August 24, 1966

Professor Edward A. Feigenbaum
Acting Director
Computation Center
Stanford University
Stanford, California

Dear Professor Feigenbaum:

We are hoping very much to receive your Symposium manuscript in September. Each Symposium volume contains a table of contents for all of the volumes. Your paper has been included in the first Probability volume which is at the binders as well as in the second Probability volume and the Statistics volume which are at the page proof stage. Although this could be changed, both Professor Neyman and Professor Scott would be very disappointed if your paper could not appear in the Biology volume.

Thanking you in anticipation,

Yours sincerely,

Virginia Thompson
Assistant Editor
Symposium Proceedings
