Dear Esther:

Ed Feigenbaum is expecting to meet with you at 3:45 on Friday, February 24 in his office in Margaret Jacks Hall.

The single most pervasive problem at Stanford is, of course, finding a place to park. I am enclosing a map on which I have indicated the location of the most likely parking spot as well as that of Margaret Jacks Hall. The parking lot is a pay lot which requires the use of three quarters.

I am also enclosing an overview of the work in progress in the Heuristic Programming Project (HPP) which was published in the *AI Magazine*.

Sincerely,

Ellie Engelmore
