitted by May 30 and be of acceptable quality to the student’s faculty adviser. Creative projects must include a section of critical analysis. For more information, see http://feminist.stanford.edu.

COGNATE COURSES
The following is a partial list of cognate courses for Feminist Studies. Please refer to the program web site for updated lists throughout the year. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program mentor for applicability of these courses to a major or minor program.

AFRICAAM 144. African Women Writers
AFRICAAM 255. Racial Identity in the American Imagination
AMSTUD 156H. History of Women and Medicine in the United States
ANTHRO 111. Archaeology of Sex, Sexuality, and Gender
ANTHRO 151. Women, Fertility, and Work
ANTHRO 180. Science, Technology, and Gender
ANTHRO 218. Literature, Politics, and Gender in Africa
ANTHRO 346A. Sexuality Studies in Anthropology
BIO 185. Evolution of Reproductive Social Behavior
CHICANST 122. Introduction to Latina Literature
CHICANST 160N. Salt of the Earth: Docudrama in (Latino) America
CHICANST 165A. Chicana/o History
CHICANST 197. The Rite to Remember: Performance and Chica na Indigenous Thought
CHINGEN 235. Chinese Bodies, Chinese Selves
CLASSGEN 119. Gender and Power in Ancient Rome
COMPLIT 141. Literature and Society in Africa and the Caribbean
CSRE 145A. Poetics and Politics of Caribbean Women’s Literature
CSRE 177. Writing for Performance: The Fundamentals
CSRE 183. Border Crossings and American Identities
DANCE 160. Performance, Dance, and History: The Ballerina
DRAMA 150T. Racial Erotics
DRAMA 163. Performance and America
DRAMA 177. Writing for Performance: The Fundamentals
EDUC 113X. Gender and Sexuality in Schools
EDUC 197. Education, Gender, and Development
EDUC 201. History of Education in the United States
EDUC 201B. Education for Liberation
EDUC 273. Gender and Higher Education: National and International Perspectives
ENGLISH 139B. American Women Writers, 1850-1920
ENGLISH 145. Another Way to be: Writings by Women of Color
FREN Lit 133. Literature and Society in Africa and the Caribbean
HISTORY 134A. The European Witch Hunts
HISTORY 161. U.S. Women’s History, 1890s-1990s
HISTORY 208B. Women Activists’ Response to War
HISTORY 221B. The Woman Question in Modern Russia
HISTORY 227. East European Women and War in the 20th Century
HISTORY 233B. Early Modern Sexualities
HISTORY 244C. The History of the Body in Science, Medicine, and Culture
HISTORY 255D. Racial Identity in the American imagination
HISTORY 258. History of Sexuality in the U.S.
HISTORY 261. Race, Gender, and Class in Jim Crow America
HISTORY 293B. Homosexuality in Historical and Comparative Perspective
HISTORY 295J. Chinese Women’s History
HUMBIO 125. Current Controversies in Women’s Health
HUMBIO 129. Critical Issues in International Women’s Health
ILAC 117N. Film, Nation, Latinidad
ILAC 193. The Cinema of Pedro Almodóvar
ILAC 272E. Clarice Lispector: the Style of Ecstasy
ILAC 280. Latina/o Literature
ILAC 326. Philosophies of Otherness: Aesthetics of Difference
ILAC 380E. Critical Concepts in Chicana/o Literature
ILAC 389E. Race, Gender and Sexuality in Cultural Representations
INDE 245. Women and Health Care
LINGUIST 156. Language and Gender
MED 108Q. Human Rights and Health
MED 240. Sex Differences in Human Physiology and Disease
OBGYN 240. Sex Differences in Human Physiology and Disease
OBGYN 256. Current Controversies in Women’s Health
POLISCI 141. The Global Politics of Human Rights
RELIGST 112. Handmaids and Harlots: Biblical Women in Jewish and Christian Traditions
RELIGST 156. Goddesses and Gender in Hinduism
RELIGST 172. Sex, Body, and Gender in Medieval Religion
RELIGST 263. Judaism and the Body
SOC 123. Sex and Love in Modern Society
SOC 134. Education, Gender, and Development
SOC 142. Sociology of Gender
SOC 273. Gender and Higher Education: National and International Perspectives
SOC 323. Sociology of the Family
SOC 339. Gender Meanings and Processes

MINOR IN FEMINIST STUDIES

Students interested in minoring in Feminist Studies should consult the program mentor. The minor proposal should be drafted in discussion with a faculty adviser selected from the Feminist Studies resource faculty list. The minor in Feminist Studies consists of at least six courses at the 100 level or above for a minimum of 30 and a maximum of 36 units. None of the units for the minor may count towards the student’s major. The minor in Feminist Studies should be declared by Winter Quarter of a student’s junior year.

Requirements—

1. FEMST 101. Introduction to Feminist Studies. This must be taken before 103.
2. Designated feminist theory course, or FEMST 103, Feminist Theories and Methods

FOCUS

A four-course thematic focus may be designed by the student or may follow one of the suggested clusters listed above. One course within the thematic focus should address crosscultural issues.

OVERSEAS STUDIES COURSES IN FEMINIST STUDIES

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bspb.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

SPRING QUARTER

FLORENCE

OSPFLO 67. Women in Italian Cinema: Maternity, Sexuality and the Image. 4 units, Ermelinda Campani, GER:DB:Hum, EC:Gender

FINANCIAL MATHEMATICS

Director: Tze Leung Lai

This is an interdisciplinary program that provides a master’s level education in applied and computational mathematics, statistics, and financial applications to individuals with strong mathematical skills. The departments of Mathematics and Statistics, in close cooperation with the departments of Economics, and Management Science and Engineering, as well as the Graduate School of Business, provide many of the basic courses.

GRADUATE PROGRAM IN FINANCIAL MATHEMATICS

The department offers a Master of Science in Financial Mathematics. University requirements for the M.S. are described in the ”Graduate Degrees” section of this bulletin. 

MASTER OF SCIENCE IN FINANCIAL MATHEMATICS

Admission—to be eligible for admission, students are expected to have taken the following courses or their equivalent:

1. Linear algebra at the level of MATH 104.
2. Advanced calculus (real analysis) at the level of MATH 115.
3. Basic ordinary and partial differential equations at the level of MATH 131 and 132 (basic partial differential equations).
4. Probability at the level of STATS 116; theory of statistics at the level of STATS 200; and stochastic processes at the level of STATS 217 or, preferably, MATH 136/STATS 219.
5. Computer programming at the level of CS 106A/B, or X. Some of these courses are offered as summer courses and may be taken by candidates lacking the required background. 

Candidates for admission must take the general Graduate Record Examination and preferably the subject test in Mathematics as well. Information about these exams can be found at http://www.gre.org.

Requirements—The program requires that the student take 45
units of work. Of these 45 units, six courses must be taken from the list of required courses and six must be taken from the list of elective courses, available on the program website at http://finmath.stanford.edu/academics/required.html and http://finmath.stanford.edu/academics/electives.html. These courses must be taken for a letter grade, but students may elect to take one of the 12 courses credit/no credit. An overall grade point average (GPA) of 2.75 is required. A seminar in Financial Mathematics is an integral part of the program and an opportunity to interact with leading academic and industry speakers (for credit, enroll in STATS 239AB). There is no thesis requirement.

Any remaining units required to complete the 45 total must be taken from the following options:

1. From the approved list of electives with emphasis on computation, information technology, or finance
2. STATS 200, STATS 217, STATS 218, MATH 131, MATH 132, MATH 202 or ECON 140
3. Additional (practical) CS courses
4. In the form of an international internship in the Bay Area or elsewhere, with approval and supervision of a faculty member.

A written report must be submitted upon completion of the internship. Students who choose to take credit for practical training must sign up for Stats 297 (1-3 units).

Ordinarily, four quarters are needed to complete all requirements.

Required Courses—For the M.S. degree in Financial Mathematics, students must fulfill six of the following required courses:

1. In stochastic processes and statistics:
   a. MATH 236. Introduction to Stochastic Differential Equations

2. In differential equations, simulation, and computing:
   a. MATH 227. Partial Differential Equations and Diffusion Processes
   or STATS 362. Monte Carlo Sampling
   b. MATH 239. Computation and Simulation in Finance

3. In finance and economics:
   a. MS&E 347. Credit Risk: Modeling and Management
   or MATH 240. Topics in Financial Mathematics: Fixed Income Models
   b. MATH 238/STATS 250. Mathematical Finance

Courses that are equivalent to the above and have been taken previously may be waived by the adviser, in which case they must be replaced by elective courses in the same subject area.

The requirements must be met within two years of entering the program, or four academic quarters for those already at Stanford.

Elective Courses—Each candidate must take at least six approved elective courses from the list below.

1. At least two electives in Probability, Stochastic Processes or Statistics from:
   - Statistics:
     STATS 202. Data Analysis
     STATS 206. Applied Multivariate Analysis
     STATS 207. Introduction to Time Series Analysis
     STATS 219. Stochastic Processes (Same as MATH 136)
     STATS 220. Continuous Time Stochastic Control
     STATS 237. Time Series Modeling and Forecasting
     STATS 240. Statistical Methods in Finance
     STATS 252. Data Mining and Electronic Business
     STATS 305. Introduction to Statistical Modeling
     STATS 306A/B/C. Methods for Applied Statistics
     STATS 310A/B/C. Theory of Probability
     STATS 315A/B/C. Modern Applied Statistics
     STATS 317. Stochastic Processes
     STATS 318. Modern Markov Chains
     STATS 324. Multivariate and Random Matrix Theory
     STATS 343. Time Series Analysis
     EE 376A. Information Theory
   - Mathematics:
     MATH 136. Stochastic Processes (Same as STATS 219)

2. At least two electives in Differential Equations, Optimization, Simulation, or Computing from:
   - Mathematics:
     MATH 220. PDE of Applied Mathematics
     MATH 222A. Computational Methods for Fronts, Interfaces, and Waves
     MATH 256A/B. Partial Differential Equations
     MATH 261A/B. Functional Analysis
     MATH 266. Time Frequency Analysis and Wavelets
   - Statistics:
     STATS 212. Applied Statistics with SAS
     STATS 227. Statistical Computing
     STATS 235. Decision Making in Financial Services
     STATS 322. Function Estimation in White Noise
   - Computer Science:
     CS 106B. Programming Abstractions
     CS 106X. Programming Abstractions (Accelerated)
     CS 193D. C++
     CS 229. Machine Learning
     CS 249A. Object-Oriented Programming: A Modeling and Simulation Perspective
   - Management Science and Engineering:
     MS&E310. Linear Programming
     MS&E 311. Optimization
     MS&E 312. Advanced Methods in Numerical Optimization
     MS&E 313. Vector Space Optimization
     MS&E 323. Simulation Theory
     MS&E 339. Approximate Dynamic Programming
     MS&E 348. Optimization of Uncertainty and Applications in Finance
     MS&E 351. Dynamic Programming and Stochastic Control
   - Computational and Mathematical Engineering:
     CME 340. Computational Methods in Data Mining
   - Graduate School of Business:
     OIT 667. Revenue Management*

3. At least two electives in Economics or Finance from:
   - Economics:
     ECON 202N-203N. Core Economics: Modules 1 and 2, 5 and 6 (for non-Economics Ph.D. students)
     ECON 210. Core Economics: Modules 3 and 7
     ECON 211. Core Economics: Modules 11 and 12
     ECON 269. International Financial Markets and Monetary Institutions
   - ECON 281. Economics of Uncertainty
   - ECON 284. Topics in Dynamic Economics
   - Mathematics:
     MATH 180. Introduction to Financial Mathematics
   - Statistics:
     STATS 243. Introduction to Mathematical Finance (summer version of MATH 180)
   - Management Science and Engineering:
     MS&E 242H. Investment Science Honors
     MS&E 247G. International Financial Management (Same as GSB F323)*
     MS&E 247S. International Investments
     MS&E 272. Entrepreneurial Finance
     MS&E 341. Advanced Economic Analysis
     MS&E 342. Advanced Investment Science
     MS&E 345. Advanced Topics in Financial Engineering
     MS&E 444. Investment Practice*
     MS&E 445. Projects in Wealth Management
   - Graduate School of Business:
     GSB F320. Debt Markets*
     GSB F326. Derivative Securities*
     GSB F328. Portfolio Management*
     GSB F620. Financial Markets I*
A curator for Romance languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes materials on 20th-century France and French social and political movements.

France-Stanford Center for Interdisciplinary Studies—The center, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, to address historical and contemporary issues. Its programs bring faculty and students from across Stanford’s departments and schools in contact with colleagues in France to explore issues of common intellectual concern. The center invites French-speaking scholars to offer courses or give lectures or seminars on campus. It facilitates internships for Stanford students in computer science and engineering in Sophia-Antipolis, France’s new high-tech center near Nice. La Maison Française—La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings, and lectures by distinguished representatives of French and Francophone intellectual, artistic, and political life. Assignment is made through the regular housing draw.

Stanford in Paris—The Bing Overseas Studies Program in Paris offers undergraduates the opportunity to study in France during Autumn, Winter, and Spring quarters. It provides a wide range of academic options, including course work at the Stanford center and at the University of Paris, independent study projects, and internships. In addition, the program promotes interaction with the local community through volunteer employment, hosteys, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Students should consult with the Director of Undergraduate Studies before and after attending the program, in order to ensure that course work and skills acquired abroad can be coordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the “Overseas Studies” section of this bulletin, the Stanford in Paris web site http://osp.stanford.edu/program/paris, or the Overseas Studies Program Office in Sweet Hall.

ITALIAN SECTION

The Italian section offers graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small, specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

Three degree programs are available in Italian: a B.A., a terminal M.A., and a Ph.D. A Ph.D. in French and Italian is also available.

Collections in Green Research Library are strong in the medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the western European collection at the Hoover Institution for the Study of War, Revolution, and Peace; and the Music Library has excellent holdings in Italian opera.

La Casa Italiana—La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works closely with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

Stanford in Italy—The Bing Overseas Studies Program in Florence affords undergraduates with at least three quarters of Italian language the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on two areas: Renaissance history and art, and contemporary Italian and European studies. The program is structured to help integrate students
into Italian culture through homestays, Florence University courses, the Language Partners Program, research, internship and public service opportunities, and by conducting some of the program’s classes in Italian. Many courses offered in Florence may count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian section requirements. Information on the Florence program is available in the “Overseas Studies” section of this bulletin, the Stanford in Florence web site http://osp.stanford.edu/program/florence, or at the Overseas Studies office in Sweet Hall.

**BACHELOR OF ARTS IN FRENCH**

The French section offers a major and a minor in French. Students are encouraged to pursue a course of study tailored to their individual needs and interests. A degree in French serves as a stepping stone to entering international business, law, translation, and teaching, or as preparation for graduate studies in French, history, or comparative literature.

The French literature, culture, and civilization specialization allows students to combine their work in French with work from another field such as African studies, linguistics, art history, music, economics, history, education, medicine, international relations, political science, or other foreign languages and literatures. The literature and philosophy specialization offers students the opportunity to pursue interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

Students who complete the department’s two quarter IHUM sequence are eligible for 5 units towards the French major or minor. Students enrolled in the French language discussion section of the sequence are required by the department before beginning to take courses toward the major to complete the portion of the language sequence as deemed necessary.

**Prerequisites**—Before declaring a French major, a student must be proficient in written and spoken French at a second-year college level. Such proficiency must be demonstrated either:

1. by having completed the entire language sequence up to and including FRENLANG 23,
2. by having scored a 5 or better on the French language Advanced Placement (AP) exam; or
3. by having demonstrated equivalent proficiency on the Language Center placement exam offered at the beginning of each academic year.

Students not meeting at least one of these criteria are required to complete the portion of the language sequence as deemed necessary by the department before beginning to take courses toward the major.

**REQUIREMENTS**

**FRENCH**

The French major requires a minimum of 56 units, all courses of which must be taken for a letter grade and must be selected in accordance with the following requirements:

1. **Advanced language** (ca. 4 units): At least one course from the following:
   - FRENLANG 121. Introduction to French Texts
   - FRENLANG 122. Introduction to French Culture and Civilization
   - FRENLANG 124. Advanced French Grammar
   - FRENLANG 126. French Stylistics and Textual Analysis
   - OSPPARIS 125P. Advanced French II

2. **Introductory series on French and Francophone literature and culture** (ca. 12 units): Three courses must be taken from the FRENLANG 130 sequence. Any one of these courses fulfills the Writing in the Major requirement.

3. **FRENLANG 130. Authorship, Book Culture, and National Identity in Medieval and Renaissance France**

4. **FRENLANG 124. Advanced French Grammar**

5. **FRENLANG 126. French Stylistics and Textual Analysis**

6. **OSPPARIS 125P. Advanced French II**

7. **Upper-level French courses** (ca. 8 units): At least two additional courses must be taken within the department. In total, at least 32 units of course work must be taken within the department. No more than three courses numbered lower than 130 may be counted towards the major.

8. **FRENLANG 131. Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France**

9. **FRENLANG 132. Literature, Revolutions, and Changes in 19th- and 20th-Century France**

10. **FRENLANG 133. Literature and Society in Africa and the Caribbean**

12. **FRENLANG 156. Myth and Ritual in 18th-Century France**

13. **FRENLANG 160. The Absurdist Imagination**

15. **FRENLANG 175. Imagery of Death and Afterlife**

16. **FRENLANG 176. The Problem of Evil in Literature, Film, and Philosophy**

17. **FRENLANG 181. Philosophy and Literature**

19. **FRENLANG 228E. Getting Through Proust**

20. **FRENLANG 242. Women Mystics from the Middle Ages to the Present**

21. **FRENLANG 252. Historiography of Theater**

22. **FRENLANG 265. The Problem of Evil in Literature, Film, and Philosophy**

23. **FRENLANG 267. French and Italian Literary Theory**

24. **FRENLANG 289. French and Italian Women Writers**

26. **FRENLANG 167. The Essayistic Tradition in 20th-Century France**

27. **FRENLANG 252. Theater of the Absurd**

28. **FRENLANG 278. Special Topic in French and Francophone Literature: From Exoticism to a Discourse of Auto-Representation**

29. **FRENLANG 293A/B. Topics in French Literature and Philosophy**

30. **Upper-level French courses** (ca. 8 units): At least two additional courses must be taken within the department. In total, at least 32 units of course work must be taken within the department. No more than three courses numbered lower than 130 may be counted towards the major.

32. **FRENLANG 167. The Essayistic Tradition in 20th-Century France**

33. **FRENLANG 252. Theater of the Absurd**

34. **FRENLANG 278. Special Topic in French and Francophone Literature: From Exoticism to a Discourse of Auto-Representation**

35. **FRENLANG 293A/B. Topics in French Literature and Philosophy**

36. **Remaining courses** (ca. 22 units): The student is encouraged to use the remaining five or more courses to develop a specialized knowledge of a specific domain related to the senior project or the honors thesis. These courses must show obvious internal consistency and relevance to the chosen focus, and must be approved by the Director of Undergraduate Studies. Where possible, students are encouraged to complete their written work in French. Of these courses, only one, for a maximum of 4 units, may be drawn from individual work (FRENLANG 199).

**Cognate Courses**—Credits earned for completion of the following cognate courses may be applied to unit requirements for the departmental major:

- ANTHRO 380. Practice and Performance: Bourdieu, Butler, Giddens, de Certeau
- COMPLIT 101. What is Literature?
- DLCL 189. Honors Thesis Seminar
OSPPARIS 030. The Avant-garde in France through Literature, Art and Theater
OSPPARIS 031. American Writers in 20th-Century Paris
OSPPARIS 038. First Language Acquisition, with Emphasis on French
OSPPARIS 047. Women in French Cinema
OSPPARIS 056. From Text to Stage: Transformation of French Theater in the 19th and 20th Centuries
OSPPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France
OSPPARIS 186F. Contemporary African Literature in French

STANFORD BULLETIN, 2009-10

The French and Philosophy major specialization requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. **Advanced language** (ca. 4 units): At least one course from the following: FRENLANG 121, FRENLANG 122, FRENLANG 124, FRENLANG 126, or OSPPARIS 125P.
2. **Introductory Series on French and Francophone Literature and Culture** (ca. 12 units): Three courses must be taken from the FRENLANG 130 sequence.
3. **Philosophy Writing in the Major** (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. **Philosophy and Literature Gateway Course** (4 units): FRENLANG 181 (same as PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
5. **Aesthetics, Ethics, Political Philosophy** (ca. 4 units): One course from the PHIL 170 series.
6. **Language, Mind, Metaphysics, and Epistemology** (ca. 4 units): One course from the PHIL 180 series.
7. **History of Philosophy** (ca. 8 units): Two courses in the history of philosophy, numbered above PHIL 100.
8. **Upper Division French Courses** (ca. 12 units): At least three courses numbered FRENLANG/FRENGEN 140 or higher.
9. **Related Courses** (ca. 8 units): Two upper division courses relevant to the student’s chosen area of specialization. One course (4 units) may be FRENLANG 199, Individual Work.
10. **Capstone Seminar** (ca. 4 units): This year’s capstone seminars are: COMPLIT 226. Narrative and Ethics
    ILAC 240E. Borges and Philosophy
    RELSTUD 212. Chuang-Tzu

One of these courses must be taken in the student’s senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of French and the undergraduate adviser of the initiative in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

**EXTENDED MAJORS**

Requirements for both extended majors are essentially identical to those of the French major with a concentration in French literature.

**French and English Literatures**—In addition to the requirements for the B.A. in French, candidates complete four English literature courses numbered 100 and above related to their French program.

**French and Italian Literatures**—In addition to the requirements for the B.A. in French, students complete four Italian courses numbered 200 and above related to their concentration in French.

**FRENCH AND LINGUISTICS**

Linguistics majors may elect to specialize in the French language. In addition to 50 units in Linguistics, of which two courses (LINGUIST 110 and 160) may be replaced by comparable courses in French, students opting for a French Language specialization must take three courses in the introductory series devoted to French and Francophone literature and culture (FRENLANG 130-133). For details, contact the Department of Linguistics.

**MINOR IN FRENCH**

Students considering a minor in French are encouraged to design a course of studies that fosters their understanding of the interaction between French and their major field of specialization. A minimum of 24 units of undergraduate work beyond the French 23 level must be completed. All courses must be taken for a letter grade.

Requirements for the minor include one advanced language course (at the 120 level); three of the introductory series on French and Francophone literature and culture (FRENLANG 130-133); and a minimum of two additional courses in language or literature numbered 121 and above. Of these, only one may be taught in English. All courses must be chosen in consultation with the Director of Undergraduate Studies.

Courses used to satisfy French minor requirements may not be counted toward a student’s major or toward a second minor.

**HONORS PROGRAM**

Majors are eligible to apply to the honors program if they have maintained an average grade point average (GPA) of 3.5 in five upper-division French courses. The honors program candidate must fulfill all regular requirements for the major, save the senior project, from which he or she is exempt. Instead, the student undertakes the writing of a research paper no shorter than 50 pages in length, written in French or English, on a specialized topic. No later than the end of Spring Quarter of the junior year, the student must submit to the Director of Undergraduate Studies an Application for Honors, the central portion of which must contain an outline of the proposed honors essay. If it is in need of revisions, the Director of Undergraduate Studies helps the student through the revision process until the proposal is granted his or her approval. The Director of Undergraduate Studies also helps the student identify an appropriate adviser for the essay. Students may enroll for 2 units of credit in FRENLANG 189B for the drafting or revision of the thesis proposal in Spring Quarter of the junior year. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in FRENLANG 189A while composing the thesis during Winter Quarter. Students who did not enroll in a 189B course in the junior year may enroll in FRENLANG 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis adviser. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of a grade
‘A’ or better by the thesis adviser, honors are granted at the time of graduation.

Honors College—The Department of French and Italian encourages honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages (DLCL). The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by Spring Quarter of the same calendar year. For more information, contact the undergraduate student services officer in the DLCL.

BACHELOR OF ARTS IN ITALIAN

REQUIREMENTS

The Italian major offers students the opportunity to develop an in-depth knowledge of Italian literature, language, and civilization through a highly flexible program combining course work in Italian with work in such fields as art history, classics, comparative literature, economics, English, French, history, international relations, music, philosophy, and political science. All Italian majors are required to have completed three second-year language courses (or the equivalent taken at the Florence campus): ITALLANG 21, Second-Year Italian, First Quarter; ITALLANG 22, Second-Year Italian, Second Quarter; ITALLANG 23, Second-Year Italian, Third Quarter.

Completion of the department’s two-quarter Great Works IHUM sequence entitles a student to 5 units towards the Italian major or minor. Students considering an Italian major should consult with the Italian undergraduate adviser as early as possible (even before completing the language requirement) in order to ensure a maximum of flexibility in designing a course of study suited to individual needs and cultural interests.

Italian majors must complete 60 units of course work. (updated October 1, 2008)

The remaining requirements for the major are:

1. A minimum of 32 units of Italian courses:
   ITALGEN 181. Philosophy and Literature
   ITALGEN 233. Afterlife of the Middle Ages
   ITALGEN 242. Women Mystics from the Middle Ages to the Present
   ITALGEN 267. French and Italian Literary Theory
   ITALGEN 289. French and Italian Women Writers
   ITALLIT 239. Renaissance Foundations of Modernity
   ITALLIT 249. Love and Death in the Decameron
   ITALLIT 258. Italo Calvino
   ITALLIT 283. Modern Italian Poetry

2. Of these courses, at least one on Dante is required, as well as at least one in each of the following areas.
   a. the Middle Ages (FRENGEN 204, ITALLIT 233, ITALLIT 249); a Dante course may fulfill the Middle Ages requirement.
   b. the early modern period (ITALLIT 239); and
   c. the modern period (ITALGEN 242, 267, 289, ITALLIT 258, 283).

3. The intermediate-level survey sequence; any one of these courses fulfills the Writing in the Major Requirement.
   ITALLIT 127. Inventing Italian Literature: Dante, Boccaccio, Petrarcha
   ITALLIT 128. The Italian Renaissance and the Path to Modernity
   ITALLIT 129. Modern Italian History and Literature

4. One advanced language course: (updated October 1, 2008).
   ITALLANG 113. Italian Cultural Studies
   ITALLANG 114. Advanced Stylistics and Composition
   ITALLANG 115. Academic and Creative Writing

Of the 60 units required for the major, up to 28 units of course work in related fields may be taken outside the department.

Cognate Courses—Credits earned for completion of the following cognate courses may be applied to unit requirements for the departmental major:

COMPLIT 101. What is Literature?
DLCL 159. Senior Honors Thesis
ENGLISH 185. Opera as Cultural History
OSPFLO 34. The Woman in Florentine Art
OSPFLO 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought
OSPFLO 48. Sharing Beauty: Florence and the Western Museum Tradition
OSPFLO 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema
OSPFLO 54. High Renaissance and Mannerism
OSPFLO 67. Women in Italian Cinema: Maternity, Sexuality and the Image
OSPFLO 106V. Italy: From an Agrarian to a Post-industrial Society
OSPFLO 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence
OSPFLO 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization
OSPFLO 134F. Modernist Italian Cinema

Relevant courses from other departments or programs may also earn credit toward the major with the consent of the Director of Undergraduate Studies.

ITALIAN AND PHILOSOPHY

A second option is now possible within the Italian major, offering students the opportunity to combine studies in literature and philosophy. Students take most of their courses alongside students from departments specializing in the intersection of literature and philosophy.

The Italian and Philosophy major track requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. Italian Survey Sequence (ca. 12 units): ITALLIT 127, 128, 129.
2. Advanced Language Course (ca. 4 units): ITALLIT 113 and above.
3. Philosophy Writing in the Major (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. Philosophy and Literature Gateway Course (4 units): ITALGEN 181 (same as PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
5. Aesthetics, Ethics, Political Philosophy (ca. 4 units): one course from the PHIL 170 series.
6. Language, Mind, Metaphysics, and Epistemology (ca. 4 units): one course from the PHIL 180 series.
7. History of Philosophy (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. Upper Division Italian Courses (ca. 12 units): at least three courses numbered ITALLIT/ITALGEN 100 or higher.
9. Related Courses (ca. 8 units): two upper division courses relevant to the student’s chosen area of specialization.
10. Capstone Seminar (ca. 4 units): this year’s capstone seminars are: COMPLIT 226. Narrative and Ethics
    ILAC 240E. Borges and Philosophy
    RELSTUD 212. Chuang-Tzu

One of these courses must be taken in the student’s senior year. The capstone seminar and the two related courses must be approved by both the undergraduate adviser of Italian and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. No more than 24 units may be drawn from courses offered overseas. Substitutions, including transfer credit, are not normally permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10.

Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.
EXTENDED MAJORS
Requirements for both extended majors are essentially identical to those of the Italian major with a concentration in Italian literature.

Italian and English Literatures—In addition to the 32 departmental units required for the B.A. in Italian, candidates must complete four English literature courses numbered 100 and above related to the field of concentration in Italian Studies.

Italian and French Literatures—In addition to the 32 departmental units required for the B.A. in Italian, candidates must complete four French literature courses numbered 100 and above related to the field of concentration in Italian Studies.

MINOR IN ITALIAN
Students considering a minor in Italian are encouraged to design a course of studies that fosters their understanding of the interaction between Italian and their second area of expertise. A minimum of 24 units of undergraduate work beyond ITALLANG 21 must be completed.

Requirements for the minor include ITALLANG 22 and 23 (or equivalent); all three of the introductory series on Italian literature and culture (ITALLIT 127, 128, 129); and a minimum of one advanced course in language or literature numbered 113 and above. All courses must be chosen in consultation with the Director of Undergraduate Studies, who is responsible for evaluating all requests and individual study plans for the minor.

HONORS PROGRAM
Italian majors with a grade point average (GPA) of 3.3 (B+) or better in all Italian courses are eligible for department honors. Students interested in the honors program should consult the Italian undergraduate adviser early in their junior year. In addition to the requirements listed above, the student must submit to the Italian faculty a proposal for the honors essay by the end of Spring Quarter of the junior year. During the quarter, students may enroll in ITALLIT 189B while drafting and revising the proposal and conducting preliminary research. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in ITALLIT 189A while composing the thesis during Winter Quarter. Students who did not enroll in a 189B course in the junior year may enroll in ITALLIT 189B in Spring quarter of the senior year while revising the thesis, if approved by the thesis adviser. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of grade of ‘A’- or better by the thesis adviser, honors are granted at the time of graduation.

Honors College—The Department of French and Italian encourages honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages (DLCL). The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by Spring Quarter of the same calendar year. For more information, contact the undergraduate student services officer in the DLCL.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES
The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs: the minor in Literature and the minor in Modern Languages. Both of these minors draw on literature and language courses offered through this and other literature departments. See the “Literatures, Cultures, and Languages” section of this bulletin for further details about the minors and their requirements.

GRADUATE PROGRAMS IN FRENCH AND ITALIAN
Admission to the M.A. and Ph.D. Programs—Applications and admissions information may be obtained from Graduate Admissions in the Registrar’s Office, or at http://gradadmissions.stanford.edu. Applicants should read the general regulations governing degrees in the “Graduate Degrees” section of this bulletin. Applicants to the French program should have preparation equivalent to an undergraduate major in French; applicants to the Italian program should have done significant course work in Italian literature and/or Italian studies on the undergraduate level; in both cases, applicants should also have reached a high level of speaking and writing proficiency in the language. Previous study of an additional language is also highly desirable. Recent Graduate Record Examination (GRE) results are required, as are two writing samples representative of the applicant’s best undergraduate work. One sample should be in English, one in the language of study.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM IN FRENCH OR ITALIAN
Each year the department admits a small number of highly motivated undergraduates to the coterminal B.A. and M.A. degree in French or Italian. Applications must be submitted by January 31 of the senior year to the department chair and must include: a written statement of purpose, two letters of recommendation from faculty at Stanford, and a transcript. Students accepted into the coterminal program must have been undergraduate majors in the relevant language and must meet all requirements both for the B.A. and the M.A.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MASTER OF ARTS IN FRENCH
The terminal M.A. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a grade point average (GPA) of 3.3, as well as pass the master’s examination at the end of their training. To fulfill the requirements in a single year, enrollment must be for an average of 15 units per quarter.

Candidates must take one cultural history course (to be taken either inside or outside the Department of French and Italian). All remaining units are to be taken in advanced French literature courses (200 level or above), three of which must be concerned with the pre-revolutionary period of French cultural history.

Applications for admission to the Masters of Arts program must be received by the last Friday of March in the prior academic year. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

EXAMINATION
The terminal M.A. examination is normally administered two weeks before the end of the Spring Quarter by the two members of the examination committee, selected each year by the Director of Graduate Studies. It consists of two parts:

1. The written exam (two hours) tests the candidate’s general knowledge of French literature and is based on the same reading list as that for the Ph.D. qualifying exam (see below). The exam requires that the candidate answer two questions (out of three) in a manner that demonstrates his/her ability to synthesize and draw parallels between periods, genres, and systems of representation on the basis of the standard reading list. At least one question must be answered in French and two in English. Use of a dictionary is allowed.

2. If the student’s performance on the exam is deemed a ‘pass’ by two out of three of the members of the examining com-
requirements may be adjusted accordingly.

To a maximum of 45 units. Fellowship funding, teaching, and other service. 72 of the 135 units must be taken within the department. A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study and teach five language courses in the same. Applications for admission must be received by the last Friday of March in the prior academic year. It is preferred that applicants have an undergraduate degree in Italian or in a related field. Candidates for this degree are not eligible for financial aid or teaching assistan-

**MASTEr OF ARTS IN ITALIAN**

The terminal M.A. in Italian provides a combination of language, literature, civilization, and general courses designed to prepare secondary school, junior college, or college teachers. Reading knowledge of a second Romance language is required. French is recommended.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a GPA of 3.3 (B+). To fulfill the requirements in one year, students should enroll for an average of 15 units per quarter. The basic course program is nine graduate courses, one of which may be taken outside the department but must be in a related field. The option of substituting a master’s thesis for two literature courses is available.

Requirements for the completion of the M.A. include a comprehensive literature and language oral examination, which is normally given before the end of Spring Quarter. Before taking the exam, a candidate for the degree must submit to the Italian faculty a sample graduate seminar paper representative of the quality of his or her graduate work. On the basis of this paper, the results of the comprehensive examination, and the student’s overall progress, members of the department vote for or against awarding of the M.A. degree.

Applications for admission must be received by the last Friday of March in the prior academic year. It is preferred that applicants have an undergraduate degree in Italian or in a related field. Candidates for this degree are not eligible for financial aid or teaching assistantships.

**PH.D. IN FRENCH OR ITALIAN AND HUMANITIES**

The department participates in the Graduate Program in Humanities leading to the joint Ph.D. in French and Humanities, or Italian and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities. Although the Graduate Program in Humanities is not currently accepting new students, it continues to provide advising for students already enrolled as well as courses, open to all students. The University remains committed to a broad-based undergraduate education in the humanities, and a successor program is under consideration.

Apart from these requirements, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is usually done within the department, in order to ensure an adequate preparation for the qualifying examination. In the second and third years, however, the program of study is tailored to the specific interests of the student.

Employing the sixth quarter of graduate study, students must have satisfied all requirements to advance to candidacy for the Ph.D. Students must have passed the qualifying examination and satisfactorily completed at least 72 units of graduate-level study beyond the bachelor’s degree (incompletes can not be counted). A candidacy form, available from the student services officer, should be completed, signed and approved the department.

**TGR status**—Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form, may request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in FRENGEN 802 or ITALGEN 802 for zero units, in the appropriate section for their adviser.

**EXAMINATIONS**

There are three examinations: the qualifying exam, the field exam, and the University oral examination.

Qualifying Examination—The first oral examination, which takes place in the first week of October of the second year of study, tests the student’s knowledge of language and literature. The examining committee (see below) will schedule the precise exam date and time.

The exam is based on a standard reading list covering major works from all periods of literature in the language(s) of study, from the Middle Ages to the present day. The list may be expanded to reflect a student’s particular interests, but not abridged. Half of the exam takes place in the language of study, half in English (with the student free to choose which portion transpires in which language).

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct and synthetic manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion.

2. A 70-minute question and answer period in which the examining committee follows up on the candidate’s presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the language of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit.
The examining committee is determined yearly by the Department Chair.

Two weeks before the exam, the student must also submit three graduate seminar papers which he or she considers representative of the quality of his or her graduate work at Stanford.

On the basis of these papers, the results of the qualifying examination, and an evaluation of the student’s overall progress, the members of the student’s examining committee vote for or against admission to candidacy for the Ph.D. The terminal master’s degree may be awarded to students who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall case for or against promotion to candidacy is deemed uncertain, students may be asked either to retake the qualifying exam, to submit a new paper, or to continue their study on a probationary basis. Subject to approval by the Director of Graduate Studies and department chair, students already holding an advanced degree in the relevant area may be excused from the qualifying exam. However, they must present a formal request to the Director of Graduate Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

Field Examination—The second oral examination, which normally takes place in the Fall Quarter of the third year of study, consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her adviser and the Director of Graduate Studies. The student should design this research project so that it has the breadth and focus of a book he or she might write or a seminar he or she might teach. The student should discuss the proposed topic with the Director of Graduate Studies before proceeding, and the quarter in which he or she plans to take the exam; together they choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student’s adviser.) In addition to these two members, the examination committee includes the Director of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee. This presentation is followed by a 20-minute discussion.

2. An 80-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered, and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student’s field. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee no later than two weeks preceding the examination; two copies of the final reading list must be given to the student services officer for the Division of Languages, Cultures, and Literatures (one for the student’s file and one for a special file which subsequent students can consult).

Each member of the committee is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student’s credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student’s research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

The University Oral—The University Ph.D. examination takes the form of a dissertation proposal defense. It is to be taken no later than Autumn Quarter of the student’s fourth year (or third year, if the student received four years of funding). Normally students put one, and at most two, full-time quarters of study into preparation for the exam. Students must complete minimum course requirements (as listed in this bulletin) and all language and course requirements before the quarter in which they take the University oral examination. By the time of the examination, they must have no outstanding incompletes. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the foreign language the student presents to meet the language requirements.

Two weeks before the exam, at the latest, the student must submit to the committee a 25-35 page proposal (two other copies must be given to the student services officer of the Division of Languages, Cultures, and Literatures, one of which will be added to a file for subsequent students to consult). This proposal must contain the following parts: 1) a clear presentation of the student’s central thesis; 2) a synthetic overview of the dissertation; 3) a description of the methodology that will be used in the dissertation; 4) an in-depth discussion of current secondary sources on the topic. The student must also present a bibliography, but this does not take the place of 4. The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) will question the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam.

The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student’s overall preparation as a candidate for the Ph.D. After the University oral, only the certification of the final dissertation by the student’s reading committee must be obtained before conferment of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student’s preparation to write a dissertation at the highest standards of excellence.

Evaluation—At the end of each examination, the committee meets briefly and immediately informs the student whether he or she has passed. In the week following, the student is expected to meet individually with members of the committee to discuss strengths and weaknesses revealed during the examination.

Dissertation

The fourth and (if necessary) fifth years of graduate study are devoted to writing and researching the doctoral dissertation. The doctoral dissertation should demonstrate the ability to carry out
DOCTOR OF PHILOSOPHY IN FRENCH

The Department of French and Italian offers three Ph.D. programs: a Ph.D. in French, a Ph.D. in Italian, and a Ph.D. in French and Italian. Requirements for each separate Ph.D. program are listed first, followed by general requirements. All requirements are binding.

FRENCH

The Department of French and Italian provides students with the opportunity to pursue advanced work in French language, literature, cultural history, and Francophone studies within a uniquely flexible interdisciplinary framework. Unlike conventional Ph.D. programs, it encourages students to construct a highly individualized course of study integrating specialization in a particular literary period or area with work in such fields as art history, classics, film studies, the history of science and technology, linguistics, literary theory, music, and philosophy. The program is founded on the belief that such a balance between period/area specialization and interdisciplinary breadth is not only desirable but essential in a field such as French Studies. Students in the Ph.D. program are normally admitted as French Fellows on a four- to five-year fellowship plan that integrates their financial support with rigorous training as scholars and as prospective university faculty.

Students admitted to the program work closely with the Director of Graduate Studies in structuring a plan consistent with their needs and interests. Aside from the benefits of the program’s flexible structure, a number of unique resources are available to students. The French section’s exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris.

Language Requirements—Attaining a native or near-native fluency in French is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree. In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and his or her adviser as a function of the student’s area of specialization. Such proficiency may be demonstrated either by successfully completing a third-year level or above undergraduate course or, better, a graduate seminar in the language in question; or by passing an exam that establishes a third-year or above level of competence in writing, reading, and speaking. (In no case is passage of a standard reading competence exam considered sufficient.) In the case of ancient Greek and Latin, a high level of proficiency means a level superior to a second year collegiate level of proficiency in reading and writing.

The second foreign language requirement should be completed as soon as possible, but in any case not later than the end of the third year for students who entered the program without an M.A., and not later than the end of the second year for students who entered the program with a master’s degree. Completion of the language requirements is a prerequisite for taking the University Oral Examination.

DOCTOR OF PHILOSOPHY IN ITALIAN

Stanford’s Ph.D. program in Italian offers the opportunity for advanced work in Italian literature and studies within a flexible interdisciplinary framework. It is independent of the Ph.D. program in French and aims to encourage students to bring broad methodological and interdisciplinary concerns to bear on the study of Italian literature. While it places primary emphasis on developing a command of Italian literature as a whole, it allows students to construct a highly individualized course of study, integrating specialization in a particular literary period with work in such fields as art history, classics, comparative literature, feminist studies, film, French, history, history of science, linguistics, literary theory, Medieval or Renaissance studies, philosophy, and religion. The program is founded on the belief that balance between period specialization and interdisciplinary breadth is essential in a small field such as Italian studies, particularly given the diversity of the Italian literary canon which extends over many disciplines.

Students admitted into the Ph.D. program in Italian work closely with the adviser in structuring a plan of study appropriate to needs and interests. Such a plan usually involves a mix of teaching and courses taken within the Italian program, courses taken in other departments, and independent work under supervision of a member of the Italian faculty, thus integrating financial support with training as scholars and prospective university teachers. Assuming satisfactory academic progress, fellowships are typically offered for three or four years. Graduate-level work completed elsewhere may be counted as fulfilling part of the requirements for the degree. Students in the fifth year normally apply for outside fellowships or part-time teaching positions in the department.

Aside from the benefits of the program’s structure and fellowship plan, a number of unique resources are available to Ph.D. students in Italian at Stanford. During their years of study, students may be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty. The Florence center, located in a palazzo along the Arno, is near important Florentine libraries and archives and the University of Florence. Graduate students also have at their disposal the resources of La Casa Italiana, a residential theme house which serves as an Italian cultural center and hosts such events as colloquia, lectures, and film series.

Language Requirements—As soon as possible, but not later than the end of the third year, the candidate must have passed reading examinations in two additional foreign languages. If the candidate’s period of concentration is earlier than the Romantic period, one of these must be Latin; if Romantic or later, French. Completion of the language requirement is a prerequisite for taking the University Oral Examination.
Aside from the benefits of the program’s flexible structure, a number of unique resources are available to students. The French Section’s exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris. Students may also be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty.

Language Requirements—Attaining a native or near-native fluency in both French and Italian is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree.

For students specializing in areas (a) medieval and renaissance and (b) renaissance and early modern, proficiency in Latin equivalent to a second year collegiate level of proficiency (the equivalent of CLASSLAT 101, 102, and 103) in reading is also required. Such proficiency may be demonstrated by successfully completing a course in the language in question (at least second-year level, but preferably a graduate seminar); or by passing an exam that establishes a second-year or above level of competence. In no case is passage of a standard reading competence exam considered sufficient.

For students specializing in area (c) modern and contemporary, proficiency in a third language (beyond French and Italian) is not required; students are, however, encouraged to acquire competency in a third language or area that is relevant to their research (e.g., German, Film Studies).

The language requirements should be completed as soon as possible, but in any case not later than the end of the third year for students who entered the program without a master’s degree, and not later than the end of the second year for students who entered the program with an external master’s degree. Completion of the language requirements is a prerequisite for taking the University Oral Examination.

Distribution of Elective Courses—Students must take a minimum of four advanced courses on French literature and culture, and four advanced courses on Italian literature and culture.

Qualifying Examination—Students may take either two qualifying exams, one in French and one in Italian, or a single qualifying exam in French and Italian. The combined French and Italian qualifying exam covers one of three periods, (a) medieval and renaissance, (b) renaissance and early modern, or (c) modern and contemporary. For each period it is based on a standard reading list. The list may be expanded to reflect a student’s particular interests, but not abridged. One third of the combined exam takes place in English, one third in French, and one third in Italian (with the student free to choose which portion transpires in which language).

An M.A. in French and Italian is awarded in the eventuality that a student completes the qualifying examination but whose work is judged insufficient for admission to candidacy for the Ph.D. This M.A. option is open only to students approved for the French and Italian Ph.D., and is not available to coterminal students, to M.A.-only students, or to Ph.D. students in French only or Italian only.

If, at the qualifying exam stage, a student’s work is judged insufficient for admission to candidacy for the Ph.D., the student may petition to continue in French only or Italian only. This petition is reviewed by the qualifying exam committee, the relevant director of graduate studies, and the chair of the Department of French and Italian.

Special Topic Examination—The chosen topic must focus equally on French and Italian literature and culture, and actively explore their relationship. Two weeks before the exam, the student must also submit not one but two graduate seminar papers, one in French on a French topic and one in Italian on an Italian topic.

University Oral Examination—The reading list should include works in both French and Italian in all genres relevant to the period covered.

Dissertation—The dissertation topic must include a substantial quotient of material from both the French and the Italian tradition, and the dissertation must include, either (1) at least one chapter on French materials and one chapter on Italian materials, or (2) at least two chapters focusing on a comparison between French and Italian materials.

Teaching—Out of the five courses the student is required to teach, at least one must be a French language course and at least one an Italian language course.

PH.D. MINOR IN FRENCH AND ITALIAN

The Ph.D. may be combined with a minor in a related field, including Comparative Literature, Linguistics, Modern Thought and Literature, Art History, History, Music, Philosophy, and Spanish. Ph.D. candidates in French may minor in Italian, and vice versa. Students interested in a minor should design their course of study with their adviser(s).

Ph.D. Minor in French Literature—The department offers a minor in French Literature. The requirement for a minor in French is successful completion of 24 units of graduate course work in the French section. Interested students should consult the graduate adviser.

Ph.D. Minor in Italian Literature—The department offers a minor in Italian Literature. The requirement for a minor in Italian is a minimum of 24 units of graduate course work in Italian literature. Interested students should consult the graduate adviser.

OVERSEAS STUDIES COURSES IN FRENCH AND ITALIAN

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

FLORENCE

OSPFLOR 34. The Woman in Florentine Art. 4 units, Timothy Verdon, GER:DB:Hum, EC:Gender
OSPFLOR 106V. Italy: From an Agrarian to a Post-industrial Society. 5 units, Giuseppe Mammarella, GER:DB:SocSci, EC:GlobalCom
OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization. 4 units, Timothy Verdon, GER:DB:Hum
OSPFLOR 134F. Modernist Italian Cinema. 5 units, Ermelinda Campani, GER:DB:Hum

PARIS

OSPPARIS 31. American Writers in 20th Century Paris. 5 units, Cecile Alduy, GER:DB:Hum
OSPPARIS 47. Women in French Cinema. 4 units, Cecile Alduy, GER:DB:Hum, EC:Gender

WINTER QUARTER

FLORENCE

OSPFLOR 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought. 5 units, Paolo Galluzzi, GER:DB:Hum
OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition. 4 units, Filippo Rossi, Timothy Verdon, GER:DB:Hum
OSPFLOR 49. The Cinema Goes to War: Fascism and World War II As Represented in Italian and European Cinema. 5 units, Ermelinda Campani, GER:DB:Hum
OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence. 4 units, Timothy Verdon, GER:DB:Hum
PARIS
OSP-PARIS 38. First Language Acquisition, with Emphasis on French. 4 units, Eve Clark
OSP-PARIS 56. From Text to Stage: Transformation of French Theater in the 19th and 20th Centuries. 4 units, Marie Madeleine Mervaut-Roux, GER:DB:Hum
OSP-PARIS 186F. Contemporary African Literature in French. 4 units, Françoise Rullier, GER:DB:Hum, EC:GlobalCom

SPRING QUARTER
FLORENCE
OSP-FLO 54. High Renaissance and Maniera. 5 units, Timothy Verdon, GER:DB:Hum
OSP-FLO 67. Women in Italian Cinema: Maternity, Sexuality and the Image. 4 units, Ermelinda Campani, GER:DB:Hum, EC:Gender

PARIS
OSP-PARIS 30. The Avant-garde in France through Literature, Art and Theater. 4 units, Tiphaine Karsenti, GER:DB:Hum

GERMAN STUDIES
Chair: Russell A. Berman
Director of Graduate Studies: Amir Eshel
Director of Undergraduate Studies: Martón Dornbach
Professors: Russell A. Berman, Elizabeth Bernhardt, Amir Eshel, Orrin W. Robinson III (on leave, Autumn)
Assistant Professors: Adrian Daub, Martón Dornbach, Chatrini Douvaldzi
Senior Lecturers: William E. Petig, Kathryn Strachota
Lecturer: Shafiq Shamel
Visiting Professors: Karen Kramer (Autumn), Karl Heinz Bohrer (Spring)
* recalled to active duty

Department Office: Building 260, Room 212
Mail Code: 94305-2030
Phone: (650) 723-3266
Email: germanstudies@stanford.edu
Web Site: http://germanstudies.stanford.edu

Courses offered by the Department of German Studies are listed on the Stanford Bulletin’s ExploreCourses web site under the subject codes GERGEN (German General) and GERALIT (German Literature). For courses in German language instruction with the subject code GERALANG, see the “Language Center” section of this bulletin.

The department’s goal is to provide students with the linguistic and analytic ability to explore the significance of the cultural traditions and political histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, history, literature, media theory, philosophy, and political science, encourages students to evaluate broader and contradictory legacies of modernity, such as how the literary, artistic, and cultural responses to the belated and rapid modernization of Germany allow for reflection on the modern condition in general.

Similarly, the German experience of national identity and political unification sheds light on wider issues of cultural cohesion and difference, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies not only encourages the student to consider the effects of German-speaking thinkers and artists on the modern world, but also provides a lens through which the contours of the present and past can be evaluated.

The department offers students the opportunity to pursue course work at all levels in the languages, cultures, literatures, and intellectual histories of the German-language traditions. Whether interested in German literature or the influence of German thought on other fields in the humanities, students find a broad range of courses covering language acquisition and refinement, literary history and criticism, cultural history and theory, history of thought, continental philosophy, and linguistics.

By carefully planning their programs, students may fulfill the B.A. requirements for a double major in German Studies and another subject. An extended undergraduate major in English and German literature is available, as are coterminal programs for the B.A. and M.A. degrees in German Studies. Doctoral students may elect Ph.D. minors in Comparative Literature, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German Studies and related fields pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrand Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material to the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The department also has its own reference library.

The Republic of Austria has endowed the Distinguished Visiting Professorship in Austrian Studies. The professorship rotates on a yearly basis through several departments.

Haus Mitteleuropa, the German theme house at 620 Mayfield, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

UNDERGRADUATE PROGRAMS IN GERMAN STUDIES

STANFORD IN BERLIN

Undergraduates interested in Germany are encouraged to enroll in the Berlin program, which is open for academic study during the Autumn, Winter, and Spring quarters. The program also offers internships in German industry, government, and cultural organizations year round. Through the Center, students with at least two years of college-level German can also take courses at the Freie Universität, Technische Universität, or Humboldt Universität. Most students live in homes with German hosts.

Most credits earned in Berlin can be applied to the undergraduate major in German Studies. All students who are planning to study at Stanford in Berlin or engage in an internship are encouraged to consult with their major Director of Undergraduate Studies and the Overseas Studies office about integrating work done abroad into their degree program. Returning interns who wish to develop a paper based on their experience should enroll in GER-LIT 298. More detailed information is available at the Overseas Studies Program in Sweet Hall or with the faculty adviser in the department.

BACHELOR OF ARTS IN GERMAN STUDIES

Majors must demonstrate basic language skills, either by completing GERALANG 1,2,3, First-Year German, or the equivalent such as an appropriate course of study at the Stanford in Berlin Center. Students then enroll in intermediate and advanced courses on literature, culture, thought, and language. Requirements for the B.A. include at least three courses at the 120-139 level (introductory surveys on topics in German literature, thought, linguistics, and culture). Every major is expected to complete at least one Writing
in the Major (WIM) course. Including GERLANG 1,2,3, the total requirement for the B.A. is a minimum of 60 units of work; the German and Philosophy option requires 65 units. At the discretion of the Director of Undergraduate Studies, appropriate courses offered by other departments or relevant transfer units can be accepted toward this total, up to a maximum of 25 units. All GERLANG courses count as department electives. Courses counted toward degree requirements must be taken for a letter grade unless that grading option is not available.

Requests for exceptions to any of these requirements must be referred to the Director of Undergraduate Studies who, in consultation with the Chair, makes a final decision.

Internships—Internships in Germany are arranged through the Overseas Studies Program. In addition, students may consult with the department to arrange local internships involving German language use or issues pertaining to Germany or Central Europe. Interns who prepare papers based on their experience enroll in GERLIT 298.

Extended Major in English and German Literatures—Students may enter this program with the consent of the chairs of both departments. See the “English” section of this bulletin.

Multiple Majors—Students can combine a major in German Studies with a major in any other field. By choosing courses in such disciplines as history, international relations, or economics, students can prepare themselves in the area of Central Europe. Multiple majors are especially recommended for students spending one or more quarters at the Stanford in Berlin Center.

Degree Requirements—

Three 120-139 courses:

GERGEN 120Q. The Culture of Pessimism
GERGEN 125. Varieties of Freedom in Modern German Culture
GERLIT 120Q. Is God Dead?
GERLIT 121. The Viennese Coffeehouse
GERLIT 129. The German Novella
GERLIT 130. Brecht and Modern Aesthetics
GERLIT 131B. German Lyric and the Oriental Tradition

One Writing in the Major course (WIM):

GERLIT 127A. The German Ballad
GERLIT 135. Outsiders and Outcasts: Introduction to German Prose Fiction
GERLIT 123N. Brothers Grimm Fairy Tales

Elective courses:

GERGEN 104N. Resistance Writings
GERGEN 161. Wagnerian Echos
GERGEN 177. Culture and Politics in Modern Germany
GERLIT 201. Conservative Revolution
GERLIT 211. Theodor W. Adorno
GERLIT 212. The Invention of Experience
GERLIT 221. Memory and Modernism
GERLIT 221A. Modernism and the Jewish Voice
GERGEN 246. Kant’s Third Critique and Its Repercussions
GERGEN 268A. Freud and Psychoanalysis
GERGEN 291A. Foundations of Psychoanalysis/ Oedipus, Hamlet, Moses: Archetypes of the Hero
GERLIT 177. Movies from GDR
GERLIT 217. Holderlin’s Poetry
GERLIT 159. Reading Dutch
GERLIT 219. German Utopias and Dystopias
GERLIT 242. Narrative and Ethics
GERLIT 250C. Postwar German Culture and Thought: 1945-to the Present
GERLIT 258. German Dialect
GERLIT 369. Introduction to Graduate Studies

COGNATE COURSES

Credits earned for completion of the following cognate courses may be applied to unit requirements for the departmental major.

Autumn Quarter:

RELLIGST 278/378. Heidegger: Hermeneutics of the Self

Winter Quarter:

CLASGGN 6N. Antigone: From Ancient Democracy to Contemporary Dissent (Same as DRAMA 12N)
ENGLISH 140A. Creative Resistance
MUSIC 17N. Operas of Mozart
MUSIC 312A. Aesthetics and Criticism of Music, Ancients and Moderns: Plato to Nietzsche

Spring Quarter:

MUSIC 16N. Music, Myth, and Modernity: Wagner’s Ring Cycle and Tolkien’s Lord of the Rings (Same as GERLIT 16N)
MUSIC 312B. Aesthetics and Criticism of Music, Contemporaries: Heidegger to Today
PHIL 125/225. Kant’s First Critique

GERMAN AND PHILOSOPHY

The German and Philosophy major option offers students the opportunity to combine studies in literature and philosophy. Students take most of their courses from departments specializing in the intersection of literature and philosophy. This option is not declared in Axess; it does not appear on the transcript or diploma. The German and Philosophy major option requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. 35 units in German Studies, including:
   a. three courses at the 120-139 level
   b. a WIM course
2. GERGEN 181/PHIL 81, the gateway course in philosophy and literature, preferably in the sophomore year.
3. Requirements in Philosophy:
   a. PHIL 80. Prerequisite: introductory philosophy class
   b. a course in the PHIL 180 series
   c. a course in the PHIL 170 series
   d. two courses in the history of philosophy numbered above 170
4. Two additional elective courses of special relevance to the study of philosophy and literature as identified by the committee in charge of the program. In German, these courses include the GERGEN 120Q, Is God Dead?; GERGEN 122Q, The Culture of Pessimism; GERGEN 125, Varieties of Freedom in Modern German Culture; GERGEN 211, Theodor W. Adorno; GERGEN 212, The Invention of Experience; GERGEN 246, Kant’s Third Critique; GERGEN 268A, Freud and the Enterprise of Psychoanalysis; and other advanced seminars in German thought and literature. Students must consult with their advisers, the Director of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.
5. Capstone: One of the courses must be taken in the student’s senior year. When choosing courses, students must consult with their advisers, the director of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.

6. Units devoted to meeting the department’s language requirement are not counted toward the 65-unit requirement.

The capstone seminar and the two related courses must be approved by both the German Studies Director of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 3b, 3c, and 3d, and are not permitted under any circumstances for items 2, 3a, and 5. Up to 10 units taken in the Philosophy Department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

HONORS

 Majors with a minimum grade point average (GPA) of 3.3 in German courses are eligible for departmental honors. Students interested in the honors program should consult the undergraduate adviser early in their junior year. The essay topic is chosen in consultation with a faculty member of the department, and opportunities to start research projects are offered at the Stanford in Berlin
MINOR IN GERMAN STUDIES

The department offers two minor options. *German Language and Culture*—Students may choose to minor in German Language and Culture if they are particularly interested in developing a strong ability in the German language, or in pursuing linguistic issues pertinent to German. Students satisfy the requirements for the minor in German Language and Culture by completing 35 units of course work, including at least three courses at the 100-129 level in either GERLANG or GERLIT, taught in German. Study at the Stanford in Berlin Center for at least one quarter is highly recommended.

*German Cultural Studies*—Students who wish to study German literature, culture, or thought, without necessarily acquiring facility in the German language, may pursue a minor in German Cultural Studies. Students meet the requirements for the minor in German Cultural Studies by completing 35 units of course work in German literature, culture, and thought in translation, including at least three courses at the 130 or 140 level.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers undergraduate minor programs in Literature and in Modern Languages. Both of these minors draw on literature and language courses offered through this and other literature departments. See the “Literatures, Cultures, and Languages” section of this bulletin for further details about the minors and their requirements.

GRADUATE PROGRAMS IN GERMAN STUDIES

The University requirements for the M.A. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

COTERMINAL PROGRAMS

Students may elect to combine programs for the B.A. and M.A. degrees in German Studies. For details, see the “Undergraduate Degrees and Programs” section of this bulletin.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MASTER OF ARTS IN GERMAN STUDIES

This program is designed for those who do not intend to continue studies through the Ph.D. degree. Students desiring the M.A. degree must complete a minimum of 45 units of graduate work. If students enroll for three quarters for a minimum of 15 units per quarter, they can fulfill the M.A. requirements in one year. The program normally includes at least one course in each of the three areas of concentration: language and linguistics, literature, and thought. In addition, students must take graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

M.A. candidates must take an oral examination toward the end of their last quarter.

DOCTOR OF PHILOSOPHY IN GERMAN STUDIES

The requirements for the Ph.D. include:

1. A minimum of 36 graduate units during the first year of graduate study, 45 units for the completion of the M.A., and a minimum of 9 units per quarter during the six quarters following the first year. A total of 135 units is required for the Ph.D.; doctoral candidates are advised to complete at least one course with each member of the department.
2. A reading knowledge of one language other than English and German, normally French. Students in Medieval Studies must also have a reading knowledge of Latin.
3. A master’s oral examination, unless the student has an M.A. upon entering the program
4. A qualifying paper
5. A qualifying examination
6. The University oral examination
7. A dissertation

During the first year of work, the student should select courses that provide an introduction to the major areas of the discipline. During Spring Quarter of the first year, students, except those admitted with a master’s degree, must take an oral M.A. examination. During the one-hour examination, the student is questioned by three faculty members, two of whom are regular faculty in the department, chosen by the student, on work undertaken in specific graduate courses.

By July 1 of the summer following the first year of graduate study, students should present as a qualifying paper an example of their course work. Although ordinarily not meant to represent an original contribution to scholarship, it should demonstrate the candidate’s ability to grasp complex subject matter with sufficient competence to organize materials and to present arguments in a clear and concise manner commensurate with scholarly standards. The paper is submitted to the department chair, who passes it on for approval by the student’s faculty adviser and a second reader appointed by the chair in consultation with the Director of Graduate Studies.

Students who enter the program with a master’s degree from another institution must submit, in lieu of a qualifying paper, a master’s thesis or a major research paper as evidence of ability to pursue advanced scholarly work.

At the end of the sixth quarter of study (and only if the qualifying paper has been accepted), the student takes a one-hour oral qualifying exam with two faculty members from German Studies, the student’s chosen adviser, and another faculty member appointed by the chair. The purpose of this examination is to demonstrate a broad familiarity with the literature of the major periods, movements, and some major figures. Only after completion of the qualifying procedure will the department approve the student’s admission to candidacy. A student who fails the qualifying examination may retake it once at the beginning of the seventh quarter.

After passing the qualifying exam, the student should consult with appropriate faculty members in order to develop a dissertation topic. It is important to consider scholarly significance, access to resources, and feasibility of completion within a reasonable period. The student then prepares a preliminary statement describing the topic (no more than five pages), which is circulated to prospective committee members for discussion at a meeting normally held during the eighth quarter. The purpose of this meeting is to provide the student with feedback and guidance in the preparation of the formal prospectus.

The University oral examination in the Department of German Studies is based on the dissertation prospectus. The prospectus, normally 25 pages plus bibliography, elaborates on the topic, the proposed argument, and the organization of the dissertation. It must be distributed to the committee members and the outside chair at least two weeks before the formal University oral examination. Students should plan this examination for the end of the third year or the end of the subsequent summer. The examination lasts approximately two hours, permitting each of the four examin-
ers a 25-minute question period and reserving an optional ten minutes for questions from the chair of the examination.

Students, regardless of their future fields of concentration, are expected to acquire excellence in German and a thorough knowledge of the grammatical structure of German. The department expects Ph.D. candidates to demonstrate teaching proficiency in German; APPLING 201, The Learning and Teaching of Second Languages, is required. The teaching requirement is five quarters during the second and third years of study. The fifth and final quarter of teaching may be postponed until the student has worked extensively on the dissertation and may be devoted to a literary topic related to the dissertation. Such courses are subject to departmental review procedures.

The department expects candidates to demonstrate research skills appropriate to their special areas of study. The requirement can be fulfilled in the capacity of either a University Fellow or a Research Assistant.

Graduate students are also advised to start developing skills in the teaching of literature by participating in the teaching of undergraduate literature courses. Students can earn up to 3 units of graduate credit for practice teaching in literature.

Regular attendance at the departmental colloquium is mandatory. Each student is expected to make a formal presentation at the colloquium for public discussion.

PH.D. IN GERMAN STUDIES AND HUMANITIES

The department of German Studies participates in the Graduate Program in Humanities leading to the joint Ph.D. in German and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities. Although the Graduate Program in Humanities is not currently accepting new students, it continues to provide advising for students already enrolled as well as courses, open to all students. The University remains committed to a broad-based undergraduate education in the humanities, and a successor program is under discussion by the faculty of the Division of Literatures, Cultures, and Languages. For further information, please consult Gregory Freidin, the director of the program; the list of courses and events may be found on the program web site at http://ish.stanford.edu/programs/graduate.

GERMAN STUDIES AND A MINOR FIELD

Students may work toward a Ph.D. in German Studies with minors in such areas as comparative literature, modern thought and literature, linguistics, or history. Students obtaining a Ph.D. in such combinations may require additional training.

OVERSEAS STUDIES COURSES IN GERMAN STUDIES

For course descriptions and additional offerings, see the listings on the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

SPRING QUARTER

BERLIN

OSPBER 62. Shades of Green: Environmental Policy in Germany and the U.S. in Historical Perspective. 5 units, Sylke Tempel, GER:DB:SocSci

OSPBER 101A. Contemporary Theater. 5 units, Karen Kramer, GER:DB:Hum

OSPBER 174. Sports, Culture and Gender in Comparative Perspective. 5 units, Wolf-D. Junghanns, GER:DB:SocSci, EC:Gender

HISTORY

Emeriti: (Professors) Carl N. Degler, Peter Duus, Terence Emmons, Harold L. Kahn, David M. Kennedy, George H. Knoles, Richard W. Lyman, Mark Mancall, Peter Paret, Paul A. Robinson, Paul Seaver, James J. Sheehan, Rixford K. Snyder, Peter Stansky, David B. Tyack, Lyman P. Van Slyke; (Senior Lecturer) Joseph J. Corn

Chair: Paula Findlen

Associate Professors: David R. Como, Robert Crews, Zephyr Frank, Jessica Riskin, Matthew H. Sommer, Amir Weiner, Caroline Winterer

Assistant Professors: James P. Daughton, Sean Hanretta, Allyson V. Hobbs, Aishwary Kumar, Kathryn Miller, Yumi Moon, Thomas S. Mullaney, Priya Satia, Laura Stokes, Jun Uchida

Professor (Teaching): Herbert Klein

 Courtesy Professors: Giovanna Ceserani, Lawrence Friedman, Leah Gordon, Avner Greif, Amalia Kessler, Larry Kramer, David F. Labaree, Reviel Netz, Walter Scheidel, Sam Wineburg, Gavin Wright

Senior Lecturers: Katherine Jollock, Martin W. Lewis

Acting Assistant Professor: James M. Ward

Lecturers: Heather Ferguson, Alan Mikhail, Bradley Naran, Edith Sheffer

Department Office: Building 200, Room 113
Mail Code: 94305-2024
Phone: (650) 723-2651
Web Site: http://history.stanford.edu

Courses offered by the Department of History are listed under the subject code HISTORY on the Stanford Bulletin’s ExploreCourses web site.

MISSION OF THE DEPARTMENT

History courses teach the analytical, interpretive, and writing knowledge and skills necessary for understanding the connections between past and present. History is a pragmatic discipline in which the analysis of change over time involves sifting the influences and perspectives that affect the course of events, and evaluating the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into persuasive analysis lies at the heart of the department’s teaching. Graduates with a history major pursue careers and graduate study in law, public service, business, writing, education, and journalism.

DEGREES OFFERED

The Department of History offers the following degrees: Bachelor of Arts, coterminal Bachelor of Arts and Master of Arts, Master of Arts, and Doctor of Philosophy.

BACHELOR OF ARTS IN HISTORY

Note: The following History Bachelor of Arts degree requirements apply to students declaring the history major on or after September 1, 2008. Students who declared on or before August 31, 2008 should consult the 2007-2008 edition of the Stanford Bulletin for the History B.A. degree requirements.

PREREQUISITES FOR THE MAJOR

Before declaring the History major, students must take two lecture courses. Fulfilling this requirement are courses numbered...
HISTORY 101-199. (Winter/Spring IHUM History offerings are also allowed.) The choices for 2009-10 are:  
IHUM 11A,B. Origins of the World: Europe and Latin America  
HISTORY 102. The History of the International System  
HISTORY 103E. History of Nuclear Weapons  
HISTORY 106A. Global Human Geography: Asia and Africa  
HISTORY 106B. Global Human Geography: Europe and Americas  
HISTORY 106C. Global Historical Geography  
HISTORY 110A. Europe from Late Antiquity to 1500  
HISTORY 110B. Early Modern Europe  
HISTORY 110C. Introduction to Modern Europe  
HISTORY 120A. Russian Civilization from Beginnings to the Enlightenment  
HISTORY 123. Reform and Revolution in Modern Russia, 1856-2009  
HISTORY 125. Twentieth-Century Eastern Europe  
HISTORY 132A. Enlightenment and the Arts  
HISTORY 133A. Blood and Roses: The Age of the Tudors  
HISTORY 134A. European Witch Hunts  
HISTORY 135. History of European Law, Medieval to Contemporary  
HISTORY 137. The Holocaust  
HISTORY 138A. Germany and the World Wars, 1870-1990  
HISTORY 139. Modern Britain and the Empire  
HISTORY 140. World History of Science, Technology and Medicine: From Prehistory to the Scientific Revolution  
HISTORY 141A. The Emergence of Modern Medicine: The Middle Ages and Renaissance  
HISTORY 142. Darwin in the History of Life  
HISTORY 144. Gender in Science, Medicine and Engineering  
HISTORY 145B. Africa in the Twentieth Century  
HISTORY 145C. Africa in the Age of Empire  
HISTORY 147. History of South Africa  
HISTORY 150A. Colonial and Revolutionary America  
HISTORY 150B. Nineteenth-Century America  
HISTORY 150C. The United States in the Twentieth Century  
HISTORY 151. Slavery and Freedom in American History  
HISTORY 154. 19th Century U.S. Cultural and Intellectual History, 1790-1860  
HISTORY 154A. Religion and American Society  
HISTORY 158. The United States Since 1945  
HISTORY 165. Mexican American History through Film  
HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle  
HISTORY 168. U.S. History in Film: Since World War II  
HISTORY 170. Colonial Latin America  
HISTORY 181B. The Middle East in the Twentieth Century  
HISTORY 181C. Social and Cultural History of Modern Shi’ism  
HISTORY 182B. The Three Empires of Islam: The Ottomans, Safavids, and Mughals  
HISTORY 182C. From Prophet to Empire: The Making of the Muslim Middle East, 600-1500  
HISTORY 185B. Jews in the Modern World  
HISTORY 191D. China: The Northern and Southern Dynasties  
HISTORY 193. Late Imperial China  
HISTORY 194B. Japan in the Age of the Samurai  
HISTORY 195. Modern Korean History  
HISTORY 195C. Modern Japanese History  
HISTORY 196. Modern South Asia  
HISTORY 198. The History of Modern China

**BACHELOR OF ARTS REQUIREMENTS**

History majors are required to complete the following:

1. Completion of a minimum of 63 units and at least 13 courses of at least 3 units each, to include:
   a. one Sources and Methods seminar (HISTORY 1S-99S)
   b. two 200-level undergraduate colloquia (HISTORY 200-298)
   c. at least one other small group course, to be chosen among the department’s undergraduate colloquia, research seminars, or Stanford Introductory Seminars.
   d. two lecture courses, one of which must be either a Europe survey course (such as HISTORY 110A,B,C) or a United States survey course (such as HISTORY 150A,B,C); the second must be a lecture course in African, Asian, Middle East, or Latin American History. Students may count courses they took as pre-requisites to the major for this requirement.

2. Courses comprising the 63 units must be taken for a letter grade, and the student must maintain a grade point average (GPA) in History courses of 2.0 or higher.

3. At least nine courses must be taken from within the Stanford Department of History. (Transfer students and those who study abroad may be granted exemptions from this requirement at the discretion of the Director of Undergraduate Studies.)

4. Completion of the Writing in the Major requirement. This requirement is satisfied by completing a Research Seminar for Majors (HISTORY 209S) and writing a 20-25 page essay based on original research and including at least two drafts. The Research Seminar for Majors may be taken in either the junior or the senior year. Students must complete the Sources & Methods seminar before enrolling in the Research Seminar.

5. At least six quarters of enrollment in the major. Each candidate for the B.A. in History should declare the major by the Autumn Quarter of the third year of study or earlier, if possible.

6. One Directed Writing (299W) or Directed Research (299S) taken for 3-5 units and for a letter grade may be applied toward the thirteen courses required for the B.A. in History.

7. Capstone: The History department organizes a series of luncheon workshops in May, at which students present their research essays and honors theses. Completion of the major requires planning. History majors should plan to meet with their faculty advisers twice yearly, once in the Autumn and once in the Winter or Spring quarters. These meetings should take place within the first three weeks of the quarter, before the add/drop deadline.

The department also encourages students to acquire proficiency in foreign languages and study at one of Stanford’s overseas programs. Such studies are not only valuable in themselves; they can provide an opportunity for independent research and a foundation for honors essays and graduate study.

Advanced Placement credits do not fulfill any major requirements.

For further information on History courses’ satisfaction of major requirements, see http://history.stanford.edu/courses.

**WRITING IN THE MAJOR (WIM) REQUIREMENT**

History’s Writing in the Major requirement is satisfied by completing a Research Seminar for Majors.

This course may be taken in either the junior or senior year, but not before completing the sources and methods seminar requirement. Students will write a 20-25 page research essay. Original research and revision are important parts of the research essay. Students must conduct substantial research in the libraries and must submit at least two drafts (a rough draft as well as a final draft) of the essay. Any student wishing to write an honors thesis must take the Research Seminar for Majors in his or her junior year and use it to begin work on the thesis; this work can take the place of a research essay.

**Note:** HISTORY 209S fulfills the WIM requirement only. It does not fulfill geographical requirements or small group course requirements.

Students will select their research topics based on the general topic of each quarter’s offering.
OVERSEAS STUDIES OR STUDY ABROAD

Courses offered by Stanford’s Bing Overseas Studies Program and appearing on the History Department’s Cognate Course List automatically receive credit towards the major or minor in History. Course work completed in non-Stanford Study Abroad programs will be evaluated for major/minor credit by designated History Department faculty on a case-by-case basis. Students in non-Stanford Study Abroad programs are advised to take classes with reading and writing components comparable to History Department course loads.

HISTORY FIELDS OF STUDY OR DEGREE OPTIONS

The Department of History offers five tracks to the B.A. in History. These tracks are not declared on Axess. The tracks are:

- General History
- History, Literature, and the Arts
- History of Science and Medicine
- History and the Law
- Public History/Public Service

The General History track emphasizes breadth of study among historical areas and periods as well as concentration in one selected field. The four tracks with interdisciplinary emphasis (History, Literature and the Arts, History of Science and Medicine, History and the Law, and Public History/Public Service) combine the study of history with the methods and approaches of other disciplines, and involve substantial course work outside of History.

GENERAL HISTORY TRACK

In addition to completing the requirements for all History majors, the student in the General History track is required to satisfy breadth and concentration requirements.

1. Breadth Requirements: to ensure chronological and geographical breadth, at least two courses must be completed in a pre-modern chronological period and in each of three geographical fields: Field I (Africa, Asia, and Middle East); Field II (the Americas); and Field III (Europe, including Western Europe, Eastern Europe, and Russia). Courses fulfilling the premodern chronological period (Field IV) may also count for Fields I-III.

- Field I: Africa/Asia/Middle East
- HISTORY 44S. Sex and Power in South African History
- HISTORY 46S. The History and Legacy of Mau Mau in Kenya: A Civil War, Peasant Revolt, or Nationalist Struggle?
- HISTORY 48N. African History through Literature and Film
- HISTORY 48Q. South Africa: Contested Traditions
- HISTORY 50S. The History of Development in Africa
- HISTORY 84Q. The American Empire in the Middle East since the Cold War: Afghanistan, Iraq, and Israel/Palestine
- HISTORY 90S. The Social and Cultural History of Tokugawa Japan, 1603-1868
- HISTORY 91N. Mao Zedong: The Man Who Would Become China
- HISTORY 91S. The Making of Nationalism in Modern China
- HISTORY 106A. Global Human Geography: Asia and Africa
- HISTORY 145B. Africa in the Twentieth Century
- HISTORY 145C. Africa in the Age of Empire
- HISTORY 147. History of South Africa
- HISTORY 181B. The Middle East in the 20th Century
- HISTORY 181C. Social and Cultural History of Modern Shi’ism
- HISTORY 182B. The Three Empires of Islam: The Ottomans, Safavids, and Mughals
- HISTORY 182C. From Prophet to Empire: The Making of the Muslim Middle East, 600-1500
- HISTORY 191D. China: The Northern and Southern Dynasties
- HISTORY 193. Late Imperial China
- HISTORY 194B. Japan in the Age of the Samurai
- HISTORY 195. Modern Korean History

- Field II: History of the Americas
- HISTORY 90S. The Social and Cultural History of Tokugawa Japan, 1603-1868
- HISTORY 91N. Mao Zedong: The Man Who Would Become China
- HISTORY 91S. The Making of Nationalism in Modern China
- HISTORY 106A. Global Human Geography: Asia and Africa
- HISTORY 145B. Africa in the Twentieth Century
- HISTORY 145C. Africa in the Age of Empire
- HISTORY 147. History of South Africa
- HISTORY 181B. The Middle East in the 20th Century
- HISTORY 181C. Social and Cultural History of Modern Shi’ism
- HISTORY 182B. The Three Empires of Islam: The Ottomans, Safavids, and Mughals
- HISTORY 182C. From Prophet to Empire: The Making of the Muslim Middle East, 600-1500
- HISTORY 191D. China: The Northern and Southern Dynasties
- HISTORY 193. Late Imperial China
- HISTORY 194B. Japan in the Age of the Samurai
- HISTORY 195. Modern Korean History

- Field III: Europe
- HISTORY 44S. Sex and Power in South African History
- HISTORY 46S. The History and Legacy of Mau Mau in Kenya: A Civil War, Peasant Revolt, or Nationalist Struggle?
- HISTORY 48N. African History through Literature and Film
- HISTORY 48Q. South Africa: Contested Traditions
- HISTORY 50S. The History of Development in Africa
- HISTORY 84Q. The American Empire in the Middle East since the Cold War: Afghanistan, Iraq, and Israel/Palestine
- HISTORY 90S. The Social and Cultural History of Tokugawa Japan, 1603-1868
- HISTORY 91N. Mao Zedong: The Man Who Would Become China
- HISTORY 91S. The Making of Nationalism in Modern China
- HISTORY 106A. Global Human Geography: Asia and Africa
- HISTORY 145B. Africa in the Twentieth Century
- HISTORY 145C. Africa in the Age of Empire
- HISTORY 147. History of South Africa
- HISTORY 181B. The Middle East in the 20th Century
- HISTORY 181C. Social and Cultural History of Modern Shi’ism
- HISTORY 182B. The Three Empires of Islam: The Ottomans, Safavids, and Mughals
- HISTORY 182C. From Prophet to Empire: The Making of the Muslim Middle East, 600-1500
- HISTORY 191D. China: The Northern and Southern Dynasties
- HISTORY 193. Late Imperial China
- HISTORY 194B. Japan in the Age of the Samurai
- HISTORY 195. Modern Korean History

- Field IV: Historical Methods and Approaches
- HISTORY 44S. Sex and Power in South African History
- HISTORY 46S. The History and Legacy of Mau Mau in Kenya: A Civil War, Peasant Revolt, or Nationalist Struggle?
- HISTORY 48N. African History through Literature and Film
- HISTORY 48Q. South Africa: Contested Traditions
- HISTORY 50S. The History of Development in Africa
- HISTORY 84Q. The American Empire in the Middle East since the Cold War: Afghanistan, Iraq, and Israel/Palestine
- HISTORY 90S. The Social and Cultural History of Tokugawa Japan, 1603-1868
- HISTORY 91N. Mao Zedong: The Man Who Would Become China
- HISTORY 91S. The Making of Nationalism in Modern China
- HISTORY 106A. Global Human Geography: Asia and Africa
- HISTORY 145B. Africa in the Twentieth Century
- HISTORY 145C. Africa in the Age of Empire
- HISTORY 147. History of South Africa
- HISTORY 181B. The Middle East in the 20th Century
- HISTORY 181C. Social and Cultural History of Modern Shi’ism
- HISTORY 182B. The Three Empires of Islam: The Ottomans, Safavids, and Mughals
- HISTORY 182C. From Prophet to Empire: The Making of the Muslim Middle East, 600-1500
- HISTORY 191D. China: The Northern and Southern Dynasties
- HISTORY 193. Late Imperial China
- HISTORY 194B. Japan in the Age of the Samurai
- HISTORY 195. Modern Korean History

- Field V: History and Public History
- HISTORY 44S. Sex and Power in South African History
- HISTORY 46S. The History and Legacy of Mau Mau in Kenya: A Civil War, Peasant Revolt, or Nationalist Struggle?
- HISTORY 48N. African History through Literature and Film
- HISTORY 48Q. South Africa: Contested Traditions
- HISTORY 50S. The History of Development in Africa
- HISTORY 84Q. The American Empire in the Middle East since the Cold War: Afghanistan, Iraq, and Israel/Palestine

HISTORY 281C. Urban History of the Middle East: Aleppo and Istanbul on the Eve of Modernity
HISTORY 281D. The Origins and Formation of Islam
IHUM 11A. Origins of the World: Europe and Latin America

2. Concentration: to develop some measure of expertise, students must complete four courses in a single area (including one undergraduate colloquium or research seminar). The proposed concentration must be approved by the major adviser; a proposal for a thematic concentration must be approved by both the adviser and the department’s director of undergraduate studies. Areas of concentration are:
   - Africa
   - Asia
   - Eastern Europe and Russia
   - Europe before 1700
   - Europe since 1700
   - Jewish History
   - Latin America
   - Science and Technology
   - The United States
   - The Middle East
   - International History
   - Comparative Empires and Cultures
   - or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture, or high culture.

3. Required course: HISTORY 102. The International System is a required course for students who select the International History concentration. This course is offered in Spring quarter.

Certain Introduction to the Humanities (IHUM) courses taught by History faculty in a Winter-Spring sequence count toward the General History major. These are: IHUM 4A,B; 5A,B; 6A,B;11A,B

HISTORY TRACKS WITH INTERDISCIPLINARY EMPHASIS (HMIE)

These tracks are designed for students who are interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline, who want to understand how interdisciplinary approaches can deepen their understanding of history, or who are primarily interested in developing interdisciplinary approaches to historical scholarship by combining the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science and the humanities. In pursuing the above requirements for all History majors, students in HMIE are required to complete their thirteen courses for the major as follows:

Gateway Course (one course)—Students are required to take the appropriate gateway course for their interdisciplinary track. This course introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major track. (Note: The History and the Law track has no gateway course requirement.)

Methodological Cluster (three courses)—This cluster is designed to acquaint students with the ways in which interdisciplinary methods are employed in historical scholarship, by practicing historians and scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for the appropriate historical methods courses. (Note: The History and the Law track requires four methodology courses.)

Geographic Cluster (four courses)—History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

Interdisciplinary Cluster (four courses)—These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must pro-
vide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for appropriate interdisciplinary courses.

Research Seminar for Majors (HISTORY 209S)—Fulfills Writing in the Major Requirement.

HMIE tracks do not mandate the breadth or concentration requirements of the General History track. Introduction to the Humanities courses taught by History faculty may apply to HMIE tracks only so far as their content is specifically appropriate to the particular methodological or geographic cluster.

HISTORY, LITERATURE, AND THE ARTS

The History, Literature, and the Arts (HLA) track is designed for the student who wishes to complement his or her work in History with study in literature, particularly in a foreign language. For the purposes of this major, literature is defined broadly, including art, drama, films and poetry, memoirs and autobiography, novels, as well as canonical works of philosophy and political science. It appeals to students who are interested in studying literature primarily in its historical context, or who want to focus on both the literature and history of a specific geographical area while also learning the language of that area.

Gateway Course—HISTORY 132A. Enlightenment and the Arts gives students a broad introduction to the study of literary texts in history. Note: The former gateway course, HISTORY 239E, History, Literature and the Arts in Great Britain, may be counted in lieu of 132A.

Methodological Cluster—This three-course cluster teaches students how historians, in particular, analyze literary texts as documentary sources. Students choose three courses from among the pre-approved HLA methodology curriculum. These courses need not be in the student’s geographic concentration. For 2009-10, these courses are:

HISTORY 6N. Utopia: History of Nowhere Land
HISTORY 20Q. Russia in the Early Modern European Imagination
HISTORY 20Q. English Society through Fiction
HISTORY 31S. The Renaissance of War: War, Technology, and Art in the High Renaissance
HISTORY 36N. Gay Autobiography
HISTORY 36S. Folk Tales, Fairy Tales, Carnival and Magic: Popular Culture in Early Modern Europe
HISTORY 48N. African History through Literature and Film
HISTORY 54N. African American Women’s Lives
HISTORY 67S. The Virgin Mary: Religion and Identity from Mexico City to Los Angeles
HISTORY 68S. The Cultural Margins of America: Witches, Indians, and Arabs in the 18th Century Imagination
HISTORY 90S. The Social and Cultural History of Tokugawa Japan, 1603-1868
HISTORY 154. 19th Century U.S. Cultural and Intellectual History, 1790-1860
HISTORY 154A. Religion and American Society
HISTORY 165. Mexican American History through Film
HISTORY 168. American History in Film: Since World War II
HISTORY 207. Biography and History
HISTORY 209B. The Century: The Problem of the Present in Twentieth Century Thought
HISTORY 230A. The Witness in Modern History: Memoir, Reportage, Image
HISTORY 231S. Early Modern Things
HISTORY 233F. Political Thought in Early Modern Britain
HISTORY 236B. The Idea of Society
HISTORY 247S. Intellectual and Cultural History in Modern Africa
HISTORY 254. Popular Culture and American Nature
HISTORY 255D. Racial Identity in the American Imagination
HISTORY 258C. Science, Technology and Medicine
HISTORY 287E. Jewish Intellectuals and Modernity
HISTORY 292F. Traditional Korea: History and Culture

Geographical Cluster—Students select four History courses in one geographic area. These are: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological courses required above.

Interdisciplinary Cluster—Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student’s adviser must pre-approve all courses in this cluster; these courses may not be double-counted towards a minor or major other than History.

Research Seminar for Majors—HISTORY 209S; fulfills Writing in the Major requirement.

General Requirements—Like all History majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S., one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

HISTORY, SCIENCE, AND MEDICINE

The History, Science and Medicine (HS&M) track is a collaborative program of the Department of History and the Program in the History and Philosophy of Science. The major is designed for students interested in both sciences and humanities, and in the interactions between the two. It is also especially useful for students contemplating medical school, since it allows them to study the history of medicine, biology, and allied sciences in conjunction with fulfilling the pre-med science requirements.

Gateway Course (one course)—HISTORY 140. World History of Science, Technology and Medicine: From Prehistory to the Scientific Revolution (Winter Quarter)

Methodological Cluster (three courses)—These History courses focus on the history of science, technology, and medicine. For 2009-10, these courses are:

HISTORY 7S. The Age of Discovery: Maritime Imperialism and Science, 1406-1850
HISTORY 31S. The Renaissance of War: War, Technology, and Art in the High Renaissance
HISTORY 42N. Science, Medicine and Empire
HISTORY 141A. The Emergence of Medicine: The Middle Ages and Renaissance
HISTORY 142. Darwin in the History of Life
HISTORY 144. Gender in Science, Medicine and Engineering
HISTORY 208A. Science and Law in History
HISTORY 231S. Early Modern Things
HISTORY 243G. Tobacco and Health in World History
HISTORY 243J. Climate Change in the West: A History of the Future

Geographical Cluster (four courses)—Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological cluster courses. Courses in the history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted in the methodological cluster.

Interdisciplinary Cluster (four courses)—Students select four courses in scientific disciplines and/or in philosophy of science, anthropology of science, or sociology of science. These courses require faculty adviser pre-approval.

Research Seminar for Majors (HISTORY 209S)—Fulfills the Writing in the Major requirement.

General Requirements—Like all history majors, students in History Interdisciplinary Programs must complete two lecture
courses (one Europe or US, one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources & Methods seminar, and a Research Seminar for Majors.

HISTORY AND LAW

The History and Law (HL) interdisciplinary track is for students who wish to explore the intersections between historical and legal studies. The HL curriculum focuses on the role of legal institutions, policies, and structures in various societies. HL track majors enroll in at least four History department courses that focus on issues of law in civil societies and four courses that provide a geographic concentration. In addition, students enroll in four courses outside History that provide disciplinary or interdisciplinary perspectives on the role of law in shaping societies and a Research Seminar for Majors.

Gateway Course—There is no gateway course for this track. Instead, students take an extra course in the Methodological cluster.

Methodological Cluster (four courses)—Students enroll in at least four History department courses, including courses outside History taught by faculty affiliated with the department, that focus on how law, policies, constitutions, and legal structures affect the development of various societies. (Note: The Methodological Cluster for this HIP contains one extra course since there is no Gateway course.) For 2009-10, these courses are:

- HISTORY 22N. Crime, Punishment and Rebellion in Early Modern Russia
- HISTORY 57. The Constitution: A Short History
- HISTORY 134A. European Witch Hunts
- HISTORY 135. History of European Law, Medieval to Contemporary
- HISTORY 208A. Science and Law in History
- HISTORY 208S. Facing the Past: The Politics of Retrospective Justice
- HISTORY 237E. Violence, Law, and Order in Eighteenth and Nineteenth Century Ireland
- HISTORY 245G. Law and Colonialism in Africa
- HISTORY 251. Creating the American Republic
- HISTORY 253D. Approaches to American Legal History
- HISTORY 352B. History of American Law (requires the permission of the Law School instructor)
- CLASSHIS 141. Ancient Justice: Trials and Judgment in Ancient Greece

Geographical Cluster (four courses)—Students choose four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa.

Interdisciplinary Cluster (four courses)—Students may select from courses offered in the School of Law, School of Education, and others as appropriate. (Note: The Geographical Cluster for this HIP contains one extra course since there is no Gateway course.)

Research Seminar for Majors (HISTORY 209S)—Fulfills the Writing in the Major requirement.

General Requirements—Like all history majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or US, one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources & Methods seminar, and a Research Seminar for Majors.

PUBLIC HISTORY/PUBLIC SERVICE

The Public History/Public Service (PH/PS) interdisciplinary history track is designed for students who wish to include in their course of studies the application of historical study in (1) public settings such as museums and heritage sites, national and state parks, public agencies, and private foundations, and (2) public service settings in non-profit organizations, public agencies, and educational institutions.

PH/PS majors enroll in a gateway course on public history and public service and in four History department courses that provide a geographic concentration as well as completing a two-course methodological requirement. In addition, students, in consultation with the PH/PS faculty coordinator, complete four courses from outside the History department drawn from the annual listing of service-learning courses provided by the Haas Center for Public Service; these courses provide interdisciplinary and methodological perspectives on public service. PH/PS majors must also complete an internship through a regularly offered service-learning course or through a summer internship or fellowship.

Gateway course (one course)—HISTORY 201, Introduction to Public History in the U.S., Nineteenth Century to the Present, provides grounding in the theory and practice of public service and exposure to the types of public history practiced in venues such as museums, historical sites, parks, and non-profit organizations, including local historical societies.

Interdisciplinary Cluster (four courses)—Students select four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

History and Law (HL) interdisciplinary track is for students who wish to include in their course of studies the application of historical study in (1) public settings such as museums and heritage sites, national and state parks, public agencies, and private foundations, and (2) public service settings in non-profit organizations, public agencies, and educational institutions.

Geographical Cluster (four courses)—Students select four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

Methodological Cluster (two courses)—Students must enroll in four courses from outside the History department drawn from the annual listing of service-learning and theory/practice courses provided by the Haas Center for Public Service. The faculty coordinator must pre-approve all courses in this cluster.

Examples of appropriate PH/PS interdisciplinary courses are:

- SOC 118. Social Movements and Collective Action
- SOC 137. Homelessness: Its Causes, Consequences, and Policy Solutions
- POLISCI 133. Ethics and Politics In Public Service
- POLISCI 141. Global Politics of Human Rights
- AMSTUD 221. Public and Professional Service: Theories and Ethical Practice of Public and Community
- ETHICSOC 144. Nongovernmental Organizations and Development in Poor Countries

Methodological Cluster (two courses)—Students must enroll in one Sources and Methods seminar course and one additional 200-level History course. The Writing in the Major (WIM) requirement must be completed in a Research Seminar for Majors.

Public Service/Service Learning Internship (one course)—Students must engage in at least a one quarter internship through a service learning course or through a full-time public service or public history summer internship or fellowship. This internship must be pre-approved by the faculty coordinator. (Note: Students who complete a paid summer internship in lieu of one for academic credit will have two options: they can complete an additional history course, or they can enroll in 3 units of HISTORY 299S with the faculty coordinator of the PH/PS track and write a 20-page research paper related to their internship work. This research paper will be in addition to that required for the Research Seminar for Majors.)

Three History Department service-learning courses will be offered in 2009-10:

- HIST 201. Introduction to Public History in the U.S., 19th Century to the Present (Autumn)
- HISTORY 259A.B. Poverty and Homelessness in America (Winter/Spring)
- HISTORY 260. California’s Minority-Majority Cities (Spring)

If students elect to fulfill the internship requirement through a History Department service-learning course, they must enroll in an additional course in either the geographical cluster or the Interdisciplinary cluster in order to complete the 13 courses required for the major.

Research Seminar for Majors (HISTORY 209S)—Fulfills Writing in the Major requirement.

General Requirements—Like all history majors, students in
History Interdisciplinary Programs must complete two lecture courses (one Europe or US, one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources & Methods seminar, and a Research Seminar for Majors.

HISTORY SECONDARY TEACHER’S CREDENTIAL

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding this program from the Credential Administrator, School of Education.

MINOR IN HISTORY

Students must declare the minor in History no later than Autumn Quarter of the senior year via Axess. Minor declarations are approved by the Department of History and confirmation is sent via email to the student.

Candidates for the minor in History must complete six courses, at least three of which must have a field or thematic focus. Students completing the minor may choose to concentrate in such fields as African, American, Asian, British, European (medieval, early modern, or modern), Russian and East European history, comparative empires and cultures, or such thematic topics as the history of gender, the family, religion, technology, or revolution. Students may also petition to have a concentration of their own design count toward the minor.

Requirements—

All six courses must be of at least 3 units each and must be taken for a letter grade. The student must maintain a grade point average (GPA) in History courses of 2.0 (C) or higher. Two of the six courses must be small-group in format (Stanford Introductory Seminars, Sources and Methods Seminars, departmental colloquia, and research seminars). History courses taken at Stanford overseas campuses may count toward the minor, but at least three of the six courses must be taken from Stanford History faculty. Advanced Placement credits do not fulfill any minor requirements.

Optional Courses for the Minor—History courses taken at non-Stanford Study Abroad programs may count toward the minor (provided the History Department approves them), but at least three of the six courses must be taken from Stanford History faculty. One course from certain Introduction to the Humanities courses (IHUM 4A,B; 5A,B; and 11A,B) may count toward the six-course requirement, but not for the three-course field of concentration. One Directed Research (299S) course may count toward the minor, if taken for 3-5 units and for a letter grade. A maximum of three transfer courses may be used toward the minor.

GRADUATE PROGRAMS IN HISTORY

The primary goal of Stanford’s Department of History’s graduate program is the training of scholars. Most students who receive doctorates in the program go on to teach at colleges or universities. Other students have obtained positions in university administration and research.

COTERMINAL B.A. AND M.A. PROGRAM IN HISTORY

The department each year admits a limited number of undergraduates for coterminal B.A. and M.A. degrees in History. Coterminal applications are accepted during Autumn Quarter for admission in Spring Quarter; check with the History office for the application deadline. Applicants are responsible for checking their compliance with University coterminal requirements listed in the “Undergraduate Degrees and Programs” section of this bulletin.

ADMISSION

Applicants must meet the same general standards as those seeking admission to the M.A. program; they must submit a written statement of purpose, a transcript, GRE test scores, and three letters of recommendation, at least two of which should be from members of the Department of History faculty. To be competitive, coterminal applicants should have a 3.75 GPA in their undergraduate history major (or equivalent if they are entering without a History major). The decision on admission rests with the department faculty upon recommendation by the Graduate Admissions Committee. Students must meet all requirements for both degrees. They must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three courses that fall within a single Ph.D. field.

The application filing deadline is December 9, 2009. The coterminal B.A. and M.A. program is not declared on Axess.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm/Coterm.

MASTER OF ARTS IN HISTORY

University requirements for the M.A. are described in the “Graduate Degrees” section of this bulletin.

The department requires the completion of nine courses (totaling not less than 45 units) of graduate work; seven courses of this work must be Department of History courses. Of the seven, one must be a seminar and four must be either graduate colloquia or graduate seminars. Directed reading may be counted for a maximum of 10 units. A candidate whose undergraduate training in history is deemed inadequate must complete nine courses of graduate work in the department. The department does not recognize for credit toward the M.A. degree any work that has not received the grade of ‘A’ or ‘B.’

Terminal M.A. Program—Applicants who do not wish to continue beyond the M.A. degree are admitted to this program at the discretion of the faculty in individual fields (U.S., modern Europe, and so on). Students admitted may not apply to enter the Ph.D. program in History during the course of work for the M.A. degree.

M.A. in Teaching (History)—The department cooperates with the School of Education in offering the Master of Arts in Teaching degree. For the general requirements, see the “School of Education” section of this bulletin. For certain additional requirements made by the Department of History, contact the department office. Candidates must possess a teaching credential or relevant teaching experience.

ADMISSION

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Guide to Graduate Admission, available from Graduate Admissions, the Registrar’s Office, 630 Serra Street, Suite 120, or at http://gradadmissions.stanford.edu. Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

The application filing deadline is December 9, 2009.

DOCTOR OF PHILOSOPHY IN HISTORY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

Students planning to work for the doctorate in history should be familiar with the general degree requirements of the University outlined in the “Graduate Degrees” section of this bulletin. Those interested in applying for admission to the M.A. and Ph.D. programs should contact the graduate program coordinator in the History department. Online applications are available in September of the year prior to intended enrollment. The application filing dead-
line is December 9, 2009. Applicants must file a report of their general scores on the Graduate Record Examination and submit a writing sample of 10-25 pages on a historical topic. Successful applicants for the M.A. and Ph.D. programs may enter only in the Autumn Quarter.

Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A decision as to whether the student is admitted to candidacy for the Ph.D. is normally made by the start of the student’s third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.

ADMISSION

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Guide to Graduate Admission, available from Graduate Admissions, the Registrar’s Office, 630 Serra Street, Suite 120, or at http://gradadmissions.stanford.edu.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

The application filing deadline is December 9, 2009.

DEGREE REQUIREMENTS

Required Courses—

HISTORY 304, Approaches to History—for all first-year Ph.D. students
HISTORY 305, Graduate Workshop in Teaching—for all first-year Ph.D. students
HISTORY 351A,B,C,D,E,F, Core in American History—for first-year Ph.D. students in American History
HISTORY 313,314, Core in Medieval History—for Ph.D. students in Medieval History.

Other Graduate Core Colloquia required for Ph.D. students studying in fields other than the above are listed in the Department of History’s Graduate Handbook.

University Oral Examinations—The student is expected to take the University oral examination in the major concentration in the third graduate year.

Dissertation—The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

Dissertation Committee—The reading committee consists of the principal dissertation adviser (first reader), and two additional members of the Department (second and third readers) agreed upon by the adviser and the student.

FINANCIAL SUPPORT

Students who are admitted with financial support are provided multiple years of support through fellowships, teaching and research assistantships, and tuition grants. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent resident aliens who are interested in area language studies in East Asia, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from the FLAS coordinator of the respective programs offering the FLAS (CEAS, CAS, CREEES). The FLAS application deadlines are in January and February (CAS).

RESOURCES

The Degree Requirements section relates to formal requirements, but the success of a student’s graduate program depends in large part on the quality of the guidance received from faculty and on the library resources available. Prospective graduate applicants are advised to study the list of History faculty and the courses this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described following.

The University Library maintains strong general collections in almost all fields of history. It has a very large microtext collection, including, for instance, all items listed in Charles Evans’ American Bibliography, and in the Short-Title Catalogues of English publications, 1474-1700, and virtually complete microfilmed documents of the Department of State to 1906. It also has a number of valuable special collections including the Borel Collection on the History of California; many rare items on early American and early modern European history; the Brasch Collection on Sir Isaac Newton and scientific thought during his time; the Gimon Collection on French political economy, and other such materials.

The rich collection of the Hoover Institution on the causes, conduct, and results of WW I and WW II are being augmented for the post-1945 period. The materials include government documents, newspaper and serial files, and organization and party publications (especially the British and German Socialist parties). There are also important manuscript collections, including unpublished records of the Paris Peace Conference of 1919 and the Herbert Hoover archives, which contain the records of the Commission for Relief in Belgium, the American Relief Administration, the various technical commissions established at the close of WW I for reconstruction in Central and Eastern Europe, the personal papers of Herbert Hoover as United States Food Administrator, and other important personal papers. Other materials for the period since 1914 relate to revolutions and political ideologies of international importance; colonial and minority problems; propaganda and public opinion; military occupation; peace plans and movements; international relations; international organizations and administration including the publications of the United Nations, as well as principal international conferences. The Hoover Institution also possesses some of the richest collections available anywhere on the British labor movement; Eastern Europe, including the Soviet Union; East Asia (runs of important newspapers and serials and extensive documentary collections, especially for the period of WW II); and Africa since 1860, especially French-speaking Africa, the former British colonies, and South Africa.

REQUIREMENTS

1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:

- Europe, 300-1500
- Europe, 1400-1800
- Europe since 1700
- Jewish History
- Russia
- Eastern Europe
- Middle East
- East Asia before 1600
- China since 1600
- Japan since 1600

STANFORD BULLETIN, 2009-10 | 255
• Africa
• Britain and the British Empire since 1460
• Latin America
• The United States (including colonial America)
• History of Science, Medicine, and Technology

2. The department seeks to provide a core colloquium in every major concentration. Students normally enroll in this colloquium during the first year of graduate study.

3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.

4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
   a. One of the concentrations listed above (other than the student’s major concentration).
   b. One of the concentrations listed below, which falls largely outside the student’s major concentration:
      • The Ancient Greek World
      • The Roman World
      • Europe, 300-1000
      • Europe, 1000-1400
      • Europe, 1400-1600
      • Europe, 1600-1789
      • Europe, 1700-1871
      • Europe since 1848
      • England, 450-1460
      • Britain and the British Empire, 1460-1714
      • Britain and the British Empire since 1714
      • Russia to 1800
      • Russia since 1800
      • Eastern Europe to 1800
      • Eastern Europe since 1800
      • Jewish History
      • Middle East to 1800
      • Middle East since 1800
      • Africa
      • China before 1600
      • China since 1600
      • Japan before 1600
      • Japan since 1600
      • Latin America to 1825
      • Latin America since 1810
      • The United States (including Colonial America) to 1865
      • The United States since 1850
      • The History of Science, Medicine, and Technology
   c. Work in a national history of sufficiently long time to span chronologically two or more major concentrations. For example, a student with Europe since 1700 as a major concentration may take France from 1000 to the present as a secondary concentration.
   d. A comparative study of a substantial subject across countries or periods. The secondary concentration requirement may also be satisfied in an interdisciplinary concentration. Students plan these concentrations in consultation with their advisers. Interconcentrations require course work outside the Department of History which is related to the student’s training as a historian. Interdisciplinary course work can either add to a student’s technical competence or broaden his or her approach to the problems of the research concentration.

5. Each student, before conferral of the Ph.D., is required to satisfy the department’s teaching requirement.

6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. In no concentration is a student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Italian, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of language competence must be accomplished before a student takes the University oral examination.

7. The student is expected to take the University oral examination in the major concentration in the third graduate year.

8. The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

**PH.D. IN HISTORY AND HUMANITIES**

The department of History participates in the Graduate Program in Humanities leading to the joint Ph.D. in History and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities. Although the Graduate Program in Humanities is not currently accepting new students, it continues to provide advising for students already enrolled as well as courses, open to all students. The University remains committed to a broad-based undergraduate education in the humanities, and a successor program is under discussion by the faculty of the Division of Literatures, Cultures, and Languages. For further information, please consult Gregory Freidin, the director of the program; the list of courses and events may be found on the program web site at http://ish.stanford.edu/programs/graduate.

**PH.D. MINOR IN HISTORY**

Students pursuing a Ph.D. other than in History may apply for the Ph.D. Minor in History. Ph.D. students cannot pursue a minor in their own program. The minimum University requirement for a Ph.D. minor is 20 units of History course work at the graduate level (courses numbered 300 and above) at Stanford. All units should be in a single field. Units taken for the minor may not be used to meet the requirements for a master’s degree.

**Requirements**—20 units of History course work at the graduate level (HISTORY 300-399W and 400-499X) at Stanford. All units should be in a single field.

**Optional Courses for the Minor**—A Ph.D. minor form outlining the program of study must be approved by the major and minor departments.

**OVERSEAS STUDIES COURSES IN HISTORY**

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

**AUTUMN QUARTER**

OSPFLOR 26. Greeks and Etruscans in the Archaeology of Ancient Italy. 3-5 units, Giovanna Ceserani, GER:DB:Hum
OSPFLOR 27. Ancients and Moderns in the Making of the Italian Nation. 3-5 units, Giovanna Ceserani, GER:DB:Hum
HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

Co-chairs: Michael Friedman (Philosophy), Jessica Riskin (History)

Committee-in-Charge: Barton Bernstein (History), Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History)

Program Committee: Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Londa Schiebinger (History, Clayman Institute for Gender Research)

Professors: Keith Baker (History), Barton Bernstein (History), Paula Findlen (History), Michael Friedman (Philosophy), David Holloway (History, Institute for International Studies, Political Science), David Kennedy (History), Reviel Net (Classics), Robert Proctor (History), Nancy Stoltzfus (History, Clayman Institute for Gender Research), Richard White (History), Helen Longino (Philosophy)

Associate Professors: Jessica Riskin (History), Caroline Winterer (History)

Assistant Professors: Sarah Jain (Anthropology), Thomas Mulaney (History), Priya Satia (History), Fred Turner (Communication)

Professor (Research): Rega Wood (Philosophy)

Lecturers: Tom Ryckman (Philosophy), Margo Horn, John McCaskey

Other Affiliation: Henry Lowood (Stanford University Libraries)

Visiting Scholar: Adrienne Mayor (Classics)

Mail Code: 94305-2024
Email: trogers@stanford.edu
Web Site: http://HPST.stanford.edu
Courses offered by the Program in History and Philosophy of Science and Technology are listed under the subject code HPS on the Stanford Bulletin’s ExploreCourses web site.

The Program in History and Philosophy of Science and Technology (HPST) teaches students to examine the sciences, medicine and technology from myriad perspectives, conceptual, historical and social. Our community of scholars includes core faculty and students in History and Philosophy and affiliated members in Classics, Anthropology, English, Political Science, Communication and other disciplines. Together, we draw upon the multiple methods of our disciplines to study the development, functioning, applications and social and cultural engagements of the sciences.

Stanford’s Program in History and Philosophy of Science and Technology is a collaborative enterprise of the Departments of History and Philosophy. Each department has its own undergraduate and graduate degree programs in this area, but these overlap and interact through the structure of requirements, advising, team-taught courses, an active graduate student community and a shared colloquium series.

The program’s courses span a period from antiquity to the late 20th century, with emphasis on: ancient science; Renaissance science; the Scientific Revolution; Enlightenment and transatlantic science; history of medicine and the body; history and philosophy of biology; history and philosophy of modern physics; history of the philosophy of science in the modern period; and gender, science, and technology.

UNDERGRADUATE DEGREES

The Department of History offers an interdisciplinary track in History, Science, and Medicine; the Department of Philosophy offers a degree field in History and Philosophy of Science.

The following courses may be used to fulfill optional course requirements:
INTRODUCTORY
HPS/PHIL 60. Introduction to Philosophy of Science
PHIL 16N. Values and Objectivity
PHIL 15N. Freedom, Community, and Morality
CLASSGEN 133. Invention of Science
CLASSGEN 16. Archimedes and His Science

SCIENCE IN HISTORY
This sequence is designed to introduce students to the history of Science from antiquity to the 20th century. Students are advised to take most or all of this sequence as a core foundation.
CLASGEN 22N. Technologies of Civilization: Writing, Number, and Money
HISTORY 31/STS 125/225. Science, Technology, and Art: The Worlds of Leonardo
HISTORY 40/140. World History of Science
HISTORY 41A/141A. The Emergence of Modern Medicine
HISTORY 44N. The History of Women and Gender in Science, Medicine, and Engineering
OSPOXFRD 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought

MEDICINE IN HISTORY
This sequence is designed to introduce students to the history of medicine from antiquity to the 20th century. Students are advised to take most or all of this sequence as a core foundation.
AMSTUD 156. History of Women and Medicine in the United States
HISTORY 243G/343G. Tobacco and Health in World History

PHILOSOPHICAL PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY
This sequence is designed to introduce students to the philosophy of science. Students are advised to take HPS 60 above as a starting point, and combine a number of the electives listed below in conjunction with courses in the other concentrations that address their specific interests.
FEMST 16/PHIL 184F/284F. Feminist Theories of Knowledge
HPS 220. Nineteenth-Century Philosophy of Science
PHIL 107/207. Plato and Heraclitus
PHIL 115/215. Problems in Medieval Philosophy
PHIL 163/263. Significant Figures in Philosophy of Science
PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence
PHIL 165/265. Philosophy of Physics
PHIL 167A/267A. Philosophy of Biology
PHIL 167B/267B. Philosophy, Biology, and Behavior
PHIL 224. Kant’s Philosophy of Physical Science
PHIL 224A. Math in Kant’s Philosophy
PHIL 360. Core Seminar in Philosophy of Science
PHIL 365. Seminar in Philosophy of Science: Time

ADVANCED
HISTORICAL PERSPECTIVES ON SCIENCE
The following courses focus on specific episodes in or approaches to the history of science.
HPS 154. What is Science? Explaining Nature from Pythagoras to Poper
HISTORY 142/342. Darwin in History of Life
HISTORY 208A/308A. Science and the Law in History
HISTORY 232F/332F. The Scientific Revolution
HISTORY 241F/341F. History of the Modern Fact
HISTORY 241G/341G/STS 134/234. History of the Senses
HISTORY 241S. Science and Culture Wars

CONTEMPORARY PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY
The following courses focus on contemporary cultural and social science approaches to science, technology, and medicine.
HPS 199. Directed Reading

HPS 299. Graduate Individual Work
ANTHRO 180. Science, Technology, and Gender
HISTORY 144/344. Gender in Science, Medicine, and Engineering
HISTORY 242G. Representing the World: Maps, Statistics, and Photography
HISTORY 243C/343C. 18th-Century Colonial Science and Medicine
HISTORY 244C/444C. The History of the Body in Science, Medicine, and Culture
HUMBIO 175. Healthcare as Seen Through Medical History, Literature, and the Arts

GRADUATE DEGREES
Graduate students in the Program in History and Philosophy of Science and Technology can pursue a Ph.D. either in History, through its Ph.D. field in History of Science, Medicine and Technology, or in Philosophy, through its Ph.D. field in Philosophy of Science. Students completing the requirements of the HPST program graduate with a diploma stating their concentration in HPST.

OVERSEAS STUDIES COURSES IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY
For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER
OXFORD

WINTER QUARTER
FLORENCE
OSPOXFRD 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought. 5 units, Paolo Galluzzi, GER:DB:Hum

HUMAN BIOLOGY
Emeriti: (Professors) Clifford Barnett (Anthropological Sciences), Luigi Cavalli-Sforza (Genetics), Christos Constantinou (Urology), Carl Djerassi (Chemistry), Sanford Dornbusch (Sociology), Albert H. Hastorf (Psychology), Dale Kaiser (Biochemistry), Herant Katchadourian (Human Biology), Donald Kennedy (Biology), Carol Winograd (Medicine), (Associate Director) Shirley Feldman
Director: Carol Boggs (Biology)
Associate Director: Katherine Preston
Professors: Laurence Baker (Health Research & Policy), Lisa Curran (Anthropology), William H. Durham (Anthropology), Russell D. Fernald (Biology), Uta Francke (Genetics), Margaret Fuller (Developmental Biology), Lawrence H. Gould (Economics), H. Craig Heller (Biology), Richard Klein (Biology and Anthropology), Tanya Luhmann (Anthropology), Michael Marmor (Ophthalmology), Gordon Matheson (Orthopedic Surgery), Roeland Nusse (Developmental Biology), Amado Padilla (Education), Thomas Rando (Neurology), Natalie Rasgon (Psychiatry and Behavioral Sciences), Thomas Robinson (Pediatrics, Medicine), Robert Sapolsky (Biology, Neurology and Neurological Sciences), Stephen Schneider (Biology), Matthew Scott
(Developmental Biology), William Talbot (Developmental Biology), Shirpad Tuljapurkar (Biology), Irving Weissman (Pathology), Jeffrey Wine (Psychology), Paul Wise (Pediatrics), Arthur B. Wolf (Anthropological Sciences)

**Associate Professors:** Rebecca Bird (Anthropology), Firdaus Dhabhar (Psychiatry and Behavioral Sciences), Anne Fernald (Psychology), Paul Fisher (Neurology and Neurological Sciences, Pediatrics), James Fox (Anthropology), John Rick (Anthropology), Randall Stafford (Medicine)

**Assistant Professors:** Melissa Brown (Anthropology), David De-Gusta (Anthropology), Brenda Golianu (Anesthesiology), James H. Jones (Anthropology), Norman G. Miller (Medicine), Michael Ramscar (Psychology)

**Professors (Research):** David Katzenstein (Medicine), Marcia Stefanick (Medicine)

**Associate Professors (Research):** Christopher Gardner (Medicine), David Lyons (Psychiatry and Behavioral Sciences)

**Professors (Teaching):** Carol Boggs (Biology), Ellen Porzig (Developmental Biology)

**Associate Professors (Teaching):** Donald Barr (Pediatrics), Catherine Heaney (Psychology, Medicine), David Magnus (Pediatrics), Eunice Rodriguez (Pediatrics), Robert Siegel (Microbiology and Immunology)

**Clinical Professor:** Laraine Zappert (Psychiatry and Behavioral Sciences)

**Clinical Assistant Professors:** Daniel Garza (Orthopedic Surgery, Emergency Medicine), Mary Therese Jacobson (Obstetrics and Gynecology), Rita Popat (Epidemiology)

**Other Teaching Faculty and Staff:** William Abrams, Maya Adams-Seef, Wesley F. Alles (Medicine), Judy Chu, Gerda Endemann (Biological Sciences), Anne Firth-Murray, Anne Friedlander, Renu Heller (Biological Sciences), Robert Lickliter, Donald Light, Danielle Liubicich, Michael Mandra (Earth Sciences), Lisa Medoff, Katherine Preston, Lynn Rothschild, Gerd Endemann (Biological Sciences), Gert Ruhlen, Daniel Salkeld (Anthropology), Darvin Scott Smith (Medical Genetics and Immunology), James Truncer (Anthropology), Katherine E. Williams (Psychiatry and Behavioral Sciences), Jennifer Wolf (Education), Nathan Wolfe, Larry Zarfroff (Anesthesiology, Biomedical Ethics)

**Course Associates:** Rebecca Briggs, Fiona Gispen, Grace Hunter, Tom McFadden, Lauren Smith, Rebecca Tisdale, Tanya Widmer, Peng Zhang

**Honors Chair:** Katherine Preston

**Program Offices:** Building 20

**Mail Code:** 94305-2160

**Phone:** (650) 725-0336

**Email:** cacciarri@stanford.edu (Student Services)

**Web Site:** http://humbio.stanford.edu

Courses offered by the Program in Human Biology are listed under the subject code HUMBIO on the Stanford Bulletin’s ExploreCourses web site.

### UNDERGRADUATE MISSION STATEMENT IN HUMAN BIOLOGY

The Program in Human Biology is an interschool, interdepartmental, undergraduate major. The program’s mission is to provide an interdisciplinary approach to understanding the human being from biological, behavioral, social, and cultural perspectives. The curriculum provides a broad and rigorous introduction to the biological and behavioral sciences and their interrelationships, and explores how this knowledge, in conjunction with studies in other fields, can be applied to formulate and evaluate health, environmental, and other public policies that influence human welfare. Majors later pursue advanced training in professional or graduate programs, or work in diverse sectors.

To achieve these goals, all students complete a 30-unit core sequence, normally in the sophomore year, that provides the foundation for the major. Also during the sophomore year, students consult with student advisers to choose a faculty adviser and complete the declaration process. Together they plan a road map of course work designed to help each student focus on an area of interest within Human Biology. Early planning and subsequent refining of an individualized course of study, in consultation with student and faculty advisers, is a strength and requirement of the program. The curriculum draws on faculty from across the University. To complete a B.A. in Human Biology, students must take courses from within the program and from other University departments. Most Human Biology majors go on to advanced training in professional schools, or graduate programs in the behavioral, natural, and social sciences, including coterminous master’s degree programs in other University departments. Additional information about the major may be obtained from the program’s offices or at http://humbio.stanford.edu.

### UNDERGRADUATE PROGRAMS IN HUMAN BIOLOGY

The program offers a Bachelor of Arts in Human Biology, as well as a minor and an honors program.

### STUDENT ADVISERS

Human Biology has an advising program comprising faculty and student advisers. Before declaring Human Biology as their undergraduate major, each student must meet with one of six student advisers who assist them in developing a coherent study plan based on an individualized area of concentration, and the selection of foundation, concentration, and upper-division courses. The student advisers also assist students in selecting an appropriate faculty adviser and a suitable internship for their area of concentration and career goals. Student advisers offer drop-in services during scheduled office hours every weekday and some evenings. The student advisers also sponsor events including the Internship Faire, Beyond HumBio, and declaration workshops. To maintain high standards of advising that respond to the needs of individual students, student advisers meet weekly with the program’s faculty advising chairs and the student services coordinator to review the program’s policies and specific student inquiries and petitions concerning the program.

### BACHELOR OF ARTS IN HUMAN BIOLOGY

The B.A. in Human Biology (HUMBIO) requires a minimum of 87 units in the major divided among four levels of courses:

1. **Fundamental Program:** at least 38 units, to include Human Biology Core (30 units)
   - **Statistics:** (4-5 units)
   - **Internship (HUMBIO 197; 4 units)**

   The Human Biology Core refers to HUMBIO 2A and 2B, 3A and 3B, 4A and 4B. See "Human Biology Core" below for more information. Statistics may be chosen from courses such as STATS 60 or 141, PSYCH 10, SOC 181B, and BIO 141. For questions about other statistics courses that might fulfill this requirement, see the program office. The core and statistics courses must be taken for a letter grade by majors. The internship requirement, a mentored non-classroom project, is graded satisfactorily/no credit only.

2. **Foundation Courses:** 20-unit minimum. Total units vary, depending on the focus of study chosen by the student for the area of concentration. They may include introductory-level courses from across the University and lab courses. The minimum grade requirement for foundation courses is ‘C-.’

3. **Area of Concentration:** a minimum of five courses totaling at least 20 units. This in-depth area of study enables the student to focus on educational and post-baccalaureate goals. Courses are non-introductory, theory-based, and are usually numbered over 100. Three or more departments must be represented in the concentration. Each course must be taken for a minimum of 3 units. The area of concentration is individually designed by the student in consultation with the student advisers and faculty adviser. Final approval of the concentration rests with the student advisers and faculty adviser. All area of concentration courses must be taken for a letter grade. The minimum grade
requirement for area of concentration courses is ‘C-’. The area of concentration generally has an emphasis in one, and sometimes more than one, of the following eight areas:  

**Area 1: Environment and Environmental Policy**  
Environment  
Environmental Policy  
Culture/Demography/Human Ecology  

**Area 2: Health and Health Policy**  
Health Policy  
Public Health  
International Health  

**Area 3: Human Performance**  

**Area 4: Human Development**  
Biological Development  
Psychological Development  
Education  

**Area 5: Biomedical Science**  
Genetics  
Molecular Biology  
Human Physiology  
Infectious Diseases  

**Area 6: Brain and Behavior**  

**Area 7: Ethics and Medical Humanities**  

**Area 8: Evolution**  

A non-exclusive list of possible courses for each emphasis is available at the student advisers’ office or at [http://www.stanford.edu/dept/humbio/cgi-bin/?q=node/474](http://www.stanford.edu/dept/humbio/cgi-bin/?q=node/474).

4. **Upper-Division Courses:** students must take three Human Biology upper-division courses numbered 100 to 189. These courses should be used to explore subjects outside the area of concentration. One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. All non-laboratory advanced HUMBIO courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement. A list of Human Biology cognate courses can be found at [http://www.stanford.edu/dept/humbio/cgi-bin/?q=node/1382](http://www.stanford.edu/dept/humbio/cgi-bin/?q=node/1382).

A prospective major must consult with the student and faculty advisers to obtain detailed information about the program and guidance in the development of an individual course of study. At the time the major is declared, the student must submit a written statement (3-5 pages) of academic and long-term goals and the proposed list of courses satisfying the requirements for the major. The proposal is then reviewed by the student advisers who help identify an appropriate faculty adviser. Final approval of the proposed course of study rests with the faculty adviser. It is important to declare early, preferably by the end of Spring Quarter of the sophomore year, but not later than the end of Autumn Quarter of the junior year; students must petition the director to declare later than Autumn Quarter of the junior year. Petitions to declare late require additional documentation and are less likely to be approved.

Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

**HUMAN BIOLOGY CORE**  
Required core sequences (2A,B, 3A,B, and 4A,B) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series and take the core in sequence. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are not permitted to enroll. Majors must earn a minimum letter grade of ‘C-’ in core courses. The Human Biology core consists of the following courses:

- HUMBIO 2A. Genetics, Evolution, and Ecology  
- HUMBIO 2B. Culture, Evolution, and Society  
- HUMBIO 3A. Cell and Developmental Biology  
- HUMBIO 3B. Behavior, Health, and Development  

HUMBIO 4A. The Human Organism  
HUMBIO 4B. Environmental and Health Policy Analysis  

**HONORS PROGRAM**

The honors program in Human Biology provides qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including topics introduced in the core or upper-division courses, independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences. Students may apply to the honors program if they have completed the Human Biology core with a minimum GPA of 3.0, have an overall Stanford grade point average (GPA) of 3.2, and meet other requirements detailed in the handbook. Interested students should consult the Human Biology Honors Handbook at [https://stanford.edu/dept/humbio/cgi-bin/?q=node/1385](https://stanford.edu/dept/humbio/cgi-bin/?q=node/1385) and meet with the Human Biology Associate Director or Student Services Officer. Most honors projects involve a total of 10-15 units of course work in HUMBIO 193 and 194. Admission to the honors program is by submission of an intention to undertake honors research in early February, followed by the application in early March of the junior year. Students planning to undertake honors begin research or preparation as early as completion of the sophomore year. The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Each honors student then presents a summary of their research at the Human Biology Honors Poster Symposium in May. Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year. For applications, contact the program office.

**MINOR IN HUMAN BIOLOGY**

A minor in Human Biology provides an introductory background to the relationship between the biological and social aspects of humanity’s origin, development, and prospects. Many of the major problems facing human civilization today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived, integrating what we know of the biological with an understanding of the social and cultural setting in which they exist. Students with a minor in Human Biology will have a strong background in the integration between the biological and social aspects of humans. To minor in Human Biology, students must take the Human Biology Core (HUMBIO 2A, 2B, 3A, 3B, 4A, and 4B) and one additional upper-division course (for example, any course offering by Human Biology numbered 100-189). These must be taken for a minimum letter grade of ‘C-‘. Courses that count towards the fulfillment of major requirements may not be counted towards the minor. Students declaring a minor in Human Biology must do so no later than two quarters prior to their intended quarter of degree conferral (for example, a student must declare a minor before the end of Autumn Quarter to graduate the following Spring Quarter).

**STOREY HOUSE**

Storey House, 544 Lasuen Mall, is an undergraduate resident theme house for Human Biology, devoted to developing an intellectual community among Human Biology majors at Stanford, and allowing faculty and students to become acquainted and share their Human Biology interests and research. Its goals are to foster intellectual discussion in the residential lives of the students living in Storey House, mentoring relationships between upperclassmen and core students in the house, and stimulating events for all Human Biology majors facilitated by academic theme associates. Assignment is made through the regular undergraduate housing draw.
OVERSEAS STUDIES COURSES IN HUMAN BIOLOGY

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://exploreCourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

AUSTRALIA

OXFORD
OSPOXFRD 27. Medical Ethics through Literature and Film. 4 units, Rona Giffard, GER:DB:Hum

WINTER QUARTER

MADRID
OSPMADR 72. Issues in Bioethics Across Cultures. 5 units, Pablo de Lora del Toro

PARIS
OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S.—a Comparison. 4-5 units, Jean-Marie Fessler, GER:DB:SocSci, EC:GlobalCom

SPRING QUARTER

CAPE TOWN
OSPCPTWN 34. The Effect of HIV/AIDS on the Fate of Vulnerable Populations in Sub-Saharan Africa. 4 units, Hugh Brent Solvason

MADRID

PARIS
OSPPARIS 59. Plagues of Europe: How Infections have Shaped Politics, Society, and Biology. 4 units, Julie Parsonnet, GER:DB:SocSci

SANTIAGO
OSPSANSG 36. Darwin’s South America. 3 units, Robert Siegel

IBERIAN AND LATIN AMERICAN CULTURES

Emeriti: (Professors) Bernard Gicovate, Mary Pratt, Isabel Magaña Schevill, Sylvia Wynter; (Professor, Teaching) Maria-Paz Haro
Chair: Roland Greene
Director of Graduate Studies: Vincent Barletta
Director of Undergraduate Studies: Héctor Hoyos
Minors Coordinator: Marilia Librandi Rocha
Professors: Michael P. Predmore, Joan Ramon Resina, Jorge Ruf-finelli, Yvonne Yarbro-Bejarano

Associate Professor: Vincent Barletta
Assistant Professors: Héctor M. Hoyos, Marilia Librandi Rocha, Lisa Surwillo

Course Offerings:

Courses for Heritage Language Speakers—The Language Center offers a series of second- and third-year courses designed for students who wish to develop their existing linguistic strengths. See the “Language Center” section of this bulletin.

The Department of Iberian and Latin American Cultures offers courses focused on the languages, literatures, and cultures of the Iberian Peninsula, Latin America, and Latina/o populations in the United States. To achieve its goal of training students as experts in the cultures of the Iberian Peninsula and Latin America, the department balances an emphasis on literary studies with philosophical, historical, and social approaches to cultural issues.

The department’s faculty is made up of scholars in fields as diverse as medieval and contemporary Catalan literature and culture, modern and contemporary Spanish literature and cinema, contemporary Latin American literature and cinema, Aljamiado and medieval Spanish literature, early modern Portuguese literature, modern and contemporary Brazilian literature, and Chicana/o culture and literature. In general, the department’s courses are characterized by an intercultural and interdisciplinary focus that combines the study of literature with wide ranging intellectual concerns.

The department nurtures cooperative relationships with other departments and programs at Stanford, thus facilitating intellectual inquiry in areas such as anthropology, philosophy, history, Mediterranean studies, medieval and Renaissance studies, European and Latin American politics, feminist studies, Chicana/o studies, and film studies.

The department is committed to three main educational goals: (1) to provide students with a contextualized knowledge of the literatures and cultures of the Iberian Peninsula from the medieval period to the present, of the Spanish and Portuguese speaking countries of Latin America, and of the Spanish-speaking communities of the United States; (2) to prepare undergraduates for advanced study in those areas and/or in a range of professional fields; and (3) to provide doctoral students with advanced training as research scholars and teachers in preparation for careers as university professors or in related roles.

In addition, the department regularly hosts visiting faculty, including the Ginebre Serra visiting chair in Catalan Studies and the Euskal Ikaskuntza Visiting Professor in Basque Culture.

Courses are open to all interested students. The department awards B.A., M.A., and Ph.D. degrees in Iberian and Latin American Cultures to eligible candidates.

Courses for Heritage Language Speakers—The Language Center offers a series of second- and third-year courses designed for students who grew up in homes where Spanish is spoken and who wish to develop their existing linguistic strengths. See the “Language Center” section of this bulletin for these courses.
UNDERGRADUATE PROGRAMS IN IBERIAN AND LATIN AMERICAN CULTURES

The department offers a bachelor of arts in Iberian and Latin American Cultures and minors in Spanish and Portuguese.

The bachelor of arts in Iberian and Latin American Cultures is designed to acquaint students with the diversity of literary and cultural traditions from the Iberian Peninsula and Spanish- and Portuguese-speaking Latin America. Optional courses permit students to develop a concentration in an area of interest, or to enhance their knowledge of the areas they come to know through the core courses. Students are normally expected to declare the major during the sophomore year, but it is possible to declare during the junior year as well.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the “School of Education” section of this bulletin and the credentials administrator, School of Education.

BACHELOR OF ARTS IN IBERIAN AND LATIN AMERICAN CULTURES

The major in Iberian and Latin American Cultures (ILAC) requires 56 units of course work. Courses must be taken for a letter grade and a maximum of 20 units of course work from abroad may be applied towards the major. At the discretion of the Director of Undergraduate Studies, up to 10 units of course work from outside the department, clearly related to the study of literature and culture in the areas and traditions taught by the department, may be counted towards the degree. The core courses (requirements 1, 2, 3 and 4 below) may not be taken abroad. Exceptional cases for any of these requirements must be referred to the Director of Undergraduate Studies who, in consultation with the chair, makes a final decision.

PREREQUISITES

Students planning to declare the major must have completed the second-year sequence of Spanish language courses through SPANLANG 13, or equivalent. SPANLANG 101 is recommended.

How to Declare a Major—Students interested in declaring an ILAC major should see the Director of Undergraduate Studies.

Double Majors—The major in ILAC is designed to combine with a second major in another field and with study abroad. Students may not count the same courses to fulfill requirements in both majors.

GENERAL COURSE REQUIREMENTS

1. Two Writing in the Major (WIM) courses are required, and these are prerequisites for every subsequent course in the major; concurrent enrollment is allowed.
   a. SPANLANG 102. Writing and composition (5 units)
   b. ILAC 120. Introduction to Literary and Scholarly Research (3 units)
2. Core courses in literature. Students are required to take:
   a. ILAC 157. Introduction to Medieval and Early Modern Iberian Literatures
   b. ILAC 136. Introduction to Modern Iberian Literatures
   c. ILAC 161. Introduction to Modern Latin American Literature
3. Core course in culture, history, and civilization. Choose at least one:
   a. ILAC 130. Cultural Perspectives in Iberia
   b. ILAC 131. Cultural Perspectives in Latin America
4. A senior seminar, ILAC 278 or 278A. Topics vary. Two options are offered per year.
5. Up to two courses of introductory language classes may be applied towards the major, such as CATLANG 1A and 2A or PORTLANG 1A and 2A. This is recommended but not required.
6. Any additional 100- or 200-level ILAC literature courses above 100 to complete the required 56 units. One course above 100 and one core course, or consent of the instructor, are prerequisites for 200-level courses. When choosing courses, students are encouraged to consult the Director of Undergraduate Studies who makes recommendations about a course of study related to the student’s academic interests. I/HUM courses taught at least partially by a faculty member of the department may count towards these electives.

HONORS PROGRAM

ILAC majors with a grade point average (GPA) of 3.3 (B+) or better in major courses may apply to the honors program in Spring Quarter of the junior year. Students should submit an application for the honors program and a proposal outline and may enroll for 2 units of ILAC 189B for the drafting or revision of the thesis proposal and preliminary research. Honors students are encouraged to participate in the honors college coordinated by the Division of Literatures, Cultures, and Languages and offered at the end of the summer before the senior year. In Autumn Quarter of the senior year, students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in ILAC 189A while composing the thesis during Winter Quarter. Each honors student must write a substantial honors essay under the direction of a faculty member who serves as adviser, and the completed thesis must be submitted by the end of Winter Quarter. Students who do not enroll in a 189B course in the junior year may enroll in ILAC 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis adviser. A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis. Students should consult their undergraduate advisers for additional information on the honors program.

MINORS IN SPANISH AND PORTUGUESE

The minors in Spanish and Portuguese are for students who want to develop advanced linguistic competence in Spanish or Portuguese, or who wish to combine acquisition of linguistic competence with the study of the literature, thought, culture, or language systems of the Spanish- or Portuguese-speaking worlds. The minors in Spanish and Portuguese require 30 units of course work taken for a letter grade. Up to 5 units of course work outside the department may count towards the minor, with the approval of the minors coordinator, and up to 10 units of relevant course work taken abroad, may count toward these minors. Courses other than those listed as eligible may only count toward the minor with the approval of the minors coordinator or the Director of Undergraduate Studies. To declare either of these minors or for more information, see the minors coordinator or the undergraduate student services office in the Division of Literatures, Cultures, and Languages.

MINOR IN SPANISH

Requirements—
1. SPANLANG 102. Writing and composition
2. A 100- or 200-level course in Iberian literature
3. A 100- or 200-level course in Latin American literature
4. Any additional 100- or 200-level courses in literature and culture to complete 30 units. I/HUM courses taught at least partially by a faculty member of the department count towards these electives.

MINOR IN PORTUGUESE

Requirements—
1. PORTLANG 102.
2. A 100- or 200-level course in Iberian literature with a Lusophone component
3. A 100- or 200-level course in Latin American literature with a Lusophone component
MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs: the minor in Literature and the minor in Modern Languages. These minors draw on literature and language courses offered in this and other literature departments. See the “Literatures, Cultures, and Languages” section of this bulletin for further details about these minors and their requirements.

STUDY ABROAD PROGRAMS IN IBERIAN AND LATIN AMERICAN CULTURES

All majors are encouraged to study abroad. To transfer credits from non-Stanford programs abroad, consult the Student Services Center. Depending on course selections, up to 20 units of course work taken abroad may be applied toward the major in ILAC and 10 units toward the minor in Spanish or Portuguese. Students planning to study abroad, or returning from study programs, are encouraged to consult with the Director of Undergraduate Studies to coordinate the course work from abroad with their degree program.

The department and Bechtel International Center maintain information on study abroad programs. Stanford supports the options listed below and credits course work taken in academically sound programs. Students considering different options are encouraged to speak with the Chair of the department or the Director of Undergraduate Studies.

STANFORD IN SANTIAGO, CHILE AND MADRID OR BARCELONA, SPAIN

The Bing Overseas Studies Programs in Santiago, Chile and Madrid, Spain require one year of college-level Spanish (SPAN-LANG 3). Course work is primarily in Spanish. Information and course offerings are listed in the “Overseas Studies” section of this bulletin or at http://osp.stanford.edu. Internships and research opportunities may be arranged for students staying for two quarters.

For ILAC majors with an interest in Iberian Studies, the department recommends study in Barcelona through CASB, a Consortium of U.S. universities of which Stanford is a participating member. This program combines courses at the program’s center with open access to courses at three Barcelona Universities: Universitat Popeu Fabra, University of Barcelona, and Autonomous University of Barcelona. Visiting faculty from Brown, Chicago, Stanford and Northwestern complement the offerings of these three major universities. Admission is highly competitive. Other programs are also recognized by the department, and students are encouraged to discuss their interests with the Chair or with the Director of Undergraduate Studies.

BRAZIL AND PORTUGAL

The University maintains a relationship with the Universidade Estadual do Rio de Janeiro in Brazil at the graduate level. Students interested in study in Brazil should contact Marilia Librandi Rocha. Students interested in study in Portugal should contact Professor Vincent Barletta.

GRADUATE PROGRAMS IN IBERIAN AND LATIN AMERICAN CULTURES

University requirements for the M.A. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

COTERMINAL B.A. AND M.A.

The requirements for the coterminal M.A. are the same as those outlined below for the M.A. No course can count for both the B.A. and M.A. degrees. For University coterminal degree program rules and application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MASTER OF ARTS IN IBERIAN AND LATIN AMERICAN CULTURES

This terminal M.A. degree program is for students who do not intend to continue their studies through the Ph.D. degree. Students in this program may not apply concurrently for entrance to the Ph.D. program. Students must complete a minimum of 45 graduate-level units, 36 of which must have a grade point average (GPA) of 3.0 or above.

The requirements for the M.A. are:
1. One course in literary or cultural theory
2. Two 200 or above courses in Latin American (including Brazilian) or Latino/Chicano literature and culture
3. Two 200 or above courses in Iberian Studies
4. One 300-level course in Iberian Studies and one in Latin American (including Brazilian)
5. Reading knowledge of Portuguese or Catalan for students concentrating in Spanish, or Spanish or Catalan for students concentrating in Portuguese.

Independent study courses (ILAC 299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by consent of the Director of Graduate Studies. In addition, students may take approved courses in related fields such as classics, comparative literature, education, history of art, linguistics, modern thought, and philosophy.

DOCTOR OF PHILOSOPHY IN IBERIAN AND LATIN AMERICAN CULTURES

The requirements of the Ph.D. in ILAC are:
1. 135 units of graduate-level course work with a grade point average (GPA) of 3.0 (B) or above. Units completed for the M.A. degree can be counted toward the Ph.D.
2. One course on introduction to literary theory or philosophical issues, which may be fulfilled with various courses offered in the Department and the Division of Literatures, Cultures, and Languages. Students should discuss the options with the Director of Graduate Studies or their advisor.
3. Knowledge of Catalan, Portuguese and Spanish equivalent to one year of university study must be demonstrated before students take the comprehensive examination. In addition, Ph.D. students must have superior proficiency in one of these languages upon admission to the program.
4. The qualifying paper, the comprehensive examination, and the University oral examination, as described below.
5. Teaching of five courses in the department.

Independent study courses (ILAC 299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by consent of the Director of Graduate Studies in consultation with the student’s graduate adviser. For residency and candidacy requirements, see the “Graduate Degrees” section of this bulletin. For further information, consult the department’s Graduate Student Handbook.

In preparation for teaching, Ph.D. candidates are required to take DLCL 201 in the first year.

In consultation with the adviser, students choose one major field of study from the following:
1. Medieval and Early Modern Iberian Literature and Culture
2. Modern Iberian Literature and Culture
3. Modern Latin American Literature and Culture (includes Brazilian)

In addition, candidates choose two secondary areas of study outside the major field from any of the above.

At least four courses must be taken in the major field of study. At least two courses must be taken in each secondary area.

In addition to the department’s course offerings, students may take relevant courses with the approval of their adviser in other departments and programs, such as courses in Comparative Literature, Feminist Studies, History, Humanities, Linguistics, or Mod-
ern Thought and Literature. It is also possible to complete a minor in another department with approval of the adviser. Not more than 20 units may be taken outside the department. Prior to the quarter in which the comprehensive examination is taken, students are required to take at least one graduate seminar in the department every quarter.

After the first year of study, the student’s progress is evaluated by the faculty to determine whether continuation to the Ph.D. is recommended and whether there are particular areas where improvement is needed. For this evaluation, students submit a research paper of approximately 20 pages, called the qualifying paper, on October 1st of the second year. The requirements for this paper are outlined in the Graduate Student Handbook.

If approval of the qualifying paper is granted, the student should file a formal application for candidacy no later than the end of the second year, as prescribed by the University. Course requirements are usually completed by the third year of study. A written comprehensive examination on the major field and secondary areas is then taken. The examination is based on a list of readings, selected in consultation with the adviser, which integrates major and secondary topics in both Iberian and Latin American or Latino/Chicano Studies. At this time, students hand in a long research paper to be evaluated by the faculty. For further details, consult the Graduate Student Handbook.

Following the comprehensive examination, students should find a topic requiring extensive original research and request that a member of the department serve as dissertation adviser. The student must complete the Reading Committee form and request that the chair approve a committee to supervise the dissertation. The committee may advise extra preparation within or outside the department, and time should be allowed for such work. The University oral examination usually takes place one or two quarters after passing the comprehensive examination. The oral examination covers plans for the dissertation based on a prospectus approved by the committee (15 to 20 pages), and may be taken in English, Spanish, Portuguese, or Catalan, depending on the committee’s composition.

The dissertation must be submitted to the reading committee in substantially final form at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree. Ph.D. dissertations must be completed and approved within five years from the date of admission to candidacy. Candidates taking more than five years must apply for reinstatement of candidacy and may not expect continued financial support.

**PH.D. IN SPANISH AND HUMANITIES**

The Department of Iberian and Latin American Cultures participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Iberian and Latin American Cultures and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities. Although the Graduate Program in Humanities is not currently accepting new students, it continues to provide advising for students already enrolled as well as courses, open to all students. The University remains committed to a broad-based undergraduate education in the humanities, and a successor program is under discussion by the faculty of the Division of Literatures, Cultures, and Languages. For further information, please consult Gregory Freidin, the director of the program; the list of courses and events may be found on the program web site: http://ish.stanford.edu/programs/graduate.

**PH.D. MINOR IN IBERIAN AND LATIN AMERICAN CULTURES**

For a minor in Spanish, the student must complete 25 units, with a grade point average (GPA) of 3.0 or above, selected from courses numbered 200 or higher.

Students in the Ph.D. program in ILAC who choose a minor in another department should consult with advisers in that department.

**IBERIAN AND LATIN AMERICAN CULTURES COURSE CATALOG NUMBERING SYSTEM**

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literary studies should also consult course listings in the departments of East Asian Languages and Cultures, Classics, Comparative Literature, English, French and Italian, German Studies, and Slavic Languages and Literatures, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

**OVERVIEW**

1. Stanford Introductory Seminars, freshman and sophomore preference (suffix of N or Q)
   a. Undergraduate Courses (100-199)
   b. Courses for Advanced Undergraduates and Graduates (200-299)
   Iberian Literature (200-239)
   Latin American Literature, including Brazil (240-279)
   Latino/Chicano Literature (280-298)
   Individual Work (299)
2. Graduate Seminars (300-399)
   Iberian Literature (300-339)
   Latin American and Brazilian Literature (340-379)
   Chicano Literature (380-398)
   Individual Work (399)
   Dissertation Research (802)

Courses bearing the suffix ‘E’ are taught in English and do not assume competence in another language. All other courses require some knowledge of Spanish or Portuguese, and may be given in those languages or bilingually.

**OVERSEAS STUDIES COURSES IN IBERIAN AND LATIN AMERICAN STUDIES**

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

**AUTUMN QUARTER**

**MADRID**

OSPMADR 40. Introduction to Literary and Cultural Analysis in the Spanish World. 4-5 units, Santiago Tejerina-Canal, GER:DB:Hum
OSPMADR 63. Spanish Society Through the Eye of the Camera. 3 units, Maria-Paz Haro, GER:DB:Hum

**SANTIAGO**

OSPSANTG 14. Women Writers of Latin America in the 20th Century. 4-5 units, Sergio Missana, GER:DB:Hum, EC:Gender
OSPSANTG 104X. Modernization and Culture in Latin America. 5 units, Bernardo Subercaseaux, GER:DB:SocSci, EC:GlobalCom

**WINTER QUARTER**

**MADRID**

OSPMADR 41. Dissidence and Continuity: Spanish Theater 1907 to the Present. 4-5 units, Santiago Tejerina-Canal, GER:DB:Hum
OSPMADR 45. Women in Art: Case Study in the Madrid Museums. 4 units, Julia Domínech López, GER:DB:Hum, EC:Gender
The Individually Designed Major (IDM) program is overseen by the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences. (Please see the "School of Engineering" section of this bulletin for information about the IDM in Engineering.)

The program is intended for currently registered undergraduates in good academic standing interested in pursuing an area of scholarly inquiry that falls outside the purview of an established academic department or program of the University. Proposals for the IDM should be intellectually coherent majors designed by the students themselves with the assistance of faculty members of their choice. The advisers must be members of the Academic Council. The IDM requires a minimum of 75 units, all in courses at or above the 100 level, and a minimum GPA of 3.5. The proposed major must not duplicate or be achievable through a major already offered by another degree-granting department or program. IDM students are required to complete a capstone requirement in the form of an honors project. An IDM cannot be a student’s secondary major.

The application deadline for IDM proposals is the fifth week of Spring Quarter of the sophomore year. Applications are reviewed only once a year by a curriculum committee in H&S. Information about proposal procedures and the procedure for an honors project is available at the Office of Graduate and Undergraduate Studies in the Dean’s Office in the School of Humanities and Sciences, Building 1.

**INDIVIDUALLY DESIGNED MAJORS AND INDIVIDUALLY DESIGNED HONORS PROGRAM IN HUMANITIES**

Qualified students who wish to complete an honors thesis in the Humanities and to have the notation "Honors in Humanities" recorded on their diplomas and transcripts in addition to their primary major must complete the equivalent of a minor in one humanities and arts department, and an additional 10 units in another. Winter-Spring IHUM courses may be used to satisfy part of this requirement. Courses must be chosen in consultation with the student’s advisers, and a potential list of such courses submitted with the proposal.

4. Students majoring in a non-humanities and arts department must complete the equivalent of a minor in one humanities and arts department, and an additional 10 units in another. Winter-Spring IHUM courses may be used to satisfy part of this requirement. Courses must be chosen in consultation with the student’s advisers, and a potential list of such courses submitted with the proposal.

5. Students must complete a capstone, majors seminar, or honors seminar in a humanities and arts department.

6. The honors thesis may be taken for a minimum of 5 units up to a maximum of 10 units. These units must be in addition to the requirements of 3 or 4 and 5 above. The student should determine the size and scope of the thesis in consultation with his or her two advisers.

7. Students should consult with the Associate Dean for Graduate and Undergraduate Studies in the School of Humanities and Sciences before submitting a proposal.

8. All proposals must be submitted no later than the third week of Autumn Quarter in the student’s junior year, and preferably by Spring Quarter of the Sophomore year. H&S’s Curriculum Committee in the Humanities and Arts reviews all proposals as received.

**INTERDISCIPLINARY STUDIES IN HUMANITIES**

**Director:** Gregory Freidin  
**Program Coordinator:** Alice Staveley  
**Program Offices:** Building 460, Room 216  
**Mail Code:** 94305-2022  
**Phone:** (650) 723-3413  
**Email:** monica.moore@stanford.edu  
**Web Site:** [http://ish.stanford.edu](http://ish.stanford.edu)

The Program in Interdisciplinary Studies in Humanities is not accepting new students; it will provide courses and advising for students already enrolled. The University remains committed to broad-based undergraduate education in the humanities; a successor program is under discussion by the faculty of the Division of Literatures, Cultures, and Languages. For updates on this status, please visit the program web site: [http://ish.stanford.edu](http://ish.stanford.edu).

Undergraduates interested in the broad-based humanities honors degree should consult the Associate Dean for Graduate and Undergraduate Studies in the School of Humanities and Sciences for the Individually Designed Honors Program in Humanities.

The Graduate Program in Humanities is not accepting new students; it will provide courses and advising for students already enrolled. The University remains committed to broad-based graduate education in the humanities; the courses, colloquium, and symposium will continue to be offered, and a successor program is under discussion by the faculty of the Division of Literatures, Cultures, and Languages. For updates on this status, please visit the program web site: [http://ish.stanford.edu/programs/graduate](http://ish.stanford.edu/programs/graduate).

Courses for undergraduate and graduate students already enrolled in the program are listed under the subject code HUMANITIES on the [Stanford Bulletin’s ExploreCourses web site](http://ish.stanford.edu/courses), as well as the program web site: [http://ish.stanford.edu/courses](http://ish.stanford.edu/courses).
DIVISION OF INTERNATIONAL, COMPARATIVE AND AREA STUDIES

Director: Andrew Walder
Advisory Committee: Shahzad Bashir (Religious Studies), Judith Goldstein (Political Science), Aron Rodrigue (History), Kenneth Schultz (Political Science), Andrew Walder (Sociology), Kären E. Wigen (History)

Directors’ Committee: Keith Baker (History), Shahzad Bashir (Religious Studies), Carl Bielefeldt (Religious Studies), Philippe Buc (History), Charlotte Fonrobert (Religious Studies), Paul Harrison (Religious Studies), Linda Hess (Religious Studies), Herbert Klein (History), Abbas Milani (Hoover), Richard Roberts (History), Aron Rodrigue (History), Gabriella Safran (Slavic Languages and Literatures), Kenneth Schultz (Political Science), Vered Shemtov (Language Center), Stephen J. Stedman (Freeman Spogli Institute for International Studies), Andrew Walder (Sociology), Amir Weiner (History), Kären E. Wigen (History)

Division Office: Encina Hall West, second floor
Mail Code: 94305-6045
Web Site: http://ica.stanford.edu

The Division of International, Comparative and Area Studies (ICA) supports research and teaching in the cultures and societies of the world, and studies the problems facing developing societies as they seek to end their poverty and social and economic inequalities. ICA promotes new centers of teaching excellence in traditional areas of historical and cultural concerns, as well as promoting interdisciplinary activities related to developing new ideas for dealing with fundamental issues of justice, equality, and growth within nation states, cultures, and regions.

The Division of International, Comparative and Area Studies is comprised of research centers, degree granting programs, and religious and cultural centers: Center for African Studies*; Center for East Asian Studies*; Center for European Studies*; Center for Latin American Studies*; Center for Russian, East European and Eurasian Studies*; Center for South Asia; Ford Dorsey Program in International Policy Studies*; France-Stanford Center for Interdisciplinary Studies; Hamid and Christina Moghadam Program in Iranian Studies; Mediterranean Studies Forum; Program in International Relations*; Robert H. N. Ho Family Foundation Center for Buddhist Studies at Stanford University; Sohaib and Sara Abbasi Program in Islamic Studies; and the Taube Center for Jewish Studies*. Degree granting programs are denoted with an asterisk (*); the Taube Center for Jewish Studies oversees an Individually Designed Major.

CENTER FOR AFRICAN STUDIES

Director: Richard Roberts
Office: Encina Hall West, second floor
Web Site: http://africanstudies.stanford.edu

The Center for African Studies (CAS) is an interdisciplinary research program. CAS offers an undergraduate minor and certificate, and a Master of Arts (M.A.) degree. For further information, see the “African Studies” section of this bulletin.

CENTER FOR EAST ASIAN STUDIES

Director: Kären E. Wigen
Office: Encina Commons
Web Site: http://ceas.stanford.edu

The Center for East Asian Studies (CEAS) seeks to increase interdisciplinary communication among faculty, students, and outside scholars whose research, teaching, or study focuses on East Asia. CEAS offers a master’s degree program. It sponsors programs that enhance public knowledge and access to the University’s East Asia resources.

For further information, see the “East Asian Studies” section of this bulletin.

CENTER FOR EUROPEAN STUDIES

Director: Philippe Buc, Amir Weiner
Office: Encina Hall West, second floor
Web Site: http://europeanstudies.stanford.edu

The Center for European Studies (CES) is a multidisciplinary institute committed to the examination of European society, culture, politics, diplomacy, and security. The Center’s goal is to develop Stanford’s contribution to the study of Europe’s history and contemporary position as a global power by bringing together students and scholars from the humanities and the social sciences, policy makers, diplomats, and journalists. The Center sponsors visiting professors, intellectuals, and personalities from Europe. Besides research, an important side-product of these exchanges is the development of Stanford undergraduate and graduate courses on themes related to European history, culture, and current events.

CENTER FOR LATIN AMERICAN STUDIES

Director: Herbert S. Klein
Office: Bolivar House
Web Site: http://las.stanford.edu

The Center for Latin American Studies at Stanford University (CLAS) offers academic programs for students, coordinates academic conferences and lectures, and fosters interdisciplinary research for students and faculty through fellowships and funding opportunities. The Center offers an undergraduate minor, an interdisciplinary honors program for undergraduates, and a master’s degree.

For further information, see the “Center for Latin American Studies” section of this bulletin.

CENTER FOR RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES

Director: Gabriella Safran
Office: Encina Hall West, second floor
Web Site: http://creees.stanford.edu

The Center for Russian, East European and Eurasian Studies (CREEES) offers an undergraduate minor and a one-year master’s program in interdisciplinary area studies.

For further information, see the “Center for Russian, East European and Eurasian Studies” section of this bulletin.

CENTER FOR SOUTH ASIA

Director: Linda Hess
Office: Encina Hall West, second floor
Web Site: http://southasia.stanford.edu

The Center for South Asia (CSA) serves to coordinate and develop Stanford’s resources for the study of South Asia across all the disciplines in the School of Humanities and Sciences. It works closely with departments and other units of the University to increase faculty strength, support research, enhance the curriculum, build the library collection, and sponsor programs and events.

FORD DORSEY PROGRAM IN INTERNATIONAL POLICY STUDIES

Director: Stephen J. Stedman
Office: Encina Hall West, second floor
Web Site: http://ips.stanford.edu

The Ford Dorsey Program in International Policy Studies (IPS) is a two-year master’s program that seeks to train the next generation of policy analysts to solve key global problems.

For further information, see the “International Policy Studies” section of this bulletin.
FRANCE-STANFORD CENTER FOR INTERDISCIPLINARY STUDIES

Director: Keith Baker
Office: Building 260, room 105
Web Site: http://francestanford.stanford.edu

The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues of significance for France and the United States. The Center brings together Stanford faculty and students and academics in France to advance collaborative research and foster interdisciplinary inquiry. Its programs include conferences, support for collaborative research projects, internships, exchanges, lectures, and seminars.

HAMID AND CHRISTINA MOGHADAM PROGRAM IN IRANIAN STUDIES

Director: Abbas Milani
Office: Encina Hall West, second floor
Web Site: http://iranian-studies.stanford.edu

The Hamid and Christina Moghadam Program in Iranian Studies at Stanford fosters the interdisciplinary study of Iran as a civilization, one of the oldest in the world. The program combines pedagogy, policy analysis, and research on all aspects of Iran’s past, present, and future. The program organizes lectures and student research conferences on Iran.

MEDITERRANEAN STUDIES FORUM

Director: Aron Rodrigue
Office: Encina Hall West, second floor
Web Site: http://mediterraneanstudies.stanford.edu

The Mediterranean Studies Forum encourages scholars to explore the interplay among societies, cultures, and communities around the Mediterranean Basin from the Middle Ages to the present. Its focus is on all aspects of co-existence and conflict that have marked these encounters in the empires, port cities, nation states, and transregional and transnational social, religious, cultural, and economic contexts of North Africa, the Levant, the Balkans, and Southern Europe. It is also interested in the relations of the Mediterranean with other regions and areas of the world. The central goal of the forum is to contribute to interdisciplinary dialogue among scholars of these areas through lectures, colloquia, workshops, conferences, and publications.

PROGRAM IN INTERNATIONAL RELATIONS

Director: Kenneth Schultz
Office: Encina Hall West, second floor
Web Site: http://internationalrelations.stanford.edu

International Relations (IR) is an interdisciplinary undergraduate major focusing on changing political, economic, and cultural relations within the international system in the modern era.

For further information, see the “International Relations” section of this bulletin.

ROBERT H. N. HO FAMILY FOUNDATION CENTER FOR BUDDHIST STUDIES AT STANFORD UNIVERSITY

Directors: Carl Bielefeldt, Paul Harrison
Office: Building 70, Room 71E
Web Site: http://hcbs.stanford.edu

The Robert H. N. Ho family Foundation Center for Buddhist Studies at Stanford University (HCBSS) serves to coordinate, support, and develop the University’s resources for Buddhist Studies in scholarly research, academic communication, teaching, and public outreach. The Center supports individual and team research projects for faculty, students, and visiting fellows. It houses a reference collection and reading room and sponsors lectures, conferences, symposia, workshops, and seminars. The Center works closely with the Department of Religious Studies, the Buddhism in the Modern World Program, and the Group in Buddhist Studies at UC Berkeley.

SOHAIB AND SARA ABBASI PROGRAM IN ISLAMIC STUDIES

Director: Shazhad Bashir
Office: Encina Hall West, second floor
Web Site: http://islamicstudies.stanford.edu

The mission of the Sohaib and Sara Abbasi Program in Islamic Studies is to serve as a forum for interdisciplinary research and teaching in Islamic studies, complemented by seminars, colloquia and public lectures. The program seeks to illuminate Islamic history from its beginnings to the 21st century, the religion of Islam in its many aspects, and the diversity of Muslim cultures and societies, past and present, not only in the Middle East but also including South and Southeast Asia, Africa, Europe, and America. In addition to geographical breadth, the program promotes the use of scholarly resources from both the humanities and the social sciences. Participating faculty and students bring perspectives and methods from academic fields including anthropology, art, economics, history, international relations, languages, law, literature, philosophy, political science, and religious studies.

TAUBE CENTER FOR JEWISH STUDIES

Directors: Charlotte Fonrobert, Vered Shemtov
Office: Building 360, Room 362G
Web Site: http://jewishstudies.stanford.edu

The interdisciplinary Taube Center for Jewish Studies coordinates and promotes the study of all aspects of Jewish life. The center offers an undergraduate minor and an interdisciplinary major coordinated by the Humanities and Sciences dean’s office.

For further information, see the “Jewish Studies” section of this bulletin.

INTERNATIONAL POLICY STUDIES

Director: Stephen J. Stedman (Freeman Spogli Institute for International Studies)

Executive Committee Co-chairs: Coit D. Blacker (Freeman Spogli Institute for International Studies), Andrew Walder (Sociology)
Executive Committee: Larry Diamond (Hoover Institution), Nicholas C. Hope (Stanford Institute for Economic Policy Research), Jenny Martinez (Law), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Bruce Owen (Public Policy), Julie Parsommet (Medicine), Frank Wolak (Economics)

Lecturers: Undraa Agvaanluvsan, Chonira Aturupane, Rafiq Dosani, Erica Gould, Eric Morris, Joe Nation, Daniel Sneider
Affiliated Faculty: Mike Armacost (Freeman Spogli Institute for International Studies), Jonathan Bendor (Business), Byron Bland (Freeman Spogli Institute for International Studies), Paul Brest (Law), Jeremy Bulow (Economics), Gordon Chang (History), John Cogan (Hoover Institution), Joshua Cohen (Political Science), Martha Crenshaw (Freeman Spogli Institute for International Studies), Larry Diamond (Hoover Institution), Lynn Eden (Sociology), Walter P. Falcon (Freeman Spogli Institute for International Studies), James Fearon (Political Science), Lawrence Goluber (Economics), Stephen H. Haber (Political Science), David J. Holloway (History, Political Science), Simon Jackman (Political Science), Seema Jayachandran (Economics), Timothy Josling (Freeman Spogli Institute for International Studies), Terry Karl (Political Science), Daniel P. Kessler
(Business), Stephen D. Krasner (Political Science), Gail Lapidus (Freeman Spogli Institute for International Studies), Susanna Loeb (Education), Michael McFaul (Political Science, on leave), Ronald I. McKinnon (Economics), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Jean Oi (Political Science), William Perry (Management Science and Engineering), Rob Reich (Political Science), Douglas Rivers (Political Science), Richard Roberts (History), Lee Ross (Psychology), Scott D. Sagan (Political Science), Peter Stone (Political Science), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies), Jeff Strnad (Law), Michael Tomz (Political Science), Andrew Walder (Sociology), Allen Weiner (Law), Jeremy Weinstein (Political Science)

Program Office: Encina Hall West, Room 216
Mail Code: 94305-6045
Phone: (650) 725-9155
Web Site: http://ips.stanford.edu

Courses offered by the Ford Dorsey Program in International Policy Studies are listed under the subject code IPS on the Stanford Bulletin’s ExploreCourses web site.

The Ford Dorsey Program in International Policy Studies (IPS) is an analytical interdisciplinary program focusing on international policy analysis. Its goal is to provide students with exposure to issues they will face in international business and public policy, and to develop the skills and knowledge to address those issues. The program allows students to specialize in: international political economy; international negotiation and conflict management; international security and cooperation; democracy, development, and the rule of law; global health; global justice; energy, environment, and natural resources.

University requirements for the M.A. degree are described in the “Graduate Degrees” section of this bulletin.

ADMISSION

IPS is designed for students who have a strong undergraduate background in economics and political science. To enroll in the program, students must have taken undergraduate courses in calculus-based statistics, microeconomics, macroeconomics, international trade and international finance. Stanford courses satisfying these requirements are ECON 51, 52, 102A or POLISCI 150A, and ECON 165 and 166.

Applicants from schools other than Stanford or applicants from Stanford who did not apply in their senior year should submit a graduate admission application including a statement setting forth relevant personal, academic, and career plans and goals; official transcripts; three letters of recommendation; Graduate Record Examination (GRE) scores; a writing sample of at least ten pages; area of concentration form; and resume. TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction. To apply or for information on graduate admission, see http://gradadmissions.stanford.edu. Applicants are expected to have a B.A. or B.S. degree from an accredited school. Applications for admission in Autumn Quarter must be filed with supporting credentials by January 5, 2010.

Undergraduates at Stanford may apply for admission to the coterminal master’s program in IPS when they have earned a minimum of 120 units toward graduation, including AP and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. Students who have been admitted to Stanford’s Law School as well as the IPS program may choose to complete a joint JD/MA in IPS degree. Students interested in pursuing the joint JD/MA in IPS should speak with a program administrator, as degree requirements are tailored to each individual student.

The IPS program has the following prerequisites: ECON 51, 52, and either 102A or POLISCI 150A, and ECON 165 and 166. Core Courses—

1. IPS 300. Public Policy Colloquium (1 unit)
2. IPS 201. Managing Global Complexity (3 units)

Policy Skills—

1. IPS 204B. Cost-Benefit Analysis and Evaluation (4 units)
2. IPS 205A. Foundations of Statistical Inference (4 units)
3. IPS 205B. Econometrics (4 units)
4. IPS 206A. Politics and Collective Action (4 units); or IPS 208. Justice (4 units); or POLISCI 336. Global Justice (5 units)
5. IPS 206B. Organizations (4 units)
6. IPS 207A. Judgment and Decision Making (4 units); or IPS 207B. Public Policy and Social Psychology: Implications and Applications (4 units)

Writing and Rhetoric Seminar—One of the following (5 units):
1. IPS 210. Politics of International Humanitarianism
2. IPS 211. The Transition from War to Peace: Peacebuilding Strategies
3. IPS 244. U.S. Policy Toward Northeast Asia
4. IPS 314S. Decision Making in U.S. Foreign Policy International Economics—IPS 202. Topics in International Macroeconomics; or IPS 203. Issues in International Economics (5 units)

Practicum or Thesis—IPS 209. Practicum (10 units); or IPS 209A. Master’s Thesis

Concentration Curriculum—Students are required to complete a total of six courses at a minimum of 24 units from a list of IPS

Law School with training through IPS. Prospective students interested in the joint JD/MA in IPS program may apply concurrently to both the Stanford Law School and the IPS program. This means that two separate application forms are required and applicants must submit LSAT scores to the Law School and GRE scores to the IPS program.

Students already enrolled at Stanford Law School may apply to the joint JD/MA in IPS program by no later than the end of the second year of Law School. The IPS program will make rolling admissions decisions based on the student’s original application materials (GRE scores are not required in addition to LSAT scores in this case). Submission of the following documents is required for consideration: IPS Joint Degree Application Form (available from the IPS web site), Law School Joint Degree Petition (available from the Law School Registrar’s Office), Graduate Program Authorization Petition and the Enrollment Agreement for Students with Multiple Programs (both available from the H&S Registrar’s Office).

M A S T E R O F A R T S I N I N T E R N A T I O N A L P O L I C Y S T U D I E S

DEGREE REQUIREMENTS

To receive the M.A. degree in International Policy Studies, students must complete the courses listed below. These requirements entail 4 units of core courses, 24-25 units of policy skills courses, a 10-unit practicum or master’s thesis, a 5-unit writing and rhetoric seminar, a 5-unit course in international economics, and a total of six courses at a minimum of 24 units from the concentration curriculum. Only students with two or more years of relevant work experience may petition to write a master’s thesis instead of taking the practicum. To obtain the M.A. degree in IPS, students must complete a minimum of 72 units over two years.

Undergraduates at Stanford may apply for admission to the coterminal master’s program in IPS when they have earned a minimum of 120 units toward graduation, including AP and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree.

Students who have been admitted to Stanford’s Law School as well as the IPS program may choose to complete a joint JD/MA in IPS degree. Students interested in pursuing the joint JD/MA in IPS should speak with a program administrator, as degree requirements are tailored to each individual student.

The IPS program has the following prerequisites: ECON 51, 52, and either 102A or POLISCI 150A, and ECON 165 and 166. Core Courses—

1. IPS 300. Public Policy Colloquium (1 unit)
2. IPS 201. Managing Global Complexity (3 units)

Policy Skills—

1. IPS 204B. Cost-Benefit Analysis and Evaluation (4 units)
2. IPS 205A. Foundations of Statistical Inference (4 units)
3. IPS 205B. Econometrics (4 units)
4. IPS 206A. Politics and Collective Action (4 units); or IPS 208. Justice (4 units); or POLISCI 336. Global Justice (5 units)
5. IPS 206B. Organizations (4 units)
6. IPS 207A. Judgment and Decision Making (4 units); or IPS 207B. Public Policy and Social Psychology: Implications and Applications (4 units)

Writing and Rhetoric Seminar—One of the following (5 units):
1. IPS 210. Politics of International Humanitarianism
2. IPS 211. The Transition from War to Peace: Peacebuilding Strategies
3. IPS 244. U.S. Policy Toward Northeast Asia
4. IPS 314S. Decision Making in U.S. Foreign Policy International Economics—IPS 202. Topics in International Macroeconomics; or IPS 203. Issues in International Economics (5 units)

Practicum or Thesis—IPS 209. Practicum (10 units); or IPS 209A. Master’s Thesis

Concentration Curriculum—Students are required to complete a total of six courses at a minimum of 24 units from a list of IPS
approved courses within their area of concentration (see list below). A gateway course in the area of concentration must be taken prior to enrolling in subsequent courses. A complete list of the courses in these areas is available on the IPS web site.

- Democracy, Development, and Rule of Law
- Energy, Environment, and Natural Resources
- Global Health
- Global Justice
- International Negotiation and Conflict Management
- International Political Economy
- International Security and Cooperation

**Language Requirement**—Proficiency in a foreign language is required and may be demonstrated by completion of three years of university-level course work in a foreign language or by passing an oral and written proficiency examination prior to graduation.

**Grade Requirements**—All courses to be counted toward the degree, except IPS 300, must be taken for a letter grade.

**Financial Aid**—Limited financial aid is available for graduate students entering the IPS program.

**COGNATE COURSES**

The courses listed below fulfill elective requirements within the various areas of concentration. Not all courses are applicable for every area of concentration. Additional relevant courses may be offered; for updated information, please visit the program office or web site. For course descriptions, see respective department listings.

Web Site: http://internationalrelations.stanford.edu

Courses offered by the Program in International Relations are listed under the subject code INTNLREL on the Stanford Bulletin’s ExploreCourses web site.

International Relations (IR) is an interdisciplinary undergraduate major focusing on the changing political, economic, and cultural relations within the international system in the modern era. The program explores how global, regional, and domestic factors influence relations among world actors. Students are equipped with the skills and knowledge necessary to analyze choices and challenges that arise in this arena. IR majors pursue a study in world politics that includes courses in political science, economics, history, and languages, focusing on issues such as international security, international political economy, political and economic development, and democratization. Students must spend at least one quarter overseas and show two-year proficiency in a foreign language. Many IR students pursue careers in government, nongovernmental organizations, and business, or go to graduate school in law, business, economics, or political science.

UNDERGRADUATE PROGRAMS IN INTERNATIONAL RELATIONS

International Relations offers an undergraduate Bachelor of Arts program, an honors program, and a minor in International Relations.

It is possible for students majoring in International Relations to work simultaneously for a coterminal master’s degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree requirements in both fields. For information on the M.A. program in International Policy Studies, see the “International Policy Studies” section in this bulletin. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

BACHELOR OF ARTS IN INTERNATIONAL RELATIONS

The International Relations major must be declared no earlier than the beginning of sophomore year and no later than the end of the second quarter of the junior year. Students must submit an acceptable proposal to the director of the program and declare IR on Axess. Students completing a double major, or fulfilling International Relations as a secondary major, are also required to file a proposal by the end of the second quarter of the junior year.

Requirements for the major (70 units) are as follows; IR core courses are listed in items 1-5:

1. POLISCI 1
2. POLISCI 110A or 110B or 110C or 110D or HISTORY 158
3. ECON (10 units), two of these five courses: ECON 1A, 1B, 50, 51, 52
4. Two additional upper-division courses with strong economic components from the IR approved course offerings list
5. At least one of the following skills classes: ECON 102A, POLISCI 150A, STATS 60
6. Complete either a functional specialization or an area specialization (see below for descriptions of specializations). Courses that are used in the core area (1-5 above) cannot also be counted for the specialization.
7. At least one course must be an upper-division seminar or colloquium.
8. At least one writing intensive course designated as Writing in the Major (WIM) for International Relations.
9. No more than 20 units can be lower-division courses.
10. A minimum grade of ‘C’ is required for courses to count towards major requirements.
11. Completion of one quarter study overseas either through the Stanford Overseas Studies Program or an approved non-Stanford program; non-Stanford programs must be pre-approved by the IR program before the student enrolls in the program.
12. Proficiency in a foreign language through two years of course work (second-year, third-quarter) or a proficiency exam.

FUNCTIONAL SPECIALIZATION

The three functional specializations are:
1. Comparative Political and Historical Analysis (CPHA)
2. Comparative Culture and Society (CCAS)
3. Comparative and International Political Economy (CIPE)

Students must complete a total of seven courses (35 units) for their functional specialization. Four courses must be from the student’s functional area (CPHA, CCAS, CIPE); two courses from a second track; and the final course from the third track (4-2-1). Functional specializations are not declared on Axess.

The following courses are approved for each functional specialization. Updated lists are made available every quarter on the web and they are also available in the International Relations office.

COMPARATIVE POLITICAL AND HISTORICAL ANALYSIS (CPHA)

INTNLREL 114D. Democracy, Development, and the Rule of Law
INTNLREL 116. Politics of Divided Korea
INTNLREL 120. Terrorism and Security in Israel
INTNLREL 125. Japanese Postwar Politics
INTNLREL 131. Globalization and Organizations
INTNLREL 136R. Introduction to Global Justice
INTNLREL 140A. International Law and International Relations
INTNLREL 140B. Theories of International Law
INTNLREL 163. History and Geography of Contemporary Global Issues
INTNLREL 170. Energy and the Climate

COMM 177K. Specialized Writing and Reporting - Human Rights Reporting

EASTASN 189K. Politics of Divided Korea
HISTORY 102. The History of the International System (WIM)
HISTORY 120C. 20th-Century Russian and Soviet History
HISTORY 123. Reform and Revolution in Modern Russia, 1856-2008
HISTORY 125. 20th-Century Eastern Europe
HISTORY 137/337. The Holocaust
HISTORY 145B. Africa in the 20th Century
HISTORY 150C. The United States in the Twentieth Century
HISTORY 158. The United States Since 1945
HISTORY 181B. The Middle East in the 20th Century
POLISCI 216. Law, Economics, and Politics of International Trade (Same as LAW 306)
POLISCI 242S. Politics of Welfare State Expansion and Reform
POLISCI 247R. Politics and Economics in Democracies (WIM)

1- and 2-unit options
INTNLREL 191. International Relations Journal

INDEPENDENT STUDY/HONORS
INTNLREL 197. Directed Reading in International Relations—open only to declared International Relations majors.
INTNLREL 198. Senior Thesis—open only to declared International Relations majors with approved senior thesis proposals.
INTNLREL 199. Honors Research: Democracy, Development, and the Rule of Law in Developing Countries
INTNLREL 200A. International Relations Honors Field Research
INTNLREL 200B. International Relations Honors Seminar

AREA SPECIALIZATION
The area specializations are: Africa, Europe, Latin America, and Russia/East Europe. Students must complete a total of seven courses (35 units) with five courses directly related to their area specialization. Three of these five courses must be in one of the three tracks (CPHA, CCAS, CIPLE), one course in a second track, and the final course in the third track. The ten remaining units must be fulfilled by comparative or further area course work.

Students must also demonstrate proficiency in a language, other than English, commonly spoken in the area chosen, by completing two years of language study or by passing a second-year, third-quarter proficiency exam.

Check the IR office for updated information about the area specialization requirements. Area specializations are not declared on Axess.

HONORS PROGRAM
The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisors, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can select from the IR honors option or the CDDRL (Center on Democracy, Development, and the Rule of Law) option which focuses on issues of democracy, development, and the rule of law; for information on the CDDRL, see http://cddrl.stanford.edu.

Students should submit their honors thesis proposal late in Winter Quarter of the junior year; check with IR office for the exact deadline.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students are required to enroll in INTNLREL 200A, International Relations Honors Field Research, in Spring Quarter of their junior year and consider participating in Honors College. CDDRL option students should enroll in INTNLREL 199, Honors Research: Democracy, Development, and the Rule of Law in Developing Countries. In their senior year, honors students must enroll in INTNLREL 200B in Autumn Quarter and in research units each quarter with their faculty adviser. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of ’B+’ in order to graduate with honors in International Relations.

MINOR IN INTERNATIONAL RELATIONS
A minor in International Relations is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. Declaration of the minor must take place no later than the end of the second quarter of the junior year. To declare, complete the application for a minor on Axess.

Students complete the minor by taking seven unduplicated courses (35 units) from the IR curriculum, including the following:

1. POLISCI 1
2. Two of these five courses: POLISCI 110A,B,C,D, or HISTORY 158
3. Four courses from one of the three major tracks (CPHA, CCAS, CIPLE), or four courses relating to the same geographic region (Africa, Europe, Latin America, and Russia/East Europe).

OVERSEAS STUDIES COURSES IN INTERNATIONAL RELATIONS
For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://exploreCourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER
BEIJING
OSPBEIJ 42. Chinese Media Studies. 4 units, Kun Li, GER:DB:SocSci
OSPBEIJ 46. Introduction to Chinese Economy. 5 units, Dong Chen, GER:DB:SocSci, EC:GlobalCom

The Taube Center for Jewish Studies investigates all aspects of Jewish life in history, religion, literature, language, education and culture from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish Studies, and the Dr. Bernard Kaufman Undergraduate Research Award in Jewish Studies to an undergraduate engaged in research on Jews in modernity.

Graduate students enroll in the program through the departments of English, History, Comparative Literature, Religious Studies, or the School of Education, and must meet the requirements of those departments.

UNDERGRADUATE PROGRAMS IN JEWISH STUDIES

INDIVIDUALLY DESIGNED MAJOR

The Individually Designed Major in Jewish Studies permits interested students to focus their attention on the broad field of Jewish Studies and, at the same time, to expand their knowledge of one or another related fields.

Each major should complete at least 75 units, all in courses at or above the 100 level (or their equivalent). A maximum of 15 of these 75 units may be taken on a credit/no credit basis. A maximum of 5 of these 75 units may be taken in individual study or directed reading. Students must present evidence that demonstrates their ability to do independent work and have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee. Each major must obtain sponsorship from three faculty members, one of whom is the student’s primary adviser, and from one of the Directors of the Taube Center for Jewish Studies. The application deadline for IDM proposals is the fifth week of Spring Quarter of the sophomore year. Applications are reviewed only once a year. Details about the written procedures and documents necessary for application for an individually designed major in Jewish Studies can be obtained at the Taube Center for Jewish Studies, Bldg. 360, Main Quad, (650) 725-2789.

REQUIREMENTS

The faculty members in Jewish Studies have designed the following structure for the major:

Category | Units
--- | ---
History and Society: | 
Students must take one course in each of the three periods: | 20
biblical and ancient, medieval and modern, and contemporary | 
Religion: | 
Biblical, rabbinic, medieval, modern | 20
Literature: | 
Hebrew, Holocaust, American Jewish, Yiddish, German Jewish, Russian Jewish | 15
Hebrew Language (second year or beyond): | 
Students who demonstrate by examination that they have completed the equivalent of at least two years of university-level modern Hebrew may apply the 12 units required in this category to more work in another category, with the approval of their primary adviser | 12
Ancillary Courses: | 
Ancient history, medieval history, modern European history, history of philosophy, Islam, Christianity | 8-10
Total number of units required | 75-77

Students planning an Individually Designed Major in Jewish Studies are also urged to write an honors thesis. Students interested in declaring an Individually Designed Major in Jewish Studies should discuss this with their adviser(s) when discussing the major itself. Up to 10 honors thesis units may be included in the major.

No course proposed for the major may be counted as fulfilling more than one required category in the proposed major. Transfer credits from other universities must be approved by the appropriate Stanford authorities.

COGNATE COURSES

Students interested in pursuing an Individually Designed Major in Jewish Studies are advised to consult the following list of courses in preparing their program.

AMELANG 50A. Reading Hebrew, First Quarter
AMELANG 127. Land and Literature
AMELANG 128A. Beginning Hebrew, First Quarter
AMELANG 128B. Beginning Hebrew, Second Quarter
AMELANG 128C. Beginning Hebrew, Third Quarter
AMELANG 129A. Intermediate Hebrew, First Quarter
AMELANG 129B. Intermediate Hebrew, Second Quarter
AMELANG 129C. Intermediate Hebrew, Third Quarter
AMELANG 130A. Advanced Hebrew, First Quarter
AMELANG 140A. Beginning Yiddish, First Quarter
AMELANG 140B. Beginning Yiddish, Second Quarter
AMELANG 140C. Beginning Yiddish, Third Quarter
AMELANG 170A. Biblical Hebrew, First Quarter
AMELANG 170B. Biblical Hebrew, Second Quarter
AMELANG 170C. Biblical Hebrew, Third Quarter
COMPLIT 247. Modernism and the Jewish Voice in Europe (same as GERGEN 221A, SLAVGEN 221)
COMPLIT 345. Modern Hebrew Literature Reading Circle
FEMST 139. Rereading Judaism in Light of Feminism
GERLIT 104N. Resistance Writings in Nazi Germany
HISTORY 137/337. The Holocaust
HISTORY 185B. Jews in the Modern World
HISTORY 207. Biography and History
HISTORY 211B/311B. Jews Under Islam and Christianity in the Middle Ages
HISTORY 217A/317A. Poverty and Charity in Medieval Christianity, Judaism, and Islam
HISTORY 217B/317B. Land of Three Religions: Medieval Spain and Mediterranean Civilizations
HISTORY 229/329. Poles and Jews
HISTORY 287D/387D. Tel-Aviv: Site, Symbol, City
HISTORY 287E/387E. Jewish Intellectuals and Modernity
HISTORY 288/388. Palestine and the Arab-Israeli Conflict (same as IPS 388)
HISTORY 385A. Core in Jewish History, 17th-19th Centuries
HISTORY 385B. Core in Jewish History, 20th Century
HISTORY 385K. History of Modern Antisemitism
HISTORY 387C. Zionism and Its Critics
HISTORY 486A. Graduate Research Seminar in Jewish History
INTNLREL 120. Terrorism and Security in Israel
MUSIC 80. Music of Modern Israel
MUSIC 80T. Jewish Music in the Lands of Islam
RELIGST 15N. The History of Immortality
RELIGST 23. Introduction to Judaism
RELIGST 95. How to Read the Bible
RELIGST 132C. Jesus the Jew in First Century Christianity
RELIGST 148A. St. Paul and the Politics of Religion
RELIGST 221A/321A. Philology of Rabbinic Literature
RELIGST 221B/321B. The Talmud as Literature
RELIGST 226A/326A. Judaism and Hellenism

MINOR IN JEWISH STUDIES

The Jewish Studies minor is open to students in any department who wish to enrich their studies through acquiring knowledge in Jewish history, thought, religion, literature, and society. Students must complete their declaration of the minor no later than the last day of the quarter four quarters before degree conferral. For example, a student graduating in Spring Quarter must declare the minor no later than the last day of Spring quarter of the junior year.

Students must complete six courses for a maximum of 36 units toward the minor. Courses of study should be discussed and approved by a Jewish Studies faculty member in the departments of English, History, Religious Studies, or the Division of Literatures, Cultures, and Languages, and by the center directors. In addition to suggested introductory courses, students are also encouraged to take courses in the Hebrew language as part of their Jewish studies minor, and are granted credit toward the minor for up to 5 units of language study. Any variations on the minor requirements must be approved in advance by one of the directors of the center.

Courses credited toward the minor must be distributed as follows:
1. Three introductory courses at the 100 level or below in the fields of history, religious studies, literature, or Hebrew language (for a maximum of 5 units) or one of the designated introductory courses offered through the Program in Comparative Studies in Race and Ethnicity.
2. Two courses at the 100 level or above from two of three areas of concentration (history, religious studies, or literature).

One seminar or undergraduate colloquium at the 200 level or above in one area of concentration (history, religious studies, or literature). No course credited toward the Jewish Studies minor may be double counted toward major requirements.

LANGUAGE CENTER

Director: Elizabeth Bernhardt
Associate Director: Joan Molitoris
African and Middle Eastern Languages
Senior Lecturers: Khalil Barhoum (Coordinator, and Minor Advisor: Arabic Language and Literature), Vered Shemtov (Jewish Language and Literature)
Lecturers: Salem Aweise, Estee Greif, Jon Levitow, Khalid Obeid, Gallia Porat, Ramzi Salih, Galen Sibanda

Catalan Language
Lecturers: Joan Molitoris (Coordinator and Associate Director, Language Center), Todd Mack

Chinese Language
Coordinator: Chao Fen Sun (Professor, Asian Languages and Cultures)
Lecturers: Marina Chung, Michelle DiBello, Sik Lee Demng, Nina Lim, Yu-hwa Liao Celle, Huazhi Wang, Jingning Xu, Hong Zeng, Youping Zhang, Qi Zhu

English for Foreign Students
Director and Senior Lecturer: Philip Hubbard
Senior Lecturer: Beverley McChesney (on leave)
Lecturers: Robyn Brinks Lockwood, Carole Maswong, Andrea Kevech, Kenneth Romney, Constance Rylance, Seth Streicher

French Language
Lecturers: Jane Dozer-Rabedea, Heather Howard, Sylvie Palumbo-Liu, Tanya Shashiko (Coordinator), Thomas Villementeix

German Language
Lecturer: Paul Nissler (Coordinator)
Senior Lecturers: William E. Petig, Kathryn Strachota

Italian Language
Coordinator: Elizabeth Bernhardt (Director, Language Center, and Professor, German Studies)
Lecturers: Marta Baldocci, Anna Cellinese, Giovanni Tempesta

Japanese Language
Coordinator: Yoshiko Matsumoto (Associate Professor, Asian Languages and Cultures)
Senior Lecturer: Kazuko M. Busbin
Lecturers: Hisayo O. Lipton, Momoyo K. Lowdermilk, Emiko Yasumoto Magnani, Kiyomi Nakamura, Yoshiko Tomiyama

Korean Language
Lecturers: Hee-Sun Kim (Coordinator), Soomi Pak (Fullbright Scholar)

Portuguese Language
Senior Lecturer: Lyris Wiedemann (Coordinator)

Slavic Language
Senior Lecturer: Rima Greenhill
Lecturer: Eugenia Khassina (Coordinator)

Spanish Language
Senior Lecturer: Irene Corso
Lecturers: Vivian Brates, Loreto Catora, Citalli del Carpio, Irene Corso, Alice Miano (Coordinator), Joan Molitoris (Associate Director, Language Center), Paul Nissler, Cariner Ortiz Cuvas, Consuelo Perales, Veronika Reinhold, Candy Renfr, Kara Sanchez, Cintia Santana, Ana M. Sierra, Maria Cristina Urruela, Hae-Joon Won

Special Language Program
Lecturers: Anubha Anushree (Fullbright Scholar), Sneha Desai, Cathy Haas, Eva Prionas (Coordinator, Modern Greek Language and Literature), Janeth Seno (Fullbright Scholar)

Tibetan Language Program
Lecturer and Coordinator: Robert W. Clark

Language Center Offices: Building 30
Courses offered by the Language Center are listed under the following subject codes on the Stanford Bulletin’s ExploreCourses web site: AMELANG (African and Middle Eastern Languages and Literatures), CATLANG (Catalan Language), CHINLANG (Chinese Language), EFSLANG (English for Foreign Students), FRENLANG (French Language), GERLANG (German Language), ITALLANG (Italian Language), JAPANLANG (Japanese Language), KORLANG (Korean Language), PORTLANG (Portuguese Language), SLAVLANG (Slavic Language), SPANLANG (Spanish Language), SPECLANG (Special Language), and TIBETLANG (Tibetan Language).

The Stanford Language Center oversees all language instruction at Stanford. The center’s charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford’s language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages.

The African and Middle Eastern Languages and Literatures Program (AME) offers classes in Arabic, Hebrew, Swahili, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2009-10 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2010-11 academic year should be made by Spring Quarter of this year at the AME program office by email to khali@stanford.edu. All beginning-level, three-unit courses are offered on a S/NC basis only. Intermediate-level and four-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year’s sequence of language study. Most three-unit language courses are offered for a two-year, three quarter sequence: ‘A’ suffix courses are taught Autumn; ‘B’ suffix courses are taught Winter; ‘C’ suffix courses are taught Spring. Those who have taken courses in the relevant language at another institution, or have previous knowledge of the language, can request to be tested. Tests are comprised of two parts, written and oral. Students must display first-year proficiency in the requested language to fulfill the requirement. Testing is guaranteed only for languages currently offered. Students planning to take a test must contact the AME program no later than the Spring Quarter of their sophomore year. To submit a request for language testing or to request that a language be taught, and for further information on the program, see http://language.stanford.edu.

PROFICIENCY IN FOREIGN LANGUAGE NOTATION

A student who demonstrates levels of achievement equivalent to those expected at the end of the third quarter of the third year of study in a language may be awarded the notation “proficiency in” that language on the official transcript. For further information and details on applying for a Proficiency Notation, see http://language.stanford.edu.

In order for a student to have the proficiency notation appear on the official transcript, the student must:
1. Inform the Language Center at least two quarters prior to graduation that he/she is requesting such a notation.
2. Schedule an Oral Proficiency Interview (OPI) through the Language Center. Since this is a formal oral proficiency interview, at least two quarters of lead time are essential for scheduling this interview. The interview will be conducted by a certified OPI rater.
3. Submit to the Language Center an academic paper written in the foreign language in question of at least five pages (two pages in the Asian languages and Russian).
4. Ask one Stanford University Academic Council faculty member to write a letter on the student’s behalf, attesting to a high level of academic writing and composition skill in the foreign language.

MINOR IN MIDDLE EASTERN LANGUAGES, LITERATURES, AND CULTURES

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Middle Eastern and African languages, and to the cultures and civilizations of the Middle East and Africa. Contact the minors adviser before declaration at khalili@stanford.edu.

Students declaring a minor must do so no later than the last day of the fourth quarter before degree conferral. For example, students graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of their junior year. If a student is not able to meet this deadline, he or she may petition the Language Center director and request a revised declaration date, which may be granted at the director’s discretion.

The requirements for a minor in Middle Eastern Languages, Literatures, and Cultures are:
1. Completion of six courses in either the Cultural Studies Track or the Language Studies Track.
2. Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
3. All courses must be completed with a letter grade of ‘C’ or better.
4. Courses may not overlap with those taken for a major course of study.
5. Courses taken which also fulfill a GER count toward fulfilling both minor and GER requirements.
6. Students pursuing the Cultural Studies Track must complete the prerequisite of beginning level in the respective language, or demonstrate an equivalent competence.

Cultural Studies Track—Requirements are:
1. Completion of the language prerequisite, or a demonstrated equivalent competence.
2. In the case of Arabic, completion of six non-language courses, including three from the AME program.
4. Course work from GER courses may be used to fulfill the unit requirements for the minor.

Language Track—Requirements are:
1. Completion of prerequisite language study at the beginning level, or a demonstrated equivalent competence.
2. Completion of one year of language study at the intermediate level.
3. Completion of three non-language related courses, including one of the AMELANG 30-36 series in the case of Arabic. Consult the minor adviser for course options.

1. Completion of prerequisite language study at the advanced level in Arabic, Hebrew, or an African language, for the equivalent of three years of language study.
2. Completion of one African and Middle Eastern literature and culture course relevant to the language studied in the case of Arabic or Hebrew; or, in the case of African languages, com-
pletion of one non-language African Studies course relevant to the language studied. Consult the minor adviser (khai@stanford.edu) for course options.

MINOR IN LITERATURE
An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES
An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

SPECIAL LANGUAGE PROGRAM
The Special Language Program (SLP) offers foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for 2009-10 are listed in the "Courses" section of this Bulletin under the Special Languages (SPECLANG) program; however, not every course listed is taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2010-11 academic year should be made by Spring Quarter of this year at the Special Language Program office.

All beginning-level 3-unit courses are offered on a satisfactory/no credit basis only. Intermediate-level and 4-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year’s sequence of language study. Most 3-unit language courses are offered for a two-year, three quarter sequence:
- ‘A’ suffix courses are typically taught Autumn.
- ‘B’ suffix courses are typically taught Winter.
- ‘C’ suffix courses are typically taught Spring.

Beginning, intermediate, and advanced courses are 3 units except modern Greek, Hindi, and ASL. In some circumstances, a beginning or intermediate course may be offered in alternate years.

For more information, see http://www.stanford.edu/dept/SLP. Language courses may not be repeated for credit, and must be taken in sequence.

FULFILLING THE LANGUAGE REQUIREMENT
Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request a language, apply via the web at http://www.stanford.edu/dept/SLP.

BEGINNING-LEVEL, FIRST-YEAR COURSES
Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

INTERMEDIATE-LEVEL, SECOND-YEAR COURSES
Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions. Curricular objectives and enhanced understanding of the culture are built into the courses through a multimodal approach.

ADVANCED-LEVEL, THIRD-YEAR COURSES
Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

AFRICAN AND MIDDLE EASTERN LANGUAGES AND LITERATURES PROGRAM
The African and Middle Eastern Languages and Literatures Program offers classes in Arabic, Hebrew, Swahili, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2009-10 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2010-11 academic year should be made by Spring Quarter of this year at the AME program office, email: khai@stanford.edu.

All beginning-level, three-unit courses are offered on a S/NC basis only. Intermediate-level and four-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year’s sequence of language study. Most three-unit language courses are offered for a two-year, three quarter sequence:
- All ‘A’ suffix courses are taught Autumn.
- All ‘B’ suffix courses are taught Winter.
- All ‘C’ suffix courses are taught Spring.

All beginning, intermediate, and advanced courses are 3 units except Arabic, Hebrew, and Swahili. In some circumstances, a beginning or intermediate course may be offered in alternate years.

FULFILLING THE LANGUAGE REQUIREMENT
Students can fulfill the language requirement by taking an African or Middle Eastern language. At least 12 units are needed to complete the requirement. Normally, the requirement is completed after the first quarter of intermediate-level language. In the case of African or Middle Eastern languages taught only at the beginning level, students may petition the Language Center to fulfill the requirement by taking a directed reading course in the fourth quarter. Contact patricia@stanford.edu for more information.

BEGINNING-LEVEL, FIRST-YEAR COURSES
Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

INTERMEDIATE-LEVEL, SECOND-YEAR COURSES
Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions. Curricular
objectives and enhanced understanding of the culture are built into the courses through a multimodal approach.

ADVANCED-LEVEL, THIRD-YEAR COURSES

Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

OVERSEAS STUDIES COURSES IN THE LANGUAGE CENTER

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://exploreCourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

BEIJING

OSPEBEIJ 21C. Second-Year Modern Chinese. 5 units, Li Chen
OSPEBEIJ 101C. Third-Year Modern Chinese. 5 units, Xiaoya Zhu
OSPEBEIJ 211C. Advanced Modern Chinese. 5 units, Yan Wang

BERLIN

OSPBER 1Z. Accelerated German 1st and 2nd Quarter. 8 units, Jari Splettsstoesser, Jochen Wohlfeil
OSPBER 21B. Intermediate German. 5 units, Sylvia Kloetzer
OSPBER 100B. Berlin Heute. 2 units, Dubravka Friesel
OSPBER 101B. Advanced German. 5 units, Maria Biege

FLORENCE

OSPFLOR 21F. Accelerated Second Year Italian, Part A. 5 units, Fiorenza Quercioli
OSPFLOR 22F. Accelerated Second-Year Italian, Part B. 5 units, Fiorenza Quercioli
OSPFLOR 31F. Advanced Oral Communication: Italian. 3 units, Fiorenza Quercioli

MADRID

OSPMADR 12M. Accelerated Second-Year Spanish I. 5 units, Maria Teresa Camblor Portilla
OSPMADR 13M. Accelerated Second-Year Spanish II. 5 units, Maria Teresa Camblor Portilla
OSPMADR 102M. Composition and Writing Workshop for Students in Madrid. 3-5 units, Maria Teresa Camblor Portilla

MOSCOW

OSPMOSC 10M. Intensive First-Year Russian. 9 units, Liza Kurganova
OSPMOSC 51M. Second Year Russian I. 5 units, Tatyana Boldyreva
OSPMOSC 111M. Third Year Russian I. 5 units, Galina Filatova
OSPMOSC 177M. Fourth Year Russian I. 5 units, Staff

PARIS

OSPPARIS 22P. Intermediate French I. 4 units, Pauline Reyehman
OSPPARIS 23P. Intermediate French II. 4 units, Florence Mercier
OSPPARIS 124P. Advanced French I. 4 units, Patrick Guedon

SANTIAGO

OSPSANTG 12S. Accelerated Second-Year Spanish I. 5 units, Mabel Abad
OSPSANTG 13S. Accelerated Second-Year Spanish II. 5 units, Mabel Abad

MOScow

OSPMOSC 10M. Intensive First-Year Russian. 9 units, Liza Kurganova
OSPMOSC 51M. Second Year Russian I. 5 units, Tatyana Boldyreva
OSPMOSC 111M. Third Year Russian I. 5 units, Galina Filatova
OSPMOSC 177M. Fourth Year Russian I. 5 units, Staff

PARIS

OSPPARIS 22P. Intermediate French I. 4 units, Pauline Reyehman
OSPPARIS 23P. Intermediate French II. 4 units, Florence Mercier
OSPPARIS 124P. Advanced French I. 4 units, Patrick Guedon

SANTIAGO

OSPSANTG 12S. Accelerated Second-Year Spanish I. 5 units, Mabel Abad
OSPSANTG 13S. Accelerated Second-Year Spanish II. 5 units, Mabel Abad

OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago. 3-5 units, Andres Bobbert

WINTER QUARTER

BERLIN

OSPBER 1Z. Accelerated German 1st and 2nd Quarter. 8 units, Jari Splettsstoesser, Jochen Wohlfeil
OSPBER 21B. Intermediate German. 5 units, Sylvia Kloetzer
OSPBER 100B. Berlin Heute. 2 units, Dubravka Friesel
OSPBER 101B. Advanced German. 5 units, Maria Biege

FLORENCE

OSPFLOR 21F. Accelerated Second Year Italian, Part A. 5 units, Fiorenza Quercioli
OSPFLOR 22F. Accelerated Second-Year Italian, Part B. 5 units, Fiorenza Quercioli
OSPFLOR 31F. Advanced Oral Communication: Italian. 3 units, Fiorenza Quercioli

MADRID

OSPMADR 12M. Accelerated Second-Year Spanish I. 5 units, Maria Teresa Camblor Portilla
OSPMADR 13M. Accelerated Second-Year Spanish II. 5 units, Maria Teresa Camblor Portilla
OSPMADR 102M. Composition and Writing Workshop for Students in Madrid. 3-5 units, Maria Teresa Camblor Portilla

PARIS

OSPPARIS 22P. Intermediate French I. 4 units, Florence Mercier
OSPPARIS 23P. Intermediate French II. 4 units, Elizabeth Molkou
OSPPARIS 125P. Advanced French II. 4 units, Marie-Christine Ricci

SANTIAGO

OSPSANTG 12S. Accelerated Second-Year Spanish I. 5 units, Mabel Abad
OSPSANTG 13S. Accelerated Second-Year Spanish II. 5 units, Mabel Abad
OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago. 3-5 units, Staff

SPRING QUARTER

BEIJING

OSPEBEIJ 3C. First-Year Modern Chinese. 5 units, Li Chen
OSPEBEIJ 23C. Second-Year Modern Chinese. 5 units, Xiaoya Zhu
OSPEBEIJ 103C. Third-Year Modern Chinese. 5 units, Yan Wang

BERLIN

OSPBER 2Z. Accelerated German 2nd and 3rd Quarters. 8 units, Jochen Wohlfeil
OSPBER 21B. Intermediate German. 5 units, Sylvia Kloetzer
OSPBER 100B. Berlin Heute. 2 units, Dubravka Friesel
OSPBER 101B. Advanced German. 5 units, Maria Biege

OSPFLOR 21F. Accelerated Second Year Italian, Part A. 5 units, Fiorenza Quercioli
OSPFLOR 22F. Accelerated Second-Year Italian, Part B. 5 units, Fiorenza Quercioli
OSPFLOR 31F. Advanced Oral Communication: Italian. 3 units, Fiorenza Quercioli

KYOTO

OSPKYOTO 9K. First Year Japanese Language, Culture, Communication B. 5 units, Staff
OSPKYOTO 17K. Second Year Japanese Language, Culture, Communication B, First Quarter. 5 units, Staff
OSPKYOTO 19K. Second Year Japanese Language, Culture, Communication B, Third Quarter. 5 units, Staff
OSPKYOTO 129K. Third Year Japanese Language, Culture, Communication B. 5 units, Staff
OSPKYOTO 211K. Advanced Japanese. 5 units, Staff

MADRID
OSPMADRD 12M. Accelerated Second-Year Spanish I. 5 units, Maria Teresa Cambor Portilla
OSPMADRD 13M. Accelerated Second-Year Spanish II. 5 units, Maria Teresa Cambor Portilla
OSPMADRD 102M. Composition and Writing Workshop for Students in Madrid. 3-5 units, Maria Teresa Cambor Portilla

PARIS
OSPPARIS 22P. Intermediate French I. 4 units, Pauline Reychnaman
OSPPARIS 23P. Intermediate French II. 4 units, Sonia Gourevitich
OSPPARIS 125P. Advanced French II. 4 units, Elizabeth Molkou

SANTIAGO
OSPSANTG 12S. Accelerated Second-Year Spanish I. 5 units, Mabel Abad
OSPSANTG 13S. Accelerated Second-Year Spanish II. 5 units, Mabel Abad
OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago. 3-5 units, Andres Bobbert

LATIN AMERICAN STUDIES

Director of the Center: Herbert S. Klein
Associate Director: Megan Gorman
Tinker Visiting Professors: Eduardo Dvorkin, Fernando Ferreira, João Adolfo Hansen, Arturo Ripstein

Affiliated Faculty and Staff:
Anthropology: Clifford Barnett (emeritus), George Collier (emeritus), Carolyn Duffey, William Durham, James Fox, Dominique Irvine, John Rick, Ian Robertson
Art and Art History: Barbara Martinez-Ruiz
Biology: Gretchen Daily, Rodolfo Dirzo, Harold Mooney, Peter Vitousek, Virginia Walbot
Comparative Literature: Roland Greene, Hans Ulrich Gumbrecht
Dance: Susan Cashion (emerita)
Earth Sciences, School of: Pamela Matson
Economics: Roger Noll (emeritus)
Education, School of: Martin Carnoy, Amado Padilla, Guadalupe Valdés
Engineering, School of: Adrian Lew, Bruce Lusignan (emeritus), Leonard Ortolano
English: Ramón Saldívar (also Comparative Literature)
Freeman Spogli Institute for International Studies: Rosamond Naylor, David Victor
History: Zephyr Frank, Stephen Haber, Tamar Herzog, Herbert S. Klein
Hoover Institute: William Ratliff
Human Biology: Anne Firth Murray
Iberian and Latin American Cultures: Héctor Hoyos, Marilia Librandi Rocha, Michael Predmore, Joan Ramon Resina, Jorge Ruffinelli, Lisa Surwillo, Yvonne Yarbro-Bejarano
Language Center: José Carlos Fajardo, Caridad Kenna, Alice Miano, Otilia Perales, Ana Sierra, Lyris Wiedemann
Law, School of: Jonathan Greenberg, Thomas Keller
Linguistics: John Rickford
Medicine, School of: Victor Froelicher, Evaleen Jones, Samuel LeBaron, Grant Miller, Julie Parsonnet, Paul Wise
Political Science: Terry Karl, Beatriz Magaloni, Robert Packham (emeritus), Gary Segura, Michael Tomz
Religious Studies: Thomas Sheehan
Sociology: Alex Inkeles (emeritus), Tomás Jiménez, Michael Rosenfield
Stanford University Libraries: Adán Griego, Sergio Stone, Robert Trujillo

Center Offices: Bolivar House, 582 Alvarado Row
Mail Code: 94305-8545
Department Phone: (650) 723-4444
Email: latinamerica@stanford.edu
Web Site: http://las.stanford.edu

The Center for Latin American Studies (CLAS) supports research and teaching in all fields of study as they relate to Latin America. Academic programs encourage interdisciplinary approaches and draw on the expertise of nearly sixty active affiliated faculty members representing Stanford’s various schools and departments. Stanford University Libraries’ substantial Latin American collections are valuable resources for students, faculty, and visiting researchers alike. Each year CLAS hosts a number of Tinker Visiting Professors, highly distinguished Latin American and Iberian scholars who come to Stanford to teach a course in their field of specialization. The Center for Latin American Studies maintains a highly active public events calendar and provides funding to students and faculty for a variety of research, teaching, internship, and conference activities. Stanford offers three formal academic programs in Latin American Studies: an Undergraduate Minor, Interdisciplinary Honors certification, and a Master of Arts degree.

UNDERGRADUATE PROGRAMS IN LATIN AMERICAN STUDIES

Currently, Stanford University does not offer an undergraduate major in Latin American Studies; however, undergraduates may pursue a minor or interdisciplinary honors certification in Latin American Studies. In addition, students may concentrate on Latin America through other departmental and interdisciplinary degree programs, such as Anthropology, History, Political Science, Iberian and Latin American Cultures, or International Relations. Interested students should consult the relevant departmental web sites and sections of this bulletin for further information.

SUMMER INTERNSHIP GRANT

Each summer, CLAS awards grants to a small number of undergraduates to complete internships in Latin America. Applications include a proposal, academic transcript, and letters of recommendation. Students from any department are eligible to apply. Visit http://las.stanford.edu for details.

MINOR IN LATIN AMERICAN STUDIES

The Minor in Latin American Studies is open to students in any major. Students who wish to complete the minor must declare online (through Axess) and submit a proposal of course work no later than the second quarter of their junior year. The minor must be completed by the second quarter of the senior year. At least 25 units must be completed at Stanford.

Requirements for the minor include:

1. A 5-unit course surveying Latin America: HISTORY 70, Culture, Politics, and Society in Latin America (or an approved substitute)
2. 20 additional units in a number of courses which together comprise a coherent focus on a theoretical problem or issue of the region, such as (but not limited to) culture and identity, political economy, or sustainable development. All courses, with the exception of Overseas Studies courses, must be at the 100-level or higher. For approved courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
3. At least 10 of the 25 units must be completed at Stanford.

2. Fulfill the Foreign Language Requirement. The minimum requirement for completion of the minor in Latin American Studies is advanced proficiency in Spanish or Portuguese by any one of the following means:
   a. A 5-unit course surveying Latin America: HISTORY 70, Culture, Politics, and Society in Latin America (or an approved substitute)
   b. 20 additional units in a number of courses which together comprise a coherent focus on a theoretical problem or issue of the region, such as (but not limited to) culture and identity, political economy, or sustainable development. All courses, with the exception of Overseas Studies courses, must be at the 100-level or higher. For approved courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
   c. At least 10 of the 25 units must be completed at Stanford.

2. Fulfill the Foreign Language Requirement. The minimum requirement for completion of the minor in Latin American Studies is advanced proficiency in Spanish or Portuguese by any one of the following means:
   a. Successful completion of seven quarters of college-level study of Spanish or Portuguese.
HONORS IN LATIN AMERICAN STUDIES

The Honors Program in Latin American Studies is open to undergraduate students in any major. The aim of the honors program is to prepare students to pursue individualized research on Latin America, culminating in an honors thesis completed under the supervision of a faculty adviser. The honors program is particularly suited to the student who wishes to go on to graduate school or supervision of a faculty adviser. The honors program is particularly suited to the student who wishes to go on to graduate school or pursue employment in an institution emphasizing research and independent work. Although not required, students are encouraged to undertake independent field research in Latin America towards their thesis. It is strongly recommended that students enroll in HISTOR-Y 299X, Design and Methodology for International Field Research (1 unit), during their sophomore or junior year for an overview of research design and methods for international field research.

Admission to the honors program is by application by the end of the junior year. Applications are reviewed and approved by the CLAS director and associate director. Applicants must have a cumulative grade point average (GPA) of 3.3 (B+) or higher and maintain this average in courses taken to satisfy the requirements. Courses must be taken for a letter grade where that option is available. Courses credited toward LAS honors may be double-counted toward the student’s major requirements.

To graduate with interdisciplinary honors in Latin American Studies a student must:

1. Complete a total of 35 units in courses certified for honors by the Center for Latin American Studies, distributed as follows:
   a. A 5-unit survey course, normally taken in the sophomore year: HISTORY 70, Culture, Politics, and Society in Latin America (or an approved substitute)
   b. For breadth: two 4-5-unit courses at the 100-level or higher with a focus on Latin America. These courses are normally taken during the sophomore and junior years. For approved courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
   c. For depth: one 4-5-unit course, approved by the honors adviser, at the 100-level or higher with a focus on Latin America that explores in depth an issue of particular interest to the student. See the "Latin American Studies Cognate Courses" section of this bulletin.
   d. LATINAM 198, Honors Thesis (1-10 units), under the supervision of the honors adviser. Normally these units are spread over two or three quarters of the senior year and are devoted to the completion of the honors thesis.
   e. Core Latin American Studies course: LATINAM 201/301, Social Change in Latin America Since 1900. This honors seminar must be taken in the senior year.
   f. Additional courses at the 100-level or higher focusing on Latin America to bring the total to 35 units. Up to 5 units may come from study of Spanish or Portuguese beyond the seventh quarter. For approved courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
   g. Of the courses applied to ‘b’ and ‘c’ above, up to 10 units may be completed in Overseas Studies, and up to 5 units may be taken as directed individual study.

2. Submit an honors thesis that meets standards of scholarly excellence and is approved by the thesis adviser. If graduating in June, participate in the LAS honors symposium in late May or early June.

GRADUATE PROGRAMS IN LATIN AMERICAN STUDIES

The one-year master’s program in Latin American Studies is designed for students who have experience working, living, or studying in Latin America or Iberia and little prior course work on Latin America.

Stanford University does not offer a Ph.D. program in Latin American Studies; however, doctoral candidates may concentrate on Latin America through other departmental programs, such as Anthropology, History, Political Science, or Iberian and Latin American Cultures. Interested applicants should consult the relevant departmental web sites and sections of this bulletin for admissions information and further details.

Admission—The application deadline for the 2010-2011 academic year is January 5, 2010. Applicants submit an online application, including a 500-word statement of purpose, resume, 10-15 page double-spaced academic writing sample, and three letters of recommendation. In addition, all applicants must submit official transcripts and GRE general test scores. TOEFL scores are required of applicants whose first language is not English or who did not earn a degree from an undergraduate institution where English is the primary language of instruction. For information on university graduate admissions and to access the online application, visit http://gradadmissions.stanford.edu.

Applicants must meet the University admission requirements, have a working knowledge of Spanish or Portuguese at the university third-year level or higher, and have experience working, living, or studying in Latin America or Iberia prior to admission.

CLAS takes a broad approach to evaluating applications for admission. As important as GRE scores and grades are the applicant’s essay, letters of recommendation, academic writing sample, and the experiences and goals conveyed through the personal statement and resume.

Students interested in pursuing the joint degree program in Latin American Studies and Law (J.D.) or a dual degree in Latin American Studies and Business (M.B.A.) or Medicine (M.D.) must apply to each program separately and be accepted by both. Details about the joint and dual degree programs can be found in the "Master of Arts in Latin American Studies" section of this bulletin.

Financial Aid—The Center for Latin American Studies provides several graduate fellowships as well as limited research and course assistantship positions with the Tinker Visiting Professors each quarter.
COTERMINAL BACHELOR’S AND MASTER’S DEGREES IN LATIN AMERICAN STUDIES

Undergraduates at Stanford may apply for admission to the coterminal master’s program in Latin American Studies when they have earned a minimum of 120 units toward graduation, including advanced placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The application deadline for the 2010-2011 academic year is January 5, 2010.

Coterminal applicants must submit an application form, a 500-word statement of purpose, a resume, a 10-15 page double-spaced academic writing sample, three letters of recommendation, a Stanford transcript, and GRE general test scores. Coterminal applicants must have a minimum cumulative GPA of 3.5 and a working knowledge of Spanish or Portuguese at the university third-year level or higher.

For university coterminal degree program policies, procedures, and application forms, see http://registrar.stanford.edu/shared/forms.htm#Coterm.

Requirements for the coterminal master’s degree are outlined in the "Master of Arts in Latin American Studies" section of this bulletin.

MASTER OF ARTS IN LATIN AMERICAN STUDIES

The Master of Arts in Latin American Studies is an interdisciplinary program. The curriculum consists of a core set of courses surveying the history, politics, society, ecology, and culture of the Latin American region; advanced language training; and in-depth course work. In consultation with a faculty adviser, students select a course of study suited to their individual interests.

JOINT DEGREE PROGRAM IN LATIN AMERICAN STUDIES AND LAW

The joint degree program in Latin American Studies and Law allows students to pursue the M.A. degree in Latin American Studies concurrently with the Doctor of Jurisprudence (J.D.) degree, with a significant number of courses that may apply to both degrees. It is designed to train students interested in a career in teaching, research, or the practice of law related to Latin American legal affairs. Students must apply separately to the Latin American Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student’s background and level of language training. For more information, see the "Joint Degree Programs" section of this bulletin and consult with the program offices for the two programs.

DUAL MASTER’S DEGREE WITH MEDICINE OR BUSINESS

Stanford offers dual degree programs that grant an M.A. degree in Latin American Studies and a Master of Business Administration degree or a Medical Doctor degree. Students must apply separately to and be accepted by both the Latin American Studies M.A. program and the Graduate School of Business or School of Medicine.

DEGREE REQUIREMENTS

University requirements for the master’s degree are described in the "Graduate Degrees General Requirements" section of this bulletin.

The program requires completion of a minimum of 45 graduate units. Each student is assigned a faculty adviser who works with the student to develop a customized program of study.

Candidates to the M.A. in Latin American Studies must complete the following:

1. Core courses (15 units): one core 5-unit course in each of three fields of specialization:
   a. Environment and Ecology: LATINAM 202/302, Human Ecology of the Amazon (Same as ANTHRO 161B/261B)
   b. Political Economy: POLISCI 248S, Latin American Politics
   c. Culture and Society: LATINAM 201/301, Social Change in Latin America Since 1900 (Same as HISTORY 275F/375F)

2. Cognate courses (15 units): three courses, one from each of the three fields of specialization listed in ‘1’ above. For approved courses, see the "Latin American Studies Cognate Courses" section of the Bulletin.

3. Elective courses (10-15 units): three elective courses in one of the three fields of specialization (see ‘1’ above) from across the University’s offerings, selected with guidance and approval from the faculty adviser.

4. Language requirement: at least 3 units of course work on a second Latin American language. Students proficient in both Spanish and Portuguese must take an advanced third-year language course in either Spanish or Portuguese; students proficient in only Spanish or only Portuguese must take a basic course in the language in which they are not already proficient.

5. Seminar requirement: 3 units (1 per quarter) of LATINAM 200, Contemporary Issues in Latin American Studies.

6. Thesis option: students may elect to write a master’s thesis; they may register for LATINAM 398 for up to 10 units of thesis research under the guidance of an Academic Council faculty member. Thesis units may be counted toward the elective field unit requirements (requirement number 3, above).

7. Grade requirements: students must earn a grade of ‘B’ or higher in all courses to be counted toward the degree (besides LATINAM 200, which is offered only on a Satisfactory/No-Credit basis).

LATIN AMERICAN STUDIES COGNATE COURSES

The following courses may be used to satisfy requirements for the master’s program and for the undergraduate honors and minor programs in Latin American Studies. Consult the Stanford Bulletin’s Explore Courses website for full course descriptions and class schedules.

1. Overseas Studies courses, denoted by the subject codes OSPGEN, OSPMADRD, or OSPSANTG, apply only to the undergraduate minor or honors programs.

2. MED 259 and OSPGEN 40 require application to and acceptance into the Community Health in Oaxaca summer program. See http://och.stanford.edu/oaxaca.html for information.

CULTURE AND SOCIETY

ANTHRO 100C. Chavin de Huántar Research Seminar
ANTHRO 106/206A. Incas and their Ancestors: Peruvian Archaeology, Mythology and Human Origins (same as ARCHLGY 102B)
ANTHRO 120. Introduction to Language Change (same as LINGUIST 160)
ANTHRO 124. Maya Mythology and the Popol Vuh
ARTHIST 294. Caribbean and Latin American Art
COMM 177K/277K. Specialized Writing and Reporting: Human Rights Journalism
COMPLIT 121. Poems, Poetry, Worlds: An Introductory Course
COMPLIT 134. The Poetry of History in the Americas
COMPLIT 142. The Literature of the Americas (same as ENGLISH 172E)
COMPLIT 332. The Transatlantic Renaissance (same as ENGLISH 310)
EDUC 136/306D. World, Societal, and Educational Change: Comparative Perspectives (same as SOC 231)
EDUC 149/249. Theory and Issues in the Study of Bilingualism
EDUC 178X Latino Families, Languages, and Schools
EDUC 193B. Peer Counseling in the Chicano/Latino Community
ENGLISH 152. Introduction to Caribbean Literature
ENGLISH 363G. American Transnational Novel
FILMSTUD 138A/338A. The Films of Arturo Ripstein

EDUC 136/306D. World, Societal, and Educational Change: Comparative Perspectives (same as SOC 231)
EDUC 149/249. Theory and Issues in the Study of Bilingualism
EDUC 178X Latino Families, Languages, and Schools
EDUC 193B. Peer Counseling in the Chicano/Latino Community
ENGLISH 152. Introduction to Caribbean Literature
ENGLISH 363G. American Transnational Novel
FILMSTUD 138A/338A. The Films of Arturo Ripstein
IPS 250. International Conflict: Management and Resolution (same as POLISCI 210R/310R, PSYCH 383)
IPS 263. Energy Cooperation in the Western Hemisphere (same as EARTHYSYS 132/232)
LAW 330. International Human Rights
LAW 582. Latin American Law
LAW 611. International Conflict Resolution Colloquium
LAW 661. Advanced Negotiation: International
OSPSANTG 65. Economic History of the Southern Cone from Liberalism to Neoliberalism and Beyond
OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century
OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies
OSPSANTG 129X. Latin America in the International System
OSPSANTG 130X. Latin American Economies in Transition
OSPSANTG 141X. Politics and Culture in Chile
OSPSANTG 160X. Latin America in the International Economy
OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective
POLISCI 125S. Chicano/Latino Politics
POLISCI 136S. Justice (same as PHIL 171/271, ETHICSOC 171, PUBLPOL 103C/307, IPS 208)
POLISCI 144T. Democracies and Dictatorships
POLISCI 215. Explaining Ethnic Violence
POLISCI 242. Political Economy of Oil and Other Resources
POLISCI 243R. Research Seminar in Democratization and Human Rights
POLISCI 248S. Latin American Politics
PUBLPOL 305B. Public Policy and Social Psychology: Implications and Applications (same as IPS 207B, PSYCH 216)
POLISCI 440B. Political Economy of Development (same as HISTORY 378E)

OVERSEAS STUDIES COURSES IN LATIN AMERICAN STUDIES

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

MADRID
OSPMADR 40. Introduction to Literary and Cultural Analysis in the Spanish World. 4-5 units, Santiago Tejerina-Canal, GER:DB:Hum

SANTIAGO
OSPSANTG 14. Women Writers of Latin America in the 20th Century. 4-5 units, Sergio Missana, GER:DB:Hum, EC:Gender
OSPSANTG 58. Living Chile: A Land of Extremes. 5 units, Marcela A. Bustamante, GER:DB:EngrAppSci
OSPSANTG 68. The Emergence of Nations in Latin America. 4-5 units, Ivan Jaksic, GER:DB:SocSci
OSPSANTG 104X. Modernization and Culture in Latin America. 5 units, Bernardo Subercaseaux, GER:DB:SocSci, EC:GlobalCom
OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective. 5 units, Sergio Micco, GER:DB:SocSci

WINTER QUARTER

SANTIAGO
OSPSANTG 10. Borges and Argentina. 4-5 units, Sergio Missana, GER:DB:Hum
OSPSANTG 58. Living Chile: A Land of Extremes. 5 units, Marcela A. Bustamante, GER:DB:EngrAppSci
OSPSANTG 62. Topics in Chilean History. 4-5 units, Ivan Jaksic
OSPSANTG 118X. Artistic Expression in Latin America. 5 units, César Albornoz, GER:DB:SocSci, EC:GlobalCom
OSPSANTG 129X. Latin America in the International System. 4-5 units, Claudio Fuentes, GER:DB:SocSci
OSPSANTG 160X. Latin America in the International Economy. 5 units, Ignacio Briones, GER:DB:SocSci

SPRING QUARTER

SANTIAGO
OSPSANTG 14. Women Writers of Latin America in the 20th Century. 4-5 units, Sergio Missana, GER:DB:Hum, EC:Gender
OSPSANTG 68. The Emergence of Nations in Latin America. 4-5 units, Ivan Jaksic, GER:DB:SocSci
OSPSANTG 85. Marine Ecology of Chile and the South Pacific. 5 units, Alvaro Palma, GER:DB:NatSci
OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century. 5 units, German Correa, GER:DB:SocSci
OSPSANTG 141X. Politics and Culture in Chile. 5 units, Bernardo Subercaseaux, GER:DB:Hum, EC:GlobalCom

LINGUISTICS

Emeriti: (Professors) Joan Bresnan, Clara N. Bush, Shirley Brice Heath, William R. Leiben, Stanley Peters, Elizabeth C. Traugott
Chair: Thomas A. Wasow
Professors: Eve V. Clark, Penelope Eckert (on leave Autumn and Winter), Martin Kay, Paul Kiparsky, Beth Levin, John R. Rickford, Ivan A. Sag (on leave Autumn and Winter), Thomas A. Wasow
Associate Professors: Arto Antilla, Daniel Jurafsky, Christopher Manning, Christopher Potts
Assistant Professor: Meghan Summer
Courtesy Professors: Herbert H. Clark, Kenji Hakuta, James McClelland, Orrin W. Robinson III, Chao Fen Sun
Courtesy Associate Professors: James A. Fox, Miyako Inoue, Yoshiko Matsumoto
Senior Lecturer: Philip L. Hubbard
Visiting Professor: Arnold Zwicky
Lecturers: Adam Hodges (Autumn and Winter), Asya Pereltsvaig (Winter), Kathryn Potts, Sarah Roberts (Winter and Spring)
Consulting Professors: Ronald Kaplan, Lauri Karttunen, Annie Zaenen
Consulting Associate Professors: Jared Bernstein, Cleo Condoravdi
Department Offices: Margaret Jacks Hall, Building 460
Mail Code: 94305-2150
Phone: (650) 723-4284
Email: linguistics@lists.stanford.edu
Web site: http://www-linguistics.stanford.edu

Courses offered by the Department of Linguistics are listed under the subject code LINGUIST on the Stanford Bulletin’s ExploreCourses web site.

Linguistics concerns itself with the fundamental questions of what language is and how it is related to the other human faculties. In answering these questions, linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is unique in languages, what is universal, how language is acquired, and how it changes. Linguistics is, therefore, one of the cognitive sciences; it provides a link between the humanities and the social sciences, as well as education, and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels in the areas central to linguistic theory and analysis. Many of them deal with the analysis of structural patterns in the different components that make up language, including sounds (phonetics and phonology), meanings (semantics and pragmatics),
words (morphology), sentences (syntax), and the way they vary and change over time. Other courses integrate the analysis of linguistic structure with phenomena that directly concern other disciplines. These include courses in computational linguistics, language acquisition, the philosophy of language, psycholinguistics, and sociolinguistics.

A variety of open forums provide for the discussion of linguistic issues, including colloquia and regularly scheduled workshops in child language, computational linguistics, phonology, psycholinguistics, semantics, sociolinguistics, and syntax. Faculty and visiting scholars in the department and the Center for the Study of Language and Information (CSLI), whose members are computer scientists, linguists, philosophers, and psychologists, participate extensively in the activities of the department.

**LINGUISTICS COURSE CATALOG**

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics. Those with numbers 200 and above are primarily for graduate students, but with consent of instructor some of them may be taken for credit by qualified undergraduates. At all levels, the course numberings indicate a special area, as follows:

- 00-04 General
- 05-09 Phonetics
- 10-14 Phonology
- 15-19 Morphology
- 20-29 Syntax
- 30-39 Semantics, Pragmatics, Discourse
- 40-49 Language Acquisition, Psycholinguistics
- 50-61 Sociolinguistics, Language Variation, Change
- 62-73 Language and Culture, Structure of a Language
- 74-79 Methods, Mathematical Linguistics, Statistics
- 80-89 Computational Linguistics
- 90-93 Applied Linguistics
- 94-99 Directed Work, Theses, Dissertations

**BACHELOR OF ARTS IN LINGUISTICS**

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; the major also draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities and the social and physical sciences. It provides a solid general education as a background for advanced studies in such disciplines as Anthropology, Cognitive Science, Communication, Computer Science, Education (Language, Literacy, and Culture), hearing and speech sciences, languages, Law, Linguistics, Philosophy, and Psychology.

**REQUIREMENTS**

Requirements for the B.A. include at least 50 units of course work in Linguistics and approved courses in related fields. Of the 50 units required for the major, no more than 12 may be below the 100 level. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis. Students must receive a ‘C-’ or better in courses used towards the requirements.

**Core Courses**—The core courses are:

- LINGUIST 1. Introduction to Linguistics
- LINGUIST 110. Introduction to Phonetics and Phonology
- LINGUIST 120. Introduction to Syntax
- LINGUIST 130A. Introduction to Linguistic Meaning
- or LINGUIST 130B. Introduction to Lexical Semantics
- LINGUIST 150. Language in Society, which fulfills the Writing in the Major requirement (WIM)

**HONORS PROGRAM**

Students who wish to undertake a more intensive program of study, including independent research, should pursue departmental honors. Students should apply for honors by the end of Winter Quarter of their junior year. As part of the application, the student must submit a research proposal describing the honors project which must be approved by the faculty adviser. Approval is given only to students who have maintained a grade point average (GPA) of 3.3 (B+) or better in the courses required for the major.

Honors students complete a total of 60 units including the 50 units for the major, plus 10 additional units of independent study and Honors Research. In addition, they must complete an honors thesis based on research conducted with a principal adviser who must be a member of the Linguistics faculty, and a secondary fa-
culty adviser who may, with the approval of the Undergraduate Studies Committee, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199, Independent Study, to work closely with one of their advisers on the research project. In Winter and Spring quarters, honors students enroll in LINGUIST 198, Honors Research, with the student’s principal adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

MINOR IN LINGUISTICS

Requirements for the minor include at least 28 units of course work (typically seven courses) in Linguistics and related fields, approved in advance by the Linguistics undergraduate studies adviser. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis. The courses counting towards the minor must be incremental units beyond those needed to satisfy the student’s major course of study. The minor consists of:

1. LINGUIST 1. Introduction to Linguistics
2. Two out of the following Linguistics core courses:
   - LINGUIST 110. Introduction to Phonetics and Phonology
   - LINGUIST 120. Introduction to Syntax
   - LINGUIST 130A. Introduction to Linguistic Meaning or LINGUIST 160. Introduction to Language Change or, in advance consultation with the Linguistics undergraduate studies adviser, a course in historical linguistics or the history of a language.
3. At least four other courses determined in advance consultation with the Linguistics undergraduate studies adviser. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.

GRADUATE PROGRAMS IN LINGUISTICS

COGNITIVE SCIENCE

Linguistics is participating with the departments of Computer Science, Philosophy, and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics. To receive this field designation, students must complete 30 units of approved courses, to be determined in consultation with the graduate studies adviser.

COTERMINAL BACHELOR’S AND MASTER’S DEGREE PROGRAM IN LINGUISTICS

The Department of Linguistics admits a limited number of undergraduates to the coterminal degree program. Students are required to submit to the department a complete application, which includes a statement of purpose identifying a thesis topic, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree program rest with the Graduate Admissions Committee of the Department of Linguistics. For further application information, see the department’s web pages.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MASTER OF ARTS IN LINGUISTICS

The University’s basic requirements for the master’s degree are discussed in the “Graduate Degrees” section of this bulletin. The following are additional departmental requirements. Candidates should review the department’s Guidelines for the M.A. Degree in Linguistics for further particulars concerning these requirements.

1. Courses: candidates must complete 45 units of graduate work in Linguistics, including at least four courses in the student’s area of specialization. No more than two courses should be at the 100 level.
2. Language: reading knowledge of a non-native language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language, or in-depth research on the structure of a non-native language.
3. Thesis or Thesis Project: a research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of LINGUIST 398, Directed Research).

DOCTOR OF PHILOSOPHY IN LINGUISTICS

The following requirements are in addition to the basic University requirements for the degree sought; see the “Graduate Degrees” section of this bulletin. Candidates should review the department’s Guidelines for the Degree of Ph.D. in Linguistics, downloadable at http://www-linguistics.stanford.edu/graduate/phd-guidelines.pdf, for further particulars concerning these requirements.

1. Language—candidates must demonstrate the ability to read at least one foreign language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language. (Particular areas of specialization may require additional research languages.)
2. Courses—a minimum of 135 units of graduate work beyond the bachelor’s degree, or 90 units beyond the master’s degree. The course requirements detailed in the Guidelines for the Degree of Ph.D. in Linguistics guarantee that each student covers a sufficient set of subareas within the field.
3. Research—the prospective Ph.D. candidate is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end of Autumn Quarter of the third year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by two quarters of LINGUIST 395, Research Workshop (1-2 units each), and by oral discussion with a committee of at least three faculty members selected by the student and the faculty.
4. Candidacy—students must complete a prescribed portion of the basic course requirement (see item 2 above), one foreign language requirement (see item 1 above), and one qualifying paper (see item 3 above) by the end of their second year.
5. Teaching—at least three quarters serving as a teaching assistant in Linguistics courses.
6. Colloquia—two oral presentations exclusive of the oral presentation of the dissertation proposal (see item 7b below). This requirement is satisfied by class presentations, conference papers, or colloquium talks. Normally, both should be given during the first four years of study.

7. Dissertation—
   a. a written dissertation proposal is required by the end of the third year.
   b. oral presentation of the dissertation proposal, preferably as a colloquium.
   c. approval of the dissertation topic and appointment of a dissertation committee.
   d. passing a University oral examination on the dissertation and related areas.
   e. dissertation (up to 15 units of LINGUIST 399).

**PH.D. MINOR IN LINGUISTICS**

1. Courses: the candidate must complete 30 units of course work in linguistics. The University requires that at least 20 of these units be at the 200 level or above; the remaining 10 units must be at the 100 level or above. The course work for the minor must include LINGUIST 110, 120, and either 130A or 130B or 200-level introductory courses in the same areas and at least three courses related to the area of specialization. Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student’s Ph.D. minor adviser in Linguistics.

2. Research Project (optional): the candidate may elect to present a paper which integrates the subject matter of linguistics into the field of specialization of the candidate.

3. The Linguistics minor adviser or designee serves on the candidate’s University oral examination committee and may request that up to one-third of the examination be devoted to the minor subject.

**OVERSEAS STUDIES COURSES IN LINGUISTICS**

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://exploreCourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

**WINTER QUARTER**

**PARIS**

OSSPARIS 37. Gesture. 3 units, Eve Clark, GER:DB:SocSci
OSSPARIS 38. First Language Acquisition, with Emphasis on French. 4 units, Eve Clark

**DIVISION OF LITERATURES, CULTURES, AND LANGUAGES**

*Division Head: Roland Greene*

*Division Offices: Building 260, Rooms 114-119*

*Mail Code: 94305-2005*

*Phone: (650) 724-1333; Fax: (650) 725-9306*

*Email: dlcl@stanford.edu*

*Web Site: http://dlcl.stanford.edu*

The Division of Literatures, Cultures, and Languages consists of five academic departments (Comparative Literature, French and Italian, German Studies, Iberian and Latin American Cultures, and Slavic Languages and Literatures) as well as the Language Center, which oversees language instruction at Stanford. All the departments of the division offer academic programs leading to B.A., M.A., and Ph.D. degrees. The division brings together scholars and teachers dedicated to the study of literatures, cultures, and languages from humanistic and interdisciplinary perspectives. The departments in the division are distinguished by the quality and versatility of their faculty, a wide variety of approaches to cultural tradition and expression, and the intense focus on the mastery of languages. This wealth of academic resources, together with small classes and the emphasis on individual advising, creates a superior opportunity for students who wish to be introduced to or develop a deeper understanding of non-English speaking cultures.

The division’s departments and the Language Center offer instruction at all levels, including introductory and general courses that do not require knowledge of a language other than English. These courses satisfy a variety of undergraduate requirements and can serve as a basis for developing a minor or a major program in the member departments. The more advanced and specialized courses requiring skills in a particular language are listed under the relevant departments, as are descriptions of the minor and major programs.

In addition to the undergraduate Minor programs, the DLCL offers instruction in a small number of courses, including an undergraduate multimedia laboratory course and several graduate courses focused on the teaching of second languages, the teaching of literature, and academic professionalization.

Courses offered by the Division of Literatures, Cultures, and Languages are listed under the subject code DLCL on the Stanford Bulletin’s ExploreCourses web site.

**MINOR IN LITERATURES, CULTURES, AND LANGUAGES**

The Division of Literatures, Cultures, and Languages offers two undergraduate minors that draw upon courses in literature and language within the division’s departments and elsewhere in the University.

Course work in these minors may not duplicate work counted toward language majors or other minors. Advanced Placement credit and transfer credit do not apply to the minors. All courses must be taken for a letter grade. By University policy, no more than 36 units may be awarded in these minors.

Prospective minors should obtain a Minor Declaration form from the DLCL office of undergraduate student services.

**MINOR IN LITERATURE**

The minor in Literature allows students from any major to develop skills in the interpretation and criticism of literature, while acquiring a familiarity with types of literature from different national traditions and periods. Students must complete 30 units of course work on literature or literary theory. Courses may be in the original language or in translation.

The courses must include a minimum of:

1. One course on literary theory or the history of criticism.
2. One course on literature prior to the eighteenth century.
3. One course on literature reflecting perspectives outside of the European traditions.
4. One course from each of three distinct national or linguistic traditions from among Arabic, Chinese, English (including Anglophone literatures broadly conceived), French, German, Greek, Hebrew, Italian, Japanese, Korean, Latin, Persian, Portuguese, Russian, Spanish, Yiddish, and other national or linguistic traditions when appropriate courses are available. The pre-eighteenth-century course and the non-European course may be counted toward fulfilling this requirement.
5. Courses from two different genres such as poetry, drama, and prose fiction. Theory does not count as a genre.
6. One course requiring a research paper.

Students must consult with the minor adviser for approval of courses to meet these requirements. Second-year foreign language courses are not normally counted unless the syllabus reflects a primary emphasis on the reading of literature. Students are encouraged to acquire second-language skills and to explore courses in
related disciplines; such courses, however, are not counted toward the 30 units required for the minor in Literature.

Course work in the minor may not duplicate work counted toward specific language majors or minors. Neither Advanced Placement credit nor transfer credit may be applied to the minor. All courses applied to the minor must be Stanford courses. At least 25 units of the course work must be taken for a letter grade.

The DLCL office of undergraduate student services verifies course work for the minor. The minor in Literature must be approved by a divisional faculty member designated by the DLCL.

MINOR IN MODERN LANGUAGES

The minor in Modern Languages is offered to students who want to supplement the course work in their major with course work in modern languages and literatures. The minor must be approved by the directors of undergraduate studies of the respective language departments. Students in any field qualify for the minor by meeting the following requirements:
1. A minimum of 20 units at the intermediate level (second year) or beyond in two languages other than English offered by the DLCL. Normally, this involves 12 units in each language.
2. At least one additional course whose subject code ends in -LIT or -GEN in each modern language in ‘1’ above. These courses should be taught by Academic Council members or other senior members of the faculty. In the case of Slavic or Asian languages, the course should be marked as advanced.

Students are recommended to study, work, or intern abroad for at least eight weeks at a location where one of the languages is spoken.

MATHEMATICAL AND COMPUTATIONAL SCIENCE

Director: Bradley Efron
Associate Director: Susan Holmes
Committee in Charge: Takeshi Amemiya (Economics), Gunnar Carlsson (Mathematics), Richard Cottle (Management Science and Engineering), Thomas M. Cover (Electrical Engineering, Statistics), Bradley Efron (Statistics), Peter W. Glynn (Management Science and Engineering), J. Michael Harrison (Graduate School of Business), Susan Holmes (Statistics), Parviz Moin (Engineering), George Papanicolaou (Mathematics), Eric Roberts (Computer Science), David Rogosa (Education), Tim Roughgarden (Computer Science), Mehran Sahami (Computer Science), David Siegmund (Statistics), Jonathan Taylor (Statistics), Arthur F. Veinott, Jr. (Management Science and Engineering), Brian White (Mathematics), Nancy R. Zhang (Statistics)

Program Administrator: Helen Tombroupolos

Program Offices: Sequoia Hall, 390 Serra Mall
Mail Code: 94305-4065
Phone: (650) 723-2620
Email: helen@stat.stanford.edu
Web Site: http://stanford.edu/group/mathcompsci

Courses offered by the Program in Mathematical and Computational Science are listed under the subject code MCS on the Stanford Bulletin’s ExploreCourses web site.

This interdepartmental interschool undergraduate program provides a major for students interested in the mathematical and computational sciences, or in the use of mathematical ideas and analysis in problems in the social or management sciences. It provides a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of automatic computation, optimal decision making, probabilistic modeling, and statistical inference. It also provides an opportunity for elective work in any of Stanford’s mathematical science disciplines.

The program uses the faculty and courses of the departments of Computer Science, Management Science and Engineering, Mathematics, and Statistics. It prepares students for graduate study or employment in the mathematical and computational sciences or in those areas of applied mathematics which center around the use of computers and are concerned with the problems of the social and management sciences.

A biology option is offered for students interested in applications of mathematics, statistics, and computer science to the biological sciences (bioinformatics, computational biology, statistical genetics, neurosciences); and in a similar spirit, an engineering option.

UNDERGRADUATE MISSION STATEMENT FOR MATHEMATICAL AND COMPUTATIONAL SCIENCE

The mission of the Mathematical and Computational Science Program is to provide students with a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of automatic computation, optimal decision making, probabilistic modeling and statistical inference. The program is interdisciplinary in its focus, and students are required to complete course work in mathematics, computer science, statistics, and management science and engineering. A computational biology track is available for students interested in biomedical applications. The program prepares students for careers in academic, financial and government settings as well as for study in graduate or professional schools.

BACHELOR OF SCIENCE IN MATHEMATICAL AND COMPUTATIONAL SCIENCE

The requirement for the bachelor’s degree, beyond the University’s basic requirements, is an approved course program of 72-77 units, distributed as follows:

Mathematics (MATH): 29-31 units

- MATH 41. Calculus A 5
  and MATH 42. Calculus A,W 5
- MATH 51. Linear Algebra and Differential Calculus of Several Variables A,W,S 5
  or MATH 51H. Honors Advanced Calculus A,S 5
- MATH 52. Integral Calculus of Several Variables A,W,S 5
  or MATH 52H. Honors Advanced Calculus W 5
  or MATH 53H. Honors Advanced Calculus S 5
- MATH 109. Applied Group Theory (WIM) W 3
  or MATH 110. Applied Number Theory and Field Theory (WIM) S 3
  or MATH 120. Modern Algebra (WIM) A,S 3
  or MATH 171. Fundamental Concepts of Analysis (WIM) A,S 3
- MATH 104. Applied Matrix Theory A,W 3
  or MATH 113. Linear Algebra and Matrix Theory W,S 3

Computer Science (CS): 16-18 units

- CS 106X. Programming Methodology and Abstractions (Accel.) A 3-5
  or CS 106A. Programming Methodology A,W,S 3-5
  and CS 106B. Programming Abstractions A,W,S 3-5
  or two of the following (CS or CME):
  - CME 106. Introduction to Scientific Computing W 3-4
  - CS 107. Programming Paradigms A,S 3-5
  - CS 154. Introduction to Automata and Complexity Theory A,S 3-4
  - CS 161. Design and Analysis of Algorithms A,W 3-4
- CS 181. Computers, Ethics and Public Policy (WIM) W 3-4

Management Science and Engineering (MS&E): 8-9 units

- MS&E 111. Introduction to Optimization (same as ENGR 62) S 3-4
  and MS&E 121. Introduction to Stochastic Modeling W 43
  or MS&E 221. Stochastic Modeling W
HONORS PROGRAM

The honors program is designed to encourage a more intensive study of mathematical sciences than the B.S. program. In addition to meeting all requirements for the B.S., the student must:

1. Maintain an average letter grade equivalent in mathematical sciences courses of at least a 3.4.
2. Complete at least 15 units in mathematical sciences in addition to the requirements for the major listed above. These courses should form a sustained effort in one area and constitute a program approved by the committee in charge of the Mathematical and Computational Science Program.
3. Include in the above 15 units at least one of the following:
   a. an approved higher-level graduate course
   b. participation in a small group seminar
   c. at least 3 units of directed reading

Students interested in doing honors work should consult with their advisers by the last quarter of the junior year to prepare a program of study. Honors work may be concentrated in fields outside the Mathematical and Computational Science programs such as biological sciences, medicine, physics.

MATHEMATICAL AND COMPUTATIONAL SCIENCE ELECTIVES (9 UNITS)

Three courses in mathematical and computational science, 100-level or above, at least 3 units each. At least one must be chosen from the following:

ECON 102C. Advanced Topics in Econometrics
   Qtr. and Units: W, 5
ECON 140. Introduction to Financial Economics
   Qtr. and Units: S, W, 5
ECON 160. Game Theory and Economic Applications
   (not given 2009-10)
   Qtr. and Units: W, 5
   (prerequisite ECON 51)
ECON 179. Experimental Economics
   Qtr. and Units: W, 5
EE 261. The Fourier Transform and its Applications
   Qtr. and Units: A, W, 5
EE 263. Introduction to Linear Dynamical Systems
   Qtr. and Units: W, 5
EE 278. An Introduction to Statistical and Signal Processing
   Qtr. and Units: A, 5
MS&E 211. Linear and Nonlinear Optimization
   Qtr. and Units: W, 3
MS&E 212. Mathematical Programming and Combinatorial Optimization
   Qtr. and Units: W, 3
MS&E 221. Stochastic Modeling
   Qtr. and Units: W, 3
MS&E 251. Stochastic Decision Models (not given 2009-10)
   Qtr. and Units: W, 3
MCS 200. Mathematics of Sports (same as STATS 50)
   Qtr. and Units: W, 3
MATH 104. Applied Matrix Theory
   Qtr. and Units: A, W, 3
MATH 106. Functions of a Complex Variable
   Qtr. and Units: A, 3
MATH 108. Introduction to Combinatorics and its Applications
   Qtr. and Units: A, S, 3
MATH 113. Linear Algebra & Matrix Theory
   Qtr. and Units: W, S, 3
MATH 115. Functions of a Real Variable
   Qtr. and Units: A, W, 3
MATH 116. Complex Analysis
   Qtr. and Units: W, 3
MATH 131. Partial Differential Equations I
   Qtr. and Units: A, W, 3
MATH 132. Partial Differential Equations II
   Qtr. and Units: S, 3
MATH 136. Stochastic Processes
   Qtr. and Units: A, 3
MATH 171. Fundamental Concepts of Analysis
   Qtr. and Units: A, S, 3
MATH 172. Lebesgue Integration and Fourier Analysis
   Qtr. and Units: S, 3
PHIL 151. First-Order Logic
   Qtr. and Units: W, 4
STATS 202. Data Analysis
   Qtr. and Units: A, 3
STATS 208. Introduction to the Bootstrap (not given 2009-10)
STATS 215. Statistical Models in Biology
   Qtr. and Units: W, 3
STATS 217. Introduction to Stochastic Processes
   Qtr. and Units: W, 3

For Computer Science (CS), electives can include courses not taken as units under the CS list above and the following:

CME 302. Numerical Linear Algebra
   Qtr. and Units: A, 3
CS 108. Object-Oriented Systems Design
   Qtr. and Units: A, W, 3-4
CS 110. Principles of Computer Systems
   Qtr. and Units: W, S, 5
CS 140. Operating Systems and Systems Programming
   Qtr. and Units: W, S, 3-4
CS 143. Compilers
   Qtr. and Units: A, 3-4
CS 157. Logic and Automated Reasoning
   Qtr. and Units: A, 3-4
CS 161. Design and Analysis of Algorithms
   Qtr. and Units: A, W, 3-4
CS 164. Computing with Physical Objects
   Qtr. and Units: S, 3
CS 194. Software Project (prerequisite CS 108)
   Qtr. and Units: S, 3
CS 221. Artificial Intelligence: Principles and Techniques
   Qtr. and Units: A, 3-4
CS 223A. Introduction to Robotics
   Qtr. and Units: W, 3
CS 223B. Introduction to Computer Vision
   Qtr. and Units: W, 3
CS 225A. Experimental Robotics
   Qtr. and Units: S, 3
CS 228. Probabilistic Models in Artificial Intelligence
   Qtr. and Units: W, 3
CS 229. Machine Learning
   Qtr. and Units: A, 3
CS 243. Advanced Compiling Techniques
   Qtr. and Units: W, 3-4
EE 282. Computer Systems Architecture
   Qtr. and Units: S, 3

With the adviser’s approval, courses other than those offered by the sponsoring departments may be used to fulfill part of the elective requirement. These may be in fields such as biology, economics, electrical engineering, industrial engineering, and medicine, that might be relevant to a mathematical sciences major, depending on a student’s interests.

1. At least three quarters before graduation, majors must file with their advisers a plan for completing degree requirements.
2. All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfac-
tory/no credit only.
3. A course used to fulfill the requirements of one section of the program may not be applied toward the fulfillment of the re-
quirements of another section.
4. The student must have a grade point average (GPA) of 2.0 or better in all course work used to fulfill the major requirement.

MATHEMATICAL AND COMPUTATIONAL SCIENCE BIOLOGY OPTION

Replace MATH 109/110 with:

Replace STATS 191/203 with:

STATS/BIO 141. Biostatistics
   Qtr. and Units: A, 3-5

Take at least 2 courses from the Biology core:

BIO 41. Genetics and Biochemistry
   Qtr. and Units: A, 5
BIO 42. Cell Biology and Animal Physiology
   Qtr. and Units: W, 5
BIO 43. Plant Ecology, Evolution, and Ecol-
   Qtr. and Units: S, 5

Take a third course either from the core or

STATS 166. Statistical Methods in Computational Geo-
   Qtr. and Units: WIM

BIO 133. Genetics of Prokaryotes (not given 2009-10)
   Qtr. and Units: S, 3
BIO 135. Biological Clocks (not given 2009-10)
   Qtr. and Units: S, 3
BIO 136. Evolutionary Paleobiology (not given 2009-
   Qtr. and Units: 4-5
   10)
BIO 143/243. Evolution
   Qtr. and Units: A, 4
BIO 144. Conservation Biology
   Qtr. and Units: W, 3-4
BIO 160A. Developmental Biology I
   Qtr. and Units: A, 4
BIO 160B. Developmental Biology II
   Qtr. and Units: W, 4
BIO 203. Advanced Genetics
   Qtr. and Units: A, 4
BIO 230. Molecular and Cellular Immunology
   Qtr. and Units: A, 4-5

Honors students should take 3 of the following:

STATS 166. Statistical Methods in Computational Geo-
   Qtr. and Units: WIM

ANTHRO 180. Introduction to Anthropological Gene-
   Qtr. and Units: S, 5

ANTHRO 187. The Genetic Structure of Populations
   Qtr. and Units: S, 5
ANTHRO 188. Research in Anthropological Genetics
   Qtr. and Units: S, 5
BIO 113. Fundamentals of Molecular Evolution
   Qtr. and Units: S, 4
BIO 146. Population Studies
   Qtr. and Units: W, 1
**MATHEMATICAL AND COMPUTATIONAL SCIENCE ENGINEERING OPTION**

Students in the Engineering option take the introductory courses for the Mathematics and Computational Sciences major with the following allowable substitutions.

The MATH 51-53 series may be replaced by:

- **CME 100/ENGR 154. Vector Calculus for Engineers**
  - Qtr. and Units: A 5
- **CME 102/ENGR 155A. Ordinary Differential Equations for Engineers**
  - W 5
- **CME 104/ENGR 155B. Linear Algebra and Partial Differential Equations for Engineers**
  - S 5
- **MATH 115. Functions of a Real Variable**
  - A,W 3
- **STATS 116 may be replaced by either one of the following:**
  - **STATS 110. Statistical Methods in Engineering and Physical Sciences**
    - A 4-5
  - **or CME 106/ENGR 155C. Introduction to Probability and Statistics for Engineers**
    - W 3-4
- **STATS 191/STATS 203 may be replaced by:**
  - **STATS 202. Data Analysis**
    - A 3
- **Electives; take at least one course from the following list:**
  - **MATH 106. Introduction to Theory of Functions of a Complex Variable**
    - A 3
  - **MATH 108. Introduction to Combinatorics Applications**
    - A 3
  - **MATH 116. Complex Analysis**
    - W 3
  - **MATH 132. Partial Differential Equations II**
    - S 3
  - **PHIL 151. First-Order Logic**
    - W 4
- **Take at least two courses from the following list:**
  - **ENGR 15. Dynamics**
    - A,S 3
  - **ENGR 20. Introduction to Chemical Engineering**
    - S 3
  - **ENGR 25. Biotechnology**
    - S 3
  - **ENGR 30. Engineering Thermodynamics**
    - A,W 3
  - **ENGR 40. Introductory Electronics**
    - A,S 5
  - **ENGR 50. Introductory Science Materials**
    - W,S 3
  - **ENGR 105. Feedback Control Design**
    - W 3
- **Take three additional courses from a single engineering department, and two additional courses from any engineering department(s).**

**MINOR IN MATHEMATICAL AND COMPUTATIONAL SCIENCE**

The minor in Mathematical and Computational Science is intended to provide an experience of the four constituent areas: Computer Science, Mathematics, Management Science and Engineering, and Statistics. Five basic courses are required:

- **CS 106X. Programming Methodology and Abstractions (Accelerated)**
- **or CS 106A,B. Programming Methodology**
- **MATH 51. Linear Algebra and Differential Calculus of Several Variables**
- **or MATH 104. Applied Matrix Theory**
- **ENGR 62/MS&E 111. Introduction to Optimization**
- **or MS&E 121. Introduction to Stochastic Modeling**
- **STATS 116. Theory of Probability, and either**
- **STATS 191. Introduction to Applied Statistics**
- **or STATS 200. Introduction to Statistical Inference**

In addition to the above, the minor requires three courses from the following, two of which must be in different departments:

- **CME 108. Introduction to Scientific Computing**
- **CS 103. Mathematical Foundations of Computing**
- **CS 107. Programming Paradigms**
- **CS 154. Introduction to Automata and Complexity Theory**
- **CS 161. Design and Analysis of Algorithms**
- **EE 261. The Fourier Transform and its Applications**
- **ECON 102C. Advanced Topics in Econometrics**
- **ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)**
- **ECON 181. Optimization and Economic Analysis**
- **MS&E 121. Introduction to Stochastic Modeling**
- **MS&E 211. Linear and Nonlinear Optimization**
- **MS&E 212. Mathematical Programming and Combinatorial Optimization**
- **MS&E 221. Stochastic Modeling**
- **MS&E 251. Stochastic Decision Models**
- **MATH 104. Applied Matrix Theory**
- **MATH 106. Functions of a Complex Variable**
- **MATH 108. Introduction to Combinatorics and its Applications**
- **MATH 109. Applied Group Theory**
- **MATH 110. Applied Number Theory and Field Theory**
- **MATH 115. Functions of a Real Variable**
- **MATH 131. Partial Differential Equations I**
- **MATH 132. Partial Differential Equations II**
- **MATH 171. Fundamental Concepts of Analysis**
- **PHIL 151. First-Order Logic**
- **STATS 191. Introduction to Applied Statistics**
- **STATS 200. Introduction to Statistical Inference**
- **STATS 202. Data Analysis**
- **STATS 203. Introduction to Regression Models and Analysis of Variance**
- **STATS 217. Introduction to Stochastic Processes**

Other upper-division courses appropriate to the program major may be substituted with consent of the program director. Undergraduate majors in the constituent programs may not count courses in their own departments.

**MATHEMATICS**

*Emeriti:* Solomon Feferman, Robert Finn, Joseph Keller, Georg Kreisel, Harold Levine, Tai-Ping Liu, R. James Milgram, Donald Ornstein, Robert Osserman

*Chair:* Rafe Mazzeo

*Associate Professor:* Soren Galatius

*Szegő Assistant Professors:* Fei Han, Pierre Garapon, Vladislav Kargin, Joan Licata, Antoine Toussaint, Denis Trotabas, Leo Tzou, Melanie Wood

*Lecturers:* Eric Bahuaud, Mark Lucianovic, Laurence Nedelec, Wojciech Wieczorek

*Consulting Professors:* Brian Conrey, Keith Devlin, David Hoffman, Wu-chung Hsiang

*Samelson Fellows:* Matthew Kahle, Anthony Licata, Samuel Lisi, Catherine Williams

*Web site:* http://math.stanford.edu

Courses offered by the Department of Mathematics are listed under the subject code MATH on the Stanford Bulletin’s Explore-Courses web site.

The Department of Mathematics offers programs leading to the degrees of Bachelor of Science, Master of Science, and Doctor of Philosophy in Mathematics, and participates in the program leading to the B.S. in Mathematical and Computational Science. The department also participates in the M.S. and Ph.D. degree programs in Scientific Computing and Computational Mathematics and the M.S. degree program in Financial Mathematics.

**UNDERGRADUATE PROGRAMS IN MATHEMATICS**

**ADVANCED PLACEMENT IN MATHEMATICS FOR FRESHMEN**

Students of unusual ability in mathematics often take one or more semesters of college-equivalent courses in mathematics while
they are still in high school. Under certain circumstances, it is possible for such students to secure both advanced placement and credit toward the bachelor’s degree. A decision as to placement and credit is made by the department after consideration of the student’s performance on the Advanced Placement Examination in Mathematics (forms AB or BC) of the College Entrance Examination Board, and also after consideration of transfer credit in mathematics from other colleges and universities.

The department does not give its own advanced placement examination. Students can receive either 5 or 10 units of advanced placement credit, depending on their scores on the CEEB Advanced Placement Examination. Entering students who have credit for two quarters of single variable calculus (10 units) are encouraged to enroll in MATH 51-53 in multivariable mathematics, or the honors version 51H-53H. These three-course sequences, which can be completed during the freshman year, supply the necessary mathematics background for most majors in science and engineering. They also serve as excellent background for the major or minor in Mathematics, or in Mathematical and Computational Science. Students who have credit for one quarter of single variable calculus (5 units) should take MATH 42 in Autumn Quarter and 51 in Winter Quarter. Options available in Spring Quarter include MATH 52, or 53. For proper placement, contact the Department of Mathematics.

**BACHELOR OF SCIENCE IN MATHEMATICAL AND COMPUTATIONAL SCIENCE**

The Department of Mathematics participates with the departments of Computer Science, Management Science and Engineering, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the “Mathematical and Computational Science” section of this bulletin.

**INTRODUCTORY AND UNDERGRADUATE COURSES**

The department offers two sequences of introductory courses in single variable calculus.

1. MATH 41, 42 present single variable calculus. Differential calculus is covered in the first quarter, integral calculus in the second.
2. MATH 19, 20, 21 cover the material in 41, 42 in three quarters instead of two.

There are options for studying multivariable mathematics:

1. MATH 51, 52, 53 cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize application. MATH 51 covers differential calculus in several variables and introduces matrix theory and linear algebra; 52 covers integral calculus in several variables and vector analysis; 53 studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is strongly recommended for incoming freshmen with 10 units of advanced placement credit.
2. MATH 51H, 52H, 53H cover the same material as 51, 52, 53, but with more emphasis on theory and rigor.

The department offers three classes on linear algebra: 51 (or 51H), 104, and 113.

**BACHELOR OF SCIENCE IN MATHEMATICS**

The following department requirements are in addition to the University’s basic requirements for the bachelor’s degree:

Students wishing to major in Mathematics must satisfy the following requirements:

1. Department of Mathematics courses (other than MATH 100) totaling at least 49 units credit; such courses must be taken for a letter grade. For the purposes of this requirement, STATS 116, PHIL 151, and PHIL 152 count as Department of Mathematics courses.
2. Additional courses taken from Department of Mathematics courses numbered 101 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units credit. At least 9 of these units must be taken for a letter grade.
3. A Department of Mathematics adviser must be selected, and the courses selected under items ‘1’ and ‘2’ above must be approved by the department’s director of undergraduate study, acting under guidelines laid down by the department’s Committee for Undergraduate Affairs. The Department of Mathematics adviser can be any member of the department’s faculty.
4. To receive the department’s recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation. Students are encouraged to declare as early as possible, preferably by the end of the sophomore year.

Students are normally expected to complete either the sequence 19, 20, 21 or the sequence 41, 42 (but not both). Students with an Advanced Placement score of at least 4 in BC math or 5 in AB math may receive 10 units credit and fulfill requirement ‘1’ by taking at least 39 units of Department of Mathematics courses numbered 51 and above. Students with an Advanced Placement score of at least 3 in BC math or at least 4 in AB math may receive 5 units credit and fulfill requirement ‘1’ by taking at least 44 units of Department of Mathematics courses numbered 42 and above.

Sophomore seminar courses may be counted among the choice of courses under item ‘1’. Other variations of the course requirements laid down above (under items ‘1’ and ‘2’) may, in some circumstances, be allowed. For example, students transferring from other universities may be allowed credit for some courses completed before their arrival at Stanford. However, at least 24 units of the 49 units under item ‘1’ above and 9 of the units under item ‘2’ above must be taken at Stanford. In all cases, approval for variations in the degree requirements must be obtained from the department’s Committee for Undergraduate Affairs. Application for such approval should be made through the department’s director of undergraduate studies. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

It is to be emphasized that the above regulations are minimum requirements for the major; students contemplating graduate work in mathematics are strongly encouraged to include the courses 116, 120, 121, 147 or 148, and 171 in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items ‘1’ and ‘2’ above, including at least one 200-level course. Such students are also encouraged to consider the possibility of taking the honors program, discussed below.

To help develop a sense of the type of course selection (under items ‘1’ and ‘2’ above) that would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a few of a very large number of possible combinations of courses that could be taken in fulfillment of the Mathematics major requirements:

**Example 1**—A general program (a balanced program of both pure and applied components, without any particular emphasis on any one field of mathematics or applications) as follows:

A. either MATH 19, 20, and 21, or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 104 or 113; 106; 109; 110; 115;

B. plus any selection of at least eight of the following courses, including three Department of Mathematics courses: MATH 108, 131, 132, 143, 146, 147, 148, 152, 161; CS 137; ECON 50; PHYSICS 41, 43, 45; STATS 116. These courses from other departments are only meant as examples; there are many suitable courses in several departments that can be taken to fulfill part or all of requirement ‘2’.

**Example 2**—A theoretical program recommended for those contemplating possible later graduate work providing an introduction to the main areas of mathematics both broader and deeper than
the general program outlined above:

A. either MATH 19, 20 and 21, or 41 and 42 (or satisfactory Advanced Placement credit)

B. either the sequence 51, 52, 53, or the sequence 51H, 52H, 53H; 106 or 116; 113; 120; 171

C. plus nine or more 3-unit math courses numbered 121 or higher (the logic courses PHIL 151 and PHIL 152 are considered to be such courses), including at least one algebra course, one analysis course, and one geometry/topology course. (See the description of the honors program below.)

In addition, those contemplating eventual graduate work in Mathematics should consider including at least one graduate-level math course such as MATH 205A, 210A, or 215A or B. Such students should also consider the possibility of entering the honors program.

Example 3*—An applied mathematics program:

A. either MATH 19, 20, and 21; or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 104; 106; 109; 110; 115; 131; 132; STATS 116

B. plus at least 15 units of additional courses in Applied Mathematics, including, for example, suitable courses from the departments of Physics, Computer Science, Economics, Engineering, and Statistics.

* Students with interests in applied mathematics, but desiring a broader-based program than the type of program suggested in Example 3, including significant computational and/or financial and/or statistical components, are encouraged to also consider the Mathematics and Computational Science program.

HONORS PROGRAM

The honors program is intended for students who have strong theoretical interests and abilities in mathematics. The goal of the program is to give students a thorough introduction to the main branches of mathematics, especially analysis, algebra, and geometry. Through the honors thesis, students may be introduced to a current or recent research topic, although occasionally more classical projects are encouraged. The program provides an excellent background with which to enter a master’s or Ph.D. program in Mathematics. Students completing the program are awarded a B.S. in Mathematics with Honors.

It is recommended that the sequence 51H, 52H, 53H be taken in the freshman year. To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

1. The selection of courses under items ‘1’ and ‘2’ above must contain MATH 106 or 116, MATH 120, and MATH 171 and must also include seven additional 3-unit Math courses numbered 121 or higher. (The logic courses PHIL 151 and 152 can also be used.) These seven courses must include at least one algebra course (121, 122, 152, 154, or 155), one analysis course (131P, 132, 136, 151, 172, 173, or 175), and one geometry/topology course (143, 145, 146, 147, or 148).

2. Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics faculty, and map out a concentrated reading program under the direction and guidance of the adviser. During the senior year, the student must enroll in MATH 197 for a total of 6 units (typically spread over two quarters), and work toward completion of the thesis under the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for MATH 197 are required in addition to the course requirements laid out under items ‘1’ and ‘2’ above and in addition to all other requirements for math majors.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range). MATH 205A, 210A, and 215A or B are especially recommended in this context.

Students with questions about the honors program should see the director of undergraduate advising.

MINOR IN MATHEMATICS

To qualify for the minor in Mathematics, a student should complete, for a letter grade, at least six Department of Mathematics courses (other than MATH 100) numbered 51 or higher, totaling a minimum of 24 units. It is recommended that these courses include either the sequence 51, 52, 53 or the sequence 51H, 52H, 53H. At least 12 of the units applied toward the minor in Mathematics must be taken at Stanford. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

GRADUATE PROGRAMS IN MATHEMATICS

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the “School of Education” section of this bulletin or address inquiries to Credential Secretary, School of Education.

MASTER OF SCIENCE IN MATHEMATICS

The University’s basic requirements for the master’s degree are discussed in the “Graduate Degrees” section of this bulletin. Students should pay particular attention to the University’s course requirements for graduate degrees. The following are specific departmental requirements:

Candidates must complete an approved course program of 45 units of courses beyond the department requirements for the B.S. degree, of which at least 36 units must be Mathematics Department courses, taken for a letter grade. The Mathematics courses must include at least 18 units numbered 200 or above. The candidate must have a grade point average (GPA) of 3.0 (B) over all course work taken in Mathematics, and a GPA of 3.0 (B) in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department’s Director of Graduate Studies.

For the M.S. degree in Financial Mathematics, see the “Financial Mathematics” section of this bulletin.

DOCTOR OF PHILOSOPHY IN MATHEMATICS

The University’s basic requirements for the doctorate (residency, dissertation, examinations, etc.) are discussed in the “Graduate Degrees” section of this bulletin. The following are specific departmental requirements.

To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

Beyond the requirements for candidacy, the student must complete a course of study approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. In accordance with University requirements, Ph.D. students must complete a total of 135 course units beyond the bachelor’s degree. These courses should be Department of Mathematics courses or approved courses from other departments. The course program must display substantial breadth in mathematics outside the student’s field of application. The student must receive a grade point average (GPA) of 3.0 (B) or better in courses used to satisfy the Ph.D. requirement. In addition, the student must pass the Department area examination and the University oral examination.

Experience in teaching is emphasized in the Ph.D. program. Each student must complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student.
Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

For further information concerning degree programs, fellowships, and assistantships, inquire of the academic associate of the department.

**PH.D. MINOR IN MATHEMATICS**

The student should complete both of the following:*  
1. MATH 106 or 116, 131, 132  
2. MATH 113, 114, 120 or 152

These courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable. In addition, the student should complete 21 units of 200-level courses in Mathematics. These must be taken at Stanford and approved by the Department of Mathematics Ph.D. minor adviser.

* A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for items ‘1’ or ‘2’.

**MEDIEVAL STUDIES**

**Co-Directors:** Paula Findlen, Jennifer Summit  
**Associate Director:** Michael Wyatt  
**Committee in Charge:** Philippe Buc, Hester Gelber, Hans Ulrich Gumbrecht, Robert P. Harrison, Nancy S. Kollman, Seth Lerer, William Mahrt, Bissera Pentcheva, Jennifer Summit, Rega Wood

**Affiliated Faculty:** Cecile Alduy (French and Italian), Theodore Andersson (German Studies), Vincent Barletta (Iberian and Latin American Cultures), Shahzad Bashir (Religious Studies), Carl Bielefeldt (Religious Studies), George H. Brown (English), Philippe Buc (History), Steven Carter (Asian Languages), Charlotte Fonrobert (Religious Studies), Hester Gelber (Religious Studies), Arvner Greif (Economics), Hans Ulrich Gumbrecht (French and Italian), Robert Harrison (French and Italian), Michelle Karnes (English), Nancy S. Kollmann (History), Seth Lerer (English, Comparative Literature), Mark E. Lewis (History), William Mahrt (Music), David Malkiel (Religious Studies), Michael Markham (Music), Kathryn Miller (History), Patricia Parker (Comparative Literature), Bissera Pentcheva (Art and Art History), Orrin W. Robinson (German Studies), Jesse Rodin (Music), Behnam Sadeki (Religious Studies), Stuart Sargent (Asian Languages), Jeffrey Schnapp (French and Italian), Carolyne Springer (French and Italian), Edward Steidle (English), Jennifer Summit (English), Rega Wood (Philosophy)

**Program Offices:** Pigott Hall 205  
**Mail Code:** 94305-2087  
**Department Phone:** (650) 721-4099  
**Email:** ganymede@stanford.edu  
**Web Site:** http://stanford.edu/dept/medieval

Courses offered by the Program in Medieval Studies are listed under the subject code MEDVLST on the Stanford Bulletin’s ExploreCourses web site.

The Program in Medieval Studies draws together a wide range of disciplines: art and architecture; literature and languages; music; philosophy; religious studies; and economic, social, and political history. Faculty interests bridge Western, Islamic, and Asian cultures, and encompass both traditional and innovative materials and methods.

The program is administered through the Center for Medieval and Early Modern Studies, but the degree is conferred by the School of Humanities and Sciences. The committee has approved the program as below. Students interested in pursuing a Medieval Studies major or minor should visit the program office in Pigott Hall and consult with one of the co-directors. The major is normally declared by the beginning of the student’s third year.

The major combines interdisciplinary breadth with a disciplinary focus. The interdisciplinary emphasis is provided by MEDVLST 165, Crusades: Interdisciplinary Approaches, by upper-division interdisciplinary colloquia, and by the requirement that students take courses in three different areas. Depth is ensured by the requirement that students take at least four courses in one area. A faculty adviser helps each student choose courses that integrate the requirements of breadth and depth. To that end, the following guidelines are provided.

The student should take a minimum of 60 units of course work from the list of Medieval Studies courses or appropriate alternatives approved by the co-directors, including ten courses as follows:

1. the introductory course, MEDVLST 165, Crusades: Interdisciplinary Approaches (given alternate years).  
2. two upper-division courses, ideally with an interdisciplinary component, in any field dealing with the Middle Ages.  
3. four courses in one of the following categories:
   a. Literature: English, French, German and Scandinavian, Italian, Latin, Slavic, Spanish  
   b. History  
   c. Art History, Drama, Music  
   d. Humanities, Philosophy, Religious Studies. Certain humanities courses may fulfill requirements within other categories.

4. two courses in a second category from the above list  
5. one course in a third category from the above list.

Students doing the Medieval Studies concentration for the Humanities major should use these requirements as guidelines for developing their program of study.

In addition to the ten courses, a language proficiency equal to two years of college-level study is suggested in Latin or one of the following: French, German, Italian, or Spanish.

The Medieval Studies Writing in theMajor (WIM) requirement can be fulfilled in one of three ways:  
1. through a course designated as WIM by a department contributing to the Medieval Studies major  
2. through a paper in a Medieval Studies course  
3. through an independent paper with a member of the Medieval Studies faculty

Check with the program office regarding requirements for each of these options.

Courses used to satisfy Medieval Studies major requirements must be taken for a letter grade.

**OPTIONAL COURSES**

Students may choose courses from the following list to complete the 60-unit major requirement:

ARTHIST 105/205. Introduction to Medieval Art

ARTHIST 106A. Art of Pilgrimage and Crusade

ARTHIST 206. Virginity and Power: Mary in the Middle Ages

ECON 228. Institutions and Organizations in Historical Perspectives

ENGLISH 104C. Arthurian Literature and Medieval Romance

ENGLISH 184C. Texts in History: Medieval to Early Modern

FRENCH 204. Songs of Love and War: Gender Crusade, Politics

FRENCH 233. Afterlife of the Middle Ages

GER 138A/138. Introduction to Germanic Languages

GER 50N. Charlemagne’s Germany

GERLIT 257. Gothic

HISTORY 14N. Crusades

HISTORY 110A. Europe from Late Antiquity to 1500

HISTORY 133A. Yorkist and Tudor England

HISTORY 135/335. History of European Law, Medieval to Contemporary

HISTORY 182. Medieval Islamic History, 600-1500 (not given 2009-10)

HISTORY 182C. From Prophet to Empire: The Making of the Muslim Middle East, 600-1500

HISTORY 211/311. Body, Gender, and Society in Medieval Europe

HISTORY 211B. Jews under Islam and Christianity in the Middle Ages
HISTORY 212/312. Holy Wars: Medieval Perspectives (not given 2009-10)
HISTORY 217A/317A. Poverty and Charity in Medieval Christianity, Judaism, and Islam
HISTORY 217B/317B. Land of Three Religions: Medieval Spain
HISTORY 218A. Barcelona to Berlin: Muslim Minorities in History
ITALLIT 127. Inventing Italian Literature: Dante, Boccaccio and Petrarcha
LAW 586. Classical Islamic Law (same as RELIGST 201/301; not given 2009-10)
MUSIC 40. Music History to 1600
MUSIC 140/240. Studies in Medieval Music (not given 2009-10)
MUSIC 301A. Analysis of Music: Modal
PHIL 101. Introduction to Medieval Philosophy
PHIL 115/215. Problems of Medieval Philosophy
RELIGST 27. Exploring Islam
RELIGST 84. Mystics, Pilgrims, Monks, and Scholars: Religious Devotion in Medieval Christianity (not given 2009-10)
RELIGST 101. Who Is Allah?
RELIGST 172. Sex, Body, and Gender in Medieval Religion (not given 2009-10)
RELIGST 222. Literature and Society in Medieval Islam (not given 2009-10)
RELIGST 222B. Sufism
RELIGST 224B. Unveiling the Sacred: Explorations in Islamic Religious Imagination
RELIGST 227/327. The Qur’an (not given 2009-10)
RELIGST 226/326. Philosophy and Kabbalah in Jewish Society: Middle Ages and Early Modern Period (not given 2009-10)
RELIGST 258/358. Japanese Buddhist Texts
SPANLIT 157. Introduction to Medieval and Early Modern Iberian Literatures (Same as PORTLIT 157)

MINOR IN MEDIEVAL STUDIES

An undergraduate minor in Medieval Studies is available through the program. Students interested in completing the minor should inquire about enrollment procedures at the program office.

Requirements are as follows:

1. Language: in addition to the University foreign language requirement, at least a one quarter course in a classical and/or medieval vernacular language is recommended, which may count as one of the five required courses for the minor listed under item 2b.

2. The minor consists of six courses, which include:
   a. MEDITLST 165, Crusades: Interdisciplinary Approaches (core course). If 165 is not offered in a given year, students may petition to take a substitute course if necessary. Petitions should be directed to the Director of Medieval Studies.
   b. an additional five courses dealing directly with the Middle Ages. If the student’s major department or program offers medieval courses, he/she should take two of them for the Medieval Studies minor, but those courses may not also count for the major. At least three courses must be taken outside the student’s major, selected from two or more of the following categories:
      1. Language and Literature
      2. History
      3. Art History, Drama, Music
      4. Humanities, Philosophy, Religious Studies
      5. From among the Medieval Studies faculty, the student chooses an adviser who assists in the selection of courses and the design of the program.

Courses applied to the minor in Medieval Studies must be taken for a letter grade. Courses applied to the minor cannot also be applied to a student’s major or another minor.

MODERN THOUGHT AND LITERATURE

Director: Ursula K. Heise
Committee in Charge (Chair) Ursula K. Heise, Scott Bukatman, Joshua Cohen, Shelley Fisher Fishkin, Hans U. Gumbrecht (on leave), Sean Hanretta, Andrea A. Lunsford, Saikat Majumdar, Robert McGinn, Paula Moya, Helen Stacy, Fred Turner
Affiliated Faculty: Lanier Anderson (Philosophy), Shahzad Bashir (Religious Studies), Scott Bukatman (Art and Art History), Eamonn Callan (Education), Joshua Cohen (Political Science, Philosophy, Law), Jean-Pierre Dupuy (French and Italian), Paulla Ebron (Anthropology), Dan Edelstein (French and Italian), Harry Elam (Drama), Michele Elam (English), Amir Eshel (German Studies), Shelley Fisher Fishkin (English), James Ferguson (Anthropology), Gregory Freidin (Slavic Languages and Literatures), Theodore Glasser (Communication), Roland Greene (English, Comparative Literature), Hans U. Gumbrecht (French and Italian, Comparative Literature), Sean Hanretta (History), Ursula K. Heise (English), Matthew Kohrman (Anthropology), Joshua Landy (French and Italian), Helen Longino (Philosophy), Andrea A. Lunsford (English), Saikat Majumdar (English), Liisa Malkki (Anthropology), Barbara Martinez-Ruiz (Art and Art History), Robert McGinn (Management Science and Engineering; Science, Technology, and Society), Franco Moretti (English, Comparative Literature), Paula Moya (English), Elisabeth Mudimbe-Boyti (French and Italian), David Palumbo-Liu (Comparative Literature), Arnold Rampersad (English), Richard Roberts (History), Ramón Saldivar (English, Comparative Literature), Priya Satia (History), Debra Satz (Philosophy), Londa Schiebinger (History), Stephen Sohn (English), Helen Stacy (Law), Fred Turner (Communication), Richard White (History), Bryan Wolf (Art and Art History), Alex Woloch (English), Sylvia Yanagisako (Anthropology), Yvonne Yarbro-Bejarano (Iberian and Latin American Cultures)

Program Offices: Building 460, Room 216
Mail Code: 94305-2022
Phone: (650) 723-3413
Email: monica.moore@stanford.edu
Web Site: http://www.stanford.edu/dept/MTL

Courses offered by the Program in Modern Thought and Literature are listed under the subject code MTL on the Stanford Bulletin’s ExploreCourses web site. The program in Modern Thought and Literature admits students for the Ph.D. and a limited number for a coterminal B.A./M.A. Program.

UNDERGRADUATE PROGRAMS IN MODERN THOUGHT AND LITERATURE

Although Modern Thought and Literature has no formal undergraduate degree granting program, undergraduates interested in completing a major in this field may do so through the Individually Designed Majors Program. Students interested in this option should consult the Director of the Program in Modern Thought and Literature, in addition to the Dean’s Office in the School of Humanities and Sciences, which administers the IDM Programs.

GRADUATE PROGRAMS IN MODERN THOUGHT AND LITERATURE

Modern Thought and Literature (MTL) is an interdisciplinary graduate program advancing the study of critical issues in the modern world. Since 1971, MTL students have helped to redefine the cutting edge of many interdisciplinary fields and to reshape the ways in which disciplinary scholarship is understood and practiced. MTL graduates are leaders in fields such as American studies, ethnic studies, film studies, social and cultural studies, and...
women’s studies, as well as disciplines such as English, cultural anthropology, and comparative literature.

The program trains students to understand the histories and methods of disciplines and to test their assumptions. It considers how disciplines shape knowledge and, most importantly, how interdisciplinary methods reshape objects of study. MTL students produce innovative analyses of diverse texts, forms, and practices, including those of literature, history, philosophy, anthropology, law, and science; film, visual arts, popular culture, and performance; and material culture and technology.

Each student constructs a unique program of study suited to his or her research. Students have focused on such areas as gender and sexuality; race and ethnicity; science, technology, and medicine; media and performance; legal studies; and critical and social theory. The program’s faculty is drawn from fields of the humanities and social sciences, as well as from education, law, and medicine. As interdisciplinary study is impossible without an understanding of the disciplines under consideration, each student is expected to master the methods of one discipline and to gain a foundation in a second field.

MASTER OF ARTS

The Master of Arts is available to students who are admitted to the doctoral program. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D. who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an M.A. in Modern Thought and Literature.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

Each year, one or two undergraduates who are exceptionally well prepared in literature and at least one foreign language and whose undergraduate course work includes a strong interdisciplinary component, may petition to be admitted to the program for the purpose of completing a coterminal M.A. degree. Admission to this program is granted only on condition that in the course of working on their master’s degrees they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is early February.

To apply, applicants submit:

1. An unofficial grade transcript from Axess.
2. A Petition for Admission to the Coterminal Program from the Registrar’s Office.
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. A plan of study listing, quarter by quarter, each course by name, units, and instructor, to be taken in order to fulfill the requirements for the degree for a total of 45 units, including at least 20 units of advanced work in literature, and at least 20 units in a coherent interdisciplinary program of courses taken in non-literature departments.
5. A writing sample of critical or analytical prose.
6. Two letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

REQUIREMENTS

The candidate for the M.A. must complete at least 45 units of graduate work, to be divided in the following manner:

1. One of the two introductory seminars, MTL 334A, Concepts of Modernity 1, or 334B, Concepts of Modernity 2, 5 units.
2. At least 20 units of advanced course work in literature, to be approved by the director.
3. At least 20 units of course work in a coherent and individually arranged interdisciplinary program, to be approved by the director.

By the end of the course of study, each candidate must also demonstrate a reading knowledge of at least one foreign language.

DOCTOR OF PHILOSOPHY IN MODERN THOUGHT AND LITERATURE

University requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin. A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

1. MTL 334A,B, Concepts of Modernity 1 and 2 (5 units each).
2. MTL 299, Edgework: New Directions in the Study of Culture (2 units, Spring Quarter), required of all first-year students.
3. A coherent program of eight courses of advanced work in literary studies to be worked out with the adviser, of which at least six must be regularly scheduled courses in literature. Courses in the teaching of composition (ENGLISH 396, 397), ad hoc graduate seminars (MTL 395), research courses (MTL 398), and thesis registration (MTL 802) may not be counted among these six courses; MTL 396L, 397, 399, 802 may not be counted toward these requirements under any circumstances.
4. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdepartmental concentration, typically consisting of six courses. Departmental minors are available from the departments of Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, and Sociology (see the relevant information in those sections of this bulletin). Approved interdepartmental concentrations have been established in popular culture, ethnic studies, feminist and gender studies, and science and technology studies (specific course requirements are available from the program office). Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with each student’s academic adviser. Course restrictions noted above in item 2 also apply.
5. Qualifying Paper: this certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. The qualifying paper must be a substantial revision of a seminar paper written at Stanford during the first year and should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge. Qualifying papers must be submitted to the program office no later than the end of the third week of the fifth quarter of enrollment, normally, winter of the second year.
6. Teaching, an essential part of the program, is normally undertaken in conjunction with the Department of English. Candidates are required to demonstrate competence in teaching.
7. Students must demonstrate, by the end of the third quarter of the first year, a reading knowledge of one foreign language and, by the beginning of the first quarter of the third year, a reading knowledge of one other foreign language. Reading
knowledge means the ability to make a genuine scholarly use of the language; that is, to read prose of ordinary difficulty. Students may not take the University examination before completion of the foreign language requirement.

8. Candidacy: at the end of the second year, students apply for candidacy. The following qualifications are required before candidacy can be certified: the earlier submission of a satisfactory qualifying paper; demonstration of a reading knowledge of one foreign language; satisfactory progress in course work; a list of courses applicable to the degree, distinguishing between courses appropriate to the literary component and courses appropriate to the interdisciplinary component; designation of a departmental minor or an interdisciplinary concentration; and the submission of a statement outlining the scope and coherence of the interdisciplinary component of the program in relation to the literary component, and noting the relevance of the course work to that program.

9. Annual Review: the program and progress of each student must be approved by the Committee in Charge at the end of each academic year.

10. University Oral Examination: this examination, covering the student’s areas of concentration, normally is taken in the third year of graduate study. It is a two-hour oral examination administered by a faculty committee consisting of five members, including a chair from another department.

The examination is based on a substantial reading list prepared by the student in consultation with the faculty committee and designed to cover the areas of expertise pertinent to the student’s dissertation project.

11. Colloquium on the Dissertation Proposal: sometime after the University oral examination, or in conjunction with that examination, the dissertation committee assembles for up to one hour to discuss the dissertation proposal with the student. Prior to this meeting, the student should have consulted each member of the committee to discuss the proposal and compile a bibliography.

12. Dissertation: the fourth and fifth years are devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee on Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies.

PH.D. IN MODERN THOUGHT AND LITERATURE AND HUMANITIES

The program participates in the Graduate Program in Humanities leading to a Ph.D. degree in Modern Thought and Literature and Humanities. This option is available only to students already enrolled in the program. The Graduate Program in Humanities is no longer accepting new students.

MUSIC

Chair: Stephen M. Sano
Professors: Jonathan Berger, Karol Berger, Chris Chafe, Brian Ferneyhough, Thomas Grey, Stephen Hinton, Julius O. Smith (on leave Autumn)
Associate Professors: Mark Applebaum, Heather Hadlock, William P. Mahrt
Assistant Professors: Jaroslaw Kapuscinski, Jesse Rodin, Ge Wang
Professor (Teaching): George Barth (Piano)
Associate Professor (Teaching): Stephen M. Sano (Director of Choral Studies)
Associate Professor (Performance): Jindong Cai (Director of Orchestral Studies)
Course: Professor: Paul DeMarinis
Senior Lecturers: Giancarlo Aquilanti (Director of Theory; Wind Ensemble), Stephen Harrison (Violoncello), Thomas Schultz (Piano), Gregory A. Wait (Voice; Director of Vocal Studies), Frederick R. Weldy (Piano)
Lecturers: Kumaran Arul (Piano), Fredrick Berry (Jazz Ensemble), Talya Berger (Theo)., Mark Brandenburg (Clarinet), Marjorie Chauvel (Harp), Tony Clements (Tuba), Laura Dahl (Resident Collaborative Pianist), Anthony Doheny (Violin), John Dornenburg (Viola da Gamba), Charles A. Ferguson (Guitar), Debra Fong (Violin), Claire Giovannetti (Voice), Dawn Harms (Violin, Viola), Alexandra Hawley (Flute), David Henderson (Classical Saxophone), Melody Holmes (Flute), Robert Hubbard (Oboe), Joyce Johnson-Hamilton (Trumpet), Jay Kadis (Audio Recording), McDowell Kenley (Trombone), Mary Lindsey (Voice), Murray Low (Jazz Piano), Janet Maestre (Flute), Anthony Martin (Baroque Violin), James Matheson (Oboe), Charles McCarthy (Jazz Saxophone), Robert Huw Morgan (University Organist, Organ), Bruce Moyer (Contrabass), Herbert Myers (Early Winds), James Nadel (Jazz), Rufus Olivier (Bassoon), Larry S. Ragent (French Horn), Amy Schneider (Voice), Robin Sharp (Violin), Jerome Simas (Clarinet), Livia Sohn (Violin), Elaine Thornburgh (Harpischord), Erik Ulman (Composition, Theory), Linda Uyechi (Taiiko), Mark Veregge (Percussion), Sharon Wei (Viola), John Worley (Jazz Trumpet), Hui (Daisy) You (Guzheng), Timothy Zerlang (University Choral, Piano)
Consulting Professors: Jonathan Abel (CCRMA), David Berners (CCRMA), Marina Bosi-Goldberg (CCRMA), Walter Hewlett (Computer-Assisted Research in the Humanities), Eleanor Selfridge-Field (Computer-Assisted Research in the Humanities), Malcolm Slaney (CCRMA)
Visiting Professor: Thomas Rossing (CCRMA)
Acting Assistant Professor: Charles Kronengold
Artists-in-Residence (St. Lawrence String Quartet): Geoff Nuttall (Violin), Scott St. John (Violin), Lesley Robertson (Viola), Christopher Costanza (Violincello)
Mellon Fellow: Shana Goldin-Perschbacher (Music History)
Department Offices: Braun Music Center, Room 101
Mail Code: 94305-3076
Phone: (650) 723-3811
Email: musicdept@stanford.edu
Web Site: http://music.stanford.edu

Courses offered by the Department of Music are listed under the subject code MUSIC on the Stanford Bulletin’s Explore Courses web site.
MISSION OF THE DEPARTMENT OF MUSIC

The Department of Music’s aims are to provide specialized training for those who plan careers in music as composers, performers, teachers, and research scholars, and to promote the understanding and enjoyment of music in the University at large through its courses and performance offerings.

BACHELOR OF ARTS IN MUSIC

The undergraduate major in Music is built around a series of foundation courses in theory, musicianship, and music history, in addition to performance and the proficiency requirements outlined below. Majors must complete a minimum of 66 units within the department. All required courses for the B.A. in any concentration must be taken for a letter grade. Electives may be taken credit/no credit, but any courses taken towards concentration requirements must carry a letter grade.

SUGGESTED PREPARATION FOR THE MAJOR

Because of the sequence of courses, it takes more than two years to complete the requirements for the major. Students are required to meet with the undergraduate student services officer in the department prior to declaring the major. It is recommended that prospective majors schedule this consultation with the undergraduate student services officer as early as possible in their careers in order to plan a program that allows sufficient time for major course work, practice, and University requirements outside the major. Early planning is especially important for students wishing to double-major, for those contemplating overseas study during their undergraduate years, for those wishing to do an in-depth concentration in the Music major, and for those with particular musical talents and interests. It is recommended that music majors complete MUSIC 21, 22, and 23 in the freshman year; the series should be completed by Autumn Quarter of the junior year. It is recommended that music majors complete MUSIC 40, 41, and 42 in the sophomore year: The series should be completed by the end of the junior year.

Suggested Preparatory Course—MUSIC 19. Introduction to Music Theory

FIELDS OF STUDY OR DEGREE OPTIONS

Concentrations are offered in: performance; conducting; composition; history and theory; or music, science, and technology. Each of these concentration areas is declarable in Axess as a sub-plan. Specific guidelines and information on the concentration tracks are available from the Department of Music office and students are urged to select this option no later than the middle of their junior year in order to complete all of the requirements in a timely manner.

DEGREE REQUIREMENTS

In conjunction with the undergraduate student services officer, the student is assigned a departmental adviser with whom the student is required to meet at least once each quarter. Total units and courses required to graduate for each concentration are specified in the relevant section following.

Required Courses—The following courses are required of all majors.

1. Theory—
   MUSIC 21. Elements of Music I (4 units)
   MUSIC 22. Elements of Music II (4 units)
   MUSIC 23. Elements of Music III (4 units)
2. History—
   MUSIC 40. Music History to 1600 (4 units)
   MUSIC 41. Music History 1600-1830 (4 units)
   MUSIC 42. Music History Since 1830 (4 units)
3. Analysis—
   MUSIC 121. Analysis of Tonal Music (4 units)
   and two at the 4-unit level, from:
   MUSIC 122A. Renaissance and Baroque Counterpoint
   MUSIC 122B. Harmonic Materials of the 19th Century
   MUSIC 122C. Introduction to 20th-Century Composition

4. Writing in the Major (WIM)—Three (at least two at the 4-unit level) from:
   MUSIC 140. Studies in Medieval Music
   MUSIC 141. Studies in Renaissance Music
   MUSIC 142. Studies in Baroque Music
   MUSIC 143. Studies in Classical Music
   MUSIC 144. Studies in Romantic Music
   MUSIC 145. Studies in Modern Music
   MUSIC 146. Music and Urban Film
   MUSIC 147. The Soul Tradition in African American Music
   MUSIC 148. Musical Shakespeare: Theater, Song, Opera, and Film

5. Applied—
   a. minimum five quarters totaling 15 units of private instruction in instrumental or vocal performance (MUSIC 172/272-177/277); students who do not qualify for private instruction at the intermediate or advanced level, but who wish to pursue the major may take introductory voice (MUSIC 65 and 73), piano (MUSIC 12 and 72A), or guitar (MUSIC 74C) to reach the minimum proficiency levels required to be accepted into a private studio and then complete their 5 quarters. Requirements for the minimum levels of proficiency in each instrument for private instruction are posted at:
   b. minimum five quarters totaling at least 5 units of work in one or more of the department’s organizations or chamber groups. To fulfill the ensemble requirement, Music majors need at least three quarters of participation in the department’s traditional large ensembles (MUSIC 159–167), with the exception of students whose primary instrument is harp, keyboard, or guitar, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music (MUSIC 171). MUSIC 181 and MUSIC 156 may count for up to two of the ensemble-unit requirements for the Music major.

Note—MUSIC 128, Composition, Coding, and Performance with SLOrk; MUSIC 157, Mariachi Band; MUSIC 158, Soundwire Ensemble; MUSIC 160A, Stanford Philharmonia Orchestra; MUSIC 160B, Stanford New Ensemble; MUSIC 161C, Red Vest Band; and MUSIC 161D, Stanford Brass Ensemble do not satisfy this requirement.

6. Additional requirements—
   a. Majors are required to pass a Piano Proficiency examination as part of the music theory core (MUSIC 21, 22, 23). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the Piano Proficiency examination are required to enroll in MUSIC 12 concurrently with the music theory core until they are able to pass the examination. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight-reading, and the performance of prepared pieces. Information regarding the proficiency examination may be downloaded at:
      http://music.stanford.edu/private/downloads/PIANO%20PROFICIENCY%20EXAM.doc
   b. Majors must also pass an ear-training proficiency examination, which is one of the requirements to complete MUSIC 23. It may be taken by arrangement and demonstrates a student’s ability to hear music accurately and to perform it at sight.
7. Electives—
I. Concentration in Performance—In addition to degree requirements of majors listed above, students in the Performance concentration must:
1. complete at least 6 additional, graded course units in performance. Acceptable courses are described under "Applied" in the section describing private instruction and ensemble course work above. Additional courses might include, but are not limited to:
   - MUSIC 126. Introduction to Thoroughbass
   - MUSIC 154. Composition and Performance of Instrumental Music with Electronics
   - MUSIC 182. Diction for Singers
   - MUSIC 183. Art Song Interpretation
   - MUSIC 269. Research in Performance Practices
1. register for an independent project (MUSIC 198, 4 units) in the senior year under faculty supervision, leading to a senior recital.

II. Concentration in Conducting—In addition to degree requirements of majors listed above, students in the Conducting concentration must:
1. complete at least 6 additional, graded course units in conducting. Additional courses might include, but are not limited to:
   - MUSIC 127. Instrumentation and Orchestration
   - MUSIC 130. Elementary Conducting
   - MUSIC 230. Advanced Orchestral Conducting
   - MUSIC 231. Advanced Choral Conducting
1. register for an independent project (MUSIC 198, 4 units) in the senior year under faculty supervision, leading to a senior conducting project.

III. Concentration in Composition—In addition to degree requirements of majors listed above, students in the Composition concentration must:
1. complete at least 6 additional, graded course units in composition. Additional courses might include, but are not limited to:
   - MUSIC 123. Undergraduate Seminar in Composition
   - MUSIC 125. Individual Undergraduate Projects in Composition
   - MUSIC 127. Instrumentation and Orchestration
   - MUSIC 150. Musical Acoustics
   - MUSIC 154. Composition and Performance of Instrumental Music with Electronics
   - MUSIC 220A, B, or C—any of the series in computer-generated sound, music, and composition
   - register for an independent project (MUSIC 198, 4 units) in the senior year under faculty supervision, leading to a composition.

IV. Concentration in History and Theory—In addition to degree requirements of majors listed above, students in the History and Theory concentration must:
1. complete at least 6 additional, graded course units in history and theory. Additional courses might include, but are not limited to:
   - MUSIC 122A, B, or C—any course not taken in fulfillment of the major requirement
   - MUSIC 140-149/240-249, 251—any courses not taken in fulfillment of the major requirement
   - MUSIC 221. Topics in the History of Theory
   - MUSIC 220A, B, or C—any of the series in computer-generated sound, music, and composition
1. register for an independent project (MUSIC 198, 4 units) in the senior year under faculty supervision, leading to a senior research paper.

V. Concentration in Music, Science, and Technology—Requires completion of 66 units of course work that differs from that of the major and is delineated below. This field of study is designed for those students interested in the musical ramifications of rapidly evolving computer technology and digital audio, and in the acoustic and psychoacoustic foundations of music. This program can serve as a complementary major to students in the sciences and engineering. Students in the program are required to include the following courses in their studies:
1. Theory and Analysis—
   - MUSIC 21. Elements of Music I (4 units)
   - MUSIC 22. Elements of Music II (4 units)
   - MUSIC 23. Elements of Music III (4 units)
1. Theory (includes passing the piano and ear-training proficiency examinations, as described for the major)
   - MUSIC 121. Analysis of Tonal Music (4 units)
   - MUSIC 150. Musical Acoustics (3 units)
   - MUSIC 251. Psychophysics and Music Cognition (WIM) (4 units)
   - MUSIC 220A. Fundamentals of Computer-Generated Sound (4 units)
   - MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing (4 units)
   - MUSIC 220C. Research Seminar in Computer-Generated Music (4 units)
   - MUSIC 220D. Research in Computer-Generated Music (4 units)
   - MUSIC 250A. Human-Computer Interface Theory and Practice (4 units)
1. History—
   a. Individual studies in performance, MUSIC 171/272-177/277, (6 units), or MUSIC 192A, Foundations of Sound Recording Technology and MUSIC 192B, Advanced Sound-Recording Technology (3 units each).
   b. Ensemble as described above for the major (3 units) or MUSIC 192C. Session Recording (5 units)
2. History—Two at the 4-unit level from:
   - MUSIC 40. Music History to 1600
   - MUSIC 41. Music History 1600–1830
   - MUSIC 42. Music History Since 1830
1. The program requires a senior research project (4 units) completed under faculty guidance. May be completed in conjunction with enrollment in any of the following: MUSIC 220D; MUSIC 199; MUSIC 198.

HONORS PROGRAM
Honors in Music are awarded by the faculty to concentrators who have produced an independent project of exceptional quality and meet certain departmental standards in musicianship, scholarship, and academic standing. The conferral of honors is done solely through faculty consultation. Students do not petition for honors.

OVERSEAS STUDY OR STUDY ABROAD
Courses in Music are often available at Stanford overseas programs, especially in Berlin, Paris, Florence, and Oxford. See the "Overseas Studies Program" section of this bulletin for this year's listings. Music majors and minors should talk to the Department of Music undergraduate administrator prior to going overseas.

MINOR IN MUSIC
Minors in Music and in Music, Science, and Technology provide the student with a core of essential Music courses in the disciplines that establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it.

Requirements—Total of 36 units required course work as delineated below. Students in either minor must also pass the piano and ear-training proficiency examinations required of Music majors.

Required Courses for the Minor in Music—
1. Theory—
   - MUSIC 21. Elements of Music I (4 units)
   - MUSIC 22. Elements of Music II (4 units)
   - MUSIC 23. Elements of Music III (4 units)
2. History—
   - MUSIC 40. Music History to 1600 (4 units)
   - MUSIC 41. Music History 1600–1830 (4 units)
three quarters); 3 units total

MUSIC 42. Music History Since 1830 (4 units)

3. Applied (two quarters)—
MUSIC 159-171. Ensemble (2 units, total)
MUSIC 172-177. Individual Instruction (6 units, total)

4. Choice of one (WIM)—
MUSIC 140-149, 190H, 251 (4 units)

Required Courses for the Minor in Music, Science, and Technology—

1. Theory—
MUSIC 21. Elements of Music I (4 units)
MUSIC 22. Elements of Music II (4 units)
MUSIC 23. Elements of Music III (4 units)
MUSIC 150. Musical Acoustics (3 units)
MUSIC 251. Psychophysics and Music Cognition (WIM) (4 units)
MUSIC 220A. Fundamentals of Computer-Generated Sound (4 units)
MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing (4 units)

2. Applied—
MUSIC 192A. Foundations of Sound-Recording Technology (3 units)
MUSIC 192B. Advanced Sound-Recording Technology (3 units)

MUSIC 192C. Session Recording (two quarters; 3 units total)

MASTER OF ARTS IN MUSIC

University requirements for the M.A. are described in the "Graduate Degrees" section of this bulletin.

None of Stanford’s required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of ‘A,’ ‘B,’ or ‘Satisfactory’ (a passing grade in an instructor-mandated credit/no credit course) in Music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

ADMISSION

Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers) when they complete the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 15 application deadline. All components of the application are due by December 15. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see http://gradadmissions.stanford.edu).

FIELDS OF STUDY OR DEGREE OPTIONS

All of the above fields of study are declarable as subplans in Axess:
Master of Arts degree (M.A.)—in Composition.
Master of Arts degree (M.A.)—in Music History.
Master of Arts degree (M.A.)—in Computer-Based Music Theory and Acoustics.
Master of Arts degree (M.A.)—in Music, Science, and Technology (M.A./M.S.T.) Note: The MA/MST program is the only terminal master’s degree; it is one year in duration and consists only of course work.

DEGREE REQUIREMENTS

A minimum of 45 academic units is required for the master’s degree in Music. The Department of Music does not accept students for study only towards the M.A. degree except in the Music, Science, and Technology program, described below.

Required Courses—

1. Composition—Students are not admitted into the M.A. as a terminal degree for composition; rather, students in the D.M.A. program in composition who enter directly from the bachelor’s level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in composition.

II. Music History—Students are not admitted into the M.A. as a terminal degree for music history; rather, students in the Ph.D. program in musicology who enter directly from the bachelor’s level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in music history.

III. Computer-Based Music Theory and Acoustics—Students are not admitted into the M.A. as a terminal degree for computer-based music theory and acoustics: rather, students in the Ph.D. program in computer-based music theory and acoustics who enter directly from the bachelor’s level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in computer-based music theory and acoustics.

IV. Music, Science, and Technology—The M.A. in music, science, and technology is the department’s only terminal master’s degree. This is a one-year program of 45 units focusing on the integration of music perception, music-related signal processing and controllers, and synthesis. The program is designed for students who have an undergraduate engineering or science degree or a degree that includes course work in engineering mathematics. In addition to degree requirements required of all students listed above, students must complete at least 39 units of approved course work. Modifications to the required course work listed below may be proposed on a student’s behalf by the student’s program advisor.

1. Required:
   MUSIC 154. Composition and Performance of Instrumental Music with Electronics (3 units)
   MUSIC 192A. Foundations of Sound-Recording Technology (3 units)
   MUSIC 192B. Advanced Sound-Recording Technology (3 units)
   MUSIC 220A. Fundamentals of Computer-Generated Sound (4 units)
   MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing (4 units)
   MUSIC 220C. Research Seminar in Computer-Generated Music (4 units)
   MUSIC 250A. Human-Computer Interface Theory and Practice (4 units)
   MUSIC 320. Introduction to Digital Audio Signal Processing (4 units)
   MUSIC 420. Signal Processing Models in Musical Acoustics (3 units)
   MUSIC 421. Audio Applications of the Fast Fourier Transform (3 units)

2. Electives: students are required to complete an additional 6 units of graduate level work that may be taken outside the department.

DOCTOR OF MUSICAL ARTS (D.M.A.) AND DOCTOR OF PHILOSOPHY (PH.D.) IN MUSIC

University requirements for the D.M.A and Ph.D. are described in the "Graduate Degrees" section of this bulletin. The following statements apply to all the graduate degrees described below, unless otherwise indicated.

Department Examinations—All entering doctoral graduate students are required to take: (1) a diagnostic examination testing the student in theory (counterpoint, harmony, and analysis) and (for musicologists only) the history of Western art music; and, (2) a proficiency examination in sight-singing and piano sight-reading. These exams are given at the beginning of study in the department (usually the week before school begins). Teaching Assistant assignments and the funding associated with this portion of a graduate student’s financial aid package are determined based upon successful completion of these exams.
None of Stanford’s required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of ‘A’, ‘B’, or ‘Satisfactory’ (a passing grade in an instructor-mandated credit/no credit course) in music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

The following may be taken as electives for graduate credit:

a. any course in another department numbered 100 or over (with adviser’s consent)
b. any course in the Music department numbered 100 or over except those required for the B.A. degree. A letter grade of ‘A’, ‘B’, or ‘S’ (in an instructor-mandated pass/fail course) is required.

ADMISSION

Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers, according to the proposed field of concentration) when they complete the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 15 application deadline. All components of the application are due by December 15. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see http://gradadmissions.stanford.edu).

FIELDS OF STUDY OR DEGREE OPTIONS

All of the following fields of study are declarable as subplans in Axess:

1. Doctor of Musical Arts degree (D.M.A.) in Composition—The D.M.A. is offered to a limited number of students who demonstrate substantial training in the field and high promise of attainment as composers. Students may work in traditional and/or electronic forms. Breadth is given through studies in other branches of music and in relevant studies outside music as seems desirable. The final project for this degree is a large-scale composition.

2. Doctor of Philosophy degree (Ph.D.) in Musicology

   Doctor of Philosophy degree (Ph.D.) in Computer-Based Music Theory and Acoustics—The Ph.D. is offered in areas of the research of Stanford’s Graduate faculty: Musicology, including specialties in musical aesthetics, history of music theory, and performance practice; and Computer-Based Music Theory and Acoustics (CBMTA), specializing in research in musical acoustics at the Center for Computer Research in Music and Acoustics (CCRMA). The department seeks students who demonstrate substantial scholarship, high promise of attainment, and the ability to do independent investigation and present the results of such research in a dissertation.

DEGREE REQUIREMENTS

Residence—The candidate must complete a minimum of 135 academic units (see Residency under the “Graduate Degrees” section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate Registration (TGR), after they have reached the required 135 academic units and have completed their Special Area examinations.

Qualifying Examination—A written and oral examination for admission to candidacy is given just prior to the fourth quarter of residence. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 15 application deadline. All components of the application are due by December 15. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see http://gradadmissions.stanford.edu).

Teaching—All students in the Ph.D. or D.M.A. degree programs, regardless of sources of financial support, are required to complete six quarters of supervised teaching at half time. Music 280 (given in Spring Quarter and taken at the end of the first year) is a required course for Teaching Assistants. Additional quarters of teaching may be required by the department.

Required Courses—

MUSIC 200. Graduate Proseminar (4 units)—required of all composition and computer-based music theory and acoustics students entering directly from the bachelor’s degree and of all students in musicology, regardless of entering degree level.

MUSIC 280. TA Training (1 unit)

MUSIC 301A. Analysis of Music: Modal (4 units)

MUSIC 301B. Analysis of Music: Tonal (4 units)

MUSIC 301C. Analysis of Music: Post-Tonal (4 units)

1. Composition—The Doctor of Musical Arts (D.M.A.) degree in Composition is given breadth through collateral studies in other branches of music and in relevant studies outside music as seems desirable. In addition to degree requirements required of all doctoral graduate students and listed above, students must complete at least 24 units of:

   1. MUSIC 323. Doctoral Seminar in Composition

   2. Besides those requirements listed above, candidates are expected to produce a number of works demonstrating their ability to compose in a variety of forms and for the common media: vocal, instrumental, and electronic music. If possible, the works submitted are presented in public performance prepared by the composer. Annual progress is reviewed by the composition faculty with a major portfolio review conducted at the conclusion of the second year.

   3. Foreign Language Requirement—At the time of advancement to candidacy, all D.M.A. students are required to have demonstrated a reading knowledge of one language other than English and the ability to translate it into idiomatic English.

   4. Special-Area Examination—A written examination in the candidate’s field of concentration, including a final project proposal, is required to be completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year.

   5. Final Project Presentation—Required during the last quarter of residence, the purpose of the presentation is to demonstrate the ability of the candidate to organize and present the topic of the final project for public review. It should be two hours in length, treating aspects of the final project. Details regarding the D.M.A. final project presentation may be found in the Department of Music Graduate Handbook available at: http://music.stanford.edu/Academics/gradStudies.html

   6. Final Project—Candidate’s work culminates in a required Final Project. The final project in composition must be a substantial composition, the scope of which shall be agreed upon by the members of the committee. Typically, work on the final project encompasses several quarters. Usually, smaller works, for specific performances, are composed at the same time.

   7. Reading Committee—The membership of the reading committee is the principal final project adviser and a minimum of two additional members. The notice of appointment of a D.M.A. Final Project Reading Committee should be submitted to the department at the same time as the approved final project proposal and the completion of the special area exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee. Obtain the D.M.A. reading committee form from the department office; fill it out; obtain committee members’ signatures; return to the department office.

II. Musicology—In addition to degree requirements required of all doctoral graduate students and listed above, students must complete at least 42 units of approved courses including:

1. Required:

   MUSIC 221. Topics in the History of Theory (3–5 units)

   MUSIC 300A. Medieval Notation (4 units)

   MUSIC 300B. Renaissance Notation (4 units)

   MUSIC 310. Research Seminar in Musicology (24–40 units); the requirement is for eight seminars of 3–5 units each.
SCHOOL OF HUMANITIES AND SCIENCES

students may petition to take up to two graduate seminars in other departments, in consultation with their adviser.

2. Foreign Language Requirement—At the time of advancement to candidacy, all Ph.D. students in Musicology must have passed a Ph.D. Language examination in German and in a second language, chosen from French, Italian, or Latin (or, on a case-by-case basis, another language, if it has significant bearing on the candidate’s field of study). If one of these languages is the student’s native language, the student may be exempted from an examination.

3. Special-Area Examination—A written and oral examination testing the student’s knowledge of music and research in the student’s field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.

4. University Oral Examination—Taken once the dissertation is substantially under way; an oral presentation and defense of dissertation research methods and results.

5. Dissertation—After the first two years of graduate study, the student concentrates on research and writing of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.

6. Reading Committee—The minimum membership of the reading committee is 1) the principal dissertation adviser, 2) a second member from the department, and 3) a third member from the major department or another department. If a third member is from another institution, a fourth member must be appointed from the department. The principal dissertation adviser and all other members of the committee must belong to the Academic Council. The notice of appointment of a Reading Committee should be submitted to the department at the same time as the approved dissertation proposal and the completion of the Special-Area Exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee.

III. Computer-Based Music Theory and Acoustics—In addition to degree requirements required of all doctoral graduate students and listed above, students must complete at least 28 units of approved courses including:

1. Required:
   MUSIC 220A. Fundamentals of Computer-Generated Sound (4 units)
   MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing (4 units)
   MUSIC 220C. Research Seminar in Computer-Generated Music (4 units)
   MUSIC 220D. Research in Computer-Generated Music (12 units total)
   MUSIC 320. Introduction to Digital Audio Signal Processing (4 units)

2. Foreign Language Requirement—At the time of advancement to candidacy, all Ph.D. students in computer-based music theory and acoustics are required to have demonstrated a reading knowledge of one language other than English and the ability to translate it into idiomatic English.

3. Special-Area Examination—A written and oral examination testing the student’s knowledge of music and research in the student’s field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.

4. University Oral Examination—Taken once the dissertation is substantially under way; an oral presentation and defense of dissertation research methods and results.

5. Dissertation—After the first two years of graduate study, the student concentrates on research and writing of the disserta-
Although it may appear to be an assortment of different disciplines, there are features common to all philosophical inquiry. These include an emphasis on methods of reasoning and the way in which judgments are formed, on criticizing and organizing beliefs, and on the nature and role of fundamental concepts.

Students of almost any discipline can find something in philosophy which is relevant to their own specialties. In the sciences, it provides a framework within which the foundations and scope of a scientific theory can be studied, and it may even suggest directions for future development. Since philosophical ideas have had an important influence on human endeavors of all kinds, including artistic, political, and economic, students of the humanities should find their understanding deepened by acquaintance with philosophy.

Philosophy is an excellent major for those planning a career in law, medicine, or business. It provides analytical skills and a breadth of perspective helpful to those called upon to make decisions about their own conduct and the welfare of others. Philosophy majors who have carefully planned their undergraduate program have an excellent record of admission to professional and graduate schools.

The Special Program in the History and Philosophy of Science enables students to combine interests in science, history, and philosophy. Students interested in this program should see the special adviser.

The joint major in Philosophy and Religious Studies combines courses from both departments into a coherent theoretical pattern.

The Tanner Memorial Library of Philosophy contains an excellent working library and ideal conditions for study.

Graduate students and undergraduate majors in philosophy have formed associations for discussion of philosophical issues and the reading of papers by students, faculty, and visitors.

**BACHELOR OF ARTS IN PHILOSOPHY**

There are three ways of majoring in philosophy: the General Program, the Special Program in the History and Philosophy of Science, and the Special Option in Philosophical and Literary Thought. A student completing any of these receives a B.A. degree in Philosophy. There is also a major program offered jointly with the Department of Religious Studies. To declare a major, a student should consult with the Director of Undergraduate Study and see the undergraduate student services administrator to be assigned an adviser and work out a coherent plan. The department strongly urges proficiency in at least one foreign language.

**GENERAL PROGRAM**

1. Course requirements, minimum 55 units:
   a. preparation for the major: an introductory course (under 100) and 80. (PHIL 80 should normally be taken no later than the first quarter after declaring the major.) Students taking both quarters of the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track can count 5 units toward the introductory Philosophy requirement.
   b. the core, 24 additional Philosophy units as follows:
      1. logic: one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
      2. philosophy of science: any course from 60, 61, 156, 163-168
      3. moral and political philosophy: one from 170-173
      4. metaphysics and epistemology: one from 180-189
      5. history of philosophy: 100 and 102 are required of each major
   c. one undergraduate philosophy seminar from the 194 series.
   d. electives: courses numbered 10 or above, at least 13 units of which must be in courses numbered above 99.

2. Units for Tutorial, Directed Reading (PHIL 196, 197, 198), The Dualist (PHIL 198), Honors Seminar (PHIL 199), or affiliated courses may not be counted in the 55-unit requirement. No more than 10 units completed with grades of ‘satisfactory’ and/or ‘credit’ may be counted in the 55-unit requirement.

3. A maximum of 10 transfer units or two courses can be used for the departmental major. In general, transfer courses cannot be used to satisfy the five area requirements or the undergraduate seminar requirement. Students may not substitute transfer units for the PHIL 80 requirement.

**SPECIAL PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE**

Undergraduates may major in Philosophy with a field of study in History and Philosophy of Science. This field of study is declared on Axess. Each participating student is assigned an adviser who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

1. Three science courses (for example, biology, chemistry, physics) for 12 units.
2. The following Philosophy (PHIL) core courses must be completed with a letter grade by the end of the junior year:
   a. one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b. 60 or 61
   c. 80
3. Three history of science courses.
4. Three philosophy of science courses, of which one must be PHIL 164.
5. Three additional courses related to the major, in philosophy or history, to be agreed on by the adviser.
6. At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or The Dualist (196, 197, 198) may not be counted in the requirement. No more than 10 units completed with grades of ‘satisfactory’ and/or ‘credit’ may be counted in the requirement.
7. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring a major. Transfer courses are strictly limited when used to satisfy major requirements.

**SPECIAL OPTION IN PHILOSOPHICAL AND LITERARY THOUGHT**

Undergraduates may major in Philosophy with a special option in philosophy and literature. This option is declared to the department; it is not declared on Axess, and it does not appear on the transcript or the diploma. Students in this option take courses alongside students from other major departments which also have a specialized option associated with the program for the study of philosophical and literary thought, with administrative staff in the DLCL. Each student in this option is assigned an adviser in Philosophy, and students’ schedules and overall course of study must be approved in writing by the adviser, and the Directors of Undergraduate Studies of Philosophy and of the program.

A total of 65 units must be completed for this option, including the following requirements.

1. Core requirements for the major in Philosophy, including:
   a. an introductory course
   b. PHIL 80
   c. the core distribution requirements listed in section 1b of the general program above.
2. Gateway course in philosophy and literature (PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
3. Three courses in a single national literature, chosen by the student in consultation with the adviser and the program director of undergraduate studies. This normally involves meeting...
the language proficiency requirements of the relevant literature department.
4. Electives within Philosophy beyond the core requirements totaling at least 5 units, and drawn from courses numbered 100 or higher.
5. Two upper division courses of special relevance to the study of philosophy and literature, as identified by the committee in charge of the program. A list of approved courses is available from the program director of undergraduate studies.
6. Capstone seminar in the PHIL 194 series.
7. Capstone seminar of relevance to the study of philosophy and literature, as approved by the program committee. In some cases, with approval of the Philosophy Director of Undergraduate Study and the program director of undergraduate studies, the same course may be used to meet requirements 6 and 7 simultaneously. In any case, the student’s choice of a capstone seminar must be approved in writing by the Philosophy Director of Undergraduate Study and the program director of undergraduate studies.

Students are encouraged to consider doing honors work in a topic related to philosophy and literature through the Philosophy honors program.

The following rules also apply to the special option:
1. Units for Honors Tutorial, Directed Reading (PHIL 196, 197, 198), The Dualist (PHIL 198), Honors Seminar (PHIL 199) may not be counted toward the 65-unit requirement. No more than 10 units with a grade of ‘satisfactory’ or ‘credit’ may be counted toward the unit requirement.
2. A maximum of 15 transfer units may be counted toward the major, at most 10 of which may substitute for courses within Philosophy. Transfer credits may not substitute for PHIL 80 or 81, and are approved as substitutes for the five area requirements or PHIL 194 only in exceptional cases.
3. Courses offered in other departments may be counted toward requirements 3, 5 and 7, but such courses, including affiliated courses, do not generally count toward the other requirements. In particular, such courses may not satisfy requirement 4.
4. Units devoted to meeting the language requirement are not counted toward the 65-unit requirement.

HONORS PROGRAM

Students who wish to undertake a more intensive and extensive program of study, including seminars and independent work, are invited to apply for the honors program during Winter Quarter of the junior year. Admission is selective on the basis of demonstrat-ed ability in philosophy, including an average grade of at least 'A-' in a substantial number of philosophy courses and progress towards satisfying the requirements of the major.

With their application, candidates should submit an intended plan of study for the remainder of the junior and the senior years. It should include at least 5 units of Senior Tutorial (196) during Autumn and/or Winter Quarters of the senior year. Students who are applying to Honors College may use the same application for philosophy honors. In the quarter preceding the tutorial, students should submit an essay proposal to the Philosophy undergraduate director and determine an adviser.

Students applying for honors should enroll in Junior Honors Seminar (199) during the Spring Quarter of the junior year.

The length of the honors essay may vary considerably depending on the problem and the approach; usually it falls somewhere between 7,500 and 12,500 words. This essay may use work in previous seminars and courses as a starting point, but it cannot be the same essay that has been used, or is being used, in some other class or seminar. It must be a substantially new and different piece of work reflecting work in the tutorials.

A completed draft of the essay is submitted to the adviser at the end of the Winter Quarter of the senior year. Any further revisions must be finished by the fifth full week of the Spring Quarter, when three copies of the essay are to be given to the undergraduate secretary. The honors essay is graded by the adviser together with a second reader, chosen by the adviser in consultation with the stu-dent. The student also provides an oral defense of the thesis at a meeting with the adviser and second reader. The essay must receive a grade of ‘A’ or better for the student to receive honors. Honors tutorials represent units in addition to the 55-unit requirement.

MINOR IN PHILOSOPHY

A minor in Philosophy consists of at least 30 units of Philosophy courses satisfying the following conditions:
1. Students taking both quarters of the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track may count these courses as equivalent to a maximum of 5 units of Philosophy courses under 100.
2. At least 10 units must be from courses numbered 100 or above.
3. The 30 units must include one of:
   a. a history of philosophy course numbered 100 or above
   b. two quarters of Area I (only 5 of the 10 units can count towards 30-unit requirement)
4. One course from any of the following three areas (PHIL): a. philosophy of science and logic: 60, 61, 156, 163-168; 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b. moral and political philosophy: 20, 30, 170-172
   c. metaphysics and epistemology: 10, 80, 180-189
5. Units for tutorials, directed reading, and affiliated courses may not be counted.
6. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring. The number of transfer units is generally limited to a maximum of 10.
7. No more than 6 units completed with grades of ‘satisfactory’ or ‘credit’ count towards the 30-unit requirement.

Students must declare their intention to minor in Philosophy in a meeting with the Director of Undergraduate Study. This formal declaration must be made no later than the last day of the quarter two quarters before degree conferral. The Permission to Declare a Philosophy Minor (signed by the Director of Undergraduate Study) lists courses taken and to be taken to fulfill minor requirements. This permission is on file in the department office. Before graduation, a student’s record is checked to see that requirements have been fulfilled, and the results are reported to the University Registrar.

JOINT MAJOR IN PHILOSOPHY AND RELIGIOUS STUDIES

The joint major in Philosophy and Religious Studies consists of 60 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major or the special concentration. Affiliated courses cannot be used to satisfy this requirement.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit or credit/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

CORE REQUIREMENTS
1. Philosophy (PHIL) courses:
   a. 80
   b. 16 units, including at least one Philosophy course from each of the following areas:
      1. logic and philosophy of science: 50 (formerly 57), 60, 61, 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169), 156, 162-168
      2. ethics and value theory: 170-173
      2. epistemology, metaphysics, and philosophy of language: 180-189
      3. history of philosophy: 100-103
2. Religious Studies (RELIGST) courses: 20 units, chosen in consultation with the student’s adviser, including:
a. RELIGST 290. Theories of Religion (5 units; Winter Quarter; recommended junior year; fulfills WIM requirement)
c. diversity requirement: Students may not take all their religion courses in one religious tradition.

General Major Requirements—Five additional courses (approximately 20 units) divided between the two departments. No more than five of these units may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

Special Concentration—With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the adviser.

Directed Reading and Satisfactory/No Credit Units—Units of directed reading for fulfilling requirements of the joint major are allowed only with special permission. No more than 10 units of work with a grade of ‘satisfactory’ count toward the joint major.

HONORS PROGRAM

Students pursuing a joint major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

It is possible to earn an M.A. in Philosophy while earning a B.A. or B.S. This can usually be done by the end of the fifth undergraduate year, although a student whose degree is not in philosophy may require an additional year. Standards for admission to, and completion of, this program are the same as for M.A. applicants who already have the bachelor’s degree when matriculating. Applicants for the coterminal program are not, however, required to take the Graduate Record Exam. Information about applying is available from Graduate Admissions in the Registrar’s Office. Please see the departmental website, http://philosophy.stanford.edu/, for application deadlines.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MASTER OF ARTS IN PHILOSOPHY

University requirements for the M.A. are discussed in the “Graduate Degrees” section of this bulletin.

Three programs lead to the M.A. in Philosophy. One is a general program providing a grounding in all branches of the subject. The others provide special training in one branch.

Admissions—All prospective master’s students, including those currently enrolled in other Stanford programs, must apply for admission to the program. Please see the departmental website at http://philosophy.stanford.edu for applications deadlines. No fellowships are available. Entering students must meet with the director of the master’s program and have their adviser’s approval, in writing, of program proposals. The master’s program should not be considered a stepping stone to the doctoral program; these two programs are separate and distinct.

Unit Requirements—Each program requires a minimum of 45 units in philosophy. Students in a special program may be allowed or required to replace up to 9 units of philosophy by 9 units in the field of specialization. Although the requirements for the M.A. are designed so that a student with the equivalent of a strong undergraduate philosophy major at Stanford might complete them in one year, most students need longer. Students should also keep in mind that although 45 units is the minimum required by the University, quite often more units are necessary to complete department requirements. Up to 6 units of directed reading in philosophy may be allowed. There is no thesis requirement, but an optional master’s thesis or project, upon faculty approval, may count as the equivalent of up to 8 units. A special program may require knowledge of a foreign language. At least 45 units in courses numbered 100 or above must be completed with a grade of ‘B–’ or better at Stanford. Students are reminded of the University requirements for advanced degrees, and particularly of the fact that for the M.A., students must complete three full quarters as measured by tuition payment.

GENERAL PROGRAM

The General Program requires a minimum of 45 units in Philosophy courses numbered above 99. These courses must be taken for a letter grade, and the student must receive at least a ‘B–’ in the course. Courses taken to satisfy the undergraduate core or affiliated courses may not be counted in the 45 units. The requirement has three parts:

1. Undergraduate Core: students must have when they enter, or complete early in their program, the following undergraduate courses (students entering from other institutions should establish equivalent requirements with a master’s adviser upon arrival or earlier):
   a. Logic: 50 (formerly 57), 150 (formerly 159), or 151 (formerly 160A)
   b. Philosophy of science: any course from 60, 61, 163-167
   c. Moral and political philosophy: one from 170-173
   d. Metaphysics and epistemology: one from 80, 180-189
   e. History of philosophy: two history of philosophy courses numbered 100 or above

2. Graduate Core: Students must take at least one course numbered per 105 from three of the following areas (courses used to satisfy the undergraduate core cannot also be counted toward satisfaction of the graduate core). Cross listed and other courses taught outside the Department of Philosophy do not count towards satisfaction of the core.
   a. Logic and semantics
   b. Philosophy of science and history of science
   c. Ethics, value theory, and moral and political philosophy
   d. Metaphysics, epistemology, and philosophy of language
   e. History of philosophy
   Each master’s candidate must take at least two courses numbered above 200 (these cannot be graduate sections of undergraduate courses). One may be a graduate core seminar (360, 370, 380, 381), but no student is admitted to a core seminar before completing undergraduate requirements in the area of the seminar and securing the approval of the instructor.

3. Specialization: students must take at least three courses numbered over 105 in one of the five areas.

SPECIAL PROGRAM IN SYMBOLIC SYSTEMS

Students should have the equivalent of the Stanford undergraduate major in Symbolic Systems. Students who have a strong major in one of the basic SSP disciplines (philosophy, psychology, linguistics, computer science) may be admitted, but are required to do a substantial part of the undergraduate SSP core in each of the other basic SSP fields. This must include the following three philosophy courses or their equivalents: 80; 151 (formerly 160A); and one from 181, 183, 184, 186. This work does not count towards the 45-unit requirement.

COURSE REQUIREMENTS

1. Four courses in philosophy at the graduate level (numbered 200 or above), including courses from three of the following five areas:
   a. Philosophy of language
   b. Logic
   c. Philosophy of mind
   d. Metaphysics and epistemology
1. Philosophy of science
   At most two of the four courses may be graduate sections of undergraduate courses numbered 100 or higher.
2. Three courses numbered 100 or higher from outside Philosophy, chosen in consultation with an adviser. These courses should be from two of the following four areas:
   a. Psychology
   b. Linguistics
   c. Computer Science
   d. Education
   Remaining courses are chosen in consultation with and approved by an adviser.

SPECIAL PROGRAM IN THE PHILOSOPHY OF LANGUAGE

Admission is limited to students with substantial preparation in philosophy or linguistics. Those whose primary preparation has been in linguistics may be required to satisfy all or part of the undergraduate core requirements as described in the “General Program” subsection above. Those whose preparation is primarily in philosophy may be required to take additional courses in linguistics.

COURSE REQUIREMENTS

1. Philosophy of language: two approved courses in the philosophy of language numbered 180 or higher.
2. Syntactic theory and generative grammar: 384 and LINGUIST 231.
3. Logic: at least two approved courses numbered 151 (formerly 160A) or higher.
4. An approved graduate-level course in mathematical linguistics or automata theory.

PHILOSOPHY

DOCTOR OF PHILOSOPHY IN PHILOSOPHY

Prospective graduate students should see http://gradadmissions.stanford.edu for information and application materials. Applicants should take the Graduate Record Examination by October of the year the application is submitted.

The University’s basic requirements for the Ph.D. degree including residence, dissertation, and examination are discussed in the “Graduate Degrees” section of this bulletin. The requirements detailed here are department requirements.

All courses used to satisfy all requirements must be passed with a letter grade of “B-” or better (no satisfactory/no credit).

At the end of each year, the department reviews the progress of each student to determine whether the student is making satisfactory progress, and on that basis to make decisions about probationary status and termination from the program where appropriate.

Any student in one of the Ph.D. programs may apply for the M.A. when all University and department requirements have been met.

PROFICIENCY REQUIREMENTS

1. Course requirements—To be completed during the first two years:
   a. four core graduate courses: philosophy of language (381); philosophy of mind, metaphysics, and epistemology (380); value theory (370); and philosophy of science (360)
   b. three of the four items listed below:
      1. three history courses, each consisting of an approved graduate-level course in the history of philosophy. Courses satisfying this seven-out-of-eight requirement must include at least one history course in ancient philosophy, one in modern.
      1. PHIL 151 (formerly 160A)
      c. PHIL 150 (formerly 159) or the equivalent
      d. A total of at least 49 units of course work in the Department of Philosophy numbered above 110, but not including Teaching Methods (PHIL 239) or affiliated courses. Units of Individual Directed Reading (PHIL 240) may be included only with the approval of the Director of Graduate Study.

2. Teaching Assistance—A minimum of five quarters of teaching assistance, usually during the second and third years. As part of the training for being a teaching assistant, Ph.D. students are required to take PHIL 239 during Spring Quarter of their first year and during Autumn Quarter of their second year.

3. Candidacy—To continue in the Ph.D. program, each student must be approved for candidacy during the sixth academic quarter, normally the Spring Quarter of the student’s second year. Students may be approved for candidacy on a conditional basis if they have only one or two outstanding deficiencies, but are not officially advanced to candidacy until these deficiencies have been removed. Approval for candidacy indicates that, in the department’s judgment, the student can complete the Ph.D. In reaching this judgment, the department considers the overall quality of the student’s work during the first six quarters and the student’s success in fulfilling course requirements.

4. During the third year of graduate study, and after advancement to candidacy, a Ph.D. student should complete at least three graduate-level courses/seminars, at least two of which must be in philosophy. Courses required for candidacy are not counted toward satisfaction of this requirement. Choice of courses/seminars outside philosophy is determined in consultation with a student’s adviser. Except in special circumstances, one, but no more than one, of these courses/seminars may be taken for reduced units, if that option is provided by the faculty teaching that course/seminar.

5. During the summer of their second year, students are required to attend a dissertation development seminar given by the department.

6. Dissertation work and defense: the third and fourth, and sometimes fifth, years are devoted to dissertation work. Students should make every effort to conform to the following deadlines:
   a. Dissertation Proposal—By Spring Quarter of the third year, students select a dissertation topic, a reading committee, and some possible thesis relative to that topic. The topic and thesis should be sketched in a proposal of three to five pages, plus a detailed, annotated bibliography indicating familiarity with the relevant literature. Individual faculty on the committee may impose further requirements on the proposal. The proposal should be approved by the reading committee before the meeting on graduate student progress late in Spring Quarter.
   b. Departmental Oral—During Autumn Quarter of the fourth year, students take an oral examination, called the “departmental oral,” based on at least 30 pages of written work, in addition to the proposal. The aim of the exam is to help the student arrive at an acceptable plan for the dissertation and to make sure that the student, thesis, topic, and adviser make a reasonable fit.
   c. Fourth-Year Colloquium—No later than Spring Quarter of the fourth year, students present a research paper in a seminar open to the entire department. This paper should be on an aspect of the student’s dissertation research.
   d. University Oral Exam—Ph.D. students must submit a completed draft of the dissertation to the reading committee at least one month before the student expects to defend the thesis in the University oral exam. If the student is given permission to go forward, the University orals take place approximately two weeks later. A portion of the exam consists of a student presentation based on the dissertation and is open to the public. A closed question period follows. If the draft is ready by Autumn Quarter of the fourth year, the student can request that the University oral count as the department oral.
SPECIAL GRADUATE PROGRAMS

The department recognizes that some students may need to spend a large amount of time preparing themselves in some other discipline related to their philosophical goals, or in advanced preparation in some area within philosophy. In such circumstances, the department may be willing to waive some of the Ph.D. requirements. Such an exemption is not automatic; a program must be worked out with an adviser and submitted to the department some time in the student’s first year. This proposal must be in writing and must include:

1. The areas to be exempted (see below).
2. A program of additional courses and seminars in the special area, usually at least 12 units.
3. A justification of the program that considers both intellectual coherence and the student’s goals.

The department believes there is plenty of room for normal specialization within the program as it stands, and that all students specialize to some extent. Thus, the intent is not to exempt courses on a one-to-one basis, but only to grant exemptions when a student plans an extensive and intensive study of some relevant area.

Special program students may be exempted from the following:

1. One additional item from the items listed above in Proficiency requirement 1(a) in the general Ph.D. program
2. PHIL 150 (formerly 159); but in this case, a student must take PHIL 50 (formerly 57)

If a student’s special program involves substantial course work outside of philosophy, the student may, with the approval of the adviser, petition the department to reduce requirement 1(d), the Philosophy unit requirement for the first two years. Normally this requirement is not reduced below 32 units.

INTERDEPARTMENTAL PROGRAMS
PH.D. IN PHILOSOPHY AND HUMANITIES

The program participates in the Graduate Program in Humanities leading to a Ph.D. degree in Philosophy and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities. Although the Graduate Program in Humanities is not currently accepting new students, it continues to provide advising for students already enrolled as well as courses, open to all students. The University remains committed to a broad-based graduate education in the humanities, the courses, colloquium, and symposium will continue to be offered, and a successor program is under discussion by the faculty of the Division of Literature, Cultures, and Languages. Courses for students already enrolled in the program are listed under the subject code HUMNTIES and may be viewed on the Stanford Bulletin’s Explore Courses web site.

GRADUATE PROGRAM IN COGNITIVE SCIENCE

Philosophy participates with the departments of Computer Science, Linguistics, and Psychology in an interdisciplinary program in Cognitive Science. It is intended to provide an interdisciplinary education, as well as a deeper concentration in philosophy, and is open to doctoral students. Students who complete the requirements within Philosophy and the Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Philosophy. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of philosophy. The list of approved courses can be obtained from the Cognitive Science program located in the Department of Psychology.

SPECIAL TRACK IN PHILOSOPHY AND SYMBOLIC SYSTEMS

Students interested in interdisciplinary work relating philosophy to artificial intelligence, cognitive science, computer science, linguistics, or logic may pursue a degree in this program.
One year of Greek is a requirement for admission to the program. If students have had a year of Latin, they are required to take 3 courses in second- or third-year Greek or Latin, at least one of which must be in Latin. If they have not had a year of Latin, they are then required to complete a year of Latin, and take two courses in second- or third-year Greek or Latin.

Students are also required to take at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Classics department and two of which must be in the Philosophy department.

**GRADUATE DEGREES IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY**

See the description in the “History and Philosophy of Science and Technology” section of this bulletin.

**PH.D. MINOR IN PHILOSOPHY**

To obtain a Ph.D. minor in Philosophy, students must follow these procedures:

1. Consult with the Director of Graduate Study to establish eligibility, and select a suitable adviser.

2. Give to the department academic assistant a signed copy of the program of study (designed with the adviser) which offers:
   a. 30 units of courses in the Department of Philosophy with a letter grade of ‘B-’ or better in each course. No more than 3 units of directed reading may be counted in the 30-unit requirement.
   b. At least one course or seminar numbered over 99 to be taken in each of these five areas:
      1. Logic
      2. Philosophy of science
      3. Ethics, value theory, and moral and political philosophy
      4. Metaphysics, epistemology, and philosophy of language
      5. History of philosophy
   c. Two additional courses numbered over 199 to be taken in one of those (b) five areas.

3. A faculty member from the Department of Philosophy (usually the student’s adviser) serves on the student’s doctoral oral examination committee and may request that up to one third of this examination be devoted to the minor subject.

4. Paperwork for the minor must be submitted to the department office before beginning the program.

**COGNATE COURSES**

The following courses have substantial philosophical content. However, in the absence of special permission these courses cannot generally be used to satisfy requirements for the Philosophy major or graduate degrees in Philosophy.

CLASSHS 101. The Greeks
CLASSHS 133. Classical Seminar: Origins of Political Thought
CLASSHS 137/237. Models of Democracy (Same as COMM 212/312, POLISCI 237/337)
CLASSHS 333. Classical Seminar: Origins of Political Thought
CLASSGRK 113. Advanced Greek: Thucydidès
CLASSGEN 22N. Technologies of Civilization: Writing, Number, and Money
CLASSGEN 94. Ethics of Pleasure
CLASSGEN 208B. Survey of Greek and Latin Literature: Classical Greek
CLASSGEN 237. Augustine on the Body (Same as COMPLIT 337)
ETHICSSOC 179M. Libertarianism, Egalitarianism, and Public Policy
GERGEN 246/346. Being at Home in the World: Kant’s Critique of the Power of Judgment
HPS 220. Nineteenth-Century Philosophy of Science
HUMNTIES 321. Classical Seminar: Origins of Political Thought

IPS 206A. Politics and Collective Action (same as POLISCI 331S, PUBLPOL 304A)

LAWGEN 206. Thinking Like a Lawyer (Same as GSBGEN 382)

MATH 161. Set Theory

POLISCI 132. Ethics of Political Animals
POLISCI 332R.S. Greek Political Economy I,II
POLISCI 436. Rational Choice

RELIGST 278/378. Heidegger: Confronting the Ultimate

SYMBSYS 206. Topics in the Philosophy of Neuroscience

**PHYSICS**

Chair: Patricia Burchat

Associate Professors: Tom Abel, Steven Allen, Sarah Church, David Goldberg-Gordon, Kathryn Moler

Assistant Professors: Stefan Funk, Chao-Lin Kuo, Hari Manoharan, Risa Wechsler

Professors (Research): John A. Lipa, Phillip H. Scherrer

Lecturer: Rick Pam

Consulting Professors: Ralph Devoe, Gerald Fisher, Barbara Jones, Greg Madejski, Alan Title

Visiting Professors: Francois LeDiberder

* Recalled to active duty.
** On leave

Department Offices: 382 Via Pueblo Mall

Mail Code: 94305-4060

Phone: (650) 723-4344

Web Site: http://stanford.edu/dept/physics

Courses offered by the Department of Physics are listed under the subject code PHYSICS on the Stanford Bulletin’s Explore-Courses web site.

The Russell H. Varian Laboratory of Physics, the Physics and Astrophysics Building, the W. W. Hansen Experimental Physics Laboratory (HEPL), the E. L. Ginzton Laboratory, and the Geballe Laboratory for Advanced Materials (GLAM) together house a range of physics activities from general courses through advanced research. Ginzton Lab houses research on optical systems, including quantum electronics, metrology, optical communication and development of advanced lasers. GLAM houses research on novel and nanopatterned materials, from high-temperature superconductors and magnets to organic semiconductors, subwavelength photon waveguides, and quantum dots. GLAM also supports the materials community on campus with a range of characterization tools: it is the site for the Stanford Nanocharacterization Lab (SNL) and the NSF-sponsored Center for Probing the Nanoscale (CPN). The SLAC National Accelerator Laboratory is just a few miles from the Varian Laboratory. SLAC is a national laboratory funded by the Office of Basic Energy Sciences and High Energy Physics of the Department of Energy. Scientists at SLAC conduct research in photon science, accelerator physics, particle physics, astrophysics and cosmology. The laboratory hosts a two-mile-long linear accelerator that can accelerate electrons and positrons. Until recently, the PEP-II asymmetric-energy electron-positron storage ring was used to study CP violation in the B meson system. The Stanford
Synchrotron Radiation Laboratory (SSRL) uses intense x-ray beams produced with another smaller storage ring on the SLAC site. Construction of the world’s first x-ray free electron laser, called the Linac Coherent Light Source (LCLS), was completed in 2009.

The Ginzton Laboratory, HEPL, GLAM, SLAC, and SSRL are listed in the “Academic Programs and Centers, Independent Research Laboratories, Centers, and Institutes” section of this bulletin. Students may also be interested in research and facilities at two other independent labs: the Center for Integrated Systems, focused on electronics and nanofabrication; and the Clark Center, an interdisciplinary biology, medicine, and bioengineering laboratory.

The Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), formed jointly with the SLAC National Accelerator Laboratory, provides a focus for theoretical, computational, observational, and instrumental research programs, including the Fermi Gamma-Ray Space Telescope (FGST, formerly known as GLAST), the Large Synoptic Survey Telescope (LSST), the Joint Dark Energy Mission (JDEM) and the Dark Energy Survey (DES). KIPAC members are also involved in several microwave background experiments, new x-ray telescopes, TeV gamma ray astronomy, the Cryogenic Dark Matter Search (CDMS) and the EXO-200 double beta decay experiments. Stanford is a member of the Hobby-Eberly Telescope Consortium, operating an innovative 9.2 meter-equivalent telescope at the McDonald Observatory in Texas. The CDMS (cryogenic dark matter search) experiment is operated in an underground laboratory on the Stanford campus and in the Soudan mine in Minnesota. Stanford is also the center of activities for the very large double-beta decay experiment that is about to start taking data at a deep underground site in New Mexico. The Experiment, called EXO-200, will measure the mass of the neutrino with a sensitivity close to 0.2 eV. Many research opportunities are available for students in the growing fields of particle astrophysics and cosmology.

The Stanford Institute for Theoretical Physics is devoted to the investigation of the basic structure of matter (string theory, M-theory, quantum cosmology, condensed matter physics).

The Physics Library, a center for the reading and study of physics and astronomy at all levels, includes print and electronic access to current subscriptions and back sets of important journals together with textbooks, dissertations, scholarly monographs, and the collected works of the most eminent physicists.

Course work is designed to provide students with a sound foundation in both classical and modern physics. Students who wish to specialize in astronomy, astrophysics, or space science should also consult the “Astronomy Course Program” section of this bulletin.

Three introductory series of courses include labs in which undergraduates carry out individual experiments. The Intermediate Physics Laboratories offer facilities for increasingly complex individual work, including the conception, design, and fabrication of laboratory equipment. Undergraduates are also encouraged to participate in research; most can do this through the honors program and/or the summer research program.

Graduate students find opportunities for research in the fields of astrophysics, particle astrophysics, cosmology, experimental particle physics, theoretical particle physics, intermediate energy physics, low energy physics, condensed matter physics, materials research, atomic physics, laser physics, quantum electronics, coherent optical radiation, novel imaging technologies, and biophysics. Faculty advisers are drawn from many departments, including Physics, Applied Physics, Materials Science and Engineering, Electrical Engineering, and Biology. Opportunities for research are also available with the faculty at SLAC in the areas of theoretical and experimental particle physics, particle astrophysics, cosmology, accelerator design, and photon science.

The number of graduate students admitted to the Department of Physics is strictly limited. Students should submit applications by Tuesday, December 15, 2009, for the following Autumn Quarter. Graduate students may normally enter the department only at the beginning of Autumn Quarter.

**PHYSICS COURSE CATALOG NUMBERING SYSTEM**

There are four series of beginning courses. One course from the teen series (15, 16, 17, 19) is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics. The 20 series (21, 22, 23, 24, 25, 26) is recommended for general students and for students preparing for medicine or biology. The 40 series (41, 43, 44, 45, 46) is for students of engineering, chemistry, earth sciences, mathematics, or physics. The advanced freshman series (61, 63, 64, 65, 67) is for students who have had strong preparation in physics and calculus in high school. Students who have had appropriate background and wish to major in physics should take this introductory series.

The 20, 40, and 60 series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments correlated with the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the 40 and 60 series.

Courses beyond 99 are numbered in accordance with a threedigit code. The first digit indicates the approximate level of the course:

100 undergraduate courses
300 more advanced courses
400 research, special, or current topics

The second digit indicates the general subject matter:
00 laboratory
10, 20, 30 general courses
50 elementary particle physics
60 astrophysics, cosmology, gravitation
70 condensed matter physics
80 optics and atomic physics
90 miscellaneous courses

**UNDERGRADUATE MISSION STATEMENT FOR PHYSICS**

The mission of the Physics Program is to provide students with a foundation in both classical and modern physics. Introductory physics courses include a laboratory component. Advanced laboratory courses develop experimental skills and include the design and execution of experiments. Students are also encouraged to participate in independent research projects. The program prepares students for careers in industry, government, teaching, engineering and medicine, as well as graduate programs in physics.

**UNDERGRADUATE PROGRAMS IN PHYSICS**

The study of physics is undertaken by three principal groups of undergraduates: those including physics as part of a general education; those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering; and those preparing for careers in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas. Physics courses numbered below 100 are intended to serve all three of these groups. The courses numbered above 100 meet the needs mainly of the third group, but also of some students majoring in other branches of science and in engineering.

**ENTRY-LEVEL SEQUENCES IN PHYSICS**

The Department of Physics offers three year-long, entry-level physics sequences, the PHYSICS 20, 40, and 60 series. The first of these is non-calculus-based, and is intended primarily for those who are majoring in biology. Such students with AP Physics credit, particularly those who are considering research careers, may
wish to consider taking the PHYSICS 20 or 40 series, rather than using AP placement. These introductory series provide a depth and emphasis on problem solving that is of significant value in biological research, which today involves considerable physics-based technology.

For those intending to major in engineering or the physical sciences, or simply wishing for a stronger background in physics, the department offers the PHYSICS 40 and 60 series. Either of these satisfies the entry-level physics requirements of any Stanford major. The 60 series is intended for those who have already taken a Physics course at the level of the 40 series, or at least have a strong background in mechanics, some background in electricity and magnetism, and a strong background in calculus. The PHYSICS 40 series begins with mechanics in Winter Quarter, electricity and magnetism in Spring Quarter, and light and heat in Autumn Quarter. While it is recommended that most students begin the sequence with mechanics (PHYSICS 41) in Winter Quarter, those who have had strong physics preparation in high school (such as a score of at least 4 on the Physics Advanced Placement C exam) may start the sequence with PHYSICS 45 in Autumn Quarter. Effective academic year 2009/2010, all courses for the major must be taken for a letter grade, and a grade of ‘C-’ or better must be received for all units applied toward the major.

BACHELOR OF SCIENCE IN PHYSICS

A calculus-based entry-level series is required, either PHYSICS 61, 63, 64, 65, 67, or 41, 43, 44, 45, 46 (or preferably 67 rather than 44). Students who take the PHYSICS 40 series take PHYSICS 70, which covers the foundations of modern physics. This material was incorporated into the PHYSICS 60 series beginning in 2005-06. Students taking the PHYSICS 60 series in 2005-06 or after do not take PHYSICS 70; instead, they must take one advanced Physics elective (100-level or higher). In addition, the following more advanced courses are required: PHYSICS 105, 107 (WIM), 108, 110, 120, 121, 130, 131, 170, and 171; PHYSICS 105, 51, 52, 53, 131; one additional Mathematics course numbered 101 or higher, or PHYSICS 112, MATH 51H, 52H, and 53H may substitute for PHYSICS 112, MATH 51H, 52H, and 53H may substitute for MATH 51, 52, and 53. It is strongly recommended that students intending to complete a Ph.D. in Physics also take PHYSICS 113, 134, and one or more of the following, depending upon their interests: PHYSICS 152A,B, 160, 161, 172, 204 and EE 268. PHYSICS 113 is designed to be taken in parallel with 110. The department advises the study of some computer science such as CS 106A/CS106X. Mathematics and Physics courses taken to satisfy the department’s major requirements cannot be taken on a credit/no credit basis. Prospective Physics majors are also advised to take PHYSICS 59, Current Research Topics, in their freshman or sophomore year. Effective academic year 2009-10, courses applied to the major must be taken for a letter grade, and a grade of ‘C-’ or better must be received for all units applied toward the major.

To help in deciding which introductory sequence is most suitable, students considering a major in Physics may contact the undergraduate program coordinator (elva@stanford.edu) to arrange an advising appointment. Although it is possible to complete the Physics major in three years, students who contemplate starting the major during sophomore year should make an advising appointment to map out their schedule. Students who have had previous college-level courses (including EPGY) should make an advising appointment for placement and possible transfer credit. For advanced placement advice, see http:// registrar.stanford.edu/students/academics/adv_place.htm. Undergraduates are offered help with physics problems in the Physics Tutoring Center, which is staffed Monday through Friday.

REQUIRED COURSES FOR MAJORS

For sample schedules illustrating how to complete the Physics major, see http://physics.stanford.edu/academics/undergrad.html.

INTRODUCTORY SEQUENCE

Students must complete either the 40 or 60 series as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Qtr.</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 41. Mechanics</td>
<td>W</td>
<td>4</td>
</tr>
<tr>
<td>PHYSICS 43. Electricity and Magnetism</td>
<td>S</td>
<td>4</td>
</tr>
<tr>
<td>PHYSICS 44. Electricity and Magnetism Lab</td>
<td>S</td>
<td>1</td>
</tr>
<tr>
<td>PHYSICS 45. Light and Heat</td>
<td>A</td>
<td>4</td>
</tr>
<tr>
<td>PHYSICS 46. Light and Heat Lab</td>
<td>A</td>
<td>1</td>
</tr>
<tr>
<td>PHYSICS 67. Introduction to Laboratory Physics (recommended for physics majors in place of 44)</td>
<td>S</td>
<td>2</td>
</tr>
<tr>
<td>PHYSICS 70. Foundations of Modern Physics</td>
<td>A</td>
<td>4</td>
</tr>
</tbody>
</table>

ADVANCED SEQUENCE

Students seeking further advice on a given concentration should contact the professor whose name appears next to the respective title of each section below.

A. APPLIED PHYSICS (HARI MANOHARAN)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

- Solid State: PHYSICS 172, Solid State Physics
- APPPHY 270. Magnetism and Long Range Order in Solids
- MATSCI 195. Waves and Diffraction in Solids
- Biophysics: APPPHY 192. Introductory Biophysics
- Lasers: EE 231. Introduction to Lasers
INDIVIDUALLY DESIGNED MAJOR PROGRAM IN TEACHING PHYSICAL SCIENCE

This major, a joint effort of the Department of Physics and the Stanford Teacher Education Program (STEP), is designed for students to prepare themselves as high school teachers of physics and general science. Students complete 45-47 units of Physics and related Mathematics courses, 40-43 units of course work in other sciences such as the life sciences, chemistry, and geosciences, and in general issues of science, and 9-15 units of concentration and depth courses. Total program units: 94-105. Students interested in this program should consult Professor Patricia Burchat (burchat@stanford.edu, 725-5771), and Professor Rachel Lotan, Director of the Stanford Teacher Education Program—Secondary in the School of Education (rlotan@stanford.edu).

CORE PHYSICS COURSES:

Mechanics:
- PHYSICS 41. Mechanics
  - or PHYSICS 61. Mechanics and Special Relativity
  
Heat:
- PHYSICS 45. Light and Heat
- PHYSICS 46. Light and Heat Lab
  
Electricity and Magnetism:
- PHYSICS 43. Electricity and Magnetism
- PHYSICS 67. Introduction to Laboratory Physics
  
Wave Motion:
- PHYSICS 107 Intermediate Physics Laboratory II:
  - Experimental Techniques and Data Analysis (WIM)
  - Modern Physics (for students who take 40 series):
  - PHYSICS 70. Foundations of Modern Physics
  
Applications:
- PHYSICS 59. Current Research Topics
- Mathematics (Physics departmental requirement):
  - MATH 51, 52, 53. Linear Algebra, Multivariable Calculus, and Ordinary Differential Equations
  - and a course in Statistics (choose one):
  - STATS 110. Statistical Methods in Engineering and the Physical Sciences
  - STATS 116. Theory of Probability
  - STATS 141. Biostatistics
  - STATS 166. Computational Biology
  - STATS 191. Introduction to Applied Statistics
  
Total: 46-48

ADDITIONAL SCIENCE BREADTH COURSES

Life Sciences:
- BIO 41. Genetics, Biochemistry, and Molecular Biology
- BIO 42. Cell Biology and Animal Physiology
- BIO 43. Plant Biology, Evolution and Ecology
  
Chemistry:
- CHEM 31A and B, or 31X. Chemical Principles
- CHEM 33. Structure and Reactivity

Geosciences:
- EARTHYS 10. Introduction to Earth Systems
- PHYSICS 15. The Nature of the Universe
  - or PHYSICS 16. Cosmic Horizon
  - or PHYSICS 17. Black Holes

General Issues of Science:
- STS 101. Science, Technology, and Contemporary Society
- EDUC 180. Directed Reading in History of Science

Notes to students taking this concentration:
1. No more than one of the courses should be taken for CR/NC.
2. Students should discuss the choice of courses with members of the Department of Physics and/or their major adviser.
3. Students may attend 330 after taking 130, 131 and 134. Prior study of special topics in quantum mechanics (232) may be helpful.
This individually designed major program in Physical Science includes all the elements of a Program of Subject Matter Preparation for Secondary Teachers of Physics and General Science that has been approved by the California Commission on Teacher Credentialing (CCTC). Students who complete the program are exempt from taking the CSET examination in Physics and General Science for admission to the Stanford Teacher Education Program (STEP) or any other accredited secondary teacher education program in California. Full details of the CCTC-approved program may be found at http://ed.stanford.edu/suse/programs-degrees/program-coterminal-step.html. Note: the Stanford individually designed major program in Physical Science requires course work beyond the CCTC-approved program, specifically 9-15 units of depth courses in a field of concentration: Physics, Astrophysics, Biology, Chemistry, Earth Sciences, Human Biology, or Computational Mathematics. See the adviser in the Physics department or the School of Education for more details.

HONORS PROGRAM

The department offers a program leading to the degree of Bachelor of Science in Physics with honors as follows:

1. Students must submit an Honors Program Proposal form to the undergraduate program coordinator once they find a physics project, either theoretical or experimental, in consultation with individual faculty members. Proposal forms are available from the Physics undergraduate office and must be submitted by November 1 of the academic year in which the student plans to graduate.

2. Credit for the project is assigned by the adviser within the framework of PHYSICS 205. The work done in the honors program may not be used as a substitute for regular required courses.

3. A written report and a presentation of the work at its completion are required for honors. By mid-May, the honors candidate is required to present the project at the department’s honors presentations. This event is publicized and open to the general public. The expectation is that the student’s adviser, second reader, and all other honors candidates attend.

4. The decision as to whether a given independent study project does or does not merit award of honors is made jointly by the student’s honors adviser and the second reader for the written thesis. This decision is based on the quality of the student’s honors work and other work in physics.

MINORS

A minor is offered in either Physics or Astronomy. Students who take the 20 or 40 series at Stanford in support of their major may count those units towards the minor. Those who have fulfilled Physics requirements at the 20 or 40 series level by enrollment at another accredited university, or through advanced placement credits, may count credits towards 21/22 and 23/24, or 41 and 43/44, respectively. 25/26, or 45/46 for a technical minor, must be taken at Stanford even if similar material has been covered elsewhere. With the 21/22/23/24 or 41/43/44 exception noted above, all courses for the minor must be taken at Stanford University for a letter grade, and a grade of ‘C’ or better must be received for all units applied toward the minor. The minor declaration deadline is three quarters before graduation, typically the beginning of Autumn Quarter if the student is graduating at the end of Spring Quarter.

MINOR IN PHYSICS

An undergraduate minor in Physics requires a minimum of 27 units with the following course work:

Non-Technical—For students whose majors do not require the PHYSICS 40 or 60 series:

<table>
<thead>
<tr>
<th>Subject and Catalog Number</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 21, 22, 23, 24, 25, and 26</td>
<td>12</td>
</tr>
<tr>
<td>Any combination of Physics courses totaling 15 units or greater</td>
<td>15</td>
</tr>
</tbody>
</table>

Total: 27

Technical—For students whose majors require the PHYSICS 40 or 60 series:

<table>
<thead>
<tr>
<th>Subject and Catalog Number</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 41, 43/44, 45/46 and PHYSICS 70</td>
<td>18</td>
</tr>
<tr>
<td>PHYSICS 61, 63/64, 65/67</td>
<td>15</td>
</tr>
<tr>
<td>at least three PHYSICS courses numbered 100 or above</td>
<td></td>
</tr>
</tbody>
</table>

Total: 27-30

MINOR IN ASTRONOMY

Students wishing to pursue advanced work in astrophysical sciences should major in physics and concentrate in astrophysics. However, students outside of physics with a general interest in astronomy may organize their studies by completing one of the following minor programs.

An undergraduate minor in astronomy requires the following courses:

Non-Technical—For students whose majors do not require the PHYSICS 40 series:

<table>
<thead>
<tr>
<th>Subject and Catalog Number</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 21, 23, 25/26</td>
<td>10</td>
</tr>
<tr>
<td>PHYSICS 50 or 100 (Observatory Lab)</td>
<td>3-4</td>
</tr>
<tr>
<td>Choose two courses from the following:</td>
<td></td>
</tr>
<tr>
<td>PHYSICS 15, 16, 17</td>
<td>6</td>
</tr>
</tbody>
</table>

Total: 19-20 (9-10 in addition to the 20 series)

Technical—For students whose majors require the PHYSICS 40 series:

<table>
<thead>
<tr>
<th>Subject and Catalog Number</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 41, 43, 45/46</td>
<td>13</td>
</tr>
<tr>
<td>PHYSICS 70</td>
<td>4</td>
</tr>
<tr>
<td>PHYSICS 100 (Observatory Lab)</td>
<td>4</td>
</tr>
<tr>
<td>Choose two courses from the following:</td>
<td></td>
</tr>
<tr>
<td>PHYSICS 160,* 161,* EE 106*</td>
<td>6</td>
</tr>
</tbody>
</table>

Total: 27 (14 in addition to the 40 series)

* With approval of the minor adviser and the chair of the Astronomy Course Program, 3 units of PHYSICS 169, Independent Study in Astrophysics, may be substituted for one course of astronomy (e.g., 160, 161, EE 106). This independent study can either be constituted as a directed reading program or participation in a research project. Students are also strongly encouraged to take the electricity and magnetism/optics lab of the appropriate Physics series (24, 44) for 1 additional unit.

GRADUATE PROGRAMS

FELLOWSHIPS AND ASSISTANTSHIPS

The Department of Physics makes an effort to support all its graduate students through fellowships, teaching assistantships, research assistantships, or a combination of sources. More detailed information is provided with the offer of admission.

TEACHING CREDENTIALS

For information on teaching credentials, consult the “School of Education” section of this bulletin or visit http://suse-step.stanford.edu. Also see the earlier section on the Individually Designed Major program in Teaching Physical Science.

MASTER OF SCIENCE

The department does not offer a coterminal degree program, or a separate program for the M.S. degree, but this degree may be awarded for a portion of the Ph.D. degree work.

University requirements for the master’s degree, discussed in the “Graduate Degrees” section of this bulletin, include completion of 45 units of unduplicated course work after the bachelor’s degree. Among the department requirements are a grade point average (GPA) of at least 3.0 (B) for courses 210 or 211, 212, 220,
221, 230, 231, or their equivalents. Up to 6 of these required units may be waived on petition if a thesis is submitted.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin. The minimum department requirements for the Ph.D. degree in Physics consist of completing all courses listed below, plus 290 and 294 and at least one quarter from each of two subject areas (among biophysics, condensed matter, quantum optics and atomic physics, astrophysics and gravitation, and nuclear and particle physics) chosen from courses with numbers above 232, except 290 and 294. The requirements in the following list may be fulfilled by passing the course at Stanford or passing an equivalent course elsewhere: 210 or 211, 212, 220, 221, 230, 231. A grade point average (GPA) of at least 3.0 (B) is required for courses taken toward the degree.

All Ph.D. candidates must have math proficiency equivalent to the following Stanford math courses: 106, 113, 114, 116, 131, 132. Prior to making an application for candidacy, each student is required to pass a comprehensive qualifying examination on undergraduate physics. This closed book exam is given in the month of January following the student’s arrival at Stanford. This is a written examination held over two days, covering particle mechanics, electricity and magnetism, quantum mechanics, statistical mechanics, thermodynamics, special relativity, and general physics. A thesis proposal must be submitted during the third year. In order to assess the direction and progress toward a thesis, an oral report and evaluation are required during the fourth year. After completion of the dissertation, each student must take the University oral examination (defense of dissertation).

Three quarters of teaching (including a demonstrated ability to teach) are a requirement for obtaining the Ph.D. in Physics.

Students interested in applied physics and biophysics research should also consult the “Astronomy Course Program” section of this bulletin. To obtain approval of their Physics course program from the Physics undergraduate administrator and declare on Axess. Forms are listed under the subject code POLISCI on the Stanford Bulletin’s ExploreCourses web site.

UNDERGRADUATE MISSION OF THE DEPARTMENT OF POLITICAL SCIENCE

The mission of the department of Political Science is to educate students in the major theories and empirical findings on how political systems work in practice, and in the major normative debates concerning how governments should ideally be constituted and what they should do. Students learn about U.S. and other political institutions and practices, and also study international politics and institutions. Courses in the major are designed to help students to a) build competence in the primary sub-fields of political science, including American and comparative politics, international relations, and political theory; b) develop in-depth knowledge in at least one sub-field; c) acquire a variety of research methodologies and tools; and d) develop students’ written and oral communication skills. Students in the program have excellent preparation for careers in government, business, and not-for-profit organizations, as well as for further study in graduate or professional schools.

BACHELOR OF ARTS IN POLITICAL SCIENCE

To receive a B.A. in Political Science, a student must:

1. Submit an application for the Political Science major to the undergraduate administrator and declare on Axess. Forms are available in Encina Hall West, Room 100, or at http://polisci.stanford.edu/bachelors. For additional information, come to the office or phone (650) 723-1608. Students must complete their major declaration no later than the end of Autumn Quarter in junior year.

2. Complete 70 units including:
   a. 45 Political Science course units in the primary and secondary concentration combined. Each major should declare a primary concentration in one subfield and take at least 30 units in this concentration, including the introductory course for that subfield. The secondary concentration must be completed with at least 15 units, including the introductory course for that subfield. Subfields include: International Relations (1, 110-119, 210-219, 310-319) American Politics (2, 120-129, 220-229, 320-329) Political Theory (3, 130-139, 230-239, 330-339) Comparative Politics (4, 140-149, 240-249, 340-349) Methodology (150-159, 350-359)
   c. 20 additional Political Science units and/or cognate course units including no more than 5 units of directed reading. 10 units of ECON 1A and/or ECON 1B may substitute for two 5-unit POLISCI courses.
   d. No more than two 5-unit Stanford Introductory Seminar courses can be applied toward the 70-unit major requirement.

3. Introductory Courses: each student must take two from the following Political Science courses, one of which must be in the primary concentration, the other in the secondary concen-
OSPEC 1A, 1B. Introductory Economics A, B
OSPEC 206B. Organizations (Same as PUBLPOL 204B)
OSPEC 15. Shifting Alliances? The European Union and the New European Union
OSPEC 126X. A People’s Union? Money, Markets, and Identity
OSPEC 115X. The German Economy: Past and Present
OSPEIBIJ 66. Essentials of China’s Criminal Justice System
OSPEFLO 78. An Extraordinary Experiment: Politics and Policies
OSPEBR 15. Shifting Alliances? The European Union and the U.S.
OSPEFLO 106V. Italy: From Agrarian to Post-Industrial Society
OSPEFLOR 78. An Extraordinary Experiment: Politics and Policies of the New European Union
OSPKYOTO 215X. The Political Economy of Japan
OSPSMOSC 72. Space, Politics, and Modernity in Russia
OSPSMOSC 74. Post-Soviet Eurasia and SCO: Society, Politics, Integration
OSPOXFDR 18. Making Public Policy: An Introduction to Political Philosophy, Politics, and Economics
OSPOXFDR 24. British and American Constitutional Systems in Comparative Perspective
OSPOXFDR 35. Modern UK and European Government and Politics
OSPPARIS 122X. Challenges of Integration in the European Union
OSPPARIS 211X. Political Attitudes and Behavior in Contemporary France
OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century
OSPSANTG 129X. Latin America in the International System
OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective
PUBPOL 102. Organizations and Public Policy
PUBPOL 183. Philanthropy and Social Innovation
REES 320. State and Nation Building in Central Asia

HONORS PROGRAM
The honors program offers qualified students an opportunity to conduct independent research, write a thesis summarizing their findings, and make a presentation of their work. During the process of research, analysis, thinking, drafting, rethinking, and redrafting, students work closely with a faculty adviser and their fellow students.

Applicants must have a minimum grade point average (GPA) of 3.5, and an adviser who is a member of the academic council. Students interested in pursuing honors should apply in Axess by the beginning of Spring Quarter of their junior year. Applications can be obtained from the department office and will be due by the first Friday of Spring Quarter to the undergraduate administrator in Encina Hall West, room 100.

Students pursuing honors must complete the following by the end of Spring Quarter of their junior year: Methods requirement (POLISCI 150A,B,C, 151A, 151B, STATS 60, or ECON 102A), WIM requirement, and a completed research paper from an advanced undergraduate seminar or directed reading. Students are required to enroll in one quarter of POLISCI 299Q, Junior Research Seminar, in spring quarter of their junior year. This C/NC course is designed to help students map out a concrete time line for their thesis work.

Students who are accepted into the program should plan to make the thesis the focus of their senior year. They should enroll in 10-15 units of POLISCI 299A,B,C, which covers research and writing directed by the student’s adviser.

To complete the honors program, students must:
1. Complete all requirements for the major.
2. Enroll in POLISCI 299Q during spring quarter of the student’s junior year.
3. Enroll in at least 10 units of POLISCI 299A, B, or C, senior project. Students must take at least two quarters of Senior Project units.
4. Complete a thesis of honors quality, for a grade of ‘B+’ or better.

Students cannot apply units from the POLISCI 299Q, Junior Research Seminar, toward the 70-unit requirement for the major. However, students can apply up to 10 units from POLISCI 299A,B,C Senior Project, toward the 70-unit requirement.

PRIZES
There are several annual prizes for undergraduate students: the Arnaud B. Leavelle Memorial Prize for the best paper in the History of Political Thought sequence (POLISCI 130A,B,C), a cash prize for the best thesis written in political theory, the Lindsay Peters, Jr., Memorial Prize for the outstanding student each year in POLISCI 2, and Cottrell Prizes for outstanding students in POLISCI 1, 3, and 4.

MINOR IN POLITICAL SCIENCE
Students must complete their declaration of the minor on Axess no later than the end of the junior year.

To receive a minor in Political Science, a student must complete a minimum of 30 unduplicated units. All units must be in courses listed or cross-listed in the Department of Political Science.
Science. A student may petition for a maximum of 5 units of directed reading which must be supervised by a faculty member in the department.

All units are for a letter grade. A minimum grade point average (GPA) of 2.0 (C) is required for courses to count towards minor requirements.

Concentration—The student selects a subfield in which three courses are taken. One of these courses is the introductory course, the other two are at a more advanced level (numbered above 100). The concentration corresponds to one of the subfields the department already has in place, namely, American politics, international relations, political theory, and comparative politics.

Distribution—Three courses must be in the area of concentration, as specified above, for 15 units. An additional 10 units of intermediate and advanced courses (100 level or above) must be in two additional subfields. The final 5 units may be in any related subfield.

Transfer Work—A maximum of 10 units of work completed outside Stanford may be given Political Science credit toward the minor for transfer students. A maximum of 5 units of work completed in Stanford Summer Session or outside of Stanford for non-transfer students may be given Political Science credit toward the minor. All such cases must be individually reviewed and approved by the Director of Undergraduate Studies.

GRADUATE PROGRAMS IN POLITICAL SCIENCE

Admission—Prospective graduate students should see http://gradadmissions.stanford.edu for application materials. Applicants are required to submit a recent sample of their writing (not to exceed 35 pages) and to take the General Test of the Graduate Record Examination (GRE). Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). The TOEFL requirements are waived for applicants who have recently completed two or more years of study at a university that does not offer English as a foreign language.

The department does not offer a coterminal bachelor’s and master’s degree. Doctoral candidates may pursue master’s degrees from other departments. Recent examples include but are not restricted to master’s degrees in Statistics and Economics. Students interested in this option should consult the relevant sections of this bulletin for both University and department requirements for master’s degrees.

DOCTOR OF PHILOSOPHY IN POLITICAL SCIENCE

The University’s basic requirements for the Ph.D. degree are discussed in the “Graduate Degrees” section of this bulletin. Programs of study leading to the Ph.D. degree are designed by the student, in consultation with advisers and the Director of Graduate Studies, to serve his or her particular interests as well as to achieve the general department requirements. A student is recommended to the University Committee on Graduate Studies to receive the Ph.D. degree in Political Science when the following program of study has been completed:

1. The candidate for the Ph.D. degree must offer three of the following concentrations in political science: American politics, comparative politics, international relations, political institutions, and political theory. Upon petition, a special field (for example, public law, or urban politics) may be offered as a third concentration. Students concentrate on two of these areas by fulfilling, depending on the concentration, combinations of the following: written qualifying examinations, research papers, research design, or course work.

2. The Ph.D. candidate is required to demonstrate competence in a language and/or skill that is likely to be relevant to the dissertation research. The level of competence needed for successful completion of the research is determined by the student’s adviser. All candidates must complete at least 10 units of statistical methods or its equivalent. Previous instruction can be counted towards this requirement only if approved by the Director of Graduate Studies.

3. Every Ph.D. candidate must complete at least five units of graduate-level instruction in political theory.

4. By the start of the fourth quarter in residence, each first-year graduate student submits to the student’s adviser a statement of purpose. This statement indicates the student’s proposed major concentrations of study, the courses taken and those planned to be taken to cover those fields, the student’s plan for meeting language and/or skill requirements, plans for scheduling of comprehensive examinations and/or research papers, and, where possible, dissertation ideas or plans. This statement is discussed with, and must be approved by, the student’s adviser. In the Autumn Quarter following completion of their first year, students are reviewed at a regular meeting of the department faculty. The main purposes of this procedure are, in order of importance: to advise and assist the student to realize his or her educational goals; to provide an incentive for clarifying goals and for identifying ways to achieve them; and to facilitate assessment of progress toward the degree.

5. Students must take the comprehensive exams in two major fields by the end of their second year in the program. Students are expected to have passed these examinations and to have faculty approval of their research paper by the end of their second year.
6. Upon completion of one research paper and two comprehensive exams in his or her two major concentrations, the student files an Application for Admission to Candidacy for the Ph.D. which details program plans and records. The University and the department expect that students will be advanced to candidacy by the completion of their sixth quarter as a full-time student. Each second-year student is reviewed and considered for admission to candidacy in a meeting of the faculty that is typically held during the tenth week of Spring Quarter. Since completion of two comprehensive exams and a research paper are prerequisites for admission to candidacy, students should plan their first- and second-year studies so that these requirements are satisfied by the time of the faculty review meeting. In particular, students should submit their research paper to the relevant faculty readers no later than the middle of Winter Quarter, since revisions of the paper are often required prior to obtaining faculty approval.

7. During the third year, a formal dissertation proposal must be submitted to and approved by the student’s dissertation adviser and the Director of Graduate Studies. Dissertation proposals must be approved by the end of the third year.

8. A candidate for the Ph.D. in Political Science is required to serve as a teaching assistant (TA) for a minimum of three quarters.

9. Doctoral candidates who apply for the M.A. degree are awarded that degree on completion of the requirements outlined in the description of the M.A. program.

10. The candidate must pass the University oral examination on the area of the dissertation at a time, after the passing of the written comprehensive examinations, suggested by the candidate’s dissertation committee.

11. The candidate must complete a dissertation satisfactory to the dissertation reading committee.

**PH.D. MINOR IN POLITICAL SCIENCE**

Candidates in other departments which accept a minor in Political Science select two concentrations in political science in consultation with the Director of Graduate Studies and submit to her or him a program of study for approval. Written approval for the program must be obtained from the Director of Graduate Studies before application for doctoral candidacy. Students are required to complete at least 20 units in Political Science courses. Courses must be 300 level and above. Grades must be a GPA of 3.0 (B) or better. Candidates may be examined in their concentrations in the general oral examination by a member of the Department of Political Science, chosen in consultation with the Director of Graduate Studies.

**OVERSEAS STUDIES COURSES IN POLITICAL SCIENCE**

For course descriptions and additional offerings, see the listings in the Stanford Bulletin’s ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies website (http://bosp.stanford.edu). Students should consult their department or program’s student services office for applicability of Overseas Studies courses to a major or minor program.

**AUTUMN QUARTER**

**BEIJING**

**BERLIN**
OSPBER 115X. German Economy: Past and Present. 4-5 units, Ingo Klein, GER:DB:SocSci, EC:GlobalCom

**FLORENCE**
OSPFLOR 106V. Italy: From an Agrarian to a Post-industrial Society. 5 units, Giuseppe Mammarella, GER:DB:SocSci, EC:GlobalCom

**MOSCOW**
OSPMOSC 72. Space, Politics and Modernity in Russia. 5 units, Sergei Medvedev, GER:DB:SocSci, EC:GlobalCom

**OXFORD**
OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective. 4-5 units, Robert McMahon, GER:DB:SocSci

**PARIS**
OSPPARIS 211X. Political Attitudes and Behavior in Contemporary France. 4-5 units, Anne Muxel, Sylvie Strudel, GER:DB:SocSci, EC:GlobalCom

**SANTIAGO**
OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective. 5 units, Sergio Mico, GER:DB:SocSci

**WINTER QUARTER**

**BERLIN**

**FLORENCE**

**OXFORD**
OSPOXFRD 18. Making Public Policy: an Introduction to Political Philosophy, Politics and Economics. 4-5 units, Robert McMahon, GER:DB:SocSci

**SANTIAGO**
OSPSANTG 129X. Latin America in the International System. 4-5 units, Claudio Fuentes, GER:DB:SocSci

**SPRING QUARTER**

**KYOTO**
OSPKYOTO 215X. Political Economy of Japan. 4-5 units, Toshihiko Hayashi, GER:DB:SocSci

**OXFORD**
OSPOXFRD 35. Modern UK and European Government and Politics. 4-5 units, Giovanni Cappocia, GER:DB:SocSci

**PARIS**
OSPPARIS 122X. Challenges of Integration in the European Union. 4-5 units, Sylvie Strudel, GER:DB:SocSci

**SANTIAGO**
OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century. 5 units, Germán Correa, GER:DB:SocSci
**PSYCHOLOGY**

**Chair:** James L. McClelland

**Professors:** Albert Bandura, Laura L. Carstensen, Herbert H. Clark, Carol Dweck, Ian H. Gotlib, James J. Gross, Leonard M. Horowitz, John D. Krumholtz, Mark R. Lepper, Ellen M. Markman, Hazel R. Markus, James L. McClelland, Dale Miller, Lee D. Ross, Ewart A. C. Thomas, Brian Wandell, Jeffrey J. Wine

**Associate Professors:** Jennifer L. Eberhardt, Anne Fernald, Kalanit Grill-Spector, Brian Knutson, Benoit Monin, Jeanne L. Tsai, Anthony Wagner

**Assistant Professors:** Lera Boroditsky, Samuel M. McClure, Michael Ramscar, Gregory M. Walton

**Associate Professor (Teaching):** Catherine Heaney

**Lecturers:** Joseph Brown, Amie Haas, Bridgette Martin-Hard, Adrienne Lomangino, Tectea Thomas Tormala

**Courtesy Professors:** William C. Dement, Gary H. Glover, Jon Krosnick, Tanya Luhrmann, William T. Newsome, Anne C. Petersen, Richard J. Shavelson

**Director, Bing Nursery School:** Jennifer Winters

**Department Offices:** Jordan Hall, Building 420
**Mail Code:** 91430
**Department Phone:** (650) 725-2400
**Web Site:** http://psychology.stanford.edu

Courses offered by the Department of Psychology are listed under the subject code PSYCH on the Stanford Bulletin’s ExploreCourses web site.

The department, housed in Jordan Hall, maintains shop facilities and many computer-equipped laboratories. Bing Nursery School, located on campus at 850 Escondido Road, provides a laboratory for child observation, training in nursery school teaching, and research. It was constructed with funding from the National Science Foundation and a special grant from Mrs. Anna Bing Arnold and Dr. Peter Bing.

The department provides (1) courses designed for the general student, (2) a major program leading to the degree of Bachelor of Arts, including options for honors and a specialization in one of four content area tracks, (3) a minor program, (4) a coterminal master’s degree program leading to the degree of Master of Arts, and (5) programs of graduate study and research leading to the degree of Doctor of Philosophy. Applications are not accepted for the master’s degree except as noted below.

**MISSION STATEMENT**

The mission of the Psychology Program is to introduce students to the corpus of data on, and explanations of, human nature and behavior. Through the study of abnormal behavior, aging, child development, cognitive processes, decision making, emotion, group behavior, infancy, language, learning and memory, personality, social perception, visual perception, and other related topics, students are introduced to the properties of sensory, cognitive, and affective systems, and of their interrelationships; to the reciprocal effects of one person on another; and to the effects on behavior of the physical, social, and cultural environment. The major provides students with preparation for professional careers in business, medicine or counseling as well as for graduate work in psychology.

**BACHELOR OF ARTS IN PSYCHOLOGY**

**Major Requirements**—Students declaring a major in Psychology must complete a minimum of 70 units of course work in Psychology, 60 of which must be taken in the Psychology department. The remaining 10 units can be taken outside of the Psychology department but must be pre-approved by the student services office or faculty adviser. These courses should represent a coherent thematic focus. One way to achieve this focus is through a field of study. Courses taken to satisfy the 70-unit requirement must be taken for a grade of ‘C-‘ or better (except for courses offered only on a satisfactory/no credit basis). Majors must take PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods. Advanced placement (AP) credit may no longer be used toward the Psychology major requirements. Beyond these two required courses, students must complete at least five of the following eleven core Psychology courses, with a minimum of two from each area A and B:

**Area A Courses:**
- BIO 20. Introduction to Brain and Behavior
- PSYCH 30. Introduction to Perception
- PSYCH 45. Introduction to Learning and Memory
- PSYCH 50. Introduction to Cognitive Neuroscience
- PSYCH 55. Introduction to Cognition and the Brain

**Area B Courses:**
- PSYCH 60. Introduction to Developmental Psychology
- PSYCH 70. Introduction to Social Psychology
- PSYCH 75. Introduction to Cultural Psychology
- PSYCH 80. Introduction to Personality Psychology
- PSYCH 90. Introduction to Clinical Psychology
- PSYCH 95. Introduction to Abnormal Psychology

Students who declared a major in Psychology prior to the 2005-06 academic year may choose to adhere to the 55-unit major requirement, taking PSYCH 1 and 10, five core courses, and elective courses, totaling 55 units.

Students must take one Writing in the Major (WIM) course in Psychology, and should check the Stanford Bulletin yearly as these courses may change. The department also strongly recommends that all majors take at least one advanced seminar.

Students may count up to 10 units of research, independent study, and practica (including but not limited to PSYCH 194, 195, 281) toward the Psychology major. Students who are teaching assistants for a Psychology course or are enrolled in the senior honors program are allowed up to 15 units in independent study and research. Any units beyond the limit of 10 or 15 may be counted toward the 180 units required for graduation.

Students who are double majoring or completing a minor degree in another department may not overlap (double-count) courses, unless the overlapping courses constitute introductory skill requirements, such as PSYCH 10, Introduction to Statistical Methods. In this instance, while the course requirement would be satisfied, the units for the course can only be applied to one program of study, not both. Consult the student services office for further clarification.

Summer Quarter Psychology courses are not equivalent to courses given during the regular academic year and, while applicable toward the 70 units needed for the major, may not be used to fulfill the statistics requirement or a core course requirement. Additionally, a course taken during the Summer Quarter cannot be used to replace the grade of a non-Summer Quarter course, even if the title and units of the two courses are the same.

**Beyond the Minimal Requirements**—The following recommendations may be helpful to students who wish to plan a program which goes beyond the minimal requirements listed above:

1. **Within the general major,** the student may take advanced undergraduate or graduate courses, including seminars. The student may also take advantage of widespread opportunities for directed research, working closely with individual faculty and graduate students.
2. **The student may apply to the senior honors program, described below.**
3. **The student may elect to pursue one of four fields of study:** Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience, described below.

The training obtained from the pursuit of any of these options is valuable not only for students considering graduate work in psychology, but also for those thinking of professional careers outside of psychology in fields such as business, counseling, education, law, or medicine.
CREDIT FROM OUTSIDE THE DEPARTMENT

Psychology majors must complete at least 60 units of course work toward their major at Stanford within the Psychology department. Psychology minors may count no more than a total of 10 units credit from outside the department toward the minor. Both majors and minors, under extenuating circumstances, may use one course from outside the department to fulfill core course requirements. Additional courses may be used to fulfill the 70-unit major requirement, but may not be counted as core courses. Please see the student services office for further clarification.

Petition for transfer of credit is rarely granted. In cases where petitioning is necessary, there are two types of credit from outside the department: external transfer credit for courses taken at institutions other than Stanford and credit for courses in other Stanford departments. A student must have already declared Psychology as a major or minor in order to submit a petition for transfer credit. Stanford credit for courses completed at other institutions must have been granted by the External Credit Evaluation section of the Registrar’s Office; those units may be applied toward the 180 units required for graduation. To have credit from outside the department evaluated to fulfill requirements toward the Psychology major or minor, students must complete an Undergraduate Petition form, available from the student services office, and submit it with a course syllabus. Students requesting external transfer credit must also submit a copy of the signed transcript from the External Credit Evaluation section of the Registrar’s Office showing the number of Stanford units granted for the course. The Psychology department then evaluates external credit courses and courses from other Stanford departments to determine if they can be applied toward Psychology major or minor requirements.

FIELDS OF STUDY

Students in the major program, including those in the senior honors program, may elect to specialize in one of four fields of study: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience. Fields of study consist of a coherent set of courses leading to advanced undergraduate or even graduate-level courses in an area. In the ideal case, the student who specializes would acquire an understanding of a range of psychological processes, as well as an appreciation of the significance of these processes in the chosen area of application. In this way, specialization could facilitate the student’s preparation for a professional career in, for example, medicine, business, or counseling, as well as for graduate work in Psychology.

Specialization in a field of study is optional, although students who do not wish to complete all the requirements for a track may still want to use the track as a guideline for an integrated program in Psychology. Students who choose to complete a field of study must meet the requirements for the major plus the additional requirements designated for the field of study. Typically the courses required for a field of study include one or two required courses, four to six recommended courses in Psychology, one or two advanced seminars, and three or four courses in related disciplines. Psychology courses completed for the field of study count toward satisfying the major requirements. Courses from other departments listed for the field of study may count toward the 10 outside units for the major requirement, but must be pre-approved by the student services office or faculty adviser.

HONORS PROGRAM

The senior honors program is designed for exceptionally able Psychology majors who wish to pursue a year of intensive supervised independent research. Admission to the program is made at the end of the student’s junior year on the basis of (1) excellent academic performance, (2) previous research experience, and (3) two letters of recommendations by faculty and/or graduate students. Applications are available late Spring Quarter and are to be turned in to the student services office with a current transcript and recommendations prior to the student’s senior year.

Students interested in the program should involve themselves in research as early as possible and should acquire a broad general background in Psychology, including statistics, and a deep background in their chosen area. The honors program is particularly appropriate for students planning to go to graduate school in Psychology or in other social sciences, as well as in computer science, business, law, and medicine.

During Autumn Quarter of their senior year, honors program students participate in a weekly seminar and meet with their advisors to develop their experimental program and begin data collection. Winter and Spring quarters are devoted to completing the research, analyzing the data, and writing the thesis, which is submitted mid-May. Students give oral presentations of their projects at the annual Honors Convention. This convention is attended by undergraduates, graduate students, and faculty.

MINOR IN PSYCHOLOGY

Declaration—Students who wish to declare a minor field of concentration in Psychology must do so no later than the last day of the application for graduation.

Requirements—Completion of a minimum of 36 units in Psychology is required for the minor, including PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable statistics course. Advanced placement (AP) credit may no longer be used toward the Psychology minor. The minor must include three of eleven core courses, with a minimum of one from each of two areas (A: BIO 20; PSYCH 30, 45, 50, 55; and B: 60, 70, 75, 80, 90, 95) and elective Psychology courses of at least three units each, totaling 35 units. Students who declared a Psychology minor prior to the 2002-03 academic year may choose any three of the eleven core courses. Students who declared a Psychology minor prior to the 2005-06 academic year may choose to complete seven total courses: PSYCH 1 and 10, three core courses, and two elective courses. Independent study, research, and practica cannot be counted toward the minor. Summer Quarter Psychology courses are not applicable toward the 35 units needed for the minor. All courses used to fulfill the requirements of the minor must be passed with a grade of “C-” or better, except for courses offered only on a satisfactory/no credit basis. No more than 10 units of transfer credit may be counted toward the Psychology minor.

MASTER OF ARTS IN PSYCHOLOGY

The Department of Psychology offers a Master of Arts degree only to students concurrently enrolled in its Ph.D. program or to students currently pursuing Stanford B.A. or M.A. degrees. In exceptional cases, students concurrently enrolled in another doctoral or professional program at Stanford may also apply for the M.A. degree. Such applicants should consult with the student services office.

All applicants must satisfy University residency requirements for the degree and are responsible for consulting with their primary departments or the Financial Aid Office about the effects of the proposed program on their current funding. General University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

Stanford undergraduates who would like advanced training in Psychology may apply for a coterminal M.A. degree in Psychology. To do so, students should consult with the student services office. Along with a coterminal program application, applicants must submit (1) a statement of purpose, (2) a preliminary program plan specifying the courses in which they intend to enroll to fulfill degree requirements, (3) at least two letters of recommendation from Stanford faculty members familiar with their academic work, (4) a current Stanford undergraduate transcript, and (5) a written nomination by a member of the Psychology faculty willing to serve as the student’s master’s degree adviser. This program is limited in size and admission is selective. Applicants must have earned a minimum of 120 units towards graduation as shown on the undergraduate transcript. The department’s deadline for the submission of an application to the coterminal program is traditionally in January.
For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

Students must complete at least 45 units of Psychology courses for the degree. (For coterminal degree students, course work for the master’s degree may not duplicate courses taken for the undergraduate degree.) Of these 45 units, at least 27 must be in Psychology courses numbered 200 or above. Units from research, teaching, practica, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may not be counted toward these 27 units. Two of the graduate courses of at least 3 units each (one from Area A and one from Area B below) are required. In addition, at least one upper division statistics course is required. The course must be approved by the student’s adviser. It is recommended that all coterminal students enroll in PSYCH 196, Contemporary Psychology.

Courses to be counted toward the master’s degree must be passed with a grade of “B-” or better, unless the course is offered only on a satisfactory/no credit basis. Units from research, teaching, practica, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may be counted toward the remaining required 18 units. Psychology courses numbered in the 100-level and courses from other Stanford departments may be used to satisfy the remaining 18 units. Courses specifically for undergraduates, such as undergraduate honors courses, and courses offered in the Summer Quarter may not be counted toward the master’s program unit requirements. Demonstration of competence in the design and execution of psychological research is also required for receipt of the master’s degree. This demonstration entails completion of a master’s thesis containing original research. If the student is currently doing a senior honors thesis, this honors thesis may be accepted as proof of research competence provided the honors thesis is judged to be master’s level research by the student’s adviser and the department’s Committee on Graduate Studies. If the student has completed an honors thesis in Psychology in the prior year, the student would be expected to continue independent research during the coterminal year and to submit this research in a written report which, together with the completed honors thesis, would constitute the master’s thesis. All students are required to make an oral presentation of their research during the Spring Quarter, and to present their thesis or written report in June. Applicants to the coterminal program must have an adviser in the department who agrees to supervise the student’s research. Students in the program may be terminated if they do not have an adviser, or if they are not making satisfactory progress in research or course work.

Area A Courses:
PSYCH 202. Cognitive Neuroscience
PSYCH 205. Foundations of Cognition
PSYCH 210. Memory and Learning
PSYCH 221. Applied Vision and Image Systems
PSYCH 228. Ion Transport
PSYCH 251. Affective Neuroscience
PSYCH 261. Emotion
PSYCH 261A. Learning and Cognition in Activity

Area B Courses:
PSYCH 211. Developmental Psychology
PSYCH 212. Social Psychology
PSYCH 213. Personality and Psychopathology
PSYCH 215. Mind, Culture, and Society
PSYCH 217. Topics and Methods in Cultural Psychology
PSYCH 259. Emotions: History, Theories, Research
PSYCH 271. Applications of Social Psychology

DOCTOR OF PHILOSOPHY IN PSYCHOLOGY

There are no specific course requirements for admission to the doctoral program. However, an applicant should have research experience as an undergraduate, as well as the equivalent of an undergraduate major in Psychology. The major focus of the doctoral program is on research training, and admission is highly selective.

Applicants for admission must submit their scores on the general Graduate Record Examination as part of the application. GRE subject scores are recommended.

General University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

In addition to fulfilling Stanford University requirements for the degree, the following departmental requirements are stipulated.

First-Year Course Requirements—During the first year of graduate study, the student must take PSYCH 207, Proseminar for First-Year Ph.D. Graduate Students, at least one approved graduate statistics course, and at least two core courses from the list following:

PSYCH 202. Neuroscience
PSYCH 205. Foundations of Cognition
PSYCH 211. Developmental Psychology
PSYCH 212. Social Psychology
or PSYCH 215. Mind, Culture, and Society
PSYCH 213. Personality

Students in each area may be required to take up to two additional non-core graduate courses in their area of specialization.

The student is expected to spend at least half of the time in research from the beginning of the first year of graduate study to the completion of the Ph.D., taking no more than 10 units of course work each quarter. At the end of the first year of graduate study, the student must file with the department a written report of the first-year research activities. The deadline for filing this report is the first Monday of June.

Second Year Course Requirements—By the end of the second year of graduate study, the student must complete the core courses listed above and take a second approved graduate course in statistics.

Third-Year and Beyond—Students are expected to form a research committee, which must include the dissertation reading committee, before the initiation of the dissertation research. The research committee includes the dissertation adviser and consists of at least three faculty members, at least two of whom should be in the Psychology department. For University guidelines for the composition of the dissertation reading committee, see the “Graduate Degrees” section of this bulletin.

The research committee must meet no later than the last day of classes of Spring Quarter of the third year, and determines the timeline for further development of the dissertation research project. Subsequent meetings are triggered by the completion of one of two documents: a dissertation proposal (DP) or a conceptual analysis of the dissertation area (CADA). The timing and sequencing of the DP and CADA are developed by the student in consultation with the committee. As a general guide, one of the two preliminary elements (CADA or DP) should be completed by the end of the third Summer Quarter and the second should be completed by the end of the fourth Spring Quarter. Students are free to alter the membership of the committee at any time during the process, subject to consultation with the adviser.

The DP should be a description of the proposed research. The CADA provides a framework for the research topic of the dissertation. The student and the committee agree on the central topics within the specialty area, and reviews the pertinent literature.

Advanced Course or Minor Requirements—The candidate must complete 12 units of advanced graduate course work or a Ph.D. minor in another department. If a student waives the minor requirement in favor of the 12 advanced units, the student must fulfill the advanced course requirement by taking (a) non-core graduate courses required by a particular area, or (b) graduate-level courses in other departments comparable in quality to Psychology’s graduate courses. If there is any question about comparability, the student should consult the adviser, student services, and, in some cases, the graduate education committee chair before taking the course.

Orals—The candidate must pass the University oral examination, which also serves as a dissertation defense. A committee is
formed to review the oral examination, including the dissertation reading committee, an additional faculty member, and one oral examination committee chair from outside the Psychology department. The oral examination consists of a 40-45-minute presentation to the department of the completed dissertation research. Parents and friends are welcome to attend. Following the presentation, the student and the committee convene for a discussion of the dissertation and the presentation.

Dissertation Requirements—The candidate must complete a dissertation satisfactory to the dissertation reading committee prior to the oral examination. Minor revisions to formatting may be made after the oral examination.

Ph.D. candidacy expires five years after admission to candidacy at the end of the second year of study. Reapplication requires department reexamination.

STUDENT EVALUATIONS

First-Year Evaluation—It is the department’s policy to evaluate the progress of each graduate student at the end of the first year of graduate study. As part of the procedure, each student is required to file with the department a report of the first-year research activities.

Students should discuss this report and the evaluation procedures with their adviser as early as possible in their first year. The report is due on the first Monday of June. If the student fulfills the academic promise displayed upon entrance, he or she is invited to continue working towards the doctorate.

The first-year evaluation is primarily based on three factors:
1. quality of research carried out in the first year
2. performance in courses (especially required courses)
3. recommendations of the adviser (including a commitment on the part of that adviser to continue in that role)

Second-Year and Beyond Evaluation—A similar evaluation is conducted at the end of each year of graduate training involving the same criteria as the first year; however, the student is not required to submit a paper. Students who are not making satisfactory progress may be dropped from the program.

THE DOCTORAL TRAINING PROGRAM

As indicated by the requirements described above, a student concentrates in any one of several areas within psychology. Regardless of area, however, the training program places emphasis on the development of research competence, and students are encouraged to develop those skills and attitudes that are appropriate to a career of continuing research productivity.

Two kinds of experience are necessary for this purpose. One is the learning of substantial amounts of technical information. A number of courses and seminars are provided to assist in this learning, and a student is expected to work out a program, with his or her adviser, to attain this knowledge in the most stimulating and economical fashion.

A second aspect of training is one that cannot be gained from the courses or seminars. This is firsthand knowledge of, and practical experience with, the methods of psychological investigation and study. These methods include ways of behaving with the subjects being studied. Students are provided with whatever opportunities they need to reach those levels of competence representative of doctoral standing. Continuing research programs, sponsored by members of the faculty, offer direct opportunities for experience in fields represented by the faculty’s many research interests.

Each student achieves competence in unique ways and at different rates. Each student and adviser share in planning a program leading to the objectives discussed. The student is expected to spend half of his or her time on research and takes no more than 10 units of course work per quarter. For further information please contact the student services office and the department graduate guide.

TEACHING REQUIREMENT

The department views experience in supervised teaching as an integral part of its graduate program. Regardless of the source of financial support, all students serve as teaching assistants for at least five Psychology courses during their graduate study. Of the courses, two must be PSYCH 1, Introduction to Psychology, or PSYCH 10, 252 or 253, Statistical Methods. Students are encouraged from participating in teaching during the first year of graduate study. Students typically progress from closely supervised teaching to more independent work. Some students may be invited to offer a supervised, but essentially independent, seminar during their final year of graduate study.

COGNITIVE SCIENCE PROGRAM

Psychology participates, along with the departments of Computer Science, Linguistics, and Philosophy, and the School of Education, in an interdisciplinary program of cognitive science. The program is intended to provide students with an interdisciplinary education as well as a deeper concentration in psychology. Doctoral students in Psychology are eligible to participate in the cognitive science program. Students who complete the requirements receive a special designation in cognitive science along with the Ph.D. in Psychology. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside psychology. For information or course approval, contact the student services office.

PSYCHOLOGY COLLOQUIUM

The Psychology Colloquium meets on most Wednesday afternoons at 3:45 p.m. Speakers from Stanford and other institutions present topics of current interest. Graduate students are expected to attend. Additional announcements may be found at http://www.stanford.edu/dept/psychology/colloquium.

PH.D. MINOR IN PSYCHOLOGY

Candidates for the Ph.D. degree in other departments may elect a minor in Psychology. To obtain a minor, the student must complete 20 units of course work at the graduate level in the Department of Psychology, excluding PSYCH 275 (graduate-level research). Crosslisted graduate courses can be used to satisfy this requirement. All courses counting toward the Ph.D. minor must be passed with a grade of ‘B-‘ or better (unless the course is offered only on a credit/no credit basis).

PUBLIC POLICY

Director: Bruce M. Owen (Stanford Institute for Economic Policy Research)
Deputy Director: Gregory L. Rosston (Stanford Institute for Economic Policy Research)
Associate Director and Senior Lecturer: Geoffrey Rothwell (Economics, Public Policy)
Acting Assistant Professor and Director of Undergraduate Capstone: Mary Sprague (Public Policy)
Director of Graduate Practicum and Lecturer: Joe Nation (Public Policy)

Executive Committee: Laurence Baker (Medicine), Jonathan Bendor (Graduate School of Business), David Brady (Political Science, Hoover Institution), Samuel Chiu (Management Science and Engineering), Morris Fiorina (Political Science), Judith Goldstein (Freeman Spogli Institute for International Studies, Political Science), Larry Gould (Economics), David Grusky (Sociology), Stephen Haber (Political Science, Hoover Institution), Eric A. Hanushek (Hoover Institution), Deborah Hensler (Law), Daniel Kessler (Law), Sunil Kumar (Graduate School of Business), Roger Noll (Stanford Institute for Economic Policy Research, emeritus), Leonard Ortolano (Civil and Environmental Engineering), Bruce Owen (Stanford Institute for Economic Policy Research), Sean Reardon (Education), Lee Ross (Psychology), Gregory Rosston (Stanford Institute for Economic Policy Research), Debra Satz (Philosophy), John B. Shoven (Stanford Institute for Economic Policy Research, Eco-
nomatics, Hoover Institution), Stephen Stedman (Freeman Spogli Institute for International Studies)

**Affiliated Faculty:** Jayanta Bhattacharya (Medicine), Coit Blacker (Freeman Spogli Institute for International Studies), Paul Brest (Law, emeritus), Jeremy Bulow (Graduate School of Business), Eamonn Callan (Education), Martin Carnoy (Education), John Cogan (Hoover Institution), Joshua Cohen (Political Science), Christophe Crombez (Freeman Spogli Institute for International Studies), Paul David (Economics, emeritus), Larry Diamond (Freeman Spogli Institute for International Studies, Hoover), Lynn Eden (Freeman Spogli Institute for International Studies), Walter Falcon (Freeman Spogli Institute for International Studies, emeritus), Lawrence Friedman (Law), Lawrence Goulder (Economics, Freeman Spogli Institute for International Studies), Thomas C. Heller (Law, Freeman Spogli Institute for International Studies), Pamela Hinds (Management Science and Engineering), Daniel Ho (Law), Nicholas Hope (Stanford Center for International Development), Carolin Hoxby (Economics), Peter Klenow (Economics), Stephen Krausser (Freeman Spogli Institute for International Studies), Jon A. Krosnick (Communications, Political Science), Claire Lim (Graduate School of Business), Thomas MacCurdy (Economics), Robert McGinn (Management Science and Engineering), Milbrey McLaughlin (Education), Terry Moe (Political Science), Norman Nie (Political Science), James Phillips (Graduate School of Business), A. Mitchell Polinsky (Law, Stanford Institute for Economic Policy Research), Robert Reich (Political Science), Samuel So (Medicine), Peter Stone (Political Science), Jeff Strnad (Law), Barton Thompson (Law), Michael Tomz (Political Science), David Victor (Law), Greg Walton (Psychology), Jonathan Wand (Political Science), Barry Weingast (Political Science), Jeremy Weinstein (Political Science), Frank Wolak (Economics)

**Lecturers:** Laura Arrigalla (Graduate School of Business), Frank Benest (Public Policy), Ward Hanson (Stanford Institute for Economic Policy Research), Tammy Frisby (Hoover Institution), Gopi Sivapathy (Stanford Institute for Economic Policy Research), Jonathan D. Greenberg (Law), Russell Hancock (Public Policy), Adrienne Jamieson (Graduate School of Business), Damon Jones (Stanford Institute for Economic Policy Research), Anjini Kochar (Stanford Institute for Economic Policy Research), Eva Meyerson Milgrom (Stanford Institute for Economic Policy Research), Mark Tendall (Economics), Teceta Thomas Tormala (Psychology), Scott Wallsten (Bing Stanford in Washington), Patrick Windham (Public Policy)

**Program Office:** Encina Hall West, Rooms 203 and 204

**Mail Code:** 94305-6050

**Program Phone:** (650) 725-0109

**Web Site:** http://publicpolicy.stanford.edu

Courses offered by the Public Policy Program are listed under the subject code PUBLPOL on the Stanford Bulletin’s Explore Courses web site.

**UNDERGRADUATE PROGRAMS IN PUBLIC POLICY**

The undergraduate Public Policy curriculum is intended to expose students to the basic concepts and tools used in evaluating public policy options and outcomes, and to prepare students for entry-level positions in organizations concerned with such analyses. Although the concepts and tools are of wider applicability, the institutional context is chiefly American. Economics and quantitative analyses are central to but not sufficient for modern public policy analysis; political science, law, philosophy, organizational behavior, and cognitive psychology are among other necessary disciplinary perspectives. Political philosophy and ethics form the foundations of public policy. Political science offers insights to the decision making process and information needs of a democracy. Organizational behavior focuses on the decisions made outside the market environment in hierarchies, bureaucracies, and teams. Nearly all public policy is formulated as law, and economic analysis of legal rules and institutions is key to effective implementation of policy decisions.

The Public Policy Program offers a Bachelor of Arts, an honors program, and a minor for undergraduates, as well as a coterminal M.A. in Public Policy.

**BACHELOR OF ARTS IN PUBLIC POLICY**

The core courses in the Public Policy Program develop the skills necessary to assess the performance of alternative approaches to policy implementation, evaluate the effectiveness of policies, understand the political constraints faced by policy makers, and appreciate the conflicts in fundamental human values that often animate the policy debate. After completing the core, students apply these skills by focusing their studies in one of several areas of concentration. The areas of concentration address specific fields of public policy, types of institutions, or a deeper development of the tools of policy analysis. Students design their own concentrations with the help of their faculty advisers and the approval of the program director. Students must submit a list of their proposed concentration course work and a brief written defense of its coherence in advance of taking concentration courses. Areas of concentration are not declared on Axess. They do not appear on the transcript or diploma.

Recent areas of concentration include, but are not limited to:

- Advanced Methods of Policy Analysis
- Design of Public Institutions
- Development and Growth Policies
- Education Environment, Resources, and Population
- Health Care
- International Policies
- Law and the Legal System
- Social Policy: Discrimination, Crime, Poverty

Completion of the program in Public Policy requires 87 units of course work.

1. **Preparatory courses (44 units)**—POLISCI 2, ECON 1A, 1B, 50, 51, 102A, 102B, MATH 51; MS&E 180 or PSYCH 13B. The U.S. Government and politics requirement can be fulfilled by taking POLISCI 2, passing a diagnostic exam offered by the Public Policy program, or by receiving a score of at least 4 on the Advanced Placement exam in U.S. government and politics (which appears on your Stanford transcript). ECON 50 and 51 must be taken for a letter grade. A maximum of 10 units of the other prerequisite courses may be taken as credit/no credit.

2. **Core courses**—A 25-unit sequence of 5-unit PUBLPOL courses (101, 102, 103A, B, C, or D, 104, and 106), which students should plan to complete by the end of junior year. All core courses must be completed for a letter grade.

3. **Concentration**—Majors must complete at least 15 units of course work in a concentration. The post-core course work must be approved by a faculty adviser and the director. Concentration course work must be completed for a letter grade.

4. **Seniors are required to participate in one quarter (at least 3 units) of the Senior Seminar (PUBPOL 200A, B, or C). Majors also must submit at least one research paper during the senior year and present it during the Senior Seminar. The senior paper may be a term paper or report for either the senior seminar or another course, or an honors thesis. PUBPOL 200B (Winter Quarter) is organized as a practicum in which small student teams analyze real world policy problems faced by Bay Area agencies and produce a report for use by the client. The senior seminar must be completed for a letter grade.
